The GPI (Scaled 1 to 5, 5 being least peaceful) measures a country's level of Negative Peace using three domains of peacefulness. The first domain, Ongoing Domestic and International Conflict, investigates the extent to which countries are involved in internal and external conflicts, as well as their role and duration of involvement in conflicts.

The second domain evaluates the level of harmony or discord within a nation; ten indicators broadly assess what might be described as Societal Safety and Security. The assertion is that low crime rates, minimal terrorist activity and violent demonstrations, harmonious relations with neighbouring countries, a stable political scene and a small proportion of the population being internally displaced or made refugees can be equated with peacefulness.

Seven further indicators are related to a country's Militarisation-reflecting the link between a country's level of military build-up and access to weapons and its level of peacefulness, both domestically and internationally. Comparable data on military expenditure as a percentage of GDP and the number of armed service officers per head are gauged, as are financial contributions to UN peacekeeping missions.

2.17.8.55 Incarceration (1-5 Higher incarceration) (gpi_jail)

Long tag: qog_std_cs_gpi_jail

Original tag: gpi_jail

Description:

Prison population rates per 100,000 of the national population. Sclaed 1 to 5, 5 having a higher incarceration rate. Source: International Centre for Prison Studies, King's College London, World Prison Population List.

Variable citation: Institute for Economics and Peace. (2021). Global peace index 2021: Measuring peace in a complex world [Accessed 09-11-2021]. `http://visionofhumanity.org/reports`

2.17.8.56 Safety and Security (1-5 Less secure) (gpi_ss)

Long tag: qog_std_cs_gpi_ss

Original tag: gpi_ss

Description:

Societal Safety and Security (Scaled 1 to 5, 5 being less secure) is one of the three subdomains of the GPI. Low crime rates, minimal terrorist activity and violent demonstrations, harmonious relations with neighbouring countries, a stable political scene and a small proportion of the population being internally displaced or made refugees can be equated with peacefulness.

Variable citation: Institute for Economics and Peace. (2021). Global peace index 2021: Measuring peace in a complex world [Accessed 09-11-2021]. `http://visionofhumanity.org/reports`

2.17.8.57 Gender (iiag_gen)

Long tag: qog_std_cs_iiag_gen

Original tag: iiag_gen

Description:

Gender is one of the four sub-categories that are used to calculate the Participation, Rights Inclusion category score. It consists of five indicators from four data sources.

Variable citation: Mo Ibrahim Foundation. (2020). The Ibrahim Index of African Governance. `http://mo.ibrahim.foundation/iiag/`

2.17.8.58 Rural Sector (iiag_rs)

Long tag: qog_std_cs_iiag_rs

Original tag: iiag_rs

Description:

Rural sector is one of the four sub-categories that are used to calculate the Foundations for Economic Opportunity category score. It consists of four indicators from International Fund for Agricultural Development (IFAD).

2.17.8.68 Women political empowerment index (vdem_gender)

Long tag: qog_std_cs_vdem_gender

Original tag: vdem_gender

Description:
Women political empowerment index. Question: How politically empowered are women?

Clarifications: Women's political empowerment is defined as a process of increasing capacity for women, leading to greater choice, agency, and participation in societal decision-making. It is understood to incorporate three equally-weighted dimensions: fundamental civil liberties, women's open discussion of political issues and participation in civil society organizations, and the descriptive representation of women in formal political positions. Aggregation: The index is formed by taking the average of women's civil liberties index, women's civil society participation index, and women's political participation index.

2.17.8.69 Birth rate, crude (per 1,000 people) (wdi_birth)

Long tag: qog_std_cs_wdi_birth

Original tag: wdi_birth

Description:
Crude birth rate indicates the number of live births occurring during the year, per 1,000 population estimated at midyear. Subtracting the crude death rate from the crude birth rate provides the rate of natural increase, which is equal to the rate of population change in the absence of migration.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.8.70 Completeness of birth registration (percent) (wdi_birthreg)

Long tag: qog_std_cs_wdi_birthreg

Original tag: wdi_birthreg

Description:
Completeness of birth registration is the percentage of children under age 5 whose births were registered at the time of the survey. The numerator of completeness of birth registration includes children whose birth certificate was seen by the interviewer or whose mother or caretaker says the birth has been registered.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.8.71 Completeness of birth registration, rural (percent) (wdi_birthregr)

Long tag: qog_std_cs_wdi_birthregr

Original tag: wdi_birthregr

Description:
Completeness of birth registration is the percentage of children under age 5 whose births were registered at the time of the survey in the rural areas. The numerator of completeness of birth registration includes children whose birth certificate was seen by the interviewer or whose mother or caretaker says the birth has been registered.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.8.72 Completeness of birth registration, urban (percent) (wdi_birthregu)

Long tag: qog_std_cs_wdi_birthregu

Original tag: wdi_birthregu

Description:

Completeness of birth registration is the percentage of children under age 5 whose births were registered at the time of the survey in the urban areas. The numerator of completeness of birth registration includes children whose birth certificate was seen by the interviewer or whose mother or caretaker says the birth has been registered.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.8.73 Births attended by skilled health staff (percent of total) (wdi_birthskill)

Long tag: qog_std_cs_wdi_birthskill

Original tag: wdi_birthskill

Description:

Births attended by skilled health staff are the percentage of deliveries attended by personnel trained to give the necessary supervision, care, and advice to women during pregnancy, labor, and the postpartum period; to conduct deliveries on their own; and to care for newborns.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.8.74 Death rate, crude (per 1,000 people) (wdi_death)

Long tag: qog_std_cs_wdi_death

Original tag: wdi_death

Description:

Crude death rate indicates the number of deaths occurring during the year, per 1,000 population estimated at midyear. Subtracting the crude death rate from the crude birth rate provides the rate of natural increase, which is equal to the rate of population change in the absence of migration.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.8.75 Completeness of death registration with cause-of-death information (percent) (wdi_deathreg)

Long tag: qog_std_cs_wdi_deathreg

Original tag: wdi_deathreg

Description:

Completeness of death registration is the estimated percentage of deaths that are registered with their cause of death information in the vital registration system of a country.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.8.76 Fertility rate, total (births per woman) (wdi_fertility)

Long tag: qog_std_cs_wdi_fertility

Original tag: wdi_fertility

Description:

Total fertility rate represents the number of children that would be born to a woman if she were to live to the end of her childbearing years and bear children in accordance with age-specific fertility rates of the specified year.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.8.77 CPIA gender equality rating (1=low to 6=high) (wdi_gendeqr)

Long tag: qog_std_cs_wdi_gendeqr

Original tag: wdi_gendeqr

Description:

Gender equality assesses the extent to which the country has installed institutions and programs to enforce laws and policies that promote equal access for men and women in education, health, the economy, and protection under law.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.8.78 Life expectancy at birth, total (years) (wdi_lifexp)

Long tag: qog_std_cs_wdi_lifexp

Original tag: wdi_lifexp

Description:

Life expectancy at birth indicates the number of years a newborn infant would live if prevailing patterns of mortality at the time of its birth were to stay the same throughout its life.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.8.79 Life expectancy at birth, female (years) (wdi_lifexpf)

Long tag: qog_std_cs_wdi_lifexpf

Original tag: wdi_lifexpf

Description:

Life expectancy at birth for females indicates the number of years a newborn infant would live if prevailing patterns of mortality at the time of its birth were to stay the same throughout its life.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.8.80 Life expectancy at birth, male (years) (wdi_lifexpm)

Long tag: qog_std_cs_wdi_lifexpm

Original tag: wdi_lifexpm

Description:

Life expectancy at birth for males indicates the number of years a newborn infant would live if prevailing patterns of mortality at the time of its birth were to stay the same throughout its life.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.8.81 Mortality rate, adult, female (per 1,000 female adults) (wdi_mortf)

Long tag: qog_std_cs_wdi_mortf

Original tag: wdi_mortf

Description:

Adult mortality rate is the probability of dying between the ages of 15 and 60 – that is, the probability of a 15-year-old dying before reaching age 60, if subject to age-specific mortality rates of the specified year between those ages.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.8.82 Mortality rate, infant (per 1,000 live births) (wdi_mortinf)

Long tag: qog_std_cs_wdi_mortinf

Original tag: wdi_mortinf

Description:

Infant mortality rate is the number of infants dying before reaching one year of age, per 1,000 live births in a given year.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.8.83 Mortality rate, infant, female (per 1,000 live births) (wdi_mortinff)

Long tag: qog_std_cs_wdi_mortinff

Original tag: wdi_mortinff

Description:

Infant mortality rate, female is the number of female infants dying before reaching one year of age, per 1,000 female live births in a given year.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.8.84 Mortality rate, infant, male (per 1,000 live births) (wdi_mortinfm)

Long tag: qog_std_cs_wdi_mortinfm

Original tag: wdi_mortinfm

Description:

Infant mortality rate, male is the number of male infants dying before reaching one year of age, per 1,000 male live births in a given year.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.8.85 Mortality rate, adult, male (per 1,000 male adults) (wdi_mortm)

Long tag: qog_std_cs_wdi_mortm

Original tag: wdi_mortm

Description:

Adult mortality rate is the probability of dying between the ages of 15 and 60–that is, the probability of a 15-year-old dying before reaching age 60, if subject to age-specific mortality rates of the specified year between those ages.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.8.86 Mortality rate, neonatal (per 1,000 live births) (wdi_mortnn)

Long tag: qog_std_cs_wdi_mortnn

Original tag: wdi_mortnn

Description:

Neonatal mortality rate is the number of neonates dying before reaching 28 days of age, per 1,000 live births in a given year.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.8.87 Mortality rate, under-5 (per 1,000 live births) (wdi_mortu5)

Long tag: qog_std_cs_wdi_mortu5

Original tag: wdi_mortu5

Description:

Under-five mortality rate is the probability per 1,000 that a newborn baby will die before reaching age five, if subject to age-specific mortality rates of the specified year.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.8.88 Mortality rate, under-5, female (per 1,000 live births) (wdi_mortu5f)

Long tag: qog_std_cs_wdi_mortu5f

Original tag: wdi_mortu5f

Description:

Under-five mortality rate, female is the probability per 1,000 that a newborn female baby will die before reaching age five, if subject to female age-specific mortality rates of the specified year.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.8.89 Mortality rate, under-5, male (per 1,000 live births) (wdi_mortu5m)

Long tag: qog_std_cs_wdi_mortu5m

Original tag: wdi_mortu5m

Description:

Under-five mortality rate, male is the probability per 1,000 that a newborn male baby will die before reaching age five, if subject to male age-specific mortality rates of the specified year.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.8.90 Population, total (wdi_pop)

Long tag: qog_std_cs_wdi_pop

Original tag: wdi_pop

Description:
Total population is based on the de facto definition of population, which counts all residents regardless of legal status or citizenship. The values shown are midyear estimates.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.8.91 Population ages 0-14 (percent of total population) (wdi_pop14)

Long tag: qog_std_cs_wdi_pop14

Original tag: wdi_pop14

Description:
Total population between the ages 0 to 14 as a percentage of the total population. Population is based on the de facto definition of population, which counts all residents regardless of legal status or citizenship.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.8.92 Population ages 15-64 (percent of total population) (wdi_pop1564)

Long tag: qog_std_cs_wdi_pop1564

Original tag: wdi_pop1564

Description:
Total population between the ages 15 to 64 as a percentage of the total population. Population is based on the de facto definition of population, which counts all residents regardless of legal status or citizenship.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.8.93 Population ages 65 and above (percent of total population) (wdi_pop65)

Long tag: qog_std_cs_wdi_pop65

Original tag: wdi_pop65

Description:
Population ages 65 and above as a percentage of the total population. Population is based on the de facto definition of population, which counts all residents regardless of legal status or citizenship.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.8.94 Population density (people per sq. km of land area) (wdi_popden)

Long tag: qog_std_cs_wdi_popden

Original tag: wdi_popden

Description:
Population density is midyear population divided by land area in square kilometers. Population is based on the de facto definition of population, which counts all residents regardless of legal status or citizenship–except for refugees not permanently settled in the country of asylum, who are generally considered part of the population of their country of origin. Land area is a country's total area, excluding area under inland water bodies, national claims to continental shelf, and exclusive economic zones. In most cases the definition of inland water bodies includes major rivers and lakes.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.8.95 Population, female (percent of total population) (wdi_popf)

Long tag: qog_std_cs_wdi_popf

Original tag: wdi_popf

Description:
Female population is the percentage of the population that is female. Population is based on the de facto definition of population, which counts all residents regardless of legal status or citizenship.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.8.96 Population growth (annual percent) (wdi_popgr)

Long tag: qog_std_cs_wdi_popgr

Original tag: wdi_popgr

Description:
Annual population growth rate for year t is the exponential rate of growth of midyear population from year t-1 to t, expressed as a percentage. Population is based on the de facto definition of population, which counts all residents regardless of legal status or citizenship.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.8.97 Rural population (percent of total population) (wdi_poprul)

Long tag: qog_std_cs_wdi_poprul

Original tag: wdi_poprul

Description:
Rural population refers to people living in rural areas as defined by national statistical offices. It is calculated as the difference between total population and urban population.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.8.98 Rural population growth (annual percent) (wdi_poprulgr)

Long tag: qog_std_cs_wdi_poprulgr

Original tag: wdi_poprulgr

Description:
Rural population growth. Rural population refers to people living in rural areas as defined by national statistical offices. It is calculated as the difference between total population and urban population.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.8.99 Urban population (percent of total population) (wdi_popurb)

Long tag: qog_std_cs_wdi_popurb

Original tag: wdi_popurb

Description:
Urban population refers to people living in urban areas as defined by national statistical offices. The data are collected and smoothed by United Nations Population Division.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.8.100 Urban population growth (annual percent) (wdi_popurbagr)

Long tag: qog_std_cs_wdi_popurbagr

Original tag: wdi_popurbagr

Description:
Urban population growth. Urban population refers to people living in urban areas as defined by national statistical offices. It is calculated using World Bank population estimates and urban ratios from the United Nations World Urbanization Prospects.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.8.101 Women who were first married by age 15 (percent of women ages 20-24) (wdi_wofm15)

Long tag: qog_std_cs_wdi_wofm15

Original tag: wdi_wofm15

Description:
Women who were first married by age 15 (percent of women ages 20-24). Women who were first married by age 15 refers to the percentage of women ages 20-24 who were first married by age 15.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.8.102 E-Participation Index . 0-1 (best) (wef_epi)

Long tag: qog_std_cs_wef_epi

Original tag: wef_epi

Description:
E-Participation Index . 0-1 (best). This indicator assesses the use of online services to facilitate the provision of information by governments to citizens ("e-information sharing"), interaction with stakeholders ("e-consultation"), and engagement in decision-making processes. Original sources: United Nations, Department of Economic and Social Affairs (UNDESA)

2.17.9 Conflict and Military Service

This category includes variables concerning armed conflict, including civil war and terrorism, govern- ment revenue and spending related to violent conflict (military expenditure, arms imports, military personnel).

2.17.9.1 Member of an Alliance (atop_ally)

Long tag: qog_std_cs_atop_ally

Original tag: atop_ally

Description:
Member of an Alliance

0. Not a member of an alliance
1. Member of an alliance

Variable citation: Leeds, B., Ashley, J., Ritter, S. M., McLaughlin, M., & Long, A. G. (2002). Alliance treaty obligations and provisions, 1815–1944. *International Interactions*, 28, 237–260

2.17.9.2 Consultancy Obligation (atop_consult)

Long tag: qog_std_cs_atop_consult

Original tag: atop_consult

Description:
Consultancy Obligation

0. Has no Consultancy obligations
1. Has Consultancy obligations

Variable citation: Leeds, B., Ashley, J., Ritter, S. M., McLaughlin, M., & Long, A. G. (2002). Alliance treaty obligations and provisions, 1815–1944. *International Interactions*, 28, 237–260

2.17.9.3 Defensive Obligation (atop_defensive)

Long tag: qog_std_cs_atop_defensive

Original tag: atop_defensive

Description:
Defensive Obligation

0. Has no defensive obligations
1. Has defensive obligations

Variable citation: Leeds, B., Ashley, J., Ritter, S. M., McLaughlin, M., & Long, A. G. (2002). Alliance treaty obligations and provisions, 1815–1944. *International Interactions*, 28, 237–260

2.17.9.4 Neutrality Obligation (atop_neutrality)

Long tag: qog_std_cs_atop_neutrality

Original tag: atop_neutrality

Description:
Neutrality Obligation

0. Has no Neutrality obligations
1. Has Neutrality obligations

Variable citation: Leeds, B., Ashley, J., Ritter, S. M., McLaughlin, M., & Long, A. G. (2002). Alliance treaty obligations and provisions, 1815–1944. *International Interactions*, 28, 237–260

2.17.9.5 Non-Aggression Obligation (atop_nonagg)

Long tag: qog_std_cs_atop_nonagg

Original tag: atop_nonagg

Description:
Non-Agression Obligation

0. Has no Non-Agression obligations
1. Has Non-Agression obligations

Variable citation: Leeds, B., Ashley, J., Ritter, S. M., McLaughlin, M., & Long, A. G. (2002). Alliance treaty obligations and provisions, 1815–1944. *International Interactions*, 28, 237–260

2.17.9.6 Number of Alliances (atop_number)

Long tag: qog_std_cs_atop_number

Original tag: atop_number

Description:
Number of Alliances

Variable citation: Leeds, B., Ashley, J., Ritter, S. M., McLaughlin, M., & Long, A. G. (2002). Alliance treaty obligations and provisions, 1815–1944. *International Interactions*, 28, 237–260

2.17.9.7 Offensive Obligation (atop_offensive)

Long tag: qog_std_cs_atop_offensive

Original tag: atop_offensive

Description:
Offensive Obligation

0. Has no offensive obligations
1. Has offensive obligations

Variable citation: Leeds, B., Ashley, J., Ritter, S. M., McLaughlin, M., & Long, A. G. (2002). Alliance treaty obligations and provisions, 1815–1944. *International Interactions*, 28, 237–260

2.17.9.8 Transition Year (atop_transyr)

Long tag: qog_std_cs_atop_transyr

Original tag: atop_transyr

Description:
Transition Year

Variable citation: Leeds, B., Ashley, J., Ritter, S. M., McLaughlin, M., & Long, A. G. (2002). Alliance treaty obligations and provisions, 1815–1944. *International Interactions*, 28, 237–260

2.17.9.9 Global Militarization Index (bicc_gmi)

Long tag: qog_std_cs_bicc_gmi

Original tag: bicc_gmi

Description:
The Global Militarization Index is divided into three overarching categories: expenditure, personnel and heavy weapons. (See variables bicc_milexp, bicc_milper, and bicc_hw).

In order to increase the compatibility between different indicators and preventing extreme values from crating distortions when normalizing data, in a first step every indicator was represented in a logarithm with the factor 10. Second, all data was normalized using the formula x=(y-min)/(max-min), with min and max representing, respectively, the lowest and the highest value of the logarithm. In a third step, every indicator was weighted in accordance to a subjective factor, reflecting the relative importance attributed to it by BICC researchers. In order to calculate the final score, the weighted indicators were added together and then normalized one last time on a scale ranging from 0 to 1,000. For better comparison of individual years, all years were finally normalized.

Weighting Factors used:
Military expenditures as percentage of GDP - 5
Military expenditures in relation to health spending - 3
Military and paramilitary personnel in relation to population - 4
Military reservers in relation to population - 2
Military and paramilitary personnel in relation to physicians - 2
Heavy weapons in relation to population - 4

Variable citation: Mutschler, Max. M and Marius Bales. (2020). *Global Militarization Index 2020*. Bonn International Center for Conversion BICC. https://gmi.bicc.de/

2.17.9.10 Heavy Weapons Index (bicc_hw)

Long tag: qog_std_cs_bicc_hw

Original tag: bicc_hw

Description:

The GMI takes into consideration the number of an armed forces' heavy weapons in relation to the total population. Heavy weapons are defined here as any piece of military equipment which fits into either one of four categories: armored vehicles (armored personnel carriers, light tanks, main battle tanks), artillery (multiple rocket launchers, self-propelled artillery, towed artillery) above 100mm caliber, combat aircraft (attack helicopters, fixed-wing fighter aircraft), and major fighting ships (submarines, major surface combatants above corvette size).

Data on weapons holdings was collected by BICC from different sources, mainly the Military Balance from ISS. Data on small arms and light weapons (SALW) is not only extremely difficult to obtain but also unreliable and was thus not included in the GMI.

Variable citation: Mutschler, Max. M and Marius Bales. (2020). *Global Militarization Index 2020*. Bonn International Center for Conversion BICC. https://gmi.bicc.de/

2.17.9.11 Military Expenditure Index (bicc_milexp)

Long tag: qog_std_cs_bicc_milexp

Original tag: bicc_milexp

Description:

Military spending in relation to GDP and health spending are the most important indicators for determining the level of militarization. Financial resources which are made available via the military budget by a government are an important factor which affects capacities and size of a state's armed forces. The other indicator the GMI uses is the comparison between the total military budget and government spending on health services.

Figures for military expenditure are compiled from the data base of the Stockholm Peace Research Institute SIPRI. Even though SIPRI may currently be regarded as the most reliable source, data on military expenditure has to be treated with extreme caution. For many countries, especially in the developing world and autocratic states, the figures are but rough estimates. In cases where SIPRI does not provide any up-to-date information, we adopted the latest available figures provided they were no older than three years.

Data on gross domestic product was taken from the International Monetary Fund. Data on health expenditure used have been extracted from the data base of the World Health Organization.

Variable citation: Mutschler, Max. M and Marius Bales. (2020). *Global Militarization Index 2020*. Bonn International Center for Conversion BICC. https://gmi.bicc.de/

2.17.9.12 Military Personnel Index (bicc_milper)

Long tag: qog_std_cs_bicc_milper

Original tag: bicc_milper

Description:

The level of militarization is also represented by the relation of military personnel to the total population and physicians. The first and most important indicator in this category is the active (para)military personnel to the total population. Paramilitary personnel were included here, since in many countries the regular military alone does not adequately reflect the total size of the armed forces.

The main criterion for coding an organizational entity as either military or paramilitary is that the forces in question are under the direct control of the government in addition to being armed, uniformed and garrisoned.

For a comprehensive presentation of the available personnel and an adequate representation of the relative level of militarization, a second indicator in this category takes into account the percentage of reserve forces in the total population. This factor is relevant for some countries, such as Switzerland that have a comparably small standing army but a more substantial amount of available reserves within society. The third indicator compares the total amount of military and paramilitary forces with the number of physicians in a country in order to express the relation between military and non-military expertise in a society.

All data on military personnel was compiled from the Military Balance, the yearbook published by the Institute for Strategic and International Studies (IISS). Population size figures were taken from the Vital Statistics Report of the United Nations; data on the number of physicians from the World Health Organization.

Variable citation: Mutschler, Max. M and Marius Bales. (2020). *Global Militarization Index 2020*. Bonn International Center for Conversion BICC. https://gmi.bicc.de/

2.17.9.13 Monopoly on the Use of Force (bti_muf)

Long tag: qog_std_cs_bti_muf

Original tag: bti_muf

Description:
To what extent does the state's monopoly on the use of force cover the entire territory of the country? 1-10.

1. There is no state monopoly on the use of force.
4. The state's monopoly on the use of force is established only in key parts of the country. Large areas of the country are controlled by guerrillas, paramilitaries or clans.
7. The state's monopoly on the use of force is established nationwide in principle, but it is challenged by guerrillas, mafias or clans in territorial enclaves.
10. There is no competition with the state's monopoly on the use of force throughout the entire territory.

Variable citation: Donner, S., Hartmann, H., & Schwarz, R. (2020). *Transformation index of the bertelsmann stiftung 2020*. Bertelsmann Stiftung. `http://www.bti-project.org`

2.17.9.14 Political Terror Scale - Amnesty International (gd_ptsa)

Long tag: qog_std_cs_gd_ptsa

Original tag: gd_ptsa

Description:
Political Terror Scale Levels from the yearly country reports of Amnesty International:

1. Countries under a secure rule of law, people are not imprisoned for their view, and torture is rare or exceptional. Political murders are extremely rare.
2. There is a limited amount of imprisonment for nonviolent political activity. However, few persons are affected, torture and beatings are exceptional. Political murder is rare.
3. There is extensive political imprisonment, or a recent history of such imprisonment. Execution or other political murders and brutality may be common. Unlimited detention, with or without a trial, for political views is accepted.
4. Civil and political rights violations have expanded to large numbers of the population. Murders, disappearances, and torture are a common part of life. In spite of its generality, on this level terror affects those who interest themselves in politics or ideas.
5. Terror has expanded to the whole population. The leaders of these societies place no limits on the means or thoroughness with which they pursue personal or ideological goals.

Variable citation: Gibney, M., Cornett, L., Wood, R., Haschke, P., Arnon, D., Pisanò, A., Barrett, G., & Park, B. (2020). The political terror scale 1976-2019 [Data retrieved from the Political Terror Scale website]. `http://www.politicalterrorscale.org`

2.17.9.15 Political Terror Scale - Human Rights Watch (gd_ptsh)

Long tag: qog_std_cs_gd_ptsh

Original tag: gd_ptsh

Description:
Political Terror Scale Levels from the Human Rights Watch's World Reports:

1. Countries under a secure rule of law, people are not imprisoned for their view, and torture is rare or exceptional. Political murders are extremely rare.
2. There is a limited amount of imprisonment for nonviolent political activity. However, few persons are affected, torture and beatings are exceptional. Political murder is rare.
3. There is extensive political imprisonment, or a recent history of such imprisonment. Execution or other political murders and brutality may be common. Unlimited detention, with or without a trial, for political views is accepted.

2.17.9.17 Expenditure on defense, as percent of total gen. gov. exp. (gfs_def)

Long tag: qog_std_cs_gfs_def

Original tag: gfs_def

Description:

Total expenditure on defense, as the percentage of general government expenditure.

Variable citation: International Monetary Fund. (2019). Government finance statistics yearbook (gfsy) 2019. `https://data.imf.org/?sk=a0867067-d23c-4ebc-ad23-d3b015045405`

2.17.9.18 Ongoing Conflict (1-5 Higher intensity of conflict) (gpi_conf)

Long tag: qog_std_cs_gpi_conf

Original tag: gpi_conf

Description:

Ongoing Domestic and International Conflict (1 to 5, 5 refers to higher intensity of conflict) is one of the three subdomains of the GPI. It investigates the extent to which countries are involved in internal and external conflicts, as well as their role and duration of involvement in conflicts.

Variable citation: Institute for Economics and Peace. (2021). Global peace index 2021: Measuring peace in a complex world [Accessed 09-11-2021]. `http://visionofhumanity.org/reports`

2.17.9.19 Militarisation (1-5 Higher militarisation) (gpi_mil)

Long tag: qog_std_cs_gpi_mil

Original tag: gpi_mil

Description:

Militarisation (Scaled 1 to 5, 5 being more militarised) is one of the three subdomains of the GPI. It reflects the link between a country's level of military build-up and access to weapons and its level of peacefulness, both domestically and internationally.

Variable citation: Institute for Economics and Peace. (2021). Global peace index 2021: Measuring peace in a complex world [Accessed 09-11-2021]. `http://visionofhumanity.org/reports`

2.17.9.20 Riots and Protests after Election (nelda_rpae)

Long tag: qog_std_cs_nelda_rpae

Original tag: nelda_rpae

Description:

If there are protests and riots after elections, a "Yes" is coded. The riots and protests should at least somewhat be related to the handling or outcome of the election.

Variable citation: Hyde, S. D., & Marinov, N. (2012). Which elections can be lost? *Political Analysis*, 20(2), 191–201 Hyde, S. D., & Marinov, N. (2021). Codebook for national elections across democracy and autocracy dataset, 5.0. `https://nelda.co/`

2.17.9.21 Violence and Civilian Deaths before Election (nelda_vcdbe)

Long tag: qog_std_cs_nelda_vcdbe

Original tag: nelda_vcdbe

Description:

If there was any significant violence relating to the elections that resulted in civilian deaths, a "Yes" is coded. These deaths should be at least plausibly related to the election, though sometimes it is difficult to be certain. Deaths related to civil war that are not intended to influence the election, and are not caused by the election, should not be counted.

Variable citation: Hyde, S. D., & Marinov, N. (2012). Which elections can be lost? *Political Analysis*, 20(2), 191–201 Hyde, S. D., & Marinov, N. (2021). Codebook for national elections across democracy and autocracy dataset, 5.0. `https://nelda.co/`

2.17.9.22 Structure of central gov. expenditures, defence (oecd_gengovdistri_t1b)

Long tag: qog_std_cs_oecd_gengovdistri_t1b

Original tag: oecd_gengovdistri_t1b

Description:
Structure of central government expenditures, defence.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. `https://doi.org/10.1787/20752288`

2.17.9.23 Societal Violence Scale Index 1-5 (svs_ind)

Long tag: qog_std_cs_svs_ind

Original tag: svs_ind

Description:
The Societal Violence Scale is coded on a 5-point scale where:
1 Societal violence is limited in scope and severity, with relatively few victims and few perpetrators.
2 Societal violence is a problem, affecting a significant number of victims, albeit across few victim categories and of a less severe nature.
3 Societal violence is widespread and serious in nature. It affects a significant number of people across several victim categories.
4 Societal violence is pervasive in scope, severe in nature, assumes a variety of forms and affects a large proportion of the population typically across several victim categories and perpetrators.
5 Societal violence is ubiquitous in scope, egregious in nature and assumes a variety of forms. If affects a large proportion of the population, commonly crossing numerous victim groups and perpetrators.

Variable citation: Gibney, M., Cornett, L., & Haschke, P. (2021). The societal violence scale [Data retrieved from the Political Terror Scale website]. `http://www.politicalterrorscale.org/Data/Documentation-SVS.html`

2.17.9.24 Internal armed conflict (ucdp_type3)

Long tag: qog_std_cs_ucdp_type3

Original tag: ucdp_type3

Description:
Number of internal armed conflicts per country in a given year. Internal armed conflict occurs between the government of a state and one or more internal opposition group(s) without intervention from other states.

Variable citation: Pemstein, D., Meserve, S. A., & Melton, J. (2017). Democratic compromise: A latent variable analysis of ten measures of regime type. *Political Analysis*, 18(4), 426–449. `https://doi.org/10.1093/pan/mpq020`

2.17.9.25 Internationalized internal armed conflict (ucdp_type4)

Long tag: qog_std_cs_ucdp_type4

Original tag: ucdp_type4

Description:
Number of internationalized internal armed conflicts per country in a given year. An internationalized internal armed conflict occurs between the government of a state and one or more internal opposition group(s) with intervention from other states (secondary parties) on one or both sides.

Variable citation: Pemstein, D., Meserve, S. A., & Melton, J. (2017). Democratic compromise: A latent variable analysis of ten measures of regime type. *Political Analysis*, 18(4), 426–449. `https://doi.org/10.1093/pan/mpq020`

2.17.9.26 Global Terrorism Index (voh_gti)

Long tag: qog_std_cs_voh_gti

Original tag: voh_gti

Description:
Global Terrorism Index.

2.17.9.27 Political Stability and Absence of Violence/Terrorism, Estimate (wbgi_pve)

Long tag: qog_std_cs_wbgi_pve

Original tag: wbgi_pve

Description:
Political Stability and Absence of Violence- Estimate: "Political Stability and Absence of Violence/Terrorism" measures perceptions of the likelihood of political instability and/or politically-motivated violence, including terrorism.

Variable citation: Kaufmann, D., Kraay, A., & Mastruzzi, M. (2010). The worldwide governance indicators: A summary of methodology, data and analytical issues. *World Bank Policy Research Working Paper, 5430*

2.17.9.28 Political Stability and Absence of Violence/Terrorism, Number of Sources (wbgi_pvn)

Long tag: qog_std_cs_wbgi_pvn

Original tag: wbgi_pvn

Description:
Political Stability and Absence of Violence - Number of Sources.

Variable citation: Kaufmann, D., Kraay, A., & Mastruzzi, M. (2010). The worldwide governance indicators: A summary of methodology, data and analytical issues. *World Bank Policy Research Working Paper, 5430*

2.17.9.29 Political Stability and Absence of Violence/Terrorism, Standard Error (wbgi_pvs)

Long tag: qog_std_cs_wbgi_pvs

Original tag: wbgi_pvs

Description:
Political Stability and Absence of Violence - Standard Errors.

Variable citation: Kaufmann, D., Kraay, A., & Mastruzzi, M. (2010). The worldwide governance indicators: A summary of methodology, data and analytical issues. *World Bank Policy Research Working Paper, 5430*

2.17.9.30 Armed forces personnel (percent of total labor force) (wdi_afp)

Long tag: qog_std_cs_wdi_afp

Original tag: wdi_afp

Description:
Armed forces personnel are active duty military personnel, including paramilitary forces if the training, organization, equipment, and control suggest they may be used to support or replace regular military forces. Labor force comprises all people who meet the International Labour Organization's definition of the economically active population.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.9.31 Armed forces personnel, total (wdi_afpt)

Long tag: qog_std_cs_wdi_afpt

Original tag: wdi_afpt

Description:
Armed forces personnel are active duty military personnel, including paramilitary forces if the training, organization, equipment, and control suggest they may be used to support or replace regular military forces.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.9.32 Arms exports (SIPRI trend indicator values) (wdi_armexp)

Long tag: qog_std_cs_wdi_armexp

Original tag: wdi_armexp

Description:
Exports - Arms transfers cover the supply of military weapons through sales, aid, gifts, and those made through manufacturing licenses. Data cover major conventional weapons such as aircraft, armored vehicles, artillery, radar systems, missiles, and ships designed for military use. Excluded are transfers of other military equipment such as small arms and light weapons, trucks, small artillery, ammunition, support equipment, technology transfers, and other services.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.9.33 Arms imports (SIPRI trend indicator values) (wdi_armimp)

Long tag: qog_std_cs_wdi_armimp

Original tag: wdi_armimp

Description:

Imports - Arms transfers cover the supply of military weapons through sales, aid, gifts, and those made through manufacturing licenses. Data cover major conventional weapons such as aircraft, armored vehicles, artillery, radar systems, missiles, and ships designed for military use. Excluded are transfers of other military equipment such as small arms and light weapons, trucks, small artillery, ammunition, support equipment, technology transfers, and other services.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.9.34 Battle-related deaths (number of people) (wdi_brdeath)

Long tag: qog_std_cs_wdi_brdeath

Original tag: wdi_brdeath

Description:

Battle-related deaths are deaths in battle-related conflicts between warring parties in the conflict dyad (two conflict units that are parties to a conflict). Typically, battle-related deaths occur in warfare involving the armed forces of the warring parties. This includes traditional battlefield fighting, guerrilla activities, and all kinds of bombardments of military units, cities, and villages, etc. The targets are usually the military itself and its installations or state institutions and state representatives, but there is often substantial collateral damage in the form of civilians being killed in crossfire, in indiscriminate bombings, etc. All deaths–military as well as civilian–incurred in such situations, are counted as battle-related deaths.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.9.35 Military expenditure (percent of GDP) (wdi_expmil)

Long tag: qog_std_cs_wdi_expmil

Original tag: wdi_expmil

Description:

Military expenditure (percent of GDP). Military expenditures data from SIPRI are derived from the NATO definition, which includes all current and capital expenditures on the armed forces, including peacekeeping forces; defense ministries and other government agencies engaged in defense projects; paramilitary forces, if these are judged to be trained and equipped for military operations; and military space activities. Such expenditures include military and civil personnel, including retirement pensions of military personnel and social services for personnel; operation and maintenance; procurement; military research and development; and military aid (in the military expenditures of the donor country). Excluded are civil defense and current expenditures for previous military activities, such as for veterans' benefits, demobilization, conversion, and destruction of weapons. This definition cannot be applied for all countries, however, since that would require much more detailed information than is available about what is included in military budgets and off-budget military expenditure items. (For example, military budgets might or might not cover civil defense, reserves and auxiliary forces, police and paramilitary forces, dual-purpose forces such as military and civilian police, military grants in kind, pensions for military personnel, and social security contributions paid by one part of government to another).

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.9.36 Military expenditure (percent of general government expenditure) (wdi_expmilge)

Long tag: qog_std_cs_wdi_expmilge

Original tag: wdi_expmilge

Description:

Military expenditure (percent of central government expenditure). Military expenditures data from SIPRI are derived from the NATO definition, which includes all current and capital expenditures on the armed forces, including peacekeeping forces; defense ministries and other government agencies engaged in defense projects; paramilitary forces, if these are judged to be trained and equipped for military operations; and military space activities. Such expenditures include military and civil personnel, including retirement pensions of military personnel and social services for personnel; operation and maintenance; procurement; military research and development; and military aid (in the military expenditures of the donor country). Excluded are civil defense and current expenditures for previous military activities, such as for veterans' benefits, demobilization, conversion, and destruction of weapons. This definition cannot be applied for all countries, however, since that would require much more detailed information than is available about what is included in military budgets and off-budget military expenditure items. (For example, military budgets might or might not cover civil defense, reserves and auxiliary forces, police and paramilitary forces, dual-purpose forces such as military and civilian police, military grants in kind, pensions for military personnel, and social security contributions paid by one part of government to another.)

2.17.9.37 Internally displaced persons, new displacement-conflict and violence (number) (wdi_idpvc)

Long tag: qog_std_cs_wdi_idpvc

Original tag: wdi_idpvc

Description:

Internally displaced persons, new displacement associated with conflict and violence (number of cases). Internally displaced persons are defined according to the 1998 Guiding Principles (http://www.internal-displacement.org/publications/1998/ocha-guiding-principles-on-internal-displacement) as people or groups of people who have been forced or obliged to flee or to leave their homes or places of habitual residence, in particular as a result of armed conflict, or to avoid the effects of armed conflict, situations of generalized violence, violations of human rights, or natural or human-made disasters and who have not crossed an international border. "New Displacement" refers to the number of new cases or incidents of displacement recorded, rather than the number of people displaced. This is done because people may have been displaced more than once.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.9.38 Internally displaced persons, total displaced by conflict-violence (number) (wdi_idpvp)

Long tag: qog_std_cs_wdi_idpvp

Original tag: wdi_idpvp

Description:

Internally displaced persons, new displacement associated with conflict and violence (number of people). Internally displaced persons are defined according to the 1998 Guiding Principles (http://www.internal-displacement.org/publications/1998/ocha-guiding-principles-on-internal-displacement) as people or groups of people who have been forced or obliged to flee or to leave their homes or places of habitual residence, in particular as a result of armed conflict, or to avoid the effects of armed conflict, situations of generalized violence, violations of human rights, or natural or human-made disasters and who have not crossed an international border. "People displaced" refers to the number of people living in displacement as of the end of each year.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.9.39 Terrorism incidence. 1 (very high) - 100 (no incidence) (wef_ti)

Long tag: qog_std_cs_wef_ti

Original tag: wef_ti

Description:

Terrorism incidence. 1 (very high) - 100 (no incidence). This custom-built index is the weighted average of the number of terrorism-related casualties (injuries and fatalities) and the number of terrorist attacks, discounted by time. Each component is normalized separately and then averaged. Values range from 1 [highest incidence] to 100 [no incidence]. Original sources: National Consortium for the Study of Terrorism and Responses to Terrorism (START)

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. `http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf`

2.17.9.40 Number of cabinet ministers with a military title (wgov_minmil)

Long tag: qog_std_cs_wgov_minmil

Original tag: wgov_minmil

Description:

The number of cabinet ministers with a military title. It should be noted that the authors have not done any extra checks on this variable, and solely have relied on the information provided in the "Chief of State And Cabinet Members Of Foreign Governments" directory. The information is based on national customs. Thus, in some countries military titles are consistently used, while this is not the case in other countries, and the authors therefore encourage researchers to be cautious when using this variable.

Variable citation: Nyrup, J., & Bramwell, S. (2020). Who governs? a new global dataset on members of cabinets. *American Political Science Review*, 114(4), 1366–1374

2.17.9.41 Number of people with a military title, based on all entries for the country in (wgov_totmil)

Long tag: qog_std_cs_wgov_totmil

Original tag: wgov_totmil

Description:

The number of people with a military title, based on all entries for the country in the dataset. It should be noted that the authors have not done any extra checks on this variable, and solely have relied on the information provided in the "Chief of State And Cabinet Members Of Foreign Governments" directory. The information is based on national customs. Thus, in some countries military titles are consistently used, while this is not the case in other countries, and the authors therefore encourage researchers to be cautious when using this variable.

2.17.9.44 Political system: Having the army rule (wvs_psarmy)

Long tag: qog_std_cs_wvs_psarmy

Original tag: wvs_psarmy

Description:

I'm going to describe various types of political systems and ask what you think about each as a way of governing this country: Having the army rule

1. Very bad
2. Fairly bad
3. Fairly good
4. Very good

Variable citation: Haerpfer, C., Inglehart, R., Moreno, A., Welzel, C., Kizilova, K., Diez-Medrano, J., Lagos, M., Norris, P., Ponarin, E., & et al., B. P. (2021). 2.17.10 Environment

This category includes variables related to the environment including general features such as threatened species or agriculture, as well as climate-change variables, among others.

2.17.10.1 Threatened Species: Amphibians (bi_amphibians)

Long tag: qog_std_cs_bi_amphibians

Original tag: bi_amphibians

Description:
Threatened Species: Amphibians (Total number of species reported as endangered per country)

Variable citation: International Union for Conservation of Nature and Natural Resources. (2021). The IUCN Red List of Threatened Species. Version 2021-3. http://www.iucnredlist.org

2.17.10.2 Threatened Species: Birds (bi_birds)

Long tag: qog_std_cs_bi_birds

Original tag: bi_birds

Description:
Threatened Species: Birds (Total number of species reported as endangered per country)

Variable citation: International Union for Conservation of Nature and Natural Resources. (2021). The IUCN Red List of Threatened Species. Version 2021-3. http://www.iucnredlist.org

2.17.10.3 Threatened Species: Chromists (bi_chromists)

Long tag: qog_std_cs_bi_chromists

Original tag: bi_chromists

Description:
Threatened Species: Chromists (Total number of species reported as endangered per country)

Variable citation: International Union for Conservation of Nature and Natural Resources. (2021). The IUCN Red List of Threatened Species. Version 2021-3. http://www.iucnredlist.org

2.17.10.4 Threatened Species: Fishes (bi_fishes)

Long tag: qog_std_cs_bi_fishes

Original tag: bi_fishes

Description:
Threatened Species: Fishes (Total number of species reported as endangered per country)

Variable citation: International Union for Conservation of Nature and Natural Resources. (2021). The IUCN Red List of Threatened Species. Version 2021-3. http://www.iucnredlist.org

2.17.10.5 Threatened Species: Fungi (bi_fungi)

Long tag: qog_std_cs_bi_fungi

Original tag: bi_fungi

Description:
Threatened Species: Fungi (Total number of species reported as endangered per country)

Variable citation: International Union for Conservation of Nature and Natural Resources. (2021). The IUCN Red List of Threatened Species. Version 2021-3. http://www.iucnredlist.org

2.17.10.6 Threatened Species: Mammals (bi_mammals)

Long tag: qog_std_cs_bi_mammals

Original tag: bi_mammals

Description:
Threatened Species: Mammals (Total number of species reported as endangered per country)

Variable citation: International Union for Conservation of Nature and Natural Resources. (2021). The IUCN Red List of Threatened Species. Version 2021-3. http://www.iucnredlist.org

2.17.10.7 Threatened Species: Molluscs (bi_molluscs)

Long tag: qog_std_cs_bi_molluscs

Original tag: bi_molluscs

Description:
Threatened Species: Molluscs (Total number of species reported as endangered per country)

Variable citation: International Union for Conservation of Nature and Natural Resources. (2021). The IUCN Red List of Threatened Species. Version 2021-3. http://www.iucnredlist.org

2.17.10.8 Threatened Species: Other Inverts (bi_othinverts)

Long tag: qog_std_cs_bi_othinverts

Original tag: bi_othinverts

Description:
Threatened Species: Other Inverts (Total number of species reported as endangered per country)

Variable citation: International Union for Conservation of Nature and Natural Resources. (2021). The IUCN Red List of Threatened Species. Version 2021-3. http://www.iucnredlist.org

2.17.10.9 Threatened Species: Plants (bi_plants)

Long tag: qog_std_cs_bi_plants

Original tag: bi_plants

Description:
Threatened Species: Plants (Total number of species reported as endangered per country)

Variable citation: International Union for Conservation of Nature and Natural Resources. (2021). The IUCN Red List of Threatened Species. Version 2021-3. http://www.iucnredlist.org

2.17.10.10 Threatened Species: Reptiles (bi_reptiles)

Long tag: qog_std_cs_bi_reptiles

Original tag: bi_reptiles

Description:
Threatened Species: Reptiles (Total number of species reported as endangered per country)

Variable citation: International Union for Conservation of Nature and Natural Resources. (2021). The IUCN Red List of Threatened Species. Version 2021-3. http://www.iucnredlist.org

2.17.10.11 Threatened Species: Total (bi_total)

Long tag: qog_std_cs_bi_total

Original tag: bi_total

Description:
Threatened Species: Reptiles (Total number of species reported as endangered per country)

Variable citation: International Union for Conservation of Nature and Natural Resources. (2021). The IUCN Red List of Threatened Species. Version 2021-3. http://www.iucnredlist.org

2.17.10.12 Built-up land footprint- Ecological Footprint of Consumption (GHA per person) (ef_bul)

Long tag: qog_std_cs_ef_bul

Original tag: ef_bul

Description:
Built-up Land - Ecological Footprint in consumption. The built-up land Footprint is calculated based on the area of land covered by human infrastructure: transportation, housing, and industrial structures. Built-up land may occupy what would previously have been cropland. Measured in Global Hectares (GHA) per person.

Variable citation: Global Footprint Network. (2021). National footprint accounts data set (1961-2017), 2021 edition [c 2021 Global Footprint Network. National Footprint Accounts, 2021 Edition, www.footprintnetwork.org.]. `http://www.footprintnetwork.org`

2.17.10.13 Carbon footprint - Ecological Footprint of Consumption (GHA per person) (ef_carb)

Long tag: qog_std_cs_ef_carb

Original tag: ef_carb

Description:
Carbon - Ecological Footprint in consumption. The carbon Footprint, which represents the carbon dioxide emissions from burning fossil fuels in addition to the embodied carbon in imported goods. The carbon Footprint component is represented by the area of forest land required to sequester these carbon emissions. Currently, the carbon Footprint is the largest portion of humanity's Footprint.

Variable citation: Global Footprint Network. (2021). National footprint accounts data set (1961-2017), 2021 edition [c 2021 Global Footprint Network. National Footprint Accounts, 2021 Edition, www.footprintnetwork.org.]. `http://www.footprintnetwork.org`

2.17.10.14 Cropland footprint - Ecological Footprint of Consumption (GHA per person) (ef_crop)

Long tag: qog_std_cs_ef_crop

Original tag: ef_crop

Description:
Cropland - Ecological Footprint in consumption. Cropland is the most bioproductive of all the land-use types and consists of areas used to produce food and fibre for human consumption, feed for livestock, oil crops, and rubber. The cropland Footprint includes crop products allocated to livestock and aquaculture feed mixes, and those used for fibres and materials. Due to lack of globally consistent data sets, current cropland Footprint calculations do not yet take into account the extent to which farming techniques or unsustainable agricultural practices may cause long-term degradation of soil.

Variable citation: Global Footprint Network. (2021). National footprint accounts data set (1961-2017), 2021 edition [c 2021 Global Footprint Network. National Footprint Accounts, 2021 Edition, www.footprintnetwork.org.]. `http://www.footprintnetwork.org`

2.17.10.15 Total Ecological Footprint of Consumption (GHA per person) (ef_ef)

Long tag: qog_std_cs_ef_ef

Original tag: ef_ef

Description:
Total - Ecological Footprint in consumption. Measured in Global Hectares (GHA) per person.

Variable citation: Global Footprint Network. (2021). National footprint accounts data set (1961-2017), 2021 edition [c 2021 Global Footprint Network. National Footprint Accounts, 2021 Edition, www.footprintnetwork.org.]. `http://www.footprintnetwork.org`

2.17.10.16 Fish footprint - Ecological Footprint of Consumption (GHA per person) (ef_fg)

Long tag: qog_std_cs_ef_fg

Original tag: ef_fg

Description:
Fishing Ground - Ecological Footprint in consumption. The fishing grounds Footprint is calculated based on estimates of the maximum sustainable catch for a variety of fish species. These sustainable catch estimates are converted into an equivalent mass of primary production based on the various species' trophic levels. This estimate of maximum harvestable primary production is then divided amongst the continental shelf areas of the world. Fish caught and used in aquaculture feed mixes are included. Measured in Global Hectares (GHA) per person.

Variable citation: Global Footprint Network. (2021). National footprint accounts data set (1961-2017), 2021 edition [c 2021 Global Footprint Network. National Footprint Accounts, 2021 Edition, www.footprintnetwork.org.]. `http://www.footprintnetwork.org`

2.17.10.17 Forest product footprint - Ecological Footprint of Consumption (GHA per person) (ef_for)

Long tag: qog_std_cs_ef_for

Original tag: ef_for

Description:
Forest Production - Ecological Footprint in consumption. The forest product Footprint, which is calculated based on the amount of lumber, pulp, timber products, and fuel wood consumed by a population on a yearly basis. Measured in Global Hectares (GHA) per person.

Variable citation: Global Footprint Network. (2021). National footprint accounts data set (1961-2017), 2021 edition [c 2021 Global Footprint Network. National Footprint Accounts, 2021 Edition, www.footprintnetwork.org.]. `http://www.footprintnetwork.org`

2.17.10.18 Grazing footprint - Ecological Footprint of Consumption (GHA per person) (ef_gl)

Long tag: qog_std_cs_ef_gl

Original tag: ef_gl

Description:

Grazing - Ecological Footprint in consumption. Grazing land is used to raise livestock for meat, dairy, hide, and wool products. The grazing land Footprint is calculated by comparing the amount of livestock feed available in a country with the amount of feed required for all livestock in that year, with the remainder of feed demand assumed to come from grazing land. Measured in Global Hectares (GHA) per person.

Variable citation: Global Footprint Network. (2021). National footprint accounts data set (1961-2017), 2021 edition [c 2021 Global Footprint Network. National Footprint Accounts, 2021 Edition, www.footprintnetwork.org.]. `http://www.footprintnetwork.org`

2.17.10.19 Agriculture (0-100) (epi_agr)

Long tag: qog_std_cs_epi_agr

Original tag: epi_agr

Description:

Agriculture. It is constructed from the Sustainable Nitrogen Management Index, which measures the Euclidean distance from an ideal point with optimal nitrogen use efficiency (NUE) and crop yield.

Variable citation: Wendling, Z., Emerson, J., de Sherbinin, A., Esty, D., & M.A. Levy, e. a. (2020). 2020 environmental performance index [Date accessed: 20 December 2021]. *New Haven, CT: Yale Center for Environmental Law and Policy.* `https://epi.envirocenter.yale.edu/`

2.17.10.20 Air Quality (0-100) (epi_air)

Long tag: qog_std_cs_epi_air

Original tag: epi_air

Description:

Air Quality. It measures household air pollution (HAP) as the health risk posed by the incomplete combustion of solid fuels, using the number of age-standardized disability-adjusted life-years (DALYs) lost per 100,000 persons due to this risk. PM2.5 exposure: as a measure of chronic exposure, it uses the population-weighted average ambient concentration of PM2.5 in each country. PM2.5 exceedance: as a measure of acute exposure, it uses the proportion of the population in each year that is exposed to ambient PM2.5 concentrations that exceed World Health Organization (WHO) thresholds of 10, 15, 25, and 35 micrograms per meter cubed. These four proportions are averaged to produce a summary of the distribution of exposure levels in the country's population.

2.17.10.21 Pollution Emissions (0-100) (epi_ape)

Long tag: qog_std_cs_epi_ape

Original tag: epi_ape

Description:

Air Pollution. The Pollution Emissions issue category measures progress on managing the emissions of two primary air pollutants. It is composed of two indicators, adjusted emission growth rates for SO2 and NOX.

Variable citation: Wendling, Z., Emerson, J., de Sherbinin, A., Esty, D., & M.A. Levy, e. a. (2020). 2020 environmental performance index [Date accessed: 20 December 2021]. *New Haven, CT: Yale Center for Environmental Law and Policy.* `https://epi.envirocenter.yale.edu/`

2.17.10.22 Biodiversity and Habitat (0-100) (epi_bdh)

Long tag: qog_std_cs_epi_bdh

Original tag: epi_bdh

Description:

Biodiversity and Habitat. This indicator includes:

1 Terrestrial biome protection (national weights). The percentage of biomes in protected areas, weighted by national composition of biomes.
2 Terrestrial biome protection (global weights). The percentage of biomes in protected areas, weighted by global composition of biomes.
3 Marine protected areas. The percentage of marine protected areas (MPAs) within a country's exclusive economic zone (EEZ).
4 Species Protection Index. The average area of species' distributions in a country with protected areas.

5 Protected Area Representativeness Index. The extent to which terrestrial protected areas are ecologically representative.
6 Species Habitat Index. The proportion of habitat within a country remaining, relative to a baseline set in the year 2001.
7 Biodiversity Habitat Index. The effects of habitat loss, degradation, and
fragmentation on the expected retention of terrestrial biodiversity.

Variable citation: Wendling, Z., Emerson, J., de Sherbinin, A., Esty, D., & M.A. Levy, e. a. (2020). 2020 environmental performance index [Date accessed: 20 December 2021]. *New Haven, CT: Yale Center for Environmental Law and Policy.* `https://epi.envirocenter.yale.edu/`

2.17.10.23 Climate Change (0-100) (epi_cch)

Long tag: qog_std_cs_epi_cch

Original tag: epi_cch

Description:

The Climate Change issue category measures progress to combat global climate change, which exacerbates all other environmental threats and imperils human health and safety. It is composed of eight indicators: adjusted emission growth rates for four greenhouse gases (CO2, CH4, F-gases, and N2O) and one climate pollutant (black carbon); growth rate in CO2 emissions from land cover; greenhouse gas intensity growth rate; and greenhouse gas emissions per capita.

Variable citation: Wendling, Z., Emerson, J., de Sherbinin, A., Esty, D., & M.A. Levy, e. a. (2020). 2020 environmental performance index [Date accessed: 20 December 2021]. *New Haven, CT: Yale Center for Environmental Law and Policy.* `https://epi.envirocenter.yale.edu/`

2.17.10.24 Ecosystem Services (0-100) (epi_ecs)

Long tag: qog_std_cs_epi_ecs

Original tag: epi_ecs

Description:

The new Ecosystem Services issue category recognizes the important services ecosystems provide to human and environmental well-being, including carbon sequestration and storage, biodiversity habitat, nutrient cycling, and coastal protection. It consists of three indicators to evaluate the state of these ecosystems: tree cover loss (percent90), along with two new pilot indicators for 2020 - grassland loss (percent5) and wetland loss (percent5).

Variable citation: Wendling, Z., Emerson, J., de Sherbinin, A., Esty, D., & M.A. Levy, e. a. (2020). 2020 environmental performance index [Date accessed: 20 December 2021]. *New Haven, CT: Yale Center for Environmental Law and Policy.* `https://epi.envirocenter.yale.edu/`

2.17.10.25 Environmental Performance Index (0-100) (epi_epi)

Long tag: qog_std_cs_epi_epi

Original tag: epi_epi

Description:

The 2020 Environmental Performance Index (EPI) scores 180 countries on 32 performance indicators across ten issue categories covering environmental health and ecosystem vitality. The 2020 EPI represents a composite index. The EPI researchers begin by gathering data on 32 individual metrics of environmental performance. These metrics are aggregated into a hierarchy beginning with eleven issue categories: Air Quality, Sanitation
Drinking Water, Heavy Metals, Waste Management, Biodiversity and Habitat, Ecosystem Services, Fisheries, Climate Change, Pollution Emissions, Water Resources, and Agriculture.

These issue categories are then combined into two policy objectives, Environmental Health and Ecosystem Vitality, and then finally consolidated into the overall EPI. To allow for meaningful comparisons, the EPI researchers construct scores for each of the 32 indicators, placing them onto a common scale where 0 indicates worst performance and 100 indicates best performance. How far a country is from achieving international targets of sustainability determines its placement on this scale.

Variable citation: Wendling, Z., Emerson, J., de Sherbinin, A., Esty, D., & M.A. Levy, e. a. (2020). 2020 environmental performance index [Date accessed: 20 December 2021]. *New Haven, CT: Yale Center for Environmental Law and Policy.* `https://epi.envirocenter.yale.edu/`

2.17.10.26 Ecosystem Vitality (0-100) (epi_ev)

Long tag: qog_std_cs_epi_ev

Original tag: epi_ev

Description:

The Ecosystem Vitality policy objective measures how well countries are preserving, protecting, and enhancing ecosystems and the services they provide. It comprises 60percent of the total EPI score and is

made up of seven issue categories: Biodiversity
Habitat (25percent), Ecosystem Services (10percent), Fisheries (10percent), Climate Change (40percent), Pollution Emissions (5percent), Agriculture (5percent), and Water Resources (5percent).

Variable citation: Wendling, Z., Emerson, J., de Sherbinin, A., Esty, D., & M.A. Levy, e. a. (2020). 2020 environmental performance index [Date accessed: 20 December 2021]. *New Haven, CT: Yale Center for Environmental Law and Policy.* `https://epi.envirocenter.yale.edu/`

2.17.10.27 Fisheries (0-100) (epi_fsh)

Long tag: qog_std_cs_epi_fsh

Original tag: epi_fsh

Description:
The Fisheries issue category measures the health and sustainability of the world's fisheries. It is made up of three indicators: fish stock status, marine trophic index, and fish caught by trawling.

Variable citation: Wendling, Z., Emerson, J., de Sherbinin, A., Esty, D., & M.A. Levy, e. a. (2020). 2020 environmental performance index [Date accessed: 20 December 2021]. *New Haven, CT: Yale Center for Environmental Law and Policy.* `https://epi.envirocenter.yale.edu/`

2.17.10.28 Sanitation and Drinking Water (0-100) (epi_h2o)

Long tag: qog_std_cs_epi_h2o

Original tag: epi_h2o

Description:
Sanitation
Drinking Water. This indicator includes:

1 Unsafe sanitation. EPI researchers measure sanitation as the proportion of a country's population exposed to health risks from their access to sanitation, defined by the primary toilet type used by households.
2 Unsafe drinking water. EPI researchers measure drinking water as the proportion of a country's population exposed to health risks from their access to drinking water, defined by the primary water source used by households and the household water treatment, or the treatment that happens at the point of water collection.

Both sanitation and drinking water are measured using the number of age-standardized disability-adjusted life-years (DALYs) lost per 100,000 persons. Minimizing the health risks posed from unsafe sanitation and drinking water is a vital step in evaluating a country's ability to maintain clean water systems and minimize contact with dangerous bacteria and viruses.

Variable citation: Wendling, Z., Emerson, J., de Sherbinin, A., Esty, D., & M.A. Levy, e. a. (2020). 2020 environmental performance index [Date accessed: 20 December 2021]. *New Haven, CT: Yale Center for Environmental Law and Policy.* `https://epi.envirocenter.yale.edu/`

2.17.10.29 Heavy Metals (0-100) (epi_hmt)

Long tag: qog_std_cs_epi_hmt

Original tag: epi_hmt

Description:
Heavy Metals. It includes the indicator Lead Exposure. EPI researchers measure lead exposure using the number of age-standardized disability-adjusted life-years (DALYs) lost per 100,000 persons due to this risk.

Variable citation: Wendling, Z., Emerson, J., de Sherbinin, A., Esty, D., & M.A. Levy, e. a. (2020). 2020 environmental performance index [Date accessed: 20 December 2021]. *New Haven, CT: Yale Center for Environmental Law and Policy.* `https://epi.envirocenter.yale.edu/`

2.17.10.30 Waste Management (0-100) (epi_wmg)

Long tag: qog_std_cs_epi_wmg

Original tag: epi_wmg

Description:
The Waste Management issue category recognizes the threats of solid waste to human health. It is based on one indicator, controlled solid waste.

Variable citation: Wendling, Z., Emerson, J., de Sherbinin, A., Esty, D., & M.A. Levy, e. a. (2020). 2020 environmental performance index [Date accessed: 20 December 2021]. *New Haven, CT: Yale Center for Environmental Law and Policy.* `https://epi.envirocenter.yale.edu/`

2.17.10.31 Water Resources (0-100) (epi_wrs)

Long tag: qog_std_cs_epi_wrs

Original tag: epi_wrs

Description:
The Water Resources issue category measures the extent to which humans are mitigating our threats to aquatic ecosystems. It is based on one indicator: wastewater treatment.

Variable citation: Wendling, Z., Emerson, J., de Sherbinin, A., Esty, D., & M.A. Levy, e. a. (2020). 2020 environmental performance index [Date accessed: 20 December 2021]. *New Haven, CT: Yale Center for Environmental Law and Policy*. `https://epi.envirocenter.yale.edu/`

2.17.10.32 Employment in Agriculture, Forestry, Fishing, Mining, Quarry (Female) percenttot (eu_sctabf)

Long tag: qog_std_cs_eu_sctabf

Description:

Total expenditure on environment protection, as the percentage of general government expenditure.

Variable citation: International Monetary Fund. (2019). Government finance statistics yearbook (gfsy) 2019. `https://data.imf.org/?sk=a0867067-d23c-4ebc-ad23-d3b015045405`

2.17.10.50 The Region of the Country (ht_region)

Long tag: qog_std_cs_ht_region

Original tag: ht_region

Description:

This is a tenfold politico-geographic classification of world regions, based on a mixture of two considerations: geographical proximity (with the partial exception of category 5 below) and demarcation by area specialists having contributed to a regional understanding of democratization. The categories are as follow:
1. Eastern Europe and post Soviet Union (including Central Asia)
2. Latin America (including Cuba, Haiti
the Dominican Republic)
3. North Africa
the Middle East (including Israel, Turkey
Cyprus)
4. Sub-Saharan Africa
5. Western Europe and North America (including Australia
New Zealand)
6. East Asia (including Japan
Mongolia)
7. South-East Asia
8. South Asia
9. The Pacific (excluding Australia
New Zealand)
10. The Caribbean (including Belize, Guyana
Suriname, but excluding Cuba, Haiti
the Dominican Republic)

2.17.10.51 Natural Resource Protection Indicator (nrmi_nrpi)

Long tag: qog_std_cs_nrmi_nrpi

Original tag: nrmi_nrpi

Description:

Natural Resource Protection Indicator assesses whether a country is protecting at least 17percent of all of its biomes (e.g. deserts, forests, grasslands, aquatic, and tundra). It is designed to capture the comprehensiveness of a government's commitment to habitat preservation and biodiversity protection. The World Wildlife Fund provides the underlying biome data, and the United Nations Environment Program World Conservation Monitoring Center provides the underlying data on protected areas.

Variable citation: Center for International Earth Science Information Network - CIESIN - Columbia University. (2019). Natural resource protection and child health indicators, 2020 release [Accessed on: 20-12-2021]. `https://doi.org/10.7927/r6mv-sv82`

2.17.10.52 Percentage of desert in 2012 (nunn_desert)

Long tag: qog_std_cs_nunn_desert

Original tag: nunn_desert

Description:

The percentage of the land surface area of each country covered by sandy desert, dunes, rocky or lava flows, was calculated on the basis of the desert layer of the Collins Bartholomew World Premium digital map data (Collins Bartholomew, 2005) and the country boundaries described above. This was initially computed as a

cruder measure of soil (in)fertility for an early draft of the paper and is no longer used in the final version. Nunn and Puga have left it in the dataset in case it is of use to other researchers.

Variable citation: Nunn, N., & Puga, D. (2012). Ruggedness: The blessing of bad geography in Africa. *Review of Economics and Statistics*, 94(1), 20–36

2.17.10.53 Average distance to nearest ice-free coast (1000 km) in 2012 (nunn_dist_coast)

Long tag: qog_std_cs_nunn_dist_coast

Original tag: nunn_dist_coast

Description:

Average distance to nearest ice-free coast (1000 km). To calculate the average distance to the closest ice-free coast in each country, Nunn and Puga first compute the distance to the nearest ice-free coast for every point in the country in equi-rectangular projection with standard parallels at 30 degrees, on the basis of sea and sea ice area features contained in the fifth edition of the Digital Chart of the World (US National Imagery and Mapping Agency, 2000) and the country boundaries described above. Then Nunn and Puga average this distance across all land in each country not covered by inland water features. Units are thousands of kilometres.

Variable citation: Nunn, N., & Puga, D. (2012). Ruggedness: The blessing of bad geography in Africa. *Review of Economics and Statistics*, 94(1), 20–36

2.17.10.54 Percentage within 100 km of ice-free coast in 2012 (nunn_near_coast)

Long tag: qog_std_cs_nunn_near_coast

Original tag: nunn_near_coast

Description:

Within 100 km of ice-free coast. On the basis of the same data used to calculate the average distance to nearest ice-free coast, Nunn and Puga calculate the percentage of the land surface area of each country that is within 100 km of the nearest ice-free coast.

Variable citation: Nunn, N., & Puga, D. (2012). Ruggedness: The blessing of bad geography in Africa. *Review of Economics and Statistics*, 94(1), 20–36

2.17.10.55 Ruggedness (Terrain Ruggedness Index, 100 m) in 2012 (nunn_rugged)

Long tag: qog_std_cs_nunn_rugged

Original tag: nunn_rugged

Description:

This is the Terrain Ruggedness Index originally devised by Riley, DeGloria, and Elliot (1999) to quantify topographic heterogeneity in wildlife habitats providing concealment for preys and lookout posts. The source of elevation data is GTOPO30 (US Geological Survey, 1996), a global elevation data set developed through a collaborative international effort led by staff at the US Geological Survey's Center for Earth Resources Observation and Science (EROS). Elevations in GTOPO30 are regularly spaced at 30 arc-seconds across the entire surface of the Earth on a map using a geographic projection, so the sea-level surface distance between two adjacent grid points on a meridian is half a nautical mile or, equivalently, 926 metres. After calculating the Terrain Ruggedness Index for each point on the grid, Nunn and Puga average across all grid cells in the country not covered by water to obtain the average terrain ruggedness of the country's land area. Since the sea-level surface that corresponds to a 30 by 30 arcsecond cell varies in proportion to the cosine of its latitude, when calculating the average terrain ruggedness — or the average of any other variable — for each country, Nunn and Puga weigh each cell by its latitude-varying sea-level surface. Nunn and Puga assign land to countries — for this and other variables — using digital boundary data based on the fifth edition of the Digital Chart of the World (US National Imagery and Mapping Agency, 2000), which they have updated to reflect 2000 country boundaries using information from the International Organization for Standardization ISO 3166 Maintenance Agency and other sources. Nunn and Puga exclude areas covered by permanent inland water area features contained in the same edition of the Digital Chart of the World. The units for the terrain ruggedness index correspond to the units used to measure elevation differences. In our calculation, ruggedness is measured in hundreds of metres of elevation difference for grid points 30 arc-seconds (926 metres on the equator or any meridian) apart.

Variable citation: Nunn, N., & Puga, D. (2012). Ruggedness: The blessing of bad geography in Africa. *Review of Economics and Statistics*, 94(1), 20–36

2.17.10.56 Percentage of tropical climate in 2012 (nunn_tropical)

Long tag: qog_std_cs_nunn_tropical

Original tag: nunn_tropical

Description:

Tropical climate. Using detailed temperature and precipitation data from the Climatic Research Unit of the University of East Anglia and the Global Precipitation Climatology Centre of the German Nunn and

Pugaather Service, Kottek, Grieser, Beck, Rudolf, and Rubel (2006) classify each cell on a 30 arc-minute grid covering the entire land area of the Earth into one of 31 climates in the widely-used Köppen-Geiger climate classification. Based on these data and the country boundaries described above, Nunn and Puga calculate the percentage of the land surface area of each country that has any of the four Köppen-Geiger tropical climates.

Variable citation: Nunn, N., & Puga, D. (2012). Ruggedness: The blessing of bad geography in Africa. *Review of Economics and Statistics*, 94(1), 20–36

2.17.10.62 Total amount generated of municipal waste (oecd_waste_t1b)

Long tag: qog_std_cs_oecd_waste_t1b

Original tag: oecd_waste_t1b

Description:
Total amount generated of municipal waste.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. `https://doi.org/10.1787/20752288`

2.17.10.63 The Ocean Health Index (ohi_ohi)

Long tag: qog_std_cs_ohi_ohi

Original tag: ohi_ohi

Description:

The Ocean Health Index establishes reference points for achieving ten widely accepted socio-ecological objectives, and scores the oceans adjacent to 171 countries and territories on how successfully they deliver these goals. Evaluated globally and by country, these ten public goals represent the wide range of benefits that a healthy ocean can provide; each country's overall score is the average of its respective goal scores. The ten socio-ecological objectives are: Food Provision, Artisanal Fishing Opportunities, Natural Products, Carbon Storage, Coastal Protection, Coastal Livelihoods
Economies, Tourism
Recreation, Sense of Place, Clean Waters, Biodiversity.

2.17.10.67 Minimum Atlantic distance (1,000 of kms) (slavet_mindistatl)

Long tag: qog_std_cs_slavet_mindistatl

Original tag: slavet_mindistatl

Description:

Shortest sailing distances to the locations of demand in the trans-Atlantic slave trades.

Variable citation: Nunn, N. (2008). The long term effects of africa's slave trades. *Quarterly Journal of Economics*, 123, 139–176

2.17.10.68 Minimum Indian distance (1,000 of kms) (slavet_mindistind)

Long tag: qog_std_cs_slavet_mindistind

Original tag: slavet_mindistind

Description:

Shortest sailing distances to the locations of demand in the Indian Ocean slave trades.

Variable citation: Nunn, N. (2008). The long term effects of africa's slave trades. *Quarterly Journal of Economics*, 123, 139–176

2.17.10.69 Minimum Red Sea distance (1,000 of kms) (slavet_mindistred)

Long tag: qog_std_cs_slavet_mindistred

Original tag: slavet_mindistred

Description:
Shortest overland distances to the locations of demand in the Red Sea slave trades.

Variable citation: Nunn, N. (2008). The long term effects of africa's slave trades. *Quarterly Journal of Economics*, 123, 139–176

2.17.10.70 Minimum Saharan distance (1,000 of kms) (slavet_mindistsah)

Long tag: qog_std_cs_slavet_mindistsah

Original tag: slavet_mindistsah

Description:
Shortest overland distances to the locations of demand in the trans-Saharan slave trades.

Variable citation: Nunn, N. (2008). The long term effects of africa's slave trades. *Quarterly Journal of Economics*, 123, 139–176

2.17.10.71 Agricultural irrigated land (percent of total agricultural land) (wdi_agrland)

Long tag: qog_std_cs_wdi_agrland

Original tag: wdi_agrland

Description:
Agricultural land refers to the share of land area that is arable, under permanent crops, and under permanent pastures. Arable land includes land defined by the FAO as land under temporary crops (double-cropped areas are counted once), temporary meadows for mowing or for pasture, land under market or kitchen gardens, and land temporarily fallow. Land abandoned as a result of shifting cultivation is excluded. Land under permanent crops is land cultivated with crops that occupy the land for long periods and need not be replanted after each harvest, such as cocoa, coffee, and rubber. This category includes land under flowering shrubs, fruit trees, nut trees, and vines, but excludes land under trees grown for wood or timber. Permanent pasture is land used for five or more years for forage, including natural and cultivated crops.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.10.72 Arable land (percent of land area) (wdi_araland)

Long tag: qog_std_cs_wdi_araland

Original tag: wdi_araland

Description:
Arable land includes land defined by the FAO as land under temporary crops (double-cropped areas are counted once), temporary meadows for mowing or for pasture, land under market or kitchen gardens, and land temporarily fallow. Land abandoned as a result of shifting cultivation is excluded.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.10.73 Land area (sq. km) (wdi_area)

Long tag: qog_std_cs_wdi_area

Original tag: wdi_area

Description:
Land area is a country's total area, excluding area under inland water bodies, national claims to continental shelf, and exclusive economic zones. In most cases the definition of inland water bodies includes major rivers and lakes.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.10.74 CO2 emissions (metric tons per capita) (wdi_co2)

Long tag: qog_std_cs_wdi_co2

Original tag: wdi_co2

Description:
Carbon dioxide emissions are those stemming from the burning of fossil fuels and the manufacture of cement.

They include carbon dioxide produced during consumption of solid, liquid, and gas fuels and gas flaring.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.10.75 Forest area (percent of land area) (wdi_forest)

Long tag: qog_std_cs_wdi_forest

Original tag: wdi_forest

Description:

Forest area is land under natural or planted stands of trees of at least 5 meters in situ, whether productive or not, and excludes tree stands in agricultural production systems (for example, in fruit plantations and agroforestry systems) and trees in urban parks and gardens.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.10.76 Internally displaced persons, new displacement-disasters (number) (wdi_idpdis)

Long tag: qog_std_cs_wdi_idpdis

Original tag: wdi_idpdis

Description:

Internally displaced persons, new displacement associated with disasters (number of people). Internally displaced persons are defined according to the 1998 Guiding Principles (http://www.internal-displacement.org/publications/1998/ocha-guiding-principles-on-internal-displacement) as people or groups of people who have been forced or obliged to flee or to leave their homes or places of habitual residence, in particular as a result of armed conflict, or to avoid the effects of armed conflict, situations of generalized violence, violations of human rights, or natural or human-made disasters and who have not crossed an international border. "New Displacement" refers to the number of new cases or incidents of displacement recorded, rather than the number of people displaced. This is done because people may have been displaced more than once.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.10.77 CPIA policy and institutions for envir. sustainability (1=low to 6=high) (wdi_piesr)

Long tag: qog_std_cs_wdi_piesr

Original tag: wdi_piesr

Description:

Policy and institutions for environmental sustainability assess the extent to which environmental policies foster the protection and sustainable use of natural resources and the management of pollution.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.10.78 Average precipitation in depth (mm per year) (wdi_precip)

Long tag: qog_std_cs_wdi_precip

Original tag: wdi_precip

Description:

Average precipitation is the long-term average in depth (over space and time) of annual precipitation in the country. Precipitation is defined as any kind of water that falls from clouds as a liquid or a solid.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.10.79 Confidence: The Environmental Protection Movement (wvs_confenv)

Long tag: qog_std_cs_wvs_confenv

Original tag: wvs_confenv

Description:

I am going to name a number of organizations. For each one, could you tell me how much confidence you have in them: The Environmental Protection Movement

1. None at all
2. Not very much
3. Quite a lot

4. A great deal

2.17.11 Education

This category includes variables related to education.

2.17.11.1 Average Schooling Years, Female (bl_asyf)

Long tag: qog_std_cs_bl_asyf

Original tag: bl_asyf

Description:
Average schooling years, females between 15 and 64 years old.

Variable citation: Barro, R. J., & Lee, J. W. (2013). A new data set of educational attainment in the world, 1950–2010. *Journal of Development Economics*, 104, 184–198

2.17.11.2 Average Schooling Years, Male (bl_asym)

Long tag: qog_std_cs_bl_asym

Original tag: bl_asym

Description:
Average schooling years, males between 15 and 64 years old.

Variable citation: Barro, R. J., & Lee, J. W. (2013). A new data set of educational attainment in the world, 1950–2010. *Journal of Development Economics*, 104, 184–198

2.17.11.3 Average Schooling Years, Female and Male (bl_asymf)

Long tag: qog_std_cs_bl_asymf

Original tag: bl_asymf

Description:
Average schooling years, females and males between 15 and 64 years old.

Variable citation: Barro, R. J., & Lee, J. W. (2013). A new data set of educational attainment in the world, 1950–2010. *Journal of Development Economics*, 104, 184–198

2.17.11.4 Percentage with Tertiary Schooling, Female (bl_lhf)

Long tag: qog_std_cs_bl_lhf

Original tag: bl_lhf

Description:
Percentage with tertiary schooling, females between 15 and 64 years old.

Variable citation: Barro, R. J., & Lee, J. W. (2013). A new data set of educational attainment in the world, 1950–2010. *Journal of Development Economics*, 104, 184–198

2.17.11.5 Percentage with Tertiary Schooling, Male (bl_lhm)

Long tag: qog_std_cs_bl_lhm

Original tag: bl_lhm

Description:
Percentage with tertiary schooling, males between 15 and 64 years old.

Variable citation: Barro, R. J., & Lee, J. W. (2013). A new data set of educational attainment in the world, 1950–2010. *Journal of Development Economics*, 104, 184–198

2.17.11.6 Percentage with Tertiary Schooling, Female and Male (bl_lhmf)

Long tag: qog_std_cs_bl_lhmf

Original tag: bl_lhmf

Description:
Percentage with tertiary schooling, females and males between 15 and 64 years old.

Variable citation: Barro, R. J., & Lee, J. W. (2013). A new data set of educational attainment in the world, 1950–2010. *Journal of Development Economics*, 104, 184–198

2.17.11.7 Percentage with Primary Schooling, Female (bl_lpf)

Long tag: qog_std_cs_bl_lpf

Original tag: bl_lpf

Description:
Percentage with primary schooling, females between 15 and 64 years old.

Variable citation: Barro, R. J., & Lee, J. W. (2013). A new data set of educational attainment in the world, 1950–2010. *Journal of Development Economics*, 104, 184–198

2.17.11.8 Percentage with Primary Schooling, Male (bl_lpm)

Long tag: qog_std_cs_bl_lpm

Original tag: bl_lpm

Description:
Percentage with primary schooling, males between 15 and 64 years old.

Variable citation: Barro, R. J., & Lee, J. W. (2013). A new data set of educational attainment in the world, 1950–2010. *Journal of Development Economics*, 104, 184–198

2.17.11.9 Percentage with Primary Schooling, Female and Male (bl_lpmf)

Long tag: qog_std_cs_bl_lpmf

Original tag: bl_lpmf

Description:
Percentage with primary schooling, females and males between 15 and 64 years old.

Variable citation: Barro, R. J., & Lee, J. W. (2013). A new data set of educational attainment in the world, 1950–2010. *Journal of Development Economics*, 104, 184–198

2.17.11.10 Percentage with Secondary Schooling, Female (bl_lsf)

Long tag: qog_std_cs_bl_lsf

Original tag: bl_lsf

Description:
Percentage with secondary schooling, females between 15 and 64 years old.

Variable citation: Barro, R. J., & Lee, J. W. (2013). A new data set of educational attainment in the world, 1950–2010. *Journal of Development Economics*, 104, 184–198

2.17.11.11 Percentage with Secondary Schooling, Male (bl_lsm)

Long tag: qog_std_cs_bl_lsm

Original tag: bl_lsm

Description:
Percentage with secondary schooling, males between 15 and 64 years old.

Variable citation: Barro, R. J., & Lee, J. W. (2013). A new data set of educational attainment in the world, 1950–2010. *Journal of Development Economics*, 104, 184–198

2.17.11.12 Percentage with Secondary Schooling, Female and Male (bl_lsmf)

Long tag: qog_std_cs_bl_lsmf

Original tag: bl_lsmf

Description:
Percentage with secondary schooling, females and males between 15 and 64 years old.

Variable citation: Barro, R. J., & Lee, J. W. (2013). A new data set of educational attainment in the world, 1950–2010. *Journal of Development Economics*, 104, 184–198

2.17.11.13 Percentage with No Schooling, Female (bl_luf)

Long tag: qog_std_cs_bl_luf

Original tag: bl_luf

Description:
Percentage with no schooling, females between 15 and 64 years old.

Variable citation: Barro, R. J., & Lee, J. W. (2013). A new data set of educational attainment in the world, 1950–2010. *Journal of Development Economics*, 104, 184–198

2.17.11.14 Percentage with No Schooling, Male (bl_lum)

Long tag: qog_std_cs_bl_lum

Original tag: bl_lum

Description:
Percentage with no schooling, males between 15 and 64 years old.

Variable citation: Barro, R. J., & Lee, J. W. (2013). A new data set of educational attainment in the world, 1950–2010. *Journal of Development Economics*, 104, 184–198

2.17.11.15 Percentage with No Schooling, Female and Male (bl_lumf)

Long tag: qog_std_cs_bl_lumf

Original tag: bl_lumf

Description:
Percentage with no schooling, females and males between 15 and 64 years old.

Variable citation: Barro, R. J., & Lee, J. W. (2013). A new data set of educational attainment in the world, 1950–2010. *Journal of Development Economics*, 104, 184–198

2.17.11.16 Sustainability (bti_su)

Long tag: qog_std_cs_bti_su

Original tag: bti_su

Description:
Economic growth is balanced, environmentally sustainable and future-oriented. Including "To what extent are environmental concerns effectively taken into account?" and "To what extent are there solid institutions for basic, secondary and tertiary education, as well as for research and development?".

Variable citation: Donner, S., Hartmann, H., & Schwarz, R. (2020). *Transformation index of the bertelsmann stiftung 2020*. Bertelsmann Stiftung. `http://www.bti-project.org`

Variable citation: Institute for Health Metrics and Evaluation (IHME). (2015). Global educational attainment 1970-2015

2.17.11.71 Expenditure on education, as percent of total gen. gov. exp. (gfs_educ)

Long tag: qog_std_cs_gfs_educ

Original tag: gfs_educ

Description:
Total expenditure on education, as the percentage of general government expenditure.

Variable citation: International Monetary Fund. (2019). Government finance statistics yearbook (gfsy) 2019. `https://data.imf.org/?sk=a0867067-d23c-4ebc-ad23-d3b015045405`

2.17.11.72 Global Gender Gap Educational Attainment Subindex (gggi_eas)

Long tag: qog_std_cs_gggi_eas

Original tag: gggi_eas

Description:
Educational Attainment (0 to 1, where 1 indicates no gap). This subindex captures the gap between women's and men's current access to education through ratios of women to men in primary-, secondary- and tertiary-level education. A longer-term view of the country's ability to educate women and men in equal numbers is captured through the ratio of the female literacy rate to the male literacy rate.

Variable citation: World Economic Forum. (2021). The global gender gap report 2021 [All Rights Reserved]. `https://www.weforum.org/reports/ab6795a1-960c-42b2-b3d5-587eccda6023`

2.17.11.73 Education (iiag_edu)

Long tag: qog_std_cs_iiag_edu

Original tag: iiag_edu

Description:
Education is one of the four sub-categories that are used to calculate the Human Development category score. It consists of five indicators from seven data sources.

Variable citation: Mo Ibrahim Foundation. (2020). The Ibrahim Index of African Governance. `http://mo.ibrahim.foundation/iiag/`

2.17.11.90 Official entrance age to upper secondary education (years) (une_oeaus)

Long tag: qog_std_cs_une_oeaus

Original tag: une_oeaus

Description:

Official entrance age to upper secondary education (years). Age at which students would enter a given programme or level of education assuming they start at the official entrance age for the lowest level of education, study full-time throughout and progressed through the system without repeating or skipping a grade. The theoretical entrance age to a given programme or level is typically, but not always, the most common entrance age.

Description:
Percentage of enrollment in secondary education in private institutions (percent).

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.11.128 Government expenditure on education, total (percent of GDP) (wdi_expedu)

Long tag: qog_std_cs_wdi_expedu

Original tag: wdi_expedu

Description:
General government expenditure on education (current, capital, and transfers) is expressed as a percentage of GDP. It includes expenditure funded by transfers from international sources to government. General government usually refers to local, regional and central governments.

Note: The value for Tuvalu in 1997 has been recoded to missing due to an extreme and very unlikely value.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.11.129 Government expenditure on education, total (percent of government expenditure) (wdi_expeduge)

Long tag: qog_std_cs_wdi_expeduge

Original tag: wdi_expeduge

Description:

Total general (local, regional and central) government expenditure on education (current, capital, and transfers), expressed as a percentage of total general government expenditure on all sectors (including health, education, social services, etc.). It includes expenditure funded by transfers from international sources to government. Public education expenditure includes spending by local/municipal, regional and national governments (excluding household contributions) on educational institutions (both public and private), education administration, and subsidies for private entities (students/households and other privates entities). In some instances data on total public expenditure on education refers only to the ministry of education and can exclude other ministries that spend a part of their budget on educational activities. The indicator is calculated by dividing total public expenditure on education incurred by all government agencies/departments by the total government expenditure and multiplying by 100. For more information, consult the UNESCO Institute of Statistics website: http://www.uis.unesco.org/Education/

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.11.130 Expenditure on primary education (percent of government expenditure on edu.) (wdi_expedup)

Long tag: qog_std_cs_wdi_expedup

Original tag: wdi_expedup

Description:

Expenditure on Primary education, expressed as a percentage of total general government expenditure on education. Divide government expenditure on a given level of education (ex. primary, secondary) by total government expenditure on education (all levels combined), and multiply by 100. A high percentage of government expenditure on education spent on a given level denotes a high priority given to that level compared to others. When interpreting this indicator, one should take into account enrollment at that level, and the relative costs per student between different levels of education. For more information, consult the UNESCO Institute of Statistics website: http://www.uis.unesco.org/Education/

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.11.131 Expenditure on secondary education (percent of government expenditure on edu.) (wdi_expedus)

Long tag: qog_std_cs_wdi_expedus

Original tag: wdi_expedus

Description:

Expenditure on Secondary education, expressed as a percentage of total general government expenditure on education. Divide government expenditure on a given level of education (ex. primary, secondary) by total government expenditure on education (all levels combined), and multiply by 100. A high percentage of government expenditure on education spent on a given level denotes a high priority given to that level compared to others. When interpreting this indicator, one should take into account enrollment at that level, and the relative costs per student between different levels of education. Long tag: qog_std_cs_wdi_gersm

Original tag: wdi_gersm

Description:

Total male enrollment in secondary education, regardless of age, expressed as a percentage of the male population of official secondary education age. GER can exceed 100percent due to the inclusion of over-aged and under-aged students because of early or late school entrance and grade repetition.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.11.145 School enrollment, tertiary (percent gross) (wdi_gert)

Long tag: qog_std_cs_wdi_gert

Original tag: wdi_gert

Description:
Total enrollment in tertiary education (ISCED 5 to 8), regardless of age, expressed as a percentage of the total population of the five-year age group following on from secondary school leaving.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.11.146 School enrollment, tertiary, female (percent gross) (wdi_gertf)

Long tag: qog_std_cs_wdi_gertf

Original tag: wdi_gertf

Description:
Total female enrollment in tertiary education (ISCED 5 to 8), regardless of age, expressed as a percentage of the total female population of the five-year age group following on from secondary school leaving.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.11.147 School enrollment, tertiary, male (percent gross) (wdi_gertm)

Long tag: qog_std_cs_wdi_gertm

Original tag: wdi_gertm

Description:
Total male enrollment in tertiary education (ISCED 5 to 8), regardless of age, expressed as a percentage of the total male population of the five-year age group following on from secondary school leaving.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.11.148 Literacy rate, adult total (percent of people ages 15 and above) (wdi_litrad)

Long tag: qog_std_cs_wdi_litrad

Original tag: wdi_litrad

Description:
Percentage of the population age 15 and above who can, with understanding, read and write a short, simple statement on their everyday life. Generally, 'literacy' also encompasses 'numeracy', the ability to make simple arithmetic calculations. This indicator is calculated by dividing the number of literates aged 15 years and over by the corresponding age group population and multiplying the result by 100.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.11.149 Literacy rate, adult female (percent of females ages 15 and above) (wdi_litradf)

Long tag: qog_std_cs_wdi_litradf

Original tag: wdi_litradf

Description:
Percentage of the female population age 15 and above who can, with understanding, read and write a short, simple statement on their everyday life. Generally, 'literacy' also encompasses 'numeracy', the ability to make simple arithmetic calculations. This indicator is calculated by dividing the number of literates aged 15 years and over by the corresponding age group population and multiplying the result by 100.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.11.150 Literacy rate, adult male (percent of males ages 15 and above) (wdi_litradm)

Long tag: qog_std_cs_wdi_litradm

Original tag: wdi_litradm

Description:
Percentage of the male population age 15 and above who can, with understanding, read and write a short, simple statement on their everyday life. Generally, 'literacy' also encompasses 'numeracy', the ability to make simple arithmetic calculations. This indicator is calculated by dividing the number of literates aged 15 years

and over by the corresponding age group population and multiplying the result by 100.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.11.151 Literacy rate, youth total (percent of people ages 15-24) (wdi_litry)

Long tag: qog_std_cs_wdi_litry

Original tag: wdi_litry

Description:

Number of people age 15 to 24 years who can both read and write with understanding a short simple statement on their everyday life, divided by the population in that age group. Generally, 'literacy' also encompasses 'numeracy', the ability to make simple arithmetic calculations. Divide the number of people aged 15 to 24 years who are literate by the total population in the same age group and multiply the result by 100.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.11.152 Literacy rate, youth female (percent of females ages 15-24) (wdi_litryf)

Long tag: qog_std_cs_wdi_litryf

Original tag: wdi_litryf

Description:

Number of women age 15 to 24 years who can both read and write with understanding a short simple statement on their everyday life, divided by the population in that age group. Generally, 'literacy' also encompasses 'numeracy', the ability to make simple arithmetic calculations. Divide the number of people aged 15 to 24 years who are literate by the total population in the same age group and multiply the result by 100.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.11.153 Literacy rate, youth male (percent of males ages 15-24) (wdi_litrym)

Long tag: qog_std_cs_wdi_litrym

Original tag: wdi_litrym

Description:

Number of men people age 15 to 24 years who can both read and write with understanding a short simple statement on their everyday life, divided by the population in that age group. Generally, 'literacy' also encompasses 'numeracy', the ability to make simple arithmetic calculations. Divide the number of people aged 15 to 24 years who are literate by the total population in the same age group and multiply the result by 100.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.11.154 School enrollment, primary (percent net) (wdi_nerp)

Long tag: qog_std_cs_wdi_nerp

Original tag: wdi_nerp

Description:

Net enrollment rate is the ratio of children of official school age who are enrolled in school to the population of the corresponding official school age. Primary education provides children with basic reading, writing, and mathematics skills along with an elementary understanding of such subjects as history, geography, natural science, social science, art, and music.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.11.155 School enrollment, primary, female (percent net) (wdi_nerpf)

Long tag: qog_std_cs_wdi_nerpf

Original tag: wdi_nerpf

Description:

Net enrollment rate is the ratio of girls of official school age who are enrolled in school to the population of the corresponding official school age. Primary education provides children with basic reading, writing, and mathematics skills along with an elementary understanding of such subjects as history, geography, natural science, social science, art, and music. Female.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.11.156 School enrollment, primary, male (percent net) (wdi_nerpm)

Long tag: qog_std_cs_wdi_nerpm

Original tag: wdi_nerpm

Description:

Net enrollment rate is the ratio of boys of official school age who are enrolled in school to the population of the corresponding official school age. Primary education provides children with basic reading, writing, and mathematics skills along with an elementary understanding of such subjects as history, geography, natural science, social science, art, and music. Male.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.11.157 Adjusted net enrollment rate, primary (percent of primary school children) (wdi_nerpr)

Long tag: qog_std_cs_wdi_nerpr

Original tag: wdi_nerpr

Description:

Adjusted net enrollment is the number of pupils of the school-age group for primary education, enrolled either in primary or secondary education, expressed as a percentage of the total population in that age group.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.11.158 Adjusted net enrollment rate, primary female (percent of primary school children) (wdi_nerprf)

Long tag: qog_std_cs_wdi_nerprf

Original tag: wdi_nerprf

Description:

Adjusted net enrollment is the number of female pupils of the school-age group for primary education, enrolled either in primary or secondary education, expressed as a percentage of the total population in that age group. Female.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.11.159 Adjusted net enrollment rate, primary male (percent of primary school children) (wdi_nerprm)

Long tag: qog_std_cs_wdi_nerprm

Original tag: wdi_nerprm

Description:

Adjusted net enrollment is the number of male pupils of the school-age group for primary education, enrolled either in primary or secondary education, expressed as a percentage of the total population in that age group. Male.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.11.160 School enrollment, secondary (percent net) (wdi_ners)

Long tag: qog_std_cs_wdi_ners

Original tag: wdi_ners

Description:

Net enrollment rate is the ratio of children of official school age who are enrolled in school to the population of the corresponding official school age. Secondary education completes the provision of basic education that began at the primary level, and aims at laying the foundations for lifelong learning and human development, by offering more subject- or skill-oriented instruction using more specialized teachers.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.11.161 School enrollment, secondary, female (percent net) (wdi_nersf)

Long tag: qog_std_cs_wdi_nersf

Original tag: wdi_nersf

Description:

Net enrollment rate is the ratio of girls of official school age who are enrolled in school to the population of the corresponding official school age. Secondary education completes the provision of basic education that

began at the primary level, and aims at laying the foundations for lifelong learning and human development, by offering more subject- or skill-oriented instruction using more specialized teachers. Female.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.11.162 School enrollment, secondary, male (percent net) (wdi_nersm)

Long tag: qog_std_cs_wdi_nersm

Original tag: wdi_nersm

Description:

Net enrollment rate is the ratio of boys of official school age who are enrolled in school to the population of the corresponding official school age. Secondary education completes the provision of basic education that began at the primary level, and aims at laying the foundations for lifelong learning and human development, by offering more subject- or skill-oriented instruction using more specialized teachers. Male.

2.17.11.163 Digital skills among active population. 1-7 (best) (wef_dsap)

Long tag: qog_std_cs_wef_dsap

Original tag: wef_dsap

Description:

Digital skills among active population. 1-7 (best). In your country, to what extent does the active population possess sufficient digital skills (e.g., computer skills, basic coding, digital reading)? [1 = not all; 7 = to a great extent] Original sources: World Economic Forum, Executive Opinion Survey

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. `http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf`

2.17.11.164 School life expectancy. Years (wef_lse)

Long tag: qog_std_cs_wef_lse

Original tag: wef_lse

Description:

School life expectancy. Years. Total number of years of schooling (primary through tertiary) that a child can expect to receive, assuming that the probability of his or her being enrolled in school at any particular future age is equal to the current enrollment ratio at that age. Original sources: United Nations Educational, Scientific and Cultural Organization (UNESCO)

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. `http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf`

2.17.11.165 Quality of vocational training. 1-7 (best) (wef_qvt)

Long tag: qog_std_cs_wef_qvt

Original tag: wef_qvt

Description:

Quality of vocational training. 1-7 (best). In your country, how do you assess the quality of vocational training? [1 = extremely poor-among the worst in the world; 7 = excellent-among the best in the world] Original sources: World Economic Forum, Executive Opinion Survey

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. `http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf`

2.17.11.166 Skillset of secondary-education graduates. 1-7 (best) (wef_shg)

Long tag: qog_std_cs_wef_shg

Original tag: wef_shg

Description:

Skillset of secondary-education graduates. 1-7 (best). "In your country, to what extent do graduating students possess the skills needed by businesses at the following levels: Secondary education" [1 = Not at all; 7 = To a great extent]. Original sources: World Economic Forum, Executive Opinion Survey

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. `http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf`

2.17.11.167 Skillset of university graduates. 1-7 (best) (wef_sug)

Long tag: qog_std_cs_wef_sug

Original tag: wef_sug

Description:

Skillset of university graduates. 1-7 (best). In your country, to what extent do graduating students possess the skills needed by businesses at the following levels: b. University-level (1 = Not at all; 7 = To a great extent). Original sources: World Economic Forum, Executive Opinion Survey

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. `http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf`

2.17.11.168 University-industry collaboration in R D (1-7) (wef_uic)

Long tag: qog_std_cs_wef_uic

Original tag: wef_uic

Description:

University-industry collaboration in R
D. 1-7 (best). In your country, to what extent do business and universities collaborate on research and development (R
D)? [1 = do not collaborate at all; 7 = collaborate extensively] Original sources: World Economic Forum, Executive Opinion Survey

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. `http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf`

2.17.11.169 Confidence: Education System (wvs_confedu)

Long tag: qog_std_cs_wvs_confedu

Original tag: wvs_confedu

Description:

I am going to name a number of organizations. For each one, could you tell me how much confidence you have in them: Education System

1. None at all
2. Not very much
3. Quite a lot
4. A great deal

2.17.12 Public Economy

This category includes economic indicators that reflect the involvement of the government in the economy (taxes, tariff rates and government expenditures), economic key figures of a state (GDP, inflation, and economic inequality), and indicators that characterize the state of the economy (aid- flows, debt).

2.17.12.1 Monetary and fiscal stability (bti_cps)

Long tag: qog_std_cs_bti_cps

Original tag: bti_cps

Description:
There are institutional or political precautions to achieve monetary and fiscal stability. Including "To what extend does the monetary authority pursue and communicate a consistent monetary stabilization policy?" and "To what extent do the government's budgetary policies support fiscal stability?"

Variable citation: Donner, S., Hartmann, H., & Schwarz, R. (2020). *Transformation index of the bertelsmann stiftung 2020*. Bertelsmann Stiftung. `http://www.bti-project.org`

2.17.12.2 Economic Output Strength (bti_eos)

Long tag: qog_std_cs_bti_eos

Original tag: bti_eos

Description:
How does the economy, as measured in quantitative indicators, perform? 1-10.

1. The economic performance is very poor. Strongly negative macroeconomic data may include negative GDP growth rates, very high unemployment levels, high inflation, large budget deficits, unreasonably high debt and an increasingly unsustainable current account position.
4. The economic performance is poor. Continuing negative macroeconomic data may include stagnant GDP levels, relatively high unemployment levels, low price stability, an unbalanced budget, rising debt and a volatile current account position.
7. The economic performance is good. Moderately positive macroeconomic data may include low GDP growth rates, only moderate unemployment levels, relative price stability, a slightly unbalanced budget, a tendency toward debt and a manageable current account position.
10. The economic performance is very good. Positive macroeconomic data may include relatively high GDP growth rates, relatively high employment levels, price stability, balanced budget, reasonable debt and a sustainable current account position.

