Summary of Table of Contents

1 Explanatory Notes **235**

1.1 Cautionary Notes . . . 235
1.2 Demscore Background . . . 235
1.3 The Demscore Codebook . . . 235
1.4 Methodology . . . 236
1.5 Download ID . . . 236

2 QOG **237**

2.1 QoG EQI Regional Level 2021 (with all NUTS2 regions) . . . 245
2.2 QoG European Quality of Government Index CATI - Country Level (2021) . . . 247
2.2.1 Identification Variables . . . 247
2.2.2 Country Level Variables . . . 248
2.3 QoG European Quality of Government Index Individual Level (2010 2013) . . . 251
2.3.1 Identification Variables . . . 251
2.3.2 Survey Questions . . . 253
2.3.3 Demographic Variables . . . 257
2.3.4 Weights . . . 260
2.4 QoG European Quality of Government Index Individual Level (2017) . . . 260
2.4.1 Identification Variables . . . 261
2.4.2 Demographic Variables . . . 261
2.4.3 Survey Questions . . . 263
2.4.4 Weights . . . 269
2.5 QoG European Quality of Government Index Individual Level (2021) . . . 270
2.5.1 Identification Variables . . . 271
2.5.2 Demographic Variables . . . 273
2.5.3 Survey Questions . . . 274
2.5.4 Weights . . . 279
2.6 QoG European Quality of Government Index Regional Level (2010, 2013, 2017 2021) 280
2.6.1 Identification Variables . . . 281
2.6.2 Regional Level Variables . . . 282
2.7 QoG EU Regional Dataset Long Data . . . 283
2.7.1 Identification . . . 284
2.7.2 Quality of Government . . . 285
2.7.3 Demographics . . . 287
2.7.4 Education . . . 292
2.7.5 Environment . . . 298
2.7.6 Health . . . 299
2.7.7 Science and Technology . . . 305
2.7.8 Poverty and Social Exclusion . . . 318
2.7.9 Digital Society and Economy . . . 319
2.7.10 Labour Market Statistics . . . 324

2.2.2.20 In the last 12 months, have you or anyone in your family been asked by a public official to give an informal gift or bribe in health or medical services? (ed_ask) . . . 250
2.2.2.21 In the last 12 months, have you or anyone in your family been asked by a public official to give an informal gift or bribe in health or medical services? (hel_ask) . . . 250
2.2.2.22 In the last 12 months, have you or anyone in your family been asked by a public official to give an informal gift or bribe in police authorities? (law_ask) . . . 250
2.2.2.23 In the last 12 months, have you or anyone in your family been asked by a public official to give an informal gift or bribe in any other government-run agency? (other_ask) . . . 250
2.2.2.24 Asked by a public official to give an informal gift or bribe at any public agency in the last 12 months (ask_any) . . . 251
2.2.2.25 In the area where I live, elections are conducted freely and fairly. (elec_not_free) . . . 251
2.2.2.26 On a 1 to 10 scale, with '1' being 'no confidence at all', and '10' being 'complete confidence' to do the right thing, how much confidence do you personally have in (COUNTRY's) parliament? (parl_conf) . . . 251
2.3 QoG European Quality of Government Index Individual Level (2010 2013) . . . 251
2.3.1 Identification Variables . . . 251
2.3.1.1 Respondent ID (2013) (id) . . . 251
2.3.1.2 Respondent ID (2010 & 2013) (resp_id) . . . 252
2.3.1.3 Year (year) . . . 252
2.3.1.4 Country of respondents (country) . . . 252
2.3.1.5 NUTS abbreviation Code (nuts) . . . 252
2.3.1.6 Name of NUTS Region (nuts_name) . . . 252
2.3.1.7 Numeric NUTS code found in the QoG Regional data (nuts_c) . . . 252
2.3.1.8 Language of interview (language) . . . 253
2.3.1.9 Type of interview (typetel) . . . 253

2.3.2 Survey Questions . . . 253
2.3.2.1 q1 - Have you or any of your immediate family been enrolled or employed in the public school system in your area in the past 12 months? (q1) . . . 253
2.3.2.2 q2 - In the past 12 months have you used public health care services in your area? (q2) . . . 253
2.3.2.3 q3 - Have you had any recent contact (positive or negative) with the security or police forces in your area in the past 12 months? (q3) . . . 253
2.3.2.4 q4 - How would you rate the quality of public education in your area? (q4) . . . 254
2.3.2.5 q5 - How would you rate the quality of the public health care system in your area? (q5) . . . 254
2.3.2.6 q6 - How would you rate the quality of the police force in your area? (q6) . . . 254
2.3.2.7 q7 - Certain people are given special advantages in the public education system in my area. (q7) . . . 254
2.3.2.8 q8 - Certain people are given special advantages in the public health care system in my area. (q8) . . . 254
2.3.2.9 q9 - The police force gives special advantages to certain people in my area. (q9) . . . 254
2.3.2.10 q10 - All citizens are treated equally in the public education system in my area. (q10) . . . 254
2.3.2.11 q11 - All citizens are treated equally in the public health care system in my area. (q11) . . . 254
2.3.2.12 q12 - All citizens are treated equally by the police force in my area. (q12) . . . 255
2.3.2.13 q13 - Corruption is prevalent in my area's local public school system. (q13) . . . 255
2.3.2.14 q14 - Corruption is prevalent in the public health care system in my area. (q14) . . . 255
2.3.2.15 q15 - Corruption is prevalent in the police force in my area. (q15) . . . 255
2.3.2.16 q16_1 - In the past 12 months have you or anyone living in your household paid a bribe in any form to education services? (q16_1) . . . 255
2.3.2.17 q16_2 - In the past 12 months have you or anyone living in your household paid a bribe in any form to health or medical services? (q16_2) . . . 255
2.3.2.18 q16_3 - In the past 12 months have you or anyone living in your household paid a bribe in any form to police? (q16_3) . . . 255
2.3.2.19 q16_4 - In the past 12 months have you or anyone living in your household paid a bribe in any form to any other government-run agency? (q16_4) . . . 255
2.3.2.20 q17 - In your opinion, how often do you think other citizens in your area use bribery to obtain public services? (q17) . . . 256
2.3.2.21 q18 - Please respond to the following: Corruption is NOT present in elections in my area. (q18) . . . 256
2.3.2.22 q19 - I trust the information provided by the local mass media in reporting on matters of politics and public services in my area. (q19) 256
2.3.2.23 q20 - Generally speaking, would you say that most people can be trusted or that you can't be too careful in dealing with people in your area? [2013 ONLY] (q20) . . . 256

2.3.2.24 q21a - Which statement comes closer to your own views? "In business most people can succeed if they are willing to work hard" (1) or “Hard work is no guarantee of success in business for most people, it’s more a matter of luck and connections” (10). [2013 ONLY] (q21a) 256
2.3.2.25 q21b - Which statement comes closer to your own views? "In the public sector most people can succeed if they are willing to work hard" (1) or “Hard work is no guarantee of success in the public sector for most people– it’s more a matter of luck and connections” (10). [2013 ONLY] (q21b) 256
2.3.2.26 q22 - How would you judge the current state of the economy in (YOUR COUN- TRY)? (q22) 256
2.3.2.27 q23 - In politics, people sometimes talk of "left" and "right". Where would you place yourself on a scale from 1 to 7, where ’1’ means the extreme left and ’7’ means the extreme right? [2013 ONLY] (q23) . . 257
2.3.2.28 q24 - What political party would you vote for if the national parliamentary election were today? [2013 ONLY] (q24) 257
2.3.2.29 q25 – Now imagine that your preferred party was involved in a corruption scandal where party leaders had given high level jobs to their unqualified friends and family, which of the following would be most likely? [2013 ONLY] (q25) 257
2.3.2.30 q26 - Is your first language (mother tongue) the same as the official language in your region? (q26) 257
2.3.2.31 service_exp (service_exp) 257
2.3.3 Demographic Variables 257
2.3.3.1 d1 - Gender of respondent (d1) 257
2.3.3.2 d2 - Education of respondent (d2) 257
2.3.3.3 d3 - Age of respondent (d3) 258
2.3.3.4 rd3 - Age of respondent (recoded categories) (rd3) 258
2.3.3.5 d4 - Household income (d4) 258
2.3.3.6 rd4 - recoded d4 in local currency (rd4) 258
2.3.3.7 recoded4 – categorical re-code of rd4 income, country specific (recoded4) 258
2.3.3.8 d5 - Occupation by sector (d5) 258
2.3.3.9 d5bis - Occupation (d5bis) 258
2.3.3.10 d6 - Population (d6) 259
2.3.3.11 gender (gender) 259
2.3.3.12 edu3 (edu3) 259
2.3.3.13 age4 (age4) 259
2.3.3.14 income3 (income3) 259
2.3.3.15 population (population) 260
2.3.3.16 unemployed (unemployed) 260
2.3.4 Weights 260
2.3.4.1 dweight (dweight) 260
2.3.4.2 psweight (psweight) 260
2.3.4.3 pweight (pweight) 260
2.4 QoG European Quality of Government Index Individual Level (2017) 260
2.4.1 Identification Variables 261
2.4.1.1 Respondent ID (idfinal) 261
2.4.1.2 Type of Telephone Interview (typetel) 261
2.4.1.3 Country (country) 261
2.4.1.4 Language (language) 261
2.4.1.5 NUTS 2 (d7_nuts2) 261

2.5.2.7 Occupation (IF d5a=1) (d5b) . . . 273
2.5.2.8 Were you born in (COUNTRY) (d6) . . . 274
2.5.2.9 Population (d7) . . . 274
2.5.3 Survey Questions . . . 274
2.5.3.1 Have you or any of your immediate family been enrolled or employed in the public school system in your area in the past 12 months? (q1) 274
2.5.3.2 Have you or any of your immediate family used public health care services in your area in the past 12 months? (q2) . . . 274
2.5.3.3 Have you or anyone in your immediate family had any recent contact (positive or negative) with the security or police forces in your area in the past 12 months? (q3) . . . 274
2.5.3.4 How would you rate the quality of public education in your area? (q4) 275

2.5.3.5 How would you rate the quality of the public health care system in your area? (q5) . . . 275
2.5.3.6 How would you rate the quality of the police force in your area? (q6) 275
2.5.3.7 Certain people are given special advantages in the public education system in my area. (q7) . . . 275
2.5.3.8 Certain people are given special advantages in the public health care system in my area. (q8) . . . 275
2.5.3.9 The police force gives special advantages to certain people in my area. (q9) . . . 275
2.5.3.10 All citizens are treated equally in the public education system in my area. (q10) . . . 275
2.5.3.11 All citizens are treated equally in the public health care system in my area. (q11) . . . 275
2.5.3.12 All citizens are treated equally by the police force in my area. (q12) 275
2.5.3.13 In the area where I live, elections are conducted freely and fairly. (q13) 276
2.5.3.14 Corruption is prevalent in my area's local public school system. (q14) 276
2.5.3.15 Corruption is prevalent in the public health care system in my area. (q15) . . . 276
2.5.3.16 Corruption is prevalent in the police force in my area. (q16) . . . 276
2.5.3.17 People in my area must use some form of corruption to just to get some basic public services. (q17_1) . . . 276
2.5.3.18 Corruption in my area is used to get access to special unfair privileges and wealth. (q17_2) . . . 276
2.5.3.19 In the last 12 months, have you or anyone in your family been asked by a public official to give an informal gift or bribe in schools and other education services? (q18_1) . . . 276
2.5.3.20 In the last 12 months, have you or anyone in your family been asked by a public official to give an informal gift or bribe in health or medical services? (q18_2) . . . 276
2.5.3.21 In the last 12 months, have you or anyone in your family been asked by a public official to give an informal gift or bribe in police authorities? (q18_3) . . . 277
2.5.3.22 In the last 12 months, have you or anyone in your family been asked by a public official to give an informal gift or bribe in any other government-run agency? (q18_4) . . . 277
2.5.3.23 In the last 12 months, have you or anyone in your family given an informal gift or bribe to schools or other education services? (q19_1) 277
2.5.3.24 In the last 12 months, have you or anyone in your family given an informal gift or bribe to health or medical services? (q19_2) . . . 277
2.5.3.25 In the last 12 months, have you or anyone in your family given an informal gift or bribe to police? (q19_3) . . . 277
2.5.3.26 In the last 12 months, have you or anyone in your family given an informal gift or bribe to any other government-run agency? (q19_4) . 277
2.5.3.27 Changing topics a bit, how would you judge the current state of the economy in the area where you live? (q20) . . . 277
2.5.3.28 What political party would you vote for if the national parliamentary election were today? (q21) . . . 278
2.5.3.29 On a 1 to 10 scale, with '1' being 'no confidence at all', and '10' being 'complete confidence' to do the right thing, how much confidence do you personally have in (COUNTRY's) parliament? (q22_1) . . . 278
2.5.3.30 On a 1 to 10 scale, with '1' being 'no confidence at all', and '10' being 'complete confidence' to do the right thing, how much confidence do you personally have in other people in your area? (q22_2) . . . 278

2.5.3.31 People might feel different levels of attachment to where they live and to Europe, on a scale of 1-10 with '1' being 'not at all' and '10' being 'very attached', how closely attached do you feel about (COUNTRY)? (q23_1) . . . 278
2.5.3.32 People might feel different levels of attachment to where they live and to Europe, on a scale of 1-10 with '1' being 'not at all' and '10' being 'very attached', how closely attached do you feel about your region in (COUNTRY)? (q23_2) . . . 278
2.5.3.33 People might feel different levels of attachment to where they live and to Europe, on a scale of 1-10 with '1' being 'not at all' and '10' being 'very attached', how closely attached do you feel about Europe? (q23_3) . . . 278
2.5.3.34 The government in (COUNTRY) should reduce differences in peoples' incomes by taxing wealthier people and then providing welfare to the poor. (q25) . . . 278
2.5.3.35 Governments should control prices and wages. (q26) . . . 278
2.5.3.36 On whole, (COUNTRY) is worse-off by people coming to live here from other countries. (q27) . . . 279
2.5.3.37 Gays and lesbians should be allowed to marry legally. (q28) . . . 279
2.5.3.38 We'd be better off if we went back to living according to (COUNTRY's) traditional values. (q30) . . . 279
2.5.3.39 Personally, how worried are you about the effect of the COVID-19 virus on your own or your family's health? (q31_1) . . . 279
2.5.3.40 Personally, how worried are you about the effect of the COVID-19 virus on your own or your family's economic situation? (q31_2) . . . 279
2.5.3.41 How would you rate how the authorities are handling the COVID-19 virus in your area? (q32) . . . 279
2.5.3.42 Length of survey (length) . . . 279
2.5.4 Weights . . . 279
2.5.4.1 The design weight (dweight) . . . 280
2.5.4.2 The population weight (country) (pweight) . . . 280
2.5.4.3 The post-stratification weight by survey admin (age, gender, education) (psweight_a) . . . 280
2.5.4.4 The post-stratification weight overall(age, gender, education) (psweight_o) . . . 280
2.5.4.5 Partisanship weight (party_w) . . . 280
2.5.4.6 Partisanship weight, truncated (party_w_truc) . . . 280

2.7.3 Demographics 287
2.7.3.1 Reported number of cases of burglary of private premises (eu_cri_bur) 287
2.7.3.2 Reported number of cases of intentional homicide (eu_cri_inthom) . 287
2.7.3.3 Reported number of cases of robbery (eu_cri_rob) 287
2.7.3.4 Proportion of live births outside marriage (eu_agemoth) 288

2.7.3.5 Total fertility rate (eu_agemoth1) 288
2.7.3.6 Mean age of women at childbirth (eu_nmarpct) 288
2.7.3.7 Mean age of women at birth of first child (eu_totferrt) 288
2.7.3.8 Number of deaths of females, all ages (eu_death_totalf) 288
2.7.3.9 Number of deaths of males, all ages (eu_death_totalm) 288
2.7.3.10 Number of deaths, total all ages (eu_death_totalt) 288
2.7.3.11 Number of deaths of females, at 1 year old (eu_death_y1f) 288
2.7.3.12 Number of deaths of males, at 1 year old (eu_death_y1m) 288
2.7.3.13 Number of deaths, total at 1 year old (eu_death_y1t) 289
2.7.3.14 Number of deaths of females, at 20 years old (eu_death_y20f) . . . 289
2.7.3.15 Number of deaths of males, at 20 years old (eu_death_y20m) 289
2.7.3.16 Number of deaths, total at 20 years old (eu_death_y20t) 289
2.7.3.17 Number of deaths of females, at 50 years old (eu_death_y50f) . . . 289
2.7.3.18 Number of deaths of males, at 50 years old (eu_death_y50m) 289
2.7.3.19 Number of deaths, total at 50 years old (eu_death_y50t) 289
2.7.3.20 Number of deaths of females, at 70 years old (eu_death_y70f) . . . 289
2.7.3.21 Number of deaths of males, at 70 years old (eu_death_y70m) 289
2.7.3.22 Number of deaths, total at 70 years old (eu_death_y70t) 290
2.7.3.23 Population at 1st January, Female (eu_d2jan_f) 290
2.7.3.24 Population at 1st January, Male (eu_d2jan_m) 290
2.7.3.25 Population at 1st January, Total (eu_d2jan_t) 290
2.7.3.26 Area of a region, land area total, sq km (eu_d3area_lat) 290
2.7.3.27 Area of a region, total, sq km (eu_d3area_t) 291
2.7.3.28 Population density, average population per square km (eu_per_km2) 291
2.7.3.29 Fertility rate, total (eu_frate_total) 291
2.7.3.30 Fertility rate, at age 15 (eu_frate_y15) 291
2.7.3.31 Fertility rate, at age 30 (eu_frate_y30) 291
2.7.3.32 Fertility rate, at age 35 (eu_frate_y35) 291
2.7.3.33 Life expectancy in years at 1 year old, female (eu_mlifexp_f) 291
2.7.3.34 Life expectancy in years at 1 year old, male (eu_mlifexp_m) 291
2.7.3.35 Life expectancy in years at 1 year old, total (eu_mlifexp_t) 292
2.7.3.36 Crude rate of net migration plus statistical adjustment (eu_cnmigratrt) 292
2.7.3.37 Crude rate of total population change (eu_growrt) 292
2.7.3.38 Crude rate of natural change of population (eu_natgrowrt) 292
2.7.4 Education 292
2.7.4.1 Educational attainment for ages 25 to 64, primary education, Female (eu_edatt_ed02_y2564f) 292
2.7.4.2 Educational attainment for ages 25 to 64, primary education, Male (eu_edatt_ed02_y2564m) 292
2.7.4.3 Educational attainment for ages 25 to 64, primary education, Total (eu_edatt_ed02_y2564t) 292
2.7.4.4 Educational attainment for ages 25 to 64, secondary education, Female (eu_edatt_ed34_y2564f) 293
2.7.4.5 Educational attainment for ages 25 to 64, secondary education, Male (eu_edatt_ed34_y2564m) 293
2.7.4.6 Educational attainment for ages 25 to 64, secondary education, Total (eu_edatt_ed34_y2564t) 293
2.7.4.7 Educational attainment for ages 25 to 64, tertiary education, Female (eu_edatt_ed58_y2564f) 293

2.7.4.8 Educational attainment for ages 25 to 64, tertiary education, Male (eu_edatt_ed58_y2564m) . . . 293
2.7.4.9 Educational attainment for ages 25 to 64, tertiary education, Total (eu_edatt_ed58_y2564t) . . . 293
2.7.4.10 Educational attainment for ages 30 to 34, primary education, Female (eu_edatt_ed02_y3034f) . . . 293
2.7.4.11 Educational attainment for ages 30 to 34, primary education, Male (eu_edatt_ed02_y3034m) . . . 294
2.7.4.12 Educational attainment for ages 30 to 34, primary education, Total (eu_edatt_ed02_y3034t) . . . 294
2.7.4.13 Educational attainment for ages 30 to 34, secondary education, Female (eu_edatt_ed34_y3034f) . . . 294

2.7.10.50 Unemployment rate for + 25 years, total (eu_unemp_ge25t) 333
2.7.11 Economy . . . 333
2.7.11.1 Income of households (Balance) in euro per inhabitant (eu_b5n_eur_hab) . . . 333
2.7.11.2 Income of households (Balance) in million euro (eu_b5n_mio_eur) . 334
2.7.11.3 Income of households (Balance) in million national currency (eu_b5n_mio_nac) . . . 334
2.7.11.4 Income of households (Balance) in million PPS (eu_b5n_mio_pps) . 334
2.7.11.5 Income of households (Disposable income) in euro per inhabitant (eu_b6n_eur_hab) . . . 334
2.7.11.6 Income of households (Disposable income) in million euro (eu_b6n_mio_eur) . . . 334

2.7.11.7 Income of households (Disposable income) in million national currency (eu_b6n_mio_nac) . . . 334
2.7.11.8 Income of households (Disposable income) in million PPS (eu_b6n_mio_pps) . . . 335
2.7.11.9 Income of households (Adjusted disposable income) in million euro (eu_b7n_mio_eur) . . . 335
2.7.11.10 Income of households (Adjusted disposable income) in million national currency (eu_b7n_mio_nac) . . . 335
2.7.11.11 Regional gross domestic product by NUTS 2 regions, million EUR (eu_mio_eur) . . . 335
2.7.11.12 Regional gross domestic product (million PPS) by NUTS 2 regions (eu_gdp_mio_pps) . . . 335
2.7.11.13 Regional gross domestic product (PPS per inhabitant) by NUTS 2 regions (eu_gdp_pps_hab) . . . 336
2.7.11.14 Regional gross domestic product. PPS per inhabitant in percentage of EU27 (eu_gdp_pps_hab_eu27_2020) . . . 336
2.7.11.15 Disposable income of private households by NUTS 2 regions (eu_dinc_pps_hab) . . . 336
2.7.11.16 Primary income of private households by NUTS 2 regions (eu_pinc_pps_hab) . . . 336
2.7.11.17 Real growth rate of regional gross value added (GVA) at basic prices (eu_rgva_pch_pre) . . . 336
2.7.12 Tourism . . . 337
2.7.12.1 Number of bed-places in hotels, camping places and other (eu_tour_nstour_bedpl) . . . 337
2.7.12.2 Number of establishments in hotels, camping places and other (eu_tour_nstour_estbl) . . . 337
2.7.12.3 Net occupancy rate of bed-places in hotels and similar (eu_tour_bedpl) 337
2.7.12.4 Net occupancy rate of bedrooms in hotels and similar (eu_tour_bedrm) 337
2.7.12.5 Number of nights spent at camping grounds, recreational vehicle and trailer park (eu_tour_nscamp) . . . 337
2.7.12.6 Number of nights spent at hotels and similar accommodation (eu_tour_nshotel) . . . 338
2.7.12.7 Number of nights spent at holiday and other short-stay accommodation (eu_tour_nssa) . . . 338
2.7.12.8 Number of nights spent at tourist accommodations (eu_tour_nstour) 338
2.7.13 Transport . . . 338
2.7.13.1 Injured victims in road accidents, per million inhabitants (eu_rac_inj) 338
2.7.13.2 Killed victims in road accidents, per million inhabitants (eu_rac_kil) 339
2.7.13.3 Air transport of freight and mail loaded, in thousand tonnes (eu_atf_frm_ld) . . . 339
2.7.13.4 Air transport of freight and mail loaded and unloaded, in thousand tonnes (eu_atf_frm_ld_nld) . . . 339
2.7.13.5 Air transport of freight and mail loaded, in thousand tonnes (eu_atf_frm_nld) . . . 339
2.7.13.6 Passengers carried by air transport, in thousand passengers (eu_mtp_pas_crd) . . . 339
2.7.13.7 Passengers carried by air transport, in thousand passengers (eu_mtp_pas_crd_arr) . . . 339
2.7.13.8 Passengers carried by air transport (arrival), in thousand passengers (eu_mtp_pas_crd_dep) . . . 339

2.7.13.9 Maritime transport of freight and mail loaded, in thousand tonnes (eu_mtf_fr_ld) . . . 340
2.7.13.10 Maritime transport of freight and mail loaded, in thousand tonnes (eu_mtf_fr_ld_nld) . . . 340
2.7.13.11 Maritime transport of freight and mail loaded and unloaded, in thousand tonnes (eu_mtf_fr_nld) . . . 340
2.7.13.12 Maritime transport of passengers embarked and disembarked, in thousand passengers (eu_mtp_pas) . . . 340
2.7.13.13 Maritime transport of passengers, in thousand passengers (eu_mtp_pas_demb) . . . 340
2.7.13.14 Maritime transport of passengers disembarked, in thousand passengers (eu_mtp_pas_emb) . . . 340
2.7.13.15 Navigable canals, in kilometers (eu_troad_cnl) . . . 341
2.7.13.16 Navigable canals, in kilometers (eu_troad_mway) . . . 341
2.7.13.17 Motorways, in kilometers (eu_troad_rd_oth) . . . 341
2.7.13.18 Other roads, in kilometers (eu_troad_riv) . . . 341
2.7.13.19 Navigable rivers, in kilometers (eu_troad_rl) . . . 341
2.7.13.20 Total railway lines, in kilometers (eu_troad_rl_elc) . . . 341
2.7.13.21 Electrified railway lines, in kilometers (eu_troad_rl_tge2) . . . 341
2.7.13.22 Total number of motor coaches, buses and trolley buses (eu_vs_bus_tot) . . . 341
2.7.13.23 Total number of motor coaches, buses and trolley buses (eu_vs_car) 341
2.7.13.24 Total number of passenger cars (eu_vs_lor) . . . 342
2.7.13.25 Total number of lorries (eu_vs_moto) . . . 342
2.7.13.26 Total number of motorcycles (eu_vs_spe) . . . 342
2.7.13.27 Total number of special vehicles (eu_vs_tot_x_tm) . . . 342
2.7.13.28 Total number of all vehicles (except trailers and motorcycles) (eu_vs_trc) . . . 342
2.7.13.29 Total number of road tractors (eu_vs_trl_strl) . . . 342
2.7.13.30 Total number of trailers and semi-trailers (eu_vs_utl) . . . 342
2.8 QoG EU Regional Dataset Wide Data (NUTS 1) . . . 343
2.8.1 Identification . . . 343
2.8.1.1 NUTS code of region (region_code) . . . 343
2.8.1.2 Name of the region (region_name) . . . 343
2.8.1.3 Year (year) . . . 343
2.8.1.4 Code of NUTS0 level region (nuts0) . . . 343
2.8.1.5 Code of NUTS1 level region (nuts1) . . . 344
2.8.1.6 The Nomenclature of Territorial Units for Statistics (NUTS) level (nuts_level) . . . 344
2.8.2 Quality of Government . . . 344
2.8.2.1 Number of awarded contracts above 130,000 EUR (cri_contr_nuts0) 344
2.8.2.2 Number of awarded contracts above 130,000 EUR (cri_contr_nuts1) 344
2.8.2.3 Final value of awarded tenders of over 130,000 EUR (cri_cvalue_nuts0) 344
2.8.2.4 Final value of awarded tenders of over 130,000 EUR (cri_cvalue_nuts1) 344
2.8.2.5 Share of contracts with only one bid in total (cri_singleb_nuts0) . . 344
2.8.2.6 Share of contracts with only one bid in total (cri_singleb_nuts1) . . 344
2.8.2.7 Share of contracts with no published call for tender red flag (cri_nocall_nuts0) . . . 345
2.8.2.8 Share of contracts with no published call for tender red flag (cri_nocall_nuts1) . . . 345

2.8.2.9 Share of contracts with non-open procedure red flag (cri_nonopen_nuts0) . . . 345
2.8.2.10 Share of contracts with non-open procedure red flag (cri_nonopen_nuts1) . . . 345
2.8.2.11 Share of contracts with tax haven red flag (cri_taxhav_nuts0) . . . 345
2.8.2.12 Share of contracts with tax haven red flag (cri_taxhav_nuts1) . . . 345
2.8.2.13 EQI Index Score (eqi_score_nuts0) . . . 345
2.8.2.14 EQI Index Score (eqi_score_nuts1) . . . 345
2.8.2.15 Quality pillar, country centered and z-score standardized (eqi_zquality_nuts0) . . . 346
2.8.2.16 Quality pillar, country centered and z-score standardized (eqi_zquality_nuts1) . . . 346
2.8.2.17 Impartiality pillar, country centered and z-score standardized (eqi_zimpartiality_nuts0) . . . 346
2.8.2.18 Impartiality pillar, country centered and z-score standardized (eqi_zimpartiality_nuts1) . . . 346
2.8.2.19 Corruption pillar, country centered and z-score standardized (eqi_zcorruption_nuts0) . . . 346
2.8.2.20 Corruption pillar, country centered and z-score standardized (eqi_zcorruption_nuts1) . . . 346
2.8.2.21 Corruption perceptions index (corruption sub-pillar) z-score stand. (2017 only) (eqi_zcorruptper_nuts1) . . . 347
2.8.2.22 Corruption experiences index (corruption sub-pillar) z-score stand. (2017 only) (eqi_zcorruptexp_nuts1) . . . 347
2.8.2.23 EQI index, min-max (0-100) standardized (eqi_norm_eqi_nuts0) . . . 347
2.8.2.24 EQI index, min-max (0-100) standardized (eqi_norm_eqi_nuts1) . . . 347
2.8.2.25 Quality pillar, country centered and min-max (0-100) standardized (eqi_norm_qual_nuts0) . . . 347
2.8.2.26 Quality pillar, country centered and min-max (0-100) standardized (eqi_norm_qual_nuts1) . . . 347
2.8.2.27 Impartiality pillar, country centered and min-max (0-100) standardized (eqi_norm_impart_nuts0) . . . 347
2.8.2.28 Impartiality pillar, country centered and min-max (0-100) standardized (eqi_norm_impart_nuts1) . . . 347
2.8.2.29 Corruption pillar, country centered and min-max (0-100) standardized (eqi_norm_corrupt_nuts0) . . . 348
2.8.2.30 Corruption pillar, country centered and min-max (0-100) standardized (eqi_norm_corrupt_nuts1) . . . 348
2.8.2.31 Corruption perceptions index (corruption sub-pillar) min-max (0-100)(2017) (eqi_norm_corruptper_nuts1) . . . 348
2.8.2.32 Corruption experiences index (corruption sub-pillar) min-max (0-100) (2017) (eqi_norm_corruptexp_nuts1) . . . 348
2.8.3 Demographics . . . 348
2.8.3.1 Reported number of cases of burglary of private premises (eu_cri_bur_nuts0) . . . 348
2.8.3.2 Reported number of cases of burglary of private premises (eu_cri_bur_nuts1) . . . 348
2.8.3.3 Reported number of cases of intentional homicide (eu_cri_inthom_nuts0) . . . 348
2.8.3.4 Reported number of cases of intentional homicide (eu_cri_inthom_nuts1) . . . 348
2.8.3.5 Reported number of cases of robbery (eu_cri_rob_nuts0) . . . 349

2.8.3.6 Reported number of cases of robbery (eu_cri_rob_nuts1) 349
2.8.3.7 Proportion of live births outside marriage (eu_agemoth_nuts0) . . . 349
2.8.3.8 Total fertility rate (eu_agemoth1_nuts0) 349
2.8.3.9 Mean age of women at childbirth (eu_nmarpct_nuts0) 349
2.8.3.10 Mean age of women at birth of first child (eu_totferrt_nuts0) 349
2.8.3.11 Number of deaths of females, all ages (eu_death_totalf_nuts0) . . . 349
2.8.3.12 Number of deaths of males, all ages (eu_death_totalm_nuts0) . . . 349
2.8.3.13 Number of deaths, total all ages (eu_death_totalt_nuts0) 350
2.8.3.14 Number of deaths of females, at 1 year old (eu_death_y1f_nuts0) . 350
2.8.3.15 Number of deaths of males, at 1 year old (eu_death_y1m_nuts0) . . 350
2.8.3.16 Number of deaths, total at 1 year old (eu_death_y1t_nuts0) 350
2.8.3.17 Number of deaths of females, at 20 years old (eu_death_y20f_nuts0) 350
2.8.3.18 Number of deaths of males, at 20 years old (eu_death_y20m_nuts0) 350
2.8.3.19 Number of deaths, total at 20 years old (eu_death_y20t_nuts0) . . 350
2.8.3.20 Number of deaths of females, at 50 years old (eu_death_y50f_nuts0) 350
2.8.3.21 Number of deaths of males, at 50 years old (eu_death_y50m_nuts0) 350
2.8.3.22 Number of deaths, total at 50 years old (eu_death_y50t_nuts0) . . 351
2.8.3.23 Number of deaths of females, at 70 years old (eu_death_y70f_nuts0) 351
2.8.3.24 Number of deaths of males, at 70 years old (eu_death_y70m_nuts0) 351
2.8.3.25 Number of deaths, total at 70 years old (eu_death_y70t_nuts0) . . 351
2.8.3.26 Population at 1st January, Female (eu_d2jan_f_nuts0) 351
2.8.3.27 Population at 1st January, Female (eu_d2jan_f_nuts1) 351
2.8.3.28 Population at 1st January, Male (eu_d2jan_m_nuts0) 352
2.8.3.29 Population at 1st January, Male (eu_d2jan_m_nuts1) 352
2.8.3.30 Population at 1st January, Total (eu_d2jan_t_nuts0) 352
2.8.3.31 Population at 1st January, Total (eu_d2jan_t_nuts1) 352
2.8.3.32 Area of a region, land area total, sq km (eu_d3area_lat_nuts0) . . . 352
2.8.3.33 Area of a region, land area total, sq km (eu_d3area_lat_nuts1) . . . 353
2.8.3.34 Area of a region, total, sq km (eu_d3area_t_nuts0) 353
2.8.3.35 Area of a region, total, sq km (eu_d3area_t_nuts1) 353
2.8.3.36 Population density, average population per square km (eu_per_km2_nuts0) 353
2.8.3.37 Population density, average population per square km (eu_per_km2_nuts1) 353
2.8.3.38 Fertility rate, total (eu_frate_total_nuts0) 353
2.8.3.39 Fertility rate, total (eu_frate_total_nuts1) 353
2.8.3.40 Fertility rate, at age 15 (eu_frate_y15_nuts0) 354
2.8.3.41 Fertility rate, at age 15 (eu_frate_y15_nuts1) 354
2.8.3.42 Fertility rate, at age 30 (eu_frate_y30_nuts0) 354
2.8.3.43 Fertility rate, at age 30 (eu_frate_y30_nuts1) 354
2.8.3.44 Fertility rate, at age 35 (eu_frate_y35_nuts0) 354
2.8.3.45 Fertility rate, at age 35 (eu_frate_y35_nuts1) 354
2.8.3.46 Life expectancy in years at 1 year old, female (eu_mlifexp_f_nuts0) 354
2.8.3.47 Life expectancy in years at 1 year old, female (eu_mlifexp_f_nuts1) 354
2.8.3.48 Life expectancy in years at 1 year old, male (eu_mlifexp_m_nuts0) 354
2.8.3.49 Life expectancy in years at 1 year old, male (eu_mlifexp_m_nuts1) 355
2.8.3.50 Life expectancy in years at 1 year old, total (eu_mlifexp_t_nuts0) . 355
2.8.3.51 Life expectancy in years at 1 year old, total (eu_mlifexp_t_nuts1) . 355

2.8.3.52 Crude rate of net migration plus statistical adjustment (eu_cnmigratrt_nuts1) . . . 355
2.8.3.53 Crude rate of total population change (eu_growrt_nuts1) . . . 355
2.8.3.54 Crude rate of natural change of population (eu_natgrowrt_nuts1) . 355
2.8.4 Education . . . 355
2.8.4.1 Educational attainment for ages 25 to 64, primary education, Female (eu_edatt_ed02_y2564f_nuts0) . . . 355
2.8.4.2 Educational attainment for ages 25 to 64, primary education, Female (eu_edatt_ed02_y2564f_nuts1) . . . 356
2.8.4.3 Educational attainment for ages 25 to 64, primary education, Male (eu_edatt_ed02_y2564m_nuts0) . . . 356
2.8.4.4 Educational attainment for ages 25 to 64, primary education, Male (eu_edatt_ed02_y2564m_nuts1) . . . 356

2.18.19.38 Financial asset of households: Debt securities (oecd_houswealth_t1b) 1775
2.18.19.39 Financial asset of households: equity (oecd_houswealth_t1c) . . . 1775
2.18.19.40 Financial asset of households: investment funds shares (oecd_houswealth_t1d) . . . 1775
2.18.19.41 Financial asset of households: Life insurance and annuities (oecd_houswealth_t1e) . . . 1775
2.18.19.42 Financial asset of households: Pension funds (oecd_houswealth_t1f) 1776
2.18.19.43 Income inequality: Gini (at disposable income post taxes transfers) (oecd_incinequal_t1a) . . . 1776
2.18.19.44 Relative poverty rates: Entire population (oecd_incompoverty_t1a) 1776
2.18.19.45 Relative poverty rates: Children (age 0-17) (oecd_incompoverty_t1b) 1776
2.18.19.46 Relative poverty rates: Working-age population (age 18-65) (oecd_incompoverty_t1c) . . . 1776
2.18.19.47 Relative poverty rates: Retirement-age population (over 65) (oecd_incompoverty_t1d) . . . 1776
2.18.19.48 Poverty gap entire population (oecd_incompoverty_t1e) . . . 1776
2.18.19.49 Purchasing power parities (oecd_rtsconv_t1a) . . . 1777
2.18.19.50 Indices of price levels (oecd_rtsconv_t1b) . . . 1777
2.18.19.51 Taxes on the average worker (oecd_taxapw_t1) . . . 1777
2.18.19.52 Level of the shadow economy (shec_se) . . . 1777
2.18.19.53 New business density (new registrations per 1,000 people ages 15-64) (wdi_busden) . . . 1777

2.18.19.54 Poverty gap at USD 1.90 a day (2011 PPP) (percent) (wdi_povgap190) 1777
2.18.19.55 Women Business and the Law Index Score (scale 1-100) (wdi_wombuslawi) 1778
2.18.19.56 Innovation capability. 0-100 (best) (wef_ci) 1778
2.18.19.57 Global Competitiveness Index 4.0. 0-100 (best) (wef_gci) 1778
2.18.19.58 Property rights. 1-7 (best) (wef_pr) 1778
2.18.19.59 Satisfaction with financial situation of household (wvs_satfin) 1778
2.18.20 Gender Equality 1779
2.18.20.1 Gender Inequality Index (0 to 1 higher disparity) (gii_gii) 1779
2.18.20.2 Men make better political leaders than women do (wvs_menpol) . . 1779

3 Bibliography **1780**

1 Explanatory Notes

1.1 Cautionary Notes

The current release of the Demscore data is a beta version. The data is not yet complete and the data quality is not yet guaranteed. We are working on improving the data quality and are planning to do a full release later this year.

1.2 Demscore Background

Demscore provides worldwide free access to harmonized data on Democracy, Environment, Migration, Social Policy, Conflict and Representation from several of the world's most prominent social science research institutes.

Demscore facilitates large-scale comparative analyses on the grand challenges of today's societies, including those caused by population aging, rapidly changing migration patterns, increased social inequalities, accelerating globalization, recurrent financial crises, political deadlocks, violent conflict, and the rise of populism. The interdisciplinary nature of Demscore data is essential to advance adequate policy responses to such complex societal challenges facing Sweden, Europe, and the world today.

The Demscore consortium includes several national and internationally renowned databases of outmost importance for the scientific community when tackling complex societal challenges associated with the Sustainable Development Goals (SDGs) and beyond. The joint infrastructure ensures that data integrity and quality are at the highest international standards, and it maximizes usability in the measurement of contextual data with over 25,000 variables across nearly all countries in the world, from 1789 to the present.

It creates critical time- and cost saving advantages in data collection, management, distribution, and not the least for end-users in the scientific community. A fully normalized, joint PostgreSQL database, sophisticated programming, and a web-based interface make it possible to select a series of variables across all six Demscore databases, and get a custom-designed dataset and codebook generated automatically.

1.3 The Demscore Codebook

The autogenerated Demscore Codebook lists variable entries for those variables chosen by the user along with citation guidelines and license per variable.

The meta data is extracted from the codebooks per dataset stored in a table in The Demscore PostgreSQL database with one row per variable for all datasets. This table includes codebook entries, variable tags, labels and other variable information in LaTeX format used for the generating of an automated codebook.

For all meta data across all datasets, Demscore uses one set of standard entries that all members projects provided information on. In addition, variables from the different datasets have or require different sets of additional information as meta data specific to each dataset. These entries are also included, but as variable-specific meta data below the standard entries.

To avoid name clashes of variables and because variables entries have different naming schemes across datasets and projects, Demscore uses a hybrid form between original variable entries and new Demscore variable entries:

To begin with, all variable names in Demscore were cleaned in the beginning of the harmonization process. This cleaning included for instance that spaces or dots in the variable names were replaced with underscores and all letters were converted to lower case. The original tag is however still available and stored in the PostgreSQL table. Each variable in Demscore is available in a short- and long form. The short form is the cleaned name of the priginal variable tag, the long form begins with the name of the dataset from which it is retrieved, followed by the cleaned variable name.

For instance, the original name of the variable *MinisterPersonalID* from the H-DATA Foreign Minister Dataset is included as *ministerpersonalid* (short form) *hdata_fomin_ministerpersonalid* (long form) in Demscore.

In addition, each dataset inlcudes Demscore unit-identifier variables which are named according to the following naming scheme: Beginning with u_ ,followed by the name of the primary unit and finally the variable tag. The *year*- variable from the COMPLAB SPIN The Out-of-Work Benefits Dataset (OUTWB), which is part of the primary unit u_complab_country_year has the Demscore unit identifier name *u_complab_country_year_year*.

1.4 Methodology

For details on our methodology please see the Demscore Methodology document which is included in the zip file retrieved from the download interface.

1.5 Download ID

The download ID allows the user to share the ID with other users for replication purposes. A user can type the download ID into the demscore website and retrieve the same download selection and files as the original user. This ID is autogenerated for each download from the demscore website.

Download ID:

2 QOG

The Quality of Government (QoG) Institute was founded in 2004 by Professor Bo Rothstein and Professor Sören Holmberg. It is an independent research institute within the Department of Political Science at the University of Gothenburg. QoG is comprised of about 30 researchers who conduct and promote research on the causes, consequences and nature of Good Governance and the Quality of Government (QoG) - that is, trustworthy, reliable, impartial, uncorrupted and competent government institutions. QoG's award-winning datasets focus on concepts related to quality of government, transparency, and public administration. The main objective of QoG's research is to address the theoretical and empirical problem of how political institutions of high quality can be created and maintained. A second objective is to study the effects of Quality of Government on a number of policy areas, such as health, the environment, social policy, and poverty. The QoG datasets draw on a number of freely available datasources. The list below lists all datasources included in QoG and the variable prefixes QoG uses to mark the original variable sources. More information on how the variables are complied for different QoG datasets can be found in the respective QoG codebooks available on their website. More information is available on the project's website: https://www.gu.se/en/quality-government

2.1 QoG EQI Regional Level 2021 (with all NUTS2 regions)

Dataset tag: qog_eqi_agg21

Description: This index focuses on both perceptions and experiences with public sector corruption, along with the extent to which citizens believe various public sector services are impartially allocated and of good quality in the EU.

Dataset citation: Charron, Nicholas, Victor Lapuente Monika Bauhr. 2021. Sub-national Quality of Government in EU Member States: Presenting the 2021 European Quality of Government Index and its relationship with Covid-19 indicators. University of Gothenburg: The QoG Working Paper Series 2021:4.

License: The QoG datasets are open and available, free of charge and without a need to register your data. You can use them for your analysis, graphs, teaching, and other academic-related and non-commercial purposes. We ask our users to cite always the original source(s) of the data and our datasets.

We do not allow other uses of these data including but not limited to redistribution, commercialization and other for-profit usage. If a user is interested in such use or has doubts about the license, they will have to refer to the original source and check with them if this is allowed and what requirements they need to fulfill.

Be mindful that the original data sources are the only owners of their data and they can adjust their license without previous warning.

More detailed information on the dataset can be found at the following web page: `https://www.gu.se/en/quality-government/qog-data/data-downloads/european-quality-of-government-index`
NA

2.1.0.1 NUTS code of region (region_code)

Long tag: qog_eqi_agg21_region_code

Original tag: region_code

Description:

Numerical code of the region to which the observation belongs. The Nomenclature of Territorial Units for Statistics, (NUTS), is a geocode standard for referencing the administrative divisions of countries for statistical purposes. See appendix of this document for each region's code.

2.1.0.2 Name of region (name)

Long tag: qog_eqi_agg21_name

Original tag: name

Description:

Name of the region in English.

2.1.0.3 Year (year)

Long tag: qog_eqi_agg21_year

Original tag: year

Description:

Year of observation. If you are using data from previous waves (2010, 2013 and 2017), please also check "Suggestion Citation for Previous Waves".

2.1.0.4 EQI region code (eqiregionn2)

Long tag: qog_eqi_agg21_eqiregionn2

Original tag: EQIregionN2

Description:

EQI region code (NUTS 2) . See appendix of *THE EUROPEAN QUALITY OF GOVERNMENT INDEX 2021* for each region's code. `https://www.qogdata.pol.gu.se/data/qog_eqi_codebook_21.pdf`

2.1.0.5 NUTS Level (nuts_level)

Long tag: qog_eqi_agg21_nuts_level

Original tag: nuts_level

Description:

To what level of NUTS belong observation. The Nomenclature of Territorial Units for Statistics, (NUTS), is a geocode standard for referencing the administrative divisions of countries for statistical purposes.
(0) Country level
(1) Major socio-economic regions
(2) Basic regions for the application of regional policies

2.1.0.6 NUTS0 abbreviation code (nuts0)

Long tag: qog_eqi_agg21_nuts0

Original tag: nuts0

Description:
Code of NUTS0 level region to which the observation belongs. The Nomenclature of Territorial Units for Statistics, (NUTS), is a geocode standard for referencing the administrative divisions of countries for statistical purposes. NUTS 0: country level.

2.1.0.7 NUTS1 abbreviation code (nuts1)

Long tag: qog_eqi_agg21_nuts1

Original tag: nuts1

Description:
Code of NUTS1 level region to which the observation belongs. The Nomenclature of Territorial Units for Statistics, (NUTS), is a geocode standard for referencing the administrative divisions of countries for statistical purposes. NUTS 1: major socio-economic regions.

2.1.0.8 NUTS2 abbreviation code (nuts2)

Long tag: qog_eqi_agg21_nuts2

Original tag: nuts2

Description:
Code of NUTS2 level region to which the observation belongs. The Nomenclature of Territorial Units for Statistics, (NUTS), is a geocode standard for referencing the administrative divisions of countries for statistical purposes. NUTS 2: basic regions for the application of regional policies.

2.1.0.9 Name of the country (cname)

Long tag: qog_eqi_agg21_cname

Original tag: cname

Description:
Name of the country where the region is located, in English.NA

2.1.0.10 Nuts 2 Level (eqi21_n2)

Long tag: qog_eqi_agg21_eqi21_n2

Original tag: eqi21_n2

Description:

2.1.0.11 Lower boundary of margin of error, EQI (eqi21_n2_lowme)

Long tag: qog_eqi_agg21_eqi21_n2_lowme

Original tag: eqi21_n2_lowME

Description:
Lower boundary of margin of error for EQI score.

2.1.0.12 Upper boundary of margin of error, EQI (eqi21_n2_highme)

Long tag: qog_eqi_agg21_eqi21_n2_highme

Original tag: eqi21_n2_highME

Description:
Upper boundary of margin of error for EQI score.

2.1.0.13 Quality pillar (qualityp21_n2)

Long tag: qog_eqi_agg21_qualityp21_n2

Original tag: qualityp21_n2

Description:
Quality pillar, country centered and z-score standardized. We aggregate the individual scores ('survey question') to the corresponding regional level, so that each of question on the quality of public services is now a regional 'indicator'. After normalizing each of quality indicators (through z-score standardization) so that they share a common range, the quality indicators are aggregated into 'quality pillar'.

2.1.0.14 Impartiality pillar (impartialityp21_n2)

Long tag: qog_eqi_agg21_impartialityp21_n2

Original tag: impartialityp21_n2

Description:
Impartiality pillar, country centered and z-score standardized. We aggregate the individual scores ('survey question') to the corresponding regional level, so that each of question assessing impartiality in the provision of public services is now a regional 'indicator'. After normalizing each of impartiality indicators (through z-score standardization) so that they share a common range, the impartiality indicators are aggregated into 'impartiality pillar'.

2.1.0.15 Corruption pillar (corruptionp21_n2)

Long tag: qog_eqi_agg21_corruptionp21_n2

Original tag: corruptionp21_n2

Description:

Corruption pillar, country centered and z-score standardized. We aggregate the individual scores ('survey question') to the corresponding regional level, so that each of question assessing corruption in the provision of public services is now a regional 'indicator'. After normalizing each of corruption indicators (through z-score standardization) so that they share a common range, the corruption
indicators are aggregated into two sub-pillars, called 'experience' and 'perceptions. They respectively represent question items reflecting personal experience with petty corruption versus perception of corruption in various other areas. These two sub-pillars are aggregated using equal weighting.

2.2 QoG European Quality of Government Index CATI - Country Level (2021)

Dataset tag: qog_eqi_cati_long

Description: This index focuses on both perceptions and experiences with public sector corruption, along with the extent to which citizens believe various public sector services are impartially allocated and of good quality in the EU.

Dataset citation: Charron, Nicholas, Victor Lapuente Monika Bauhr. 2021. Sub-national Quality of Government in EU Member States: Presenting the 2021 European Quality of Government Index and its relationship with Covid-19 indicators. University of Gothenburg: The QoG Working Paper Series 2021:4.

License: The QoG datasets are open and available, free of charge and without a need to register your data. You can use them for your analysis, graphs, teaching, and other academic-related and non-commercial purposes. We ask our users to cite always the original source(s) of the data and our datasets.

We do not allow other uses of these data including but not limited to redistribution, commercialization and other for-profit usage. If a user is interested in such use or has doubts about the license, they will have to refer to the original source and check with them if this is allowed and what requirements they need to fulfill.

Be mindful that the original data sources are the only owners of their data and they can adjust their license without previous warning.

More detailed information on the dataset can be found at the following web page: `https://www.gu.se/en/quality-government/qog-data/data-downloads/european-quality-of-government-index`

2.2.1 Identification Variables

These variables identify the observations in the dataset.

2.2.1.1 Name of the country (cname)

Long tag: qog_eqi_cati_long_cname

Original tag: cname

Description:

Name of the country where the region is located in English.

2.2.1.2 Year (year)

Long tag: qog_eqi_cati_long_year

Original tag: year

Description:

Year of observation. If you are using data from previous waves (2010, 2013 and 2017), please also check "Suggestion Citation for Previous Waves".

2.2.1.3 Country Code (ccode)

Long tag: qog_eqi_cati_long_ccode

Original tag: ccode

Description:

Numeric country code based on the ISO-3166-1 standard. All the numeric country codes are unique and this is thus the variable best suitable to use when merging les (in combination with year for time-series data). (`http://en.wikipedia.org/wiki/ISO_3166-1_numeric`)

2.2.1.4 3-letter Country Code (ccodealp)

Long tag: qog_eqi_cati_long_ccodealp

Original tag: ccodealp

Description:
A three-letter country code based on the ISO-3166-1 alpha3 standard. Please note that the ccodealp variable does not uniquely identify all countries.

2.2.1.5 Country Code COW (ccodecow)

Long tag: qog_eqi_cati_long_ccodecow

Original tag: ccodecow

Description:
Country code from the Correlates of War.

2.2.1.6 Country Code World Bank (ccodewb)

Long tag: qog_eqi_cati_long_ccodewb

Original tag: ccodewb

Description:
Country code from the World Bank.

2.2.2 Country Level Variables

EQI variables for the country level.

2.2.2.1 How would you rate the quality of public education in your area? (ed_qual)

Long tag: qog_eqi_cati_long_ed_qual

Original tag: Ed_qual

Description:
On a scale from 1 to 10, where 1 means "very poor" and 10 means "excellent".

2.2.2.2 How would you rate the quality of the public health care system in your area? (hel_qual)

Long tag: qog_eqi_cati_long_hel_qual

Original tag: Hel_qual

Description:
On a scale from 1 to 10, where 1 means "very poor" and 10 means "excellent".

2.2.2.3 How would you rate the quality of the police force in your area? (law_qual)

Long tag: qog_eqi_cati_long_law_qual

Original tag: Law_qual

Description:
On a scale from 1 to 10, where 1 means "very poor" and 10 means "excellent".

2.2.2.4 Certain people are given special advantages in the public education system in my area. (edimpart1)

Long tag: qog_eqi_cati_long_edimpart1

Original tag: Edimpart1

Description:
On a scale from 1 to 10, where 1 means "Strongly disagree" and 10 means "Strongly agree".

2.2.2.5 Certain people are given special advantages in the public health care system in my area. (helimpart1)

Long tag: qog_eqi_cati_long_helimpart1

Original tag: Helimpart1

Description:
On a scale from 1 to 10, where 1 means "Strongly disagree" and 10 means "Strongly agree".

2.2.2.6 The police force gives special advantages to certain people in my area. (lawimpart1)

Long tag: qog_eqi_cati_long_lawimpart1

Original tag: Lawimpart1

Description:
On a scale from 1 to 10, where 1 means "Strongly disagree" and 10 means "Strongly agree".

2.2.2.7 All citizens are treated equally in the public education system in my area. (edimpart2)

Long tag: qog_eqi_cati_long_edimpart2

Original tag: Edimpart2

Description:
(1) Agree
(2) Rather Agree
(3) Rather Disagree
(4) Disagree

2.2.2.8 All citizens are treated equally in the public health care system in my area. (helimpart2)

Long tag: qog_eqi_cati_long_helimpart2

Original tag: Helimpart2

Description:
(1) Agree
(2) Rather Agree
(3) Rather Disagree
(4) Disagree

2.2.2.9 All citizens are treated equally by the police force in my area. (lawimpart2)

Long tag: qog_eqi_cati_long_lawimpart2

Original tag: Lawimpart2

Description:
(1) Agree
(2) Rather Agree
(3) Rather Disagree
(4) Disagree

2.2.2.10 Corruption is prevalent in my area's local public school system. (edcorr)

Long tag: qog_eqi_cati_long_edcorr

Original tag: EdCorr

Description:
On a scale from 1 to 10, where 1 means "Strongly disagree" and 10 means "Strongly agree".

2.2.2.11 Corruption is prevalent in the public health care system in my area. (helcorr)

Long tag: qog_eqi_cati_long_helcorr

Original tag: HelCorr

Description:
On a scale from 1 to 10, where 1 means "Strongly disagree" and 10 means "Strongly agree".

2.2.2.12 Corruption is prevalent in the police force in my area. (lawcorr)

Long tag: qog_eqi_cati_long_lawcorr

Original tag: LawCorr

Description:
On a scale from 1 to 10, where 1 means "Strongly disagree" and 10 means "Strongly agree".

2.2.2.13 People in my area must use some form of corruption to just to get some basic public services. (need_cor)

Long tag: qog_eqi_cati_long_need_cor

Original tag: Need_cor

Description:
On a scale from 1 to 10, where 1 means "Strongly disagree" and 10 means "Strongly agree".

2.2.2.14 Corruption in my area is used to get access to special unfair privileges and wealth. (greed_cor)

Long tag: qog_eqi_cati_long_greed_cor

Original tag: Greed_cor

Description:
On a scale from 1 to 10, where 1 means "Strongly disagree" and 10 means "Strongly agree".

2.2.2.15 In the last 12 months, have you or anyone in your family given an informal gift or bribe to schools or other education services? (ed_pay)

Long tag: qog_eqi_cati_long_ed_pay

Original tag: Ed_pay

Description:
Share of population who said "Yes" to above-stated question (q19_1 of individual-level dataset).

2.2.2.16 In the last 12 months, have you or anyone in your family given an informal gift or bribe to health or medical services? (hel_pay)

Long tag: qog_eqi_cati_long_hel_pay

Original tag: Hel_pay

Description:
Share of population who said "Yes" to above-stated question (q19_2 of individual-level dataset).

2.2.2.17 In the last 12 months, have you or anyone in your family given an informal gift or bribe to police? (law_pay)

Long tag: qog_eqi_cati_long_law_pay

Original tag: Law_pay

Description:
Share of population who said "Yes" to above-stated question (q19_3 of individual-level dataset).

2.2.2.18 In the last 12 months, have you or anyone in your family given an informal gift or bribe to any other government-run agency? (other_pay)

Long tag: qog_eqi_cati_long_other_pay

Original tag: Other_pay

Description:
Share of population who said "Yes" to above-stated question (q19_4 of individual-level dataset).

2.2.2.19 Give an informal gift or bribe at any public agency in the last 12 months (any_bribe)

Long tag: qog_eqi_cati_long_any_bribe

Original tag: Any_bribe

Description:
Share of population who have been asked by a public official to give an informal gift or bribe at any public agency in the last 12 months. For this variable, each respondent answered 'yes' to any of the 4 services above (*Ed_pay, Hel_pay, Law_pay, Other_pay*) is coded as '1', and '0' if otherwise.

2.2.2.20 In the last 12 months, have you or anyone in your family been asked by a public official to give an informal gift or bribe in health or medical services? (ed_ask)

Long tag: qog_eqi_cati_long_ed_ask

Original tag: Ed_ask

Description:
Share of population who said "Yes" to above-stated question (q18_1 of individual-level dataset)

2.2.2.21 In the last 12 months, have you or anyone in your family been asked by a public official to give an informal gift or bribe in health or medical services? (hel_ask)

Long tag: qog_eqi_cati_long_hel_ask

Original tag: Hel_ask

Description:
Share of population who said "Yes" to above-stated question (q18_2 of individual-level dataset).

2.2.2.22 In the last 12 months, have you or anyone in your family been asked by a public official to give an informal gift or bribe in police authorities? (law_ask)

Long tag: qog_eqi_cati_long_law_ask

Original tag: Law_ask

Description:
Share of population who said "Yes" to above-stated question (q18_3 of individual-level dataset).

2.2.2.23 In the last 12 months, have you or anyone in your family been asked by a public official to give an informal gift or bribe in any other government-run agency? (other_ask)

Long tag: qog_eqi_cati_long_other_ask

Original tag: Other_ask

Description:
Share of population who said "Yes" to above-stated question (q18_4 of individual-level dataset).

2.2.2.24 Asked by a public official to give an informal gift or bribe at any public agency in the last 12 months (ask_any)

Long tag: qog_eqi_cati_long_ask_any

Original tag: Ask_Any

Description:
Share of population who have been asked by a public official to give an informal gift or bribe at any public agency in the last 12 months. For this variable, each respondent answered 'yes' to any of the 4 services above (*Ed_ask, Hel_ask, Law_ask, Other_ask*) is coded as '1', and '0' if otherwise.

2.2.2.25 In the area where I live, elections are conducted freely and fairly. (elec_not_free)

Long tag: qog_eqi_cati_long_elec_not_free

Original tag: elec_not_free

Description:
(1) Agree
(2) Rather Agree
(3) Rather Disagree
(4) Disagree

2.2.2.26 On a 1 to 10 scale, with '1' being 'no confidence at all', and '10' being 'complete confidence' to do the right thing, how much confidence do you personally have in (COUNTRY's) parliament? (parl_conf)

Long tag: qog_eqi_cati_long_parl_conf

Original tag: Parl_conf

Description:
On a scale from 1 to 10, where 1 means "No confidence at all" and 10 means "Complete Confidence".

2.3 QoG European Quality of Government Index Individual Level (2010 2013)

Dataset tag: qog_eqi_ind_1013

Description: This index focuses on both perceptions and experiences with public sector corruption, along with the extent to which citizens believe various public sector services are impartially allocated and of good quality in the EU.

Dataset citation:: Charron, N., Dijkstra, L., Lapuente, V. (2015). Mapping the regional divide in Europe: A measure for assessing quality of government in 206 European regions. Social Indicators Research, 122(2), 315-346.

License: The QoG datasets are open and available, free of charge and without a need to register your data. You can use them for your analysis, graphs, teaching, and other academic-related and non-commercial purposes. We ask our users to cite always the original source(s) of the data and our datasets.

We do not allow other uses of these data including but not limited to redistribution, commercialization and other for-profit usage. If a user is interested in such use or has doubts about the license, they will have to refer to the original source and check with them if this is allowed and what requirements they need to fulfill.

Be mindful that the original data sources are the only owners of their data and they can adjust their license without previous warning.

More detailed information on the dataset can be found at the following web page: `https://www.gu.se/en/quality-government/qog-data/data-downloads/european-quality-of-government-index`

2.3.1 Identification Variables

These variables identify the observations in the dataset.

2.3.1.1 Respondent ID (2013) (id)

Long tag: qog_eqi_ind_1013_id

Original tag: id

Description:
A unique identification number given each respondent for the 2013 survey.

2.3.1.2 Respondent ID (2010 & 2013) (resp_id)

Long tag: qog_eqi_ind_1013_resp_id

Original tag: resp_id

Description:

A unique identification number given each respondent in the combined dataset of 2010 & 2013 EQI.

2.3.1.3 Year (year)

Long tag: qog_eqi_ind_1013_year

Original tag: year

Description:

The year to which the observation belong (2010 or 2013 EQI).

2.3.1.4 Country of respondents (country)

Long tag: qog_eqi_ind_1013_country

Original tag: country

Description:

Unique country code, numeric.
NUTS abbreviation Code
1. France
2. Bulgaria
3. Portugal
4. Denmark
5. Sweden
6. Belgium
7. Croatia
8. Greece
9. Germany
10. Italy
11. Spain
12. UK
13. Hungary
14. Czech Republic
15. Slovakia
16. Romania
17. Austria
18. Netherlands
19. Poland
20. Finland
21. Ireland
22. Turkey
23. Serbia
24. Ukraine
25. Kosovo

2.3.1.5 NUTS abbreviation Code (nuts)

Long tag: qog_eqi_ind_1013_nuts

Original tag: nuts

Description:

Abbreviation code of both NUTS1 and NUTS2-level region to which the observation belong. The Nomenclature of Territorial Units for Statistics, (NUTS), is a geocode standard for referencing the administrative divisions of countries for statistical purposes. NUTS 1: major socio-economic regions, NUTS 2: basic regions for the application of regional policies.

2.3.1.6 Name of NUTS Region (nuts_name)

Long tag: qog_eqi_ind_1013_nuts_name

Original tag: nuts_name

Description:

Full name of NUTS1 and NUTS2-level region to which the observation belong.

2.3.1.7 Numeric NUTS code found in the QoG Regional data (nuts_c)

Long tag: qog_eqi_ind_1013_nuts_c

Original tag: nuts_c

Description:

Numerical code of the region to which the observation belong. The Nomenclature of Territorial Units for Statistics, (NUTS), is a geocode standard for referencing the administrative divisions of countries for statistical purposes. See appendix of this document for each region's code.

2.3.1.8 Language of interview (language)

Long tag: qog_eqi_ind_1013_language

Original tag: language

Description:

The language in which the interview was conducted.

1. French
2. Bulgarian
3. Portuguese
4. Danish
5. Swedish
6. Flemish
7. Croatian
8. Greek
9. German
10. Italian
11. Spanish
12. English
13. Hungarian
14. Czech
15. Slovak
16. Romanian
17. Austrian
18. Dutch
19. Polish
20. Finnish
21. Irish
22. Turkish
23. Serbian
24. Albanian
25. Ukrainian

2.3.1.9 Type of interview (typetel)

Long tag: qog_eqi_ind_1013_typetel

Original tag: typetel

Description:

whether mobile or landline was used in the interview.

1. Landline
2. Mobil Phone

2.3.2 Survey Questions

Survey Question included in the QoG EQI Survey

2.3.2.1 q1 - Have you or any of your immediate family been enrolled or employed in the public school system in your area in the past 12 months? (q1)

Long tag: qog_eqi_ind_1013_q1

Original tag: q1

Description:

(1) Yes
(2) No
(99) Don't know/Refused

2.3.2.2 q2 - In the past 12 months have you used public health care services in your area? (q2)

Long tag: qog_eqi_ind_1013_q2

Original tag: q2

Description:

(1) Yes
(2) No
(99) Don't know/Refused

2.3.2.3 q3 - Have you had any recent contact (positive or negative) with the security or police forces in your area in the past 12 months? (q3)

Long tag: qog_eqi_ind_1013_q3

Original tag: q3

Description:

(1) Yes

(2) No
(99) Don't know/Refused

2.3.2.4 q4 - How would you rate the quality of public education in your area? (q4)

Long tag: qog_eqi_ind_1013_q4

Original tag: q4

Description:
On a scale from 1 to 10, where 1 means "very poor" and 10 means "excellent".

2.3.2.5 q5 - How would you rate the quality of the public health care system in your area? (q5)

Long tag: qog_eqi_ind_1013_q5

Original tag: q5

Description:
On a scale from 1 to 10, where 1 means "very poor" and 10 means "excellent".

2.3.2.6 q6 - How would you rate the quality of the police force in your area? (q6)

Long tag: qog_eqi_ind_1013_q6

Original tag: q6

Description:
On a scale from 1 to 10, where 1 means "very poor" and 10 means "excellent".

2.3.2.7 q7 - Certain people are given special advantages in the public education system in my area. (q7)

Long tag: qog_eqi_ind_1013_q7

Original tag: q7

Description:
On a scale from 1 to 10, where 1 means "Strongly disagree" and 10 means "Strongly agree".

2.3.2.8 q8 - Certain people are given special advantages in the public health care system in my area. (q8)

Long tag: qog_eqi_ind_1013_q8

Original tag: q8

Description:
On a scale from 1 to 10, where 1 means "Strongly disagree" and 10 means "Strongly agree".

2.3.2.9 q9 - The police force gives special advantages to certain people in my area. (q9)

Long tag: qog_eqi_ind_1013_q9

Original tag: q9

Description:
On a scale from 1 to 10, where 1 means "Strongly disagree" and 10 means "Strongly agree".

2.3.2.10 q10 - All citizens are treated equally in the public education system in my area. (q10)

Long tag: qog_eqi_ind_1013_q10

Original tag: q10

Description:
(1) Agree
(2) Rather Agree
(3) Rather Disagree
(4) Disagree

2.3.2.11 q11 - All citizens are treated equally in the public health care system in my area. (q11)

Long tag: qog_eqi_ind_1013_q11

Original tag: q11

Description:
(1) Agree
(2) Rather Agree
(3) Rather Disagree
(4) Disagree

2.3.2.12 q12 - All citizens are treated equally by the police force in my area. (q12)

Long tag: qog_eqi_ind_1013_q12

Original tag: q12

Description:
(1) Agree
(2) Rather Agree
(3) Rather Disagree
(4) Disagree

2.3.2.13 q13 - Corruption is prevalent in my area's local public school system. (q13)

Long tag: qog_eqi_ind_1013_q13

Original tag: q13

Description:
On a scale from 1 to 10, where 1 means "Strongly disagree" and 10 means "Strongly agree".

2.3.2.14 q14 - Corruption is prevalent in the public health care system in my area. (q14)

Long tag: qog_eqi_ind_1013_q14

Original tag: q14

Description:
On a scale from 1 to 10, where 1 means "Strongly disagree" and 10 means "Strongly agree".

2.3.2.15 q15 - Corruption is prevalent in the police force in my area. (q15)

Long tag: qog_eqi_ind_1013_q15

Original tag: q15

Description:
On a scale from 1 to 10, where 1 means "Strongly disagree" and 10 means "Strongly agree".

2.3.2.16 q16_1 - In the past 12 months have you or anyone living in your household paid a bribe in any form to education services? (q16_1)

Long tag: qog_eqi_ind_1013_q16_1

Original tag: q16_1

Description:
(1) Yes
(2) No
(99) Don't know/Refused

2.3.2.17 q16_2 - In the past 12 months have you or anyone living in your household paid a bribe in any form to health or medical services? (q16_2)

Long tag: qog_eqi_ind_1013_q16_2

Original tag: q16_2

Description:
(1) Yes
(2) No
(99) Don't know/Refused

2.3.2.18 q16_3 - In the past 12 months have you or anyone living in your household paid a bribe in any form to police? (q16_3)

Long tag: qog_eqi_ind_1013_q16_3

Original tag: q16_3

Description:
(1) Yes
(2) No
(99) Don't know/Refused

2.3.2.19 q16_4 - In the past 12 months have you or anyone living in your household paid a bribe in any form to any other government-run agency? (q16_4)

Long tag: qog_eqi_ind_1013_q16_4

Original tag: q16_4

Description:
(1) Yes
(2) No
(99) Don't know/Refused

2.3.2.20 q17 - In your opinion, how often do you think other citizens in your area use bribery to obtain public services? (q17)

Long tag: qog_eqi_ind_1013_q17

Original tag: q17

Description:
On a scale from 1 to 10, where 1 means "Strongly disagree" and 10 means "Strongly agree".

2.3.2.21 q18 - Please respond to the following: Corruption is NOT present in elections in my area. (q18)

Long tag: qog_eqi_ind_1013_q18

Original tag: q18

Description:
On a scale from 1 to 10, where 1 means "Strongly disagree" and 10 means "Strongly agree".

2.3.2.22 q19 - I trust the information provided by the local mass media in reporting on matters of politics and public services in my area. (q19)

Long tag: qog_eqi_ind_1013_q19

Original tag: q19

Description:
On a scale from 1 to 10, where 1 means "Extremely unlikely" and 10 means "Extremely likely".
Note: In EQI 2010, the same question is asked as following: "In your opinion, if corruption by a public employee or politician were to occur in your area, how likely is it that such corruption would be exposed by the local mass media?".

2.3.2.23 q20 - Generally speaking, would you say that most people can be trusted or that you can't be too careful in dealing with people in your area? [2013 ONLY] (q20)

Long tag: qog_eqi_ind_1013_q20

Original tag: q20

Description:
(1) Most people can be trusted
(2) Can't be too careful
(99) Don't know/Refused

2.3.2.24 q21a - Which statement comes closer to your own views? "In business most people can succeed if they are willing to work hard" (1) or "Hard work is no guarantee of success in business for most people, it's more a matter of luck and connections" (10). [2013 ONLY] (q21a)

Long tag: qog_eqi_ind_1013_q21a

Original tag: q21a

Description:
"Don't know/Refused" is coded as 99.
On a scale from 1 to 10, where 1 means "Success with hard work" and 10 means "Luck and Connections".

2.3.2.25 q21b - Which statement comes closer to your own views? "In the public sector most people can succeed if they are willing to work hard" (1) or "Hard work is no guarantee of success in the public sector for most people– it's more a matter of luck and connections" (10). [2013 ONLY] (q21b)

Long tag: qog_eqi_ind_1013_q21b

Original tag: q21b

Description:
"Don't know/Refused" is coded as 99.
On a scale from 1 to 10, where 1 means "Success with hard work" and 10 means "Luck and Connections".

2.3.2.26 q22 - How would you judge the current state of the economy in (YOUR COUN- TRY)? (q22)

Long tag: qog_eqi_ind_1013_q22

Original tag: q22

Description:
(1) Very good
(2) Somewhat good
(3) Somewhat bad
(4) Very bad

2.3.2.27 q23 - In politics, people sometimes talk of "left" and "right". Where would you place yourself on a scale from 1 to 7, where '1' means the extreme left and '7' means the extreme right? [2013 ONLY] (q23)

Long tag: qog_eqi_ind_1013_q23

Original tag: q23

Description:
On a scale from 1 to 7, where 1 means "Extreme left" and 10 means "Extreme right".

2.3.2.28 q24 - What political party would you vote for if the national parliamentary election were today? [2013 ONLY] (q24)

Long tag: qog_eqi_ind_1013_q24

Original tag: q24

Description:
Each respondent hears a pre-coded list of all actual political parties, including an "other" (not speci- fied) and a "don't know/refused".

2.3.2.29 q25 – Now imagine that your preferred party was involved in a corruption scandal where party leaders had given high level jobs to their unqualified friends and family, which of the following would be most likely? [2013 ONLY] (q25)

Long tag: qog_eqi_ind_1013_q25

Original tag: q25

Description:
(1) Still vote for preferred party
(2) Vote for another established party not involved in the corruption scandal
(3) Not vote at all
(99) Don't know/Refused

2.3.2.30 q26 - Is your first language (mother tongue) the same as the official language in your region? (q26)

Long tag: qog_eqi_ind_1013_q26

Original tag: q26

Description:
(1) Yes
(2) No
(99) Don't know/Refused

2.3.2.31 service_exp (service_exp)

Long tag: qog_eqi_ind_1013_service_exp

Original tag: Service_Exp

Description:
Public service experience
(0) Respondent has not had direct contact with any other public services in question (q1, q2 and/or q3)
(1) Respondent has had direct contact with any other public services in question (q1, q2 and/or q3)

2.3.3 Demographic Variables

Variables in this section provide demographic information about the respondent.

2.3.3.1 d1 - Gender of respondent (d1)

Long tag: qog_eqi_ind_1013_d1

Original tag: d1

Description:
(1) Male
(2) Female

2.3.3.2 d2 - Education of respondent (d2)

Long tag: qog_eqi_ind_1013_d2

Original tag: d2

Description:
(1) Elementary (primary) school or less (no diploma)
(2) High (secondary) school (but did not graduated from it)
(3) Graduation from high (secondary) school
(4) Graduation from college, university or other third-level institute
(5) Post-graduate degree (Masters, PHD) beyond your initial college degree
(99) Don't know/Refused

2.3.3.3 d3 - Age of respondent (d3)

Long tag: qog_eqi_ind_1013_d3

Original tag: d3

Description:
"Don't know/refused" is coded as 999.

2.3.3.4 rd3 - Age of respondent (recoded categories) (rd3)

Long tag: qog_eqi_ind_1013_rd3

Original tag: rd3

Description:
(1) 18-29
(2) 30-49
(3) 50-64
(4) 65+
(99) Don't know/Refused

2.3.3.5 d4 - Household income (d4)

Long tag: qog_eqi_ind_1013_d4

Original tag: d4

Description:
Total household net income per month, after taxes. Stated in Euros (€). "Don't know/Refused" is coded as 99.

2.3.3.6 rd4 - recoded d4 in local currency (rd4)

Long tag: qog_eqi_ind_1013_rd4

Original tag: rd4

Description:
Total household net income per month, after taxes. Stated in local currency. "Don't know/Refused" is coded as 999.

2.3.3.7 recoded4 – categorical re-code of rd4 income, country specific (recoded4)

Long tag: qog_eqi_ind_1013_recoded4

Original tag: recoded4

Description:
(1) Low
(2) Medium
(3) High
(99) Don't know/Refused

2.3.3.8 d5 - Occupation by sector (d5)

Long tag: qog_eqi_ind_1013_d5

Original tag: d5

Description:
As far as your current occupation is concerned, would you say you work in the public sector (a public sector organization is either wholly owned by the public authorities or they have a majority share), the private sector or would you say that you are without a professional activity?
2.3.9
d5bis - Occupation
If d5a=1
(1) Military, soldier (6)
(2) Law enforcement, police, fire-fighter
(1) Public sector
(2) Private sector
(3) Without professional employment (99) Don't know/Refused

2.3.3.9 d5bis - Occupation (d5bis)

Long tag: qog_eqi_ind_1013_d5bis

Original tag: d5bis

Description:
Occupation
If d5a=1
(1) Military, soldier
(2) Law enforcement, police, fire-fighter
(3) Healthcare worker, doctor
(4) Teacher, academic, researcher
(5) Other government agency

(99) Don't know/Refused

If d5a=2:
(6) Self-employed, small business owner, freelancer
(7) Other private sector employee
(99) Don't know/Refused

If d5a=1:
(8) Currently unemployed
(9) Housewife, houseman
(10) Pensioner, retired
(11) Pupil, student, trainee
(12) Other
(99) Don't know/Refused

2.3.3.10 d6 - Population (d6)

Long tag: qog_eqi_ind_1013_d6

Original tag: d6

Description:

About how many people live in the place the interview was conducted?
(1) Less than 10,000 (rural)
(2) 10,000 - 100,000 (small town or city)
(3) 100,000 - 1,000,000 (large city or urban area)
(4) More than 1,000,000 (very large city or urban area)
(99) Don't know/Refused

2.3.3.11 gender (gender)

Long tag: qog_eqi_ind_1013_gender

Original tag: gender

Description:

Gender of respondent
(0) Male
(1) Female

2.3.3.12 edu3 (edu3)

Long tag: qog_eqi_ind_1013_edu3

Original tag: Edu3

Description:

Education of respondent
(1) Lower education (lower secondary or less) includes ISCED "level 0 Not completed primary educa- tion", "1 Primary or first stage of basic", and "2 Lower secondary or Second stage of basic education". Also short vocational programs (less than 3 years) taken after primary school (shorter 3C programs), labeled in LFS with "22".
(2) Medium education (higher secondary and post-secondary, non-tertiary) includes ISCED level "3 Upper secondary (A, B, C)" and "4 Post-secondary, non-tertiary".
(3) Higher education (post-secondary) includes ISCED level 5 and higher levels, i.e. any stage of tertiary education (e.g. BA, BSc, MA, PhD), including vocational ISCED 5B programs which have different names in different countries.
(99) Don't know/Refused

2.3.3.13 age4 (age4)

Long tag: qog_eqi_ind_1013_age4

Original tag: Age4

Description:

Age of respondent (categorical)
(1) 18-29
(2) 30-49
(3) 50-64
(4) 65+
(99) Don't know/Refused

2.3.3.14 income3 (income3)

Long tag: qog_eqi_ind_1013_income3

Original tag: Income3

Description:

Categorical income, country specific
(1) Low

(2) Medium
(3) High
(99) Don't know/Refused

2.3.3.15 population (population)

Long tag: qog_eqi_ind_1013_population

Original tag: Population

Description:
Population in respondent's place
About how many people live in the place the interview was conducted?
(1) Less than 10,000 (rural)
(2) 10,000 - 100,000 (small town or city)
(3) 100,000 - 1,000,000 (large city or urban area)
(4) More than 1,000,000 (very large city or urban area) (99) Don't know/Refused

2.3.3.16 unemployed (unemployed)

Long tag: qog_eqi_ind_1013_unemployed

Original tag: unemployed

Description:
Binary variable on respondent's employment status
(0) Respondent reported being employed
(1) Respondent reported being unemployed

2.3.4 Weights

NA

2.3.4.1 dweight (dweight)

Long tag: qog_eqi_ind_1013_dweight

Original tag: Dweight

Description:
The design weight
For more information on its calculation, please refer to the introduction of this codebook.

2.3.4.2 psweight (psweight)

Long tag: qog_eqi_ind_1013_psweight

Original tag: PSweight

Description:
The post-stratification weight
For more information on its calculation, please refer to the introduction of this codebook.

2.3.4.3 pweight (pweight)

Long tag: qog_eqi_ind_1013_pweight

Original tag: Pweight

Description:
The population weight
For more information on its calculation, please refer to the introduction of this codebook.

2.4 QoG European Quality of Government Index Individual Level (2017)

Dataset tag: qog_eqi_ind_17

Description: This index focuses on both perceptions and experiences with public sector corruption, along with the extent to which citizens believe various public sector services are impartially allocated and of good quality in the EU.

Dataset citation: Charron, N., V. Lapuente P. Annoni (2019). 'Measuring Quality of Government in EU Regions Across Space and Time.' Papers in Regional Science. DOI: 10.1111/pirs.12437

License: The QoG datasets are open and available, free of charge and without a need to register your data. You can use them for your analysis, graphs, teaching, and other academic-related and non-commercial purposes. We ask our users to cite always the original source(s) of the data and our datasets.

We do not allow other uses of these data including but not limited to redistribution, commercialization and other for-profit usage. If a user is interested in such use or has doubts about the license, they will have to refer to the original source and check with them if this is allowed and what requirements they need to fulfill.

Be mindful that the original data sources are the only owners of their data and they can adjust their license without previous warning.

More detailed information on the dataset can be found at the following web page: `https://www.gu.se/en/quality-government/qog-data/data-downloads/european-quality-of-government-index`

2.4.1 Identification Variables

These variables identify the observations in the dataset.

2.4.1.1 Respondent ID (idfinal)

Long tag: qog_eqi_ind_17_idfinal

Original tag: IDFinal

Description:
A unique respondent id number for the 2017 survey

2.4.1.2 Type of Telephone Interview (typetel)

Long tag: qog_eqi_ind_17_typetel

Original tag: TYPETEL

Description:
Whether mobile or landline was used in the interview

2.4.1.3 Country (country)

Long tag: qog_eqi_ind_17_country

Original tag: COUNTRY

Description:
The country of the respondent

2.4.1.4 Language (language)

Long tag: qog_eqi_ind_17_language

Original tag: LANGUAGE

Description:
The language in which the interview was conducted

2.4.1.5 NUTS 2 (d7_nuts2)

Long tag: qog_eqi_ind_17_d7_nuts2

Original tag: D7_NUTS2

Description:
The NUTS 2 abbreviation code of the respondent's residence

2.4.1.6 NUTS 1 (d7_nuts1)

Long tag: qog_eqi_ind_17_d7_nuts1

Original tag: D7_NUTS1

Description:
The NUTS 1 abbreviation code of the respondent's residence

2.4.2 Demographic Variables

Variables in this section provide demographic information about the respondent.

2.4.2.1 Gender (d1)

Long tag: qog_eqi_ind_17_d1

Original tag: D1

Description:
Gender of respondent

2.4.2.2 Age (d3)

Long tag: qog_eqi_ind_17_d3

Original tag: D3

Description:
Age of respondent

2.4.2.3 Age Recoded (rd3)

Long tag: qog_eqi_ind_17_rd3

Original tag: RD3

Description:

Age of respondent (recoded categories) – 1=18-29,
2=30-49,
3=50-64,
4=65+,
99= Don't know/Refused

2.4.2.4 Educational Level (d2)

Long tag: qog_eqi_ind_17_d2

Original tag: D2

Description:

Education level of respondent.
1-Elementary (primary) school or less (no diploma),
2-High (secondary) school (but did not graduated from it),
3-Graduation from high (secondary) school,
4-Graduation from college, university or other third-level institute,
5-Post-graduate degree (Masters, PHD) beyond your initial college degree,
99 Don't know/Refused (2013 only)

2.4.2.5 Household Income (d4)

Long tag: qog_eqi_ind_17_d4

Original tag: D4

Description:

Please tell me your average total household net income per month (after taxes). In Euros (€)

2.4.2.6 Household Income Local Cuurency (d4b)

Long tag: qog_eqi_ind_17_d4b

Original tag: D4B

Description:

Recoded d4 in local currency

2.4.2.7 Household Income Recoded (recoded4)

Long tag: qog_eqi_ind_17_recoded4

Original tag: RECODED4

Description:

Categorical re-code of rd4 income, country specific (1=low, 2=medium, 3=high) (2013 only)

2.4.2.8 Public Sector Organization (d5a)

Long tag: qog_eqi_ind_17_d5a

Original tag: D5A

Description:

As far as your current occupation is concerned, would you say you work in the public sector (a public sector organization is either wholly owned by the public authorities or they have a majority share), the private sector or would you say that you are without a professional activity? (1=public sector,
2=private sector,
3=without professional employment,
99= Don't know/Refused) (2013 only)

2.4.2.9 Public Sector Organization if D5A = 1 (d5b)

Long tag: qog_eqi_ind_17_d5b

Original tag: D5B

Description:

f d5a=1:
(1) Military, soldier
(2) Lawn enforcement, police, fire-fighter
(3) Healthcare worker, doctor
(4) Teacher, academic, researcher
(5) Other government agency
(99) Don't know/Refused

If d5a=2:
(6) Self-employed, small business owner, freelancer

(7) Other private sector employee
(99) Don't know/Refused

If d5a=3:
(8) Currently unemployed
(9) Housewife, houseman
(10) Pensioner, retired
(11) Pupil, student, trainee
(12) Other
(99) Don't know/Refused

2.4.2.10 Population (d6)

Long tag: qog_eqi_ind_17_d6

Original tag: D6

Description:
About how many people live in the place the interview was conducted?
1= <10,000 (rural),
2=10,000-100,000 (small town or city),
3=100,000-1,000,000 (large city or urban area),
4= >1,000,000 (Very large city or urban area),
99=Don't know/Refused (2013 only)

2.4.3 Survey Questions

Survey Question included in the QoG EQI Survey

2.4.3.1 Q1: Public School Enrollment or Employment (q1)

Long tag: qog_eqi_ind_17_q1

Original tag: Q1

Description:
Have you or any of your immediate family been enrolled or employed in the public school system in your area in the past 12 months? (1 yes, 2 no)
99=Don't know/Refused

2.4.3.2 Q2: Use of Public Health Care Services (q2)

Long tag: qog_eqi_ind_17_q2

Original tag: Q2

Description:
In the past 12 months have you or anyone in your immediate family used public health care services in your area? (1 yes, 2 no)
99=Don't know/Refused

2.4.3.3 Q3: Contact with Security or Police Forces (q3)

Long tag: qog_eqi_ind_17_q3

Original tag: Q3

Description:
Have you or anyone in your immediate family had any recent contact (positive or negative) with the security or police forces in your area in the past 12 months? (1 yes, 2 no)
99=Don't know/Refused

2.4.3.4 Q4: Quality of Public Education (q4)

Long tag: qog_eqi_ind_17_q4

Original tag: Q4

Description:
How would you rate the quality of public education in your area? (1-10, with '1' being very poor and '10' being excellent quality)

2.4.3.5 Q5: Quality of Public Health Care (q5)

Long tag: qog_eqi_ind_17_q5

Original tag: Q5

Description:
How would you rate the quality of the public health care system in your area? (1-10, with '1' being very poor and '10' being excellent quality)

2.4.3.6 Q6: Quality of Police Force (q6)

Long tag: qog_eqi_ind_17_q6

Original tag: Q6

Description:

How would you rate the quality of the police force in your area? (1-10, with '1' being very poor and '10' being excellent quality)

2.4.3.7 Q7: Advantages in Education (q7)

Long tag: qog_eqi_ind_17_q7

Original tag: Q7

Description:

Certain people are given special advantages in the public education system in my area. (1-10, with 1 being 'strongly disagree' and 10 being 'strongly agree')

2.4.3.8 Q8: Advantages in Public Health Care (q8)

Long tag: qog_eqi_ind_17_q8

Original tag: Q8

Description:

Certain people are given special advantages in the public health care system in my area (1-10, with 1 being 'strongly disagree' and 10 being 'strongly agree')

2.4.3.9 Q9: Advantages by Police Forces (q9)

Long tag: qog_eqi_ind_17_q9

Original tag: Q9

Description:

The police force gives special advantages to certain people in my area (1-10, with 1 being 'strongly disagree' and 10 being 'strongly agree')

2.4.3.10 Q10: Equal Treatment in Education System (q10)

Long tag: qog_eqi_ind_17_q10

Original tag: Q10

Description:

All citizens are treated equally in the public education system in my area (1-4, Agree, rather agree, rather disagree or Disagree')

2.4.3.11 Q11: Equal Treatment in Public Health Care (q11)

Long tag: qog_eqi_ind_17_q11

Original tag: Q11

Description:

All citizens are treated equally in the public health care system in my area (1-4, Agree, rather agree, rather disagree or Disagree')

2.4.3.12 Q12: Equal Treatment by Police Forces (q12)

Long tag: qog_eqi_ind_17_q12

Original tag: Q12

Description:

All citizens are treated equally by the police force in my area (1-4, Agree, rather agree, rather disagree or Disagree')

2.4.3.13 Q13: Corruption Prevalance in Public School System (q13)

Long tag: qog_eqi_ind_17_q13

Original tag: Q13

Description:

Corruption is prevalent in my area's local public school system (1-10, with 1 being 'strongly disagree' and 10 being 'strongly agree')

2.4.3.14 Q14: Corruption Prevalance in Public Health Care (q14)

Long tag: qog_eqi_ind_17_q14

Original tag: Q14

Description:

Corruption is prevalent in the public health care system in my area (1-10, with 1 being 'strongly disagree' and 10 being 'strongly agree')

2.4.3.15 Q15: Corruption Prevalance among Police Forces (q15)

Long tag: qog_eqi_ind_17_q15

Original tag: Q15

Description:

Corruption is prevalent in the police force in my area (1-10, with 1 being 'strongly disagree' and 10 being 'strongly agree')

2.4.3.16 Q16.1. Corruption for Basic Public Services (q16_1)

Long tag: qog_eqi_ind_17_q16_1

Original tag: Q16_1

Description:

People in my area must use some form of corruption to just to get some basic public services (1-10, with 1 being 'strongly disagree' and 10 being 'strongly agree')

2.4.3.17 Q16.2. Corruption for Unfair Privileges (q16_2)

Long tag: qog_eqi_ind_17_q16_2

Original tag: Q16_2

Description:

Corruption in my area is used to get access to special unfair privileges and wealth. (1-10, with 1 being 'strongly disagree' and 10 being 'strongly agree')

2.4.3.18 Q17.1. Bribery: Asked by Education Services (q17_1)

Long tag: qog_eqi_ind_17_q17_1

Original tag: Q17_1

Description:

In the last 12 months, have you or anyone in your family been asked by a public official to give an informal gift or bribe in
education services? (1 yes/ 2 no) 99 Don't know/Refused

2.4.3.19 Q17.2. Bribery: Asked by Health or Medical Services (q17_2)

Long tag: qog_eqi_ind_17_q17_2

Original tag: Q17_2

Description:

In the last 12 months, have you or anyone in your family been asked by a public official to give an informal gift or bribe in
health or medical services? (1 yes/ 2 no) 99 Don't know/Refused

2.4.3.20 Q17.3. Bribery: Asked by Police (q17_3)

Long tag: qog_eqi_ind_17_q17_3

Original tag: Q17_3

Description:

In the last 12 months, have you or anyone in your family been asked by a public official to give an informal gift or bribe in police? (1 yes/ 2 no) 99 Don't know/Refused

2.4.3.21 Q17.4. Bribery: Asked by Other Government Run Agency (q17_4)

Long tag: qog_eqi_ind_17_q17_4

Original tag: Q17_4

Description:

In the last 12 months, have you or anyone in your family been asked by a public official to give an informal gift or bribe in any other government-run agency? (1 yes/ 2 no) 99 Don't know/Refused

2.4.3.22 Q18.1. Bribery: given to Education Services (q18_1)

Long tag: qog_eqi_ind_17_q18_1

Original tag: Q18_1

Description:

In the last 12 months, have you or anyone in your family given an informal gift or bribe to education services? (1 yes/ 2 no) 99 Don't know/Refused

2.4.3.23 Q18.2. Bribery: Given to Health or Medical Services (q18_2)

Long tag: qog_eqi_ind_17_q18_2

Original tag: Q18_2

Description:
In the last 12 months, have you or anyone in your family given an informal gift or bribe to health or medical services? (1 yes/ 2 no) 99 Don't know/Refused

2.4.3.24 Q18.3. Bribery: Given to Police (q18_3)

Long tag: qog_eqi_ind_17_q18_3

Original tag: Q18_3

Description:
In the last 12 months, have you or anyone in your family given an informal gift or bribe to the police? (1 yes/ 2 no) 99 Don't know/Refused

2.4.3.25 Q18.4. Bribery: Given to Other Government-Run Agency (q18_4)

Long tag: qog_eqi_ind_17_q18_4

Original tag: Q18_4

Description:
In the last 12 months, have you or anyone in your family given an informal gift or bribe to any other government-run agency? (1 yes/ 2 no) 99 Don't know/Refused

2.4.3.26 Q19: Corruption: Elections (q19)

Long tag: qog_eqi_ind_17_q19

Original tag: Q19

Description:
Corruption is NOT present in elections in my area. (1-10, with 1 being 'strongly disagree' and 10 being 'strongly agree')

2.4.3.27 Q20: Equal Treatment by Tax Authorities (q20)

Long tag: qog_eqi_ind_17_q20

Original tag: Q20

Description:
The tax authorities in my **area** treat all people equally (1-10, with 1 being 'strongly disagree' and 10 being 'strongly agree')

2.4.3.28 Q21: News Sources (q21)

Long tag: qog_eqi_ind_17_q21

Original tag: Q21

Description:
From which of the following do you most often get your news?

$$[Randomizeorder\breve{}Singlechoice\breve{}Readout] \tag{1}$$

1. In a print or online newspaper,
2. On the radio,
3. On television,
4. An online social networking site (such as Facebook, Twitter or Youtube) or any other website (blogs..)

2.4.3.29 Q22.1. Trust Others (q22_1)

Long tag: qog_eqi_ind_17_q22_1

Original tag: Q22_1

Description:
On a 1-10 scale, with '1' being 'don't trust at all', and '10' being 'complete trust', how much do you personally trust the other people in your area?

2.4.3.30 Q22.2. Trust National Parliament (q22_2)

Long tag: qog_eqi_ind_17_q22_2

Original tag: Q22_2

Description:
On a 1-10 scale, with '1' being 'don't trust at all', and '10' being 'complete trust', how much do you personally trust the COUNTRY'S parliament?

2.4.3.31 Q22.3. Trust European Union (q22_3)

Long tag: qog_eqi_ind_17_q22_3

Original tag: Q22_3

Description:
On a 1-10 scale, with '1' being 'don't trust at all', and '10' being 'complete trust', how much do you personally trust the European Union?

2.4.3.32 Q22.4. Trust Regional or Local Parliament (q22_4)

Long tag: qog_eqi_ind_17_q22_4

Original tag: Q22_4

Description:
On a 1-10 scale, with '1' being 'don't trust at all', and '10' being 'complete trust', how much do you personally trust your regional/local parliament?

2.4.3.33 Q23.1. Public v Private Ownership (q23_1)

Long tag: qog_eqi_ind_17_q23_1

Original tag: Q23_1

Description:
We'd like to ask you about your views on some issues in the next few questions. Please rate how strongly you agree with the following statements, with '1' being strongly disagree, and '10' being strongly agree. (1-10 scale, 99 Don't know/Refused):

You prefer private ownership of business and industry over state ownership in most cases

2.4.3.34 Q23.2. Government Responsibility to Reduce Income Differences (q23_2)

Long tag: qog_eqi_ind_17_q23_2

Original tag: Q23_2

Description:
We'd like to ask you about your views on some issues in the next few questions. Please rate how strongly you agree with the following statements, with '1' being strongly disagree, and '10' being strongly agree. (1-10 scale, 99 Don't know/Refused):

The government in COUNTRY should take measures to reduce differences in peoples' income.

2.4.3.35 Q23.3. Environmental Protection v Economic Growth (q23_3)

Long tag: qog_eqi_ind_17_q23_3

Original tag: Q23_3

Description:
We'd like to ask you about your views on some issues in the next few questions. Please rate how strongly you agree with the following statements, with '1' being strongly disagree, and '10' being strongly agree. (1-10 scale, 99 Don't know/Refused):

Protecting the environment should always take priority, even at the cost of economic growth

2.4.3.36 Q23.4. Migration (q23_4)

Long tag: qog_eqi_ind_17_q23_4

Original tag: Q23_4

Description:
We'd like to ask you about your views on some issues in the next few questions. Please rate how strongly you agree with the following statements, with '1' being strongly disagree, and '10' being strongly agree. (1-10 scale, 99 Don't know/Refused):

Immigrants contribute a lot to COUNTRY

2.4.3.37 Q23.5. Strong Leader (q23_5)

Long tag: qog_eqi_ind_17_q23_5

Original tag: Q23_5

Description:
We'd like to ask you about your views on some issues in the next few questions. Please rate how strongly you agree with the following statements, with '1' being strongly disagree, and '10' being strongly agree. (1-10 scale, 99 Don't know/Refused):

We need a strong leader with the willingness to punish those who don't behave properly.

2.4.3.38 Q24. State of Economy (q24)

Long tag: qog_eqi_ind_17_q24

Original tag: Q24

Description:
How would you judge the current state of the economy in (YOUR COUNTRY)? (1. Very good,
2. Somewhat good,
3. Somewhat bad,
4. Very bad)

2.4.3.39 Q25. Political Party Preference (q25)

Long tag: qog_eqi_ind_17_q25

Original tag: Q25

Description:
What political party would you vote for if the national parliamentary election were today? (2013 only)

2.4.3.40 Q26.a.1. Randomized Question 1 (q26a1)

Long tag: qog_eqi_ind_17_q26a1

Original tag: Q26A1

Description:
Randomized experimental question – 4 equally-sized random groups – responses:
1. Still vote for preferred party
2. Vote for another established party not involved in the corruption scandal
3. Not vote at all.
99 Don't know/Refused

Now imagine that your preferred party was involved in a corruption scandal where party leaders had given high level jobs to their unqualified friends and family, which of the following would be most likely?

2.4.3.41 Q26.a.2. Randomized Question 2 (q26a2)

Long tag: qog_eqi_ind_17_q26a2

Original tag: Q26A2

Description:
Randomized experimental question – 4 equally-sized random groups – responses:
1. Still vote for preferred party
2. Vote for another established party not involved in the corruption scandal
3. Not vote at all.
99 Don't know/Refused

Now imagine that your preferred party was involved in a corruption scandal where party leaders had been caught with public funds in their personal bank accounts, which of the following would be most likely?

2.4.3.42 Q26.a.3. Randomized Question 3 (q26a3)

Long tag: qog_eqi_ind_17_q26a3

Original tag: Q26A3

Description:
Randomized experimental question – 4 equally-sized random groups – responses:
1. Still vote for preferred party
2. Vote for another established party not involved in the corruption scandal
3. Not vote at all.
99 Don't know/Refused

Now imagine that your preferred party was involved in a corruption scandal where party leaders had been caught taking bribes in exchange for public contracts, which of the following would be most likely?

2.4.3.43 Q26.a.4. Randomized Question 4 (q26a4)

Long tag: qog_eqi_ind_17_q26a4

Original tag: Q26A4

Description:
Randomized experimental question – 4 equally-sized random groups – responses:
1. Still vote for preferred party
2. Vote for another established party not involved in the corruption scandal
3. Not vote at all.
99 Don't know/Refused

Now imagine that that party was involved in a corruption scandal, which of the following would be most likely?

2.4.3.44 Q26.b.1. Follow Up to Randomized Question 1 (q26b_1)

Long tag: qog_eqi_ind_17_q26b_1

Original tag: Q26B_1

Description:

Follow up ONLY if '1' on 26a – could you just tell me if you 'totally agree', 'rather agree', rather disagree' or 'totally disagree' with the following as to why your choice is to still vote for your preferred party?

No other party comes as close to reflecting your political preferences

2.4.3.45 Q26.b.2. Follow Up to Randomized Question 2 (q26b_2)

Long tag: qog_eqi_ind_17_q26b_2

Original tag: Q26B_2

Description:

Follow up ONLY if '1' on 26a – could you just tell me if you 'totally agree', 'rather agree', rather disagree' or 'totally disagree' with the following as to why your choice is to still vote for your preferred party?

The other parties are probably involved in corruption as well

2.4.3.46 Q26.b.3. Follow Up to Randomized Question 3 (q26b_3)

Long tag: qog_eqi_ind_17_q26b_3

Original tag: Q26B_3

Description:

Follow up ONLY if '1' on 26a – could you just tell me if you 'totally agree', 'rather agree', rather disagree' or 'totally disagree' with the following as to why your choice is to still vote for your preferred party?

Corruption as an issue is just not as important as other things, like the economy or jobs

2.4.3.47 Q26.b.4. Follow Up to Randomized Question 4 (q26b_4)

Long tag: qog_eqi_ind_17_q26b_4

Original tag: Q26B_4

Description:

Follow up ONLY if '1' on 26a – could you just tell me if you 'totally agree', 'rather agree', rather disagree' or 'totally disagree' with the following as to why your choice is to still vote for your preferred party?

Your party would most likely deal with the scandal internally and punish those involved

2.4.4 Weights

NA

2.4.4.1 Individual Weights (iweight)

Long tag: qog_eqi_ind_17_iweight

Original tag: Iweight

Description:

Individual weights based on gender and age compared with region's actual population.

The EQI employs a random sampling technique that does not involve quotas (other than NUTS regions) or stratification on demographic categories across individuals, such as gender. The post stratification weights thus help to adjust the sample to better match the population on general demographic characteristics. In this case, gender and age are included (see the variables 'D1' and 'D3'). Population data is taken from Eurostat for all countries. Cross-tabulations from the population data were then collected and put together for each country and region and were compared with that of the cross tabulations in the sample. The Iweights were calculated based on differences between the sample and population cells, such that demographic groups (older males for example) that were over (under) sampled relative to the population receive a lower (higher) weight.

2.4.4.2 Design Weights (dweight)

Long tag: qog_eqi_ind_17_dweight

Original tag: Dweight

Description:

The design weight

Design weights are included to compensate for the fact that certain people have a higher or lower likelihood of being selected for the survey than others. As the EQI survey is one that draws an equal number of respondents from each NUTS 2 (or NUTS 1 region in some cases), respondents do not have the same likelihood of selection within countries. There are an uneven amount of regions across countries and the design weights are country-centric, and are equal to the inverse of the size of a region's population within each country, so that more (less) populous regions receive greater (lesser) weights than rural ones to compensate for the fact that their sample size is equal in the survey data. Although for all analyses it is important to use

the Dweight, it is especially important for country comparisons, means, proportions, etc. to use the design weights, otherwise results will likely be biased.
The Dweight is equal to Population size aged 18 years and above in region X in country Y / Net sample size of region X in country Y. It therefore has a mean value of '1' in each country.

2.4.4.3 Population Weights (pweight)

Long tag: qog_eqi_ind_17_pweight

Original tag: Pweight

Description:

The population weight

The population weight is included for comparisons across countries and is included to adjust for a country's proportion in the sample relative to its actual population of the total population of all countries in the survey. The weights are thus at the country level and do not need to be included for single country, regional level analyses or analyses where comparing country averages of certain survey items are of interest where the country-level is the primary unit of comparison. However, in obtaining sample-wide (or EU-wide) means or proportions, it is recommended to use the population weights.
The Pweight helps to correct for any potential bias in obtaining means, proportion, etc when combining data from two or more countries. Without the Pweight, the researcher risks (most often) over-represent smaller countries at the expense of larger ones. The Pweight thus is included to adjust so that every country is represented in relative proportion to its population size of the countries in the sample for each year. The population size weight is calculated as PWEIGHT = population size aged 18 and above divided by net sample size in country.

2.4.4.4 Post Stratification Weight (psweight)

Long tag: qog_eqi_ind_17_psweight

Original tag: PSweight

Description:

The post stratification weight.

The PSweights are the product of the Iweights and the Dweights.
PSweights are recommended when comparing means, proportions, etc across regions and/or countries to correct for sampling issues. However, for more sophisticated, multilevel statistical analyses, the researcher can/should include additional demographic controls as independent variables in the model, such as income or age for example.

Weighting truncations and re-scaling

To avoid extreme weighting values, all values are truncated at the 99th percentile of the distribution of the originally calculated design and post-stratification weight values. This truncates the weights at the high end at about a value of '5', which effects on 144 cases in the 2017 data. Weights are then divided by the mean value of the sample to adjust for the sample size, giving the mean weight a value of '1'.

Missing data

In the case of missing data, this outcome is coded '99' in the dataset. On the two post-stratification control variables (gender and education) in no case do we find that any country exceeds 1percent of the total observations as missing values, thus we follow the standard practice of MCAR (missing completely at random assumption) and simply drop these observations from the weighting scheme.

2.5 QoG European Quality of Government Index Individual Level (2021)

Dataset tag: qog_eqi_ind_21

Description: This index focuses on both perceptions and experiences with public sector corruption, along with the extent to which citizens believe various public sector services are impartially allocated and of good quality in the EU.

Dataset citation: Charron, Nicholas, Victor Lapuente Monika Bauhr. 2021. Sub-national Quality of Government in EU Member States: Presenting the 2021 European Quality of Government Index and its relationship with Covid-19 indicators. University of Gothenburg: The QoG Working Paper Series 2021:4.

License: The QoG datasets are open and available, free of charge and without a need to register your data. You can use them for your analysis, graphs, teaching, and other academic-related and non-commercial purposes. We ask our users to cite always the original source(s) of the data and our datasets.

We do not allow other uses of these data including but not limited to redistribution, commercialization and other for-profit usage. If a user is interested in such use or has doubts about the license, they will have to refer to the original source and check with them if this is allowed and what requirements they need to fulfill.

Be mindful that the original data sources are the only owners of their data and they can adjust their license without

previous warning.

More detailed information on the dataset can be found at the following web page: `https://www.gu.se/en/quality-government/qog-data/data-downloads/european-quality-of-government-index`

2.5.1 Identification Variables

These variables identify the observations in the dataset.

2.5.1.1 Respondent ID (resp_id)

Long tag: qog_eqi_ind_21_resp_id

Original tag: resp_id

Description:
Respondent ID Number

2.5.1.2 Type of interview (typeinterview)

Long tag: qog_eqi_ind_21_typeinterview

Original tag: typeinterview

Description:
How was the interview conducted?
1. Computer assisted telephone interview(CATI)
2. Online

2.5.1.3 Type of Interview, detailed (typetel)

Long tag: qog_eqi_ind_21_typetel

Original tag: typetel

Description:
Whether mobile or landline was used in the interview.
1. Landline
2. Mobile Phone
3. Online

2.5.1.4 Country of respondents (country)

Long tag: qog_eqi_ind_21_country

Original tag: country

Description:
Unique country code, numeric.
1. Austria
2. Belgium
3. Bulgaria
4. Croatia
5. Cyprus
6. Czechia
7. Denmark
8. Estonia
9. Finland
10. France
11. Germany
12. Greece
13. Hungary
14. Ireland
15. Italy
16. Latvia
17. Lithuania
18. Luxembourg
19. Malta
20. Netherlands
21. Poland
22. Portugal
23. Romania
24. Slovakia
25. Slovenia
26. Spain
27. Sweden

2.5.1.5 Language of interview (language)

Long tag: qog_eqi_ind_21_language

Original tag: language

Description:

The language in which the interview was conducted, numeric.

1. Basque
2. Bulgarian
3. Catalan
4. Croatian
5. Czech
6. Danish
7. Dutch
8. English
9. Estonian
10. Finnish
11. French
12. German
13. Greek
14. Hungarian
15. Italian
16. Lativan
17. Lithuanian
18. Luxembourgish
19. Maltese
20. Polish
21. Portuguese
22. Romanian
23. Russian
24. Slovak
25. Slovene
26. Spanish
27. Swedish

2.5.1.6 EQI regional code (eqiregion)

Long tag: qog_eqi_ind_21_eqiregion

Original tag: EQIregion

Description:

Regional identifier at the level of EQI data.

2.5.1.7 NUTS3 abbreviation Code (nuts3)

Long tag: qog_eqi_ind_21_nuts3

Original tag: NUTS3

Description:

Abbreviation code of NUTS3-level region to which the observation belongs. The Nomenclature of Territorial Units for Statistics, (NUTS), is a geocode standard for referencing the administrative divisions of countries for statistical purposes. NUTS 3: small regions for specific diagnoses.

2.5.1.8 NUTS2 abbreviation Code (nuts2)

Long tag: qog_eqi_ind_21_nuts2

Original tag: NUTS2

Description:

Abbreviation code of NUTS2-level region to which the observation belongs. The Nomenclature of Territorial Units for Statistics, (NUTS), is a geocode standard for referencing the administrative divisions of countries for statistical purposes. NUTS 2: basic regions for the application of regional policies.

2.5.1.9 NUTS1 abbreviation code (nuts1)

Long tag: qog_eqi_ind_21_nuts1

Original tag: NUTS1

Description:

Abbreviation code of NUTS1-level region to which the observation belongs. The Nomenclature of Territorial Units for Statistics, (NUTS), is a geocode standard for referencing the administrative divisions of countries for statistical purposes. NUTS 1: major socio-economic regions.

2.5.1.10 Postcode (postcode)

Long tag: qog_eqi_ind_21_postcode

Original tag: postcode

Description:

Postcode of district that interviewee resides.

2.5.2 Demographic Variables

Variables in this section provide demographic information about the respondent.

2.5.2.1 Gender of respondent (d1)

Long tag: qog_eqi_ind_21_d1

Original tag: d1

Description:
(1) Male
(2) Female

2.5.2.2 Age of respondent (recoded categories) (d2quotas)

Long tag: qog_eqi_ind_21_d2quotas

Original tag: d2quotas

Description:
(1) 18-29
(2) 30-49
(3) 50-64
(4) 65 and above
(99) Don't know/Refused

2.5.2.3 Education of respondent (d3recode)

Long tag: qog_eqi_ind_21_d3recode

Original tag: d3recode

Description:
What is the highest level in school you have completed?
(1) Elementary
(2) Secondary
(3) Third level

2.5.2.4 Household income (d4)

Long tag: qog_eqi_ind_21_d4

Original tag: d4

Description:
Total household net income per month, after taxes. Stated in Euros (€).

2.5.2.5 Categorical re-code of d4(income) (recoded4)

Long tag: qog_eqi_ind_21_recoded4

Original tag: recoded4

Description:
Country-specific, categorical recode of household income, in local currencies. "Don't know/Refused" is coded as 999.

2.5.2.6 Occupation by sector (d5a)

Long tag: qog_eqi_ind_21_d5a

Original tag: d5a

Description:
As far as your current occupation is concerned, would you say you work in the public sector (a public sector organization is either wholly owned by the public authorities or they have a majority share), the private sector or would you say that you are without a professional activity?
(1) Public sector
(2) Private sector
(3) Without professional employment
(99) Don't know/Refused

2.5.2.7 Occupation (IF d5a=1) (d5b)

Long tag: qog_eqi_ind_21_d5b

Original tag: d5b

Description:
If d5a=1:
(1) Military, soldier
(2) Lawn enforcement, police, fire-fighter
(3) Healthcare worker, doctor
(4) Teacher, academic, researcher
(5) Other government agency

(99) Don't know/Refused

If d5a=2:
(6) Self-employed, small business owner, freelancer
(7) Other private sector employee
(99) Don't know/Refused

If d5a=3:
(8) Currently unemployed
(9) Housewife, houseman
(10) Pensioner, retired
(11) Pupil, student, trainee
(12) Other
(99) Don't know/Refused

2.5.2.8 Were you born in (COUNTRY) (d6)

Long tag: qog_eqi_ind_21_d6

Original tag: d6

Description:
About how many people live in the place the interview was conducted?
(1) Yes
(2) No
(99) Don't know/Refused

2.5.2.9 Population (d7)

Long tag: qog_eqi_ind_21_d7

Original tag: d7

Description:
About how many people live in the place the interview was conducted?
(1) Less than 10,000 (rural)
(2) 10,000 - 100,000 (small town or city)
(3) 100,000 - 1,000,000 (large city or urban area)
(4) More than 1,000,000 (very large city or urban area)
(99) Don't know/Refused

2.5.3 Survey Questions

Survey Question included in the QoG EQI Survey

2.5.3.1 Have you or any of your immediate family been enrolled or employed in the public school system in your area in the past 12 months? (q1)

Long tag: qog_eqi_ind_21_q1

Original tag: q1

Description:
(1) Yes
(2) No
(99) Don't know/Refused

2.5.3.2 Have you or any of your immediate family used public health care services in your area in the past 12 months? (q2)

Long tag: qog_eqi_ind_21_q2

Original tag: q2

Description:
(1) Yes
(2) No
(99) Don't know/Refused

2.5.3.3 Have you or anyone in your immediate family had any recent contact (positive or negative) with the security or police forces in your area in the past 12 months? (q3)

Long tag: qog_eqi_ind_21_q3

Original tag: q3

Description:
(1) Yes
(2) No
(99) Don't know/Refused

2.5.3.4 How would you rate the quality of public education in your area? (q4)

Long tag: qog_eqi_ind_21_q4

Original tag: q4

Description:

On a scale from 1 to 10, where 1 means "very poor" and 10 means "excellent".

2.5.3.5 How would you rate the quality of the public health care system in your area? (q5)

Long tag: qog_eqi_ind_21_q5

Original tag: q5

Description:

On a scale from 1 to 10, where 1 means "very poor" and 10 means "excellent".

2.5.3.6 How would you rate the quality of the police force in your area? (q6)

Long tag: qog_eqi_ind_21_q6

Original tag: q6

Description:

On a scale from 1 to 10, where 1 means "very poor" and 10 means "excellent".

2.5.3.7 Certain people are given special advantages in the public education system in my area. (q7)

Long tag: qog_eqi_ind_21_q7

Original tag: q7

Description:

On a scale from 1 to 10, where 1 means "Strongly disagree" and 10 means "Strongly agree".

2.5.3.8 Certain people are given special advantages in the public health care system in my area. (q8)

Long tag: qog_eqi_ind_21_q8

Original tag: q8

Description:

On a scale from 1 to 10, where 1 means "Strongly disagree" and 10 means "Strongly agree".

2.5.3.9 The police force gives special advantages to certain people in my area. (q9)

Long tag: qog_eqi_ind_21_q9

Original tag: q9

Description:

On a scale from 1 to 10, where 1 means "Strongly disagree" and 10 means "Strongly agree".

2.5.3.10 All citizens are treated equally in the public education system in my area. (q10)

Long tag: qog_eqi_ind_21_q10

Original tag: q10

Description:

(1) Agree
(2) Rather Agree
(3) Rather Disagree
(4) Disagree

2.5.3.11 All citizens are treated equally in the public health care system in my area. (q11)

Long tag: qog_eqi_ind_21_q11

Original tag: q11

Description:

(1) Agree
(2) Rather Agree
(3) Rather Disagree
(4) Disagree

2.5.3.12 All citizens are treated equally by the police force in my area. (q12)

Long tag: qog_eqi_ind_21_q12

Original tag: q12

Description:
(1) Agree
(2) Rather Agree
(3) Rather Disagree
(4) Disagree

2.5.3.13 In the area where I live, elections are conducted freely and fairly. (q13)

Long tag: qog_eqi_ind_21_q13

Original tag: q13

Description:
(1) Agree
(2) Rather Agree
(3) Rather Disagree
(4) Disagree

2.5.3.14 Corruption is prevalent in my area's local public school system. (q14)

Long tag: qog_eqi_ind_21_q14

Original tag: q14

Description:
On a scale from 1 to 10, where 1 means "Strongly disagree" and 10 means "Strongly agree".

2.5.3.15 Corruption is prevalent in the public health care system in my area. (q15)

Long tag: qog_eqi_ind_21_q15

Original tag: q15

Description:
On a scale from 1 to 10, where 1 means "Strongly disagree" and 10 means "Strongly agree".

2.5.3.16 Corruption is prevalent in the police force in my area. (q16)

Long tag: qog_eqi_ind_21_q16

Original tag: q16

Description:
On a scale from 1 to 10, where 1 means "Strongly disagree" and 10 means "Strongly agree".

2.5.3.17 People in my area must use some form of corruption to just to get some basic public services. (q17_1)

Long tag: qog_eqi_ind_21_q17_1

Original tag: q17_1

Description:
On a scale from 1 to 10, where 1 means "Strongly disagree" and 10 means "Strongly agree".

2.5.3.18 Corruption in my area is used to get access to special unfair privileges and wealth. (q17_2)

Long tag: qog_eqi_ind_21_q17_2

Original tag: q17_2

Description:
On a scale from 1 to 10, where 1 means "Strongly disagree" and 10 means "Strongly agree".

2.5.3.19 In the last 12 months, have you or anyone in your family been asked by a public official to give an informal gift or bribe in schools and other education services? (q18_1)

Long tag: qog_eqi_ind_21_q18_1

Original tag: q18_1

Description:
(1) Yes
(2) No
(99) Don't know/Refused

2.5.3.20 In the last 12 months, have you or anyone in your family been asked by a public official to give an informal gift or bribe in health or medical services? (q18_2)

Long tag: qog_eqi_ind_21_q18_2

Original tag: q18_2

Description:
(1) Yes

(2) No
(99) Don't know/Refused

2.5.3.21 In the last 12 months, have you or anyone in your family been asked by a public official to give an informal gift or bribe in police authorities? (q18_3)

Long tag: qog_eqi_ind_21_q18_3

Original tag: q18_3

Description:
(1) Yes
(2) No
(99) Don't know/Refused

2.5.3.22 In the last 12 months, have you or anyone in your family been asked by a public official to give an informal gift or bribe in any other government-run agency? (q18_4)

Long tag: qog_eqi_ind_21_q18_4

Original tag: q18_4

Description:
(1) Yes
(2) No
(99) Don't know/Refused

2.5.3.23 In the last 12 months, have you or anyone in your family given an informal gift or bribe to schools or other education services? (q19_1)

Long tag: qog_eqi_ind_21_q19_1

Original tag: q19_1

Description:
(1) Yes
(2) No
(99) Don't know/Refused

2.5.3.24 In the last 12 months, have you or anyone in your family given an informal gift or bribe to health or medical services? (q19_2)

Long tag: qog_eqi_ind_21_q19_2

Original tag: q19_2

Description:
(1) Yes
(2) No
(99) Don't know/Refused

2.5.3.25 In the last 12 months, have you or anyone in your family given an informal gift or bribe to police? (q19_3)

Long tag: qog_eqi_ind_21_q19_3

Original tag: q19_3

Description:
(1) Yes
(2) No
(99) Don't know/Refused

2.5.3.26 In the last 12 months, have you or anyone in your family given an informal gift or bribe to any other government-run agency? (q19_4)

Long tag: qog_eqi_ind_21_q19_4

Original tag: q19_4

Description:
(1) Yes
(2) No
(99) Don't know/Refused

2.5.3.27 Changing topics a bit, how would you judge the current state of the economy in the area where you live? (q20)

Long tag: qog_eqi_ind_21_q20

Original tag: q20

Description:
(1) Very good
(2) Somewhat good

(3) Somewhat bad
(4) Very bad
(99) Don't know/Refused

2.5.3.28 What political party would you vote for if the national parliamentary election were today? (q21)

Long tag: qog_eqi_ind_21_q21

Original tag: q21

Description:
Each respondent hears a pre-coded list of all actual political parties, including an "other" (not speci- fied) and a "don't know/refused".

2.5.3.29 On a 1 to 10 scale, with '1' being 'no confidence at all', and '10' being 'complete confidence' to do the right thing, how much confidence do you personally have in (COUNTRY's) parliament? (q22_1)

Long tag: qog_eqi_ind_21_q22_1

Original tag: q22_1

Description:
On a scale from 1 to 10, where 1 means "No confidence" and 10 means "Complete confidence".

2.5.3.30 On a 1 to 10 scale, with '1' being 'no confidence at all', and '10' being 'complete confidence' to do the right thing, how much confidence do you personally have in other people in your area? (q22_2)

Long tag: qog_eqi_ind_21_q22_2

Original tag: q22_2

Description:
On a scale from 1 to 10, where 1 means "No confidence" and 10 means "Complete confidence".

2.5.3.31 People might feel different levels of attachment to where they live and to Europe, on a scale of 1-10 with '1' being 'not at all' and '10' being 'very attached', how closely attached do you feel about (COUNTRY)? (q23_1)

Long tag: qog_eqi_ind_21_q23_1

Original tag: q23_1

Description:
On a scale from 1 to 10, where 1 means "Not at all" and 10 means "Very attached".

2.5.3.32 People might feel different levels of attachment to where they live and to Europe, on a scale of 1-10 with '1' being 'not at all' and '10' being 'very attached', how closely attached do you feel about your region in (COUNTRY)? (q23_2)

Long tag: qog_eqi_ind_21_q23_2

Original tag: q23_2

Description:
n a scale from 1 to 10, where 1 means "Not at all" and 10 means "Very attached".

2.5.3.33 People might feel different levels of attachment to where they live and to Europe, on a scale of 1-10 with '1' being 'not at all' and '10' being 'very attached', how closely attached do you feel about Europe? (q23_3)

Long tag: qog_eqi_ind_21_q23_3

Original tag: q23_3

Description:
n a scale from 1 to 10, where 1 means "Not at all" and 10 means "Very attached".

2.5.3.34 The government in (COUNTRY) should reduce differences in peoples' incomes by taxing wealthier people and then providing welfare to the poor. (q25)

Long tag: qog_eqi_ind_21_q25

Original tag: q25

Description:
On a scale from 1 to 10, where 1 means "Strongly disagree" and 10 means "Strongly agree".

2.5.3.35 Governments should control prices and wages. (q26)

Long tag: qog_eqi_ind_21_q26

Original tag: q26

Description:
On a scale from 1 to 10, where 1 means "Strongly disagree" and 10 means "Strongly agree".

2.5.3.36 On whole, (COUNTRY) is worse-off by people coming to live here from other countries. (q27)

Long tag: qog_eqi_ind_21_q27

Original tag: q27

Description:

On a scale from 1 to 10, where 1 means "Strongly disagree" and 10 means "Strongly agree".

2.5.3.37 Gays and lesbians should be allowed to marry legally. (q28)

Long tag: qog_eqi_ind_21_q28

Original tag: q28

Description:

On a scale from 1 to 10, where 1 means "Strongly disagree" and 10 means "Strongly agree".

2.5.3.38 We'd be better off if we went back to living according to (COUNTRY's) traditional values. (q30)

Long tag: qog_eqi_ind_21_q30

Original tag: q30

Description:

On a scale from 1 to 10, where 1 means "Strongly disagree" and 10 means "Strongly agree".

2.5.3.39 Personally, how worried are you about the effect of the COVID-19 virus on your own or your family's health? (q31_1)

Long tag: qog_eqi_ind_21_q31_1

Original tag: q31_1

Description:

(1) Very worried
(2) Somewhat worried
(3) Not so worried
(4) Not at all worried
(99) Don't know/Refused

2.5.3.40 Personally, how worried are you about the effect of the COVID-19 virus on your own or your family's economic situation? (q31_2)

Long tag: qog_eqi_ind_21_q31_2

Original tag: q31_2

Description:

(1) Very worried
(2) Somewhat worried
(3) Not so worried
(4) Not at all worried
(99) Don't know/Refused

2.5.3.41 How would you rate how the authorities are handling the COVID-19 virus in your area? (q32)

Long tag: qog_eqi_ind_21_q32

Original tag: q32

Description:

(1) Very good
(2) Somewhat good
(3) Somewhat bad
(4) Very bad
(99) Don't know/Refused

2.5.3.42 Length of survey (length)

Long tag: qog_eqi_ind_21_length

Original tag: length

Description:

Length of survey in seconds, only for online survey.

2.5.4 Weights

NA

2.5.4.1 The design weight (dweight)

Long tag: qog_eqi_ind_21_dweight

Original tag: Dweight

Description:

Design weights are included to compensate for the fact that certain people have a higher or lower likelihood of being selected for the survey than others. Please check section 1.4 of this codebook for detailed information on design weights.