Variable citation: Donner, S., Hartmann, H., & Schwarz, R. (2020). *Transformation index of the bertelsmann stiftung 2020*. Bertelsmann Stiftung. `http://www.bti-project.org`

2.17.12.3 Economic Performance (bti_ep)

Long tag: qog_std_cs_bti_ep

Original tag: bti_ep

Description:
Economic Performance: The economy's performance points to solid development 1-10.

Variable citation: Donner, S., Hartmann, H., & Schwarz, R. (2020). *Transformation index of the bertelsmann stiftung 2020*. Bertelsmann Stiftung. `http://www.bti-project.org`

2.17.12.4 Economy Status (bti_mes)

Long tag: qog_std_cs_bti_mes

Original tag: bti_mes

Description:
Economy Status: It groups the scores of the level of socioeconomic development, the organization of the market and competition, currency and price stability, private property, the welfare regime, the economic performance, and sustainability 1-10. Higher scores reflect advanced economy status.

Variable citation: Donner, S., Hartmann, H., & Schwarz, R. (2020). *Transformation index of the bertelsmann stiftung 2020*. Bertelsmann Stiftung. `http://www.bti-project.org`

2.17.12.5 Organization of the Market and Competition (bti_mo)

Long tag: qog_std_cs_bti_mo

Original tag: bti_mo

Description:
Organization of the Market and Competition: There are clear rules for stable, market-based competition 1-10. State-guaranteed rules for market competition with equal opportunities for all market participants exist in countries with higher scores.

Variable citation: Donner, S., Hartmann, H., & Schwarz, R. (2020). *Transformation index of the bertelsmann stiftung 2020*. Bertelsmann Stiftung. `http://www.bti-project.org`

2.17.12.6 Socio-Economic Level (bti_sel)

Long tag: qog_std_cs_bti_sel

Original tag: bti_sel

Description:
Socio-Economic Level: In principle, the country's level of development permits adequate freedom of choice for all citizens 1-10. Higher scores are present for countries with better socio-economic level.

Variable citation: Donner, S., Hartmann, H., & Schwarz, R. (2020). *Transformation index of the bertelsmann stiftung 2020*. Bertelsmann Stiftung. `http://www.bti-project.org`

2.17.12.7 Economic Globalization (dr_eg)

Long tag: qog_std_cs_dr_eg

Original tag: dr_eg

Description:
Economic globalisation (scale of 1 to 100) covers both trade flows as well as financial flows. De facto trade is determined with reference to the trade in goods and services. De jure trade covers customs duties, taxes and restrictions on trade.

Variable citation: Gygli, S., Haelg, F., Potrafke, N., & Sturm, J.-E. (2019). The KOF Globalisation Index - Revisited. `https://doi.org/10.1007/s11558-019-09344-2` Dreher, A. (2006). Does globalization affect growth? evidence from a new index of globalization. *Applied Economics*, 38(10), 1091–1110

2.17.12.20 Economic Complexity Index (SITC product classification) (gpcr_eci)

Long tag: qog_std_cs_gpcr_eci

Original tag: gpcr_eci

Description:
The Economic Complexity Index (ECI) is a measure of the amount of capabilities and know-how of a given country determined by the diversity, ubiquity, and complexity of the products it exports.

A rank of countries based on how diversified and complex their export basket is. Countries that are home to a great diversity of productive know-how, particularly complex specialized know-how, are able to produce a great diversity of sophisticated products.

The complexity of a country's exports is found to highly predict current income levels, or where complexity exceed expectations for a country's income level, the country is predicted to experience more rapid growth in the future. ECI therefore provides a useful measure of economic development.

This Economic Complexity Index is computed using SITC product classification.

Variable citation: The Growth Lab at Harvard University. (2019). Growth projections and complexity rankings [UNF:6:+dXp8TMQz26OFv7ZOfIxSg== [fileUNF]]. `https://doi.org/10.7910/DVN/XTAQMC`

2.17.12.21 Forecasted annualized rate of growth for following decade (gpcr_growth)

Long tag: qog_std_cs_gpcr_growth

Original tag: gpcr_growth

Description:
A prediction of how much a country will grow based on its current level of Economic Complexity, its Complexity Outlook or connectedness to new complex products in the Product Space, as compared to its current income level in GDP per capita and expected natural resource exports.

Economic complexity alone helps explain the lion's share of variance in current income levels. But the value of economic complexity is in its predictive power on future growth, where a simple measure of current complexity and connectedness to new complex products, in relation to current income levels and expected natural resource exports, holds greater accuracy in predicting future growth than any other single economic indicator.

To calculate Economic Complexity Growth Projections, the authors consider four factors as explanatory

variables: the Economic Complexity Index; the Complexity Outlook Index; the current level of income; and the expected growth in the value of natural resource exports per capita.

In effect, the growth projections show countries grow by expanding the know-how they have that allows them to produce more, and more complex products, depending on the connectedness of know-how and how many other products rely on similar capabilities, as well as the initial economic complexity the country held.

Growth projections are calculated through a process largely based on determining whether a country's economic complexity is higher or lower than expected given its level of income. The authors expect countries whose economic complexity is greater than the authors would expect for its level of income to grow faster than those that are "too rich" for their current level of complexity.

In this data, a country's growth projection value for a given year is for the decade beginning with that year. For example, a value in a 2017 row is the projection of annualized growth for 2017-2027.

2.17.12.34 Open Budget Index (ibp_obi)

Long tag: qog_std_cs_ibp_obi

Original tag: ibp_obi

Description:
The Open Budget Index (OBI) is a comparative measure of central government budget transparency. The OBI assigns countries covered by the Open Budget Survey a transparency score on a 100-point scale using 109 of the 140 questions on the Survey. These questions focus specifically on whether the government provides the public with timely access to comprehensive information contained in eight key budget documents in accordance with international good practice standards.

Variable citation: International Budget Partnership. (2019). Open budget survey data [Accessed on 2021-12-01]. `https://www.internationalbudget.org/data-evidence/`

2.17.12.35 Grants (ictd_grants)

Long tag: qog_std_cs_ictd_grants

Original tag: ictd_grants

Description:
Total grants received by the government.

Variable citation: ICTD/UNU-WIDER. (2020). Government revenue dataset. `https://www.wider.unu.edu/project/government-revenue-dataset`

2.17.12.36 Consolidated Non-Tax Revenue (ictd_nontax)

Long tag: qog_std_cs_ictd_nontax

Original tag: ictd_nontax

Description:
Total non-tax revenue, comprising data categorized as either "non-tax revenue" or "other revenue" depending on the underlying source. Includes revenue from both resource and non-resource sources.

Variable citation: ICTD/UNU-WIDER. (2020). Government revenue dataset. `https://www.wider.unu.edu/project/government-revenue-dataset`

2.17.12.37 Revenue (excluding social contributions) (ictd_revexsc)

Long tag: qog_std_cs_ictd_revexsc

Original tag: ictd_revexsc

Description:
Total government revenue, excluding social contributions.

Variable citation: ICTD/UNU-WIDER. (2020). Government revenue dataset. `https://www.wider.unu.edu/project/government-revenue-dataset`

2.17.12.38 Revenue (including social contributions) (ictd_revinsc)

Long tag: qog_std_cs_ictd_revinsc

Original tag: ictd_revinsc

Description:
Total government revenue including taxes, non-tax revenue, grants and social contributions.

Variable citation: ICTD/UNU-WIDER. (2020). Government revenue dataset. `https://www.wider.unu.edu/project/government-revenue-dataset`

2.17.12.39 Total Resource Revenue (ictd_revres)

Long tag: qog_std_cs_ictd_revres

Original tag: ictd_revres

Description:
Total natural resource revenues, including natural resource revenues reported as "tax revenue" or "non-tax revenue". Natural resources are here defined as natural resources that include a significant component of economic rent, primarily from oil and mining activities.

Variable citation: ICTD/UNU-WIDER. (2020). Government revenue dataset. `https://www.wider.unu.edu/project/government-revenue-dataset`

2.17.12.40 Social Contributions (ictd_soccon)

Long tag: qog_std_cs_ictd_soccon

Original tag: ictd_soccon

Description:
Total social contributions.

Variable citation: ICTD/UNU-WIDER. (2020). Government revenue dataset. `https://www.wider.unu.edu/project/government-revenue-dataset`

2.17.12.41 Taxes on Corporations and Other Enterprises (ictd_taxcorp)

Long tag: qog_std_cs_ictd_taxcorp

Original tag: ictd_taxcorp

Description:
Total income and profit taxes on corporations, including taxes on resource firms.

Variable citation: ICTD/UNU-WIDER. (2020). Government revenue dataset. `https://www.wider.unu.edu/project/government-revenue-dataset`

2.17.12.42 Taxes (excluding social contributions) (ictd_taxexsc)

Long tag: qog_std_cs_ictd_taxexsc

Original tag: ictd_taxexsc

Description:
Total tax revenue, excluding social contributions.

Variable citation: ICTD/UNU-WIDER. (2020). Government revenue dataset. `https://www.wider.unu.edu/project/government-revenue-dataset`

2.17.12.43 Taxes on Goods and Services (ictd_taxgs)

Long tag: qog_std_cs_ictd_taxgs

Original tag: ictd_taxgs

Description:
Total taxes on goods and services, which includes (but it not necessarily always equal to) sales taxes and excise taxes.

Variable citation: ICTD/UNU-WIDER. (2020). Government revenue dataset. `https://www.wider.unu.edu/project/government-revenue-dataset`

2.17.12.44 Taxes on Income, Profits, and Capital Gains (ictd_taxinc)

Long tag: qog_std_cs_ictd_taxinc

Original tag: ictd_taxinc

Description:
Total taxes on income, profits and capital gains, including taxes on natural resource firms. This figure is always exclusive of social contributions. The total value of Taxes on Income, Profits and Capital Gains may sometimes exceed the sum of Individuals and Corporations, due to revenues that are unallocated between the

two.

Variable citation: ICTD/UNU-WIDER. (2020). Government revenue dataset. `https://www.wider.unu.edu/project/government-revenue-dataset`

2.17.12.45 Taxes on Individuals (ictd_taxind)

Long tag: qog_std_cs_ictd_taxind

Original tag: ictd_taxind

Description:

Total income, capital gains and profit taxes on individuals. This figure is always exclusive of resource revenues in available sources.

Variable citation: ICTD/UNU-WIDER. (2020). Government revenue dataset. `https://www.wider.unu.edu/project/government-revenue-dataset`

2.17.12.46 Indirect Taxes (ictd_taxindirect)

Long tag: qog_std_cs_ictd_taxindirect

Original tag: ictd_taxindirect

Description:

Total indirect taxes, including resource revenues. Includes taxes on goods and services, taxes on international trade and other taxes. Indirect may exceed the sum of Taxes on Goods and Services, Taxes on International Trade and Transactions and Other Taxes due to unallocated revenue not classified in any of these categories.

Variable citation: ICTD/UNU-WIDER. (2020). Government revenue dataset. `https://www.wider.unu.edu/project/government-revenue-dataset`

2.17.12.47 Taxes (including social contributions) (ictd_taxinsc)

Long tag: qog_std_cs_ictd_taxinsc

Original tag: ictd_taxinsc

Description:

Total tax revenue, including social contributions.

Variable citation: ICTD/UNU-WIDER. (2020). Government revenue dataset. `https://www.wider.unu.edu/project/government-revenue-dataset`

2.17.12.48 Non-resource Tax (excluding social contributions) (ictd_taxnresexsc)

Long tag: qog_std_cs_ictd_taxnresexsc

Original tag: ictd_taxnresexsc

Description:

Total non-resource tax revenue, excluding social contributions. Calculated as "Taxes excluding social contributions" minus "resource taxes". This is the variable recommended for econometric analysis, as it is most complete and consistent across countries.

Variable citation: ICTD/UNU-WIDER. (2020). Government revenue dataset. `https://www.wider.unu.edu/project/government-revenue-dataset`

2.17.12.49 Non-resource Tax (including social contributions) (ictd_taxnresinsc)

Long tag: qog_std_cs_ictd_taxnresinsc

Original tag: ictd_taxnresinsc

Description:

Total non-resource tax revenue, including social contributions. Calculated as "Taxes including social contributions" minus "resource taxes".

Variable citation: ICTD/UNU-WIDER. (2020). Government revenue dataset. `https://www.wider.unu.edu/project/government-revenue-dataset`

2.17.12.50 Other Taxes (ictd_taxother)

Long tag: qog_std_cs_ictd_taxother

Original tag: ictd_taxother

Description:

Total other taxes.

Variable citation: ICTD/UNU-WIDER. (2020). Government revenue dataset. `https://www.wider.unu.edu/project/government-revenue-dataset`

2.17.12.51 Taxes on Payroll and Workforce (ictd_taxpaywf)

Long tag: qog_std_cs_ictd_taxpaywf

Original tag: ictd_taxpaywf

Description:
Total taxes on payroll and workforce. This variable is entirely distinct from social contributions, though in underlying sources, social contributions are very occasionally reported as payroll taxes.

Variable citation: ICTD/UNU-WIDER. (2020). Government revenue dataset. `https://www.wider.unu.edu/project/government-revenue-dataset`

2.17.12.52 Taxes on Property (ictd_taxprop)

Long tag: qog_std_cs_ictd_taxprop

Original tag: ictd_taxprop

Description:
Total taxes on property.

Variable citation: ICTD/UNU-WIDER. (2020). Government revenue dataset. `https://www.wider.unu.edu/project/government-revenue-dataset`

2.17.12.53 Resource Taxes (ictd_taxres)

Long tag: qog_std_cs_ictd_taxres

Original tag: ictd_taxres

Description:
Component of reported tax revenue that is from natural resource sources, most often corporate taxation of resource firms.

Variable citation: ICTD/UNU-WIDER. (2020). Government revenue dataset. `https://www.wider.unu.edu/project/government-revenue-dataset`

2.17.12.54 Taxes on International Trade and Transactions (ictd_taxtrade)

Long tag: qog_std_cs_ictd_taxtrade

Original tag: ictd_taxtrade

Description:
Total taxes on international trade, including both import and export taxes. In some cases this figure may also include VAT collected at the border, where countries consistently report revenue in this way.

Variable citation: ICTD/UNU-WIDER. (2020). Government revenue dataset. `https://www.wider.unu.edu/project/government-revenue-dataset`

Exports of services.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. https://doi.org/10.1787/20752288

2.17.12.127 Total tax revenue (oecd_totaltax_t1)

Long tag: qog_std_cs_oecd_totaltax_t1

Original tag: oecd_totaltax_t1

Description:
Total tax revenue.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. https://doi.org/10.1787/20752288

2.17.12.128 International imports in goods and services (oecd_tradegdp_t1a)

Long tag: qog_std_cs_oecd_tradegdp_t1a

Original tag: oecd_tradegdp_t1a

Description:
International imports in goods and services.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. https://doi.org/10.1787/20752288

2.17.12.129 International exports in goods and services (oecd_tradegdp_t1b)

Long tag: qog_std_cs_oecd_tradegdp_t1b

Original tag: oecd_tradegdp_t1b

Description:
International exports in goods and services.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. https://doi.org/10.1787/20752288

2.17.12.130 Value added: agriculture, hunting, fishing and forestry (oecd_valaddac_t1a)

Long tag: qog_std_cs_oecd_valaddac_t1a

Original tag: oecd_valaddac_t1a

Description:
Value added in agriculture, hunting, fishing and forestry.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. https://doi.org/10.1787/20752288

2.17.12.131 Value added: industry including energy (oecd_valaddac_t1b)

Long tag: qog_std_cs_oecd_valaddac_t1b

Original tag: oecd_valaddac_t1b

Description:
Value added in industry including energy.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. https://doi.org/10.1787/20752288

2.17.12.132 Value added: construction (oecd_valaddac_t1c)

Long tag: qog_std_cs_oecd_valaddac_t1c

Original tag: oecd_valaddac_t1c

Description:
Value added in construction.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. https://doi.org/10.1787/20752288

2.17.12.133 Value added: trade, repairs, transport, accommodation and food services (oecd_valaddac_t1d)

Long tag: qog_std_cs_oecd_valaddac_t1d

Original tag: oecd_valaddac_t1d

Description:
Value added in distributive trade, repairs, transport and accommodation and food services activities.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. https://doi.org/10.1787/20752288

2.17.12.134 Value added: Information and communication (oecd_valaddac_t1e)

Long tag: qog_std_cs_oecd_valaddac_t1e

Original tag: oecd_valaddac_t1e

Description:
Value added in Information and communication.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. https://doi.org/10.1787/20752288

2.17.12.135 Value added: financial and insurance activities (oecd_valaddac_t1f)

Long tag: qog_std_cs_oecd_valaddac_t1f

Original tag: oecd_valaddac_t1f

Description:
Value added in financial and insurance activities.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. https://doi.org/10.1787/20752288

2.17.12.136 Value added: real estate activities (oecd_valaddac_t1g)

Long tag: qog_std_cs_oecd_valaddac_t1g

Original tag: oecd_valaddac_t1g

Description:
Value added in real estate activities.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. https://doi.org/10.1787/20752288

2.17.12.137 Value added in professional, scientific, technical, administration (oecd_valaddac_t1h)

Long tag: qog_std_cs_oecd_valaddac_t1h

Original tag: oecd_valaddac_t1h

Description:
Value added in professional, scientific, technical, administration and support services activities.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. https://doi.org/10.1787/20752288

2.17.12.138 Value added in public administration, defence, education human health (oecd_valaddac_t1i)

Long tag: qog_std_cs_oecd_valaddac_t1i

Original tag: oecd_valaddac_t1i

Description:
Value added in public administration, defence, education human health and social work activities.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. `https://doi.org/10.1787/20752288`

2.17.12.139 Value added in other services activities (oecd_valaddac_t1j)

Long tag: qog_std_cs_oecd_valaddac_t1j

Original tag: oecd_valaddac_t1j

Description:
Value added in other services activities.

2.17.12.164 Sustainable Policies: Economic Policies - Research, Innovation and Infrastructur (sgi_ecri)

Long tag: qog_std_cs_sgi_ecri

Original tag: sgi_ecri

Description:
Sustainable Policies: Economic Policies - Research, Innovation and Infrastructure (Research and Innovation Policy, Public R

D Spending, Non-public R
D Spending, Total Researchers, Intellectual Property Licenses, PCT Patent Applications).

Variable citation: Schiller, C., & Hellmann, T. (2020). Sustainable governance indicators 2020 [Date accessed: 12 December 2021]. *Bertelsmann Stiftung*. `https://www.sgi-network.org`

2.17.12.165 Sustainable Policies: Economic Policies - Taxes (sgi_ectx)

Long tag: qog_std_cs_sgi_ectx

Original tag: sgi_ectx

Description:
Sustainable Policies: Economic Policies - Taxes (Tax Policy, Tax System Complexity, Structural Balance, Marginal Tax Burden for Businesses, Redistribution Effect).

Variable citation: Schiller, C., & Hellmann, T. (2020). Sustainable governance indicators 2020 [Date accessed: 12 December 2021]. *Bertelsmann Stiftung*. `https://www.sgi-network.org`

2.17.12.166 Top 10percent income share (top_top10_income_share)

Long tag: qog_std_cs_top_top10_income_share

Original tag: top_top10_income_share

Description:
Income share of the top 10percent of the population. This refers to the share of pre-tax national income among equal-split adults for the top 10percent in each country-year.

The pre-tax national income is the sum of all pre-tax personal income flows accruing to the owners of the production factors, labor and capital, before taking into account the operation of the tax/transfer system, but after taking into account the operation of pension system.

The central difference between personal factor income and pre-tax income is the treatment of pensions, which are counted on a contribution basis by factor income and on a distribution basis by pre-tax income. The population is comprised of individuals over age 20. The base unit is the individual (rather than the household) but resources are split equally within couples.

Variable citation: Alvaredo, F., Atkinson, A. B., Piketty, T., & Saez, E. (2020b). World inequality report 2020. `http://wid.world/` Alvaredo, F., Atkinson, A. B., Piketty, T., & Saez, E. (2020a). World inequality database. `http://wid.world/data`

2.17.12.167 Top 1percent income share (top_top1_income_share)

Long tag: qog_std_cs_top_top1_income_share

Original tag: top_top1_income_share

Description:
Income share of the top 1percent of the population. This refers to the share of pre-tax national income among equal-split adults for the top 1percent in each country-year.

The pre-tax national income is the sum of all pre-tax personal income flows accruing to the owners of the production factors, labor and capital, before taking into account the operation of the tax/transfer system, but after taking into account the operation of pension system.

The central difference between personal factor income and pre-tax income is the treatment of pensions, which are counted on a contribution basis by factor income and on a distribution basis by pre-tax income. The population is comprised of individuals over age 20. The base unit is the individual (rather than the household) but resources are split equally within couples.

2.17.12.168 Regulatory Quality, Estimate (wbgi_rqe)

Long tag: qog_std_cs_wbgi_rqe

Original tag: wbgi_rqe

Description:
Regulatory Quality - Estimate: "Regulatory Quality" includes measures of the incidence of market-unfriendly policies such as price controls or inadequate bank supervision, as well as perceptions of the burdens imposed by excessive regulation in areas such as foreign trade and business development.

Variable citation: Kaufmann, D., Kraay, A., & Mastruzzi, M. (2010). The worldwide governance indicators: A summary of methodology, data and analytical issues. *World Bank Policy Research Working Paper, 5430*

2.17.12.169 Regulatory Quality, Number of Sources (wbgi_rqn)

Long tag: qog_std_cs_wbgi_rqn

Original tag: wbgi_rqn

Description:
Regulatory Quality - Number of Sources.

Variable citation: Kaufmann, D., Kraay, A., & Mastruzzi, M. (2010). The worldwide governance indicators: A summary of methodology, data and analytical issues. *World Bank Policy Research Working Paper, 5430*

2.17.12.170 Regulatory Quality, Standard Error (wbgi_rqs)

Long tag: qog_std_cs_wbgi_rqs

Original tag: wbgi_rqs

Description:
Regulatory Quality - Standard Errors.

Variable citation: Kaufmann, D., Kraay, A., & Mastruzzi, M. (2010). The worldwide governance indicators: A summary of methodology, data and analytical issues. *World Bank Policy Research Working Paper, 5430*

2.17.12.171 Proportion of people living below 50 percent of median income (percent) (wdi_belmedinc)

Long tag: qog_std_cs_wdi_belmedinc

Original tag: wdi_belmedinc

Description:
The percentage of people in the population who live in households whose per capita income or consumption is below half of the median income or consumption per capita. The median is measured at 2011 Purchasing Power Parity (PPP) using PovcalNet (http://iresearch.worldbank.org/PovcalNet). For some countries, medians are not reported due to grouped and/or confidential data. The reference year is the year in which the underlying household survey data was collected. In cases for which the data collection period bridged two calendar years, the first year in which data were collected is reported.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.12.172 Central government debt, total (percent of GDP) (wdi_debt)

Long tag: qog_std_cs_wdi_debt

Original tag: wdi_debt

Description:
Debt is the entire stock of direct government fixed-term contractual obligations to others outstanding on a particular date. It includes domestic and foreign liabilities such as currency and money deposits, securities other than shares, and loans. It is the gross amount of government liabilities reduced by the amount of equity and financial derivatives held by the government. Because debt is a stock rather than a flow, it is measured as of a given date, usually the last day of the fiscal year.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.12.173 Domestic general government health expenditure (percent of GDP) (wdi_dgovhexp)

Long tag: qog_std_cs_wdi_dgovhexp

Original tag: wdi_dgovhexp

Description:
Domestic general government health expenditure (percent of GDP). Public expenditure on health from domestic sources as a share of the economy as measured by GDP.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.12.174 Domestic private health expenditure (percent of current health expenditure) (wdi_dprivhexp)

Long tag: qog_std_cs_wdi_dprivhexp

Original tag: wdi_dprivhexp

Description:
Domestic private health expenditure (percent of current health expenditure). Share of current health expenditures funded from domestic private sources. Domestic private sources include funds from households, corporations and non-profit organizations. Such expenditures can be either prepaid to voluntary health

insurance or paid directly to healthcare providers.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.12.175 External health expenditure (percent of current health expenditure) (wdi_ehexpp)

Long tag: qog_std_cs_wdi_ehexpp

Original tag: wdi_ehexpp

Description:

External health expenditure (percent of current health expenditure). Share of current health expenditures funded from external sources. External sources compose of direct foreign transfers and foreign transfers distributed by government encompassing all financial inflows into the national health system from outside the country. External sources either flow through the government scheme or are channeled through non-governmental organizations or other schemes.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.12.176 CPIA equity of public resource use rating (1=low to 6=high) (wdi_eqpubres)

Long tag: qog_std_cs_wdi_eqpubres

Original tag: wdi_eqpubres

Description:

Equity of public resource use assesses the extent to which the pattern of public expenditures and revenue collection affects the poor and is consistent with national poverty reduction priorities.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.12.177 Exports of goods and services (percent of GDP) (wdi_export)

Long tag: qog_std_cs_wdi_export

Original tag: wdi_export

Description:

Exports of goods and services represent the value of all goods and other market services provided to the rest of the world. They include the value of merchandise, freight, insurance, transport, travel, royalties, license fees, and other services, such as communication, construction, financial, information, business, personal, and government services. They exclude compensation of employees and investment income (formerly called factor services) and transfer payments.

2.17.12.178 Foreign direct investment, net inflows (percent of GDP) (wdi_fdiin)

Long tag: qog_std_cs_wdi_fdiin

Original tag: wdi_fdiin

Description:

Foreign direct investment are the net inflows of investment to acquire a lasting management interest (10 percent or more of voting stock) in an enterprise operating in an economy other than that of the investor. It is the sum of equity capital, reinvestment of earnings, other long-term capital, and short-term capital as shown in the balance of payments. This series shows net inflows (new investment inflows less disinvestment) in the reporting economy from foreign investors, and is divided by GDP.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.12.179 Foreign direct investment, net outflows (percent of GDP) (wdi_fdiout)

Long tag: qog_std_cs_wdi_fdiout

Original tag: wdi_fdiout

Description:

Foreign direct investment are the net outflows of investment to acquire a lasting management interest (10 percent or more of voting stock) in an enterprise operating in an economy other than that of the investor. It is the sum of equity capital, reinvestment of earnings, other long-term capital, and short-term capital as shown in the balance of payments. This series shows net outflows of investment from the reporting economy to the rest of the world and is divided by GDP.

2.17.12.180 Agriculture, forestry, and fishing, value added (percent of GDP) (wdi_gdpagr)

Long tag: qog_std_cs_wdi_gdpagr

Original tag: wdi_gdpagr

Description:

Agriculture corresponds to ISIC divisions 1-5 and includes forestry, hunting, and fishing, as well as cultivation of crops and livestock production. Value added is the net output of a sector after adding up all outputs and subtracting intermediate inputs. It is calculated without making deductions for depreciation of fabricated assets or depletion and degradation of natural resources. The origin of value added is determined by the International Standard Industrial Classification (ISIC), revision 3 or 4.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.12.181 GDP per capita (constant 2010 US dollar) (wdi_gdpcapcon2010)

Long tag: qog_std_cs_wdi_gdpcapcon2010

Original tag: wdi_gdpcapcon2010

Description:

GDP per capita is gross domestic product divided by midyear population. GDP is the sum of gross value added by all resident producers in the economy plus any product taxes and minus any subsidies not included in the value of the products. It is calculated without making deductions for depreciation of fabricated assets or for depletion and degradation of natural resources. Data are in constant 2010 U.S. dollars.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.12.182 GDP per capita (current US dollar) (wdi_gdpcapcur)

Long tag: qog_std_cs_wdi_gdpcapcur

Original tag: wdi_gdpcapcur

Description:

GDP per capita is gross domestic product divided by midyear population. GDP is the sum of gross value added by all resident producers in the economy plus any product taxes and minus any subsidies not included in the value of the products. It is calculated without making deductions for depreciation of fabricated assets or for depletion and degradation of natural resources. Data are in current U.S. dollars.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.12.183 GDP per capita growth (annual percent) (wdi_gdpcapgr)

Long tag: qog_std_cs_wdi_gdpcapgr

Original tag: wdi_gdpcapgr

Description:

Annual percentage growth rate of GDP per capita based on constant local currency. Aggregates are based on constant 2010 U.S. dollars. GDP per capita is gross domestic product divided by midyear population. GDP at purchaser's prices is the sum of gross value added by all resident producers in the economy plus any product taxes and minus any subsidies not included in the value of the products. It is calculated without making deductions for depreciation of fabricated assets or for depletion and degradation of natural resources.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.12.184 GDP per capita, PPP (constant 2017 international dollar) (wdi_gdpcappppcon2017)

Long tag: qog_std_cs_wdi_gdpcappppcon2017

Original tag: wdi_gdpcappppcon2017

Description:

GDP per capita based on purchasing power parity (PPP). PPP GDP is gross domestic product converted to international dollars using purchasing power parity rates. An international dollar has the same purchasing power over GDP as the U.S. dollar has in the United States. GDP at purchaser's prices is the sum of gross value added by all resident producers in the economy plus any product taxes and minus any subsidies not included in the value of the products. It is calculated without making deductions for depreciation of fabricated assets or for depletion and degradation of natural resources. Data are in constant 2017 international dollars.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.12.185 GDP per capita, PPP (current international dollar) (wdi_gdpcappppcur)

Long tag: qog_std_cs_wdi_gdpcappppcur

Original tag: wdi_gdpcappppcur

Description:

GDP per capita based on purchasing power parity (PPP). PPP GDP is gross domestic product converted to international dollars using purchasing power parity rates. An international dollar has the same purchasing power over GDP as the U.S. dollar has in the United States. GDP at purchaser's prices is the sum of gross value added by all resident producers in the economy plus any product taxes and minus any subsidies not included in the value of the products. It is calculated without making deductions for depreciation of fabricated assets or for depletion and degradation of natural resources. Data are in current international dollars based on the 2011 ICP round.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.12.186 GDP growth (annual percent) (wdi_gdpgr)

Long tag: qog_std_cs_wdi_gdpgr

Original tag: wdi_gdpgr

Description:

Annual percentage growth rate of GDP at market prices based on constant local currency. Aggregates are based on constant 2010 U.S. dollars. GDP is the sum of gross value added by all resident producers in the economy plus any product taxes and minus any subsidies not included in the value of the products. It is calculated without making deductions for depreciation of fabricated assets or for depletion and degradation of natural resources.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.12.187 Industry (including construction), value added (percent of GDP) (wdi_gdpind)

Long tag: qog_std_cs_wdi_gdpind

Original tag: wdi_gdpind

Description:

Industry corresponds to ISIC divisions 10-45 and includes manufacturing (ISIC divisions 15-37). It comprises value added in mining, manufacturing (also reported as a separate subgroup), construction, electricity, water, and gas. Value added is the net output of a sector after adding up all outputs and subtracting intermediate inputs. It is calculated without making deductions for depreciation of fabricated assets or depletion and degradation of natural resources. The origin of value added is determined by the International Standard Industrial Classification (ISIC), revision 3. Note: For VAB countries, gross value added at factor cost is used as the denominator.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.12.188 GDP, PPP (constant 2017 international dollar) (wdi_gdppppcon2017)

Long tag: qog_std_cs_wdi_gdppppcon2017

Original tag: wdi_gdppppcon2017

Description:

PPP GDP is gross domestic product converted to international dollars using purchasing power parity rates. An international dollar has the same purchasing power over GDP as the U.S. dollar has in the United States. GDP is the sum of gross value added by all resident producers in the economy plus any product taxes and minus any subsidies not included in the value of the products. It is calculated without making deductions for depreciation of fabricated assets or for depletion and degradation of natural resources. Data are in constant 2017 international dollars.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.12.189 GDP, PPP (current international dollar) (wdi_gdppppcur)

Long tag: qog_std_cs_wdi_gdppppcur

Original tag: wdi_gdppppcur

Description:
PPP GDP is gross domestic product converted to international dollars using purchasing power parity rates. An international dollar has the same purchasing power over GDP as the U.S. dollar has in the United States. GDP is the sum of gross value added by all resident producers in the economy plus any product taxes and minus any subsidies not included in the value of the products. It is calculated without making deductions for depreciation of fabricated assets or for depletion and degradation of natural resources. Data are in current international dollars. For most economies PPP figures are extrapolated from the 2011 International Comparison Program (ICP) benchmark estimates or imputed using a statistical model based on the 2011 ICP. For 47 high- and upper middle-income economies conversion factors are provided by Eurostat and the Organisation for Economic Co-operation and Development (OECD).

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.12.190 Gini index (World Bank estimate) (wdi_gini)

Long tag: qog_std_cs_wdi_gini

Original tag: wdi_gini

Description:
Gini index measures the extent to which the distribution of income (or, in some cases, consumption expenditure) among individuals or households within an economy deviates from a perfectly equal distribution. A Lorenz curve plots the cumulative percentages of total income received against the cumulative number of recipients, starting with the poorest individual or household. The Gini index measures the area between the Lorenz curve and a hypothetical line of absolute equality, expressed as a percentage of the maximum area under the line. Thus a Gini index of 0 represents perfect equality, while an index of 100 implies perfect inequality.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.12.191 GNI, Atlas method (current US dollar) (wdi_gniatlcur)

Long tag: qog_std_cs_wdi_gniatlcur

Original tag: wdi_gniatlcur

Description:
GNI (formerly GNP) is the sum of value added by all resident producers plus any product taxes (less subsidies) not included in the valuation of output plus net receipts of primary income (compensation of employees and property income) from abroad. Data are in current U.S. dollars. GNI, calculated in national currency, is usually converted to U.S. dollars at official exchange rates for comparisons across economies, although an alternative rate is used when the official exchange rate is judged to diverge by an exceptionally large margin from the rate actually applied in international transactions. To smooth fluctuations in prices and exchange rates, a special Atlas method of conversion is used by the World Bank. This applies a conversion factor that averages the exchange rate for a given year and the two preceding years, adjusted for differences in rates of inflation between the country, and through 2000, the G-5 countries (France, Germany, Japan, the United Kingdom, and the United States). From 2001, these countries include the Euro area, Japan, the United Kingdom, and the United States.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.12.192 GNI per capita, Atlas method (current US dollar) (wdi_gnicapatlcur)

Long tag: qog_std_cs_wdi_gnicapatlcur

Original tag: wdi_gnicapatlcur

Description:
GNI per capita (formerly GNP per capita) is the gross national income, converted to U.S. dollars using the World Bank Atlas method, divided by the midyear population. GNI is the sum of value added by all resident producers plus any product taxes (less subsidies) not included in the valuation of output plus net receipts of primary income (compensation of employees and property income) from abroad. GNI, calculated in national currency, is usually converted to U.S. dollars at official exchange rates for comparisons across economies, although an alternative rate is used when the official exchange rate is judged to diverge by an exceptionally large margin from the rate actually applied in international transactions. To smooth fluctuations in prices and exchange rates, a special Atlas method of conversion is used by the World Bank. This applies a conversion factor that averages the exchange rate for a given year and the two preceding years, adjusted for differences in rates of inflation between the country, and through 2000, the G-5 countries (France, Germany, Japan, the United Kingdom, and the United States). From 2001, these countries include the Euro area, Japan, the United Kingdom, and the United States.

2.17.12.203 Income share held by highest 10percent (wdi_incsh10h)

Long tag: qog_std_cs_wdi_incsh10h

Original tag: wdi_incsh10h

Description:
Income share held by highest 10percent. Percentage share of income or consumption is the share that accrues to subgroups of population indicated by deciles or quintiles.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.12.204 Income share held by lowest 10percent (wdi_incsh10l)

Long tag: qog_std_cs_wdi_incsh10l

Original tag: wdi_incsh10l

Description:
Income share held by lowest 10percent. Percentage share of income or consumption is the share that accrues to subgroups of population indicated by deciles or quintiles.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.12.205 Income share held by second 20percent (wdi_incsh202)

Long tag: qog_std_cs_wdi_incsh202

Original tag: wdi_incsh202

Description:
Income share held by second 20percent. Percentage share of income or consumption is the share that accrues to subgroups of population indicated by deciles or quintiles. Percentage shares by quintile may not sum to 100 because of rounding.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.12.206 Income share held by third 20percent (wdi_incsh203)

Long tag: qog_std_cs_wdi_incsh203

Original tag: wdi_incsh203

Description:
Income share held by third 20percent. Percentage share of income or consumption is the share that accrues to subgroups of population indicated by deciles or quintiles. Percentage shares by quintile may not sum to 100 because of rounding.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.12.207 Income share held by fourth 20percent (wdi_incsh204)

Long tag: qog_std_cs_wdi_incsh204

Original tag: wdi_incsh204

Description:
Income share held by fourth 20percent. Percentage share of income or consumption is the share that accrues to subgroups of population indicated by deciles or quintiles. Percentage shares by quintile may not sum to 100 because of rounding.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.12.208 Income share held by highest 20percent (wdi_incsh20h)

Long tag: qog_std_cs_wdi_incsh20h

Original tag: wdi_incsh20h

Description:
Income share held by highest 20percent. Percentage share of income or consumption is the share that accrues to subgroups of population indicated by deciles or quintiles. Percentage shares by quintile may not sum to 100 because of rounding.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.12.209 Income share held by lowest 20percent (wdi_incsh20l)

Long tag: qog_std_cs_wdi_incsh20l

Original tag: wdi_incsh20l

Description:
Income share held by lowest 20percent. Percentage share of income or consumption is the share that accrues to subgroups of population indicated by deciles or quintiles. Percentage shares by quintile may not sum to 100 because of rounding.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.12.210 Inflation, consumer prices (annual percent) (wdi_inflation)

Long tag: qog_std_cs_wdi_inflation

Original tag: wdi_inflation

Description:
Inflation as measured by the consumer price index reflects the annual percentage change in the cost to the average consumer of acquiring a basket of goods and services that may be fixed or changed at specified intervals, such as yearly. The Laspeyres formula is generally used.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.12.211 Interest payments (percent of expense) (wdi_interexp)

Long tag: qog_std_cs_wdi_interexp

Original tag: wdi_interexp

Description:
Interest payments as percentage of expense include interest payments on government debt–including long-term bonds, long-term loans, and other debt instruments–to domestic and foreign residents.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.12.212 Interest payments (percent of revenue) (wdi_interrev)

Long tag: qog_std_cs_wdi_interrev

Original tag: wdi_interrev

Description:
Interest payments as percentage of revenue include interest payments on government debt–including long-term bonds, long-term loans, and other debt instruments–to domestic and foreign residents.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.12.213 Real interest rate (percent) (wdi_intrate)

Long tag: qog_std_cs_wdi_intrate

Original tag: wdi_intrate

Description:
Real interest rate is the lending interest rate adjusted for inflation as measured by the GDP deflator. The terms and conditions attached to lending rates differ by country, however, limiting their comparability.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.12.214 Poverty gap at USD 3.20 a day (2011 PPP) (percent) (wdi_povgap320)

Long tag: qog_std_cs_wdi_povgap320

Original tag: wdi_povgap320

Description:
Poverty gap at 3.20 dollars a day (2011 PPP) is the mean shortfall in income or consumption from the poverty line 3.20 dollars a day (counting the nonpoor as having zero shortfall), expressed as a percentage of the poverty line. This measure reflects the depth of poverty as well as its incidence (percent of population).

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.12.215 Services, value added (constant 2010 US dollar) (wdi_sva2010)

Long tag: qog_std_cs_wdi_sva2010

Original tag: wdi_sva2010

Description:

Services, value added (constant 2010 US dollar). Services correspond to ISIC divisions 50-99. They include value added in wholesale and retail trade (including hotels and restaurants), transport, and government, financial, professional, and personal services such as education, health care, and real estate services. Also included are imputed bank service charges, import duties, and any statistical discrepancies noted by national compilers as well as discrepancies arising from rescaling. Value added is the net output of a sector after adding up all outputs and subtracting intermediate inputs. It is calculated without making deductions for depreciation of fabricated assets or depletion and degradation of natural resources. The industrial origin of value added is determined by the International Standard Industrial Classification (ISIC), revision 3 or 4. Data are in constant 2010 U.S. dollars.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.12.216 Services, value added (annual percent growth) (wdi_svapg)

Long tag: qog_std_cs_wdi_svapg

Original tag: wdi_svapg

Description:

Services, value added (annual percent growth). Annual growth rate for value added in services based on constant local currency. Aggregates are based on constant 2010 U.S. dollars. Services correspond to ISIC divisions 50-99. They include value added in wholesale and retail trade (including hotels and restaurants), transport, and government, financial, professional, and personal services such as education, health care, and real estate services. Also included are imputed bank service charges, import duties, and any statistical discrepancies noted by national compilers as well as discrepancies arising from rescaling. Value added is the net output of a sector after adding up all outputs and subtracting intermediate inputs. It is calculated without making deductions for depreciation of fabricated assets or depletion and degradation of natural resources. The industrial origin of value added is determined by the International Standard Industrial Classification (ISIC), revision 3 or 4.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.12.217 Services, value added (percent of GDP) (wdi_svapgdp)

Long tag: qog_std_cs_wdi_svapgdp

Original tag: wdi_svapgdp

Description:

Services, value added (percent of GDP). Services correspond to ISIC divisions 50-99 and they include value added in wholesale and retail trade (including hotels and restaurants), transport, and government, financial, professional, and personal services such as education, health care, and real estate services. Also included are imputed bank service charges, import duties, and any statistical discrepancies noted by national compilers as well as discrepancies arising from rescaling. Value added is the net output of a sector after adding up all outputs and subtracting intermediate inputs. It is calculated without making deductions for depreciation of fabricated assets or depletion and degradation of natural resources. The industrial origin of value added is determined by the International Standard Industrial Classification (ISIC), revision 3 or 4.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.12.218 Tax revenue (percent of GDP) (wdi_taxrev)

Long tag: qog_std_cs_wdi_taxrev

Original tag: wdi_taxrev

Description:

Tax revenue refers to compulsory transfers to the central government for public purposes. Certain compulsory transfers such as fines, penalties, and most social security contributions are excluded. Refunds and corrections of erroneously collected tax revenue are treated as negative revenue.

Note: The value for San Marino for 1995 was extremely high (44326) and has been recoded to missing.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.12.219 Trade (percent of GDP) (wdi_trade)

Long tag: qog_std_cs_wdi_trade

Original tag: wdi_trade

Description:

Trade is the sum of exports and imports of goods and services measured as a share of gross domestic product.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.12.220 Trade in services (percent of GDP) (wdi_tradeserv)

Long tag: qog_std_cs_wdi_tradeserv

Original tag: wdi_tradeserv

Description:

Trade in services is the sum of service exports and imports divided by the value of GDP, all in current U.S. dollars.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.12.221 Debt dynamics. 0-100 (best) (wef_ddyn)

Long tag: qog_std_cs_wef_ddyn

Original tag: wef_ddyn

Description:

Debt dynamics. 0-100 (best). Index measuring the change in public debt, weighted by a country's credit rating and debt level in relation to its GDP. Original sources: World Economic Forum; calculations based on data from International Monetary Fund and rating agencies

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. `http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf`

2.17.12.222 Gross domestic product (billions, PPP) (wef_gdpp2)

Long tag: qog_std_cs_wef_gdpp2

Original tag: wef_gdpp2

Description:

Gross domestic product (GDP) PPP dollar valued at purchasing power parity in billions of international dollars (constant 2011 prices). Original sources: International Monetary Fund (IMF)

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. `http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf`

2.17.12.223 Inflation. Annual percent change (wef_infl)

Long tag: qog_std_cs_wef_infl

Original tag: wef_infl

Description:

Inflation. Annual percent change. Annual percent change in consumer price index (year average). Original sources: International Monetary Fund (IMF)

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. `http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf`

2.17.12.224 Prevalence of non-tariff barriers. 1-7 (best) (wef_pntb)

Long tag: qog_std_cs_wef_pntb

Original tag: wef_pntb

Description:

Prevalence of non-tariff barriers. 1-7 (best). In your country, to what extent do non-tariff barriers (e.g., health and product standards, technical and labeling requirements, etc.) limit the ability of imported goods to compete in the domestic market? [1 = strongly limit; 7 = do not limit at all] Original sources: World Economic Forum, Executive Opinion Survey

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. `http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf`

2.17.12.225 Pay and productivity. 1-7 (best) (wef_pp)

Long tag: qog_std_cs_wef_pp

Original tag: wef_pp

Description:
Pay and productivity. 1-7 (best). In your country, to what extent is pay related to employee productivity? [1 = not at all; 7 = to a great extent] Original sources: World Economic Forum, Executive Opinion Survey

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. `http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf`

2.17.12.226 Scientific publications. H Index (wef_sp)

Long tag: qog_std_cs_wef_sp

Original tag: wef_sp

Description:
Scientific publications. H Index. Score on an index measuring the number of publications and their citations, expressed at the country level. Original sources: SCImago

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. `http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf`

2.17.13 Welfare

This category includes indicators on government expenditure related to social welfare (pension, sick- ness coverage and accidents coverage).

2.17.13.1 Social Safety Nets (bti_ssn)

Long tag: qog_std_cs_bti_ssn

Original tag: bti_ssn

Description:
To what extent do social safety nets provide compensation for social risks? 1-10.

1. Social safety nets do not exist. Poverty is combated hardly at all, or only ad hoc.
4. Social safety nets are rudimentary and cover only few risks for a limited number of beneficiaries. The majority of the population is at risk of poverty.
7. Social safety nets are well developed, but do not cover all risks for all strata of the population. A significant part of the population is still at risk of poverty.
10. Social safety nets are comprehensive and compensate for social risks, especially nationwide health care and a well-focused prevention of poverty.

Variable citation: Donner, S., Hartmann, H., & Schwarz, R. (2020). *Transformation index of the bertelsmann stiftung 2020*. Bertelsmann Stiftung. `http://www.bti-project.org`

2.17.13.2 Welfare Regime (bti_wr)

Long tag: qog_std_cs_bti_wr

Original tag: bti_wr

Description:
Welfare Regime: Assesses whether there are available arrangements to compensate for social risks 1-10. Including "To what extent do social safety nets provide compensation for social risks?" and "To what extent does equality of opportunity exist?".

Variable citation: Donner, S., Hartmann, H., & Schwarz, R. (2020). *Transformation index of the bertelsmann stiftung 2020*. Bertelsmann Stiftung. `http://www.bti-project.org`

2.17.13.3 Expenditure on general public services, as percent of total gen. gov. exp. (gfs_gps)

Long tag: qog_std_cs_gfs_gps

Original tag: gfs_gps

Description:
Total expenditure on general public services, as the percentage of general government expenditure.

Variable citation: International Monetary Fund. (2019). Government finance statistics yearbook (gfsy) 2019. `https://data.imf.org/?sk=a0867067-d23c-4ebc-ad23-d3b015045405`

2.17.13.4 Expenditure on housing and comm. amenities, as percent of total gen. gov. exp. (gfs_hca)

Long tag: qog_std_cs_gfs_hca

Original tag: gfs_hca

Description:
Total expenditure on housing and community amenities, as the percentage of general government expenditure.

Variable citation: International Monetary Fund. (2019). Government finance statistics yearbook (gfsy) 2019. `https://data.imf.org/?sk=a0867067-d23c-4ebc-ad23-d3b015045405`

2.17.13.5 Expenditure on recreation, culture and religion, as percent of total gen. gov. exp. (gfs_rcr)

Long tag: qog_std_cs_gfs_rcr

Original tag: gfs_rcr

Description:
Total expenditure on recreation, culture and religion, as the percentage of general government expenditure.

Variable citation: International Monetary Fund. (2019). Government finance statistics yearbook (gfsy) 2019. `https://data.imf.org/?sk=a0867067-d23c-4ebc-ad23-d3b015045405`

2.17.13.6 Structure of central gov. expenditures, social protection (oecd_gengovdistri_t1j)

Long tag: qog_std_cs_oecd_gengovdistri_t1j

Original tag: oecd_gengovdistri_t1j

Description:
Structure of central government expenditures, social protection.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. `https://doi.org/10.1787/20752288`

2.17.13.7 Public social expenditure (oecd_socexpnd_t1a)

Long tag: qog_std_cs_oecd_socexpnd_t1a

Original tag: oecd_socexpnd_t1a

Description:
Public social expenditure.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. `https://doi.org/10.1787/20752288`

2.17.13.8 Private social expenditure (oecd_socexpnd_t1b)

Long tag: qog_std_cs_oecd_socexpnd_t1b

Original tag: oecd_socexpnd_t1b

Description:
Private social expenditure.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. `https://doi.org/10.1787/20752288`

2.17.13.9 Net social expenditure (oecd_socexpnd_t1c)

Long tag: qog_std_cs_oecd_socexpnd_t1c

Original tag: oecd_socexpnd_t1c

Description:
Net social expenditure.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. `https://doi.org/10.1787/20752288`

2.17.13.10 Sustainable Policies: Social Policies - Overall (sgi_so)

Long tag: qog_std_cs_sgi_so

Original tag: sgi_so

Description:
Sustainable Policies: Social Policies (Education, Social Inclusion, Health, Families, Pensions, Integration, Safe Living, Global Inequalities).

Variable citation: Schiller, C., & Hellmann, T. (2020). Sustainable governance indicators 2020 [Date accessed: 12 December 2021]. *Bertelsmann Stiftung*. `https://www.sgi-network.org`

2.17.13.11 Sustainable Policies: Social Policies - Families (sgi_sofa)

Long tag: qog_std_cs_sgi_sofa

Original tag: sgi_sofa

Description:
Sustainable Policies: Social Policies - Families (Family Policy, Child Care Density Age 0-2, Child Care Density Age 3-5, Fertility Rate, Child Poverty Rate).

Variable citation: Schiller, C., & Hellmann, T. (2020). Sustainable governance indicators 2020 [Date accessed: 12 December 2021]. *Bertelsmann Stiftung*. `https://www.sgi-network.org`

2.17.13.12 Sustainable Policies: Social Policies - Global Social Inequalities (sgi_sogi)

Long tag: qog_std_cs_sgi_sogi

Original tag: sgi_sogi

Description:
Sustainable Policies: Social Policies - Global Inequalities (Global Social Policy, Official Development Assistance (ODA)).

Variable citation: Schiller, C., & Hellmann, T. (2020). Sustainable governance indicators 2020 [Date accessed: 12 December 2021]. *Bertelsmann Stiftung*. `https://www.sgi-network.org`

2.17.13.13 Sustainable Policies: Social Policies - Integration Policy (sgi_soin)

Long tag: qog_std_cs_sgi_soin

Original tag: sgi_soin

Description:
Sustainable Policies: Social Policies - Integration (Integration Policy, Foreign-born to Native Upper Secondary Attainment, Foreign-born to Native Tertiary Attainment, Foreign-born to Native Unemployment, Foreign-born to Native Employment).

Variable citation: Schiller, C., & Hellmann, T. (2020). Sustainable governance indicators 2020 [Date accessed: 12 December 2021]. *Bertelsmann Stiftung*. `https://www.sgi-network.org`

2.17.13.14 Sustainable Policies: Social Policies - Pensions (sgi_sope)

Long tag: qog_std_cs_sgi_sope

Original tag: sgi_sope

Description:
Sustainable Policies: Social Policies - Pensions (Pension Policy, Older Employment, Old Age Dependency Ratio, Senior Citizen Poverty).

Variable citation: Schiller, C., & Hellmann, T. (2020). Sustainable governance indicators 2020 [Date accessed: 12 December 2021]. *Bertelsmann Stiftung*. `https://www.sgi-network.org`

2.17.13.15 Sustainable Policies: Social Policies - Social Inclusion (sgi_sosi)

Long tag: qog_std_cs_sgi_sosi

Original tag: sgi_sosi

Description:
Sustainable Policies: Social Policies - Social Inclusion (Social Inclusion Policy, Poverty Rate, NEET Rate, Gini Coefficient, Gender Equality in Parliaments, Life Satisfaction).

Variable citation: Schiller, C., & Hellmann, T. (2020). Sustainable governance indicators 2020 [Date accessed: 12 December 2021]. *Bertelsmann Stiftung*. `https://www.sgi-network.org`

2.17.13.16 Sustainable Policies: Social Policies - Safe Living Conditions (sgi_sosl)

Long tag: qog_std_cs_sgi_sosl

Original tag: sgi_sosl

Description:
Sustainable Policies: Social Policies - Safe Living (Internal Security Policy, Homicides, Thefts, Confidence in Police).

Variable citation: Schiller, C., & Hellmann, T. (2020). Sustainable governance indicators 2020 [Date accessed: 12 December 2021]. *Bertelsmann Stiftung*. `https://www.sgi-network.org`

2.17.13.17 CPIA social protection rating (1=low to 6=high) (wdi_spr)

Long tag: qog_std_cs_wdi_spr

Original tag: wdi_spr

Description:
Social protection and labor assess government policies in social protection and labor market regulations that reduce the risk of becoming poor, assist those who are poor to better manage further risks, and ensure a minimal level of welfare to all people.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.13.18 Confidence: Social Security System (wvs_confsss)

Long tag: qog_std_cs_wvs_confsss

Original tag: wvs_confsss

Description:
I am going to name a number of organizations. For each one, could you tell me how much confidence you have in them: Social Security System

1. None at all
2. Not very much
3. Quite a lot
4. A great deal

2.17.13.20 Share of public paid employees with social security (wwbi_pupempss)

Long tag: qog_std_cs_wwbi_pupempss

Original tag: wwbi_pupempss

Description:
Share of public paid employees with social security

Variable citation: The World Bank. (2021b). Worldwide bureacracy indicators version 2.0. `https://www.worldbank.org/en/topic/migrationremittancesdiasporaissues/brief/migration-remittances-data`

2.17.14 Health

This category includes indicators describing the health of a population in a given country. These include reports about self-perceived health (state of health), policies and provided infrastructure concerning health (expenditure, number of hospitals), the prevalence of diseases (HIV, tuberculosis), and indicators such as birth rate, death rate and life expectancy.

2.17.14.1 Comparative Abortion Index 1 (0 to 7) (cai_cai1)

Long tag: qog_std_cs_cai_cai1

Original tag: cai_cai1

Description:
The scale quantifies grounds on which a country might grant legal access to abortion: saving a woman's life, preserving a woman's physical health, preserving a woman's mental health, in case of rape or incest, in case of fetal impairment, for social or economic reasons, and on request. 0 represents a country with a complete ban on abortions. 7 represents a country that allows abortions on request.

Variable citation: Forman–Rabinovici, A., & Sommer, U. (2018). Reproductive health policymakers: Comparing the influences of international and domestic institutions on abortion policy. *Public Administration*, 96(1), 185–199

2.17.14.2 Comparative Abortion Index 2 (0 to 1) (cai_cai2)

Long tag: qog_std_cs_cai_cai2

Original tag: cai_cai2

Description:

Using the 7 grounds for legal abortion, the weight of each grounds (Wi) will be determined based on the percentage (Pi) of countries that allow it. In the weighted index, countries are given a score on a scale of 0-1, where 0 represents countries in which there are no conditions for legal abortion, and 1 represents a country that accepts all criteria for abortion, including on request. The need for a weighted scale is as follows: It would be imprecise, for instance, to suggest that the criterion of saving a woman's life is equivalent to (and thus carries the same weight as) allowing abortion on demand. The more permissive the criterion, the less likely that it is universally accepted. Thus, the scale accounts for the different degrees of acceptance that each criterion represents.

Variable citation: Forman–Rabinovici, A., & Sommer, U. (2018). Reproductive health policymakers: Comparing the influences of international and domestic institutions on abortion policy. *Public Administration*, 96(1), 185–199

2.17.14.3 Foetal impairment is accepted as grounds for legal abortion (cai_foetal)

Long tag: qog_std_cs_cai_foetal

Original tag: cai_foetal

Description:

Binary variable that codes whether or not foetal impairment is accepted as grounds for a legal abortion. 1 means that it is accepted as grounds for abortion. 0 means that it is illegal, and not accepted as grounds for legal abortion.

Variable citation: Forman–Rabinovici, A., & Sommer, U. (2018). Reproductive health policymakers: Comparing the influences of international and domestic institutions on abortion policy. *Public Administration*, 96(1), 185–199

2.17.14.4 Threat to mother's life is accepted as grounds for legal abortion (cai_life)

Long tag: qog_std_cs_cai_life

Original tag: cai_life

Description:

Binary variable that codes whether or not threat to a mother's life is accepted as grounds for a legal abortion. 1 means that it is accepted as grounds for abortion. 0 means that it is illegal, and not accepted as grounds for legal abortion.

Variable citation: Forman–Rabinovici, A., & Sommer, U. (2018). Reproductive health policymakers: Comparing the influences of international and domestic institutions on abortion policy. *Public Administration*, 96(1), 185–199

2.17.14.5 Threat to mother's mental health is accepted as grounds for legal abortion (cai_mental)

Long tag: qog_std_cs_cai_mental

Original tag: cai_mental

Description:

Binary variable that codes whether or not threat to a mother's mental health is accepted as grounds for a legal abortion. 1 means that it is accepted as grounds for abortion. 0 means that it is illegal, and not accepted as grounds for legal abortion.

Variable citation: Forman–Rabinovici, A., & Sommer, U. (2018). Reproductive health policymakers: Comparing the influences of international and domestic institutions on abortion policy. *Public Administration*, 96(1), 185–199

2.17.14.6 Threat to mother's physical health is accepted as grounds for legal abortion (cai_physical)

Long tag: qog_std_cs_cai_physical

Original tag: cai_physical

Description:

Binary variable that codes whether or not threat to a mother's physical health is accepted as grounds for a legal abortion. 1 means that it is accepted as grounds for abortion. 0 means that it is illegal, and not accepted as grounds for legal abortion.

Variable citation: Forman–Rabinovici, A., & Sommer, U. (2018). Reproductive health policymakers: Comparing the influences of international and domestic institutions on abortion policy. *Public Administration*, 96(1), 185–199

2.17.14.7 Pregnancy as result of rape or incest is accepted as grounds for legal abortion (cai_rape)

Long tag: qog_std_cs_cai_rape

Original tag: cai_rape

Description:
Binary variable that codes whether or not pregnancy as a result of rape or incest is accepted as grounds for a legal abortion. 1 means that they are accepted as grounds for abortion. 0 means that it is illegal, and they are not accepted as grounds for legal abortion.

Variable citation: Forman–Rabinovici, A., & Sommer, U. (2018). Reproductive health policymakers: Comparing the influences of international and domestic institutions on abortion policy. *Public Administration*, 96(1), 185–199

2.17.14.8 Abortion is available on request (cai_request)

Long tag: qog_std_cs_cai_request

Original tag: cai_request

Description:
Binary variable that codes whether abortion is available on request. In other words, if there is complete legal access to abortion. 1 implies that there is complete access to abortion. 0 implies that there are limitations, and abortion services are not legally available upon request.

Variable citation: Forman–Rabinovici, A., & Sommer, U. (2018). Reproductive health policymakers: Comparing the influences of international and domestic institutions on abortion policy. *Public Administration*, 96(1), 185–199

2.17.14.9 Social or economic reasons are accepted as grounds for legal abortion (cai_social)

Long tag: qog_std_cs_cai_social

Original tag: cai_social

Description:
Binary variable that codes whether or not social or economic reasons are accepted as grounds for a legal abortion. 1 means that they are accepted as grounds for abortion. 0 means that it is illegal, and they are not accepted as grounds for legal abortion.

Variable citation: Forman–Rabinovici, A., & Sommer, U. (2018). Reproductive health policymakers: Comparing the influences of international and domestic institutions on abortion policy. *Public Administration*, 96(1), 185–199

2.17.14.10 Environmental Health (0-100) (epi_eh)

Long tag: qog_std_cs_epi_eh

Original tag: epi_eh

Description:
The Environmental Health policy objective measures how well countries are protecting their populations from environmental health risks. It comprises 40percent of the total EPI score and is made up of four issue categories: Air Quality (50percent), Sanitation
Drinking Water (percent40), Heavy Metals (percent5), and Waste Management (percent5).

Variable citation: Wendling, Z., Emerson, J., de Sherbinin, A., Esty, D., & M.A. Levy, e. a. (2020). 2020 environmental performance index [Date accessed: 20 December 2021]. *New Haven, CT: Yale Center for Environmental Law and Policy*. `https://epi.envirocenter.yale.edu/`

2.17.14.11 Subjective Happiness (ess_happy)

Long tag: qog_std_cs_ess_happy

Original tag: ess_happy

Description:
Taking all things together, how happy would you say you are?
0. Extremely Unhappy
1.
2.
3.
4.
5.
6.
7.
8.
9.
10. Extremely Happy

2.17.14.49 Global Gender Gap Health and Survival Subindex (gggi_hss)

Long tag: qog_std_cs_gggi_hss

Original tag: gggi_hss

Description:
Health and Survival (0 to 1, where 1 indicates no gap). This subindex provides an overview of the differences between women's and men's health through the use of two indicators. The first is the sex ratio at birth, which aims specifically to capture the phenomenon of "missing women", prevalent in many countries with a strong son preference. Second, we use the gap between women's and men's healthy life expectancy. This measure provides an estimate of the number of years that women and men can expect to live in good health by taking into account the years lost to violence, disease, malnutrition and other relevant factors.

2.17.14.71 Human Development Index (undp_hdi)

Long tag: qog_std_cs_undp_hdi

Original tag: undp_hdi

Description:
The HDI was created to emphasize that people and their capabilities should be the ultimate criteria for assessing the development of a country, not economic growth alone. The HDI can also be used to question national policy choices, asking how two countries with the same level of GNI per capita can end up with different human development outcomes. These contrasts can stimulate debate about government policy priorities.

The Human Development Index (HDI) is a summary measure of average achievement in key dimensions of human development: a long and healthy life, being knowledgeable and having a decent standard of living. The HDI is the geometric mean of normalized indices for each of the three dimensions.

The health dimension is assessed by life expectancy at birth, the education dimension is measured by mean of years of schooling for adults aged 25 years and more and expected years of schooling for children of school entering age. The standard of living dimension is measured by gross national income per capita. The HDI uses the logarithm of income, to reflect the diminishing importance of income with increasing GNI. The scores for the three HDI dimension indices are then aggregated into a composite index using geometric mean. Refer to Technical notes for more details.

The HDI simplifies and captures only part of what human development entails. It does not reflect on inequalities, poverty, human security, empowerment, etc. The HDRO offers the other composite indices as broader proxy on some of the key issues of human development, inequality, gender disparity and human poverty.

2.17.14.72 CPIA building human resources rating (1=low to 6=high) (wdi_bhr)

Long tag: qog_std_cs_wdi_bhr

Original tag: wdi_bhr

Description:
The CPIA measures the extent to which a country's policy and institutional framework supports sustainable growth and poverty reduction and, consequently, the effective use of development assistance. More

specifically, this indicator assesses the national policies and public and private sector service delivery that affect the access to and quality of health and education services, including prevention and treatment of HIV/AIDS, tuberculosis, and malaria.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.14.73 Current health expenditure (percent of GDP) (wdi_chexppgdp)

Long tag: qog_std_cs_wdi_chexppgdp

Original tag: wdi_chexppgdp

Description:

Current health expenditure (percent of GDP). Level of current health expenditure expressed as a percentage of GDP. Estimates of current health expenditures include healthcare goods and services consumed during each year. This indicator does not include capital health expenditures such as buildings, machinery, IT and stocks of vaccines for emergency or outbreaks.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.14.74 Prevalence of severe food insecurity in the population (percent) (wdi_foodins)

Long tag: qog_std_cs_wdi_foodins

Original tag: wdi_foodins

Description:

The percentage of people in the population who live in households classified as severely food insecure. A household is classified as severely food insecure when at least one adult in the household has reported to have been exposed, at times during the year, to several of the most severe experiences described in the FIES questions, such as to have been forced to reduce the quantity of the food, to have skipped meals, having gone hungry, or having to go for a whole day without eating because of a lack of money or other resources.

2.17.14.75 Intentional homicides, female (per 100,000 female) (wdi_homicidesf)

Long tag: qog_std_cs_wdi_homicidesf

Original tag: wdi_homicidesf

Description:

Intentional homicides, female (per 100,000 female). Intentional homicides, female are estimates of unlawful female homicides purposely inflicted as a result of domestic disputes, interpersonal violence, violent conflicts over land resources, intergang violence over turf or control, and predatory violence and killing by armed groups. Intentional homicide does not include all intentional killing; the difference is usually in the organization of the killing. Individuals or small groups usually commit homicide, whereas killing in armed conflict is usually committed by fairly cohesive groups of up to several hundred members and is thus usually excluded.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.14.76 Intentional homicides, male (per 100,000 male) (wdi_homicidesm)

Long tag: qog_std_cs_wdi_homicidesm

Original tag: wdi_homicidesm

Description:

Intentional homicides, male (per 100,000 male). Intentional homicides, male are estimates of unlawful male homicides purposely inflicted as a result of domestic disputes, interpersonal violence, violent conflicts over land resources, intergang violence over turf or control, and predatory violence and killing by armed groups. Intentional homicide does not include all intentional killing; the difference is usually in the organization of the killing. Individuals or small groups usually commit homicide, whereas killing in armed conflict is usually committed by fairly cohesive groups of up to several hundred members and is thus usually excluded.

2.17.14.77 People with basic handwashing facilities (percent of population) (wdi_hwf)

Long tag: qog_std_cs_wdi_hwf

Original tag: wdi_hwf

Description:
People with basic handwashing facilities including soap and water (percent of population). The percentage of people living in households that have a handwashing facility with soap and water available on the premises. Handwashing facilities may be fixed or mobile and include a sink with tap water, buckets with taps, tippy-taps, and jugs or basins designated for handwashing. Soap includes bar soap, liquid soap, powder detergent, and soapy water but does not include ash, soil, sand or other handwashing agents.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.14.78 People with basic handwashing facilities, rural (percent of rural population) (wdi_hwfr)

Long tag: qog_std_cs_wdi_hwfr

Original tag: wdi_hwfr

Description:
People with basic handwashing facilities including soap and water, rural (percent of rural population). The percentage of people living in households that have a handwashing facility with soap and water available on the premises. Handwashing facilities may be fixed or mobile and include a sink with tap water, buckets with taps, tippy-taps, and jugs or basins designated for handwashing. Soap includes bar soap, liquid soap, powder detergent, and soapy water but does not include ash, soil, sand or other handwashing agents.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.14.79 People with basic handwashing facilities, urban (percent of urban population) (wdi_hwfu)

Long tag: qog_std_cs_wdi_hwfu

Original tag: wdi_hwfu

Description:
People with basic handwashing facilities including soap and water, urban (percent of urban population). The percentage of people living in households that have a handwashing facility with soap and water available on the premises. Handwashing facilities may be fixed or mobile and include a sink with tap water, buckets with taps, tippy-taps, and jugs or basins designated for handwashing. Soap includes bar soap, liquid soap, powder detergent, and soapy water but does not include ash, soil, sand or other handwashing agents.

2.17.14.80 Lifetime risk of maternal death (percent) (wdi_lrmd)

Long tag: qog_std_cs_wdi_lrmd

Original tag: wdi_lrmd

Description:
Life time risk of maternal death is the probability that a 15-year-old female will die eventually from a maternal cause assuming that current levels of fertility and mortality (including maternal mortality) do not change in the future, taking into account competing causes of death.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.14.81 Out-of-pocket expenditure (percent of current health expenditure) (wdi_ophexp)

Long tag: qog_std_cs_wdi_ophexp

Original tag: wdi_ophexp

Description:
Out-of-pocket expenditure (percent of current health expenditure). Share of out-of-pocket payments of total current health expenditures. Out-of-pocket payments are spending on health directly out-of-pocket by households.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.14.82 Smoking prevalence, females (percent of adults) (wdi_smokf)

Long tag: qog_std_cs_wdi_smokf

Original tag: wdi_smokf

Description:
Prevalence of smoking, female is the percentage of women ages 15 and over who smoke any form of tobacco,

including cigarettes, cigars, pipes or any other smoked tobacco products. Data include daily and non-daily or occasional smoking.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.14.83 Smoking prevalence, males (percent of adults) (wdi_smokm)

Long tag: qog_std_cs_wdi_smokm

Original tag: wdi_smokm

Description:
Prevalence of smoking, male is the percentage of men ages 15 and over who smoke any form of tobacco, including cigarettes, cigars, pipes or any other smoked tobacco products. Data include daily and non-daily or occasional smoking.

2.17.15.5 Important in life: Religion (wvs_imprel)

Long tag: qog_std_cs_wvs_imprel

Original tag: wvs_imprel

Description:

For each of the following, indicate how important it is in your life. Would you say it is: Religion

1. Not at all important
2. Not very important
3. Rather important
4. Very important

Variable citation: Haerpfer, C., Inglehart, R., Moreno, A., Welzel, C., Kizilova, K., Diez-Medrano, J., Lagos, M., Norris, P., Ponarin, E., & et al., B. P. (2021). 2.17.16.26 International migrant stock (percent of population) (wdi_imig)

Long tag: qog_std_cs_wdi_imig

Original tag: wdi_imig

Description:
International migrant stock is the number of people born in a country other than that in which they live. It also includes refugees. The data used to estimate the international migrant stock at a particular time are obtained mainly from population censuses. The estimates are derived from the data on foreign-born population–people who have residence in one country but were born in another country. When data on the foreign-born population are not available, data on foreign population–that is, people who are citizens of a country other than the country in which they reside–are used as estimates. After the breakup of the Soviet Union in 1991 people living in one of the newly independent countries who were born in another were classified as international migrants. Estimates of migrant stock in the newly independent states from 1990 on are based on the 1989 census of the Soviet Union. For countries with information on the international migrant stock for at least two points in time, interpolation or extrapolation was used to estimate the international migrant stock on July 1 of the reference years. For countries with only one observation, estimates for the reference years were derived using rates of change in the migrant stock in the years preceding or following the single observation available. A model was used to estimate migrants for countries that had no data.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.16.27 Net migration (wdi_migration)

Long tag: qog_std_cs_wdi_migration

Original tag: wdi_migration

Description:

Net migration is the net total of migrants during the period, that is, the total number of immigrants less the annual number of emigrants, including both citizens and noncitizens. Data are five-year estimates.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.16.28 Refugee population by country or territory of asylum (wdi_refasy)

Long tag: qog_std_cs_wdi_refasy

Original tag: wdi_refasy

Description:

Refugees are people who are recognized as refugees under the 1951 Convention Relating to the Status of Refugees or its 1967 Protocol, the 1969 Organization of African Unity Convention Governing the Specific Aspects of Refugee Problems in Africa, people recognized as refugees in accordance with the UNHCR statute, people granted refugee-like humanitarian status, and people provided temporary protection. Asylum seekers–people who have applied for asylum or refugee status and who have not yet received a decision or who are registered as asylum seekers–are excluded. Palestinian refugees are people (and their descendants) whose residence was Palestine between June 1946 and May 1948 and who lost their homes and means of livelihood as a result of the 1948 Arab-Israeli conflict. Country of asylum is the country where an asylum claim was filed and granted.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.16.29 Refugee population by country or territory of origin (wdi_refori)

Long tag: qog_std_cs_wdi_refori

Original tag: wdi_refori

Description:

Refugees are people who are recognized as refugees under the 1951 Convention Relating to the Status of Refugees or its 1967 Protocol, the 1969 Organization of African Unity Convention Governing the Specific Aspects of Refugee Problems in Africa, people recognized as refugees in accordance with the UNHCR statute, people granted refugee-like humanitarian status, and people provided temporary protection. Asylum seekers–people who have applied for asylum or refugee status and who have not yet received a decision or who are registered as asylum seekers–are excluded. Palestinian refugees are people (and their descendants) whose residence was Palestine between June 1946 and May 1948 and who lost their homes and means of livelihood as a result of the 1948 Arab-Israeli conflict. Country of origin generally refers to the nationality or country of citizenship of a claimant.

2.17.17.127 Age dependency ratio (percent of working-age pop.) (wdi_agedr)

Long tag: qog_std_cs_wdi_agedr

Original tag: wdi_agedr

Description:
Age dependency ratio is the ratio of dependents–people younger than 15 or older than 64–to the working-age population–those ages 15-64. Data are shown as the proportion of dependents per 100 working-age population.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.17.128 Employers, total (percent of total employment) (modeled ILO) (wdi_emp)

Long tag: qog_std_cs_wdi_emp

Original tag: wdi_emp

Description:

Employers are those workers who, working on their own account or with one or a few partners, hold the type of jobs defined as a "self-employment jobs" i.e. jobs where the remuneration is directly dependent upon the profits derived from the goods and services produced, and, in this capacity, have engaged, on a continuous basis, one or more persons to work for them as employee(s). Modeled ILO estimate.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.17.129 Employment in agriculture (percent of total employment) (modeled ILO) (wdi_empagr)

Long tag: qog_std_cs_wdi_empagr

Original tag: wdi_empagr

Description:

Employment in agriculture as a percentage of all employment. Employment is defined as persons of working age who were engaged in any activity to produce goods or provide services for pay or profit, whether at work during the reference period or not at work due to temporary absence from a job, or to working-time arrangement. The agriculture sector consists of activities in agriculture, hunting, forestry and fishing, in accordance with division 1 (ISIC 2) or categories A-B (ISIC 3) or category A (ISIC 4). Modeled ILO estimate.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.17.130 Employment in agriculture, female (percent female employment) (modeled ILO) (wdi_empagrf)

Long tag: qog_std_cs_wdi_empagrf

Original tag: wdi_empagrf

Description:

Female employment in agriculture as a percentage of all female employment. Employment is defined as persons of working age who were engaged in any activity to produce goods or provide services for pay or profit, whether at work during the reference period or not at work due to temporary absence from a job, or to working-time arrangement. The agriculture sector consists of activities in agriculture, hunting, forestry and fishing, in accordance with division 1 (ISIC 2) or categories A-B (ISIC 3) or category A (ISIC 4). Modeled ILO estimate.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.17.131 Employment in agriculture, male (percent male employment) (modeled ILO) (wdi_empagrm)

Long tag: qog_std_cs_wdi_empagrm

Original tag: wdi_empagrm

Description:

Male employment in agriculture as a percentage of all male employment. Employment is defined as persons of working age who were engaged in any activity to produce goods or provide services for pay or profit, whether at work during the reference period or not at work due to temporary absence from a job, or to working-time arrangement. The agriculture sector consists of activities in agriculture, hunting, forestry and fishing, in accordance with division 1 (ISIC 2) or categories A-B (ISIC 3) or category A (ISIC 4). Long tag: qog_std_cs_wdi_empprypfilo

Original tag: wdi_empprypfilo

Description:
Employment to population ratio, ages 15-24, female (percent) (ILO estimation). Employment to population ratio is the proportion of a country's population that is employed. Ages 15-24 are generally considered the youth population.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.17.144 Employment to population ratio, ages 15-24, female percent (national est.) (wdi_empprypfne)

Long tag: qog_std_cs_wdi_empprypfne

Original tag: wdi_empprypfne

Description:
Employment to population ratio, ages 15-24, female (percent) (National estimation). Employment to population ratio is the proportion of a country's population that is employed. Ages 15-24 are generally considered the youth population.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.17.145 Employment to population ratio, ages 15-24, total percent (modeled ILO) (wdi_empprypilo)

Long tag: qog_std_cs_wdi_empprypilo

Original tag: wdi_empprypilo

Description:
Employment to population ratio, ages 15-24, total (percent) (ILO estimation). Employment to population ratio is the proportion of a country's population that is employed. Ages 15-24 are generally considered the youth population.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.17.146 Employment to population ratio, ages 15-24, male percent (modeled ILO) (wdi_empprymilo)

Long tag: qog_std_cs_wdi_empprymilo

Original tag: wdi_empprymilo

Description:
Employment to population ratio, ages 15-24, male (percent) (ILO estimation). Employment to population ratio is the proportion of a country's population that is employed. Ages 15-24 are generally considered the youth population.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.17.147 Employment to population ratio, ages 15-24, male percent (national est.) (wdi_empprymne)

Long tag: qog_std_cs_wdi_empprymne

Original tag: wdi_empprymne

Description:
Employment to population ratio, ages 15-24, male (percent) (National estimation). Employment to population ratio is the proportion of a country's population that is employed. Ages 15-24 are generally considered the youth population.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.17.148 Employment to population ratio, ages 15-24, total percent (national est.) (wdi_empppryne)

Long tag: qog_std_cs_wdi_empppryne

Original tag: wdi_empppryne

Description:

Employment to population ratio, ages 15-24, total (percent) (National estimation). Employment to population ratio is the proportion of a country's population that is employed. Ages 15-24 are generally considered the youth population.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.17.149 Employment in services (percent of total employment) (modeled ILO) (wdi_empser)

Long tag: qog_std_cs_wdi_empser

Original tag: wdi_empser

Description:

Total employment in services as percentage of total employment. Employment is defined as persons of working age who were engaged in any activity to produce goods or provide services for pay or profit, whether at work during the reference period or not at work due to temporary absence from a job, or to working-time arrangement. The services sector consists of wholesale and retail trade and restaurants and hotels; transport, storage, and communications; financing, insurance, real estate, and business services; and community, social, and personal services, in accordance with divisions 6-9 (ISIC 2) or categories G-Q (ISIC 3) or categories G-U (ISIC 4). Modeled ILO estimate.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.17.150 Employment in services, female (percent of female employment) (modeled ILO) (wdi_empserf)

Long tag: qog_std_cs_wdi_empserf

Original tag: wdi_empserf

Description:

Female employment in services (percent of female employment). Employment is defined as persons of working age who were engaged in any activity to produce goods or provide services for pay or profit, whether at work during the reference period or not at work due to temporary absence from a job, or to working-time arrangement. The services sector consists of wholesale and retail trade and restaurants and hotels; transport, storage, and communications; financing, insurance, real estate, and business services; and community, social, and personal services, in accordance with divisions 6-9 (ISIC 2) or categories G-Q (ISIC 3) or categories G-U (ISIC 4). Modeled ILO estimate.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.17.151 Employment in services, male (percent of male employment) (modeled ILO) (wdi_empserm)

Long tag: qog_std_cs_wdi_empserm

Original tag: wdi_empserm

Description:

Male employment in services (percent of male employment). Employment is defined as persons of working age who were engaged in any activity to produce goods or provide services for pay or profit, whether at work during the reference period or not at work due to temporary absence from a job, or to working-time arrangement. The services sector consists of wholesale and retail trade and restaurants and hotels; transport, storage, and communications; financing, insurance, real estate, and business services; and community, social, and personal services, in accordance with divisions 6-9 (ISIC 2) or categories G-Q (ISIC 3) or categories G-U (ISIC 4). Modeled ILO estimate.

2.17.17.152 Labor force with advanced education percent of total working-age pop. (wdi_lfpedua)

Long tag: qog_std_cs_wdi_lfpedua

Original tag: wdi_lfpedua

Description:

The percentage of the working age population with an advanced level of education who are in the labor force.

Advanced education comprises short-cycle tertiary education, a bachelor's degree or equivalent education level, a master's degree or equivalent education level, or doctoral degree or equivalent education level according to the International Standard Classification of Education 2011 (ISCED 2011).

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.17.153 Labor force with advanced education percent of female working-age pop. (wdi_lfpeduaf)

Long tag: qog_std_cs_wdi_lfpeduaf

Original tag: wdi_lfpeduaf

Description:

The percentage of the working age female population with an advanced level of education who are in the labor force. Advanced education comprises short-cycle tertiary education, a bachelor's degree or equivalent education level, a master's degree or equivalent education level, or doctoral degree or equivalent education level according to the International Standard Classification of Education 2011 (ISCED 2011).

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.17.154 Labor force with advanced education percent of male working-age pop. (wdi_lfpeduam)

Long tag: qog_std_cs_wdi_lfpeduam

Original tag: wdi_lfpeduam

Description:

The percentage of the working age male population with an advanced level of education who are in the labor force. Advanced education comprises short-cycle tertiary education, a bachelor's degree or equivalent education level, a master's degree or equivalent education level, or doctoral degree or equivalent education level according to the International Standard Classification of Education 2011 (ISCED 2011).

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.17.155 Labor force with basic education percent of total working-age pop. basic edu. (wdi_lfpedub)

Long tag: qog_std_cs_wdi_lfpedub

Original tag: wdi_lfpedub

Description:

The percentage of the working age population with a basic level of education who are in the labor force. Basic education comprises primary education or lower secondary education according to the International Standard Classification of Education 2011 (ISCED 2011).

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.17.156 Labor force with basic education percent of female working-age pop. basic edu. (wdi_lfpedubf)

Long tag: qog_std_cs_wdi_lfpedubf

Original tag: wdi_lfpedubf

Description:

The percentage of the working age female population with a basic level of education who are in the labor force. Basic education comprises primary education or lower secondary education according to the International Standard Classification of Education 2011 (ISCED 2011).

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.17.157 Labor force with basic education percent of male working-age pop. w. basic edu. (wdi_lfpedubm)

Long tag: qog_std_cs_wdi_lfpedubm

Original tag: wdi_lfpedubm

Description:

The percentage of the working age male population with a basic level of education who are in the labor force. Basic education comprises primary education or lower secondary education according to the International Standard Classification of Education 2011 (ISCED 2011).

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.17.158 Labor force with intermediate education percent of total working-age pop. (wdi_lfpedui)

Long tag: qog_std_cs_wdi_lfpedui

Original tag: wdi_lfpedui

Description:

The percentage of the working age population with an intermediate level of education who are in the labor force. Intermediate education comprises upper secondary or post-secondary non tertiary education according to the International Standard Classification of Education 2011 (ISCED 2011).

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.17.159 Labor force with intermediate education percent of female working-age pop. (wdi_lfpeduif)

Long tag: qog_std_cs_wdi_lfpeduif

Original tag: wdi_lfpeduif

Description:

The percentage of the working age female population with an intermediate level of education who are in the labor force. Intermediate education comprises upper secondary or post-secondary non tertiary education according to the International Standard Classification of Education 2011 (ISCED 2011).

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.17.160 Labor force with intermediate education percent of male working-age pop. (wdi_lfpeduim)

Long tag: qog_std_cs_wdi_lfpeduim

Original tag: wdi_lfpeduim

Description:

The percentage of the working age male population with an intermediate level of education who are in the labor force. Intermediate education comprises upper secondary or post-secondary non tertiary education according to the International Standard Classification of Education 2011 (ISCED 2011).

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.17.161 Labor force, female (percent of total labor force) (wdi_lfpf)

Long tag: qog_std_cs_wdi_lfpf

Original tag: wdi_lfpf

Description:

Female labor force as a percentage of the total show the extent to which women are active in the labor force. Labor force comprises people ages 15 and older who meet the International Labour Organization's definition of the economically active population.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.17.162 Labor force participation rate (percent female ages 15+) (modeled ILO) (wdi_lfpfilo15)

Long tag: qog_std_cs_wdi_lfpfilo15

Original tag: wdi_lfpfilo15

Description:

Labor force participation rate (percent of female ages 15+) (modeled ILO est.). Labor force participation rate is the proportion of the population ages 15 and older that is economically active: all people who supply labor for the production of goods and services during a specified period.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.17.163 Labor force participation rate (percent of female ages 15+) (national est.) (wdi_lfpfne15)

Long tag: qog_std_cs_wdi_lfpfne15

Original tag: wdi_lfpfne15

Description:
Labor force participation rate (percent of female ages 15+) (national est.). Labor force participation rate is the proportion of the population ages 15 and older that is economically active: all people who supply labor for the production of goods and services during a specified period.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.17.164 Labor force participation rate (percent of total ages 15+) (modeled ILO) (wdi_lfpilo15)

Long tag: qog_std_cs_wdi_lfpilo15

Original tag: wdi_lfpilo15

Description:
Labor force participation rate (percent of total ages 15+) (modeled ILO est.). Labor force participation rate is the proportion of the population ages 15 and older that is economically active: all people who supply labor for the production of goods and services during a specified period.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.17.189 Unemployment with intermediate education (percent of total labor force) (wdi_unempedui)

Long tag: qog_std_cs_wdi_unempedui

Original tag: wdi_unempedui

Description:
The percentage of the labor force with an intermediate level of education who are unemployed. Intermediate

education comprises upper secondary or post-secondary non tertiary education according to the International Standard Classification of Education 2011 (ISCED 2011).

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.17.190 Unemployment with intermediate education (percent of female labor force) (wdi_unempeduif)

Long tag: qog_std_cs_wdi_unempeduif

Original tag: wdi_unempeduif

Description:
The percentage of the labor force with an intermediate level of education who are unemployed. Intermediate education comprises upper secondary or post-secondary non tertiary education according to the International Standard Classification of Education 2011 (ISCED 2011). Female.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.17.191 Unemployment with intermediate education (percent of male labor force) (wdi_unempeduim)

Long tag: qog_std_cs_wdi_unempeduim

Original tag: wdi_unempeduim

Description:
The percentage of the labor force with an intermediate level of education who are unemployed. Intermediate education comprises upper secondary or post-secondary non tertiary education according to the International Standard Classification of Education 2011 (ISCED 2011). Male.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.17.192 Unemployment, female (percent of female labor force) (modeled ILO) (wdi_unempfilo)

Long tag: qog_std_cs_wdi_unempfilo

Original tag: wdi_unempfilo

Description:
Unemployment refers to the share of the labor force that is without work but available for and seeking employment. Female.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.17.193 Unemployment, female (percent of female labor force) (national est.) (wdi_unempfne)

Long tag: qog_std_cs_wdi_unempfne

Original tag: wdi_unempfne

Description:
Unemployment refers to the share of the labor force that is without work but available for and seeking employment. Definitions of labor force and unemployment differ by country. Female.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.17.194 Unemployment, total (percent of total labor force) (modeled ILO) (wdi_unempilo)

Long tag: qog_std_cs_wdi_unempilo

Original tag: wdi_unempilo

Description:
Unemployment refers to the share of the labor force that is without work but available for and seeking employment. Total.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.17.195 Unemployment, male (percent of male labor force) (modeled ILO) (wdi_unempmilo)

Long tag: qog_std_cs_wdi_unempmilo

Original tag: wdi_unempmilo

Description:
Unemployment refers to the share of the labor force that is without work but available for and seeking employment. Male.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.17.196 Unemployment, male (percent of male labor force) (national est.) (wdi_unempmne)

Long tag: qog_std_cs_wdi_unempmne

Original tag: wdi_unempmne

Description:
Unemployment refers to the share of the labor force that is without work but available for and seeking employment. Definitions of labor force and unemployment differ by country. Male.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.17.197 Unemployment, total (percent of total labor force) (national est.) (wdi_unempne)

Long tag: qog_std_cs_wdi_unempne

Original tag: wdi_unempne

Description:
Unemployment refers to the share of the labor force that is without work but available for and seeking employment. Definitions of labor force and unemployment differ by country. Total.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.17.198 Unemployment, youth female (percent of female labor force 15-24) (modeled ILO) (wdi_unempyfilo)

Long tag: qog_std_cs_wdi_unempyfilo

Original tag: wdi_unempyfilo

Description:
Youth unemployment refers to the share of the labor force ages 15-24 without work but available for and seeking employment.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.17.199 Unemployment, youth female (percent of female labor force 15-24) (nation est.) (wdi_unempyfne)

Long tag: qog_std_cs_wdi_unempyfne

Original tag: wdi_unempyfne

Description:
Youth unemployment refers to the share of the labor force ages 15-24 without work but available for and seeking employment. Definitions of labor force and unemployment differ by country.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.17.200 Unemployment, youth total (percent of total labor force 15-24) (modeled ILO) (wdi_unempyilo)

Long tag: qog_std_cs_wdi_unempyilo

Original tag: wdi_unempyilo

Description:
Youth unemployment refers to the share of the labor force ages 15-24 without work but available for and seeking employment.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.17.201 Unemployment, youth male (percent of male labor force 15-24) (modeled ILO) (wdi_unempymilo)

Long tag: qog_std_cs_wdi_unempymilo

Original tag: wdi_unempymilo

Description:
Youth unemployment refers to the share of the labor force ages 15-24 without work but available for and seeking employment.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.17.202 Unemployment, youth male (percent of male labor force 15-24) (national est.) (wdi_unempymne)

Long tag: qog_std_cs_wdi_unempymne

Original tag: wdi_unempymne

Description:
Youth unemployment refers to the share of the labor force ages 15-24 without work but available for and seeking employment. Definitions of labor force and unemployment differ by country.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.17.203 Unemployment, youth total (percent of total labor force 15-24) (national est.) (wdi_unempyne)

Long tag: qog_std_cs_wdi_unempyne

Original tag: wdi_unempyne

Description:
Youth unemployment refers to the share of the labor force ages 15-24 without work but available for and seeking employment. Definitions of labor force and unemployment differ by country.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.17.204 Active labour market policies. 1-7 (best) (wef_alp)

Long tag: qog_std_cs_wef_alp

Original tag: wef_alp

Description:
Active labour policies. 1-7 (best). In your country, to what extent do Labour market policies help unemployed people to reskill and find new employment (including skills matching, retraining, etc.)? [1 = not at all; 7 = to a great extent] Original sources: World Economic Forum, Executive Opinion Survey

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. `http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf`

2.17.17.205 Ease of finding skilled employees. 1-7 (best) (wef_efs)

Long tag: qog_std_cs_wef_efs

Original tag: wef_efs

Description:
Ease of finding skilled employees. 1-7 (best). In your country, to what extent can companies find people with the skills required to fill their vacancies? [1 = not at all; 7 = to a great extent] Original sources: World Economic Forum, Executive Opinion Survey

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. `http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf`

2.17.17.206 Ease of hiring foreign labour. 1-7 (best) (wef_hfl)

Long tag: qog_std_cs_wef_hfl

Original tag: wef_hfl

Description:
Ease of hiring foreign labour. 1-7 (best). To what extent does labour regulation in your country limit the ability to hire foreign labour? (1 = very much limits hiring foreign labour, 7 = does not limit hiring foreign labour at all) Original sources: World Economic Forum, Executive Opinion Survey

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. `http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf`

2.17.17.207 Hiring and firing practices. 1-7 (best) (wef_hfp)

Long tag: qog_std_cs_wef_hfp

Original tag: wef_hfp

Description:
Hiring and firing practices. 1-7 (best). In your country, to what extent do regulations allow flexible hiring and firing of workers? [1 = not at all; 7 = to a great extent] Original sources: World Economic Forum, Executive Opinion Survey

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. `http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf`

2.17.17.208 Cooperation in labour-employer relations. 1-7 (best) (wef_ler)

Long tag: qog_std_cs_wef_ler

Original tag: wef_ler

Description:
Cooperation in Labour-employer relations. 1-7 (best). In your country, how do you characterize Labour-employer relations? [1 = generally confrontational; 7 = generally cooperative] Original sources: World Economic Forum, Executive Opinion Survey

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. `http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf`

2.17.17.209 Flexibility of wage determination. 1-7 (best) (wef_wbp)

Long tag: qog_std_cs_wef_wbp

Original tag: wef_wbp

Description:
Flexibility of wage determination. 1-7 (best). In your country, how are wages generally set? [1 = by a centralized bargaining process; 7 = by each individual company] Original sources: World Economic Forum, Executive Opinion Survey

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. `http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf`

2.17.17.210 Ratio of wage and salaried female workers to male workers (wef_wlf)

Long tag: qog_std_cs_wef_wlf

Original tag: wef_wlf

Description:
Ratio of wage and salaried female workers to male workers. Ratio. The ratio of the percentage of women aged 15-64 participating in the labour force as wage and salaried workers to the percentage of men aged 15-64 participating in the labour force as wage and salaried workers. Original sources: International Labour Organization (ILO), World Economic Forum.

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. `http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf`

2.17.17.211 Confidence: Labour Unions (wvs_conflu)

Long tag: qog_std_cs_wvs_conflu

Original tag: wvs_conflu

Description:
I am going to name a number of organizations. For each one, could you tell me how much confidence you have in them: Labour Unions

1. None at all

2. Not very much
3. Quite a lot
4. A great deal

2.17.17.239 Rural residents as a share of private paid employees (wwbi_rrespripemp)

Long tag: qog_std_cs_wwbi_rrespripemp

Original tag: wwbi_rrespripemp

Description:
Rural residents, as a share of private paid employees

Variable citation: The World Bank. (2021b). Worldwide bureacracy indicators version 2.0. `https://www.worldbank.org/en/topic/migrationremittancesdiasporaissues/brief/migration-remittances-data`

2.17.17.240 Rural residents as a share of public paid employees (wwbi_rrespubpemp)

Long tag: qog_std_cs_wwbi_rrespubpemp

Original tag: wwbi_rrespubpemp

Description:
Rural residents, as a share of public paid employees

Variable citation: The World Bank. (2021b). Worldwide bureacracy indicators version 2.0. `https://www.worldbank.org/en/topic/migrationremittancesdiasporaissues/brief/migration-remittances-data`

2.17.18 Energy and Infrastructure

This category includes indicators that cover descriptions of different energy sources (production, con- sumption and trade) and variables related to quality and quantity of different sectors of infrastructure (transportation and communication).

2.17.18.1 Resident population percent not connected to urban and wastewater treatment plants (eu_envnc)

Long tag: qog_std_cs_eu_envnc

Original tag: eu_envnc

Description:
Percentage of resident population not connected to urban and other wastewater treatment plants

Variable citation: European Commission. (2021). Eurostat. `http://ec.europa.eu/eurostat/data/database`

2.17.18.2 Households with broadband access (percent of households with Internet access) (eu_ispchhiacc)

Long tag: qog_std_cs_eu_ispchhiacc

Original tag: eu_ispchhiacc

Description:
Households with broadband access (percent of households with Internet access)

Variable citation: European Commission. (2021). Eurostat. `http://ec.europa.eu/eurostat/data/database`

2.17.18.3 Employment in Electricity, Gas, Steam, Air Con. supply (Female) percent tot (eu_sctdff)

Long tag: qog_std_cs_eu_sctdff

Original tag: eu_sctdff

Description:
Employment in Electricity, Gas, Steam, Air conditioning supply (Female) percent total employment

Variable citation: European Commission. (2021). Eurostat. `http://ec.europa.eu/eurostat/data/database`

2.17.18.4 Employment in Electricity, Gas, Steam, Air Con. supply (Male) percent tot (eu_sctdfm)

Long tag: qog_std_cs_eu_sctdfm

Original tag: eu_sctdfm

Description:
Employment in Electricity, Gas, Steam, Air conditioning supply (Male) percent total employment

Variable citation: European Commission. (2021). Eurostat. `http://ec.europa.eu/eurostat/data/database`

2.17.18.5 Employment in Electricity, Gas, Steam, Air Con. supply (Total) percent tot (eu_sctdft)

Long tag: qog_std_cs_eu_sctdft

Original tag: eu_sctdft

Description:
Employment in Electricity, Gas, Steam, Air conditioning supply (Total) percent total employment

Variable citation: European Commission. (2021). Eurostat. `http://ec.europa.eu/eurostat/data/database`

2.17.18.6 Employment in Land, Water, Air transport, Warehouse Female percent tot employ. (eu_scth52n79f)

Long tag: qog_std_cs_eu_scth52n79f

Original tag: eu_scth52n79f

Description:
Employment in Land, Water, Air transport, Warehouse (Female) percent total employment

Variable citation: European Commission. (2021). Eurostat. `http://ec.europa.eu/eurostat/data/database`

2.17.18.7 Employment in Land, Water, Air transport, Warehouse Male percent tot employ. (eu_scth52n79m)

Long tag: qog_std_cs_eu_scth52n79m

Original tag: eu_scth52n79m

Description:
Employment in Land, Water, Air transport, Warehouse (Male) percent total employment

Variable citation: European Commission. (2021). Eurostat. `http://ec.europa.eu/eurostat/data/database`

2.17.18.8 Employment in Land, Water, Air transport, Warehouse Total percent tot employ. (eu_scth52n79t)

Long tag: qog_std_cs_eu_scth52n79t

Original tag: eu_scth52n79t

Description:
Employment in Land, Water, Air transport, Warehouse (Total) percent total employment

Variable citation: European Commission. (2021). Eurostat. `http://ec.europa.eu/eurostat/data/database`

2.17.18.9 Navigable canals (kilometre) (eu_trcnlkm)

Long tag: qog_std_cs_eu_trcnlkm

Original tag: eu_trcnlkm

Description:
Navigable canals (kilometre)

Variable citation: European Commission. (2021). Eurostat. `http://ec.europa.eu/eurostat/data/database`

2.17.18.10 Maritime transport, freight loaded and unloaded (1000's tonnes) (eu_trfrldnld)

Long tag: qog_std_cs_eu_trfrldnld

Original tag: eu_trfrldnld

Description:
Maritime transport, freight loaded and unloaded (1000's tonnes)

Variable citation: European Commission. (2021). Eurostat. `http://ec.europa.eu/eurostat/data/database`

2.17.18.11 Air transport, freight and mail loaded and unloaded (tonnes) (eu_trldnld)

Long tag: qog_std_cs_eu_trldnld

Original tag: eu_trldnld

Description:
Air transport, freight and mail loaded and unloaded (tonnes)

Variable citation: European Commission. (2021). Eurostat. `http://ec.europa.eu/eurostat/data/database`

2.17.18.12 Motorways (kilometre) (eu_trmwaykm)

Long tag: qog_std_cs_eu_trmwaykm

Original tag: eu_trmwaykm

Description:
Motorways (kilometre)

Variable citation: European Commission. (2021). Eurostat. `http://ec.europa.eu/eurostat/data/database`

2.17.18.13 Other roads (kilometre) (eu_trrdothkm)

Long tag: qog_std_cs_eu_trrdothkm

Original tag: eu_trrdothkm

Description:
Other roads (kilometre)

Variable citation: European Commission. (2021). Eurostat. `http://ec.europa.eu/eurostat/data/database`

2.17.18.14 Navigable rivers (kilometre) (eu_trrivkm)

Long tag: qog_std_cs_eu_trrivkm

Original tag: eu_trrivkm

Description:
Navigable rivers (kilometre)

Variable citation: European Commission. (2021). Eurostat. `http://ec.europa.eu/eurostat/data/database`

2.17.18.15 Electrified railway lines (kilometre) (eu_trrlelckm)

Long tag: qog_std_cs_eu_trrlelckm

Original tag: eu_trrlelckm

Description:
Electrified railway lines (kilometre)

Variable citation: European Commission. (2021). Eurostat. `http://ec.europa.eu/eurostat/data/database`

2.17.18.16 Total railway lines (kilometre) (eu_trrlkm)

Long tag: qog_std_cs_eu_trrlkm

Original tag: eu_trrlkm

Description:
Total railway lines (kilometre)

Variable citation: European Commission. (2021). Eurostat. `http://ec.europa.eu/eurostat/data/database`

2.17.18.17 Railway lines with double and more tracks (kilometre) (eu_trrltge2km)

Long tag: qog_std_cs_eu_trrltge2km

Original tag: eu_trrltge2km

Description:
Railway lines with double and more tracks (kilometre)

Variable citation: European Commission. (2021). Eurostat. `http://ec.europa.eu/eurostat/data/database`

2.17.18.18 Infrastructure (iiag_inf)

Long tag: qog_std_cs_iiag_inf

Original tag: iiag_inf

Description:
Infrastructure is one of the four sub-categories that are used to calculate the Foundations for Economic Opportunity category score. It consists of four indicators from four data sources.