2.5.4.2 The population weight (country) (pweight)

Long tag: qog_eqi_ind_21_pweight

Original tag: Pweight

Description:

The population weight is included for comparisons across countries and is included to adjust for a country's proportion in the sample relative to its actual population of the total population of all countries in the survey. Please check section 1.4 of this codebook for detailed information on population weights.

2.5.4.3 The post-stratification weight by survey admin (age, gender, education) (psweight_a)

Long tag: qog_eqi_ind_21_psweight_a

Original tag: PSweight_a

Description:

The individual post stratification weights help to adjust the sample to better match the population on general demographic characteristics. Please check section 1.4 of this codebook for detailed information on stratification weights.

2.5.4.4 The post-stratification weight overall(age, gender, education) (psweight_o)

Long tag: qog_eqi_ind_21_psweight_o

Original tag: PSweight_o

Description:

The individual post stratification weights help to adjust the sample to better match the population on general demographic characteristics. Please check section 1.4 of this codebook for detailed information on stratification weights.

2.5.4.5 Partisanship weight (party_w)

Long tag: qog_eqi_ind_21_party_w

Original tag: Party_W

Description:

This variable indicates a respondent's weight for their preferred political party (asked in each EQI survey in a closed question with a specific list of sitting parties and any new parties expected to reach parliament) in the sample in relation to their party's proportional support in the population. Please check section 1.4 of this codebook for detailed information on partisanship weights.

2.5.4.6 Partisanship weight, truncated (party_w_truc)

Long tag: qog_eqi_ind_21_party_w_truc

Original tag: Party_W_truc

Description:

This variable indicates a respondent's weight for their preferred political party (asked in each EQI survey in a closed question with a specific list of sitting parties and any new parties expected to reach parliament) in the sample in relation to their party's proportional support in the population. Please check section 1.4 of this codebook for detailed information on partisanship weights.

2.6 QoG European Quality of Government Index Regional Level (2010, 2013, 2017 2021)

Dataset tag: qog_eqi_long

Description: This index focuses on both perceptions and experiences with public sector corruption, along with the extent to which citizens believe various public sector services are impartially allocated and of good quality in the EU.

Dataset citation: Charron, Nicholas, Victor Lapuente Monika Bauhr. 2021. Sub-national Quality of Government in EU Member States: Presenting the 2021 European Quality of Government Index and its relationship with Covid-19 indicators. University of Gothenburg: The QoG Working Paper Series 2021:4.

License: The QoG datasets are open and available, free of charge and without a need to register your data. You can use them for your analysis, graphs, teaching, and other academic-related and non-commercial purposes. We ask our

users to cite always the original source(s) of the data and our datasets.

We do not allow other uses of these data including but not limited to redistribution, commercialization and other for-profit usage. If a user is interested in such use or has doubts about the license, they will have to refer to the original source and check with them if this is allowed and what requirements they need to fulfill.

Be mindful that the original data sources are the only owners of their data and they can adjust their license without previous warning.

More detailed information on the dataset can be found at the following web page: `https://www.gu.se/en/quality-government/qog-data/data-downloads/european-quality-of-government-index`

2.6.1 Identification Variables

This section includes variables which identify observations by year, country, and region.

2.6.1.1 NUTS code of region (region_code)

Long tag: qog_eqi_long_region_code

Original tag: region_code

Description:

Numerical code of the region to which the observation belongs. The Nomenclature of Territorial Units for Statistics, (NUTS), is a geocode standard for referencing the administrative divisions of countries for statistical purposes.

2.6.1.2 Name of region (name)

Long tag: qog_eqi_long_name

Original tag: name

Description:

Name of the region in English.

2.6.1.3 Year (year)

Long tag: qog_eqi_long_year

Original tag: year

Description:

Year of observation. If you are using data from previous waves (2010, 2013 and 2017), please also check "Suggestion Citation for Previous Waves".

2.6.1.4 EQI region code (eqiregion)

Long tag: qog_eqi_long_eqiregion

Original tag: EQIregion

Description:

EQI region code.

2.6.1.5 NUTS Level (nuts_level)

Long tag: qog_eqi_long_nuts_level

Original tag: nuts_level

Description:

To what level of NUTS belong observation. The Nomenclature of Territorial Units for Statistics, (NUTS), is a geocode standard for referencing the administrative divisions of countries for statistical purposes.
(0) Country level
(1) Major socio-economic regions
(2) Basic regions for the application of regional policies

2.6.1.6 NUTS0 abbreviation code (nuts0)

Long tag: qog_eqi_long_nuts0

Original tag: nuts0

Description:

Code of NUTS0 level region to which the observation belongs. The Nomenclature of Territorial Units for Statistics, (NUTS), is a geocode standard for referencing the administrative divisions of countries for statistical purposes. NUTS 0: country level.

2.6.1.7 NUTS1 abbreviation code (nuts1)

Long tag: qog_eqi_long_nuts1

Original tag: nuts1

Description:
Code of NUTS1 level region to which the observation belongs. The Nomenclature of Territorial Units for Statistics, (NUTS), is a geocode standard for referencing the administrative divisions of countries for statistical purposes. NUTS 1: major socio-economic regions.

2.6.1.8 NUTS2 abbreviation code (nuts2)

Long tag: qog_eqi_long_nuts2

Original tag: nuts2

Description:
Code of NUTS2 level region to which the observation belongs. The Nomenclature of Territorial Units for Statistics, (NUTS), is a geocode standard for referencing the administrative divisions of countries for statistical purposes. NUTS 2: basic regions for the application of regional policies.

2.6.1.9 Name of the country (cname)

Long tag: qog_eqi_long_cname

Original tag: cname

Description:
Name of the country where the region is located in English.

2.6.2 Regional Level Variables

This section includes QoG EQI regional-level variables.

2.6.2.1 European Quality Index (EQI) (eqi)

Long tag: qog_eqi_long_eqi

Original tag: EQI

Description:
Final EQI index (centered around WGI), all units. The construction of EQI Index starts by taking the country average from the WGI data for four indicators: 'control of corruption', 'government effectiveness', 'rule of law' and 'voice and accountability' and combine the four into one composite index (equal weighting). Then, the combined WGI data is standardized for the EU sample. This figure is used as country's mean score in the EQI for all 30 countries4.
In previous rounds, we then took the standardized sample mean for 2015 WGI data and set each country's national average as such. A key difference in this round (and retrospectively in other two rounds) we now aggregate to the WGI at the pillar levels of corruption impartiality and quality in order to better make use of these three distinct concepts empirically.
The regional data itself combines 18 survey questions about QoG in the region. In building the regional index, we re-score each variable so that higher numbers equate to higher QoG and then the 18 questions/indicators to three pillars based on factor analysis, then we averaged these three pillars together to form the final index figure for each region. After each stage of aggregation, the data are standardized.
For data for the regional pillars' score for each of the countries included in the 2017 regional survey, weighting each region's score by their share of the national population. This figure is thus used to explain regional variation only within each country included (not absolute levels of QoG). We then subtract this mean score from each region's individual pillar score from the regional study, which shows if the region is above or below its national average and by how much. This figure is then added to the national level, WGI data, so each region has an adjusted score for each of the three pillars, centered on the respective WGI indicators. It is worth mentioning that none of the regional variation from the regional index is lost during this merging process; the country mean of all regional scores is simply adjusted. The formula employed is the following:

$$EQI_{regionXincountryY} = WGI_{countryY} + (Rqog_{regionXincountryY} CRqog_{countryY}) \quad (2)$$

where 'EQI' is the final score from each region or country in each pillar –corruption, impartiality and quality - of the EQI. 'WGI' is the World Bank's national average for each country for each pillar, while 'Rqog' is each region's score from the regional survey and 'CRqog' is the country average (weighted by regional population) of all regions within the country from the regional survey for each pillar. The EQI pillars are standardized so that the mean is '0' with a standard deviation of '1'. The three pillar scores are then aggregated using equal weighting.

2.6.2.2 Lower boundary of margin of error, EQI (eqi_low_me)

Long tag: qog_eqi_long_eqi_low_me

Original tag: EQI_low_me

Description:
Lower boundary of margin of error for EQI score.

2.6.2.3 Upper boundary of margin of error, EQI (eqi_high_me)

Long tag: qog_eqi_long_eqi_high_me

Original tag: EQI_high_me

Description:
Upper boundary of margin of error for EQI score.

2.6.2.4 Quality pillar (qualityp)

Long tag: qog_eqi_long_qualityp

Original tag: qualityp

Description:
Quality pillar, country centered and z-score standardized. We aggregate the individual scores ('survey question') to the corresponding regional level, so that each of question on the quality of public services is now a regional 'indicator'. After normalizing each of quality indicators (through z-score standardization) so that they share a common range, the quality indicators are aggregated into 'quality pillar'.

2.6.2.5 Impartiality pillar (impartialityp)

Long tag: qog_eqi_long_impartialityp

Original tag: impartialityp

Description:
Impartiality pillar, country centered and z-score standardized. We aggregate the individual scores ('survey question') to the corresponding regional level, so that each of question assessing impartiality in the provision of public services is now a regional 'indicator'. After normalizing each of impartiality indicators (through z-score standardization) so that they share a common range, the impartiality indicators are aggregated into 'impartiality pillar'.

2.6.2.6 Corruption pillar (corruptionp)

Long tag: qog_eqi_long_corruptionp

Original tag: corruptionp

Description:
Corruption pillar, country centered and z-score standardized. We aggregate the individual scores ('survey question') to the corresponding regional level, so that each of question assessing corruption in the provision of public services is now a regional 'indicator'. After normalizing each of corruption indicators (through z-score standardization) so that they share a common range, the corruption indicators are aggregated into two sub-pillars, called 'experience' and 'perceptions. They respectively represent question items reflecting personal experience with petty corruption versus perception of corruption in various other areas. These two sub-pillars are aggregated using equal weighting.

2.6.2.7 Corruption perception sub-pillar (corruption_subexp)

Long tag: qog_eqi_long_corruption_subexp

Original tag: corruption_subExp

Description:
Corruption perceptions index, z-score standardized. It constitutes one of the sub-pillars of corruption pillar.

2.6.2.8 Corruption experience sub-pillar (corruption_subper)

Long tag: qog_eqi_long_corruption_subper

Original tag: corruption_subPer

Description:
Corruption experiences index, z-score standardized. It constitutes one of the sub-pillars of corruption pillar.

2.7 QoG EU Regional Dataset Long Data

Dataset tag: qog_eureg_long

Description: The QoG EU Regional dataset is a dataset consisting of more than 300 variables covering three levels of European regions - Nomenclature of Territorial Units for Statistics (NUTS): NUTS0 (country), NUTS1(major socio-economic regions) and NUTS2 (basic regions for the application of regional policies).

The QoG Regional Data is presented in three different forms available in separate datasets. The variable are the same across all three dataset besides a varying suffix (_nuts0, _nuts1, _nuts2) indication which NUTS level is represented. All datasets are available in time-series format. The first one (The QoG Regional Data - Long Form) is a dataset where data is presented in the long form. The list of units of analysis contains regions of all NUTS levels.
Two other datasets are presented in the wide form for multilevel analysis. In the second dataset (The QoG Regional Data - Wide Form NUTS1) includes NUTS1 level as the unit of analysis and variables represent the values for this level and corresponding lower level – NUTS0. As an example, in this dataset the data is presented only for East Sweden(Ostra Sverige SE1), as a unit of analysis and has values for lower levels of this region - Sweden (SE).
In the third dataset (The QoG Regional Data - Wide Form NUTS2) the unit of analysis is NUTS2 level regions and variables provide values as for every unit of analysis, as well as for corresponding lower NUTS levels: NUTS1 and NUTS0. One example of unit of analysis in this dataset is Stockholm (SE11) and data for every variable will be for Stockholm, as well as for lower level regions - East Sweden (Ostra Sverige SE1) and Sweden (SE).

Dataset citation: Charron, Nicholas, Stefan Dahlberg, Aksel Sundström, Sören Holmberg, Bo Rothstein, Natalia Alvarado Pachon Cem Mert Dalli. 2020. The Quality of Government EU Regional Dataset, version Nov20. University of Gothenburg: The Quality of Government Institute, https://www.gu.se/en/quality-government doi:10.18157/qogeuregnov20

License: The QoG datasets are open and available, free of charge and without a need to register your data. You can use them for your analysis, graphs, teaching, and other academic-related and non-commercial purposes. We ask our users to cite always the original source(s) of the data and our datasets.

We do not allow other uses of these data including but not limited to redistribution, commercialization and other for-profit usage. If a user is interested in such use or has doubts about the license, they will have to refer to the original source and check with them if this is allowed and what requirements they need to fulfill.

Be mindful that the original data sources are the only owners of their data and they can adjust their license without previous warning.

More detailed information on the dataset can be found at the following web page: `https://www.gu.se/en/quality-government/qog-data/data-downloads/eu-regional-dataset`

2.7.1 Identification

Identification variables in the dataset.

2.7.1.1 NUTS code of region (region_code)

Long tag: qog_eureg_long_region_code

Original tag: region_code

Description:

NUTS code of region. The Nomenclature of Territorial Units for Statistics, (NUTS), is a geocode standard for referencing the administrative divisions of countries for statistical purposes.

2.7.1.2 Name of the region (region_name)

Long tag: qog_eureg_long_region_name

Original tag: region_name

Description:

Name of the region in the language of the country.

2.7.1.3 Year (year)

Long tag: qog_eureg_long_year

Original tag: year

Description:

Year of observation

2.7.1.4 The Nomenclature of Territorial Units for Statistics (NUTS) level (level)

Long tag: qog_eureg_long_level

Original tag: level

Description:

To what level of NUTS belong observation. The Nomenclature of Territorial Units for Statistics, (NUTS), is a geocode standard for referencing the administrative divisions of countries for statistical purposes.
(0) Country level;
(1) Major socio-economic regions;
(2) Basic regions for the application of regional policies.

2.7.1.5 Code of NUTS0 level region (nuts0)

Long tag: qog_eureg_long_nuts0

Original tag: nuts0

Description:

Code of NUTS0 level region to which the observation belongs. The Nomenclature of Territorial Units for Statistics, (NUTS), is a geocode standard for referencing the administrative divisions of countries for statistical purposes. NUTS 0: country level.

2.7.1.6 Code of NUTS1 level region (nuts1)

Long tag: qog_eureg_long_nuts1

Original tag: nuts1

Description:

Code of NUTS1 level region to which the observation belongs. The Nomenclature of Territorial Units for

Statistics, (NUTS), is a geocode standard for referencing the administrative divisions of countries for statistical purposes. NUTS 1: major socio-economic regions.

2.7.1.7 Code of NUTS2 level region (nuts2)

Long tag: qog_eureg_long_nuts2

Original tag: nuts2

Description:

Code of NUTS2 level region to which the observation belongs. The Nomenclature of Territorial Units for Statistics, (NUTS), is a geocode standard for referencing the administrative divisions of countries for statistical purposes. NUTS 2: basic regions for the application of regional policies.

2.7.1.8 Country name (cname)

Long tag: qog_eureg_long_cname

Original tag: cname

Description:

Name of the country in English

2.7.2 Quality of Government

This category includes variables that are the core features of QoG (impartiality, bureaucratic quality and corruption) as well as measures that are broader (rule of law and transparency).

2.7.2.1 Number of awarded contracts above 130,000 EUR (cri_contr)

Long tag: qog_eureg_long_cri_contr

Original tag: cri_contr

Description:

Number of successfully awarded contracts within tenders published on TED above 130k EUR threshold.

2.7.2.2 Final value of awarded tenders of over 130,000 EUR (cri_cvalue)

Long tag: qog_eureg_long_cri_cvalue

Original tag: cri_cvalue

Description:

Sum of the final value of successfully awarded tenders published on TED above 130k EUR threshold.

2.7.2.3 Share of contracts with only one bid in total (cri_singleb)

Long tag: qog_eureg_long_cri_singleb

Original tag: cri_singleb

Description:

Share of contracts with only one bid in total.

2.7.2.4 Share of contracts with no published call for tender red flag (cri_nocall)

Long tag: qog_eureg_long_cri_nocall

Original tag: cri_nocall

Description:

Share of contracts with “no published call for tender” red flag. Contract is considered to have “no call for tender” red flag if two conditions are met: i) sum of prior information notices and contract notices equals 0 and ii) country of a buyer is not on the list of countries in which “no call for tender publication” is not a risk factor. These countries are BG, DK, EE, ES, LT.

2.7.2.5 Share of contracts with non-open procedure red flag (cri_nonopen)

Long tag: qog_eureg_long_cri_nonopen

Original tag: cri_nonopen

Description:

Share of contracts with “non-open procedure” red flag. Whether procedure is considered non-open depends on procedure type as well as specific country regulation. Please refer to the “Non-open procedure details” sheet to search for country-procedure combinations.

2.7.2.6 Share of contracts with tax haven red flag (cri_taxhav)

Long tag: qog_eureg_long_cri_taxhav

Original tag: cri_taxhav

Description:

Share of contracts with “tax haven” red flag. Contract has “tax haven” red flag in case two conditions are

met: i) buyer and supplier are from different countries and ii) according to Financial Secrecy Index (https://www.financialsecrecyindex.com/en/) supplier country was classified as tax haven.

2.7.2.7 EQI Index Score (eqi_score)

Long tag: qog_eureg_long_eqi_score

Original tag: eqi_score

Description:

Final score of European Quality Index (centered around WGI), all units. Detailed information on its calculation method and indicators used for this aggregation can be found in "European Quality of Government Index 2017 Codebook".

2.7.2.8 Quality pillar, country centered and z-score standardized (eqi_zquality)

Long tag: qog_eureg_long_eqi_zquality

Original tag: eqi_zquality

Description:

EQI quality pillar, country centered and z-score standardized. For its calculation, they aggregate the individual scores ('survey question') to the corresponding regional level, so that each of question on the quality of public services is now a regional 'indicator'. After normalizing each of quality indicators (through z-score standardization) so that they share a common range, the quality indicators are aggregated into 'quality pillar'.

2.7.2.9 Impartiality pillar, country centered and z-score standardized (eqi_zimpartiality)

Long tag: qog_eureg_long_eqi_zimpartiality

Original tag: eqi_zimpartiality

Description:

EQI impartiality pillar, country centered and z-score standardized. For its calculation, they aggregate the individual scores ('survey question') to the corresponding regional level, so that each of question assessing impartiality in the provision of public services is now a regional 'indicator'. After normalizing each of impartiality indicators (through z-score standardization) so that they share a common range, the impartiality indicators are aggregated into 'impartiality pillar'.

2.7.2.10 Corruption pillar, country centered and z-score standardized (eqi_zcorruption)

Long tag: qog_eureg_long_eqi_zcorruption

Original tag: eqi_zcorruption

Description:

EQI corruption pillar, country centered and z-score standardized. For its calculation, they aggregate the individual scores ('survey question') to the corresponding regional level, so that each of question assessing corruption in the provision of public services is now a regional 'indicator'. After normalizing each of corruption indicators (through z-score standardization) so that they share a common range, the corruption indicators are aggregated into two sub-pillars, called 'experience' and 'perceptions. They respectively represent question items reflecting personal experience with petty corruption versus perception of corruption in various other areas. These two sub-pillars are aggregated using equal weighting.

2.7.2.11 Corruption perceptions index (corruption sub-pillar) z-score stand. (2017 only) (eqi_zcorruptper)

Long tag: qog_eureg_long_eqi_zcorruptper

Original tag: eqi_zcorruptper

Description:

EQI corruption perceptions index, z-score standardized. It constitutes one of the sub-pillars of corruption pillar.

2.7.2.12 Corruption experiences index (corruption sub-pillar) z-score stand. (2017 only) (eqi_zcorruptexp)

Long tag: qog_eureg_long_eqi_zcorruptexp

Original tag: eqi_zcorruptexp

Description:

EQI corruption experiences index, z-score standardized. It constitutes one of the sub-pillars of corruption pillar.

2.7.2.13 EQI index, min-max (0-100) standardized (eqi_norm_eqi)

Long tag: qog_eureg_long_eqi_norm_eqi

Original tag: eqi_norm_eqi

Description:

EQI index, min-max (0-100) standardized. Detailed information on its calculation method and indicators used for this aggregation can be found in "European Quality of Government Index 2017 Codebook".

2.7.2.14 Quality pillar, country centered and min-max (0-100) standardized (eqi_norm_qual)

Long tag: qog_eureg_long_eqi_norm_qual

Original tag: eqi_norm_qual

Description:
Quality pillar, country centered and min-max (0-100) standardized.

2.7.2.15 Impartiality pillar, country centered and min-max (0-100) standardized (eqi_norm_impart)

Long tag: qog_eureg_long_eqi_norm_impart

Original tag: eqi_norm_impart

Description:
Impartiality pillar, country centered and min-max (0-100) standardized.

2.7.2.16 Corruption pillar, country centered and min-max (0-100) standardized (eqi_norm_corrupt)

Long tag: qog_eureg_long_eqi_norm_corrupt

Original tag: eqi_norm_corrupt

Description:
Corruption pillar, country centered and min-max (0-100) standardized.

2.7.2.17 Corruption perceptions index (corruption sub-pillar) min-max (0-100)(2017) (eqi_norm_corruptper)

Long tag: qog_eureg_long_eqi_norm_corruptper

Original tag: eqi_norm_corruptper

Description:
Corruption perceptions index (corruption sub-pillar), min-max (0-100) standardized.

2.7.2.18 Corruption experiences index (corruption sub-pillar) min-max (0-100) (2017) (eqi_norm_corruptexp)

Long tag: qog_eureg_long_eqi_norm_corruptexp

Original tag: eqi_norm_corruptexp

Description:
Corruption experiences index (corruption sub-pillar) min-max (0-100) standardized.

2.7.3 Demographics

This category includes variables describing the demographic characteristics of a population, such as its size, life-expectancy, fertility rates and death rates.

2.7.3.1 Reported number of cases of burglary of private premises (eu_cri_bur)

Long tag: qog_eureg_long_eu_cri_bur

Original tag: eu_cri_bur

Description:
Reported number of cases of burglary of private premises. Domestic burglary is defined as gaining access to a dwelling by the use of force to steal goods.

2.7.3.2 Reported number of cases of intentional homicide (eu_cri_inthom)

Long tag: qog_eureg_long_eu_cri_inthom

Original tag: eu_cri_inthom

Description:
Reported number of cases of intentional homicide. It is defined as intentional killing of a person, including murder, manslaughter, euthanasia and infanticide. Causing death by dangerous driving is excluded, as are abortion and help with suicide. Attempted (uncompleted) homicide is also excluded. The counting unit for homicide is normally the victim (rather than the case).

2.7.3.3 Reported number of cases of robbery (eu_cri_rob)

Long tag: qog_eureg_long_eu_cri_rob

Original tag: eu_cri_rob

Description:
Reported number of cases of robbery. Robbery is a sub-set of violent crime (see above). It is defined as stealing from a person with force or threat of force, including muggings (bag-snatching) and theft with violence. Pick-pocketing, extortion and blackmailing are generally not included.

2.7.3.4 Proportion of live births outside marriage (eu_agemoth)

Long tag: qog_eureg_long_eu_agemoth

Original tag: eu_agemoth

Description:

Proportion of live births outside marriage. A live birth outside marriage is defined as a live birth where the mother's marital status at the time of birth is other than married.

2.7.3.5 Total fertility rate (eu_agemoth1)

Long tag: qog_eureg_long_eu_agemoth1

Original tag: eu_agemoth1

Description:

Total fertility rate. It is defined as the mean number of children who would be born to a woman during her lifetime, if she were to spend her childbearing years conforming to the age-specific fertility rates, that have been measured in a given year.

2.7.3.6 Mean age of women at childbirth (eu_nmarpct)

Long tag: qog_eureg_long_eu_nmarpct

Original tag: eu_nmarpct

Description:

Mean age of women at childbirth. It is calculated as the mean age of women when their children are born.

2.7.3.7 Mean age of women at birth of first child (eu_totferrt)

Long tag: qog_eureg_long_eu_totferrt

Original tag: eu_totferrt

Description:

Mean age of women at birth of first child. It is calculated as the mean age of women when their first children are born.

2.7.3.8 Number of deaths of females, all ages (eu_death_totalf)

Long tag: qog_eureg_long_eu_death_totalf

Original tag: eu_death_totalf

Description:

Number of deaths of females, all ages. Death means the permanent disappearance of all evidence of life at any time after life birth has taken place (postnatal cessation of vital functions without capability of resuscitation).

2.7.3.9 Number of deaths of males, all ages (eu_death_totalm)

Long tag: qog_eureg_long_eu_death_totalm

Original tag: eu_death_totalm

Description:

Number of deaths of males, all ages. Death means the permanent disappearance of all evidence of life at any time after life birth has taken place (postnatal cessation of vital functions without capability of resuscitation).

2.7.3.10 Number of deaths, total all ages (eu_death_totalt)

Long tag: qog_eureg_long_eu_death_totalt

Original tag: eu_death_totalt

Description:

Number of deaths, all ages. Death means the permanent disappearance of all evidence of life at any time after life birth has taken place (postnatal cessation of vital functions without capability of resuscitation).

2.7.3.11 Number of deaths of females, at 1 year old (eu_death_y1f)

Long tag: qog_eureg_long_eu_death_y1f

Original tag: eu_death_y1f

Description:

Number of deaths of females, at 1 year old. Death means the permanent disappearance of all evidence of life at any time after life birth has taken place (postnatal cessation of vital functions without capability of resuscitation).

2.7.3.12 Number of deaths of males, at 1 year old (eu_death_y1m)

Long tag: qog_eureg_long_eu_death_y1m

Original tag: eu_death_y1m

Description:

Number of deaths of males, at 1 year old. Death means the permanent disappearance of all evidence of life at any time after life birth has taken place (postnatal cessation of vital functions without capability of resuscitation).

2.7.3.13 Number of deaths, total at 1 year old (eu_death_y1t)

Long tag: qog_eureg_long_eu_death_y1t

Original tag: eu_death_y1t

Description:

Number of deaths, total at 1 year old. Death means the permanent disappearance of all evidence of life at any time after life birth has taken place (postnatal cessation of vital functions without capability of resuscitation).

2.7.3.14 Number of deaths of females, at 20 years old (eu_death_y20f)

Long tag: qog_eureg_long_eu_death_y20f

Original tag: eu_death_y20f

Description:

Number of deaths of females, at 20 years old. Death means the permanent disappearance of all evidence of life at any time after life birth has taken place (postnatal cessation of vital functions without capability of resuscitation).

2.7.3.15 Number of deaths of males, at 20 years old (eu_death_y20m)

Long tag: qog_eureg_long_eu_death_y20m

Original tag: eu_death_y20m

Description:

Number of deaths of males, at 20 years old. Death means the permanent disappearance of all evidence of life at any time after life birth has taken place (postnatal cessation of vital functions without capability of resuscitation).

2.7.3.16 Number of deaths, total at 20 years old (eu_death_y20t)

Long tag: qog_eureg_long_eu_death_y20t

Original tag: eu_death_y20t

Description:

Number of deaths, total at 20 years old. Death means the permanent disappearance of all evidence of life at any time after life birth has taken place (postnatal cessation of vital functions without capability of resuscitation).

2.7.3.17 Number of deaths of females, at 50 years old (eu_death_y50f)

Long tag: qog_eureg_long_eu_death_y50f

Original tag: eu_death_y50f

Description:

Number of deaths of females, at 50 years old. Death means the permanent disappearance of all evidence of life at any time after life birth has taken place (postnatal cessation of vital functions without capability of resuscitation).

2.7.3.18 Number of deaths of males, at 50 years old (eu_death_y50m)

Long tag: qog_eureg_long_eu_death_y50m

Original tag: eu_death_y50m

Description:

Number of deaths of males, at 50 years old. Death means the permanent disappearance of all evidence of life at any time after life birth has taken place (postnatal cessation of vital functions without capability of resuscitation).

2.7.3.19 Number of deaths, total at 50 years old (eu_death_y50t)

Long tag: qog_eureg_long_eu_death_y50t

Original tag: eu_death_y50t

Description:

Number of deaths, total at 50 years old. Death means the permanent disappearance of all evidence of life at any time after life birth has taken place (postnatal cessation of vital functions without capability of resuscitation).

2.7.3.20 Number of deaths of females, at 70 years old (eu_death_y70f)

Long tag: qog_eureg_long_eu_death_y70f

Original tag: eu_death_y70f

Description:

Number of deaths of females, at 70 years old. Death means the permanent disappearance of all evidence of life at any time after life birth has taken place (postnatal cessation of vital functions without capability of resuscitation).

2.7.3.21 Number of deaths of males, at 70 years old (eu_death_y70m)

Long tag: qog_eureg_long_eu_death_y70m

Original tag: eu_death_y70m

Description:

Number of deaths of males, at 70 years old. Death means the permanent disappearance of all evidence of life at any time after life birth has taken place (postnatal cessation of vital functions without capability of resuscitation).

2.7.3.22 Number of deaths, total at 70 years old (eu_death_y70t)

Long tag: qog_eureg_long_eu_death_y70t

Original tag: eu_death_y70t

Description:

Number of deaths, total at 70 years old. Death means the permanent disappearance of all evidence of life at any time after life birth has taken place (postnatal cessation of vital functions without capability of resuscitation).

2.7.3.23 Population at 1st January, Female (eu_d2jan_f)

Long tag: qog_eureg_long_eu_d2jan_f

Original tag: eu_d2jan_f

Description:

Female population as of 1st January of the year indicated. It is based on concept of usual resident population, i.e. the number of inhabitants of a given area on 1 January of the year in question (or, in some cases, on 31 December of the previous year). The population figures can be based on data from the most recent census adjusted by the components of population change produced since the last census, or based on population registers. Usually resident population means all persons having usual residence in a country at the reference time. Usual residence means the place where a person normally spends the daily period of rest, regardless of temporary absences for purposes of recreation, holidays, visits to friends and relatives, business, medical treatment or religious pilgrimage. The following persons alone are considered to be usual residents of the geographical area in question: a) those who have lived in their place of usual residence for a continuous period of at least 12 months before the reference time; or b) those who arrived in their place of usual residence during the 12 months before the reference time with the intention of staying there for at least one year.

2.7.3.24 Population at 1st January, Male (eu_d2jan_m)

Long tag: qog_eureg_long_eu_d2jan_m

Original tag: eu_d2jan_m

Description:

Male population as of 1st January of the year indicated. It is based on concept of usual resident population, i.e. the number of inhabitants of a given area on 1 January of the year in question (or, in some cases, on 31 December of the previous year). The population figures can be based on data from the most recent census adjusted by the components of population change produced since the last census, or based on population registers. Usually resident population means all persons having usual residence in a country at the reference time. Usual residence means the place where a person normally spends the daily period of rest, regardless of temporary absences for purposes of recreation, holidays, visits to friends and relatives, business, medical treatment or religious pilgrimage. The following persons alone are considered to be usual residents of the geographical area in question: a) those who have lived in their place of usual residence for a continuous period of at least 12 months before the reference time; or b) those who arrived in their place of usual residence during the 12 months before the reference time with the intention of staying there for at least one year.

2.7.3.25 Population at 1st January, Total (eu_d2jan_t)

Long tag: qog_eureg_long_eu_d2jan_t

Original tag: eu_d2jan_t

Description:

Total population as of 1st January of the year indicated. It is based on concept of usual resident population, i.e. the number of inhabitants of a given area on 1 January of the year in question (or, in some cases, on 31 December of the previous year). The population figures can be based on data from the most recent census adjusted by the components of population change produced since the last census, or based on population registers. Usually resident population means all persons having usual residence in a country at the reference time. Usual residence means the place where a person normally spends the daily period of rest, regardless of temporary absences for purposes of recreation, holidays, visits to friends and relatives, business, medical treatment or religious pilgrimage. The following persons alone are considered to be usual residents of the geographical area in question: a) those who have lived in their place of usual residence for a continuous period of at least 12 months before the reference time; or b) those who arrived in their place of usual residence during the 12 months before the reference time with the intention of staying there for at least one year.

2.7.3.26 Area of a region, land area total, sq km (eu_d3area_lat)

Long tag: qog_eureg_long_eu_d3area_lat

Original tag: eu_d3area_lat

Description:

Total land area of a region as square kilometer. Total Land Area (TLA) is defined as total surface area

excluding lakes, rivers, transitional and coastal waters. Mountainous regions, glaciers, forests, wetlands and other temporarily or permanently uninhabitable regions are included in TLA.

2.7.3.27 Area of a region, total, sq km (eu_d3area_t)

Long tag: qog_eureg_long_eu_d3area_t

Original tag: eu_d3area_t

Description:

Total surface area of a region as square kilometer. Total Surface Area (TSA) is defined as the area of any given statistical area and includes land area and inland waters (lakes, rivers etc.). The sub-national areas (e.g. LAU and NUTS areas) defined by statistical and/or administrative boundaries are the building blocks for calculating both concepts. By definition Total Surface Area does not cover areas that are not statistical areas.

2.7.3.28 Population density, average population per square km (eu_per_km2)

Long tag: qog_eureg_long_eu_per_km2

Original tag: eu_per_km2

Description:

Average population density per square km. Population density is the ratio of the (annual average) population of a region to the (land) area of the region; total area (including inland waters) is used when land area is not available.

2.7.3.29 Fertility rate, total (eu_frate_total)

Long tag: qog_eureg_long_eu_frate_total

Original tag: eu_frate_total

Description:

Total fertility rate. It is the mean number of children that would be born alive to a woman during her lifetime if she were to pass through her childbearing years conforming to the fertility rates by age of a given year.

2.7.3.30 Fertility rate, at age 15 (eu_frate_y15)

Long tag: qog_eureg_long_eu_frate_y15

Original tag: eu_frate_y15

Description:

Fertility rate, at age 15. This age-specific fertility rate is calculated by dividing the number of births of mothers of age 15 to the average female population of age 15.

2.7.3.31 Fertility rate, at age 30 (eu_frate_y30)

Long tag: qog_eureg_long_eu_frate_y30

Original tag: eu_frate_y30

Description:

Fertility rate, at age 30. This age-specific fertility rate is calculated by dividing the number of births of mothers of age 30 to the average female population of age 30.

2.7.3.32 Fertility rate, at age 35 (eu_frate_y35)

Long tag: qog_eureg_long_eu_frate_y35

Original tag: eu_frate_y35

Description:

Fertility rate, at age 35. This age-specific fertility rate is calculated by dividing the number of births of mothers of age 35 to the average female population of age 35.

2.7.3.33 Life expectancy in years at 1 year old, female (eu_mlifexp_f)

Long tag: qog_eureg_long_eu_mlifexp_f

Original tag: eu_mlifexp_f

Description:

Life expectancy in years at 1 year old, female. Life expectancy at given exact age is the mean number of years still to be lived by a person who has reached a certain exact age, if subjected throughout the rest of his or her life to the current mortality conditions (age-specific probabilities of dying).

2.7.3.34 Life expectancy in years at 1 year old, male (eu_mlifexp_m)

Long tag: qog_eureg_long_eu_mlifexp_m

Original tag: eu_mlifexp_m

Description:

Life expectancy in years at 1 year old, male. Life expectancy at given exact age is the mean number of years still to be lived by a person who has reached a certain exact age, if subjected throughout the rest of his or her life to the current mortality conditions (age-specific probabilities of dying).

2.7.3.35 Life expectancy in years at 1 year old, total (eu_mlifexp_t)

Long tag: qog_eureg_long_eu_mlifexp_t

Original tag: eu_mlifexp_t

Description:

Life expectancy in years at 1 year old, total. Life expectancy at given exact age is the mean number of years still to be lived by a person who has reached a certain exact age, if subjected throughout the rest of his or her life to the current mortality conditions (age-specific probabilities of dying).

2.7.3.36 Crude rate of net migration plus statistical adjustment (eu_cnmigratrt)

Long tag: qog_eureg_long_eu_cnmigratrt

Original tag: eu_cnmigratrt

Description:

Crude rate of net migration plus statistical adjustment. Net migration including statistical adjustments the ratio of the net migration including statistical adjustment during the year to the average population in that year. The value is expressed per 1000 inhabitants. The crude rate of net migration is equal to the difference between the crude rate of population change and the crude rate of natural change (that is, net migration is considered as the part of population change not attributable to births and deaths). It is calculated in this way because immigration or emigration flows are either not available or the figures are not reliable.

2.7.3.37 Crude rate of total population change (eu_growrt)

Long tag: qog_eureg_long_eu_growrt

Original tag: eu_growrt

Description:

Crude rate of total population change. It is the ratio of the total population change during the year to the average population of the area in question in that year. The value is expressed per 1000 inhabitants.

2.7.3.38 Crude rate of natural change of population (eu_natgrowrt)

Long tag: qog_eureg_long_eu_natgrowrt

Original tag: eu_natgrowrt

Description:

Crude rate of natural change. It is the ratio of natural change over a period to the average population of the area in question during that period. The value is expressed per 1000 inhabitants.

2.7.4 Education

This category includes a variety of indicators related to education, such as educational attainment, the students (age, gender, educational level), and educational outcomes.

2.7.4.1 Educational attainment for ages 25 to 64, primary education, Female (eu_edatt_ed02_y2564f)

Long tag: qog_eureg_long_eu_edatt_ed02_y2564f

Original tag: eu_edatt_ed02_y2564f

Description:

Percentage of 25-64 years old females whose the highest level of education successfully completed is less than primary, primary and lower secondary education (levels 0-2). This aggregate refers to levels 0, 1 and 2 of the ISCED 2011 (online code ED0-2). Data up to 2013 refer to ISCED 1997 levels 0, 1 and 2 but also include level 3C short (educational attainment from ISCED level 3 programmes of less than two years).

2.7.4.2 Educational attainment for ages 25 to 64, primary education, Male (eu_edatt_ed02_y2564m)

Long tag: qog_eureg_long_eu_edatt_ed02_y2564m

Original tag: eu_edatt_ed02_y2564m

Description:

Percentage of 25-64 years old males whose the highest level of education successfully completed is less than primary, primary and lower secondary education (levels 0-2). This aggregate refers to levels 0, 1 and 2 of the ISCED 2011 (online code ED0-2). Data up to 2013 refer to ISCED 1997 levels 0, 1 and 2 but also include level 3C short (educational attainment from ISCED level 3 programmes of less than two years).

2.7.4.3 Educational attainment for ages 25 to 64, primary education, Total (eu_edatt_ed02_y2564t)

Long tag: qog_eureg_long_eu_edatt_ed02_y2564t

Original tag: eu_edatt_ed02_y2564t

Description:

Percentage of 25-64 years old population whose the highest level of education successfully completed is less than primary, primary and lower secondary education (levels 0-2). This aggregate refers to levels 0, 1 and 2 of

the ISCED 2011 (online code ED0-2). Data up to 2013 refer to ISCED 1997 levels 0, 1 and 2 but also include level 3C short (educational attainment from ISCED level 3 programmes of less than two years).

2.7.4.4 Educational attainment for ages 25 to 64, secondary education, Female (eu_edatt_ed34_y2564f)

Long tag: qog_eureg_long_eu_edatt_ed34_y2564f

Original tag: eu_edatt_ed34_y2564f

Description:

Percentage of 25-64 years old females whose the highest level of education successfully completed is upper secondary and post-secondary non-tertiary education (levels 3 and 4). This aggregate corresponds to ISCED 2011 levels 3 and 4 (online code ED3_4). ISCED 2011 level 3 programmes of partial level completion are considered within ISCED level 3. Data up to 2013 refer to ISCED 1997 levels 3C long, 3A, 3B and 4.

2.7.4.5 Educational attainment for ages 25 to 64, secondary education, Male (eu_edatt_ed34_y2564m)

Long tag: qog_eureg_long_eu_edatt_ed34_y2564m

Original tag: eu_edatt_ed34_y2564m

Description:

Percentage of 25-64 years old males whose the highest level of education successfully completed is upper secondary and post-secondary non-tertiary education (levels 3 and 4). This aggregate corresponds to ISCED 2011 levels 3 and 4 (online code ED3_4). ISCED 2011 level 3 programmes of partial level completion are considered within ISCED level 3. Data up to 2013 refer to ISCED 1997 levels 3C long, 3A, 3B and 4.

2.7.4.6 Educational attainment for ages 25 to 64, secondary education, Total (eu_edatt_ed34_y2564t)

Long tag: qog_eureg_long_eu_edatt_ed34_y2564t

Original tag: eu_edatt_ed34_y2564t

Description:

Percentage of 25-64 years old population whose the highest level of education successfully completed is upper secondary and post-secondary non-tertiary education (levels 3 and 4). This aggregate corresponds to ISCED 2011 levels 3 and 4 (online code ED3_4). ISCED 2011 level 3 programmes of partial level completion are considered within ISCED level 3. Data up to 2013 refer to ISCED 1997 levels 3C long, 3A, 3B and 4.

2.7.4.7 Educational attainment for ages 25 to 64, tertiary education, Female (eu_edatt_ed58_y2564f)

Long tag: qog_eureg_long_eu_edatt_ed58_y2564f

Original tag: eu_edatt_ed58_y2564f

Description:

Percentage of 25-64 years old females whose the highest level of education successfully completed is tertiary education (levels 5-8). This aggregate covers ISCED 2011 levels 5, 6, 7 and 8 (short-cycle tertiary education, bachelor's or equivalent level, master's or equivalent level, doctoral or equivalent level, online code ED5-8 'tertiary education'). Data up to 2013 refer to ISCED 1997 levels 5 and 6.

2.7.4.8 Educational attainment for ages 25 to 64, tertiary education, Male (eu_edatt_ed58_y2564m)

Long tag: qog_eureg_long_eu_edatt_ed58_y2564m

Original tag: eu_edatt_ed58_y2564m

Description:

Percentage of 25-64 years old males whose the highest level of education successfully completed is tertiary education (levels 5-8). This aggregate covers ISCED 2011 levels 5, 6, 7 and 8 (short-cycle tertiary education, bachelor's or equivalent level, master's or equivalent level, doctoral or equivalent level, online code ED5-8 'tertiary education'). Data up to 2013 refer to ISCED 1997 levels 5 and 6.

2.7.4.9 Educational attainment for ages 25 to 64, tertiary education, Total (eu_edatt_ed58_y2564t)

Long tag: qog_eureg_long_eu_edatt_ed58_y2564t

Original tag: eu_edatt_ed58_y2564t

Description:

Percentage of 25-64 years old population whose the highest level of education successfully completed is tertiary education (levels 5-8). This aggregate covers ISCED 2011 levels 5, 6, 7 and 8 (short-cycle tertiary education, bachelor's or equivalent level, master's or equivalent level, doctoral or equivalent level, online code ED5-8 'tertiary education'). Data up to 2013 refer to ISCED 1997 levels 5 and 6.

2.7.4.10 Educational attainment for ages 30 to 34, primary education, Female (eu_edatt_ed02_y3034f)

Long tag: qog_eureg_long_eu_edatt_ed02_y3034f

Original tag: eu_edatt_ed02_y3034f

Description:

Percentage of 30-34 years old females whose the highest level of education successfully completed is less than primary, primary and lower secondary education (levels 0-2). This aggregate refers to levels 0, 1 and 2 of the ISCED 2011 (online code ED0-2). Data up to 2013 refer to ISCED 1997 levels 0, 1 and 2 but also include level 3C short (educational attainment from ISCED level 3 programmes of less than two years).

2.7.4.11 Educational attainment for ages 30 to 34, primary education, Male (eu_edatt_ed02_y3034m)

Long tag: qog_eureg_long_eu_edatt_ed02_y3034m

Original tag: eu_edatt_ed02_y3034m

Description:

Percentage of 30-34 years old males whose the highest level of education successfully completed is less than primary, primary and lower secondary education (levels 0-2). This aggregate refers to levels 0, 1 and 2 of the ISCED 2011 (online code ED0-2). Data up to 2013 refer to ISCED 1997 levels 0, 1 and 2 but also include level 3C short (educational attainment from ISCED level 3 programmes of less than two years).

2.7.4.12 Educational attainment for ages 30 to 34, primary education, Total (eu_edatt_ed02_y3034t)

Long tag: qog_eureg_long_eu_edatt_ed02_y3034t

Original tag: eu_edatt_ed02_y3034t

Description:

Percentage of 30-34 years old population whose the highest level of education successfully completed is less than primary, primary and lower secondary education (levels 0-2). This aggregate refers to levels 0, 1 and 2 of the ISCED 2011 (online code ED0-2). Data up to 2013 refer to ISCED 1997 levels 0, 1 and 2 but also include level 3C short (educational attainment from ISCED level 3 programmes of less than two years).

2.7.4.13 Educational attainment for ages 30 to 34, secondary education, Female (eu_edatt_ed34_y3034f)

Long tag: qog_eureg_long_eu_edatt_ed34_y3034f

Original tag: eu_edatt_ed34_y3034f

Description:

Percentage of 30-34 years old females whose the highest level of education successfully completed is upper secondary and post-secondary non-tertiary education (levels 3 and 4). This aggregate corresponds to ISCED 2011 levels 3 and 4 (online code ED3_4). ISCED 2011 level 3 programmes of partial level completion are considered within ISCED level 3. Data up to 2013 refer to ISCED 1997 levels 3C long, 3A, 3B and 4.

2.7.4.14 Educational attainment for ages 30 to 34, secondary education, Male (eu_edatt_ed34_y3034m)

Long tag: qog_eureg_long_eu_edatt_ed34_y3034m

Original tag: eu_edatt_ed34_y3034m

Description:

Percentage of 30-34 years old males whose the highest level of education successfully completed is upper secondary and post-secondary non-tertiary education (levels 3 and 4). This aggregate corresponds to ISCED 2011 levels 3 and 4 (online code ED3_4). ISCED 2011 level 3 programmes of partial level completion are considered within ISCED level 3. Data up to 2013 refer to ISCED 1997 levels 3C long, 3A, 3B and 4.

2.7.4.15 Educational attainment for ages 30 to 34, secondary education, Total (eu_edatt_ed34_y3034t)

Long tag: qog_eureg_long_eu_edatt_ed34_y3034t

Original tag: eu_edatt_ed34_y3034t

Description:

Percentage of 30-34 years old population whose the highest level of education successfully completed is upper secondary and post-secondary non-tertiary education (levels 3 and 4). This aggregate corresponds to ISCED 2011 levels 3 and 4 (online code ED3_4). ISCED 2011 level 3 programmes of partial level completion are considered within ISCED level 3. Data up to 2013 refer to ISCED 1997 levels 3C long, 3A, 3B and 4.

2.7.4.16 Educational attainment for ages 30 to 34, tertiary education, Female (eu_edatt_ed58_y3034f)

Long tag: qog_eureg_long_eu_edatt_ed58_y3034f

Original tag: eu_edatt_ed58_y3034f

Description:

Percentage of 30-34 years old females whose the highest level of education successfully completed is tertiary education (levels 5-8). This aggregate covers ISCED 2011 levels 5, 6, 7 and 8 (short-cycle tertiary education,

bachelor's or equivalent level, master's or equivalent level, doctoral or equivalent level, online code ED5-8 'tertiary education'). Data up to 2013 refer to ISCED 1997 levels 5 and 6.

2.7.4.17 Educational attainment for ages 30 to 34, tertiary education, Male (eu_edatt_ed58_y3034m)

Long tag: qog_eureg_long_eu_edatt_ed58_y3034m

Original tag: eu_edatt_ed58_y3034m

Description:

Percentage of 30-34 years old males whose the highest level of education successfully completed is tertiary education (levels 5-8). This aggregate covers ISCED 2011 levels 5, 6, 7 and 8 (short-cycle tertiary education, bachelor's or equivalent level, master's or equivalent level, doctoral or equivalent level, online code ED5-8 'tertiary education'). Data up to 2013 refer to ISCED 1997 levels 5 and 6.

2.7.4.18 Educational attainment for ages 30 to 34, tertiary education, Total (eu_edatt_ed58_y3034t)

Long tag: qog_eureg_long_eu_edatt_ed58_y3034t

Original tag: eu_edatt_ed58_y3034t

Description:

Percentage of 30-34 years old population whose the highest level of education successfully completed is tertiary education (levels 5-8). This aggregate covers ISCED 2011 levels 5, 6, 7 and 8 (short-cycle tertiary education, bachelor's or equivalent level, master's or equivalent level, doctoral or equivalent level, online code ED5-8 'tertiary education'). Data up to 2013 refer to ISCED 1997 levels 5 and 6.

2.7.4.19 Early leavers from education and training as a percentage, Female (eu_eduleave_f)

Long tag: qog_eureg_long_eu_eduleave_f

Original tag: eu_eduleave_f

Description:

Female early leavers from education and training as a percentage of the population aged 18-24 with at most lower secondary education and not in further education or training. The indicator is defined as the percentage of the population aged 18-24 with at most lower secondary education and who were not in further education or training during the last four weeks preceding the survey. Lower secondary education refers to ISCED (International Standard Classification of Education) 2011 level 0-2 for data from 2014 onwards and to ISCED 1997 level 0-3C short for data up to 2013. The indicator is based on the EU Labour Force Survey.

2.7.4.20 Early leavers from education and training as a percentage, Male (eu_eduleave_m)

Long tag: qog_eureg_long_eu_eduleave_m

Original tag: eu_eduleave_m

Description:

Male early leavers from education and training as a percentage of the population aged 18-24 with at most lower secondary education and not in further education or training. The indicator is defined as the percentage of the population aged 18-24 with at most lower secondary education and who were not in further education or training during the last four weeks preceding the survey. Lower secondary education refers to ISCED (International Standard Classification of Education) 2011 level 0-2 for data from 2014 onwards and to ISCED 1997 level 0-3C short for data up to 2013. The indicator is based on the EU Labour Force Survey.

2.7.4.21 Early leavers from education and training as a percentage, Total (eu_eduleave_t)

Long tag: qog_eureg_long_eu_eduleave_t

Original tag: eu_eduleave_t

Description:

Early leavers from education and training as a percentage of the population aged 18-24 with at most lower secondary education and not in further education or training. The indicator is defined as the percentage of the population aged 18-24 with at most lower secondary education and who were not in further education or training during the last four weeks preceding the survey. Lower secondary education refers to ISCED (International Standard Classification of Education) 2011 level 0-2 for data from 2014 onwards and to ISCED 1997 level 0-3C short for data up to 2013. The indicator is based on the EU Labour Force Survey.

2.7.4.22 15-24 year old neither in employment nor in education as percentage, female (eu_neet_y1524f)

Long tag: qog_eureg_long_eu_neet_y1524f

Original tag: eu_neet_y1524f

Description:

15-24 year old females neither in employment nor in education as percentage. The indicator on young people neither in employment nor in education and training (NEET) provides information on young people aged 15

to 24 who meet the following two conditions: (a) they are not employed (i.e. unemployed or inactive according to the International Labour Organisation definition) and (b) they have not received any education or training in the four weeks preceding the survey. Data are expressed as a percentage of the total population in the same age group and sex, excluding the respondents who have not answered the question 'participation to education and training'. Data come from the European Union Labour Force Survey.

2.7.4.23 15-24 year old neither in employment nor in education as percentage, male (eu_neet_y1524m)

Long tag: qog_eureg_long_eu_neet_y1524m

Original tag: eu_neet_y1524m

Description:

15-24 year old males neither in employment nor in education as percentage. The indicator on young people neither in employment nor in education and training (NEET) provides information on young people aged 15 to 24 who meet the following two conditions: (a) they are not employed (i.e. unemployed or inactive according to the International Labour Organisation definition) and (b) they have not received any education or training in the four weeks preceding the survey. Data are expressed as a percentage of the total population in the same age group and sex, excluding the respondents who have not answered the question 'participation to education and training'. Data come from the European Union Labour Force Survey.

2.7.4.24 15-24 year old neither in employment nor in education as percentage, total (eu_neet_y1524t)

Long tag: qog_eureg_long_eu_neet_y1524t

Original tag: eu_neet_y1524t

Description:

15-24 year old population neither in employment nor in education as percentage. The indicator on young people neither in employment nor in education and training (NEET) provides information on young people aged 15 to 24 who meet the following two conditions: (a) they are not employed (i.e. unemployed or inactive according to the International Labour Organisation definition) and (b) they have not received any education or training in the four weeks preceding the survey. Data are expressed as a percentage of the total population in the same age group and sex, excluding the respondents who have not answered the question 'participation to education and training'. Data come from the European Union Labour Force Survey.

2.7.4.25 Employment rate for people between 15-34 years, total duration since education (eu_empl_durtotal)

Long tag: qog_eureg_long_eu_empl_durtotal

Original tag: eu_empl_durtotal

Description:

Employment rate for people between 15 and 34 years, total duration since completion of highest level of education. The indicator is defined as the percentage of the population aged 15-34, who were employed (ILO definition), not in further education or training (i.e. neither formal nor non-formal) during the last four weeks preceding the survey.

2.7.4.26 Employment rate for people between 15-34 years, over 3 years since education (eu_empl_dury_gt3)

Long tag: qog_eureg_long_eu_empl_dury_gt3

Original tag: eu_empl_dury_gt3

Description:

Employment rate for people between 15 and 34 years, over 3 years since completion of highest level of education. The indicator is defined as the percentage of the population aged 15-34, who were employed (ILO definition), not in further education or training (i.e. neither formal nor non-formal) during the last four weeks preceding the survey.

2.7.4.27 Employment rate for people between 15-34 years, 1 to 3 years since education (eu_empl_dury13)

Long tag: qog_eureg_long_eu_empl_dury13

Original tag: eu_empl_dury13

Description:

Employment rate for people between 15 and 34 years, 1 to 3 years since completion of highest level of education. The indicator is defined as the percentage of the population aged 15-34, who were employed (ILO definition), not in further education or training (i.e. neither formal nor non-formal) during the last four weeks preceding the survey.

2.7.4.28 Employment rate for people between 15-34 years, education levels 0-2 (eu_empl_edled02)

Long tag: qog_eureg_long_eu_empl_edled02

Original tag: eu_empl_edled02

Description:
Employment rate for people between 15 and 34 years, whose the highest level of education successfully completed is less than primary, primary and lower secondary education (levels 0-2). The indicator is defined as the percentage of the population aged 15-34, who were employed (ILO definition), not in further education or training (i.e. neither formal nor non-formal) during the last four weeks preceding the survey.

2.7.4.29 Employment rate for people between 15-34 years, education levels 3-4 (eu_empl_edled34)

Long tag: qog_eureg_long_eu_empl_edled34

Original tag: eu_empl_edled34

Description:
Employment rate for people between 15 and 34 years, whose the highest level of education successfully completed is upper secondary and post-secondary non-tertiary education (levels 3 and 4). The indicator is defined as the percentage of the population aged 15-34, who were employed (ILO definition), not in further education or training (i.e. neither formal nor non-formal) during the last four weeks preceding the survey.

2.7.4.30 Employment rate for people between 15-34 years, education levels 5-8 (eu_empl_edled58)

Long tag: qog_eureg_long_eu_empl_edled58

Original tag: eu_empl_edled58

Description:
Employment rate for people between 15 and 34 years, whose the highest level of education successfully completed is tertiary education (levels 5-8). The indicator is defined as the percentage of the population aged 15-34, who were employed (ILO definition), not in further education or training (i.e. neither formal nor non-formal) during the last four weeks preceding the survey.

2.7.4.31 Employment rate for people between 15-34 years, all education levels (eu_empl_edltotal)

Long tag: qog_eureg_long_eu_empl_edltotal

Original tag: eu_empl_edltotal

Description:
Total employment rate for people between 15 and 34 years for all education levels. The indicator is defined as the percentage of the population aged 15-34, who were employed (ILO definition), not in further education or training (i.e. neither formal nor non-formal) during the last four weeks preceding the survey.

2.7.4.32 Participation rate in Primary and lower secondary education (eu_epred12)

Long tag: qog_eureg_long_eu_epred12

Original tag: eu_epred12

Description:
Participation rate in primary and lower secondary education (levels 1-2). Countries participating in this collection are compiling their data according to the concepts and definitions of the UOE data collection manuals on education systems statistics. This aggregate refers to levels 1 and 2 of the ISCED 2011 (online code ED1-2).

2.7.4.33 Participation rate in Tertiary education (eu_epred58)

Long tag: qog_eureg_long_eu_epred58

Original tag: eu_epred58

Description:
Participation rate in tertiary education (level 5-8). Countries participating in this collection are compiling their data according to the concepts and definitions of the UOE data collection manuals on education systems statistics. This aggregate covers ISCED 2011 levels 5, 6, 7 and 8 (short-cycle tertiary education, bachelor's or equivalent level, master's or equivalent level, doctoral or equivalent level, online code ED5-8 'tertiary education').

2.7.4.34 Participation rate in education and training (last 4 weeks), females (eu_epry2564f)

Long tag: qog_eureg_long_eu_epry2564f

Original tag: eu_epry2564f

Description:
Female participation rate in education and training during the last four weeks preceding the survey. The participation rate in education and training covers participation in formal and non-formal education and training. The reference period for the participation in education and training is the four weeks prior to the interview. Formal education is defined by ISCED as 'education that is institutionalised, intentional and planned through public organisations and recognised private bodies, and – in their totality – constitute the formal education system of a country. Formal education programmes are thus recognised as such by the relevant national education or equivalent authorities, e.g. any other institution in cooperation with the national or sub-national education authorities.' Non-formal education and training is defined as any

institutionalised, intentional and organised/planned learning activities outside the formal education system. According to the classification of learning activities (CLA 2016), non-formal education and training comprises courses, seminars and workshops, private lessons or instructions and guided-on-the-job training. However, non-formal education as measured in the EU-LFS excludes guided-on-the-job training. The information collected covers both job-related (professional) and non-job related (personal, social, 'leisure') education and training activities.

2.7.4.35 Participation rate in education and training (last 4 weeks), males (eu_epry2564m)

Long tag: qog_eureg_long_eu_epry2564m

Original tag: eu_epry2564m

Description:

Male participation rate in education and training during the last four weeks preceding the survey. The participation rate in education and training covers participation in formal and non-formal education and training. The reference period for the participation in education and training is the four weeks prior to the interview. Formal education is defined by ISCED as 'education that is institutionalised, intentional and planned through public organisations and recognised private bodies, and – in their totality – constitute the formal education system of a country. Formal education programmes are thus recognised as such by the relevant national education or equivalent authorities, e.g. any other institution in cooperation with the national or sub-national education authorities.' Non-formal education and training is defined as any institutionalised, intentional and organised/planned learning activities outside the formal education system. According to the classification of learning activities (CLA 2016), non-formal education and training comprises courses, seminars and workshops, private lessons or instructions and guided-on-the-job training. However, non-formal education as measured in the EU-LFS excludes guided-on-the-job training. The information collected covers both job-related (professional) and non-job related (personal, social, 'leisure') education and training activities.

2.7.4.36 Participation rate in education and training (last 4 weeks), total (eu_epry2564t)

Long tag: qog_eureg_long_eu_epry2564t

Original tag: eu_epry2564t

Description:

Participation rate in education and training during the last four weeks preceding the survey. The participation rate in education and training covers participation in formal and non-formal education and training. The reference period for the participation in education and training is the four weeks prior to the interview. Formal education is defined by ISCED as 'education that is institutionalised, intentional and planned through public organisations and recognised private bodies, and – in their totality – constitute the formal education system of a country. Formal education programmes are thus recognised as such by the relevant national education or equivalent authorities, e.g. any other institution in cooperation with the national or sub-national education authorities.' Non-formal education and training is defined as any institutionalised, intentional and organised/planned learning activities outside the formal education system. According to the classification of learning activities (CLA 2016), non-formal education and training comprises courses, seminars and workshops, private lessons or instructions and guided-on-the-job training. However, non-formal education as measured in the EU-LFS excludes guided-on-the-job training. The information collected covers both job-related (professional) and non-job related (personal, social, 'leisure') education and training activities.

2.7.5 Environment

This category includes indicators related to temperature and municipal waste.

2.7.5.1 Municipal waste disposal - incineration in thousand tonnes (eu_env_wasdsp_i)

Long tag: qog_eureg_long_eu_env_wasdsp_i

Original tag: eu_env_wasdsp_i

Description:

Municipal waste disposal, incineration in thousand tonnes. Municipal waste is mainly produced by households, similar wastes from sources such as commerce, offices and public institutions are included. The amount of municipal waste generated consists of waste collected by or on behalf of municipal authorities and disposed of through the waste management system. The amount of municipal waste treatment is reported for the treatment operations incineration (with and without energy recovery), recycling, composting and landfilling. Data are available in thousand tonnes and kilograms per person. Wastes from agriculture and from industries are not included.

2.7.5.2 Municipal waste generated in thousand tonnes (eu_env_wasgen)

Long tag: qog_eureg_long_eu_env_wasgen

Original tag: eu_env_wasgen

Description:

Municipal waste generated in thousand tonnes. Municipal waste is mainly produced by households, similar

wastes from sources such as commerce, offices and public institutions are included. The amount of municipal waste generated consists of waste collected by or on behalf of municipal authorities and disposed of through the waste management system. The amount of municipal waste treatment is reported for the treatment operations incineration (with and without energy recovery), recycling, composting and landfilling. Data are available in thousand tonnes and kilograms per person. Wastes from agriculture and from industries are not included.

2.7.5.3 Municipal waste recovery - energy recovery in thousand tonnes (eu_env_wasrcv_e)

Long tag: qog_eureg_long_eu_env_wasrcv_e

Original tag: eu_env_wasrcv_e

Description:

Municipal waste energy recovery in thousand tonnes. Energy recovery is defined as the incineration that fulfils the energy efficiency criteria laid down in the Waste Framework Directive (2008/98/EC), Annex II (recovery operation R1). Municipal waste is mainly produced by households, similar wastes from sources such as commerce, offices and public institutions are included. The amount of municipal waste generated consists of waste collected by or on behalf of municipal authorities and disposed of through the waste management system. The amount of municipal waste treatment is reported for the treatment operations incineration (with and without energy recovery), recycling, composting and landfilling. Data are available in thousand tonnes and kilograms per person. Wastes from agriculture and from industries are not included.

2.7.5.4 Municipal waste recycling in thousand tonnes (eu_env_wasrcy_c_d)

Long tag: qog_eureg_long_eu_env_wasrcy_c_d

Original tag: eu_env_wasrcy_c_d

Description:

Municipal waste recycling in thousand tonnes. Recycling means any recovery operation by which waste materials are reprocessed into products, materials or substances whether for the original or other purposes. It includes the reprocessing of organic material but does not include energy recovery and the reprocessing into materials that are to be used as fuels or for backfilling operations. Municipal waste is mainly produced by households, similar wastes from sources such as commerce, offices and public institutions are included. The amount of municipal waste generated consists of waste collected by or on behalf of municipal authorities and disposed of through the waste management system. The amount of municipal waste treatment is reported for the treatment operations incineration (with and without energy recovery), recycling, composting and landfilling. Data are available in thousand tonnes and kilograms per person. Wastes from agriculture and from industries are not included.

2.7.5.5 Number of cooling degree days (eu_eng_cdd)

Long tag: qog_eureg_long_eu_eng_cdd

Original tag: eu_eng_cdd

Description:

Number of cooling degree days (CDD). Cooling degree day (CDD) index is a weather-based technical index designed to describe the need for the cooling (air-conditioning) requirements of buildings. CDD is derived from meteorological observations of air temperature, interpolated to regular grids at 25 km resolution for Europe. Calculated gridded CDD is aggregated and subsequently presented on NUTS-2 level, for 2017 and 2018 also on NUTS-3 level.

2.7.5.6 Number of heating degree days (eu_eng_hdd)

Long tag: qog_eureg_long_eu_eng_hdd

Original tag: eu_eng_hdd

Description:

Number of heating degree days (HDD). Heating degree day (HDD) index is a weather-based technical index designed to describe the need for the heating energy requirements of buildings. HDD is derived from meteorological observations of air temperature, interpolated to regular grids at 25 km resolution for Europe. Calculated gridded HDD is aggregated and subsequently presented on NUTS-2 level, for 2017 and 2018 also on NUTS-3 level.

2.7.6 Health

This category includes indicators describing the health of a population in a given country. These include reports about the prevalence of infectious diseases, and indicators such as birth rate, death rate, life expectancy. It also provides information on the capacity of the health care system, such as the number of hospital beds available.

2.7.6.1 Number of deaths by circulatory system diseases, female (eu_hea_cs_f)

Long tag: qog_eureg_long_eu_hea_cs_f

Original tag: eu_hea_cs_f

Description:

Number of deaths by circulatory system diseases, female. Causes of death (COD) statistics are based on information derived from the medical certificate of cause of death. COD target at the underlying cause of death, in accordance with the ICD-10 definition i.e. "the disease or injury which initiated the train of morbid

events leading directly to death, or the circumstances of the accident or violence which produced the fatal injury". Expressed in deaths per 100,000 inhabitants, it is calculated as the number of deaths recorded in the population for a given period divided by population in the same period and then multiplied by 100,000.

2.7.6.2 Number of deaths by circulatory system diseases, male (eu_hea_cs_m)

Long tag: qog_eureg_long_eu_hea_cs_m

Original tag: eu_hea_cs_m

Description:

Number of deaths by circulatory system diseases, male. Causes of death (COD) statistics are based on information derived from the medical certificate of cause of death. COD target at the underlying cause of death, in accordance with the ICD-10 definition i.e. "the disease or injury which initiated the train of morbid events leading directly to death, or the circumstances of the accident or violence which produced the fatal injury". Expressed in deaths per 100,000 inhabitants, it is calculated as the number of deaths recorded in the population for a given period divided by population in the same period and then multiplied by 100,000.

2.7.6.3 Number of deaths by circulatory system diseases, total (eu_hea_cs_t)

Long tag: qog_eureg_long_eu_hea_cs_t

Original tag: eu_hea_cs_t

Description:

Number of deaths by circulatory system diseases, total. Causes of death (COD) statistics are based on information derived from the medical certificate of cause of death. COD target at the underlying cause of death, in accordance with the ICD-10 definition i.e. "the disease or injury which initiated the train of morbid events leading directly to death, or the circumstances of the accident or violence which produced the fatal injury". Expressed in deaths per 100,000 inhabitants, it is calculated as the number of deaths recorded in the population for a given period divided by population in the same period and then multiplied by 100,000.

2.7.6.4 Number of deaths by HIV, female (eu_hea_hiv_f)

Long tag: qog_eureg_long_eu_hea_hiv_f

Original tag: eu_hea_hiv_f

Description:

Number of deaths by HIV, female. Causes of death (COD) statistics are based on information derived from the medical certificate of cause of death. COD target at the underlying cause of death, in accordance with the ICD-10 definition i.e. "the disease or injury which initiated the train of morbid events leading directly to death, or the circumstances of the accident or violence which produced the fatal injury". Expressed in deaths per 100,000 inhabitants, it is calculated as the number of deaths recorded in the population for a given period divided by population in the same period and then multiplied by 100,000.

2.7.6.5 Number of deaths by HIV, male (eu_hea_hiv_m)

Long tag: qog_eureg_long_eu_hea_hiv_m

Original tag: eu_hea_hiv_m

Description:

Number of deaths by HIV, male. Causes of death (COD) statistics are based on information derived from the medical certificate of cause of death. COD target at the underlying cause of death, in accordance with the ICD-10 definition i.e. "the disease or injury which initiated the train of morbid events leading directly to death, or the circumstances of the accident or violence which produced the fatal injury". Expressed in deaths per 100,000 inhabitants, it is calculated as the number of deaths recorded in the population for a given period divided by population in the same period and then multiplied by 100,000.

2.7.6.6 Number of deaths by HIV, total (eu_hea_hiv_t)

Long tag: qog_eureg_long_eu_hea_hiv_t

Original tag: eu_hea_hiv_t

Description:

Number of deaths by HIV, total. Causes of death (COD) statistics are based on information derived from the medical certificate of cause of death. COD target at the underlying cause of death, in accordance with the ICD-10 definition i.e. "the disease or injury which initiated the train of morbid events leading directly to death, or the circumstances of the accident or violence which produced the fatal injury". Expressed in deaths per 100,000 inhabitants, it is calculated as the number of deaths recorded in the population for a given period divided by population in the same period and then multiplied by 100,000.

2.7.6.7 Number of deaths by infectious and parasitic diseases, female (eu_hea_ipd_f)

Long tag: qog_eureg_long_eu_hea_ipd_f

Original tag: eu_hea_ipd_f

Description:

Number of deaths by infectious and parasitic diseases, female. Causes of death (COD) statistics are based on information derived from the medical certificate of cause of death. COD target at the underlying cause of death,

in accordance with the ICD-10 definition i.e. "the disease or injury which initiated the train of morbid events leading directly to death, or the circumstances of the accident or violence which produced the fatal injury". Expressed in deaths per 100,000 inhabitants, it is calculated as the number of deaths recorded in the population for a given period divided by population in the same period and then multiplied by 100,000.

2.7.6.8 Number of deaths by infectious and parasitic diseases, male (eu_hea_ipd_m)

Long tag: qog_eureg_long_eu_hea_ipd_m

Original tag: eu_hea_ipd_m

Description:

Number of deaths by infectious and parasitic diseases, male. Causes of death (COD) statistics are based on information derived from the medical certificate of cause of death. COD target at the underlying cause of death, in accordance with the ICD-10 definition i.e. "the disease or injury which initiated the train of morbid events leading directly to death, or the circumstances of the accident or violence which produced the fatal injury". Expressed in deaths per 100,000 inhabitants, it is calculated as the number of deaths recorded in the population for a given period divided by population in the same period and then multiplied by 100,000.

2.7.6.9 Number of deaths by infectious and parasitic diseases, total (eu_hea_ipd_t)

Long tag: qog_eureg_long_eu_hea_ipd_t

Original tag: eu_hea_ipd_t

Description:

Number of deaths by infectious and parasitic diseases, total. Causes of death (COD) statistics are based on information derived from the medical certificate of cause of death. COD target at the underlying cause of death, in accordance with the ICD-10 definition i.e. "the disease or injury which initiated the train of morbid events leading directly to death, or the circumstances of the accident or violence which produced the fatal injury". Expressed in deaths per 100,000 inhabitants, it is calculated as the number of deaths recorded in the population for a given period divided by population in the same period and then multiplied by 100,000.

2.7.6.10 Number of deaths by malignant neoplasms, female (eu_hea_np_f)

Long tag: qog_eureg_long_eu_hea_np_f

Original tag: eu_hea_np_f

Description:

Number of deaths by malignant neoplasms, female. Causes of death (COD) statistics are based on information derived from the medical certificate of cause of death. COD target at the underlying cause of death, in accordance with the ICD-10 definition i.e. "the disease or injury which initiated the train of morbid events leading directly to death, or the circumstances of the accident or violence which produced the fatal injury". Expressed in deaths per 100,000 inhabitants, it is calculated as the number of deaths recorded in the population for a given period divided by population in the same period and then multiplied by 100,000.

2.7.6.11 Number of deaths by malignant neoplasms, male (eu_hea_np_m)

Long tag: qog_eureg_long_eu_hea_np_m

Original tag: eu_hea_np_m

Description:

Number of deaths by malignant neoplasms, male. Causes of death (COD) statistics are based on information derived from the medical certificate of cause of death. COD target at the underlying cause of death, in accordance with the ICD-10 definition i.e. "the disease or injury which initiated the train of morbid events leading directly to death, or the circumstances of the accident or violence which produced the fatal injury". Expressed in deaths per 100,000 inhabitants, it is calculated as the number of deaths recorded in the population for a given period divided by population in the same period and then multiplied by 100,000.

2.7.6.12 Number of deaths by malignant neoplasms, total (eu_hea_np_t)

Long tag: qog_eureg_long_eu_hea_np_t

Original tag: eu_hea_np_t

Description:

Number of deaths by malignant neoplasms, total. Causes of death (COD) statistics are based on information derived from the medical certificate of cause of death. COD target at the underlying cause of death, in accordance with the ICD-10 definition i.e. "the disease or injury which initiated the train of morbid events leading directly to death, or the circumstances of the accident or violence which produced the fatal injury". Expressed in deaths per 100,000 inhabitants, it is calculated as the number of deaths recorded in the population for a given period divided by population in the same period and then multiplied by 100,000.

2.7.6.13 Number of deaths by nervous system diseases, female (eu_hea_ns_f)

Long tag: qog_eureg_long_eu_hea_ns_f

Original tag: eu_hea_ns_f

Description:

Number of deaths by nervous system diseases, female. Causes of death (COD) statistics are based on information

derived from the medical certificate of cause of death. COD target at the underlying cause of death, in accordance with the ICD-10 definition i.e. "the disease or injury which initiated the train of morbid events leading directly to death, or the circumstances of the accident or violence which produced the fatal injury". Expressed in deaths per 100,000 inhabitants, it is calculated as the number of deaths recorded in the population for a given period divided by population in the same period and then multiplied by 100,000.

2.7.6.14 Number of deaths by nervous system diseases, male (eu_hea_ns_m)

Long tag: qog_eureg_long_eu_hea_ns_m

Original tag: eu_hea_ns_m

Description:

Number of deaths by nervous system diseases, male. Causes of death (COD) statistics are based on information derived from the medical certificate of cause of death. COD target at the underlying cause of death, in accordance with the ICD-10 definition i.e. "the disease or injury which initiated the train of morbid events leading directly to death, or the circumstances of the accident or violence which produced the fatal injury". Expressed in deaths per 100,000 inhabitants, it is calculated as the number of deaths recorded in the population for a given period divided by population in the same period and then multiplied by 100,000.

2.7.6.15 Number of deaths by nervous system diseases, total (eu_hea_ns_t)

Long tag: qog_eureg_long_eu_hea_ns_t

Original tag: eu_hea_ns_t

Description:

Number of deaths by nervous system diseases, total. Causes of death (COD) statistics are based on information derived from the medical certificate of cause of death. COD target at the underlying cause of death, in accordance with the ICD-10 definition i.e. "the disease or injury which initiated the train of morbid events leading directly to death, or the circumstances of the accident or violence which produced the fatal injury". Expressed in deaths per 100,000 inhabitants, it is calculated as the number of deaths recorded in the population for a given period divided by population in the same period and then multiplied by 100,000.

2.7.6.16 Number of deaths by pregnancy, childbirth and puerperium (eu_hea_pr_f)

Long tag: qog_eureg_long_eu_hea_pr_f

Original tag: eu_hea_pr_f

Description:

Number of deaths by pregnancy, childbirth and puerperium. Causes of death (COD) statistics are based on information derived from the medical certificate of cause of death. COD target at the underlying cause of death, in accordance with the ICD-10 definition i.e. "the disease or injury which initiated the train of morbid events leading directly to death, or the circumstances of the accident or violence which produced the fatal injury". Expressed in deaths per 100,000 inhabitants, it is calculated as the number of deaths recorded in the population for a given period divided by population in the same period and then multiplied by 100,000.

2.7.6.17 Number of deaths by self-harm, female (eu_hea_sh_f)

Long tag: qog_eureg_long_eu_hea_sh_f

Original tag: eu_hea_sh_f

Description:

Number of deaths by self-harm, female. Causes of death (COD) statistics are based on information derived from the medical certificate of cause of death. COD target at the underlying cause of death, in accordance with the ICD-10 definition i.e. "the disease or injury which initiated the train of morbid events leading directly to death, or the circumstances of the accident or violence which produced the fatal injury". Expressed in deaths per 100,000 inhabitants, it is calculated as the number of deaths recorded in the population for a given period divided by population in the same period and then multiplied by 100,000.

2.7.6.18 Number of deaths by self-harm, male (eu_hea_sh_m)

Long tag: qog_eureg_long_eu_hea_sh_m

Original tag: eu_hea_sh_m

Description:

Number of deaths by self-harm, male. Causes of death (COD) statistics are based on information derived from the medical certificate of cause of death. COD target at the underlying cause of death, in accordance with the ICD-10 definition i.e. "the disease or injury which initiated the train of morbid events leading directly to death, or the circumstances of the accident or violence which produced the fatal injury". Expressed in deaths per 100,000 inhabitants, it is calculated as the number of deaths recorded in the population for a given period divided by population in the same period and then multiplied by 100,000.

2.7.6.19 Number of deaths by self-harm, total (eu_hea_sh_t)

Long tag: qog_eureg_long_eu_hea_sh_t

Original tag: eu_hea_sh_t

Description:
Number of deaths by self-harm, total. Causes of death (COD) statistics are based on information derived from the medical certificate of cause of death. COD target at the underlying cause of death, in accordance with the ICD-10 definition i.e. "the disease or injury which initiated the train of morbid events leading directly to death, or the circumstances of the accident or violence which produced the fatal injury". Expressed in deaths per 100,000 inhabitants, it is calculated as the number of deaths recorded in the population for a given period divided by population in the same period and then multiplied by 100,000.

2.7.6.20 Number of deaths by drug dependence, female (eu_hea_tox_f)

Long tag: qog_eureg_long_eu_hea_tox_f

Original tag: eu_hea_tox_f

Description:
Number of deaths by drug dependence, female. Causes of death (COD) statistics are based on information derived from the medical certificate of cause of death. COD target at the underlying cause of death, in accordance with the ICD-10 definition i.e. "the disease or injury which initiated the train of morbid events leading directly to death, or the circumstances of the accident or violence which produced the fatal injury". Expressed in deaths per 100,000 inhabitants, it is calculated as the number of deaths recorded in the population for a given period divided by population in the same period and then multiplied by 100,000.

2.7.6.21 Number of deaths by drug dependence, male (eu_hea_tox_m)

Long tag: qog_eureg_long_eu_hea_tox_m

Original tag: eu_hea_tox_m

Description:
Number of deaths by drug dependence, male. Causes of death (COD) statistics are based on information derived from the medical certificate of cause of death. COD target at the underlying cause of death, in accordance with the ICD-10 definition i.e. "the disease or injury which initiated the train of morbid events leading directly to death, or the circumstances of the accident or violence which produced the fatal injury". Expressed in deaths per 100,000 inhabitants, it is calculated as the number of deaths recorded in the population for a given period divided by population in the same period and then multiplied by 100,000.

2.7.6.22 Number of deaths by drug dependence, total (eu_hea_tox_t)

Long tag: qog_eureg_long_eu_hea_tox_t

Original tag: eu_hea_tox_t

Description:
Number of deaths by drug dependence, total. Causes of death (COD) statistics are based on information derived from the medical certificate of cause of death. COD target at the underlying cause of death, in accordance with the ICD-10 definition i.e. "the disease or injury which initiated the train of morbid events leading directly to death, or the circumstances of the accident or violence which produced the fatal injury". Expressed in deaths per 100,000 inhabitants, it is calculated as the number of deaths recorded in the population for a given period divided by population in the same period and then multiplied by 100,000.

2.7.6.23 Available beds in hospitals (HP.1) per hundred thousand inhabitants (eu_hea_bed)

Long tag: qog_eureg_long_eu_hea_bed

Original tag: eu_hea_bed

Description:
Available beds in hospitals (HP.1) per hundred thousand inhabitants. Health care facilities data refer to available beds in hospitals (HP.1) and subcategories (such as curative care beds, rehabilitative care beds, etc.). Total hospital beds (HP.1) are all hospital beds which are regularly maintained and staffed and immediately available for the care of admitted patients. Total hospital beds are broken down as follows: i) curative care (acute care) beds; ii) rehabilitative care beds; iii) long-term care beds (excluding psychiatric care beds) and iv) other hospital beds. The definition of health care facilities follows the International Classification for Health Accounts - Providers of health care (ICHA-HP) of the System of Health Accounts (SHA).

2.7.6.24 Curative care beds in hospitals (HP.1) per hundred thousand inhabitants (eu_hea_bedcur)

Long tag: qog_eureg_long_eu_hea_bedcur

Original tag: eu_hea_bedcur

Description:
Curative care beds in hospitals (HP.1) per hundred thousand inhabitants. Health care facilities data refer to available beds in hospitals (HP.1) and subcategories (such as curative care beds, rehabilitative care beds, etc.). Total hospital beds (HP.1) are all hospital beds which are regularly maintained and staffed and immediately available for the care of admitted patients. Total hospital beds are broken down as follows: i) curative care (acute care) beds; ii) rehabilitative care beds; iii) long-term care beds (excluding psychiatric care beds) and iv) other hospital beds. The definition of health care facilities follows the International Classification for Health Accounts - Providers of health care (ICHA-HP) of the System of Health Accounts (SHA).

2.7.6.25 Long-term care beds in hospitals (HP.1) per hundred thousand inhabitants (eu_hea_bedlt)

Long tag: qog_eureg_long_eu_hea_bedlt

Original tag: eu_hea_bedlt

Description:

Long-term care beds in hospitals (HP.1) per hundred thousand inhabitants. Health care facilities data refer to available beds in hospitals (HP.1) and subcategories (such as curative care beds, rehabilitative care beds, etc.). Total hospital beds (HP.1) are all hospital beds which are regularly maintained and staffed and immediately available for the care of admitted patients. Total hospital beds are broken down as follows: i) curative care (acute care) beds; ii) rehabilitative care beds; iii) long-term care beds (excluding psychiatric care beds) and iv) other hospital beds. The definition of health care facilities follows the International Classification for Health Accounts - Providers of health care (ICHA-HP) of the System of Health Accounts (SHA).

2.7.6.26 Other beds in hospitals (HP.1) per hundred thousand inhabitants (eu_hea_bedoth)

Long tag: qog_eureg_long_eu_hea_bedoth

Original tag: eu_hea_bedoth

Description:

Other beds in hospitals (HP.1) per hundred thousand inhabitants. Health care facilities data refer to available beds in hospitals (HP.1) and subcategories (such as curative care beds, rehabilitative care beds, etc.). Total hospital beds (HP.1) are all hospital beds which are regularly maintained and staffed and immediately available for the care of admitted patients. Total hospital beds are broken down as follows: i) curative care (acute care) beds; ii) rehabilitative care beds; iii) long-term care beds (excluding psychiatric care beds) and iv) other hospital beds. The definition of health care facilities follows the International Classification for Health Accounts - Providers of health care (ICHA-HP) of the System of Health Accounts (SHA).

2.7.6.27 Psychiatric care beds in hospitals (HP.1) per hundred thousand inhabitants (eu_hea_bedpsy)

Long tag: qog_eureg_long_eu_hea_bedpsy

Original tag: eu_hea_bedpsy

Description:

Psychiatric care beds in hospitals (HP.1) per hundred thousand inhabitants. Health care facilities data refer to available beds in hospitals (HP.1) and subcategories (such as curative care beds, rehabilitative care beds, etc.). Total hospital beds (HP.1) are all hospital beds which are regularly maintained and staffed and immediately available for the care of admitted patients. Total hospital beds are broken down as follows: i) curative care (acute care) beds; ii) rehabilitative care beds; iii) long-term care beds (excluding psychiatric care beds) and iv) other hospital beds. The definition of health care facilities follows the International Classification for Health Accounts - Providers of health care (ICHA-HP) of the System of Health Accounts (SHA).

2.7.6.28 Rehabilitative care beds in hospitals (HP.1) per hundred thousand inhabitants (eu_hea_bedreh)

Long tag: qog_eureg_long_eu_hea_bedreh

Original tag: eu_hea_bedreh

Description:

Rehabilitative care beds in hospitals (HP.1) per hundred thousand inhabitants. Health care facilities data refer to available beds in hospitals (HP.1) and subcategories (such as curative care beds, rehabilitative care beds, etc.). Total hospital beds (HP.1) are all hospital beds which are regularly maintained and staffed and immediately available for the care of admitted patients. Total hospital beds are broken down as follows: i) curative care (acute care) beds; ii) rehabilitative care beds; iii) long-term care beds (excluding psychiatric care beds) and iv) other hospital beds. The definition of health care facilities follows the International Classification for Health Accounts - Providers of health care (ICHA-HP) of the System of Health Accounts (SHA).

2.7.6.29 Dentists per hundred thousand inhabitants (eu_hea_dent)

Long tag: qog_eureg_long_eu_hea_dent

Original tag: eu_hea_dent

Description:

Dentists, per hundred thousand inhabitants. Health care staff data refer to human resources available for providing health care services in the country, irrespective of the sector of employment (i.e. whether they are independent, employed by a hospital or any other health care provider). 'Manpower' categories focus on health care professionals (physicians, dentists, nursing and caring professionals, pharmacists, physiotherapists). Three different concepts are used to present the number of health care professionals: i) 'practising', i.e. health care professionals providing services directly to patients; ii) 'professionally active', i.e. 'practising' health care professionals plus health care professionals for whom their medical education is a prerequisite for the execution of the job; iii) 'licensed to practice', i.e. health care professionals who are registered and entitled to practice as health care professionals.

2.7.6.30 Medical doctors per hundred thousand inhabitants (eu_hea_mdoc)

Long tag: qog_eureg_long_eu_hea_mdoc

Original tag: eu_hea_mdoc

Description:

Medical doctors, per hundred thousand inhabitants. Health care staff data refer to human resources available for providing health care services in the country, irrespective of the sector of employment (i.e. whether they are independent, employed by a hospital or any other health care provider). 'Manpower' categories focus on health care professionals (physicians, dentists, nursing and caring professionals, pharmacists, physiotherapists). Three different concepts are used to present the number of health care professionals: i) 'practising', i.e. health care professionals providing services directly to patients; ii) 'professionally active', i.e. 'practising' health care professionals plus health care professionals for whom their medical education is a prerequisite for the execution of the job; iii) 'licensed to practice', i.e. health care professionals who are registered and entitled to practice as health care professionals.

2.7.6.31 Nurses and midwives per hundred thousand inhabitants (eu_hea_nurs)

Long tag: qog_eureg_long_eu_hea_nurs

Original tag: eu_hea_nurs

Description:

Nurses and midwives, per hundred thousand inhabitants. Health care staff data refer to human resources available for providing health care services in the country, irrespective of the sector of employment (i.e. whether they are independent, employed by a hospital or any other health care provider). 'Manpower' categories focus on health care professionals (physicians, dentists, nursing and caring professionals, pharmacists, physiotherapists). Three different concepts are used to present the number of health care professionals: i) 'practising', i.e. health care professionals providing services directly to patients; ii) 'professionally active', i.e. 'practising' health care professionals plus health care professionals for whom their medical education is a prerequisite for the execution of the job; iii) 'licensed to practice', i.e. health care professionals who are registered and entitled to practice as health care professionals.

2.7.6.32 Pharmacists per hundred thousand inhabitants (eu_hea_pharm)

Long tag: qog_eureg_long_eu_hea_pharm

Original tag: eu_hea_pharm

Description:

Pharmacists per hundred thousand inhabitants. Health care staff data refer to human resources available for providing health care services in the country, irrespective of the sector of employment (i.e. whether they are independent, employed by a hospital or any other health care provider). 'Manpower' categories focus on health care professionals (physicians, dentists, nursing and caring professionals, pharmacists, physiotherapists). Three different concepts are used to present the number of health care professionals: i) 'practising', i.e. health care professionals providing services directly to patients; ii) 'professionally active', i.e. 'practising' health care professionals plus health care professionals for whom their medical education is a prerequisite for the execution of the job; iii) 'licensed to practice', i.e. health care professionals who are registered and entitled to practice as health care professionals.

2.7.6.33 Physiotherapists per hundred thousand inhabitants (eu_hea_phys)

Long tag: qog_eureg_long_eu_hea_phys

Original tag: eu_hea_phys

Description:

Physiotherapists per hundred thousand inhabitants. Health care staff data refer to human resources available for providing health care services in the country, irrespective of the sector of employment (i.e. whether they are independent, employed by a hospital or any other health care provider). 'Manpower' categories focus on health care professionals (physicians, dentists, nursing and caring professionals, pharmacists, physiotherapists). Three different concepts are used to present the number of health care professionals: i) 'practising', i.e. health care professionals providing services directly to patients; ii) 'professionally active', i.e. 'practising' health care professionals plus health care professionals for whom their medical education is a prerequisite for the execution of the job; iii) 'licensed to practice', i.e. health care professionals who are registered and entitled to practice as health care professionals.

2.7.7 Science and Technology

This category provides information on employment rates in different sectors, for the total population as well as subgroups.

2.7.7.1 Employment in agriculture, fishing and mining, percent of tot. employment, female (eu_emtk_ab_f)

Long tag: qog_eureg_long_eu_emtk_ab_f

Original tag: eu_emtk_ab_f

Description:

Female employment in agriculture, forestry and fishing; mining and quarrying, as percentage of total female employment. Data come from EU Labour force survey (LFS). Employed people are defined as persons aged 15

years and over who during the reference week performed work, even for just one hour a week, for pay, profit or family gain or were not at work but had a job or business from which they were temporarily absent because of, e.g., illness, holidays, industrial dispute and education and training. In high-tech statistics the population excludes anyone below the age of 15 or over the age of 74. The data are aggregated based on the statistical classification of economic activities in the European Community (NACE) at 2-digit level.

2.7.7.2 Employment in agriculture, fishing and mining, percent of tot. employment, male (eu_emtk_ab_m)

Long tag: qog_eureg_long_eu_emtk_ab_m

Original tag: eu_emtk_ab_m

Description:

Male employment in agriculture, forestry and fishing; mining and quarrying, as percentage of total male employment. Data come from EU Labour force survey (LFS). Employed people are defined as persons aged 15 years and over who during the reference week performed work, even for just one hour a week, for pay, profit or family gain or were not at work but had a job or business from which they were temporarily absent because of, e.g., illness, holidays, industrial dispute and education and training. In high-tech statistics the population excludes anyone below the age of 15 or over the age of 74. The data are aggregated based on the statistical classification of economic activities in the European Community (NACE) at 2-digit level.

2.7.7.3 Employment in agriculture, fishing and mining, percent of tot. employment, total (eu_emtk_ab_t)

Long tag: qog_eureg_long_eu_emtk_ab_t

Original tag: eu_emtk_ab_t

Description:

Employment in agriculture, forestry and fishing; mining and quarrying, as percentage of total employment. Data come from EU Labour force survey (LFS). Employed people are defined as persons aged 15 years and over who during the reference week performed work, even for just one hour a week, for pay, profit or family gain or were not at work but had a job or business from which they were temporarily absent because of, e.g., illness, holidays, industrial dispute and education and training. In high-tech statistics the population excludes anyone below the age of 15 or over the age of 74. The data are aggregated based on the statistical classification of economic activities in the European Community (NACE) at 2-digit level.

2.7.7.4 Employment in manufacturing, percent of tot. employment, female (eu_emtk_c_f)

Long tag: qog_eureg_long_eu_emtk_c_f

Original tag: eu_emtk_c_f

Description:

Female employment in manufacturing, as percentage of total female employment. Data come from EU Labour force survey (LFS). Employed people are defined as persons aged 15 years and over who during the reference week performed work, even for just one hour a week, for pay, profit or family gain or were not at work but had a job or business from which they were temporarily absent because of, e.g., illness, holidays, industrial dispute and education and training. In high-tech statistics the population excludes anyone below the age of 15 or over the age of 74. The data are aggregated based on the statistical classification of economic activities in the European Community (NACE) at 2-digit level.

2.7.7.5 Employment in manufacturing, percent of tot. employment, male (eu_emtk_c_m)

Long tag: qog_eureg_long_eu_emtk_c_m

Original tag: eu_emtk_c_m

Description:

Male employment in manufacturing, as percentage of total male employment. Data come from EU Labour force survey (LFS). Employed people are defined as persons aged 15 years and over who during the reference week performed work, even for just one hour a week, for pay, profit or family gain or were not at work but had a job or business from which they were temporarily absent because of, e.g., illness, holidays, industrial dispute and education and training. In high-tech statistics the population excludes anyone below the age of 15 or over the age of 74. The data are aggregated based on the statistical classification of economic activities in the European Community (NACE) at 2-digit level.

2.7.7.6 Employment in manufacturing, percent of tot. employment, total (eu_emtk_c_t)

Long tag: qog_eureg_long_eu_emtk_c_t

Original tag: eu_emtk_c_t

Description:

Employment in manufacturing, as percentage of total employment. Data come from EU Labour force survey (LFS). Employed people are defined as persons aged 15 years and over who during the reference week performed work, even for just one hour a week, for pay, profit or family gain or were not at work but had a job or business from which they were temporarily absent because of, e.g., illness, holidays, industrial dispute and education and

training. In high-tech statistics the population excludes anyone below the age of 15 or over the age of 74. The data are aggregated based on the statistical classification of economic activities in the European Community (NACE) at 2-digit level.

2.7.7.7 Employment in high-technology manufacturing, percent of tot. employment, female (eu_emtk_chtc_f)

Long tag: qog_eureg_long_eu_emtk_chtc_f

Original tag: eu_emtk_chtc_f

Description:

Female employment in high-technology manufacturing, as percentage of total female employment. Data come from EU Labour force survey (LFS). Employed people are defined as persons aged 15 years and over who during the reference week performed work, even for just one hour a week, for pay, profit or family gain or were not at work but had a job or business from which they were temporarily absent because of, e.g., illness, holidays, industrial dispute and education and training. In high-tech statistics the population excludes anyone below the age of 15 or over the age of 74. The data are aggregated based on the statistical classification of economic activities in the European Community (NACE) at 2-digit level.

Original tag: eu_emtk_p_m

Description:
Male employment in education, as percentage of total male employment. Data come from EU Labour force survey (LFS). Employed people are defined as persons aged 15 years and over who during the reference week performed work, even for just one hour a week, for pay, profit or family gain or were not at work but had a job or business from which they were temporarily absent because of, e.g., illness, holidays, industrial dispute and education and training. In high-tech statistics the population excludes anyone below the age of 15 or over the age of 74. The data are aggregated based on the statistical classification of economic activities in the European Community (NACE) at 2-digit level.

2.7.7.42 Employment in education, percent of tot. employment, total (eu_emtk_p_t)

2.7.7.52 Business enterprise sector intramural expenditure in R&D, euro per inhabitant (eu_rdexp_bes)

Long tag: qog_eureg_long_eu_rdexp_bes

Original tag: eu_rdexp_bes

Description:

Business enterprise sector intramural expenditure in R&D, euro per inhabitant. Intramural R&D expenditures are all current expenditures plus gross fixed expenditure for R&D performed within a statistical unit during a

specific period, whatever the source of funds. Further information on the concepts and definitions used for the production of R&D statistics can be found in Frascati Manual (OECD 2015).

2.7.7.53 Government sector intramural expenditure in R&D, euro per inhabitant (eu_rdexp_gov)

Long tag: qog_eureg_long_eu_rdexp_gov

Original tag: eu_rdexp_gov

Description:

Government sector intramural expenditure in R&D, euro per inhabitant. Intramural R&D expenditures are all current expenditures plus gross fixed expenditure for R&D performed within a statistical unit during a specific period, whatever the source of funds. Further information on the concepts and definitions used for the production of R&D statistics can be found in Frascati Manual (OECD 2015).

2.7.7.54 Higher education sector intramural expenditure in R&D, euro per inhabitant (eu_rdexp_hes)

Long tag: qog_eureg_long_eu_rdexp_hes

Original tag: eu_rdexp_hes

Description:

Higher education sector intramural expenditure in R&D, euro per inhabitant. Intramural R&D expenditures are all current expenditures plus gross fixed expenditure for R&D performed within a statistical unit during a specific period, whatever the source of funds. Further information on the concepts and definitions used for the production of R&D statistics can be found in Frascati Manual (OECD 2015).

2.7.7.55 Private non-profit sector intramural expenditure in R&D, euro per inhabitant (eu_rdexp_pnp)

Long tag: qog_eureg_long_eu_rdexp_pnp

Original tag: eu_rdexp_pnp

Description:

Private non-profit sector intramural expenditure in R&D, euro per inhabitant. Intramural R&D expenditures are all current expenditures plus gross fixed expenditure for R&D performed within a statistical unit during a specific period, whatever the source of funds. Further information on the concepts and definitions used for the production of R&D statistics can be found in Frascati Manual (OECD 2015).

2.7.7.56 All sectors intramural expenditure in R&D, euro per inhabitant (eu_rdexp_total)

Long tag: qog_eureg_long_eu_rdexp_total

Original tag: eu_rdexp_total

Description:

All sectors intramural expenditure in R&D, euro per inhabitant. Intramural R&D expenditures are all current expenditures plus gross fixed expenditure for R&D performed within a statistical unit during a specific period, whatever the source of funds. Further information on the concepts and definitions used for the production of R&D statistics can be found in Frascati Manual (OECD 2015).

2.7.7.57 Total R&D employees in business enterprise sector, female, full-time equivalent (eu_prd_bes_f)

Long tag: qog_eureg_long_eu_prd_bes_f

Original tag: eu_prd_bes_f

Description:

Female R&D employees in business enterprise sector, full-time equivalent. R&D personnel in a statistical unit include all persons engaged directly in R&D, whether employed by the statistical unit or external contributors fully integrated into the statistical unit‘s R&D activities, as well as those providing direct services for the R&D activities (such as R&D managers, administrators, technicians and clerical staff). Persons providing indirect support and ancillary services, such as canteen, maintenance, administrative and security staff, has been excluded, even though their wages and salaries are included in “other current costs” when measuring R&D expenditure. Further information on the concepts and definitions used for the production of R&D statistics can be found in Frascati Manual (OECD 2015).

2.7.7.58 Total R&D employees in business enterprise sector, total, full-time equivalent (eu_prd_bes_t)

Long tag: qog_eureg_long_eu_prd_bes_t

Original tag: eu_prd_bes_t

Description:

Total R&D employees in business enterprise sector, full-time equivalent. R&D personnel in a statistical unit include all persons engaged directly in R&D, whether employed by the statistical unit or external contributors fully integrated into the statistical unit‘s R&D activities, as well as those providing direct services for the R&D activities (such as R&D managers, administrators, technicians and clerical staff). Persons providing

indirect support and ancillary services, such as canteen, maintenance, administrative and security staff, has been excluded, even though their wages and salaries are included in "other current costs" when measuring R&D expenditure. Further information on the concepts and definitions used for the production of R&D statistics can be found in Frascati Manual (OECD 2015).

2.7.7.59 Total R&D employees in government sector, female, full-time equivalent (eu_prd_gov_f)

Long tag: qog_eureg_long_eu_prd_gov_f

Original tag: eu_prd_gov_f

Description:

Female R&D employees in government sector, full-time equivalent. R&D personnel in a statistical unit include all persons engaged directly in R&D, whether employed by the statistical unit or external contributors fully integrated into the statistical unit's R&D activities, as well as those providing direct services for the R&D activities (such as R&D managers, administrators, technicians and clerical straff). Persons providing indirect support and ancillary services, such as canteen, maintenance, administrative and security staff, has been excluded, even though their wages and salaries are included in "other current costs" when measuring R&D expenditure. Further information on the concepts and definitions used for the production of R&D statistics can be found in Frascati Manual (OECD 2015).

2.7.7.66 Total R&D employees in all sectors, total, full-time equivalent (eu_prd_total_t)

Long tag: qog_eureg_long_eu_prd_total_t

Original tag: eu_prd_total_t

Description:

Total R&D employees in all sectors, full-time equivalent. R&D personnel in a statistical unit include all persons engaged directly in R&D, whether employed by the statistical unit or external contributors fully integrated into the statistical unit‘s R&D activities, as well as those providing direct services for the R&D activities (such as R&D managers, administrators, technicians and clerical staff). Persons providing indirect support and ancillary services, such as canteen, maintenance, administrative and security staff, has been excluded, even though their wages and salaries are included in “other current costs” when measuring R&D expenditure. Further information on the concepts and definitions used for the production of R&D statistics can be found in Frascati Manual (OECD 2015).

2.7.8 Poverty and Social Exclusion

This category describes the share of the population living in or at risk of poverty.

2.7.8.1 At-risk-of-poverty rate by NUTS regions, percentage (eu_povrisk_pc)

Long tag: qog_eureg_long_eu_povrisk_pc

Original tag: eu_povrisk_pc

Description:

Percentage of total population at-risk-of-poverty rate by NUTS 2 regions. The persons with an equivalised disposable income below the risk-of-poverty threshold, which is set at 60 percent of the national median equivalised disposable income (after social transfers).

2.7.8.2 People (0 to 59 years) in households with low work intensity, as percent (eu_lwoin_pc)

Long tag: qog_eureg_long_eu_lwoin_pc

Original tag: eu_lwoin_pc

Description:
Population aged 0-59 living in households with very low work intensity by NUTS regions, as a percentage of total population. People living in households with very low work intensity are people aged 0-59 living in households where the adults work less than 20percent of their total work potential during the past year.

2.7.8.3 People (0 to 59 years) in households with low work intensity, percent of total pop. (eu_lwoin_pc_y_lt60)

Long tag: qog_eureg_long_eu_lwoin_pc_y_lt60

Original tag: eu_lwoin_pc_y_lt60

Description:
Population aged 0-59 living in households with very low work intensity by NUTS regions, as a percentage of total population aged less than 60. People living in households with very low work intensity are people aged 0-59 living in households where the adults work less than 20percent of their total work potential during the past year.

2.7.8.4 Severe material deprivation rate by NUTS regions, percentage (eu_matdep_pc)

Long tag: qog_eureg_long_eu_matdep_pc

Original tag: eu_matdep_pc

Description:
Percentage of total population living in conditions of severe material deprivation by NUTS 2 regions. The collection "material deprivation" covers indicators relating to economic strain, durables, housing and environment of the dwelling. Severely materially deprived persons have living conditions severely constrained by a lack of resources, they experience at least 4 out of 9 following deprivations items: they cannot afford i) to pay rent or utility bills, ii) keep home adequately warm, iii) face unexpected expenses, iv) eat meat, fish or a protein equivalent every second day, v) a week holiday away from home, vi) a car, vii) a washing machine, viii) a colour TV, ix) a telephone.

2.7.8.5 People at risk of poverty or social exclusion by NUTS regions, percentage (eu_povr_pc)

Long tag: qog_eureg_long_eu_povr_pc

Original tag: eu_povr_pc

Description:
People at risk of poverty or social exclusion by NUTS 2 regions, percentage of total population. Persons who are at risk of poverty or severely materially deprived or living in households with very low work intensity. Persons are only counted once even if they are present in several sub-indicators. At risk-of-poverty are persons with an equivalised disposable income below the risk-of-poverty threshold, which is set at 60 percent of the national median equivalised disposable income (after social transfers). Material deprivation covers indicators relating to economic strain and durables. Severely materially deprived persons have living conditions severely constrained by a lack of resources, they experience at least 4 out of 9 following deprivations items: cannot afford i) to pay rent or utility bills, ii) keep home adequately warm, iii) face unexpected expenses, iv) eat meat, fish or a protein equivalent every second day, v) a week holiday away from home, vi) a car, vii) a washing machine, viii) a colour TV, or ix) a telephone. People living in households with very low work intensity are those aged 0-59 living in households where the adults (aged 18-59) work less than 20percent of their total work potential during the past year.

2.7.9 Digital Society and Economy

This category includes variables related to internet use and the use of the internet for economic purposes, such as purchases or banking.

2.7.9.1 Last online purchase: between 3 and 12 months ago, percentage (eu_igs_b3_12)

Long tag: qog_eureg_long_eu_igs_b3_12

Original tag: eu_igs_b3_12

Description:
Percentage of individuals whose last online purchase between 3 and 12 months ago. Data given in this domain are collected annually by the National Statistical Institutes and are based on Eurostat's annual model questionnaires on ICT (Information and Communication Technologies) usage in households and by individuals. The survey comprises questions at household level and individual level. The population of households consists of all private households having at least one member in the age group 16 to 74 years. The population of individuals consists of all individuals aged 16 to 74 (on an optional basis some countries collect separate data on other age groups, individuals aged 15 years or less, aged 75 or more). Regional breakdowns have been provided on a voluntary basis for 2006 and 2007 according to NUTS1 or NUTS2 by several countries. Starting from 2008, the collection of NUTS1 breakdowns is obligatory (regional breakdowns for all countries are available) while NUTS2 breakdowns are still optional.

2.7.9.2 Online purchases: from sellers from other EU countries, percentage (eu_igs_bfeu)

Long tag: qog_eureg_long_eu_igs_bfeu

Original tag: eu_igs_bfeu

Description:

Percentage of individuals who have made online purchases from sellers in other EU countries. Data given in this domain are collected annually by the National Statistical Institutes and are based on Eurostat's annual model questionnaires on ICT (Information and Communication Technologies) usage in households and by individuals. The survey comprises questions at household level and individual level. The population of households consists of all private households having at least one member in the age group 16 to 74 years. The population of individuals consists of all individuals aged 16 to 74 (on an optional basis some countries collect separate data on other age groups, individuals aged 15 years or less, aged 75 or more). Regional breakdowns have been provided on a voluntary basis for 2006 and 2007 according to NUTS1 or NUTS2 by several countries. Starting from 2008, the collection of NUTS1 breakdowns is obligatory (regional breakdowns for all countries are available) while NUTS2 breakdowns are still optional.

2.7.9.3 Online purchases: travel and holiday accommodation, percentage (eu_igs_bhols)

Long tag: qog_eureg_long_eu_igs_bhols

Original tag: eu_igs_bhols

Description:

Percentage of individuals who purchased travel and holiday accommodation online. Data given in this domain are collected annually by the National Statistical Institutes and are based on Eurostat's annual model questionnaires on ICT (Information and Communication Technologies) usage in households and by individuals. The survey comprises questions at household level and individual level. The population of households consists of all private households having at least one member in the age group 16 to 74 years. The population of individuals consists of all individuals aged 16 to 74 (on an optional basis some countries collect separate data on other age groups, individuals aged 15 years or less, aged 75 or more). Regional breakdowns have been provided on a voluntary basis for 2006 and 2007 according to NUTS1 or NUTS2 by several countries. Starting from 2008, the collection of NUTS1 breakdowns is obligatory (regional breakdowns for all countries are available) while NUTS2 breakdowns are still optional.

2.7.9.4 Last online purchase: in the 12 months, percentage (eu_igs_blt12)

Long tag: qog_eureg_long_eu_igs_blt12

Original tag: eu_igs_blt12

Description:

Percentage of individuals who made an online purchase in the 12 months. Data given in this domain are collected annually by the National Statistical Institutes and are based on Eurostat's annual model questionnaires on ICT (Information and Communication Technologies) usage in households and by individuals. The survey comprises questions at household level and individual level. The population of households consists of all private households having at least one member in the age group 16 to 74 years. The population of individuals consists of all individuals aged 16 to 74 (on an optional basis some countries collect separate data on other age groups, individuals aged 15 years or less, aged 75 or more). Regional breakdowns have been provided on a voluntary basis for 2006 and 2007 according to NUTS1 or NUTS2 by several countries. Starting from 2008, the collection of NUTS1 breakdowns is obligatory (regional breakdowns for all countries are available) while NUTS2 breakdowns are still optional.

2.7.9.5 Last online purchase: more than a year ago or never, percentage (eu_igs_bumt12x)

Long tag: qog_eureg_long_eu_igs_bumt12x

Original tag: eu_igs_bumt12x

Description:

Percentage of individuals who ordered goods or services in internet more than a year ago or never. Data given in this domain are collected annually by the National Statistical Institutes and are based on Eurostat's annual model questionnaires on ICT (Information and Communication Technologies) usage in households and by individuals. The survey comprises questions at household level and individual level. The population of households consists of all private households having at least one member in the age group 16 to 74 years. The population of individuals consists of all individuals aged 16 to 74 (on an optional basis some countries collect separate data on other age groups, individuals aged 15 years or less, aged 75 or more). Regional breakdowns have been provided on a voluntary basis for 2006 and 2007 according to NUTS1 or NUTS2 by several countries. Starting from 2008, the collection of NUTS1 breakdowns is obligatory (regional breakdowns for all countries are available) while NUTS2 breakdowns are still optional.

2.7.9.6 Last online purchase: in the last 3 months, percentage (eu_igs_buy3)

Long tag: qog_eureg_long_eu_igs_buy3

Original tag: eu_igs_buy3

Description:

Percentage of individuals who made an online purchase in the last 3 months. Data given in this domain are

collected annually by the National Statistical Institutes and are based on Eurostat's annual model questionnaires on ICT (Information and Communication Technologies) usage in households and by individuals. The survey comprises questions at household level and individual level. The population of households consists of all private households having at least one member in the age group 16 to 74 years. The population of individuals consists of all individuals aged 16 to 74 (on an optional basis some countries collect separate data on other age groups, individuals aged 15 years or less, aged 75 or more). Regional breakdowns have been provided on a voluntary basis for 2006 and 2007 according to NUTS1 or NUTS2 by several countries. Starting from 2008, the collection of NUTS1 breakdowns is obligatory (regional breakdowns for all countries are available) while NUTS2 breakdowns are still optional.

2.7.9.7 Percentage of households with broadband internet access (eu_is_bacc)

Long tag: qog_eureg_long_eu_is_bacc

Original tag: eu_is_bacc

Description:

Percentage of households with broadband internet access. Data given in this domain are collected annually by the National Statistical Institutes and are based on Eurostat's annual model questionnaires on ICT (Information and Communication Technologies) usage in households and by individuals. The survey comprises questions at household level and individual level. The population of households consists of all private households having at least one member in the age group 16 to 74 years. The population of individuals consists of all individuals aged 16 to 74 (on an optional basis some countries collect separate data on other age groups, individuals aged 15 years or less, aged 75 or more). Regional breakdowns have been provided on a voluntary basis for 2006 and 2007 according to NUTS1 or NUTS2 by several countries. Starting from 2008, the collection of NUTS1 breakdowns is obligatory (regional breakdowns for all countries are available) while NUTS2 breakdowns are still optional.

2.7.9.8 Percentage of individuals who have never used a computer (eu_iu_never)

Long tag: qog_eureg_long_eu_iu_never

Original tag: eu_iu_never

Description:

Percentage of individuals who have never used a computer. Data given in this domain are collected annually by the National Statistical Institutes and are based on Eurostat's annual model questionnaires on ICT (Information and Communication Technologies) usage in households and by individuals. The survey comprises questions at household level and individual level. The population of households consists of all private households having at least one member in the age group 16 to 74 years. The population of individuals consists of all individuals aged 16 to 74 (on an optional basis some countries collect separate data on other age groups, individuals aged 15 years or less, aged 75 or more). Regional breakdowns have been provided on a voluntary basis for 2006 and 2007 according to NUTS1 or NUTS2 by several countries. Starting from 2008, the collection of NUTS1 breakdowns is obligatory (regional breakdowns for all countries are available) while NUTS2 breakdowns are still optional.

2.7.9.9 Percentage of individuals using internet to interact with public authorities (eu_iu_govform)

Long tag: qog_eureg_long_eu_iu_govform

Original tag: eu_iu_govform

Description:

Percentage of individuals using the internet to interact with public authorities. Data given in this domain are collected annually by the National Statistical Institutes and are based on Eurostat's annual model questionnaires on ICT (Information and Communication Technologies) usage in households and by individuals. The survey comprises questions at household level and individual level. The population of households consists of all private households having at least one member in the age group 16 to 74 years. The population of individuals consists of all individuals aged 16 to 74 (on an optional basis some countries collect separate data on other age groups, individuals aged 15 years or less, aged 75 or more). Regional breakdowns have been provided on a voluntary basis for 2006 and 2007 according to NUTS1 or NUTS2 by several countries. Starting from 2008, the collection of NUTS1 breakdowns is obligatory (regional breakdowns for all countries are available) while NUTS2 breakdowns are still optional.

2.7.9.10 Percentage of individuals using internet to submit forms to authorities (eu_iu_govint)

Long tag: qog_eureg_long_eu_iu_govint

Original tag: eu_iu_govint

Description:

Percentage of individuals using the internet to submit forms to authorities. Data given in this domain are collected annually by the National Statistical Institutes and are based on Eurostat's annual model questionnaires on ICT (Information and Communication Technologies) usage in households and by individuals. The survey comprises questions at household level and individual level. The population of households consists of all private households having at least one member in the age group 16 to 74 years. The population of individuals consists of all individuals aged 16 to 74 (on an optional basis some countries collect separate data on other age groups, individuals aged 15 years or less, aged 75 or more). Regional breakdowns have been provided on a voluntary basis for 2006 and 2007 according to NUTS1 or NUTS2 by several countries. Starting from 2008, the collection of NUTS1 breakdowns is obligatory (regional breakdowns for all countries are available) while NUTS2 breakdowns are still optional.

2.7.9.11 Percentage of households with internet access (eu_is_iacc)

Long tag: qog_eureg_long_eu_is_iacc

Original tag: eu_is_iacc

Description:

Percentage of households with internet access. Data given in this domain are collected annually by the National Statistical Institutes and are based on Eurostat's annual model questionnaires on ICT (Information and Communication Technologies) usage in households and by individuals. The survey comprises questions at household level and individual level. The population of households consists of all private households having at least one member in the age group 16 to 74 years. The population of individuals consists of all individuals aged 16 to 74 (on an optional basis some countries collect separate data on other age groups, individuals aged 15 years or less, aged 75 or more). Regional breakdowns have been provided on a voluntary basis for 2006 and 2007 according to NUTS1 or NUTS2 by several countries. Starting from 2008, the collection of NUTS1 breakdowns is obligatory (regional breakdowns for all countries are available) while NUTS2 breakdowns are still optional.

2.7.9.12 Individuals who accessed internet away from home or work, percent (eu_iu_ohw)

Long tag: qog_eureg_long_eu_iu_ohw

Original tag: eu_iu_ohw

Description:

Percentage of individuals who accessed the internet away from home or work. Data given in this domain are collected annually by the National Statistical Institutes and are based on Eurostat's annual model questionnaires on ICT (Information and Communication Technologies) usage in households and by individuals. The survey comprises questions at household level and individual level. The population of households consists of all private households having at least one member in the age group 16 to 74 years. Starting from 2008, the collection of NUTS1 breakdowns is obligatory (regional breakdowns for all countries are available) while NUTS2 breakdowns are still optional.

2.7.9.22 Internet use: never (eu_iu_iux)

Long tag: qog_eureg_long_eu_iu_iux

Original tag: eu_iu_iux

Description:

Percentage of individuals who have never used the internet. Data given in this domain are collected annually by the National Statistical Institutes and are based on Eurostat's annual model questionnaires on ICT (Information and Communication Technologies) usage in households and by individuals. The survey comprises questions at household level and individual level. The population of households consists of all private households having at least one member in the age group 16 to 74 years. The population of individuals consists of all individuals aged 16 to 74 (on an optional basis some countries collect separate data on other age groups, individuals aged 15 years or less, aged 75 or more). Regional breakdowns have been provided on a voluntary basis for 2006 and 2007 according to NUTS1 or NUTS2 by several countries. Starting from 2008, the collection of NUTS1 breakdowns is obligatory (regional breakdowns for all countries are available) while NUTS2 breakdowns are still optional.

2.7.10 Labour Market Statistics

This category includes variables about employment and unemployment rates, in general, as well as in subgroups of the population.

2.7.10.1 Full-time employment, female, in thousands (eu_emp_ft_f)

Long tag: qog_eureg_long_eu_emp_ft_f

Original tag: eu_emp_ft_f

Description:

Full-time female employment, in thousands. The source for the regional labour market information is the EU Labour Force Survey (EU-LFS). This is a quarterly household sample survey conducted in all Member States of the EU, the United Kingdom, EFTA and Candidate Countries (Montenegro, North Macedonia, Serbia and Turkey). The definitions of employment and unemployment, as well as other survey characteristics follow the definitions and recommendations of the International Labour Organisation (ILO). The definition of unemployment is further specified in Commission Regulation (EC) No 1897/2000.

2.7.10.2 Full-time employment, male, in thousands (eu_emp_ft_m)

Long tag: qog_eureg_long_eu_emp_ft_m

Original tag: eu_emp_ft_m

Description:

Full-time male employment, in thousands. The source for the regional labour market information is the EU Labour Force Survey (EU-LFS). This is a quarterly household sample survey conducted in all Member States of the EU, the United Kingdom, EFTA and Candidate Countries (Montenegro, North Macedonia, Serbia and

Turkey). The definitions of employment and unemployment, as well as other survey characteristics follow the definitions and recommendations of the International Labour Organisation (ILO). The definition of unemployment is further specified in Commission Regulation (EC) No 1897/2000.

2.7.10.3 Full-time employment, total, in thousands (eu_emp_ft_t)

Long tag: qog_eureg_long_eu_emp_ft_t

Original tag: eu_emp_ft_t

Description:

Total full-time employment, in thousands. The source for the regional labour market information is the EU Labour Force Survey (EU-LFS). This is a quarterly household sample survey conducted in all Member States of the EU, the United Kingdom, EFTA and Candidate Countries (Montenegro, North Macedonia, Serbia and Turkey). The definitions of employment and unemployment, as well as other survey characteristics follow the definitions and recommendations of the International Labour Organisation (ILO). The definition of unemployment is further specified in Commission Regulation (EC) No 1897/2000.

2.7.10.4 Part-time employment, female, in thousands (eu_emp_pt_f)

Long tag: qog_eureg_long_eu_emp_pt_f

Original tag: eu_emp_pt_f

Description:

Part-time female employment, in thousands. The source for the regional labour market information is the EU Labour Force Survey (EU-LFS). This is a quarterly household sample survey conducted in all Member States of the EU, the United Kingdom, EFTA and Candidate Countries (Montenegro, North Macedonia, Serbia and Turkey). The definitions of employment and unemployment, as well as other survey characteristics follow the definitions and recommendations of the International Labour Organisation (ILO). The definition of unemployment is further specified in Commission Regulation (EC) No 1897/2000.

2.7.10.5 Part-time employment, male, in thousands (eu_emp_pt_m)

Long tag: qog_eureg_long_eu_emp_pt_m

Original tag: eu_emp_pt_m

Description:

Part-time male employment, in thousands. The source for the regional labour market information is the EU Labour Force Survey (EU-LFS). This is a quarterly household sample survey conducted in all Member States of the EU, the United Kingdom, EFTA and Candidate Countries (Montenegro, North Macedonia, Serbia and Turkey). The definitions of employment and unemployment, as well as other survey characteristics follow the definitions and recommendations of the International Labour Organisation (ILO). The definition of unemployment is further specified in Commission Regulation (EC) No 1897/2000.

2.7.10.6 Part-time employment, total, in thousands (eu_emp_pt_t)

Long tag: qog_eureg_long_eu_emp_pt_t

Original tag: eu_emp_pt_t

Description:

Total part-time employment, in thousands. The source for the regional labour market information is the EU Labour Force Survey (EU-LFS). This is a quarterly household sample survey conducted in all Member States of the EU, the United Kingdom, EFTA and Candidate Countries (Montenegro, North Macedonia, Serbia and Turkey). The source for the regional labour market information is the EU Labour Force Survey (EU-LFS). The definitions of employment and unemployment, as well as other survey characteristics follow the definitions and recommendations of the International Labour Organisation (ILO). The definition of unemployment is further specified in Commission Regulation (EC) No 1897/2000.

2.7.10.7 Employment rate for 15-24 years old, female (eu_emp_1524f)

Long tag: qog_eureg_long_eu_emp_1524f

Original tag: eu_emp_1524f

Description:

Employment rate for women between 15-24 years old. The source for the regional labour market information is the EU Labour Force Survey (EU-LFS). This is a quarterly household sample survey conducted in all Member States of the EU, the United Kingdom, EFTA and Candidate Countries (Montenegro, North Macedonia, Serbia and Turkey). The definitions of employment and unemployment, as well as other survey characteristics follow the definitions and recommendations of the International Labour Organisation (ILO). The definition of unemployment is further specified in Commission Regulation (EC) No 1897/2000.

2.7.10.8 Employment rate for 15-24 years old, male (eu_emp_1524m)

Long tag: qog_eureg_long_eu_emp_1524m

Original tag: eu_emp_1524m

Description:

Employment rate for men between 15-24 years old. The source for the regional labour market information is the EU Labour Force Survey (EU-LFS). This is a quarterly household sample survey conducted in all Member

States of the EU, the United Kingdom, EFTA and Candidate Countries (Montenegro, North Macedonia, Serbia and Turkey). The definitions of employment and unemployment, as well as other survey characteristics follow the definitions and recommendations of the International Labour Organisation (ILO). The definition of unemployment is further specified in Commission Regulation (EC) No 1897/2000.

2.7.10.9 Employment rate for 15-24 years old, total (eu_emp_1524t)

Long tag: qog_eureg_long_eu_emp_1524t

Original tag: eu_emp_1524t

Description:

Total employment rate between 15-24 years old. The source for the regional labour market information is the EU Labour Force Survey (EU-LFS). This is a quarterly household sample survey conducted in all Member States of the EU, the United Kingdom, EFTA and Candidate Countries (Montenegro, North Macedonia, Serbia and Turkey). Original tag: eu_b6n_eur_hab

Description:

Income of households (disposable income), Euro per inhabitant. The disposable income of private households is the balance of primary income (operating surplus/mixed income plus compensation of employees plus property income received minus property income paid) and the redistribution of income in cash. These transactions comprise social contributions paid, social benefits in cash received, current taxes on income and wealth paid, as well as other current transfers. Disposable income does not include social transfers in kind coming from public administrations or non-profit institutions serving households.

2.7.11.6 Income of households (Disposable income) in million euro (eu_b6n_mio_eur)

Long tag: qog_eureg_long_eu_b6n_mio_eur

Original tag: eu_b6n_mio_eur

Description:

Income of households (disposable income), million Euro. The disposable income of private households is the balance of primary income (operating surplus/mixed income plus compensation of employees plus property income received minus property income paid) and the redistribution of income in cash. These transactions comprise social contributions paid, social benefits in cash received, current taxes on income and wealth paid, as well as other current transfers. Disposable income does not include social transfers in kind coming from public administrations or non-profit institutions serving households.

2.7.11.7 Income of households (Disposable income) in million national currency (eu_b6n_mio_nac)

Long tag: qog_eureg_long_eu_b6n_mio_nac

Original tag: eu_b6n_mio_nac

Description:

Income of households (disposable income), million national currency. The disposable income of private households is the balance of primary income (operating surplus/mixed income plus compensation of employees plus property income received minus property income paid) and the redistribution of income in

cash. These transactions comprise social contributions paid, social benefits in cash received, current taxes on income and wealth paid, as well as other current transfers. Disposable income does not include social transfers in kind coming from public administrations or non-profit institutions serving households.

2.7.11.8 Income of households (Disposable income) in million PPS (eu_b6n_mio_pps)

Long tag: qog_eureg_long_eu_b6n_mio_pps

Original tag: eu_b6n_mio_pps

Description:

Income of households (disposable income), million PPS. The disposable income of private households is the balance of primary income (operating surplus/mixed income plus compensation of employees plus property income received minus property income paid) and the redistribution of income in cash. These transactions comprise social contributions paid, social benefits in cash received, current taxes on income and wealth paid, as well as other current transfers. Disposable income does not include social transfers in kind coming from public administrations or non-profit institutions serving households.