Variable citation: Mo Ibrahim Foundation. (2020). The Ibrahim Index of African Governance. `http://mo.ibrahim.foundation/iiag/`

2.17.18.19 Real value added: industry including energy (oecd_evova_t1b)

Long tag: qog_std_cs_oecd_evova_t1b

Original tag: oecd_evova_t1b

Description:
Real value added in industry including energy.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. `https://doi.org/10.1787/20752288`

2.17.18.20 Production of crude oil (oecd_oilprod_t1)

Long tag: qog_std_cs_oecd_oilprod_t1

Original tag: oecd_oilprod_t1

Description:
Production of crude oil.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. `https://doi.org/10.1787/20752288`

2.17.18.21 Contribution of renewables to energy supply (oecd_rnewable_t1)

Long tag: qog_std_cs_oecd_rnewable_t1

Original tag: oecd_rnewable_t1

Description:
Contribution of renewables to energy supply.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. `https://doi.org/10.1787/20752288`

2.17.18.22 Total primary energy supply per unit of GDP (oecd_tpes_t1)

Long tag: qog_std_cs_oecd_tpes_t1

Original tag: oecd_tpes_t1

Description:
Total primary energy supply per unit of GDP.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. `https://doi.org/10.1787/20752288`

2.17.18.23 Generation intensities of municipal waste (oecd_waste_t1a)

Long tag: qog_std_cs_oecd_waste_t1a

Original tag: oecd_waste_t1a

Description:
Generation intensities of municipal waste.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. https://doi.org/10.1787/20752288

2.17.18.24 Water abstractions per capita (oecd_water_t1a)

Long tag: qog_std_cs_oecd_water_t1a

Original tag: oecd_water_t1a

Description:
Water abstractions per capita.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. https://doi.org/10.1787/20752288

2.17.18.25 Total abstractions of water (oecd_water_t1b)

Long tag: qog_std_cs_oecd_water_t1b

Original tag: oecd_water_t1b

Description:
Total abstractions of water.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. https://doi.org/10.1787/20752288

2.17.18.26 Electricity generation (oecd_welecgen_t1)

Long tag: qog_std_cs_oecd_welecgen_t1

Original tag: oecd_welecgen_t1

Description:
Electricity generation.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. https://doi.org/10.1787/20752288

2.17.18.27 Total primary energy supply (oecd_wenergys_t1)

Long tag: qog_std_cs_oecd_wenergys_t1

Original tag: oecd_wenergys_t1

Description:
Total primary energy supply.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. https://doi.org/10.1787/20752288

2.17.18.28 Access to electricity (percent of population) (wdi_acel)

Long tag: qog_std_cs_wdi_acel

Original tag: wdi_acel

Description:
Access to electricity is the percentage of population with access to electricity. Electrification data are collected from industry, national surveys and international sources.

Variable citation: World Bank. (2021). World development indicators. https://databank.worldbank.org/source/world-development-indicators

2.17.18.29 Access to electricity, rural (percent of rural population) (wdi_acelr)

Long tag: qog_std_cs_wdi_acelr

Original tag: wdi_acelr

Description:
Access to electricity, rural is the percentage of rural population with access to electricity.

Variable citation: World Bank. (2021). World development indicators. https://databank.worldbank.org/source/world-development-indicators

2.17.18.30 Access to electricity, urban (percent of urban population) (wdi_acelu)

Long tag: qog_std_cs_wdi_acelu

Original tag: wdi_acelu

Description:
Access to electricity, urban is the percentage of urban population with access to electricity.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.18.31 Alternative and nuclear energy (percent of total energy use) (wdi_ane)

Long tag: qog_std_cs_wdi_ane

Original tag: wdi_ane

Description:
Clean energy is noncarbohydrate energy that does not produce carbon dioxide when generated. It includes hydropower and nuclear, geothermal, and solar power, among others.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.18.32 Fixed broadband subscriptions (per 100 people) (wdi_broadb)

Long tag: qog_std_cs_wdi_broadb

Original tag: wdi_broadb

Description:
Fixed broadband subscriptions refers to fixed subscriptions to high-speed access to the public Internet (a TCP/IP connection), at downstream speeds equal to, or greater than, 256 kbit/s. This includes cable modem, DSL, fiber-to-the-home/building, other fixed (wired)-broadband subscriptions, satellite broadband and terrestrial fixed wireless broadband. This total is measured irrespective of the method of payment. It excludes subscriptions that have access to data communications (including the Internet) via mobile-cellular networks. It should include fixed WiMAX and any other fixed wireless technologies. It includes both residential subscriptions and subscriptions for organizations.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.18.33 Renewable electricity output (percent of total electricity output) (wdi_elerenew)

Long tag: qog_std_cs_wdi_elerenew

Original tag: wdi_elerenew

Description:
Renewable electricity is the share of electrity generated by renewable power plants in total electricity generated by all types of plants.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.18.34 Electricity production from coal sources (percent of total) (wdi_elprodcoal)

Long tag: qog_std_cs_wdi_elprodcoal

Original tag: wdi_elprodcoal

Description:
Sources of electricity refer to the inputs used to generate electricity. Coal refers to all coal and brown coal, both primary (including hard coal and lignite-brown coal) and derived fuels (including patent fuel, coke oven coke, gas coke, coke oven gas, and blast furnace gas). Peat is also included in this category.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.18.35 Electricity production from natural gas sources (percent of total) (wdi_elprodgas)

Long tag: qog_std_cs_wdi_elprodgas

Original tag: wdi_elprodgas

Description:
Sources of electricity refer to the inputs used to generate electricity. Gas refers to natural gas but excludes natural gas liquids.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.18.36 Electricity production from hydroelectric sources (percent of total) (wdi_elprodhyd)

Long tag: qog_std_cs_wdi_elprodhyd

Original tag: wdi_elprodhyd

Description:
Sources of electricity refer to the inputs used to generate electricity. Hydropower refers to electricity produced by hydroelectric power plants.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.18.37 Electricity production from nuclear sources (percent of total) (wdi_elprodnuc)

Long tag: qog_std_cs_wdi_elprodnuc

Original tag: wdi_elprodnuc

Description:
Sources of electricity refer to the inputs used to generate electricity. Nuclear power refers to electricity produced by nuclear power plants.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.18.38 Electricity production from oil sources (percent of total) (wdi_elprodoil)

Long tag: qog_std_cs_wdi_elprodoil

Original tag: wdi_elprodoil

Description:
Sources of electricity refer to the inputs used to generate electricity. Oil refers to crude oil and petroleum products.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.18.39 Energy imports, net (percent of energy use) (wdi_eneimp)

Long tag: qog_std_cs_wdi_eneimp

Original tag: wdi_eneimp

Description:
Net energy imports are estimated as energy use less production, both measured in oil equivalents. A negative value indicates that the country is a net exporter. Energy use refers to use of primary energy before transformation to other end-use fuels, which is equal to indigenous production plus imports and stock changes, minus exports and fuels supplied to ships and aircraft engaged in international transport.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.18.40 Renewable energy consumption (percent of total final energy consumption) (wdi_enerenew)

Long tag: qog_std_cs_wdi_enerenew

Original tag: wdi_enerenew

Description:
Renewable energy consumption is the share of renewables energy in total final energy consumption.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.18.41 Energy use (kg of oil equivalent per capita) (wdi_eneuse)

Long tag: qog_std_cs_wdi_eneuse

Original tag: wdi_eneuse

Description:
Energy use refers to use of primary energy before transformation to other end-use fuels, which is equal to indigenous production plus imports and stock changes, minus exports and fuels supplied to ships and aircraft engaged in international transport.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.18.42 Fossil fuel energy consumption (percent of total) (wdi_fossil)

Long tag: qog_std_cs_wdi_fossil

Original tag: wdi_fossil

Description:
Fossil fuel comprises coal, oil, petroleum, and natural gas products.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.18.43 Individuals using the Internet (percent of population) (wdi_internet)

Long tag: qog_std_cs_wdi_internet

Original tag: wdi_internet

Description:
Internet users are individuals who have used the Internet (from any location) in the last 3 months. The Internet can be used via a computer, mobile phone, personal digital assistant, games machine, digital TV etc.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.18.44 Mobile cellular subscriptions (per 100 people) (wdi_mobile)

Long tag: qog_std_cs_wdi_mobile

Original tag: wdi_mobile

Description:
Mobile cellular telephone subscriptions are subscriptions to a public mobile telephone service that provide access to the PSTN using cellular technology. The indicator includes (and is split into) the number of postpaid subscriptions, and the number of active prepaid accounts (i.e. that have been used during the last three months). The indicator applies to all mobile cellular subscriptions that offer voice communications. It excludes subscriptions via data cards or USB modems, subscriptions to public mobile data services, private trunked mobile radio, telepoint, radio paging and telemetry services.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.18.45 Oil rents (percent of GDP) (wdi_oilrent)

Long tag: qog_std_cs_wdi_oilrent

Original tag: wdi_oilrent

Description:
Oil rents are the difference between the value of crude oil production at world prices and total costs of production.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.18.46 Fixed telephone subscriptions (per 100 people) (wdi_tele)

Long tag: qog_std_cs_wdi_tele

Original tag: wdi_tele

Description:
Fixed telephone subscriptions refers to the sum of active number of analogue fixed telephone lines, voice-over-IP (VoIP) subscriptions, fixed wireless local loop (WLL) subscriptions, ISDN voice-channel equivalents and fixed public payphones.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.18.47 Efficiency of air transport services. 1-7 (best) (wef_eair)

Long tag: qog_std_cs_wef_eair

Original tag: wef_eair

Description:
Efficiency of air transport services. 1-7 (best). In your country, how efficient (i.e., frequency, punctuality, speed, price) are air transport services? [1 = extremely inefficient-among the worst in the world; 7 = extremely efficient-among the best in the world] Original sources: World Economic Forum, Executive Opinion Survey

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden].

http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf

2.17.18.48 Electricity. 0-100 (best) (wef_elec)

Long tag: qog_std_cs_wef_elec

Original tag: wef_elec

Description:

Electricity. 0-100 (best). This indicator is calculated by the World Economic Forum by aggregating two indicators that measure the electrification rate and electric power transmission and distribution losses. For more information, write to gcp@weforum.org.

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf

2.17.18.49 Percentage of population with access to electricity percent pop. (wef_elr)

Long tag: qog_std_cs_wef_elr

Original tag: wef_elr

Description:

Electricity access entails a household having initial access to sufficient electricity to power a basic bundle of energy services-at a minimum, several lightbulbs, task lighting (such as a flashlight), phone.

Sources: International Energy Agency, World Energy Outlook 2018 (https://www.iea.org/weo2018/); The World Bank Group, Sustainable Energy for All database (https://datacatalog.worldbank.org/dataset/sustainable-energy-all, accessed 21 March 2019); national sources.

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf

2.17.18.50 Efficiency of seaport services. 1-7 (best) (wef_eport)

Long tag: qog_std_cs_wef_eport

Original tag: wef_eport

Description:

Efficiency of seaport services. 1-7 (best). In your country, how efficient (i.e., frequency, punctuality, speed, price) are seaport services (ferries, boats) (for landlocked countries: assess access to seaport services) [1 = extremely inefficient-among the worst in the world; 7 = extremely efficient-among the best in the world] Original sources: World Economic Forum, Executive Opinion Survey

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf

2.17.18.51 Efficiency of train services. 1-7 (best) (wef_erail)

Long tag: qog_std_cs_wef_erail

Original tag: wef_erail

Description:

Efficiency of train services. 1-7 (best). In your country, how efficient (i.e., frequency, punctuality, speed, price) are train transport services? [1 = extremely inefficient-among the worst in the world; 7 = extremely efficient-among the best in the world] Original sources: World Economic Forum, Executive Opinion Survey

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf

2.17.18.52 Fixed-broadband Internet subscriptions/100 pop. (wef_fis)

Long tag: qog_std_cs_wef_fis

Original tag: wef_fis

Description:

Fixed-broadband Internet subscriptions. Fixed-broadband Internet subscriptions per 100 population Original sources: International Telecommunications Union (ITU)

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf

2.17.18.53 Internet users. percent pop. (wef_iu)

Long tag: qog_std_cs_wef_iu

Original tag: wef_iu

Description:
Percentage of individuals using the Internet. Original sources: International Telecommunications Union (ITU)

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. `http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf`

2.17.18.54 Mobile-cellular telephone subscriptions/100 pop. (wef_mobile)

Long tag: qog_std_cs_wef_mobile

Original tag: wef_mobile

Description:
Mobile-cellular telephone subscriptions. Number of mobile-cellular telephone subscriptions per 100 population. Original sources: International Telecommunications Union (ITU)

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. `http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf`

2.17.18.55 Transport infrastructure. 0-100 (best) (wef_qoi)

Long tag: qog_std_cs_wef_qoi

Original tag: wef_qoi

Description:
Transport infrastructure. 0-100 (best). This indicator is calculated by the World Economic Forum by aggregating eight indicators that measure roads, railroads, air transport and water transport infrastructure. For more information, write to gcp@weforum.org. Original sources: World Economic Forum, Global Competitiveness Report 2018

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. `http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf`

2.17.18.56 Quality of road infrastructure. 1-7 (best) (wef_qroad)

Long tag: qog_std_cs_wef_qroad

Original tag: wef_qroad

Description:
Quality of roads. 1-7 (best). In your country, how is the quality (extensiveness and condition) of road infrastructure [1 = extremely poor-among the worst in the world; 7 = extremly good-among the best in the world]. Original sources: World Economic Forum, Executive Opinion Survey

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. `http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf`

2.17.18.57 Water. 0-100 (best) (wef_wi)

2.17.19.5 Freedom to Trade Internationally (current) (fi_ftradeint)

Long tag: qog_std_cs_fi_ftradeint

Original tag: fi_ftradeint

Description:
The index ranges from 0-10 where 0 corresponds to "increasing tax rate on international trade", "slow import or export process", "small trade sectors relative to the population and geographic size", "exchange rate controls are present and a black-market exists", and "restrictions on the freedom of citizens to engage in capital market exchange with foreigners" and 10 corresponds to "no specific taxes on international trade", "swift import or export process", "large trade sectors relative to the population and geographic size", "no black-market exchange rate", and "no restrictions on the freedom of citizens to engage in capital market exchange with foreigners". The index consists of the following indicators: Taxes on international trade, Regulatory trade barriers, Actual size of trade sector compared to expected size, Difference between official exchange rate and black market rate, and International capital market controls.

2.17.19.7 Economic Freedom of the World Index (current) (fi_index)

Long tag: qog_std_cs_fi_index

Original tag: fi_index

Description:

The index is founded upon objective components that reflect the presence (or absence) of economic freedom. The index comprises 21 components designed to identify the consistency of institutional arrangements and policies with economic freedom in five major areas: size of government (fi_sog), legal structure and security of property rights (fi_legprop), access to sound money (fi_sm), freedom to trade internationally (fi_ftradeint), regulation of credit, labor and business (fi_reg). The index ranges from 0-10 where 0 corresponds to "less economic freedom" and 10 to "more economic freedom". This is the version of the index published at the current year of measurement, without taking methodological changes over time into account.

Variable citation: Gwartney, J., Lawson, R., Hall, J., Murphy, R., Callais, J. T., Fike, R., Geloso, V., Kahli, N. S., McMahon, F., & van Staden, M. (2021). 2.17.19.8 Regulation of Credit, Labor and Business (current) (fi_reg)

Long tag: qog_std_cs_fi_reg

Original tag: fi_reg

Description:

The index ranges from 0-10 where 0 corresponds to "low percentage of deposits held in privately owned banks", "high foreign bank license denial rate", "private sector's share of credit is close to the base-year-minimum", "deposit and lending rates is fixed by the government and real rates is persistently negative", "high impact of minimum wage", "widespread use of price controls throughout various sectors of the economy", and "starting a new business is generally complicated" and 10 corresponds to "high percentage of deposits held in privately owned banks", "low foreign bank license denial rate", "private sector's share of credit is close to the base-year-maximum", "interest rates is determined primarily by market forces and the real rates is positive", "low impact of minimum wage", "no price controls or marketing boards", and "starting a new business is generally easy". The index consists of the following indicators: Credit Market Regulations, Labor Market Regulations, Business Regulations.

Variable citation: Gwartney, J., Lawson, R., Hall, J., Murphy, R., Callais, J. T., Fike, R., Geloso, V., Kahli, N. S., McMahon, F., & van Staden, M. (2021). 2.17.19.10 Access to Sound Money (current) (fi_sm)

Long tag: qog_std_cs_fi_sm

Original tag: fi_sm

Description:

The index ranges from 0-10 where 0 corresponds to "high annual money growth", "high variation in the annual rate of inflation", "high inflation rate", and "restricted foreign currency bank accounts" and 10 corresponds to "low annual money growth", "low or no variation in the annual rate of inflation", "low inflation rate", and "foreign currency bank accounts are permissible without restrictions". The index consists of the following indicators: Average annual growth of the money supply in the last five years minus average annual growth of real GDP in the last ten years, Standard inflation variability in the last five years, Recent inflation rate, Freedom to own foreign currency bank accounts domestically and abroad.

Variable citation: Gwartney, J., Lawson, R., Hall, J., Murphy, R., Callais, J. T., Fike, R., Geloso, V., Kahli, N. S., McMahon, F., & van Staden, M. (2021). Economic Freedom Dataset 2021, published in Economic Freedom of

the World: 2021. *Fraser Institute*. https://www.fraserinstitute.org/economicfreedom/dataset

2.17.19.11 Access to Sound Money (chain_linked) (fi_sm_pd)

Long tag: qog_std_cs_fi_sm_pd

Original tag: fi_sm_pd

Description:

The index ranges from 0-10 where 0 corresponds to "high annual money growth", "high variation in the annual rate of inflation", "high inflation rate", and "restricted foreign currency bank accounts" and 10 corresponds to "low annual money growth", "low or no variation in the annual rate of inflation", "low inflation rate", and "foreign currency bank accounts are permissible without restrictions". The index consists of the following indicators: Average annual growth of the money supply in the last five years minus average annual growth of real GDP in the last ten years, Standard inflation variability in the last five years, Recent inflation rate, Freedom to own foreign currency bank accounts domestically and abroad. Panel-data adjusted.

2.17.19.12 Global Gender Gap Economic Participation and Opportunity Subindex (gggi_pos)

Long tag: qog_std_cs_gggi_pos

Original tag: gggi_pos

Description:

Economic Participation and Opportunity (0 to 1, where 1 indicates no gap). This subindex contains three concepts: the participation gap, the remuneration gap and the advancement gap. The participation gap is captured using the difference between women and men in labour force participation rates. The remuneration gap is captured through a hard data indicator (ratio of estimated female-to-male earned income) and a qualitative indicator gathered through the World Economic Forum's annual Executive Opinion Survey (wage equality for similar work). Finally, the gap between the advancement of women and men is captured through two hard data statistics (the ratio of women to men among legislators, senior officials and managers, and the ratio of women to men among technical and professional workers).

Variable citation: World Economic Forum. (2021). The global gender gap report 2021 [All Rights Reserved]. https://www.weforum.org/reports/ab6795a1-960c-42b2-b3d5-587eccda6023

2.17.19.13 Business Environment (iiag_be)

Long tag: qog_std_cs_iiag_be

Original tag: iiag_be

Description:

Business Environment is one of the four sub-categories that are used to calculate the Foundations for Economic Opportunity category score. It consists of five indicators from five data sources.

2.17.19.50 Taxes on the average worker (oecd_taxapw_t1)

Long tag: qog_std_cs_oecd_taxapw_t1

Original tag: oecd_taxapw_t1

Description:
Taxes on the average worker.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. https://doi.org/10.1787/20752288

2.17.19.51 New business density (new registrations per 1,000 people ages 15-64) (wdi_busden)

Long tag: qog_std_cs_wdi_busden

Original tag: wdi_busden

Description:
New businesses registered are the number of new limited liability corporations registered in the calendar year.

Variable citation: World Bank. (2021). World development indicators. https://databank.worldbank.org/source/world-development-indicators

2.17.19.52 Ease of doing business index (1=most business-friendly regulations) (wdi_eodb)

Long tag: qog_std_cs_wdi_eodb

Original tag: wdi_eodb

Description:
Ease of doing business ranks economies from 1 to 189, with first place being the best. A high ranking (a low numerical rank) means that the regulatory environment is conducive to business operation. The index averages the country's percentile rankings on 10 topics covered in the World Bank's Doing Business. The ranking on each topic is the simple average of the percentile rankings on its component indicators.

Variable citation: World Bank. (2021). World development indicators. https://databank.worldbank.org/source/world-development-indicators

2.17.19.53 Firms with female participation in ownership (percent of firms) (wdi_firfown)

Long tag: qog_std_cs_wdi_firfown

Original tag: wdi_firfown

Description:
Firms with female participation in ownership are the percentage of firms with a woman among the principal owners.

Variable citation: World Bank. (2021). World development indicators. https://databank.worldbank.org/source/world-development-indicators

2.17.19.54 Firms with female top manager (percent of firms) (wdi_firftopm)

Long tag: qog_std_cs_wdi_firftopm

Original tag: wdi_firftopm

Description:
Firms with female top manager refers to the percentage of firms in the private sector who have females as top managers. Top manager refers to the highest ranking manager or CEO of the establishment. This person may be the owner if he/she works as the manager of the firm. The results are based on surveys of more than 100,000 private firms.

Variable citation: World Bank. (2021). World development indicators. https://databank.worldbank.org/source/world-development-indicators

2.17.19.55 Poverty gap at USD 1.90 a day (2011 PPP) (percent) (wdi_povgap190)

Long tag: qog_std_cs_wdi_povgap190

Original tag: wdi_povgap190

Description:
Poverty gap at 1.90 dollars a day (2011 PPP) is the mean shortfall in income or consumption from the poverty line 1.90 dollars a day (counting the nonpoor as having zero shortfall), expressed as a percentage of the poverty line. This measure reflects the depth of poverty as well as its incidence. As a result of revisions in PPP exchange rates, poverty rates for individual countries cannot be compared with poverty rates reported in earlier editions. Note: five countries – Bangladesh, Cabo Verde, Cambodia, Jordan, and Lao PDR – use the 2005 PPP conversion factors and corresponding 1.25 dollars a day and 2 dollars a day poverty lines. This is due to the large deviations in the rate of change in PPP factors relative to the rate of change in domestic consumer price indexes. See Box 1.1 in the Global Monitoring Report 2015/2016 (http://www.worldbank.org/en/publication/global-monitoring-report) for a detailed explanation.

2.17.19.56 Women Business and the Law Index Score (scale 1-100) (wdi_wombuslawi)

Long tag: qog_std_cs_wdi_wombuslawi

Original tag: wdi_wombuslawi

Description:

Women Business and the Law Index Score (1-100) measures how laws and regulations affect women's economic opportunity. Overall scores are calculated by taking the average score of each of the eight areas (Going Places, Starting a Job, Getting Paid, Getting Married, Having Children, Running a Business, Managing Assets and Getting a Pension), with 100 representing the highest possible score.

2.17.19.57 Strength of auditing and reporting standards. 1-7 (best) (wef_audit)

Long tag: qog_std_cs_wef_audit

Original tag: wef_audit

Description:

Strength of auditing and reporting standards. 1-7 (best). In your country, how strong are financial auditing and reporting standards? [1 = extremely weak; 7 = extremely strong] Original sources: World Economic Forum, Executive Opinion Survey

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. `http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf`

2.17.19.58 Burden of government regulation. 1-7 (best) (wef_bgr)

Long tag: qog_std_cs_wef_bgr

Original tag: wef_bgr

Description:

Burden of government regulation. 1-7 (best). In your country, how burdensome is it for companies to comply with public administration's requirements (e.g., permits, regulations, reporting)? [1 = extremely burdensome; 7 = not burdensome at all] Original sources: World Economic Forum, Executive Opinion Survey

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. `http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf`

2.17.19.59 Credit gap. percentage points (wef_cg)

Long tag: qog_std_cs_wef_cg

Original tag: wef_cg

Description:

Credit gap. percentage points. Difference between the most recent domestic credit to private sector, as a percentage of GDP, and its 20-year trend. Original sources: The World Bank Group; World Economic Forum

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. `http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf`

2.17.19.60 Innovation capability. 0-100 (best) (wef_ci)

Long tag: qog_std_cs_wef_ci

Original tag: wef_ci

Description:

Innovation capability. 0-100 (best). Original sources: World Economic Forum, Global Competitiveness Report 2018

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. `http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf`

2.17.19.61 Global Competitiveness Index 4.0. 0-100 (best) (wef_gci)

Long tag: qog_std_cs_wef_gci

Original tag: wef_gci

Description:
Global Competitiveness Index 4.0. 0-100 (best). The Global Competitiveness Index 4.0 assesses the microeconomic and macroeconomic foundations of national competitiveness, which is defined as the set of institutions, policies, and factors that determine the level of productivity of a country. Original sources: World Economic Forum, Global Competitiveness Report 2018

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. `http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf`

2.17.19.62 Growth of innovative companies. 1-7 (best) (wef_gic)

Long tag: qog_std_cs_wef_gic

Original tag: wef_gic

Description:
Growth of innovative companies. 1-7 (best). In your country, to what extent do new companies with innovative ideas grow rapidly? [1 = not at all; 7 = to a great extent] Original sources: World Economic Forum, Executive Opinion Survey

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. `http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf`

2.17.19.63 Intellectual property protection. 1-7 (best) (wef_ipr)

Long tag: qog_std_cs_wef_ipr

Original tag: wef_ipr

Description:
Intellectual property protection. 1-7 (best). In your country, to what extent is intellectual property protected? [1 = not at all; 7 = to a great extent] Original sources: World Economic Forum, Executive Opinion Survey

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. `http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf`

2.17.19.64 Extent of market dominance. 1-7 (best) (wef_md)

Long tag: qog_std_cs_wef_md

Original tag: wef_md

Description:
Extent of market dominance. 1-7 (best). In your country, how do you characterize corporate activity? [1 = dominated by a few business groups; 7 = spread among many firms] Original sources: World Economic Forum, Executive Opinion Survey

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. `http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf`

2.17.19.65 Property rights. 1-7 (best) (wef_pr)

Long tag: qog_std_cs_wef_pr

Original tag: wef_pr

Description:
Property rights. 1-7 (best). In your country, to what extent are property rights, including financial assets, protected? [1 = not at all; 7 = to a great extent] Original sources: World Economic Forum, Executive Opinion Survey

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. `http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf`

2.17.19.66 Financing of SMEs. 1-7 (best) (wef_smec)

Long tag: qog_std_cs_wef_smec

Original tag: wef_smec

Description:
Financing of SMEs. 1-7 (best). In your country, to what extent can small- and medium-sized enterprises (SMEs) access finance they need for their business operations through the financial sector? [1 = not at all; 7 = to a great extent] Original sources: World Economic Forum, Executive Opinion Survey

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf

2.17.19.67 Venture capital availability. 1-7 (best) (wef_vca)

Long tag: qog_std_cs_wef_vca

Original tag: wef_vca

Description:

Venture capital availability. 1-7 (best). In your country, how easy is it for start-up entrepreneurs with innovative but risky projects to obtain equity funding? [1 = extremely difficult; 7 = extremely easy] Original sources: World Economic Forum, Executive Opinion Survey

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf

2.17.19.68 Satisfaction with financial situation of household (wvs_satfin)

Long tag: qog_std_cs_wvs_satfin

Original tag: wvs_satfin

Description:

How satisfied are you with the financial situation of your household?

1. Completely dissatisfied
2.
3.
4.
5.
6.
7.
8.
9.
10. Completely satisfied

2.17.20 Gender Equality

This category includes variables related to the differences of access and opportunities between women and men by country, such as access to education, overall employment and employment by specific sectors, and indexes that shine a light on the general differences in treatment between men and women.

2.17.20.1 Gender Inequality Index (0 to 1 higher disparity) (gii_gii)

Long tag: qog_std_cs_gii_gii

Original tag: gii_gii

Description:

The GII is an inequality index. It measures gender inequalities in three important aspects of human development-reproductive health, measured by maternal mortality ratio and adolescent birth rates; empowerment, measured by proportion of parliamentary seats occupied by females and proportion of adult females and males aged 25 years and older with at least some secondary education; and economic status, expressed as labour market participation and measured by labour force participation rate of female and male populations aged 15 years and older. The GII is built on the same framework as the IHDI-to better expose differences in the distribution of achievements between women and men. It measures the human development costs of gender inequality. Thus the higher the GII value the more disparities between females and males and the more loss to human development.

Variable citation: United Nations Development Program. (2020a). Gender inequality index. http://hdr.undp.org/en/content/gender-inequality-index-gii

2.17.20.2 Men make better political leaders than women do (wvs_menpol)

Long tag: qog_std_cs_wvs_menpol

Original tag: wvs_menpol

Description:
Men make better political leaders than women do

Variable citation: Haerpfer, C., Inglehart, R., Moreno, A., Welzel, C., Kizilova, K., Diez-Medrano, J., Lagos, M., Norris, P., Ponarin, E., & et al., B. P. (2021). 2.18 QoG Standard Dataset Time-Series

Dataset tag: qog_std_ts

Description: The QoG Standard dataset is our largest dataset. It consists of approximately 2100 variables from more than 100 data sources related to Quality of Government. In the QoG Standard TS dataset, data from 1946 to 2021 is included and the unit of analysis is country-year (e.g., Sweden-1946, Sweden-1947, etc.).

Dataset citation: Teorell, Jan, Aksel Sundström, Sören Holmberg, Bo Rothstein, Natalia Alvarado Pachon Cem Mert Dalli. 2021. The Quality of Government Standard Dataset, version Jan21. University of Gothenburg: The Quality of Government Institute, http://www.qog.pol.gu.se doi:10.18157/qogstdjan21

License: The QoG datasets are open and available, free of charge and without a need to register your data. You can use them for your analysis, graphs, teaching, and other academic-related and non-commercial purposes. We ask our users to cite always the original source(s) of the data and our datasets.

We do not allow other uses of these data including but not limited to redistribution, commercialization and other for-profit usage. If a user is interested in such use or has doubts about the license, they will have to refer to the original source and check with them if this is allowed and what requirements they need to fulfill.

Be mindful that the original data sources are the only owners of their data and they can adjust their license without previous warning.

More detailed information on the dataset can be found at the following web page: `https://www.gu.se/en/quality-government/qog-data/data-downloads/standard-dataset`

2.18.1 Identification Variables

Identification variables in the dataset.

2.18.1.1 Country Code (ccode)

Long tag: qog_std_ts_ccode

Original tag: ccode

Description:
Numeric country code based on the ISO-3166-1 standard. All the numeric country codes are unique and this is thus the variable best suitable to use when merging files (in combination with year for time-series data). (http://en.wikipedia.org/wiki/ISO_3166-1_numeric)

2.18.1.2 Country Name (cname)

Long tag: qog_std_ts_cname

Original tag: cname

Description:
The name of the country based in the ISO standard.

2.18.1.3 Year (year)

Long tag: qog_std_ts_year

Original tag: year

Description:
Year.

2.18.1.4 Country Code QoG (ccode_qog)

Long tag: qog_std_ts_ccode_qog

Original tag: ccode_qog

Description:
The country code using the QoG standard.

2.18.1.5 Country Name QoG (cname_qog)

Long tag: qog_std_ts_cname_qog

Original tag: cname_qog

Description:
The name of the country using the QoG standard.

2.18.1.6 3-letter Country Code (ccodealp)

Long tag: qog_std_ts_ccodealp

Original tag: ccodealp

Description:
A three-letter country code based on the ISO-3166-1 alpha3 standard. Please note that the ccodealp variable does not uniquely identify all countries.

2.18.1.7 Country Code COW (ccodecow)

Long tag: qog_std_ts_ccodecow

Original tag: ccodecow

Description:
Country code from the Correlates of War.

2.18.1.8 Version of the Dataset (version)

Long tag: qog_std_ts_version

Original tag: version

Description:
Version of the QoG dataset.

2.18.1.9 Country Name and Year (cname_year)

Long tag: qog_std_ts_cname_year

Original tag: cname_year

Description:
Country name and year.

2.18.1.10 3-letter Country Code and Year (ccodealp_year)

Long tag: qog_std_ts_ccodealp_year

Original tag: ccodealp_year

Description:
A three-letter country code and year.

2.18.2 Public Economy

This category includes economic indicators that reflect the involvement of the government in the economy (taxes, tariff rates and government expenditures), economic key figures of a state (GDP, inflation, and economic inequality), and indicators that characterize the state of the economy (aid- flows, debt).

2.18.2.1 Number of Recipients to whom Commitments were provided (not incl. Int. Org.) (aid_cpnc)

Long tag: qog_std_ts_aid_cpnc

Original tag: aid_cpnc

Description:
Number of Recipients to whom Commitments were provided, not including International Organizations

Variable citation: Tierney, M. J., Nielson, D. L., Hawkins, D. G., Roberts, J. T., Findley, M. G., Powers, R. M., Parks, B., Wilson, S. E., & Hicks, R. L. (2011). Aiddatacore_researchrelease_level1_v3.1 research releases dataset [Accessed on 2021-08-25]. `http://aiddata.org/research-datasets`

2.18.2.6 Sum of Commitments recieved from Int. Org. (aid_crsio)

Long tag: qog_std_ts_aid_crsio

Original tag: aid_crsio

Description:
Sum of Commitments recieved from International Organizations

Variable citation: Tierney, M. J., Nielson, D. L., Hawkins, D. G., Roberts, J. T., Findley, M. G., Powers, R. M., Parks, B., Wilson, S. E., & Hicks, R. L. (2011). More dollars than sense: Refining our knowledge of development finance using aiddata. *World Development*, 39(11), 1891–1906 AidData. (2017). Aiddatacore_researchrelease_level1_v3.1 research releases dataset [Accessed on 2021-08-25]. `http://aiddata.org/research-datasets`

2.18.2.7 Monetary and fiscal stability (bti_cps)

Long tag: qog_std_ts_bti_cps

Original tag: bti_cps

Description:
There are institutional or political precautions to achieve monetary and fiscal stability. Including "To what extend does the monetary authority pursue and communicate a consistent monetary stabilization policy?" and "To what extent do the government's budgetary policies support fiscal stability?"

Variable citation: Donner, S., Hartmann, H., & Schwarz, R. (2020). *Transformation index of the bertelsmann stiftung 2020*. Bertelsmann Stiftung. `http://www.bti-project.org`

2.18.2.8 Economic Output Strength (bti_eos)

Long tag: qog_std_ts_bti_eos

Original tag: bti_eos

Description:

How does the economy, as measured in quantitative indicators, perform? 1-10.

1. The economic performance is very poor. Strongly negative macroeconomic data may include negative GDP growth rates, very high unemployment levels, high inflation, large budget deficits, unreasonably high debt and an increasingly unsustainable current account position.
4. The economic performance is poor. Continuing negative macroeconomic data may include stagnant GDP levels, relatively high unemployment levels, low price stability, an unbalanced budget, rising debt and a volatile current account position.
7. The economic performance is good. Moderately positive macroeconomic data may include low GDP growth rates, only moderate unemployment levels, relative price stability, a slightly unbalanced budget, a tendency toward debt and a manageable current account position.
10. The economic performance is very good. Positive macroeconomic data may include relatively high GDP growth rates, relatively high employment levels, price stability, balanced budget, reasonable debt and a sustainable current account position.

Variable citation: Donner, S., Hartmann, H., & Schwarz, R. (2020). *Transformation index of the bertelsmann stiftung 2020*. Bertelsmann Stiftung. `http://www.bti-project.org`

2.18.2.9 Economic Performance (bti_ep)

Long tag: qog_std_ts_bti_ep

Original tag: bti_ep

Description:

Economic Performance: The economy's performance points to solid development 1-10.

Variable citation: Donner, S., Hartmann, H., & Schwarz, R. (2020). *Transformation index of the bertelsmann stiftung 2020*. Bertelsmann Stiftung. `http://www.bti-project.org`

2.18.2.10 Economy Status (bti_mes)

Long tag: qog_std_ts_bti_mes

Original tag: bti_mes

Description:

Economy Status: It groups the scores of the level of socioeconomic development, the organization of the market and competition, currency and price stability, private property, the welfare regime, the economic performance, and sustainability 1-10. Higher scores reflect advanced economy status.

Variable citation: Donner, S., Hartmann, H., & Schwarz, R. (2020). *Transformation index of the bertelsmann stiftung 2020*. Bertelsmann Stiftung. `http://www.bti-project.org`

2.18.2.11 Organization of the Market and Competition (bti_mo)

Long tag: qog_std_ts_bti_mo

Original tag: bti_mo

Description:

Organization of the Market and Competition: There are clear rules for stable, market-based competition 1-10. State-guaranteed rules for market competition with equal opportunities for all market participants exist in countries with higher scores.

Variable citation: Donner, S., Hartmann, H., & Schwarz, R. (2020). *Transformation index of the bertelsmann stiftung 2020*. Bertelsmann Stiftung. `http://www.bti-project.org`

2.18.2.12 Socio-Economic Level (bti_sel)

Long tag: qog_std_ts_bti_sel

Original tag: bti_sel

Description:

Socio-Economic Level: In principle, the country's level of development permits adequate freedom of choice for all citizens 1-10. Higher scores are present for countries with better socio-economic level.

Variable citation: Donner, S., Hartmann, H., & Schwarz, R. (2020). *Transformation index of the bertelsmann stiftung 2020*. Bertelsmann Stiftung. `http://www.bti-project.org`

2.18.2.13 Economic Globalization (dr_eg)

Long tag: qog_std_ts_dr_eg

Original tag: dr_eg

Description:
Economic globalisation (scale of 1 to 100) covers both trade flows as well as financial flows. De facto trade is determined with reference to the trade in goods and services. De jure trade covers customs duties, taxes and restrictions on trade.

Variable citation: Gygli, S., Haelg, F., Potrafke, N., & Sturm, J.-E. (2019). The KOF Globalisation Index - Revisited. `https://doi.org/10.1007/s11558-019-09344-2` Dreher, A. (2006). Does globalization affect growth? evidence from a new index of globalization. *Applied Economics*, 38(10), 1091–1110

2.18.2.14 GDP at current market prices, Euro per inhabitant (eu_eco2gdpeurhab)

Long tag: qog_std_ts_eu_eco2gdpeurhab

Original tag: eu_eco2gdpeurhab

2.18.2.30 Real GDP per Capita (2005) (gle_rgdpc)

Long tag: qog_std_ts_gle_rgdpc

Original tag: gle_rgdpc

Description:
This is the estimate of real GDP per Capita in constant US dollars at base year 2000, based on the imputation technique described above.

Variable citation: Gleditsch, K. S. (2002). Expanded trade and GDP data (version 6.0). extitJournal of Conflict Resolution, 46(5), 712–724 Gleditsch, K., & Ward, M. D. (1999). Interstate system membership: A revised list of the independent states since 1816. *International Interactions*, 25, 393–413

2.18.2.31 Total Trade (gle_trade)

Long tag: qog_std_ts_gle_trade

Original tag: gle_trade

Description:

This amounts to the sum of import and export of a country, in millions of current year US dollars, estimated as the sum of all dyadic import and export figures of that country using the imputation technique described above.

Variable citation: Gleditsch, K. S. (2002). Expanded trade and GDP data (version 6.0). extitJournal of Conflict Resolution, 46(5), 712–724 Gleditsch, K., & Ward, M. D. (1999). Interstate system membership: A revised list of the independent states since 1816. *International Interactions*, 25, 393–413

2.18.2.32 Economic Complexity Index (SITC product classification) (gpcr_eci)

Long tag: qog_std_ts_gpcr_eci

Original tag: gpcr_eci

Description:

The Economic Complexity Index (ECI) is a measure of the amount of capabilities and know-how of a given country determined by the diversity, ubiquity, and complexity of the products it exports.

A rank of countries based on how diversified and complex their export basket is. Countries that are home to a great diversity of productive know-how, particularly complex specialized know-how, are able to produce a great diversity of sophisticated products.

The complexity of a country's exports is found to highly predict current income levels, or where complexity exceed expectations for a country's income level, the country is predicted to experience more rapid growth in the future. ECI therefore provides a useful measure of economic development.

This Economic Complexity Index is computed using SITC product classification.

Variable citation: The Growth Lab at Harvard University. (2019). Growth projections and complexity rankings [UNF:6:+dXp8TMQz26OFv7ZOfIxSg== [fileUNF]]. `https://doi.org/10.7910/DVN/XTAQMC`

2.18.2.33 Forecasted annualized rate of growth for following decade (gpcr_growth)

Long tag: qog_std_ts_gpcr_growth

Original tag: gpcr_growth

Description:

A prediction of how much a country will grow based on its current level of Economic Complexity, its Complexity Outlook or connectedness to new complex products in the Product Space, as compared to its current income level in GDP per capita and expected natural resource exports.

Economic complexity alone helps explain the lion's share of variance in current income levels. But the value of economic complexity is in its predictive power on future growth, where a simple measure of current complexity and connectedness to new complex products, in relation to current income levels and expected natural resource exports, holds greater accuracy in predicting future growth than any other single economic indicator.

To calculate Economic Complexity Growth Projections, the authors consider four factors as explanatory variables: the Economic Complexity Index; the Complexity Outlook Index; the current level of income; and the expected growth in the value of natural resource exports per capita.

In effect, the growth projections show countries grow by expanding the know-how they have that allows them to produce more, and more complex products, depending on the connectedness of know-how and how many other products rely on similar capabilities, as well as the initial economic complexity the country held.

Growth projections are calculated through a process largely based on determining whether a country's economic complexity is higher or lower than expected given its level of income. The authors expect countries whose economic complexity is greater than the authors would expect for its level of income to grow faster than those that are "too rich" for their current level of complexity.

In this data, a country's growth projection value for a given year is for the decade beginning with that year. For example, a value in a 2017 row is the projection of annualized growth for 2017-2027.

2.18.2.50 Open Budget Index (ibp_obi)

Long tag: qog_std_ts_ibp_obi

Original tag: ibp_obi

Description:

The Open Budget Index (OBI) is a comparative measure of central government budget transparency. The OBI assigns countries covered by the Open Budget Survey a transparency score on a 100-point scale using 109 of the 140 questions on the Survey. These questions focus specifically on whether the government provides the public with timely access to comprehensive information contained in eight key budget documents in accordance with international good practice standards.

Variable citation: International Budget Partnership. (2019). Open budget survey data [Accessed on 2021-12-01]. `https://www.internationalbudget.org/data-evidence/`

2.18.2.51 Grants (ictd_grants)

Long tag: qog_std_ts_ictd_grants

Original tag: ictd_grants

Description:

Total grants received by the government.

Variable citation: ICTD/UNU-WIDER. (2020). Government revenue dataset. `https://www.wider.unu.edu/project/government-revenue-dataset`

2.18.2.52 Consolidated Non-Tax Revenue (ictd_nontax)

Long tag: qog_std_ts_ictd_nontax

Original tag: ictd_nontax

Description:

Total non-tax revenue, comprising data categorized as either "non-tax revenue" or "other revenue" depending on the underlying source. Includes revenue from both resource and non-resource sources.

Variable citation: ICTD/UNU-WIDER. (2020). Government revenue dataset. `https://www.wider.unu.edu/project/government-revenue-dataset`

2.18.2.53 Revenue (excluding social contributions) (ictd_revexsc)

Long tag: qog_std_ts_ictd_revexsc

Original tag: ictd_revexsc

Description:

Total government revenue, excluding social contributions.

Variable citation: ICTD/UNU-WIDER. (2020). Government revenue dataset. `https://www.wider.unu.edu/project/government-revenue-dataset`

2.18.2.54 Revenue (including social contributions) (ictd_revinsc)

Long tag: qog_std_ts_ictd_revinsc

Original tag: ictd_revinsc

Description:

Total government revenue including taxes, non-tax revenue, grants and social contributions.

Variable citation: ICTD/UNU-WIDER. (2020). Government revenue dataset. `https://www.wider.unu.edu/project/government-revenue-dataset`

2.18.2.55 Total Resource Revenue (ictd_revres)

Long tag: qog_std_ts_ictd_revres

Original tag: ictd_revres

Description:

Total natural resource revenues, including natural resource revenues reported as "tax revenue" or "non-tax revenue". Natural resources are here defined as natural resources that include a significant component of economic rent, primarily from oil and mining activities.

Variable citation: ICTD/UNU-WIDER. (2020). Government revenue dataset. `https://www.wider.unu.edu/project/government-revenue-dataset`

2.18.2.56 Social Contributions (ictd_soccon)

Long tag: qog_std_ts_ictd_soccon

Original tag: ictd_soccon

Description:

Total social contributions.

Variable citation: ICTD/UNU-WIDER. (2020). Government revenue dataset. `https://www.wider.unu.edu/project/government-revenue-dataset`

2.18.2.57 Taxes on Corporations and Other Enterprises (ictd_taxcorp)

Long tag: qog_std_ts_ictd_taxcorp

Original tag: ictd_taxcorp

Description:

Total income and profit taxes on corporations, including taxes on resource firms.

Variable citation: ICTD/UNU-WIDER. (2020). Government revenue dataset. `https://www.wider.unu.edu/project/government-revenue-dataset`

2.18.2.58 Taxes (excluding social contributions) (ictd_taxexsc)

Long tag: qog_std_ts_ictd_taxexsc

Original tag: ictd_taxexsc

Description:
Total tax revenue, excluding social contributions.

Variable citation: ICTD/UNU-WIDER. (2020). Government revenue dataset. `https://www.wider.unu.edu/project/government-revenue-dataset`

2.18.2.59 Taxes on Goods and Services (ictd_taxgs)

Long tag: qog_std_ts_ictd_taxgs

Original tag: ictd_taxgs

Description:
Total taxes on goods and services, which includes (but it not necessarily always equal to) sales taxes and excise taxes.

Variable citation: ICTD/UNU-WIDER. (2020). Government revenue dataset. `https://www.wider.unu.edu/project/government-revenue-dataset`

2.18.2.60 Taxes on Income, Profits, and Capital Gains (ictd_taxinc)

Long tag: qog_std_ts_ictd_taxinc

Original tag: ictd_taxinc

Description:
Total taxes on income, profits and capital gains, including taxes on natural resource firms. This figure is always exclusive of social contributions. The total value of Taxes on Income, Profits and Capital Gains may sometimes exceed the sum of Individuals and Corporations, due to revenues that are unallocated between the two.

Variable citation: ICTD/UNU-WIDER. (2020). Government revenue dataset. `https://www.wider.unu.edu/project/government-revenue-dataset`

2.18.2.61 Taxes on Individuals (ictd_taxind)

Long tag: qog_std_ts_ictd_taxind

Original tag: ictd_taxind

Description:
Total income, capital gains and profit taxes on individuals. This figure is always exclusive of resource revenues in available sources.

Variable citation: ICTD/UNU-WIDER. (2020). Government revenue dataset. `https://www.wider.unu.edu/project/government-revenue-dataset`

2.18.2.62 Indirect Taxes (ictd_taxindirect)

Long tag: qog_std_ts_ictd_taxindirect

Original tag: ictd_taxindirect

Description:
Total indirect taxes, including resource revenues. Includes taxes on goods and services, taxes on international trade and other taxes. Indirect may exceed the sum of Taxes on Goods and Services, Taxes on International Trade and Transactions and Other Taxes due to unallocated revenue not classified in any of these categories.

Variable citation: ICTD/UNU-WIDER. (2020). Government revenue dataset. `https://www.wider.unu.edu/project/government-revenue-dataset`

2.18.2.63 Taxes (including social contributions) (ictd_taxinsc)

Long tag: qog_std_ts_ictd_taxinsc

Original tag: ictd_taxinsc

Description:
Total tax revenue, including social contributions.

Variable citation: ICTD/UNU-WIDER. (2020). Government revenue dataset. `https://www.wider.unu.edu/project/government-revenue-dataset`

2.18.2.64 Non-resource Tax (excluding social contributions) (ictd_taxnresexsc)

Long tag: qog_std_ts_ictd_taxnresexsc

Original tag: ictd_taxnresexsc

Description:
Total non-resource tax revenue, excluding social contributions. Calculated as "Taxes excluding social

contributions" minus "resource taxes". This is the variable recommended for econometric analysis, as it is most complete and consistent across countries.

Variable citation: ICTD/UNU-WIDER. (2020). Government revenue dataset. `https://www.wider.unu.edu/project/government-revenue-dataset`

2.18.2.65 Non-resource Tax (including social contributions) (ictd_taxnresinsc)

Long tag: qog_std_ts_ictd_taxnresinsc

Original tag: ictd_taxnresinsc

Description:
Total non-resource tax revenue, including social contributions. Calculated as "Taxes including social contributions" minus "resource taxes".

Variable citation: ICTD/UNU-WIDER. (2020). Government revenue dataset. `https://www.wider.unu.edu/project/government-revenue-dataset`

2.18.2.66 Other Taxes (ictd_taxother)

Long tag: qog_std_ts_ictd_taxother

Original tag: ictd_taxother

Description:
Total other taxes.

Variable citation: ICTD/UNU-WIDER. (2020). Government revenue dataset. `https://www.wider.unu.edu/project/government-revenue-dataset`

2.18.2.67 Taxes on Payroll and Workforce (ictd_taxpaywf)

Long tag: qog_std_ts_ictd_taxpaywf

Original tag: ictd_taxpaywf

Description:
Total taxes on payroll and workforce. This variable is entirely distinct from social contributions, though in underlying sources, social contributions are very occasionally reported as payroll taxes.

Variable citation: ICTD/UNU-WIDER. (2020). Government revenue dataset. `https://www.wider.unu.edu/project/government-revenue-dataset`

2.18.2.68 Taxes on Property (ictd_taxprop)

Long tag: qog_std_ts_ictd_taxprop

Original tag: ictd_taxprop

Description:
Total taxes on property.

Variable citation: ICTD/UNU-WIDER. (2020). Government revenue dataset. `https://www.wider.unu.edu/project/government-revenue-dataset`

2.18.2.69 Resource Taxes (ictd_taxres)

Long tag: qog_std_ts_ictd_taxres

Original tag: ictd_taxres

Description:
Component of reported tax revenue that is from natural resource sources, most often corporate taxation of resource firms.

Variable citation: ICTD/UNU-WIDER. (2020). Government revenue dataset. `https://www.wider.unu.edu/project/government-revenue-dataset`

2.18.2.70 Taxes on International Trade and Transactions (ictd_taxtrade)

Long tag: qog_std_ts_ictd_taxtrade

Original tag: ictd_taxtrade

Description:
Total taxes on international trade, including both import and export taxes. In some cases this figure may also include VAT collected at the border, where countries consistently report revenue in this way.

Variable citation: ICTD/UNU-WIDER. (2020). Government revenue dataset. `https://www.wider.unu.edu/project/government-revenue-dataset`

2.18.2.71 Absolute economic institutional quality(simple averages) (kun_ecoabs)

Long tag: qog_std_ts_kun_ecoabs

Original tag: kun_ecoabs

Description:
Absolute economic institutional quality(simple averages).

Variable citation: Kuncic, A. (2014). Institutional quality dataset. *Journal of Institutional Economics*, 10(01), 135–161. https://doi.org/10.1017/S1744137413000192

2.18.2.72 Economic institutional quality (relative factor scores) (kun_ecorel)

Long tag: qog_std_ts_kun_ecorel

Original tag: kun_ecorel

Description:
Economic institutional quality (relative factor scores).

Variable citation: Kuncic, A. (2014). Institutional quality dataset. *Journal of Institutional Economics*, 10(01), 135–161. https://doi.org/10.1017/S1744137413000192

2.18.2.73 Economic World Institutional Quality Ranking (all countries) (kun_wiqreco_all)

Long tag: qog_std_ts_kun_wiqreco_all

Original tag: kun_wiqreco_all

Description:
Economic World Institutional Quality Ranking (all countries).

Variable citation: Kuncic, A. (2014). Institutional quality dataset. *Journal of Institutional Economics*, 10(01), 135–161. https://doi.org/10.1017/S1744137413000192

2.18.2.74 Economic World Institutional Quality Ranking (full obs.) (kun_wiqreco_full)

Long tag: qog_std_ts_kun_wiqreco_full

Original tag: kun_wiqreco_full

Description:
Economic World Institutional Quality Ranking (countries with full observations).

Variable citation: Kuncic, A. (2014). Institutional quality dataset. *Journal of Institutional Economics*, 10(01), 135–161. https://doi.org/10.1017/S1744137413000192

2.18.2.75 Atkinson Coefficient (epsilon=0.5) (lis_atk05)

Long tag: qog_std_ts_lis_atk05

Original tag: lis_atk05

Description:
Atkinson Coefficient (epsilon=0.5).

Variable citation: LIS Cross-National Data Center in Luxembourg. (2021). Lis inequality and poverty key figures [Accessed on 2021-12-09]. https://www.lisdatacenter.org/download-key-figures/

2.18.2.76 Atkinson Coefficient (epsilon=1) (lis_atk1)

Long tag: qog_std_ts_lis_atk1

Original tag: lis_atk1

Description:
Atkinson Coefficient (epsilon=1).

Variable citation: LIS Cross-National Data Center in Luxembourg. (2021). Lis inequality and poverty key figures [Accessed on 2021-12-09]. https://www.lisdatacenter.org/download-key-figures/

2.18.2.77 Gini Coefficient (lis_gini)

Long tag: qog_std_ts_lis_gini

Original tag: lis_gini

Description:
Gini Coefficient.

Variable citation: LIS Cross-National Data Center in Luxembourg. (2021). Lis inequality and poverty key figures [Accessed on 2021-12-09]. https://www.lisdatacenter.org/download-key-figures/

2.18.2.78 Mean Equivalized Income (lis_meaneqi)

Long tag: qog_std_ts_lis_meaneqi

Original tag: lis_meaneqi

Description:
Mean Equivalized Income.

Variable citation: LIS Cross-National Data Center in Luxembourg. (2021). Lis inequality and poverty key figures [Accessed on 2021-12-09]. https://www.lisdatacenter.org/download-key-figures/

2.18.2.79 Median Equivalized Income (lis_medeqi)

Long tag: qog_std_ts_lis_medeqi

Original tag: lis_medeqi

Description:
Median Equivalized Income.

Variable citation: LIS Cross-National Data Center in Luxembourg. (2021). Lis inequality and poverty key figures [Accessed on 2021-12-09]. https://www.lisdatacenter.org/download-key-figures/

2.18.2.80 Percentile Ratio (80/20) (lis_pr8020)

Long tag: qog_std_ts_lis_pr8020

Original tag: lis_pr8020

Description:
Percentile Ratio (80/20).

Variable citation: LIS Cross-National Data Center in Luxembourg. (2021). Lis inequality and poverty key figures [Accessed on 2021-12-09]. https://www.lisdatacenter.org/download-key-figures/

2.18.2.81 Percentile Ratio (90/10) (lis_pr9010)

Long tag: qog_std_ts_lis_pr9010

Original tag: lis_pr9010

Variable citation: LIS Cross-National Data Center in Luxembourg. (2021). Lis inequality and poverty key figures [Accessed on 2021-12-09]. https://www.lisdatacenter.org/download-key-figures/

2.18.2.83 Real GDP per Capita (mad_gdppc)

Long tag: qog_std_ts_mad_gdppc

Original tag: mad_gdppc

Description:
Real GDP per capita in 2011 US dollars, multiple benchmarks.

Variable citation: Bolt, J., & van Zanden, J. L. (2020). Maddison project database, version 2020 [Maddison style estimates of the evolution of the world economy: A new 2020 update]. https://www.rug.nl/ggdc/historicaldevelopment/maddison/research

2.18.2.84 Real GDP per Capita (year 1) (mad_gdppc1)

Long tag: qog_std_ts_mad_gdppc1

Original tag: mad_gdppc1

Description:
Real GDP per capita in 2011 US dollars for year 1, multiple benchmarks.

Variable citation: Bolt, J., & van Zanden, J. L. (2020). Maddison project database, version 2020 [Maddison style estimates of the evolution of the world economy: A new 2020 update]. `https://www.rug.nl/ggdc/historicaldevelopment/maddison/research`

2.18.2.85 Real GDP per Capita (year 1000) (mad_gdppc1000)

Long tag: qog_std_ts_mad_gdppc1000

Original tag: mad_gdppc1000

Description:
Real GDP per capita in 2011 US dollars for year 1000, multiple benchmarks.

Variable citation: Bolt, J., & van Zanden, J. L. (2020). Maddison project database, version 2020 [Maddison style estimates of the evolution of the world economy: A new 2020 update]. `https://www.rug.nl/ggdc/historicaldevelopment/maddison/research`

2.18.2.86 Real GDP per Capita (year 1300) (mad_gdppc1300)

Long tag: qog_std_ts_mad_gdppc1300

Original tag: mad_gdppc1300

Description:
Real GDP per capita in 2011 US dollars for year 1300, multiple benchmarks.

Variable citation: Bolt, J., & van Zanden, J. L. (2020). Maddison project database, version 2020 [Maddison style estimates of the evolution of the world economy: A new 2020 update]. `https://www.rug.nl/ggdc/historicaldevelopment/maddison/research`

2.18.2.87 Real GDP per Capita (year 1400) (mad_gdppc1400)

Long tag: qog_std_ts_mad_gdppc1400

Original tag: mad_gdppc1400

Description:
Real GDP per capita in 2011 US dollars for year 1400, multiple benchmarks.

Variable citation: Bolt, J., & van Zanden, J. L. (2020). Maddison project database, version 2020 [Maddison style estimates of the evolution of the world economy: A new 2020 update]. `https://www.rug.nl/ggdc/historicaldevelopment/maddison/research`

2.18.2.88 Real GDP per Capita (year 1500) (mad_gdppc1500)

Long tag: qog_std_ts_mad_gdppc1500

Original tag: mad_gdppc1500

Description:
Real GDP per capita in 2011 US dollars for year 1500, multiple benchmarks.

Variable citation: Bolt, J., & van Zanden, J. L. (2020). Maddison project database, version 2020 [Maddison style estimates of the evolution of the world economy: A new 2020 update]. `https://www.rug.nl/ggdc/historicaldevelopment/maddison/research`

2.18.2.89 Real GDP per Capita (year 1600) (mad_gdppc1600)

Long tag: qog_std_ts_mad_gdppc1600

Original tag: mad_gdppc1600

Description:
Real GDP per capita in 2011 US dollars for year 1600, multiple benchmarks.

Variable citation: Bolt, J., & van Zanden, J. L. (2020). Maddison project database, version 2020 [Maddison style estimates of the evolution of the world economy: A new 2020 update]. `https://www.rug.nl/ggdc/historicaldevelopment/maddison/research`

2.18.2.90 Real GDP per Capita (year 1700) (mad_gdppc1700)

Long tag: qog_std_ts_mad_gdppc1700

Original tag: mad_gdppc1700

Description:
Real GDP per capita in 2011 US dollars for year 1700, multiple benchmarks.

Variable citation: Bolt, J., & van Zanden, J. L. (2020). Maddison project database, version 2020 [Maddison style estimates of the evolution of the world economy: A new 2020 update]. `https://www.rug.nl/ggdc/historicaldevelopment/maddison/research`

2.18.2.91 Real GDP per Capita (year 1800) (mad_gdppc1800)

Long tag: qog_std_ts_mad_gdppc1800

Original tag: mad_gdppc1800

Description:
Real GDP per capita in 2011 US dollars for year 1800, multiple benchmarks.

Variable citation: Bolt, J., & van Zanden, J. L. (2020). Maddison project database, version 2020 [Maddison style estimates of the evolution of the world economy: A new 2020 update]. `https://www.rug.nl/ggdc/historicaldevelopment/maddison/research`

2.18.2.92 Real GDP per Capita (year 1900) (mad_gdppc1900)

Long tag: qog_std_ts_mad_gdppc1900

Original tag: mad_gdppc1900

Description:
Real GDP per capita in 2011 US dollars for year 1900, multiple benchmarks.

Variable citation: Bolt, J., & van Zanden, J. L. (2020). Maddison project database, version 2020 [Maddison style estimates of the evolution of the world economy: A new 2020 update]. `https://www.rug.nl/ggdc/historicaldevelopment/maddison/research`

2.18.2.93 Current account balance (oecd_bop_t1)

Long tag: qog_std_ts_oecd_bop_t1

Original tag: oecd_bop_t1

Description:
Current account balance.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. `https://doi.org/10.1787/20752288`

2.18.2.94 Real GDP growth (oecd_evogdp_t1)

Long tag: qog_std_ts_oecd_evogdp_t1

Original tag: oecd_evogdp_t1

Description:
Real GDP growth.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. `https://doi.org/10.1787/20752288`

2.18.2.95 Real value added: agriculture, fishing, hunting and forestry (oecd_evova_t1a)

Long tag: qog_std_ts_oecd_evova_t1a

Original tag: oecd_evova_t1a

Description:
Real value added in agriculture, fishing, hunting and forestry.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. `https://doi.org/10.1787/20752288`

2.18.2.96 Real value added: construction (oecd_evova_t1c)

Long tag: qog_std_ts_oecd_evova_t1c

Original tag: oecd_evova_t1c

Description:
Real value added in construction.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. `https://doi.org/10.1787/20752288`

2.18.2.97 Real value added: trade, repairs, transport, accommodation and food serv. (oecd_evova_t1d)

Long tag: qog_std_ts_oecd_evova_t1d

Original tag: oecd_evova_t1d

Description:
Real value added in distributive trade, repairs, transport, accommodation and food services activities.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. https://doi.org/10.1787/20752288

2.18.2.98 Real value added: Information and communication (oecd_evova_t1e)

Long tag: qog_std_ts_oecd_evova_t1e

Original tag: oecd_evova_t1e

Description:
Real value added in Information and communication.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. https://doi.org/10.1787/20752288

2.18.2.99 Real value added: financial and insurance activities (oecd_evova_t1f)

Long tag: qog_std_ts_oecd_evova_t1f

Original tag: oecd_evova_t1f

Description:
Real value added in financial and insurance activities.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. https://doi.org/10.1787/20752288

2.18.2.203 Sustainable Policies: Economic Policies - Labor Markets (sgi_eclm)

Long tag: qog_std_ts_sgi_eclm

Original tag: sgi_eclm

Description:
Sustainable Policies: Economic Policies - Labor Market (Labor Market Policy, Unemployment, Long-term Unemployment, Youth Unemployment, Low-skilled Unemployment, Employment, Low Pay Incidence).

Variable citation: Schiller, C., & Hellmann, T. (2020). Sustainable governance indicators 2020 [Date accessed: 12 December 2021]. *Bertelsmann Stiftung*. `https://www.sgi-network.org`

2.18.2.204 Sustainable Policies: Economic Policies - Research, Innovation and Infrastructur (sgi_ecri)

Long tag: qog_std_ts_sgi_ecri

Original tag: sgi_ecri

Description:
Sustainable Policies: Economic Policies - Research, Innovation and Infrastructure (Research and Innovation Policy, Public R

D Spending, Non-public R
D Spending, Total Researchers, Intellectual Property Licenses, PCT Patent Applications).

Variable citation: Schiller, C., & Hellmann, T. (2020). Sustainable governance indicators 2020 [Date accessed: 12 December 2021]. *Bertelsmann Stiftung*. `https://www.sgi-network.org`

2.18.2.205 Sustainable Policies: Economic Policies - Taxes (sgi_ectx)

Long tag: qog_std_ts_sgi_ectx

Original tag: sgi_ectx

Description:
Sustainable Policies: Economic Policies - Taxes (Tax Policy, Tax System Complexity, Structural Balance, Marginal Tax Burden for Businesses, Redistribution Effect).

Variable citation: Schiller, C., & Hellmann, T. (2020). Sustainable governance indicators 2020 [Date accessed: 12 December 2021]. *Bertelsmann Stiftung*. `https://www.sgi-network.org`

2.18.2.206 Top 10percent income share (top_top10_income_share)

Long tag: qog_std_ts_top_top10_income_share

Original tag: top_top10_income_share

Description:
Income share of the top 10percent of the population. This refers to the share of pre-tax national income among equal-split adults for the top 10percent in each country-year.

The pre-tax national income is the sum of all pre-tax personal income flows accruing to the owners of the production factors, labor and capital, before taking into account the operation of the tax/transfer system, but after taking into account the operation of pension system.

The central difference between personal factor income and pre-tax income is the treatment of pensions, which are counted on a contribution basis by factor income and on a distribution basis by pre-tax income. The population is comprised of individuals over age 20. The base unit is the individual (rather than the household) but resources are split equally within couples.

Variable citation: Alvaredo, F., Atkinson, A. B., Piketty, T., & Saez, E. (2020b). World inequality report 2020. `http://wid.world/` Alvaredo, F., Atkinson, A. B., Piketty, T., & Saez, E. (2020a). World inequality database. `http://wid.world/data`

2.18.2.207 Top 1percent income share (top_top1_income_share)

Long tag: qog_std_ts_top_top1_income_share

Original tag: top_top1_income_share

Description:
Income share of the top 1percent of the population. This refers to the share of pre-tax national income among equal-split adults for the top 1percent in each country-year.

The pre-tax national income is the sum of all pre-tax personal income flows accruing to the owners of the production factors, labor and capital, before taking into account the operation of the tax/transfer system, but after taking into account the operation of pension system.

The central difference between personal factor income and pre-tax income is the treatment of pensions, which are counted on a contribution basis by factor income and on a distribution basis by pre-tax income. The population is comprised of individuals over age 20. The base unit is the individual (rather than the household) but resources are split equally within couples.

2.18.2.208 Regulatory Quality, Estimate (wbgi_rqe)

Long tag: qog_std_ts_wbgi_rqe

Original tag: wbgi_rqe

Description:
Regulatory Quality - Estimate: "Regulatory Quality" includes measures of the incidence of market-unfriendly policies such as price controls or inadequate bank supervision, as well as perceptions of the burdens imposed by excessive regulation in areas such as foreign trade and business development.

Variable citation: Kaufmann, D., Kraay, A., & Mastruzzi, M. (2010). The worldwide governance indicators: A summary of methodology, data and analytical issues. *World Bank Policy Research Working Paper, 5430*

2.18.2.209 Regulatory Quality, Number of Sources (wbgi_rqn)

Long tag: qog_std_ts_wbgi_rqn

Original tag: wbgi_rqn

Description:
Regulatory Quality - Number of Sources.

Variable citation: Kaufmann, D., Kraay, A., & Mastruzzi, M. (2010). The worldwide governance indicators: A summary of methodology, data and analytical issues. *World Bank Policy Research Working Paper, 5430*

2.18.2.210 Regulatory Quality, Standard Error (wbgi_rqs)

Long tag: qog_std_ts_wbgi_rqs

Original tag: wbgi_rqs

Description:
Regulatory Quality - Standard Errors.

Variable citation: Kaufmann, D., Kraay, A., & Mastruzzi, M. (2010). The worldwide governance indicators: A summary of methodology, data and analytical issues. *World Bank Policy Research Working Paper, 5430*

2.18.2.211 Proportion of people living below 50 percent of median income (percent) (wdi_belmedinc)

Long tag: qog_std_ts_wdi_belmedinc

Original tag: wdi_belmedinc

Description:
The percentage of people in the population who live in households whose per capita income or consumption is below half of the median income or consumption per capita. The median is measured at 2011 Purchasing Power Parity (PPP) using PovcalNet (http://iresearch.worldbank.org/PovcalNet). For some countries, medians are not reported due to grouped and/or confidential data. The reference year is the year in which the underlying household survey data was collected. In cases for which the data collection period bridged two calendar years, the first year in which data were collected is reported.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.2.212 Central government debt, total (percent of GDP) (wdi_debt)

Long tag: qog_std_ts_wdi_debt

Original tag: wdi_debt

Description:
Debt is the entire stock of direct government fixed-term contractual obligations to others outstanding on a particular date. It includes domestic and foreign liabilities such as currency and money deposits, securities other than shares, and loans. It is the gross amount of government liabilities reduced by the amount of equity and financial derivatives held by the government. Because debt is a stock rather than a flow, it is measured as of a given date, usually the last day of the fiscal year.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.2.213 Domestic general government health expenditure (percent of GDP) (wdi_dgovhexp)

Long tag: qog_std_ts_wdi_dgovhexp

Original tag: wdi_dgovhexp

Description:
Domestic general government health expenditure (percent of GDP). Public expenditure on health from domestic sources as a share of the economy as measured by GDP.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.2.214 Domestic private health expenditure (percent of current health expenditure) (wdi_dprivhexp)

Long tag: qog_std_ts_wdi_dprivhexp

Original tag: wdi_dprivhexp

Description:
Domestic private health expenditure (percent of current health expenditure). Share of current health expenditures funded from domestic private sources. Domestic private sources include funds from households, corporations and non-profit organizations. Such expenditures can be either prepaid to voluntary health

insurance or paid directly to healthcare providers.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.2.215 External health expenditure (percent of current health expenditure) (wdi_ehexpp)

Long tag: qog_std_ts_wdi_ehexpp

Original tag: wdi_ehexpp

Description:

External health expenditure (percent of current health expenditure). Share of current health expenditures funded from external sources. External sources compose of direct foreign transfers and foreign transfers distributed by government encompassing all financial inflows into the national health system from outside the country. External sources either flow through the government scheme or are channeled through non-governmental organizations or other schemes.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.2.216 CPIA equity of public resource use rating (1=low to 6=high) (wdi_eqpubres)

Long tag: qog_std_ts_wdi_eqpubres

Original tag: wdi_eqpubres

Description:

Equity of public resource use assesses the extent to which the pattern of public expenditures and revenue collection affects the poor and is consistent with national poverty reduction priorities.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.2.217 Exports of goods and services (percent of GDP) (wdi_export)

Long tag: qog_std_ts_wdi_export

Original tag: wdi_export

Description:

Exports of goods and services represent the value of all goods and other market services provided to the rest of the world. They include the value of merchandise, freight, insurance, transport, travel, royalties, license fees, and other services, such as communication, construction, financial, information, business, personal, and government services. They exclude compensation of employees and investment income (formerly called factor services) and transfer payments.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.2.218 Foreign direct investment, net inflows (percent of GDP) (wdi_fdiin)

Long tag: qog_std_ts_wdi_fdiin

Original tag: wdi_fdiin

Description:

Foreign direct investment are the net inflows of investment to acquire a lasting management interest (10 percent or more of voting stock) in an enterprise operating in an economy other than that of the investor. It is the sum of equity capital, reinvestment of earnings, other long-term capital, and short-term capital as shown in the balance of payments. This series shows net inflows (new investment inflows less disinvestment) in the reporting economy from foreign investors, and is divided by GDP.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.2.219 Foreign direct investment, net outflows (percent of GDP) (wdi_fdiout)

Long tag: qog_std_ts_wdi_fdiout

Original tag: wdi_fdiout

Description:

Foreign direct investment are the net outflows of investment to acquire a lasting management interest (10 percent or more of voting stock) in an enterprise operating in an economy other than that of the investor. It is the sum of equity capital, reinvestment of earnings, other long-term capital, and short-term capital as shown in the balance of payments. This series shows net outflows of investment from the reporting economy to the rest of the world and is divided by GDP.

2.18.2.220 Agriculture, forestry, and fishing, value added (percent of GDP) (wdi_gdpagr)

Long tag: qog_std_ts_wdi_gdpagr

Original tag: wdi_gdpagr

Description:

Agriculture corresponds to ISIC divisions 1-5 and includes forestry, hunting, and fishing, as well as cultivation of crops and livestock production. Value added is the net output of a sector after adding up all outputs and subtracting intermediate inputs. It is calculated without making deductions for depreciation of fabricated assets or depletion and degradation of natural resources. The origin of value added is determined by the International Standard Industrial Classification (ISIC), revision 3 or 4.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.2.221 GDP per capita (constant 2010 US dollar) (wdi_gdpcapcon2010)

Long tag: qog_std_ts_wdi_gdpcapcon2010

Original tag: wdi_gdpcapcon2010

Description:

GDP per capita is gross domestic product divided by midyear population. GDP is the sum of gross value added by all resident producers in the economy plus any product taxes and minus any subsidies not included in the value of the products. It is calculated without making deductions for depreciation of fabricated assets or for depletion and degradation of natural resources. Data are in constant 2010 U.S. dollars.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.2.222 GDP per capita (current US dollar) (wdi_gdpcapcur)

Long tag: qog_std_ts_wdi_gdpcapcur

Original tag: wdi_gdpcapcur

Description:

GDP per capita is gross domestic product divided by midyear population. GDP is the sum of gross value added by all resident producers in the economy plus any product taxes and minus any subsidies not included in the value of the products. It is calculated without making deductions for depreciation of fabricated assets or for depletion and degradation of natural resources. Data are in current U.S. dollars.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.2.223 GDP per capita growth (annual percent) (wdi_gdpcapgr)

Long tag: qog_std_ts_wdi_gdpcapgr

Original tag: wdi_gdpcapgr

Description:

Annual percentage growth rate of GDP per capita based on constant local currency. Aggregates are based on constant 2010 U.S. dollars. GDP per capita is gross domestic product divided by midyear population. GDP at purchaser's prices is the sum of gross value added by all resident producers in the economy plus any product taxes and minus any subsidies not included in the value of the products. It is calculated without making deductions for depreciation of fabricated assets or for depletion and degradation of natural resources.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.2.224 GDP per capita, PPP (constant 2017 international dollar) (wdi_gdpcappppcon2017)

Long tag: qog_std_ts_wdi_gdpcappppcon2017

Original tag: wdi_gdpcappppcon2017

Description:

GDP per capita based on purchasing power parity (PPP). PPP GDP is gross domestic product converted to international dollars using purchasing power parity rates. An international dollar has the same purchasing power over GDP as the U.S. dollar has in the United States. GDP at purchaser's prices is the sum of gross value added by all resident producers in the economy plus any product taxes and minus any subsidies not included in the value of the products. It is calculated without making deductions for depreciation of fabricated assets or for depletion and degradation of natural resources. Data are in constant 2017 international dollars.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.2.225 GDP per capita, PPP (current international dollar) (wdi_gdpcappppcur)

Long tag: qog_std_ts_wdi_gdpcappppcur

Original tag: wdi_gdpcappppcur

Description:

GDP per capita based on purchasing power parity (PPP). PPP GDP is gross domestic product converted to international dollars using purchasing power parity rates. An international dollar has the same purchasing power over GDP as the U.S. dollar has in the United States. GDP at purchaser's prices is the sum of gross value added by all resident producers in the economy plus any product taxes and minus any subsidies not included in the value of the products. It is calculated without making deductions for depreciation of fabricated assets or for depletion and degradation of natural resources. Data are in current international dollars based on the 2011 ICP round.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.2.226 GDP growth (annual percent) (wdi_gdpgr)

Long tag: qog_std_ts_wdi_gdpgr

Original tag: wdi_gdpgr

Description:

Annual percentage growth rate of GDP at market prices based on constant local currency. Aggregates are based on constant 2010 U.S. dollars. GDP is the sum of gross value added by all resident producers in the economy plus any product taxes and minus any subsidies not included in the value of the products. It is calculated without making deductions for depreciation of fabricated assets or for depletion and degradation of natural resources.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.2.227 Industry (including construction), value added (percent of GDP) (wdi_gdpind)

Long tag: qog_std_ts_wdi_gdpind

Original tag: wdi_gdpind

Description:

Industry corresponds to ISIC divisions 10-45 and includes manufacturing (ISIC divisions 15-37). It comprises value added in mining, manufacturing (also reported as a separate subgroup), construction, electricity, water, and gas. Value added is the net output of a sector after adding up all outputs and subtracting intermediate inputs. It is calculated without making deductions for depreciation of fabricated assets or depletion and degradation of natural resources. The origin of value added is determined by the International Standard Industrial Classification (ISIC), revision 3. Note: For VAB countries, gross value added at factor cost is used as the denominator.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.2.228 GDP, PPP (constant 2017 international dollar) (wdi_gdppppcon2017)

Long tag: qog_std_ts_wdi_gdppppcon2017

Original tag: wdi_gdppppcon2017

Description:

PPP GDP is gross domestic product converted to international dollars using purchasing power parity rates. An international dollar has the same purchasing power over GDP as the U.S. dollar has in the United States. GDP is the sum of gross value added by all resident producers in the economy plus any product taxes and minus any subsidies not included in the value of the products. It is calculated without making deductions for depreciation of fabricated assets or for depletion and degradation of natural resources. Data are in constant 2017 international dollars.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.2.229 GDP, PPP (current international dollar) (wdi_gdppppcur)

Long tag: qog_std_ts_wdi_gdppppcur

Original tag: wdi_gdppppcur

Description:
PPP GDP is gross domestic product converted to international dollars using purchasing power parity rates. An international dollar has the same purchasing power over GDP as the U.S. dollar has in the United States. GDP is the sum of gross value added by all resident producers in the economy plus any product taxes and minus any subsidies not included in the value of the products. It is calculated without making deductions for depreciation of fabricated assets or for depletion and degradation of natural resources. Data are in current international dollars. For most economies PPP figures are extrapolated from the 2011 International Comparison Program (ICP) benchmark estimates or imputed using a statistical model based on the 2011 ICP. For 47 high- and upper middle-income economies conversion factors are provided by Eurostat and the Organisation for Economic Co-operation and Development (OECD).

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.2.230 Gini index (World Bank estimate) (wdi_gini)

Long tag: qog_std_ts_wdi_gini

Original tag: wdi_gini

Description:
Gini index measures the extent to which the distribution of income (or, in some cases, consumption expenditure) among individuals or households within an economy deviates from a perfectly equal distribution. A Lorenz curve plots the cumulative percentages of total income received against the cumulative number of recipients, starting with the poorest individual or household. The Gini index measures the area between the Lorenz curve and a hypothetical line of absolute equality, expressed as a percentage of the maximum area under the line. Thus a Gini index of 0 represents perfect equality, while an index of 100 implies perfect inequality.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.2.231 GNI, Atlas method (current US dollar) (wdi_gniatlcur)

Long tag: qog_std_ts_wdi_gniatlcur

Original tag: wdi_gniatlcur

Description:
GNI (formerly GNP) is the sum of value added by all resident producers plus any product taxes (less subsidies) not included in the valuation of output plus net receipts of primary income (compensation of employees and property income) from abroad. Data are in current U.S. dollars. GNI, calculated in national currency, is usually converted to U.S. dollars at official exchange rates for comparisons across economies, although an alternative rate is used when the official exchange rate is judged to diverge by an exceptionally large margin from the rate actually applied in international transactions. To smooth fluctuations in prices and exchange rates, a special Atlas method of conversion is used by the World Bank. This applies a conversion factor that averages the exchange rate for a given year and the two preceding years, adjusted for differences in rates of inflation between the country, and through 2000, the G-5 countries (France, Germany, Japan, the United Kingdom, and the United States). From 2001, these countries include the Euro area, Japan, the United Kingdom, and the United States.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.2.232 GNI per capita, Atlas method (current US dollar) (wdi_gnicapatlcur)

Long tag: qog_std_ts_wdi_gnicapatlcur

Original tag: wdi_gnicapatlcur

Description:
GNI per capita (formerly GNP per capita) is the gross national income, converted to U.S. dollars using the World Bank Atlas method, divided by the midyear population. GNI is the sum of value added by all resident producers plus any product taxes (less subsidies) not included in the valuation of output plus net receipts of primary income (compensation of employees and property income) from abroad. GNI, calculated in national currency, is usually converted to U.S. dollars at official exchange rates for comparisons across economies, although an alternative rate is used when the official exchange rate is judged to diverge by an exceptionally large margin from the rate actually applied in international transactions. To smooth fluctuations in prices and exchange rates, a special Atlas method of conversion is used by the World Bank. This applies a conversion factor that averages the exchange rate for a given year and the two preceding years, adjusted for differences in rates of inflation between the country, and through 2000, the G-5 countries (France, Germany, Japan, the United Kingdom, and the United States). From 2001, these countries include the Euro area, Japan, the United Kingdom, and the United States.

2.18.2.242 Imports of goods and services (percent of GDP) (wdi_import)

Long tag: qog_std_ts_wdi_import

Original tag: wdi_import

Description:
Imports of goods and services represent the value of all goods and other market services received from the rest of the world. They include the value of merchandise, freight, insurance, transport, travel, royalties, license fees, and other services, such as communication, construction, financial, information, business, personal, and government services. They exclude compensation of employees and investment income (formerly called factor services) and transfer payments.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.2.243 Income share held by highest 10percent (wdi_incsh10h)

Long tag: qog_std_ts_wdi_incsh10h

Original tag: wdi_incsh10h

Description:
Income share held by highest 10percent. Percentage share of income or consumption is the share that accrues to subgroups of population indicated by deciles or quintiles.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.2.244 Income share held by lowest 10percent (wdi_incsh10l)

Long tag: qog_std_ts_wdi_incsh10l

Original tag: wdi_incsh10l

Description:
Income share held by lowest 10percent. Percentage share of income or consumption is the share that accrues to subgroups of population indicated by deciles or quintiles.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.2.245 Income share held by second 20percent (wdi_incsh202)

Long tag: qog_std_ts_wdi_incsh202

Original tag: wdi_incsh202

Description:
Income share held by second 20percent. Percentage share of income or consumption is the share that accrues to subgroups of population indicated by deciles or quintiles. Percentage shares by quintile may not sum to 100 because of rounding.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.2.246 Income share held by third 20percent (wdi_incsh203)

Long tag: qog_std_ts_wdi_incsh203

Original tag: wdi_incsh203

Description:
Income share held by third 20percent. Percentage share of income or consumption is the share that accrues to subgroups of population indicated by deciles or quintiles. Percentage shares by quintile may not sum to 100 because of rounding.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.2.247 Income share held by fourth 20percent (wdi_incsh204)

Long tag: qog_std_ts_wdi_incsh204

Original tag: wdi_incsh204

Description:
Income share held by fourth 20percent. Percentage share of income or consumption is the share that accrues to subgroups of population indicated by deciles or quintiles. Percentage shares by quintile may not sum to 100 because of rounding.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.2.248 Income share held by highest 20percent (wdi_incsh20h)

Long tag: qog_std_ts_wdi_incsh20h

Original tag: wdi_incsh20h

Description:
Income share held by highest 20percent. Percentage share of income or consumption is the share that accrues to subgroups of population indicated by deciles or quintiles. Percentage shares by quintile may not sum to 100 because of rounding.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.2.249 Income share held by lowest 20percent (wdi_incsh20l)

Long tag: qog_std_ts_wdi_incsh20l

Original tag: wdi_incsh20l

Description:
Income share held by lowest 20percent. Percentage share of income or consumption is the share that accrues to subgroups of population indicated by deciles or quintiles. Percentage shares by quintile may not sum to 100 because of rounding.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.2.250 Inflation, consumer prices (annual percent) (wdi_inflation)

Long tag: qog_std_ts_wdi_inflation

Original tag: wdi_inflation

Description:
Inflation as measured by the consumer price index reflects the annual percentage change in the cost to the average consumer of acquiring a basket of goods and services that may be fixed or changed at specified intervals, such as yearly. The Laspeyres formula is generally used.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.2.251 Interest payments (percent of expense) (wdi_interexp)

Long tag: qog_std_ts_wdi_interexp

Original tag: wdi_interexp

Description:
Interest payments as percentage of expense include interest payments on government debt–including long-term bonds, long-term loans, and other debt instruments–to domestic and foreign residents.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.2.252 Interest payments (percent of revenue) (wdi_interrev)

Long tag: qog_std_ts_wdi_interrev

Original tag: wdi_interrev

Description:
Interest payments as percentage of revenue include interest payments on government debt–including long-term bonds, long-term loans, and other debt instruments–to domestic and foreign residents.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.2.253 Real interest rate (percent) (wdi_intrate)

Long tag: qog_std_ts_wdi_intrate

Original tag: wdi_intrate

Description:
Real interest rate is the lending interest rate adjusted for inflation as measured by the GDP deflator. The terms and conditions attached to lending rates differ by country, however, limiting their comparability.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.2.254 Poverty gap at USD 3.20 a day (2011 PPP) (percent) (wdi_povgap320)

Long tag: qog_std_ts_wdi_povgap320

Original tag: wdi_povgap320

Description:
Poverty gap at 3.20 dollars a day (2011 PPP) is the mean shortfall in income or consumption from the poverty line 3.20 dollars a day (counting the nonpoor as having zero shortfall), expressed as a percentage of the poverty line. This measure reflects the depth of poverty as well as its incidence (percent of population).

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.2.255 Services, value added (constant 2010 US dollar) (wdi_sva2010)

Long tag: qog_std_ts_wdi_sva2010

Original tag: wdi_sva2010

Description:

Services, value added (constant 2010 US dollar). Services correspond to ISIC divisions 50-99. They include value added in wholesale and retail trade (including hotels and restaurants), transport, and government, financial, professional, and personal services such as education, health care, and real estate services. Also included are imputed bank service charges, import duties, and any statistical discrepancies noted by national compilers as well as discrepancies arising from rescaling. Value added is the net output of a sector after adding up all outputs and subtracting intermediate inputs. It is calculated without making deductions for depreciation of fabricated assets or depletion and degradation of natural resources. The industrial origin of value added is determined by the International Standard Industrial Classification (ISIC), revision 3 or 4. Data are in constant 2010 U.S. dollars.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.2.256 Services, value added (annual percent growth) (wdi_svapg)

Long tag: qog_std_ts_wdi_svapg

Original tag: wdi_svapg

Description:

Services, value added (annual percent growth). Annual growth rate for value added in services based on constant local currency. Aggregates are based on constant 2010 U.S. dollars. Services correspond to ISIC divisions 50-99. They include value added in wholesale and retail trade (including hotels and restaurants), transport, and government, financial, professional, and personal services such as education, health care, and real estate services. Also included are imputed bank service charges, import duties, and any statistical discrepancies noted by national compilers as well as discrepancies arising from rescaling. Value added is the net output of a sector after adding up all outputs and subtracting intermediate inputs. It is calculated without making deductions for depreciation of fabricated assets or depletion and degradation of natural resources. The industrial origin of value added is determined by the International Standard Industrial Classification (ISIC), revision 3 or 4.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.2.257 Services, value added (percent of GDP) (wdi_svapgdp)

Long tag: qog_std_ts_wdi_svapgdp

Original tag: wdi_svapgdp

Description:

Services, value added (percent of GDP). Services correspond to ISIC divisions 50-99 and they include value added in wholesale and retail trade (including hotels and restaurants), transport, and government, financial, professional, and personal services such as education, health care, and real estate services. Also included are imputed bank service charges, import duties, and any statistical discrepancies noted by national compilers as well as discrepancies arising from rescaling. 2.18.2.258 Tax revenue (percent of GDP) (wdi_taxrev)

Long tag: qog_std_ts_wdi_taxrev

Original tag: wdi_taxrev

Description:

Tax revenue refers to compulsory transfers to the central government for public purposes. Certain compulsory transfers such as fines, penalties, and most social security contributions are excluded. Refunds and corrections of erroneously collected tax revenue are treated as negative revenue.

Note: The value for San Marino for 1995 was extremely high (44326) and has been recoded to missing.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.2.259 Trade (percent of GDP) (wdi_trade)

Long tag: qog_std_ts_wdi_trade

Original tag: wdi_trade

Description:

Trade is the sum of exports and imports of goods and services measured as a share of gross domestic product.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.2.260 Trade in services (percent of GDP) (wdi_tradeserv)

Long tag: qog_std_ts_wdi_tradeserv

Original tag: wdi_tradeserv

Description:

Trade in services is the sum of service exports and imports divided by the value of GDP, all in current U.S. dollars.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.3 Judicial

This category includes judicial indicators, generally covering legal rights granted by a state to its citizens and their compliance, as well as measures of crimes and the overall state of the judicial system.

2.18.3.1 Accountability sub-index (aii_acc)

Long tag: qog_std_ts_aii_acc

Original tag: aii_acc

Description:

Accountability. This sub index from 0 to 100 is composed of:

1. In law, the independence of the judiciary is guaranteed.
2. In practice, the independence of the judiciary is guaranteed.
3. In practice, national-level judges appointments (justices or magistrates) support the independence of the judiciary.
4. In practice, national-level judges give reasons for their decisions/judgments.
5. In law, there is a supreme audit institution.
6. In law, the independence of the supreme audit institution is guaranteed.
7. In practice, the independence of the supreme audit institution is guaranteed.
8. In practice, appointments to the supreme audit institution support the independence of the agency.
9. In practice, the supreme audit agency releases frequent reports that are accessible to citizens.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.18.3.2 Access to Information and Openness sub-index (aii_aio)

Long tag: qog_std_ts_aii_aio

Original tag: aii_aio

Description:

Access to Information and Openness. This sub index from 0 to 100 is composed of:

10. In law, corruption is criminalized as a specific offense.
11. In law, there is an independent body/bodies mandated to receive and investigate cases of alleged public sector corruption.
12. In practice, allegations of corruption against senior level politicians and/or civil servants of any level are investigated by an independent body.
13. In practice, the body/bodies that investigate/s allegations of public sector corruption is/are effective.
14. In practice, appointments to the body/bodies that investigate/s allegations of public sector corruption support/s the independence of the body.
15. In law, the head of state and government can be investigated and prosecuted while in office if evidence suggests they committed a crime.
16. In practice, heads of state and government are investigated and prosecuted while in office if evidence suggest they committed a crime.
17. In law, there is a mechanism for citizens to report police misconduct or abuse of force.
18. In practice, the mechanism for citizens to report police misconduct or abuse of force is effective.

2.18.3.3 Law: the independence of the judiciary is guaranteed (aii_q01)

Long tag: qog_std_ts_aii_q01

Original tag: aii_q01

Description:

Sub-score (0-100). Question no. 1. In law, the independence of the judiciary is guaranteed.

A 100 score is earned where all the following conditions are met:
1) the law establishes that the judiciary is independent from the executive and legislative branches, and
2) the law establishes the judiciary's right, authority or mandate to review laws, issue judicial decisions, and choose the cases heard by courts.

A 0 score is earned where no such law exists, or a law exists but it does not include ALL of the elements described in 100.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.18.3.4 Practice: the independence of the judiciary is guaranteed (aii_q02)

Long tag: qog_std_ts_aii_q02

Original tag: aii_q02

Description:

Sub-score (0-100). Question no. 2. In practice, the independence of the judiciary is guaranteed.

A 100 score is earned where all the following conditions are met:
1) judges have autonomy to interpret and review existing laws, legislation and policy, and
2) judges operate without fear or favor, independent from other branches of government.

A 50 score is earned where any of the following conditions apply:
1) judges' autonomy to interpret and review existing laws is occasionally restricted, or
2) judges are occasionally subject to negative or positive political incentives (for example, judges are demoted/promoted or relocated to worse/better offices in retaliation/reward for making certain decisions).

A 0 score is earned where at least one of the following conditions apply:
1) judges rarely have autonomy to interpret and review existing laws, legislation and policy, or
2) judges are routinely subject to negative or positive political incentives (for example, judges are frequently demoted/promoted or relocated to worse/better offices in retaliation/reward for making certain decisions).

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.18.3.5 Practice: national-level judges support the independence of judiciary (aii_q03)

Long tag: qog_std_ts_aii_q03

Original tag: aii_q03

Description:

Sub-score (0-100). Question no. 3. In practice, national-level judges appointments (justices or magistrates) support the independence of the judiciary.

A 100 score is earned where all the following conditions are met:
1) national-level judges are chosen through a merit-based selection system,
2) they have security of tenure, and
3) they are disciplined/removed/transferred only through due process by a peer panel/independent oversight body.

A 50 score is earned where any of the following conditions apply:
1) national-level judges are occasionally appointed without following a merit-based selection system,
2) some judges are denied security of tenure, or
3) occasionally judges are disciplined/removed/transferred without due process or the peer panel/independent oversight body occasionally includes representatives of the executive or legislative branches.

A 0 score is earned where at least one of the following conditions apply:
1) there's a merit-based selection system but it fails to require basic skills (ex. legal education, litigation experience, etc.) or is so weak that individuals with less merit are usually appointed over those with more merit,
2) there is no security of tenure, or
3) the due process usually involves the Executive or Legislative branches.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.18.3.6 Practice: national-level judges give reasons for their decisions (aii_q04)

Long tag: qog_std_ts_aii_q04

Original tag: aii_q04

Description:

Sub-score (0-100). Question no. 4. In practice, national-level judges give reasons for their decisions/judgments.

A 100 score is earned where all the following conditions are met:

1) judges routinely provide formal reasoning for their rulings,
2) their reasoning references the laws/jurisprudence they considered and the specific interpretation they gave them in relation to the case, and
3) their reasoning is public (for this indicator, national security exceptions are allowed).

A 50 score is earned where any of the following conditions apply:
1) judges occasionally fail to provide formal reasoning for their decisions,
2) the reasoning occasionally lacks references to the laws/jurisprudence considered or the respective judges' interpretations, or
3) it takes more than two weeks for citizens to obtain the reasoning after requested.

A 0 score is earned where at least one of the following conditions apply:
1) judges rarely provide formal reasoning for their rulings, or
2) their reasoning rarely references the laws/jurisprudence they considered and/or the specific interpretations they gave them in relation to the case, or
3) the reasoning is not public.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.18.3.7 Law: there is a supreme audit institution (aii_q05)

Long tag: qog_std_ts_aii_q05

Original tag: aii_q05

Description:
Sub-score (0-100). Question no. 5. In law, there is a supreme audit institution.

A 100 score is earned where the law mandates the creation of a supreme audit institution or office of the Auditor General, tasked with auditing the government accounts.
A 0 score is earned where no such law exists.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.18.3.8 Law: the independence of supreme audit institution is guaranteed (aii_q06)

Long tag: qog_std_ts_aii_q06

Original tag: aii_q06

Description:
Sub-score (0-100). Question no. 6. In law, the independence of the supreme audit institution is guaranteed.

A 100 score is earned where all the following conditions are met:
1) the law establishes that the audit institution is independent from the executive and legislative branches,
2) the institution has the right, authority or mandate to audit any government account, issue recommendations and resolutions, and refer cases to the prosecutor's office, and
3) the institution has a consistent source of funding to operate.

A 0 score is earned where no such law exists, or a law exists but it doesn't establish ALL of the conditions described in 100.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.18.3.9 Practice: the independence of supreme audit institution is guaranteed (aii_q07)

Long tag: qog_std_ts_aii_q07

Original tag: aii_q07

Description:
Sub-score (0-100). Question no. 7. In practice, the independence of the supreme audit institution is guaranteed.

A 100 score is earned where all the following conditions are met:
1) auditors have autonomy to audit accounts,
2) auditors operate without fear or favor, independent from other offices of government, and
3) they have a predictable source of funding that is consistent from year to year.

A 50 score is earned where any of the following conditions apply:
1) auditors usually have autonomy to audit any account but exceptions exist,
2) auditors are occasionally subject to negative or positive political incentives (for example, auditors are demoted/promoted or relocated to worse/better offices in retaliation/reward for not auditing/not auditing or issuing favorable/unfavorable resolutions), or
3) funding is occasionally inconsistent.

A 0 score is earned where at least one of the following conditions apply:

1) auditors rarely have autonomy to audit accounts,
2) they routinely operate with fear or favor, dependent of other offices of government, or
3) the source of funding is usually inconsistent from year to year.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.18.3.10 Law: there are indep. bodies to investigate cases of pubsec. corruption (aii_q11)

Long tag: qog_std_ts_aii_q11

Original tag: aii_q11

Description:

Sub-score (0-100). Question no. 11. In law, there is an independent body/bodies mandated to receive and investigate cases of alleged public sector corruption.

A 100 score is earned where all of the following conditions are met:
1) a law mandates a specific body to receive and investigate citizens' allegations of public sector corruption, and
2) a law establishes that the body is independent from the Executive and Legislative branches.

A 0 score is earned where no such law exists, or a law exists but it doesn't meet the two conditions described in 100.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.18.3.11 Practice: corruption allegations are investigated by independent body (aii_q12)

Long tag: qog_std_ts_aii_q12

Original tag: aii_q12

Description:

Sub-score (0-100). Question no. 12. In practice, allegations of corruption against senior level politicians and/or civil servants of any level are investigated by an independent body.

A 100 score is earned where all the following conditions are met:
1) allegations against senior level politicians and/or civil servants of any level are investigated, and
2) the members of the body mandated to investigate the allegations work without fear or favor from other offices.

A 50 score is earned where any of the following conditions apply:
1) not all allegations against senior level politicians and/or civil servants of any level are investigated, or
2) the members of the body mandated to investigate the allegations are occasionally subjected to positive/negative incentives to rule in favor/against a senior level politician and/or civil servant.

A 0 score is earned where at least one of the following conditions apply:
1) allegations against senior level politicians and/or civil servants of any level are rarely or never investigated, or
2) the members of the body mandated to investigate the allegations routinely receive positive/negative incentives to rule in favor/against a senior level politician and/or civil servant.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.18.3.12 Practice: bodies investigating pubsector corruption allegations are effective (aii_q13)

Long tag: qog_std_ts_aii_q13

Original tag: aii_q13

Description:

Sub-score (0-100). Question no. 13. In practice, the body/bodies that investigate/s allegations of public sector corruption is/are effective.