2.7.11.9 Income of households (Adjusted disposable income) in million euro (eu_b7n_mio_eur)

Long tag: qog_eureg_long_eu_b7n_mio_eur

Original tag: eu_b7n_mio_eur

Description:

Income of households (net adjusted disposable income), million euro. The disposable income of private households is the balance of primary income (operating surplus/mixed income plus compensation of employees plus property income received minus property income paid) and the redistribution of income in cash. These transactions comprise social contributions paid, social benefits in cash received, current taxes on income and wealth paid, as well as other current transfers. Disposable income does not include social transfers in kind coming from public administrations or non-profit institutions serving households. Net signifies that depreciation costs have been subtracted from the income presented, and regional data are adjusted to the national values by Eurostat.

2.7.11.10 Income of households (Adjusted disposable income) in million national currency (eu_b7n_mio_nac)

Long tag: qog_eureg_long_eu_b7n_mio_nac

Original tag: eu_b7n_mio_nac

Description:

Income of households (net adjusted disposable income), million national currency. The disposable income of private households is the balance of primary income (operating surplus/mixed income plus compensation of employees plus property income received minus property income paid) and the redistribution of income in cash. These transactions comprise social contributions paid, social benefits in cash received, current taxes on income and wealth paid, as well as other current transfers. Disposable income does not include social transfers in kind coming from public administrations or non-profit institutions serving households. Net signifies that depreciation costs have been subtracted from the income presented, and regional data are adjusted to the national values by Eurostat.

2.7.11.11 Regional gross domestic product by NUTS 2 regions, million EUR (eu_mio_eur)

Long tag: qog_eureg_long_eu_mio_eur

Original tag: eu_mio_eur

Description:

Regional gross domestic product (GDP) by NUTS 2 regions in Million euro. GDP is an indicator of the output of a country or a region. It reflects the total value of all goods and services produced less the value of goods and services used for intermediate consumption in their production. Expressing GDP in PPS (purchasing power standards) eliminates differences in price levels between countries. Calculations on a per inhabitant basis allow for the comparison of economies and regions significantly different in absolute size. GDP per inhabitant in PPS is the key variable for determining the eligibility of NUTS 2 regions in the framework of the European Union's structural policy.

2.7.11.12 Regional gross domestic product (million PPS) by NUTS 2 regions (eu_gdp_mio_pps)

Long tag: qog_eureg_long_eu_gdp_mio_pps

Original tag: eu_gdp_mio_pps

Description:

Regional gross domestic product (GDP) by NUTS 2 regions in Million PPS (purchasing power standards). GDP is an indicator of the output of a country or a region. It reflects the total value of all goods and services produced less the value of goods and services used for intermediate consumption in their production. Expressing GDP in PPS eliminates differences in price levels between countries. Calculations on a per inhabitant basis allow for the comparison of economies and regions significantly different in absolute size. GDP per inhabitant

in PPS is the key variable for determining the eligibility of NUTS 2 regions in the framework of the European Union's structural policy.

2.7.11.13 Regional gross domestic product (PPS per inhabitant) by NUTS 2 regions (eu_gdp_pps_hab)

Long tag: qog_eureg_long_eu_gdp_pps_hab

Original tag: eu_gdp_pps_hab

Description:

Regional gross domestic product (GDP) by NUTS 2 regions in PPS (purchasing power standards) per inhabitant. GDP is an indicator of the output of a country or a region. It reflects the total value of all goods and services produced less the value of goods and services used for intermediate consumption in their production. Expressing GDP in PPS eliminates differences in price levels between countries. Calculations on a per inhabitant basis allow for the comparison of economies and regions significantly different in absolute size. GDP per inhabitant in PPS is the key variable for determining the eligibility of NUTS 2 regions in the framework of the European Union's structural policy.

2.7.11.14 Regional gross domestic product. PPS per inhabitant in percentage of EU27 (eu_gdp_pps_hab_eu27_2020)

Long tag: qog_eureg_long_eu_gdp_pps_hab_eu27_2020

Original tag: eu_gdp_pps_hab_eu27_2020

Description:

Regional gross domestic product (GDP) by NUTS 2 regions in PPS (purchasing power standards) per inhabitant, as percent of EU27 (from 2020) average. GDP is an indicator of the output of a country or a region. It reflects the total value of all goods and services produced less the value of goods and services used for intermediate consumption in their production. Expressing GDP in PPS eliminates differences in price levels between countries. Calculations on a per inhabitant basis allow for the comparison of economies and regions significantly different in absolute size. GDP per inhabitant in PPS is the key variable for determining the eligibility of NUTS 2 regions in the framework of the European Union's structural policy.

2.7.11.15 Disposable income of private households by NUTS 2 regions (eu_dinc_pps_hab)

Long tag: qog_eureg_long_eu_dinc_pps_hab

Original tag: eu_dinc_pps_hab

Description:

Disposable income of private households by NUTS 2 regions in PPS (purchasing power standards) based on final consumption per inhabitant. The disposable income of private households is the balance of primary income (operating surplus/mixed income plus compensation of employees plus property income received minus property income paid) and the redistribution of income in cash. These transactions comprise social contributions paid, social benefits in cash received, current taxes on income and wealth paid, as well as other current transfers. Disposable income does not include social transfers in kind coming from public administrations or non-profit institutions serving households. The data for NUTS 1 and NUTS 0 regions has been calculated by computing a mean of the NUTS 2 values within each region.

2.7.11.16 Primary income of private households by NUTS 2 regions (eu_pinc_pps_hab)

Long tag: qog_eureg_long_eu_pinc_pps_hab

Original tag: eu_pinc_pps_hab

Description:

Primary income of private households by NUTS 2 regions in PPS (purchasing power standards) based on final consumption per inhabitant. The disposable income of private households is the balance of primary income (operating surplus/mixed income plus compensation of employees plus property income received minus property income paid) and the redistribution of income in cash. These transactions comprise social contributions paid, social benefits in cash received, current taxes on income and wealth paid, as well as other current transfers. Disposable income does not include social transfers in kind coming from public administrations or non-profit institutions serving households.

2.7.11.17 Real growth rate of regional gross value added (GVA) at basic prices (eu_rgva_pch_pre)

Long tag: qog_eureg_long_eu_rgva_pch_pre

Original tag: eu_rgva_pch_pre

Description:

Real growth rate of regional gross value added (GVA) at basic prices by NUTS 2 regions, percentage change on previous year. GVA is an indicator of the economic activity of a country or a region. It reflects the total value of all goods and services produced less the value of goods and services used for intermediate consumption in their production. Several years ago Eurostat has started to collect real growth rates of regional GVA at NUTS level 2 from those Member States which calculate this already. The indicator is part of the ESA 2010 data transmission programme, but the transmission will be obligatory only as from the end of 2017.

2.7.12 Tourism

This category includes information about avaliable hotel beds as well as the number of days spent in tourist accomodation.

2.7.12.1 Number of bed-places in hotels, camping places and other (eu_tour_nstour_bedpl)

Long tag: qog_eureg_long_eu_tour_nstour_bedpl

Original tag: eu_tour_nstour_bedpl

Description:

Number of bed-places in hotels, camping places and other. The number of bed-places in an establishment or dwelling is determined by the number of persons who can stay overnight in the beds set up in the establishment (dwelling), ignoring any extra beds that may be set up by customer request. The term bed place applies to a single bed, double beds are counted as two bed-places. The unit serves to measure the capacity of any type of accommodation. A bed place is also a place on a pitch or in a boat on a mooring to accommodate one person. One camping pitch should equal four bed-places if the actual number of bed-places is not known.

2.7.12.2 Number of establishments in hotels, camping places and other (eu_tour_nstour_estbl)

Long tag: qog_eureg_long_eu_tour_nstour_estbl

Original tag: eu_tour_nstour_estbl

Description:

Number of establishments in hotels, camping places and other. A tourist accommodation establishment is defined as any facility that regularly or occasionally provides short-term accommodation for tourists as a paid service (although the price might be partially or fully subsidised). Data is reported at the level of a local kind-of-activity unit. The local unit is an enterprise or part thereof situated in a geographically identified place. At or from this place economic activity is carried out for which - save for certain exceptions - one or more persons work (even if only part-time) for one and the same enterprise. The accommodation establishment conforms to the definition of local unit as the production unit. This is irrespective of whether the accommodation of tourists is the main or secondary activity. This means that all establishments are classified in the accommodation sector if their capacity exceeds the national minimum even if the major part of turnover may come from restaurant or other services.

2.7.12.3 Net occupancy rate of bed-places in hotels and similar (eu_tour_bedpl)

Long tag: qog_eureg_long_eu_tour_bedpl

Original tag: eu_tour_bedpl

Description:

Net occupancy rate of bed-places in hotels and similar. The occupancy rate of bed-places in reference period is obtained by dividing the total number of overnight stays by the number of the bed-places on offer (excluding extra beds) and the number of days when the bed-places are actually available for use (net of seasonal closures and other temporary closures for decoration, by police order, etc.). The result is multiplied by 100 to express the occupancy rate as a percentage. From reference period 2012 onwards, tourism occupancy statistics consist of harmonised data collected by the Member States in the frame of the Regulation (EU) 692/2011 of the European Parliament and of the Council. Up to reference period 2011, tourism occupancy statistics consist of harmonised data collected by the Member States in the frame of the Council Directive on tourism statistics 95/57/EC .

2.7.12.4 Net occupancy rate of bedrooms in hotels and similar (eu_tour_bedrm)

Long tag: qog_eureg_long_eu_tour_bedrm

Original tag: eu_tour_bedrm

Description:

Net occupancy rate of bedrooms in hotels and similar. The net occupancy rate of bedrooms in reference period is obtained by dividing the total number of bedrooms used during the reference period (i.e. the sum of the bedrooms in use per day) by the total number of bedrooms available for the reference period (i.e. the sum of bedrooms available per day). The result is multiplied by 100 to express the occupancy rate as a percentage. From reference period 2012 onwards, tourism occupancy statistics consist of harmonised data collected by the Member States in the frame of the Regulation (EU) 692/2011 of the European Parliament and of the Council. Up to reference period 2011, tourism occupancy statistics consist of harmonised data collected by the Member States in the frame of the Council Directive on tourism statistics 95/57/EC .

2.7.12.5 Number of nights spent at camping grounds, recreational vehicle and trailer park (eu_tour_nscamp)

Long tag: qog_eureg_long_eu_tour_nscamp

Original tag: eu_tour_nscamp

Description:

Number of nights spent at camping grounds, recreational vehicle parks and trailer parks. A night spent (or overnight stay) is each night a guest / tourist (resident or non-resident) actually spends (sleeps or stays) in a tourist accommodation establishment or non-rented accommodation. Normally the date of arrival is different

from the date of departure but persons arriving after midnight and leaving on the same day are included in overnight stays. A person should not be registered in two or more accommodation establishments at the same time. From reference period 2012 onwards, tourism occupancy statistics consist of harmonised data collected by the Member States in the frame of the Regulation (EU) 692/2011 of the European Parliament and of the Council. Up to reference period 2011, tourism occupancy statistics consist of harmonised data collected by the Member States in the frame of the Council Directive on tourism statistics 95/57/EC .

2.7.12.6 Number of nights spent at hotels and similar accommodation (eu_tour_nshotel)

Long tag: qog_eureg_long_eu_tour_nshotel

Original tag: eu_tour_nshotel

Description:

Number of nights spent at hotels and similar accommodations. A night spent (or overnight stay) is each night a guest / tourist (resident or non-resident) actually spends (sleeps or stays) in a tourist accommodation establishment or non-rented accommodation. Normally the date of arrival is different from the date of departure but persons arriving after midnight and leaving on the same day are included in overnight stays. A person should not be registered in two or more accommodation establishments at the same time. From reference period 2012 onwards, tourism occupancy statistics consist of harmonised data collected by the Member States in the frame of the Regulation (EU) 692/2011 of the European Parliament and of the Council. Up to reference period 2011, tourism occupancy statistics consist of harmonised data collected by the Member States in the frame of the Council Directive on tourism statistics 95/57/EC .

2.7.12.7 Number of nights spent at holiday and other short-stay accommodation (eu_tour_nssa)

Long tag: qog_eureg_long_eu_tour_nssa

Original tag: eu_tour_nssa

Description:

Number of nights spent at holiday and other short-stay accommodation. A night spent (or overnight stay) is each night a guest / tourist (resident or non-resident) actually spends (sleeps or stays) in a tourist accommodation establishment or non-rented accommodation. Normally the date of arrival is different from the date of departure but persons arriving after midnight and leaving on the same day are included in overnight stays. Up to reference period 2011, tourism occupancy statistics consist of harmonised data collected by the Member States in the frame of the Council Directive on tourism statistics 95/57/EC .

2.7.13 Transport

This category provides information on the means of transportation used as well as available vehicles and the road infrastructure.

2.7.13.1 Injured victims in road accidents, per million inhabitants (eu_rac_inj)

Long tag: qog_eureg_long_eu_rac_inj

Original tag: eu_rac_inj

Description:

Injured victims in road accidents, per million inhabitants. It includes any person who as result of an injury accident was not killed immediately or not dying within 30 days, but sustained an injury, normally needing medical treatment, excluding attempted suicides. Persons with lesser wounds, such as minor cuts and bruises are not normally recorded as injured. An injured person is excluded if the competent authority declares the cause of the injury to be attempted suicide by that person, i.e. a deliberate act to injure oneself resulting in injury, but not in death.

2.7.13.2 Killed victims in road accidents, per million inhabitants (eu_rac_kil)

Long tag: qog_eureg_long_eu_rac_kil

Original tag: eu_rac_kil

Description:

Killed victims in road accidents, per million inhabitants. It includes any person killed immediately or dying within 30 days as a result of an injury accident, excluding suicides. A killed person is excluded if the competent authority declares the cause of death to be suicide, i.e. a deliberate act to injure oneself resulting in death. For countries that do not apply the threshold of 30 days, conversion coefficients are estimated so that comparisons on the basis of the 30 day-definition can be made.

2.7.13.3 Air transport of freight and mail loaded, in thousand tonnes (eu_atf_frm_ld)

Long tag: qog_eureg_long_eu_atf_frm_ld

Original tag: eu_atf_frm_ld

Description:

Air transport of freight and mail loaded in thousand tonnes. The air transport regional data have been calculated using data collected at the airport level in the frame of Commission Regulation (EC) No 1358/2003. They are aggregated at regional level (NUTS 1 and NUTS 2) and also at national level (NUTS0), excluding double counting within each region.

2.7.13.4 Air transport of freight and mail loaded and unloaded, in thousand tonnes (eu_atf_frm_ld_nld)

Long tag: qog_eureg_long_eu_atf_frm_ld_nld

Original tag: eu_atf_frm_ld_nld

Description:

Air transport of freight and mail loaded and unloaded in thousand tonnes. The air transport regional data have been calculated using data collected at the airport level in the frame of Commission Regulation (EC) No 1358/2003. They are aggregated at regional level (NUTS 1 and NUTS 2) and also at national level (NUTS0), excluding double counting within each region.

2.7.13.5 Air transport of freight and mail loaded, in thousand tonnes (eu_atf_frm_nld)

Long tag: qog_eureg_long_eu_atf_frm_nld

Original tag: eu_atf_frm_nld

Description:

Air transport of freight and mail unloaded in thousand tonnes. The air transport regional data have been calculated using data collected at the airport level in the frame of Commission Regulation (EC) No 1358/2003. They are aggregated at regional level (NUTS 1 and NUTS 2) and also at national level (NUTS0), excluding double counting within each region.

2.7.13.6 Passengers carried by air transport, in thousand passengers (eu_mtp_pas_crd)

Long tag: qog_eureg_long_eu_mtp_pas_crd

Original tag: eu_mtp_pas_crd

Description:

Air transport of passengers carried in thousand passengers. The air transport regional data have been calculated using data collected at the airport level in the frame of Commission Regulation (EC) No 1358/2003. They are aggregated at regional level (NUTS 1 and NUTS 2) and also at national level (NUTS0), excluding double counting within each region.

2.7.13.7 Passengers carried by air transport, in thousand passengers (eu_mtp_pas_crd_arr)

Long tag: qog_eureg_long_eu_mtp_pas_crd_arr

Original tag: eu_mtp_pas_crd_arr

Description:

Air transport of passengers carried (arrival) in thousand passengers. The air transport regional data have been calculated using data collected at the airport level in the frame of Commission Regulation (EC) No 1358/2003. They are aggregated at regional level (NUTS 1 and NUTS 2) and also at national level (NUTS0), excluding double counting within each region.

2.7.13.8 Passengers carried by air transport (arrival), in thousand passengers (eu_mtp_pas_crd_dep)

Long tag: qog_eureg_long_eu_mtp_pas_crd_dep

Original tag: eu_mtp_pas_crd_dep

Description:
Air transport of passengers carried (departures), in thousand passengers. The air transport regional data have been calculated using data collected at the airport level in the frame of Commission Regulation (EC) No 1358/2003. They are aggregated at regional level (NUTS 1 and NUTS 2) and also at national level (NUTS0), excluding double counting within each region.

2.7.13.9 Maritime transport of freight and mail loaded, in thousand tonnes (eu_mtf_fr_ld)

Long tag: qog_eureg_long_eu_mtf_fr_ld

Original tag: eu_mtf_fr_ld

Description:
Maritime transport of freight loaded in thousand tonnes. The maritime transport regional data have been calculated using data collected at the port level in the frame of Council Directive 2009/42/EC (6.5.2009). They are aggregated at regional level (NUTS 1 and NUTS 2) and also at national level (NUTS0), excluding double counting within each region.

2.7.13.10 Maritime transport of freight and mail loaded, in thousand tonnes (eu_mtf_fr_ld_nld)

Long tag: qog_eureg_long_eu_mtf_fr_ld_nld

Original tag: eu_mtf_fr_ld_nld

Description:
Maritime transport of freight loaded and unloaded in thousand tonnes. The maritime transport regional data have been calculated using data collected at the port level in the frame of Council Directive 2009/42/EC (6.5.2009). They are aggregated at regional level (NUTS 1 and NUTS 2) and also at national level (NUTS0), excluding double counting within each region.

2.7.13.11 Maritime transport of freight and mail loaded and unloaded, in thousand tonnes (eu_mtf_fr_nld)

Long tag: qog_eureg_long_eu_mtf_fr_nld

Original tag: eu_mtf_fr_nld

Description:
Maritime transport of freight unloaded in thousand tonnes. The maritime transport regional data have been calculated using data collected at the port level in the frame of Council Directive 2009/42/EC (6.5.2009). They are aggregated at regional level (NUTS 1 and NUTS 2) and also at national level (NUTS0), excluding double counting within each region.

2.7.13.12 Maritime transport of passengers embarked and disembarked, in thousand passengers (eu_mtp_pas)

Long tag: qog_eureg_long_eu_mtp_pas

Original tag: eu_mtp_pas

Description:
Maritime transport of passengers embarked and disembarked in thousand passengers. The maritime transport regional data have been calculated using data collected at the port level in the frame of Council Directive 2009/42/EC (6.5.2009). They are aggregated at regional level (NUTS 1 and NUTS 2) and also at national level (NUTS0), excluding double counting within each region.

2.7.13.13 Maritime transport of passengers, in thousand passengers (eu_mtp_pas_demb)

Long tag: qog_eureg_long_eu_mtp_pas_demb

Original tag: eu_mtp_pas_demb

Description:
Maritime transport of passengers disembarked in thousand passengers. The maritime transport regional data have been calculated using data collected at the port level in the frame of Council Directive 2009/42/EC (6.5.2009). They are aggregated at regional level (NUTS 1 and NUTS 2) and also at national level (NUTS0), excluding double counting within each region.

2.7.13.14 Maritime transport of passengers disembarked, in thousand passengers (eu_mtp_pas_emb)

Long tag: qog_eureg_long_eu_mtp_pas_emb

Original tag: eu_mtp_pas_emb

Description:
Maritime transport of passengers embarked in thousand passengers. The maritime transport regional data have been calculated using data collected at the port level in the frame of Council Directive 2009/42/EC (6.5.2009). They are aggregated at regional level (NUTS 1 and NUTS 2) and also at national level (NUTS0), excluding double counting within each region.

2.7.13.15 Navigable canals, in kilometers (eu_troad_cnl)

Long tag: qog_eureg_long_eu_troad_cnl

Original tag: eu_troad_cnl

Description:

Navigable canal – waterway built primarily for navigation.

2.7.13.16 Navigable canals, in kilometers (eu_troad_mway)

Long tag: qog_eureg_long_eu_troad_mway

Original tag: eu_troad_mway

Description:

Motorway / freeway – road, specially designed and built for motor traffic, which does not serve properties bordering on it, and which: i) is provided, except at special points or temporarily, with separate carriageways for traffic in two directions, separated from each other, either by a dividing strip not intended for traffic, or exceptionally by other means; ii) has no crossings at the same level with any road, railway or tramway track, or footpath; and iii) is especially sign-posted as a motorway and is reserved for specific categories of road motor vehicles.

2.7.13.17 Motorways, in kilometers (eu_troad_rd_oth)

Long tag: qog_eureg_long_eu_troad_rd_oth

Original tag: eu_troad_rd_oth

Description:

Other roads, in kilometers.

2.7.13.18 Other roads, in kilometers (eu_troad_riv)

Long tag: qog_eureg_long_eu_troad_riv

Original tag: eu_troad_riv

Description:

Navigable river – natural waterway open for navigation, irrespective of whether it has been improved for that purpose.

2.7.13.19 Navigable rivers, in kilometers (eu_troad_rl)

Long tag: qog_eureg_long_eu_troad_rl

Original tag: eu_troad_rl

Description:

Railway line – line of communication made up by rail exclusively for the use of railway vehicles. Line of communication is an area equipped for the performance of rail transport.

2.7.13.20 Total railway lines, in kilometers (eu_troad_rl_elc)

Long tag: qog_eureg_long_eu_troad_rl_elc

Original tag: eu_troad_rl_elc

Description:

Electrified railway lines in kilometers.

2.7.13.21 Electrified railway lines, in kilometers (eu_troad_rl_tge2)

Long tag: qog_eureg_long_eu_troad_rl_tge2

Original tag: eu_troad_rl_tge2

Description:

Railway lines with double and more tracks in kilometers.

2.7.13.22 Total number of motor coaches, buses and trolley buses (eu_vs_bus_tot)

Long tag: qog_eureg_long_eu_vs_bus_tot

Original tag: eu_vs_bus_tot

Description:

Total number of motor coaches, buses and trolley buses. Motor coach is passenger road motor vehicle designed to seat 24 or more persons (including the driver) and constructed exclusively for the carriage of seated passengers. Bus is defined as passenger road motor vehicle designed to carry more than 24 persons (including the driver), and with provision to carry seated as well as standing passengers. Trolleybus is passenger road vehicle designed to seat more than nine persons (including the driver), which is connected to electric conductors and which is not rail-borne. This term covers vehicles which may be used either as trolleybuses or as buses, if they have a motor independent of the main electric power supply.

2.7.13.23 Total number of motor coaches, buses and trolley buses (eu_vs_car)

Long tag: qog_eureg_long_eu_vs_car

Original tag: eu_vs_car

Description:

Total number of passenger cars. Passenger car is a road motor vehicle, other than a moped or a motor cycle, intended for the carriage of passengers and designed to seat no more than nine persons (including the driver). Included are: passenger cars, vans designed and used primarily for transport of passengers, taxis, hire cars, ambulances, motor homes. Excluded are light goods road vehicles, as well as motor-coaches and buses, and mini-buses/mini-coaches. "Passenger car" includes micro cars (needing no permit to be driven), taxis and passenger hire cars, provided that they have fewer than ten seats.

2.7.13.24 Total number of passenger cars (eu_vs_lor)

Long tag: qog_eureg_long_eu_vs_lor

Original tag: eu_vs_lor

Description:

Total number of lorries. Lorry / truck is rigid road motor vehicle designed, exclusively or primarily, to carry goods.

2.7.13.25 Total number of lorries (eu_vs_moto)

Long tag: qog_eureg_long_eu_vs_moto

Original tag: eu_vs_moto

Description:

Total number of motorcycles. Motorcycle is defined as two-, three- or four-wheeled road motor vehicle not exceeding 400 kg (900 lb) of unladen weight. All such vehicles with a cylinder capacity of 50 cc or over are included, as are those under 50 cc which do not meet the definition of moped.

2.7.13.26 Total number of motorcycles (eu_vs_spe)

Long tag: qog_eureg_long_eu_vs_spe

Original tag: eu_vs_spe

Description:

Total number of special vehicles. Special purpose road motor vehicle is road motor vehicle designed for purposes other than the carriage of passengers or goods. This category includes: fire brigade vehicles, mobile cranes, self-propelled rollers, bulldozers with metallic wheels or track, vehicles for recording film, radio and TV broadcasting, mobile library vehicles, towing vehicles for vehicles in need of repair, other special purpose road motor vehicles.

2.7.13.27 Total number of special vehicles (eu_vs_tot_x_tm)

Long tag: qog_eureg_long_eu_vs_tot_x_tm

Original tag: eu_vs_tot_x_tm

Description:

Total number of all vehicles except trailers and motorcycles.

2.7.13.28 Total number of all vehicles (except trailers and motorcycles) (eu_vs_trc)

Long tag: qog_eureg_long_eu_vs_trc

Original tag: eu_vs_trc

Description:

Total number of road tractors. Road tractor is road motor vehicle designed, exclusively or primarily, to haul other road vehicles which are not power-driven (mainly semi-trailers). Agricultural tractors are excluded.

2.7.13.29 Total number of road tractors (eu_vs_trl_strl)

Long tag: qog_eureg_long_eu_vs_trl_strl

Original tag: eu_vs_trl_strl

Description:

Total number of trailers and semi-trailers. Trailer is goods road vehicle designed to be hauled by a road motor vehicle. This category excludes agricultural trailers and caravans. Semi-trailer describes goods road vehicle with no front axle designed in such way that part of the vehicle and a substantial part of its loaded weight rests on a road tractor.

2.7.13.30 Total number of trailers and semi-trailers (eu_vs_utl)

Long tag: qog_eureg_long_eu_vs_utl

Original tag: eu_vs_utl

Description:

Total number of total utility vehicles.

2.8 QoG EU Regional Dataset Wide Data (NUTS 1)

Dataset tag: qog_eureg_wide1

Description: The QoG EU Regional dataset is a dataset consisting of more than 300 variables covering three levels of European regions - Nomenclature of Territorial Units for Statistics (NUTS): NUTS0 (country), NUTS1(major socio-economic regions) and NUTS2 (basic regions for the application of regional policies).

The QoG Regional Data is presented in three different forms available in separate datasets. The variable are the same across all three dataset besides a varying suffix (_nuts0, _nuts1, _nuts2) indication which NUTS level is represented. All datasets are available in time-series format. The first one (The QoG Regional Data - Long Form) is a dataset where data is presented in the long form. The list of units of analysis contains regions of all NUTS levels.
Two other datasets are presented in the wide form for multilevel analysis. In the second dataset (The QoG Regional Data - Wide Form NUTS1) includes NUTS1 level as the unit of analysis and variables represent the values for this level and corresponding lower level – NUTS0. As an example, in this dataset the data is presented only for East Sweden(Ostra Sverige SE1), as a unit of analysis and has values for lower levels of this region - Sweden (SE).
In the third dataset (The QoG Regional Data - Wide Form NUTS2) the unit of analysis is NUTS2 level regions and variables provide values as for every unit of analysis, as well as for corresponding lower NUTS levels: NUTS1 and NUTS0. One example of unit of analysis in this dataset is Stockholm (SE11) and data for every variable will be for Stockholm, as well as for lower level regions - East Sweden (Ostra Sverige SE1) and Sweden (SE).

The Quality of Government EU Regional Dataset, version Nov20. University of Gothenburg: The Quality of Government Institute, https://www.gu.se/en/quality-government

License: The QoG datasets are open and available, free of charge and without a need to register your data. You can use them for your analysis, graphs, teaching, and other academic-related and non-commercial purposes. We ask our users to cite always the original source(s) of the data and our datasets.

We do not allow other uses of these data including but not limited to redistribution, commercialization and other for-profit usage. If a user is interested in such use or has doubts about the license, they will have to refer to the original source and check with them if this is allowed and what requirements they need to fulfill.

Be mindful that the original data sources are the only owners of their data and they can adjust their license without previous warning.

More detailed information on the dataset can be found at the following web page: `https://www.gu.se/en/quality-government/qog-data/data-downloads/eu-regional-dataset`

2.8.1 Identification

Identification variables in the dataset.

2.8.1.1 NUTS code of region (region_code)

Long tag: qog_eureg_wide1_region_code

Original tag: region_code

Description:
NUTS code of region. The Nomenclature of Territorial Units for Statistics, (NUTS), is a geocode standard for referencing the administrative divisions of countries for statistical purposes.

2.8.1.2 Name of the region (region_name)

Long tag: qog_eureg_wide1_region_name

Original tag: region_name

Description:
Name of the region in the language of the country.

2.8.1.3 Year (year)

Long tag: qog_eureg_wide1_year

Original tag: year

Description:
Year of observation

2.8.1.4 Code of NUTS0 level region (nuts0)

Long tag: qog_eureg_wide1_nuts0

Original tag: nuts0

Description:
Code of NUTS0 level region to which the observation belongs. The Nomenclature of Territorial Units for

Statistics, (NUTS), is a geocode standard for referencing the administrative divisions of countries for statistical purposes. NUTS 0: country level.

2.8.1.5 Code of NUTS1 level region (nuts1)

Long tag: qog_eureg_wide1_nuts1

Original tag: nuts1

Description:

Code of NUTS1 level region to which the observation belongs. The Nomenclature of Territorial Units for Statistics, (NUTS), is a geocode standard for referencing the administrative divisions of countries for statistical purposes. NUTS 1: major socio-economic regions.

2.8.1.6 The Nomenclature of Territorial Units for Statistics (NUTS) level (nuts_level)

Long tag: qog_eureg_wide1_nuts_level

Original tag: NA

Description:

To what level of NUTS belong observation. The Nomenclature of Territorial Units for Statistics, (NUTS), is a geocode standard for referencing the administrative divisions of countries for statistical purposes.
(0) Country level
(1) Major socio-economic regions
(2) Basic regions for the application of regional policies

2.8.2 Quality of Government

This category includes variables that are the core features of QoG (impartiality, bureaucratic quality and corruption) as well as measures that are broader (rule of law and transparency).

2.8.2.1 Number of awarded contracts above 130,000 EUR (cri_contr_nuts0)

Long tag: qog_eureg_wide1_cri_contr_nuts0

Original tag: cri_contr_nuts0

Description:

Number of successfully awarded contracts within tenders published on TED above 130k EUR threshold.

2.8.2.2 Number of awarded contracts above 130,000 EUR (cri_contr_nuts1)

Long tag: qog_eureg_wide1_cri_contr_nuts1

Original tag: cri_contr_nuts1

Description:

Number of successfully awarded contracts within tenders published on TED above 130k EUR threshold.

2.8.2.3 Final value of awarded tenders of over 130,000 EUR (cri_cvalue_nuts0)

Long tag: qog_eureg_wide1_cri_cvalue_nuts0

Original tag: cri_cvalue_nuts0

Description:

Sum of the final value of successfully awarded tenders published on TED above 130k EUR threshold.

2.8.2.4 Final value of awarded tenders of over 130,000 EUR (cri_cvalue_nuts1)

Long tag: qog_eureg_wide1_cri_cvalue_nuts1

Original tag: cri_cvalue_nuts1

Description:

Sum of the final value of successfully awarded tenders published on TED above 130k EUR threshold.

2.8.2.5 Share of contracts with only one bid in total (cri_singleb_nuts0)

Long tag: qog_eureg_wide1_cri_singleb_nuts0

Original tag: cri_singleb_nuts0

Description:

Share of contracts with only one bid in total.

2.8.2.6 Share of contracts with only one bid in total (cri_singleb_nuts1)

Long tag: qog_eureg_wide1_cri_singleb_nuts1

Original tag: cri_singleb_nuts1

Description:

Share of contracts with only one bid in total.

2.8.2.7 Share of contracts with no published call for tender red flag (cri_nocall_nuts0)

Long tag: qog_eureg_wide1_cri_nocall_nuts0

Original tag: cri_nocall_nuts0

Description:

Share of contracts with "no published call for tender" red flag. Contract is considered to have "no call for tender" red flag if two conditions are met: i) sum of prior information notices and contract notices equals 0 and ii) country of a buyer is not on the list of countries in which "no call for tender publication" is not a risk factor. These countries are BG, DK, EE, ES, LT.

2.8.2.8 Share of contracts with no published call for tender red flag (cri_nocall_nuts1)

Long tag: qog_eureg_wide1_cri_nocall_nuts1

Original tag: cri_nocall_nuts1

Description:

Share of contracts with "no published call for tender" red flag. Contract is considered to have "no call for tender" red flag if two conditions are met: i) sum of prior information notices and contract notices equals 0 and ii) country of a buyer is not on the list of countries in which "no call for tender publication" is not a risk factor. These countries are BG, DK, EE, ES, LT.

2.8.2.9 Share of contracts with non-open procedure red flag (cri_nonopen_nuts0)

Long tag: qog_eureg_wide1_cri_nonopen_nuts0

Original tag: cri_nonopen_nuts0

Description:

Share of contracts with "non-open procedure" red flag. Whether procedure is considered non-open depends on procedure type as well as specific country regulation. Please refer to the "Non-open procedure details" sheet to search for country-procedure combinations.

2.8.2.10 Share of contracts with non-open procedure red flag (cri_nonopen_nuts1)

Long tag: qog_eureg_wide1_cri_nonopen_nuts1

Original tag: cri_nonopen_nuts1

Description:

Share of contracts with "non-open procedure" red flag. Whether procedure is considered non-open depends on procedure type as well as specific country regulation. Please refer to the "Non-open procedure details" sheet to search for country-procedure combinations.

2.8.2.11 Share of contracts with tax haven red flag (cri_taxhav_nuts0)

Long tag: qog_eureg_wide1_cri_taxhav_nuts0

Original tag: cri_taxhav_nuts0

Description:

Share of contracts with "tax haven" red flag. Contract has "tax haven" red flag in case two conditions are met: i) buyer and supplier are from different countries and ii) according to Financial Secrecy Index (https://www.financialsecrecyindex.com/en/) supplier country was classified as tax haven.

2.8.2.12 Share of contracts with tax haven red flag (cri_taxhav_nuts1)

Long tag: qog_eureg_wide1_cri_taxhav_nuts1

Original tag: cri_taxhav_nuts1

Description:

Share of contracts with "tax haven" red flag. Contract has "tax haven" red flag in case two conditions are met: i) buyer and supplier are from different countries and ii) according to Financial Secrecy Index (https://www.financialsecrecyindex.com/en/) supplier country was classified as tax haven.

2.8.2.13 EQI Index Score (eqi_score_nuts0)

Long tag: qog_eureg_wide1_eqi_score_nuts0

Original tag: eqi_score_nuts0

Description:

Final score of European Quality Index (centered around WGI), all units. Detailed information on its calculation method and indicators used for this aggregation can be found in "European Quality of Government Index 2017 Codebook".

2.8.2.14 EQI Index Score (eqi_score_nuts1)

Long tag: qog_eureg_wide1_eqi_score_nuts1

Original tag: eqi_score_nuts1

Description:
Final score of European Quality Index (centered around WGI), all units. Detailed information on its calculation method and indicators used for this aggregation can be found in "European Quality of Government Index 2017 Codebook".

2.8.2.15 Quality pillar, country centered and z-score standardized (eqi_zquality_nuts0)

Long tag: qog_eureg_wide1_eqi_zquality_nuts0

Original tag: eqi_zquality_nuts0

Description:
EQI quality pillar, country centered and z-score standardized. For its calculation, they aggregate the individual scores ('survey question') to the corresponding regional level, so that each of question on the quality of public services is now a regional 'indicator'. After normalizing each of quality indicators (through z-score standardization) so that they share a common range, the quality indicators are aggregated into 'quality pillar'.

2.8.2.16 Quality pillar, country centered and z-score standardized (eqi_zquality_nuts1)

Long tag: qog_eureg_wide1_eqi_zquality_nuts1

Original tag: eqi_zquality_nuts1

Description:
EQI quality pillar, country centered and z-score standardized. For its calculation, they aggregate the individual scores ('survey question') to the corresponding regional level, so that each of question on the quality of public services is now a regional 'indicator'. After normalizing each of quality indicators (through z-score standardization) so that they share a common range, the quality indicators are aggregated into 'quality pillar'.

2.8.2.17 Impartiality pillar, country centered and z-score standardized (eqi_zimpartiality_nuts0)

Long tag: qog_eureg_wide1_eqi_zimpartiality_nuts0

Original tag: eqi_zimpartiality_nuts0

Description:
EQI impartiality pillar, country centered and z-score standardized. For its calculation, they aggregate the individual scores ('survey question') to the corresponding regional level, so that each of question assessing impartiality in the provision of public services is now a regional 'indicator'. After normalizing each of impartiality indicators (through z-score standardization) so that they share a common range, the impartiality indicators are aggregated into 'impartiality pillar'.

2.8.2.18 Impartiality pillar, country centered and z-score standardized (eqi_zimpartiality_nuts1)

Long tag: qog_eureg_wide1_eqi_zimpartiality_nuts1

Original tag: eqi_zimpartiality_nuts1

Description:
EQI impartiality pillar, country centered and z-score standardized. For its calculation, they aggregate the individual scores ('survey question') to the corresponding regional level, so that each of question assessing impartiality in the provision of public services is now a regional 'indicator'. After normalizing each of impartiality indicators (through z-score standardization) so that they share a common range, the impartiality indicators are aggregated into 'impartiality pillar'.

2.8.2.19 Corruption pillar, country centered and z-score standardized (eqi_zcorruption_nuts0)

Long tag: qog_eureg_wide1_eqi_zcorruption_nuts0

Original tag: eqi_zcorruption_nuts0

Description:
EQI corruption pillar, country centered and z-score standardized. For its calculation, they aggregate the individual scores ('survey question') to the corresponding regional level, so that each of question assessing corruption in the provision of public services is now a regional 'indicator'. After normalizing each of corruption indicators (through z-score standardization) so that they share a common range, the corruption indicators are aggregated into two sub-pillars, called 'experience' and 'perceptions. They respectively represent question items reflecting personal experience with petty corruption versus perception of corruption in various other areas. These two sub-pillars are aggregated using equal weighting.

2.8.2.20 Corruption pillar, country centered and z-score standardized (eqi_zcorruption_nuts1)

Long tag: qog_eureg_wide1_eqi_zcorruption_nuts1

Original tag: eqi_zcorruption_nuts1

Description:
EQI corruption pillar, country centered and z-score standardized. For its calculation, they aggregate the

individual scores ('survey question') to the corresponding regional level, so that each of question assessing corruption in the provision of public services is now a regional 'indicator'. After normalizing each of corruption indicators (through z-score standardization) so that they share a common range, the corruption indicators are aggregated into two sub-pillars, called 'experience' and 'perceptions. They respectively represent question items reflecting personal experience with petty corruption versus perception of corruption in various other areas. These two sub-pillars are aggregated using equal weighting.

2.8.2.21 Corruption perceptions index (corruption sub-pillar) z-score stand. (2017 only) (eqi_zcorruptper_nuts1)

Long tag: qog_eureg_wide1_eqi_zcorruptper_nuts1

Original tag: eqi_zcorruptper_nuts1

Description:
EQI corruption perceptions index, z-score standardized. It constitutes one of the sub-pillars of corruption pillar.

2.8.2.22 Corruption experiences index (corruption sub-pillar) z-score stand. (2017 only) (eqi_zcorruptexp_nuts1)

Long tag: qog_eureg_wide1_eqi_zcorruptexp_nuts1

Original tag: eqi_zcorruptexp_nuts1

Description:
EQI corruption experiences index, z-score standardized. It constitutes one of the sub-pillars of corruption pillar.

2.8.2.23 EQI index, min-max (0-100) standardized (eqi_norm_eqi_nuts0)

Long tag: qog_eureg_wide1_eqi_norm_eqi_nuts0

Original tag: eqi_norm_eqi_nuts0

Description:
EQI index, min-max (0-100) standardized. Detailed information on its calculation method and indicators used for this aggregation can be found in "European Quality of Government Index 2017 Codebook".

2.8.2.24 EQI index, min-max (0-100) standardized (eqi_norm_eqi_nuts1)

Long tag: qog_eureg_wide1_eqi_norm_eqi_nuts1

Original tag: eqi_norm_eqi_nuts1

Description:
EQI index, min-max (0-100) standardized. Detailed information on its calculation method and indicators used for this aggregation can be found in "European Quality of Government Index 2017 Codebook".

2.8.2.25 Quality pillar, country centered and min-max (0-100) standardized (eqi_norm_qual_nuts0)

Long tag: qog_eureg_wide1_eqi_norm_qual_nuts0

Original tag: eqi_norm_qual_nuts0

Description:
Quality pillar, country centered and min-max (0-100) standardized.

2.8.2.26 Quality pillar, country centered and min-max (0-100) standardized (eqi_norm_qual_nuts1)

Long tag: qog_eureg_wide1_eqi_norm_qual_nuts1

Original tag: eqi_norm_qual_nuts1

Description:
Quality pillar, country centered and min-max (0-100) standardized.

2.8.2.27 Impartiality pillar, country centered and min-max (0-100) standardized (eqi_norm_impart_nuts0)

Long tag: qog_eureg_wide1_eqi_norm_impart_nuts0

Original tag: eqi_norm_impart_nuts0

Description:
Impartiality pillar, country centered and min-max (0-100) standardized.

2.8.2.28 Impartiality pillar, country centered and min-max (0-100) standardized (eqi_norm_impart_nuts1)

Long tag: qog_eureg_wide1_eqi_norm_impart_nuts1

Original tag: eqi_norm_impart_nuts1

Description:
Impartiality pillar, country centered and min-max (0-100) standardized.

2.8.2.29 Corruption pillar, country centered and min-max (0-100) standardized (eqi_norm_corrupt_nuts0)

Long tag: qog_eureg_wide1_eqi_norm_corrupt_nuts0

Original tag: eqi_norm_corrupt_nuts0

Description:
Corruption pillar, country centered and min-max (0-100) standardized.

2.8.2.30 Corruption pillar, country centered and min-max (0-100) standardized (eqi_norm_corrupt_nuts1)

Long tag: qog_eureg_wide1_eqi_norm_corrupt_nuts1

Original tag: eqi_norm_corrupt_nuts1

Description:
Corruption pillar, country centered and min-max (0-100) standardized.

2.8.2.31 Corruption perceptions index (corruption sub-pillar) min-max (0-100)(2017) (eqi_norm_corruptper_nuts1)

Long tag: qog_eureg_wide1_eqi_norm_corruptper_nuts1

Original tag: eqi_norm_corruptper_nuts1

Description:
Corruption perceptions index (corruption sub-pillar), min-max (0-100) standardized.

2.8.2.32 Corruption experiences index (corruption sub-pillar) min-max (0-100) (2017) (eqi_norm_corruptexp_nuts1)

Long tag: qog_eureg_wide1_eqi_norm_corruptexp_nuts1

Original tag: eqi_norm_corruptexp_nuts1

Description:
Corruption experiences index (corruption sub-pillar) min-max (0-100) standardized.

2.8.3 Demographics

This category includes variables describing the demographic characteristics of a population, such as its size, life-expectancy, fertility rates and death rates.

2.8.3.1 Reported number of cases of burglary of private premises (eu_cri_bur_nuts0)

Long tag: qog_eureg_wide1_eu_cri_bur_nuts0

Original tag: eu_cri_bur_nuts0

Description:
Reported number of cases of burglary of private premises. Domestic burglary is defined as gaining access to a dwelling by the use of force to steal goods.

2.8.3.2 Reported number of cases of burglary of private premises (eu_cri_bur_nuts1)

Long tag: qog_eureg_wide1_eu_cri_bur_nuts1

Original tag: eu_cri_bur_nuts1

Description:
Reported number of cases of burglary of private premises. Domestic burglary is defined as gaining access to a dwelling by the use of force to steal goods.

2.8.3.3 Reported number of cases of intentional homicide (eu_cri_inthom_nuts0)

Long tag: qog_eureg_wide1_eu_cri_inthom_nuts0

Original tag: eu_cri_inthom_nuts0

Description:
Reported number of cases of intentional homicide. It is defined as intentional killing of a person, including murder, manslaughter, euthanasia and infanticide. Causing death by dangerous driving is excluded, as are abortion and help with suicide. Attempted (uncompleted) homicide is also excluded. The counting unit for homicide is normally the victim (rather than the case).

2.8.3.4 Reported number of cases of intentional homicide (eu_cri_inthom_nuts1)

Long tag: qog_eureg_wide1_eu_cri_inthom_nuts1

Original tag: eu_cri_inthom_nuts1

Description:
Reported number of cases of intentional homicide. It is defined as intentional killing of a person, including

murder, manslaughter, euthanasia and infanticide. Causing death by dangerous driving is excluded, as are abortion and help with suicide. Attempted (uncompleted) homicide is also excluded. The counting unit for homicide is normally the victim (rather than the case).

2.8.3.5 Reported number of cases of robbery (eu_cri_rob_nuts0)

Long tag: qog_eureg_wide1_eu_cri_rob_nuts0

Original tag: eu_cri_rob_nuts0

Description:

Reported number of cases of robbery. Robbery is a sub-set of violent crime (see above). It is defined as stealing from a person with force or threat of force, including muggings (bag-snatching) and theft with violence. Pick-pocketing, extortion and blackmailing are generally not included.

2.8.3.6 Reported number of cases of robbery (eu_cri_rob_nuts1)

Long tag: qog_eureg_wide1_eu_cri_rob_nuts1

Original tag: eu_cri_rob_nuts1

Description:

Reported number of cases of robbery. Robbery is a sub-set of violent crime (see above). It is defined as stealing from a person with force or threat of force, including muggings (bag-snatching) and theft with violence. Pick-pocketing, extortion and blackmailing are generally not included.

2.8.3.7 Proportion of live births outside marriage (eu_agemoth_nuts0)

Long tag: qog_eureg_wide1_eu_agemoth_nuts0

Original tag: eu_agemoth_nuts0

Description:

Proportion of live births outside marriage. A live birth outside marriage is defined as a live birth where the mother's marital status at the time of birth is other than married.

2.8.3.8 Total fertility rate (eu_agemoth1_nuts0)

Long tag: qog_eureg_wide1_eu_agemoth1_nuts0

Original tag: eu_agemoth1_nuts0

Description:

Total fertility rate. It is defined as the mean number of children who would be born to a woman during her lifetime, if she were to spend her childbearing years conforming to the age-specific fertility rates, that have been measured in a given year.

2.8.3.9 Mean age of women at childbirth (eu_nmarpct_nuts0)

Long tag: qog_eureg_wide1_eu_nmarpct_nuts0

Original tag: eu_nmarpct_nuts0

Description:

Mean age of women at childbirth. It is calculated as the mean age of women when their children are born.

2.8.3.10 Mean age of women at birth of first child (eu_totferrt_nuts0)

Long tag: qog_eureg_wide1_eu_totferrt_nuts0

Original tag: eu_totferrt_nuts0

Description:

Mean age of women at birth of first child. It is calculated as the mean age of women when their first children are born.

2.8.3.11 Number of deaths of females, all ages (eu_death_totalf_nuts0)

Long tag: qog_eureg_wide1_eu_death_totalf_nuts0

Original tag: eu_death_totalf_nuts0

Description:

Number of deaths of females, all ages. Death means the permanent disappearance of all evidence of life at any time after life birth has taken place (postnatal cessation of vital functions without capability of resuscitation).

2.8.3.12 Number of deaths of males, all ages (eu_death_totalm_nuts0)

Long tag: qog_eureg_wide1_eu_death_totalm_nuts0

Original tag: eu_death_totalm_nuts0

Description:

Number of deaths of males, all ages. Death means the permanent disappearance of all evidence of life at any time after life birth has taken place (postnatal cessation of vital functions without capability of resuscitation).

2.8.3.13 Number of deaths, total all ages (eu_death_totalt_nuts0)

Long tag: qog_eureg_wide1_eu_death_totalt_nuts0

Original tag: eu_death_totalt_nuts0

Description:

Number of deaths, all ages. Death means the permanent disappearance of all evidence of life at any time after life birth has taken place (postnatal cessation of vital functions without capability of resuscitation).

2.8.3.14 Number of deaths of females, at 1 year old (eu_death_y1f_nuts0)

Long tag: qog_eureg_wide1_eu_death_y1f_nuts0

Original tag: eu_death_y1f_nuts0

Description:

Number of deaths of females, at 1 year old. Death means the permanent disappearance of all evidence of life at any time after life birth has taken place (postnatal cessation of vital functions without capability of resuscitation).

2.8.3.15 Number of deaths of males, at 1 year old (eu_death_y1m_nuts0)

Long tag: qog_eureg_wide1_eu_death_y1m_nuts0

Original tag: eu_death_y1m_nuts0

Description:

Number of deaths of males, at 1 year old. Death means the permanent disappearance of all evidence of life at any time after life birth has taken place (postnatal cessation of vital functions without capability of resuscitation).

2.8.3.16 Number of deaths, total at 1 year old (eu_death_y1t_nuts0)

Long tag: qog_eureg_wide1_eu_death_y1t_nuts0

Original tag: eu_death_y1t_nuts0

Description:

Number of deaths, total at 1 year old. Death means the permanent disappearance of all evidence of life at any time after life birth has taken place (postnatal cessation of vital functions without capability of resuscitation).

2.8.3.17 Number of deaths of females, at 20 years old (eu_death_y20f_nuts0)

Long tag: qog_eureg_wide1_eu_death_y20f_nuts0

Original tag: eu_death_y20f_nuts0

Description:

Number of deaths of females, at 20 years old. Death means the permanent disappearance of all evidence of life at any time after life birth has taken place (postnatal cessation of vital functions without capability of resuscitation).

2.8.3.18 Number of deaths of males, at 20 years old (eu_death_y20m_nuts0)

Long tag: qog_eureg_wide1_eu_death_y20m_nuts0

Original tag: eu_death_y20m_nuts0

Description:

Number of deaths of males, at 20 years old. Death means the permanent disappearance of all evidence of life at any time after life birth has taken place (postnatal cessation of vital functions without capability of resuscitation).

2.8.3.19 Number of deaths, total at 20 years old (eu_death_y20t_nuts0)

Long tag: qog_eureg_wide1_eu_death_y20t_nuts0

Original tag: eu_death_y20t_nuts0

Description:

Number of deaths, total at 20 years old. Death means the permanent disappearance of all evidence of life at any time after life birth has taken place (postnatal cessation of vital functions without capability of resuscitation).

2.8.3.20 Number of deaths of females, at 50 years old (eu_death_y50f_nuts0)

Long tag: qog_eureg_wide1_eu_death_y50f_nuts0

Original tag: eu_death_y50f_nuts0

Description:

Number of deaths of females, at 50 years old. Death means the permanent disappearance of all evidence of life at any time after life birth has taken place (postnatal cessation of vital functions without capability of resuscitation).

2.8.3.21 Number of deaths of males, at 50 years old (eu_death_y50m_nuts0)

Long tag: qog_eureg_wide1_eu_death_y50m_nuts0

Original tag: eu_death_y50m_nuts0

Description:
Number of deaths of males, at 50 years old. Death means the permanent disappearance of all evidence of life at any time after life birth has taken place (postnatal cessation of vital functions without capability of resuscitation).

2.8.3.22 Number of deaths, total at 50 years old (eu_death_y50t_nuts0)

Long tag: qog_eureg_wide1_eu_death_y50t_nuts0

Original tag: eu_death_y50t_nuts0

Description:
Number of deaths, total at 50 years old. Death means the permanent disappearance of all evidence of life at any time after life birth has taken place (postnatal cessation of vital functions without capability of resuscitation).

2.8.3.23 Number of deaths of females, at 70 years old (eu_death_y70f_nuts0)

Long tag: qog_eureg_wide1_eu_death_y70f_nuts0

Original tag: eu_death_y70f_nuts0

Description:
Number of deaths of females, at 70 years old. Death means the permanent disappearance of all evidence of life at any time after life birth has taken place (postnatal cessation of vital functions without capability of resuscitation).

2.8.3.24 Number of deaths of males, at 70 years old (eu_death_y70m_nuts0)

Long tag: qog_eureg_wide1_eu_death_y70m_nuts0

Original tag: eu_death_y70m_nuts0

Description:
Number of deaths of males, at 70 years old. Death means the permanent disappearance of all evidence of life at any time after life birth has taken place (postnatal cessation of vital functions without capability of resuscitation).

2.8.3.25 Number of deaths, total at 70 years old (eu_death_y70t_nuts0)

Long tag: qog_eureg_wide1_eu_death_y70t_nuts0

Original tag: eu_death_y70t_nuts0

Description:
Number of deaths, total at 70 years old. Death means the permanent disappearance of all evidence of life at any time after life birth has taken place (postnatal cessation of vital functions without capability of resuscitation).

2.8.3.26 Population at 1st January, Female (eu_d2jan_f_nuts0)

Long tag: qog_eureg_wide1_eu_d2jan_f_nuts0

Original tag: eu_d2jan_f_nuts0

Description:
Female population as of 1st January of the year indicated. It is based on concept of usual resident population, i.e. the number of inhabitants of a given area on 1 January of the year in question (or, in some cases, on 31 December of the previous year). The population figures can be based on data from the most recent census adjusted by the components of population change produced since the last census, or based on population registers. Usually resident population means all persons having usual residence in a country at the reference time. Usual residence means the place where a person normally spends the daily period of rest, regardless of temporary absences for purposes of recreation, holidays, visits to friends and relatives, business, medical treatment or religious pilgrimage. The following persons alone are considered to be usual residents of the geographical area in question: a) those who have lived in their place of usual residence for a continuous period of at least 12 months before the reference time; or b) those who arrived in their place of usual residence during the 12 months before the reference time with the intention of staying there for at least one year.

2.8.3.27 Population at 1st January, Female (eu_d2jan_f_nuts1)

Long tag: qog_eureg_wide1_eu_d2jan_f_nuts1

Original tag: eu_d2jan_f_nuts1

Description:
Female population as of 1st January of the year indicated. 2.8.3.32 Area of a region, land area total, sq km (eu_d3area_lat_nuts0)

Long tag: qog_eureg_wide1_eu_d3area_lat_nuts0

Original tag: eu_d3area_lat_nuts0

Description:
Total land area of a region as square kilometer. Total Land Area (TLA) is defined as total surface area excluding lakes, rivers, transitional and coastal waters. Mountainous regions, glaciers, forests, wetlands and other temporarily or permanently uninhabitable regions are included in TLA.

2.8.3.33 Area of a region, land area total, sq km (eu_d3area_lat_nuts1)

Long tag: qog_eureg_wide1_eu_d3area_lat_nuts1

Original tag: eu_d3area_lat_nuts1

Description:
Total land area of a region as square kilometer. Total Land Area (TLA) is defined as total surface area excluding lakes, rivers, transitional and coastal waters. Mountainous regions, glaciers, forests, wetlands and other temporarily or permanently uninhabitable regions are included in TLA.

2.8.3.34 Area of a region, total, sq km (eu_d3area_t_nuts0)

Long tag: qog_eureg_wide1_eu_d3area_t_nuts0

Original tag: eu_d3area_t_nuts0

Description:
Total surface area of a region as square kilometer. Total Surface Area (TSA) is defined as the area of any given statistical area and includes land area and inland waters (lakes, rivers etc.). The sub-national areas (e.g. LAU and NUTS areas) defined by statistical and/or administrative boundaries are the building blocks for calculating both concepts. By definition Total Surface Area does not cover areas that are not statistical areas.

2.8.3.35 Area of a region, total, sq km (eu_d3area_t_nuts1)

Long tag: qog_eureg_wide1_eu_d3area_t_nuts1

Original tag: eu_d3area_t_nuts1

Description:
Total surface area of a region as square kilometer. Total Surface Area (TSA) is defined as the area of any given statistical area and includes land area and inland waters (lakes, rivers etc.). The sub-national areas (e.g. LAU and NUTS areas) defined by statistical and/or administrative boundaries are the building blocks for calculating both concepts. By definition Total Surface Area does not cover areas that are not statistical areas.

2.8.3.36 Population density, average population per square km (eu_per_km2_nuts0)

Long tag: qog_eureg_wide1_eu_per_km2_nuts0

Original tag: eu_per_km2_nuts0

Description:
Average population density per square km. Population density is the ratio of the (annual average) population of a region to the (land) area of the region; total area (including inland waters) is used when land area is not available.

2.8.3.37 Population density, average population per square km (eu_per_km2_nuts1)

Long tag: qog_eureg_wide1_eu_per_km2_nuts1

Original tag: eu_per_km2_nuts1

Description:
Average population density per square km. Population density is the ratio of the (annual average) population of a region to the (land) area of the region; total area (including inland waters) is used when land area is not available.

2.8.3.38 Fertility rate, total (eu_frate_total_nuts0)

Long tag: qog_eureg_wide1_eu_frate_total_nuts0

Original tag: eu_frate_total_nuts0

Description:
Total fertility rate. It is the mean number of children that would be born alive to a woman during her lifetime if she were to pass through her childbearing years conforming to the fertility rates by age of a given year.

2.8.3.39 Fertility rate, total (eu_frate_total_nuts1)

Long tag: qog_eureg_wide1_eu_frate_total_nuts1

Original tag: eu_frate_total_nuts1

Description:
Total fertility rate. It is the mean number of children that would be born alive to a woman during her lifetime if she were to pass through her childbearing years conforming to the fertility rates by age of a given year.

2.8.3.40 Fertility rate, at age 15 (eu_frate_y15_nuts0)

Long tag: qog_eureg_wide1_eu_frate_y15_nuts0

Original tag: eu_frate_y15_nuts0

Description:

Fertility rate, at age 15. This age-specific fertility rate is calculated by dividing the number of births of mothers of age 15 to the average female population of age 15.

2.8.3.41 Fertility rate, at age 15 (eu_frate_y15_nuts1)

Long tag: qog_eureg_wide1_eu_frate_y15_nuts1

Original tag: eu_frate_y15_nuts1

Description:

Fertility rate, at age 15. This age-specific fertility rate is calculated by dividing the number of births of mothers of age 15 to the average female population of age 15.

2.8.3.42 Fertility rate, at age 30 (eu_frate_y30_nuts0)

Long tag: qog_eureg_wide1_eu_frate_y30_nuts0

Original tag: eu_frate_y30_nuts0

Description:

Fertility rate, at age 30. This age-specific fertility rate is calculated by dividing the number of births of mothers of age 30 to the average female population of age 30.

2.8.3.43 Fertility rate, at age 30 (eu_frate_y30_nuts1)

Long tag: qog_eureg_wide1_eu_frate_y30_nuts1

Original tag: eu_frate_y30_nuts1

Description:

Fertility rate, at age 30. This age-specific fertility rate is calculated by dividing the number of births of mothers of age 30 to the average female population of age 30.

2.8.3.44 Fertility rate, at age 35 (eu_frate_y35_nuts0)

Long tag: qog_eureg_wide1_eu_frate_y35_nuts0

Original tag: eu_frate_y35_nuts0

Description:

Fertility rate, at age 35. This age-specific fertility rate is calculated by dividing the number of births of mothers of age 35 to the average female population of age 35.

2.8.3.45 Fertility rate, at age 35 (eu_frate_y35_nuts1)

Long tag: qog_eureg_wide1_eu_frate_y35_nuts1

Original tag: eu_frate_y35_nuts1

Description:

Fertility rate, at age 35. This age-specific fertility rate is calculated by dividing the number of births of mothers of age 35 to the average female population of age 35.

2.8.3.46 Life expectancy in years at 1 year old, female (eu_mlifexp_f_nuts0)

Long tag: qog_eureg_wide1_eu_mlifexp_f_nuts0

Original tag: eu_mlifexp_f_nuts0

Description:

Life expectancy in years at 1 year old, female. Life expectancy at given exact age is the mean number of years still to be lived by a person who has reached a certain exact age, if subjected throughout the rest of his or her life to the current mortality conditions (age-specific probabilities of dying).

2.8.3.47 Life expectancy in years at 1 year old, female (eu_mlifexp_f_nuts1)

Long tag: qog_eureg_wide1_eu_mlifexp_f_nuts1

Original tag: eu_mlifexp_f_nuts1

Description:

Life expectancy in years at 1 year old, female. Life expectancy at given exact age is the mean number of years still to be lived by a person who has reached a certain exact age, if subjected throughout the rest of his or her life to the current mortality conditions (age-specific probabilities of dying).

2.8.3.48 Life expectancy in years at 1 year old, male (eu_mlifexp_m_nuts0)

Long tag: qog_eureg_wide1_eu_mlifexp_m_nuts0

Original tag: eu_mlifexp_m_nuts0

Description:

Life expectancy in years at 1 year old, male. Life expectancy at given exact age is the mean number of years

still to be lived by a person who has reached a certain exact age, if subjected throughout the rest of his or her life to the current mortality conditions (age-specific probabilities of dying).

2.8.3.49 Life expectancy in years at 1 year old, male (eu_mlifexp_m_nuts1)

Long tag: qog_eureg_wide1_eu_mlifexp_m_nuts1

Original tag: eu_mlifexp_m_nuts1

Description:

Life expectancy in years at 1 year old, male. Life expectancy at given exact age is the mean number of years still to be lived by a person who has reached a certain exact age, if subjected throughout the rest of his or her life to the current mortality conditions (age-specific probabilities of dying).

2.8.3.50 Life expectancy in years at 1 year old, total (eu_mlifexp_t_nuts0)

Long tag: qog_eureg_wide1_eu_mlifexp_t_nuts0

Original tag: eu_mlifexp_t_nuts0

Description:

Life expectancy in years at 1 year old, total. Life expectancy at given exact age is the mean number of years still to be lived by a person who has reached a certain exact age, if subjected throughout the rest of his or her life to the current mortality conditions (age-specific probabilities of dying).

2.8.3.51 Life expectancy in years at 1 year old, total (eu_mlifexp_t_nuts1)

Long tag: qog_eureg_wide1_eu_mlifexp_t_nuts1

Original tag: eu_mlifexp_t_nuts1

Description:

Life expectancy in years at 1 year old, total. Life expectancy at given exact age is the mean number of years still to be lived by a person who has reached a certain exact age, if subjected throughout the rest of his or her life to the current mortality conditions (age-specific probabilities of dying).

2.8.3.52 Crude rate of net migration plus statistical adjustment (eu_cnmigratrt_nuts1)

Long tag: qog_eureg_wide1_eu_cnmigratrt_nuts1

Original tag: eu_cnmigratrt_nuts1

Description:

Crude rate of net migration plus statistical adjustment. Net migration including statistical adjustments the ratio of the net migration including statistical adjustment during the year to the average population in that year. The value is expressed per 1000 inhabitants. The crude rate of net migration is equal to the difference between the crude rate of population change and the crude rate of natural change (that is, net migration is considered as the part of population change not attributable to births and deaths). It is calculated in this way because immigration or emigration flows are either not available or the figures are not reliable.

2.8.3.53 Crude rate of total population change (eu_growrt_nuts1)

Long tag: qog_eureg_wide1_eu_growrt_nuts1

Original tag: eu_growrt_nuts1

Description:

Crude rate of total population change. It is the ratio of the total population change during the year to the average population of the area in question in that year. The value is expressed per 1000 inhabitants.

2.8.3.54 Crude rate of natural change of population (eu_natgrowrt_nuts1)

Long tag: qog_eureg_wide1_eu_natgrowrt_nuts1

Original tag: eu_natgrowrt_nuts1

Description:

Crude rate of natural change. It is the ratio of natural change over a period to the average population of the area in question during that period. The value is expressed per 1000 inhabitants.

2.8.4 Education

This category includes a variety of indicators related to education, such as educational attainment, the students (age, gender, educational level), and educational outcomes.

2.8.4.1 Educational attainment for ages 25 to 64, primary education, Female (eu_edatt_ed02_y2564f_nuts0)

Long tag: qog_eureg_wide1_eu_edatt_ed02_y2564f_nuts0

Original tag: eu_edatt_ed02_y2564f_nuts0

Description:

Percentage of 25-64 years old females whose the highest level of education successfully completed is less than

primary, primary and lower secondary education (levels 0-2). This aggregate refers to levels 0, 1 and 2 of the ISCED 2011 (online code ED0-2). Data up to 2013 refer to ISCED 1997 levels 0, 1 and 2 but also include level 3C short (educational attainment from ISCED level 3 programmes of less than two years).

2.8.4.2 Educational attainment for ages 25 to 64, primary education, Female (eu_edatt_ed02_y2564f_nuts1)

Long tag: qog_eureg_wide1_eu_edatt_ed02_y2564f_nuts1

Original tag: eu_edatt_ed02_y2564f_nuts1

Description:

Percentage of 25-64 years old females whose the highest level of education successfully completed is less than primary, primary and lower secondary education (levels 0-2). This aggregate refers to levels 0, 1 and 2 of the ISCED 2011 (online code ED0-2). Data up to 2013 refer to ISCED 1997 levels 0, 1 and 2 but also include level 3C short (educational attainment from ISCED level 3 programmes of less than two years).

2.8.4.3 Educational attainment for ages 25 to 64, primary education, Male (eu_edatt_ed02_y2564m_nuts0)

Long tag: qog_eureg_wide1_eu_edatt_ed02_y2564m_nuts0

Original tag: eu_edatt_ed02_y2564m_nuts0

Description:

Percentage of 25-64 years old males whose the highest level of education successfully completed is less than primary, primary and lower secondary education (levels 0-2). This aggregate refers to levels 0, 1 and 2 of the ISCED 2011 (online code ED0-2). Data up to 2013 refer to ISCED 1997 levels 0, 1 and 2 but also include level 3C short (educational attainment from ISCED level 3 programmes of less than two years).

2.8.4.4 Educational attainment for ages 25 to 64, primary education, Male (eu_edatt_ed02_y2564m_nuts1)

Long tag: qog_eureg_wide1_eu_edatt_ed02_y2564m_nuts1

Original tag: eu_edatt_ed02_y2564m_nuts1

Description:

Percentage of 25-64 years old males whose the highest level of education successfully completed is less than primary, primary and lower secondary education (levels 0-2). This aggregate refers to levels 0, 1 and 2 of the ISCED 2011 (online code ED0-2). Data up to 2013 refer to ISCED 1997 levels 0, 1 and 2 but also include level 3C short (educational attainment from ISCED level 3 programmes of less than two years).

2.8.4.5 Educational attainment for ages 25 to 64, primary education, Total (eu_edatt_ed02_y2564t_nuts0)

Long tag: qog_eureg_wide1_eu_edatt_ed02_y2564t_nuts0

Original tag: eu_edatt_ed02_y2564t_nuts0

Description:

Percentage of 25-64 years old population whose the highest level of education successfully completed is less than primary, primary and lower secondary education (levels 0-2). This aggregate refers to levels 0, 1 and 2 of the ISCED 2011 (online code ED0-2). Data up to 2013 refer to ISCED 1997 levels 0, 1 and 2 but also include level 3C short (educational attainment from ISCED level 3 programmes of less than two years).

2.8.4.6 Educational attainment for ages 25 to 64, primary education, Total (eu_edatt_ed02_y2564t_nuts1)

Long tag: qog_eureg_wide1_eu_edatt_ed02_y2564t_nuts1

Original tag: eu_edatt_ed02_y2564t_nuts1

Description:

Percentage of 25-64 years old population whose the highest level of education successfully completed is less than primary, primary and lower secondary education (levels 0-2). This aggregate refers to levels 0, 1 and 2 of the ISCED 2011 (online code ED0-2). Data up to 2013 refer to ISCED 1997 levels 0, 1 and 2 but also include level 3C short (educational attainment from ISCED level 3 programmes of less than two years).

2.8.4.7 Educational attainment for ages 25 to 64, secondary education, Female (eu_edatt_ed34_y2564f_nuts0)

Long tag: qog_eureg_wide1_eu_edatt_ed34_y2564f_nuts0

Original tag: eu_edatt_ed34_y2564f_nuts0

Description:

Percentage of 25-64 years old females whose the highest level of education successfully completed is upper secondary and post-secondary non-tertiary education (levels 3 and 4). This aggregate corresponds to ISCED 2011 levels 3 and 4 (online code ED3_4). ISCED 2011 level 3 programmes of partial level completion are considered within ISCED level 3. Data up to 2013 refer to ISCED 1997 levels 3C long, 3A, 3B and 4.

2.8.4.8 Educational attainment for ages 25 to 64, secondary education, Female (eu_edatt_ed34_y2564f_nuts1)

Long tag: qog_eureg_wide1_eu_edatt_ed34_y2564f_nuts1

Original tag: eu_edatt_ed34_y2564f_nuts1

Description:

Percentage of 25-64 years old females whose the highest level of education successfully completed is upper secondary and post-secondary non-tertiary education (levels 3 and 4). This aggregate corresponds to ISCED 2011 levels 3 and 4 (online code ED3_4). ISCED 2011 level 3 programmes of partial level completion are considered within ISCED level 3. Data up to 2013 refer to ISCED 1997 levels 3C long, 3A, 3B and 4.

2.8.4.9 Educational attainment for ages 25 to 64, secondary education, Male (eu_edatt_ed34_y2564m_nuts0)

Long tag: qog_eureg_wide1_eu_edatt_ed34_y2564m_nuts0

Original tag: eu_edatt_ed34_y2564m_nuts0

Description:

Percentage of 25-64 years old males whose the highest level of education successfully completed is upper secondary and post-secondary non-tertiary education (levels 3 and 4). This aggregate corresponds to ISCED 2011 levels 3 and 4 (online code ED3_4). ISCED 2011 level 3 programmes of partial level completion are considered within ISCED level 3. Data up to 2013 refer to ISCED 1997 levels 3C long, 3A, 3B and 4.

2.8.4.10 Educational attainment for ages 25 to 64, secondary education, Male (eu_edatt_ed34_y2564m_nuts1)

Long tag: qog_eureg_wide1_eu_edatt_ed34_y2564m_nuts1

Original tag: eu_edatt_ed34_y2564m_nuts1

Description:

Percentage of 25-64 years old males whose the highest level of education successfully completed is upper secondary and post-secondary non-tertiary education (levels 3 and 4). This aggregate corresponds to ISCED 2011 levels 3 and 4 (online code ED3_4). ISCED 2011 level 3 programmes of partial level completion are considered within ISCED level 3. Data up to 2013 refer to ISCED 1997 levels 3C long, 3A, 3B and 4.

2.8.4.11 Educational attainment for ages 25 to 64, secondary education, Total (eu_edatt_ed34_y2564t_nuts0)

2.8.4.43 15-24 year old neither in employment nor in education as percentage, female (eu_neet_y1524f_nuts0)

Long tag: qog_eureg_wide1_eu_neet_y1524f_nuts0

Original tag: eu_neet_y1524f_nuts0

Description:

15-24 year old females neither in employment nor in education as percentage. The indicator on young people neither in employment nor in education and training (NEET) provides information on young people aged 15 to 24 who meet the following two conditions: (a) they are not employed (i.e. unemployed or inactive according to the International Labour Organisation definition) and (b) they have not received any education or training in the four weeks preceding the survey. Data are expressed as a percentage of the total population in the same age group and sex, excluding the respondents who have not answered the question 'participation to education and training'. Data come from the European Union Labour Force Survey.

2.8.4.44 15-24 year old neither in employment nor in education as percentage, female (eu_neet_y1524f_nuts1)

15-24 year old males neither in employment nor in education as percentage. The indicator on young people neither in employment nor in education and training (NEET) provides information on young people aged 15

to 24 who meet the following two conditions: (a) they are not employed (i.e. unemployed or inactive according to the International Labour Organisation definition) and (b) they have not received any education or training in the four weeks preceding the survey. Data are expressed as a percentage of the total population in the same age group and sex, excluding the respondents who have not answered the question 'participation to education and training'. Data come from the European Union Labour Force Survey.

2.8.4.46 15-24 year old neither in employment nor in education as percentage, male (eu_neet_y1524m_nuts1)

Long tag: qog_eureg_wide1_eu_neet_y1524m_nuts1

Original tag: eu_neet_y1524m_nuts1

Description:

15-24 year old males neither in employment nor in education as percentage. The indicator on young people neither in employment nor in education and training (NEET) provides information on young people aged 15 to 24 who meet the following two conditions: (a) they are not employed (i.e. unemployed or inactive according to the International Labour Organisation definition) and (b) they have not received any education or training in the four weeks preceding the survey. Data are expressed as a percentage of the total population in the same age group and sex, excluding the respondents who have not answered the question 'participation to education and training'. Data come from the European Union Labour Force Survey.

2.8.4.49 Employment rate for people between 15-34 years, total duration since education (eu_empl_durtotal_nuts0)

Long tag: qog_eureg_wide1_eu_empl_durtotal_nuts0

Original tag: eu_empl_durtotal_nuts0

Description:

Employment rate for people between 15 and 34 years, total duration since completion of highest level of education. The indicator is defined as the percentage of the population aged 15-34, who were employed (ILO definition), not in further education or training (i.e. neither formal nor non-formal) during the last four weeks preceding the survey.

2.8.4.50 Employment rate for people between 15-34 years, total duration since education (eu_empl_durtotal_nuts1)

Long tag: qog_eureg_wide1_eu_empl_durtotal_nuts1

Original tag: eu_empl_durtotal_nuts1

Description:

Employment rate for people between 15 and 34 years, total duration since completion of highest level of education. The indicator is defined as the percentage of the population aged 15-34, who were employed (ILO definition), not in further education or training (i.e. neither formal nor non-formal) during the last four weeks preceding the survey.

2.8.4.51 Employment rate for people between 15-34 years, over 3 years since education (eu_empl_dury_gt3_nuts0)

Long tag: qog_eureg_wide1_eu_empl_dury_gt3_nuts0

Original tag: eu_empl_dury_gt3_nuts0

Description:

Employment rate for people between 15 and 34 years, over 3 years since completion of highest level of education. The indicator is defined as the percentage of the population aged 15-34, who were employed (ILO definition), not in further education or training (i.e. neither formal nor non-formal) during the last four weeks preceding the survey.

2.8.4.52 Employment rate for people between 15-34 years, over 3 years since education (eu_empl_dury_gt3_nuts1)

Long tag: qog_eureg_wide1_eu_empl_dury_gt3_nuts1

Original tag: eu_empl_dury_gt3_nuts1

Description:

Employment rate for people between 15 and 34 years, over 3 years since completion of highest level of education. The indicator is defined as the percentage of the population aged 15-34, who were employed (ILO definition), not in further education or training (i.e. neither formal nor non-formal) during the last four weeks preceding the survey.

2.8.4.53 Employment rate for people between 15-34 years, 1 to 3 years since education (eu_empl_dury13_nuts0)

Long tag: qog_eureg_wide1_eu_empl_dury13_nuts0

Original tag: eu_empl_dury13_nuts0

Description:

Employment rate for people between 15 and 34 years, 1 to 3 years since completion of highest level of education. The indicator is defined as the percentage of the population aged 15-34, who were employed (ILO definition), not in further education or training (i.e. neither formal nor non-formal) during the last four weeks preceding the survey.

2.8.4.54 Employment rate for people between 15-34 years, 1 to 3 years since education (eu_empl_dury13_nuts1)

Long tag: qog_eureg_wide1_eu_empl_dury13_nuts1

Original tag: eu_empl_dury13_nuts1

Description:

Employment rate for people between 15 and 34 years, 1 to 3 years since completion of highest level of education. The indicator is defined as the percentage of the population aged 15-34, who were employed (ILO definition), not in further education or training (i.e. neither formal nor non-formal) during the last four weeks preceding the survey.

2.8.4.55 Employment rate for people between 15-34 years, education levels 0-2 (eu_empl_edled02_nuts0)

Long tag: qog_eureg_wide1_eu_empl_edled02_nuts0

Original tag: eu_empl_edled02_nuts0

Description:

Employment rate for people between 15 and 34 years, whose the highest level of education successfully completed is less than primary, primary and lower secondary education (levels 0-2). The indicator is defined as the percentage of the population aged 15-34, who were employed (ILO definition), not in further education or training (i.e. neither formal nor non-formal) during the last four weeks preceding the survey.

2.8.4.56 Employment rate for people between 15-34 years, education levels 0-2 (eu_empl_edled02_nuts1)

Long tag: qog_eureg_wide1_eu_empl_edled02_nuts1

Original tag: eu_empl_edled02_nuts1

Description:

Employment rate for people between 15 and 34 years, whose the highest level of education successfully completed is less than primary, primary and lower secondary education (levels 0-2). The indicator is defined as the percentage of the population aged 15-34, who were employed (ILO definition), not in further education or training (i.e. neither formal nor non-formal) during the last four weeks preceding the survey.

2.8.4.57 Employment rate for people between 15-34 years, education levels 3-4 (eu_empl_edled34_nuts0)

Long tag: qog_eureg_wide1_eu_empl_edled34_nuts0

Original tag: eu_empl_edled34_nuts0

Description:

Employment rate for people between 15 and 34 years, whose the highest level of education successfully completed is upper secondary and post-secondary non-tertiary education (levels 3 and 4). The indicator is defined as the

percentage of the population aged 15-34, who were employed (ILO definition), not in further education or training (i.e. neither formal nor non-formal) during the last four weeks preceding the survey.

2.8.4.58 Employment rate for people between 15-34 years, education levels 3-4 (eu_empl_edled34_nuts1)

Long tag: qog_eureg_wide1_eu_empl_edled34_nuts1

Original tag: eu_empl_edled34_nuts1

Description:

Employment rate for people between 15 and 34 years, whose the highest level of education successfully completed is upper secondary and post-secondary non-tertiary education (levels 3 and 4). The indicator is defined as the percentage of the population aged 15-34, who were employed (ILO definition), not in further education or training (i.e. neither formal nor non-formal) during the last four weeks preceding the survey.

2.8.4.59 Employment rate for people between 15-34 years, education levels 5-8 (eu_empl_edled58_nuts0)

Long tag: qog_eureg_wide1_eu_empl_edled58_nuts0

Original tag: eu_empl_edled58_nuts0

Description:

Employment rate for people between 15 and 34 years, whose the highest level of education successfully completed is tertiary education (levels 5-8). The indicator is defined as the percentage of the population aged 15-34, who were employed (ILO definition), not in further education or training (i.e. neither formal nor non-formal) during the last four weeks preceding the survey.

2.8.4.60 Employment rate for people between 15-34 years, education levels 5-8 (eu_empl_edled58_nuts1)

Long tag: qog_eureg_wide1_eu_empl_edled58_nuts1

Original tag: eu_empl_edled58_nuts1

Description:

Employment rate for people between 15 and 34 years, whose the highest level of education successfully completed is tertiary education (levels 5-8). The indicator is defined as the percentage of the population aged 15-34, who were employed (ILO definition), not in further education or training (i.e. neither formal nor non-formal) during the last four weeks preceding the survey.

2.8.4.61 Employment rate for people between 15-34 years, all education levels (eu_empl_edltotal_nuts0)

Long tag: qog_eureg_wide1_eu_empl_edltotal_nuts0

Original tag: eu_empl_edltotal_nuts0

Description:

Total employment rate for people between 15 and 34 years for all education levels. The indicator is defined as the percentage of the population aged 15-34, who were employed (ILO definition), not in further education or training (i.e. neither formal nor non-formal) during the last four weeks preceding the survey.

2.8.4.62 Employment rate for people between 15-34 years, all education levels (eu_empl_edltotal_nuts1)

Long tag: qog_eureg_wide1_eu_empl_edltotal_nuts1

Original tag: eu_empl_edltotal_nuts1

Description:

Total employment rate for people between 15 and 34 years for all education levels. The indicator is defined as the percentage of the population aged 15-34, who were employed (ILO definition), not in further education or training (i.e. neither formal nor non-formal) during the last four weeks preceding the survey.

2.8.4.63 Participation rate in Primary and lower secondary education (eu_epred12_nuts0)

Long tag: qog_eureg_wide1_eu_epred12_nuts0

Original tag: eu_epred12_nuts0

Description:

Participation rate in primary and lower secondary education (levels 1-2). Countries participating in this collection are compiling their data according to the concepts and definitions of the UOE data collection manuals on education systems statistics. This aggregate refers to levels 1 and 2 of the ISCED 2011 (online code ED1-2).

2.8.4.64 Participation rate in Primary and lower secondary education (eu_epred12_nuts1)

Long tag: qog_eureg_wide1_eu_epred12_nuts1

Original tag: eu_epred12_nuts1

Description:
Participation rate in primary and lower secondary education (levels 1-2). Countries participating in this collection are compiling their data according to the concepts and definitions of the UOE data collection manuals on education systems statistics. This aggregate refers to levels 1 and 2 of the ISCED 2011 (online code ED1-2).

2.8.4.65 Participation rate in Tertiary education (eu_epred58_nuts0)

Long tag: qog_eureg_wide1_eu_epred58_nuts0

Original tag: eu_epred58_nuts0

Description:
Participation rate in tertiary education (level 5-8). Countries participating in this collection are compiling their data according to the concepts and definitions of the UOE data collection manuals on education systems statistics. This aggregate covers ISCED 2011 levels 5, 6, 7 and 8 (short-cycle tertiary education, bachelor's or equivalent level, master's or equivalent level, doctoral or equivalent level, online code ED5-8 'tertiary education').

2.8.4.66 Participation rate in Tertiary education (eu_epred58_nuts1)

Long tag: qog_eureg_wide1_eu_epred58_nuts1

Original tag: eu_epred58_nuts1

Description:
Participation rate in tertiary education (level 5-8). Countries participating in this collection are compiling their data according to the concepts and definitions of the UOE data collection manuals on education systems statistics. This aggregate covers ISCED 2011 levels 5, 6, 7 and 8 (short-cycle tertiary education, bachelor's or equivalent level, master's or equivalent level, doctoral or equivalent level, online code ED5-8 'tertiary education').

2.8.4.67 Participation rate in education and training (last 4 weeks), females (eu_epry2564f_nuts0)

Long tag: qog_eureg_wide1_eu_epry2564f_nuts0

Original tag: eu_epry2564f_nuts0

Description:
Female participation rate in education and training during the last four weeks preceding the survey. The participation rate in education and training covers participation in formal and non-formal education and training. The reference period for the participation in education and training is the four weeks prior to the interview. Formal education is defined by ISCED as 'education that is institutionalised, intentional and planned through public organisations and recognised private bodies, and – in their totality – constitute the formal education system of a country. Formal education programmes are thus recognised as such by the relevant national education or equivalent authorities, e.g. any other institution in cooperation with the national or sub-national education authorities.' Non-formal education and training is defined as any institutionalised, intentional and organised/planned learning activities outside the formal education system. According to the classification of learning activities (CLA 2016), non-formal education and training comprises courses, seminars and workshops, private lessons or instructions and guided-on-the-job training. However, non-formal education as measured in the EU-LFS excludes guided-on-the-job training. The information collected covers both job-related (professional) and non-job related (personal, social, 'leisure') education and training activities.

2.8.4.68 Participation rate in education and training (last 4 weeks), females (eu_epry2564f_nuts1)

Long tag: qog_eureg_wide1_eu_epry2564f_nuts1

Original tag: eu_epry2564f_nuts1

Description:
Female participation rate in education and training during the last four weeks preceding the survey. The participation rate in education and training covers participation in formal and non-formal education and training. The reference period for the participation in education and training is the four weeks prior to the interview. Formal education is defined by ISCED as 'education that is institutionalised, intentional and planned through public organisations and recognised private bodies, and – in their totality – constitute the formal education system of a country. Formal education programmes are thus recognised as such by the relevant national education or equivalent authorities, e.g. any other institution in cooperation with the national or sub-national education authorities.' Non-formal education and training is defined as any institutionalised, intentional and organised/planned learning activities outside the formal education system. According to the classification of learning activities (CLA 2016), non-formal education and training comprises courses, seminars and workshops, private lessons or instructions and guided-on-the-job training. 2.8.5 Environment

This category includes indicators related to temperature and municipal waste.

2.8.5.1 Municipal waste disposal - incineration in thousand tonnes (eu_env_wasdsp_i_nuts0)

Long tag: qog_eureg_wide1_eu_env_wasdsp_i_nuts0

Original tag: eu_env_wasdsp_i_nuts0

Description:

Municipal waste disposal, incineration in thousand tonnes. Municipal waste is mainly produced by households, similar wastes from sources such as commerce, offices and public institutions are included. The amount of municipal waste generated consists of waste collected by or on behalf of municipal authorities and disposed of through the waste management system. The amount of municipal waste treatment is reported for the treatment operations incineration (with and without energy recovery), recycling, composting and landfilling. Data are available in thousand tonnes and kilograms per person. Wastes from agriculture and from industries are not included.

2.8.5.2 Municipal waste disposal - incineration in thousand tonnes (eu_env_wasdsp_i_nuts1)

Long tag: qog_eureg_wide1_eu_env_wasdsp_i_nuts1

Original tag: eu_env_wasdsp_i_nuts1

Description:

Municipal waste disposal, incineration in thousand tonnes. Municipal waste is mainly produced by households, similar wastes from sources such as commerce, offices and public institutions are included. The amount of municipal waste generated consists of waste collected by or on behalf of municipal authorities and disposed of through the waste management system. The amount of municipal waste treatment is reported for the treatment operations incineration (with and without energy recovery), recycling, composting and landfilling. Data are available in thousand tonnes and kilograms per person. Wastes from agriculture and from industries are not included.

2.8.5.3 Municipal waste generated in thousand tonnes (eu_env_wasgen_nuts0)

Long tag: qog_eureg_wide1_eu_env_wasgen_nuts0

Original tag: eu_env_wasgen_nuts0

Description:

Municipal waste generated in thousand tonnes. Municipal waste is mainly produced by households, similar wastes from sources such as commerce, offices and public institutions are included. The amount of municipal waste generated consists of waste collected by or on behalf of municipal authorities and disposed of through the waste management system. The amount of municipal waste treatment is reported for the treatment operations incineration (with and without energy recovery), recycling, composting and landfilling. Data are available in thousand tonnes and kilograms per person. Wastes from agriculture and from industries are not included.

2.8.5.4 Municipal waste generated in thousand tonnes (eu_env_wasgen_nuts1)

Long tag: qog_eureg_wide1_eu_env_wasgen_nuts1

Original tag: eu_env_wasgen_nuts1

Description:

Municipal waste generated in thousand tonnes. Municipal waste is mainly produced by households, similar wastes from sources such as commerce, offices and public institutions are included. The amount of municipal waste generated consists of waste collected by or on behalf of municipal authorities and disposed of through the waste management system. The amount of municipal waste treatment is reported for the treatment operations incineration (with and without energy recovery), recycling, composting and landfilling. Data are available in thousand tonnes and kilograms per person. Wastes from agriculture and from industries are not included.

2.8.5.5 Municipal waste recovery - energy recovery in thousand tonnes (eu_env_wasrcv_e_nuts0)

Long tag: qog_eureg_wide1_eu_env_wasrcv_e_nuts0

Original tag: eu_env_wasrcv_e_nuts0

Description:

Municipal waste energy recovery in thousand tonnes. Energy recovery is defined as the incineration that fulfils the energy efficiency criteria laid down in the Waste Framework Directive (2008/98/EC), Annex II (recovery operation R1). Municipal waste is mainly produced by households, similar wastes from sources such as commerce, offices and public institutions are included. The amount of municipal waste generated consists

of waste collected by or on behalf of municipal authorities and disposed of through the waste management system. The amount of municipal waste treatment is reported for the treatment operations incineration (with and without energy recovery), recycling, composting and landfilling. Data are available in thousand tonnes and kilograms per person. Wastes from agriculture and from industries are not included.

2.8.5.6 Municipal waste recovery - energy recovery in thousand tonnes (eu_env_wasrcv_e_nuts1)

Long tag: qog_eureg_wide1_eu_env_wasrcv_e_nuts1

Original tag: eu_env_wasrcv_e_nuts1

Description:

Municipal waste energy recovery in thousand tonnes. Energy recovery is defined as the incineration that fulfils the energy efficiency criteria laid down in the Waste Framework Directive (2008/98/EC), Annex II (recovery operation R1). Municipal waste is mainly produced by households, similar wastes from sources such as commerce, offices and public institutions are included. The amount of municipal waste generated consists of waste collected by or on behalf of municipal authorities and disposed of through the waste management system. The amount of municipal waste treatment is reported for the treatment operations incineration (with and without energy recovery), recycling, composting and landfilling. Data are available in thousand tonnes and kilograms per person. Wastes from agriculture and from industries are not included.

2.8.5.7 Municipal waste recycling in thousand tonnes (eu_env_wasrcy_c_d_nuts0)

Long tag: qog_eureg_wide1_eu_env_wasrcy_c_d_nuts0

Original tag: eu_env_wasrcy_c_d_nuts0

Description:

Municipal waste recycling in thousand tonnes. Recycling means any recovery operation by which waste materials are reprocessed into products, materials or substances whether for the original or other purposes. It includes the reprocessing of organic material but does not include energy recovery and the reprocessing into materials that are to be used as fuels or for backfilling operations. Municipal waste is mainly produced by households, similar wastes from sources such as commerce, offices and public institutions are included. The amount of municipal waste generated consists of waste collected by or on behalf of municipal authorities and disposed of through the waste management system. The amount of municipal waste treatment is reported for the treatment operations incineration (with and without energy recovery), recycling, composting and landfilling. Data are available in thousand tonnes and kilograms per person. Wastes from agriculture and from industries are not included.

2.8.5.8 Municipal waste recycling in thousand tonnes (eu_env_wasrcy_c_d_nuts1)

Long tag: qog_eureg_wide1_eu_env_wasrcy_c_d_nuts1

Original tag: eu_env_wasrcy_c_d_nuts1

Description:

Municipal waste recycling in thousand tonnes. Recycling means any recovery operation by which waste materials are reprocessed into products, materials or substances whether for the original or other purposes. It includes the reprocessing of organic material but does not include energy recovery and the reprocessing into materials that are to be used as fuels or for backfilling operations. Municipal waste is mainly produced by households, similar wastes from sources such as commerce, offices and public institutions are included. The amount of municipal waste generated consists of waste collected by or on behalf of municipal authorities and disposed of through the waste management system. The amount of municipal waste treatment is reported for the treatment operations incineration (with and without energy recovery), recycling, composting and landfilling. Data are available in thousand tonnes and kilograms per person. Wastes from agriculture and from industries are not included.

2.8.5.9 Number of cooling degree days (eu_eng_cdd_nuts0)

Long tag: qog_eureg_wide1_eu_eng_cdd_nuts0

Original tag: eu_eng_cdd_nuts0

Description:

Number of cooling degree days (CDD). Cooling degree day (CDD) index is a weather-based technical index designed to describe the need for the cooling (air-conditioning) requirements of buildings. CDD is derived from meteorological observations of air temperature, interpolated to regular grids at 25 km resolution for Europe. Calculated gridded CDD is aggregated and subsequently presented on NUTS-2 level, for 2017 and 2018 also on NUTS-3 level.

2.8.5.10 Number of cooling degree days (eu_eng_cdd_nuts1)

Long tag: qog_eureg_wide1_eu_eng_cdd_nuts1

Original tag: eu_eng_cdd_nuts1

Description:

Number of cooling degree days (CDD). Cooling degree day (CDD) index is a weather-based technical index designed to describe the need for the cooling (air-conditioning) requirements of buildings. CDD is derived from meteorological observations of air temperature, interpolated to regular grids at 25 km resolution for Europe. Calculated gridded CDD is aggregated and subsequently presented on NUTS-2 level, for 2017 and 2018 also on NUTS-3 level.

2.8.5.11 Number of heating degree days (eu_eng_hdd_nuts0)

Long tag: qog_eureg_wide1_eu_eng_hdd_nuts0

Original tag: eu_eng_hdd_nuts0

Description:

Number of heating degree days (HDD). Heating degree day (HDD) index is a weather-based technical index designed to describe the need for the heating energy requirements of buildings. HDD is derived from meteorological observations of air temperature, interpolated to regular grids at 25 km resolution for Europe. Calculated gridded HDD is aggregated and subsequently presented on NUTS-2 level, for 2017 and 2018 also on NUTS-3 level.

2.8.5.12 Number of heating degree days (eu_eng_hdd_nuts1)

Long tag: qog_eureg_wide1_eu_eng_hdd_nuts1

Original tag: eu_eng_hdd_nuts1

Description:

Number of heating degree days (HDD). Heating degree day (HDD) index is a weather-based technical index designed to describe the need for the heating energy requirements of buildings. HDD is derived from meteorological observations of air temperature, interpolated to regular grids at 25 km resolution for Europe. Calculated gridded HDD is aggregated and subsequently presented on NUTS-2 level, for 2017 and 2018 also on NUTS-3 level.

2.8.6 Health

This category includes indicators describing the health of a population in a given country. These include reports about the prevalence of infectious diseases, and indicators such as birth rate, death rate, life expectancy. It also provides information on the capacity of the health care system, such as the number of hospital beds available.

2.8.6.1 Number of deaths by circulatory system diseases, female (eu_hea_cs_f_nuts0)

Long tag: qog_eureg_wide1_eu_hea_cs_f_nuts0

Original tag: eu_hea_cs_f_nuts0

Description:

Number of deaths by circulatory system diseases, female. Causes of death (COD) statistics are based on information derived from the medical certificate of cause of death. COD target at the underlying cause of death, in accordance with the ICD-10 definition i.e. "the disease or injury which initiated the train of morbid events leading directly to death, or the circumstances of the accident or violence which produced the fatal injury". Expressed in deaths per 100,000 inhabitants, it is calculated as the number of deaths recorded in the population for a given period divided by population in the same period and then multiplied by 100,000.

2.8.6.2 Number of deaths by circulatory system diseases, female (eu_hea_cs_f_nuts1)

Long tag: qog_eureg_wide1_eu_hea_cs_f_nuts1

Original tag: eu_hea_cs_f_nuts1

Description:

Number of deaths by circulatory system diseases, female. Causes of death (COD) statistics are based on information derived from the medical certificate of cause of death. COD target at the underlying cause of death, in accordance with the ICD-10 definition i.e. "the disease or injury which initiated the train of morbid events leading directly to death, or the circumstances of the accident or violence which produced the fatal injury". Expressed in deaths per 100,000 inhabitants, it is calculated as the number of deaths recorded in the population for a given period divided by population in the same period and then multiplied by 100,000.

2.8.6.3 Number of deaths by circulatory system diseases, male (eu_hea_cs_m_nuts0)

Long tag: qog_eureg_wide1_eu_hea_cs_m_nuts0

Original tag: eu_hea_cs_m_nuts0

Description:

Number of deaths by circulatory system diseases, male. Causes of death (COD) statistics are based on information derived from the medical certificate of cause of death. COD target at the underlying cause of death, in accordance with the ICD-10 definition i.e. "the disease or injury which initiated the train of morbid events leading directly to death, or the circumstances of the accident or violence which produced the fatal injury". Expressed in deaths per 100,000 inhabitants, it is calculated as the number of deaths recorded in the population for a given period divided by population in the same period and then multiplied by 100,000.

2.8.6.4 Number of deaths by circulatory system diseases, male (eu_hea_cs_m_nuts1)

Long tag: qog_eureg_wide1_eu_hea_cs_m_nuts1

Original tag: eu_hea_cs_m_nuts1

Description:
Number of deaths by circulatory system diseases, male. Causes of death (COD) statistics are based on information derived from the medical certificate of cause of death. COD target at the underlying cause of death, in accordance with the ICD-10 definition i.e. "the disease or injury which initiated the train of morbid events leading directly to death, or the circumstances of the accident or violence which produced the fatal injury". Expressed in deaths per 100,000 inhabitants, it is calculated as the number of deaths recorded in the population for a given period divided by population in the same period and then multiplied by 100,000.

2.8.6.5 Number of deaths by circulatory system diseases, total (eu_hea_cs_t_nuts0)

Long tag: qog_eureg_wide1_eu_hea_cs_t_nuts0

Original tag: eu_hea_cs_t_nuts0

Description:
Number of deaths by circulatory system diseases, total. Causes of death (COD) statistics are based on information derived from the medical certificate of cause of death. COD target at the underlying cause of death, in accordance with the ICD-10 definition i.e. "the disease or injury which initiated the train of morbid events leading directly to death, or the circumstances of the accident or violence which produced the fatal injury". Expressed in deaths per 100,000 inhabitants, it is calculated as the number of deaths recorded in the population for a given period divided by population in the same period and then multiplied by 100,000.

2.8.6.6 Number of deaths by circulatory system diseases, total (eu_hea_cs_t_nuts1)

Long tag: qog_eureg_wide1_eu_hea_cs_t_nuts1

Original tag: eu_hea_cs_t_nuts1

Description:
Number of deaths by circulatory system diseases, total. Causes of death (COD) statistics are based on information derived from the medical certificate of cause of death. COD target at the underlying cause of death, in accordance with the ICD-10 definition i.e. "the disease or injury which initiated the train of morbid events leading directly to death, or the circumstances of the accident or violence which produced the fatal injury". Expressed in deaths per 100,000 inhabitants, it is calculated as the number of deaths recorded in the population for a given period divided by population in the same period and then multiplied by 100,000.

2.8.6.7 Number of deaths by HIV, female (eu_hea_hiv_f_nuts0)

Long tag: qog_eureg_wide1_eu_hea_hiv_f_nuts0

Original tag: eu_hea_hiv_f_nuts0

Description:
Number of deaths by HIV, female. Causes of death (COD) statistics are based on information derived from the medical certificate of cause of death. COD target at the underlying cause of death, in accordance with the ICD-10 definition i.e. "the disease or injury which initiated the train of morbid events leading directly to death, or the circumstances of the accident or violence which produced the fatal injury". Expressed in deaths per 100,000 inhabitants, it is calculated as the number of deaths recorded in the population for a given period divided by population in the same period and then multiplied by 100,000.

2.8.6.8 Number of deaths by HIV, female (eu_hea_hiv_f_nuts1)

Long tag: qog_eureg_wide1_eu_hea_hiv_f_nuts1

Original tag: eu_hea_hiv_f_nuts1

Description:
Number of deaths by HIV, female. Causes of death (COD) statistics are based on information derived from the medical certificate of cause of death. COD target at the underlying cause of death, in accordance with the ICD-10 definition i.e. "the disease or injury which initiated the train of morbid events leading directly to death, or the circumstances of the accident or violence which produced the fatal injury". Expressed in deaths per 100,000 inhabitants, it is calculated as the number of deaths recorded in the population for a given period divided by population in the same period and then multiplied by 100,000.

2.8.6.9 Number of deaths by HIV, male (eu_hea_hiv_m_nuts0)

Long tag: qog_eureg_wide1_eu_hea_hiv_m_nuts0

Original tag: eu_hea_hiv_m_nuts0

Description:
Number of deaths by HIV, male. Causes of death (COD) statistics are based on information derived from the medical certificate of cause of death. COD target at the underlying cause of death, in accordance with the ICD-10 definition i.e. "the disease or injury which initiated the train of morbid events leading directly to death, or the circumstances of the accident or violence which produced the fatal injury". Expressed in deaths per 100,000 inhabitants, it is calculated as the number of deaths recorded in the population for a given period divided by population in the same period and then multiplied by 100,000.

2.8.6.10 Number of deaths by HIV, male (eu_hea_hiv_m_nuts1)

Long tag: qog_eureg_wide1_eu_hea_hiv_m_nuts1

Original tag: eu_hea_hiv_m_nuts1

Description:
Number of deaths by HIV, male. Causes of death (COD) statistics are based on information derived from the medical certificate of cause of death. COD target at the underlying cause of death, in accordance with the ICD-10 definition i.e. "the disease or injury which initiated the train of morbid events leading directly to death, or the circumstances of the accident or violence which produced the fatal injury". Expressed in deaths per 100,000 inhabitants, it is calculated as the number of deaths recorded in the population for a given period divided by population in the same period and then multiplied by 100,000.

2.8.6.11 Number of deaths by HIV, total (eu_hea_hiv_t_nuts0)

Long tag: qog_eureg_wide1_eu_hea_hiv_t_nuts0

Original tag: eu_hea_hiv_t_nuts0

Description:
Number of deaths by HIV, total. Causes of death (COD) statistics are based on information derived from the medical certificate of cause of death. COD target at the underlying cause of death, in accordance with the ICD-10 definition i.e. "the disease or injury which initiated the train of morbid events leading directly to death, or the circumstances of the accident or violence which produced the fatal injury". Expressed in deaths per 100,000 inhabitants, it is calculated as the number of deaths recorded in the population for a given period divided by population in the same period and then multiplied by 100,000.

2.8.6.12 Number of deaths by HIV, total (eu_hea_hiv_t_nuts1)

Long tag: qog_eureg_wide1_eu_hea_hiv_t_nuts1

Original tag: eu_hea_hiv_t_nuts1

Description:
Number of deaths by HIV, total. Causes of death (COD) statistics are based on information derived from the medical certificate of cause of death. COD target at the underlying cause of death, in accordance with the ICD-10 definition i.e. "the disease or injury which initiated the train of morbid events leading directly to death, or the circumstances of the accident or violence which produced the fatal injury". Expressed in deaths per 100,000 inhabitants, it is calculated as the number of deaths recorded in the population for a given period divided by population in the same period and then multiplied by 100,000.

2.8.6.13 Number of deaths by infectious and parasitic diseases, female (eu_hea_ipd_f_nuts0)

Long tag: qog_eureg_wide1_eu_hea_ipd_f_nuts0

Original tag: eu_hea_ipd_f_nuts0

Description:
Number of deaths by infectious and parasitic diseases, female. Causes of death (COD) statistics are based on information derived from the medical certificate of cause of death. COD target at the underlying cause of death, in accordance with the ICD-10 definition i.e. "the disease or injury which initiated the train of morbid events leading directly to death, or the circumstances of the accident or violence which produced the fatal injury". Expressed in deaths per 100,000 inhabitants, it is calculated as the number of deaths recorded in the population for a given period divided by population in the same period and then multiplied by 100,000.

Long tag: qog__eureg__wide1__eu__hea__sh__m__nuts1

Original tag: eu__hea__sh__m__nuts1

Description:
Number of deaths by self-harm, male. Causes of death (COD) statistics are based on information derived from the medical certificate of cause of death. COD target at the underlying cause of death, in accordance with the ICD-10 definition i.e. "the disease or injury which initiated the train of morbid events leading directly to death, or the circumstances of the accident or violence which produced the fatal injury". Expressed in deaths per 100,000 inhabitants, it is calculated as the number of deaths recorded in the population for a given period divided by population in the same period and then multiplied by 100,000.

2.8.6.37 Number of deaths by self-harm, total (eu__hea__sh__t__nuts0)

2.8.7 Science and Technology

This category provides information on employment rates in different sectors, for the total population as well as subgroups.

2.8.7.1 Employment in agriculture, fishing and mining, percent of tot. employment, female (eu_emtk_ab_f_nuts0)

Long tag: qog_eureg_wide1_eu_emtk_ab_f_nuts0

Original tag: eu_emtk_ab_f_nuts0

Description:

Female employment in agriculture, forestry and fishing; mining and quarrying, as percentage of total female employment. Data come from EU Labour force survey (LFS). Employed people are defined as persons aged 15 years and over who during the reference week performed work, even for just one hour a week, for pay, profit or family gain or were not at work but had a job or business from which they were temporarily absent because of, e.g., illness, holidays, industrial dispute and education and training. In high-tech statistics the population excludes anyone below the age of 15 or over the age of 74. The data are aggregated based on the statistical classification of economic activities in the European Community (NACE) at 2-digit level.

2.8.7.2 Employment in agriculture, fishing and mining, percent of tot. employment, female (eu_emtk_ab_f_nuts1)

Long tag: qog_eureg_wide1_eu_emtk_ab_f_nuts1

2.8.7.4 Employment in agriculture, fishing and mining, percent of tot. employment, male (eu_emtk_ab_m_nuts1)

Long tag: qog_eureg_wide1_eu_emtk_ab_m_nuts1

Original tag: eu_emtk_ab_m_nuts1

Description:

Male employment in agriculture, forestry and fishing; mining and quarrying, as percentage of total male employment. Data come from EU Labour force survey (LFS). Employed people are defined as persons aged 15 years and over who during the reference week performed work, even for just one hour a week, for pay, profit or family gain or were not at work but had a job or business from which they were temporarily absent because of, e.g., illness, holidays, industrial dispute and education and training. In high-tech statistics the population excludes anyone below the age of 15 or over the age of 74. The data are aggregated based on the statistical classification of economic activities in the European Community (NACE) at 2-digit level.

Description:

Female employment in information and communication, as percentage of total female employment. Data come from EU Labour force survey (LFS). Employed people are defined as persons aged 15 years and over who during the reference week performed work, even for just one hour a week, for pay, profit or family gain or were not at work but had a job or business from which they were temporarily absent because of, e.g., illness, holidays, industrial dispute and education and training. In high-tech statistics the population excludes anyone below the age of 15 or over the age of 74. The data are aggregated based on the statistical classification of economic activities in the European Community (NACE) at 2-digit level.

Long tag: qog_eureg_wide1_eu_emtk_n_t_nuts0

Original tag: eu_emtk_n_t_nuts0

Description:

Employment in administrative and support service activities, as percentage of total employment. Data come from EU Labour force survey (LFS). Employed people are defined as persons aged 15 years and over who during the reference week performed work, even for just one hour a week, for pay, profit or family gain or were not at work but had a job or business from which they were temporarily absent because of, e.g., illness, holidays, industrial dispute and education and training. In high-tech statistics the population excludes anyone below the age of 15 or over the age of 74. The data are aggregated based on the statistical classification of economic activities in the European Community (NACE) at 2-digit level.

Long tag: qog_eureg_wide1_eu_prd_total_t_nuts1

Original tag: eu_prd_total_t_nuts1

Description:

Total R&D employees in all sectors, full-time equivalent. R&D personnel in a statistical unit include all persons engaged directly in R&D, whether employed by the statistical unit or external contributors fully integrated into the statistical unit‘s R&D activities, as well as those providing direct services for the R&D activities

(such as R&D managers, administrators, technicians and clerical straff). Persons providing indirect support and ancillary services, such as canteen, maintenance, administrative and security staff, has been excluded, even though their wages and salaries are included in "other current costs" when measuring R&D expenditure. Further information on the concepts and definitions used for the production of R&D statistics can be found in Frascati Manual (OECD 2015).

2.8.8 Poverty and Social Exclusion

This category describes the share of the population living in or at risk of poverty.

2.8.8.1 At-risk-of-poverty rate by NUTS regions, percentage (eu_povrisk_pc_nuts0)

Long tag: qog_eureg_wide1_eu_povrisk_pc_nuts0

Original tag: eu_povrisk_pc_nuts0

Description:

Percentage of total population at-risk-of-poverty rate by NUTS 2 regions. The persons with an equivalised disposable income below the risk-of-poverty threshold, which is set at 60 percent of the national median equivalised disposable income (after social transfers).

2.8.8.2 At-risk-of-poverty rate by NUTS regions, percentage (eu_povrisk_pc_nuts1)

Long tag: qog_eureg_wide1_eu_povrisk_pc_nuts1

Original tag: eu_povrisk_pc_nuts1

Description:

Percentage of total population at-risk-of-poverty rate by NUTS 2 regions. The persons with an equivalised disposable income below the risk-of-poverty threshold, which is set at 60 percent of the national median equivalised disposable income (after social transfers).

2.8.8.3 People (0 to 59 years) in households with low work intensity, as percent (eu_lwoin_pc_nuts0)

Long tag: qog_eureg_wide1_eu_lwoin_pc_nuts0

Original tag: eu_lwoin_pc_nuts0

Description:

Population aged 0-59 living in households with very low work intensity by NUTS regions, as a percentage of total population. People living in households with very low work intensity are people aged 0-59 living in households where the adults work less than 20percent of their total work potential during the past year.

2.8.8.4 People (0 to 59 years) in households with low work intensity, percent of total pop. (eu_lwoin_pc_y_lt60_nuts0)

Long tag: qog_eureg_wide1_eu_lwoin_pc_y_lt60_nuts0

Original tag: eu_lwoin_pc_y_lt60_nuts0

Description:

Population aged 0-59 living in households with very low work intensity by NUTS regions, as a percentage of total population aged less than 60. People living in households with very low work intensity are people aged 0-59 living in households where the adults work less than 20percent of their total work potential during the past year.

2.8.8.5 People (0 to 59 years) in households with low work intensity, percent of total pop. (eu_lwoin_pc_y_lt60_nuts1)

Long tag: qog_eureg_wide1_eu_lwoin_pc_y_lt60_nuts1

Original tag: eu_lwoin_pc_y_lt60_nuts1

Description:

Population aged 0-59 living in households with very low work intensity by NUTS regions, as a percentage of total population aged less than 60. People living in households with very low work intensity are people aged 0-59 living in households where the adults work less than 20percent of their total work potential during the past year.

2.8.8.6 Severe material deprivation rate by NUTS regions, percentage (eu_matdep_pc_nuts0)

Long tag: qog_eureg_wide1_eu_matdep_pc_nuts0

Original tag: eu_matdep_pc_nuts0

Description:

Percentage of total population living in conditions of severe material deprivation by NUTS 2 regions. The collection "material deprivation" covers indicators relating to economic strain, durables, housing and environment of the dwelling. Severely materially deprived persons have living conditions severely constrained

by a lack of resources, they experience at least 4 out of 9 following deprivations items: they cannot afford i) to pay rent or utility bills, ii) keep home adequately warm, iii) face unexpected expenses, iv) eat meat, fish or a protein equivalent every second day, v) a week holiday away from home, vi) a car, vii) a washing machine, viii) a colour TV, ix) a telephone.

2.8.8.7 Severe material deprivation rate by NUTS regions, percentage (eu_matdep_pc_nuts1)

Long tag: qog_eureg_wide1_eu_matdep_pc_nuts1

Original tag: eu_matdep_pc_nuts1

Description:

Percentage of total population living in conditions of severe material deprivation by NUTS 2 regions. The collection "material deprivation" covers indicators relating to economic strain, durables, housing and environment of the dwelling. Severely materially deprived persons have living conditions severely constrained by a lack of resources, they experience at least 4 out of 9 following deprivations items: they cannot afford i) to pay rent or utility bills, ii) keep home adequately warm, iii) face unexpected expenses, iv) eat meat, fish or a protein equivalent every second day, v) a week holiday away from home, vi) a car, vii) a washing machine, viii) a colour TV, ix) a telephone.

2.8.8.8 People at risk of poverty or social exclusion by NUTS regions, percentage (eu_povr_pc_nuts0)

Long tag: qog_eureg_wide1_eu_povr_pc_nuts0

Original tag: eu_povr_pc_nuts0

Description:

People at risk of poverty or social exclusion by NUTS 2 regions, percentage of total population. Persons who are at risk of poverty or severely materially deprived or living in households with very low work intensity. Persons are only counted once even if they are present in several sub-indicators. At risk-of-poverty are persons with an equivalised disposable income below the risk-of-poverty threshold, which is set at 60 percent of the national median equivalised disposable income (after social transfers). Material deprivation covers indicators relating to economic strain and durables. Severely materially deprived persons have living conditions severely constrained by a lack of resources, they experience at least 4 out of 9 following deprivations items: cannot afford i) to pay rent or utility bills, ii) keep home adequately warm, iii) face unexpected expenses, iv) eat meat, fish or a protein equivalent every second day, v) a week holiday away from home, vi) a car, vii) a washing machine, viii) a colour TV, or ix) a telephone. People living in households with very low work intensity are those aged 0-59 living in households where the adults (aged 18-59) work less than 20percent of their total work potential during the past year.

2.8.8.9 People at risk of poverty or social exclusion by NUTS regions, percentage (eu_povr_pc_nuts1)

Long tag: qog_eureg_wide1_eu_povr_pc_nuts1

Original tag: eu_povr_pc_nuts1

Description:

People at risk of poverty or social exclusion by NUTS 2 regions, percentage of total population. Persons who are at risk of poverty or severely materially deprived or living in households with very low work intensity. Persons are only counted once even if they are present in several sub-indicators. At risk-of-poverty are persons with an equivalised disposable income below the risk-of-poverty threshold, which is set at 60 percent of the national median equivalised disposable income (after social transfers). Material deprivation covers indicators relating to economic strain and durables. Severely materially deprived persons have living conditions severely constrained by a lack of resources, they experience at least 4 out of 9 following deprivations items: cannot afford i) to pay rent or utility bills, ii) keep home adequately warm, iii) face unexpected expenses, iv) eat meat, fish or a protein equivalent every second day, v) a week holiday away from home, vi) a car, vii) a washing machine, viii) a colour TV, or ix) a telephone. People living in households with very low work intensity are those aged 0-59 living in households where the adults (aged 18-59) work less than 20percent of their total work potential during the past year.

2.8.9 Digital Society and Economy

This category includes variables related to internet use and the use of the internet for economic purposes, such as purchases or banking.

2.8.9.1 Last online purchase: between 3 and 12 months ago, percentage (eu_igs_b3_12_nuts0)

Long tag: qog_eureg_wide1_eu_igs_b3_12_nuts0

Original tag: eu_igs_b3_12_nuts0

Description:

Percentage of individuals whose last online purchase between 3 and 12 months ago. Data given in this domain are collected annually by the National Statistical Institutes and are based on Eurostat's annual model questionnaires on ICT (Information and Communication Technologies) usage in households and by individuals. The survey comprises questions at household level and individual level. The population of households consists of all private

households having at least one member in the age group 16 to 74 years. The population of individuals consists of all individuals aged 16 to 74 (on an optional basis some countries collect separate data on other age groups, individuals aged 15 years or less, aged 75 or more). Regional breakdowns have been provided on a voluntary basis for 2006 and 2007 according to NUTS1 or NUTS2 by several countries. Starting from 2008, the collection of NUTS1 breakdowns is obligatory (regional breakdowns for all countries are available) while NUTS2 breakdowns are still optional.

2.8.9.2 Last online purchase: between 3 and 12 months ago, percentage (eu_igs_b3_12_nuts1)

Long tag: qog_eureg_wide1_eu_igs_b3_12_nuts1

Original tag: eu_igs_b3_12_nuts1

Description:

Percentage of individuals whose last online purchase between 3 and 12 months ago. Net signifies that depreciation costs have been subtracted from the income presented, and regional data are adjusted to the national values by Eurostat.

2.8.11.21 Regional gross domestic product by NUTS 2 regions, million EUR (eu_mio_eur_nuts0)

Long tag: qog_eureg_wide1_eu_mio_eur_nuts0

Original tag: eu_mio_eur_nuts0

Description:

Regional gross domestic product (GDP) by NUTS 2 regions in Million euro. GDP is an indicator of the output of a country or a region. It reflects the total value of all goods and services produced less the value of goods and services used for intermediate consumption in their production. Expressing GDP in PPS (purchasing power standards) eliminates differences in price levels between countries. Calculations on a per inhabitant basis allow for the comparison of economies and regions significantly different in absolute size. GDP per inhabitant in PPS is the key variable for determining the eligibility of NUTS 2 regions in the framework of the European Union's structural policy.

2.8.11.22 Regional gross domestic product by NUTS 2 regions, million EUR (eu_mio_eur_nuts1)

Long tag: qog_eureg_wide1_eu_mio_eur_nuts1

Original tag: eu_mio_eur_nuts1

Description:

Regional gross domestic product (GDP) by NUTS 2 regions in Million euro. GDP is an indicator of the output of a country or a region. It reflects the total value of all goods and services produced less the value of goods and services used for intermediate consumption in their production. Expressing GDP in PPS (purchasing power standards) eliminates differences in price levels between countries. Calculations on a per inhabitant basis allow for the comparison of economies and regions significantly different in absolute size. GDP per inhabitant in PPS is the key variable for determining the eligibility of NUTS 2 regions in the framework of the European Union's structural policy.

2.8.11.23 Disposable income of private households by NUTS 2 regions (eu_dinc_pps_hab_nuts0)

Long tag: qog_eureg_wide1_eu_dinc_pps_hab_nuts0

Original tag: eu_dinc_pps_hab_nuts0

Description:

Disposable income of private households by NUTS 2 regions in PPS (purchasing power standards) based on final consumption per inhabitant. The disposable income of private households is the balance of primary income (operating surplus/mixed income plus compensation of employees plus property income received minus property income paid) and the redistribution of income in cash. These transactions comprise social contributions paid, social benefits in cash received, current taxes on income and wealth paid, as well as other current transfers. Disposable income does not include social transfers in kind coming from public administrations or non-profit institutions serving households. The data for NUTS 1 and NUTS 0 regions has been calculated by computing a mean of the NUTS 2 values within each region.

2.8.11.24 Disposable income of private households by NUTS 2 regions (eu_dinc_pps_hab_nuts1)

Long tag: qog_eureg_wide1_eu_dinc_pps_hab_nuts1

Original tag: eu_dinc_pps_hab_nuts1

Description:

Disposable income of private households by NUTS 2 regions in PPS (purchasing power standards) based on final consumption per inhabitant. The disposable income of private households is the balance of primary income (operating surplus/mixed income plus compensation of employees plus property income received minus property income paid) and the redistribution of income in cash. These transactions comprise social contributions paid, social benefits in cash received, current taxes on income and wealth paid, as well as other current transfers. Disposable income does not include social transfers in kind coming from public administrations or non-profit institutions serving households. The data for NUTS 1 and NUTS 0 regions has been calculated by computing a mean of the NUTS 2 values within each region.

2.8.12 Tourism

This category includes information about avaliable hotel beds as well as the number of days spent in tourist accomodation.

2.8.12.1 Number of bed-places in hotels, camping places and other (eu_tour_nstour_bedpl_nuts0)

Long tag: qog_eureg_wide1_eu_tour_nstour_bedpl_nuts0

Original tag: eu_tour_nstour_bedpl_nuts0

Description:

Number of bed-places in hotels, camping places and other. The number of bed-places in an establishment or dwelling is determined by the number of persons who can stay overnight in the beds set up in the establishment (dwelling), ignoring any extra beds that may be set up by customer request. The term bed place applies to a single bed, double beds are counted as two bed-places. The unit serves to measure the capacity of any type of accommodation. A bed place is also a place on a pitch or in a boat on a mooring to accommodate one person. One camping pitch should equal four bed-places if the actual number of bed-places is not known.

2.8.12.2 Number of bed-places in hotels, camping places and other (eu_tour_nstour_bedpl_nuts1)

Long tag: qog_eureg_wide1_eu_tour_nstour_bedpl_nuts1

Original tag: eu_tour_nstour_bedpl_nuts1

Description:

Number of bed-places in hotels, camping places and other. The number of bed-places in an establishment or dwelling is determined by the number of persons who can stay overnight in the beds set up in the establishment (dwelling), ignoring any extra beds that may be set up by customer request. The term bed place applies to a single bed, double beds are counted as two bed-places. The unit serves to measure the capacity of any type of accommodation. A bed place is also a place on a pitch or in a boat on a mooring to accommodate one person. One camping pitch should equal four bed-places if the actual number of bed-places is not known.

2.8.12.3 Number of establishments in hotels, camping places and other (eu_tour_nstour_estbl_nuts0)

Long tag: qog_eureg_wide1_eu_tour_nstour_estbl_nuts0

Original tag: eu_tour_nstour_estbl_nuts0

Description:

Number of establishments in hotels, camping places and other. A tourist accommodation establishment is defined as any facility that regularly or occasionally provides short-term accommodation for tourists as a paid service (although the price might be partially or fully subsidised). Data is reported at the level of a local kind-of-activity unit. The local unit is an enterprise or part thereof situated in a geographically identified place. At or from this place economic activity is carried out for which - save for certain exceptions - one or more persons

work (even if only part-time) for one and the same enterprise. The accommodation establishment conforms to the definition of local unit as the production unit. This is irrespective of whether the accommodation of tourists is the main or secondary activity. This means that all establishments are classified in the accommodation sector if their capacity exceeds the national minimum even if the major part of turnover may come from restaurant or other services.

2.8.12.4 Number of establishments in hotels, camping places and other (eu_tour_nstour_estbl_nuts1)

Long tag: qog_eureg_wide1_eu_tour_nstour_estbl_nuts1

Original tag: eu_tour_nstour_estbl_nuts1

2.8.12.5 Net occupancy rate of bed-places in hotels and similar (eu_tour_bedpl_nuts0)

Long tag: qog_eureg_wide1_eu_tour_bedpl_nuts0

Original tag: eu_tour_bedpl_nuts0

Description:

Net occupancy rate of bed-places in hotels and similar. The occupancy rate of bed-places in reference period is obtained by dividing the total number of overnight stays by the number of the bed-places on offer (excluding extra beds) and the number of days when the bed-places are actually available for use (net of seasonal closures and other temporary closures for decoration, by police order, etc.). The result is multiplied by 100 to express the occupancy rate as a percentage. From reference period 2012 onwards, tourism occupancy statistics consist of harmonised data collected by the Member States in the frame of the Regulation (EU) 692/2011 of the European Parliament and of the Council. Up to reference period 2011, tourism occupancy statistics consist of harmonised data collected by the Member States in the frame of the Council Directive on tourism statistics 95/57/EC .

2.8.12.6 Net occupancy rate of bed-places in hotels and similar (eu_tour_bedpl_nuts1)

Long tag: qog_eureg_wide1_eu_tour_bedpl_nuts1

Original tag: eu_tour_bedpl_nuts1

Description:

Net occupancy rate of bed-places in hotels and similar. 2.8.12.9 Number of nights spent at camping grounds, recreational vehicle and trailer park (eu_tour_nscamp_nuts0)

Long tag: qog_eureg_wide1_eu_tour_nscamp_nuts0

Original tag: eu_tour_nscamp_nuts0

Description:
Number of nights spent at camping grounds, recreational vehicle parks and trailer parks. A night spent (or overnight stay) is each night a guest / tourist (resident or non-resident) actually spends (sleeps or stays) in a tourist accommodation establishment or non-rented accommodation. Normally the date of arrival is different from the date of departure but persons arriving after midnight and leaving on the same day are included in overnight stays. A person should not be registered in two or more accommodation establishments at the same time. From reference period 2012 onwards, tourism occupancy statistics consist of harmonised data collected by the Member States in the frame of the Regulation (EU) 692/2011 of the European Parliament and of the Council. Up to reference period 2011, tourism occupancy statistics consist of harmonised data collected by the Member States in the frame of the Council Directive on tourism statistics 95/57/EC .

2.8.12.10 Number of nights spent at camping grounds, recreational vehicle and trailer park (eu_tour_nscamp_nuts1)

Long tag: qog_eureg_wide1_eu_tour_nscamp_nuts1

Original tag: eu_tour_nscamp_nuts1

2.8.13 Transport

This category provides information on the means of transportation used as well as available vehicles and the road infrastructure.