A 100 score is earned where all the following conditions are met:
1) the body has a functioning system in place to receive citizens' allegations of public sector corruption,
2) it investigates most of the allegations within three months of being reported, and
3) it exercises its own initiative to start investigations when/if needed.

A 50 score is earned where any of the following conditions apply:
1) the system to receive citizens' allegations may not work for several days at a time,
2) not all cases reported are investigated or investigations take more than three months to start, or
3) the body rarely or never starts investigations out of its own initiative.

A 0 score is earned where at least one of the following conditions apply:
1) there's no system to receive citizens' allegations, or
2) cases reported are rarely or never investigated.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.18.3.13 Law: head of state and gov. can be investigated and prosecuted while in office (aii_q15)

Long tag: qog_std_ts_aii_q15

Original tag: aii_q15

Description:

Sub-score (0-100). Question no. 15. In law, the head of state and government can be investigated and prosecuted while in office if evidence suggests they committed a crime.

A 100 score is earned where the law doesn't protect the heads of state and government from being investigated and prosecuted while in office if evidence suggests they committed a crime.
A 0 score is earned where a law protects/gives immunity to the heads of state and government from being investigated and prosecuted while in office if evidence suggests they committed a crime.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.18.3.14 Practice: head of state and gov. can be investigated and prosecuted while in off (aii_q16)

Long tag: qog_std_ts_aii_q16

Original tag: aii_q16

Description:

Sub-score (0-100). Question no. 16. In practice, heads of state and government are investigated and prosecuted while in office if evidence suggest they committed a crime.

A 100 score is earned where all the following conditions are met:
1) criminal allegations against heads of state and government are investigated while they are in office,
2) heads of state and government are prosecuted when investigations find evidence of possible wrongdoing, and
3) legal punishment is imposed if/when they are found guilty.

A 50 score is earned where any of the following conditions apply:
1) not all allegations are investigated while they are in office,
2) not all investigations that find evidence of criminal activity result in prosecution, or
3) not all guilty verdicts result in legal punishment.

A 0 score is earned where at least one of the following conditions apply:
1) allegations against heads of state and government are rarely investigated while they are in office,
2) criminal evidence rarely results in prosecution, or
3) guilty verdicts rarely result in legal punishment.
A 0 also applies if the heads of state and government have immunity, therefore making it impossible in practice to investigate, prosecute or punish them.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.18.3.15 Law: there are mechanisms for citizens to report police force misconduct/abuse (aii_q17)

Long tag: qog_std_ts_aii_q17

Original tag: aii_q17

Description:

Sub-score (0-100). Question no. 17. In law, there is a mechanism for citizens to report police misconduct or abuse of force.

A 100 score is earned where a law establishes the existence of an oversight body/entity specifically mandated to investigate police misconduct or abuse of force.

A 0 score is earned when no such law exists.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.18.3.16 Practice: mechanisms for citizens to report police misconduct/abuse are effect. (aii_q18)

Long tag: qog_std_ts_aii_q18

Original tag: aii_q18

Description:
Sub-score (0-100). Question no. 18. In practice, the mechanism for citizens to report police misconduct or abuse of force is effective.

A 100 score is earned where all the following conditions are met:
1) the body has a functioning system in place to receive citizens' allegations of police misconduct or abuse of force,
2) it investigates most of the allegations within one week of being reported, and
3) it exercises its own initiative to start investigations when/if needed.

A 50 score is earned where any of the following conditions apply:
1) the system to receive citizens' allegations may not work for several days at a time,
2) not all cases reported are investigated or investigations take more than one week to start, or
3) none or only a minority of the investigations are self-started by the body.

A 0 score is earned where at least one of the following conditions are met:
1) there's no system to receive citizens' allegations, or
2) cases reported are rarely investigated.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.18.3.17 Law: independence of agencies that organize and monitor elections is guaranteed (aii_q19)

Long tag: qog_std_ts_aii_q19

Original tag: aii_q19

Description:
Sub-score (0-100). Question no. 19. In law, the independence of the agency/agencies mandated to organize and monitor national elections is guaranteed.

A 100 score is earned where all the following conditions are met:
1) the law establishes that the agency/agencies mandated to organize and monitor national elections is independent from the Executive, Legislative and Judicial branches, and
2) it establishes its right, authority or mandate to review elections, issue binding decisions, and choose the cases to be heard by the agency/agencies.

A 0 score is earned where no such law exists, or a law exists but it doesn't include all the conditions described in 100.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.18.3.18 Law: companies guilty of procurement violations can't participate in future bid (aii_q27)

Long tag: qog_std_ts_aii_q27

Original tag: aii_q27

Description:
Sub-score (0-100). Question no. 27. In law, companies found guilty of violations of procurement regulations are prohibited from participating in future bids.

A 100 score is earned where the law forbids companies found guilty of violating the law (procurement, tax, labor, corruption, etc.) from participating in future bidding in the country, whether indefinitely or for a limited period of time.

A 0 score is earned where no such law exists.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.18.3.19 Practice: companies guilty of violations cannot participate in future bids (aii_q28)

Long tag: qog_std_ts_aii_q28

Original tag: aii_q28

Description:
Sub-score (0-100). Question no. 28. In practice, companies found guilty of violating procurement regulations are prohibited from participating in future bids

A 100 score is earned where all the following conditions are met:
1) companies found guilty of violating the law (procurement, tax, labor, corruption, etc.) are forbidden from participating in future bidding in the country, whether indefinitely or for a limited period of time, and
2) there is a registry of companies forbidden from bidding that citizens can access immediately or in less than two weeks upon request. A 100 is also earned if there is a registry in place that at the time of this research is

empty because no company has violated the law.

A 50 score is earned where any of the following conditions apply:
1) companies found guilty of violating the law (procurement, tax, labor, corruption, etc.) are generally forbidden from participating in future bidding, but there is evidence that some exceptions exist, or
2) citizen access to the full list of companies forbidden from participating takes more than two weeks.

A 0 score is earned where at least one of the following conditions apply:
1) companies found guilty of violating the law (procurement, tax, labor, corruption, etc.) are rarely forbidden from participating in future bidding, or
2) there is no registry of companies forbidden from participating or it exists but it's not public.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.18.3.20 Law: civil servants who report corruption cases are protected (aii_q36)

Long tag: qog_std_ts_aii_q36

Original tag: aii_q36

Description:

Sub-score (0-100). Question no. 36. In law, civil servants who report cases of corruption are protected from recrimination or other negative consequences.

A 100 score is earned where all the following conditions are met:
1) there is a law specifically created to protect public sector whistle-blowers, and
2) the law forbids termination, transfer, harassment or other negative consequences against whistle-blowers. Note: General protections for civil servants do not grant a 100.

A 0 score is earned if no such law exists.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.18.3.21 Law: senior officials of government are required to disclose records of assets (aii_q44)

Long tag: qog_std_ts_aii_q44

Original tag: aii_q44

Description:

Sub-score (0-100). Question no. 44. In law, senior officials of the three branches of government (including heads of state and government, ministers, members of Parliament, judges, etc.) are required to disclose records of their assets and disclosures are public.

A 100 score is earned where in law all the following conditions are met:
1) senior officials of the three branches of government (including heads of state and government, ministers, members of Parliament, judges, etc.) must file asset disclosures,
2) disclosures must contain all assets and income belonging to them and their immediate family (including real estate, movable property, cash, salaries, and income from investments), and
3) disclosures must be available to the public.

A 0 score is earned where at least one of the following conditions apply:
1) no such law exists or it exists but it doesn't apply to all senior officials of the three branches of government,
2) the law requires so little information as to render the disclosures useless (e.g. it doesn't require disclosing assets of the immediate family, or requires citing real estate but not movable property, cash, salaries, and income from investments), or
3) the law doesn't make the disclosures public.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.18.3.22 Law: civil service members are required to disclose assets and these are public (aii_q46)

Long tag: qog_std_ts_aii_q46

Original tag: aii_q46

Description:

Sub-score (0-100). Question no. 46. In law, members of the civil service are required to disclose records of their assets and the disclosures are public.

A 100 score is earned when in law all the following conditions are met:
1) members of the civil service must file asset disclosures,
2) disclosures must contain all assets and income belonging to them and their immediate family (including real estate, movable property, cash, salaries, and income from investments, both domestic and foreign), and
3) disclosures must be available to the public.

A 0 score is earned where at least one of the following conditions apply:
1) no such law exists or it exists but it doesn't apply to all members of the civil service,
2) the law requires so little information as to render the disclosures useless (e.g. it doesn't require disclosing assets of the immediate family, or requires citing real estate but not movable property, cash, salaries, and income from investments), or
3) the law doesn't make the disclosures public.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.18.3.23 Rule of law sub-index (aii_rol)

Long tag: qog_std_ts_aii_rol

Original tag: aii_rol

Description:
Rule of Law. This sub index from 0 to 100 is composed of:

41. In law, citizens have a right to request public information from state bodies.
42. In practice, citizen requests for public information are effective.
43. In practice, citizens can access legislative processes and documents.
44. In law, senior officials of the three branches of government (including heads of state and government, ministers, members of Parliament, judges, etc.) are required to disclose records of their assets and disclosures are public.
45. In practice, the asset disclosure process for senior officials of the three branches of government (heads of state and government, ministers, members of Parliament, judges, etc.) is effective.
46. In law, members of the civil service are required to disclose records of their assets and the disclosures are public.
47. In practice, the asset disclosure process for members of the civil service is effective.
48. In law, political parties are required to regularly disclose public donations (funds sourced from the government).
49. In practice, political parties regularly disclose public donations (funds that are sourced from the government) and the disclosures are easily available to the public.
50. In law, political parties are required to regularly disclose private donations.
51. In practice, political parties regularly disclose private donations and the disclosures are easily available to the public.
52. In practice, media organizations (print, broadcast, online) disclose the identities of their owners to the public.
53. In practice, journalists and editors adhere to strict, professional practices in their reporting.
54. In law, it is legal to report accurate news even if it damages the reputation of a public figure.
55. In practice, there is no prior government restraint (pre-publication censoring) and the government doesn't promote the media's self-censorship.
56. In practice, there is no prior government restraint (pre-publication censoring) of citizen-created content online and the government doesn't promote the self-censorship of citizens online (in blogs, social media, etc.).
57. In practice, the government does not block (or require ICT firms to block) online content.
58. In practice, ministries and autonomous agencies have websites.
59. In practice, the public services regulatory agencies and the national ombudsman (when and if there is one) have websites.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.18.3.24 Civil Rights (bti_cr)

Long tag: qog_std_ts_bti_cr

Original tag: bti_cr

Description:
To what extent are civil rights guaranteed and protected, and to what extent can citizens seek redress for violations of these rights? 1-10.

1. Civil rights are not guaranteed and frequently violated. There are no mechanisms and institutions to protect citizens against violations of their rights.
4. Civil rights are guaranteed only within limited enclaves or are violated over protracted periods of time. Some mechanisms and institutions to prosecute, punish and redress violations of civil rights are established formally, but do not function.
7. Civil rights are guaranteed, but are partially or temporarily violated or are not protected in some parts of the country. Mechanisms and institutions to prosecute, punish and redress violations of civil rights are in place, but often prove to be ineffective.
10. Civil rights are guaranteed by the constitution and respected by all state institutions. Infringements present an extreme exception. Citizens are effectively protected by mechanisms and institutions established to prosecute, punish and redress violations of their rights.

Variable citation: Donner, S., Hartmann, H., & Schwarz, R. (2020). *Transformation index of the bertelsmann stiftung 2020*. Bertelsmann Stiftung. `http://www.bti-project.org`

2.18.3.25 Freedom of Expression (bti_foe)

Long tag: qog_std_ts_bti_foe

Original tag: bti_foe

Description:

To what extent can citizens, organizations and the mass media express opinions freely? 1-10.

1. Freedom of expression is denied. Independent media do not exist or are prohibited.
4. Freedom of expression is often subject to interference or government restrictions. Distortion and manipulation shape matters of public debate.
7. Freedom of expression is occasionally subject to interference or government restrictions, but there are generally no incidents of blatant intrusions like outright state censorship or media shutdowns.
10. Freedom of expression is guaranteed against interference or government restrictions. Individuals, groups and the press can fully exercise these rights.

Variable citation: Donner, S., Hartmann, H., & Schwarz, R. (2020). *Transformation index of the bertelsmann stiftung 2020*. Bertelsmann Stiftung. `http://www.bti-project.org`

2.18.3.26 Independent Judiciary (bti_ij)

Long tag: qog_std_ts_bti_ij

Original tag: bti_ij

Description:

To what extent does an independent judiciary exist? 1-10.

1. The judiciary is not independent and not institutionally differentiated.
4. The independence of the judiciary is heavily impaired by political authorities and high levels of corruption. It is to some extent institutionally differentiated, but severely restricted by functional deficits, insufficient territorial operability and scarce resources.
7. The judiciary is largely independent, even though occasionally its decisions are subordinated to political authorities or influenced by corruption. It is institutionally differentiated, but partially restricted by insufficient territorial or functional operability.
10. The judiciary is independent and free both from unconstitutional intervention by other institutions and from corruption. It is institutionally differentiated, and there are mechanisms for judicial review of legislative or executive acts.

Variable citation: Donner, S., Hartmann, H., & Schwarz, R. (2020). *Transformation index of the bertelsmann stiftung 2020*. Bertelsmann Stiftung. `http://www.bti-project.org`

2.18.3.27 Prosecution of Office Abuse (bti_poa)

Long tag: qog_std_ts_bti_poa

Original tag: bti_poa

Description:

To what extent are public officeholders who abuse their positions prosecuted or penalized? 1-10.

1. Office holders who break the law and engage in corruption can do so without fear of legal consequences or adverse publicity.
4. Office holders who break the law and engage in corruption are not prosecuted adequately under the law, but occasionally attract adverse publicity.
7. Officeholders who break the law and engage in corruption generally are prosecuted under established laws and often attract adverse publicity, but occasionally slip through political, legal or procedural loopholes.
10. Officeholders who break the law and engage in corruption are prosecuted rigorously under established laws and always attract adverse publicity.

Variable citation: Donner, S., Hartmann, H., & Schwarz, R. (2020). *Transformation index of the bertelsmann stiftung 2020*. Bertelsmann Stiftung. `http://www.bti-project.org`

2.18.3.28 Duty of the People is to Build Country in Constitution (ccp_buildsoc)

Long tag: qog_std_ts_ccp_buildsoc

Original tag: ccp_buildsoc

Description:

Does the constitution refer to a duty of the people to take part in building society or to work for the development of the country?

1. Yes
2. No
96. Other

Variable citation: Elkins, Z., & Ginsburg, T. (2021). Characteristics of national constitutions, version 3.0 [Last modified: May 20, 2021. Available at comparativeconstitutionsproject.org].

http://www.comparativeconstitutionsproject.org

2.18.3.29 Corruption Commission Present in Constitution (ccp_cc)

Long tag: qog_std_ts_ccp_cc

Original tag: ccp_cc

Description:

Does the constitution contain provisions for a counter corruption commission?

1. Yes
2. No
96. Other
97. Unable to determine

Variable citation: Elkins, Z., & Ginsburg, T. (2021). Characteristics of national constitutions, version 3.0 [Last modified: May 20, 2021. Available at comparativeconstitutionsproject.org]. http://www.comparativeconstitutionsproject.org

2.18.3.30 Limits on Child Work in Constitution (ccp_childwrk)

Long tag: qog_std_ts_ccp_childwrk

Original tag: ccp_childwrk

Description:

Does the constitution place limits on child employment?

1. Yes
2. No
90. Left explicitly to non-constitutional law
96. Other

2.18.3.31 Meritocratic Recruitment of Civil Servants Mentioned in Constitution (ccp_civil)

Long tag: qog_std_ts_ccp_civil

Original tag: ccp_civil

Description:

Does the constitution include provisions for the meritocratic recruitment of civil servants (e.g. exams or credential requirements)?

1. Yes
2. No
96. Other

Variable citation: Elkins, Z., & Ginsburg, T. (2021). Characteristics of national constitutions, version 3.0 [Last modified: May 20, 2021. Available at comparativeconstitutionsproject.org]. http://www.comparativeconstitutionsproject.org

2.18.3.32 Equality Before the Law Mentioned in Constitution (ccp_equal)

Long tag: qog_std_ts_ccp_equal

Original tag: ccp_equal

Description:

Does the constitution refer to equality before the law, the equal rights of men, or non-discrimination?

1. Yes
2. No
96. Other

Variable citation: Elkins, Z., & Ginsburg, T. (2021). Characteristics of national constitutions, version 3.0 [Last modified: May 20, 2021. Available at comparativeconstitutionsproject.org]. http://www.comparativeconstitutionsproject.org

2.18.3.33 Freedom of Religion in Constitution (ccp_freerel)

Long tag: qog_std_ts_ccp_freerel

Original tag: ccp_freerel

Description:
Does the constitution provide for freedom of religion?

1. Yes
2. No
96. Other

Variable citation: Elkins, Z., & Ginsburg, T. (2021). Characteristics of national constitutions, version 3.0 [Last modified: May 20, 2021. Available at comparativeconstitutionsproject.org]. `http://www.comparativeconstitutionsproject.org`

2.18.3.34 Human Rights Commission Present in Constitution (ccp_hr)

Long tag: qog_std_ts_ccp_hr

Original tag: ccp_hr

Description:
Does the constitution contain provisions for a human rights commission?

1. Yes
2. No
96. Other

Variable citation: Elkins, Z., & Ginsburg, T. (2021). Characteristics of national constitutions, version 3.0 [Last modified: May 20, 2021. Available at comparativeconstitutionsproject.org]. `http://www.comparativeconstitutionsproject.org`

2.18.3.35 Right to Government Documents in Constitution (ccp_infoacc)

Long tag: qog_std_ts_ccp_infoacc

Original tag: ccp_infoacc

Description:
Does the constitution provide for an individual right to view government files or documents under at least some conditions?

1. Yes
2. No
96. Other

Variable citation: Elkins, Z., & Ginsburg, T. (2021). Characteristics of national constitutions, version 3.0 [Last modified: May 20, 2021. Available at comparativeconstitutionsproject.org]. `http://www.comparativeconstitutionsproject.org`

2.18.3.36 Reference in Constitution to Capitalism (ccp_market)

Long tag: qog_std_ts_ccp_market

Original tag: ccp_market

Description:
Does the constitution refer to the “free market,” “capitalism,” or an analogous term?

1. Yes
2. No
96. Other

Variable citation: Elkins, Z., & Ginsburg, T. (2021). Characteristics of national constitutions, version 3.0 [Last modified: May 20, 2021. Available at comparativeconstitutionsproject.org]. `http://www.comparativeconstitutionsproject.org`

2.18.3.37 Status of Slavery in Constitution (ccp_slave)

Long tag: qog_std_ts_ccp_slave

Original tag: ccp_slave

Description:
Does the constitution prohibit slavery, servitude, or forced labor?

1. Universally prohibited
2. Prohibited except in the case of war
3. Prohibited with other exception(s)n
90. Left explicitly to non-constitutional law
96. Other
98. Not specified

Variable citation: Elkins, Z., & Ginsburg, T. (2021). Characteristics of national constitutions, version 3.0 [Last modified: May 20, 2021. Available at comparativeconstitutionsproject.org]. http://www.comparativeconstitutionsproject.org

2.18.3.38 Right to Strike in Constitution (ccp_strike)

Long tag: qog_std_ts_ccp_strike

Original tag: ccp_strike

Description:

Does the constitution provide for a right to strike?

1. Yes
2. Yes, but with limitations
3. No
96. Other

Variable citation: Elkins, Z., & Ginsburg, T. (2021). Characteristics of national constitutions, version 3.0 [Last modified: May 20, 2021. Available at comparativeconstitutionsproject.org]. http://www.comparativeconstitutionsproject.org

2.18.3.39 New Constitutional System (ccp_syst)

Long tag: qog_std_ts_ccp_syst

Original tag: ccp_syst

Description:

Identifies new constitutional systems.

Variable citation: Elkins, Z., & Ginsburg, T. (2021). Characteristics of national constitutions, version 3.0 [Last modified: May 20, 2021. Available at comparativeconstitutionsproject.org]. http://www.comparativeconstitutionsproject.org

2.18.3.40 Year in which the Constitutional System was Promulgated (ccp_systyear)

Long tag: qog_std_ts_ccp_systyear

Original tag: ccp_systyear

Description:

Year in which the constitutional system was promulgated.

Variable citation: Elkins, Z., & Ginsburg, T. (2021). Characteristics of national constitutions, version 3.0 [Last modified: May 20, 2021. Available at comparativeconstitutionsproject.org]. http://www.comparativeconstitutionsproject.org

2.18.3.41 Duty of People is to Pay Taxes in Constitution (ccp_taxes)

Long tag: qog_std_ts_ccp_taxes

Original tag: ccp_taxes

Description:

Does the constitution refer to a duty to pay taxes?

1. Yes
2. No
96. Other

Variable citation: Elkins, Z., & Ginsburg, T. (2021). Characteristics of national constitutions, version 3.0 [Last modified: May 20, 2021. Available at comparativeconstitutionsproject.org]. http://www.comparativeconstitutionsproject.org

2.18.3.42 Disappearance (ciri_disap)

Long tag: qog_std_ts_ciri_disap

Original tag: ciri_disap

Description:

Disappearances are cases in which people have disappeared, political motivation appears likely, and the victims have not been found. Knowledge of the whereabouts of the disappeared is, by definition, not public knowledge. However, while there is typically no way of knowing where victims are, it is typically known by whom they were taken and under what circumstances. A score of 0 indicates that disappearances have occurred frequently in a given year; a score of 1 indicates that disappearances occasionally occurred; and a score of 2 indicates that disappearances did not occur in a given year.

2.18.3.43 Freedom of Domestic Movement (ciri_dommov)

Long tag: qog_std_ts_ciri_dommov

Original tag: ciri_dommov

Description:

This variable indicates citizens' freedom to travel within their own country. A score of 0 indicates that this freedom was severely restricted; a score of 1 indicates the freedom was somewhat restricted, and a score of 2 indicates unrestricted freedom of foreign movement.

Variable citation: Cingranelli, D. L., Filippov, M., & Mark, S. (2019). 2.18.3.44 Empowerment Index (ciri_empinx)

Long tag: qog_std_ts_ciri_empinx

Original tag: ciri_empinx

Description:

This is an additive index constructed from the Foreign Movement, Domestic Movement, Freedom of Speech, Freedom of Assembly and Association, Workers' Rights, Electoral Self-Determination, and Freedom of Religion indicators. It ranges from 0 (no government respect for these seven rights) to 14 (full government respect for these seven rights).

Variable citation: Cingranelli, D. L., Filippov, M., & Mark, S. (2019). The CIRIGHTS dataset [Version 2019.07.21]. *The Binghamton University Human Right Institute*. `www.binghamton.edu/institutes/hri` Cingranelli, D. L., Richards, D. L., & Clay, K. C. (2014). The CIRI Human Rights Dataset [Version 2014.04.14]. *CIRI Human Rights Data Project*, 6

2.18.3.45 Freedom of Foreign Movement (ciri_formov)

Long tag: qog_std_ts_ciri_formov

Original tag: ciri_formov

Description:

This variable indicates citizens' freedom to leave and return to their country. A score of 0 indicates that this freedom was severely restricted, a score of 1 indicates the freedom was somewhat restricted, and a score of 2 indicates unrestricted freedom of foreign movement.

Variable citation: Cingranelli, D. L., Filippov, M., & Mark, S. (2019). The CIRIGHTS dataset [Version 2019.07.21]. *The Binghamton University Human Right Institute*. `www.binghamton.edu/institutes/hri` Cingranelli, D. L., Richards, D. L., & Clay, K. C. (2014). The CIRI Human Rights Dataset [Version 2014.04.14]. *CIRI Human Rights Data Project*, 6

2.18.3.46 Independence of the Judiciary (ciri_injud)

Long tag: qog_std_ts_ciri_injud

Original tag: ciri_injud

Description:

This variable indicates the extent to which the judiciary is independent of control from other sources, such as another branch of the government or the military. A score of 0 indicates "not independent", a score of 1 indicates "partially independent" and a score of 2 indicates "generally independent".

Variable citation: Cingranelli, D. L., Filippov, M., & Mark, S. (2019). The CIRIGHTS dataset [Version 2019.07.21]. *The Binghamton University Human Right Institute*. `www.binghamton.edu/institutes/hri` Cingranelli, D. L., Richards, D. L., & Clay, K. C. (2014). The CIRI Human Rights Dataset [Version 2014.04.14]. *CIRI Human Rights Data Project*, 6

2.18.3.47 Extrajudicial Killing (ciri_kill)

Long tag: qog_std_ts_ciri_kill

Original tag: ciri_kill

Description:

Extrajudicial killings are killings by government officials without due process of law. They include murders by private groups if instigated by government. These killings may result from the deliberate, illegal, and excessive use of lethal force by the police, security forces, or other agents of the state whether against criminal suspects, detainees, prisoners, or others. A score of 0 indicates that extrajudicial killings were practiced frequently in a given year; a score of 1 indicates that extrajudicial killings were practiced occasionally; and a

score of 2 indicates that such killings did not occur in a given year.

Variable citation: Cingranelli, D. L., Filippov, M., & Mark, S. (2019). The CIRIGHTS dataset [Version 2019.07.21]. *The Binghamton University Human Right Institute*. `www.binghamton.edu/institutes/hri` Cingranelli, D. L., Richards, D. L., & Clay, K. C. (2014). The CIRI Human Rights Dataset [Version 2014.04.14]. *CIRI Human Rights Data Project*, 6

2.18.3.48 Physical Integrity Rights (ciri_physint)

Long tag: qog_std_ts_ciri_physint

Original tag: ciri_physint

Description:

This is an additive index constructed from the Torture, Extrajudicial Killing, Political Imprisonment, and Disappearance indicators. It ranges from 0 (no government respect for these four rights) to 8 (full government respect for these four rights).

Variable citation: Cingranelli, D. L., Filippov, M., & Mark, S. (2019). The CIRIGHTS dataset [Version 2019.07.21]. *The Binghamton University Human Right Institute*. `www.binghamton.edu/institutes/hri` Cingranelli, D. L., Richards, D. L., & Clay, K. C. (2014). The CIRI Human Rights Dataset [Version 2014.04.14]. *CIRI Human Rights Data Project*, 6

2.18.3.49 Political Imprisonment (ciri_polpris)

Long tag: qog_std_ts_ciri_polpris

Original tag: ciri_polpris

Description:

Political imprisonment refers to the incarceration of people by government officials because of: their speech; their non-violent opposition to government policies or leaders; their religious beliefs; their non-violent religious practices including proselytizing; or their membership in a group, including an ethnic or racial group. A score of 0 indicates that there were many people imprisoned because of their religious, political, or other beliefs in a given year; a score of 1indicates that a few people were imprisoned; and a score of 2 indicates that no persons were imprisoned for any of the above reasons in a given year.

Variable citation: Cingranelli, D. L., Filippov, M., & Mark, S. (2019). The CIRIGHTS dataset [Version 2019.07.21]. *The Binghamton University Human Right Institute*. `www.binghamton.edu/institutes/hri` Cingranelli, D. L., Richards, D. L., & Clay, K. C. (2014). The CIRI Human Rights Dataset [Version 2014.04.14]. *CIRI Human Rights Data Project*, 6

2.18.3.50 New Freedom of Religion (ciri_relfre)

Long tag: qog_std_ts_ciri_relfre

Original tag: ciri_relfre

Description:

This variable indicates the extent to which the freedom of citizens to exercise and practice the irreligious beliefs is subject to actual government restrictions. Citizens should be able to freely practice their religion and proselytize (attempt to convert) other citizens to their religion as long as such attempts are done in a non-coercive, peaceful manner. A score of 0 indicates that government restrictions on religious practices are severe and widespread. A score of 1 indicates such practices are moderate, and a 0 indicates such practices are practically absent.

Variable citation: Cingranelli, D. L., Filippov, M., & Mark, S. (2019). The CIRIGHTS dataset [Version 2019.07.21]. *The Binghamton University Human Right Institute*. `www.binghamton.edu/institutes/hri` Cingranelli, D. L., Richards, D. L., & Clay, K. C. (2014). The CIRI Human Rights Dataset [Version 2014.04.14]. *CIRI Human Rights Data Project*, 6

2.18.3.51 Freedom of Speech (ciri_speech)

Long tag: qog_std_ts_ciri_speech

Original tag: ciri_speech

Description:

This variable indicates the extent to which freedoms of speech and press are affected by government censorship, including ownership of media outlets. Censorship is any form of restriction that is placed on freedom of the press, speech or expression. Expression may be in the form of art or music. A score of 0 indicates that government censorship of the media was complete; a score of 1 indicates that there was some government censorship of the media; and a score of 2 indicates that there was no government censorship of the media in a given year.

Variable citation: Cingranelli, D. L., Filippov, M., & Mark, S. (2019). The CIRIGHTS dataset [Version 2019.07.21]. *The Binghamton University Human Right Institute*. `www.binghamton.edu/institutes/hri` Cingranelli, D. L., Richards, D. L., & Clay, K. C. (2014). The CIRI Human Rights Dataset [Version 2014.04.14]. *CIRI Human Rights Data Project*, 6

2.18.3.52 Torture (ciri_tort)

Long tag: qog_std_ts_ciri_tort

Original tag: ciri_tort

Description:

Torture refers to the purposeful inflicting of extreme pain, whether mental or physical, by government officials or by private individuals at the instigation of government officials. Torture includes the use of physical and other force by police and prison guards that is cruel, inhuman, or degrading. This also includes deaths in custody due to negligence by government officials. A score of 0 indicates that torture was practiced frequently in a given year; a score of 1 indicates that torture was practiced occasionally; and a score of 2 indicates that torture did not occur in a given year.

Variable citation: Cingranelli, D. L., Filippov, M., & Mark, S. (2019). The CIRIGHTS dataset [Version 2019.07.21]. *The Binghamton University Human Right Institute*. `www.binghamton.edu/institutes/hri` Cingranelli, D. L., Richards, D. L., & Clay, K. C. (2014). The CIRI Human Rights Dataset [Version 2014.04.14]. *CIRI Human Rights Data Project*, 6

2.18.3.53 Women's Economic Rights (ciri_wecon)

Long tag: qog_std_ts_ciri_wecon

Original tag: ciri_wecon

Description:

Women's economic rights include a number of internationally recognized rights. These rights include:

- Equal pay for equal work,
- Free choice of profession or employment without the need to obtain a husband or male relative's consent,
- The right to gainful employment without the need to obtain a husband or male relative's consent,
- Equality in hiring and promotion practices,
- Job security (maternity leave, unemployment benefits, no arbitrary firing or layoffs, etc.),
Non-discrimination by employers,
- The right to be free from sexual harassment in the workplace,
- The right to work at night,
- The right to work in occupations classified as dangerous,
- The right to work in the military and the police force.

A score of 0 indicates that there were no economic rights for women in law and that systematic discrimination based on sex may have been built into law. A score of 1 indicates that women had some economic rights under law, but these rights were not effectively enforced. A score of 2 indicates that women had some economic rights under law, and the government effectively enforced these rights in practice while still allowing a low level of discrimination against women in economic matters. Finally, a score of 3 indicates that all or nearly all of women's economic rights were guaranteed by law and the government fully and vigorously enforces these laws in practice.

Variable citation: Cingranelli, D. L., Filippov, M., & Mark, S. (2019). The CIRIGHTS dataset [Version 2019.07.21]. *The Binghamton University Human Right Institute*. `www.binghamton.edu/institutes/hri` Cingranelli, D. L., Richards, D. L., & Clay, K. C. (2014). The CIRI Human Rights Dataset [Version 2014.04.14]. *CIRI Human Rights Data Project*, 6

2.18.3.54 Women's Political Rights (ciri_wopol)

Long tag: qog_std_ts_ciri_wopol

Original tag: ciri_wopol

Description:

Women's political rights include a number of internationally recognized rights. These rights include:

- The right to vote
- The right to run for political office
- The right to hold elected and appointed government positions
- The right to join political parties
- The right to petition government officials.

A score of 0 indicates that women's political rights were not guaranteed by law during a given year. A score of 1 indicates that women's political rights were guaranteed in law, but severely prohibited in practice. A score of 2 indicates that women's political rights were guaranteed in law, but were still moderately prohibited in practice. Finally, a score of 3 indicates that women's political rights were guaranteed in both law and practice.

Variable citation: Cingranelli, D. L., Filippov, M., & Mark, S. (2019). The CIRIGHTS dataset [Version 2019.07.21]. *The Binghamton University Human Right Institute*. `www.binghamton.edu/institutes/hri` Cingranelli, D. L., Richards, D. L., & Clay, K. C. (2014). The CIRI Human Rights Dataset [Version 2014.04.14]. *CIRI Human Rights Data Project*, 6

2.18.3.55 Workers' Rights (ciri_worker)

Long tag: qog_std_ts_ciri_worker

Original tag: ciri_worker

Description:

Workers should have freedom of association at their workplaces and the right to bargain collectively with their employers. This variable indicates the extent to which workers enjoy these and other internationally recognized rights at work, including a prohibition on the use of any form of forced or compulsory labor; a minimum age for the employment of children; and acceptable conditions of work with respect to minimum wages, hours of work, and occupational safety and health. A score of 0 indicates that workers' rights were severely restricted; a score of 1 indicates that workers' rights were somewhat restricted; and a score of 2 indicates that workers' rights were fully protected during the year in question.

Variable citation: Cingranelli, D. L., Filippov, M., & Mark, S. (2019). The CIRIGHTS dataset [Version 2019.07.21]. *The Binghamton University Human Right Institute*. `www.binghamton.edu/institutes/hri` Cingranelli, D. L., Richards, D. L., & Clay, K. C. (2014). The CIRI Human Rights Dataset [Version 2014.04.14]. *CIRI Human Rights Data Project*, 6

2.18.3.56 Women's Social Rights (ciri_wosoc)

Long tag: qog_std_ts_ciri_wosoc

Original tag: ciri_wosoc

Description:

Women's social rights include a number of internationally recognized rights. These rights include:

- The right to equal inheritance
- The right to enter into marriage on a basis of equality with men
- The right to travel abroad
- The right to obtain a passport
- The right to confer citizenship to children or a husband
- The right to initiate a divorce
- The right to own, acquire, manage, and retain property brought into marriage
- The right to participate in social, cultural, and community activities
- The right to an education
- The freedom to choose a residence/domicile
- Freedom from female genital mutilation of children and of adults without their consent
- Freedom from forced sterilization.

A score of 0 indicates that there were no social rights for women in law and that systematic discrimination based on sex may have been built into law. A score of 1 indicates that women had some social rights under law, but these rights were not effectively enforced. A score of 2indicates that women had some social rights under law and the government effectively enforced these rights in practice while still allowing a low level of discrimination against women in social matters. Finally, a score of 3 indicates that all or nearly all of women's social rights were guaranteed by law and the government fully and vigorously enforced these laws in practice. This variable was retired as of 2005.

Variable citation: Cingranelli, D. L., Filippov, M., & Mark, S. (2019). The CIRIGHTS dataset [Version 2019.07.21]. *The Binghamton University Human Right Institute*. `www.binghamton.edu/institutes/hri` Cingranelli, D. L., Richards, D. L., & Clay, K. C. (2014). 2.18.3.57 Trust in Legal System (ess_trlegal)

Long tag: qog_std_ts_ess_trlegal

Original tag: ess_trlegal

Description:

Please tell me on a score of 0-10 how much you personally trust each of the institutions I read out. 0 means you do not trust an institution at all, and 10 means you have complete trust. The Legal System.

Variable citation: NSD - Norwegian Centre for Research Data. (2018). European social survey cumulative file, ess 1-8 [Data Archive and distributor of ESS data for ESS ERIC]. `http://www.europeansocialsurvey.org/`

2.18.3.58 Trust in Police (ess_trpolice)

Long tag: qog_std_ts_ess_trpolice

Original tag: ess_trpolice

Description:

Please tell me on a score of 0-10 how much you personally trust each of the institutions I read out. 0 means you do not trust an institution at all, and 10 means you have complete trust. The Police.

Variable citation: NSD - Norwegian Centre for Research Data. (2018). European social survey cumulative file, ess 1-8 [Data Archive and distributor of ESS data for ESS ERIC]. `http://www.europeansocialsurvey.org/`

2.18.3.59 Patent applications to the EPO, Purchasing Power Standard per inhabitant (eu_sctppspop)

Long tag: qog_std_ts_eu_sctppspop

Original tag: eu_sctppspop

Description:
Patent applications to the EPO, Purchasing Power Standard per inhabitant

Variable citation: European Commission. (2021). Eurostat. `http://ec.europa.eu/eurostat/data/database`

2.18.3.60 Associational and Organizational Rights (fh_aor)

Long tag: qog_std_ts_fh_aor

Original tag: fh_aor

Description:
Associational and Organizational Rights - The variable evaluates the freedom of assembly, demonstrations and open public discussion; the freedom for nongovernmental organizations; and the freedom for trade unions, peasant organizations and other professional and private organizations. Countries are graded between 0 (worst) and 12 (best).

Variable citation: Freedom House. (2021a). Freedom in the world 2021. `https://freedomhouse.org/report/freedom-world`

2.18.3.61 Civil Liberties (fh_cl)

Long tag: qog_std_ts_fh_cl

Original tag: fh_cl

Description:
Civil Liberties Rating - Civil liberties allow for the freedoms of expression and belief, associational and organizational rights, rule of law, and personal autonomy without interference from the state. The more specific list of rights considered vary over the years. Countries are graded between 1 (most free) and 7 (least free).

Variable citation: Freedom House. (2021a). Freedom in the world 2021. `https://freedomhouse.org/report/freedom-world`

2.18.3.62 Freedom of Expression and Belief (fh_feb)

Long tag: qog_std_ts_fh_feb

Original tag: fh_feb

Description:
Freedom of Expression and Belief - The variable measures the freedom and independence of the media and other cultural expressions; the freedom of religious groups to practice their faith and express themselves; the academic freedom and freedom from extensive political indoctrination in the educational system; and the ability of the people to engage in private (political) discussions without fear of harassment or arrest by the authorities. Countries are graded between 0 (worst) and 16 (best).

Variable citation: Freedom House. (2021a). Freedom in the world 2021. `https://freedomhouse.org/report/freedom-world`

2.18.3.63 Personal Autonomy and Individual Rights (fh_pair)

Long tag: qog_std_ts_fh_pair

Original tag: fh_pair

Description:
Personal Autonomy and Individual Rights - The variable evaluates the extent of state control over travel, choice of residence, employment or institution of higher education; the right of citizens to own property and establish private businesses; the private business' freedom from unduly influence by government officials, security forces, political parties or organized crime; gender equality, freedom of choice of marriage partners and size of family; equality of opportunity and absence of economic exploitation. Countries are graded between 0 (worst) and 16 (best).

Variable citation: Freedom House. (2021a). Freedom in the world 2021. `https://freedomhouse.org/report/freedom-world`

2.18.3.64 Rule of Law (fh_rol)

Long tag: qog_std_ts_fh_rol

Original tag: fh_rol

Description:
Rule of Law - The variable measures the independence of the judiciary; the extent to which rule of law

prevails in civil and criminal matters; the existence of direct civil control over the police; the protection from political terror, unjustified imprisonment, exile and torture; absence of war and insurgencies; and the extent to which laws, policies and practices guarantee equal treatment of various segments of the population. Countries are graded between 0 (worst) and 16 (best).

Variable citation: Freedom House. (2021a). Freedom in the world 2021. `https://freedomhouse.org/report/freedom-world`

2.18.3.65 Legal Structure and Security of Property Rights (current) (fi_legprop)

Long tag: qog_std_ts_fi_legprop

Original tag: fi_legprop

Description:

The index ranges from 0-10 where 0 corresponds to "no judicial independence", "no trusted legal framework exists", "no protection of intellectual property", "military interference in rule of law", and "no integrity of the legal system" and 10 corresponds to "high judicial independence", "trusted legal framework exists", "protection of intellectual property", "no military interference in rule of law", and "integrity of the legal system". The index consists of the following indicators: Judicial independence: The judiciary is independent and not subject to interference by the government or parties in dispute, Impartial courts: A trusted legal framework exists for private businesses to challenge the legality of government actions or regulations, Protection of intellectual property, Military interference in rule of law and the political process, Integrity of the legal system.

2.18.3.66 Legal Structure and Security of Property Rights (panel data) (fi_legprop_pd)

Long tag: qog_std_ts_fi_legprop_pd

Original tag: fi_legprop_pd

Description:

The index ranges from 0-10 where 0 corresponds to "no judicial independence", "no trusted legal framework exists", "no protection of intellectual property", "military interference in rule of law", and "no integrity of the legal system" and 10 corresponds to "high judicial independence", "trusted legal framework exists", "protection of intellectual property", "no military interference in rule of law", and "integrity of the legal system". The index consists of the following indicators: Judicial independence: The judiciary is independent and not subject to interference by the government or parties in dispute, Impartial courts: A trusted legal framework exists for private businesses to challenge the legality of government actions or regulations, Protection of intellectual property, Military interference in rule of law and the political process, Integrity of the legal system. Panel-data adjusted.

2.18.3.67 Minority Shareholder Rights (gc_shr)

Long tag: qog_std_ts_gc_shr

Original tag: gc_shr

Description:

The ten key legal provisions identified as most relevant to the protection of minority shareholder rights are coded by a team of legal scholars coded between 0 and 1. The measures are not dichotomous because intermediate scores between 0 and 1 are possible. The sum of the scores for each of the ten legal provisions are the value of the variable, ranging from 0 to 10.

The ten legal provisions protecting the rights of minority shareholders:
1. Powers of the general meeting for de facto changes
2. Agenda-setting power
3. Anticipation of shareholder decision facilitated
4. Prohibition of multiple voting rights (super voting rights)
5. Independent board members
6. Feasibility of directors' dismissal
7. Private enforcement of directors' duties (derivative suit)
8. Shareholder action against resolutions of the general meeting
9. Mandatory bid
10. Disclosure of major share ownership

Variable citation: Guillen, M., & Capron, L. (2016). State capacity, minority shareholder protections, and stock market development. *Administrative Science Quarterly*, 61(1), 125–160

2.18.3.68 Paid Bribe: Police (gcb_bpol)

Long tag: qog_std_ts_gcb_bpol

Original tag: gcb_bpol

Description:

In the past 12 months have you or anyone living in your household paid a bribe in any form to each of the following institutions/organizations? Police. Share of population answering Yes.

Variable citation: Transparency International (2017). Global corruption barometer 9th edition. `https://www.transparency.org/research/gcb`

2.18.3.69 Corruption Perception: Judiciary/Legal System (gcb_pj)

Long tag: qog_std_ts_gcb_pj

Original tag: gcb_pj

Description:

To what extent do you perceive the following categories in this country to be affected by corruption? Judiciary/Legal system. 1 (Not at all corrupt) - 5 (Extremely corrupt).

Variable citation: Transparency International (2017). Global corruption barometer 9th edition. `https://www.transparency.org/research/gcb`

2.18.3.70 Corruption Perception: Police (gcb_ppol)

Long tag: qog_std_ts_gcb_ppol

Original tag: gcb_ppol

Description:

To what extent do you perceive the following categories in this country to be affected by corruption? Police. 1 (Not at all corrupt) - 5 (Extremely corrupt).

Variable citation: Transparency International (2017). Global corruption barometer 9th edition. `https://www.transparency.org/research/gcb`

2.18.3.71 Independent Judiciary (h_j)

Long tag: qog_std_ts_h_j

Original tag: h_j

Description:

Dummy variable coded 1 if there is an independent judiciary (based on information from Polity's Executive Constraints, p_xconst) and - where available - on ICRG's index of Law
Order.

Variable citation: Henisz, W. J. (2017). The Political Constraint Index (POLCON) Dataset 2017 release. `https://mgmt.wharton.upenn.edu/profile/1327`

2.18.3.72 Appointments/Elections to Constitutional Court (iaep_aecc)

Long tag: qog_std_ts_iaep_aecc

Original tag: iaep_aecc

Description:

Are members of this court (see iaep_cc) appointed or elected? "Elected" here refers to a popular election. Elections by legislative bodies are considered appointments.

1. Appointed
2. Elected

Source: IAEP (Wig et al., 2015)

Variable citation: Wig, T., Hegre, H., & Regan, P. M. (2015). Updated data on institutions and elections 1960–2012: Presenting the iaep dataset version 2.0. *Research & Politics*, 2(2). `https://doi.org/10.1177/2053168015579120`

2.18.3.73 Appointment for Life to Constitutional Court (iaep_alcc)

Long tag: qog_std_ts_iaep_alcc

Original tag: iaep_alcc

Description:

Are members of the court appointed for life?

0. No
1. Yes

Source: IAEP (Wig et al., 2015)

Variable citation: Wig, T., Hegre, H., & Regan, P. M. (2015). Updated data on institutions and elections 1960–2012: Presenting the iaep dataset version 2.0. *Research & Politics*, 2(2). https://doi.org/10.1177/2053168015579120

2.18.3.74 The Age of the Constitution (years) (iaep_const)

Long tag: qog_std_ts_iaep_const

Original tag: iaep_const

Description:

How long has the current constitution existed (years since the constitution was established)?

Source: IAEP (Wig et al., 2015)

Variable citation: Wig, T., Hegre, H., & Regan, P. M. (2015). Updated data on institutions and elections 1960–2012: Presenting the iaep dataset version 2.0. *Research & Politics*, 2(2). https://doi.org/10.1177/2053168015579120

2.18.3.75 The Time the Constitution has been in Effect (years) (iaep_constin)

Long tag: qog_std_ts_iaep_constin

Original tag: iaep_constin

Description:

How long has the current constitution been in effect (in years)?

Source: IAEP (Wig et al., 2015)

Variable citation: Wig, T., Hegre, H., & Regan, P. M. (2015). Updated data on institutions and elections 1960–2012: Presenting the iaep dataset version 2.0. *Research & Politics*, 2(2). https://doi.org/10.1177/2053168015579120

2.18.3.76 The Time since the Last Amendment of Constitution (years) (iaep_constlam)

Long tag: qog_std_ts_iaep_constlam

Original tag: iaep_constlam

Description:

How many years since the last amendment (in years)?

Source: IAEP (Wig et al., 2015)

Variable citation: Wig, T., Hegre, H., & Regan, P. M. (2015). Updated data on institutions and elections 1960–2012: Presenting the iaep dataset version 2.0. *Research & Politics*, 2(2). https://doi.org/10.1177/2053168015579120

2.18.3.77 Removal of Members of Constitutional Court (iaep_rmcc)

Long tag: qog_std_ts_iaep_rmcc

Original tag: iaep_rmcc

Description:

Can members of this court (see iaep_cc) be removed?

0. No
1. Yes

Source: IAEP (Wig et al., 2015)

Variable citation: Wig, T., Hegre, H., & Regan, P. M. (2015). Updated data on institutions and elections 1960–2012: Presenting the iaep dataset version 2.0. *Research & Politics*, 2(2). https://doi.org/10.1177/2053168015579120

2.18.3.78 Rights (iiag_rig)

Long tag: qog_std_ts_iiag_rig

Original tag: iiag_rig

Description:

Rights is one of the four sub-categories that are used to calculate the Participation, Rights Inclusion category score. It consists of five indicators from six data sources.

Variable citation: Mo Ibrahim Foundation. (2020). The Ibrahim Index of African Governance. `http://mo.ibrahim.foundation/iiag/`

2.18.3.79 Index of Public Integrity (overall) (ipi_ipi)

Long tag: qog_std_ts_ipi_ipi

Original tag: ipi_ipi

Description:

The Index of Public Integrity (IPI) aims to capture a snapshot of this balance in 114 countries for which data is available. It is a composite index consisting of six components. For the 2015, 2017 and 2019 editions, the components were: administrative burden, trade openness, budget transparency for opportunities, and judicial independence, e-citizenship and freedom of the press for constraints.

Starting from the 2021 edition, administrative burden and trade openness have been replaced by administrative transparency and online services, due to unavailable alternative data on the original components (based on the World Bank Doing Business project, which closed).. Below you will find an outline of the methodology behind the IPI, detailing recent changes.

A more extensive explanation of the methodology and the original composition of the IPI can be found in the following peer-reviewed publication:

Measuring Control of Corruption by a New Index of Public Integrity - Mungiu-Pippidi, A., Dadašov, R. Measuring Control of Corruption by a New Index of Public Integrity. European Journal on Criminal Policy Research 22, 415-438 (2016).

Variable citation: Mungiu–Pippidi, A., Dadasov, R., Martinez–Kukutschka, R., Alvarado–Pachon, N., Dykes, V., Kossow, N., & Khaghaghordyan, A. (2019). Index of public integrity. `http://www.integrity-index.org`

2.18.3.80 Absolute legal institutional quality (simple averages) (kun_legabs)

Long tag: qog_std_ts_kun_legabs

Original tag: kun_legabs

Description:

Absolute legal institutional quality (simple averages).

Variable citation: Kuncic, A. (2014). Institutional quality dataset. *Journal of Institutional Economics*, 10(01), 135–161. `https://doi.org/10.1017/S1744137413000192`

2.18.3.81 Legal institutional quality (relative factor scores) (kun_legrel)

Long tag: qog_std_ts_kun_legrel

Original tag: kun_legrel

Description:

Legal institutional quality (relative factor scores).

Variable citation: Kuncic, A. (2014). Institutional quality dataset. *Journal of Institutional Economics*, 10(01), 135–161. `https://doi.org/10.1017/S1744137413000192`

2.18.3.82 Legal World Institutional Quality Ranking (all countries) (kun_wiqrleg_all)

Long tag: qog_std_ts_kun_wiqrleg_all

Original tag: kun_wiqrleg_all

Description:

Legal World Institutional Quality Ranking (all countries).

Variable citation: Kuncic, A. (2014). Institutional quality dataset. *Journal of Institutional Economics*, 10(01), 135–161. `https://doi.org/10.1017/S1744137413000192`

2.18.3.83 Legal World Institutional Quality Ranking (full obs.) (kun_wiqrleg_full)

Long tag: qog_std_ts_kun_wiqrleg_full

Original tag: kun_wiqrleg_full

Description:

Legal World Institutional Quality Ranking (countries with full observations).

Variable citation: Kuncic, A. (2014). Institutional quality dataset. *Journal of Institutional Economics*, 10(01), 135–161. `https://doi.org/10.1017/S1744137413000192`

2.18.3.84 Structure of central gov. expenditures, public order and safety (oecd_gengovdistri_t1c)

Long tag: qog_std_ts_oecd_gengovdistri_t1c

Original tag: oecd_gengovdistri_t1c

Description:
Structure of central government expenditures, public order and safety.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. `https://doi.org/10.1787/20752288`

2.18.3.85 Legislature corrupt activities (vdem_gcrrpt)

Long tag: qog_std_ts_vdem_gcrrpt

Original tag: vdem_gcrrpt

Description:
Legislature corrupt activities. Do members of the legislature abuse their position for financial gain?

Clarification: This includes any of the following: (a) accepting bribes, (b) helping to obtain government contracts for firms that the legislator (or his/her family/friends/political supporters) own, (c) doing favors for firms in exchange for the opportunity of employment after leaving the legislature, (d) stealing money from the state or from campaign donations for personal use. V-Dem uses a specifically designed measurement model to provide country-year point estimates, aggregated from multiple codings submitted by country experts by taking disagreement and measurement error into account. In this version of the variable, used in the QoG dataset, V-Dem has linearly translated the measurement model point estimates back to the original ordinal scale of each variable as an interval measure.

Variable citation: Coppedge, M., Gerring, J., Knutsen, C. H., Lindberg, S. I., Teorell, J., Alizada, N., Altman, D., Bernhard, M., Cornell, A., Fish, M. S., Gastaldi, L., Gjerløw, H., Glynn, A., Hicken, A., Hindle, G., Ilchenko, N., Krusell, J., Luhrmann, A., Maerz, S. F., . . . Ziblatt, D. (2021). (2021). The V-Dem measurement model: Latent variable analysis for crossnational and cross-temporal expert-coded data

2.18.3.86 Judicial corruption decision (vdem_jucorrdc)

Long tag: qog_std_ts_vdem_jucorrdc

Original tag: vdem_jucorrdc

Description:
Judicial corruption decision. Question: How often do individuals or businesses make undocumented extra payments or bribes in order to speed up or delay the process or to obtain a favorable judicial decision? V-Dem uses a specifically designed measurement model to provide country-year point estimates, aggregated from multiple codings submitted by country experts by taking disagreement and measurement error into account. In this version of the variable, used in the QoG dataset, V-Dem has linearly translated the measurement model point estimates back to the original ordinal scale of each variable as an interval measure.

Variable citation: Coppedge, M., Gerring, J., Knutsen, C. H., Lindberg, S. I., Teorell, J., Alizada, N., Altman, D., Bernhard, M., Cornell, A., Fish, M. V-dem [country-year/country-date] dataset v11.1. `https://doi.org/10.23696/vdemds21` Pemstein, D., Marquardt, K. L., Tzelgov, E., Wang, Y.-t., Medzihorsky, J., Krusell, J., Miri, F., & von Römer, J. (2021). The V-Dem measurement model: Latent variable analysis for crossnational and cross-temporal expert-coded data

2.18.3.87 Rule of Law, Estimate (wbgi_rle)

Long tag: qog_std_ts_wbgi_rle

Original tag: wbgi_rle

Description:
Rule of Law - Estimate: "Rule of Law" includes several indicators which measure the extent to which agents have confidence in and abide by the rules of society. These include perceptions of the incidence of crime, the effectiveness and predictability of the judiciary, and the enforceability of contracts. Together, these indicators measure the success of a society in developing an environment in which fair and predictable rules form the basis for economic and social interactions and the extent to which property rights are protected.

Variable citation: Kaufmann, D., Kraay, A., & Mastruzzi, M. (2010). The worldwide governance indicators: A summary of methodology, data and analytical issues. *World Bank Policy Research Working Paper, 5430*

2.18.3.88 Rule of Law, Number of Sources (wbgi_rln)

Long tag: qog_std_ts_wbgi_rln

Original tag: wbgi_rln

Description:
Rule of Law - Number of Sources.

Variable citation: Kaufmann, D., Kraay, A., & Mastruzzi, M. (2010). The worldwide governance indicators: A summary of methodology, data and analytical issues. *World Bank Policy Research Working Paper, 5430*

2.18.3.89 Rule of Law, Standard Error (wbgi_rls)

Long tag: qog_std_ts_wbgi_rls

Original tag: wbgi_rls

Description:
Rule of Law - Standard Errors.

Variable citation: Kaufmann, D., Kraay, A., & Mastruzzi, M. (2010). The worldwide governance indicators: A summary of methodology, data and analytical issues. *World Bank Policy Research Working Paper, 5430*

2.18.3.90 Intentional homicides (per 100,000 people) (wdi_homicides)

Long tag: qog_std_ts_wdi_homicides

Original tag: wdi_homicides

Description:
Intentional homicides are estimates of unlawful homicides purposely inflicted as a result of domestic disputes, interpersonal violence, violent conflicts over land resources, intergang violence over turf or control, and predatory violence and killing by armed groups. Intentional homicide does not include all intentional killing; the difference is usually in the organization of the killing. Individuals or small groups usually commit homicide, whereas killing in armed conflict is usually committed by fairly cohesive groups of up to several hundred members and is thus usually excluded.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.3.91 CPIA property rights and rule-based governance rating (1=low to 6=high) (wdi_prrbgr)

Long tag: qog_std_ts_wdi_prrbgr

Original tag: wdi_prrbgr

Description:
Property rights and rule-based governance assess the extent to which private economic activity is facilitated by an effective legal system and rule-based governance structure in which property and contract rights are reliably respected and enforced.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.3.92 Personal Autonomy Rights (wel_par)

Long tag: qog_std_ts_wel_par

Original tag: wel_par

Description:
Meaning: The indicator measures to what extent a country enacts personal autonomy rights by law and respects them in practice.
Source: Welzel's (2013: 254-263) "personal autonomy rights index" based on Freedom House's "civil liberties" as well as Cingranelli/Richards' "integrity rights". Freedom House civil liberties are inverted and then standardized into a range from minimum 0 to maximum 1.0. CIRI integrity rights are also standardized into a range from minimum 0 to maximum 1.0. Then the average of the two is taken to measure personal autonomy rights. Measures exist on an annual basis from 1981 to 2010 for most countries in the world.
Scaling: Index scores range from 0 for the completely absent or disrespected personal autonomy rights to 1.0 for their full presence and respect, with proper fractions for intermediate positions.
Links: Data sources, rescaling procedures and replication data are meticulously documented in the Online Appendix to Welzel's (2013) Freedom Rising at www.cambridge.com/welzel (p. 72). Test statistics documenting this index's superior validity in comparison to alternative democracy measures are reported in Welzel (2013: 267-271).
Note: the missing code (-99) has been recoded to missing (.).

Variable citation: Welzel, C. (2013). *Freedom rising: Human empowerment and the quest for emancipation (1st ed.)*. Cambridge University Press

2.18.3.93 Political Participation Rights (wel_ppr)

Long tag: qog_std_ts_wel_ppr

Original tag: wel_ppr

Description:

Meaning: The indicator measures to what extent a country enacts political participation rights by law and respects them in practice.
Source: Welzel's (2013: 254-263) "political participation rights index" based on Freedom House's "political rights" as well as Cingranelli/Richards' "empowerment rights". Freedom House political rights are inverted and then standardized into a range from minimum 0 to maximum 1.0. CIRI empowerment rights are also standardized into a range from minimum 0 to maximum 1.0. Then the average of the two is taken to measure political participation rights. Measures exist on an annual basis from 1981 to 2010 for most countries in the world.
Scaling: Index scores range from 0 for completely absent or disrespected political participation rights to 1.0 for their full presence and respect, with proper fractions for intermediate positions.
Links: Data sources, rescaling procedures and replication data are meticulously documented in the Online Appendix to Welzel's (2013) Freedom Rising at www.cambridge.com/welzel (p. 72). Test statistics documenting this index's superior validity in comparison to alternative democracy measures are reported in Welzel (2013: 267-271).
Note: the missing code (-99) has been recoded to missing (.).

Variable citation: Welzel, C. (2013). *Freedom rising: Human empowerment and the quest for emancipation (1st ed.)*. Cambridge University Press

2.18.3.94 Rule of Law Index (wel_rli)

Long tag: qog_std_ts_wel_rli

Original tag: wel_rli

Description:

(Rule of Law + Control of Corruption) / 2

Variable citation: Welzel, C. (2013). *Freedom rising: Human empowerment and the quest for emancipation (1st ed.)*. Cambridge University Press

2.18.3.95 Rule of Law (wel_rol)

Long tag: qog_std_ts_wel_rol

Original tag: wel_rol

Description:

Meaning: Factor scale from the World Bank's "global governance indicators" measuring the degree of law enforcement in a country.
Source: Alexander and Welzel (2011); Alexander, Inglehart and Welzel (2012). Categorization is available in annual measures for most countries of the world from 1996 to 2006.
Scaling: The factor scores are standardized into a range from minimum 0 (for the lowest ever observed rule of law score) to maximum 1.0 (for the highest ever observed rule of law score), with fractions for intermediate positions. Note: In the original data there exists two different observations for Dominica, the value has been recoded to missing for this country.

Variable citation: Welzel, C. (2013). *Freedom rising: Human empowerment and the quest for emancipation (1st ed.)*. Cambridge University Press

2.18.3.96 Scalezone on Citizen Rights (wel_scalezone)

Long tag: qog_std_ts_wel_scalezone

Original tag: wel_scalezone

Description:

Meaning: Categorical scale zones on the citizen rights index, distinguishing four categories from more completely to less completely autocratic, and then from less completely to more completely democratic.
Source: Welzel, Freedom Rising (2013: 255-256). Categorization is available in annual measures for most countries of the world from 1981 to 2010.
Scaling: 1 "Complete Autocracy": citizen rights score less equal 0.25; 2 "Incomplete Autocracy": citizen rights score above 0.25 and less equal 0.50; 3 "Incomplete Democracy": citizen rights score above 0.50 and less equal 0.75; 4 "Complete Democracy": citizen rights score above 0.75.
Links: Data sources, rescaling procedures and replication data are meticulously documented in the Online Appendix to Welzel's (2013) Freedom Rising at www.cambridge.com/welzel (p. 72). Test statistics documenting this index's superior validity in comparison to alternative democracy measures are reported in Welzel (2013: 267-271).

Variable citation: Welzel, C. (2013). *Freedom rising: Human empowerment and the quest for emancipation (1st ed.)*. Cambridge University Press

2.18.3.97 Confidence: Justice System/Courts (wvs_confjs)

Long tag: qog_std_ts_wvs_confjs

Original tag: wvs_confjs

Description:
I am going to name a number of organizations. For each one, could you tell me how much confidence you have in them: Justice System/Courts

1. None at all
2. Not very much
3. Quite a lot
4. A great deal

2.18.4 Quality of Government

This category includes variables that are the core features of QoG (impartiality, bureaucratic quality and corruption) as well as measures that are broader (rule of law and transparency).

2.18.4.1 Civil Service Integrity sub-index (aii_cilser)

Long tag: qog_std_ts_aii_cilser

Original tag: aii_cilser

Description:
Civil Service Integrity. This sub index from 0 to 100 is composed of:

19. In law, the independence of the agency/agencies mandated to organize and monitor national elections is guaranteed.
20. In practice, appointments to the agency/agencies mandated to organize and monitor national elections support the independence of the agency/agencies.
21. In practice, the agency/agencies mandated to organize and monitor national elections is/are protected from political interference.
22. In practice, the agency/agencies mandated to organize and monitor national elections make/s timely, publicly available reports before and after a national election.
23. In practice, candidates/political parties have equitable access to state-owned media outlets.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.18.4.2 Elections sub-index (aii_elec)

Long tag: qog_std_ts_aii_elec

Original tag: aii_elec

Description:
Elections. This sub index from 0 to 100 is composed of:

24. In law, major public procurements require competitive bidding.
25. In practice, major public procurements involve competitive bidding.

26. In practice, citizens can access the results and documents associated with procurement contracts (full contract, proposals, execution reports, financial audits, etc.).
27. In law, companies found guilty of violations of procurement regulations are prohibited from participating in future bids.
28. In practice, companies found guilty of violating procurement regulations are prohibited from participating in future bids.
29. In practice, citizens can access the financial records of state-owned companies.
30. In practice, citizens can access the financial records associated with natural resources exploitation (gas, oil and mining), whether they involve the participation of public or private corporations.
31. In practice, significant public expenditure receives legislative approval on an annual basis.
32. In law, both the executive's budget proposal and the approved budget must be published in full every year.
33. In practice, a legislative committee exercises oversight of public funds.

2.18.4.3 Public management sub-index (aii_pubm)

Long tag: qog_std_ts_aii_pubm

Original tag: aii_pubm

Description:

Public Management. This sub index from 0 to 100 is composed of:

35. In law, civil servants are required to report cases of alleged corruption.
36. In law, civil servants who report cases of corruption are protected from recrimination or other negative consequences.
37. In law, there are formal rules to prevent conflicts of interest, nepotism, cronyism and patronage in all branches of government.
38. In practice, civil servants' work is not compromised by political interference.
39. In practice, civil servants are appointed and evaluated according to professional criteria.
40. In law, there are restrictions for civil servants entering the private sector after leaving the government.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.18.4.4 Practice: appointments to audit institution support agency's independ. (aii_q08)

Long tag: qog_std_ts_aii_q08

Original tag: aii_q08

Description:

Sub-score (0-100). Question no. 8. In practice, appointments to the supreme audit institution support the independence of the agency.

A 100 score is earned where all the following conditions are met:
1) appointments to positions in the agency follow a merit-based system,
2) appointees are free of conflicts of interest due to personal loyalties, family connections, political party affiliations or other biases, and
3) auditors are disciplined/removed/transferred only through due process by a peer panel/oversight body.

A 50 score is earned where any of the following conditions apply:
1) appointments don't always follow a merit-based system,
2) appointees sometimes have conflicts of interest, or
3) auditors are sometimes disciplined/removed/transferred without observing due process by a peer panel/oversight body.

A 0 score is earned where at least one of the following conditions apply:
1) appointments to positions in the agency rarely or never follow a merit-based system, or the merit-base system is so weak that individuals with less merit are usually appointed over those with more merit,
2) appointees usually have conflicts of interest due to personal loyalties, family connections, political party affiliations or other biases, or
3) appointees are usually disciplined/removed/transferred without observing due process by a peer panel/oversight body.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.18.4.5 Practice: the supreme audit agency releases frequent reports (aii_q09)

Long tag: qog_std_ts_aii_q09

Original tag: aii_q09

Description:

Sub-score (0-100). Question no. 9. In practice, the supreme audit agency releases frequent reports that are accessible to citizens.

A 100 score is earned where all the following conditions are met:
1) the agency in average publishes 10 reports or more per year, and
2) the reports are published less than one month after issued, and
3) they are accessible online or on paper within two weeks of requested at photocopying cost.

A 50 score is earned where any of the following conditions apply:
1) the agency publishes between three and nine reports per year,
2) the reports are published more than one month after issued, or
3) they are available on paper but it takes more than two weeks after requested to obtain them or costs are higher than photocopying.

A 0 score is earned where at least one of the following conditions apply:
1) the audit institution publishes one or less reports per year, or
2) the reports are not available to citizens.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.18.4.6 Law: corruption is criminalized as a specific offense (aii_q10)

Long tag: qog_std_ts_aii_q10

Original tag: aii_q10

Description:

Sub-score (0-100). Question no. 10. In law, corruption is criminalized as a specific offense.

A 100 score is earned where a national law criminalizes corruption as a specific offence(s) for at least three of the following: extortion, offering a bribe, accepting a bribe, kickbacks, using public resources for private gain, using confidential state information for private gain, money laundering, conspiring or attempting to commit any of the above, organized crime and trafficking.
A 0 score is earned where no such law exists, or a law exists but it alludes to corruption in general terms without criminalizing specific offences.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.18.4.7 Practice: appointees to bodies investigating pubsec corruption support independ. (aii_q14)

Long tag: qog_std_ts_aii_q14

Original tag: aii_q14

Description:

Sub-score (0-100). Question no. 14. In practice, appointments to the body/bodies that investigate/s allegations of public sector corruption support/s the independence of the body.

A 100 score is earned where all the following conditions are met:
1) appointments follow a merit-based system,
2) appointees are free of conflicts of interest due to personal loyalties, family connections, political party affiliations or other biases, and
3) appointees are disciplined/removed/transferred only through due process by a peer panel/oversight body.

A 50 score is earned where any of the following conditions apply:
1) appointments don't always follow the merit-based system,
2) appointees occasionally have conflicts of interest, or
3) appointees are occasionally disciplined/removed/transferred without observing due process by a peer panel/oversight body.

A 0 score is earned where at least one of the following conditions apply:
1) appointments to positions in the body rarely follow a merit-based system,
2) individuals appointed usually have conflicts of interest due to personal loyalties, family connections, political party affiliations or other biases, or
3) due process by a peer panel/oversight body is rarely or never followed to discipline/remove/transfer the appointees.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.18.4.8 Practice: appointees to agencies organizing elections support agencies' independ (aii_q20)

Long tag: qog_std_ts_aii_q20

Original tag: aii_q20

Description:

Sub-score (0-100). Question no. 20. In practice, appointments to the agency/agencies mandated to organize and monitor national elections support the independence of the agency/agencies.

A 100 score is earned where electoral officials are always chosen through merit-selection systems.

A 50 score is earned where electoral officials are generally chosen through merit-selection systems, but there are exceptions (e.g. sometimes candidates with less merit are selected over those with more merit).

A 0 score is earned where electoral officials are rarely chosen through merit-selection systems, or the selection system is so weak it can't guarantee candidates are appointed based on merit (e.g. no legal education is required, the President has discretion to decide who the top candidates are, etc.).

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.18.4.9 Practice: agencies that organize elections are protected from pol. interference (aii_q21)

Long tag: qog_std_ts_aii_q21

Original tag: aii_q21

Description:

Sub-score (0-100). Question no. 21. In practice, the agency/agencies mandated to organize and monitor national elections is/are protected from political interference.

A 100 score is earned where all the following conditions are met:
1) appointees are disciplined/removed only through due process by a peer panel/oversight body, and
2) appointees are not removed when a new administration takes power.

A 50 score is earned where any of the following conditions apply:
1) appointees are occasionally disciplined/removed/transferred without following due process by a peer panel/oversight body, or
2) appointees are occasionally removed when a new administration takes power.

A 0 score is earned where at least one of the following conditions apply:
1) appointees are usually disciplined/removed without following due process, or the due process is so weak it doesn't support independence (e.g. members of the Executive or Legislative branches are part of the panel that conducts the due process), or
2) appointees are usually removed when a new administration takes power.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.18.4.10 Practice: reports before after a national election are publicly available (aii_q22)

Long tag: qog_std_ts_aii_q22

Original tag: aii_q22

Description:

Sub-score (0-100). Question no. 22. In practice, the agency/agencies mandated to organize and monitor national elections make/s timely, publicly available reports before and after a national election.

A 100 score is earned where all the following conditions are met:
1) the agency/agencies publish/es at least one report before the election and one report after the election, and
2) the publications are easily accessible to citizens less than one month after issuance online or at cost of photocopying.

A 50 score is earned where any of the following conditions apply:
1) the agency only publishes one report before or after the election, or
2) the publication is generally accessible to citizens but published more than one month after issued or the cost is higher than photocopying.

A 0 score is earned where no reports about the elections are published or reports are not available to the public.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.18.4.11 Law: major public procurements require competitive bidding (aii_q24)

Long tag: qog_std_ts_aii_q24

Original tag: aii_q24

Description:

Sub-score (0-100). Question no. 24. In law, major public procurements require competitive bidding.

A 100 score is earned where all major procurements are required by law to follow competitive bidding.

A 0 score is earned where no such law exists.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.18.4.12 Practice: major public procurements involve competitive bidding (aii_q25)

Long tag: qog_std_ts_aii_q25

Original tag: aii_q25

Description:

Sub-score (0-100). Question no. 25. In practice, major public procurements involve competitive bidding.

A 100 score is earned where all the following conditions are met:
1) bids from competing contractors, suppliers, or vendors are invited through open advertising of the scope, specifications, and terms of the proposed contract, and
2) the criteria by which the bids are evaluated is available for scrutiny.

A 50 score is earned where any of the following conditions apply:
1) bids from competing contractors, suppliers, or vendors are invited through open advertising, but the advertising doesn't leave much time for bidders to prepare their offers or it lacks basic components (scope, specifications, or terms of the proposed contract), or
2) the criteria by which the bids are evaluated is not readily available for scrutiny.

A 0 score is earned where at least one of the following conditions apply:
1) bids from competing contractors, suppliers, or vendors are rarely or never invited through open advertising of the scope, specifications, and terms of the proposed contract, or
2) the criteria by which the bids are to be evaluated is rarely available for scrutiny.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.18.4.13 Practice: citizens can access results and procurement contracts related document (aii_q26)

Long tag: qog_std_ts_aii_q26

Original tag: aii_q26

Description:

Sub-score (0-100). Question no. 26. In practice, citizens can access the results and documents associated with procurement contracts (full contract, proposals, execution reports, financial audits, etc.).

A 100 score is earned where all the following conditions are met:
1) there is an archive containing full records of all procurement contracts, whether in a central government office or at each contracting institution, and
2) full records are readily available on or off line for scrutiny by journalists, auditors, competitors and any citizen who request them.

A 50 score is earned where any of the following conditions apply:
1) there is an archive but it doesn't contain complete records of all procurement contracts, whether in a central government office or at each contracting institution, and
2) full records are not readily available on/off line for scrutiny by journalists, auditors, competing contractors and any citizen who request them.

A 0 score is earned where at least one of the following conditions apply:
1) there's no archive containing full records of all procurement contracts, whether in a central government office or at each contracting institution, or
2) full records are rarely or never available on/off line for scrutiny by journalists, auditors, competitors or any citizen who request them.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.18.4.14 Practice: citizens can access the financial records of state-owned companies (aii_q29)

Long tag: qog_std_ts_aii_q29

Original tag: aii_q29

Description:

Sub-score (0-100). Question no. 29. In practice, citizens can access the financial records of state-owned companies.

A 100 score is earned where all the following conditions are met:
1) financial records of state-owned companies are available on/offline to journalists, auditors and citizens at least quarterly, and
2) the records can be obtained immediately for free online or on paper in less than two weeks of requested at

cost of photocopying.

A 50 score is earned where any of the following conditions apply:
1) financial records of state-owned companies are available less than quarterly, or
2) obtaining the records takes two weeks to a month, or costs are higher than photocopying.
A 0 score is earned where financial records of state-owned companies are rarely available to the public or don't exist.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.18.4.15 Practice: citizens can access natural resources exploitation financial records (aii_q30)

Long tag: qog_std_ts_aii_q30

Original tag: aii_q30

Description:

Sub-score (0-100). Question no. 30. In practice, citizens can access the financial records associated with natural resources exploitation (gas, oil and mining), whether they involve the participation of public or private corporations.

A 100 score is earned where all the following conditions are met:
1) financial records associated with natural resource projects are available on/offline to journalists, auditors and citizens at least quarterly, and
2) the records can be obtained immediately for free online or on paper in less than two weeks of requested at cost of photocopying.

A 50 score is earned where any of the following conditions apply:
1) financial records associated with natural resource projects are available less than quarterly, or
2) obtaining the records occasionally takes more than two weeks of requested, or costs are higher than photocopying.
A 0 score is earned where financial records associated with natural resource projects are rarely available to the public or don't exist.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.18.4.16 Law: civil servants are required to report cases of alleged corruption (aii_q35)

Long tag: qog_std_ts_aii_q35

Original tag: aii_q35

Description:

Sub-score (0-100). Question no. 35. In law, civil servants are required to report cases of alleged corruption.

A 100 score is earned where the law creates a explicit legal requirement for civil servants to report any cases of alleged corruption they are aware of.
A 0 score is earned if no such law exists.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.18.4.17 Law: there are formal rules to prevent conflict of interest, nepotism, etc. (aii_q37)

Long tag: qog_std_ts_aii_q37

Original tag: aii_q37

Description:

Sub-score (0-100). Question no. 37. In law, there are formal rules to prevent conflicts of interest, nepotism, cronyism and patronage in all branches of government.

A 100 score is earned where at least two of the following three conditions are met:
1) the law prohibits conflicts of interest, nepotism, cronyism, and patronage (at least two of these offenses must be prohibited),
2) the law applies to all branches of government, including the civil service, and
3) it mandates mechanisms such as competitive recruitment and promotion procedures, safeguards against arbitrary disciplinary actions and dismissal, and recusal procedures.

A 0 score is earned where no such law exist. It also scores 0 if only one of the three conditions described in 100 is met.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.18.4.18 Practice: civil servants' work is not compromised by political interference (aii_q38)

Long tag: qog_std_ts_aii_q38

Original tag: aii_q38

Description:

Sub-score (0-100). Question no. 38. In practice, civil servants' work is not compromised by political interference.

A 100 score is earned where all the following conditions are met:
1) civil servants are disciplined/removed/transferred only through due process by a peer panel/oversight body, and
2) civil servants are not removed when a new administration takes power.

A 50 score is earned where any of the following conditions apply:
1) civil servants are occasionally disciplined/removed/transferred without following due process by a peer panel/oversight body, or
2) civil servants are occasionally removed when a new administration takes power.

A 0 score is earned where at least one of the following conditions apply:
1) the due process is so weak it doesn't protect civil servants (e.g. the members of the panel that conducts the due process have a particular interest in how the issue is decided), or
2) civil servants are usually removed when a new administration takes power.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.18.4.19 Practice: civil servants are appointed and evaluated according to prof. criteria (aii_q39)

Long tag: qog_std_ts_aii_q39

Original tag: aii_q39

Description:

Sub-score (0-100). Question no. 39. In practice, civil servants are appointed and evaluated according to professional criteria.

A 100 score is earned where all the following conditions are met:
1) appointments to the civil service are made on a merit-based system,
2) individuals appointed are free of conflicts of interest due to personal loyalties, family connections, political party affiliations or other biases, and
3) performance evaluations are based on standard benchmarks.

A 50 score is earned where any of the following conditions apply:
1) not all civil servants are appointed because of their merits,
2) not all appointees are free of conflicts or interest, or
3) performance evaluations are not always based on standard benchmarks.

A 0 score is earned where at least one of the following conditions apply:
1) no merit-based system is in place or it's so weak it's useless,
2) civil servants frequently have conflicts of interest, or
3) performance evaluations are usually based on personal, discretionary criteria.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.18.4.20 Law: there are restrictions for civil servants after entering private sector (aii_q40)

Long tag: qog_std_ts_aii_q40

Original tag: aii_q40

Description:

Sub-score (0-100). Question no. 40. In law, there are restrictions for civil servants entering the private sector after leaving the government.

A 100 score is earned where the law forbids civil servants to take a position in the private sector for a period of time after leaving government if the position involves any of the following:
1) would present a conflict of interest,
2) would involve seeking to influence their former government colleagues, or
3) would establish a relationship between the former and the new office.

A 0 score is earned if no such law exists.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.18.4.21 Practice: citizen requests for public information are effective (aii_q42)

Long tag: qog_std_ts_aii_q42

Original tag: aii_q42

Description:

Sub-score (0-100). Question no. 42. In practice, citizen requests for public information are effective.

A 100 score is earned where all the following conditions are met:
1) records are available online or on paper less than two weeks after requested, and
2) costs are limited to photocopying. A 100 score is possible even if there are exceptions for information protected by national security or individual privacy laws.

A 50 score is earned where any of the following conditions apply:
1) many records are not online and/or it takes between two and four weeks for citizens' to obtain them, or
2) costs sometimes are higher than photocopying.

A 0 score is earned where at least one of the following conditions applies:
1) most records are not online and it takes more than a month for a citizen to obtain them, or
2) costs are usually higher than photocopying.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.18.4.22 Practice: asset disclosure process of senior officials branches is effective (aii_q45)

Long tag: qog_std_ts_aii_q45

Original tag: aii_q45

Description:

Sub-score (0-100). Question no. 45. In practice, the asset disclosure process for senior officials of the three branches of government (heads of state and government, ministers, members of Parliament, judges, etc.) is effective.

A 100 score is earned where all the following conditions are met:
1) senior officials of the three branches of government file their asset disclosures,
2) their disclosures contain detailed information about assets belonging to them and their immediate family (including real estate, movable property, cash, salaries, and income from investments), and
3) disclosures are available to the public online or within two weeks of requested at the cost of photocopying.

A 50 score is earned where any of the following conditions apply:
1) not all senior officials of the three branches of government file their asset disclosures,
2) their disclosures don't contain detailed information about them and their immediate family, or
3) disclosures are not always available to the public (they're not online, paper versions take more than two weeks to obtain, or costs are higher than photocopying).

A 0 score is earned where at least one of the following conditions apply:
1) senior officials of the three branches of government routinely fail to file asset disclosures,
2) asset disclosures contain so little information they are useless (e.g. they don't disclose assets of the immediate family, or cite real estate but not movable property, cash, salaries, and income from investments), or
3) asset disclosures are not available to the public. A 0 score is also earned where no law requires asset disclosures.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.18.4.23 Practice: the asset disclosure process for civil service members is effective (aii_q47)

Long tag: qog_std_ts_aii_q47

Original tag: aii_q47

Description:

Sub-score (0-100). Question no. 47. In practice, the asset disclosure process for members of the civil service is effective.

A 100 score is earned where all the following conditions are met:
1) all members of the civil service file their asset disclosures,
2) their disclosures contain detailed information about assets belonging to them and their immediate family (including real estate, movable property, cash, salaries, and income from investments), and
3) disclosures are available to the public online or within two weeks of requested at the cost of photocopying.

A 50 score is earned where any of the following conditions apply:
1) most but not all members of the civil service file their asset disclosures,
2) their disclosures are not complete (e.g. they contain real estate assets but not movable property, or list the asset but don't provide its estimated value), or

3) disclosures are not always available to the public (they're not online, paper versions take more than two weeks to obtain, or costs are higher than photocopying).

A 0 score is earned where at least one of the following conditions apply:
1) members of the civil service routinely fail to file asset disclosures,
2) asset disclosures contain so little information they are useless (e.g. they don't disclose assets of the immediate family, or cite real estate but not movable property, cash, salaries, and income from investments), or
3) asset disclosures are not available to the public. A 0 score is also earned where no law requires asset disclosures.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.18.4.24 The Bayesian Corruption Indicator (bci_bci)

Long tag: qog_std_ts_bci_bci

Original tag: bci_bci

Description:

The BCI index values lie between 0 and 100, with an increase in the index corresponding to a raise in the level of corruption. This is a first difference with CPI and WGI where an increase means that the level of corruption has decreased.

There exists no objective scale on which to measure the perception of corruption and the exact scaling you use is to a large extent arbitrary. However, the authors were able to give the index an absolute scale: zero corresponds to a situation where all surveys say that there is absolutely no corruption. On the other hand, when the index is one, all surveys say that corruption is as bad as it gets according to their scale. This is another difference with CPI and WGI, where the scaling is relative. They are rescaled such that WGI has mean 0 and a standard deviation of 1 in each year, while CPI always lies between 0 and 100.

In contrast, the actual range of values of the BCI will change in each year, depending how close countries come to the situation where everyone agrees there is no corruption at all (0), or that corruption is as bad as it can get (100).

The absolute scale of the BCI index was obtained by rescaling all the individual survey data such that zero corresponds to the lowest possible level of corruption and 1 to the highest one. We subsequently rescaled the BCI index such that when all underlying indicators are zero (one), the expected value of the BCI index is zero (hundred).

2.18.4.25 The standard deviation of The Bayesian Corruption Indicator (bci_bcistd)

Long tag: qog_std_ts_bci_bcistd

Original tag: bci_bcistd

Description:

The standard deviation of the Bayesian Corruption Index.

Variable citation: Standaert, S. (2015). Divining the level of corruption: A bayesian state-space approach. *Journal of Comparative Economics*, 43(3), 782–803. https://doi.org/10.1016/j.jce.2014.05.007

2.18.4.26 Anti-Corruption Policy (bti_acp)

Long tag: qog_std_ts_bti_acp

Original tag: bti_acp

Description:

To what extent does the government successfully contain corruption? 1-10.

1. The government fails to contain corruption, and there are no integrity mechanisms in place.
4. The government is only partly willing and able to contain corruption, while the few integrity mechanisms implemented are mostly ineffective.
7. The government is often successful in containing corruption. Most integrity mechanisms are in place, but some are functioning only with limited effectiveness.
10. The government is successful in containing corruption, and all integrity mechanisms are in place and effective.

2.18.4.31 Number of contracts won by a supplier registered at a foreign address (cri_foreign)

Long tag: qog_std_ts_cri_foreign

Original tag: cri_foreign

Description:
Total number of contracts won by a supplier that is registered at a foreign address.

Variable citation: Fazekas, M., & Kocsis, G. (2017). Uncovering high-level corruption: Cross-national objec- tive corruption risk indicators using public procurement data. `https://doi.org/doi:10.1017/S0007123417000461`

2.18.4.32 Share of contracts with no published call for tender red flag (cri_nocall)

Long tag: qog_std_ts_cri_nocall

Original tag: cri_nocall

Description:
Share of contracts with "no published call for tender" red flag. Contract is considered to have "no call for tender" red flag if two conditions are met: i) sum of prior information notices and contract notices equals 0 and ii) country of a buyer is not on the list of countries in which "no call for tender publication" is not a risk factor. These countries are BG, DK, EE, ES, LT.

Variable citation: Fazekas, M., & Kocsis, G. (2017). Uncovering high-level corruption: Cross-national objec- tive corruption risk indicators using public procurement data. `https://doi.org/doi:10.1017/S0007123417000461`

2.18.4.33 Share of contracts with non-open procedure red flag (cri_nonopen)

Long tag: qog_std_ts_cri_nonopen

Original tag: cri_nonopen

Description:
Share of contracts with "non-open procedure" red flag. Whether procedure is considered non-open depends on procedure type as well as specific country regulation. Please refer to the "Non-open procedure details" sheet to search for country-procedure combinations.

Variable citation: Fazekas, M., & Kocsis, G. (2017). Uncovering high-level corruption: Cross-national objec- tive corruption risk indicators using public procurement data. `https://doi.org/doi:10.1017/S0007123417000461`

2.18.4.34 Share of contracts with only one bid in total (cri_singleb)

Long tag: qog_std_ts_cri_singleb

Original tag: cri_singleb

Description:
Share of contracts with only one bid in total.

Variable citation: Fazekas, M., & Kocsis, G. (2017). Uncovering high-level corruption: Cross-national objec- tive corruption risk indicators using public procurement data. `https://doi.org/doi:10.1017/S0007123417000461`

2.18.4.35 Share of contracts with tax haven red flag (cri_taxhav)

Long tag: qog_std_ts_cri_taxhav

Original tag: cri_taxhav

Description:
Share of contracts with "tax haven" red flag. Contract has "tax haven" red flag in case two conditions are met: i) buyer and supplier are from different countries and ii) according to Financial Secrecy Index (https://fsi.taxjustice.net/en/) supplier country was classified as tax haven.

Variable citation: Fazekas, M., & Kocsis, G. (2017). Uncovering high-level corruption: Cross-national objec- tive corruption risk indicators using public procurement data. `https://doi.org/doi:10.1017/S0007123417000461`

2.18.4.36 State Fragility Index (cspf_sfi)

Long tag: qog_std_ts_cspf_sfi

Original tag: cspf_sfi

Description:
A country's fragility is closely associated with its state capacity to manage conflict; make and implement public policy; and deliver essential services and its systemic resilience in maintaining system coherence, cohesion, and quality of life; responding effectively to challenges and crises, and sustaining progressive development. State Fragility = Effectiveness Score + Legitimacy Score (25 points possible).

Variable citation: Marshall, M. G., & Elzinga-Marshall, G. (2017). Global report 2017: Conflict, governance, and state fragility

2.18.4.37 Functioning of Government (fh_fog)

Long tag: qog_std_ts_fh_fog

Original tag: fh_fog

Description:
Functioning of Government - The variable examines in what extent the freely elected head of government and a national legislative representative determine the policies of the government; if the government is free from pervasive corruption; and if the government is accountable to the electorate between elections and operates with openness and transparency. Countries are graded between 0 (worst) and 12 (best).

Variable citation: Freedom House. (2021a). Freedom in the world 2021. `https://freedomhouse.org/report/freedom-world`

2.18.4.38 Paid Bribe: Registry and permit services (gcb_bper)

Long tag: qog_std_ts_gcb_bper

Original tag: gcb_bper

Description:
In the past 12 months have you or anyone living in your household paid a bribe in any form to each of the following institutions/organizations? Registry and permit services. Share of population answering Yes.

Variable citation: Transparency International (2017). Global corruption barometer 9th edition. `https://www.transparency.org/research/gcb`

2.18.4.39 Paid Bribe: Tax Revenue (gcb_btax)

Long tag: qog_std_ts_gcb_btax

Original tag: gcb_btax

Description:
In the past 12 months have you or anyone living in your household paid a bribe in any form to each of the following institutions/organizations? Tax revenue. Share of population answering Yes.

Variable citation: Transparency International (2017). Global corruption barometer 9th edition. `https://www.transparency.org/research/gcb`

2.18.4.40 Corruption Perception: Business (gcb_pb)

Long tag: qog_std_ts_gcb_pb

Original tag: gcb_pb

Description:
To what extent do you perceive the following categories in this country to be affected by corruption? Business. 1 (Not at all corrupt) - 5 (Extremely corrupt).

Variable citation: Transparency International (2017). Global corruption barometer 9th edition. `https://www.transparency.org/research/gcb`

2.18.4.41 Corruption Perception: Media (gcb_pmedia)

Long tag: qog_std_ts_gcb_pmedia

Original tag: gcb_pmedia

Description:
To what extent do you perceive the following categories in this country to be affected by corruption? Media. 1 (Not at all corrupt) - 5 (Extremely corrupt).

Variable citation: Transparency International (2017). Global corruption barometer 9th edition. `https://www.transparency.org/research/gcb`

2.18.4.42 Corruption Perception: Registry and permit services (gcb_pper)

Long tag: qog_std_ts_gcb_pper

Original tag: gcb_pper

Description:
To what extent do you perceive the following categories in this country to be affected by corruption? Registry and permit services. 1 (Not at all corrupt) - 5 (Extremely corrupt).

Variable citation: Transparency International (2017). Global corruption barometer 9th edition. `https://www.transparency.org/research/gcb`

2.18.4.43 Corruption Perception: Religious Bodies (gcb_prel)

Long tag: qog_std_ts_gcb_prel

Original tag: gcb_prel

Description:
To what extent do you perceive the following categories in this country to be affected by corruption? Religious bodies. 1 (Not at all corrupt) - 5 (Extremely corrupt).

Variable citation: Transparency International (2017). Global corruption barometer 9th edition. `https://www.transparency.org/research/gcb`

2.18.4.44 Corruption Perception: Tax Revenue (gcb_ptax)

Long tag: qog_std_ts_gcb_ptax

Original tag: gcb_ptax

Description:
To what extent do you perceive the following categories in this country to be affected by corruption? Tax revenue. 1 (Not at all corrupt) - 5 (Extremely corrupt).

Variable citation: Transparency International (2017). Global corruption barometer 9th edition. `https://www.transparency.org/research/gcb`

2.18.4.45 Information Capacity (icd_infcapirt)

Long tag: qog_std_ts_icd_infcapirt

Original tag: icd_infcapirt

Description:
The aggregate index of information capacity. It is based on a hybrid two-parameter and graded Item Response Model (IRT) that is based on five component indicators - when the country first established a statistical agency, whether the country had in place a civil register and a population register, and the graded

indexes of census ability and yearbook ability.

Variable citation: Brambor, T., Goenaga, A., Lindvall, J., & JanTeorell. (2020). The lay of the land: Information capacity and the state. *Comparative Political Studies*, 53(2), 175–213. `https://doi.org/10.1177/0010414019843432`

2.18.4.46 Information Capacity (year 1750) (icd_infcapirt1750)

Long tag: qog_std_ts_icd_infcapirt1750

Original tag: icd_infcapirt1750

Description:

The aggregate index score of information capacity for the year of 1750. It is based on a hybrid two-parameter and graded Item Response Model (IRT) that is based on five component indicators - when the country first established a statistical agency, whether the country had in place a civil register and a population register, and the graded indexes of census ability and yearbook ability.

Variable citation: Brambor, T., Goenaga, A., Lindvall, J., & JanTeorell. (2020). The lay of the land: Information capacity and the state. *Comparative Political Studies*, 53(2), 175–213. `https://doi.org/10.1177/0010414019843432`

2.18.4.47 Information Capacity (year 1800) (icd_infcapirt1800)

Long tag: qog_std_ts_icd_infcapirt1800

Original tag: icd_infcapirt1800

Description:

The aggregate index score of information capacity for the year of 1800. It is based on a hybrid two-parameter and graded Item Response Model (IRT) that is based on five component indicators - when the country first established a statistical agency, whether the country had in place a civil register and a population register, and the graded indexes of census ability and yearbook ability.

2.18.4.50 ICRG Indicator of Quality of Government (icrg_qog)

Long tag: qog_std_ts_icrg_qog

Original tag: icrg_qog

Description:

The mean value of the ICRG variables “Corruption”, “Law and Order” and “Bureaucracy Quality”, scaled 0-1. Higher values indicate higher quality of government.

Corruption (originally 6 points)

This is an assessment of corruption within the political system. Such corruption is a threat to foreign investment for several reasons: it distorts the economic and financial environment; it reduces the efficiency of government and business by enabling people to assume positions of power through patronage rather than ability; and, last but not least, it introduces an inherent instability into the political process. The most common form of corruption met directly by business is financial corruption in the form of demands for special payments and bribes connected with import and export licenses, exchange controls, tax assessments, police protection, or loans. Such corruption can make it difficult to conduct business effectively, and in some cases may force the withdrawal or withholding of an investment. Although the measure takes such corruption into account, it is more concerned with actual or potential corruption in the form of excessive patronage, nepotism, job reservations, "favor-for-favors", secret party funding, and suspiciously close ties between politics and business. According to ICRG, these insidious sorts of corruption are potentially of much greater risk to foreign business in that they can lead to popular discontent, unrealistic and inefficient controls on the state economy, and encourage the development of the black market. The greatest risk in such corruption is that at some time it will become so overweening, or some major scandal will be suddenly revealed, so as to provoke a popular backlash, resulting in a fall or overthrow of the government, a major reorganizing or restructuring of the country's political institutions, or, at worst, a breakdown in law and order, rendering the country ungovernable.

Law and order (originally 6 points)
Law and Order are assessed separately, with each sub-component comprising zero to three points. The Law sub-component is an assessment of the strength and impartiality of the legal system, while the Order sub-component is an assessment of popular observance of the law. Thus, a country can enjoy a high rating in terms of its judicial system, but a low rating if it suffers from a very high crime rate or if the law is routinely ignored without effective sanction (for example, widespread illegal strikes).

Bureaucracy Quality (originally 4 points)
The institutional strength and quality of the bureaucracy is another shock absorber that tends to minimize revisions of policy when governments change. Therefore, high points are given to countries where the bureaucracy has the strength and expertise to govern without drastic changes in policy or interruptions in government services. In these low-risk countries, the bureaucracy tends to be somewhat autonomous from political pressure and to have an established mechanism for recruitment and training. Countries that lack the cushioning effect of a strong bureaucracy receive low points because a change in government tends to be traumatic in terms of policy formulation and day-to-day administrative functions.

The component variables can be purchased at http://epub.prsgroup.com/products/icrg

2.18.4.51 Accountability and Transparency (iiag_acc)

Long tag: qog_std_ts_iiag_acc

Original tag: iiag_acc

Description:
Accountability
Transparency is one of the four sub-categories that are used to calculate the Security
Rule of Law category score. It consists of five indicators from six data sources.

Variable citation: Mo Ibrahim Foundation. (2020). The Ibrahim Index of African Governance. `http://mo.ibrahim.foundation/iiag/`

2.18.4.52 Anti-corruption (iiag_corr)

Long tag: qog_std_ts_iiag_corr

Original tag: iiag_corr

Description:
Anti-corruption is one of the four sub-categories that are used to calculate the Security
Rule of Law category score. It consists of five indicators from six data sources.

Variable citation: Mo Ibrahim Foundation. (2020). The Ibrahim Index of African Governance. `http://mo.ibrahim.foundation/iiag/`

2.18.4.53 Foundations for Economic Opportunity (iiag_feo)

Long tag: qog_std_ts_iiag_feo

Original tag: iiag_feo

Description:
Foundations for Economic Opportunity is one of the four categories that are used to calculate the Overall Governance score. It consists of four sub-categories, made up of 18 indicators.

Variable citation: Mo Ibrahim Foundation. (2020). The Ibrahim Index of African Governance. `http://mo.ibrahim.foundation/iiag/`

2.18.4.54 Overall Governance (iiag_gov)

Long tag: qog_std_ts_iiag_gov

Original tag: iiag_gov

Description:

The Overall Governance score is calculated by aggregating the four categories: Security
Rule of Law; Participation, Rights and Inclusion; Human Development and Foundations for Economic Opportunity. These categories are made up of 16 sub-categories, consisting of 79 IIAG indicators, from 40 data sources.

Variable citation: Mo Ibrahim Foundation. (2020). The Ibrahim Index of African Governance. `http://mo.ibrahim.foundation/iiag/`

2.18.4.55 Inclusion and Equality (iiag_ie)

Long tag: qog_std_ts_iiag_ie

Original tag: iiag_ie

Description:

Inclusion
Equality is one of the four sub-categories that are used to calculate the Participation, Rights
Inclusion category score. It consists of five indicators from four data sources.

Variable citation: Mo Ibrahim Foundation. (2020). The Ibrahim Index of African Governance. `http://mo.ibrahim.foundation/iiag/`

2.18.4.56 Public Administration (iiag_pa)

Long tag: qog_std_ts_iiag_pa

Original tag: iiag_pa

Description:

Public Administration is one of the four sub-categories that are used to calculate the Foundations for Economic Opportunity category score. It consists of five indicators from six data sources.

Variable citation: Mo Ibrahim Foundation. (2020). The Ibrahim Index of African Governance. `http://mo.ibrahim.foundation/iiag/`

2.18.4.57 Participation, Rights and Inclusion (iiag_pri)

Long tag: qog_std_ts_iiag_pri

Original tag: iiag_pri

Description:

Participation, Rights
Inclusion is one of the four categories that are used to calculate the Overall Governance score. It consists of four sub-categories, made up of 19 indicators.

Variable citation: Mo Ibrahim Foundation. (2020). The Ibrahim Index of African Governance. `http://mo.ibrahim.foundation/iiag/`

2.18.4.58 Rule of Law and Justice (iiag_rolf)

Long tag: qog_std_ts_iiag_rolf

Original tag: iiag_rolf

Description:

Rule of Law
Justice is one of the four sub-categories that are used to calculate the Security
Rule of Law category score. It consists of six indicators from six data sources.

Variable citation: Mo Ibrahim Foundation. (2020). The Ibrahim Index of African Governance. `http://mo.ibrahim.foundation/iiag/`

2.18.4.59 Sustainable Environment (iiag_se)

Long tag: qog_std_ts_iiag_se

Original tag: iiag_se

Description:

Sustainable Environment is one of the four sub-categories that are used to calculate the Human Development category score. It consists of five indicators from ten data sources.

Variable citation: Mo Ibrahim Foundation. (2020). The Ibrahim Index of African Governance. `http://mo.ibrahim.foundation/iiag/`

2.18.4.60 Social Protection (iiag_sp)

Long tag: qog_std_ts_iiag_sp

Original tag: iiag_sp

Description:
Social Protection is one of the four sub-categories that are used to calculate the Human Development category score. It consists of five indicators from eight data sources.