2.8.13.1 Injured victims in road accidents, per million inhabitants (eu_rac_inj_nuts0)

Long tag: qog_eureg_wide1_eu_rac_inj_nuts0

Original tag: eu_rac_inj_nuts0

Description:
Injured victims in road accidents, per million inhabitants. It includes any person who as result of an injury accident was not killed immediately or not dying within 30 days, but sustained an injury, normally needing medical treatment, excluding attempted suicides. Persons with lesser wounds, such as minor cuts and bruises are not normally recorded as injured. An injured person is excluded if the competent authority declares the cause of the injury to be attempted suicide by that person, i.e. a deliberate act to injure oneself resulting in injury, but not in death.

2.8.13.2 Injured victims in road accidents, per million inhabitants (eu_rac_inj_nuts1)

Long tag: qog_eureg_wide1_eu_rac_inj_nuts1

Original tag: eu_rac_inj_nuts1

Description:

2.8.13.3 Killed victims in road accidents, per million inhabitants (eu_rac_kil_nuts0)

Long tag: qog_eureg_wide1_eu_rac_kil_nuts0

Original tag: eu_rac_kil_nuts0

Description:
Killed victims in road accidents, per million inhabitants. It includes any person killed immediately or dying within 30 days as a result of an injury accident, excluding suicides. A killed person is excluded if the competent authority declares the cause of death to be suicide, i.e. a deliberate act to injure oneself resulting in death. For countries that do not apply the threshold of 30 days, conversion coefficients are estimated so that comparisons on the basis of the 30 day-definition can be made.

2.8.13.4 Killed victims in road accidents, per million inhabitants (eu_rac_kil_nuts1)

Long tag: qog_eureg_wide1_eu_rac_kil_nuts1

Original tag: eu_rac_kil_nuts1

Maritime transport of passengers embarked and disembarked in thousand passengers. The maritime transport regional data have been calculated using data collected at the port level in the frame of Council Directive 2009/42/EC (6.5.2009). They are aggregated at regional level (NUTS 1 and NUTS 2) and also at national level (NUTS0), excluding double counting within each region.

2.8.13.24 Maritime transport of passengers embarked and disembarked, in thousand passengers (eu_mtp_pas_nuts1)

Long tag: qog_eureg_wide1_eu_mtp_pas_nuts1

Original tag: eu_mtp_pas_nuts1

Description:
Maritime transport of passengers embarked and disembarked in thousand passengers. The maritime transport regional data have been calculated using data collected at the port level in the frame of Council Directive 2009/42/EC (6.5.2009). They are aggregated at regional level (NUTS 1 and NUTS 2) and also at national level (NUTS0), excluding double counting within each region.

2.8.13.25 Maritime transport of passengers, in thousand passengers (eu_mtp_pas_demb_nuts0)

Long tag: qog_eureg_wide1_eu_mtp_pas_demb_nuts0

Original tag: eu_mtp_pas_demb_nuts0

Description:
Maritime transport of passengers disembarked in thousand passengers. The maritime transport regional data have been calculated using data collected at the port level in the frame of Council Directive 2009/42/EC (6.5.2009). They are aggregated at regional level (NUTS 1 and NUTS 2) and also at national level (NUTS0), excluding double counting within each region.

2.8.13.26 Maritime transport of passengers, in thousand passengers (eu_mtp_pas_demb_nuts1)

Long tag: qog_eureg_wide1_eu_mtp_pas_demb_nuts1

Original tag: eu_mtp_pas_demb_nuts1

Description:
Maritime transport of passengers disembarked in thousand passengers. The maritime transport regional data have been calculated using data collected at the port level in the frame of Council Directive 2009/42/EC (6.5.2009). They are aggregated at regional level (NUTS 1 and NUTS 2) and also at national level (NUTS0), excluding double counting within each region.

2.8.13.27 Maritime transport of passengers disembarked, in thousand passengers (eu_mtp_pas_emb_nuts0)

Long tag: qog_eureg_wide1_eu_mtp_pas_emb_nuts0

Original tag: eu_mtp_pas_emb_nuts0

Description:

Maritime transport of passengers embarked in thousand passengers. The maritime transport regional data have been calculated using data collected at the port level in the frame of Council Directive 2009/42/EC (6.5.2009). 2.8.13.29 Navigable canals, in kilometers (eu_troad_cnl_nuts0)

Long tag: qog_eureg_wide1_eu_troad_cnl_nuts0

Original tag: eu_troad_cnl_nuts0

Description:

Navigable canal – waterway built primarily for navigation.

2.8.13.30 Navigable canals, in kilometers (eu_troad_cnl_nuts1)

Long tag: qog_eureg_wide1_eu_troad_cnl_nuts1

Original tag: eu_troad_cnl_nuts1

Description:

Navigable canal – waterway built primarily for navigation.

2.8.13.31 Navigable canals, in kilometers (eu_troad_mway_nuts0)

Long tag: qog_eureg_wide1_eu_troad_mway_nuts0

Original tag: eu_troad_mway_nuts0

Description:

Motorway / freeway – road, specially designed and built for motor traffic, which does not serve properties bordering on it, and which: i) is provided, except at special points or temporarily, with separate carriageways for traffic in two directions, separated from each other, either by a dividing strip not intended for traffic, or exceptionally by other means; ii) has no crossings at the same level with any road, railway or tramway track, or footpath; and iii) is especially sign-posted as a motorway and is reserved for specific categories of road motor vehicles.

2.8.13.32 Navigable canals, in kilometers (eu_troad_mway_nuts1)

Long tag: qog_eureg_wide1_eu_troad_mway_nuts1

Original tag: eu_troad_mway_nuts1

Description:

Motorway / freeway – road, specially designed and built for motor traffic, which does not serve properties bordering on it, and which: i) is provided, except at special points or temporarily, with separate carriageways for traffic in two directions, separated from each other, either by a dividing strip not intended for traffic, or exceptionally by other means; ii) has no crossings at the same level with any road, railway or tramway track, or footpath; and iii) is especially sign-posted as a motorway and is reserved for specific categories of road motor vehicles.

2.8.13.33 Motorways, in kilometers (eu_troad_rd_oth_nuts0)

Long tag: qog_eureg_wide1_eu_troad_rd_oth_nuts0

Original tag: eu_troad_rd_oth_nuts0

Description:

Other roads, in kilometers.

2.8.13.34 Motorways, in kilometers (eu_troad_rd_oth_nuts1)

Long tag: qog_eureg_wide1_eu_troad_rd_oth_nuts1

Original tag: eu_troad_rd_oth_nuts1

Description:
Other roads, in kilometers.

2.8.13.35 Other roads, in kilometers (eu_troad_riv_nuts0)

Long tag: qog_eureg_wide1_eu_troad_riv_nuts0

Original tag: eu_troad_riv_nuts0

Description:
Navigable river – natural waterway open for navigation, irrespective of whether it has been improved for that purpose.

2.8.13.36 Other roads, in kilometers (eu_troad_riv_nuts1)

Long tag: qog_eureg_wide1_eu_troad_riv_nuts1

Original tag: eu_troad_riv_nuts1

Description:
Navigable river – natural waterway open for navigation, irrespective of whether it has been improved for that purpose.

2.8.13.37 Navigable rivers, in kilometers (eu_troad_rl_nuts0)

Long tag: qog_eureg_wide1_eu_troad_rl_nuts0

Original tag: eu_troad_rl_nuts0

Description:
Railway line – line of communication made up by rail exclusively for the use of railway vehicles. Line of communication is an area equipped for the performance of rail transport.

2.8.13.38 Navigable rivers, in kilometers (eu_troad_rl_nuts1)

Long tag: qog_eureg_wide1_eu_troad_rl_nuts1

Original tag: eu_troad_rl_nuts1

Description:
Railway line – line of communication made up by rail exclusively for the use of railway vehicles. Line of communication is an area equipped for the performance of rail transport.

2.8.13.39 Total railway lines, in kilometers (eu_troad_rl_elc_nuts0)

Long tag: qog_eureg_wide1_eu_troad_rl_elc_nuts0

Original tag: eu_troad_rl_elc_nuts0

Description:
Electrified railway lines in kilometers.

2.8.13.40 Total railway lines, in kilometers (eu_troad_rl_elc_nuts1)

Long tag: qog_eureg_wide1_eu_troad_rl_elc_nuts1

Original tag: eu_troad_rl_elc_nuts1

Description:
Electrified railway lines in kilometers.

2.8.13.41 Electrified railway lines, in kilometers (eu_troad_rl_tge2_nuts0)

Long tag: qog_eureg_wide1_eu_troad_rl_tge2_nuts0

Original tag: eu_troad_rl_tge2_nuts0

Description:
Railway lines with double and more tracks in kilometers.

2.8.13.42 Electrified railway lines, in kilometers (eu_troad_rl_tge2_nuts1)

Long tag: qog_eureg_wide1_eu_troad_rl_tge2_nuts1

Original tag: eu_troad_rl_tge2_nuts1

Description:
Railway lines with double and more tracks in kilometers.

2.8.13.43 Total number of motor coaches, buses and trolley buses (eu_vs_bus_tot_nuts0)

Long tag: qog_eureg_wide1_eu_vs_bus_tot_nuts0

Original tag: eu_vs_bus_tot_nuts0

Description:
Total number of motor coaches, buses and trolley buses. Motor coach is passenger road motor vehicle designed to seat 24 or more persons (including the driver) and constructed exclusively for the carriage of seated passengers.

Bus is defined as passenger road motor vehicle designed to carry more than 24 persons (including the driver), and with provision to carry seated as well as standing passengers. Trolleybus is passenger road vehicle designed to seat more than nine persons (including the driver), which is connected to electric conductors and which is not rail-borne. This term covers vehicles which may be used either as trolleybuses or as buses, if they have a motor independent of the main electric power supply.

2.8.13.44 Total number of motor coaches, buses and trolley buses (eu_vs_bus_tot_nuts1)

Long tag: qog_eureg_wide1_eu_vs_bus_tot_nuts1

Original tag: eu_vs_bus_tot_nuts1

Description:

Total number of motor coaches, buses and trolley buses. Motor coach is passenger road motor vehicle designed to seat 24 or more persons (including the driver) and constructed exclusively for the carriage of seated passengers. Bus is defined as passenger road motor vehicle designed to carry more than 24 persons (including the driver), and with provision to carry seated as well as standing passengers. Trolleybus is passenger road vehicle designed to seat more than nine persons (including the driver), which is connected to electric conductors and which is not rail-borne. This term covers vehicles which may be used either as trolleybuses or as buses, if they have a motor independent of the main electric power supply.

2.8.13.45 Total number of motor coaches, buses and trolley buses (eu_vs_car_nuts0)

Long tag: qog_eureg_wide1_eu_vs_car_nuts0

Original tag: eu_vs_car_nuts0

Description:

Total number of passenger cars. Passenger car is a road motor vehicle, other than a moped or a motor cycle, intended for the carriage of passengers and designed to seat no more than nine persons (including the driver). Included are: passenger cars, vans designed and used primarily for transport of passengers, taxis, hire cars, ambulances, motor homes. Excluded are light goods road vehicles, as well as motor-coaches and buses, and mini-buses/mini-coaches. "Passenger car" includes micro cars (needing no permit to be driven), taxis and passenger hire cars, provided that they have fewer than ten seats.

2.8.13.46 Total number of motor coaches, buses and trolley buses (eu_vs_car_nuts1)

Long tag: qog_eureg_wide1_eu_vs_car_nuts1

Original tag: eu_vs_car_nuts1

Description:

Total number of passenger cars. Passenger car is a road motor vehicle, other than a moped or a motor cycle, intended for the carriage of passengers and designed to seat no more than nine persons (including the driver). Included are: passenger cars, vans designed and used primarily for transport of passengers, taxis, hire cars, ambulances, motor homes. Excluded are light goods road vehicles, as well as motor-coaches and buses, and mini-buses/mini-coaches. "Passenger car" includes micro cars (needing no permit to be driven), taxis and passenger hire cars, provided that they have fewer than ten seats.

2.8.13.47 Total number of passenger cars (eu_vs_lor_nuts0)

Long tag: qog_eureg_wide1_eu_vs_lor_nuts0

Original tag: eu_vs_lor_nuts0

Description:

Total number of lorries. Lorry / truck is rigid road motor vehicle designed, exclusively or primarily, to carry goods.

2.8.13.48 Total number of passenger cars (eu_vs_lor_nuts1)

Long tag: qog_eureg_wide1_eu_vs_lor_nuts1

Original tag: eu_vs_lor_nuts1

Description:

Total number of lorries. Lorry / truck is rigid road motor vehicle designed, exclusively or primarily, to carry goods.

2.8.13.49 Total number of lorries (eu_vs_moto_nuts0)

Long tag: qog_eureg_wide1_eu_vs_moto_nuts0

Original tag: eu_vs_moto_nuts0

Description:

Total number of motorcycles. Motorcycle is defined as two-, three- or four-wheeled road motor vehicle not exceeding 400 kg (900 lb) of unladen weight. All such vehicles with a cylinder capacity of 50 cc or over are included, as are those under 50 cc which do not meet the definition of moped.

2.8.13.50 Total number of lorries (eu_vs_moto_nuts1)

Long tag: qog_eureg_wide1_eu_vs_moto_nuts1

Original tag: eu_vs_moto_nuts1

Description:

Total number of motorcycles. Motorcycle is defined as two-, three- or four-wheeled road motor vehicle not exceeding 400 kg (900 lb) of unladen weight. All such vehicles with a cylinder capacity of 50 cc or over are included, as are those under 50 cc which do not meet the definition of moped.

2.8.13.51 Total number of motorcycles (eu_vs_spe_nuts0)

Long tag: qog_eureg_wide1_eu_vs_spe_nuts0

Original tag: eu_vs_spe_nuts0

Description:

Total number of special vehicles. Special purpose road motor vehicle is road motor vehicle designed for purposes other than the carriage of passengers or goods. This category includes: fire brigade vehicles, mobile cranes, self-propelled rollers, bulldozers with metallic wheels or track, vehicles for recording film, radio and TV broadcasting, mobile library vehicles, towing vehicles for vehicles in need of repair, other special purpose road motor vehicles.

2.8.13.52 Total number of motorcycles (eu_vs_spe_nuts1)

Long tag: qog_eureg_wide1_eu_vs_spe_nuts1

Original tag: eu_vs_spe_nuts1

Description:

Total number of special vehicles. Special purpose road motor vehicle is road motor vehicle designed for purposes other than the carriage of passengers or goods. This category includes: fire brigade vehicles, mobile cranes, self-propelled rollers, bulldozers with metallic wheels or track, vehicles for recording film, radio and TV broadcasting, mobile library vehicles, towing vehicles for vehicles in need of repair, other special purpose road motor vehicles.

2.8.13.53 Total number of special vehicles (eu_vs_tot_x_tm_nuts0)

Long tag: qog_eureg_wide1_eu_vs_tot_x_tm_nuts0

Original tag: eu_vs_tot_x_tm_nuts0

Description:

Total number of all vehicles except trailers and motorcycles.

2.8.13.54 Total number of special vehicles (eu_vs_tot_x_tm_nuts1)

Long tag: qog_eureg_wide1_eu_vs_tot_x_tm_nuts1

Original tag: eu_vs_tot_x_tm_nuts1

Description:

Total number of all vehicles except trailers and motorcycles.

2.8.13.55 Total number of all vehicles (except trailers and motorcycles) (eu_vs_trc_nuts0)

Long tag: qog_eureg_wide1_eu_vs_trc_nuts0

Original tag: eu_vs_trc_nuts0

Description:

Total number of road tractors. Road tractor is road motor vehicle designed, exclusively or primarily, to haul other road vehicles which are not power-driven (mainly semi-trailers). Agricultural tractors are excluded.

2.8.13.56 Total number of all vehicles (except trailers and motorcycles) (eu_vs_trc_nuts1)

Long tag: qog_eureg_wide1_eu_vs_trc_nuts1

Original tag: eu_vs_trc_nuts1

Description:

Total number of road tractors. Road tractor is road motor vehicle designed, exclusively or primarily, to haul other road vehicles which are not power-driven (mainly semi-trailers). Agricultural tractors are excluded.

2.8.13.57 Total number of road tractors (eu_vs_trl_strl_nuts0)

Long tag: qog_eureg_wide1_eu_vs_trl_strl_nuts0

Original tag: eu_vs_trl_strl_nuts0

Description:

Total number of trailers and semi-trailers. Trailer is goods road vehicle designed to be hauled by a road motor vehicle. This category excludes agricultural trailers and caravans. Semi-trailer describes goods road vehicle with no front axle designed in such way that part of the vehicle and a substantial part of its loaded weight rests on a road tractor.

2.8.13.58 Total number of road tractors (eu_vs_trl_strl_nuts1)

Long tag: qog_eureg_wide1_eu_vs_trl_strl_nuts1

Original tag: eu_vs_trl_strl_nuts1

Description:

Total number of trailers and semi-trailers. Trailer is goods road vehicle designed to be hauled by a road motor vehicle. This category excludes agricultural trailers and caravans. Semi-trailer describes goods road vehicle with no front axle designed in such way that part of the vehicle and a substantial part of its loaded weight rests on a road tractor.

2.8.13.59 Total number of trailers and semi-trailers (eu_vs_utl_nuts0)

Long tag: qog_eureg_wide1_eu_vs_utl_nuts0

Original tag: eu_vs_utl_nuts0

Description:

Total number of total utility vehicles.

2.8.13.60 Total number of trailers and semi-trailers (eu_vs_utl_nuts1)

Long tag: qog_eureg_wide1_eu_vs_utl_nuts1

Original tag: eu_vs_utl_nuts1

Description:

Total number of total utility vehicles.

2.9 QoG EU Regional Dataset Wide Data (NUTS 2)

Dataset tag: qog_eureg_wide2

Description: The QoG EU Regional dataset is a dataset consisting of more than 300 variables covering three levels of European regions - Nomenclature of Territorial Units for Statistics (NUTS): NUTS0 (country), NUTS1(major socio-economic regions) and NUTS2 (basic regions for the application of regional policies).

The QoG Regional Data is presented in three different forms available in separate datasets. The variable are the same across all three dataset besides a varying suffix (_nuts0, _nuts1, _nuts2) indication which NUTS level is represented. All datasets are available in time-series format. The first one (The QoG Regional Data - Long Form) is a dataset where data is presented in the long form. The list of units of analysis contains regions of all NUTS levels.
Two other datasets are presented in the wide form for multilevel analysis. In the second dataset (The QoG Regional Data - Wide Form NUTS1) includes NUTS1 level as the unit of analysis and variables represent the values for this level and corresponding lower level – NUTS0. As an example, in this dataset the data is presented only for East Sweden(Ostra Sverige SE1), as a unit of analysis and has values for lower levels of this region - Sweden (SE).
In the third dataset (The QoG Regional Data - Wide Form NUTS2) the unit of analysis is NUTS2 level regions and variables provide values as for every unit of analysis, as well as for corresponding lower NUTS levels: NUTS1 and NUTS0. One example of unit of analysis in this dataset is Stockholm (SE11) and data for every variable will be for Stockholm, as well as for lower level regions - East Sweden (Ostra Sverige SE1) and Sweden (SE).

Dataset citation: When using QoG EU Regional data, make sure to cite both the original source and our publication:
Charron, Nicholas, Stefan Dahlberg, Aksel Sundström, Sören Holmberg, Bo Rothstein, Natalia Alvarado Pachon Cem Mert Dalli. 2020. The Quality of Government EU Regional Dataset, version Nov20. University of Gothenburg: The Quality of Government Institute, https://www.gu.se/en/quality-government

License: The QoG datasets are open and available, free of charge and without a need to register your data. You can use them for your analysis, graphs, teaching, and other academic-related and non-commercial purposes. We ask our users to cite always the original source(s) of the data and our datasets.

We do not allow other uses of these data including but not limited to redistribution, commercialization and other for-profit usage. If a user is interested in such use or has doubts about the license, they will have to refer to the original source and check with them if this is allowed and what requirements they need to fulfill.

Be mindful that the original data sources are the only owners of their data and they can adjust their license without previous warning.

More detailed information on the dataset can be found at the following web page: `https://www.gu.se/en/quality-government/qog-data/data-downloads/eu-regional-dataset`

2.9.1 Identification

Identification variables in the dataset.

2.9.1.1 NUTS code of region (region_code)

Long tag: qog_eureg_wide2_region_code

Original tag: region_code

Description:
Numerical code of the region to which the observation belongs. The Nomenclature of Territorial Units for Statistics, (NUTS), is a geocode standard for referencing the administrative divisions of countries for statistical purposes.

2.9.1.2 Name of the region (region_name)

Long tag: qog_eureg_wide2_region_name

Original tag: region_name

Description:
Name of the region in English.

2.9.1.3 Year (year)

Long tag: qog_eureg_wide2_year

Original tag: year

Description:
Year of observation. If you are using data from previous waves (2010, 2013 and 2017), please also check "Suggestion Citation for Previous Waves".

2.9.1.4 Code of NUTS0 level region (nuts0)

Long tag: qog_eureg_wide2_nuts0

Original tag: nuts0

Description:
Code of NUTS0 level region to which the observation belongs. The Nomenclature of Territorial Units for Statistics, (NUTS), is a geocode standard for referencing the administrative divisions of countries for statistical purposes. NUTS 0: country level.

2.9.1.5 Code of NUTS2 level region (nuts2)

Long tag: qog_eureg_wide2_nuts2

Original tag: nuts2

Description:
Code of NUTS2 level region to which the observation belongs. The Nomenclature of Territorial Units for Statistics, (NUTS), is a geocode standard for referencing the administrative divisions of countries for statistical purposes. NUTS 2: basic regions for the application of regional policies.

2.9.1.6 The Nomenclature of Territorial Units for Statistics (NUTS) level (nuts_level)

Long tag: qog_eureg_wide2_nuts_level

Original tag: NA

Description:
To what level of NUTS belong observation. The Nomenclature of Territorial Units for Statistics, (NUTS), is a geocode standard for referencing the administrative divisions of countries for statistical purposes.
(0) Country level
(1) Major socio-economic regions
(2) Basic regions for the application of regional policies

2.9.2 Quality of Government

This category includes variables that are the core features of QoG (impartiality, bureaucratic quality and corruption) as well as measures that are broader (rule of law and transparency).

2.9.2.1 Number of awarded contracts above 130,000 EUR (cri_contr_nuts0)

Long tag: qog_eureg_wide2_cri_contr_nuts0

Original tag: cri_contr_nuts0

Description:
Number of successfully awarded contracts within tenders published on TED above 130k EUR threshold.

2.9.2.2 Number of awarded contracts above 130,000 EUR (cri_contr_nuts2)

Long tag: qog_eureg_wide2_cri_contr_nuts2

Original tag: cri_contr_nuts2

Description:
Number of successfully awarded contracts within tenders published on TED above 130k EUR threshold.

2.9.2.3 Final value of awarded tenders of over 130,000 EUR (cri_cvalue_nuts0)

Long tag: qog_eureg_wide2_cri_cvalue_nuts0

Original tag: cri_cvalue_nuts0

Description:

Sum of the final value of successfully awarded tenders published on TED above 130k EUR threshold.

2.9.2.4 Final value of awarded tenders of over 130,000 EUR (cri_cvalue_nuts2)

Long tag: qog_eureg_wide2_cri_cvalue_nuts2

Original tag: cri_cvalue_nuts2

Description:

Sum of the final value of successfully awarded tenders published on TED above 130k EUR threshold.

2.9.2.5 Share of contracts with only one bid in total (cri_singleb_nuts0)

Long tag: qog_eureg_wide2_cri_singleb_nuts0

Original tag: cri_singleb_nuts0

Description:

Share of contracts with only one bid in total.

2.9.2.6 Share of contracts with only one bid in total (cri_singleb_nuts2)

Long tag: qog_eureg_wide2_cri_singleb_nuts2

Original tag: cri_singleb_nuts2

Description:

Share of contracts with only one bid in total.

2.9.2.7 Share of contracts with no published call for tender red flag (cri_nocall_nuts0)

Long tag: qog_eureg_wide2_cri_nocall_nuts0

Original tag: cri_nocall_nuts0

Description:

Share of contracts with “no published call for tender” red flag. Contract is considered to have “no call for tender” red flag if two conditions are met: i) sum of prior information notices and contract notices equals 0 and ii) country of a buyer is not on the list of countries in which “no call for tender publication” is not a risk factor. These countries are BG, DK, EE, ES, LT.

2.9.2.8 Share of contracts with no published call for tender red flag (cri_nocall_nuts2)

Long tag: qog_eureg_wide2_cri_nocall_nuts2

Original tag: cri_nocall_nuts2

Description:

Share of contracts with “no published call for tender” red flag. Contract is considered to have “no call for tender” red flag if two conditions are met: i) sum of prior information notices and contract notices equals 0 and ii) country of a buyer is not on the list of countries in which “no call for tender publication” is not a risk factor. These countries are BG, DK, EE, ES, LT.

2.9.2.9 Share of contracts with non-open procedure red flag (cri_nonopen_nuts0)

Long tag: qog_eureg_wide2_cri_nonopen_nuts0

Original tag: cri_nonopen_nuts0

Description:

Share of contracts with “non-open procedure” red flag. Whether procedure is considered non-open depends on procedure type as well as specific country regulation. Please refer to the “Non-open procedure details” sheet to search for country-procedure combinations.

2.9.2.10 Share of contracts with non-open procedure red flag (cri_nonopen_nuts2)

Long tag: qog_eureg_wide2_cri_nonopen_nuts2

Original tag: cri_nonopen_nuts2

Description:

Share of contracts with “non-open procedure” red flag. Whether procedure is considered non-open depends on procedure type as well as specific country regulation. Please refer to the “Non-open procedure details” sheet to search for country-procedure combinations.

2.9.2.11 Share of contracts with tax haven red flag (cri_taxhav_nuts0)

Long tag: qog_eureg_wide2_cri_taxhav_nuts0

Original tag: cri_taxhav_nuts0

Description:
Share of contracts with “tax haven” red flag. Contract has “tax haven” red flag in case two conditions are met: i) buyer and supplier are from different countries and ii) according to Financial Secrecy Index (https://www.financialsecrecyindex.com/en/) supplier country was classified as tax haven.

2.9.2.12 Share of contracts with tax haven red flag (cri_taxhav_nuts2)

Long tag: qog_eureg_wide2_cri_taxhav_nuts2

Original tag: cri_taxhav_nuts2

Description:
Share of contracts with “tax haven” red flag. Contract has “tax haven” red flag in case two conditions are met: i) buyer and supplier are from different countries and ii) according to Financial Secrecy Index (https://www.financialsecrecyindex.com/en/) supplier country was classified as tax haven.

2.9.2.13 EQI Index Score (eqi_score_nuts0)

Long tag: qog_eureg_wide2_eqi_score_nuts0

Original tag: eqi_score_nuts0

Description:
Final score of European Quality Index (centered around WGI), all units. Detailed information on its calculation method and indicators used for this aggregation can be found in "European Quality of Government Index 2017 Codebook".

2.9.2.14 EQI Index Score (eqi_score_nuts2)

Long tag: qog_eureg_wide2_eqi_score_nuts2

Original tag: eqi_score_nuts2

Description:
Final score of European Quality Index (centered around WGI), all units. Detailed information on its calculation method and indicators used for this aggregation can be found in "European Quality of Government Index 2017 Codebook".

2.9.2.15 Quality pillar, country centered and z-score standardized (eqi_zquality_nuts0)

Long tag: qog_eureg_wide2_eqi_zquality_nuts0

Original tag: eqi_zquality_nuts0

Description:
EQI quality pillar, country centered and z-score standardized. For its calculation, they aggregate the individual scores (‘survey question’) to the corresponding regional level, so that each of question on the quality of public services is now a regional ‘indicator’. After normalizing each of quality indicators (through z-score standardization) so that they share a common range, the quality indicators are aggregated into ’quality pillar’.

2.9.2.16 Quality pillar, country centered and z-score standardized (eqi_zquality_nuts2)

Long tag: qog_eureg_wide2_eqi_zquality_nuts2

Original tag: eqi_zquality_nuts2

Description:
EQI quality pillar, country centered and z-score standardized. For its calculation, they aggregate the individual scores (‘survey question’) to the corresponding regional level, so that each of question on the quality of public services is now a regional ‘indicator’. After normalizing each of quality indicators (through z-score standardization) so that they share a common range, the quality indicators are aggregated into ’quality pillar’.

2.9.2.17 Impartiality pillar, country centered and z-score standardized (eqi_zimpartiality_nuts0)

Long tag: qog_eureg_wide2_eqi_zimpartiality_nuts0

Original tag: eqi_zimpartiality_nuts0

Description:
EQI impartiality pillar, country centered and z-score standardized. For its calculation, they aggregate the individual scores (‘survey question’) to the corresponding regional level, so that each of question assessing impartiality in the provision of public services is now a regional ‘indicator’. After normalizing each of impartiality indicators (through z-score standardization) so that they share a common range, the impartiality indicators are aggregated into ’impartiality pillar’.

2.9.2.18 Impartiality pillar, country centered and z-score standardized (eqi_zimpartiality_nuts2)

Long tag: qog_eureg_wide2_eqi_zimpartiality_nuts2

Original tag: eqi_zimpartiality_nuts2

Description:
EQI impartiality pillar, country centered and z-score standardized. For its calculation, they aggregate the individual scores ('survey question') to the corresponding regional level, so that each of question assessing impartiality in the provision of public services is now a regional 'indicator'. After normalizing each of impartiality indicators (through z-score standardization) so that they share a common range, the impartiality indicators are aggregated into 'impartiality pillar'.

2.9.2.19 Corruption pillar, country centered and z-score standardized (eqi_zcorruption_nuts0)

Long tag: qog_eureg_wide2_eqi_zcorruption_nuts0

Original tag: eqi_zcorruption_nuts0

Description:
EQI corruption pillar, country centered and z-score standardized. For its calculation, they aggregate the individual scores ('survey question') to the corresponding regional level, so that each of question assessing corruption in the provision of public services is now a regional 'indicator'. After normalizing each of corruption indicators (through z-score standardization) so that they share a common range, the corruption indicators are aggregated into two sub-pillars, called 'experience' and 'perceptions. They respectively represent question items reflecting personal experience with petty corruption versus perception of corruption in various other areas. These two sub-pillars are aggregated using equal weighting.

2.9.2.20 Corruption pillar, country centered and z-score standardized (eqi_zcorruption_nuts2)

Long tag: qog_eureg_wide2_eqi_zcorruption_nuts2

Original tag: eqi_zcorruption_nuts2

Description:
EQI corruption pillar, country centered and z-score standardized. For its calculation, they aggregate the individual scores ('survey question') to the corresponding regional level, so that each of question assessing corruption in the provision of public services is now a regional 'indicator'. After normalizing each of corruption indicators (through z-score standardization) so that they share a common range, the corruption indicators are aggregated into two sub-pillars, called 'experience' and 'perceptions. They respectively represent question items reflecting personal experience with petty corruption versus perception of corruption in various other areas. These two sub-pillars are aggregated using equal weighting.

2.9.2.21 Corruption perceptions index (corruption sub-pillar) z-score stand. (2017 only) (eqi_zcorruptper_nuts2)

Long tag: qog_eureg_wide2_eqi_zcorruptper_nuts2

Original tag: eqi_zcorruptper_nuts2

Description:
EQI corruption perceptions index, z-score standardized. It constitutes one of the sub-pillars of corruption pillar.

2.9.2.22 Corruption experiences index (corruption sub-pillar) z-score stand. (2017 only) (eqi_zcorruptexp_nuts2)

Long tag: qog_eureg_wide2_eqi_zcorruptexp_nuts2

Original tag: eqi_zcorruptexp_nuts2

Description:
EQI corruption experiences index, z-score standardized. It constitutes one of the sub-pillars of corruption pillar.

2.9.2.23 EQI index, min-max (0-100) standardized (eqi_norm_eqi_nuts0)

Long tag: qog_eureg_wide2_eqi_norm_eqi_nuts0

Original tag: eqi_norm_eqi_nuts0

Description:
EQI index, min-max (0-100) standardized. Detailed information on its calculation method and indicators used for this aggregation can be found in "European Quality of Government Index 2017 Codebook".

2.9.2.24 EQI index, min-max (0-100) standardized (eqi_norm_eqi_nuts2)

Long tag: qog_eureg_wide2_eqi_norm_eqi_nuts2

Original tag: eqi_norm_eqi_nuts2

Description:
EQI index, min-max (0-100) standardized. Detailed information on its calculation method and indicators used for this aggregation can be found in "European Quality of Government Index 2017 Codebook".

2.9.2.25 Quality pillar, country centered and min-max (0-100) standardized (eqi_norm_qual_nuts0)

Long tag: qog_eureg_wide2_eqi_norm_qual_nuts0

Original tag: eqi_norm_qual_nuts0

Description:
Quality pillar, country centered and min-max (0-100) standardized.

2.9.2.26 Quality pillar, country centered and min-max (0-100) standardized (eqi_norm_qual_nuts2)

Long tag: qog_eureg_wide2_eqi_norm_qual_nuts2

Original tag: eqi_norm_qual_nuts2

Description:
Quality pillar, country centered and min-max (0-100) standardized.

2.9.2.27 Impartiality pillar, country centered and min-max (0-100) standardized (eqi_norm_impart_nuts0)

Long tag: qog_eureg_wide2_eqi_norm_impart_nuts0

Original tag: eqi_norm_impart_nuts0

Description:
Impartiality pillar, country centered and min-max (0-100) standardized.

2.9.2.28 Impartiality pillar, country centered and min-max (0-100) standardized (eqi_norm_impart_nuts2)

Long tag: qog_eureg_wide2_eqi_norm_impart_nuts2

Original tag: eqi_norm_impart_nuts2

Description:
Impartiality pillar, country centered and min-max (0-100) standardized.

2.9.2.29 Corruption pillar, country centered and min-max (0-100) standardized (eqi_norm_corrupt_nuts0)

Long tag: qog_eureg_wide2_eqi_norm_corrupt_nuts0

Original tag: eqi_norm_corrupt_nuts0

Description:
Corruption pillar, country centered and min-max (0-100) standardized.

2.9.2.30 Corruption pillar, country centered and min-max (0-100) standardized (eqi_norm_corrupt_nuts2)

Long tag: qog_eureg_wide2_eqi_norm_corrupt_nuts2

Original tag: eqi_norm_corrupt_nuts2

Description:
Corruption pillar, country centered and min-max (0-100) standardized.

2.9.2.31 Corruption perceptions index (corruption sub-pillar) min-max (0-100)(2017) (eqi_norm_corruptper_nuts2)

Long tag: qog_eureg_wide2_eqi_norm_corruptper_nuts2

Original tag: eqi_norm_corruptper_nuts2

Description:
Corruption perceptions index (corruption sub-pillar), min-max (0-100) standardized.

2.9.2.32 Corruption experiences index (corruption sub-pillar) min-max (0-100) (2017) (eqi_norm_corruptexp_nuts2)

Long tag: qog_eureg_wide2_eqi_norm_corruptexp_nuts2

Original tag: eqi_norm_corruptexp_nuts2

Description:
Corruption experiences index (corruption sub-pillar) min-max (0-100) standardized.

2.9.3 Demographics

This category includes variables describing the demographic characteristics of a population, such as its size, life-expectancy, fertility rates and death rates.

2.9.3.1 Reported number of cases of burglary of private premises (eu_cri_bur_nuts0)

Long tag: qog_eureg_wide2_eu_cri_bur_nuts0

Original tag: eu_cri_bur_nuts0

Description:
Reported number of cases of burglary of private premises. Domestic burglary is defined as gaining access to a dwelling by the use of force to steal goods.

2.9.3.2 Reported number of cases of burglary of private premises (eu_cri_bur_nuts2)

Long tag: qog_eureg_wide2_eu_cri_bur_nuts2

Original tag: eu_cri_bur_nuts2

Description:
Reported number of cases of burglary of private premises. Domestic burglary is defined as gaining access to a dwelling by the use of force to steal goods.

2.9.3.3 Reported number of cases of intentional homicide (eu_cri_inthom_nuts0)

Long tag: qog_eureg_wide2_eu_cri_inthom_nuts0

Original tag: eu_cri_inthom_nuts0

Description:
Reported number of cases of intentional homicide. It is defined as intentional killing of a person, including murder, manslaughter, euthanasia and infanticide. Causing death by dangerous driving is excluded, as are abortion and help with suicide. Attempted (uncompleted) homicide is also excluded. The counting unit for homicide is normally the victim (rather than the case).

2.9.3.4 Reported number of cases of intentional homicide (eu_cri_inthom_nuts2)

Long tag: qog_eureg_wide2_eu_cri_inthom_nuts2

Original tag: eu_cri_inthom_nuts2

Description:
Reported number of cases of intentional homicide. It is defined as intentional killing of a person, including murder, manslaughter, euthanasia and infanticide. Causing death by dangerous driving is excluded, as are abortion and help with suicide. Attempted (uncompleted) homicide is also excluded. The counting unit for homicide is normally the victim (rather than the case).

2.9.3.5 Reported number of cases of robbery (eu_cri_rob_nuts0)

Long tag: qog_eureg_wide2_eu_cri_rob_nuts0

Original tag: eu_cri_rob_nuts0

Description:
Reported number of cases of robbery. Robbery is a sub-set of violent crime (see above). It is defined as stealing from a person with force or threat of force, including muggings (bag-snatching) and theft with violence. Pick-pocketing, extortion and blackmailing are generally not included.

2.9.3.6 Reported number of cases of robbery (eu_cri_rob_nuts2)

Long tag: qog_eureg_wide2_eu_cri_rob_nuts2

Original tag: eu_cri_rob_nuts2

Description:
Reported number of cases of robbery. Robbery is a sub-set of violent crime (see above). It is defined as stealing from a person with force or threat of force, including muggings (bag-snatching) and theft with violence. Pick-pocketing, extortion and blackmailing are generally not included.

2.9.3.7 Proportion of live births outside marriage (eu_agemoth_nuts0)

Long tag: qog_eureg_wide2_eu_agemoth_nuts0

Original tag: eu_agemoth_nuts0

Description:
Proportion of live births outside marriage. A live birth outside marriage is defined as a live birth where the mother's marital status at the time of birth is other than married.

2.9.3.8 Total fertility rate (eu_agemoth1_nuts0)

Long tag: qog_eureg_wide2_eu_agemoth1_nuts0

Original tag: eu_agemoth1_nuts0

Description:
Total fertility rate. It is defined as the mean number of children who would be born to a woman during her lifetime, if she were to spend her childbearing years conforming to the age-specific fertility rates, that have been measured in a given year.

2.9.3.9 Mean age of women at childbirth (eu_nmarpct_nuts0)

Long tag: qog_eureg_wide2_eu_nmarpct_nuts0

Original tag: eu_nmarpct_nuts0

Description:
Mean age of women at childbirth. It is calculated as the mean age of women when their children are born.

2.9.3.10 Mean age of women at birth of first child (eu_totferrt_nuts0)

Long tag: qog_eureg_wide2_eu_totferrt_nuts0

Original tag: eu_totferrt_nuts0

Description:
Mean age of women at birth of first child. It is calculated as the mean age of women when their first children are born.

2.9.3.11 Number of deaths of females, all ages (eu_death_totalf_nuts0)

Long tag: qog_eureg_wide2_eu_death_totalf_nuts0

Original tag: eu_death_totalf_nuts0

Description:
Number of deaths of females, all ages. Death means the permanent disappearance of all evidence of life at any time after life birth has taken place (postnatal cessation of vital functions without capability of resuscitation).

2.9.3.12 Number of deaths of males, all ages (eu_death_totalm_nuts0)

Long tag: qog_eureg_wide2_eu_death_totalm_nuts0

Original tag: eu_death_totalm_nuts0

Description:
Number of deaths of males, all ages. Death means the permanent disappearance of all evidence of life at any time after life birth has taken place (postnatal cessation of vital functions without capability of resuscitation).

2.9.3.13 Number of deaths, total all ages (eu_death_totalt_nuts0)

Long tag: qog_eureg_wide2_eu_death_totalt_nuts0

Original tag: eu_death_totalt_nuts0

Description:
Number of deaths, all ages. Death means the permanent disappearance of all evidence of life at any time after life birth has taken place (postnatal cessation of vital functions without capability of resuscitation).

2.9.3.14 Number of deaths of females, at 1 year old (eu_death_y1f_nuts0)

Long tag: qog_eureg_wide2_eu_death_y1f_nuts0

Original tag: eu_death_y1f_nuts0

Description:
Number of deaths of females, at 1 year old. Death means the permanent disappearance of all evidence of life at any time after life birth has taken place (postnatal cessation of vital functions without capability of resuscitation).

2.9.3.15 Number of deaths of males, at 1 year old (eu_death_y1m_nuts0)

Long tag: qog_eureg_wide2_eu_death_y1m_nuts0

Original tag: eu_death_y1m_nuts0

Description:
Number of deaths of males, at 1 year old. Death means the permanent disappearance of all evidence of life at any time after life birth has taken place (postnatal cessation of vital functions without capability of resuscitation).

2.9.3.16 Number of deaths, total at 1 year old (eu_death_y1t_nuts0)

Long tag: qog_eureg_wide2_eu_death_y1t_nuts0

Original tag: eu_death_y1t_nuts0

Description:
Number of deaths, total at 1 year old. Death means the permanent disappearance of all evidence of life at any time after life birth has taken place (postnatal cessation of vital functions without capability of resuscitation).

2.9.3.17 Number of deaths of females, at 20 years old (eu_death_y20f_nuts0)

Long tag: qog_eureg_wide2_eu_death_y20f_nuts0

Original tag: eu_death_y20f_nuts0

Description:
Number of deaths of females, at 20 years old. Death means the permanent disappearance of all evidence of life at any time after life birth has taken place (postnatal cessation of vital functions without capability of resuscitation).

2.9.3.18 Number of deaths of males, at 20 years old (eu_death_y20m_nuts0)

Long tag: qog_eureg_wide2_eu_death_y20m_nuts0

Original tag: eu_death_y20m_nuts0

Description:

Number of deaths of males, at 20 years old. Death means the permanent disappearance of all evidence of life at any time after life birth has taken place (postnatal cessation of vital functions without capability of resuscitation).

2.9.3.19 Number of deaths, total at 20 years old (eu_death_y20t_nuts0)

Long tag: qog_eureg_wide2_eu_death_y20t_nuts0

Original tag: eu_death_y20t_nuts0

Description:

Number of deaths, total at 20 years old. Death means the permanent disappearance of all evidence of life at any time after life birth has taken place (postnatal cessation of vital functions without capability of resuscitation).

2.9.3.20 Number of deaths of females, at 50 years old (eu_death_y50f_nuts0)

Long tag: qog_eureg_wide2_eu_death_y50f_nuts0

Original tag: eu_death_y50f_nuts0

Description:

Number of deaths of females, at 50 years old. Death means the permanent disappearance of all evidence of life at any time after life birth has taken place (postnatal cessation of vital functions without capability of resuscitation).

2.9.3.21 Number of deaths of males, at 50 years old (eu_death_y50m_nuts0)

Long tag: qog_eureg_wide2_eu_death_y50m_nuts0

Original tag: eu_death_y50m_nuts0

Description:

Number of deaths of males, at 50 years old. Death means the permanent disappearance of all evidence of life at any time after life birth has taken place (postnatal cessation of vital functions without capability of resuscitation).

2.9.3.22 Number of deaths, total at 50 years old (eu_death_y50t_nuts0)

Long tag: qog_eureg_wide2_eu_death_y50t_nuts0

Original tag: eu_death_y50t_nuts0

Description:

Number of deaths, total at 50 years old. Death means the permanent disappearance of all evidence of life at any time after life birth has taken place (postnatal cessation of vital functions without capability of resuscitation).

2.9.3.23 Number of deaths of females, at 70 years old (eu_death_y70f_nuts0)

Long tag: qog_eureg_wide2_eu_death_y70f_nuts0

Original tag: eu_death_y70f_nuts0

Description:

Number of deaths of females, at 70 years old. Death means the permanent disappearance of all evidence of life at any time after life birth has taken place (postnatal cessation of vital functions without capability of resuscitation).

2.9.3.24 Number of deaths of males, at 70 years old (eu_death_y70m_nuts0)

Long tag: qog_eureg_wide2_eu_death_y70m_nuts0

Original tag: eu_death_y70m_nuts0

Description:

Number of deaths of males, at 70 years old. Death means the permanent disappearance of all evidence of life at any time after life birth has taken place (postnatal cessation of vital functions without capability of resuscitation).

2.9.3.25 Number of deaths, total at 70 years old (eu_death_y70t_nuts0)

Long tag: qog_eureg_wide2_eu_death_y70t_nuts0

Original tag: eu_death_y70t_nuts0

Description:

Number of deaths, total at 70 years old. Death means the permanent disappearance of all evidence of life at any time after life birth has taken place (postnatal cessation of vital functions without capability of resuscitation).

2.9.3.26 Population at 1st January, Female (eu_d2jan_f_nuts0)

Long tag: qog_eureg_wide2_eu_d2jan_f_nuts0

Original tag: eu_d2jan_f_nuts0

Description:

Female population as of 1st January of the year indicated. It is based on concept of usual resident population, i.e. the number of inhabitants of a given area on 1 January of the year in question (or, in some cases, on 31 December of the previous year). The population figures can be based on data from the most recent census adjusted by the components of population change produced since the last census, or based on population registers. Usually resident population means all persons having usual residence in a country at the reference time. Usual residence means the place where a person normally spends the daily period of rest, regardless of temporary absences for purposes of recreation, holidays, visits to friends and relatives, business, medical treatment or religious pilgrimage. The following persons alone are considered to be usual residents of the geographical area in question: a) those who have lived in their place of usual residence for a continuous period of at least 12 months before the reference time; or b) those who arrived in their place of usual residence during the 12 months before the reference time with the intention of staying there for at least one year.

2.9.3.27 Population at 1st January, Female (eu_d2jan_f_nuts2)

Long tag: qog_eureg_wide2_eu_d2jan_f_nuts2

Original tag: eu_d2jan_f_nuts2

Description:

Female population as of 1st January of the year indicated. It is based on concept of usual resident population, i.e. the number of inhabitants of a given area on 1 January of the year in question (or, in some cases, on 31 December of the previous year). The population figures can be based on data from the most recent census adjusted by the components of population change produced since the last census, or based on population registers. Usually resident population means all persons having usual residence in a country at the reference time. Usual residence means the place where a person normally spends the daily period of rest, regardless of temporary absences for purposes of recreation, holidays, visits to friends and relatives, business, medical treatment or religious pilgrimage. The following persons alone are considered to be usual residents of the geographical area in question: a) those who have lived in their place of usual residence for a continuous period of at least 12 months before the reference time; or b) those who arrived in their place of usual residence during the 12 months before the reference time with the intention of staying there for at least one year.

2.9.3.28 Population at 1st January, Male (eu_d2jan_m_nuts0)

Long tag: qog_eureg_wide2_eu_d2jan_m_nuts0

Original tag: eu_d2jan_m_nuts0

Description:

Male population as of 1st January of the year indicated. It is based on concept of usual resident population, i.e. the number of inhabitants of a given area on 1 January of the year in question (or, in some cases, on 31 December of the previous year). The population figures can be based on data from the most recent census adjusted by the components of population change produced since the last census, or based on population registers. Usually resident population means all persons having usual residence in a country at the reference time. Usual residence means the place where a person normally spends the daily period of rest, regardless of temporary absences for purposes of recreation, holidays, visits to friends and relatives, business, medical treatment or religious pilgrimage. The following persons alone are considered to be usual residents of the geographical area in question: a) those who have lived in their place of usual residence for a continuous period of at least 12 months before the reference time; or b) those who arrived in their place of usual residence during the 12 months before the reference time with the intention of staying there for at least one year.

2.9.3.29 Population at 1st January, Male (eu_d2jan_m_nuts2)

Long tag: qog_eureg_wide2_eu_d2jan_m_nuts2

Original tag: eu_d2jan_m_nuts2

Description:

Male population as of 1st January of the year indicated. It is based on concept of usual resident population, i.e. the number of inhabitants of a given area on 1 January of the year in question (or, in some cases, on 31 December of the previous year). The population figures can be based on data from the most recent census adjusted by the components of population change produced since the last census, or based on population registers. Usually resident population means all persons having usual residence in a country at the reference time. Usual residence means the place where a person normally spends the daily period of rest, regardless of temporary absences for purposes of recreation, holidays, visits to friends and relatives, business, medical treatment or religious pilgrimage. The following persons alone are considered to be usual residents of the geographical area in question: a) those who have lived in their place of usual residence for a continuous period of at least 12 months before the reference time; or b) those who arrived in their place of usual residence during the 12 months before the reference time with the intention of staying there for at least one year.

2.9.3.30 Population at 1st January, Total (eu_d2jan_t_nuts0)

Long tag: qog_eureg_wide2_eu_d2jan_t_nuts0

Original tag: eu_d2jan_t_nuts0

Description:

Total population as of 1st January of the year indicated. It is based on concept of usual resident population, i.e. the number of inhabitants of a given area on 1 January of the year in question (or, in some cases, on 31

December of the previous year). The population figures can be based on data from the most recent census adjusted by the components of population change produced since the last census, or based on population registers. Usually resident population means all persons having usual residence in a country at the reference time. Usual residence means the place where a person normally spends the daily period of rest, regardless of temporary absences for purposes of recreation, holidays, visits to friends and relatives, business, medical treatment or religious pilgrimage. The following persons alone are considered to be usual residents of the geographical area in question: a) those who have lived in their place of usual residence for a continuous period of at least 12 months before the reference time; or b) those who arrived in their place of usual residence during the 12 months before the reference time with the intention of staying there for at least one year.

2.9.3.31 Population at 1st January, Total (eu_d2jan_t_nuts2)

Long tag: qog_eureg_wide2_eu_d2jan_t_nuts2

Original tag: eu_d2jan_t_nuts2

Description:

Total population as of 1st January of the year indicated. It is based on concept of usual resident population, i.e. the number of inhabitants of a given area on 1 January of the year in question (or, in some cases, on 31 December of the previous year). The population figures can be based on data from the most recent census adjusted by the components of population change produced since the last census, or based on population registers. Usually resident population means all persons having usual residence in a country at the reference time. Usual residence means the place where a person normally spends the daily period of rest, regardless of temporary absences for purposes of recreation, holidays, visits to friends and relatives, business, medical treatment or religious pilgrimage. The following persons alone are considered to be usual residents of the geographical area in question: a) those who have lived in their place of usual residence for a continuous period of at least 12 months before the reference time; or b) those who arrived in their place of usual residence during the 12 months before the reference time with the intention of staying there for at least one year.

2.9.3.32 Area of a region, land area total, sq km (eu_d3area_lat_nuts0)

Long tag: qog_eureg_wide2_eu_d3area_lat_nuts0

Original tag: eu_d3area_lat_nuts0

Description:

Total land area of a region as square kilometer. Total Land Area (TLA) is defined as total surface area excluding lakes, rivers, transitional and coastal waters. Mountainous regions, glaciers, forests, wetlands and other temporarily or permanently uninhabitable regions are included in TLA.

2.9.3.33 Area of a region, land area total, sq km (eu_d3area_lat_nuts2)

Long tag: qog_eureg_wide2_eu_d3area_lat_nuts2

Original tag: eu_d3area_lat_nuts2

Description:

Total land area of a region as square kilometer. Total Land Area (TLA) is defined as total surface area excluding lakes, rivers, transitional and coastal waters. Mountainous regions, glaciers, forests, wetlands and other temporarily or permanently uninhabitable regions are included in TLA.

2.9.3.34 Area of a region, total, sq km (eu_d3area_t_nuts0)

Long tag: qog_eureg_wide2_eu_d3area_t_nuts0

Original tag: eu_d3area_t_nuts0

Description:

Total surface area of a region as square kilometer. Total Surface Area (TSA) is defined as the area of any given statistical area and includes land area and inland waters (lakes, rivers etc.). The sub-national areas (e.g. LAU and NUTS areas) defined by statistical and/or administrative boundaries are the building blocks for calculating both concepts. By definition Total Surface Area does not cover areas that are not statistical areas.

2.9.3.35 Area of a region, total, sq km (eu_d3area_t_nuts2)

Long tag: qog_eureg_wide2_eu_d3area_t_nuts2

Original tag: eu_d3area_t_nuts2

Description:

Total surface area of a region as square kilometer. Total Surface Area (TSA) is defined as the area of any given statistical area and includes land area and inland waters (lakes, rivers etc.). The sub-national areas (e.g. LAU and NUTS areas) defined by statistical and/or administrative boundaries are the building blocks for calculating both concepts. By definition Total Surface Area does not cover areas that are not statistical areas.

2.9.3.36 Population density, average population per square km (eu_per_km2_nuts0)

Long tag: qog_eureg_wide2_eu_per_km2_nuts0

Original tag: eu_per_km2_nuts0

Description:

Average population density per square km. Population density is the ratio of the (annual average) population

of a region to the (land) area of the region; total area (including inland waters) is used when land area is not available.

2.9.3.37 Population density, average population per square km (eu_per_km2_nuts2)

Long tag: qog_eureg_wide2_eu_per_km2_nuts2

Original tag: eu_per_km2_nuts2

Description:

Average population density per square km. Population density is the ratio of the (annual average) population of a region to the (land) area of the region; total area (including inland waters) is used when land area is not available.

2.9.3.38 Fertility rate, total (eu_frate_total_nuts0)

Long tag: qog_eureg_wide2_eu_frate_total_nuts0

Original tag: eu_frate_total_nuts0

Description:

Total fertility rate. It is the mean number of children that would be born alive to a woman during her lifetime if she were to pass through her childbearing years conforming to the fertility rates by age of a given year.

2.9.3.39 Fertility rate, total (eu_frate_total_nuts2)

Long tag: qog_eureg_wide2_eu_frate_total_nuts2

Original tag: eu_frate_total_nuts2

Description:

Total fertility rate. It is the mean number of children that would be born alive to a woman during her lifetime if she were to pass through her childbearing years conforming to the fertility rates by age of a given year.

2.9.3.40 Fertility rate, at age 15 (eu_frate_y15_nuts0)

Long tag: qog_eureg_wide2_eu_frate_y15_nuts0

Original tag: eu_frate_y15_nuts0

Description:

Fertility rate, at age 15. This age-specific fertility rate is calculated by dividing the number of births of mothers of age 15 to the average female population of age 15.

2.9.3.41 Fertility rate, at age 15 (eu_frate_y15_nuts2)

Long tag: qog_eureg_wide2_eu_frate_y15_nuts2

Original tag: eu_frate_y15_nuts2

Description:

Fertility rate, at age 15. This age-specific fertility rate is calculated by dividing the number of births of mothers of age 15 to the average female population of age 15.

2.9.3.42 Fertility rate, at age 30 (eu_frate_y30_nuts0)

Long tag: qog_eureg_wide2_eu_frate_y30_nuts0

Original tag: eu_frate_y30_nuts0

Description:

Fertility rate, at age 30. This age-specific fertility rate is calculated by dividing the number of births of mothers of age 30 to the average female population of age 30.

2.9.3.43 Fertility rate, at age 30 (eu_frate_y30_nuts2)

Long tag: qog_eureg_wide2_eu_frate_y30_nuts2

Original tag: eu_frate_y30_nuts2

Description:

Fertility rate, at age 30. This age-specific fertility rate is calculated by dividing the number of births of mothers of age 30 to the average female population of age 30.

2.9.3.44 Fertility rate, at age 35 (eu_frate_y35_nuts0)

Long tag: qog_eureg_wide2_eu_frate_y35_nuts0

Original tag: eu_frate_y35_nuts0

Description:

Fertility rate, at age 35. This age-specific fertility rate is calculated by dividing the number of births of mothers of age 35 to the average female population of age 35.

2.9.3.45 Fertility rate, at age 35 (eu_frate_y35_nuts2)

Long tag: qog_eureg_wide2_eu_frate_y35_nuts2

Original tag: eu_frate_y35_nuts2

Description:

Fertility rate, at age 35. This age-specific fertility rate is calculated by dividing the number of births of mothers of age 35 to the average female population of age 35.

2.9.3.46 Life expectancy in years at 1 year old, female (eu_mlifexp_f_nuts0)

Long tag: qog_eureg_wide2_eu_mlifexp_f_nuts0

Original tag: eu_mlifexp_f_nuts0

Description:

Life expectancy in years at 1 year old, female. Life expectancy at given exact age is the mean number of years still to be lived by a person who has reached a certain exact age, if subjected throughout the rest of his or her life to the current mortality conditions (age-specific probabilities of dying).

2.9.3.47 Life expectancy in years at 1 year old, female (eu_mlifexp_f_nuts2)

Long tag: qog_eureg_wide2_eu_mlifexp_f_nuts2

Original tag: eu_mlifexp_f_nuts2

Description:

Life expectancy in years at 1 year old, female. Life expectancy at given exact age is the mean number of years still to be lived by a person who has reached a certain exact age, if subjected throughout the rest of his or her life to the current mortality conditions (age-specific probabilities of dying).

2.9.3.48 Life expectancy in years at 1 year old, male (eu_mlifexp_m_nuts0)

Long tag: qog_eureg_wide2_eu_mlifexp_m_nuts0

Original tag: eu_mlifexp_m_nuts0

Description:

Life expectancy in years at 1 year old, male. Life expectancy at given exact age is the mean number of years still to be lived by a person who has reached a certain exact age, if subjected throughout the rest of his or her life to the current mortality conditions (age-specific probabilities of dying).

2.9.3.49 Life expectancy in years at 1 year old, male (eu_mlifexp_m_nuts2)

Long tag: qog_eureg_wide2_eu_mlifexp_m_nuts2

Original tag: eu_mlifexp_m_nuts2

Description:

Life expectancy in years at 1 year old, male. Life expectancy at given exact age is the mean number of years still to be lived by a person who has reached a certain exact age, if subjected throughout the rest of his or her life to the current mortality conditions (age-specific probabilities of dying).

2.9.3.50 Life expectancy in years at 1 year old, total (eu_mlifexp_t_nuts0)

Long tag: qog_eureg_wide2_eu_mlifexp_t_nuts0

Original tag: eu_mlifexp_t_nuts0

Description:

Life expectancy in years at 1 year old, total. Life expectancy at given exact age is the mean number of years still to be lived by a person who has reached a certain exact age, if subjected throughout the rest of his or her life to the current mortality conditions (age-specific probabilities of dying).

2.9.3.51 Life expectancy in years at 1 year old, total (eu_mlifexp_t_nuts2)

Long tag: qog_eureg_wide2_eu_mlifexp_t_nuts2

Original tag: eu_mlifexp_t_nuts2

Description:

Life expectancy in years at 1 year old, total. Life expectancy at given exact age is the mean number of years still to be lived by a person who has reached a certain exact age, if subjected throughout the rest of his or her life to the current mortality conditions (age-specific probabilities of dying).

2.9.3.52 Crude rate of net migration plus statistical adjustment (eu_cnmigratrt_nuts2)

Long tag: qog_eureg_wide2_eu_cnmigratrt_nuts2

Original tag: eu_cnmigratrt_nuts2

Description:

Crude rate of net migration plus statistical adjustment. Net migration including statistical adjustments the ratio of the net migration including statistical adjustment during the year to the average population in that year. The value is expressed per 1000 inhabitants. The crude rate of net migration is equal to the difference between the crude rate of population change and the crude rate of natural change (that is, net migration is

considered as the part of population change not attributable to births and deaths). It is calculated in this way because immigration or emigration flows are either not available or the figures are not reliable.

2.9.3.53 Crude rate of total population change (eu_growrt_nuts2)

Long tag: qog_eureg_wide2_eu_growrt_nuts2

Original tag: eu_growrt_nuts2

Description:

Crude rate of total population change. It is the ratio of the total population change during the year to the average population of the area in question in that year. The value is expressed per 1000 inhabitants.

2.9.3.54 Crude rate of natural change of population (eu_natgrowrt_nuts2)

Long tag: qog_eureg_wide2_eu_natgrowrt_nuts2

Original tag: eu_natgrowrt_nuts2

Description:

Crude rate of natural change. It is the ratio of natural change over a period to the average population of the area in question during that period. The value is expressed per 1000 inhabitants.

2.9.4 Education

This category includes a variety of indicators related to education, such as educational attainment, the students (age, gender, educational level), and educational outcomes.

2.9.4.1 Educational attainment for ages 25 to 64, primary education, Female (eu_edatt_ed02_y2564f_nuts0)

Long tag: qog_eureg_wide2_eu_edatt_ed02_y2564f_nuts0

Original tag: eu_edatt_ed02_y2564f_nuts0

Description:

Percentage of 25-64 years old females whose the highest level of education successfully completed is less than primary, primary and lower secondary education (levels 0-2). This aggregate refers to levels 0, 1 and 2 of the ISCED 2011 (online code ED0-2). Data up to 2013 refer to ISCED 1997 levels 0, 1 and 2 but also include level 3C short (educational attainment from ISCED level 3 programmes of less than two years).