Variable citation: Mo Ibrahim Foundation. (2020). The Ibrahim Index of African Governance. `http://mo.ibrahim.foundation/iiag/`

2.18.4.61 Security and Rule of Law (iiag_srol)

Long tag: qog_std_ts_iiag_srol

Original tag: iiag_srol

Description:
Security
Rule of Law is one of the four categories that are used to calculate the Overall Governance score. It consists of four sub-categories, made up of 21 indicators.

Variable citation: Mo Ibrahim Foundation. (2020). The Ibrahim Index of African Governance. `http://mo.ibrahim.foundation/iiag/`

2.18.4.62 Security and Safety (iiag_ssaf)

Long tag: qog_std_ts_iiag_ssaf

Original tag: iiag_ssaf

Description:
Security
Safety is one of the four sub-categories that are used to calculate the Security
Rule of Law category score. It consists of five indicators from eight data sources.

Variable citation: Mo Ibrahim Foundation. (2020). The Ibrahim Index of African Governance. `http://mo.ibrahim.foundation/iiag/`

2.18.4.63 Hanson Sigman State Capacity Index (lld_capacity)

Long tag: qog_std_ts_lld_capacity

Original tag: lld_capacity

Description:
Hanson and Sigman's State Capacity Estimate. Three dimensions of state capacity that their estimate relies on are extractive capacity, coercive capacity, and administrative capacity. The authors use Bayesian latent variable analysis to estimate state capacity at the conjunction of indicators related to these dimensions.

Variable citation: Hanson, J. K., & Sigman, R. (2021). Leviathans latent dimensions: Measuring state capacity for comparative political research. *The Journal of Politics*, 83(4), 1495–1510

2.18.4.64 Standard Deviation for Hanson Sigman State Capacity Index (lld_capstd)

Long tag: qog_std_ts_lld_capstd

Original tag: lld_capstd

Description:
Standard Deviation for Hanson and Sigman's State Capacity Estimate.

Variable citation: Hanson, J. K., & Sigman, R. (2021). Leviathans latent dimensions: Measuring state capacity for comparative political research. *The Journal of Politics*, 83(4), 1495–1510

2.18.4.65 The Property Right Protection Index (prp_prp)

Long tag: qog_std_ts_prp_prp

Original tag: prp_prp

Description:
The Poperty Rights Index measures (the perception of) the security of property rights, separately from other aspects of the rule of law. It combines all publicly available information on the perception of the security of property rights (18 singular indicators of property rights).

Variable citation: Ouattara, B., & Standaert, S. (2020). Property rights revisited. *European Journal of Political Economy*, 64, 101895. `https://doi.org/https://doi.org/10.1016/j.ejpoleco.2020.101895`

2.18.4.66 Estimated variance of the PRP point estimate (prp_std)

Long tag: qog_std_ts_prp_std

Original tag: prp_std

Description:
Estimated variance of the Property Rights Protection estimate.

Variable citation: Ouattara, B., & Standaert, S. (2020). Property rights revisited. *European Journal of Political Economy*, 64, 101895. `https://doi.org/https://doi.org/10.1016/j.ejpoleco.2020.101895`

2.18.4.67 Sustainable Policies (sgi_pp)

Long tag: qog_std_ts_sgi_pp

Original tag: sgi_pp

Description:
This pillar of the SGI examines each country's sustainable policy performance in terms of three dimensions of sustainable development. If the goal of politics is to promote sustainable development, and if citizens are to be empowered to live their lives in accordance with their own individual talents, then governments must be able to establish and maintain the social, economic and environmental conditions for such well-being and empowerment. The conditions for social progress must be generated by suitable outcomes in certain policy fields. Such outcomes are examined by the Policy Performance pillar, which is comprised of 16 policy fields grouped in terms of economic, social and environmental sustainability. Each policy field is addressed by a qualitative assessment and additional quantitative data. The point here is to examine domestic policymaking as well as the extent to which governments actively contribute to the provision of global public goods. The areas examined are:

1. Economic Policies: economy, labor markets, taxes, budgets, research and innovation, global financial system.
2. Social Policies: education, social inclusion, health, families, pensions, integration policy, safe living conditions, global inequalities.
3. Environmental Policies: environment policy, global environmental protection.

Variable citation: Schiller, C., & Hellmann, T. (2020). Sustainable governance indicators 2020 [Date accessed: 12 December 2021]. *Bertelsmann Stiftung*. `https://www.sgi-network.org`

2.18.4.68 Basic Human Needs (SPI) (spi_bn)

Long tag: qog_std_ts_spi_bn

Original tag: spi_bn

Description:
Basic Human Needs is one of the three components of the SPI, which are used to calculate the overall Social Progress Index. It assesses a population's capacity to survive with adequate nourishment and basic medical care, clean water, sanitation, adequate shelter, and personal safety.

Variable citation: The Social Progress Imperative. (2020). Social progress index. `www.socialprogress.org`

2.18.4.69 Foundations of Wellbeing (SPI) (spi_fob)

Long tag: qog_std_ts_spi_fob

Original tag: spi_fob

Description:
Foundations of Wellbeing is one of the three components of the SPI, which are used to calculate the overall Social Progress Index. It highlights the extent to which a country's residents can gain a basic education, obtain information and communicate freely, benefit from a modern healthcare system, and live in a healthy environment conducive to a long life.

Variable citation: The Social Progress Imperative. (2020). Social progress index. `www.socialprogress.org`

2.18.4.70 Opportunity (SPI) (spi_opp)

Long tag: qog_std_ts_spi_opp

Original tag: spi_opp

Description:
Opportunity is one of the three components of the SPI, which are used to calculate the overall Social Progress Index. Indicators on personal rights, personal freedom and choice, inclusiveness, and access to advanced education are used to assess the level of opportunity.

Variable citation: The Social Progress Imperative. (2020). Social progress index. `www.socialprogress.org`

2.18.4.71 Social Progress Index (spi_ospi)

Long tag: qog_std_ts_spi_ospi

Original tag: spi_ospi

Description:
Overall Social Progress Index. It aims to assess the capacity of a society to meet the basic human needs of its citizens, establish the building blocks that allow citizens and communities to enhance and sustain the quality of their lives, and create the conditions for all individuals to reach their full potential.

Variable citation: The Social Progress Imperative. (2020). Social progress index. `www.socialprogress.org`

2.18.4.72 Corruption Perceptions Index (ti_cpi)

Long tag: qog_std_ts_ti_cpi

Original tag: ti_cpi

Description:
Corruption Perceptions Index. Scale of 0-100 where a 0 equals the highest level of perceived corruption and 100 equals the lowest level of perceived corruption.

Variable citation: Transparency International. (2021). Corruption perception index 2020 [Licensed under CC-BY-ND 4.0]. `http://www.transparency.org/cpi`

2.18.4.73 Corruption Perceptions Index - max range (ti_cpi_max)

Long tag: qog_std_ts_ti_cpi_max

Original tag: ti_cpi_max

Description:
Corruption Perceptions Index - Max Range. Highest possible value of the CPI for a country according to the 95percent confidence interval.

Variable citation: Transparency International. (2021). Corruption perception index 2020 [Licensed under CC-BY-ND 4.0]. `http://www.transparency.org/cpi`

2.18.4.74 Corruption Perceptions Index - max range (old method.) (ti_cpi_max_om)

Long tag: qog_std_ts_ti_cpi_max_om

Original tag: ti_cpi_max_om

Description:
Corruption Perceptions Index - Max Range (Old methodology). Highest possible value of the CPI for a country according to the 95percent confidence interval.

Variable citation: Transparency International. (2021). Corruption perception index 2020 [Licensed under CC-BY-ND 4.0]. `http://www.transparency.org/cpi`

2.18.4.75 Corruption Perceptions Index - min range (ti_cpi_min)

Long tag: qog_std_ts_ti_cpi_min

Original tag: ti_cpi_min

Description:
Corruption Perceptions Index - Min Range. Lowest possible value of the CPI for a country according to the 95percent confidence interval.

Variable citation: Transparency International. (2021). Corruption perception index 2020 [Licensed under CC-BY-ND 4.0]. `http://www.transparency.org/cpi`

2.18.4.76 Corruption Perceptions Index - min range (old method.) (ti_cpi_min_om)

Long tag: qog_std_ts_ti_cpi_min_om

Original tag: ti_cpi_min_om

Description:
Corruption Perceptions Index - Min Range (Old methodology). Lowest possible value of the CPI for a country according to the 95percent confidence interval.

Variable citation: Transparency International. (2021). Corruption perception index 2020 [Licensed under CC-BY-ND 4.0]. `http://www.transparency.org/cpi`

2.18.4.77 Corruption Perceptions Index (old methodology) (ti_cpi_om)

Long tag: qog_std_ts_ti_cpi_om

Original tag: ti_cpi_om

Description:
Corruption Perceptions Index (Old methodology). Scale of 0-10 where a 0 equals the highest level of perceived corruption and 10 equals the lowest level of perceived corruption.

Variable citation: Transparency International. (2021). Corruption perception index 2020 [Licensed under CC-BY-ND 4.0]. `http://www.transparency.org/cpi`

2.18.4.78 Standard Error for Corruption Perceptions Index (ti_se)

Long tag: qog_std_ts_ti_se

Original tag: ti_se

Description:
Standard Error for Corruption Perceptions Index.

Variable citation: Transparency International. (2021). Corruption perception index 2020 [Licensed under CC-BY-ND 4.0]. `http://www.transparency.org/cpi`

2.18.4.79 Academic Freedom Index (vdem_academ)

Long tag: qog_std_ts_vdem_academ

Original tag: vdem_academ

Description:
Academic freedom index. To what extent is academic freedom respected?

Clarifications: Academic freedom is understood as the right of academics, without constriction by prescribed doctrine, to freedom of teaching and discussion, freedom in carrying out research and disseminating and publishing the results thereof, freedom to express freely their opinion about the institution or system in which they work, freedom from institutional censorship and freedom to participate in professional or representative academic bodies (UNESCO 1997 Recommendation concerning the Status of Higher-Education Teaching Personnel). The Academic
Freedom Index is designed to provide an aggregated measure that captures the de facto realization of academic freedom, including the degree to which higher-education institutions are autonomous. Aggregation: The index is formed by point estimates drawn from a Bayesian factor analysis model including the following indicators: freedom to research and teach, freedom of academic exchange and dissemination, institutional autonomy, campus integrity, freedom of academic and cultural expression.

Variable citation: Coppedge, M., Gerring, J., Knutsen, C. H., Lindberg, S. I., Teorell, J., Alizada, N., Altman, D., Bernhard, M., Cornell, A., Fish, M. (2021). The V-Dem measurement model: Latent variable analysis for crossnational and cross-temporal expert-coded data

2.18.4.80 Political corruption index (vdem_corr)

Long tag: qog_std_ts_vdem_corr

Original tag: vdem_corr

Description:
Political corruption. Question: How pervasive is political corruption?

Clarification: The directionality of the V-Dem corruption index runs from less corrupt to more corrupt (unlike the other V-Dem variables that generally run from less democratic to more democratic situation). The corruption index includes measures of six distinct types of corruption that cover both different areas and levels of the polity realm, distinguishing between executive, legislative and judicial corruption. Within the executive realm, the measures also distinguish between corruption mostly pertaining to bribery and corruption due to embezzlement. Finally, they differentiate between corruption in the highest echelons of the executive (at the level of the rulers/cabinet) on the one hand, and in the public sector at large on the other. The measures thus tap into several distinguished types of corruption: both 'petty' and 'grand'; both bribery and theft; both corruption aimed and influencing law making and that affecting implementation. Aggregation: The index is arrived at by taking the average of (a) public sector corruption index; (b) executive corruption index; (c) the indicator for legislative corruption; and (d) the indicator for judicial corruption. In other words, these four different government spheres are weighted equally in the resulting index. V-Dem replaces missing values for countries with no legislature by only taking the average of (a), (b) and (d).

Variable citation: Coppedge, M., Gerring, J., Knutsen, C. H., Lindberg, S. I., Teorell, J., Alizada, N., Altman, D., Bernhard, M., Cornell, A., Fish, M. V-dem [country-year/country-date] dataset v11.1. `https://doi.org/10.23696/vdemds21` Pemstein, D., Marquardt, K. L., Tzelgov, E., Wang, Y.-t., Medzihorsky, J., Krusell, J., Miri, F., & von Römer, J. (2021). The V-Dem measurement model: Latent variable analysis for crossnational and cross-temporal expert-coded data

2.18.4.81 Election vote buying (vdem_elvotbuy)

Long tag: qog_std_ts_vdem_elvotbuy

Original tag: vdem_elvotbuy

Description:

Election vote buying. Question: In this national election, was there evidence of vote and/or turnout buying?

Clarification: Vote and turnout buying refers to the distribution of money or gifts to individuals, families, or small groups in order to influence their decision to vote/not vote or whom to vote for. It does not include legislation targeted at specific constituencies, i.e., "porkbarrel" legislation. V-Dem uses a specifically designed measurement model to provide country-year point estimates, aggregated from multiple codings submitted by country experts by taking disagreement and measurement error into account. In this version of the variable, used in the QoG dataset, V-Dem has linearly translated the measurement model point estimates back to the original ordinal scale of each variable as an interval measure.

Variable citation: Coppedge, M., Gerring, J., Knutsen, C. H., Lindberg, S. I., Teorell, J., Alizada, N., Altman, D., Bernhard, M., Cornell, A., Fish, M. S., Gastaldi, L., Gjerløw, H., Glynn, A., Hicken, A., Hindle, G., Ilchenko, N., Krusell, J., Luhrmann, A., Maerz, S. F., . . . Ziblatt, D. (2021). (2021). The V-Dem measurement model: Latent variable analysis for crossnational and cross-temporal expert-coded data

2.18.4.82 Executive bribery and corrupt exchanges (vdem_exbribe)

Long tag: qog_std_ts_vdem_exbribe

Original tag: vdem_exbribe

Description:

Executive bribery and corrupt exchanges. Question: How routinely do members of the executive (the head of state, the head of government, and cabinet ministers), or their agents, grant favors in exchange for bribes, kickbacks, or other material inducements? V-Dem uses a specifically designed measurement model to provide country-year point estimates, aggregated from multiple codings submitted by country experts by taking disagreement and measurement error into account. In this version of the variable, used in the QoG dataset, V-Dem has linearly translated the measurement model point estimates back to the original ordinal scale of each variable as an interval measure.

Variable citation: Coppedge, M., Gerring, J., Knutsen, C. H., Lindberg, S. I., Teorell, J., Alizada, N., Altman, D., Bernhard, M., Cornell, A., Fish, M. 2.18.4.83 Public sector corrupt exchanges (vdem_excrptps)

Long tag: qog_std_ts_vdem_excrptps

Original tag: vdem_excrptps

Description:

Public sector corrupt exchanges. Question: How routinely do public sector employees grant favors in exchange for bribes, kickbacks, or other material inducements?

Clarification: When responding to this question, we would like you to think about a typical person employed by the public sector, excluding the military. If you think there are large discrepancies between branches of the public sector, between the national/federal and subnational/state level, or between the core bureaucracy and employees working with public service delivery, please try to average them out before stating your response. V-Dem uses a specifically designed measurement model to provide country-year point estimates, aggregated from multiple codings submitted by country experts by taking disagreement and measurement error into account. In this version of the variable, used in the QoG dataset, V-Dem has linearly translated the measurement model point estimates back to the original ordinal scale of each variable as an interval measure.

(2021). The V-Dem measurement model: Latent variable analysis for crossnational and cross-temporal expert-coded data

2.18.4.84 Executive corruption index (vdem_execorr)

Long tag: qog_std_ts_vdem_execorr

Original tag: vdem_execorr

Description:

Executive corruption index. Question: How routinely do members of the executive, or their agents grant

favors in exchange for bribes, kickbacks, or other material inducements, and how often do they steal, embezzle, or misappropriate public funds or other state resources for personal or family use?

Clarification: The directionality of the V-Dem corruption index runs from less corrupt to more corrupt (unlike the other V-Dem variables that generally run from less democratic to more democratic situation). Aggregation: The index is formed by taking the average of the point estimates from a Bayesian factor analysis model of the indicators for executive bribery and executive embezzlement.

Variable citation: Coppedge, M., Gerring, J., Knutsen, C. H., Lindberg, S. I., Teorell, J., Alizada, N., Altman, D., Bernhard, M., Cornell, A., Fish, M. S., Gastaldi, L., Gjerløw, H., Glynn, A., Hicken, A., Hindle, G., Ilchenko, N., Krusell, J., Luhrmann, A., Maerz, S. F., . . . Ziblatt, D. (2021). 2.18.4.89 Control of Corruption, Estimate (wbgi_cce)

Long tag: qog_std_ts_wbgi_cce

Original tag: wbgi_cce

Description:

Control of Corruption - Estimate: "Control of Corruption" measures perceptions of corruption, conventionally defined as the exercise of public power for private gain. The particular aspect of corruption measured by the various sources differs somewhat, ranging from the frequency of "additional payments to get things done", to the effects of corruption on the business environment, to measuring "grand corruption" in the political arena or in the tendency of elite forms to engage in "state capture".

Variable citation: Kaufmann, D., Kraay, A., & Mastruzzi, M. (2010). The worldwide governance indicators: A summary of methodology, data and analytical issues. *World Bank Policy Research Working Paper, 5430*

2.18.4.90 Control of Corruption, Number of Sources (wbgi_ccn)

Long tag: qog_std_ts_wbgi_ccn

Original tag: wbgi_ccn

Description:

Control of Corruption - Number of Sources.

Variable citation: Kaufmann, D., Kraay, A., & Mastruzzi, M. (2010). The worldwide governance indicators: A summary of methodology, data and analytical issues. *World Bank Policy Research Working Paper, 5430*

2.18.4.91 Control of Corruption, Standard Error (wbgi_ccs)

Long tag: qog_std_ts_wbgi_ccs

Original tag: wbgi_ccs

Description:

Control of Corruption - Standard Errors.

Variable citation: Kaufmann, D., Kraay, A., & Mastruzzi, M. (2010). The worldwide governance indicators: A summary of methodology, data and analytical issues. *World Bank Policy Research Working Paper, 5430*

2.18.4.92 Government Effectiveness, Estimate (wbgi_gee)

Long tag: qog_std_ts_wbgi_gee

Original tag: wbgi_gee

Description:

Government Effectiveness - Estimate: "Government Effectiveness" combines into a single grouping responses on the quality of public service provision, the quality of the bureaucracy, the competence of civil servants, the independence of the civil service from political pressures, and the credibility of the government's commitment to policies. The main focus of this index is on "inputs" required for the government to be able to produce and implement good policies and deliver public goods.

Variable citation: Kaufmann, D., Kraay, A., & Mastruzzi, M. (2010). The worldwide governance indicators: A summary of methodology, data and analytical issues. *World Bank Policy Research Working Paper, 5430*

2.18.4.93 Government Effectiveness, Number of Sources (wbgi_gen)

Long tag: qog_std_ts_wbgi_gen

Original tag: wbgi_gen

Description:
Government Effectiveness - Number of Sources.

Variable citation: Kaufmann, D., Kraay, A., & Mastruzzi, M. (2010). The worldwide governance indicators: A summary of methodology, data and analytical issues. *World Bank Policy Research Working Paper, 5430*

2.18.4.94 Government Effectiveness, Standard Error (wbgi_ges)

Long tag: qog_std_ts_wbgi_ges

Original tag: wbgi_ges

Description:
Government Effectiveness - Standard Errors.

Variable citation: Kaufmann, D., Kraay, A., & Mastruzzi, M. (2010). The worldwide governance indicators: A summary of methodology, data and analytical issues. *World Bank Policy Research Working Paper, 5430*

2.18.4.95 CPIA efficiency of revenue mobilization rating (1=low to 6=high) (wdi_effrevmob)

Long tag: qog_std_ts_wdi_effrevmob

Original tag: wdi_effrevmob

Description:
Efficiency of revenue mobilization assesses the overall pattern of revenue mobilization–not only the de facto tax structure, but also revenue from all sources as actually collected.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.4.96 CPIA public sector management and institution cluster average (1=low to 6=high) (wdi_psm)

Long tag: qog_std_ts_wdi_psm

Original tag: wdi_psm

Description:
The public sector management and institutions cluster includes property rights and rule-based governance, quality of budgetary and financial management, efficiency of revenue mobilization, quality of public administration, and transparency, accountability, and corruption in the public sector.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.4.97 CPIA quality of public administration rating (1=low to 6=high) (wdi_qpubadm)

Long tag: qog_std_ts_wdi_qpubadm

Original tag: wdi_qpubadm

Description:
Quality of public administration assesses the extent to which civilian central government staff is structured to design and implement government policy and deliver services effectively.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.4.98 Statistical Capacity score (Overall average) (wdi_statcap)

Long tag: qog_std_ts_wdi_statcap

Original tag: wdi_statcap

Description:
The Statistical Capacity Indicator provides an overview of the capacity of a country's national statistical system based on a diagnostic framework thereby assessing three dimensions: Methodology, Source Data, and Periodicity and Timeliness.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.4.99 Methodology assessment of statistical capacity (0 - 100) (wdi_statcapmet)

Long tag: qog_std_ts_wdi_statcapmet

Original tag: wdi_statcapmet

Description:
The Methodology score measures a country's ability to adhere to internationally recommended standards and methods.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.4.100 Periodicity and timeliness assessment of statistical capacity (0-100) (wdi_statcaptime)

Long tag: qog_std_ts_wdi_statcaptime

Original tag: wdi_statcaptime

Description:
The Periodicity score measures the availability and periodicity of key socioeconomic indicators.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.4.101 CPIA transparency-accountability-corruption in public sector rating (1-6) (wdi_tacpsr)

Long tag: qog_std_ts_wdi_tacpsr

Original tag: wdi_tacpsr

Description:
Transparency, accountability, and corruption in the public sector assess the extent to which the executive can be held accountable for its use of funds and for the results of its actions by the electorate and by the legislature and judiciary, and the extent to which public employees within the executive are required to account for administrative decisions, use of resources, and results obtained. The three main dimensions assessed here are the accountability of the executive to oversight institutions and of public employees for their performance, access of civil society to information on public affairs, and state capture by narrow vested interests.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.4.102 Control of Corruption (wel_coc)

Long tag: qog_std_ts_wel_coc

Original tag: wel_coc

Description:
Meaning: Factor scale from the World Bank's "global governance indicators" measuring the degree of corruption control in a country.
Source: Alexander and Welzel (2011); Alexander, Inglehart and Welzel (2012). Categorization is available in annual measures for most countries of the world from 1996 to 2006.
Scaling: The factor scores are standardized into a range from minimum 0 (for the lowest ever observed corruption control) to maximum 1.0 (for the highest ever observed corruption control), with fractions for intermediate positions. Note: In the original data there exists two different observations for Dominica, the value has been recoded to missing for this country.

Variable citation: Welzel, C. (2013). *Freedom rising: Human empowerment and the quest for emancipation (1st ed.)*. Cambridge University Press

2.18.5 Media

This category includes indicators on the freedom of the media in a given country (freedom of the press, regulation of the media) as well as the public access and confidence in the media.

2.18.5.1 Practice: candidates/pol. parties have fair access to state-owned media outlets (aii_q23)

Long tag: qog_std_ts_aii_q23

Original tag: aii_q23

Description:
Sub-score (0-100). Question no. 23. In practice, candidates/political parties have equitable access to state-owned media outlets.

A 100 score is earned where all the following conditions are met:
1) candidates/political parties have equal access to and receive fair treatment in state-owned media outlets,

2) access is equal in both news reports and editorial commentary, and
3) candidates/political parties are offered the same rates for campaign advertising.

A 50 score is earned where any of the following conditions apply:
1) some candidates/political parties occasionally have more access to and receive better treatment in state-owned media outlets,
2) access is occasionally unequal in either news reports or editorial commentary, or
3) occasionally a candidate/political party is offered better rates for campaign advertising.

A 0 score is earned where at least one of the following conditions apply:
1) some candidates/political parties usually have more access to and/or receive better treatment in state-owned media outlets,
2) access is usually unequal in both news reports or editorial commentary, or
3) some candidates/political parties are usually offered better rates for campaign advertising.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.18.5.2 Practice: media organizations disclose their owner's identities to the public (aii_q52)

Long tag: qog_std_ts_aii_q52

Original tag: aii_q52

Description:

Sub-score (0-100). Question no. 52. In practice, media organizations (print, broadcast, online) disclose the identities of their owners to the public.

A 100 score is earned where all the following conditions are met:
1) major media organizations disclose the names of their owners to the public, and
2) the information is readily available to any citizen (online, in the newspaper, etc.).

A 50 score is earned where any of the following conditions apply:
1) only some major media organizations disclose the name of their owners or they disclose only some of the owners, or
2) the information is public but obtaining it takes two weeks or more.

A 0 score is earned where at least one of the following conditions apply:
1) major media organizations don't disclose the names of their owners, or
2) the information is available only to the government.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.18.5.3 Practice: journalists and editors adhere to professional practices in reporting (aii_q53)

Long tag: qog_std_ts_aii_q53

Original tag: aii_q53

Description:

Sub-score (0-100). Question no. 53. In practice, journalists and editors adhere to strict, professional practices in their reporting.

A 100 score is earned where all the following conditions are met:
1) major media organizations have a formal document with standards guiding journalistic work (Code of Ethics, Editorial Guidelines, Statement of Principles, Code of Conduct, etc.),
2) the document codifies standards for use of anonymous sources, conflicts of interest, and impartiality, and
3) major media organizations enforce this document.

A 50 score is earned where any of the following conditions apply:
1) some but not all major media organizations have a formal document,
2) the formal document contains only one of the three aspects mentioned in 100 (use of anonymous sources, conflicts of interest, and impartiality), or
3) major media organizations enforce this document but some exceptions exist.

A 0 score is earned where at least one of the following conditions apply:
1) most major media organizations lack a formal document,
2) the formal document is vague and doesn't provide guidance on use of anonymous sources, conflicts of interest, and impartiality, or
3) major media organizations rarely or never enforce this document.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.18.5.4 Law: it's legal to report accurate news even if it damages pub. figures' reput. (aii_q54)

Long tag: qog_std_ts_aii_q54

Original tag: aii_q54

Description:

Sub-score (0-100). Question no. 54. In law, it is legal to report accurate news even if it damages the reputation of a public figure.

A 100 score is earned where all the following conditions are met:
1) it is legal to report accurate information on public figures regardless of the damage to their reputations,
2) journalists can only be convicted if malice is proved (a story was published even though the journalist knew it was false or didn't try to verify it).

Note: Public figures include anyone in a position of responsibility in the government or civil service; political leaders; and leaders of civil society organizations, religious groups, trade unions, or large businesses.

A 0 score is earned where no such law exists, or a law exists but it doesn't include all the conditions described in 100. A 0 score is also earned where the law establishes the presumption of bad faith for all comments deemed defamatory and/or the burden of proof falls to journalists.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.18.5.5 Practice: the government does not promote the media's self-censorship (aii_q55)

Long tag: qog_std_ts_aii_q55

Original tag: aii_q55

Description:

Sub-score (0-100). Question no. 55. In practice, there is no prior government restraint (pre-publication censoring) and the government doesn't promote the media's self-censorship.

A 100 score is earned where all the following conditions are met:
1) the government never prevents the publication of information, and
2) the government doesn't promote the media's self-censorship (e.g. with threats, discrimination in the application of tax laws, government advertising, etc.).

A 50 score is earned where any of the following conditions apply:
1) the government occasionally prevents the publication of information, or
2) it occasionally encourages the media to self-censor (e.g. with threats, discrimination in the application of tax laws, government advertising, etc.).

A 0 score is earned where at least one of the following conditions apply:
1) the government usually prevents the publication of information, or
2) it usually encourages the media to self-censor (e.g. with threats, discrimination in the application of tax laws, government advertising, etc.).

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.18.5.6 Practice: ministries and autonomous agencies have websites (aii_q58)

Long tag: qog_std_ts_aii_q58

Original tag: aii_q58

Description:

Sub-score (0-100). Question no. 58. In practice, ministries and autonomous agencies have websites.

A 100 score is earned where all the following conditions are met:
1) all ministries and autonomous agencies (public service providers) have websites, and
2) are updated at least once a month.

A 50 score is earned where any of the following conditions apply:
1) about half of the ministries and autonomous agencies (public service providers) have websites, or
2) the websites are updated less than once a month.

A 0 score is earned where less than 10percent of the ministries and autonomous agencies (public service providers) have websites.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.18.5.7 Practice: the public services regulatory agencies have websites (aii_q59)

Long tag: qog_std_ts_aii_q59

Original tag: aii_q59

Description:

Sub-score (0-100). Question no. 59. In practice, the public services regulatory agencies and the national ombudsman (when and if there is one) have websites.

A 100 score is earned where all the following conditions are met:
1) all the public services regulatory agencies and the national ombudsman (if one exists) have websites,
2) the websites inform users of their rights and how to exercise them in a way that is easy to grasp for users with limited education, and
3) the websites allow users to file complaints online. Note: other digital methods to file complaints, such as mobile apps or phone lines, can also be considered for this indicator.

A 50 score is earned where any of the following conditions apply:
1) some but not all the public services regulatory agencies and the national ombudsman have websites,
2) the websites contain little information about users rights and how to exercise them or the information is difficult to grasp for users with limited education, or
3) the websites don't allow users to file complaints online.

A 0 score is earned where at least one of the following conditions apply:
1) the public services regulatory agencies and the national ombudsman lack websites, or
2) the websites generally lack basic information about users rights or how to exercise them.

2.18.5.8 Freedom on the Net: Limits on content (fhn_fotnloc)

Long tag: qog_std_ts_fhn_fotnloc

Original tag: fhn_fotnloc

Description:

Limits on Content: Analyzes legal regulations on content, technical filtering and blocking of websites, self-censorship, the vibrancy/diversity of online news media, and the use of digital tools for civic mobilization. The score goes from 0 to 100, where 100 represents worst outcomes.

Variable citation: Freedom House. (2021b). Freedom on the net 2020: The global drive to control big tech. `https://freedomhouse.org/report/freedom-net/2021/global-drive-control-big-tech`

2.18.5.9 Freedom on the Net: Obstacles to Access (fhn_fotnota)

Long tag: qog_std_ts_fhn_fotnota

Original tag: fhn_fotnota

Description:

Obstacles to Access: Details infrastructural and economic barriers to access, legal and ownership control over internet service providers, and independence of regulatory bodies. The score goes from 0 to 100, where 100 represents worst outcomes.

Variable citation: Freedom House. (2021b). Freedom on the net 2020: The global drive to control big tech. `https://freedomhouse.org/report/freedom-net/2021/global-drive-control-big-tech`

2.18.5.10 Freedom on the Net: Score (fhn_fotnsc)

Long tag: qog_std_ts_fhn_fotnsc

Original tag: fhn_fotnsc

Description:

Freedom on the Net, Score: Measures the subtle and not-so-subtle ways that governments and non-state actors around the world restrict our intrinsic rights online by looking at Obstacles to Access, Limits on Content and Violations of User Rights. The scores are based on a scale of 0 to 100 with 0 representing the best level of freedom on the net progress and 100 the worst.

Variable citation: Freedom House. (2021b). Freedom on the net 2020: The global drive to control big tech. `https://freedomhouse.org/report/freedom-net/2021/global-drive-control-big-tech`

2.18.5.11 Freedom on the Net: Status (fhn_fotnst)

Long tag: qog_std_ts_fhn_fotnst

Original tag: fhn_fotnst

Description:

Freedom on the Net, Status:

1. Free
2. Partly Free
3. Not Free

Variable citation: Freedom House. (2021b). Freedom on the net 2020: The global drive to control big tech. `https://freedomhouse.org/report/freedom-net/2021/global-drive-control-big-tech`

2.18.5.12 Freedom on the Net: Violation of Users' rights (fhn_fotnvur)

Long tag: qog_std_ts_fhn_fotnvur

Original tag: fhn_fotnvur

Description:

Violations of User Rights: Tackles surveillance, privacy, and repercussions for online speech and activities, such as imprisonment, extralegal harassment, or cyberattacks. The score goes from 0 to 100, where 100 represents worst outcomes.

Variable citation: Freedom House. (2021b). Freedom on the net 2020: The global drive to control big tech. `https://freedomhouse.org/report/freedom-net/2021/global-drive-control-big-tech`

2.18.5.13 Economic Influences over Media Content (2001-2016) (fhp_mcei5)

Long tag: qog_std_ts_fhp_mcei5

Original tag: fhp_mcei5

Description:

Economic Influences over Media Content (2001-2016). This category includes the structure of media ownership; transparency and concentration of ownership; the costs of establishing media as well as any impediments to news production and distribution; the selective withholding of advertising or subsidies by the state or other actors; the impact of corruption and bribery on content; and the extent to which the economic situation in a country or territory affects the development and sustainability of the media.

Variable citation: Freedom House. (2017). Freedom of the press 2017. `https://freedomhouse.org/report/freedompress/freedom-press-2017`

2.18.5.14 Economic Influences over Broadcast Media Content (1993-1995) (fhp_mceib3)

Long tag: qog_std_ts_fhp_mceib3

Original tag: fhp_mceib3

Description:

Economic Influences over Media Content: Broadcast Media (1993-1995): The third sub-category examines the economic environment for the media. This includes the structure of media ownership; transparency and concentration of ownership; the costs of establishing media as well as of production and distribution; the selective withholding of advertising or subsidies by the state or other actors; the impact of corruption and bribery on content; and the extent to which the economic situation in a country impacts the development of the media. The scale of the variable is 0-20. 0 indicates more freedom.

Variable citation: Freedom House. (2017). Freedom of the press 2017. `https://freedomhouse.org/report/freedompress/freedom-press-2017`

2.18.5.15 Economic Influences over Broadcast Media Content (1996-2000) (fhp_mceib4)

Long tag: qog_std_ts_fhp_mceib4

Original tag: fhp_mceib4

Description:

Economic Influences over Media Content: Broadcast Media (1996-2000): The third sub-category examines the economic environment for the media. This includes the structure of media ownership; transparency and concentration of ownership; the costs of establishing media as well as of production and distribution; the selective withholding of advertising or subsidies by the state or other actors; the impact of corruption and bribery on content; and the extent to which the economic situation in a country impacts the development of the media. 2.18.5.18 Laws and Regulations that Influence Media Content (2001-2016) (fhp_mclr5)

Long tag: qog_std_ts_fhp_mclr5

Original tag: fhp_mclr5

Description:

Laws and Regulations that Influence the Media Content (2001-2016). The variable encompasses an examination of both the laws and regulations that could influence media content and the government's inclination to use these laws and legal institutions to restrict the media's ability to operate. Freedom House assesses the positive impact of legal and constitutional guarantees for freedom of expression; the potentially negative aspects of security legislation, the penal code, and other criminal statutes; penalties for libel and defamation; the existence of and ability to use freedom of information legislation; the independence of the judiciary and of official media regulatory bodies; registration requirements for both media outlets and journalists; and the ability of journalists' groups to operate freely. The scale of the variable is 0-30. 0 indicates more freedom.

Variable citation: Freedom House. (2017). Freedom of the press 2017. `https://freedomhouse.org/report/freedompress/freedom-press-2017`

2.18.5.19 Laws and Regulations that Influence the Broadcast Media Content (1993-1995) (fhp_mclrb3)

Long tag: qog_std_ts_fhp_mclrb3

Original tag: fhp_mclrb3

Description:

Laws and Regulations that Influence the Media Content: Broadcast Media (1993-1995). The variable encompasses an examination of both the laws and regulations that could influence media content and the government's inclination to use these laws and legal institutions to restrict the media's ability to operate. Freedom House assesses the positive impact of legal and constitutional guarantees for freedom of expression; the potentially negative aspects of security legislation, the penal code, and other criminal statutes; penalties for libel and defamation; the existence of and ability to use freedom of information legislation; the independence of the judiciary and of official media regulatory bodies; registration requirements for both media outlets and journalists; and the ability of journalists' groups to operate freely. 2.18.5.23 Political Pressures and Controls on Media Content (2001-2016) (fhp_mcpp5)

Long tag: qog_std_ts_fhp_mcpp5

Original tag: fhp_mcpp5

Description:

Political Pressures and Controls on Media Content (2001-2016). The variable evaluates the degree of political control over the content of news media. Issues examined include the editorial independence of both state-owned and privately owned media; access to information and sources; official censorship and self-censorship; the vibrancy of the media; the ability of both foreign and local reporters to cover the news freely and without harassment; and the intimidation of journalists by the state or other actors, including arbitrary detention and imprisonment, violent assaults, and other threats. The scale of the variable is 0-40. 0 indicates more freedom.

3. Not Free

Variable citation: Freedom House. (2017). Freedom of the press 2017. `https://freedomhouse.org/report/freedompress/freedom-press-2017`

2.18.5.41 Press Freedom Index (rsf_pfi)

Long tag: qog_std_ts_rsf_pfi

Original tag: rsf_pfi

Description:
The Press Freedom index measures the amount of freedom journalists and the media have in each country and the efforts made by governments to see that press freedom is respected. It does not take account of all human rights violations, only those that affect press freedom. Neither is it an indicator of the quality of a country's media.

Note: With the exception of the year 2012 the index ranges between 0 (total press freedom) and 100 (no press freedom). However for the 2012 data release RSF changed the scale so that negative values can be and indeed are assigned to countries with more press freedom. We have decided leave the data as is.

2.18.6 Political System

This category includes variables describing the rules of the political system (presidential or parlia- mentary system), the chief executive (years in office), regime type, stability (age of present regime), and checks and balances as well as aspects of federalism.

2.18.6.1 Practice: significant public expenditure receives legislative approval yearly (aii_q31)

Long tag: qog_std_ts_aii_q31

Original tag: aii_q31

Description:

Sub-score (0-100). Question no. 31. In practice, significant public expenditure receives legislative approval on an annual basis.

A 100 score is earned where all the following conditions are met:
1) all significant government expenditure is approved by the legislature on an annual basis in open hearings, and
2) the legislature makes in-year budget amendments to the government proposed budget.
A 100 score is earned even if defense expenditure is approved in closed hearings.

A 50 score is earned where any of the following conditions apply:
1) not all significant government expenditure is approved annually by the legislature or it's not approved in open hearings, or
2) the legislature occasionally doesn't approve in-year budget amendments.

A 0 score is earned where at least one of the following conditions applies:
1) the legislative rarely approves significant government expenditure, or
2) the legislature rarely makes in-year budget amendments to the government proposed budget.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.18.6.2 Law: executive's proposal and approved budget must be published in full yearly (aii_q32)

Long tag: qog_std_ts_aii_q32

Original tag: aii_q32

Description:

Sub-score (0-100). Question no. 32. In law, both the executive's budget proposal and the approved budget must be published in full every year.

A 100 score is earned where in law both the budget proposed by the Executive (draft sent to Congress for approval) and the approved budget must be published in full every year.

A 0 score is earned where no such law exists.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.18.6.3 Practice: a legislative committee exercises oversight of public funds (aii_q34)

Long tag: qog_std_ts_aii_q34

Original tag: aii_q34

Description:

Sub-score (0-100). Question no. 34. In practice, a legislative committee exercises oversight of public funds.

A 100 score is earned where all the following conditions are met:
1) there is a functioning oversight committee that goes into session at least weekly, and
2) the committee has conducted at least one investigation in the last year (even if the investigation hasn't finished at the time of this research).

A 50 score is earned where any of the following conditions apply:
1) there is a functioning oversight committee but it goes into session at least biweekly, or
2) the committee has conducted only one investigation in the last two years.

A 0 score is earned where at least one of the following conditions applies:
1) no functioning oversight committee exists or it exists but it meets monthly or less frequently, or
2) the committee has not conducted any investigation in the last two years.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.18.6.4 Law: citizens have a right to request public information from state bodies (aii_q41)

Long tag: qog_std_ts_aii_q41

Original tag: aii_q41

Description:

Sub-score (0-100). Question no. 41. In law, citizens have a right to request public information from state bodies.

A 100 score is earned where all the following conditions are met:
1) a Constitutional principle guarantees citizens' rights to request and receive access to any public documents and information, and
2) there is a specific access to information law that establishes the process for this right to be implemented.
Note: It's possible to score 100 if national security or individual privacy information is protected, as long as the law defines the parameters and processes to declare what information is protected and they are limited in scope. Just the constitutional protection is not enough to score 100.

A 0 score is earned if there is no such law, or a law exists but it doesn't mandate all the conditions described in 100.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.18.6.5 Practice: citizens can access legislative processes and documents (aii_q43)

Long tag: qog_std_ts_aii_q43

Original tag: aii_q43

Description:

Sub-score (0-100). Question no. 43. In practice, citizens can access legislative processes and documents.

A 100 score is earned where all the following conditions are met:
1) legislative records (at least transcripts of debates/votes, roll call vote, and full text of bills) are accessible to the public online or at the cost of photocopying,
2) most records are available within a day of legislative proceedings, and
3) there is a complete, easily available legislative archive either on or off line.

A 50 score is earned where any of the following conditions apply:
1) occasionally legislative records (at least transcripts of debates/votes, roll call vote, and full text of bills) are not accessible to the public online or the cost is higher than photocopying;
2) records are usually available within a week of legislative proceedings, or
3) citizens have limited access to a legislative archive either on or off line or the archive is not complete.

A 0 score is earned where at least one of the following conditions apply:
1) legislative records (at least transcripts of debates/votes, roll call vote, and full text of bills) are rarely accessible to the public online,
2) records take more than a week after legislative proceedings to be available, or
3) there is no legislative archive or citizens don't have access to it.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.18.6.6 Practice: government doesn't promote the self-censorship of citizens online (aii_q56)

Long tag: qog_std_ts_aii_q56

Original tag: aii_q56

Description:

Sub-score (0-100). Question no. 56. In practice, there is no prior government restraint (pre-publication censoring) of citizen-created content online and the government doesn't promote the self-censorship of citizens online (in blogs, social media, etc.).

A 100 score is earned where all the following conditions are met:
1) the government never prevents the publication online of information by citizens, and
2) the government doesn't promote citizen's self-censorship (e.g. with arrests, threats to prosecute, interrogations, etc.).

A 50 score is earned where any of the following conditions apply:
1) the government occasionally prevents the publication online of information by citizens, or
2) it occasionally encourages citizens to self-censor (e.g. with arrests, threats to prosecute, interrogations, etc.).

A 0 score is earned where at least one of the following conditions apply:
1) the government usually prevents the publication online of information by citizens, or
2) it usually encourages citizens to self-censor (e.g. with arrests, threats to prosecute, interrogations, etc.).

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.18.6.7 Practice: government doesn't block (or ask ICT firms to block) online content (aii_q57)

Long tag: qog_std_ts_aii_q57

Original tag: aii_q57

Description:

Sub-score (0-100). Question no. 57. In practice, the government does not block (or require ICT firms to block) online content.

A 100 score is earned where all the following conditions are met:
1) there is no evidence that politically sensitive websites, keywords, search results or content are filtered, blocked or taken down, and
2) Web users in the country are able to access any website in the world without restriction. A 100 score can still be earned if child pornography or delinquent intellectual property websites have been taken down.

A 50 score is earned where any of the following conditions apply:
1) a small number of sites, keywords or search results on a specific issue are blocked (blocking cannot include widely used Internet tools such as Skype, Google, YouTube, or Facebook/Twitter), or
2) citizens are occasionally unable to access certain websites (national or international).

A 0 score is earned where at least one of the following conditions apply:
1) politically sensitive websites, keywords, search results or content are usually filtered, blocked or taken down, or
2) Web users in the country are usually unable to access many websites without restriction, including widely used Internet tools such as Skype, Google, YouTube, or Facebook/Twitter.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.18.6.8 Official Religion (biu_offrel)

Long tag: qog_std_ts_biu_offrel

Original tag: biu_offrel

Description:

Official Religion measures whether the government has an established religion. For a religion to be established there must be a constitutional clause, a law, or the equivalent explicitly stating that a specific religion or specific religions are the official religions of that state. This variable is coded on the following scale:

0. The State has no official religion
1. The state has multiple established religions
2. The state has one established religion

Variable citation: Fox, J. (2011). Building composite measures of religion and state. *Interdisciplinary Journal of Research on Religion*, 7, 1–39 Fox, J. (2015). *Political secularism, religion, and the state: A time series analysis of worldwide data.* Cambridge University Press Fox, J. (2017). Religion and state dataset: Round 3. `http://www.religionandstate.org/` Fox, J., Finke, R., & Mataic, D. R. (2018). New data and measures on societal discrimination and religious minorities. *Interdisciplinary Journal of Research on Religion*, 2(14)

2.18.6.9 Dichotomous democracy measure (bmr_dem)

Long tag: qog_std_ts_bmr_dem

Original tag: bmr_dem

Description:

Dichotomous democracy measure.

Variable citation: Boix, C., Miller, M. K., & Rosato, S. (2022). Boix-miller-rosato dichotomous coding of democracy, 1800-2020 [UNF:6:6u8JNSHqP+yYKbLzrgFDug== [fileUNF]]. *Harvard Dataverse, V1.* https://doi.org/https://doi.org/10.7910/DVN/FENWWR Boix, C., Miller, M. K., & Rosato, S. (2013). A complete data set of political regimes, 1800-2007. *Comparative Political Studies*, 46(12), 1523–54

2.18.6.10 Number of previous democratic breakdowns (bmr_dembr)

Long tag: qog_std_ts_bmr_dembr

Original tag: bmr_dembr

Description:

Previous number of democratic breakdowns.

Variable citation: Boix, C., Miller, M. K., & Rosato, S. (2022). Boix-miller-rosato dichotomous coding of democracy, 1800-2020 [UNF:6:6u8JNSHqP+yYKbLzrgFDug== [fileUNF]]. *Harvard Dataverse, V1.*

https://doi.org/https://doi.org/10.7910/DVN/FENWWR Boix, C., Miller, M. K., & Rosato, S. (2013). A complete data set of political regimes, 1800-2007. *Comparative Political Studies*, 46(12), 1523–54

2.18.6.11 Consecutive years of current regime type (bmr_demdur)

Long tag: qog_std_ts_bmr_demdur

Original tag: bmr_demdur

Description:
Consecutive years of current regime type.

Variable citation: Boix, C., Miller, M. K., & Rosato, S. (2022). Boix-miller-rosato dichotomous coding of democracy, 1800-2020 [UNF:6:6u8JNSHqP+yYKbLzrgFDug== [fileUNF]]. *Harvard Dataverse, V1.* https://doi.org/https://doi.org/10.7910/DVN/FENWWR Boix, C., Miller, M. K., & Rosato, S. (2013). A complete data set of political regimes, 1800-2007. *Comparative Political Studies*, 46(12), 1523–54

2.18.6.12 Democracy measure, requiring min. 50percent of adult women have the right to vote (bmr_demfsuf)

Long tag: qog_std_ts_bmr_demfsuf

Original tag: bmr_demfsuf

Description:
This adjusts democracy by also requiring that at least half of adult women have the right to vote.

Variable citation: Boix, C., Miller, M. K., & Rosato, S. (2022). Boix-miller-rosato dichotomous coding of democracy, 1800-2020 [UNF:6:6u8JNSHqP+yYKbLzrgFDug== [fileUNF]]. *Harvard Dataverse, V1.* https://doi.org/https://doi.org/10.7910/DVN/FENWWR Boix, C., Miller, M. K., & Rosato, S. (2013). A complete data set of political regimes, 1800-2007. *Comparative Political Studies*, 46(12), 1523–54

2.18.6.13 Dichotomous democracy measure (incl. missing for some countries) (bmr_demmis)

Long tag: qog_std_ts_bmr_demmis

Original tag: bmr_demmis

Description:
This is the same measure as democracy (bmr_dem), except it records an NA for countries occupied during an international war (e.g., the Netherlands 1940-44) or experiencing state collapse during a civil war (e.g., Lebanon 1976-89). The democracy variable instead fills in these years as continuations of the same regime type.

Variable citation: Boix, C., Miller, M. K., & Rosato, S. (2022). Boix-miller-rosato dichotomous coding of democracy, 1800-2020 [UNF:6:6u8JNSHqP+yYKbLzrgFDug== [fileUNF]]. *Harvard Dataverse, V1.* https://doi.org/https://doi.org/10.7910/DVN/FENWWR Boix, C., Miller, M. K., & Rosato, S. (2013). A complete data set of political regimes, 1800-2007. *Comparative Political Studies*, 46(12), 1523–54

2.18.6.14 Democratic transition (bmr_demtran)

Long tag: qog_std_ts_bmr_demtran

Original tag: bmr_demtran

Description:
(-1) Democratic breakdown
(0) No change
(1) Democratic transition

Variable citation: Boix, C., Miller, M. K., & Rosato, S. (2022). Boix-miller-rosato dichotomous coding of democracy, 1800-2020 [UNF:6:6u8JNSHqP+yYKbLzrgFDug== [fileUNF]]. *Harvard Dataverse, V1.* https://doi.org/https://doi.org/10.7910/DVN/FENWWR Boix, C., Miller, M. K., & Rosato, S. (2013). A complete data set of political regimes, 1800-2007. *Comparative Political Studies*, 46(12), 1523–54

2.18.6.15 Democratic Breakdown (bnr_dem)

Long tag: qog_std_ts_bnr_dem

Original tag: bnr_dem

Description:
The variable is a binary coding of all democracies from 1913 until 2005 (included in the QoG dataset are only the years 1946-2005) prepared for use in event history analysis. Countries that meet the minimum conditions for democracy (see below) enter the dataset and are coded "0". When countries cease to meet those minimum criteria they are coded "1" and exit from the dataset. If, after a democratic breakdown, a country again meets our minimum criteria it re-enters the data as a new democratic episode. The time frame onset in 1913 is a function of when the first country (Norway) meets the minimum conditions. All series terminate in either in a breakdown in various years or right censorship in 2005. The minimal conditions are based on Dahl's notion of polyarchy (competitiveness, inclusiveness) combined with Linz and Stepan's stateness criteria.

Competitiveness: Countries that hold elections for both the executive and legislature, and in which more than one party contests the elections, are included. However, we exclude cases in which we detected outcome changing vote fraud, in which there was either extensive or extreme violence that inhibited voters' preference expression, or in which political parties representing a substantial portion of the population were banned.

Inclusiveness: We only include competitive polities in which at least fifty percent of all adult citizens are enfranchised to vote in our set of democracies.

Stateness: We also considered questions of sovereignty, not including colonial states, where founding elections were held prior to the granting of independence, and countries experiencing internal wars in which twenty percent or greater of the population or territory was out of control of the state.

Variable citation: Bernhard, M., Nordstrom, T., & Reenock, C. (2001). Economic performance, institutional intermediation, and democratic breakdown. *Journal of Politics*, 63(3), 775–803

2.18.6.16 No. of chambers in parliament (br_chpar)

Long tag: qog_std_ts_br_chpar

Original tag: br_chpar

Description:

Total number of chambers in parliament.

Variable citation: Bjørnskov, C., & Rode, M. (2020). Regime types and regime change: A new dataset on democracy, coups, and political institutions. *Review of International Organizations*, 15, 531–551

2.18.6.17 Is the country a colony (br_col)

Long tag: qog_std_ts_br_col

Original tag: br_col

Description:

Is the country a colony? (0: No; 1: Yes)

Variable citation: Bjørnskov, C., & Rode, M. (2020). Regime types and regime change: A new dataset on democracy, coups, and political institutions. *Review of International Organizations*, 15, 531–551

2.18.6.18 Is the country communist / socialist (br_com)

Long tag: qog_std_ts_br_com

Original tag: br_com

Description:

Is the country's regime communist / socialist? (0: No; 1: Yes)

Variable citation: Bjørnskov, C., & Rode, M. (2020). Regime types and regime change: A new dataset on democracy, coups, and political institutions. *Review of International Organizations*, 15, 531–551

2.18.6.19 Is the country a democracy (br_dem)

Long tag: qog_std_ts_br_dem

Original tag: br_dem

Description:

Is the country democratic or not? following Cheibub, Ghandi and Vreeland (2010). Dichotomous indicator of democracy based on a minimalist definition. A country is defined as democratic, if elections were conducted, these were free and fair, and if there was a peaceful turnover of legislative and executive offices following those elections. (0: No; 1: Yes)

Variable citation: Bjørnskov, C., & Rode, M. (2020). Regime types and regime change: A new dataset on democracy, coups, and political institutions. *Review of International Organizations*, 15, 531–551

2.18.6.20 Is the monarch female (br_monf)

Long tag: qog_std_ts_br_monf

Original tag: br_monf

Description:

Is the monarch female? (0: No; 1: Yes)

Variable citation: Bjørnskov, C., & Rode, M. (2020). Regime types and regime change: A new dataset on democracy, coups, and political institutions. *Review of International Organizations*, 15, 531–551

2.18.6.21 New constitution implemented (br_newconst)

Long tag: qog_std_ts_br_newconst

Original tag: br_newconst

Description:
Whether a new constitution was implemented (0: No; 1: Yes)

Variable citation: Bjørnskov, C., & Rode, M. (2020). Regime types and regime change: A new dataset on democracy, coups, and political institutions. *Review of International Organizations*, 15, 531–551

2.18.6.22 Is the president female (br_presf)

Long tag: qog_std_ts_br_presf

Original tag: br_presf

Description:
Is the president female? (0: No; 1: Yes)

Variable citation: Bjørnskov, C., & Rode, M. (2020). Regime types and regime change: A new dataset on democracy, coups, and political institutions. *Review of International Organizations*, 15, 531–551

2.18.6.23 Approval of Democracy (bti_aod)

Long tag: qog_std_ts_bti_aod

Original tag: bti_aod

Description:
How strong is the citizens' approval of democratic norms and procedures? 1-10.

1. Approval of democratic norms and procedures is very low.
4. Approval of democratic norms and procedures is fairly low.
7. Approval of democratic norms and procedures is fairly high.
10. Approval of democratic norms and procedures is very high.

Variable citation: Donner, S., Hartmann, H., & Schwarz, R. (2020). *Transformation index of the bertelsmann stiftung 2020*. Bertelsmann Stiftung. `http://www.bti-project.org`

2.18.6.24 Basic Administration (bti_ba)

Long tag: qog_std_ts_bti_ba

Original tag: bti_ba

Description:
To what extent do basic administrative structures exist? 1-10.

1. The administrative structures of the state are limited to keeping the peace and maintaining law and order. Their territorial scope is very limited, and broad segments of the population are not covered.
4. The administrative structures of the state are extending beyond maintaining law and order, but their territorial scope and effectivity are limited.
7. The administrative structures of the state provide most basic public services throughout the country, but their operation is to some extent deficient.
10. The state has a differentiated administrative structure throughout the country which provides all basic public services.

Variable citation: Donner, S., Hartmann, H., & Schwarz, R. (2020). *Transformation index of the bertelsmann stiftung 2020*. Bertelsmann Stiftung. `http://www.bti-project.org`

2.18.6.25 Commitment to Democratic Institutions (bti_cdi)

Long tag: qog_std_ts_bti_cdi

Original tag: bti_cdi

Description:
To what extent are democratic institutions accepted as legitimate by the relevant actors? 1-10.

1. There are no democratic institutions as such (authoritarian regime).
4. Only individual institutions are accepted, while influential actors hold vetoes. Acceptance remains unstable over time.
7. Most democratic institutions are accepted as legitimate by most relevant actors.
10. All democratic institutions are accepted as legitimate by all relevant actors.

Variable citation: Donner, S., Hartmann, H., & Schwarz, R. (2020). *Transformation index of the bertelsmann stiftung 2020*. Bertelsmann Stiftung. `http://www.bti-project.org`

2.18.6.26 Democracy Status (bti_ds)

Long tag: qog_std_ts_bti_ds

Original tag: bti_ds

Description:

Democracy Status: The state of democracy is measured in terms of five criteria; including stateness, political participation, rule of law, stability of the democratic institutions, and political and social integration 1-10.

Variable citation: Donner, S., Hartmann, H., & Schwarz, R. (2020). *Transformation index of the bertelsmann stiftung 2020*. Bertelsmann Stiftung. `http://www.bti-project.org`

2.18.6.27 Effective Power to Govern (bti_epg)

Long tag: qog_std_ts_bti_epg

Original tag: bti_epg

Description:

To what extent do democratically elected political representatives have the effective power to govern, or to what extent are there veto powers and political enclaves? 1-10.

1. Political decision-makers are not democratically elected.
4. Democratically elected political representatives have limited power to govern. Strong veto groups are able to undermine fundamental elements of democratic procedures.
7. Democratically elected political representatives have considerable power to govern. However, individual power groups can set their own domains apart or enforce special-interest policies.
10. Democratically elected political representatives have the effective power to govern. No individual or group is holding any de facto veto power.

Variable citation: Donner, S., Hartmann, H., & Schwarz, R. (2020). *Transformation index of the bertelsmann stiftung 2020*. Bertelsmann Stiftung. `http://www.bti-project.org`

2.18.6.28 International Cooperation (bti_ic)

Long tag: qog_std_ts_bti_ic

Original tag: bti_ic

Description:

The political leadership is willing and able to cooperate with external supporters and organizations. Including "To what extent does the political leadership use the support of international partners to implement a long-term strategy of development?", "To what extent does the government act as a credible and reliable partner in its relations with the international community?" and "To what extent is the political leadership willing and able to cooperate with neighboring countries?".

Variable citation: Donner, S., Hartmann, H., & Schwarz, R. (2020). *Transformation index of the bertelsmann stiftung 2020*. Bertelsmann Stiftung. `http://www.bti-project.org`

2.18.6.29 Level of Difficulty (bti_lod)

Long tag: qog_std_ts_bti_lod

Original tag: bti_lod

Description:

Level of Difficulty in Management: it groups the scores of the structural constraints, the civil society traditions and the conflict intensity of a society 1-10. Higher scores indicate more constraints on management.

Variable citation: Donner, S., Hartmann, H., & Schwarz, R. (2020). *Transformation index of the bertelsmann stiftung 2020*. Bertelsmann Stiftung. `http://www.bti-project.org`

2.18.6.30 No Interference of Religious Dogmas (bti_nird)

Long tag: qog_std_ts_bti_nird

Original tag: bti_nird

Description:

To what extent are legal order and political institutions defined without interference by religious dogmas? 1-10.

1. The state is theocratic. Religious dogmas define legal order and political institutions.
4. Secular and religious norms are in conflict about the basic constitution of the state or are forming a hybrid system.
7. The state is largely secular. However, religious dogmas have considerable influence on legal order and political institutions.
10. The state is secular. Religious dogmas have no noteworthy influence on legal order or political institutions.

Variable citation: Donner, S., Hartmann, H., & Schwarz, R. (2020). *Transformation index of the bertelsmann stiftung 2020*. Bertelsmann Stiftung. `http://www.bti-project.org`

2.18.6.31 Performance of Democratic Institutions (bti_pdi)

Long tag: qog_std_ts_bti_pdi

Original tag: bti_pdi

Description:

Are democratic institutions capable of performing? 1-10.

1. There are no democratic institutions as such (authoritarian regime).
4. Democratic institutions exist, but they are unstable and ineffective.
7. Democratic institutions perform their functions in principle, but often are inefficient due to friction between institutions.
10. The ensemble of democratic institutions is effective and efficient. As a rule, political decisions are prepared, made, implemented and reviewed in legitimate procedures by the appropriate authorities.

Variable citation: Donner, S., Hartmann, H., & Schwarz, R. (2020). *Transformation index of the bertelsmann stiftung 2020*. Bertelsmann Stiftung. `http://www.bti-project.org`

2.18.6.32 Private Property (bti_prp)

Long tag: qog_std_ts_bti_prp

Original tag: bti_prp

Description:

There are adequate conditions to support a functional private sector. Including "To what extent do government authorities ensure well-defined rights of private property and regulate the acquisition, benefits, use and sale of property?" and "To what extent are private companies permitted and protected? Are privatization processes conducted in a manner consistent with market principles?".

Variable citation: Donner, S., Hartmann, H., & Schwarz, R. (2020). *Transformation index of the bertelsmann stiftung 2020*. Bertelsmann Stiftung. `http://www.bti-project.org`

2.18.6.33 Rule of Law (bti_rol)

Long tag: qog_std_ts_bti_rol

Original tag: bti_rol

Description:

Rule of Law: State powers check and balance one another and ensure civil rights. Including "To what extent is there a working separation of powers (checks and balances)", "To what extent does an independent judiciary exist?", "To what extent are public officeholders who abuse their positions prosecuted or penalized?" and "To what extent are civil rights guaranteed and protected, and to what extent can citizens seek redress for violations of these rights?".

Variable citation: Donner, S., Hartmann, H., & Schwarz, R. (2020). *Transformation index of the bertelsmann stiftung 2020*. Bertelsmann Stiftung. `http://www.bti-project.org`

2.18.6.34 Stability of Democratic Institutions (bti_sdi)

Long tag: qog_std_ts_bti_sdi

Original tag: bti_sdi

Description:

Stability of Democratic Institutions: Democratic institutions are capable of performing, and they are adequately accepted as legitimate 1-10.

Variable citation: Donner, S., Hartmann, H., & Schwarz, R. (2020). *Transformation index of the bertelsmann stiftung 2020*. Bertelsmann Stiftung. `http://www.bti-project.org`

2.18.6.35 Separation of Powers (bti_sop)

Long tag: qog_std_ts_bti_sop

Original tag: bti_sop

Description:

To what extent is there a working separation of powers (checks and balances)? 1-10.

1. There is no separation of powers, neither de jure nor de facto.
4. One branch, generally the executive, has an ongoing and either informally or formally confirmed monopoly on power, which may include the colonization of other powers, even though they are institutionally differentiated.
7. The separation of powers generally is in place and functioning. Partial or temporary restrictions of checks and balances occur, but a restoration of balance is sought.
10. There is a clear separation of powers with mutual checks and balances.

Variable citation: Donner, S., Hartmann, H., & Schwarz, R. (2020). *Transformation index of the bertelsmann stiftung 2020*. Bertelsmann Stiftung. `http://www.bti-project.org`

2.18.6.36 Stateness (bti_st)

Long tag: qog_std_ts_bti_st

Original tag: bti_st

Description:

Stateness: There is clarity about the nation's existence as a state with adequately established and differentiated power structures 1-10.

Variable citation: Donner, S., Hartmann, H., & Schwarz, R. (2020). *Transformation index of the bertelsmann stiftung 2020*. Bertelsmann Stiftung. `http://www.bti-project.org`

2.18.6.37 Central Bank Independence unweighted index (cbi_cbiu)

Long tag: qog_std_ts_cbi_cbiu

Original tag: cbi_cbiu

Description:

CBI unweighted index: Raw average of the four components: Chief Executive Officer, Objectives, Policy Formulation and Limitations on lending to the government. It ranges from 0 (minimum) to 1 (maximum) CBI.

Variable citation: Garriga, A. C. (2016). Central bank independence in the world: A new dataset. *International Interactions*, 42(5), 849–868. `https://doi.org/10.1080/03050629.2016.1188813`

2.18.6.38 Central Bank Independence weighted index (cbi_cbiw)

Long tag: qog_std_ts_cbi_cbiw

Original tag: cbi_cbiw

Description:

CBI weighted index: Weighted average of the four components (weights between parentheses), following Cukierman, Webb and Neyapti's (1992) criteria: Chief Executive Officer (0.20), Objectives (0.15), Policy Formulation (0.15), and Limitations on lending to the government (0.5). It ranges from 0 (minimum) to 1 (maximum) CBI.

Variable citation: Garriga, A. C. (2016). Central bank independence in the world: A new dataset. *International Interactions*, 42(5), 849–868. `https://doi.org/10.1080/03050629.2016.1188813`

2.18.6.39 Component 1: Chief executive officer (cbi_cceo)

Long tag: qog_std_ts_cbi_cceo

Original tag: cbi_cceo

Description:

Component 1: Chief executive officer. Weighted average of the following variables (weights between parentheses): Term of office of CEO (0.25), Who appoints the CEO (0.25), Provisions for dismissal of CEO (0.25), CEO allowed to hold another office in government (0.25).

Variable citation: Garriga, A. C. (2016). Central bank independence in the world: A new dataset. *International Interactions*, 42(5), 849–868. `https://doi.org/10.1080/03050629.2016.1188813`

2.18.6.40 Component 4: Limitations on lending to the government (cbi_cll)

Long tag: qog_std_ts_cbi_cll

Original tag: cbi_cll

Description:

Component 4: Limitations on lending to the government. Weighted average of the following variables (weights between parentheses): Limitations on advances (0.30); Limitations on securitized lending (0.20); Who decides the terms of lending to government (0.20); Beneficiaries of central bank lending (0.10); Type of limits when they exist (0.05); Maturity of loans (0.05); Restrictions on interest rates (0.05); Prohibition on central bank lending in primary market to Government (0.05).

Variable citation: Garriga, A. C. (2016). Central bank independence in the world: A new dataset. *International Interactions*, 42(5), 849–868. `https://doi.org/10.1080/03050629.2016.1188813`

2.18.6.41 Component 2: Objectives (cbi_cobj)

Long tag: qog_std_ts_cbi_cobj

Original tag: cbi_cobj

Description:

Component 2: Objectives. Central bank objectives as stated in the law (coding between parentheses): Price stability is the major or only objective, and in case of conflict with other objectives, the Central Bank has final authority (1); Price stability is the only objective (0.8); Price stability is one of the objectives, with other compatible objectives (0.6); Price stability is one of the objectives, with other potentially conflicting goals

(0.4); Central Bank charter does not contain any objective (0.2); Some objectives appear in the charter but price stability is not one of them (0).

Variable citation: Garriga, A. C. (2016). Central bank independence in the world: A new dataset. *International Interactions*, 42(5), 849–868. https://doi.org/10.1080/03050629.2016.1188813

2.18.6.42 Component 3: Policy formulation (cbi_cpol)

Long tag: qog_std_ts_cbi_cpol

Original tag: cbi_cpol

Description:

Component 3: Policy formulation. Weighted average of the following variables (weights between parentheses): Who formulates monetary policy (0.25); Who has the final decision in monetary policy (0.50), Role of the central bank in the budget process (0.25).

Variable citation: Garriga, A. C. (2016). Central bank independence in the world: A new dataset. *International Interactions*, 42(5), 849–868. https://doi.org/10.1080/03050629.2016.1188813

2.18.6.43 Year of law creating the central bank (cbi_create)

Long tag: qog_std_ts_cbi_create

Original tag: cbi_create

Description:

1 indicates the year of the law creating the central bank, 0 otherwise.

Variable citation: Garriga, A. C. (2016). Central bank independence in the world: A new dataset. *International Interactions*, 42(5), 849–868. https://doi.org/10.1080/03050629.2016.1188813

2.18.6.44 Year of a reform that decreased central bank independence (cbi_dec)

Long tag: qog_std_ts_cbi_dec

Original tag: cbi_dec

Description:

1 indicates the year of a reform that decreased CBI, according to the CBI weighted index, 0 otherwise

Variable citation: Garriga, A. C. (2016). Central bank independence in the world: A new dataset. *International Interactions*, 42(5), 849–868. https://doi.org/10.1080/03050629.2016.1188813

2.18.6.45 Effect of the central bank reform on the weighted index (cbi_dir)

Long tag: qog_std_ts_cbi_dir

Original tag: cbi_dir

Description:

Effect of the central bank reform on the CBI weighted index: 1 indicates an increase in CBI; 0 indicates no changes in the level of CBI; 1 indicates the presence of a central bank reform that increased CBI.

Variable citation: Garriga, A. C. (2016). Central bank independence in the world: A new dataset. *International Interactions*, 42(5), 849–868. https://doi.org/10.1080/03050629.2016.1188813

2.18.6.46 Year of a reform that increased central bank independence (cbi_inc)

Long tag: qog_std_ts_cbi_inc

Original tag: cbi_inc

Description:

1 indicates the year of a reform that increased CBI, according to the CBI weighted index, 0 otherwise.

Variable citation: Garriga, A. C. (2016). Central bank independence in the world: A new dataset. *International Interactions*, 42(5), 849–868. https://doi.org/10.1080/03050629.2016.1188813

2.18.6.47 Year of a reform that affects the central bank independence (cbi_ref)

Long tag: qog_std_ts_cbi_ref

Original tag: cbi_ref

Description:

1 indicates the year of a reform that affects CBI, 0 otherwise.

Variable citation: Garriga, A. C. (2016). Central bank independence in the world: A new dataset. *International Interactions*, 42(5), 849–868. https://doi.org/10.1080/03050629.2016.1188813

2.18.6.48 Whether the central bank is a regional organization (cbi_reg)

Long tag: qog_std_ts_cbi_reg

Original tag: cbi_reg

Description:

Indicates whether the central bank is a regional organization (1), or a national central bank (0).

Variable citation: Garriga, A. C. (2016). Central bank independence in the world: A new dataset. *International Interactions*, 42(5), 849–868. `https://doi.org/10.1080/03050629.2016.1188813`

2.18.6.49 Reference in Constitution to Democracy (ccp_democ)

Long tag: qog_std_ts_ccp_democ

Original tag: ccp_democ

Description:

Does the constitution refer to "democracy" or "democratic"?

1. Yes
2. No

Variable citation: Elkins, Z., & Ginsburg, T. (2021). Characteristics of national constitutions, version 3.0 [Last modified: May 20, 2021. Available at comparativeconstitutionsproject.org]. `http://www.comparativeconstitutionsproject.org`

2.18.6.50 Legislative Initiative Allowed (ccp_initiat)

Long tag: qog_std_ts_ccp_initiat

Original tag: ccp_initiat

Description:

Does the constitution provide for the ability of individuals to propose legislative initiatives?

1. Yes
2. No
96. Other

Variable citation: Elkins, Z., & Ginsburg, T. (2021). Characteristics of national constitutions, version 3.0 [Last modified: May 20, 2021. Available at comparativeconstitutionsproject.org]. `http://www.comparativeconstitutionsproject.org`

2.18.6.51 Reference in Constitution to Socialism (ccp_socialsm)

Long tag: qog_std_ts_ccp_socialsm

Original tag: ccp_socialsm

Description:

Does the constitution refer to "socialism" or "socialist"?

1. Yes
2. No
96. Other

Variable citation: Elkins, Z., & Ginsburg, T. (2021). Characteristics of national constitutions, version 3.0 [Last modified: May 20, 2021. Available at comparativeconstitutionsproject.org]. `http://www.comparativeconstitutionsproject.org`

2.18.6.52 Democracy (chga_demo)

Long tag: qog_std_ts_chga_demo

Original tag: chga_demo

Description:

A regime is considered a democracy if the executive and the legislature is directly or indirectly elected by popular vote, multiple parties are allowed, there is de facto existence of multiple parties outside of regime front, there are multiple parties within the legislature, and there has been no consolidation of incumbent advantage (e.g. unconstitutional closing of the lower house or extension of incumbent's term by postponing of subsequent elections). Transition years are coded as the regime that emerges in that year.

0. No Democracy
1. Democracy

Variable citation: Cheibub, J. A., Gandhi, J., & Vreeland, J. R. (2010). Democracy and dictatorship revisited. *Public Choice*, 143(1-2), 67–101

2.18.6.53 Regime Institutions (chga_hinst)

Long tag: qog_std_ts_chga_hinst

Original tag: chga_hinst

Description:

Six-fold classification of political regimes:

0. Parliamentary Democracy.
1. Mixed (semi-presidential) democracy.
2. Presidential democracy.
3. Civilian dictatorship.
4. Military dictatorship.
5. Royal dictatorship.

Variable citation: Cheibub, J. A., Gandhi, J., & Vreeland, J. R. (2010). Democracy and dictatorship revisited. *Public Choice*, 143(1-2), 67–101

2.18.6.54 Satisfaction with Democracy (cses_sd)

Long tag: qog_std_ts_cses_sd

Original tag: cses_sd

Description:

On the whole, are you very satisfied, fairly satisfied, not very satisfied, or not at all satisfied with the way democracy works in [COUNTRY]?

1. Not at all satisfied.
2. Not very satisfied.
3. Fairly satisfied.
4. Very satisfied.

Note: Refused to answer, Don't know and similar answers were coded as missing, and the average are based on the remaining answers.

2.18.6.55 Accountability Transparency (diat_ati)

Long tag: qog_std_ts_diat_ati

Original tag: diat_ati

Description:

Accountability Transparency. The author has 16 separate indicators for the Accountability Transparency Index (six for the measurement of a free media, four for fiscal transparency, and six for political constraints). 1980 is considered to be the base year. The Accountability Transparency Index has 115 countries in 1980, but rising to up to 189 countries towards the end of the period.

2.18.6.56 Information Transparency (diat_iti)

Long tag: qog_std_ts_diat_iti

Original tag: diat_iti

Description:

Information Transparency. Sub-indicators are constructed to reflect the nuances of this type of transparency. Specifically, three sub-components are constructed: (1) the existence of a free and independent media; (2) fiscal (budgetary) transparency; (3) political constraints. The author has 13 separate indicators for the Information Transparency Index (six for the quantity of information, four for the processes that generate that information, and three for the infrastructure required to disseminate that information). 1980 is considered to be the base year. The Information Transparency Index (ITI) has scores for initially 153 countries in 1980, increasing over time to 191 by the year 2010.

2.18.6.57 Transparency Index (diat_ti)

Long tag: qog_std_ts_diat_ti

Original tag: diat_ti

Description:

Transparency Index. Combined index of Information Transparency Index and Accountability Transparency Index.

2.18.6.58 Index of Globalization (dr_ig)

Long tag: qog_std_ts_dr_ig

Original tag: dr_ig

Description:

The overall index of globalization (scale of 1 to 100) is the weighted average of the following variables: economic globalization, social globalization and political globalization (dr_eg, dr_sg and dr_pg). Most weight has been given to economic followed by social globalization.

Variable citation: Gygli, S., Haelg, F., Potrafke, N., & Sturm, J.-E. (2019). The KOF Globalisation Index - Revisited. `https://doi.org/10.1007/s11558-019-09344-2` Dreher, A. (2006). Does globalization affect growth? evidence from a new index of globalization. *Applied Economics*, 38(10), 1091–1110

2.18.6.59 Political Globalization (dr_pg)

Long tag: qog_std_ts_dr_pg

Original tag: dr_pg

Description:

Political globalisation (scale of 1 to 100) regards the de facto segment measured with reference to the number of embassies and international non-governmental organisations (NGOs), along with partici-pation in UN peacekeeping missions. The de jure segment contains variables focussing on membership of international organisations and international treaties.

Variable citation: Gygli, S., Haelg, F., Potrafke, N., & Sturm, J.-E. (2019). The KOF Globalisation Index - Revisited. `https://doi.org/10.1007/s11558-019-09344-2` Dreher, A. (2006). Does globalization affect growth? evidence from a new index of globalization. *Applied Economics*, 38(10), 1091–1110

2.18.6.60 E-Government Index (egov_egov)

Long tag: qog_std_ts_egov_egov

Original tag: egov_egov

Description:

The E-Government Development Index (EGDI) is a weighted average of normalised scores on the three most important dimensions of e-government, namely: scope and quality of online services (Online Service Index, OSI), status of the development of telecommunication infrastructure (Telecommunication Infrastructure Index, TII) and inherent human capital (Human Capital Index, HCI). Each of these sets of indices is in itself a composite measure that can be extracted and analysed independently.

Variable citation: Department of Economic and Social Affairs. (2020). United nations e-government survey. `https://publicadministration.un.org/egovkb/en-us/Reports/UN-E-Government-Survey-2020`

2.18.6.61 E-Participation Index (egov_epar)

Long tag: qog_std_ts_egov_epar

Original tag: egov_epar

Description:

The E-Participation Index (EPI) is derived as a supplementary index to the UN E-Government Survey. It extends the dimension of the Survey by focusing on the use of online services to facilitate provision of information by governments to citizens (e-information sharing), interaction with stakeholders (e-consultation) and engagement in decision-making processes.

A country's EPI reflects the e-participation mechanisms that are deployed by the government as compared to all other countries. The purpose of this measure is not to prescribe any specific practice, but rather to offer insight into how different countries are using online tools in promoting interaction between the government and its people, as well as among the people, for the benefit of all.

Variable citation: Department of Economic and Social Affairs. (2020). United nations e-government survey. `https://publicadministration.un.org/egovkb/en-us/Reports/UN-E-Government-Survey-2020`

2.18.6.62 Human Capital Index (egov_hci)

Long tag: qog_std_ts_egov_hci

Original tag: egov_hci

Description:

The Human Capital Index (HCI) consists of four components:

(i)adult literacy rate;

(ii)the combined primary, secondary and tertiary gross enrolment ratio;
(iii)expected years of schooling; and
(iv)average years of schooling.

Data for HCI components was extracted from the UNESCO-UIS source.

Variable citation: Department of Economic and Social Affairs. (2020). United nations e-government survey. `https://publicadministration.un.org/egovkb/en-us/Reports/UN-E-Government-Survey-2020`

2.18.6.63 Online Service Index (egov_osi)

Long tag: qog_std_ts_egov_osi

Original tag: egov_osi

Description:

The Online Service Index (OSI) values were constructed by researchers, including UN experts and online United Nations Volunteers (UNVs) from over 60 countries with coverage of 66 languages assessed each country's national website in the native language, including the national portal, e-services portal and e-participation portal, as well as the websites of the related ministries of education, labour, social services, health, finance and environment as applicable. The UNVs included qualified graduate students and volunteers from universities in the field of public administration.

Variable citation: Department of Economic and Social Affairs. (2020). United nations e-government survey. `https://publicadministration.un.org/egovkb/en-us/Reports/UN-E-Government-Survey-2020`

2.18.6.64 Telecommunication Infrastructure Index (egov_tii)

Long tag: qog_std_ts_egov_tii

Original tag: egov_tii

Description:

The Telecommunication Infrastructure Index (TII) is an arithmetic average composite of five indicators:

(i) estimated internet users per 100 inhabitants;
(ii) number of main fixed telephone lines per 100 inhabitants;
(iii) number of mobile subscribers per 100 inhabitants;
(iv) number of wireless broadband subscriptions per 100 inhabitants; and
(v) number of fixed broadband subscriptions per 100 inhabitants.

Data for each component was extracted from the ITU source.

Variable citation: Department of Economic and Social Affairs. (2020). United nations e-government survey. `https://publicadministration.un.org/egovkb/en-us/Reports/UN-E-Government-Survey-2020`

2.18.6.65 Level of Democracy (Freedom House/Imputed Polity) (fh_ipolity2)

Long tag: qog_std_ts_fh_ipolity2

Original tag: fh_ipolity2

Description:

Scale ranges from 0-10 where 0 is least democratic and 10 most democratic. Average of Freedom House (fh_pr and fh_cl) is transformed to a scale 0-10 and Polity (p_polity2) is transformed to a scale 0-10. These variables are averaged into fh_polity2. The imputed version has imputed values for countries where data on Polity is missing by regressing Polity on the average Freedom House measure. Hadenius
Teorell (2005) show that this average index performs better both in terms of validity and reliability than its constituent parts.

Variable citation: Freedom House. (2021a). Freedom in the world 2021. `https://freedomhouse.org/report/freedom-world`

2.18.6.66 Level of Democracy (Freedom House/Polity) (fh_polity2)

Long tag: qog_std_ts_fh_polity2

Original tag: fh_polity2

Description:

Scale ranges from 0-10 where 0 is least democratic and 10 most democratic. Average of Freedom House (fh_pr and fh_cl) is transformed to a scale 0-10 and Polity (p_polity2) is transformed to a scale 0-10. These variables are averaged into fh_polity2.

Variable citation: Freedom House. (2021a). Freedom in the world 2021. `https://freedomhouse.org/report/freedom-world`

2.18.6.67 Political Pluralism and Participation (fh_ppp)

Long tag: qog_std_ts_fh_ppp

Original tag: fh_ppp

Description:

Political Pluralism and Participation - This variable encompasses an examination of the right of the people to freely organize in political parties; the existence of an opposition with a realistic possibility to increase its support; the ability of the people to make political choices free from domination by the military, totalitarian parties or other powerful groups; and the existence of full political rights for all minorities. Countries are graded between 0 (worst) and 16 (best).

Variable citation: Freedom House. (2021a). Freedom in the world 2021. `https://freedomhouse.org/report/freedom-world`

2.18.6.68 Political Rights (fh_pr)

Long tag: qog_std_ts_fh_pr

Original tag: fh_pr

Description:

Political Rights Rating - Political rights enable people to participate freely in the political process, including the right to vote freely for distinct alternatives in legitimate elections, compete for public office, join political parties and organizations, and elect representatives who have a decisive impact on public policies and are accountable to the electorate. The specific list of rights considered varies over the years. Countries are graded between 1 (most free) and 7 (least free).

Variable citation: Freedom House. (2021a). Freedom in the world 2021. `https://freedomhouse.org/report/freedom-world`

2.18.6.69 Freedom Status (fh_status)

Long tag: qog_std_ts_fh_status

Original tag: fh_status

Description:

1. Free
2. Partly Free
3. Not Free

Until 2003, countries whose combined average ratings for Political Rights and Civil Liberties fell between 1.0 and 2.5 were designated "Free"; between 3.0 and 5.5 "Partly Free", and between 5.5 and 7.0 "Not Free". Since then, countries whose ratings average 1.0 to 2.5 are considered "Free", 3.0 to 5.0 "Partly Free", and 5.5 to 7.0 "Not Free".

Variable citation: Freedom House. (2021a). Freedom in the world 2021. `https://freedomhouse.org/report/freedom-world`

2.18.6.70 Corruption Perception: Political Parties (gcb_ppa)

Long tag: qog_std_ts_gcb_ppa

Original tag: gcb_ppa

Description:

To what extent do you perceive the following categories in this country to be affected by corruption? Political parties. 1 (Not at all corrupt) - 5 (Extremely corrupt).

Variable citation: Transparency International (2017). Global corruption barometer 9th edition. `https://www.transparency.org/research/gcb`

2.18.6.71 Corruption Perception: Parliament (gcb_pparl)

Long tag: qog_std_ts_gcb_pparl

Original tag: gcb_pparl

Description:

To what extent do you perceive the following categories in this country to be affected by corruption? Parliament. 1 (Not at all corrupt) - 5 (Extremely corrupt).

Variable citation: Transparency International (2017). Global corruption barometer 9th edition. `https://www.transparency.org/research/gcb`

2.18.6.72 Global Gender Gap Political Empowerment subindex (gggi_pes)

Long tag: qog_std_ts_gggi_pes

Original tag: gggi_pes

Description:

Political Empowerment (0 to 1, where 1 indicates no gap). This subindex measures the gap between men and

women at the highest level of political decision-making through the ratio of women to men in ministerial positions and the ratio of women to men in parliamentary positions. In addition, we've included the ratio of women to men in terms of years in executive office (prime minister or president) for the last 50 years. A clear drawback in this category is the absence of any indicators capturing differences between the participation of women and men at local levels of government. Should such data become available at a globally comparative level in future years, it will be considered for inclusion in the Index.

Variable citation: World Economic Forum. (2021). The global gender gap report 2021 [All Rights Reserved]. `https://www.weforum.org/reports/ab6795a1-960c-42b2-b3d5-587eccda6023`

2.18.6.73 Parliamentarism (gtm_parl)

Long tag: qog_std_ts_gtm_parl

Original tag: gtm_parl

Description:

The parliamentary/presidential distinction is conceptualized as a continuum with two dimensions: (a) the degree of separation (independence) between president and parliament (unity = parliamentary, separation = presidential) and, if there is any separation at all, (b) the relative power of the two players (the more power the president possesses, the more presidential is the resulting system). This complex reality is captured with a three-part coding scheme:

0. Presidential
1. Semi-presidential
2. Parliamentary

2.18.6.74 Unitarism (gtm_unit)

Long tag: qog_std_ts_gtm_unit

Original tag: gtm_unit

Description:

Average of Nonfederalism and Nonbicameralism: Nonfederalism is coded as 0 = federal (elective regional legislatures plus conditional recognition of subnational authority), 1 = semifederal (where there are elective legislatures at the regional level but in which constitutional sovereignty is reserved to the national government), or 2 = non-federal. Nonbicameralism is coded as 0 = strong bicameral (upper house has some effective veto power; the two houses are incongruent), 1 = weak bicameral (upper house has some effective veto power, though not necessarily a formal veto; the two houses are congruent), or 2 = unicameral (no upper house or weak upper house).

2.18.6.75 Duration of Autocratic Regime (gwf_duration)

Long tag: qog_std_ts_gwf_duration

Original tag: gwf_duration

Description:

Time-varying duration of autocratic regime up to time t.

Variable citation: Geddes, B., Wright, J., & Frantz, E. (2014). Autocratic breakdown and regime transitions: A new data set. *Perspectives on Politics*, 12(2), 313–331

2.18.6.76 Regime Failure (gwf_fail)

Long tag: qog_std_ts_gwf_fail

Original tag: gwf_fail

Description:

Binary indicator of autocratic regime failure.

Variable citation: Geddes, B., Wright, J., & Frantz, E. (2014). Autocratic breakdown and regime transitions: A new data set. *Perspectives on Politics*, 12(2), 313–331

2.18.6.77 Regime Failure - Subsequent Regime Type (gwf_failsub)

Long tag: qog_std_ts_gwf_failsub

Original tag: gwf_failsub

Description:

Categorical variable marking the subsequent regime type:

0. No regime failure at duration time t and regime still in power December 31, 2010
1. Subsequent regime is democracy
2. Subsequent regime is autocratic
3. Subsequent regime is warlord, foreign-occupied or ceases to exist

Variable citation: Geddes, B., Wright, J., & Frantz, E. (2014). Autocratic breakdown and regime transitions: A new data set. *Perspectives on Politics*, 12(2), 313–331

2.18.6.78 Regime Failure - Ending Type (gwf_failtype)

Long tag: qog_std_ts_gwf_failtype

Original tag: gwf_failtype

Description:

Categorical variable marking how the autocratic regime ends:

0. Regime still in power on December 31, 2010
1. Regime insiders change rules of regime
2. Incumbent loses elections
3. No incumbent runs in competitive election won by opponent
4. Popular uprising
5. Military coup
6. Insurgents, revolutionaries, or combatants fighting a civil war
7. Foreign imposition or invasion
8. New autocratic leader selected, changes rules, and remains in power
9. State ceases to exist, ends or government fails to control most of the country's territory

Variable citation: Geddes, B., Wright, J., & Frantz, E. (2014). Autocratic breakdown and regime transitions: A new data set. *Perspectives on Politics*, 12(2), 313–331

2.18.6.79 Regime Failure - Level of Violence (gwf_failviolent)

Long tag: qog_std_ts_gwf_failviolent

Original tag: gwf_failviolent

Description:

Categorical variable marking the level of violence during the autocratic regime failure event:

0: Regime still in power on December 31, 2010
1. No deaths
2. 1-25 deaths
3. 26-1000 deaths
4. >1000

Variable citation: Geddes, B., Wright, J., & Frantz, E. (2014). Autocratic breakdown and regime transitions: A new data set. *Perspectives on Politics*, 12(2), 313–331

2.18.6.80 Regime Type (gwf_regimetype)

Long tag: qog_std_ts_gwf_regimetype

Original tag: gwf_regimetype

Description:

Autocratic regime type:

1. Monarchy
2. Personal
3. Military
4. Party
5. Party-Personal
6. Party-Military
7. Military-Personal
8. Party-Personal-Military
9. Oligarchy
10. Indirect Military

Variable citation: Geddes, B., Wright, J., & Frantz, E. (2014). Autocratic breakdown and regime transitions: A new data set. *Perspectives on Politics*, 12(2), 313–331

2.18.6.81 Independent Sub-Federal Unit (h_f)

Long tag: qog_std_ts_h_f

Original tag: h_f

Description:

Dummy variable coded 1 if there are independent sub-federal units (states, provinces, regions etc.) that impose substantive constraints on national fiscal policy.

Variable citation: Henisz, W. J. (2017). The Political Constraint Index (POLCON) Dataset 2017 release. `https://mgmt.wharton.upenn.edu/profile/1327`

2.18.6.82 Legislative Chamber (h_l1)

Long tag: qog_std_ts_h_l1

Original tag: h_l1

Description:

Dummy variable coded 1 if there is an effective legislative chamber (based on information from Polity's Executive Constraints, p_xconst).

Variable citation: Henisz, W. J. (2017). The Political Constraint Index (POLCON) Dataset 2017 release. `https://mgmt.wharton.upenn.edu/profile/1327`

2.18.6.83 Political Constraints Index III (h_polcon3)

Long tag: qog_std_ts_h_polcon3

Original tag: h_polcon3

Description:

This index measures the feasibility of policy change, i.e. the extent to which a change in the prefer-ences of any one political actor may lead to a change in government policy. The index is composed from the following information: the number of independent branches of government with veto power over policy change, counting the executive and the presence of an effective lower and upper house in the legislature (more branches leading to more constraint); the extent of party alignment across branches of government, measured as the extent to which the same party or coalition of parties control each branch (decreasing the level of constraint); and the extent of preference heterogeneity within each legislative branch, measured as legislative fractionalization in the relevant house (increasing constraint for aligned executives, decreasing it for opposed executives). The index scores are derived from a simple spatial model and theoretically ranges from 0 to 1, with higher scores indicating more political constraint and thus less feasibility of policy change. Note that the coding reflects information as of January 1 in any given year. Henisz (2002) uses this index to demonstrate that political environments that limit the feasibility of policy change are an important determinant of investment in infrastructure.

Variable citation: Henisz, W. J. (2017). The Political Constraint Index (POLCON) Dataset 2017 release. `https://mgmt.wharton.upenn.edu/profile/1327`

2.18.6.84 Political Constraints Index V (h_polcon5)

Long tag: qog_std_ts_h_polcon5

Original tag: h_polcon5

Description:

This index follows the same logic as Political Constraints Index III (h_polcon3) but also includes two additional veto points: the judiciary and sub-federal entities. Note that the coding reflects in-formation as of January 1 in any given year. Henisz (2000) uses this index to measure the impact on cross-national growth rates of a government's ability to provide credible commitment.

Variable citation: Henisz, W. J. (2017). The Political Constraint Index (POLCON) Dataset 2017 release. `https://mgmt.wharton.upenn.edu/profile/1327`

2.18.6.85 HRV Index (hrv_index)

Long tag: qog_std_ts_hrv_index

Original tag: hrv_index

Description:

The point estimate of the HRV index. The HRV transparency index measures the availability of credible aggregate economic data that a country discloses to the public.

2.18.6.86 HRV Index: Lower bound of point estimate (hrv_lb)

Long tag: qog_std_ts_hrv_lb

Original tag: hrv_lb

Description:

The estimated lower bound of HRV index.

2.18.6.87 HRV Index: Standard deviation of point estimate (hrv_sd)

Long tag: qog_std_ts_hrv_sd

Original tag: hrv_sd

Description:

The standard deviation of the HRV index.

2.18.6.88 HRV Index: Upper bound of point estimate (hrv_ub)

Long tag: qog_std_ts_hrv_ub

Original tag: hrv_ub

Description:
The estimated upper bound of the HRV index.

2.18.6.89 Regime Type (ht_regtype)

Long tag: qog_std_ts_ht_regtype

Original tag: ht_regtype

Description:
This typology of authoritarian regimes is based on a distinction between three modes of political power maintenance (probably the three most widely used throughout history): hereditary succession (lineage), corresponding to monarchies; the actual or threatened use of military force, corresponding to military regimes; and popular elections, designating electoral regimes. Among the latter we distinguish among no-party regimes (where all parties are prohibited), one-party regimes (where all but one party is prohibited), and limited multiparty regimes (where multiple parties are allowed but the system still does not pass as democratic); a subtype of these regimes where no parties are present, although not being prohibited, are coded as "partyless" regimes. A subtype of military regimes are coded "rebel regimes", where a rebel movement has taken power by military means. We also code hybrids (or amalgams) combining elements from more than one regime type, as well as several minor types of regimes: "theocracies", "transitional" regimes, "civil war", foreign "occupation", and a residual "other" category. Using the mean of the Freedom House and Polity scales (fh_ipolity2), the line between democracies and autocracies is drawn at 7.5. This threshold value was chosen by estimating the mean cutoff point separating democracy from autocracy in five well-known categorical measures of democracy: those of Przeworski et al. (2000), Mainwaring et al. (2001), and Reich (2002), together with Freedom House's and Polity's own categorical thresholds for democracy.

1. Limited Multiparty
2. Partyless
3. No-Party
4. Military
5. Military No-Party
6. Military Multiparty
7. Military One-party
8. One-Party
9. Other
16. One-Party Monarchy
17. Monarchy
18. Rebel Regime
19. Civil War
20. Occupation
21. Theocracy
22. Transitional Regime
23. No-Party Monarchy
24. Multiparty Monarchy
25. Multiparty-Occupied
100. Democracy

Variable citation: Wahman, M., Teorell, J., & Hadenius, A. (2013). Authoritarian regime types revisited: Updated data in comparative perspective. *Contemporary Politics*, 19(1), 19–34 Hadenius, A., & Teorell, J. (2007). Pathways from authoritarianism. *Journal of Democracy*, 18(1), 143–157 Teorell, J., & Wahman, M. (2018). Institutional stepping stones for democracy: How and why multipartyism enhances democratic change. *Democratization*, 25(1), 78–97

2.18.6.90 Regime Type (simplified) (ht_regtype1)

Long tag: qog_std_ts_ht_regtype1

Original tag: ht_regtype1

Description:
A simplified, collapsed version of ht_regtype, where all monarchical regimes with amalgams [ht_regtype =16, 17, 23 or 24] are treated as monarchies, all military regimes with sub-types and amalgams [ht_regtype=4, 5, 6, 7 or 18] are treated as military regimes, and multiparty regimes with sub-types are treated as multiparty regimes [ht_regtype=1 or 2]. Only pure noparty [ht_regtype=3] and one-party [ht_regtype=8] regimes are treated as no-party and one-party regimes, respectively. The minor types [ht_regtype=9, 19, 20, 21, 22 or 25] are treated as other.

1. Monarchy
2. Military
3. One party
4. Multi-party
9. No-party
99. Other
100. Democracy

Variable citation: Wahman, M., Teorell, J., & Hadenius, A. (2013). Authoritarian regime types revisited: Updated

data in comparative perspective. *Contemporary Politics*, 19(1), 19–34 Hadenius, A., & Teorell, J. (2007). Pathways from authoritarianism. *Journal of Democracy*, 18(1), 143–157 Teorell, J., & Wahman, M. (2018). 2.18.6.91 Appointment of Executive (iaep_ae)

Long tag: qog_std_ts_iaep_ae

Original tag: iaep_ae

Description:

Is there an executive appointed either by a PM (that is, an executive who is also a member of the legislature) or a president (an independently selected executive)?

0. No
1. Yes

Source: IAEP (Wig et al., 2015)

Variable citation: Wig, T., Hegre, H., & Regan, P. M. (2015). Updated data on institutions and elections 1960–2012: Presenting the iaep dataset version 2.0. *Research & Politics*, 2(2). `https://doi.org/10.1177/2053168015579120`

2.18.6.92 Appointment of Regional Representatives (iaep_arr)

Long tag: qog_std_ts_iaep_arr

Original tag: iaep_arr

Description:

This variable examine the relationship between the central and regional governments, those which are immediately below the central government. We focus exclusively on states or provincial levels of government, municipalities are not coded. In practice, do regions or provinces:

1. Appoint, elect or otherwise choose their own representatives autonomous from decisions by the central government
2. Have their administrators appointed by the central government
3. No regional/provincial governments

Source: IAEP (Wig et al., 2015)

Variable citation: Wig, T., Hegre, H., & Regan, P. M. (2015). Updated data on institutions and elections 1960–2012: Presenting the iaep dataset version 2.0. *Research & Politics*, 2(2). `https://doi.org/10.1177/2053168015579120`

2.18.6.93 Constitutional Court (iaep_cc)

Long tag: qog_std_ts_iaep_cc

Original tag: iaep_cc

Description:

According to the constitution, does the country have a national constitutional court? In some cases, a council with the powers of a constitutional court may exist, though it may not be part of the formal judiciary. In such cases, this non-judicial council with the powers of a constitutional court is coded as the constitutional court.

0. No
1. Yes

Source: IAEP (Wig et al., 2015)

Variable citation: Wig, T., Hegre, H., & Regan, P. M. (2015). Updated data on institutions and elections 1960–2012: Presenting the iaep dataset version 2.0. *Research & Politics*, 2(2). `https://doi.org/10.1177/2053168015579120`

2.18.6.94 Constitutional Court Rules on Executive Actions (iaep_ccrea)

Long tag: qog_std_ts_iaep_ccrea

Original tag: iaep_ccrea

Description:

Can the court rule on executive actions?

0. No
1. Yes

Source: IAEP (Wig et al., 2015)

Variable citation: Wig, T., Hegre, H., & Regan, P. M. (2015). Updated data on institutions and elections 1960–2012: Presenting the iaep dataset version 2.0. *Research & Politics*, 2(2). https://doi.org/10.1177/2053168015579120

2.18.6.95 Constitutional Court Rules on Legislative Actions (iaep_ccrla)

Long tag: qog_std_ts_iaep_ccrla

Original tag: iaep_ccrla

Description:

Can the court rule on legislative actions?

0. No
1. Yes

Source: IAEP (Wig et al., 2015)

Variable citation: Wig, T., Hegre, H., & Regan, P. M. (2015). Updated data on institutions and elections 1960–2012: Presenting the iaep dataset version 2.0. *Research & Politics*, 2(2). https://doi.org/10.1177/2053168015579120

2.18.6.96 Executive Can Change Domestic Taxes (iaep_eccdt)

Long tag: qog_std_ts_iaep_eccdt

Original tag: iaep_eccdt

Description:

Can an executive change domestic taxes (excluding import/export tariffs) without legislative approval?

0. No
1. Yes

Source: IAEP (Wig et al., 2015)

Variable citation: Wig, T., Hegre, H., & Regan, P. M. (2015). Updated data on institutions and elections 1960–2012: Presenting the iaep dataset version 2.0. *Research & Politics*, 2(2). https://doi.org/10.1177/2053168015579120

2.18.6.97 Executive Can Dissolve Legislature (iaep_ecdl)

Long tag: qog_std_ts_iaep_ecdl

Original tag: iaep_ecdl

Description:

According to the constitution, can an executive dissolve the legislature?