2.9.4.2 Educational attainment for ages 25 to 64, primary education, Female (eu_edatt_ed02_y2564f_nuts2)

Long tag: qog_eureg_wide2_eu_edatt_ed02_y2564f_nuts2

Original tag: eu_edatt_ed02_y2564f_nuts2

Description:

Percentage of 25-64 years old females whose the highest level of education successfully completed is less than primary, primary and lower secondary education (levels 0-2). This aggregate refers to levels 0, 1 and 2 of the ISCED 2011 (online code ED0-2). Data up to 2013 refer to ISCED 1997 levels 0, 1 and 2 but also include level 3C short (educational attainment from ISCED level 3 programmes of less than two years).

2.9.4.3 Educational attainment for ages 25 to 64, primary education, Male (eu_edatt_ed02_y2564m_nuts0)

Long tag: qog_eureg_wide2_eu_edatt_ed02_y2564m_nuts0

Original tag: eu_edatt_ed02_y2564m_nuts0

Description:

Percentage of 25-64 years old males whose the highest level of education successfully completed is less than primary, primary and lower secondary education (levels 0-2). This aggregate refers to levels 0, 1 and 2 of the ISCED 2011 (online code ED0-2). Data up to 2013 refer to ISCED 1997 levels 0, 1 and 2 but also include level 3C short (educational attainment from ISCED level 3 programmes of less than two years).

2.9.4.4 Educational attainment for ages 25 to 64, primary education, Male (eu_edatt_ed02_y2564m_nuts2)

Long tag: qog_eureg_wide2_eu_edatt_ed02_y2564m_nuts2

Original tag: eu_edatt_ed02_y2564m_nuts2

Description:

Percentage of 25-64 years old males whose the highest level of education successfully completed is less than primary, primary and lower secondary education (levels 0-2). This aggregate refers to levels 0, 1 and 2 of the ISCED 2011 (online code ED0-2). Data up to 2013 refer to ISCED 1997 levels 0, 1 and 2 but also include level 3C short (educational attainment from ISCED level 3 programmes of less than two years).

2.9.4.5 Educational attainment for ages 25 to 64, primary education, Total (eu_edatt_ed02_y2564t_nuts0)

Long tag: qog_eureg_wide2_eu_edatt_ed02_y2564t_nuts0

Original tag: eu_edatt_ed02_y2564t_nuts0

Description:

Percentage of 25-64 years old population whose the highest level of education successfully completed is less than primary, primary and lower secondary education (levels 0-2). This aggregate refers to levels 0, 1 and 2 of the ISCED 2011 (online code ED0-2). Data up to 2013 refer to ISCED 1997 levels 0, 1 and 2 but also include level 3C short (educational attainment from ISCED level 3 programmes of less than two years).

2.9.4.6 Educational attainment for ages 25 to 64, primary education, Total (eu_edatt_ed02_y2564t_nuts2)

Long tag: qog_eureg_wide2_eu_edatt_ed02_y2564t_nuts2

Original tag: eu_edatt_ed02_y2564t_nuts2

Description:

Percentage of 25-64 years old population whose the highest level of education successfully completed is less than primary, primary and lower secondary education (levels 0-2). This aggregate refers to levels 0, 1 and 2 of the ISCED 2011 (online code ED0-2). Data up to 2013 refer to ISCED 1997 levels 0, 1 and 2 but also include level 3C short (educational attainment from ISCED level 3 programmes of less than two years).

2.9.4.7 Educational attainment for ages 25 to 64, secondary education, Female (eu_edatt_ed34_y2564f_nuts0)

Long tag: qog_eureg_wide2_eu_edatt_ed34_y2564f_nuts0

Original tag: eu_edatt_ed34_y2564f_nuts0

Description:

Percentage of 25-64 years old females whose the highest level of education successfully completed is upper secondary and post-secondary non-tertiary education (levels 3 and 4). This aggregate corresponds to ISCED 2011 levels 3 and 4 (online code ED3_4). ISCED 2011 level 3 programmes of partial level completion are considered within ISCED level 3. Data up to 2013 refer to ISCED 1997 levels 3C long, 3A, 3B and 4.

2.9.4.8 Educational attainment for ages 25 to 64, secondary education, Female (eu_edatt_ed34_y2564f_nuts2)

Long tag: qog_eureg_wide2_eu_edatt_ed34_y2564f_nuts2

Original tag: eu_edatt_ed34_y2564f_nuts2

Description:

Percentage of 25-64 years old females whose the highest level of education successfully completed is upper secondary and post-secondary non-tertiary education (levels 3 and 4). This aggregate corresponds to ISCED 2011 levels 3 and 4 (online code ED3_4). ISCED 2011 level 3 programmes of partial level completion are considered within ISCED level 3. Data up to 2013 refer to ISCED 1997 levels 3C long, 3A, 3B and 4.

2.9.4.9 Educational attainment for ages 25 to 64, secondary education, Male (eu_edatt_ed34_y2564m_nuts0)

Long tag: qog_eureg_wide2_eu_edatt_ed34_y2564m_nuts0

Original tag: eu_edatt_ed34_y2564m_nuts0

Description:

Percentage of 25-64 years old males whose the highest level of education successfully completed is upper secondary and post-secondary non-tertiary education (levels 3 and 4). This aggregate corresponds to ISCED 2011 levels 3 and 4 (online code ED3_4). ISCED 2011 level 3 programmes of partial level completion are considered within ISCED level 3. Data up to 2013 refer to ISCED 1997 levels 3C long, 3A, 3B and 4.

2.9.4.10 Educational attainment for ages 25 to 64, secondary education, Male (eu_edatt_ed34_y2564m_nuts2)

Long tag: qog_eureg_wide2_eu_edatt_ed34_y2564m_nuts2

Original tag: eu_edatt_ed34_y2564m_nuts2

Description:

Percentage of 25-64 years old males whose the highest level of education successfully completed is upper secondary and post-secondary non-tertiary education (levels 3 and 4). This aggregate corresponds to ISCED 2011 levels 3 and 4 (online code ED3_4). ISCED 2011 level 3 programmes of partial level completion are considered within ISCED level 3. Data up to 2013 refer to ISCED 1997 levels 3C long, 3A, 3B and 4.

2.9.4.37 Early leavers from education and training as a percentage, Female (eu_eduleave_f_nuts0)

Long tag: qog_eureg_wide2_eu_eduleave_f_nuts0

Original tag: eu_eduleave_f_nuts0

Description:
Female early leavers from education and training as a percentage of the population aged 18-24 with at most lower secondary education and not in further education or training. The indicator is defined as the percentage of the population aged 18-24 with at most lower secondary education and who were not in further education or training during the last four weeks preceding the survey. Lower secondary education refers to ISCED (International

Standard Classification of Education) 2011 level 0-2 for data from 2014 onwards and to ISCED 1997 level 0-3C short for data up to 2013. The indicator is based on the EU Labour Force Survey.

2.9.4.38 Early leavers from education and training as a percentage, Female (eu_eduleave_f_nuts2)

Long tag: qog_eureg_wide2_eu_eduleave_f_nuts2

Original tag: eu_eduleave_f_nuts2

Description:

Female early leavers from education and training as a percentage of the population aged 18-24 with at most lower secondary education and not in further education or training. The indicator is defined as the percentage of the population aged 18-24 with at most lower secondary education and who were not in further education or training during the last four weeks preceding the survey. Lower secondary education refers to ISCED (International Standard Classification of Education) 2011 level 0-2 for data from 2014 onwards and to ISCED 1997 level 0-3C short for data up to 2013. The indicator is based on the EU Labour Force Survey.

2.9.4.39 Early leavers from education and training as a percentage, Male (eu_eduleave_m_nuts0)

Long tag: qog_eureg_wide2_eu_eduleave_m_nuts0

Original tag: eu_eduleave_m_nuts0

Description:

Male early leavers from education and training as a percentage of the population aged 18-24 with at most lower secondary education and not in further education or training. The indicator is defined as the percentage of the population aged 18-24 with at most lower secondary education and who were not in further education or training during the last four weeks preceding the survey. Lower secondary education refers to ISCED (International Standard Classification of Education) 2011 level 0-2 for data from 2014 onwards and to ISCED 1997 level 0-3C short for data up to 2013. The indicator is based on the EU Labour Force Survey.

2.9.4.43 15-24 year old neither in employment nor in education as percentage, female (eu_neet_y1524f_nuts0)

Long tag: qog_eureg_wide2_eu_neet_y1524f_nuts0

Original tag: eu_neet_y1524f_nuts0

Description:

15-24 year old females neither in employment nor in education as percentage. The indicator on young people neither in employment nor in education and training (NEET) provides information on young people aged 15 to 24 who meet the following two conditions: (a) they are not employed (i.e. unemployed or inactive according to the International Labour Organisation definition) and (b) they have not received any education or training in the four weeks preceding the survey. Data are expressed as a percentage of the total population in the same age group and sex, excluding the respondents who have not answered the question 'participation to education and training'. Data come from the European Union Labour Force Survey.

2.9.4.44 15-24 year old neither in employment nor in education as percentage, female (eu_neet_y1524f_nuts2)

Long tag: qog_eureg_wide2_eu_neet_y1524f_nuts2

2.9.4.65 Participation rate in Tertiary education (eu_epred58_nuts0)

Long tag: qog_eureg_wide2_eu_epred58_nuts0

Original tag: eu_epred58_nuts0

Description:

Participation rate in tertiary education (level 5-8). Countries participating in this collection are compiling their data according to the concepts and definitions of the UOE data collection manuals on education systems statistics. This aggregate covers ISCED 2011 levels 5, 6, 7 and 8 (short-cycle tertiary education, bachelor's or equivalent level, master's or equivalent level, doctoral or equivalent level, online code ED5-8 'tertiary education').

2.9.4.66 Participation rate in Tertiary education (eu_epred58_nuts2)

Long tag: qog_eureg_wide2_eu_epred58_nuts2

Original tag: eu_epred58_nuts2

Description:

Participation rate in tertiary education (level 5-8). Countries participating in this collection are compiling their data according to the concepts and definitions of the UOE data collection manuals on education systems statistics. This aggregate covers ISCED 2011 levels 5, 6, 7 and 8 (short-cycle tertiary education, bachelor's or equivalent level, master's or equivalent level, doctoral or equivalent level, online code ED5-8 'tertiary education').

2.9.4.67 Participation rate in education and training (last 4 weeks), females (eu_epry2564f_nuts0)

Long tag: qog_eureg_wide2_eu_epry2564f_nuts0

Original tag: eu_epry2564f_nuts0

Description:

Female participation rate in education and training during the last four weeks preceding the survey. The participation rate in education and training covers participation in formal and non-formal education and training. The reference period for the participation in education and training is the four weeks prior to the interview. Formal education is defined by ISCED as 'education that is institutionalised, intentional and planned through public organisations and recognised private bodies, and – in their totality – constitute the formal education system of a country. Formal education programmes are thus recognised as such by the

relevant national education or equivalent authorities, e.g. any other institution in cooperation with the national or sub-national education authorities.' Non-formal education and training is defined as any institutionalised, intentional and organised/planned learning activities outside the formal education system. According to the classification of learning activities (CLA 2016), non-formal education and training comprises courses, seminars and workshops, private lessons or instructions and guided-on-the-job training. However, non-formal education as measured in the EU-LFS excludes guided-on-the-job training. The information collected covers both job-related (professional) and non-job related (personal, social, 'leisure') education and training activities.

2.9.4.68 Participation rate in education and training (last 4 weeks), females (eu_epry2564f_nuts2)

Long tag: qog_eureg_wide2_eu_epry2564f_nuts2

Original tag: eu_epry2564f_nuts2

Description:

Female participation rate in education and training during the last four weeks preceding the survey. The participation rate in education and training covers participation in formal and non-formal education and training. The reference period for the participation in education and training is the four weeks prior to the interview. Formal education is defined by ISCED as 'education that is institutionalised, intentional and planned through public organisations and recognised private bodies, and – in their totality – constitute the formal education system of a country. Formal education programmes are thus recognised as such by the relevant national education or equivalent authorities, e.g. any other institution in cooperation with the national or sub-national education authorities.' Non-formal education and training is defined as any institutionalised, intentional and organised/planned learning activities outside the formal education system. According to the classification of learning activities (CLA 2016), non-formal education and training comprises courses, seminars and workshops, private lessons or instructions and guided-on-the-job training. The information collected covers both job-related (professional) and non-job related (personal, social, 'leisure') education and training activities.

2.9.4.69 Participation rate in education and training (last 4 weeks), males (eu_epry2564m_nuts0)

Long tag: qog_eureg_wide2_eu_epry2564m_nuts0

Original tag: eu_epry2564m_nuts0

Description:

Male participation rate in education and training during the last four weeks preceding the survey. The participation rate in education and training covers participation in formal and non-formal education and training. The reference period for the participation in education and training is the four weeks prior to the interview. Formal education is defined by ISCED as 'education that is institutionalised, intentional and planned through public organisations and recognised private bodies, and – in their totality – constitute the formal education system of a country. Formal education programmes are thus recognised as such by the relevant national education or equivalent authorities, e.g. any other institution in cooperation with the national or sub-national education authorities.' Non-formal education and training is defined as any institutionalised, intentional and organised/planned learning activities outside the formal education system. According to the classification of learning activities (CLA 2016), non-formal education and training comprises courses, seminars and workshops, private lessons or instructions and guided-on-the-job training. However, non-formal education as measured in the EU-LFS excludes guided-on-the-job training. The information collected covers both job-related (professional) and non-job related (personal, social, 'leisure') education and training activities.

2.9.4.70 Participation rate in education and training (last 4 weeks), males (eu_epry2564m_nuts2)

Long tag: qog_eureg_wide2_eu_epry2564m_nuts2

Original tag: eu_epry2564m_nuts2

Description:

Male participation rate in education and training during the last four weeks preceding the survey. The participation rate in education and training covers participation in formal and non-formal education and training. The reference period for the participation in education and training is the four weeks prior to the interview. Formal education is defined by ISCED as 'education that is institutionalised, intentional and planned through public organisations and recognised private bodies, and – in their totality – constitute the formal education system of a country. Formal education programmes are thus recognised as such by the relevant national education or equivalent authorities, e.g. any other institution in cooperation with the national or sub-national education authorities.' The information collected covers both job-related (professional) and non-job related (personal, social, 'leisure') education and training activities.

2.9.5 Environment

This category includes indicators related to temperature and municipal waste.

2.9.5.1 Municipal waste disposal - incineration in thousand tonnes (eu_env_wasdsp_i_nuts0)

Long tag: qog_eureg_wide2_eu_env_wasdsp_i_nuts0

Original tag: eu_env_wasdsp_i_nuts0

Description:

Municipal waste disposal, incineration in thousand tonnes. Municipal waste is mainly produced by households, similar wastes from sources such as commerce, offices and public institutions are included. The amount of municipal waste generated consists of waste collected by or on behalf of municipal authorities and disposed of through the waste management system. The amount of municipal waste treatment is reported for the treatment operations incineration (with and without energy recovery), recycling, composting and landfilling. Data are available in thousand tonnes and kilograms per person. Wastes from agriculture and from industries are not included.

2.9.5.2 Municipal waste disposal - incineration in thousand tonnes (eu_env_wasdsp_i_nuts2)

Long tag: qog_eureg_wide2_eu_env_wasdsp_i_nuts2

Original tag: eu_env_wasdsp_i_nuts2

Description:

Municipal waste disposal, incineration in thousand tonnes. Municipal waste is mainly produced by households, similar wastes from sources such as commerce, offices and public institutions are included. The amount of municipal waste generated consists of waste collected by or on behalf of municipal authorities and disposed of through the waste management system. The amount of municipal waste treatment is reported for the treatment operations incineration (with and without energy recovery), recycling, composting and landfilling. Data are available in thousand tonnes and kilograms per person. Wastes from agriculture and from industries are not included.

2.9.5.3 Municipal waste generated in thousand tonnes (eu_env_wasgen_nuts0)

Long tag: qog_eureg_wide2_eu_env_wasgen_nuts0

Original tag: eu_env_wasgen_nuts0

Description:

Municipal waste generated in thousand tonnes. Municipal waste is mainly produced by households, similar wastes from sources such as commerce, offices and public institutions are included. The amount of municipal waste generated consists of waste collected by or on behalf of municipal authorities and disposed of through the waste management system. The amount of municipal waste treatment is reported for the treatment operations incineration (with and without energy recovery), recycling, composting and landfilling. Data are available in thousand tonnes and kilograms per person. Wastes from agriculture and from industries are not included.

2.9.5.4 Municipal waste generated in thousand tonnes (eu_env_wasgen_nuts2)

Long tag: qog_eureg_wide2_eu_env_wasgen_nuts2

Original tag: eu_env_wasgen_nuts2

Description:

Municipal waste generated in thousand tonnes. Municipal waste is mainly produced by households, similar wastes from sources such as commerce, offices and public institutions are included. The amount of municipal waste generated consists of waste collected by or on behalf of municipal authorities and disposed of through the waste management system. The amount of municipal waste treatment is reported for the treatment operations incineration (with and without energy recovery), recycling, composting and landfilling. Data are available in thousand tonnes and kilograms per person. Wastes from agriculture and from industries are not included.

2.9.5.5 Municipal waste recovery - energy recovery in thousand tonnes (eu_env_wasrcv_e_nuts0)

Long tag: qog_eureg_wide2_eu_env_wasrcv_e_nuts0

Original tag: eu_env_wasrcv_e_nuts0

Description:

Municipal waste energy recovery in thousand tonnes. Energy recovery is defined as the incineration that fulfils the energy efficiency criteria laid down in the Waste Framework Directive (2008/98/EC), Annex II (recovery operation R1). Municipal waste is mainly produced by households, similar wastes from sources such as commerce, offices and public institutions are included. The amount of municipal waste generated consists of waste collected by or on behalf of municipal authorities and disposed of through the waste management system. The amount of municipal waste treatment is reported for the treatment operations incineration (with and without energy recovery), recycling, composting and landfilling. Data are available in thousand tonnes and kilograms per person. Wastes from agriculture and from industries are not included.

2.9.5.6 Municipal waste recovery - energy recovery in thousand tonnes (eu_env_wasrcv_e_nuts2)

Long tag: qog_eureg_wide2_eu_env_wasrcv_e_nuts2

Original tag: eu_env_wasrcv_e_nuts2

Description:

Municipal waste energy recovery in thousand tonnes. Energy recovery is defined as the incineration that fulfils the energy efficiency criteria laid down in the Waste Framework Directive (2008/98/EC), Annex II (recovery operation R1). Municipal waste is mainly produced by households, similar wastes from sources such as commerce, offices and public institutions are included. The amount of municipal waste generated consists of waste collected by or on behalf of municipal authorities and disposed of through the waste management system. The amount of municipal waste treatment is reported for the treatment operations incineration (with and without energy recovery), recycling, composting and landfilling. Data are available in thousand tonnes and kilograms per person. Wastes from agriculture and from industries are not included.

2.9.5.7 Municipal waste recycling in thousand tonnes (eu_env_wasrcy_c_d_nuts0)

Long tag: qog_eureg_wide2_eu_env_wasrcy_c_d_nuts0

Original tag: eu_env_wasrcy_c_d_nuts0

Description:

Municipal waste recycling in thousand tonnes. Recycling means any recovery operation by which waste materials are reprocessed into products, materials or substances whether for the original or other purposes. It includes the reprocessing of organic material but does not include energy recovery and the reprocessing into materials that are to be used as fuels or for backfilling operations. Municipal waste is mainly produced by households, similar wastes from sources such as commerce, offices and public institutions are included. The amount of municipal waste generated consists of waste collected by or on behalf of municipal authorities and disposed of through the waste management system. The amount of municipal waste treatment is reported for the treatment operations incineration (with and without energy recovery), recycling, composting and landfilling. Data are available in thousand tonnes and kilograms per person. Wastes from agriculture and from industries are not included.

2.9.5.8 Municipal waste recycling in thousand tonnes (eu_env_wasrcy_c_d_nuts2)

Long tag: qog_eureg_wide2_eu_env_wasrcy_c_d_nuts2

Original tag: eu_env_wasrcy_c_d_nuts2

Description:
Municipal waste recycling in thousand tonnes. Recycling means any recovery operation by which waste materials are reprocessed into products, materials or substances whether for the original or other purposes. It includes the reprocessing of organic material but does not include energy recovery and the reprocessing into materials that are to be used as fuels or for backfilling operations. Municipal waste is mainly produced by households, similar wastes from sources such as commerce, offices and public institutions are included. The amount of municipal waste generated consists of waste collected by or on behalf of municipal authorities and disposed of through the waste management system. The amount of municipal waste treatment is reported for the treatment operations incineration (with and without energy recovery), recycling, composting and landfilling. Data are available in thousand tonnes and kilograms per person. Wastes from agriculture and from industries are not included.

2.9.5.9 Number of cooling degree days (eu_eng_cdd_nuts0)

Long tag: qog_eureg_wide2_eu_eng_cdd_nuts0

Original tag: eu_eng_cdd_nuts0

Description:
Number of cooling degree days (CDD). Cooling degree day (CDD) index is a weather-based technical index designed to describe the need for the cooling (air-conditioning) requirements of buildings. CDD is derived from meteorological observations of air temperature, interpolated to regular grids at 25 km resolution for Europe. Calculated gridded CDD is aggregated and subsequently presented on NUTS-2 level, for 2017 and 2018 also on NUTS-3 level.

2.9.5.10 Number of cooling degree days (eu_eng_cdd_nuts2)

Long tag: qog_eureg_wide2_eu_eng_cdd_nuts2

Original tag: eu_eng_cdd_nuts2

Description:
Number of cooling degree days (CDD). Cooling degree day (CDD) index is a weather-based technical index designed to describe the need for the cooling (air-conditioning) requirements of buildings. CDD is derived from meteorological observations of air temperature, interpolated to regular grids at 25 km resolution for Europe. Calculated gridded CDD is aggregated and subsequently presented on NUTS-2 level, for 2017 and 2018 also on NUTS-3 level.

2.9.5.11 Number of heating degree days (eu_eng_hdd_nuts0)

Long tag: qog_eureg_wide2_eu_eng_hdd_nuts0

Original tag: eu_eng_hdd_nuts0

Description:
Number of heating degree days (HDD). Heating degree day (HDD) index is a weather-based technical index designed to describe the need for the heating energy requirements of buildings. HDD is derived from meteorological observations of air temperature, interpolated to regular grids at 25 km resolution for Europe. Calculated gridded HDD is aggregated and subsequently presented on NUTS-2 level, for 2017 and 2018 also on NUTS-3 level.

2.9.5.12 Number of heating degree days (eu_eng_hdd_nuts2)

Long tag: qog_eureg_wide2_eu_eng_hdd_nuts2

Original tag: eu_eng_hdd_nuts2

Description:
Number of heating degree days (HDD). Heating degree day (HDD) index is a weather-based technical index designed to describe the need for the heating energy requirements of buildings. HDD is derived from meteorological observations of air temperature, interpolated to regular grids at 25 km resolution for Europe. Calculated gridded HDD is aggregated and subsequently presented on NUTS-2 level, for 2017 and 2018 also on NUTS-3 level.

2.9.6 Health

This category includes indicators describing the health of a population in a given country. These include reports about the prevalence of infectious diseases, and indicators such as birth rate, death rate, life expectancy. It also provides information on the capacity of the health care system, such as the number of hospital beds available.

2.9.6.1 Number of deaths by circulatory system diseases, female (eu_hea_cs_f_nuts0)

Long tag: qog_eureg_wide2_eu_hea_cs_f_nuts0

Original tag: eu_hea_cs_f_nuts0

Description:
Number of deaths by circulatory system diseases, female. Causes of death (COD) statistics are based on information derived from the medical certificate of cause of death. COD target at the underlying cause of death, in accordance with the ICD-10 definition i.e. "the disease or injury which initiated the train of morbid events leading directly to death, or the circumstances of the accident or violence which produced the fatal

injury". Expressed in deaths per 100,000 inhabitants, it is calculated as the number of deaths recorded in the population for a given period divided by population in the same period and then multiplied by 100,000.

2.9.6.2 Number of deaths by circulatory system diseases, female (eu_hea_cs_f_nuts2)

Long tag: qog_eureg_wide2_eu_hea_cs_f_nuts2

Original tag: eu_hea_cs_f_nuts2

Description:

Number of deaths by circulatory system diseases, female. Causes of death (COD) statistics are based on information derived from the medical certificate of cause of death. COD target at the underlying cause of death, in accordance with the ICD-10 definition i.e. "the disease or injury which initiated the train of morbid events leading directly to death, or the circumstances of the accident or violence which produced the fatal injury". Expressed in deaths per 100,000 inhabitants, it is calculated as the number of deaths recorded in the population for a given period divided by population in the same period and then multiplied by 100,000.

2.9.6.3 Number of deaths by circulatory system diseases, male (eu_hea_cs_m_nuts0)

Long tag: qog_eureg_wide2_eu_hea_cs_m_nuts0

Original tag: eu_hea_cs_m_nuts0

Description:

Number of deaths by circulatory system diseases, male. Causes of death (COD) statistics are based on information derived from the medical certificate of cause of death. COD target at the underlying cause of death, in accordance with the ICD-10 definition i.e. "the disease or injury which initiated the train of morbid events leading directly to death, or the circumstances of the accident or violence which produced the fatal injury". Expressed in deaths per 100,000 inhabitants, it is calculated as the number of deaths recorded in the population for a given period divided by population in the same period and then multiplied by 100,000.

2.9.6.4 Number of deaths by circulatory system diseases, male (eu_hea_cs_m_nuts2)

Long tag: qog_eureg_wide2_eu_hea_cs_m_nuts2

Original tag: eu_hea_cs_m_nuts2

Description:

Number of deaths by circulatory system diseases, male. Causes of death (COD) statistics are based on information derived from the medical certificate of cause of death. COD target at the underlying cause of death, in accordance with the ICD-10 definition i.e. "the disease or injury which initiated the train of morbid events leading directly to death, or the circumstances of the accident or violence which produced the fatal injury". Expressed in deaths per 100,000 inhabitants, it is calculated as the number of deaths recorded in the population for a given period divided by population in the same period and then multiplied by 100,000.

2.9.6.5 Number of deaths by circulatory system diseases, total (eu_hea_cs_t_nuts0)

Long tag: qog_eureg_wide2_eu_hea_cs_t_nuts0

Original tag: eu_hea_cs_t_nuts0

Description:

Number of deaths by circulatory system diseases, total. Causes of death (COD) statistics are based on information derived from the medical certificate of cause of death. COD target at the underlying cause of death, in accordance with the ICD-10 definition i.e. "the disease or injury which initiated the train of morbid events leading directly to death, or the circumstances of the accident or violence which produced the fatal injury". Expressed in deaths per 100,000 inhabitants, it is calculated as the number of deaths recorded in the population for a given period divided by population in the same period and then multiplied by 100,000.

2.9.6.6 Number of deaths by circulatory system diseases, total (eu_hea_cs_t_nuts2)

Long tag: qog_eureg_wide2_eu_hea_cs_t_nuts2

Original tag: eu_hea_cs_t_nuts2

Description:

Number of deaths by circulatory system diseases, total. Causes of death (COD) statistics are based on information derived from the medical certificate of cause of death. COD target at the underlying cause of death, in accordance with the ICD-10 definition i.e. "the disease or injury which initiated the train of morbid events leading directly to death, or the circumstances of the accident or violence which produced the fatal injury". Expressed in deaths per 100,000 inhabitants, it is calculated as the number of deaths recorded in the population for a given period divided by population in the same period and then multiplied by 100,000.

2.9.6.7 Number of deaths by HIV, female (eu_hea_hiv_f_nuts0)

Long tag: qog_eureg_wide2_eu_hea_hiv_f_nuts0

Original tag: eu_hea_hiv_f_nuts0

Description:
Number of deaths by HIV, female. Causes of death (COD) statistics are based on information derived from the medical certificate of cause of death. COD target at the underlying cause of death, in accordance with the ICD-10 definition i.e. "the disease or injury which initiated the train of morbid events leading directly to death, or the circumstances of the accident or violence which produced the fatal injury". Expressed in deaths per 100,000 inhabitants, it is calculated as the number of deaths recorded in the population for a given period divided by population in the same period and then multiplied by 100,000.

2.9.6.8 Number of deaths by HIV, female (eu_hea_hiv_f_nuts2)

Long tag: qog_eureg_wide2_eu_hea_hiv_f_nuts2

Original tag: eu_hea_hiv_f_nuts2

Description:
Number of deaths by HIV, female. Causes of death (COD) statistics are based on information derived from the medical certificate of cause of death. COD target at the underlying cause of death, in accordance with the ICD-10 definition i.e. "the disease or injury which initiated the train of morbid events leading directly to death, or the circumstances of the accident or violence which produced the fatal injury". Expressed in deaths per 100,000 inhabitants, it is calculated as the number of deaths recorded in the population for a given period divided by population in the same period and then multiplied by 100,000.

2.9.6.9 Number of deaths by HIV, male (eu_hea_hiv_m_nuts0)

Long tag: qog_eureg_wide2_eu_hea_hiv_m_nuts0

Original tag: eu_hea_hiv_m_nuts0

Description:
Number of deaths by HIV, male. Causes of death (COD) statistics are based on information derived from the medical certificate of cause of death. COD target at the underlying cause of death, in accordance with the ICD-10 definition i.e. "the disease or injury which initiated the train of morbid events leading directly to death, or the circumstances of the accident or violence which produced the fatal injury". Expressed in deaths per 100,000 inhabitants, it is calculated as the number of deaths recorded in the population for a given period divided by population in the same period and then multiplied by 100,000.

2.9.6.10 Number of deaths by HIV, male (eu_hea_hiv_m_nuts2)

Long tag: qog_eureg_wide2_eu_hea_hiv_m_nuts2

Original tag: eu_hea_hiv_m_nuts2

Description:
Number of deaths by HIV, male. Causes of death (COD) statistics are based on information derived from the medical certificate of cause of death. COD target at the underlying cause of death, in accordance with the ICD-10 definition i.e. "the disease or injury which initiated the train of morbid events leading directly to death, or the circumstances of the accident or violence which produced the fatal injury". Expressed in deaths per 100,000 inhabitants, it is calculated as the number of deaths recorded in the population for a given period divided by population in the same period and then multiplied by 100,000.

2.9.6.11 Number of deaths by HIV, total (eu_hea_hiv_t_nuts0)

Long tag: qog_eureg_wide2_eu_hea_hiv_t_nuts0

Original tag: eu_hea_hiv_t_nuts0

Description:
Number of deaths by HIV, total. Causes of death (COD) statistics are based on information derived from the medical certificate of cause of death. COD target at the underlying cause of death, in accordance with the ICD-10 definition i.e. "the disease or injury which initiated the train of morbid events leading directly to death, or the circumstances of the accident or violence which produced the fatal injury". Expressed in deaths per 100,000 inhabitants, it is calculated as the number of deaths recorded in the population for a given period divided by population in the same period and then multiplied by 100,000.

2.9.6.12 Number of deaths by HIV, total (eu_hea_hiv_t_nuts2)

Long tag: qog_eureg_wide2_eu_hea_hiv_t_nuts2

Original tag: eu_hea_hiv_t_nuts2

Description:
Number of deaths by HIV, total. Causes of death (COD) statistics are based on information derived from the medical certificate of cause of death. COD target at the underlying cause of death, in accordance with the ICD-10 definition i.e. "the disease or injury which initiated the train of morbid events leading directly to death, or the circumstances of the accident or violence which produced the fatal injury". Expressed in deaths per 100,000 inhabitants, it is calculated as the number of deaths recorded in the population for a given period divided by population in the same period and then multiplied by 100,000.

2.9.6.13 Number of deaths by infectious and parasitic diseases, female (eu_hea_ipd_f_nuts0)

Long tag: qog_eureg_wide2_eu_hea_ipd_f_nuts0

Original tag: eu_hea_ipd_f_nuts0

Description:

Number of deaths by infectious and parasitic diseases, female. Causes of death (COD) statistics are based on information derived from the medical certificate of cause of death. COD target at the underlying cause of death, in accordance with the ICD-10 definition i.e. "the disease or injury which initiated the train of morbid events leading directly to death, or the circumstances of the accident or violence which produced the fatal injury". Expressed in deaths per 100,000 inhabitants, it is calculated as the number of deaths recorded in the population for a given period divided by population in the same period and then multiplied by 100,000.

2.9.6.14 Number of deaths by infectious and parasitic diseases, female (eu_hea_ipd_f_nuts2)

Long tag: qog_eureg_wide2_eu_hea_ipd_f_nuts2

Original tag: eu_hea_ipd_f_nuts2

Description:

Number of deaths by infectious and parasitic diseases, female. Causes of death (COD) statistics are based on information derived from the medical certificate of cause of death. COD target at the underlying cause of death, in accordance with the ICD-10 definition i.e. "the disease or injury which initiated the train of morbid events leading directly to death, or the circumstances of the accident or violence which produced the fatal injury". Expressed in deaths per 100,000 inhabitants, it is calculated as the number of deaths recorded in the population for a given period divided by population in the same period and then multiplied by 100,000.

2.9.6.15 Number of deaths by infectious and parasitic diseases, male (eu_hea_ipd_m_nuts0)

Long tag: qog_eureg_wide2_eu_hea_ipd_m_nuts0

Original tag: eu_hea_ipd_m_nuts0

Description:

Number of deaths by infectious and parasitic diseases, male. Causes of death (COD) statistics are based on information derived from the medical certificate of cause of death. COD target at the underlying cause of death, in accordance with the ICD-10 definition i.e. "the disease or injury which initiated the train of morbid events leading directly to death, or the circumstances of the accident or violence which produced the fatal injury". Expressed in deaths per 100,000 inhabitants, it is calculated as the number of deaths recorded in the population for a given period divided by population in the same period and then multiplied by 100,000.

2.9.6.16 Number of deaths by infectious and parasitic diseases, male (eu_hea_ipd_m_nuts2)

Long tag: qog_eureg_wide2_eu_hea_ipd_m_nuts2

Original tag: eu_hea_ipd_m_nuts2

Description:

Number of deaths by infectious and parasitic diseases, male. Causes of death (COD) statistics are based on information derived from the medical certificate of cause of death. COD target at the underlying cause of death, in accordance with the ICD-10 definition i.e. "the disease or injury which initiated the train of morbid events leading directly to death, or the circumstances of the accident or violence which produced the fatal injury". Expressed in deaths per 100,000 inhabitants, it is calculated as the number of deaths recorded in the population for a given period divided by population in the same period and then multiplied by 100,000.

2.9.6.17 Number of deaths by infectious and parasitic diseases, total (eu_hea_ipd_t_nuts0)

Long tag: qog_eureg_wide2_eu_hea_ipd_t_nuts0

Original tag: eu_hea_ipd_t_nuts0

Description:

Number of deaths by infectious and parasitic diseases, total. Causes of death (COD) statistics are based on information derived from the medical certificate of cause of death. COD target at the underlying cause of death, in accordance with the ICD-10 definition i.e. "the disease or injury which initiated the train of morbid events leading directly to death, or the circumstances of the accident or violence which produced the fatal injury". Expressed in deaths per 100,000 inhabitants, it is calculated as the number of deaths recorded in the population for a given period divided by population in the same period and then multiplied by 100,000.

2.9.6.18 Number of deaths by infectious and parasitic diseases, total (eu_hea_ipd_t_nuts2)

Long tag: qog_eureg_wide2_eu_hea_ipd_t_nuts2

Original tag: eu_hea_ipd_t_nuts2

Description:

Number of deaths by infectious and parasitic diseases, total. Causes of death (COD) statistics are based on information derived from the medical certificate of cause of death. COD target at the underlying cause of death, in accordance with the ICD-10 definition i.e. "the disease or injury which initiated the train of morbid events leading directly to death, or the circumstances of the accident or violence which produced the fatal injury".

Expressed in deaths per 100,000 inhabitants, it is calculated as the number of deaths recorded in the population for a given period divided by population in the same period and then multiplied by 100,000.

2.9.6.19 Number of deaths by malignant neoplasms, female (eu_hea_np_f_nuts0)

Long tag: qog_eureg_wide2_eu_hea_np_f_nuts0

Original tag: eu_hea_np_f_nuts0

Description:

Number of deaths by malignant neoplasms, female. Causes of death (COD) statistics are based on information derived from the medical certificate of cause of death. COD target at the underlying cause of death, in accordance with the ICD-10 definition i.e. "the disease or injury which initiated the train of morbid events leading directly to death, or the circumstances of the accident or violence which produced the fatal injury". Expressed in deaths per 100,000 inhabitants, it is calculated as the number of deaths recorded in the population for a given period divided by population in the same period and then multiplied by 100,000.

2.9.6.53 Psychiatric care beds in hospitals (HP.1) per hundred thousand inhabitants (eu_hea_bedpsy_nuts0)

Long tag: qog_eureg_wide2_eu_hea_bedpsy_nuts0

Original tag: eu_hea_bedpsy_nuts0

Description:

Psychiatric care beds in hospitals (HP.1) per hundred thousand inhabitants. Health care facilities data refer to available beds in hospitals (HP.1) and subcategories (such as curative care beds, rehabilitative care beds, etc.). Total hospital beds (HP.1) are all hospital beds which are regularly maintained and staffed and immediately available for the care of admitted patients. Total hospital beds are broken down as follows: i) curative care (acute care) beds; ii) rehabilitative care beds; iii) long-term care beds (excluding psychiatric care beds) and iv) other hospital beds. The definition of health care facilities follows the International Classification for Health Accounts - Providers of health care (ICHA-HP) of the System of Health Accounts (SHA).

2.9.6.57 Dentists per hundred thousand inhabitants (eu_hea_dent_nuts0)

Long tag: qog_eureg_wide2_eu_hea_dent_nuts0

Original tag: eu_hea_dent_nuts0

Description:

Dentists, per hundred thousand inhabitants. Health care staff data refer to human resources available for providing health care services in the country, irrespective of the sector of employment (i.e. whether they are independent, employed by a hospital or any other health care provider). 'Manpower' categories focus on health care professionals (physicians, dentists, nursing and caring professionals, pharmacists, physiotherapists). Three different concepts are used to present the number of health care professionals: i) 'practising', i.e. health care professionals providing services directly to patients; ii) 'professionally active', i.e. 'practising' health care professionals plus health care professionals for whom their medical education is a prerequisite for the execution

of the job; iii) 'licensed to practice', i.e. health care professionals who are registered and entitled to practice as health care professionals.

2.9.7 Science and Technology

This category provides information on employment rates in different sectors, for the total population as well as subgroups.

2.9.7.1 Employment in agriculture, fishing and mining, percent of tot. employment, female (eu_emtk_ab_f_nuts0)

Long tag: qog_eureg_wide2_eu_emtk_ab_f_nuts0

Original tag: eu_emtk_ab_f_nuts0

Description:

Female employment in agriculture, forestry and fishing; mining and quarrying, as percentage of total female employment. Data come from EU Labour force survey (LFS). Employed people are defined as persons aged 15 years and over who during the reference week performed work, even for just one hour a week, for pay, profit or family gain or were not at work but had a job or business from which they were temporarily absent because of, e.g., illness, holidays, industrial dispute and education and training. In high-tech statistics the population excludes anyone below the age of 15 or over the age of 74. The data are aggregated based on the statistical classification of economic activities in the European Community (NACE) at 2-digit level.

2.9.7.2 Employment in agriculture, fishing and mining, percent of tot. employment, female (eu_emtk_ab_f_nuts2)

Long tag: qog_eureg_wide2_eu_emtk_ab_f_nuts2

Original tag: eu_emtk_ab_f_nuts2

2.9.7.20 Employment in electricity, gas and water supply, percent of tot. employment, female (eu_emtk_df_f_nuts2)

Long tag: qog_eureg_wide2_eu_emtk_df_f_nuts2

Original tag: eu_emtk_df_f_nuts2

Description:

Female employment in electricity, gas, steam and air conditioning supply; water supply and construction, as percentage of total female employment. Data come from EU Labour force survey (LFS). Employed people are defined as persons aged 15 years and over who during the reference week performed work, even for just one hour a week, for pay, profit or family gain or were not at work but had a job or business from which they were temporarily absent because of, e.g., illness, holidays, industrial dispute and education and training. In high-tech statistics the population excludes anyone below the age of 15 or over the age of 74. The data are aggregated based on the statistical classification of economic activities in the European Community (NACE) at 2-digit level.

Description:

Employment in total knowledge-intensive services, as percentage of total employment. Data come from EU Labour force survey (LFS). Employed people are defined as persons aged 15 years and over who during the reference week performed work, even for just one hour a week, for pay, profit or family gain or were not at work but had a job or business from which they were temporarily absent because of, e.g., illness, holidays, industrial dispute and education and training. In high-tech statistics the population excludes anyone below the age of 15 or over the age of 74. The data are aggregated based on the statistical classification of economic activities in the European Community (NACE) at 2-digit level.

In high-tech statistics the population excludes anyone below the age of 15 or over the age of 74. The data are aggregated based on the statistical classification of economic activities in the European Community (NACE) at 2-digit level.

2.9.7.87 Employment in health and social work activities, percent of tot. employment, male (eu_emtk_q_m_nuts0)

Long tag: qog_eureg_wide2_eu_emtk_q_m_nuts0

Original tag: eu_emtk_q_m_nuts0

Description:

Male employment in human health and social work activities, as percentage of total male employment. Data come from EU Labour force survey (LFS). Employed people are defined as persons aged 15 years and over who during the reference week performed work, even for just one hour a week, for pay, profit or family gain or

were not at work but had a job or business from which they were temporarily absent because of, e.g., illness, holidays, industrial dispute and education and training. In high-tech statistics the population excludes anyone below the age of 15 or over the age of 74. The data are aggregated based on the statistical classification of economic activities in the European Community (NACE) at 2-digit level.

Original tag: eu_prd_hes_t_nuts0

Description:

Total R&D employees in higher education sector, full-time equivalent. R&D personnel in a statistical unit include all persons engaged directly in R&D, whether employed by the statistical unit or external contributors fully integrated into the statistical unit‘s R&D activities, as well as those providing direct services for the R&D activities (such as R&D managers, administrators, technicians and clerical straff). Persons providing indirect support and ancillary services, such as canteen, maintenance, administrative and security staff, has been excluded, even though their wages and salaries are included in “other current costs” when measuring R&D expenditure. Further information on the concepts and definitions used for the production of R&D statistics can be found in Frascati Manual (OECD 2015).

2.9.7.124 Total R&D employees in higher education sector, total, full-time equivalent (eu_prd_hes_t_nuts2)

Long tag: qog_eureg_wide2_eu_prd_hes_t_nuts2

Original tag: eu_prd_hes_t_nuts2

Description:

Total R&D employees in higher education sector, full-time equivalent. R&D personnel in a statistical unit include all persons engaged directly in R&D, whether employed by the statistical unit or external contributors fully integrated into the statistical unit‘s R&D activities, as well as those providing direct services for the R&D activities (such as R&D managers, administrators, technicians and clerical straff). Persons providing indirect support and ancillary services, such as canteen, maintenance, administrative and security staff, has been excluded, even though their wages and salaries are included in “other current costs” when measuring R&D expenditure. Further information on the concepts and definitions used for the production of R&D statistics can be found in Frascati Manual (OECD 2015).

2.9.7.125 Total R&D employees in private non-profit sector, female, full-time equivalent (eu_prd_pnp_f_nuts0)

Long tag: qog_eureg_wide2_eu_prd_pnp_f_nuts0

Original tag: eu_prd_pnp_f_nuts0

Description:

Female R&D employees in private non-profit sector, full-time equivalent. 2.9.8 Poverty and Social Exclusion

This category describes the share of the population living in or at risk of poverty.

2.9.8.1 At-risk-of-poverty rate by NUTS regions, percentage (eu_povrisk_pc_nuts0)

Long tag: qog_eureg_wide2_eu_povrisk_pc_nuts0

Original tag: eu_povrisk_pc_nuts0

Description:

Percentage of total population at-risk-of-poverty rate by NUTS 2 regions. The persons with an equivalised disposable income below the risk-of-poverty threshold, which is set at 60 percent of the national median equivalised disposable income (after social transfers).

2.9.8.2 At-risk-of-poverty rate by NUTS regions, percentage (eu_povrisk_pc_nuts2)

Long tag: qog_eureg_wide2_eu_povrisk_pc_nuts2

Original tag: eu_povrisk_pc_nuts2

Description:

Percentage of total population at-risk-of-poverty rate by NUTS 2 regions. The persons with an equivalised disposable income below the risk-of-poverty threshold, which is set at 60 percent of the national median equivalised disposable income (after social transfers).

2.9.8.3 People (0 to 59 years) in households with low work intensity, as percent (eu_lwoin_pc_nuts0)

Long tag: qog_eureg_wide2_eu_lwoin_pc_nuts0

Original tag: eu_lwoin_pc_nuts0

Description:

Population aged 0-59 living in households with very low work intensity by NUTS regions, as a percentage of total population. People living in households with very low work intensity are people aged 0-59 living in households where the adults work less than 20percent of their total work potential during the past year.

2.9.8.4 People (0 to 59 years) in households with low work intensity, as percent (eu_lwoin_pc_nuts2)

Long tag: qog_eureg_wide2_eu_lwoin_pc_nuts2

Original tag: eu_lwoin_pc_nuts2

Description:

Population aged 0-59 living in households with very low work intensity by NUTS regions, as a percentage of total population. People living in households with very low work intensity are people aged 0-59 living in households where the adults work less than 20percent of their total work potential during the past year.

2.9.8.5 People (0 to 59 years) in households with low work intensity, percent of total pop. (eu_lwoin_pc_y_lt60_nuts0)

Long tag: qog_eureg_wide2_eu_lwoin_pc_y_lt60_nuts0

Original tag: eu_lwoin_pc_y_lt60_nuts0

Description:

Population aged 0-59 living in households with very low work intensity by NUTS regions, as a percentage of total population aged less than 60. People living in households with very low work intensity are people aged 0-59 living in households where the adults work less than 20percent of their total work potential during the past year.

2.9.8.6 People (0 to 59 years) in households with low work intensity, percent of total pop. (eu_lwoin_pc_y_lt60_nuts2)

Long tag: qog_eureg_wide2_eu_lwoin_pc_y_lt60_nuts2

Original tag: eu_lwoin_pc_y_lt60_nuts2

Description:

Population aged 0-59 living in households with very low work intensity by NUTS regions, as a percentage of total population aged less than 60. People living in households with very low work intensity are people aged 0-59 living in households where the adults work less than 20percent of their total work potential during the past year.

2.9.8.7 Severe material deprivation rate by NUTS regions, percentage (eu_matdep_pc_nuts0)

Long tag: qog_eureg_wide2_eu_matdep_pc_nuts0

Original tag: eu_matdep_pc_nuts0

Description:

Percentage of total population living in conditions of severe material deprivation by NUTS 2 regions. The collection "material deprivation" covers indicators relating to economic strain, durables, housing and environment of the dwelling. Severely materially deprived persons have living conditions severely constrained by a lack of resources, they experience at least 4 out of 9 following deprivations items: they cannot afford i) to pay rent or utility bills, ii) keep home adequately warm, iii) face unexpected expenses, iv) eat meat, fish or a protein equivalent every second day, v) a week holiday away from home, vi) a car, vii) a washing machine, viii) a colour TV, ix) a telephone.

2.9.8.8 Severe material deprivation rate by NUTS regions, percentage (eu_matdep_pc_nuts2)

Long tag: qog_eureg_wide2_eu_matdep_pc_nuts2

Original tag: eu_matdep_pc_nuts2

Description:

Percentage of total population living in conditions of severe material deprivation by NUTS 2 regions. The collection "material deprivation" covers indicators relating to economic strain, durables, housing and environment of the dwelling. Severely materially deprived persons have living conditions severely constrained by a lack of resources, they experience at least 4 out of 9 following deprivations items: they cannot afford i) to pay rent or utility bills, ii) keep home adequately warm, iii) face unexpected expenses, iv) eat meat, fish or a protein equivalent every second day, v) a week holiday away from home, vi) a car, vii) a washing machine, viii) a colour TV, ix) a telephone.

2.9.8.9 People at risk of poverty or social exclusion by NUTS regions, percentage (eu_povr_pc_nuts0)

Long tag: qog_eureg_wide2_eu_povr_pc_nuts0

Original tag: eu_povr_pc_nuts0

Description:

People at risk of poverty or social exclusion by NUTS 2 regions, percentage of total population. Persons who are at risk of poverty or severely materially deprived or living in households with very low work intensity. Persons are only counted once even if they are present in several sub-indicators. At risk-of-poverty are persons with an equivalised disposable income below the risk-of-poverty threshold, which is set at 60 percent of the national median equivalised disposable income (after social transfers). Material deprivation covers indicators relating to economic strain and durables. Severely materially deprived persons have living conditions severely constrained by a lack of resources, they experience at least 4 out of 9 following deprivations items: cannot afford i) to pay rent or utility bills, ii) keep home adequately warm, iii) face unexpected expenses, iv) eat meat, fish or a protein equivalent every second day, v) a week holiday away from home, vi) a car, vii) a washing machine, viii) a colour TV, or ix) a telephone. People living in households with very low work intensity are those aged 0-59 living in households where the adults (aged 18-59) work less than 20percent of their total work potential during the past year.

2.9.8.10 People at risk of poverty or social exclusion by NUTS regions, percentage (eu_povr_pc_nuts2)

Long tag: qog_eureg_wide2_eu_povr_pc_nuts2

Original tag: eu_povr_pc_nuts2

Description:

People at risk of poverty or social exclusion by NUTS 2 regions, percentage of total population. Persons who are at risk of poverty or severely materially deprived or living in households with very low work intensity. Persons are only counted once even if they are present in several sub-indicators. At risk-of-poverty are persons with an equivalised disposable income below the risk-of-poverty threshold, which is set at 60 percent of the national median equivalised disposable income (after social transfers). Material deprivation covers indicators relating to economic strain and durables. Severely materially deprived persons have living conditions severely constrained by a lack of resources, they experience at least 4 out of 9 following deprivations items: cannot afford i) to pay rent or utility bills, ii) keep home adequately warm, iii) face unexpected expenses, iv) eat meat, fish or a protein equivalent every second day, v) a week holiday away from home, vi) a car, vii) a washing machine, viii) a colour TV, or ix) a telephone. People living in households with very low work intensity are those aged 0-59 living in households where the adults (aged 18-59) work less than 20percent of their total work potential during the past year.

2.9.9 Digital Society and Economy

This category includes variables related to internet use and the use of the internet for economic purposes, such as purchases or banking.

2.9.9.1 Last online purchase: between 3 and 12 months ago, percentage (eu_igs_b3_12_nuts0)

Long tag: qog_eureg_wide2_eu_igs_b3_12_nuts0

Original tag: eu_igs_b3_12_nuts0

Description:

Percentage of individuals whose last online purchase between 3 and 12 months ago. Data given in this domain are collected annually by the National Statistical Institutes and are based on Eurostat's annual model questionnaires on ICT (Information and Communication Technologies) usage in households and by individuals. The survey comprises questions at household level and individual level. The population of households consists of all private households having at least one member in the age group 16 to 74 years. The population of individuals consists of all individuals aged 16 to 74 (on an optional basis some countries collect separate data on other age groups, individuals aged 15 years or less, aged 75 or more). Regional breakdowns have been provided on a voluntary basis for 2006 and 2007 according to NUTS1 or NUTS2 by several countries. Starting from 2008, the collection of NUTS1 breakdowns is obligatory (regional breakdowns for all countries are available) while NUTS2 breakdowns are still optional.

2.9.9.2 Last online purchase: between 3 and 12 months ago, percentage (eu_igs_b3_12_nuts2)

Long tag: qog_eureg_wide2_eu_igs_b3_12_nuts2

Original tag: eu_igs_b3_12_nuts2

Description:

Percentage of individuals whose last online purchase between 3 and 12 months ago. Data given in this domain are collected annually by the National Statistical Institutes and are based on Eurostat's annual model questionnaires on ICT (Information and Communication Technologies) usage in households and by individuals. The survey comprises questions at household level and individual level. The population of households consists of all private households having at least one member in the age group 16 to 74 years. The population of individuals consists of all individuals aged 16 to 74 (on an optional basis some countries collect separate data on other age groups, individuals aged 15 years or less, aged 75 or more). Regional breakdowns have been provided on a voluntary basis for 2006 and 2007 according to NUTS1 or NUTS2 by several countries. Starting from 2008, the collection of

NUTS1 breakdowns is obligatory (regional breakdowns for all countries are available) while NUTS2 breakdowns are still optional.

2.9.9.3 Online purchases: from sellers from other EU countries, percentage (eu_igs_bfeu_nuts0)

Long tag: qog_eureg_wide2_eu_igs_bfeu_nuts0

Original tag: eu_igs_bfeu_nuts0

Description:

Percentage of individuals who have made online purchases from sellers in other EU countries. Data given in this domain are collected annually by the National Statistical Institutes and are based on Eurostat's annual model questionnaires on ICT (Information and Communication Technologies) usage in households and by individuals. The survey comprises questions at household level and individual level. The population of households consists of all private households having at least one member in the age group 16 to 74 years. The population of individuals consists of all individuals aged 16 to 74 (on an optional basis some countries collect separate data on other age groups, individuals aged 15 years or less, aged 75 or more). Regional breakdowns have been provided on a voluntary basis for 2006 and 2007 according to NUTS1 or NUTS2 by several countries. Starting from 2008, the collection of NUTS1 breakdowns is obligatory (regional breakdowns for all countries are available) while NUTS2 breakdowns are still optional.

2.9.9.4 Online purchases: from sellers from other EU countries, percentage (eu_igs_bfeu_nuts2)

Long tag: qog_eureg_wide2_eu_igs_bfeu_nuts2

Original tag: eu_igs_bfeu_nuts2

Description:

Percentage of individuals who have made online purchases from sellers in other EU countries. Data given in this domain are collected annually by the National Statistical Institutes and are based on Eurostat's annual model questionnaires on ICT (Information and Communication Technologies) usage in households and by individuals. The survey comprises questions at household level and individual level. The population of households consists of all private households having at least one member in the age group 16 to 74 years. The population of individuals consists of all individuals aged 16 to 74 (on an optional basis some countries collect separate data on other age groups, individuals aged 15 years or less, aged 75 or more). Data given in this domain are collected annually by the National Statistical Institutes and are based on Eurostat's annual model questionnaires on ICT (Information and Communication Technologies) usage in households and by individuals. The survey comprises questions at household level and individual level. The population of households consists of all private households having at least one member in the age group 16 to 74 years. The population of individuals consists of all individuals aged 16 to 74 (on an optional basis some countries collect separate data on other age groups, individuals aged 15 years or less, aged 75 or more). Regional breakdowns have been provided on a voluntary basis for 2006 and 2007 according to NUTS1 or NUTS2 by several countries. Starting from 2008, the collection of NUTS1 breakdowns is obligatory (regional breakdowns for all countries are available) while NUTS2 breakdowns are still optional.

2.9.9.41 Internet use: participating in social networks (eu_iu_iusnet_nuts0)

Long tag: qog_eureg_wide2_eu_iu_iusnet_nuts0

Original tag: eu_iu_iusnet_nuts0

Description:

Percentage of individuals using the internet to participate in social networks. Data given in this domain are collected annually by the National Statistical Institutes and are based on Eurostat's annual model questionnaires on ICT (Information and Communication Technologies) usage in households and by individuals. The survey comprises questions at household level and individual level. The population of households consists of all private households having at least one member in the age group 16 to 74 years. The population of individuals consists of all individuals aged 16 to 74 (on an optional basis some countries collect separate data on other age groups, individuals aged 15 years or less, aged 75 or more). 2.9.10 Labour Market Statistics

This category includes variables about employment and unemployment rates, in general, as well as in subgroups of the population.

2.9.10.1 Full-time employment, female, in thousands (eu_emp_ft_f_nuts0)

Long tag: qog_eureg_wide2_eu_emp_ft_f_nuts0

Original tag: eu_emp_ft_f_nuts0

Description:

Full-time female employment, in thousands. The source for the regional labour market information is the EU Labour Force Survey (EU-LFS). This is a quarterly household sample survey conducted in all Member States of the EU, the United Kingdom, EFTA and Candidate Countries (Montenegro, North Macedonia, Serbia and Turkey). The definitions of employment and unemployment, as well as other survey characteristics follow the definitions and recommendations of the International Labour Organisation (ILO). The definition of unemployment is further specified in Commission Regulation (EC) No 1897/2000.

2.9.10.2 Full-time employment, female, in thousands (eu_emp_ft_f_nuts2)

Long tag: qog_eureg_wide2_eu_emp_ft_f_nuts2

Original tag: eu_emp_ft_f_nuts2

Description:

Full-time female employment, in thousands. The source for the regional labour market information is the EU Labour Force Survey (EU-LFS). This is a quarterly household sample survey conducted in all Member States of the EU, the United Kingdom, EFTA and Candidate Countries (Montenegro, North Macedonia, Serbia and Turkey). The definitions of employment and unemployment, as well as other survey characteristics follow the definitions and recommendations of the International Labour Organisation (ILO). The definition of unemployment is further specified in Commission Regulation (EC) No 1897/2000.

2.9.10.3 Full-time employment, male, in thousands (eu_emp_ft_m_nuts0)

Long tag: qog_eureg_wide2_eu_emp_ft_m_nuts0

Original tag: eu_emp_ft_m_nuts0

Description:

Full-time male employment, in thousands. The source for the regional labour market information is the EU Labour Force Survey (EU-LFS). This is a quarterly household sample survey conducted in all Member States of the EU, the United Kingdom, EFTA and Candidate Countries (Montenegro, North Macedonia, Serbia and

Turkey). The definitions of employment and unemployment, as well as other survey characteristics follow the definitions and recommendations of the International Labour Organisation (ILO). The definition of unemployment is further specified in Commission Regulation (EC) No 1897/2000.

2.9.10.4 Full-time employment, male, in thousands (eu_emp_ft_m_nuts2)

Long tag: qog_eureg_wide2_eu_emp_ft_m_nuts2

Original tag: eu_emp_ft_m_nuts2

Description:

Full-time male employment, in thousands. The source for the regional labour market information is the EU Labour Force Survey (EU-LFS). This is a quarterly household sample survey conducted in all Member States of the EU, the United Kingdom, EFTA and Candidate Countries (Montenegro, North Macedonia, Serbia and Turkey). The definitions of employment and unemployment, as well as other survey characteristics follow the definitions and recommendations of the International Labour Organisation (ILO). The definition of unemployment is further specified in Commission Regulation (EC) No 1897/2000.

2.9.10.5 Full-time employment, total, in thousands (eu_emp_ft_t_nuts0)

Long tag: qog_eureg_wide2_eu_emp_ft_t_nuts0

Original tag: eu_emp_ft_t_nuts0

Description:

Total full-time employment, in thousands. The source for the regional labour market information is the EU Labour Force Survey (EU-LFS). This is a quarterly household sample survey conducted in all Member States of the EU, the United Kingdom, EFTA and Candidate Countries (Montenegro, North Macedonia, Serbia and Turkey). The definitions of employment and unemployment, as well as other survey characteristics follow the definitions and recommendations of the International Labour Organisation (ILO). The definition of unemployment is further specified in Commission Regulation (EC) No 1897/2000.

2.9.10.6 Full-time employment, total, in thousands (eu_emp_ft_t_nuts2)

Long tag: qog_eureg_wide2_eu_emp_ft_t_nuts2

Original tag: eu_emp_ft_t_nuts2

Description:

Total full-time employment, in thousands. The source for the regional labour market information is the EU Labour Force Survey (EU-LFS). This is a quarterly household sample survey conducted in all Member States of the EU, the United Kingdom, EFTA and Candidate Countries (Montenegro, North Macedonia, Serbia and Turkey). The definitions of employment and unemployment, as well as other survey characteristics follow the definitions and recommendations of the International Labour Organisation (ILO). The definition of unemployment is further specified in Commission Regulation (EC) No 1897/2000.

2.9.11 Economy

This category provides information on household incomes and GDP.

2.9.11.1 Income of households (Balance) in euro per inhabitant (eu_b5n_eur_hab_nuts0)

Long tag: qog_eureg_wide2_eu_b5n_eur_hab_nuts0

Original tag: eu_b5n_eur_hab_nuts0

Description:

Income of households (balance), Euro per inhabitant. The disposable income of private households is the balance of primary income (operating surplus/mixed income plus compensation of employees plus property income received minus property income paid) and the redistribution of income in cash. These transactions comprise social contributions paid, social benefits in cash received, current taxes on income and wealth paid, as well as other current transfers. Disposable income does not include social transfers in kind coming from public administrations or non-profit institutions serving households.

2.9.11.2 Income of households (Balance) in euro per inhabitant (eu_b5n_eur_hab_nuts2)

2.9.11.21 Regional gross domestic product by NUTS 2 regions, million EUR (eu_mio_eur_nuts0)

Long tag: qog_eureg_wide2_eu_mio_eur_nuts0

Original tag: eu_mio_eur_nuts0

Description:

Regional gross domestic product (GDP) by NUTS 2 regions in Million euro. GDP is an indicator of the output of a country or a region. It reflects the total value of all goods and services produced less the value of goods and services used for intermediate consumption in their production. Expressing GDP in PPS (purchasing power standards) eliminates differences in price levels between countries. Calculations on a per inhabitant basis allow for the comparison of economies and regions significantly different in absolute size. GDP per inhabitant in PPS is the key variable for determining the eligibility of NUTS 2 regions in the framework of the European Union's structural policy.

2.9.11.22 Regional gross domestic product by NUTS 2 regions, million EUR (eu_mio_eur_nuts2)