0. No
1. Yes

Source: IAEP (Wig et al., 2015)

Variable citation: Wig, T., Hegre, H., & Regan, P. M. (2015). Updated data on institutions and elections 1960–2012: Presenting the iaep dataset version 2.0. *Research & Politics*, 2(2). https://doi.org/10.1177/2053168015579120

2.18.6.98 Executive is Member of Legislature (iaep_eml)

Long tag: qog_std_ts_iaep_eml

Original tag: iaep_eml

Description:

Is there an executive who is also a member of the legislature (like a prime minister, for example)? We consider membership in the legislature if either an explicit rule exists which requires an executive to maintain a seat in the legislature, or if practice and/or convention determines membership.

0. No
1. Yes

Source: IAEP (Wig et al., 2015)

Variable citation: Wig, T., Hegre, H., & Regan, P. M. (2015). Updated data on institutions and elections 1960–2012: Presenting the iaep dataset version 2.0. *Research & Politics*, 2(2). https://doi.org/10.1177/2053168015579120

2.18.6.99 Executive Veto Power (iaep_evp)

Long tag: qog_std_ts_iaep_evp

Original tag: iaep_evp

Description:

Does an executive have constitutional veto power over laws passed by the legislature?

0. No
1. Yes

Source: IAEP (Wig et al., 2015)

Variable citation: Wig, T., Hegre, H., & Regan, P. M. (2015). Updated data on institutions and elections 1960–2012: Presenting the iaep dataset version 2.0. *Research & Politics*, 2(2). https://doi.org/10.1177/2053168015579120

2.18.6.100 Legislature Approves Budget (iaep_lap)

Long tag: qog_std_ts_iaep_lap

Original tag: iaep_lap

Description:

Does an executive have to secure legislative approval for the budget?

0. No
1. Yes

Source: IAEP (Wig et al., 2015)

Variable citation: Wig, T., Hegre, H., & Regan, P. M. (2015). Updated data on institutions and elections 1960–2012: Presenting the iaep dataset version 2.0. *Research & Politics*, 2(2). https://doi.org/10.1177/2053168015579120

2.18.6.101 Legislature Can Remove Executive (iaep_lcre)

Long tag: qog_std_ts_iaep_lcre

Original tag: iaep_lcre

Description:

According to the constitution, can the legislature remove an executive from office?

0. No
1. Yes

Source: IAEP (Wig et al., 2015)

Variable citation: Wig, T., Hegre, H., & Regan, P. M. (2015). Updated data on institutions and elections 1960–2012: Presenting the iaep dataset version 2.0. *Research & Politics*, 2(2). https://doi.org/10.1177/2053168015579120

2.18.6.102 Some other executive have the power to introduce legislation (iaep_lego)

Long tag: qog_std_ts_iaep_lego

Original tag: iaep_lego

Description:

Does some other executive have the power to introduce legislation in the legislature?

0. No
1. Yes

Source: IAEP (Wig et al., 2015)

Variable citation: Wig, T., Hegre, H., & Regan, P. M. (2015). Updated data on institutions and elections 1960–2012: Presenting the iaep dataset version 2.0. *Research & Politics*, 2(2). https://doi.org/10.1177/2053168015579120

2.18.6.103 Legislature's Ratification of International Treaties (iaep_lrit)

Long tag: qog_std_ts_iaep_lrit

Original tag: iaep_lrit

Description:

Does the legislature have the constitutional authority to ratify international treaties negotiated by an executive?

0. No authority

1. One chamber approval necessary
2. Both chambers' approval necessary.

Source: IAEP (Wig et al., 2015)

Variable citation: Wig, T., Hegre, H., & Regan, P. M. (2015). Updated data on institutions and elections 1960–2012: Presenting the iaep dataset version 2.0. *Research & Politics*, 2(2). https://doi.org/10.1177/2053168015579120

2.18.6.104 Legislature Veto Power (iaep_lvp)

Long tag: qog_std_ts_iaep_lvp

Original tag: iaep_lvp

Description:

Does the legislature have the constitutional power to stop executive action, in effect a legislative veto?

0. No
1. Yes

Source: IAEP (Wig et al., 2015)

Variable citation: Wig, T., Hegre, H., & Regan, P. M. (2015). Updated data on institutions and elections 1960–2012: Presenting the iaep dataset version 2.0. *Research & Politics*, 2(2). https://doi.org/10.1177/2053168015579120

2.18.6.105 Official State Party (iaep_osp)

Long tag: qog_std_ts_iaep_osp

Original tag: iaep_osp

Description:

Is there an official state party?

0. No
1. Yes

Source: IAEP (Wig et al., 2015)

Variable citation: Wig, T., Hegre, H., & Regan, P. M. (2015). Updated data on institutions and elections 1960–2012: Presenting the iaep dataset version 2.0. *Research & Politics*, 2(2). https://doi.org/10.1177/2053168015579120

2.18.6.106 Unitary or Federal State (iaep_ufs)

Long tag: qog_std_ts_iaep_ufs

Original tag: iaep_ufs

Description:

This variable examines the relationship between the central and regional governments, those which are immediately below the central government. We focus exclusively on states or provincial levels of government, municipalities are not coded. Is the government structure a:

1. Unitary system
2. Confederation
3. Federal system

Source: IAEP (Wig et al., 2015)

Variable citation: Wig, T., Hegre, H., & Regan, P. M. (2015). Updated data on institutions and elections 1960–2012: Presenting the iaep dataset version 2.0. *Research & Politics*, 2(2). https://doi.org/10.1177/2053168015579120

2.18.6.107 Who Removes Members of Constitutional Court (iaep_wrmcc)

Long tag: qog_std_ts_iaep_wrmcc

Original tag: iaep_wrmcc

Description:

If members of the court can be removed, by whom? Here, the term "court itself" may refer to another court in the judiciary, not necessarily the constitutional court itself.

1. Legislature
2. Executive
3. Requires both legislature and executive action

4. Vote of general public
5. Court itself

Source: IAEP (Wig et al., 2015)

Variable citation: Wig, T., Hegre, H., & Regan, P. M. (2015). Updated data on institutions and elections 1960–2012: Presenting the iaep dataset version 2.0. *Research & Politics*, 2(2). https://doi.org/10.1177/2053168015579120

2.18.6.108 Cluster memberships based on means (kun_cluster)

Long tag: qog_std_ts_kun_cluster

Original tag: kun_cluster

Description:
Cluster membership based on means.

Variable citation: Kuncic, A. (2014). Institutional quality dataset. *Journal of Institutional Economics*, 10(01), 135–161. https://doi.org/10.1017/S1744137413000192

2.18.6.109 Absolute political institutional quality (simple averages) (kun_polabs)

2.18.6.113 Classification of Executives (no_ce)

Long tag: qog_std_ts_no_ce

Original tag: no_ce

Description:
Classification of Executives:

1. Parliamentary Monarchy
2. Presidential Republic

3. Mixed Executive
4. Monarchy
5. Military State

Variable citation: Norris, P. (2009). Democracy Timeseries Data Release 3.0. `http://www.hks.harvard.edu/fs/pnorris/Data/Data.htm`

2.18.6.114 Unitary or Federal State (no_ufs)

Long tag: qog_std_ts_no_ufs

Original tag: no_ufs

Description:

Unitary or Federal State:

1. Unitary
2. Hybrid unions
3. Federal

Variable citation: Norris, P. (2009). Democracy Timeseries Data Release 3.0. `http://www.hks.harvard.edu/fs/pnorris/Data/Data.htm`

2.18.6.115 Regime Durability (p_durable)

Long tag: qog_std_ts_p_durable

Original tag: p_durable

Description:

Regime Durability: The number of years since the most recent regime change (defined by a three point change in the p_polity score over a period of three years or less) or the end of a transition period defined by the lack of stable political institutions (denoted by a standardized authority score). In calculating the p_durable value, the first year during which a new (post-change) polity is established is coded as the baseline "year zero" (value = 0) and each subsequent year adds one to the value of the p_durable variable consecutively until a new regime change or transition period occurs.

Variable citation: Marshall, M. G., & Gurr, T. R. (2020). Polity v project, political regime characteristics and transitions, 1800-2018

2.18.6.116 Revised Combined Polity Score (p_polity2)

Long tag: qog_std_ts_p_polity2

Original tag: p_polity2

Description:

Revised Combined Polity Score: The polity score is computed by subtracting the p_autoc score from the p_democ score; the resulting unified polity scale ranges from +10 (strongly democratic) to -10 (strongly autocratic). The revised version of the polity variable is designed to facilitate the use of the polity regime measure in time-series analyses. It modifies the combined annual polity score by applying a simple treatment, or "fix" to convert instances of "standardized authority scores" (i.e., -66, -77, and -88) to conventional polity scores (i.e., within the range, -10 to +10). The values have been converted according to the following rule set:

(-66) Cases of foreign "interruption" are treated as "system missing."
(-77) Cases of "interregnum", or anarchy, are converted to a "neutral" Polity score of "0."
(-88) Cases of "transition" are prorated across the span of the transition.

For example, country X has a p_polity score of -7 in 1957, followed by three years of -88 and, finally, a score of +5 in 1961. The change (+12) would be prorated over the intervening three years at a rate of per year, so that the converted scores would be as follow: 1957 -7; 1958 -4; 1959 -1; 1960 +2; and 1961 +5.

Variable citation: Marshall, M. G., & Gurr, T. R. (2020). Polity v project, political regime characteristics and transitions, 1800-2018

2.18.6.117 Federal Political Structure (pt_federal)

Long tag: qog_std_ts_pt_federal

Original tag: pt_federal

Description:

Dummy variable:

1. If the country has a federal political structure
0. Otherwise

Variable citation: Persson, T., & Tabellini, G. E. (2003). *The economic effects of constitutions* [Munich Lectures in Economics]. MIT Press

2.18.6.118 Forms of Government (pt_pres)

Long tag: qog_std_ts_pt_pres

Original tag: pt_pres

Description:

Dummy variable:

1. For presidential regimes
0. Otherwise.

Only regimes in which the confidence of the assembly is not necessary for the executive to stay in power (even if an elected president is not the chief executive, or if there is no elected president) are included among presidential regimes. Most semi-presidential and premier-presidential systems are classified as parliamentary.

Variable citation: Persson, T., & Tabellini, G. E. (2003). *The economic effects of constitutions* [Munich Lectures in Economics]. MIT Press

2.18.6.119 Good Governance (sgi_go)

Long tag: qog_std_ts_sgi_go

Original tag: sgi_go

Description:

This pillar of the SGI examines the good governance capacities of a political system in terms of its executive capability and accountability. Sustainable governance is defined here as the political management of public affairs that adopts a long-term view of societal development, takes into account the interests of future generations, and facilitates capacities for social change.

The Governance index examines how effective governments are in directing and implementing policies appropriate to these three goals. As a measuring tool grounded in practical evidence, the Governance index draws on 37 qualitative indicators posed in an expert survey that measure a country's institutional arrangements against benchmarks of good practices in governance. Governance in this context implies both the capacity to act ("executive capacity") and the extent to which non-governmental actors and institutions are endowed with the participatory competence to hold the government accountable to its actions ("executive accountability"). This includes citizens, legislatures, parties, associations and the media, that is, actors that monitor the government's activities and whose effective inclusion in the political process improve the quality of governance.

The dimension of Executive Capacity draws on the categories of steering capability, policy implementation and institutional learning. Steering capability questions explore the roles of strategic planning and expert advice, the effectiveness of interministerial coordination and regulatory impact assessments, and the quality of consultation and communication policies. Questions about implementation assess the government's ability to ensure effective and efficient task delegation to ministers, agencies or subnational governments. Questions on institutional learning refer to a government's ability to reform its own institutional arrangements and improve its strategic orientation.

The dimension of Executive Accountability is comprised of three categories corresponding to actors or groups of actors considered to be important agents of oversight and accountability in theories of democracy and governance. The questions here are designed to examine the extent to which citizens are informed of government policies, whether the legislature is capable of evaluating and acting as a "check" on the executive branch, and whether intermediary organizations (i.e., media, parties, interest associations) demonstrate relevance and policy know-how in exercising oversight. This approach is based on a dynamic understanding of governance in which power and authority is dispersed throughout the institutions, processes and structures of government. In order to account for the diversity of institutional arrangements, the index explicitly considers functional equivalencies in different countries, and pays equal attention to formal and informal as well as hierarchical and non-hierarchical institutional arrangements.

2.18.6.122 Robust Democracy (sgi_qd)

Long tag: qog_std_ts_sgi_qd

Original tag: sgi_qd

Description:
This pillar of the SGI examines the quality of democracy in each country. From the perspective of long-term system stability and political performance, the quality of democracy and political participation are crucial aspects of a society's success. The stability and performance of a political system depends in large part upon the assent and confidence of its citizens. Democratic participation and oversight are also essential to genuine learning and adaptation processes, and to the ability to change. In this sense, guaranteeing opportunities for democratic participation and oversight, as well as the presence of due process and respect for civil rights, are fundamental prerequisites for the legitimacy of a political system. The quality of democracy in each country is measured against a definitional norm that considers issues relating to participation rights, electoral competition, access to information and the rule of law. Given that all OECD and EU member states constitute democracies, the questions posed here focus on the quality rather than the presence of democracy. Individual indicators monitor the following criteria:

1. Electoral processes.
2. Access to information.
3. Civil rights and political liberties.
4. Rule of law.

Variable citation: Schiller, C., & Hellmann, T. (2020). Sustainable governance indicators 2020 [Date accessed: 12 December 2021]. *Bertelsmann Stiftung*. `https://www.sgi-network.org`

2.18.6.123 Robust Democracy: Access to Information (sgi_qdai)

2.18.6.125 Robust Democracy: Rule of Law (sgi_qdrl)

Long tag: qog_std_ts_sgi_qdrl

Original tag: sgi_qdrl

Description:
Robust Democracy: Rule of Law (Legal Certainty, Judicial Review, Appointment of Justices, Corruption Prevention).

Variable citation: Schiller, C., & Hellmann, T. (2020). Sustainable governance indicators 2020 [Date accessed: 12 December 2021]. *Bertelsmann Stiftung*. `https://www.sgi-network.org`

2.18.6.126 Robust Democracy: Rule of Law - Corruption Prevention (sgi_qdrlc)

Long tag: qog_std_ts_sgi_qdrlc

Original tag: sgi_qdrlc

Description:
Robust Democracy: Rule of Law - Corruption Prevention. To what extent are public officeholders prevented from abusing their position for private interests? This question addresses how the state and society prevent

public servants and politicians from accepting bribes by applying mechanisms to guarantee the integrity of officeholders: auditing of state spending; regulation of party financing; citizen and media access to information; accountability of officeholders (asset declarations, conflict of interest rules, codes of conduct); transparent public procurement systems; effective prosecution of corruption. (1, 2): Public officeholders can exploit their offices for private gain as they see fit without fear of legal consequences or adverse publicity. (3, 4, 5): Some integrity mechanisms function, but do not effectively prevent public officeholders from abusing their positions. (6, 7, 8): Most integrity mechanisms function effectively and provide disincentives for public officeholders willing to abuse their positions. (9, 10): Legal, political and public integrity mechanisms effectively prevent public officeholders from abusing their positions.

2.18.6.132 Deliberative democracy index (vdem_delibdem)

Long tag: qog_std_ts_vdem_delibdem

Original tag: vdem_delibdem

Description:

Deliberative democracy index. Question: To what extent is the ideal of deliberative democracy achieved?

Clarification: The deliberative principle of democracy focuses on the process by which decisions are reached in a polity. A deliberative process is one in which public reasoning focused on the common good motivates political decisions - as contrasted with emotional appeals, solidary attachments, parochial interests, or coercion. According to this principle, democracy requires more than an aggregation of existing preferences. There should also be respectful dialogue at all levels - from preference formation to final decision - among informed and competent participants who are open to persuasion. To make it a measure of not only the deliberative principle but also of democracy, the index also takes the level of electoral democracy into account.

2.18.6.133 Deliberative component index (vdem_dl_delib)

Long tag: qog_std_ts_vdem_dl_delib

Original tag: vdem_dl_delib

Description:

Deliberative component index. Question: To what extent is the deliberative principle of democracy achieved?

Clarification: The deliberative principle of democracy focuses on the process by which decisions are reached in a polity. A deliberative process is one in which public reasoning focused on the common good motivates political decisions - as contrasted with emotional appeals, solidary attachments, parochial interests, or coercion. According to this principle, democracy requires more than an aggregation of existing preferences. There should also be respectful dialogue at all levels - from preference formation to final decision - among informed and competent participants who are open to persuasion. To measure these features of a polity, we try to determine the extent to which political elites give public justifications for their positions on matters of public policy, justify their positions in terms of the public good, acknowledge and respect counter-arguments; and how wide the range of consultation is at elite levels. Aggregation: The index is formed by point estimates drawn from a Bayesian factor analysis model including the following indicators: reasoned justification, common good justification, respect for counterarguments, range of consultation, and engaged society.

Variable citation: Coppedge, M., Gerring, J., Knutsen, C. H., Lindberg, S. I., Teorell, J., Alizada, N., Altman, D., Bernhard, M., Cornell, A., Fish, M. S., Gastaldi, L., Gjerløw, H., Glynn, A., Hicken, A., Hindle, G., Ilchenko, N., Krusell, J., Luhrmann, A., Maerz, S. F., . . . Ziblatt, D. (2021). 2.18.6.134 Electoral component index (vdem_edcomp_thick)

Long tag: qog_std_ts_vdem_edcomp_thick

Original tag: vdem_edcomp_thick

Description:

Electoral component index. Question: To what extent is the electoral principle of democracy achieved?

Clarifications: The electoral principle of democracy seeks to achieve responsiveness and accountability between leaders and citizens through the mechanism of competitive elections. This is presumed to be achieved when suffrage is extensive; political and civil society organizations can operate freely; elections are clean and not marred by fraud or systematic irregularities; and the chief executive of a country is selected directly or indirectly through elections. Aggregation: The electoral component index is operationalized as a chain defined by its weakest link of freedom of association, suffrage, clean elections, and elected executive.

Variable citation: Coppedge, M., Gerring, J., Knutsen, C. H., Lindberg, S. I., Teorell, J., Alizada, N., Altman, D., Bernhard, M., Cornell, A., Fish, M. S., Gastaldi, L., Gjerløw, H., Glynn, A., Hicken, A., Hindle, G., Ilchenko, N., Krusell, J., Luhrmann, A., Maerz, S. F., . . . Ziblatt, D. (2021). V-dem [country-year/country-date] dataset v11.1. `https://doi.org/10.23696/vdemds21` Pemstein, D., Marquardt, K. L., Tzelgov, E., Wang, Y.-t., Medzihorsky, J., Krusell, J., Miri, F., & von Römer, J. (2021). The V-Dem measurement model: Latent variable analysis for crossnational and cross-temporal expert-coded data

2.18.6.135 Egalitarian component index (vdem_egal)

Long tag: qog_std_ts_vdem_egal

Original tag: vdem_egal

Description:

Egalitarian component index. Question: To what extent is the egalitarian principle achieved?

Clarifications: The egalitarian principle of democracy holds that material and immaterial inequalities inhibit the exercise of formal rights and liberties, and diminish the ability of citizens from all social groups to participate. Egalitarian democracy is achieved when 1) rights and freedoms of individuals are protected equally across all social groups; 2) resources are distributed equally across all social groups; and 3) access to power is equally distributed by gender, socioeconomic class and social group. Aggregation: This index is formed by averaging the following indices: equal protection index and equal distribution of resources.

Variable citation: Coppedge, M., Gerring, J., Knutsen, C. H., Lindberg, S. I., Teorell, J., Alizada, N., Altman, D., Bernhard, M., Cornell, A., Fish, M. S., Gastaldi, L., Gjerløw, H., Glynn, A., Hicken, A., Hindle, G., Ilchenko, N., Krusell, J., Luhrmann, A., Maerz, S. F., . . . Ziblatt, D. (2021). V-dem [country-year/country-date] dataset v11.1. `https://doi.org/10.23696/vdemds21` Pemstein, D., Marquardt, K. L., Tzelgov, E., Wang, Y.-t., Medzihorsky, J., Krusell, J., Miri, F., & von Römer, J. (2021). The V-Dem measurement model: Latent variable analysis for crossnational and cross-temporal expert-coded data

2.18.6.136 Egalitarian democracy index (vdem_egaldem)

Long tag: qog_std_ts_vdem_egaldem

Original tag: vdem_egaldem

Description:
Egalitarian democracy index. Question: To what extent is the ideal of egalitarian democracy achieved?

Clarifications: The egalitarian principle of democracy holds that material and immaterial inequalities inhibit the exercise of formal rights and liberties, and diminish the ability of citizens from all social groups to participate. Egalitarian democracy is achieved when 1) rights and freedoms of individuals are protected equally across all social groups; and 2) resources are distributed equally across all social groups. The distribution of resources must be sufficient to ensure that citizens' basic needs are met in a way that enables their meaningful participation. Additionally, an equal distribution of resources ensures the potential for greater equality in the distribution of power. To make it a measure of egalitarian democracy, the index also takes the level of electoral democracy into account.

Variable citation: Coppedge, M., Gerring, J., Knutsen, C. H., Lindberg, S. I., Teorell, J., Alizada, N., Altman, D., Bernhard, M., Cornell, A., Fish, M. S., Gastaldi, L., Gjerløw, H., Glynn, A., Hicken, A., Hindle, G., Ilchenko, N., Krusell, J., Luhrmann, A., Maerz, S. F., . . . Ziblatt, D. (2021). (2021). The V-Dem measurement model: Latent variable analysis for crossnational and cross-temporal expert-coded data

2.18.6.137 Liberal democracy index (vdem_libdem)

Long tag: qog_std_ts_vdem_libdem

Original tag: vdem_libdem

Description:
Liberal democracy index. Question: To what extent is the ideal of liberal democracy achieved?
Clarifications: The liberal principle of democracy emphasizes the importance of protecting individual and minority rights against the tyranny of the state and the tyranny of the majority. The liberal model takes a "negative" view of political power insofar as it judges the quality of democracy by the limits placed on government. This is achieved by constitutionally protected civil liberties, strong rule of law, an independent judiciary, and effective checks and balances that, together, limit the exercise of executive power. To make this a measure of liberal democracy, the index also takes the level of electoral democracy into account.

Variable citation: Coppedge, M., Gerring, J., Knutsen, C. H., Lindberg, S. I., Teorell, J., Alizada, N., Altman, D., Bernhard, M., Cornell, A., Fish, M. S., Gastaldi, L., Gjerløw, H., Glynn, A., Hicken, A., Hindle, G., Ilchenko, N., Krusell, J., Luhrmann, A., Maerz, S. F., . . . Ziblatt, D. (2021). V-dem [country-year/country-date] dataset v11.1. `https://doi.org/10.23696/vdemds21` Pemstein, D., Marquardt, K. L., Tzelgov, E., Wang, Y.-t., Medzihorsky, J., Krusell, J., Miri, F., & von Römer, J. (2021). The V-Dem measurement model: Latent variable analysis for crossnational and cross-temporal expert-coded data

2.18.6.138 Liberal component index (vdem_liberal)

Long tag: qog_std_ts_vdem_liberal

Original tag: vdem_liberal

Description:
Liberal component index. Question: To what extent is the liberal principle of democracy achieved?

Clarification: The liberal principle of democracy emphasizes the importance of protecting individual and minority rights against the tyranny of the state and the tyranny of the majority. The liberal model takes a "negative" view of political power insofar as it judges the quality of democracy by the limits placed on government. This is achieved by constitutionally protected civil liberties, strong rule of law, an independent judiciary, and effective checks and balances that, together, limit the exercise of executive power. Aggregation: This index is formed by averaging the following indices: equality before the law and individual liberties, judicial constraints on the executive, and legislative constraints on the executive.

Variable citation: Coppedge, M., Gerring, J., Knutsen, C. H., Lindberg, S. I., Teorell, J., Alizada, N., Altman, D., Bernhard, M., Cornell, A., Fish, M. S., Gastaldi, L., Gjerløw, H., Glynn, A., Hicken, A., Hindle, G., Ilchenko, N., Krusell, J., Luhrmann, A., Maerz, S. F., . . . Ziblatt, D. (2021). (2021). The V-Dem measurement model: Latent variable analysis for crossnational and cross-temporal expert-coded data

2.18.6.139 Participatory component index (vdem_partip)

Long tag: qog_std_ts_vdem_partip

Original tag: vdem_partip

Description:
Participatory component index. Question: To what extent is the participatory principle achieved?

Clarification: The participatory principle of democracy emphasizes active participation by citizens in all political processes, electoral and non-electoral. It is motivated by uneasiness about a bedrock practice of electoral democracy: delegating authority to representatives. Thus, direct rule by citizens is preferred, wherever practicable. This model of democracy thus takes suffrage for granted, emphasizing engagement in

civil society organizations, direct democracy, and subnational elected bodies. Aggregation: This index is formed by averaging the following indices: civil society participation, direct popular vote, elected local government power, and elected regional government power.

Variable citation: Coppedge, M., Gerring, J., Knutsen, C. H., Lindberg, S. I., Teorell, J., Alizada, N., Altman, D., Bernhard, M., Cornell, A., Fish, M. S., Gastaldi, L., Gjerløw, H., Glynn, A., Hicken, A., Hindle, G., Ilchenko, N., Krusell, J., Luhrmann, A., Maerz, S. F., . . . Ziblatt, D. (2021). (2021). The V-Dem measurement model: Latent variable analysis for crossnational and cross-temporal expert-coded data

2.18.6.141 Electoral democracy index (vdem_polyarchy)

Long tag: qog_std_ts_vdem_polyarchy

Original tag: vdem_polyarchy

Description:

Electoral democracy index. Question: To what extent is the ideal of electoral democracy in its fullest sense achieved?

Clarifications: The electoral principle of democracy seeks to embody the core value of making rulers responsive to citizens, achieved through electoral competition for the electorate's approval under circumstances when suffrage is extensive; political and civil society organizations can operate freely; elections are clean and not marred by fraud or systematic irregularities; and elections affect the composition of the chief executive of the country. In between elections, there is freedom of expression and an independent media capable of presenting alternative views on matters of political relevance. In the V-Dem conceptual scheme, electoral democracy is understood as an essential element of any other conception of (representative) democracy - liberal, participatory, deliberative, egalitarian, or some other. Aggregation: The index is formed by taking the average of, on the one hand, the sum of the indices measuring freedom of association (thick), suffrage, clean elections, elected executive (de jure) and freedom of expression; and, on the other, the five-way interaction between those indices. This is half way between a straight average and strict multiplication, meaning the average of the two. It is thus a compromise between the two most well known aggregation formulas in the literature, both allowing "compensation" in one sub-component for lack of polyarchy in the others, but also punishing countries not strong in one sub-component according to the "weakest link" argument. The aggregation is done at the level of Dahl's sub-components (with the one exception of the non-electoral component).

2.18.6.142 Voice and Accountability, Estimate (wbgi_vae)

Long tag: qog_std_ts_wbgi_vae

Original tag: wbgi_vae

Description:

Voice and Accountability - Estimate: "Voice and Accountability" includes a number of indicators measuring various aspects of the political process, civil liberties and political rights. These indicators measure the extent to which citizens of a country are able to participate in the selection of governments. This category also

includes indicators measuring the independence of the media, which serves an important role in monitoring those in authority and holding them accountable for their actions.

Variable citation: Kaufmann, D., Kraay, A., & Mastruzzi, M. (2010). The worldwide governance indicators: A summary of methodology, data and analytical issues. *World Bank Policy Research Working Paper, 5430*

2.18.6.143 Voice and Accountability, Number of Sources (wbgi_van)

Long tag: qog_std_ts_wbgi_van

Original tag: wbgi_van

Description:
Voice and Accountability - Number of Sources.

Variable citation: Kaufmann, D., Kraay, A., & Mastruzzi, M. (2010). The worldwide governance indicators: A summary of methodology, data and analytical issues. *World Bank Policy Research Working Paper, 5430*

2.18.6.144 Voice and Accountability, Standard Error (wbgi_vas)

Long tag: qog_std_ts_wbgi_vas

Original tag: wbgi_vas

Description:
Voice and Accountability - Standard Errors.

Variable citation: Kaufmann, D., Kraay, A., & Mastruzzi, M. (2010). The worldwide governance indicators: A summary of methodology, data and analytical issues. *World Bank Policy Research Working Paper, 5430*

2.18.6.145 Democratic Rights (wel_dr)

Long tag: qog_std_ts_wel_dr

Original tag: wel_dr

Description:
Meaning: 14-point index measuring the prevalence of democratic rights based on Freedom House's "civil liberties" and "political rights" ratings.
Source: Alexander and Welzel (2011); Alexander, Inglehart and Welzel (2012). Categorization is available in annual measures for most countries of the world from 1996 to 2006.
Scaling: The two Freedom House scales are inverted, averaged and standardized into a range from minimum 0 (no democratic rights) to 100 (maximum democratic rights), with percentages of the maximum rights for intermediate positions. Note: In the original data there exists two different observations for Dominica, the value has been recoded to missing for this country.

Variable citation: Welzel, C. (2013). *Freedom rising: Human empowerment and the quest for emancipation (1st ed.).* Cambridge University Press

2.18.6.146 Effective Democracy Index (wel_edi)

Long tag: qog_std_ts_wel_edi

Original tag: wel_edi

Description:
Meaning: Conditional multi-point index measuring the extent of effective democracy, understood as the presence of democratic rights on the condition that honest governance puts them into real practice [EDI = DemRig * HonGov].
Source: Alexander and Welzel (2011); Alexander, Inglehart and Welzel (2012). Categorization is available in annual measures for most countries of the world from 1996 to 2006.
Scaling: Scores are weighted percentages ranging from a theoretical minimum of 0 for the least effective or absent democracy to 100 for the most effective democracy. Note: In the original data there exists two different observations for Dominica, the value has been recoded to missing for this country.

Variable citation: Welzel, C. (2013). *Freedom rising: Human empowerment and the quest for emancipation (1st ed.).* Cambridge University Press

2.18.6.147 Regime Type (wel_regtype)

Long tag: qog_std_ts_wel_regtype

Original tag: wel_regtype

Description:
Meaning: Regime types measure the 4-fold combination of personal autonomy rights and political participation rights, resulting in four combinations.
Source: Welzel, Freedom Rising (2013: 257-258). Typology is available in annual measures for most countries of the world from 1981 to 2010.
Scaling: 1 "Pure Autocracy": both personal autonomy rights and political participation rights below the scale midpoint (0.50); 2 "Inclusive Autocracy": personal autonomy rights below the scale midpoint, political

participation rights above the scale midpoint; 3 "Liberal Autocracy": personal autonomy rights above the scale midpoint, political participation rights below; 4 "Minimal Democracy": both personal autonomy rights and political participation rights above the scale midpoint.
Links: Data sources, rescaling procedures and replication data are meticulously documented in the Online Appendix to Welzel's (2013) Freedom Rising at www.cambridge.com/welzel (p. 72). Test statistics documenting this index's superior validity in comparison to alternative democracy measures are reported in Welzel (2013: 267-271).

Variable citation: Welzel, C. (2013). *Freedom rising: Human empowerment and the quest for emancipation (1st ed.)*. Cambridge University Press

2.18.6.148 Political System Type (wel_sys)

Long tag: qog_std_ts_wel_sys

Original tag: wel_sys

Description:

Meaning: 4-fold system typology derived from cross-tabulating democratic rights and honest governance.
Source: Alexander and Welzel (2011); Alexander, Inglehart and Welzel (2012). Categorization is available in annual measures for most countries of the world from 1996 to 2006.

1. "Unbound Autocracy": both democratic rights and honest governance below their scale midpoints
2. "Bounded Autocracy": democratic rights below, honest governance above the scale midpoint
3. "Ineffective Democracy": democratic rights above, honest governance below the scale midpoint
4. "Effective Democracy": both democratic rights and honest governance above the scale midpoint.

Note: In the original data there exists two different observations for Dominica, the value has been recoded to missing for this country.

Variable citation: Welzel, C. (2013). *Freedom rising: Human empowerment and the quest for emancipation (1st ed.)*. Cambridge University Press

2.18.6.149 Non-Autocracy (wr_nonautocracy)

Long tag: qog_std_ts_wr_nonautocracy

Original tag: wr_nonautocracy

Description:

Variable on what substituted the autocracy. Classes are:

1. Democracy
2. Foreign-Occupied
3. Not-Independent
4. Provisional
5. Warlord
6. Warlord/Foreign-occupied

Variable citation: Geddes, B., Wright, J., & Frantz, E. (2014). Autocratic breakdown and regime transitions: A new data set. *Perspectives on Politics*, 12(2), 313–331

2.18.6.150 Regime Type (wr_regtype)

Long tag: qog_std_ts_wr_regtype

Original tag: wr_regtype

Description:

Variable on regime type. Classes are:

1. Indirect military
2. Military
3. Military-Personal
4. Monarchy
5. Oligarchy
6. Party
7. Party-Military
8. Party-Military-Personal
9. Party-Personal
10. Personal

Variable citation: Geddes, B., Wright, J., & Frantz, E. (2014). Autocratic breakdown and regime transitions: A new data set. *Perspectives on Politics*, 12(2), 313–331

2.18.6.151 Confidence: The Civil Services (wvs_confcs)

Long tag: qog_std_ts_wvs_confcs

Original tag: wvs_confcs

Description:

I am going to name a number of organizations. For each one, could you tell me how much confidence you have in them: The Civil Services

1. None at all
2. Not very much
3. Quite a lot
4. A great deal

2.18.7 Political Parties and Elections

This category includes variables describing various aspects of the legislature and political parties in the legislature (number of seats) as well as variables related to the election for the executive and variables on the outcomes of elections.

2.18.7.1 Law: political parties are required to disclose public donations (Gov. funds) (aii_q48)

Long tag: qog_std_ts_aii_q48

Original tag: aii_q48

Description:

Sub-score (0-100). Question no. 48. In law, political parties are required to regularly disclose public donations (funds sourced from the government).

A 100 score is earned where a law requires political parties to publish all public contributions.
A 0 score is earned where no such law exists.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.18.7.2 Practice: pol. parties disclose public donations and these are available to publ (aii_q49)

Long tag: qog_std_ts_aii_q49

Original tag: aii_q49

Description:

Sub-score (0-100). Question no. 49. In practice, political parties regularly disclose public donations (funds that are sourced from the government) and the disclosures are easily available to the public.

A 100 score is earned where all the following conditions are met:
1) political parties disclose public donations within a month of received, and
2) they are easily available online or at the cost of photocopy.

A 50 score is earned where any of the following conditions apply:
1) political parties don't always disclose public donations or disclose them more than a month of received, or
2) disclosures are not available online or the cost of paper versions is higher than photocopying.

A 0 score is earned where political parties rarely disclose public donations.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.18.7.3 Law: political parties are required to disclose private donations (aii_q50)

Long tag: qog_std_ts_aii_q50

Original tag: aii_q50

Description:

Sub-score (0-100). Question no. 50. In law, political parties are required to regularly disclose private donations.

A 100 score is earned where the law requires political parties to publish all private contributions.

A 0 score is earned where no such law exists.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.18.7.4 Practice: pol. parties disclose private donations and it is available to public (aii_q51)

Long tag: qog_std_ts_aii_q51

Original tag: aii_q51

Description:

Sub-score (0-100). Question no. 51. In practice, political parties regularly disclose private donations and the disclosures are easily available to the public.

A 100 score is earned where all the following conditions are met:
1) political parties disclose private donations within a one month of received, and
2) they are easily available online or at the cost of photocopy.

A 50 score is earned where any of the following conditions apply:
1) political parties don't always disclose private donations or disclose them more than a month of received, or
2) disclosures are not available online or the cost of paper versions is higher than photocopying.

A 0 score is earned where political parties rarely disclose private donations.

2.18.7.5 No. of coups (br_coup)

Long tag: qog_std_ts_br_coup

Original tag: br_coup

Description:

Total number of coups

Variable citation: Bjørnskov, C., & Rode, M. (2020). Regime types and regime change: A new dataset on democracy, coups, and political institutions. *Review of International Organizations*, 15, 531–551

2.18.7.6 Is the country in the Commonwealth (br_cw)

Long tag: qog_std_ts_br_cw

Original tag: br_cw

Description:

Is the country a member of the British Commonwealth? (0: No; 1: Yes)

Variable citation: Bjørnskov, C., & Rode, M. (2020). Regime types and regime change: A new dataset on democracy, coups, and political institutions. *Review of International Organizations*, 15, 531–551

2.18.7.7 Whether an election was postponed (br_elecpost)

Long tag: qog_std_ts_br_elecpost

Original tag: br_elecpost

Description:
Whether an election held in that year was postponed from an earlier date (0: No, 1: Yes)

Variable citation: Bjørnskov, C., & Rode, M. (2020). Regime types and regime change: A new dataset on democracy, coups, and political institutions. *Review of International Organizations*, 15, 531–551

2.18.7.8 Typology of political institutions (br_elect)

Long tag: qog_std_ts_br_elect

Original tag: br_elect

Description:
Alternative democracy indicator capturing degree of multi-party competition. (No elections=0, Single-party elections=1, non-democratic multi-party elections=2, democratic elections= 3)

Variable citation: Bjørnskov, C., & Rode, M. (2020). Regime types and regime change: A new dataset on democracy, coups, and political institutions. *Review of International Organizations*, 15, 531–551

2.18.7.9 Whether an election was held during the year (br_elecyear)

Long tag: qog_std_ts_br_elecyear

Original tag: br_elecyear

Description:
Whether an election was held that year (0: No, 1: Yes)

Variable citation: Bjørnskov, C., & Rode, M. (2020). Regime types and regime change: A new dataset on democracy, coups, and political institutions. *Review of International Organizations*, 15, 531–551

2.18.7.10 No. of failed coups (br_fcoup)

Long tag: qog_std_ts_br_fcoup

Original tag: br_fcoup

Description:
Number of failed coups

Variable citation: Bjørnskov, C., & Rode, M. (2020). Regime types and regime change: A new dataset on democracy, coups, and political institutions. *Review of International Organizations*, 15, 531–551

2.18.7.11 Is the president interim/temporary (br_int)

Long tag: qog_std_ts_br_int

Original tag: br_int

Description:
Is the president interim / preliminary? (more than 2 Presidents/year=1, Otherwise=0)

Variable citation: Bjørnskov, C., & Rode, M. (2020). Regime types and regime change: A new dataset on democracy, coups, and political institutions. *Review of International Organizations*, 15, 531–551

2.18.7.12 Is the country a monarchy (br_mon)

Long tag: qog_std_ts_br_mon

Original tag: br_mon

Description:
Is the country a hereditary monarchy? (0: No; 1: Yes)

Variable citation: Bjørnskov, C., & Rode, M. (2020). Regime types and regime change: A new dataset on democracy, coups, and political institutions. *Review of International Organizations*, 15, 531–551

2.18.7.13 Is the political system presidential (br_pres)

Long tag: qog_std_ts_br_pres

Original tag: br_pres

Description:
Is the political system presidential? (0: No; 1: Yes)

Variable citation: Bjørnskov, C., & Rode, M. (2020). Regime types and regime change: A new dataset on democracy, coups, and political institutions. *Review of International Organizations*, 15, 531–551

2.18.7.14 Does the country have proportional voting (br_pvote)

Long tag: qog_std_ts_br_pvote

Original tag: br_pvote

Description:
Is the electoral system characterized by including proportional representation? (0: No; 1: Yes)

Variable citation: Bjørnskov, C., & Rode, M. (2020). Regime types and regime change: A new dataset on democracy, coups, and political institutions. *Review of International Organizations*, 15, 531–551

2.18.7.15 Did the main regime change (br_regch)

Long tag: qog_std_ts_br_regch

Original tag: br_regch

Description:
If a coded event, such as a change in the Presidency, took place after 01.07 it is assigned to the following calendar year in the data. In this case, the lag variable will be equal to one. For all change events before that date, the lag dummy is equal to zero. (0: No; 1: Yes)

Variable citation: Bjørnskov, C., & Rode, M. (2020). Regime types and regime change: A new dataset on democracy, coups, and political institutions. *Review of International Organizations*, 15, 531–551

2.18.7.16 No. of successful coups (br_scoup)

Long tag: qog_std_ts_br_scoup

Original tag: br_scoup

Description:
Number of successful coups

Variable citation: Bjørnskov, C., & Rode, M. (2020). Regime types and regime change: A new dataset on democracy, coups, and political institutions. *Review of International Organizations*, 15, 531–551

2.18.7.17 Full suffrage (br_suff)

Long tag: qog_std_ts_br_suff

Original tag: br_suff

Description:
Whether electoral system attributes full suffrage (0: No; 1: Yes)

Variable citation: Bjørnskov, C., & Rode, M. (2020). Regime types and regime change: A new dataset on democracy, coups, and political institutions. *Review of International Organizations*, 15, 531–551

2.18.7.18 Free and Fair Elections (bti_ffe)

Long tag: qog_std_ts_bti_ffe

Original tag: bti_ffe

Description:
To what extent are political representatives determined by general, free and fair elections? 1-10.

1. There are no elections on free and fair elections.
4. General, multi-party elections are held, conducted properly and accepted as the means of filling political posts. However, there are some constraints on the fairness of the elections with regard to registration, campaigning or media access.
7. General elections are held, but serious irregularities during voting process and ballot count occur. The rights to vote, campaign and run for office are restricted, and elections have de facto only limited influence over who governs.
10. National elections, if held at all, are entirely unfree and unfair.

Variable citation: Donner, S., Hartmann, H., & Schwarz, R. (2020). *Transformation index of the bertelsmann stiftung 2020*. Bertelsmann Stiftung. `http://www.bti-project.org`

2.18.7.19 Party System (bti_ps)

Long tag: qog_std_ts_bti_ps

Original tag: bti_ps

Description:
To what extent is there a stable and socially rooted party system able to articulate and aggregate societal interests? 1-10.

1. There is no party system to articulate and aggregate societal interest.
4. The party system is unstable with shallow roots in society: high fragmentation, high voter volatility and high polarization.
7. The party system is fairly stable and socially rooted: moderate fragmentation, moderate voter volatility and moderate polarization.

10. The party system is stable and socially rooted: it is able to articulate and aggregate societal interest with low fragmentation, low voter volatility and low polarization.

Variable citation: Donner, S., Hartmann, H., & Schwarz, R. (2020). *Transformation index of the bertelsmann stiftung 2020*. Bertelsmann Stiftung. `http://www.bti-project.org`

2.18.7.20 Contestation (standardized version) (cam_contest)

Long tag: qog_std_ts_cam_contest

Original tag: cam_contest

Description:
Contestation standardized to be comparable across years.

Variable citation: Coppedge, M., Alvarez, A., & Maldonado, C. (2008). Two persistent dimensions of democracy: Contestation and inclusiveness. *The Journal of Politics*, 70(3), 632–647

2.18.7.21 Inclusiveness (standardized version) (cam_inclusive)

Long tag: qog_std_ts_cam_inclusive

Original tag: cam_inclusive

Description:
Inclusiveness standardized to be comparable across years.

Variable citation: Coppedge, M., Alvarez, A., & Maldonado, C. (2008). Two persistent dimensions of democracy: Contestation and inclusiveness. *The Journal of Politics*, 70(3), 632–647

2.18.7.22 Electoral Self-Determination (ciri_elecsd)

Long tag: qog_std_ts_ciri_elecsd

Original tag: ciri_elecsd

Description:
This variable indicates to what extent citizens enjoy freedom of political choice and the legal right and ability in practice to change the laws and officials that govern them through free and fair elections. This right is sometimes known as the right to self-determination. A score of 0 indicates that the right to self-determination through free and fair elections did not exist in law or practice during the year in question. A score of 1 indicates that while citizens had the legal right to self-determination, there were some limitations to the fulfillment of this right in practice. Therefore, in states receiving a 1, political participation was only moderately free and open. A score of 2 indicates that political participation was very free and open during the year in question and citizens had the right to self-determination through free and fair elections in both law and practice.

Variable citation: Cingranelli, D. L., Filippov, M., & Mark, S. (2019). The CIRIGHTS dataset [Version 2019.07.21]. *The Binghamton University Human Right Institute*. `www.binghamton.edu/institutes/hri` Cingranelli, D. L., Richards, D. L., & Clay, K. C. (2014). The CIRI Human Rights Dataset [Version 2014.04.14]. *CIRI Human Rights Data Project*, 6

2.18.7.23 Number of changes in government per year (cpds_chg)

Long tag: qog_std_ts_cpds_chg

Original tag: cpds_chg

Description:
Number of changes in government per year [termination of government due to (a) elections, (b) voluntary resignation of the Prime Minister, (c) resignation of Prime Minister due to health reasons, (d) dissension within government (break up of the coalition), (e) lack of parliamentary support, (f) intervention by the head of state, or (g) broadening of the coalition (inclusion of new parties).

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.18.7.24 Effective number of parties on the seats level (cpds_enps)

Long tag: qog_std_ts_cpds_enps

Original tag: cpds_enps

Description:
Effective number of parties on the seats level according to the formula proposed by Laakso and Taagepera (1979).

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.18.7.25 Effective number of parties on the votes level (cpds_enpv)

Long tag: qog_std_ts_cpds_enpv

Original tag: cpds_enpv

Description:
Effective number of parties on the votes level according to the formula proposed by Laakso and Taagepera (1979).

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.18.7.26 Electoral fractionalization of the party system (Rae index) (cpds_frel)

Long tag: qog_std_ts_cpds_frel

Original tag: cpds_frel

Description:
Index of electoral fractionalization of the party system according to the formula proposed by Rae (1968). The index can take values between 1 (maximal fractionalization) and 0 (minimal fractionalization).

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.18.7.27 Legislative fractionalization of the party system (Rae index) (cpds_frleg)

Long tag: qog_std_ts_cpds_frleg

Original tag: cpds_frleg

Description:
Index of legislative fractionalization of the party system according to the formula proposed by Rae (1968). The index can take values between 1 (maximal fractionalization) and 0 (minimal fractionalization).

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.18.7.28 Cabinet composition (Schmidt index) (cpds_govlr)

Long tag: qog_std_ts_cpds_govlr

Original tag: cpds_govlr

Description:
Cabinet composition (Schmidt-Index):

1. Hegemony of right-wing (and centre) parties.
2. Dominance of right-wing (and centre) parties.
3. Balance of power between left and right.
4. Dominance of social-democratic and other left parties.
5. Hegemony of social-democratic and other left parties.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.18.7.29 Government support (seat share of all parties in government) (cpds_govsup)

Long tag: qog_std_ts_cpds_govsup

Original tag: cpds_govsup

Description:
Total government support: seat share of all parties in government. Weighted by the numbers of days in office in a given year.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.18.7.30 Share of seats in parliament: agrarian (cpds_la)

Long tag: qog_std_ts_cpds_la

Original tag: cpds_la

Description:
Share of seats in parliament for the political parties classified as agrarian.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.18.7.31 Share of seats in parliament: electoral alliance (cpds_lall)

Long tag: qog_std_ts_cpds_lall

Original tag: cpds_lall

Description:
Share of seats in parliament for the political parties classified as electoral alliance.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.18.7.32 Share of seats in parliament: communist (cpds_lcom)

Long tag: qog_std_ts_cpds_lcom

Original tag: cpds_lcom

Description:

Share of seats in parliament for the political parties classified as communist.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.18.7.33 Share of seats in parliament: conservative (cpds_lcon)

Long tag: qog_std_ts_cpds_lcon

Original tag: cpds_lcon

Description:

Share of seats in parliament for the political parties classified as conservative.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.18.7.34 Share of seats in parliament: ethnic (cpds_le)

Long tag: qog_std_ts_cpds_le

Original tag: cpds_le

Description:

Share of seats in parliament for the political parties classified as ethnic.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.18.7.35 Share of seats in parliament: feminist (cpds_lfe)

Long tag: qog_std_ts_cpds_lfe

Original tag: cpds_lfe

Description:

Share of seats in parliament for the political parties classified as feminist.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.18.7.36 Share of seats in parliament: green (cpds_lg)

Long tag: qog_std_ts_cpds_lg

Original tag: cpds_lg

Description:

Share of seats in parliament for the political parties classified as green.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.18.7.37 Share of seats in parliament: liberal (cpds_ll)

Long tag: qog_std_ts_cpds_ll

Original tag: cpds_ll

Description:

Share of seats in parliament for the political parties classified as liberal.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.18.7.38 Share of seats in parliament: left-socialist (cpds_lls)

Long tag: qog_std_ts_cpds_lls

Original tag: cpds_lls

Description:

Share of seats in parliament for the political parties classified as left-socialist.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.18.7.39 Share of seats in parliament: monarchist (cpds_lmo)

Long tag: qog_std_ts_cpds_lmo

Original tag: cpds_lmo

Description:

Share of seats in parliament for the political parties classified as monarchist.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.18.7.40 Share of seats in parliament: non-labelled (cpds_lnl)

Long tag: qog_std_ts_cpds_lnl

Original tag: cpds_lnl

Description:

Share of seats in parliament for the political parties classified as non-labelled.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.18.7.41 Share of seats in parliament: other (cpds_lo)

Long tag: qog_std_ts_cpds_lo

Original tag: cpds_lo

Description:

Share of seats in parliament for the political parties classified as other.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.18.7.42 Share of seats in parliament: protest (cpds_lp)

Long tag: qog_std_ts_cpds_lp

Original tag: cpds_lp

Description:

Share of seats in parliament for the political parties classified as protest.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.18.7.43 Share of seats in parliament: post-communist (cpds_lpc)

Long tag: qog_std_ts_cpds_lpc

Original tag: cpds_lpc

Description:

Share of seats in parliament for the political parties classified as post-communist.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.18.7.44 Share of seats in parliament: pensioners (cpds_lpen)

Long tag: qog_std_ts_cpds_lpen

Original tag: cpds_lpen

Description:

Share of seats in parliament for the political parties classified as pensioners.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.18.7.45 Share of seats in parliament: personalist (cpds_lper)

Long tag: qog_std_ts_cpds_lper

Original tag: cpds_lper

Description:

Share of seats in parliament for the political parties classified as personalist.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.18.7.46 Share of seats in parliament: right (cpds_lr)

Long tag: qog_std_ts_cpds_lr

Original tag: cpds_lr

Description:

Share of seats in parliament for the political parties classified as right.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.18.7.47 Share of seats in parliament: regionalist (cpds_lreg)

Long tag: qog_std_ts_cpds_lreg

Original tag: cpds_lreg

Description:
Share of seats in parliament for the political parties classified as regionalist.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.18.7.48 Share of seats in parliament: religious (cpds_lrel)

Long tag: qog_std_ts_cpds_lrel

Original tag: cpds_lrel

Description:
Share of seats in parliament for the political parties classified as religious.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.18.7.49 Share of seats in parliament: social democratic (cpds_ls)

Long tag: qog_std_ts_cpds_ls

Original tag: cpds_ls

Description:
Share of seats in parliament for the political parties classified as social democratic.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.18.7.50 Type of Government (cpds_tg)

Long tag: qog_std_ts_cpds_tg

Original tag: cpds_tg

Description:
Type of government based on the following classification:

1. Single-party majority government: One party takes all governments seats and has a parliamentary majority.
2. Minimal winning coalition: All participating parties are necessary to form a majority government [>50.0percent].
3. Surplus coalition: Coalition governments which exceed the minimal-winning criterion [>50.0percent].
4. Single-party minority government: The party in government does not possess a majority in Parliament [<50.0percent].
5. Multi-party minority government: The parties in government do not possess a majority in Parliament [<50.0percent].
6. Caretaker government: Governments which should simply maintain the status quo.
7. Technocratic government: Led by technocratic prime minister, consists of a majority of technocratic ministers and is in possession of a mandate to change the status quo.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.18.7.51 Share of votes: agrarian (cpds_va)

Long tag: qog_std_ts_cpds_va

Original tag: cpds_va

Description:
Share of votes of the political parties classified as agrarian.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.18.7.52 Share of votes: electoral alliance (cpds_vall)

Long tag: qog_std_ts_cpds_vall

Original tag: cpds_vall

Description:
Share of votes of the political parties classified as electoral alliance.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.18.7.53 Share of votes: communist (cpds_vcom)

Long tag: qog_std_ts_cpds_vcom

Original tag: cpds_vcom

Description:
Share of votes of the political parties classified as communist.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.18.7.54 Share of votes: conservative (cpds_vcon)

Long tag: qog_std_ts_cpds_vcon

Original tag: cpds_vcon

Description:
Share of votes of the political parties classified as conservative.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.18.7.55 Share of votes: ethnic (cpds_ve)

Long tag: qog_std_ts_cpds_ve

Original tag: cpds_ve

Description:
Share of votes of the political parties classified as ethnic.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.18.7.56 Share of votes: feminist (cpds_vfe)

Long tag: qog_std_ts_cpds_vfe

Original tag: cpds_vfe

Description:
Share of votes of the political parties classified as feminist.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.18.7.57 Share of votes: green (cpds_vg)

Long tag: qog_std_ts_cpds_vg

Original tag: cpds_vg

Description:
Share of votes of the political parties classified as green.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.18.7.58 Share of votes: liberal (cpds_vl)

Long tag: qog_std_ts_cpds_vl

Original tag: cpds_vl

Description:
Share of votes of the political parties classified as liberal.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.18.7.59 Share of votes: left-socialist (cpds_vls)

Long tag: qog_std_ts_cpds_vls

Original tag: cpds_vls

Description:
Share of votes of the political parties classified as left-socialist.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.18.7.60 Share of votes: monarchist (cpds_vmo)

Long tag: qog_std_ts_cpds_vmo

Original tag: cpds_vmo

Description:
Share of votes of the political parties classified as monarchist.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.18.7.61 Share of votes: non-labelled (cpds_vnl)

Long tag: qog_std_ts_cpds_vnl

Original tag: cpds_vnl

Description:
Share of votes of the political parties classified as non-labelled.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.18.7.62 Share of votes: other (cpds_vo)

Long tag: qog_std_ts_cpds_vo

Original tag: cpds_vo

Description:

Share of votes of the political parties classified as other.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.18.7.63 Share of votes: protest (cpds_vp)

Long tag: qog_std_ts_cpds_vp

Original tag: cpds_vp

Description:

Share of votes of the political parties classified as protest.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.18.7.64 Share of votes: post-communist (cpds_vpcom)

Long tag: qog_std_ts_cpds_vpcom

Original tag: cpds_vpcom

Description:

Share of votes of the political parties classified as post-communist.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.18.7.65 Share of votes: pensioners (cpds_vpen)

Long tag: qog_std_ts_cpds_vpen

Original tag: cpds_vpen

Description:

Share of votes of the political parties classified as pensioners.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.18.7.66 Share of votes: personalist (cpds_vper)

Long tag: qog_std_ts_cpds_vper

Original tag: cpds_vper

Description:

Share of votes of the political parties classified as personalist.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.18.7.67 Share of votes: right (cpds_vr)

Long tag: qog_std_ts_cpds_vr

Original tag: cpds_vr

Description:

Share of votes of the political parties classified as right.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.18.7.68 Share of votes: regionalist (cpds_vreg)

Long tag: qog_std_ts_cpds_vreg

Original tag: cpds_vreg

Description:

Share of votes of the political parties classified as regionalist.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.18.7.69 Share of votes: religious (cpds_vrel)

Long tag: qog_std_ts_cpds_vrel

Original tag: cpds_vrel

Description:
Share of votes of the political parties classified as religious.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.18.7.70 Share of votes: social democratic (cpds_vs)

Long tag: qog_std_ts_cpds_vs

Original tag: cpds_vs

Description:
Share of votes of the political parties classified as social democratic.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.18.7.71 Voter turnout in election (cpds_vt)

Long tag: qog_std_ts_cpds_vt

Original tag: cpds_vt

Description:
Voter turnout in election.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.18.7.72 Close to Political Party (cses_pc)

Long tag: qog_std_ts_cses_pc

Original tag: cses_pc

Description:
Do you usually think of yourself as close to any particular party? Share of the population who answered Yes.

Note: Refused to answer, Don't know and similar answers were coded as missing, and the average are based on the remaining answers.

2.18.7.73 Electoral Volatility - Parties above 1percent (dev_altv1)

Long tag: qog_std_ts_dev_altv1

Original tag: dev_altv1

Description:
Electoral volatility caused by vote switching between existing parties, namely parties receiving at least 1percent of the national share in both elections under scrutiny.

Variable citation: Williams, A. (2015). A global index of information transparency and accountability. *Journal of Comparative Economics*, 43(3), 804–824. `https://doi.org/10.1016/j.jce.2014.10.004`

2.18.7.74 Electoral Volatility - Parties below 1percent (dev_othv1)

Long tag: qog_std_ts_dev_othv1

Original tag: dev_othv1

Description:
Electoral volatility caused by vote switching between parties falling below 1percent of the national share in both the elections at time t and t+1. It is important to clarify that this category is not computed by aggregating the scores of each party falling below 1percent and then comparing the overall sum at time t and t+1. Conversely, each party's volatility is counted separately - up to a specification of 0.1percent - and then added to the calculation of dev_othv. This choice has been made to avoid underestimation of Total Volatility but at the same time to maintain a distinction between parties above 1percent and parties below 1percent for the calculation of the two components of dev_regv and dev_altv.

Variable citation: Williams, A. (2015). A global index of information transparency and accountability. *Journal of Comparative Economics*, 43(3), 804–824. `https://doi.org/10.1016/j.jce.2014.10.004`

2.18.7.75 Electoral Volatility - Parties entering/exiting party system (dev_regv1)

Long tag: qog_std_ts_dev_regv1

Original tag: dev_regv1

Description:

Electoral volatility caused by vote switching between parties that enter or exit from the party system. A party is considered as entering the party system where it receives at least 1percent of the national share in election at time t+1 (while it received less than 1percent in election at time t). Conversely, a party is considered as exiting the part system where it receives less than 1percent in election at time t+1 (while it received at least 1percent in election at time t).

Variable citation: Williams, A. (2015). A global index of information transparency and accountability. *Journal of Comparative Economics*, 43(3), 804–824. https://doi.org/10.1016/j.jce.2014.10.004

2.18.7.76 Electoral Volatility - Total (dev_tv1)

Long tag: qog_std_ts_dev_tv1

Original tag: dev_tv1

Description:

Total electoral volatility in the party system, given by the sum of the previous measures: dev_regv + dev_altv + dev_othv = dev_tv.

Variable citation: Williams, A. (2015). A global index of information transparency and accountability. *Journal of Comparative Economics*, 43(3), 804–824. https://doi.org/10.1016/j.jce.2014.10.004

2.18.7.77 Trust in Parliament (ess_trparl)

Long tag: qog_std_ts_ess_trparl

Original tag: ess_trparl

Description:

Please tell me on a score of 0-10 how much you personally trust each of the institutions I read out. 0 means you do not trust an institution at all, and 10 means you have complete trust. The Parliament.

Variable citation: NSD - Norwegian Centre for Research Data. (2018). European social survey cumulative file, ess 1-8 [Data Archive and distributor of ESS data for ESS ERIC]. http://www.europeansocialsurvey.org/

2.18.7.78 Trust in Political Parties (ess_trpart)

Long tag: qog_std_ts_ess_trpart

Original tag: ess_trpart

Description:

Please tell me on a score of 0-10 how much you personally trust each of the institutions I read out. 0 means you do not trust an institution at all, and 10 means you have complete trust. The Political Parties.

Variable citation: NSD - Norwegian Centre for Research Data. (2018). European social survey cumulative file, ess 1-8 [Data Archive and distributor of ESS data for ESS ERIC]. http://www.europeansocialsurvey.org/

2.18.7.79 Trust in Politicians (ess_trpolit)

Long tag: qog_std_ts_ess_trpolit

Original tag: ess_trpolit

Description:

Please tell me on a score of 0-10 how much you personally trust each of the institutions I read out. 0 means you do not trust an institution at all, and 10 means you have complete trust. The Politicians.

Variable citation: NSD - Norwegian Centre for Research Data. (2018). European social survey cumulative file, ess 1-8 [Data Archive and distributor of ESS data for ESS ERIC]. http://www.europeansocialsurvey.org/

2.18.7.80 Electoral Volatility in the EP - Parties above 1percent (evep_altv)

Long tag: qog_std_ts_evep_altv

Original tag: evep_altv

Description:

Electoral volatility in the European Parliament, caused by vote switching between parties that enter or exit from the party system caused by vote switching between existing parties, namely parties receiving at least 1percent of the national share in both elections under scrutiny.

2.18.7.81 Net change in the agg. vote share for all parties in Class Bloc (EP) (evep_classbloc)

Long tag: qog_std_ts_evep_classbloc

Original tag: evep_classbloc

Description:

Net change in the aggregate vote share for all parties included in the Class Bloc. For the definition of the class bloc and the identification of parties included in such bloc, the author relies on Bartolini and Mair (1990) and Bartolini (1983; 2000). This includes 'those parties which are the historical product of the structuring of the working-class movement' (Bartolini and Mair 1990 [2007], 46). Full list of parties in the class bloc can be found in the original codebook.

2.18.7.82 Net change in the agg. vote share for all parties in Demarcation Bloc (EP) (evep_dembloc)

Long tag: qog_std_ts_evep_dembloc

Original tag: evep_dembloc

Description:

Net change in the aggregate vote share for all parties included in the Demarcation Bloc. Those political parties that defend anti-EU, anti-immigration and economically protectionist policies are included in the demarcation bloc. Full list of parties in the demarcation bloc can be found in the original codebook.

2.18.7.83 Electoral Volatility in the EP - Parties below 1percent (evep_othv)

Long tag: qog_std_ts_evep_othv

Original tag: evep_othv

Description:

Electoral volatility in the European Parliament, caused by vote switching between parties falling below 1percent of the national share in both the elections at time t and t+1. It is important to clarify that this category is not computed by aggregating the scores of each party falling below 1percent and then comparing the overall sum at time t and t+1. Conversely, each party's volatility is counted separately - up to a specification of 0.1percent - and then added to the calculation of evep_othv. This choice has been made to avoid underestimation of Total Volatility but at the same time to maintain a distinction between parties above 1percent and parties below 1percent for the calculation of the two components of evep_regv and evep_altv.

2.18.7.84 Electoral Volatility in the EP - Parties entering/exiting party system (evep_regv)

Long tag: qog_std_ts_evep_regv

Original tag: evep_regv

Description:

Electoral volatility in the European Parliament, caused by vote switching between parties that enter or exit from the party system. A party is considered as entering the party system where it receives at least 1percent of the national share in election at time t+1 (while it received less than 1percent in election at time t). Conversely, a party is considered as exiting the part system where it receives less than 1percent in election at time t+1 (while it received at least 1percent in election at time t).

2.18.7.85 Electoral Volatility in the EP - Total (evep_tv)

Long tag: qog_std_ts_evep_tv

Original tag: evep_tv

Description:

Total electoral volatility in the party system, given by the sum of the previous measures: evep_regv + evep_altv + evep_othv = evep_tv.

2.18.7.86 Electoral Process (fh_ep)

Long tag: qog_std_ts_fh_ep

Original tag: fh_ep

Description:

Electoral Process - The variable measures to what extent the national legislative representatives and the national chief authority are elected through free and fair elections. Countries are graded between 0 (worst) and 12 (best).

Variable citation: Freedom House. (2021a). Freedom in the world 2021. `https://freedomhouse.org/report/freedom-world`

2.18.7.87 Average District Magnitude (gol_adm)

Long tag: qog_std_ts_gol_adm

Original tag: gol_adm

Description:

Average district magnitude in an electoral tier. This is calculated as the total number of seats allocated in an electoral tier divided by the total number of districts in that tier.

2.18.7.88 Districts (gol_dist)

Long tag: qog_std_ts_gol_dist

Original tag: gol_dist

Description:

This is the number of electoral districts or constituencies in an electoral tier.

2.18.7.89 Effective Number of Electoral Parties (gol_enep)

Long tag: qog_std_ts_gol_enep

Original tag: gol_enep

Description:

Effective number of electoral parties.

2.18.7.90 Effective Number of Electoral Parties 1 (gol_enep1)

Long tag: qog_std_ts_gol_enep1

Original tag: gol_enep1

Description:

The effective number of electoral parties once the "other" category has been "corrected" by using the least component method of bounds.

2.18.7.91 Effective Number of Electoral Parties (Others) (gol_enepo)

Long tag: qog_std_ts_gol_enepo

Original tag: gol_enepo

Description:

The percentage of the vote going to parties that are collectively known as "others" in official election results.

2.18.7.92 Effective Number of Parliamentary or Legislative Parties (gol_enpp)

Long tag: qog_std_ts_gol_enpp

Original tag: gol_enpp

Description:

The effective number of parliamentary (legislative) parties.

2.18.7.93 Effective Number of Parliamentary or Legislative Parties 1 (gol_enpp1)

Long tag: qog_std_ts_gol_enpp1

Original tag: gol_enpp1

Description:

This is the effective number of parliamentary (legislative) parties once the "other" category has been "corrected" by using the least component method of bounds.

2.18.7.94 Effective Number of Parliamentary or Legislative Parties (Others) (gol_enppo)

Long tag: qog_std_ts_gol_enppo

Original tag: gol_enppo

Description:

The percentage of seats won by parties that are collectively known as "others" in official election results.

2.18.7.95 Effective Number of Presidential Candidates (gol_enpres)

Long tag: qog_std_ts_gol_enpres

Original tag: gol_enpres

Description:

The effective number of presidential candidates.

2.18.7.96 Electoral System Type-3 classes (gol_est)

Long tag: qog_std_ts_gol_est

Original tag: gol_est

Description:

This is a categorical variable that takes on one of three values indicating the basic type of electoral system used in the elections.

1. Majoritarian
2. Proportional
3. Mixed

2.18.7.97 Electoral System Type-11 classes (gol_est_spec)

Long tag: qog_std_ts_gol_est_spec

Original tag: gol_est_spec

Description:

This is a categorical variable that provides a more detailed indication of the type of electoral system used in the election.

1. Single-Member-District-Plurality (SMDP)
2. Two-Round System (TRS)
3. Alternative Vote (AV)
4. Borda Count (BC)
5. Block Vote (BV)
6. Party Block Vote (PBV)
7. Limited Vote (LV)
8. Single Nontransferable Vote (SNTV)
9. List Proportional Representation (List PR)
10. Single Transferable Vote (STV)
11. Mixed Dependent (or Mixed Member Proportional)
12. Mixed Independent (or Mixed Parallel)

2.18.7.98 Institution (gol_inst)

Long tag: qog_std_ts_gol_inst

Original tag: gol_inst

Description:

This is a categorical variable indicating a country's regime type at the end of a given year. The data for this variable come from Cheibub, Gandhi and Vreeland (2010), which we updated through 2011.

0. Parliamentary democracy
1. Semi-presidential democracy
2. Presidential democracy
3. Civilian dictatorship
4. Military dictatorship
5. Royal dictatorship

Not all elections that occur when a regime is classified as a dictatorship (regime = 4-6) are dictatorial. This apparent anomaly has to do with the fact that a country's regime type is coded based on its status at the end of a given year. Elections like those in Argentina 1962, Nicaragua 1983, Philippines 1965, and Thailand 1976 all preceded a democratic collapse in the same year. Although these countries are considered dictatorial at the end of these years, we code these particular elections as democratic and therefore include them in our data set. We should note that we code the 1997 elections in Kenya, the 1999 elections in Guinea Bissau, the 2005 elections in Liberia, the 2006 elections in Mauritania, and the 2008 elections in Bangladesh as democratic even though Cheibub, Gandhi and Vreeland (2010) do not code these countries as democratic until the following year. The reason for this is that these elections are the primary reason cited by Cheibub, Gandhi and Vreeland (2010) for their eventual recoding of these countries as democratic. As an example, Cheibub, Gandhi and Vreeland (2010) do not code Liberia as democratic until 2006 despite the fact that presidential elections took place in October 2005, because the winner of these elections, Ellen Johnson-Sirleaf, did not officially take office until January 2006. The bottom line is that there are a few observations in our data set of democratic elections where regime indicates that the country was a dictatorship by the end of the year.

2.18.7.99 Mixed Type (gol_mix)

Long tag: qog_std_ts_gol_mix

Original tag: gol_mix

Description:

This is a categorical variable that indicates the precise type of mixed electoral system that is being used.

1. Coexistence
2. Superposition
3. Fusion
4. Correction
5. Conditional

2.18.7.100 Multi-Tier Type (gol_mt)

Long tag: qog_std_ts_gol_mt

Original tag: gol_mt

Description:

This is a dichotomous variable that indicates whether different electoral tiers are linked (1) or not (0). Electoral tiers are linked if the unused votes from one electoral tier are used to allocate seats in another electoral tier, or if the allocation of seats in one electoral tier is conditional on the seats received in a different electoral tier.

2.18.7.101 Number of Seats (gol_nos)

Long tag: qog_std_ts_gol_nos

Original tag: gol_nos

Description:

This indicates the total number of seats in the lower house of the national legislature.

2.18.7.102 Presidential Electoral System Type (gol_pest)

Long tag: qog_std_ts_gol_pest

Original tag: gol_pest

Description:

This is a categorical variable that indicates the electoral formula used in the presidential election.

1. Plurality
2. Absolute Majority
3. Qualified Majority
4. Electoral College
5. Alternative Vote

2.18.7.103 Electoral Formula used in an Electoral Tier (gol_pr)

Long tag: qog_std_ts_gol_pr

Original tag: gol_pr

Description:

This is a categorical variable that indicates the precise electoral formula used in an electoral tier.

1. Single-Member-District-Plurality (SMDP)
2. Two Round Majority-Plurality
3. Two Round Qualified Majority
4. Two Round Majority Runoff
5. Alternative Vote (AV)
6. Borda Count (BC)
7. Modified Borda Count (mBC)
8. Block Vote (BV)
9. Party Block Vote (PBV)
10. Limited Vote (LV)
11. Single Nontransferable Vote (SNTV)
12. Hare quota
13. Hare quota with largest remainders
14. Hare quota with highest average remainders
15. Hagenbach-Bischoff quota
16. Hagenbach-Bischoff quota with largest remainders
17. Hagenbach-Bischoff quota with highest average remainders
18. Droop quota
19. Droop quota with largest remainders
20. Droop quota with highest average remainders
21. Imperiali quota
22. Imperiali quota with largest remainders
23. Imperiali quota with highest average remainders
24. Reinforced Imperiali quota
25. D'Hondt
26. Sainte-Laguë
27. Modified Sainte-Laguë
28. Single Transferable Vote.

Note: Users can find a detailed description of the difference between types in the original codebook.

2.18.7.104 Presidential Election (gol_preel)

Long tag: qog_std_ts_gol_preel

Original tag: gol_preel

Description:

This is a dichotomous variable that takes on the value 1 if the election is presidential and 0 if the election is legislative.

2.18.7.105 Upper Seats (gol_upseat)

Long tag: qog_std_ts_gol_upseat

Original tag: gol_upseat

Description:

This indicates the number of legislative seats allocated in electoral districts above the lowest electoral tier.

2.18.7.106 Upper Tier (gol_uptier)

Long tag: qog_std_ts_gol_uptier

Original tag: gol_uptier

Description:

This indicates the percentage of all legislative seats allocated in electoral districts above the lowest electoral tier.

2.18.7.107 Proportional Representation (gtm_pr)

Long tag: qog_std_ts_gtm_pr

Original tag: gtm_pr

Description:

The centripetal theory of democratic governance emphasizes the following three features of an electoral system: (a) district magnitude (M), (b) seat allocation rules (majoritarian or proportional), and (c) candidate selection rules. The centripetal ideal type is defined by M>1, proportional seat allocation rules, and party-controlled candidate selection. This is the closed-list-PR electoral system. Other systems are ranked lower in this coding according to their deviation from this ideal type. Thus, the coding for the list-PR variable is as follows:

0. Majoritarian or Preferential-vote.
1. Mixed-member majority or Block vote.
2. Closed-list-PR.

2.18.7.108 Alignment Executive/Legislative Chamber (lower) (h_alignl1)

Long tag: qog_std_ts_h_alignl1

Original tag: h_alignl1

Description:

Dummy variable indicating alignment between the executive and the lower legislative chamber, coded 1 when the party controlling the executive branch is either the largest party in the lower legislative chamber or is a member of a ruling coalition in that chamber.

Variable citation: Henisz, W. J. (2017). The Political Constraint Index (POLCON) Dataset 2017 release. `https://mgmt.wharton.upenn.edu/profile/1327`

2.18.7.109 Alignment Lower/Upper Legislative Chamber (h_alignl1l2)

Long tag: qog_std_ts_h_alignl1l2

Original tag: h_alignl1l2

Description:

Dummy variable indicating alignment between the legislative chambers, coded 1 when the same party or a coalition of parties (when available) control a majority in both legislative chambers.

Variable citation: Henisz, W. J. (2017). The Political Constraint Index (POLCON) Dataset 2017 release. `https://mgmt.wharton.upenn.edu/profile/1327`

2.18.7.110 Alignment Executive/Legislative Chamber (upper) (h_alignl2)

Long tag: qog_std_ts_h_alignl2

Original tag: h_alignl2

Description:

Dummy variable indicating alignment between the executive and the upper legislative chamber, coded 1 when the party controlling the executive branch is either the largest party in the upper legislative chamber or is a member of a ruling coalition in that chamber.

Variable citation: Henisz, W. J. (2017). The Political Constraint Index (POLCON) Dataset 2017 release. `https://mgmt.wharton.upenn.edu/profile/1327`

2.18.7.111 2nd Legislative Chamber (h_l2)

Long tag: qog_std_ts_h_l2

Original tag: h_l2

Description:

Dummy variable coded 1 if there is an effective second legislative chamber, namely, where h_l1=1 and records on the composition of a second chamber exist - where that chamber is elected under a distinct electoral system and has a substantive (not merely delaying) role in the implementation of fiscal policy.

Variable citation: Henisz, W. J. (2017). The Political Constraint Index (POLCON) Dataset 2017 release. `https://mgmt.wharton.upenn.edu/profile/1327`

2.18.7.112 Legislative Fractionalization (lower) (h_lflo)

Long tag: qog_std_ts_h_lflo

Original tag: h_lflo

Description:
Legislative fractionalization is approximately the probability that two random draws from the lower legislative chamber will be from different parties.

Variable citation: Henisz, W. J. (2017). The Political Constraint Index (POLCON) Dataset 2017 release. `https://mgmt.wharton.upenn.edu/profile/1327`

2.18.7.113 Legislative Fractionalization (upper) (h_lfup)

Long tag: qog_std_ts_h_lfup

Original tag: h_lfup

Description:
Legislative fractionalization is approximately the probability that two random draws from the upper legislative chamber will be from different parties.

Variable citation: Henisz, W. J. (2017). The Political Constraint Index (POLCON) Dataset 2017 release. `https://mgmt.wharton.upenn.edu/profile/1327`

2.18.7.114 Size of Largest Party in Legislature (in Fractions) (ht_partsz)

Long tag: qog_std_ts_ht_partsz

Original tag: ht_partsz

Description:
Counts the largest parties' number of seats divided by the legislative assemblies' total number of seats expressed in fractions. In countries with a two-chamber parliament the lower house is counted.

Variable citation: Wahman, M., Teorell, J., & Hadenius, A. (2013). 2.18.7.115 Banning of Anti-System Parties (iaep_basp)

Long tag: qog_std_ts_iaep_basp

Original tag: iaep_basp

Description:
Does an anti-system platform determine the banning of parties?

0. No
1. Yes

Source: IAEP (Wig et al., 2015)

Variable citation: Wig, T., Hegre, H., & Regan, P. M. (2015). Updated data on institutions and elections 1960–2012: Presenting the iaep dataset version 2.0. *Research & Politics*, 2(2). `https://doi.org/10.1177/2053168015579120`

2.18.7.116 Banned Parties (iaep_bp)

Long tag: qog_std_ts_iaep_bp

Original tag: iaep_bp

Description:
Are there banned parties?

0. No
1. Yes

Source: IAEP (Wig et al., 2015)

Variable citation: Wig, T., Hegre, H., & Regan, P. M. (2015). Updated data on institutions and elections 1960–2012: Presenting the iaep dataset version 2.0. *Research & Politics*, 2(2). `https://doi.org/10.1177/2053168015579120`

2.18.7.117 Some other executive have the power to call elections (iaep_callo)

Long tag: qog_std_ts_iaep_callo

Original tag: iaep_callo

Description:
Does some other executive have the power to call elections?

0. No
1. Yes

Source: IAEP (Wig et al., 2015)

Variable citation: Wig, T., Hegre, H., & Regan, P. M. (2015). Updated data on institutions and elections 1960–2012: Presenting the iaep dataset version 2.0. *Research & Politics*, 2(2). https://doi.org/10.1177/2053168015579120

2.18.7.118 Ethnicity Based Banning of Parties (iaep_ebbp)

Long tag: qog_std_ts_iaep_ebbp

Original tag: iaep_ebbp

Description:
Does ethnic makeup determine the banning of parties?

0. No
1. Yes

Source: IAEP (Wig et al., 2015)

Variable citation: Wig, T., Hegre, H., & Regan, P. M. (2015). Updated data on institutions and elections 1960–2012: Presenting the iaep dataset version 2.0. *Research & Politics*, 2(2). https://doi.org/10.1177/2053168015579120

2.18.7.119 Election of the Executive (iaep_ee)

Long tag: qog_std_ts_iaep_ee

Original tag: iaep_ee

Description:
Is the executive elected by:

1. Directly elected by public vote
2. Elected through legislative action by members of the legislature
3. Chosen through party process strictly by a party
4. Indirect public vote
5. Appointed

Source: IAEP (Wig et al., 2015)

Variable citation: Wig, T., Hegre, H., & Regan, P. M. (2015). Updated data on institutions and elections 1960–2012: Presenting the iaep dataset version 2.0. *Research & Politics*, 2(2). https://doi.org/10.1177/2053168015579120

2.18.7.120 Executive Nomination of Legislature Candidates (iaep_enlc)

Long tag: qog_std_ts_iaep_enlc

Original tag: iaep_enlc

Description:
Does executive nomination establish how the field of candidates who stand for legislative elections is determined?

0. No
1. Yes

Source: IAEP (Wig et al., 2015)

Variable citation: Wig, T., Hegre, H., & Regan, P. M. (2015). Updated data on institutions and elections 1960–2012: Presenting the iaep dataset version 2.0. *Research & Politics*, 2(2). https://doi.org/10.1177/2053168015579120

2.18.7.121 Electoral System (iaep_es)

Long tag: qog_std_ts_iaep_es

Original tag: iaep_es

Description:
What is the type of electoral system for legislative elections?

1. Plurality (First past the post)
2. Majority
3. Proportional representation
4. Mixed systems (combination of PR and either plurality or majority). This option includes situations in which a single chamber contains seats selected by different methods, or situations in which all of the seats in a chamber are chosen with the same method, but each chamber is selected through different methods.

Source: IAEP (Wig et al., 2015)

Variable citation: Wig, T., Hegre, H., & Regan, P. M. (2015). Updated data on institutions and elections 1960–2012: Presenting the iaep dataset version 2.0. *Research & Politics*, 2(2). `https://doi.org/10.1177/2053168015579120`

2.18.7.122 Electoral System for the Executive (iaep_ese)

Long tag: qog_std_ts_iaep_ese

Original tag: iaep_ese

Description:

Election rules governing the determination of electoral outcomes for the executive: we record data on the electoral requirements for winning executive elections, specifically, the sorts of vote thresholds required for winners. If the executive is appointed or otherwise comes to power via non-electoral processes, we code this as missing.

1. Majority rule (50percent + 1). Where run-offs are held, "majority rule" is selected, as the intention of a run-off election is to have one candidate receive a majority of the votes.
2. Plurality
3. No official, explicit, rule governing the outcome
4. Party leader of majority party/coalition in legislature is automatically selected without additional process

2.18.7.123 Independence of Selection of Executive (iaep_ise)

Long tag: qog_std_ts_iaep_ise

Original tag: iaep_ise

Description:

Is there an executive chosen independently of the legislature (like a president, for example)? If these processes that select the executive are distinct from that which selects the legislature, then the authors consider the two to be independent. The selection processes, moreover, can involve different - albeit competing or complimentary - forms of selection.

2.18.7.139 Electoral System for the National Legislature (ideaesd_esnl)

Long tag: qog_std_ts_ideaesd_esnl

Original tag: ideaesd_esnl

Description:

Electoral System for National Legislature:

1. List Proportional Representation (List PR)
Under a List Proportional Representation (List PR) system each party or grouping presents a list of candidates for a multi-member electoral district, the voters vote for a party, and parties receive seats in proportion to their overall share of the vote. In some (closed list) systems the winning candidates are taken from the lists in order of their position on the lists. If the lists are 'open' or 'free' the voters can influence the order of the candidates by marking individual preferences.

2. Block Vote (BV)
Block Vote is a plurality/majority system used in multi-member districts. Electors have as many votes as there are candidates to be elected. The candidates with the highest vote totals win the seats. Usually voters vote for candidates rather than parties and in most systems may use as many, or as few, of their votes as they wish.

3. First Past the Post (FPTP)
First Past The Post is the simplest form of plurality/majority electoral system. The winning candidate is the one who gains more votes than any other candidate, even if this is not an absolute majority of valid votes. The system uses single-member districts and the voters vote for candidates rather than political parties.

4. Two-Round System (TRS)
The Two-Round System is a plurality/majority system in which a second election is held if no candidate or party achieves a given level of votes, most commonly an absolute majority (50 per cent plus one), in the first election round. A Two-Round System may take a majority-plurality form-more than two candidates contest the second round and the one wins the highest number of votes in the second round is elected, regardless of whether they have won an absolute majority-or a majority run-off form-only the top two candidates in the first round contest the second round.

5. Mixed Member Proportional (MMP)
Mixed Member Proportional is a mixed system in which the choices expressed by the voters are used to elect representatives through two different systems-one List PR system and (usually) one plurality/majority system-where the List PR system compensates for the disproportionality in the results from the plurality/majority system.

6. Single Transferable Vote (STV)
The Single Transferable Vote is a preferential system in which the voter has one vote in a multi-member district and the candidates that surpass a specified quota of first preference votes are immediately elected. In successive counts, votes are redistributed from least successful candidates, who are eliminated, and votes surplus to the quota are redistributed from successful candidates, until sufficient candidates are declared elected. Voters normally vote for candidates rather than political parties, although a party-list option is possible.

7. Alternative Vote (AV)
The Alternative Vote is a preferential plurality/majority system used in single-member districts. Voters use numbers to mark their preferences on the ballot paper. A candidate who receives an absolute majority (50 per cent plus 1) of valid first preference votes is declared elected. If no candidate achieves an absolute majority of

first preferences, the least successful candidates are eliminated and their votes reallocated according to their second preferences until one candidate has an absolute majority. Voters vote for candidates rather than political parties.

8. Single Non-Transferable Vote (SNTV)
Under the Single Non-Transferable Vote system voters cast a single vote in a multi-member district. The candidates with the highest vote totals are declared elected. Voters vote for candidates rather than political parties.

9. Two-Round System, Party Block Vote (TRS PBV)
Party Block Vote (PBV) is a plurality/majority system using multi-member districts in which voters cast a single party-centered vote for a party of choice, and do not choose between candidates. The party with the most votes will win every seat in the electoral district.

10. Limited Vote (LV)
Limited Vote is a candidate-centred electoral system used in multi-member districts in which electors have more than one vote, but fewer votes than there are candidates to be elected. The candidates with the highest vote totals win the seats.

11. First Past The Post, Party Block Vote (FPTP PBV)

12. First Past the Post, List Proportional Representation (FPTP List PR)

13. First Past the Post, Block Vote (FPTP BV)

14. First Past the Post, Party Block Vote, List Proportional Representation (FPTP PBV List PR)

15. Parallel
A Parallel System is a mixed system in which the choices expressed by the voters are used to elect representatives through two different systems-one List PR system and (usually) one plurality/majority system-but where no account is taken of the seats allocated under the first system in calculating the results in the second system.

16. In transition

17. Modified Borda Count (Modified BC)
Borda Count (BC) - A candidate-centred preferential system used in either single- or multimember districts in which voters use numbers to mark their preferences on the ballot paper and each preference marked is then assigned a value using equal steps. These are summed and the candidate(s) with the highest total(s) is/are declared elected.

18. Two-Round System, Party Block Vote, List Proportional Representation (TRS PBV List PR)

19. No direct elections.

Variable citation: The International Institute for Democracy and Electoral Assistance. (2021a). Electoral system design database. `https://www.idea.int/data-tools/data/electoral-system-design`

2.18.7.140 Electoral System for the President (ideaesd_esp)

Long tag: qog_std_ts_ideaesd_esp

Original tag: ideaesd_esp

Description:
Electoral System for the President:

1. Two-Round System (TRS)
The Two-Round System is a plurality/majority system in which a second election is held if no candidate or party achieves a given level of votes, most commonly an absolute majority (50 per cent plus one), in the first election round. A Two-Round System may take a majority-plurality form-more than two candidates contest the second round and the one who wins the highest number of votes in the second round is elected, regardless of whether they have won an absolute majority-or a majority run-off form-only the top two candidates in the first round contest the second round.

2. First Past the Post (FPTP)
First Past The Post is the simplest form of plurality/majority electoral system. The winning candidate is the one who gains more votes than any other candidate, even if this is not an absolute majority of valid votes. The system uses single-member districts and the voters vote for candidates rather than political parties.

3. Supplementary Vote (SV)
Supplementary vote: Voters can rank up to three candidates, and if no candidate wins a majority in the first round of voting, second and third preferences from ballots whose first preference candidate has been eliminated are used to determine the winner.

4. Single Transferable Vote (STV)
The Single Transferable Vote is a preferential system in which the voter has one vote in a multi-member district and the candidates that surpass a specified quota of first preference votes are immediately elected. In successive counts, votes are redistributed from least successful candidates, who are eliminated, and votes surplus to the quota are redistributed from successful candidates, until sufficient candidates are declared elected. Voters normally vote for candidates rather than political parties, although a party-list option is possible.

2.18.7.157 Party Control over Ballot (lower/only house) (jw_avgballot)

Long tag: qog_std_ts_jw_avgballot

Original tag: jw_avgballot

Description:
Country-level weighted averages of Party Control over Ballot - SMD (lower/only house) (jw_smdballot) and Party Control over Ballot - MMD (lower/only house) (jw_mmdballot), where the weights are the percentage of members that originate from each tier. This variable thus reflects the value of ballots for the average member sitting in the lower house. The ballot variables focus on the amount of party control over candidates' access to a competitive position on the ballot. The variables equal (in order of increasing personal vote incentives): (0) where parties control access to ballots as well as the order in which individuals will fill the seats that the party wins (closed list multi-member districts, open list multi-member districts with little or no de facto change in list order); (1) where parties control access to the ballot, but not the order in which candidates will receive seats (open lists where intra-party preference votes seem to have a significant influence on which candidates are selected, and single-member districts where parties control access to the list); (2) where there are few or no impediments to individual candidates' ability to appear on the ballot (single-member districts where parties do not control access, e.g. allowing independent candidates and/or use primaries to select candidates).

Variable citation: Johnson, J. W., & Wallack, J. S. (2012). Electoral systems and the personal vote. `https://doi.org/1902.1/17901`

2.18.7.158 Party Control over Ballot (upper house) (jw_avgballot2)

Long tag: qog_std_ts_jw_avgballot2

Original tag: jw_avgballot2

Description:
Country-level weighted averages of Party Control over Ballot - SMD (upper house) (jw_smdballot2) and Party Control over Ballot - MMD (upper house) (jw_mmdballot2), where the weights are the percentage of members that originate from each tier. This variable thus reflects the value of ballots for the average member sitting in the upper house. The ballot variables focus on the amount of party control over candidates' access

to a competitive position on the ballot. The variables equal (in order of increasing personal vote incentives): (0) where parties control access to ballots as well as the order in which individuals will fill the seats that the party wins (closed list multi-member districts, open list multi-member districts with little or no de facto change in list order); (1) where parties control access to the ballot, but not the order in which candidates will receive seats (open lists where intra-party preference votes seem to have a significant influence on which candidates are selected, and single-member districts where parties control access to the list); (2) where there are few or no impediments to individual candidates' ability to appear on the ballot (single-member districts where parties do not control access, e.g. allowing independent candidates and/or use primaries to select candidates).

Long tag: qog_std_ts_jw_avgpool

Original tag: jw_avgpool

Description:

Country-level weighted averages of Sharing of Votes among Candidates - SMD (lower/only house) (jw_smdpool) and Sharing of Votes among Candidates - MMD (lower/only house) (jw_mmdpool), where the weights are the percentage of members that originate from each tier. This variable thus reflects the value of the pooling of votes for the average member sitting in the lower house. The Pool variables measure the extent to which votes among candidates from the same party are shared. The variables equal (in order of increasing personal vote incentives): (0) where pooling of votes occurs across all candidates in a party in a district; (1) where pooling of votes occurs across some, but not all, candidates in a party in a district, or, where there is vote pooling across all candidates in a party in a district, but where the average district accounts for 5percent or less of a legislature's membership; (2) where no pooling of votes occurs across candidates in a party (including single-member districts).

Variable citation: Johnson, J. W., & Wallack, J. S. (2012). Electoral systems and the personal vote. `https://doi.org/1902.1/17901`

2.18.7.160 Sharing of Votes among Candidates (upper house) (jw_avgpool2)

Long tag: qog_std_ts_jw_avgpool2

Original tag: jw_avgpool2

Description:

Country-level weighted averages of Sharing of Votes among Candidates - SMD (upper house) (jw_smdpool2) and Sharing of Votes among Candidates - MMD (upper house) (jw_mmdpool2), where the weights are the percentage of members that originate from each tier. This variable thus reflects the value of the pooling of votes for the average member sitting in the upper house. The Pool variables measure the extent to which votes among candidates from the same party are shared. The variables equal (in order of increasing personal vote incentives): (0) where pooling of votes occurs across all candidates in a party in a district; (1) where pooling of votes occurs across some, but not all, candidates in a party in a district, or, where there is vote pooling across all candidates in a party in a district, but where the average district accounts for 5percent or less of a legislature's membership; (2) where no pooling of votes occurs across candidates in a party (including single-member districts).

Variable citation: Johnson, J. W., & Wallack, J. S. (2012). Electoral systems and the personal vote. `https://doi.org/1902.1/17901`

2.18.7.161 Candidate or Party-specific Voting (lower/only house) (jw_avgvote)

Long tag: qog_std_ts_jw_avgvote

Original tag: jw_avgvote

Description:

Country-level weighted averages of Candidate- or Party-specific Voting - SMD (lower/only house) (jw_smdvote) and Candidate- or Party-specific Voting - MMD (lower/only house) (jw_mmdvote), where the weights are the percentage of members that originate from each tier. This variable thus reflects the value of votes for the average member sitting in the lower house. The Vote variables focus attention on the distinction between casting votes for either parties or individual candidates. The variables equal (in order of increasing personal vote incentives): (0) where voters have only one vote for a party; (1) where voters can vote for a party or a candidate (as in open lists), where voters have multiple votes for multiple candidates (as in runoff or single-transferable vote systems), or where votes for a party or candidate are observationally equivalent (as in single-member districts); (2) where voters have one vote for an individual candidate.

Variable citation: Johnson, J. W., & Wallack, J. S. (2012). Electoral systems and the personal vote. `https://doi.org/1902.1/17901`

2.18.7.162 Candidate or Party-specific Voting (upper house) (jw_avgvote2)

Long tag: qog_std_ts_jw_avgvote2

Original tag: jw_avgvote2

Description:

Country-level weighted averages of Candidate- or Party-specific Voting - SMD (upper house) (jw_smdvote2) and Candidate- or Party-specific Voting - MMD (upper house) (jw_mmdvote2), where the weights are the percentage of members that originate from each tier. This variable thus reflects the value of votes for the average member sitting in the upper house. The Vote variables focus attention on the distinction between casting votes for either parties or individual candidates. The variables equal (in order of increasing personal vote incentives): (0) where voters have only one vote for a party; (1) where voters can vote for a party or a candidate (as in open lists), where voters have multiple votes for multiple candidates (as in runoff or single-transferable vote systems), or where votes for a party or candidate are observationally equivalent (as in single-member districts); (2) where voters have one vote for an individual candidate.

Variable citation: Johnson, J. W., & Wallack, J. S. (2012). Electoral systems and the personal vote. `https://doi.org/1902.1/17901`

2.18.7.163 Bicameral System (jw_bicameral)

Long tag: qog_std_ts_jw_bicameral

Original tag: jw_bicameral

Description:

Equals 1 whenever a country has a bicameral legislature.

Variable citation: Johnson, J. W., & Wallack, J. S. (2012). Electoral systems and the personal vote. `https://doi.org/1902.1/17901`

2.18.7.164 Dominant or Populous Tier (jw_domr)

Long tag: qog_std_ts_jw_domr

Original tag: jw_domr

Description:

This variable ranks countries in increasing order of incentives to cultivate a personal vote according to their most dominant or populous tier (or tier with the greater number of legislators). The variable varies from 1 to 13, corresponding to the thirteen positions in Carey
Shugart's (1995) ranking. For example, a country with a ranking of 1 would have a tier with the lowest possible rank of personal vote incentives, and that tier would account for the majority of the members in the assembly.

Variable citation: Johnson, J. W., & Wallack, J. S. (2012). Electoral systems and the personal vote. `https://doi.org/1902.1/17901`

2.18.7.165 Year of Election (lower/only house) (jw_election)

Long tag: qog_std_ts_jw_election

Original tag: jw_election

Description:

Dummy variable, 1 if year of election to lower house.

Variable citation: Johnson, J. W., & Wallack, J. S. (2012). Electoral systems and the personal vote. `https://doi.org/1902.1/17901`

2.18.7.166 Year of Election (upper house) (jw_election2)

Long tag: qog_std_ts_jw_election2

Original tag: jw_election2

Description:

Dummy variable, 1 if year of election to upper house.

Variable citation: Johnson, J. W., & Wallack, J. S. (2012). Electoral systems and the personal vote. `https://doi.org/1902.1/17901`

2.18.7.167 Ballot Access for Independent Candidates (lower/only house) (jw_indy)

Long tag: qog_std_ts_jw_indy

Original tag: jw_indy

Description:

Equals 1 wherever independent candidates are legally allowed (even where the legal requirements are strict), and 0 otherwise. This complements the cases where the ballot variables above equal 1 or 2, since they are adjusted to capture de facto practice. jw_indy instead captures the de jure rules. A user could adjust the ballot variables above to be de jure if (s)he replaced values of 2 with values of 1 when jw_indy = 0. Refers to lower house elections. The ballot variables focus on the amount of party control over candidates' access to a competitive position on the ballot. The variables equal (in order of increasing personal vote incentives): (0)

where parties control access to ballots as well as the order in which individuals will fill the seats that the party wins (closed list multi-member districts, open list multi-member districts with little or no de facto change in list order); (1) where parties control access to the ballot, but not the order in which candidates will receive seats (open lists where intra-party preference votes seem to have a significant influence on which candidates are selected, and single-member districts where parties control access to the list); (2) where there are few or no impediments to individual candidates' ability to appear on the ballot (single-member districts where parties do not control access, e.g. allowing independent candidates and/or use primaries to select candidates).

Variable citation: Johnson, J. W., & Wallack, J. S. (2012). Electoral systems and the personal vote. `https://doi.org/1902.1/17901`

2.18.7.168 Ballot Access for Independent Candidates (upper house) (jw_indy2)

Long tag: qog_std_ts_jw_indy2

Original tag: jw_indy2

Description:

Same as jw_indy, but for upper house elections. The ballot variables focus on the amount of party control over candidates' access to a competitive position on the ballot. The variables equal (in order of increasing personal vote incentives): (0) where parties control access to ballots as well as the order in which individuals will fill the seats that the party wins (closed list multi-member districts, open list multi-member districts with little or no de facto change in list order); (1) where parties control access to the ballot, but not the order in which candidates will receive seats (open lists where intra-party preference votes seem to have a significant influence on which candidates are selected, and single-member districts where parties control access to the list); (2) where there are few or no impediments to individual candidates' ability to appear on the ballot (single-member districts where parties do not control access, e.g. allowing independent candidates and/or use primaries to select candidates).

Variable citation: Johnson, J. W., & Wallack, J. S. (2012). Electoral systems and the personal vote. `https://doi.org/1902.1/17901`

2.18.7.169 Number of Coded Legislators (lower/only house) (jw_legsize)

Long tag: qog_std_ts_jw_legsize

Original tag: jw_legsize

Description:

The number of legislators coded in the dataset. These may not account for the total number of legislators if there are appointed legislators that have no electoral rules to code.

Variable citation: Johnson, J. W., & Wallack, J. S. (2012). Electoral systems and the personal vote. `https://doi.org/1902.1/17901`

2.18.7.170 Number of Coded Legislators (upper house) (jw_legsize2)

Long tag: qog_std_ts_jw_legsize2

Original tag: jw_legsize2

Description:

The number of legislators coded in the dataset. These may not account for the total number of legislators if there are appointed legislators that have no electoral rules to code.

Variable citation: Johnson, J. W., & Wallack, J. S. (2012). Electoral systems and the personal vote. `https://doi.org/1902.1/17901`

2.18.7.171 District Magnitude of Average Legislator (lower/only house) (jw_mcand)

Long tag: qog_std_ts_jw_mcand

Original tag: jw_mcand

Description:

In keeping with the emphasis on the incentives faced by individual legislators, this variable measures the district magnitude considering the viewpoint of the average legislator in the lower house. It is scored as a weighted average of the various district sizes, where weights are computed as the number of legislators running in the district of each magnitude divided by the total number of seats. For example: A country with 300 seats divided among one national district with 200 members and 100 single-member districts has a magnitude for the average legislator of [(200*200) + (100*1)]/300, which yields a figure of 133.67.

Variable citation: Johnson, J. W., & Wallack, J. S. (2012). Electoral systems and the personal vote. `https://doi.org/1902.1/17901`

2.18.7.172 District Magnitude of Average Legislator (upper house) (jw_mcand2)

Long tag: qog_std_ts_jw_mcand2

Original tag: jw_mcand2

Description:
This is the district magnitude of the average legislator in the upper house.

Variable citation: Johnson, J. W., & Wallack, J. S. (2012). Electoral systems and the personal vote. `https://doi.org/1902.1/17901`

2.18.7.173 Average District Magnitude (lower/only house) (jw_mdist)

Long tag: qog_std_ts_jw_mdist

Original tag: jw_mdist

Description:
This is the standard magnitude of the average district in the lower house. For example: A country with 300 seats divided among one national district with 200 members and 100 single-member districts would have an average district magnitude (jw_mdist) of 2.97 (i.e., 300/101).

Variable citation: Johnson, J. W., & Wallack, J. S. (2012). Electoral systems and the personal vote. `https://doi.org/1902.1/17901`

2.18.7.174 Average District Magnitude (upper house) (jw_mdist2)

Long tag: qog_std_ts_jw_mdist2

Original tag: jw_mdist2

Description:
This is the average district magnitude in the upper house.

Variable citation: Johnson, J. W., & Wallack, J. S. (2012). Electoral systems and the personal vote. `https://doi.org/1902.1/17901`

2.18.7.175 Party Control over Ballot - MMD (lower/only house) (jw_mmdballot)

Long tag: qog_std_ts_jw_mmdballot

Original tag: jw_mmdballot

Description:
Ballot (coded as above) for multi-member district tiers in elections to the lower house. The ballot variables focus on the amount of party control over candidates' access to a competitive position on the ballot. The variables equal (in order of increasing personal vote incentives): (0) where parties control access to ballots as well as the order in which individuals will fill the seats that the party wins (closed list multi-member districts, open list multi-member districts with little or no de facto change in list order); (1) where parties control access to the ballot, but not the order in which candidates will receive seats (open lists where intra-party preference votes seem to have a significant influence on which candidates are selected, and single-member districts where parties control access to the list); (2) where there are few or no impediments to individual candidates' ability to appear on the ballot (single-member districts where parties do not control access, e.g. allowing independent candidates and/or use primaries to select candidates).

Variable citation: Johnson, J. W., & Wallack, J. S. (2012). Electoral systems and the personal vote. `https://doi.org/1902.1/17901`

2.18.7.176 Party Control over Ballot - MMD (upper house) (jw_mmdballot2)

Long tag: qog_std_ts_jw_mmdballot2

Original tag: jw_mmdballot2

Description:
Ballot for multi-member district tiers in elections to the upper house. The ballot variables focus on the amount of party control over candidates' access to a competitive position on the ballot. The variables equal (in order of increasing personal vote incentives): (0) where parties control access to ballots as well as the order in which individuals will fill the seats that the party wins (closed list multi-member districts, open list multi-member districts with little or no de facto change in list order); (1) where parties control access to the ballot, but not the order in which candidates will receive seats (open lists where intra-party preference votes seem to have a significant influence on which candidates are selected, and single-member districts where parties control access to the list); (2) where there are few or no impediments to individual candidates' ability to appear on the ballot (single-member districts where parties do not control access, e.g. allowing independent candidates and/or use primaries to select candidates).

Variable citation: Johnson, J. W., & Wallack, J. S. (2012). Electoral systems and the personal vote. `https://doi.org/1902.1/17901`

2.18.7.177 Sharing of Votes among Candidates - MMD (lower/only house) (jw_mmdpool)

Long tag: qog_std_ts_jw_mmdpool

Original tag: jw_mmdpool

Description:
Pool for multi-member district tiers in elections to the lower house. The Pool variables measure the extent to which votes among candidates from the same party are shared. The variables equal (in order of increasing personal vote incentives): (0) where pooling of votes occurs across all candidates in a party in a district; (1) where pooling of votes occurs across some, but not all, candidates in a party in a district, or, where there is vote pooling across all candidates in a party in a district, but where the average district accounts for 5percent or less of a legislature's membership; (2) where no pooling of votes occurs across candidates in a party (including single-member districts).

Variable citation: Johnson, J. W., & Wallack, J. S. (2012). Electoral systems and the personal vote. `https://doi.org/1902.1/17901`

2.18.7.178 Sharing of Votes among Candidates - MMD (upper house) (jw_mmdpool2)

Long tag: qog_std_ts_jw_mmdpool2

Original tag: jw_mmdpool2

Description:
Pool for multi-member district tiers in elections to the upper house. The Pool variables measure the extent to which votes among candidates from the same party are shared. The variables equal (in order of increasing personal vote incentives): (0) where pooling of votes occurs across all candidates in a party in a district; (1) where pooling of votes occurs across some, but not all, candidates in a party in a district, or, where there is vote pooling across all candidates in a party in a district, but where the average district accounts for 5percent or less of a legislature's membership; (2) where no pooling of votes occurs across candidates in a party (including single-member districts).

Variable citation: Johnson, J. W., & Wallack, J. S. (2012). Electoral systems and the personal vote. `https://doi.org/1902.1/17901`

2.18.7.179 Candidate or Party-specific Voting - MMD (lower/only house) (jw_mmdvote)

Long tag: qog_std_ts_jw_mmdvote

Original tag: jw_mmdvote

Description:
Vote for multi-member district tiers in elections to the lower house. The Vote variables focus attention on the distinction between casting votes for either parties or individual candidates. The variables equal (in order of increasing personal vote incentives): (0) where voters have only one vote for a party; (1) where voters can vote for a party or a candidate (as in open lists), where voters have multiple votes for multiple candidates (as in runoff or single-transferable vote systems), or where votes for a party or candidate are observationally equivalent (as in single-member districts); (2) where voters have one vote for an individual candidate.

Variable citation: Johnson, J. W., & Wallack, J. S. (2012). Electoral systems and the personal vote. `https://doi.org/1902.1/17901`

2.18.7.180 Candidate or Party-specific Voting - MMD (upper house) (jw_mmdvote2)

Long tag: qog_std_ts_jw_mmdvote2

Original tag: jw_mmdvote2

Description:
Vote for multi-member district tiers in elections to the upper house. The Vote variables focus attention on the distinction between casting votes for either parties or individual candidates. The variables equal (in order of increasing personal vote incentives): (0) where voters have only one vote for a party; (1) where voters can vote for a party or a candidate (as in open lists), where voters have multiple votes for multiple candidates (as in runoff or single-transferable vote systems), or where votes for a party or candidate are observationally equivalent (as in single-member districts); (2) where voters have one vote for an individual candidate.

Variable citation: Johnson, J. W., & Wallack, J. S. (2012). Electoral systems and the personal vote. `https://doi.org/1902.1/17901`

2.18.7.181 Runoff Elections (jw_multiround)

Long tag: qog_std_ts_jw_multiround

Original tag: jw_multiround

Description:
The variable indicates whether there are run-off elections. These are usually for SMDs with absolute majority requirements. Where jw_multiround is equal to 1, voters have more than a single vote to cast, albeit votes occur on separate election days.

Variable citation: Johnson, J. W., & Wallack, J. S. (2012). Electoral systems and the personal vote. https://doi.org/1902.1/17901

2.18.7.182 Multi Tier (lower/only house) (jw_multitier)

Long tag: qog_std_ts_jw_multitier

Original tag: jw_multitier

Description:

Indicates whether there are two or more tiers to the legislature.

Variable citation: Johnson, J. W., & Wallack, J. S. (2012). Electoral systems and the personal vote. https://doi.org/1902.1/17901

2.18.7.183 Multi Tier (upper house) (jw_multitier2)

Long tag: qog_std_ts_jw_multitier2

Original tag: jw_multitier2

Description:

Equals 1 wherever there are multiple allocation tiers, regardless of whether they are the result of mixed member systems that incorporate different members under different rules, or systems that have upper tiers within a single electoral system to compensate for disproportionality in lower tiers.

Variable citation: Johnson, J. W., & Wallack, J. S. (2012). Electoral systems and the personal vote. https://doi.org/1902.1/17901

2.18.7.184 Single Party System (jw_oneparty)

Long tag: qog_std_ts_jw_oneparty

Original tag: jw_oneparty

Description:

Dummy variable, 1 if single-party system.

Variable citation: Johnson, J. W., & Wallack, J. S. (2012). Electoral systems and the personal vote. https://doi.org/1902.1/17901

2.18.7.185 Tiers allocated in Parallel (jw_parallel)

Long tag: qog_std_ts_jw_parallel

Original tag: jw_parallel

Description:

Coded 1 if multiple tiers are elected in parallel fashion, 0 when they are elected in (at least some-what) compensatory fashion. Is coded only when jw_multitier = 1.

Variable citation: Johnson, J. W., & Wallack, J. S. (2012). Electoral systems and the personal vote. https://doi.org/1902.1/17901

2.18.7.186 Personalistic Tier (jw_persr)

Long tag: qog_std_ts_jw_persr

Original tag: jw_persr

Description:

This variable ranks countries in increasing order of incentives to cultivate a personal vote according to their more personalistic tier (or tier with the greater incentives to cultivate a personal vote). The variable varies from 1 to 13, corresponding to the thirteen positions in Carey
Shugart's (1995) ranking. For example, a country with a ranking of 13 would have a tier with the highest possible rank of incentives to cultivate a personal vote, although that tier may only account for a minority or small fraction of its members.

Variable citation: Johnson, J. W., & Wallack, J. S. (2012). Electoral systems and the personal vote. https://doi.org/1902.1/17901

2.18.7.187 Proportion Coded Legislators (lower/only house) (jw_propcoded)

Long tag: qog_std_ts_jw_propcoded

Original tag: jw_propcoded

Description:

Shows the proportion of total legislators (elected and non-elected) that are included in the database (i.e. those that are elected).

Variable citation: Johnson, J. W., & Wallack, J. S. (2012). Electoral systems and the personal vote. https://doi.org/1902.1/17901

2.18.7.188 Proportion Coded Legislators (upper house) (jw_propcoded2)

Long tag: qog_std_ts_jw_propcoded2

Original tag: jw_propcoded2

Description:
This is the proportion of the total number of legislators (elected and non-elected) that are coded.

Variable citation: Johnson, J. W., & Wallack, J. S. (2012). Electoral systems and the personal vote. `https://doi.org/1902.1/17901`

2.18.7.189 Seats from Multi-Member Districts (lower/only house) (jw_propmmd)

Long tag: qog_std_ts_jw_propmmd

Original tag: jw_propmmd

Description:
Proportion of seats from Multi-Member District (lower/only house).

Variable citation: Johnson, J. W., & Wallack, J. S. (2012). Electoral systems and the personal vote. `https://doi.org/1902.1/17901`

2.18.7.190 Seats from Multi-Member Districts (upper house) (jw_propmmd2)

Long tag: qog_std_ts_jw_propmmd2

Original tag: jw_propmmd2

Description:
This is the proportion of coded legislators elected in multi-member districts.

Variable citation: Johnson, J. W., & Wallack, J. S. (2012). Electoral systems and the personal vote. `https://doi.org/1902.1/17901`

2.18.7.191 Seats from a National District (lower/only house) (jw_propn)

Long tag: qog_std_ts_jw_propn

Original tag: jw_propn

Description:
The proportion of legislators that are elected via a national tier.

Variable citation: Johnson, J. W., & Wallack, J. S. (2012). Electoral systems and the personal vote. `https://doi.org/1902.1/17901`

2.18.7.192 Seats from a National District (upper house) (jw_propn2)

Long tag: qog_std_ts_jw_propn2

Original tag: jw_propn2

Description:
This is the proportion of coded legislators that are elected via a national tier. This is often (but not always) similar to the proportion elected via multi-member districts (jw_propmmd): some electoral systems have proportional representation based on regional multimember districts as well as national tiers (e.g. Hungary).

Variable citation: Johnson, J. W., & Wallack, J. S. (2012). Electoral systems and the personal vote. `https://doi.org/1902.1/17901`

2.18.7.193 Seats from Single-Member Districts (lower/only house) (jw_propsmd)

Long tag: qog_std_ts_jw_propsmd

Original tag: jw_propsmd

Description:
Proportion of seats from Single-Member Districts.

Variable citation: Johnson, J. W., & Wallack, J. S. (2012). Electoral systems and the personal vote. `https://doi.org/1902.1/17901`

2.18.7.194 Seats from Single-Member Districts (upper house) (jw_propsmd2)

Long tag: qog_std_ts_jw_propsmd2

Original tag: jw_propsmd2

Description:
This is the proportion of coded legislators elected in single-member districts (Note: In the original data for Kyrgyzstan propsmd2=60 in 1997-1999 and propsmd2=45 2000-2004. We have replaced these figures with missing values).

Variable citation: Johnson, J. W., & Wallack, J. S. (2012). Electoral systems and the personal vote. `https://doi.org/1902.1/17901`

2.18.7.195 Rank Vote (lower/only house) (jw_rank)

Long tag: qog_std_ts_jw_rank

Original tag: jw_rank

Description:

Equals 1 in two circumstances: where voters may rank order candidates according to preference, or where citizens have multiple preference votes for multiple candidates, even if they may not specifically rank the candidates. Otherwise, jw_rank is equal to zero. Refers to lower house elections.

Variable citation: Johnson, J. W., & Wallack, J. S. (2012). Electoral systems and the personal vote. `https://doi.org/1902.1/17901`

2.18.7.196 Rank Vote (upper house) (jw_rank2)

Long tag: qog_std_ts_jw_rank2

Original tag: jw_rank2

Description:

Same as jw_rank, but for upper house elections.

Variable citation: Johnson, J. W., & Wallack, J. S. (2012). Electoral systems and the personal vote. `https://doi.org/1902.1/17901`

2.18.7.197 Party Control over Ballot - SMD (lower/only house) (jw_smdballot)

Long tag: qog_std_ts_jw_smdballot

Original tag: jw_smdballot

Description:

Ballot for single-member district tiers in elections to the lower house. The ballot variables focus on the amount of party control over candidates' access to a competitive position on the ballot. The variables equal (in order of increasing personal vote incentives): (0) where parties control access to ballots as well as the order in which individuals will fill the seats that the party wins (closed list multi-member districts, open list multi-member districts with little or no de facto change in list order); (1) where parties control access to the ballot, but not the order in which candidates will receive seats (open lists where intra-party preference votes seem to have a significant influence on which candidates are selected, and single-member districts where parties control access to the list); (2) where there are few or no impediments to individual candidates' ability to appear on the ballot (single-member districts where parties do not control access, e.g. allowing independent candidates and/or use primaries to select candidates).

Variable citation: Johnson, J. W., & Wallack, J. S. (2012). Electoral systems and the personal vote. `https://doi.org/1902.1/17901`

2.18.7.198 Sharing of Votes among Candidates - SMD (lower/only house) (jw_smdpool)

Long tag: qog_std_ts_jw_smdpool

Original tag: jw_smdpool

Description:

Pool for single-member district tiers in elections to the lower house. The Pool variables measure the extent to which votes among candidates from the same party are shared. The variables equal (in order of increasing personal vote incentives): (0) where pooling of votes occurs across all candidates in a party in a district; (1) where pooling of votes occurs across some, but not all, candidates in a party in a district, or, where there is vote pooling across all candidates in a party in a district, but where the average district accounts for 5percent or less of a legislature's membership; (2) where no pooling of votes occurs across candidates in a party (including single-member districts).

Variable citation: Johnson, J. W., & Wallack, J. S. (2012). Electoral systems and the personal vote. `https://doi.org/1902.1/17901`

2.18.7.199 Candidate or Party-specific Voting - SMD (lower/only house) (jw_smdvote)

Long tag: qog_std_ts_jw_smdvote

Original tag: jw_smdvote

Description:

Vote for single-member district tiers in elections to the lower house. The Vote variables focus attention on the distinction between casting votes for either parties or individual candidates. The variables equal (in order of increasing personal vote incentives): (0) where voters have only one vote for a party; (1) where voters can vote for a party or a candidate (as in open lists), where voters have multiple votes for multiple candidates (as in

runoff or single-transferable vote systems), or where votes for a party or candidate are observationally equivalent (as in single-member districts); (2) where voters have one vote for an individual candidate.

Variable citation: Johnson, J. W., & Wallack, J. S. (2012). Electoral systems and the personal vote. `https://doi.org/1902.1/17901`

2.18.7.200 Tiervote (lower/only house) (jw_tiervote)

Long tag: qog_std_ts_jw_tiervote

Original tag: jw_tiervote

Description:
Equals 1 when citizens are given a separate vote for deputies in each legislative tier.

Variable citation: Johnson, J. W., & Wallack, J. S. (2012). Electoral systems and the personal vote. `https://doi.org/1902.1/17901`

2.18.7.201 Tiervote (upper house) (jw_tiervote2)

Long tag: qog_std_ts_jw_tiervote2

Original tag: jw_tiervote2

Description:
Equals 1 when citizens are given a separate vote for deputies in each legislative tier.

Variable citation: Johnson, J. W., & Wallack, J. S. (2012). Electoral systems and the personal vote. `https://doi.org/1902.1/17901`

2.18.7.202 First Multiparty Election (nelda_fme)

Long tag: qog_std_ts_nelda_fme

Original tag: nelda_fme

Description:
This indicates when a newly independent country is having its first elections, when a country holds the first multiparty elections after a significant period of non-democratic rule, or when a country transitions from single-party elections to multiparty elections. Multiparty means that more than one party is allowed to contest the election, and that at least some of the parties are both nominally and effectively independent of the ruling actors.

Variable citation: Hyde, S. D., & Marinov, N. (2012). Which elections can be lost? *Political Analysis*, 20(2), 191–201 Hyde, S. D., & Marinov, N. (2021). Codebook for national elections across democracy and autocracy dataset, 5.0. `https://nelda.co/`

2.18.7.203 Media Bias before Election (nelda_mbbe)

Long tag: qog_std_ts_nelda_mbbe

Original tag: nelda_mbbe

Description:
If there were reports by either domestic or outside actors of media bias in favor of the incumbent or ruling party, it is coded as a "Yes". In cases where the media is totally controlled by the government, and/or no opposition is allowed, the answer is "Yes". It is possible that the answer is "No" even if the political system is tightly controlled.

Variable citation: Hyde, S. D., & Marinov, N. (2012). Which elections can be lost? *Political Analysis*, 20(2), 191–201 Hyde, S. D., & Marinov, N. (2021). Codebook for national elections across democracy and autocracy dataset, 5.0. `https://nelda.co/`

2.18.7.204 Was More Than One Party Legal (nelda_mtop)

Long tag: qog_std_ts_nelda_mtop

Original tag: nelda_mtop

Description:
This variable indicates whether multiple political parties were technically legal. The legalization of multiple parties need not necessarily mean the existence of a functioning opposition party, as there may be other non-legal barriers to the development of an opposition party. Similarly, a well organized opposition party may exist but may not be legal.

Variable citation: Hyde, S. D., & Marinov, N. (2012). Which elections can be lost? *Political Analysis*, 20(2), 191–201 Hyde, S. D., & Marinov, N. (2021). Codebook for national elections across democracy and autocracy dataset, 5.0. `https://nelda.co/`

2.18.7.205 Number of Elections, Total (nelda_noe)

Long tag: qog_std_ts_nelda_noe

Original tag: nelda_noe

Description:
The number of elections during the year (counting legislative, executive and constituent assembly elections).

Variable citation: Hyde, S. D., & Marinov, N. (2012). Which elections can be lost? *Political Analysis*, 20(2), 191–201 Hyde, S. D., & Marinov, N. (2021). Codebook for national elections across democracy and autocracy dataset, 5.0. `https://nelda.co/`

2.18.7.206 Number of Elections, Constituent Assembly (nelda_noea)

Long tag: qog_std_ts_nelda_noea

Original tag: nelda_noea

Description:
Number of constituent assembly elections during the year.

Variable citation: Hyde, S. D., & Marinov, N. (2012). Which elections can be lost? *Political Analysis*, 20(2), 191–201 Hyde, S. D., & Marinov, N. (2021). Codebook for national elections across democracy and autocracy dataset, 5.0. `https://nelda.co/`

2.18.7.207 Number of Elections, Executive (nelda_noee)

Long tag: qog_std_ts_nelda_noee

Original tag: nelda_noee

Description:
Number of executive elections during the year.

Variable citation: Hyde, S. D., & Marinov, N. (2012). Which elections can be lost? *Political Analysis*, 20(2), 191–201 Hyde, S. D., & Marinov, N. (2021). Codebook for national elections across democracy and autocracy dataset, 5.0. `https://nelda.co/`

2.18.7.208 Number of Elections, Legislative (nelda_noel)

Long tag: qog_std_ts_nelda_noel

Original tag: nelda_noel

Description:
Number of legislative elections during the year.

Variable citation: Hyde, S. D., & Marinov, N. (2012). Which elections can be lost? *Political Analysis*, 20(2), 191–201 Hyde, S. D., & Marinov, N. (2021). Codebook for national elections across democracy and autocracy dataset, 5.0. `https://nelda.co/`

2.18.7.209 Was Opposition Allowed (nelda_oa)

Long tag: qog_std_ts_nelda_oa

Original tag: nelda_oa

Description:
This variable indicates whether at least one opposition political party existed to contest the election. Some countries have multiple government parties but no opposition political party. An opposition party is one that is not in the government, meaning it is not affiliated with the incumbent party in power.

Variable citation: Hyde, S. D., & Marinov, N. (2012). Which elections can be lost? *Political Analysis*, 20(2), 191–201 Hyde, S. D., & Marinov, N. (2021). Codebook for national elections across democracy and autocracy dataset, 5.0. `https://nelda.co/`

2.18.7.210 Electoral Family (no_ef)

Long tag: qog_std_ts_no_ef

Original tag: no_ef

Description:
Electoral Family:

1. Majoritarian
2. Combined (mixed)
3. Proportional
4. No competitive elections

Variable citation: Norris, P. (2009). Democracy Timeseries Data Release 3.0. `http://www.hks.harvard.edu/fs/pnorris/Data/Data.htm`

2.18.7.211 Cummulative Party System Innovation (psi_cpsi1)

Long tag: qog_std_ts_psi_cpsi1

Original tag: psi_cpsi1

Description:

Cumulative Party System Innovation: sum of the vote share received by non-founder parties in each election. A party is considered as a founder if it has received at least 1percent of the national vote share in at least one of the first two post-WWII elections (or, in the case of Greece, Portugal and Spain, the first two democratic elections). Otherwise, the party is counted as a non-founder. The rationale behind this choice is that we look at the first two post-WWII or post-authoritarian elections and make a dichotomous distinction between relevant parties that formed the system (those who received more than 1percent of the votes) and parties that emerged later or were only marginal actors (those below 1percent) at that time.

Variable citation: Emanuele, V. (2016). Dataset of new parties and party system innovation in western europe since 1945. `https://doi.org/10.7802/1363`

2.18.7.212 Cummulative Party System Innovation of a second election in a year (psi_cpsi2)

Long tag: qog_std_ts_psi_cpsi2

Original tag: psi_cpsi2

Description:

Cumulative Party System Innovation: sum of the vote share received by non-founder parties in each election. A party is considered as a founder if it has received at least 1percent of the national vote share in at least one of the first two post-WWII elections (or, in the case of Greece, Portugal and Spain, the first two democratic elections). Otherwise, the party is counted as a non-founder. The rationale behind this choice is that we look at the first two post-WWII or post-authoritarian elections and make a dichotomous distinction between relevant parties that formed the system (those who received more than 1percent of the votes) and parties that emerged later or were only marginal actors (those below 1percent) at that time. This variable (psi_cpsi2) refers to a second election held on the same year as an election reported on psi_cpsi1.

Variable citation: Emanuele, V. (2016). Dataset of new parties and party system innovation in western europe since 1945. `https://doi.org/10.7802/1363`

2.18.7.213 Exact date of the election (psi_edate1)

Long tag: qog_std_ts_psi_edate1

Original tag: psi_edate1

Description:

Exact date of the election

Variable citation: Emanuele, V. (2016). Dataset of new parties and party system innovation in western europe since 1945. `https://doi.org/10.7802/1363`

2.18.7.214 Exact date of the second election in a year (psi_edate2)

Long tag: qog_std_ts_psi_edate2

Original tag: psi_edate2

Description:

Exact date of a second election in a same year

Variable citation: Emanuele, V. (2016). Dataset of new parties and party system innovation in western europe since 1945. `https://doi.org/10.7802/1363`

2.18.7.215 Party System Innovation (overall vote share of new parties in given election) (psi_psi1)

Long tag: qog_std_ts_psi_psi1

Original tag: psi_psi1

Description:

Party System Innovation: overall vote share of new parties in a given election. It is calculated at time t with respect to time t-1 (namely, PSInn is calculated with respect to the status quo established at the previous election) and therefore each observation in each country is completely independent from the previous ones. In order to exclude marginal parties, the author has set a threshold at 1percent of the national share for a given party to be considered as part of the party system in a given election and has collected data starting from the third post-World War II or democratic election of each country, for a total of 209 new parties (see the complete list of new parties below) in 327 elections. The underlying assumption is that the party system innovation they are interested in is that occurring after the initial institutionalization of the party system. According to PSInn, a party is considered 'new' only in the first election when it enters the party system by receiving at least 1percent of the national share. Then, in the subsequent elections, it becomes 'old'.

Variable citation: Emanuele, V. (2016). Dataset of new parties and party system innovation in western europe since 1945. `https://doi.org/10.7802/1363`

2.18.7.216 Party System Innovation of a second election in a year (psi_psi2)

Long tag: qog_std_ts_psi_psi2

Original tag: psi_psi2

Description:

Party System Innovation: overall vote share of new parties in a given election. It is calculated at time t with respect to time t-1 (namely, PSInn is calculated with respect to the status quo established at the previous election) and therefore each observation in each country is completely independent from the previous ones. In order to exclude marginal parties, the author has set a threshold at 1percent of the national share for a given party to be considered as part of the party system in a given election and has collected data starting from the third post-World War II or democratic election of each country, for a total of 209 new parties (see the complete list of new parties below) in 327 elections. The underlying assumption is that the party system innovation they are interested in is that occurring after the initial institutionalization of the party system. According to PSInn, a party is considered 'new' only in the first election when it enters the party system by receiving at least 1percent of the national share. Then, in the subsequent elections, it becomes 'old'. This variable (psi_psi2) refers to a second election held on the same year as an election reported on psi_psi1.

Variable citation: Emanuele, V. (2016). Dataset of new parties and party system innovation in western europe since 1945. `https://doi.org/10.7802/1363`

2.18.7.217 Majoritarian Electoral Systems (pt_maj)

Long tag: qog_std_ts_pt_maj

Original tag: pt_maj

Description:

Dummy variable:

1. The lower house is selected under plurality rule
0. Otherwise.

Only legislative elections (lower house) are considered.

Variable citation: Persson, T., & Tabellini, G. E. (2003). *The economic effects of constitutions* [Munich Lectures in Economics]. MIT Press

2.18.7.218 Robust Democracy: Electoral Process (sgi_qdep)

Long tag: qog_std_ts_sgi_qdep

Original tag: sgi_qdep

Description:

Robust Democracy: Electoral Process (Candidacy Procedures, Media Access, Voting and Registration Rights, Party Financing, Popular Decision-making).

Variable citation: Schiller, C., & Hellmann, T. (2020). Sustainable governance indicators 2020 [Date accessed: 12 December 2021]. *Bertelsmann Stiftung*. `https://www.sgi-network.org`

2.18.7.219 Cabinet Portfolios: Centrist Christian Democratic (sw_cccd)

Long tag: qog_std_ts_sw_cccd

Original tag: sw_cccd

Description:

Centrist Christian Democratic cabinet portfolios as a percent of all cabinet portfolios.

Variable citation: Swank, D. (2018). Comparative political parties dataset: Electoral, legislative, and government strength of political parties by ideological group in 21 capitalist democracies, 1950-2015. `http://www.marquette.edu/polisci/faculty_swank.shtml`

2.18.7.220 Cabinet Portfolios: Christian Democratic (sw_ccd)

Long tag: qog_std_ts_sw_ccd

Original tag: sw_ccd

Description:

Total Christian Democratic party cabinet portfolios as a percent of all cabinet net portfolios.

Variable citation: Swank, D. (2018). Comparative political parties dataset: Electoral, legislative, and government strength of political parties by ideological group in 21 capitalist democracies, 1950-2015. `http://www.marquette.edu/polisci/faculty_swank.shtml`

2.18.7.221 Cabinet Portfolios: Center (sw_cce)

Long tag: qog_std_ts_sw_cce

Original tag: sw_cce

Description:
Center party cabinet portfolios as a percent of all portfolios.

Variable citation: Swank, D. (2018). Comparative political parties dataset: Electoral, legislative, and government strength of political parties by ideological group in 21 capitalist democracies, 1950-2015. `http://www.marquette.edu/polisci/faculty_swank.shtml`

2.18.7.222 Cabinet Portfolios: Left (sw_cl)

Long tag: qog_std_ts_sw_cl

Original tag: sw_cl

Description:
Left party cabinet portfolios as a percent of all cabinet portfolios.

Variable citation: Swank, D. (2018). Comparative political parties dataset: Electoral, legislative, and government strength of political parties by ideological group in 21 capitalist democracies, 1950-2015. `http://www.marquette.edu/polisci/faculty_swank.shtml`

2.18.7.223 Cabinet Portfolios: Left-Libertarian (sw_cll)

Long tag: qog_std_ts_sw_cll

Original tag: sw_cll

Description:
Percentage of cabinet portfolios in national government held by left libertarian ("new left") parties.

Variable citation: Swank, D. (2018). Comparative political parties dataset: Electoral, legislative, and government strength of political parties by ideological group in 21 capitalist democracies, 1950-2015. `http://www.marquette.edu/polisci/faculty_swank.shtml`

2.18.7.224 Cabinet Portfolios: Right (sw_cr)

Long tag: qog_std_ts_sw_cr

Original tag: sw_cr

Description:
Right party cabinet portfolios as a percent of all cabinet portfolios.

Variable citation: Swank, D. (2018). Comparative political parties dataset: Electoral, legislative, and government strength of political parties by ideological group in 21 capitalist democracies, 1950-2015. `http://www.marquette.edu/polisci/faculty_swank.shtml`

2.18.7.225 Cabinet Portfolios: Right-Wing Populist (sw_crwp)

Long tag: qog_std_ts_sw_crwp

Original tag: sw_crwp

Description:
Percentage of cabinet portfolios in national government held by right-wing populist parties.

Variable citation: Swank, D. (2018). Comparative political parties dataset: Electoral, legislative, and government strength of political parties by ideological group in 21 capitalist democracies, 1950-2015. `http://www.marquette.edu/polisci/faculty_swank.shtml`

2.18.7.226 Election Year (sw_ey)

Long tag: qog_std_ts_sw_ey

Original tag: sw_ey

Description:
Election Year. Dummy variable coded 1 for years in which elections occurred; otherwise, 0.

Variable citation: Swank, D. (2018). Comparative political parties dataset: Electoral, legislative, and government strength of political parties by ideological group in 21 capitalist democracies, 1950-2015. `http://www.marquette.edu/polisci/faculty_swank.shtml`

2.18.7.227 Governing Party Seats: Centrist Christian Democratic (sw_gccd)

Long tag: qog_std_ts_sw_gccd

Original tag: sw_gccd

Description:
Centrist Christian Democratic governing party seats as a percent of all legislative seats.

Variable citation: Swank, D. (2018). Comparative political parties dataset: Electoral, legislative, and government strength of political parties by ideological group in 21 capitalist democracies, 1950-2015. `http://www.marquette.edu/polisci/faculty_swank.shtml`

2.18.7.228 Governing Party Seats: Christian Democratic (sw_gcd)

Long tag: qog_std_ts_sw_gcd

Original tag: sw_gcd

Description:
Total Christian Democratic governing party seats as a percent of all legislative seats.

Variable citation: Swank, D. (2018). Comparative political parties dataset: Electoral, legislative, and government strength of political parties by ideological group in 21 capitalist democracies, 1950-2015. `http://www.marquette.edu/polisci/faculty_swank.shtml`

2.18.7.229 Governing Party Seats: Center (sw_gce)

Long tag: qog_std_ts_sw_gce

Original tag: sw_gce

Description:
Center governing party seats as a percent of all legislative seats.

Variable citation: Swank, D. (2018). Comparative political parties dataset: Electoral, legislative, and government strength of political parties by ideological group in 21 capitalist democracies, 1950-2015. `http://www.marquette.edu/polisci/faculty_swank.shtml`

2.18.7.230 Governing Party Seats: Left (sw_gl)

Long tag: qog_std_ts_sw_gl

Original tag: sw_gl

Description:
Left governing party seats as a percent of all legislative seats.

Variable citation: Swank, D. (2018). Comparative political parties dataset: Electoral, legislative, and government strength of political parties by ideological group in 21 capitalist democracies, 1950-2015. `http://www.marquette.edu/polisci/faculty_swank.shtml`

2.18.7.231 Governing Party Seats: Left-Libertarian (sw_gll)

Long tag: qog_std_ts_sw_gll

Original tag: sw_gll

Description:
Left libertarian governing party seats as a percent of all legislative seats.

Variable citation: Swank, D. (2018). Comparative political parties dataset: Electoral, legislative, and government strength of political parties by ideological group in 21 capitalist democracies, 1950-2015. `http://www.marquette.edu/polisci/faculty_swank.shtml`

2.18.7.232 Governing Party Seats: Right (sw_gr)

Long tag: qog_std_ts_sw_gr

Original tag: sw_gr

Description:
Right governing party seats as a percent of all legislative seats.

Variable citation: Swank, D. (2018). Comparative political parties dataset: Electoral, legislative, and government strength of political parties by ideological group in 21 capitalist democracies, 1950-2015. `http://www.marquette.edu/polisci/faculty_swank.shtml`

2.18.7.233 Governing Party Seats: Right-Wing Populist (sw_grwp)

Long tag: qog_std_ts_sw_grwp

Original tag: sw_grwp

Description:
Right-wing populist governing party seats as a percent of all legislative seats.

Variable citation: Swank, D. (2018). Comparative political parties dataset: Electoral, legislative, and government strength of political parties by ideological group in 21 capitalist democracies, 1950-2015. `http://www.marquette.edu/polisci/faculty_swank.shtml`

2.18.7.234 Legislative Seats: Centrist Christian Democratic (sw_lccd)

Long tag: qog_std_ts_sw_lccd

Original tag: sw_lccd

Description:
Centrist Christian Democratic party seats as a percent of all legislative seats.

Variable citation: Swank, D. (2018). Comparative political parties dataset: Electoral, legislative, and government strength of political parties by ideological group in 21 capitalist democracies, 1950-2015. `http://www.marquette.edu/polisci/faculty_swank.shtml`

2.18.7.235 Legislative Seats: Christian Democratic (sw_lcd)

Long tag: qog_std_ts_sw_lcd

Original tag: sw_lcd

Description:
Total Christian Democratic party seats as a percent of all legislative seats.

Variable citation: Swank, D. (2018). Comparative political parties dataset: Electoral, legislative, and government strength of political parties by ideological group in 21 capitalist democracies, 1950-2015. `http://www.marquette.edu/polisci/faculty_swank.shtml`

2.18.7.236 Legislative Seats: Center (sw_lce)

Long tag: qog_std_ts_sw_lce

Original tag: sw_lce

Description:
Center party seats as a percent of all legislative seats.

Variable citation: Swank, D. (2018). Comparative political parties dataset: Electoral, legislative, and government strength of political parties by ideological group in 21 capitalist democracies, 1950-2015. `http://www.marquette.edu/polisci/faculty_swank.shtml`

2.18.7.237 Legislative Seats: Left (sw_ll)

Long tag: qog_std_ts_sw_ll

Original tag: sw_ll

Description:
Left party legislative seats as a percent of all legislative seats.

Variable citation: Swank, D. (2018). Comparative political parties dataset: Electoral, legislative, and government strength of political parties by ideological group in 21 capitalist democracies, 1950-2015. `http://www.marquette.edu/polisci/faculty_swank.shtml`

2.18.7.238 Legislative Seats: Left-Libertarian (sw_lll)

Long tag: qog_std_ts_sw_lll

Original tag: sw_lll

Description:
Percentage of seats (lower chamber) for left-libertarian parties and various miscellaneous works.

Variable citation: Swank, D. (2018). Comparative political parties dataset: Electoral, legislative, and government strength of political parties by ideological group in 21 capitalist democracies, 1950-2015. `http://www.marquette.edu/polisci/faculty_swank.shtml`

2.18.7.239 Legislative Seats: Right (sw_lr)

Long tag: qog_std_ts_sw_lr

Original tag: sw_lr

Description:
Right party legislative seats as a percent of all legislative seats.

Variable citation: Swank, D. (2018). Comparative political parties dataset: Electoral, legislative, and government strength of political parties by ideological group in 21 capitalist democracies, 1950-2015. `http://www.marquette.edu/polisci/faculty_swank.shtml`

2.18.7.240 Legislative Seats: Right-Wing Populist (sw_lrwp)

Long tag: qog_std_ts_sw_lrwp

Original tag: sw_lrwp

Description:
Percentage of seats in lower chamber of national parliament held by right wing populist parties.

Variable citation: Swank, D. (2018). Comparative political parties dataset: Electoral, legislative, and government strength of political parties by ideological group in 21 capitalist democracies, 1950-2015. `http://www.marquette.edu/polisci/faculty_swank.shtml`

2.18.7.241 Votes: Centrist Christian Democratic (sw_vccd)

Long tag: qog_std_ts_sw_vccd

Original tag: sw_vccd

Description:
Centrist Christian Democratic party votes as a percent of all votes.

Variable citation: Swank, D. (2018). Comparative political parties dataset: Electoral, legislative, and government strength of political parties by ideological group in 21 capitalist democracies, 1950-2015. `http://www.marquette.edu/polisci/faculty_swank.shtml`

2.18.7.242 Votes: Christian Democratic (sw_vcd)

Long tag: qog_std_ts_sw_vcd

Original tag: sw_vcd

Description:
Total Christian Democratic party votes as a percent of all votes.

Variable citation: Swank, D. (2018). Comparative political parties dataset: Electoral, legislative, and government strength of political parties by ideological group in 21 capitalist democracies, 1950-2015. `http://www.marquette.edu/polisci/faculty_swank.shtml`

2.18.7.243 Votes: Center (sw_vce)

Long tag: qog_std_ts_sw_vce

Original tag: sw_vce

Description:
Center party votes as a percent of all votes.

Variable citation: Swank, D. (2018). Comparative political parties dataset: Electoral, legislative, and government strength of political parties by ideological group in 21 capitalist democracies, 1950-2015. `http://www.marquette.edu/polisci/faculty_swank.shtml`

2.18.7.244 Votes: Left (sw_vl)

Long tag: qog_std_ts_sw_vl

Original tag: sw_vl

Description:
Left party votes as a percent of total votes.

Variable citation: Swank, D. (2018). Comparative political parties dataset: Electoral, legislative, and government strength of political parties by ideological group in 21 capitalist democracies, 1950-2015. `http://www.marquette.edu/polisci/faculty_swank.shtml`

2.18.7.245 Votes: Left-Libertarian (sw_vll)

Long tag: qog_std_ts_sw_vll

Original tag: sw_vll

Description:
Percentage of votes (lower chamber) for left-libertarian parties.

Variable citation: Swank, D. (2018). Comparative political parties dataset: Electoral, legislative, and government strength of political parties by ideological group in 21 capitalist democracies, 1950-2015. `http://www.marquette.edu/polisci/faculty_swank.shtml`

2.18.7.246 Votes: Right (sw_vr)

Long tag: qog_std_ts_sw_vr

Original tag: sw_vr

Description:
Right party votes as a percent of total votes.

Variable citation: Swank, D. (2018). Comparative political parties dataset: Electoral, legislative, and government strength of political parties by ideological group in 21 capitalist democracies, 1950-2015. `http://www.marquette.edu/polisci/faculty_swank.shtml`

2.18.7.247 Votes: Right-Wing Populist (sw_vrwp)

Long tag: qog_std_ts_sw_vrwp

Original tag: sw_vrwp

Description:
Percentage of national vote for right-wing populist parties in elections to lower chamber.

Variable citation: Swank, D. (2018). Comparative political parties dataset: Electoral, legislative, and government strength of political parties by ideological group in 21 capitalist democracies, 1950-2015. `http://www.marquette.edu/polisci/faculty_swank.shtml`

2.18.7.248 Competition (van_comp)

Long tag: qog_std_ts_van_comp

Original tag: van_comp

Description:
The competition variable portrays the electoral success of smaller parties, that is, the percentage of votes gained by the smaller parties in parliamentary and/or presidential elections. The variable is calculated by subtracting from 100 the percentage of votes won by the largest party (the party which wins most votes) in parliamentary elections or by the party of the successful candidate in presidential elections. Depending on their importance, either parliamentary or presidential elections are used in the calculation of the variable, or both elections are used, with weights. If information on the distribution of votes is not available, or if the distribution does not portray the reality accurately, the distribution of parliamentary seats is used instead. If parliament members are elected but political parties are not allowed to take part in elections, it is assumed that one party has taken all votes or seats. In countries where parties are not banned but yet only independent candidates participate in elections, it is assumed that the share of the largest party is not over 30 percent.

2.18.7.249 Index of Democratization (van_index)

Long tag: qog_std_ts_van_index

Original tag: van_index

Description:
The index of democratization is formed by multiplying the competition and the participation variables and then dividing the outcome by 100.

2.18.7.250 Participation (van_part)

Long tag: qog_std_ts_van_part

Original tag: van_part

Description:
The political participation variable portrays the voting turnout in each election, and is calculated as the percentage of the total population who actually voted in the election. In the case of indirect elections, only votes cast in the final election are taken into account. If electors have not been elected by citizens, only the number of actual electors is taken into account, which means that the degree of participation drops to the value 0. If an election to choose electors has been held, the participation variable is calculated from the number and distribution of votes in that election. National referendums raise the variable value by five percent and state (regional) referendums by one percent for the year they are held. Referendums can add the degree of participation at maximum by 30 percent a year. The value of the combined degree of participation cannot be higher than 70 percent, even in cases where the sum of participation and referendums would be higher than 70.

2.18.7.251 Proportion of seats held by women in national parliaments (percent) (wdi_wip)

Long tag: qog_std_ts_wdi_wip

Original tag: wdi_wip

Description:
Women in parliaments are the percentage of parliamentary seats in a single or lower chamber held by women.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.7.252 Number of years the leader in office continuously (wgov_leadexp)

Long tag: qog_std_ts_wgov_leadexp

Original tag: wgov_leadexp

Description:
The number of years the person has been leader of the country in a row, continuous. Thus, it starts over if the leader is removed. The count starts at 1, when the leader first appear as leader in the dataset. Therefore, the measure is imprecise for leaders, who came to power before 1966.

Variable citation: Nyrup, J., & Bramwell, S. (2020). Who governs? a new global dataset on members of cabinets. *American Political Science Review*, 114(4), 1366–1374

2.18.7.253 Number of cabinet ministers (wgov_min)

Long tag: qog_std_ts_wgov_min

Original tag: wgov_min

Description:
Number of cabinet ministers. This number only include cabinet ministers.

Variable citation: Nyrup, J., & Bramwell, S. (2020). Who governs? a new global dataset on members of cabinets. *American Political Science Review*, 114(4), 1366–1374

2.18.7.254 Average age of cabinet members (wgov_minage)

Long tag: qog_std_ts_wgov_minage

Original tag: wgov_minage

Description:
Average age of cabinet ministers.

Variable citation: Nyrup, J., & Bramwell, S. (2020). Who governs? a new global dataset on members of cabinets. *American Political Science Review*, 114(4), 1366–1374

2.18.7.255 Number of women among cabinet ministers (wgov_minfem)

Long tag: qog_std_ts_wgov_minfem

Original tag: wgov_minfem

Description:
The number of women among cabinet ministers.

Variable citation: Nyrup, J., & Bramwell, S. (2020). Who governs? a new global dataset on members of cabinets. *American Political Science Review*, 114(4), 1366–1374

2.18.7.256 Average tenure of cabinet members (wgov_minten)

Long tag: qog_std_ts_wgov_minten

Original tag: wgov_minten

Description:
The average tenure of cabinet ministers.

Variable citation: Nyrup, J., & Bramwell, S. (2020). Who governs? a new global dataset on members of cabinets. *American Political Science Review*, 114(4), 1366–1374

2.18.7.257 Adjusted retention rate of cabinet members (wgov_mret)

Long tag: qog_std_ts_wgov_mret

Original tag: wgov_mret

Description:
The share of cabinet ministers, who where in the list of cabinet ministers for the previous year. This measure is adjusted for an expansion of number of cabinet members, so the number of cabinet ministers stays constant and the retention rate is therefore not influenced by an expansion of the cabinet.

Variable citation: Nyrup, J., & Bramwell, S. (2020). Who governs? a new global dataset on members of cabinets. *American Political Science Review*, 114(4), 1366–1374

2.18.7.258 Total number of government positions (inc. unoccupied and multiple positions hel (wgov_tot)

Long tag: qog_std_ts_wgov_tot

Original tag: wgov_tot

Description:
Number of entries for the country in the dataset. This number includes unoccupied positions and multiple positions held by the same persons.

Variable citation: Nyrup, J., & Bramwell, S. (2020). Who governs? a new global dataset on members of cabinets. *American Political Science Review*, 114(4), 1366–1374

2.18.7.259 Average age for all entries for the country in the dataset (wgov_totage)

Long tag: qog_std_ts_wgov_totage

Original tag: wgov_totage

Description:

Average age for people, based on all entries for the country in the dataset. This includes unoccupied positions and multiple positions held by the same persons.

Variable citation: Nyrup, J., & Bramwell, S. (2020). Who governs? a new global dataset on members of cabinets. *American Political Science Review*, 114(4), 1366–1374

2.18.7.260 Number of women in the total number of entries for the country in the dataset (wgov_totfem)

Long tag: qog_std_ts_wgov_totfem

Original tag: wgov_totfem

Description:

The number of women in the total number of entries for the country in the dataset. This includes unoccupied positions and multiple positions held by the same persons.

Variable citation: Nyrup, J., & Bramwell, S. (2020). Who governs? a new global dataset on members of cabinets. *American Political Science Review*, 114(4), 1366–1374

2.18.7.261 Average tenure for all entries for the country in the dataset (wgov_totten)

Long tag: qog_std_ts_wgov_totten

Original tag: wgov_totten

Description:

The average tenure for people, based on all entries for the country in the dataset. This includes unoccupied positions and multiple positions held by the same persons.

Variable citation: Nyrup, J., & Bramwell, S. (2020). Who governs? a new global dataset on members of cabinets. *American Political Science Review*, 114(4), 1366–1374

2.18.7.262 Adjusted retention rate for all entries for the country in the dataset (wgov_tret)

Long tag: qog_std_ts_wgov_tret

Original tag: wgov_tret

Description:

The share of people in total number of entries for the country, who were also listed in the previous year. This measure is adjusted for an expansion of the size of total number of entries, so the number of entries for the country stays constant and the retention rate is therefore not influenced by an expansion of the total number of entries.

Variable citation: Nyrup, J., & Bramwell, S. (2020). Who governs? a new global dataset on members of cabinets. *American Political Science Review*, 114(4), 1366–1374

2.18.7.263 Confidence: The Political Parties (wvs_confpp)

Long tag: qog_std_ts_wvs_confpp

Original tag: wvs_confpp

Description:

I am going to name a number of organizations. For each one, could you tell me how much confidence you have in them: The Political Parties

1. None at all
2. Not very much
3. Quite a lot
4. A great deal

Variable citation: Haerpfer, C., Inglehart, R., Moreno, A., Welzel, C., Kizilova, K., Diez-Medrano, J., Lagos, M., Norris, P., Ponarin, E., & et al., B. P. (2021). 2.18.8 History

This category includes variables related to historical phenomena or situations, for example colonial origin, legal origin and GDP per capita in the year 1500.

2.18.8.1 Log Settler Mortality (ajr_settmort)

Long tag: qog_std_ts_ajr_settmort

Original tag: ajr_settmort

Description:

Log of the mortality rate faced by European settlers at the time of colonization.

Note: The data for Ethiopia is used for both Ethiopia (-1992) and Ethiopia (1993-).

Variable citation: Acemoglu, D., Johnson, S., & Robinson, J. A. (2001). The colonial origins of comparative development: An empirical investigation. *The American Economic Review*, 91(5), 1369–1401

2.18.8.2 Colonial Origin (ht_colonial)

Long tag: qog_std_ts_ht_colonial

Original tag: ht_colonial

Description:

This is a tenfold classification of the former colonial ruler of the country. Following Bernard et al. (2004), we have excluded the British settler colonies (the US, Canada, Australia, Israel and New Zealand), and exclusively focused on "Western overseas" colonialism. This implies that only Western colonizers (e.g. excluding Japanese colonialism), and only countries located in the non-Western hemisphere "overseas" (e.g. excluding Ireland
Malta), have been coded. Each country that has been colonized since 1700 is coded. In cases of several colonial powers, the last one is counted, if it lasted for 10 years or longer. The categories are the following:

0. Never colonized by a Western overseas colonial power
1. Dutch
2. Spanish
3. Italian
4. US
5. British
6. French
7. Portuguese
8. Belgian
9. British-French
10. Australian

Variable citation: Wahman, M., Teorell, J., & Hadenius, A. (2013). Authoritarian regime types revisited: Updated data in comparative perspective. *Contemporary Politics*, 19(1), 19–34 Hadenius, A., & Teorell, J. (2007). Institutional stepping stones for democracy: How and why multipartyism enhances democratic change. *Democratization*, 25(1), 78–97

2.18.8.3 Religion: Catholic (lp_catho80)

Long tag: qog_std_ts_lp_catho80

Original tag: lp_catho80

Description:

Religion: Catholic: Catholics as percentage of population in 1980.

Variable citation: Porta, R. L., Lopez-de-Silanes, F., Shleifer, A., & Vishny, R. (1999). The quality of government. *Journal of Law, Economics, and Organization*, 15(1), 222–279

2.18.8.4 Latitude (lp_lat_abst)

Long tag: qog_std_ts_lp_lat_abst

Original tag: lp_lat_abst

Description:

Latitude: The absolute value of the latitude of the capital city, divided by 90 (to take values between 0 and 1).

Variable citation: Porta, R. L., Lopez-de-Silanes, F., Shleifer, A., & Vishny, R. (1999). The quality of government. *Journal of Law, Economics, and Organization*, 15(1), 222–279

2.18.8.5 Legal Origin (lp_legor)

Long tag: qog_std_ts_lp_legor

Original tag: lp_legor

Description:

Legal origin: Identifies the legal origin of the Company Law or Commercial code of each country. There are five possible origins:
1. English Common Law
2. French Commercial Code
3. Socialist/Communist Laws
4. German Commercial Code
5. Scandinavian Commercial Code

Variable citation: Porta, R. L., Lopez-de-Silanes, F., Shleifer, A., & Vishny, R. (1999). The quality of government. *Journal of Law, Economics, and Organization*, 15(1), 222–279

2.18.8.6 Religion: Muslim (lp_muslim80)

Long tag: qog_std_ts_lp_muslim80

Original tag: lp_muslim80

Description:

Religion: Muslim: Muslims as percentage of population in 1980.

Variable citation: Porta, R. L., Lopez-de-Silanes, F., Shleifer, A., & Vishny, R. (1999). The quality of government. *Journal of Law, Economics, and Organization*, 15(1), 222–279

2.18.8.7 Religion: Other Denomination (lp_no_cpm80)

Long tag: qog_std_ts_lp_no_cpm80

Original tag: lp_no_cpm80

Description:

Religion: Other Denomination: Percentage of population belonging to other denominations in 1980. Defined as 100 - lp_catho80 - lp_muslim80 - lp_protmg80.

Variable citation: Porta, R. L., Lopez-de-Silanes, F., Shleifer, A., & Vishny, R. (1999). The quality of government. *Journal of Law, Economics, and Organization*, 15(1), 222–279

2.18.8.8 Religion: Protestant (lp_protmg80)

Long tag: qog_std_ts_lp_protmg80

Original tag: lp_protmg80

Description:

Religion: Protestant: Protestants as percentage of population in 1980.

Variable citation: Porta, R. L., Lopez-de-Silanes, F., Shleifer, A., & Vishny, R. (1999). The quality of government. *Journal of Law, Economics, and Organization*, 15(1), 222–279

2.18.9 Civil Society, Population and Culture

This category includes variables that relate to social capital, personal beliefs, size and distribution of the population as well as ethnic and linguistic fractionalization.

2.18.9.1 Ethnic Fractionalization in the year 2000 (al_ethnic2000)

Long tag: qog_std_ts_al_ethnic2000

Original tag: al_ethnic2000

Description:

Ethnic Fractionalization in the year 2000. The definition of ethnicity involves a combination of racial and linguistic characteristics. The result is a higher degree of fractionalization than the commonly used ELF-index (see el_elf60) in for example Latin America, where people of many races speak the same language.

Variable citation: Alesina, A., Devleeschauwer, A., Easterly, W., Kurlat, S., & Wacziarg, R. (2003). Fractionalization [O. Galor (ed.) (2011), Inequality and Economic Development: The Modern Perspective, Edward Elgar, UK.]. *Journal of Economic Growth*, 8(2), 155–194

2.18.9.2 Language Fractionalization in the year 2000 (al_language2000)

Long tag: qog_std_ts_al_language2000

Original tag: al_language2000

Description:
Linguistic Fractionalization in the year 2000. Reflects probability that two randomly selected people from a given country will not belong to the same linguistic group. The higher the number, the more fractionalized society.

Variable citation: Alesina, A., Devleeschauwer, A., Easterly, W., Kurlat, S., & Wacziarg, R. (2003). Fractionalization [O. Galor (ed.) (2011), Inequality and Economic Development: The Modern Perspective, Edward Elgar, UK.]. *Journal of Economic Growth*, 8(2), 155–194

2.18.9.3 Religion Fractionalization in the year 2000 (al_religion2000)

Long tag: qog_std_ts_al_religion2000

Original tag: al_religion2000

Description:
Religious Fractionalization in the year 2000. Reflects probability that two randomly selected people from a given country will not belong to the same religious group. The higher the number, the more fractionalized society.

Variable citation: Alesina, A., Devleeschauwer, A., Easterly, W., Kurlat, S., & Wacziarg, R. (2003). Fractionalization [O. Galor (ed.) (2011), Inequality and Economic Development: The Modern Perspective, Edward Elgar, UK.]. *Journal of Economic Growth*, 8(2), 155–194

2.18.9.4 Associational/Assembly Rights (bti_aar)

Long tag: qog_std_ts_bti_aar

Original tag: bti_aar

Description:
To what extent can individuals form and join independent political or civic groups? To what extent can these groups operate and assemble freely? 1-10.

1. Association and assembly rights are denied. Independent civic groups do not exist or are prohibited.
4. Association and assembly rights are severely limited. Oppositional political groups with any relevance are prohibited or systematically disabled. Independent civic groups can operate and assemble if they support the regime or are not outspokenly critical of it.
7. Association and assembly rights are partially limited, but generally there are no outright prohibitions of independent political or civic groups.
10. Association and assembly rights are unrestricted for individuals and independent political or civic groups within the basic democratic order.

Variable citation: Donner, S., Hartmann, H., & Schwarz, R. (2020). *Transformation index of the bertelsmann stiftung 2020*. Bertelsmann Stiftung. `http://www.bti-project.org`

2.18.9.5 Conflict Intensity (bti_ci)

Long tag: qog_std_ts_bti_ci

Original tag: bti_ci

Description:
How serious are social, ethnic and religious conflicts? 1-10.

1. There are no violent incidents based on social, ethnic or religious differences.
4. There are only few violent incidents. Radical political actors have limited success in mobilizing along existing cleavages. Society and the political elite, however, are divided along social, ethnic or religious lines.
7. There are violent incidents. Mobilized groups and protest movements dominate politics. Society and the political elite are deeply split into social classes, ethnic or religious communities.
10. There is civil war or a widespread violent conflict based on social, ethnic or religious differences.

Variable citation: Donner, S., Hartmann, H., & Schwarz, R. (2020). *Transformation index of the bertelsmann stiftung 2020*. Bertelsmann Stiftung. `http://www.bti-project.org`

2.18.9.6 Civil Society Participation (bti_csp)

Long tag: qog_std_ts_bti_csp

Original tag: bti_csp

Description:
To what extent does the political leadership enable the participation of civil society in the political process? 1-10.

1. The political leadership obstructs civil society participation. It suppresses civil society organizations and excludes its representatives from the policy process.
4. The political leadership neglects civil society participation. It frequently ignores civil society actors and formulates its policy autonomously.

7. The political leadership permits civil society participation. It takes into account and accommodates the interests of most civil society actors.
10. The political leadership actively enables civil society participation. It assigns an important role to civil society actors in deliberating and determining policies.

Variable citation: Donner, S., Hartmann, H., & Schwarz, R. (2020). *Transformation index of the bertelsmann stiftung 2020*. Bertelsmann Stiftung. `http://www.bti-project.org`

2.18.9.7 Civil Society Traditions (bti_cst)

Long tag: qog_std_ts_bti_cst

Original tag: bti_cst

Description:

To what extent are there traditions of civil society? 1-10.

1. Traditions of civil society are very strong.
4. Traditions of civil society are fairly strong.
7. Traditions of civil society are fairly weak.
10. Traditions of civil society are very weak.

Variable citation: Donner, S., Hartmann, H., & Schwarz, R. (2020). *Transformation index of the bertelsmann stiftung 2020*. Bertelsmann Stiftung. `http://www.bti-project.org`

2.18.9.8 Equal Opportunity (bti_eo)

Long tag: qog_std_ts_bti_eo

Original tag: bti_eo

Description:

To what extent does equality of opportunity exist? 1-10.

1. Equality of opportunity is not achieved. Women and/or members of ethnic or religious groups have only very limited access to education, public office and employment. There are no legal provisions against discrimination.
4.Equality of opportunity is only partially achieved. Women and/or members of ethnic, religious and other groups have limited access to education, public office and employment. There are some legal provisions against discrimination, but their implementation is highly deficient.
7. Equality of opportunity is largely achieved. Women and members of ethnic or religious groups have near-equal access to education, public office and employment. There are a number of legal provisions against discrimination, but their implementation is at times insufficient.
10. Equality of opportunity is achieved. Women and members of ethnic or religious groups have equal access to education, public office and employment. There is a comprehensive and effective legal and institutional framework for the protection against discrimination.

Variable citation: Donner, S., Hartmann, H., & Schwarz, R. (2020). *Transformation index of the bertelsmann stiftung 2020*. Bertelsmann Stiftung. `http://www.bti-project.org`

2.18.9.9 Interest Groups (bti_ig)

Long tag: qog_std_ts_bti_ig

Original tag: bti_ig

Description:

To what extent is there a network of cooperative associations or interest groups to mediate between society and the political system? 1-10.

1. Interest groups are present only in isolated social segments, are on the whole poorly balanced and cooperate little. A large number of social interests remain unrepresented.
4. There is a narrow range of interest groups, in which important social interests are underrepresented. Only a few players dominate, and there is a risk of polarization.
7. There is an average range of interest groups, which reflect most social interests. However, a few strong interests dominate, producing a latent risk of pooling conflicts.
10. There is a broad range of interest groups that reflect competing social interests, tend to balance one another and are cooperative.

Variable citation: Donner, S., Hartmann, H., & Schwarz, R. (2020). *Transformation index of the bertelsmann stiftung 2020*. Bertelsmann Stiftung. `http://www.bti-project.org`

2.18.9.10 Political Participation (bti_pp)

Long tag: qog_std_ts_bti_pp

Original tag: bti_pp

Description:

Political Participation: The populace decides who rules, and it has other political freedoms 1-10. Higher scores refer better conditions of political participation and other political freedoms.

Variable citation: Donner, S., Hartmann, H., & Schwarz, R. (2020). *Transformation index of the bertelsmann stiftung 2020*. Bertelsmann Stiftung. `http://www.bti-project.org`

2.18.9.11 Political and Social Integration (bti_psi)

Long tag: qog_std_ts_bti_psi

Original tag: bti_psi

Description:

Political and Social Integration: Stable patterns of representation exist for mediating between society and the state; there is also a consolidated civic culture 1-10.

Variable citation: Donner, S., Hartmann, H., & Schwarz, R. (2020). *Transformation index of the bertelsmann stiftung 2020*. Bertelsmann Stiftung. `http://www.bti-project.org`

2.18.9.12 Social Capital (bti_sc)

Long tag: qog_std_ts_bti_sc

Original tag: bti_sc

Description:

Social Capital: To what extent have social self-organization and the construction of social capital advanced? This question aims to assess the level of trust between citizens, which fosters cooperation and mutual support for purposes of self-help, rather than primarily to further political objectives.

1. There is a very low level of trust among the population, and civic self-organization is rudimentary.
4. There is a fairly low level of trust among the population. The small number of autonomous, self-organized groups, associations and organizations is unevenly distributed or spontaneous and temporary.
7. There is a fairly high level of trust among the population and a substantial number of autonomous, self-organized groups, associations and organizations.
10. There is a very high level of trust among the population and a large number of autonomous, self-organized groups, associations and organizations.

Variable citation: Donner, S., Hartmann, H., & Schwarz, R. (2020). *Transformation index of the bertelsmann stiftung 2020*. Bertelsmann Stiftung. `http://www.bti-project.org`

2.18.9.13 Socio-Economic Barriers (bti_seb)

Long tag: qog_std_ts_bti_seb

Original tag: bti_seb

Description:

To what extent are significant parts of the population fundamentally excluded from society due to poverty and inequality? 1-10.

1. Poverty and inequality are extensive and structurally ingrained.
4. Poverty and inequality are pronounced and partly structurally ingrained.
7. Poverty and inequality are limited and barely structurally ingrained.
10. Poverty and inequality are minor and not structurally ingrained.

Variable citation: Donner, S., Hartmann, H., & Schwarz, R. (2020). *Transformation index of the bertelsmann stiftung 2020*. Bertelsmann Stiftung. `http://www.bti-project.org`

2.18.9.14 State Identity (bti_si)

Long tag: qog_std_ts_bti_si

Original tag: bti_si

Description:

To what extent do all relevant groups in society agree about citizenship and accept the nation-state as legitimate? 1-10.

1. The legitimacy of the nation-state is questioned fundamentally. Different population groups compete for hegemony and deny citizenship to others.
4. The legitimacy of the nation-state is frequently challenged. Significant aspects of citizenship are withheld from entire population groups.
7. The legitimacy of the nation-state is rarely questioned. Some groups are denied full citizenship rights.
10. The large majority of the population accepts the nation-state as legitimate. All individuals and groups enjoy the right to acquire citizenship without discrimination.

Variable citation: Donner, S., Hartmann, H., & Schwarz, R. (2020). *Transformation index of the bertelsmann stiftung 2020*. Bertelsmann Stiftung. `http://www.bti-project.org`

2.18.9.15 Right to Marry in Constitution (ccp_marriage)

Long tag: qog_std_ts_ccp_marriage

Original tag: ccp_marriage

Description:

Does the constitution provide for the right to marry?

1. Yes, general provision
2. Yes, marriage allowed between a man and a woman
3. No
90. Left explicitly to non-constitution law
96. Other

Variable citation: Elkins, Z., & Ginsburg, T. (2021). Characteristics of national constitutions, version 3.0 [Last modified: May 20, 2021. Available at comparativeconstitutionsproject.org]. `http://www.comparativeconstitutionsproject.org`

2.18.9.16 Right to Same-Sex Marriages in Constitution (ccp_samesexm)

Long tag: qog_std_ts_ccp_samesexm

Original tag: ccp_samesexm

Description:

Does the constitution provide the right for same sex marriages?

1. Yes
2. No
96. Other

Variable citation: Elkins, Z., & Ginsburg, T. (2021). Characteristics of national constitutions, version 3.0 [Last modified: May 20, 2021. Available at comparativeconstitutionsproject.org]. `http://www.comparativeconstitutionsproject.org`

2.18.9.17 Freedom of Assembly and Association (ciri_assn)

Long tag: qog_std_ts_ciri_assn

Original tag: ciri_assn

Description:

It is an internationally recognized right of citizens to assemble freely and to associate with other persons in political parties, trade unions, cultural organizations, or other special-interest groups. This variable indicates the extent to which the freedoms of assembly and association are subject to actual governmental limitations or restrictions (as opposed to strictly legal protections). A score of 0 indicates that citizens' rights to freedom of assembly or association were severely restricted or denied completely to all citizens; a score of 1 indicates that these rights were limited for all citizens or severely restricted or denied for select groups; and a score of 2 indicates that these rights were virtually unrestricted and freely enjoyed by practically all citizens in a given year.

2.18.9.18 Social Globalization (dr_sg)

Long tag: qog_std_ts_dr_sg

Original tag: dr_sg

Description:

Social globalization (scale of 1 to 100) is comprised of three segments, each with its own de facto and de jure segment. Interpersonal contact is measured within the de facto segment with reference to international telephone connections, tourist numbers and migration. Within the de jure segment, it is measured with reference to telephone subscriptions, international airports and visa restrictions. Flows of information are determined within the de facto segment with reference to international patent applications, international students and trade in high technology goods. The de jure segment measures access to TV and the internet, freedom of the press and international internet connections. Cultural proximity is measured in the de facto segment from trade in cultural goods, international trade mark registrations and the number of McDonald's restaurants and IKEA stores. The de jure area focuses on civil rights (freedom of citizens), gender equality and public spending on school education.

2.18.9.40 percent of people under 60(y) living in households w. very low work intensity (eu_povpoplwoin)

Long tag: qog_std_ts_eu_povpoplwoin

Original tag: eu_povpoplwoin

Description:

Percentage of people under 60 years old living in households with very low work intensity

Variable citation: European Commission. (2021). Eurostat. `http://ec.europa.eu/eurostat/data/database`

2.18.9.41 Cultural Diversity (fe_cultdiv)

Long tag: qog_std_ts_fe_cultdiv

Original tag: fe_cultdiv

Description:

This measure modifies fractionalization (fe_etfra) so as to take some account of cultural distances between

groups, measured as the structural distance between languages spoken by different groups in a country. If the groups in a country speak structurally unrelated languages, their cultural diversity index will be the same as their level of ethnic fractionalization (fe_etfra). The more similar are the languages spoken by different ethnic groups, however, the more will this measure be reduced below the level of ethnic fractionalization for that country. The values are assumed to be constant for all years.

Variable citation: Fearon, J. D. (2003). Ethnic and cultural diversity by country. *Journal of Economic Growth*, 8(2), 195–222

2.18.9.42 Ethnic Fractionalization (fe_etfra)

Long tag: qog_std_ts_fe_etfra

Original tag: fe_etfra

Description:

Restricting attention to groups that had at least 1 percent of country population in the 1990s, Fearon identifies 822 ethnic and "ethnoreligious" groups in 160 countries. This variable reflects the probability that two randomly selected people from a given country will belong to different such groups. The variable thus ranges from 0 (perfectly homogeneous) to 1 (highly fragmented). The values are assumed to be constant for all years.

Variable citation: Fearon, J. D. (2003). Ethnic and cultural diversity by country. *Journal of Economic Growth*, 8(2), 195–222

2.18.9.43 Largest Minority (fe_lmin)

Long tag: qog_std_ts_fe_lmin

Original tag: fe_lmin

Description:

Based on the same set of groups, this variable reflects the population share of the second largest group (largest minority). The values are assumed to be constant for all years.

Variable citation: Fearon, J. D. (2003). Ethnic and cultural diversity by country. *Journal of Economic Growth*, 8(2), 195–222

2.18.9.44 Plurality Group (fe_plural)

Long tag: qog_std_ts_fe_plural

Original tag: fe_plural

Description:

Based on the same set of groups, this variable reflects the population share of the largest group (plurality group) in the country. The values are assumed to be constant for all years.

Variable citation: Fearon, J. D. (2003). Ethnic and cultural diversity by country. *Journal of Economic Growth*, 8(2), 195–222

2.18.9.45 Corruption Perception: NGOs (gcb_pngo)

Long tag: qog_std_ts_gcb_pngo

Original tag: gcb_pngo

Description:

To what extent do you perceive the following categories in this country to be affected by corruption? NGOs. 1 (Not at all corrupt) - 5 (Extremely corrupt).

Variable citation: Transparency International (2017). Global corruption barometer 9th edition. `https://www.transparency.org/research/gcb`

2.18.9.46 Overall Global Gender Gap Index (gggi_ggi)

Long tag: qog_std_ts_gggi_ggi

Original tag: gggi_ggi

Description:

The Global Gender Gap Index (0 to 1, where 1 indicates no gap) examines the gap between men and women in four fundamental categories (subindexes): Economic Participation and Opportunity, Educational Attainment, Health and Survival and Political Empowerment.

Variable citation: World Economic Forum. (2021). The global gender gap report 2021 [All Rights Reserved]. `https://www.weforum.org/reports/ab6795a1-960c-42b2-b3d5-587eccda6023`

2.18.9.47 Population (in the 1000's) (gle_pop)

Long tag: qog_std_ts_gle_pop

Original tag: gle_pop

Description:
Size of the population in the years 1000's.

Variable citation: Gleditsch, K. S. (2002). Expanded trade and GDP data (version 6.0). extitJournal of Conflict Resolution, 46(5), 712–724 Gleditsch, K., & Ward, M. D. (1999). Interstate system membership: A revised list of the independent states since 1816. *International Interactions*, 25, 393–413

2.18.9.48 Displaced people (1-5 Higher displacement) (gpi_dic)

Long tag: qog_std_ts_gpi_dic

Original tag: gpi_dic

Description:
Refugees by territory of origin (starting in 2010 this indicator also includes the number of internally displaced people by country) as percentage of the country's total population. Sclaed 1 to 5, 5 being a higher percentage of internal displacement. Source: UNHCR Statistical Yearbook and Internal Displacement Monitoring Center.

Variable citation: Institute for Economics and Peace. (2021). Global peace index 2021: Measuring peace in a complex world [Accessed 09-11-2021]. `http://visionofhumanity.org/reports`

2.18.9.49 Global Peace Index (1-5 Less peaceful) (gpi_gpi)

Long tag: qog_std_ts_gpi_gpi

Original tag: gpi_gpi

Description:
The GPI (Scaled 1 to 5, 5 being least peaceful) measures a country's level of Negative Peace using three domains of peacefulness. The first domain, Ongoing Domestic and International Conflict, investigates the extent to which countries are involved in internal and external conflicts, as well as their role and duration of involvement in conflicts.

The second domain evaluates the level of harmony or discord within a nation; ten indicators broadly assess what might be described as Societal Safety and Security. The assertion is that low crime rates, minimal terrorist activity and violent demonstrations, harmonious relations with neighbouring countries, a stable political scene and a small proportion of the population being internally displaced or made refugees can be equated with peacefulness.

Seven further indicators are related to a country's Militarisation-reflecting the link between a country's level of military build-up and access to weapons and its level of peacefulness, both domestically and internationally. Comparable data on military expenditure as a percentage of GDP and the number of armed service officers per head are gauged, as are financial contributions to UN peacekeeping missions.

2.18.9.66 Women political empowerment index (vdem_gender)

Long tag: qog_std_ts_vdem_gender

Original tag: vdem_gender

Description:
Women political empowerment index. Question: How politically empowered are women?

Clarifications: Women's political empowerment is defined as a process of increasing capacity for women, leading to greater choice, agency, and participation in societal decision-making. It is understood to incorporate three equally-weighted dimensions: fundamental civil liberties, women's open discussion of political issues and participation in civil society organizations, and the descriptive representation of women in formal political positions. Aggregation: The index is formed by taking the average of women's civil liberties index, women's civil society participation index, and women's political participation index.

2.18.9.67 Birth rate, crude (per 1,000 people) (wdi_birth)

Long tag: qog_std_ts_wdi_birth

Original tag: wdi_birth

Description:
Crude birth rate indicates the number of live births occurring during the year, per 1,000 population estimated at midyear. Subtracting the crude death rate from the crude birth rate provides the rate of natural increase, which is equal to the rate of population change in the absence of migration.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.9.68 Completeness of birth registration (percent) (wdi_birthreg)

Long tag: qog_std_ts_wdi_birthreg

Original tag: wdi_birthreg

Description:
Completeness of birth registration is the percentage of children under age 5 whose births were registered at the time of the survey. The numerator of completeness of birth registration includes children whose birth certificate was seen by the interviewer or whose mother or caretaker says the birth has been registered.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.9.69 Completeness of birth registration, rural (percent) (wdi_birthregr)

Long tag: qog_std_ts_wdi_birthregr

Original tag: wdi_birthregr

Description:
Completeness of birth registration is the percentage of children under age 5 whose births were registered at the time of the survey in the rural areas. The numerator of completeness of birth registration includes children whose birth certificate was seen by the interviewer or whose mother or caretaker says the birth has been registered.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.9.70 Completeness of birth registration, urban (percent) (wdi_birthregu)

Long tag: qog_std_ts_wdi_birthregu

Original tag: wdi_birthregu

Description:
Completeness of birth registration is the percentage of children under age 5 whose births were registered at

the time of the survey in the urban areas. The numerator of completeness of birth registration includes children whose birth certificate was seen by the interviewer or whose mother or caretaker says the birth has been registered.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.9.71 Births attended by skilled health staff (percent of total) (wdi_birthskill)

Long tag: qog_std_ts_wdi_birthskill

Original tag: wdi_birthskill

Description:

Births attended by skilled health staff are the percentage of deliveries attended by personnel trained to give the necessary supervision, care, and advice to women during pregnancy, labor, and the postpartum period; to conduct deliveries on their own; and to care for newborns.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.9.72 Death rate, crude (per 1,000 people) (wdi_death)

Long tag: qog_std_ts_wdi_death

Original tag: wdi_death

Description:

Crude death rate indicates the number of deaths occurring during the year, per 1,000 population estimated at midyear. Subtracting the crude death rate from the crude birth rate provides the rate of natural increase, which is equal to the rate of population change in the absence of migration.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.9.73 Completeness of death registration with cause-of-death information (percent) (wdi_deathreg)

Long tag: qog_std_ts_wdi_deathreg

Original tag: wdi_deathreg

Description:

Completeness of death registration is the estimated percentage of deaths that are registered with their cause of death information in the vital registration system of a country.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.9.74 Fertility rate, total (births per woman) (wdi_fertility)

Long tag: qog_std_ts_wdi_fertility

Original tag: wdi_fertility

Description:

Total fertility rate represents the number of children that would be born to a woman if she were to live to the end of her childbearing years and bear children in accordance with age-specific fertility rates of the specified year.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.9.75 CPIA gender equality rating (1=low to 6=high) (wdi_gendeqr)

Long tag: qog_std_ts_wdi_gendeqr

Original tag: wdi_gendeqr

Description:

Gender equality assesses the extent to which the country has installed institutions and programs to enforce laws and policies that promote equal access for men and women in education, health, the economy, and protection under law.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.9.76 Life expectancy at birth, total (years) (wdi_lifexp)

Long tag: qog_std_ts_wdi_lifexp

Original tag: wdi_lifexp

Description:
Life expectancy at birth indicates the number of years a newborn infant would live if prevailing patterns of mortality at the time of its birth were to stay the same throughout its life.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.9.77 Life expectancy at birth, female (years) (wdi_lifexpf)

Long tag: qog_std_ts_wdi_lifexpf

Original tag: wdi_lifexpf

Description:
Life expectancy at birth for females indicates the number of years a newborn infant would live if prevailing patterns of mortality at the time of its birth were to stay the same throughout its life.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.9.78 Life expectancy at birth, male (years) (wdi_lifexpm)

Long tag: qog_std_ts_wdi_lifexpm

Original tag: wdi_lifexpm

Description:
Life expectancy at birth for males indicates the number of years a newborn infant would live if prevailing patterns of mortality at the time of its birth were to stay the same throughout its life.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.9.79 Mortality rate, adult, female (per 1,000 female adults) (wdi_mortf)

Long tag: qog_std_ts_wdi_mortf

Original tag: wdi_mortf

Description:
Adult mortality rate is the probability of dying between the ages of 15 and 60 – that is, the probability of a 15-year-old dying before reaching age 60, if subject to age-specific mortality rates of the specified year between those ages.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.9.80 Mortality rate, infant (per 1,000 live births) (wdi_mortinf)

Long tag: qog_std_ts_wdi_mortinf

Original tag: wdi_mortinf

Description:
Infant mortality rate is the number of infants dying before reaching one year of age, per 1,000 live births in a given year.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.9.81 Mortality rate, infant, female (per 1,000 live births) (wdi_mortinff)

Long tag: qog_std_ts_wdi_mortinff

Original tag: wdi_mortinff

Description:
Infant mortality rate, female is the number of female infants dying before reaching one year of age, per 1,000 female live births in a given year.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.9.82 Mortality rate, infant, male (per 1,000 live births) (wdi_mortinfm)

Long tag: qog_std_ts_wdi_mortinfm

Original tag: wdi_mortinfm

Description:
Infant mortality rate, male is the number of male infants dying before reaching one year of age, per 1,000 male live births in a given year.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.9.83 Mortality rate, adult, male (per 1,000 male adults) (wdi_mortm)

Long tag: qog_std_ts_wdi_mortm

Original tag: wdi_mortm

Description:

Adult mortality rate is the probability of dying between the ages of 15 and 60–that is, the probability of a 15-year-old dying before reaching age 60, if subject to age-specific mortality rates of the specified year between those ages.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.9.84 Mortality rate, neonatal (per 1,000 live births) (wdi_mortnn)

Long tag: qog_std_ts_wdi_mortnn

Original tag: wdi_mortnn

Description:

Neonatal mortality rate is the number of neonates dying before reaching 28 days of age, per 1,000 live births in a given year.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.9.85 Mortality rate, under-5 (per 1,000 live births) (wdi_mortu5)

Long tag: qog_std_ts_wdi_mortu5

Original tag: wdi_mortu5

Description:

Under-five mortality rate is the probability per 1,000 that a newborn baby will die before reaching age five, if subject to age-specific mortality rates of the specified year.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.9.86 Mortality rate, under-5, female (per 1,000 live births) (wdi_mortu5f)

Long tag: qog_std_ts_wdi_mortu5f

Original tag: wdi_mortu5f

Description:

Under-five mortality rate, female is the probability per 1,000 that a newborn female baby will die before reaching age five, if subject to female age-specific mortality rates of the specified year.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.9.87 Mortality rate, under-5, male (per 1,000 live births) (wdi_mortu5m)

Long tag: qog_std_ts_wdi_mortu5m

Original tag: wdi_mortu5m

Description:

Under-five mortality rate, male is the probability per 1,000 that a newborn male baby will die before reaching age five, if subject to male age-specific mortality rates of the specified year.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.9.88 Population, total (wdi_pop)

Long tag: qog_std_ts_wdi_pop

Original tag: wdi_pop

Description:

Total population is based on the de facto definition of population, which counts all residents regardless of legal status or citizenship. The values shown are midyear estimates.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.9.89 Population ages 0-14 (percent of total population) (wdi_pop14)

Long tag: qog_std_ts_wdi_pop14

Original tag: wdi_pop14

Description:

Total population between the ages 0 to 14 as a percentage of the total population. Population is based on the de facto definition of population, which counts all residents regardless of legal status or citizenship.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.9.90 Population ages 15-64 (percent of total population) (wdi_pop1564)

Long tag: qog_std_ts_wdi_pop1564

Original tag: wdi_pop1564

Description:

Total population between the ages 15 to 64 as a percentage of the total population. Population is based on the de facto definition of population, which counts all residents regardless of legal status or citizenship.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.9.91 Population ages 65 and above (percent of total population) (wdi_pop65)

Long tag: qog_std_ts_wdi_pop65

Original tag: wdi_pop65

Description:

Population ages 65 and above as a percentage of the total population. Population is based on the de facto definition of population, which counts all residents regardless of legal status or citizenship.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.9.92 Population living in areas where elevation below 5 mts (percent of total pop.) (wdi_popbelow)

Long tag: qog_std_ts_wdi_popbelow

Original tag: wdi_popbelow

Description:

Population below 5 mts is the percentage of the total population living in areas where the elevation is 5 meters or less.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.9.93 Population density (people per sq. km of land area) (wdi_popden)

Long tag: qog_std_ts_wdi_popden

Original tag: wdi_popden

Description:

Population density is midyear population divided by land area in square kilometers. Population is based on the de facto definition of population, which counts all residents regardless of legal status or citizenship–except for refugees not permanently settled in the country of asylum, who are generally considered part of the population of their country of origin. Land area is a country's total area, excluding area under inland water bodies, national claims to continental shelf, and exclusive economic zones. In most cases the definition of inland water bodies includes major rivers and lakes.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.9.94 Population, female (percent of total population) (wdi_popf)

Long tag: qog_std_ts_wdi_popf

Original tag: wdi_popf

Description:

Female population is the percentage of the population that is female. Population is based on the de facto definition of population, which counts all residents regardless of legal status or citizenship.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.9.95 Population growth (annual percent) (wdi_popgr)

Long tag: qog_std_ts_wdi_popgr

Original tag: wdi_popgr

Description:

Annual population growth rate for year t is the exponential rate of growth of midyear population from year t-1 to t, expressed as a percentage. Population is based on the de facto definition of population, which counts all residents regardless of legal status or citizenship.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.9.96 Rural population (percent of total population) (wdi_poprul)

Long tag: qog_std_ts_wdi_poprul

Original tag: wdi_poprul

Description:

Rural population refers to people living in rural areas as defined by national statistical offices. It is calculated as the difference between total population and urban population.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.9.97 Rural population growth (annual percent) (wdi_poprulgr)

Long tag: qog_std_ts_wdi_poprulgr

Original tag: wdi_poprulgr

Description:

Rural population growth. Rural population refers to people living in rural areas as defined by national statistical offices. It is calculated as the difference between total population and urban population.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.9.98 Urban population (percent of total population) (wdi_popurb)

Long tag: qog_std_ts_wdi_popurb

Original tag: wdi_popurb

Description:

Urban population refers to people living in urban areas as defined by national statistical offices. The data are collected and smoothed by United Nations Population Division.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.9.99 Urban population growth (annual percent) (wdi_popurbagr)

Long tag: qog_std_ts_wdi_popurbagr

Original tag: wdi_popurbagr

Description:

Urban population growth. Urban population refers to people living in urban areas as defined by national statistical offices. It is calculated using World Bank population estimates and urban ratios from the United Nations World Urbanization Prospects.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.9.100 Women who were first married by age 15 (percent of women ages 20-24) (wdi_wofm15)

Long tag: qog_std_ts_wdi_wofm15

Original tag: wdi_wofm15

Description:

Women who were first married by age 15 (percent of women ages 20-24). Women who were first married by age 15 refers to the percentage of women ages 20-24 who were first married by age 15.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.9.101 Citizen Rights (wel_citrig)

Long tag: qog_std_ts_wel_citrig

Original tag: wel_citrig

Description:

Meaning: Conditional index that measures the prevalence of citizen rights as the presence of respect of political participation rights on the condition of the presence of respect of personal autonomy rights, using multiplication to combine the two [CitRig = PAR * PPR].
Source: Welzel's (2013: 254-263) "citizen rights index", available annually for most countries in the world from 1981 to 2010.
Scaling: Index scores range from 0 for the complete absence of citizen rights in law and practice to 1 for their full presence in law and practice, with proper fractions for intermediate positions.
Links: Data sources, rescaling procedures and replication data are meticulously documented in the Online Appendix to Welzel's (2013) Freedom Rising at www.cambridge.com/welzel (p. 72). Test statistics documenting this index's superior validity in comparison to alternative democracy measures are reported in Welzel (2013: 267-271).
Note: the missing code (-99) has been recoded to missing (.).

Variable citation: Welzel, C. (2013). *Freedom rising: Human empowerment and the quest for emancipation (1st ed.)*. Cambridge University Press

2.18.9.102 Culture Zone (wel_culture)

Long tag: qog_std_ts_wel_culture

Original tag: wel_culture

Description:

Meaning: Culture zone scheme, attributing each country to one of ten distinct culture zones created on the basis of religious traditions, imperial/colonial legacies and ethno-linguistic composition. Source: Classification invented and developed in Welzel, Freedom Rising (2013: 23-34), www.cambridge.org/welzel (Online Appendix, p. 8-11).
Coding:

1. Reformed West (Western European societies strongly affected by the Reformation)
2. New West (overseas offshoots of Western Europe)
3. Old West (mostly Catholic parts of Western Europe being core parts of the Roman Empire)
4. Returned West (Catholic and Protestant parts of post-communist Europe returning to the EU)
5. Orthodox East (Christian Orthodox or Islamic parts of the post-communist world, mostly parts of the former USSR)
6. Indic East (parts of South and South East Asia under the historic influence of Indian culture)
7. Islamic East (regions of the Islamic world that have been parts of the Arab/Caliphate, Persian and Ottoman empires)
8. Sinic East (parts of East Asia under the historic influence of Chinese culture)
9. Latin America (Central and South America and the Caribbean)
10. Sub-Saharan Africa (African countries South of the Sahara).

Remarks: A cluster analysis asking to place countries into ten different clusters on the basis of religious traditions, imperial legacies and ethno-linguistic composition variables produces a ninety percent overlapping classification of countries.

Variable citation: Welzel, C. (2013). *Freedom rising: Human empowerment and the quest for emancipation (1st ed.)*. Cambridge University Press

2.18.9.103 Emancipative Values: Autonomy Component (wel_evau)

Long tag: qog_std_ts_wel_evau

Original tag: wel_evau

Description:

Meaning: 3-item index measuring a national culture's emphasis on universal freedoms in the domain of personal autonomy (independence, imagination and non-obedience as desired child qualities).
Source: Index invented and documented in Welzel, Freedom Rising (2013: 66-69), www.cambridge.org/welzel (Online Appendix, p. 20-29), based on data from the World Values Surveys, all countries and time points.
Scaling: Four-point scale, ranging from a theoretical minimum of 0 when the least secular position is taken on all 3 items, to a maximum of 1.0 when the most secular position is taken on all 3 items. Intermediate positions are given in fractions of 1.0. Country scores are population averages (arithmetic mean) on the 0-1 index.

Variable citation: Welzel, C. (2013). *Freedom rising: Human empowerment and the quest for emancipation (1st ed.)*. Cambridge University Press

2.18.9.104 Emancipative Values: Choice Component (wel_evch)

Long tag: qog_std_ts_wel_evch

Original tag: wel_evch

Description:

Meaning: 3-item index measuring a national culture's emphasis on universal freedoms in the domain of reproductive choices (acceptance of divorce, abortion, homosexuality). Source: Index invented and documented in Welzel, Freedom Rising (2013: 66-69), www.cambridge.org/welzel (Online Appendix, p. 20-29), based on data from the World Values Surveys, all countries and time points. Scaling: Multi-point scale, ranging from a theoretical minimum of 0 when the least emancipative position is taken on all 3 items, to a maximum of 1.0 when the most emancipative position is taken on all 3 items. Intermediate positions are given in fractions of 1.0. Country scores are population averages (arithmetic mean) on the 0-1 index.

Variable citation: Welzel, C. (2013). *Freedom rising: Human empowerment and the quest for emancipation (1st ed.)*. Cambridge University Press

2.18.9.105 Emancipative Values Index (wel_evi)

Long tag: qog_std_ts_wel_evi

Original tag: wel_evi

Description:

Meaning: "Protective-vs.-Emancipative Values" - 12-item index measuring a national culture's emphasis on universal freedoms in the domains of (1) reproductive choice (acceptance of divorce, abortion, homosexuality), (2) gender equality (support of women's equal access to education, jobs and power), (3) people's voice (priorities for freedom of speech and people's say in national, local and job affairs), and (4) personal autonomy (independence, imagination and non-obedience as desired child qualities). Source: Index invented and documented in Welzel, Freedom Rising (2013: 66-69), www.cambridge.org/welzel (Online Appendix, p. 20-29), based on data from the World Values Surveys, all countries and time points.
Scaling: Continuous scale, ranging from a theoretical minimum of 0 when the least emancipative position is taken on all 12 items, to a maximum of 1.0 when the most emancipative position is taken on all 12 items. Intermediate positions are given in fractions of 1.0. Country scores are population averages (arithmetic mean) on the 0-1 index.
Remarks: The EVI is a conceptual refinement of Inglehart and Welzel's (2005) "Survival-vs.-Self-expression Values". Individual-level scores are normally distributed around the mean in each national sample. In the context of Freedom Rising's human empowerment framework, emancipative values are interpreted as motivational empowerment.

Variable citation: Welzel, C. (2013). *Freedom rising: Human empowerment and the quest for emancipation (1st ed.)*. Cambridge University Press

2.18.9.106 Emancipative Values: Voice Component (wel_evvo)

Long tag: qog_std_ts_wel_evvo

Original tag: wel_evvo

Description:

Meaning: 3-item index measuring a national culture's emphasis on universal freedoms in the domain of people's voice (priorities for freedom of speech and people's say in national and local affairs).
Source: Index invented and documented in Welzel, Freedom Rising (2013: 66-69), www.cambridge.org/welzel (Online Appendix, p. 20-29), based on data from the World Values Surveys, all countries and time points.
Scaling: Multi-point scale, ranging from a theoretical minimum of 0 when the least emancipative position is taken on all 3 items, to a maximum of 1.0 when the most emancipative position is taken on all 3 items. Intermediate positions are given in fractions of 1.0. Country scores are population averages (arithmetic mean) on the 0-1 index.
Remarks: This index partly overlaps with Inglehart's (1977; 1997) measure of postmaterialist values.

Variable citation: Welzel, C. (2013). *Freedom rising: Human empowerment and the quest for emancipation (1st ed.)*. Cambridge University Press

2.18.9.107 Social Movement Activity (wel_sma)

Long tag: qog_std_ts_wel_sma

Original tag: wel_sma

Description:

Meaning: 3-item index measuring to what extent three types of peaceful social movement activities (petitions, demonstrations, boycotts) are part of a national culture's action repertoire.
Source: Index invented and documented in Welzel, Freedom Rising (2013: 222-225), www.cambridge.org/welzel (Online Appendix, p. 66-70), based on data from the World Values Surveys.
Scaling: Multi-point index from a theoretical minimum 0 when none of the three activities is part of the action repertoire to 1.0 when all three of them are. On each activity, non-execution is coded 0, anticipated execution .33 and actual execution 1. Then for each individual the average over the three activities is calculated. Country scores are population averages (arithmetic mean) on the 0-1 index.
Remarks: Individual-level scores are normally distributed around the mean in each national sample. In the context of Freedom Rising's human empowerment framework, social movement activity is interpreted as behavioural empowerment.

Variable citation: Welzel, C. (2013). *Freedom rising: Human empowerment and the quest for emancipation (1st ed.)*. Cambridge University Press

2.18.9.108 Trust (Standard) (wel_trstd)

Long tag: qog_std_ts_wel_trstd

Original tag: wel_trstd

Description:

Meaning: Dummy coded standard trust question indicating to what extent people believe that they can trust unspecified other people.
Source: World Values Surveys, all countries and time points from rounds 1 to 6.
Scaling: Dummy index standardized into 0 for non-trust and 1.0 for trust in unspecified others. Country-level scores are the average of each national sample, thus transforming the individual-level dummy codes into a continuous 0-to-1.0 scale.

Variable citation: Welzel, C. (2013). *Freedom rising: Human empowerment and the quest for emancipation (1st ed.)*. Cambridge University Press

2.18.9.109 Autonomy Index (wvs_auton)

Long tag: qog_std_ts_wvs_auton

Original tag: wvs_auton

Description:

Autonomy Index

2.18.9.114 Satisfaction with your life (wvs_satlif)

Long tag: qog_std_ts_wvs_satlif

Original tag: wvs_satlif

Description:
All things considered, how satisfied are you with your life as a whole these days?

1. Completely dissatisfied
2.
3.
4.
5.
6.
7.
8.
9.
10. Completely satisfied

Variable citation: Haerpfer, C., Inglehart, R., Moreno, A., Welzel, C., Kizilova, K., Diez-Medrano, J., Lagos, M., Norris, P., Ponarin, E., & et al., B. P. (2021). 2.18.9.115 Most people can be trusted (wvs_trust)

Long tag: qog_std_ts_wvs_trust

Original tag: wvs_trust

Description:
Generally speaking, would you say that most people can be trusted or that you need to be very careful in dealing with people?

0. Need to be very careful
1. Most people can be trusted

Variable citation: Haerpfer, C., Inglehart, R., Moreno, A., Welzel, C., Kizilova, K., Diez-Medrano, J., Lagos, M., Norris, P., Ponarin, E., & et al., B. P. (2021). 2.18.10 Religion

This category includes variables regarding numbers of followers of specific religions and the status of religion in the constitution.

2.18.10.1 Animist religions: Total (percent Adherents) (arda_angenpct)

Long tag: qog_std_ts_arda_angenpct

Original tag: arda_angenpct

Description:
Animist religions: Total (percent Adherents).

Variable citation: Maoz, Z., & Henderson, E. A. (2013). The world religion dataset, 1945-2010: Logic, estimates, and trends. *International Interactions*, 39(3)

2.18.10.2 Baha'i: Total (percent Adherents) (arda_bagenpct)

Long tag: qog_std_ts_arda_bagenpct

Original tag: arda_bagenpct

Description:
Baha'i: Total (percent Adherents).

Variable citation: Maoz, Z., & Henderson, E. A. (2013). The world religion dataset, 1945-2010: Logic, estimates, and trends. *International Interactions*, 39(3)

2.18.10.3 Buddhism: Total (percent Adherents) (arda_bugenpct)

Long tag: qog_std_ts_arda_bugenpct

Original tag: arda_bugenpct

Description:
Buddhism: Total (percent Adherents).

Variable citation: Maoz, Z., & Henderson, E. A. (2013). The world religion dataset, 1945-2010: Logic, estimates, and trends. *International Interactions*, 39(3)

2.18.10.4 Buddhism: Mahayana (percent Adherents) (arda_bumahpct)

Long tag: qog_std_ts_arda_bumahpct

Original tag: arda_bumahpct

Description:
Buddhism: Mahayana (percent Adherents).

Variable citation: Maoz, Z., & Henderson, E. A. (2013). The world religion dataset, 1945-2010: Logic, estimates, and trends. *International Interactions*, 39(3)

2.18.10.5 Buddhism: Other (percent Adherents) (arda_buothpct)

Long tag: qog_std_ts_arda_buothpct

Original tag: arda_buothpct

Description:
Buddhism: Other (percent Adherents).

Variable citation: Maoz, Z., & Henderson, E. A. (2013). The world religion dataset, 1945-2010: Logic, estimates, and trends. *International Interactions*, 39(3)

2.18.10.6 Buddhism: Theravada (percent Adherents) (arda_buthrpct)

Long tag: qog_std_ts_arda_buthrpct

Original tag: arda_buthrpct

Description:
Buddhism: Theravada (percent Adherents).

Variable citation: Maoz, Z., & Henderson, E. A. (2013). The world religion dataset, 1945-2010: Logic, estimates, and trends. *International Interactions*, 39(3)

2.18.10.7 Christianity: Anglican (percent Adherents) (arda_changpct)

Long tag: qog_std_ts_arda_changpct

Original tag: arda_changpct

Description:
Christianity: Anglican (percent Adherents).

Variable citation: Maoz, Z., & Henderson, E. A. (2013). The world religion dataset, 1945-2010: Logic, estimates, and trends. *International Interactions*, 39(3)

2.18.10.8 Christianity: Roman Catholics (percent Adherents) (arda_chcatpct)

Long tag: qog_std_ts_arda_chcatpct

Original tag: arda_chcatpct

Description:
Christianity: Roman Catholics (percent Adherents).

Variable citation: Maoz, Z., & Henderson, E. A. (2013). The world religion dataset, 1945-2010: Logic, estimates, and trends. *International Interactions*, 39(3)

2.18.10.9 Christianity: Total (percent Adherents) (arda_chgenpct)

Long tag: qog_std_ts_arda_chgenpct

Original tag: arda_chgenpct

Description:
Christianity: Total (percent Adherents).

Variable citation: Maoz, Z., & Henderson, E. A. (2013). The world religion dataset, 1945-2010: Logic, estimates, and trends. *International Interactions*, 39(3)

2.18.10.10 Christianity: Eastern Orthodox (percent Adherents) (arda_chortpct)

Long tag: qog_std_ts_arda_chortpct

Original tag: arda_chortpct

Description:
Christianity: Eastern Orthodox (percent Adherents).

Variable citation: Maoz, Z., & Henderson, E. A. (2013). The world religion dataset, 1945-2010: Logic, estimates, and trends. *International Interactions*, 39(3)

2.18.10.11 Christianity: Other (percent Adherents) (arda_chothpct)

Long tag: qog_std_ts_arda_chothpct

Original tag: arda_chothpct

Description:
Christianity: Other (percent Adherents).

Variable citation: Maoz, Z., & Henderson, E. A. (2013). The world religion dataset, 1945-2010: Logic, estimates, and trends. *International Interactions*, 39(3)

2.18.10.12 Christianity: Protestants (percent Adherents) (arda_chprtpct)

Long tag: qog_std_ts_arda_chprtpct

Original tag: arda_chprtpct

Description:
Christianity: Protestants (percent Adherents).

Variable citation: Maoz, Z., & Henderson, E. A. (2013). The world religion dataset, 1945-2010: Logic, estimates, and trends. *International Interactions*, 39(3)

2.18.10.13 Confucianism: Total (percent Adherents) (arda_cogenpct)

Long tag: qog_std_ts_arda_cogenpct

Original tag: arda_cogenpct

Description:
Confucianism: Total (percent Adherents).

Variable citation: Maoz, Z., & Henderson, E. A. (2013). The world religion dataset, 1945-2010: Logic, estimates, and trends. *International Interactions*, 39(3)

2.18.10.14 Hindu: Total (percent Adherents) (arda_higenpct)

Long tag: qog_std_ts_arda_higenpct

Original tag: arda_higenpct

Description:
Hindu: Total (percent Adherents).

Variable citation: Maoz, Z., & Henderson, E. A. (2013). The world religion dataset, 1945-2010: Logic, estimates, and trends. *International Interactions*, 39(3)

2.18.10.15 Islam: Ahmadiyya (percent Adherents) (arda_isahmpct)

Long tag: qog_std_ts_arda_isahmpct

Original tag: arda_isahmpct

Description:
Islam: Ahmadiyya (percent Adherents).

Variable citation: Maoz, Z., & Henderson, E. A. (2013). The world religion dataset, 1945-2010: Logic, estimates, and trends. *International Interactions*, 39(3)

2.18.10.16 Islam: Alawite (percent Adherents) (arda_isalapct)

Long tag: qog_std_ts_arda_isalapct

Original tag: arda_isalapct

Description:
Islam: Alawite (percent Adherents).

Variable citation: Maoz, Z., & Henderson, E. A. (2013). The world religion dataset, 1945-2010: Logic, estimates, and trends. *International Interactions*, 39(3)

2.18.10.17 Islam: Total (percent Adherents) (arda_isgenpct)

Long tag: qog_std_ts_arda_isgenpct

Original tag: arda_isgenpct

Description:
Islam: Total (percent Adherents).

Variable citation: Maoz, Z., & Henderson, E. A. (2013). The world religion dataset, 1945-2010: Logic, estimates, and trends. *International Interactions*, 39(3)

2.18.10.18 Islam: Ibadhi (percent Adherents) (arda_isibdpct)

Long tag: qog_std_ts_arda_isibdpct

Original tag: arda_isibdpct

Description:
Islam: Ibadhi (percent Adherents).

Variable citation: Maoz, Z., & Henderson, E. A. (2013). The world religion dataset, 1945-2010: Logic, estimates, and trends. *International Interactions*, 39(3)

2.18.10.19 Islam: Other (percent Adherents) (arda_islotpct)

Long tag: qog_std_ts_arda_islotpct

Original tag: arda_islotpct

Description:
Islam: Other (percent Adherents).

Variable citation: Maoz, Z., & Henderson, E. A. (2013). The world religion dataset, 1945-2010: Logic, estimates, and trends. *International Interactions*, 39(3)

2.18.10.20 Islam: Nation of Islam (percent Adherents) (arda_isnatpct)

Long tag: qog_std_ts_arda_isnatpct

Original tag: arda_isnatpct

Description:
Islam: Nation of Islam (percent Adherents).

Variable citation: Maoz, Z., & Henderson, E. A. (2013). The world religion dataset, 1945-2010: Logic, estimates, and trends. *International Interactions*, 39(3)

2.18.10.21 Islam: Shi'a (percent Adherents) (arda_isshipct)

Long tag: qog_std_ts_arda_isshipct

Original tag: arda_isshipct

Description:
Islam: Shi'a (percent Adherents).

Variable citation: Maoz, Z., & Henderson, E. A. (2013). The world religion dataset, 1945-2010: Logic, estimates, and trends. *International Interactions*, 39(3)

2.18.10.22 Islam: Sunni (percent Adherents) (arda_issunpct)

Long tag: qog_std_ts_arda_issunpct

Original tag: arda_issunpct

Description:
Islam: Sunni (percent Adherents).

Variable citation: Maoz, Z., & Henderson, E. A. (2013). The world religion dataset, 1945-2010: Logic, estimates, and trends. *International Interactions*, 39(3)

2.18.10.23 Jain: Total (percent Adherents) (arda_jagenpct)

Long tag: qog_std_ts_arda_jagenpct

Original tag: arda_jagenpct

Description:
Jain: Total (percent Adherents).

Variable citation: Maoz, Z., & Henderson, E. A. (2013). The world religion dataset, 1945-2010: Logic, estimates, and trends. *International Interactions*, 39(3)

2.18.10.24 Judaism: Conservative (percent Adherents) (arda_jdcnpct)

Long tag: qog_std_ts_arda_jdcnpct

Original tag: arda_jdcnpct

Description:
Judaism: Conservative (percent Adherents).

Variable citation: Maoz, Z., & Henderson, E. A. (2013). The world religion dataset, 1945-2010: Logic, estimates, and trends. *International Interactions*, 39(3)

2.18.10.25 Judaism: Total (percent Adherents) (arda_jdgenpct)

Long tag: qog_std_ts_arda_jdgenpct

Original tag: arda_jdgenpct

Description:
Judaism: Total (percent Adherents).

Variable citation: Maoz, Z., & Henderson, E. A. (2013). The world religion dataset, 1945-2010: Logic, estimates, and trends. *International Interactions*, 39(3)

2.18.10.26 Judaism: Orthodox (percent Adherents) (arda_jdorpct)

Long tag: qog_std_ts_arda_jdorpct

Original tag: arda_jdorpct

Description:
Judaism: Orthodox (percent Adherents).

Variable citation: Maoz, Z., & Henderson, E. A. (2013). The world religion dataset, 1945-2010: Logic, estimates, and trends. *International Interactions*, 39(3)

2.18.10.27 Judaism: Other (percent Adherents) (arda_jdotpct)

Long tag: qog_std_ts_arda_jdotpct

Original tag: arda_jdotpct

Description:
Judaism: Other (percent Adherents).

Variable citation: Maoz, Z., & Henderson, E. A. (2013). The world religion dataset, 1945-2010: Logic, estimates, and trends. *International Interactions*, 39(3)

2.18.10.28 Judaism: Reform (percent Adherents) (arda_jdrfpct)

Long tag: qog_std_ts_arda_jdrfpct

Original tag: arda_jdrfpct

Description:
Judaism: Reform (percent Adherents).

Variable citation: Maoz, Z., & Henderson, E. A. (2013). The world religion dataset, 1945-2010: Logic, estimates, and trends. *International Interactions*, 39(3)

2.18.10.29 Non-religious: Total (percent Adherents) (arda_norelpct)

Long tag: qog_std_ts_arda_norelpct

Original tag: arda_norelpct

Description:
Non-religious: Total (percent Adherents).

Variable citation: Maoz, Z., & Henderson, E. A. (2013). The world religion dataset, 1945-2010: Logic, estimates, and trends. *International Interactions*, 39(3)

2.18.10.30 Other religions: Total (percent Adherents) (arda_otgenpct)

Long tag: qog_std_ts_arda_otgenpct

Original tag: arda_otgenpct

Description:
Other religions: Total (percent Adherents).

Variable citation: Maoz, Z., & Henderson, E. A. (2013). The world religion dataset, 1945-2010: Logic, estimates, and trends. *International Interactions*, 39(3)

2.18.10.31 Shinto: Total (percent Adherents) (arda_shgenpct)

Long tag: qog_std_ts_arda_shgenpct

Original tag: arda_shgenpct

Description:
Shinto: Total (percent Adherents).

Variable citation: Maoz, Z., & Henderson, E. A. (2013). The world religion dataset, 1945-2010: Logic, estimates, and trends. *International Interactions*, 39(3)

2.18.10.32 Sikh: Total (percent Adherents) (arda_sigenpct)

Long tag: qog_std_ts_arda_sigenpct

Original tag: arda_sigenpct

Description:
Sikh: Total (percent Adherents).

Variable citation: Maoz, Z., & Henderson, E. A. (2013). The world religion dataset, 1945-2010: Logic, estimates, and trends. *International Interactions*, 39(3)

2.18.10.33 Syncretic religions: Total (percent Adherents) (arda_sygenpct)

Long tag: qog_std_ts_arda_sygenpct

Original tag: arda_sygenpct

Description:
Syncretic religions: Total (percent Adherents).

Variable citation: Maoz, Z., & Henderson, E. A. (2013). The world religion dataset, 1945-2010: Logic, estimates, and trends. *International Interactions*, 39(3)

2.18.10.34 Taoism: Total (percent Adherents) (arda_tagenpct)

Long tag: qog_std_ts_arda_tagenpct

Original tag: arda_tagenpct

Description:
Taoism: Total (percent Adherents).

Variable citation: Maoz, Z., & Henderson, E. A. (2013). The world religion dataset, 1945-2010: Logic, estimates, and trends. *International Interactions*, 39(3)

2.18.10.35 Zoroastrian: Total (percent Adherents) (arda_zogenpct)

Long tag: qog_std_ts_arda_zogenpct

Original tag: arda_zogenpct

Description:
Zoroastrian: Total (percent Adherents).

Variable citation: Maoz, Z., & Henderson, E. A. (2013). The world religion dataset, 1945-2010: Logic, estimates, and trends. *International Interactions*, 39(3)

2.18.10.36 Religious Legislation (biu_relleg)

Long tag: qog_std_ts_biu_relleg

Original tag: biu_relleg

Description:
Composite measure of religious legislation, 2014 (higher scores indicate higher levels of religious legislation).

Variable citation: Fox, J. (2011). Building composite measures of religion and state. *Interdisciplinary Journal of Research on Religion*, 7, 1–39 Fox, J. (2015). *Political secularism, religion, and the state: A time series analysis of worldwide data.* Cambridge University Press Fox, J. (2017). Religion and state dataset: Round 3. `http://www.religionandstate.org/` Fox, J., Finke, R., & Mataic, D. R. (2018). New data and measures on societal discrimination and religious minorities. *Interdisciplinary Journal of Research on Religion*, 2(14)

2.18.10.37 Religiosity (ess_relig)

Long tag: qog_std_ts_ess_relig

Original tag: ess_relig

Description:
Regardless of whether you belong to a particular religion, how religious would you say you are?
0. Not at all Religious
1.
2.
3.
4.
5.
6.
7.
8.
9.
10. Very Religious

Variable citation: NSD - Norwegian Centre for Research Data. (2018). European social survey cumulative file, ess 1-8 [Data Archive and distributor of ESS data for ESS ERIC]. `http://www.europeansocialsurvey.org/`

2.18.10.38 Secular Values: Defiance Component (wel_svde)

Long tag: qog_std_ts_wel_svde

Original tag: wel_svde

Description:
Meaning: 3-item index measuring a national culture's distance to "sacred" sources of authority in the domain of patrimonial authority (the nation, the state, the parents).
Source: Index invented and documented in Welzel, Freedom Rising (2013: 63-66), www.cambridge.org/welzel (Online Appendix, p. 12-19), based on data from the World Values Surveys, all countries and time points.
Scaling: Multi-point scale, ranging from a theoretical minimum of 0 when the least secular position is taken on all 3 items, to a maximum of 1.0 when the most secular position is taken on all 3 items. Intermediate positions are given in fractions of 1.0. Country scores are population averages (arithmetic mean) on the 0-1 index.

Variable citation: Welzel, C. (2013). *Freedom rising: Human empowerment and the quest for emancipation (1st ed.).* Cambridge University Press

2.18.10.39 Secular Values: Disbelief Component (wel_svdi)

Long tag: qog_std_ts_wel_svdi

Original tag: wel_svdi

Description:

Meaning: 3-item index measuring a national culture's distance to "sacred" sources of authority in the domain of religious authority (faith, commitment, practice).
Source: Index invented and documented in Welzel, Freedom Rising (2013: 63-66), www.cambridge.org/welzel (Online Appendix, p. 12-19), based on data from the World Values Surveys, all countries and time points.
Scaling: Multi-point scale, ranging from a theoretical minimum of 0 when the least secular position is taken on all 3 items, to a maximum of 1.0 when the most secular position is taken on all 3 items. Intermediate positions are given in fractions of 1.0. Country scores are population averages (arithmetic mean) on the 0-1 index.

Variable citation: Welzel, C. (2013). *Freedom rising: Human empowerment and the quest for emancipation (1st ed.)*. Cambridge University Press

2.18.10.40 Secular Values Index (wel_svi)

Long tag: qog_std_ts_wel_svi

Original tag: wel_svi

Description:

Meaning: "Sacred-vs.-Secular Values" - 12-item index measuring a national culture's secular distance to "sacred" sources of authority, including (1) religious authority (faith, commitment, practice), (2) patrimonial authority (the nation, the state, the parents), (3) order institutions (army, police, courts), and (4) normative authority (anti-bribery, anti-cheating and anti-evasion norms).
Source: Index invented and documented in Welzel, Freedom Rising (2013: 63-66), www.cambridge.org/welzel (Online Appendix, p. 12-19), based on data from the World Values Surveys, all countries and time points.
Scaling: Continuous scale, ranging from a theoretical minimum of 0 when the least secular position is taken on all 12 items, to a maximum of 1.0 when the most secular position is taken on all 12 items. Intermediate positions are given in fractions of 1.0. Country scores are population averages (arithmetic mean) on the 0-1 index.
Remarks: The SVI is a conceptual refinement of Inglehart and Welzel's (2005) "Traditional-vs.-Secular-rational Values". Individual-level scores are normally distributed around the mean in each national sample.

Variable citation: Welzel, C. (2013). *Freedom rising: Human empowerment and the quest for emancipation (1st ed.)*. Cambridge University Press

2.18.10.41 Secular Values: Relativism Component (wel_svre)

Long tag: qog_std_ts_wel_svre

Original tag: wel_svre

Description:

Meaning: 3-item index measuring a national culture's distance to "sacred" sources of authority in the domain of normative authority (anti-bribery, anti-cheating and anti-evasion norms).
Source: Index invented and documented in Welzel, Freedom Rising (2013: 63-66), www.cambridge.org/welzel (Online Appendix, p. 12-19), based on data from the World Values Surveys, all countries and time points.
Scaling: Multi-point scale, ranging from a theoretical minimum of 0 when the least secular position is taken on all 3 items, to a maximum of 1.0 when the most secular position is taken on all 3 items. Intermediate positions are given in fractions of 1.0. Country scores are population averages (arithmetic mean) on the 0-1 index.

Note: The value for Slovenia in 2005 is considerably higher than the values for Slovenia in other years.

Variable citation: Welzel, C. (2013). *Freedom rising: Human empowerment and the quest for emancipation (1st ed.)*. Cambridge University Press

2.18.10.42 Secular Values: Skepticism Component (wel_svsk)

Long tag: qog_std_ts_wel_svsk

Original tag: wel_svsk

Description:

Meaning: 3-item index measuring a national culture's distance to "sacred" sources of authority in the domain of order institutions (army, police, courts).
Source: Index invented and documented in Welzel, Freedom Rising (2013: 63-66), www.cambridge.org/welzel (Online Appendix, p. 12-19), based on data from the World Values Surveys, all countries and time points.
Scaling: Multi-point scale, ranging from a theoretical minimum of 0 when the least secular position is taken on all 3 items, to a maximum of 1.0 when the most secular position is taken on all 3 items. Intermediate positions are given in fractions of 1.0. Country scores are population averages (arithmetic mean) on the 0-1 index.

Variable citation: Welzel, C. (2013). *Freedom rising: Human empowerment and the quest for emancipation (1st ed.)*. Cambridge University Press

2.18.10.43 Confidence: Churches (wvs_confch)

Long tag: qog_std_ts_wvs_confch

Original tag: wvs_confch

Description:

I am going to name a number of organizations. For each one, could you tell me how much confidence you have in them: Churches

1. None at all
2. Not very much
3. Quite a lot
4. A great deal

2.18.11 Conflict and Military Service

This category includes variables concerning armed conflict, including civil war and terrorism, govern- ment revenue and spending related to violent conflict (military expenditure, arms imports, military personnel).

2.18.11.1 Member of an Alliance (atop_ally)

Long tag: qog_std_ts_atop_ally

Original tag: atop_ally

Description:
Member of an Alliance

0. Not a member of an alliance
1. Member of an alliance

Variable citation: Leeds, B., Ashley, J., Ritter, S. M., McLaughlin, M., & Long, A. G. (2002). Alliance treaty obligations and provisions, 1815–1944. *International Interactions*, 28, 237–260

2.18.11.2 Consultancy Obligation (atop_consult)

Long tag: qog_std_ts_atop_consult

Original tag: atop_consult

Description:
Consultancy Obligation

0. Has no Consultancy obligations
1. Has Consultancy obligations

Variable citation: Leeds, B., Ashley, J., Ritter, S. M., McLaughlin, M., & Long, A. G. (2002). Alliance treaty obligations and provisions, 1815–1944. *International Interactions*, 28, 237–260

2.18.11.3 Defensive Obligation (atop_defensive)

Long tag: qog_std_ts_atop_defensive

Original tag: atop_defensive

Description:
Defensive Obligation

0. Has no defensive obligations
1. Has defensive obligations

Variable citation: Leeds, B., Ashley, J., Ritter, S. M., McLaughlin, M., & Long, A. G. (2002). Alliance treaty obligations and provisions, 1815–1944. *International Interactions*, 28, 237–260

2.18.11.4 Neutrality Obligation (atop_neutrality)

Long tag: qog_std_ts_atop_neutrality

Original tag: atop_neutrality

Description:
Neutrality Obligation

0. Has no Neutrality obligations
1. Has Neutrality obligations

Variable citation: Leeds, B., Ashley, J., Ritter, S. M., McLaughlin, M., & Long, A. G. (2002). Alliance treaty obligations and provisions, 1815–1944. *International Interactions*, 28, 237–260

2.18.11.5 Non-Aggression Obligation (atop_nonagg)

Long tag: qog_std_ts_atop_nonagg

Original tag: atop_nonagg

Description:
Non-Agression Obligation

0. Has no Non-Agression obligations
1. Has Non-Agression obligations

Variable citation: Leeds, B., Ashley, J., Ritter, S. M., McLaughlin, M., & Long, A. G. (2002). Alliance treaty obligations and provisions, 1815–1944. *International Interactions*, 28, 237–260

2.18.11.6 Number of Alliances (atop_number)

Long tag: qog_std_ts_atop_number

Original tag: atop_number

Description:
Number of Alliances

Variable citation: Leeds, B., Ashley, J., Ritter, S. M., McLaughlin, M., & Long, A. G. (2002). Alliance treaty obligations and provisions, 1815–1944. *International Interactions*, 28, 237–260

2.18.11.7 Offensive Obligation (atop_offensive)

Long tag: qog_std_ts_atop_offensive

Original tag: atop_offensive

Description:
Offensive Obligation

0. Has no offensive obligations
1. Has offensive obligations

Variable citation: Leeds, B., Ashley, J., Ritter, S. M., McLaughlin, M., & Long, A. G. (2002). Alliance treaty obligations and provisions, 1815–1944. *International Interactions*, 28, 237–260

2.18.11.8 Transition Year (atop_transyr)

Long tag: qog_std_ts_atop_transyr

Original tag: atop_transyr

Description:
Transition Year

Variable citation: Leeds, B., Ashley, J., Ritter, S. M., McLaughlin, M., & Long, A. G. (2002). Alliance treaty obligations and provisions, 1815–1944. *International Interactions*, 28, 237–260

2.18.11.9 Global Militarization Index (bicc_gmi)

Long tag: qog_std_ts_bicc_gmi

Original tag: bicc_gmi

Description:
The Global Militarization Index is divided into three overarching categories: expenditure, personnel and heavy weapons. (See variables bicc_milexp, bicc_milper, and bicc_hw).

In order to increase the compatibility between different indicators and preventing extreme values from crating distortions when normalizing data, in a first step every indicator was represented in a logarithm with the factor 10. Second, all data was normalized using the formula x=(y-min)/(max-min), with min and max representing, respectively, the lowest and the highest value of the logarithm. In a third step, every indicator was weighted in accordance to a subjective factor, reflecting the relative importance attributed to it by BICC researchers. In order to calculate the final score, the weighted indicators were added together and then normalized one last time on a scale ranging from 0 to 1,000. For better comparison of individual years, all years were finally normalized.

Weighting Factors used:
Military expenditures as percentage of GDP - 5
Military expenditures in relation to health spending - 3
Military and paramilitary personnel in relation to population - 4
Military reservers in relation to population - 2
Military and paramilitary personnel in relation to physicians - 2
Heavy weapons in relation to population - 4

Variable citation: Mutschler, Max. M and Marius Bales. (2020). *Global Militarization Index 2020*. Bonn International Center for Conversion BICC. https://gmi.bicc.de/

2.18.11.10 Heavy Weapons Index (bicc_hw)

Long tag: qog_std_ts_bicc_hw

Original tag: bicc_hw

Description:

The GMI takes into consideration the number of an armed forces' heavy weapons in relation to the total population. Heavy weapons are defined here as any piece of military equipment which fits into either one of four categories: armored vehicles (armored personnel carriers, light tanks, main battle tanks), artillery (multiple rocket launchers, self-propelled artillery, towed artillery) above 100mm caliber, combat aircraft (attack helicopters, fixed-wing fighter aircraft), and major fighting ships (submarines, major surface combatants above corvette size).

Data on weapons holdings was collected by BICC from different sources, mainly the Military Balance from ISS. Data on small arms and light weapons (SALW) is not only extremely difficult to obtain but also unreliable and was thus not included in the GMI.

Variable citation: Mutschler, Max. M and Marius Bales. (2020). *Global Militarization Index 2020*. Bonn International Center for Conversion BICC. https://gmi.bicc.de/

2.18.11.11 Military Expenditure Index (bicc_milexp)

Long tag: qog_std_ts_bicc_milexp

Original tag: bicc_milexp

Description:

Military spending in relation to GDP and health spending are the most important indicators for determining the level of militarization. Financial resources which are made available via the military budget by a government are an important factor which affects capacities and size of a state's armed forces. The other indicator the GMI uses is the comparison between the total military budget and government spending on health services.

Figures for military expenditure are compiled from the data base of the Stockholm Peace Research Institute SIPRI. Even though SIPRI may currently be regarded as the most reliable source, data on military expenditure has to be treated with extreme caution. For many countries, especially in the developing world and autocratic states, the figures are but rough estimates. In cases where SIPRI does not provide any up-to-date information, we adopted the latest available figures provided they were no older than three years.

Data on gross domestic product was taken from the International Monetary Fund. Data on health expenditure used have been extracted from the data base of the World Health Organization.

Variable citation: Mutschler, Max. M and Marius Bales. (2020). *Global Militarization Index 2020*. Bonn International Center for Conversion BICC. https://gmi.bicc.de/

2.18.11.12 Military Personnel Index (bicc_milper)

Long tag: qog_std_ts_bicc_milper

Original tag: bicc_milper

Description:

The level of militarization is also represented by the relation of military personnel to the total population and physicians. The first and most important indicator in this category is the active (para)military personnel to the total population. Paramilitary personnel were included here, since in many countries the regular military alone does not adequately reflect the total size of the armed forces.

The main criterion for coding an organizational entity as either military or paramilitary is that the forces in question are under the direct control of the government in addition to being armed, uniformed and garrisoned.

For a comprehensive presentation of the available personnel and an adequate representation of the relative level of militarization, a second indicator in this category takes into account the percentage of reserve forces in the total population. This factor is relevant for some countries, such as Switzerland that have a comparably small standing army but a more substantial amount of available reserves within society. The third indicator compares the total amount of military and paramilitary forces with the number of physicians in a country in order to express the relation between military and non-military expertise in a society.

All data on military personnel was compiled from the Military Balance, the yearbook published by the Institute for Strategic and International Studies (IISS). Population size figures were taken from the Vital Statistics Report of the United Nations; data on the number of physicians from the World Health Organization.

Variable citation: Mutschler, Max. M and Marius Bales. (2020). *Global Militarization Index 2020*. Bonn International Center for Conversion BICC. https://gmi.bicc.de/

2.18.11.13 Monopoly on the Use of Force (bti_muf)

Long tag: qog_std_ts_bti_muf

Original tag: bti_muf

Description:
To what extent does the state's monopoly on the use of force cover the entire territory of the country? 1-10.

1. There is no state monopoly on the use of force.
4. The state's monopoly on the use of force is established only in key parts of the country. Large areas of the country are controlled by guerrillas, paramilitaries or clans.
7. The state's monopoly on the use of force is established nationwide in principle, but it is challenged by guerrillas, mafias or clans in territorial enclaves.
10. There is no competition with the state's monopoly on the use of force throughout the entire territory.

Variable citation: Donner, S., Hartmann, H., & Schwarz, R. (2020). *Transformation index of the bertelsmann stiftung 2020*. Bertelsmann Stiftung. `http://www.bti-project.org`

2.18.11.14 Corruption Perception: Military (gcb_pmil)

Long tag: qog_std_ts_gcb_pmil

Original tag: gcb_pmil

Description:
To what extent do you perceive the following categories in this country to be affected by corruption? Military. 1 (Not at all corrupt) - 5 (Extremely corrupt).

Variable citation: Transparency International (2017). Global corruption barometer 9th edition. `https://www.transparency.org/research/gcb`

2.18.11.15 Political Terror Scale - Amnesty International (gd_ptsa)

Long tag: qog_std_ts_gd_ptsa

Original tag: gd_ptsa

Description:
Political Terror Scale Levels from the yearly country reports of Amnesty International:

1. Countries under a secure rule of law, people are not imprisoned for their view, and torture is rare or exceptional. Political murders are extremely rare.
2. There is a limited amount of imprisonment for nonviolent political activity. However, few persons are affected, torture and beatings are exceptional. Political murder is rare.
3. There is extensive political imprisonment, or a recent history of such imprisonment. Execution or other political murders and brutality may be common. Unlimited detention, with or without a trial, for political views is accepted.
4. Civil and political rights violations have expanded to large numbers of the population. Murders, disappearances, and torture are a common part of life. In spite of its generality, on this level terror affects those who interest themselves in politics or ideas.
5. Terror has expanded to the whole population. The leaders of these societies place no limits on the means or thoroughness with which they pursue personal or ideological goals.

Variable citation: Gibney, M., Cornett, L., Wood, R., Haschke, P., Arnon, D., Pisanò, A., Barrett, G., & Park, B. (2020). The political terror scale 1976-2019 [Data retrieved from the Political Terror Scale website]. `http://www.politicalterrorscale.org`

2.18.11.16 Political Terror Scale - Human Rights Watch (gd_ptsh)

Long tag: qog_std_ts_gd_ptsh

Original tag: gd_ptsh

Description:
Political Terror Scale Levels from the Human Rights Watch's World Reports:

1. Countries under a secure rule of law, people are not imprisoned for their view, and torture is rare or exceptional. Political murders are extremely rare.
2. There is a limited amount of imprisonment for nonviolent political activity. However, few persons are affected, torture and beatings are exceptional. Political murder is rare.
3. There is extensive political imprisonment, or a recent history of such imprisonment. Execution or other political murders and brutality may be common. Unlimited detention, with or without a trial, for political views is accepted.

2.18.11.18 Expenditure on defense, as percent of total gen. gov. exp. (gfs_def)

Long tag: qog_std_ts_gfs_def

Original tag: gfs_def

Description:

Total expenditure on defense, as the percentage of general government expenditure.

Variable citation: International Monetary Fund. (2019). Government finance statistics yearbook (gfsy) 2019. https://data.imf.org/?sk=a0867067-d23c-4ebc-ad23-d3b015045405

2.18.11.19 Ongoing Conflict (1-5 Higher intensity of conflict) (gpi_conf)

Long tag: qog_std_ts_gpi_conf

Original tag: gpi_conf

Description:

Ongoing Domestic and International Conflict (1 to 5, 5 refers to higher intensity of conflict) is one of the three subdomains of the GPI. It investigates the extent to which countries are involved in internal and external conflicts, as well as their role and duration of involvement in conflicts.

Variable citation: Institute for Economics and Peace. (2021). Global peace index 2021: Measuring peace in a complex world [Accessed 09-11-2021]. http://visionofhumanity.org/reports

2.18.11.20 Militarisation (1-5 Higher militarisation) (gpi_mil)

Long tag: qog_std_ts_gpi_mil

Original tag: gpi_mil

Description:

Militarisation (Scaled 1 to 5, 5 being more militarised) is one of the three subdomains of the GPI. It reflects the link between a country's level of military build-up and access to weapons and its level of peacefulness, both domestically and internationally.

Variable citation: Institute for Economics and Peace. (2021). Global peace index 2021: Measuring peace in a complex world [Accessed 09-11-2021]. http://visionofhumanity.org/reports

2.18.11.21 Executive Power over Military Force (iaep_epmf)

Long tag: qog_std_ts_iaep_epmf

Original tag: iaep_epmf

Description:

Does an executive have the power to use military force abroad without legislative approval?

0. No
1. Yes

Source: IAEP (Wig et al., 2015)

Variable citation: Wig, T., Hegre, H., & Regan, P. M. (2015). Updated data on institutions and elections 1960–2012: Presenting the iaep dataset version 2.0. *Research & Politics*, 2(2). https://doi.org/10.1177/2053168015579120

2.18.11.22 Some other executive have the power to use force abroad (iaep_milo)

Long tag: qog_std_ts_iaep_milo

Original tag: iaep_milo

Description:

Is the power to use military force vested in some other executive?

0. No
1. Yes

Source: IAEP (Wig et al., 2015)

Variable citation: Wig, T., Hegre, H., & Regan, P. M. (2015). Updated data on institutions and elections 1960–2012: Presenting the iaep dataset version 2.0. *Research & Politics*, 2(2). https://doi.org/10.1177/2053168015579120

2.18.11.23 Riots and Protests after Election (nelda_rpae)

Long tag: qog_std_ts_nelda_rpae

Original tag: nelda_rpae

Description:

If there are protests and riots after elections, a "Yes" is coded. The riots and protests should at least somewhat be related to the handling or outcome of the election.

Variable citation: Hyde, S. D., & Marinov, N. (2012). Which elections can be lost? *Political Analysis*, 20(2), 191–201 Hyde, S. D., & Marinov, N. (2021). Codebook for national elections across democracy and autocracy dataset, 5.0. https://nelda.co/

2.18.11.24 Violence and Civilian Deaths before Election (nelda_vcdbe)

Long tag: qog_std_ts_nelda_vcdbe

Original tag: nelda_vcdbe

Description:

If there was any significant violence relating to the elections that resulted in civilian deaths, a "Yes" is coded. These deaths should be at least plausibly related to the election, though sometimes it is difficult to be certain. Deaths related to civil war that are not intended to influence the election, and are not caused by the election, should not be counted.

Variable citation: Hyde, S. D., & Marinov, N. (2012). Which elections can be lost? *Political Analysis*, 20(2), 191–201 Hyde, S. D., & Marinov, N. (2021). Codebook for national elections across democracy and autocracy dataset, 5.0. https://nelda.co/

2.18.11.25 Structure of central gov. expenditures, defence (oecd_gengovdistri_t1b)

Long tag: qog_std_ts_oecd_gengovdistri_t1b

Original tag: oecd_gengovdistri_t1b

Description:

Structure of central government expenditures, defence.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. https://doi.org/10.1787/20752288

2.18.11.26 Societal Violence Scale Index 1-5 (svs_ind)

Long tag: qog_std_ts_svs_ind

Original tag: svs_ind

Description:

The Societal Violence Scale is coded on a 5-point scale where:
1 Societal violence is limited in scope and severity, with relatively few victims and few perpetrators.
2 Societal violence is a problem, affecting a significant number of victims, albeit across few victim categories and of a less severe nature.
3 Societal violence is widespread and serious in nature. It affects a significant number of people across several victim categories.
4 Societal violence is pervasive in scope, severe in nature, assumes a variety of forms and affects a large proportion of the population typically across several victim categories and perpetrators.

5 Societal violence is ubiquitous in scope, egregious in nature and assumes a variety of forms. If affects a large proportion of the population, commonly crossing numerous victim groups and perpetrators.

Variable citation: Gibney, M., Cornett, L., & Haschke, P. (2021). The societal violence scale [Data retrieved from the Political Terror Scale website]. `http://www.politicalterrorscale.org/Data/Documentation-SVS.html`

2.18.11.27 Extrasystemic armed conflict (ucdp_type1)

Long tag: qog_std_ts_ucdp_type1

Original tag: ucdp_type1

Description:
Number of extrasystemic armed conflicts per country in a given year. Extrasystemic armed conflict occurs between a state and a non-state group outside its own territory. (In the COW project, extrasystemic war is subdivided into colonial war and imperial war, but this distinction is not used here.) These conflicts are by definition territorial, since the government side is fighting to retain control of a territory outside the state system.

Variable citation: Pemstein, D., Meserve, S. A., & Melton, J. (2017). Democratic compromise: A latent variable analysis of ten measures of regime type. *Political Analysis*, 18(4), 426–449. `https://doi.org/10.1093/pan/mpq020`

2.18.11.28 Interstate armed conflict (ucdp_type2)

Long tag: qog_std_ts_ucdp_type2

Original tag: ucdp_type2

Description:
Number of interstate armed conflicts per country in a given year. An interstate armed conflict occurs between two or more states.

Variable citation: Pemstein, D., Meserve, S. A., & Melton, J. (2017). Democratic compromise: A latent variable analysis of ten measures of regime type. *Political Analysis*, 18(4), 426–449. `https://doi.org/10.1093/pan/mpq020`

2.18.11.29 Internal armed conflict (ucdp_type3)

Long tag: qog_std_ts_ucdp_type3

Original tag: ucdp_type3

Description:
Number of internal armed conflicts per country in a given year. Internal armed conflict occurs between the government of a state and one or more internal opposition group(s) without intervention from other states.

Variable citation: Pemstein, D., Meserve, S. A., & Melton, J. (2017). Democratic compromise: A latent variable analysis of ten measures of regime type. *Political Analysis*, 18(4), 426–449. `https://doi.org/10.1093/pan/mpq020`

2.18.11.30 Internationalized internal armed conflict (ucdp_type4)

Long tag: qog_std_ts_ucdp_type4

Original tag: ucdp_type4

Description:
Number of internationalized internal armed conflicts per country in a given year. An internationalized internal armed conflict occurs between the government of a state and one or more internal opposition group(s) with intervention from other states (secondary parties) on one or both sides.

2.18.11.31 Global Terrorism Index (voh_gti)

Long tag: qog_std_ts_voh_gti

Original tag: voh_gti

Description:
Global Terrorism Index.

2.18.11.32 Political Stability and Absence of Violence/Terrorism, Estimate (wbgi_pve)

Long tag: qog_std_ts_wbgi_pve

Original tag: wbgi_pve

Description:
Political Stability and Absence of Violence- Estimate: "Political Stability and Absence of Violence/Terrorism" measures perceptions of the likelihood of political instability and/or politically-motivated violence, including terrorism.

Variable citation: Kaufmann, D., Kraay, A., & Mastruzzi, M. (2010). The worldwide governance indicators: A summary of methodology, data and analytical issues. *World Bank Policy Research Working Paper, 5430*

2.18.11.33 Political Stability and Absence of Violence/Terrorism, Number of Sources (wbgi_pvn)

Long tag: qog_std_ts_wbgi_pvn

Original tag: wbgi_pvn

Description:
Political Stability and Absence of Violence - Number of Sources.

Variable citation: Kaufmann, D., Kraay, A., & Mastruzzi, M. (2010). The worldwide governance indicators: A summary of methodology, data and analytical issues. *World Bank Policy Research Working Paper, 5430*

2.18.11.34 Political Stability and Absence of Violence/Terrorism, Standard Error (wbgi_pvs)

Long tag: qog_std_ts_wbgi_pvs

Original tag: wbgi_pvs

Description:
Political Stability and Absence of Violence - Standard Errors.

Variable citation: Kaufmann, D., Kraay, A., & Mastruzzi, M. (2010). The worldwide governance indicators: A summary of methodology, data and analytical issues. *World Bank Policy Research Working Paper, 5430*

2.18.11.35 Armed forces personnel (percent of total labor force) (wdi_afp)

Long tag: qog_std_ts_wdi_afp

Original tag: wdi_afp

Description:
Armed forces personnel are active duty military personnel, including paramilitary forces if the training, organization, equipment, and control suggest they may be used to support or replace regular military forces. Labor force comprises all people who meet the International Labour Organization's definition of the economically active population.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.11.36 Armed forces personnel, total (wdi_afpt)

Long tag: qog_std_ts_wdi_afpt

Original tag: wdi_afpt

Description:
Armed forces personnel are active duty military personnel, including paramilitary forces if the training, organization, equipment, and control suggest they may be used to support or replace regular military forces.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.11.37 Arms exports (SIPRI trend indicator values) (wdi_armexp)

Long tag: qog_std_ts_wdi_armexp

Original tag: wdi_armexp

Description:
Exports - Arms transfers cover the supply of military weapons through sales, aid, gifts, and those made through manufacturing licenses. Data cover major conventional weapons such as aircraft, armored vehicles, artillery, radar systems, missiles, and ships designed for military use. Excluded are transfers of other military equipment such as small arms and light weapons, trucks, small artillery, ammunition, support equipment, technology transfers, and other services.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.11.38 Arms imports (SIPRI trend indicator values) (wdi_armimp)

Long tag: qog_std_ts_wdi_armimp

Original tag: wdi_armimp

Description:

Imports - Arms transfers cover the supply of military weapons through sales, aid, gifts, and those made through manufacturing licenses. Data cover major conventional weapons such as aircraft, armored vehicles, artillery, radar systems, missiles, and ships designed for military use. Excluded are transfers of other military equipment such as small arms and light weapons, trucks, small artillery, ammunition, support equipment, technology transfers, and other services.

2.18.11.39 Battle-related deaths (number of people) (wdi_brdeath)

Long tag: qog_std_ts_wdi_brdeath

Original tag: wdi_brdeath

Description:

Battle-related deaths are deaths in battle-related conflicts between warring parties in the conflict dyad (two conflict units that are parties to a conflict). Typically, battle-related deaths occur in warfare involving the armed forces of the warring parties. This includes traditional battlefield fighting, guerrilla activities, and all kinds of bombardments of military units, cities, and villages, etc. The targets are usually the military itself and its installations or state institutions and state representatives, but there is often substantial collateral damage in the form of civilians being killed in crossfire, in indiscriminate bombings, etc. All deaths–military as well as civilian–incurred in such situations, are counted as battle-related deaths.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.11.40 Military expenditure (percent of GDP) (wdi_expmil)

Long tag: qog_std_ts_wdi_expmil

Original tag: wdi_expmil

Description:

Military expenditure (percent of GDP). Military expenditures data from SIPRI are derived from the NATO definition, which includes all current and capital expenditures on the armed forces, including peacekeeping forces; defense ministries and other government agencies engaged in defense projects; paramilitary forces, if these are judged to be trained and equipped for military operations; and military space activities. Such expenditures include military and civil personnel, including retirement pensions of military personnel and social services for personnel; operation and maintenance; procurement; military research and development; and military aid (in the military expenditures of the donor country). Excluded are civil defense and current expenditures for previous military activities, such as for veterans' benefits, demobilization, conversion, and destruction of weapons. This definition cannot be applied for all countries, however, since that would require much more detailed information than is available about what is included in military budgets and off-budget military expenditure items. (For example, military budgets might or might not cover civil defense, reserves and auxiliary forces, police and paramilitary forces, dual-purpose forces such as military and civilian police, military grants in kind, pensions for military personnel, and social security contributions paid by one part of government to another).

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.11.41 Military expenditure (percent of general government expenditure) (wdi_expmilge)

Long tag: qog_std_ts_wdi_expmilge

Original tag: wdi_expmilge

Description:

Military expenditure (percent of central government expenditure). Military expenditures data from SIPRI are derived from the NATO definition, which includes all current and capital expenditures on the armed forces, including peacekeeping forces; defense ministries and other government agencies engaged in defense projects; paramilitary forces, if these are judged to be trained and equipped for military operations; and military space activities. Such expenditures include military and civil personnel, including retirement pensions of military personnel and social services for personnel; operation and maintenance; procurement; military research and development; and military aid (in the military expenditures of the donor country). Excluded are civil defense and current expenditures for previous military activities, such as for veterans' benefits, demobilization, conversion, and destruction of weapons. This definition cannot be applied for all countries, however, since that would require much more detailed information than is available about what is included in military budgets and off-budget military expenditure items. (For example, military budgets might or might not cover civil defense, reserves and auxiliary forces, police and paramilitary forces, dual-purpose forces such as military and civilian police, military grants in kind, pensions for military personnel, and social security contributions paid by one part of government to another.)

2.18.11.42 Internally displaced persons, new displacement-conflict and violence (number) (wdi_idpvc)

Long tag: qog_std_ts_wdi_idpvc

Original tag: wdi_idpvc

Description:

Internally displaced persons, new displacement associated with conflict and violence (number of cases). Internally displaced persons are defined according to the 1998 Guiding Principles (http://www.internal-displacement.org/publications/1998/ocha-guiding-principles-on-internal-displacement) as people or groups of people who have been forced or obliged to flee or to leave their homes or places of habitual residence, in particular as a result of armed conflict, or to avoid the effects of armed conflict, situations of generalized violence, violations of human rights, or natural or human-made disasters and who have not crossed an international border. "New Displacement" refers to the number of new cases or incidents of displacement recorded, rather than the number of people displaced. This is done because people may have been displaced more than once.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.11.43 Internally displaced persons, total displaced by conflict-violence (number) (wdi_idpvp)

Long tag: qog_std_ts_wdi_idpvp

Original tag: wdi_idpvp

Description:

Internally displaced persons, new displacement associated with conflict and violence (number of people). Internally displaced persons are defined according to the 1998 Guiding Principles (http://www.internal-displacement.org/publications/1998/ocha-guiding-principles-on-internal-displacement) as people or groups of people who have been forced or obliged to flee or to leave their homes or places of habitual residence, in particular as a result of armed conflict, or to avoid the effects of armed conflict, situations of generalized violence, violations of human rights, or natural or human-made disasters and who have not crossed an international border. "People displaced" refers to the number of people living in displacement as of the end of each year.

2.18.11.44 Number of cabinet ministers with a military title (wgov_minmil)

Long tag: qog_std_ts_wgov_minmil

Original tag: wgov_minmil

Description:

The number of cabinet ministers with a military title. It should be noted that the authors have not done any extra checks on this variable, and solely have relied on the information provided in the "Chief of State And Cabinet Members Of Foreign Governments" directory. The information is based on national customs. Thus, in some countries military titles are consistently used, while this is not the case in other countries, and the authors therefore encourage researchers to be cautious when using this variable.

Variable citation: Nyrup, J., & Bramwell, S. (2020). Who governs? a new global dataset on members of cabinets. *American Political Science Review*, 114(4), 1366–1374

2.18.11.45 Number of people with a military title, based on all entries for the country in (wgov_totmil)

Long tag: qog_std_ts_wgov_totmil

Original tag: wgov_totmil

Description:

The number of people with a military title, based on all entries for the country in the dataset. It should be noted that the authors have not done any extra checks on this variable, and solely have relied on the information provided in the "Chief of State And Cabinet Members Of Foreign Governments" directory. The information is based on national customs. Thus, in some countries military titles are consistently used, while this is not the case in other countries, and the authors therefore encourage researchers to be cautious when using this variable.

Percentage with tertiary schooling, females and males between 15 and 64 years old.

Variable citation: Barro, R. J., & Lee, J. W. (2013). A new data set of educational attainment in the world, 1950–2010. *Journal of Development Economics*, 104, 184–198

2.18.12.7 Percentage with Primary Schooling, Female (bl_lpf)

Long tag: qog_std_ts_bl_lpf

Original tag: bl_lpf

Description:

Percentage with primary schooling, females between 15 and 64 years old.

Variable citation: Barro, R. J., & Lee, J. W. (2013). A new data set of educational attainment in the world, 1950–2010. *Journal of Development Economics*, 104, 184–198

2.18.12.8 Percentage with Primary Schooling, Male (bl_lpm)

Long tag: qog_std_ts_bl_lpm

Original tag: bl_lpm

Description:
Percentage with primary schooling, males between 15 and 64 years old.

Variable citation: Barro, R. J., & Lee, J. W. (2013). A new data set of educational attainment in the world, 1950–2010. *Journal of Development Economics*, 104, 184–198

2.18.12.9 Percentage with Primary Schooling, Female and Male (bl_lpmf)

Long tag: qog_std_ts_bl_lpmf

Original tag: bl_lpmf

Description:
Percentage with primary schooling, females and males between 15 and 64 years old.

Variable citation: Barro, R. J., & Lee, J. W. (2013). A new data set of educational attainment in the world, 1950–2010. *Journal of Development Economics*, 104, 184–198

2.18.12.10 Percentage with Secondary Schooling, Female (bl_lsf)

Long tag: qog_std_ts_bl_lsf

Original tag: bl_lsf

Description:
Percentage with secondary schooling, females between 15 and 64 years old.

Variable citation: Barro, R. J., & Lee, J. W. (2013). A new data set of educational attainment in the world, 1950–2010. *Journal of Development Economics*, 104, 184–198

2.18.12.11 Percentage with Secondary Schooling, Male (bl_lsm)

Long tag: qog_std_ts_bl_lsm

Original tag: bl_lsm

Description:
Percentage with secondary schooling, males between 15 and 64 years old.

Variable citation: Barro, R. J., & Lee, J. W. (2013). A new data set of educational attainment in the world, 1950–2010. *Journal of Development Economics*, 104, 184–198

2.18.12.12 Percentage with Secondary Schooling, Female and Male (bl_lsmf)

Long tag: qog_std_ts_bl_lsmf

Original tag: bl_lsmf

Description:
Percentage with secondary schooling, females and males between 15 and 64 years old.

Variable citation: Barro, R. J., & Lee, J. W. (2013). A new data set of educational attainment in the world, 1950–2010. *Journal of Development Economics*, 104, 184–198

2.18.12.13 Percentage with No Schooling, Female (bl_luf)

Long tag: qog_std_ts_bl_luf

Original tag: bl_luf

Description:
Percentage with no schooling, females between 15 and 64 years old.

Variable citation: Barro, R. J., & Lee, J. W. (2013). A new data set of educational attainment in the world, 1950–2010. *Journal of Development Economics*, 104, 184–198

2.18.12.14 Percentage with No Schooling, Male (bl_lum)

Long tag: qog_std_ts_bl_lum

Original tag: bl_lum

Description:
Percentage with no schooling, males between 15 and 64 years old.

Variable citation: Barro, R. J., & Lee, J. W. (2013). A new data set of educational attainment in the world, 1950–2010. *Journal of Development Economics*, 104, 184–198

2.18.12.15 Percentage with No Schooling, Female and Male (bl_lumf)

Long tag: qog_std_ts_bl_lumf

Original tag: bl_lumf

Description:
Percentage with no schooling, females and males between 15 and 64 years old.

Variable citation: Barro, R. J., & Lee, J. W. (2013). A new data set of educational attainment in the world, 1950–2010. *Journal of Development Economics*, 104, 184–198

2.18.12.16 Sustainability (bti_su)

Long tag: qog_std_ts_bti_su

Original tag: bti_su

Description:
Economic growth is balanced, environmentally sustainable and future-oriented. Including "To what extent are environmental concerns effectively taken into account?" and "To what extent are there solid institutions for basic, secondary and tertiary education, as well as for research and development?".

2.18.12.73 Expenditure on education, as percent of total gen. gov. exp. (gfs_educ)

Long tag: qog_std_ts_gfs_educ

Original tag: gfs_educ

Description:
Total expenditure on education, as the percentage of general government expenditure.

Variable citation: International Monetary Fund. (2019). Government finance statistics yearbook (gfsy) 2019. `https://data.imf.org/?sk=a0867067-d23c-4ebc-ad23-d3b015045405`

2.18.12.74 Global Gender Gap Educational Attainment Subindex (gggi_eas)

Long tag: qog_std_ts_gggi_eas

Original tag: gggi_eas

Description:
Educational Attainment (0 to 1, where 1 indicates no gap). This subindex captures the gap between women's and men's current access to education through ratios of women to men in primary-, secondary- and tertiary-level education. A longer-term view of the country's ability to educate women and men in equal numbers is captured through the ratio of the female literacy rate to the male literacy rate.

Variable citation: World Economic Forum. (2021). The global gender gap report 2021 [All Rights Reserved]. `https://www.weforum.org/reports/ab6795a1-960c-42b2-b3d5-587eccda6023`

2.18.12.75 Education (iiag_edu)

Long tag: qog_std_ts_iiag_edu

Original tag: iiag_edu

Description:
Education is one of the four sub-categories that are used to calculate the Human Development category score. It consists of five indicators from seven data sources.

2.18.12.89 Official entrance age to early childhood education (years) (une_oaeece)

Long tag: qog_std_ts_une_oaeece

Original tag: une_oaeece

Description:

Official entrance age to early childhood education (years). Age at which students would enter a given programme or level of education assuming they start at the official entrance age for the lowest level of education, study full-time throughout and progressed through the system without repeating or skipping a grade. The theoretical entrance age to a given programme or level is typically, but not always, the most common entrance age.

Variable citation: UNESCO. (2020). Unesco institute for statistics. `http://data.uis.unesco.org/`

2.18.12.90 Official entrance age to primary education (years) (une_oaepe)

Long tag: qog_std_ts_une_oaepe

Original tag: une_oaepe

Description:
Official entrance age to primary education (years). Age at which students would enter a given programme or level of education assuming they start at the official entrance age for the lowest level of education, study full-time throughout and progressed through the system without repeating or skipping a grade. The theoretical entrance age to a given programme or level is typically, but not always, the most common entrance age.

2.18.12.130 School enrollment, primary, private (percent of total primary) (wdi_eduprp)

Long tag: qog_std_ts_wdi_eduprp

Original tag: wdi_eduprp

Description:
Percentage of enrollment in primary education in private institutions (percent).

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.12.131 School enrollment, secondary, private (percent of total secondary) (wdi_eduprs)

Long tag: qog_std_ts_wdi_eduprs

Original tag: wdi_eduprs

Description:

Percentage of enrollment in secondary education in private institutions (percent).

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.12.132 Government expenditure on education, total (percent of GDP) (wdi_expedu)

Long tag: qog_std_ts_wdi_expedu

Original tag: wdi_expedu

Description:

General government expenditure on education (current, capital, and transfers) is expressed as a percentage of GDP. It includes expenditure funded by transfers from international sources to government. General government usually refers to local, regional and central governments.

Note: The value for Tuvalu in 1997 has been recoded to missing due to an extreme and very unlikely value.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.12.133 Government expenditure on education, total (percent of government expenditure) (wdi_expeduge)

Long tag: qog_std_ts_wdi_expeduge

Original tag: wdi_expeduge

Description:

Total general (local, regional and central) government expenditure on education (current, capital, and transfers), expressed as a percentage of total general government expenditure on all sectors (including health, education, social services, etc.). It includes expenditure funded by transfers from international sources to government. Public education expenditure includes spending by local/municipal, regional and national governments (excluding household contributions) on educational institutions (both public and private), education administration, and subsidies for private entities (students/households and other privates entities). In some instances data on total public expenditure on education refers only to the ministry of education and can exclude other ministries that spend a part of their budget on educational activities. The indicator is calculated by dividing total public expenditure on education incurred by all government agencies/departments by the total government expenditure and multiplying by 100. For more information, consult the UNESCO Institute of Statistics website: http://www.uis.unesco.org/Education/

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.12.134 Expenditure on primary education (percent of government expenditure on edu.) (wdi_expedup)

Long tag: qog_std_ts_wdi_expedup

Original tag: wdi_expedup

Description:

Expenditure on Primary education, expressed as a percentage of total general government expenditure on education. Divide government expenditure on a given level of education (ex. primary, secondary) by total government expenditure on education (all levels combined), and multiply by 100. A high percentage of government expenditure on education spent on a given level denotes a high priority given to that level compared to others. When interpreting this indicator, one should take into account enrollment at that level, and the relative costs per student between different levels of education. For more information, consult the UNESCO Institute of Statistics website: http://www.uis.unesco.org/Education/

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.12.135 Expenditure on secondary education (percent of government expenditure on edu.) (wdi_expedus)

Long tag: qog_std_ts_wdi_expedus

Original tag: wdi_expedus

Description:
Expenditure on Secondary education, expressed as a percentage of total general government expenditure on education. Divide government expenditure on a given level of education (ex. primary, secondary) by total government expenditure on education (all levels combined), and multiply by 100. A high percentage of government expenditure on education spent on a given level denotes a high priority given to that level compared to others. When interpreting this indicator, one should take into account enrollment at that level, and the relative costs per student between different levels of education. For more information, consult the UNESCO Institute of Statistics website: http://www.uis.unesco.org/Education/

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.12.136 Expenditure on tertiary education (percent of government expenditure on edu.) (wdi_expedut)

Long tag: qog_std_ts_wdi_expedut

Original tag: wdi_expedut

Description:
Expenditure on Tertiary education, expressed as a percentage of total general government expenditure on education. Divide government expenditure on a given level of education (ex. primary, secondary) by total government expenditure on education (all levels combined), and multiply by 100. A high percentage of government expenditure on education spent on a given level denotes a high priority given to that level compared to others. When interpreting this indicator, one should take into account enrollment at that level, and the relative costs per student between different levels of education. 2.18.12.137 Government expenditure per student, primary (percent of GDP per capita) (wdi_expstup)

Long tag: qog_std_ts_wdi_expstup

Original tag: wdi_expstup

Description:
Government expenditure per student is the average general government expenditure (current, capital, and transfers) per student in the primary level of education, expressed as a percentage of GDP per capita.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.12.138 Government expenditure per student, secondary (percent of GDP per capita) (wdi_expstus)

Long tag: qog_std_ts_wdi_expstus

Original tag: wdi_expstus

Description:
Government expenditure per student is the average general government expenditure (current, capital, and transfers) per student in the secondary level of education, expressed as a percentage of GDP per capita.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.12.139 Government expenditure per student, tertiary (percent of GDP per capita) (wdi_expstut)

Long tag: qog_std_ts_wdi_expstut

Original tag: wdi_expstut

Description:
Government expenditure per student is the average general government expenditure (current, capital, and transfers) per student in the given tertiary of education, expressed as a percentage of GDP per capita.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.12.140 School enrollment, primary (percent gross) (wdi_gerp)

Long tag: qog_std_ts_wdi_gerp

Original tag: wdi_gerp

Description:
Total enrollment in primary education, regardless of age, expressed as a percentage of the population of official primary education age. GER can exceed 100percent due to the inclusion of over-aged and under-aged students because of early or late school entrance and grade repetition.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.12.141 School enrollment, primary, female (percent gross) (wdi_gerpf)

Long tag: qog_std_ts_wdi_gerpf

Original tag: wdi_gerpf

Description:
Total female enrollment in primary education, regardless of age, expressed as a percentage of the total female population of official primary education age. GER can exceed 100percent due to the inclusion of over-aged and under-aged students because of early or late school entrance and grade repetition.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.12.142 School enrollment, primary, male (percent gross) (wdi_gerpm)

Long tag: qog_std_ts_wdi_gerpm

Original tag: wdi_gerpm

Description:
Total male enrollment in primary education, regardless of age, expressed as a percentage of the total male population of official primary education age. GER can exceed 100percent due to the inclusion of over-aged and under-aged students because of early or late school entrance and grade repetition.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.12.143 School enrollment, preprimary (percent gross) (wdi_gerpp)

Long tag: qog_std_ts_wdi_gerpp

Original tag: wdi_gerpp

Description:
Total enrollment in pre-primary education, regardless of age, expressed as a percentage of the total population of official pre-primary education age. GER can exceed 100percent due to the inclusion of over-aged and under-aged students because of early or late school entrance and grade repetition.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.12.144 School enrollment, preprimary, female (percent gross) (wdi_gerppf)

Long tag: qog_std_ts_wdi_gerppf

Original tag: wdi_gerppf

Description:
Total female enrollment in pre-primary education, regardless of age, expressed as a percentage of the total female population of official pre-primary education age. GER can exceed 100percent due to the inclusion of over-aged and under-aged students because of early or late school entrance and grade repetition.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.12.145 School enrollment, preprimary, male (percent gross) (wdi_gerppm)

Long tag: qog_std_ts_wdi_gerppm

Original tag: wdi_gerppm

Description:
Total male enrollment in pre-primary education, regardless of age, expressed as a percentage of the total male population of official pre-primary education age. GER can exceed 100percent due to the inclusion of over-aged and under-aged students because of early or late school entrance and grade repetition.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.12.146 School enrollment, secondary (percent gross) (wdi_gers)

Long tag: qog_std_ts_wdi_gers

Original tag: wdi_gers

Description:
Total enrollment in secondary education, regardless of age, expressed as a percentage of the population of official secondary education age. GER can exceed 100percent due to the inclusion of over-aged and under-aged students because of early or late school entrance and grade repetition.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.12.147 School enrollment, secondary, female (percent gross) (wdi_gersf)

Long tag: qog_std_ts_wdi_gersf

Original tag: wdi_gersf

Description:
Total female enrollment in secondary education, regardless of age, expressed as a percentage of the female population of official secondary education age. GER can exceed 100percent due to the inclusion of over-aged and under-aged students because of early or late school entrance and grade repetition.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.12.148 School enrollment, secondary, male (percent gross) (wdi_gersm)

Long tag: qog_std_ts_wdi_gersm

Original tag: wdi_gersm

Description:
Total male enrollment in secondary education, regardless of age, expressed as a percentage of the male population of official secondary education age. GER can exceed 100percent due to the inclusion of over-aged and under-aged students because of early or late school entrance and grade repetition.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.12.149 School enrollment, tertiary (percent gross) (wdi_gert)

Long tag: qog_std_ts_wdi_gert

Original tag: wdi_gert

Description:
Total enrollment in tertiary education (ISCED 5 to 8), regardless of age, expressed as a percentage of the total population of the five-year age group following on from secondary school leaving.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.12.150 School enrollment, tertiary, female (percent gross) (wdi_gertf)

Long tag: qog_std_ts_wdi_gertf

Original tag: wdi_gertf

Description:
Total female enrollment in tertiary education (ISCED 5 to 8), regardless of age, expressed as a percentage of the total female population of the five-year age group following on from secondary school leaving.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.12.151 School enrollment, tertiary, male (percent gross) (wdi_gertm)

Long tag: qog_std_ts_wdi_gertm

Original tag: wdi_gertm

Description:
Total male enrollment in tertiary education (ISCED 5 to 8), regardless of age, expressed as a percentage of the total male population of the five-year age group following on from secondary school leaving.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.12.152 Literacy rate, adult total (percent of people ages 15 and above) (wdi_litrad)

Long tag: qog_std_ts_wdi_litrad

Original tag: wdi_litrad

Description:
Percentage of the population age 15 and above who can, with understanding, read and write a short, simple statement on their everyday life. Generally, 'literacy' also encompasses 'numeracy', the ability to make simple arithmetic calculations. This indicator is calculated by dividing the number of literates aged 15 years and over by the corresponding age group population and multiplying the result by 100.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.12.153 Literacy rate, adult female (percent of females ages 15 and above) (wdi_litradf)

Long tag: qog_std_ts_wdi_litradf

Original tag: wdi_litradf

Description:
Percentage of the female population age 15 and above who can, with understanding, read and write a short, simple statement on their everyday life. Generally, 'literacy' also encompasses 'numeracy', the ability to make simple arithmetic calculations. This indicator is calculated by dividing the number of literates aged 15 years and over by the corresponding age group population and multiplying the result by 100.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.12.154 Literacy rate, adult male (percent of males ages 15 and above) (wdi_litradm)

Long tag: qog_std_ts_wdi_litradm

Original tag: wdi_litradm

Description:
Percentage of the male population age 15 and above who can, with understanding, read and write a short, simple statement on their everyday life. Generally, 'literacy' also encompasses 'numeracy', the ability to make simple arithmetic calculations. This indicator is calculated by dividing the number of literates aged 15 years and over by the corresponding age group population and multiplying the result by 100.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.12.155 Literacy rate, youth total (percent of people ages 15-24) (wdi_litry)

Long tag: qog_std_ts_wdi_litry

Original tag: wdi_litry

Description:
Number of people age 15 to 24 years who can both read and write with understanding a short simple statement on their everyday life, divided by the population in that age group. Generally, 'literacy' also encompasses 'numeracy', the ability to make simple arithmetic calculations. Divide the number of people aged 15 to 24 years who are literate by the total population in the same age group and multiply the result by 100.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.12.156 Literacy rate, youth female (percent of females ages 15-24) (wdi_litryf)

Long tag: qog_std_ts_wdi_litryf

Original tag: wdi_litryf

Description:
Number of women age 15 to 24 years who can both read and write with understanding a short simple statement on their everyday life, divided by the population in that age group. Generally, 'literacy' also encompasses 'numeracy', the ability to make simple arithmetic calculations. Divide the number of people aged 15 to 24 years who are literate by the total population in the same age group and multiply the result by 100.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.12.157 Literacy rate, youth male (percent of males ages 15-24) (wdi_litrym)

Long tag: qog_std_ts_wdi_litrym

Original tag: wdi_litrym

Description:
Number of men people age 15 to 24 years who can both read and write with understanding a short simple

statement on their everyday life, divided by the population in that age group. Generally, 'literacy' also encompasses 'numeracy', the ability to make simple arithmetic calculations. Divide the number of people aged 15 to 24 years who are literate by the total population in the same age group and multiply the result by 100.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.12.158 School enrollment, primary (percent net) (wdi_nerp)

Long tag: qog_std_ts_wdi_nerp

Original tag: wdi_nerp

Description:

Net enrollment rate is the ratio of children of official school age who are enrolled in school to the population of the corresponding official school age. Primary education provides children with basic reading, writing, and mathematics skills along with an elementary understanding of such subjects as history, geography, natural science, social science, art, and music.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.12.159 School enrollment, primary, female (percent net) (wdi_nerpf)

Long tag: qog_std_ts_wdi_nerpf

Original tag: wdi_nerpf

Description:

Net enrollment rate is the ratio of girls of official school age who are enrolled in school to the population of the corresponding official school age. Primary education provides children with basic reading, writing, and mathematics skills along with an elementary understanding of such subjects as history, geography, natural science, social science, art, and music. Female.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.12.160 School enrollment, primary, male (percent net) (wdi_nerpm)

Long tag: qog_std_ts_wdi_nerpm

Original tag: wdi_nerpm

Description:

Net enrollment rate is the ratio of boys of official school age who are enrolled in school to the population of the corresponding official school age. Primary education provides children with basic reading, writing, and mathematics skills along with an elementary understanding of such subjects as history, geography, natural science, social science, art, and music. Male.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.12.161 Adjusted net enrollment rate, primary (percent of primary school children) (wdi_nerpr)

Long tag: qog_std_ts_wdi_nerpr

Original tag: wdi_nerpr

Description:

Adjusted net enrollment is the number of pupils of the school-age group for primary education, enrolled either in primary or secondary education, expressed as a percentage of the total population in that age group.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.12.162 Adjusted net enrollment rate, primary female (percent of primary school children) (wdi_nerprf)

Long tag: qog_std_ts_wdi_nerprf

Original tag: wdi_nerprf

Description:

Adjusted net enrollment is the number of female pupils of the school-age group for primary education, enrolled either in primary or secondary education, expressed as a percentage of the total population in that age group. Female.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.12.163 Adjusted net enrollment rate, primary male (percent of primary school children) (wdi_nerprm)

Long tag: qog_std_ts_wdi_nerprm

Original tag: wdi_nerprm

Description:

Adjusted net enrollment is the number of male pupils of the school-age group for primary education, enrolled either in primary or secondary education, expressed as a percentage of the total population in that age group. Male.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.12.164 School enrollment, secondary (percent net) (wdi_ners)

Long tag: qog_std_ts_wdi_ners

Original tag: wdi_ners

Description:

Net enrollment rate is the ratio of children of official school age who are enrolled in school to the population of the corresponding official school age. Secondary education completes the provision of basic education that began at the primary level, and aims at laying the foundations for lifelong learning and human development, by offering more subject- or skill-oriented instruction using more specialized teachers.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.12.165 School enrollment, secondary, female (percent net) (wdi_nersf)

Long tag: qog_std_ts_wdi_nersf

Original tag: wdi_nersf

Description:

Net enrollment rate is the ratio of girls of official school age who are enrolled in school to the population of the corresponding official school age. Secondary education completes the provision of basic education that began at the primary level, and aims at laying the foundations for lifelong learning and human development, by offering more subject- or skill-oriented instruction using more specialized teachers. Female.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.12.166 School enrollment, secondary, male (percent net) (wdi_nersm)

Long tag: qog_std_ts_wdi_nersm

Original tag: wdi_nersm

Description:

Net enrollment rate is the ratio of boys of official school age who are enrolled in school to the population of the corresponding official school age. Secondary education completes the provision of basic education that began at the primary level, and aims at laying the foundations for lifelong learning and human development, by offering more subject- or skill-oriented instruction using more specialized teachers. Male.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.12.167 Confidence: Education System (wvs_confedu)

Long tag: qog_std_ts_wvs_confedu

Original tag: wvs_confedu

Description:

I am going to name a number of organizations. For each one, could you tell me how much confidence you have in them: Education System

1. None at all
2. Not very much
3. Quite a lot
4. A great deal

2.18.13 Welfare

This category includes indicators on government expenditure related to social welfare (pension, sick- ness coverage and accidents coverage).

2.18.13.1 Social Safety Nets (bti_ssn)

Long tag: qog_std_ts_bti_ssn

Original tag: bti_ssn

Description:
To what extent do social safety nets provide compensation for social risks? 1-10.

1. Social safety nets do not exist. Poverty is combated hardly at all, or only ad hoc.
4. Social safety nets are rudimentary and cover only few risks for a limited number of beneficiaries. The majority of the population is at risk of poverty.
7. Social safety nets are well developed, but do not cover all risks for all strata of the population. A significant part of the population is still at risk of poverty.
10. Social safety nets are comprehensive and compensate for social risks, especially nationwide health care and a well-focused prevention of poverty.

Variable citation: Donner, S., Hartmann, H., & Schwarz, R. (2020). *Transformation index of the bertelsmann stiftung 2020*. Bertelsmann Stiftung. `http://www.bti-project.org`

2.18.13.2 Welfare Regime (bti_wr)

Long tag: qog_std_ts_bti_wr

Original tag: bti_wr

Description:
Welfare Regime: Assesses whether there are available arrangements to compensate for social risks 1-10. Including "To what extent do social safety nets provide compensation for social risks?" and "To what extent does equality of opportunity exist?".

Variable citation: Donner, S., Hartmann, H., & Schwarz, R. (2020). *Transformation index of the bertelsmann stiftung 2020*. Bertelsmann Stiftung. `http://www.bti-project.org`

2.18.13.3 Expenditure on general public services, as percent of total gen. gov. exp. (gfs_gps)

Long tag: qog_std_ts_gfs_gps

Original tag: gfs_gps

Description:
Total expenditure on general public services, as the percentage of general government expenditure.

Variable citation: International Monetary Fund. (2019). Government finance statistics yearbook (gfsy) 2019. `https://data.imf.org/?sk=a0867067-d23c-4ebc-ad23-d3b015045405`

2.18.14 Health

This category includes indicators describing the health of a population in a given country. These include reports about self-perceived health (state of health), policies and provided infrastructure concerning health (expenditure, number of hospitals), the prevalence of diseases (HIV, tuberculosis), and indicators such as birth rate, death rate and life expectancy.

2.18.14.1 Comparative Abortion Index 1 (0 to 7) (cai_cai1)

Long tag: qog_std_ts_cai_cai1

Original tag: cai_cai1

Description:
The scale quantifies grounds on which a country might grant legal access to abortion: saving a woman's life, preserving a woman's physical health, preserving a woman's mental health, in case of rape or incest, in case of fetal impairment, for social or economic reasons, and on request. 0 represents a country with a complete ban on abortions. 7 represents a country that allows abortions on request.

Variable citation: Forman–Rabinovici, A., & Sommer, U. (2018). Reproductive health policymakers: Comparing the influences of international and domestic institutions on abortion policy. *Public Administration*, 96(1), 185–199

2.18.14.2 Comparative Abortion Index 2 (0 to 1) (cai_cai2)

Long tag: qog_std_ts_cai_cai2

Original tag: cai_cai2

Description:
Using the 7 grounds for legal abortion, the weight of each grounds (Wi) will be determined based on the percentage (Pi) of countries that allow it. In the weighted index, countries are given a score on a scale of 0-1, where 0 represents countries in which there are no conditions for legal abortion, and 1 represents a country that accepts all criteria for abortion, including on request. The need for a weighted scale is as follows: It would be imprecise, for instance, to suggest that the criterion of saving a woman's life is equivalent to (and thus carries the same weight as) allowing abortion on demand. The more permissive the criterion, the less likely that it is universally accepted. Thus, the scale accounts for the different degrees of acceptance that each criterion represents.

Variable citation: Forman–Rabinovici, A., & Sommer, U. (2018). Reproductive health policymakers: Comparing the influences of international and domestic institutions on abortion policy. *Public Administration*, 96(1), 185–199

2.18.14.3 Foetal impairment is accepted as grounds for legal abortion (cai_foetal)

Long tag: qog_std_ts_cai_foetal

Original tag: cai_foetal

Description:
Binary variable that codes whether or not foetal impairment is accepted as grounds for a legal abortion. 1 means that it is accepted as grounds for abortion. 0 means that it is illegal, and not accepted as grounds for legal abortion.

Variable citation: Forman–Rabinovici, A., & Sommer, U. (2018). Reproductive health policymakers: Comparing the influences of international and domestic institutions on abortion policy. *Public Administration*, 96(1), 185–199

2.18.14.4 Threat to mother's life is accepted as grounds for legal abortion (cai_life)

Long tag: qog_std_ts_cai_life

Original tag: cai_life

Description:
Binary variable that codes whether or not threat to a mother's life is accepted as grounds for a legal abortion. 1 means that it is accepted as grounds for abortion. 0 means that it is illegal, and not accepted as grounds for legal abortion.

Variable citation: Forman–Rabinovici, A., & Sommer, U. (2018). Reproductive health policymakers: Comparing the influences of international and domestic institutions on abortion policy. *Public Administration*, 96(1), 185–199

2.18.14.5 Threat to mother's mental health is accepted as grounds for legal abortion (cai_mental)

Long tag: qog_std_ts_cai_mental

Original tag: cai_mental

Description:
Binary variable that codes whether or not threat to a mother's mental health is accepted as grounds for a legal abortion. 1 means that it is accepted as grounds for abortion. 0 means that it is illegal, and not accepted as grounds for legal abortion.

Variable citation: Forman–Rabinovici, A., & Sommer, U. (2018). Reproductive health policymakers: Comparing the influences of international and domestic institutions on abortion policy. *Public Administration*, 96(1), 185–199

2.18.14.6 Threat to mother's physical health is accepted as grounds for legal abortion (cai_physical)

Long tag: qog_std_ts_cai_physical

Original tag: cai_physical

Description:
Binary variable that codes whether or not threat to a mother's physical health is accepted as grounds for a legal abortion. 1 means that it is accepted as grounds for abortion. 0 means that it is illegal, and not accepted as grounds for legal abortion.

Variable citation: Forman–Rabinovici, A., & Sommer, U. (2018). Reproductive health policymakers: Comparing the influences of international and domestic institutions on abortion policy. *Public Administration*, 96(1), 185–199

2.18.14.7 Pregnancy as result of rape or incest is accepted as grounds for legal abortion (cai_rape)

Long tag: qog_std_ts_cai_rape

Original tag: cai_rape

Description:
Binary variable that codes whether or not pregnancy as a result of rape or incest is accepted as grounds for a legal abortion. 1 means that they are accepted as grounds for abortion. 0 means that it is illegal, and they are not accepted as grounds for legal abortion.

Variable citation: Forman–Rabinovici, A., & Sommer, U. (2018). Reproductive health policymakers: Comparing the influences of international and domestic institutions on abortion policy. *Public Administration*, 96(1), 185–199

2.18.14.8 Abortion is available on request (cai_request)

Long tag: qog_std_ts_cai_request

Original tag: cai_request

Description:
Binary variable that codes whether abortion is available on request. In other words, if there is complete legal access to abortion. 1 implies that there is complete access to abortion. 0 implies that there are limitations, and abortion services are not legally available upon request.

Variable citation: Forman–Rabinovici, A., & Sommer, U. (2018). Reproductive health policymakers: Comparing the influences of international and domestic institutions on abortion policy. *Public Administration*, 96(1), 185–199

2.18.14.9 Social or economic reasons are accepted as grounds for legal abortion (cai_social)

Long tag: qog_std_ts_cai_social

Original tag: cai_social

Description:
Binary variable that codes whether or not social or economic reasons are accepted as grounds for a legal abortion. 1 means that they are accepted as grounds for abortion. 0 means that it is illegal, and they are not accepted as grounds for legal abortion.

Variable citation: Forman–Rabinovici, A., & Sommer, U. (2018). Reproductive health policymakers: Comparing the influences of international and domestic institutions on abortion policy. *Public Administration*, 96(1), 185–199

2.18.14.10 Subjective Happiness (ess_happy)

Long tag: qog_std_ts_ess_happy

Original tag: ess_happy

Description:
Taking all things together, how happy would you say you are?
0. Extremely Unhappy

1.
2.
3.
4.
5.
6.
7.
8.
9.
10. Extremely Happy

Variable citation: NSD - Norwegian Centre for Research Data. (2018). European social survey cumulative file, ess 1-8 [Data Archive and distributor of ESS data for ESS ERIC]. `http://www.europeansocialsurvey.org/`

2.18.14.11 Subjective Health (ess_health)

Long tag: qog_std_ts_ess_health

Original tag: ess_health

Description:

How is your health in general? Would you say it is:
1. Very Good
2. Good
3. Fair
4. Bad
5. Very Bad

Variable citation: NSD - Norwegian Centre for Research Data. (2018). European social survey cumulative file, ess 1-8 [Data Archive and distributor of ESS data for ESS ERIC]. `http://www.europeansocialsurvey.org/`

2.18.14.12 Life expectancy in age < 1year, Female (eu_demmlifexpf)

Long tag: qog_std_ts_eu_demmlifexpf

Long tag: qog_std_ts_gcb_pmed

Original tag: gcb_pmed

Description:
To what extent do you perceive the following categories in this country to be affected by corruption? Medical services. 1 (Not at all corrupt) - 5 (Extremely corrupt).

Variable citation: Transparency International (2017). Global corruption barometer 9th edition. `https://www.transparency.org/research/gcb`

2.18.14.45 Expenditure on health, as percent of total gen. gov. exp. (gfs_heal)

Long tag: qog_std_ts_gfs_heal

Original tag: gfs_heal

Description:
Total expenditure on health, as the percentage of general government expenditure.

Variable citation: International Monetary Fund. (2019). Government finance statistics yearbook (gfsy) 2019. https://data.imf.org/?sk=a0867067-d23c-4ebc-ad23-d3b015045405

2.18.14.46 Global Gender Gap Health and Survival Subindex (gggi_hss)

Long tag: qog_std_ts_gggi_hss

Original tag: gggi_hss

Description:

Health and Survival (0 to 1, where 1 indicates no gap). This subindex provides an overview of the differences between women's and men's health through the use of two indicators. The first is the sex ratio at birth, which aims specifically to capture the phenomenon of "missing women", prevalent in many countries with a strong son preference. Second, we use the gap between women's and men's healthy life expectancy. This measure provides an estimate of the number of years that women and men can expect to live in good health by taking into account the years lost to violence, disease, malnutrition and other relevant factors.

Variable citation: World Economic Forum. (2021). The global gender gap report 2021 [All Rights Reserved]. https://www.weforum.org/reports/ab6795a1-960c-42b2-b3d5-587eccda6023

2.18.14.47 Healthy Life Years, Female, Age 1-4 years (ihme_hle_0104f)

Long tag: qog_std_ts_ihme_hle_0104f

Original tag: ihme_hle_0104f

Description:

Healthy Life Years, Female, Age 1-4 years. HALE is often referred to as healthy life expectancy. Unlike life expectancy, HALE takes into account mortality and nonfatal outcomes. HALE does this by summarizing years lived in less than ideal health (YLDs) and years lost due to premature mortality (YLLs) in a single measure of average population health for individual countries.

Variable citation: Global Burden of Disease Collaborative Network. (2020). Global burden of disease study 2019 (gbd 2019) results. http://ghdx.healthdata.org/gbd-results-tool

2.18.14.48 Healthy Life Years, Male, Age 1-4 years (ihme_hle_0104m)

Long tag: qog_std_ts_ihme_hle_0104m

Original tag: ihme_hle_0104m

Description:

Healthy Life Years, Male, Age 1-4 years. HALE is often referred to as healthy life expectancy. Unlike life expectancy, HALE takes into account mortality and nonfatal outcomes. 2.18.14.69 Human Development Index (undp_hdi)

Long tag: qog_std_ts_undp_hdi

Original tag: undp_hdi

Description:
The HDI was created to emphasize that people and their capabilities should be the ultimate criteria for assessing the development of a country, not economic growth alone. The HDI can also be used to question national policy choices, asking how two countries with the same level of GNI per capita can end up with different human development outcomes. These contrasts can stimulate debate about government policy priorities.

The Human Development Index (HDI) is a summary measure of average achievement in key dimensions of human development: a long and healthy life, being knowledgeable and having a decent standard of living. The HDI is the geometric mean of normalized indices for each of the three dimensions.

The health dimension is assessed by life expectancy at birth, the education dimension is measured by mean of years of schooling for adults aged 25 years and more and expected years of schooling for children of school entering age. The standard of living dimension is measured by gross national income per capita. The HDI uses the logarithm of income, to reflect the diminishing importance of income with increasing GNI. The scores for the three HDI dimension indices are then aggregated into a composite index using geometric mean. Refer to Technical notes for more details.

The HDI simplifies and captures only part of what human development entails. It does not reflect on inequalities, poverty, human security, empowerment, etc. The HDRO offers the other composite indices as broader proxy on some of the key issues of human development, inequality, gender disparity and human poverty.

Variable citation: United Nations Development Program. (2020b). Human development report 2020. `http://hdr.undp.org/en/2020-report`

2.18.14.70 CPIA building human resources rating (1=low to 6=high) (wdi_bhr)

Long tag: qog_std_ts_wdi_bhr

Original tag: wdi_bhr

Description:

The CPIA measures the extent to which a country's policy and institutional framework supports sustainable growth and poverty reduction and, consequently, the effective use of development assistance. More specifically, this indicator assesses the national policies and public and private sector service delivery that affect the access to and quality of health and education services, including prevention and treatment of HIV/AIDS, tuberculosis, and malaria.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.14.71 Current health expenditure (percent of GDP) (wdi_chexppgdp)

Long tag: qog_std_ts_wdi_chexppgdp

Original tag: wdi_chexppgdp

Description:

Current health expenditure (percent of GDP). Level of current health expenditure expressed as a percentage of GDP. Estimates of current health expenditures include healthcare goods and services consumed during each year. This indicator does not include capital health expenditures such as buildings, machinery, IT and stocks of vaccines for emergency or outbreaks.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.14.72 Prevalence of severe food insecurity in the population (percent) (wdi_foodins)

Long tag: qog_std_ts_wdi_foodins

Original tag: wdi_foodins

Description:

The percentage of people in the population who live in households classified as severely food insecure. A household is classified as severely food insecure when at least one adult in the household has reported to have been exposed, at times during the year, to several of the most severe experiences described in the FIES questions, such as to have been forced to reduce the quantity of the food, to have skipped meals, having gone hungry, or having to go for a whole day without eating because of a lack of money or other resources.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.14.73 Intentional homicides, female (per 100,000 female) (wdi_homicidesf)

Long tag: qog_std_ts_wdi_homicidesf

Original tag: wdi_homicidesf

Description:

Intentional homicides, female (per 100,000 female). Intentional homicides, female are estimates of unlawful female homicides purposely inflicted as a result of domestic disputes, interpersonal violence, violent conflicts over land resources, intergang violence over turf or control, and predatory violence and killing by armed groups. Intentional homicide does not include all intentional killing; the difference is usually in the organization of the killing. Individuals or small groups usually commit homicide, whereas killing in armed conflict is usually committed by fairly cohesive groups of up to several hundred members and is thus usually excluded.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.14.74 Intentional homicides, male (per 100,000 male) (wdi_homicidesm)

Long tag: qog_std_ts_wdi_homicidesm

Original tag: wdi_homicidesm

Description:

Intentional homicides, male (per 100,000 male). Intentional homicides, male are estimates of unlawful male homicides purposely inflicted as a result of domestic disputes, interpersonal violence, violent conflicts over land resources, intergang violence over turf or control, and predatory violence and killing by armed groups. Intentional homicide does not include all intentional killing; the difference is usually in the organization of the killing. Individuals or small groups usually commit homicide, whereas killing in armed conflict is usually committed by fairly cohesive groups of up to several hundred members and is thus usually excluded.

2.18.14.75 People with basic handwashing facilities (percent of population) (wdi_hwf)

Long tag: qog_std_ts_wdi_hwf

Original tag: wdi_hwf

Description:

People with basic handwashing facilities including soap and water (percent of population). The percentage of people living in households that have a handwashing facility with soap and water available on the premises. Handwashing facilities may be fixed or mobile and include a sink with tap water, buckets with taps, tippy-taps, and jugs or basins designated for handwashing. Soap includes bar soap, liquid soap, powder detergent, and soapy water but does not include ash, soil, sand or other handwashing agents.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.14.76 People with basic handwashing facilities, rural (percent of rural population) (wdi_hwfr)

Long tag: qog_std_ts_wdi_hwfr

Original tag: wdi_hwfr

Description:

People with basic handwashing facilities including soap and water, rural (percent of rural population). The percentage of people living in households that have a handwashing facility with soap and water available on the premises. Handwashing facilities may be fixed or mobile and include a sink with tap water, buckets with taps, tippy-taps, and jugs or basins designated for handwashing. Soap includes bar soap, liquid soap, powder detergent, and soapy water but does not include ash, soil, sand or other handwashing agents.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.14.77 People with basic handwashing facilities, urban (percent of urban population) (wdi_hwfu)

Long tag: qog_std_ts_wdi_hwfu

Original tag: wdi_hwfu

Description:

People with basic handwashing facilities including soap and water, urban (percent of urban population). The percentage of people living in households that have a handwashing facility with soap and water available on the premises. Handwashing facilities may be fixed or mobile and include a sink with tap water, buckets with taps, tippy-taps, and jugs or basins designated for handwashing. Soap includes bar soap, liquid soap, powder detergent, and soapy water but does not include ash, soil, sand or other handwashing agents.

2.18.14.78 Lifetime risk of maternal death (percent) (wdi_lrmd)

Long tag: qog_std_ts_wdi_lrmd

Original tag: wdi_lrmd

Description:

Life time risk of maternal death is the probability that a 15-year-old female will die eventually from a maternal cause assuming that current levels of fertility and mortality (including maternal mortality) do not change in the future, taking into account competing causes of death.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.14.79 Out-of-pocket expenditure (percent of current health expenditure) (wdi_ophexp)

Long tag: qog_std_ts_wdi_ophexp

Original tag: wdi_ophexp

Description:

Out-of-pocket expenditure (percent of current health expenditure). Share of out-of-pocket payments of total current health expenditures. Out-of-pocket payments are spending on health directly out-of-pocket by households.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.14.80 Smoking prevalence, females (percent of adults) (wdi_smokf)

Long tag: qog_std_ts_wdi_smokf

Original tag: wdi_smokf

Description:
Prevalence of smoking, female is the percentage of women ages 15 and over who smoke any form of tobacco, including cigarettes, cigars, pipes or any other smoked tobacco products. Data include daily and non-daily or occasional smoking.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.14.81 Smoking prevalence, males (percent of adults) (wdi_smokm)

Long tag: qog_std_ts_wdi_smokm

Original tag: wdi_smokm

Description:
Prevalence of smoking, male is the percentage of men ages 15 and over who smoke any form of tobacco, including cigarettes, cigars, pipes or any other smoked tobacco products. Data include daily and non-daily or occasional smoking.

Description:
Age-standardized suicide rates (per 100,000 population), Female.

Variable citation: World Health Organization. (2021). Global health observatory data repository [Accessed on 2021-11-29]. `http://www.who.int/gho/en/`

2.18.14.107 Suicide Rate (per 100,000 population), Male (who_suim)

Long tag: qog_std_ts_who_suim

Original tag: who_suim

Description:
Age-standardized suicide rates (per 100,000 population), Male.

Variable citation: World Health Organization. (2021). Global health observatory data repository [Accessed on 2021-11-29]. `http://www.who.int/gho/en/`

2.18.14.108 Suicide Rate (per 100,000 population), Total (who_suit)

Long tag: qog_std_ts_who_suit

Original tag: who_suit

Description:
Age-standardized suicide rates (per 100,000 population), Total.

Variable citation: World Health Organization. (2021). Global health observatory data repository [Accessed on 2021-11-29]. `http://www.who.int/gho/en/`

2.18.14.109 National-level average scores for subjective well-being (whr_hap)

Long tag: qog_std_ts_whr_hap

Original tag: whr_hap

Description:
National-level average scores for subjective well-being, as measured by answers to the Cantril ladder question asking people to evaluate the quality of their current lives on a scale of 0 to 10, where 0 represents the worst possible life for them, and 10 the best.

Variable citation: Helliwell, J., Layard, R., Sachs, J., & Neve, J. D. (2020). World happiness report 2020

2.18.14.110 Feeling of happiness (wvs_hap)

Long tag: qog_std_ts_wvs_hap

Original tag: wvs_hap

Description:
Taking all things together, would you say you are:

1. Not at all happy
2. Not very happy
3. Rather happy
4. Very happy

Variable citation: Haerpfer, C., Inglehart, R., Moreno, A., Welzel, C., Kizilova, K., Diez-Medrano, J., Lagos, M., Norris, P., Ponarin, E., & et al., B. P. (2021). 2.18.14.112 Share of private paid employees with health insurance (wwbi_prpemphi)

Long tag: qog_std_ts_wwbi_prpemphi

Original tag: wwbi_prpemphi

Description:
Share of private paid employees with health insurance

Variable citation: The World Bank. (2021b). Worldwide bureacracy indicators version 2.0. `https://www.worldbank.org/en/topic/migrationremittancesdiasporaissues/brief/migration-remittances-data`

2.18.14.113 Share of public paid employees with health insurance (wwbi_pupemphi)

Long tag: qog_std_ts_wwbi_pupemphi

Original tag: wwbi_pupemphi

Description:
Share of public paid employees with health insurance

Variable citation: The World Bank. (2021b). Worldwide bureacracy indicators version 2.0. `https://www.worldbank.org/en/topic/migrationremittancesdiasporaissues/brief/migration-remittances-data`

2.18.15 Environment

This category includes geographical characteristics such as the geographical region, land area etc. as well as indicators describing the state of the environment, ecosystems and materials, the impact of human beings on the environment, and environmental protection.

2.18.15.1 Built-up land footprint- Ecological Footprint of Consumption (GHA per person) (ef_bul)

Long tag: qog_std_ts_ef_bul

Original tag: ef_bul

Description:
Built-up Land - Ecological Footprint in consumption. The built-up land Footprint is calculated based on the area of land covered by human infrastructure: transportation, housing, and industrial structures. Built-up land may occupy what would previously have been cropland. Measured in Global Hectares (GHA) per person.

Variable citation: Global Footprint Network. (2021). National footprint accounts data set (1961-2017), 2021 edition [c 2021 Global Footprint Network. National Footprint Accounts, 2021 Edition, www.footprintnetwork.org.]. `http://www.footprintnetwork.org`

2.18.15.2 Carbon footprint - Ecological Footprint of Consumption (GHA per person) (ef_carb)

Long tag: qog_std_ts_ef_carb

Original tag: ef_carb

Description:
Carbon - Ecological Footprint in consumption. The carbon Footprint, which represents the carbon dioxide emissions from burning fossil fuels in addition to the embodied carbon in imported goods. The carbon Footprint component is represented by the area of forest land required to sequester these carbon emissions. Currently, the carbon Footprint is the largest portion of humanity's Footprint.

Variable citation: Global Footprint Network. (2021). National footprint accounts data set (1961-2017), 2021 edition [c 2021 Global Footprint Network. National Footprint Accounts, 2021 Edition, www.footprintnetwork.org.]. `http://www.footprintnetwork.org`

2.18.15.3 Cropland footprint - Ecological Footprint of Consumption (GHA per person) (ef_crop)

Long tag: qog_std_ts_ef_crop

Original tag: ef_crop

Description:
Cropland - Ecological Footprint in consumption. Cropland is the most bioproductive of all the land-use types and consists of areas used to produce food and fibre for human consumption, feed for livestock, oil crops, and rubber. The cropland Footprint includes crop products allocated to livestock and aquaculture feed mixes, and those used for fibres and materials. Due to lack of globally consistent data sets, current cropland Footprint calculations do not yet take into account the extent to which farming techniques or unsustainable agricultural practices may cause long-term degradation of soil.

Variable citation: Global Footprint Network. (2021). National footprint accounts data set (1961-2017), 2021 edition [c 2021 Global Footprint Network. National Footprint Accounts, 2021 Edition, www.footprintnetwork.org.]. `http://www.footprintnetwork.org`

2.18.15.4 Total Ecological Footprint of Consumption (GHA per person) (ef_ef)

Long tag: qog_std_ts_ef_ef

Original tag: ef_ef

Description:
Total - Ecological Footprint in consumption. Measured in Global Hectares (GHA) per person.

Variable citation: Global Footprint Network. (2021). National footprint accounts data set (1961-2017), 2021 edition [c 2021 Global Footprint Network. National Footprint Accounts, 2021 Edition, www.footprintnetwork.org.]. `http://www.footprintnetwork.org`

2.18.15.5 Fish footprint - Ecological Footprint of Consumption (GHA per person) (ef_fg)

Long tag: qog_std_ts_ef_fg

Original tag: ef_fg

Description:
Fishing Ground - Ecological Footprint in consumption. The fishing grounds Footprint is calculated based on estimates of the maximum sustainable catch for a variety of fish species. These sustainable catch estimates are converted into an equivalent mass of primary production based on the various species' trophic levels. This estimate of maximum harvestable primary production is then divided amongst the continental shelf areas of the world. Fish caught and used in aquaculture feed mixes are included. Measured in Global Hectares (GHA) per person.

Variable citation: Global Footprint Network. (2021). National footprint accounts data set (1961-2017), 2021 edition [c 2021 Global Footprint Network. National Footprint Accounts, 2021 Edition, www.footprintnetwork.org.]. `http://www.footprintnetwork.org`

2.18.15.6 Forest product footprint - Ecological Footprint of Consumption (GHA per person) (ef_for)

Long tag: qog_std_ts_ef_for

Original tag: ef_for

Description:
Forest Production - Ecological Footprint in consumption. The forest product Footprint, which is calculated based on the amount of lumber, pulp, timber products, and fuel wood consumed by a population on a yearly basis. Measured in Global Hectares (GHA) per person.

Variable citation: Global Footprint Network. (2021). National footprint accounts data set (1961-2017), 2021 edition [c 2021 Global Footprint Network. National Footprint Accounts, 2021 Edition, www.footprintnetwork.org.]. `http://www.footprintnetwork.org`

2.18.15.7 Grazing footprint - Ecological Footprint of Consumption (GHA per person) (ef_gl)

Long tag: qog_std_ts_ef_gl

Original tag: ef_gl

Description:
Grazing - Ecological Footprint in consumption. Grazing land is used to raise livestock for meat, dairy, hide, and wool products. The grazing land Footprint is calculated by comparing the amount of livestock feed available in a country with the amount of feed required for all livestock in that year, with the remainder of feed demand assumed to come from grazing land. Measured in Global Hectares (GHA) per person.

Variable citation: Global Footprint Network. (2021). National footprint accounts data set (1961-2017), 2021 edition [c 2021 Global Footprint Network. National Footprint Accounts, 2021 Edition, www.footprintnetwork.org.]. `http://www.footprintnetwork.org`

2.18.15.8 Employment in Agriculture, Forestry, Fishing, Mining, Quarry (Female) percenttot (eu_sctabf)

Long tag: qog_std_ts_eu_sctabf

Original tag: eu_sctabf

Description:
Employment in Agriculture, Forestry, Fishing, Mining, Quarrying (Female) percent total employment

Variable citation: European Commission. (2021). Eurostat. `http://ec.europa.eu/eurostat/data/database`

2.18.15.25 Expenditure on environment protection, as percent of total gen. gov. exp. (gfs_envr)

Long tag: qog_std_ts_gfs_envr

Original tag: gfs_envr

Description:
Total expenditure on environment protection, as the percentage of general government expenditure.

Variable citation: International Monetary Fund. (2019). Government finance statistics yearbook (gfsy) 2019. `https://data.imf.org/?sk=a0867067-d23c-4ebc-ad23-d3b015045405`

2.18.15.26 The Region of the Country (ht_region)

Long tag: qog_std_ts_ht_region

Original tag: ht_region

Description:
This is a tenfold politico-geographic classification of world regions, based on a mixture of two considerations: geographical proximity (with the partial exception of category 5 below) and demarcation by area specialists having contributed to a regional understanding of democratization. The categories are as follow:
1. Eastern Europe and post Soviet Union (including Central Asia)
2. Latin America (including Cuba, Haiti
the Dominican Republic)
3. North Africa
the Middle East (including Israel, Turkey
Cyprus)
4. Sub-Saharan Africa
5. Western Europe and North America (including Australia
New Zealand)
6. East Asia (including Japan
Mongolia)
7. South-East Asia
8. South Asia
9. The Pacific (excluding Australia
New Zealand)
10. The Caribbean (including Belize, Guyana
Suriname, but excluding Cuba, Haiti
the Dominican Republic)

2.18.15.27 Natural Resource Protection Indicator (nrmi_nrpi)

Long tag: qog_std_ts_nrmi_nrpi

Original tag: nrmi_nrpi

Description:
Natural Resource Protection Indicator assesses whether a country is protecting at least 17percent of all of its biomes (e.g. deserts, forests, grasslands, aquatic, and tundra). It is designed to capture the comprehensiveness of a government's commitment to habitat preservation and biodiversity protection. The World Wildlife Fund provides the underlying biome data, and the United Nations Environment Program World Conservation Monitoring Center provides the underlying data on protected areas.

2.18.15.34 The Ocean Health Index (ohi_ohi)

Long tag: qog_std_ts_ohi_ohi

Original tag: ohi_ohi

Description:
The Ocean Health Index establishes reference points for achieving ten widely accepted socio-ecological objectives, and scores the oceans adjacent to 171 countries and territories on how successfully they deliver these goals. Evaluated globally and by country, these ten public goals represent the wide range of benefits that a healthy ocean can provide; each country's overall score is the average of its respective goal scores. The ten socio-ecological objectives are: Food Provision, Artisanal Fishing Opportunities, Natural Products, Carbon Storage, Coastal Protection, Coastal Livelihoods
Economies, Tourism
Recreation, Sense of Place, Clean Waters, Biodiversity.

2.18.15.38 Agricultural irrigated land (percent of total agricultural land) (wdi_agrland)

Long tag: qog_std_ts_wdi_agrland

Original tag: wdi_agrland

Description:
Agricultural land refers to the share of land area that is arable, under permanent crops, and under permanent pastures. Arable land includes land defined by the FAO as land under temporary crops (double-cropped areas are counted once), temporary meadows for mowing or for pasture, land under market or kitchen gardens, and land temporarily fallow. Land abandoned as a result of shifting cultivation is excluded. Land under permanent crops is land cultivated with crops that occupy the land for long periods and need not be replanted after each harvest, such as cocoa, coffee, and rubber. This category includes land under flowering shrubs, fruit trees, nut trees, and vines, but excludes land under trees grown for wood or timber. Permanent pasture is land used for five or more years for forage, including natural and cultivated crops.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.15.39 Arable land (percent of land area) (wdi_araland)

Long tag: qog_std_ts_wdi_araland

Original tag: wdi_araland

Description:
Arable land includes land defined by the FAO as land under temporary crops (double-cropped areas are counted once), temporary meadows for mowing or for pasture, land under market or kitchen gardens, and land temporarily fallow. Land abandoned as a result of shifting cultivation is excluded.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.15.40 Land area (sq. km) (wdi_area)

Long tag: qog_std_ts_wdi_area

Original tag: wdi_area

Description:
Land area is a country's total area, excluding area under inland water bodies, national claims to continental shelf, and exclusive economic zones. In most cases the definition of inland water bodies includes major rivers and lakes.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.15.41 Land area where elevation is below 5 meters (percent of total land area) (wdi_areabelow)

Long tag: qog_std_ts_wdi_areabelow

Original tag: wdi_areabelow

Description:
Land area below 5m is the percentage of total land where the elevation is 5 meters or less.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.15.42 CO2 emissions (metric tons per capita) (wdi_co2)

Long tag: qog_std_ts_wdi_co2

Original tag: wdi_co2

Description:
Carbon dioxide emissions are those stemming from the burning of fossil fuels and the manufacture of cement. They include carbon dioxide produced during consumption of solid, liquid, and gas fuels and gas flaring.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.15.43 Forest area (percent of land area) (wdi_forest)

Long tag: qog_std_ts_wdi_forest

Original tag: wdi_forest

Description:
Forest area is land under natural or planted stands of trees of at least 5 meters in situ, whether productive or not, and excludes tree stands in agricultural production systems (for example, in fruit plantations and agroforestry systems) and trees in urban parks and gardens.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.15.44 Internally displaced persons, new displacement-disasters (number) (wdi_idpdis)

Long tag: qog_std_ts_wdi_idpdis

Original tag: wdi_idpdis

Description:
Internally displaced persons, new displacement associated with disasters (number of people). Internally displaced persons are defined according to the 1998 Guiding Principles (http://www.internal-displacement.org/publications/1998/ocha-guiding-principles-on-internal-displacement) as people or groups of people who have been forced or obliged to flee or to leave their homes or places of habitual residence, in particular as a result of armed conflict, or to avoid the effects of armed conflict, situations of generalized violence, violations of human rights, or natural or human-made disasters and who have not crossed an international border. "New Displacement" refers to the number of new cases or incidents of displacement recorded, rather than the number of people displaced. This is done because people may have been displaced more than once.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.15.45 CPIA policy and institutions for envir. sustainability (1=low to 6=high) (wdi_piesr)

Long tag: qog_std_ts_wdi_piesr

Original tag: wdi_piesr

Description:
Policy and institutions for environmental sustainability assess the extent to which environmental policies foster the protection and sustainable use of natural resources and the management of pollution.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.15.46 Average precipitation in depth (mm per year) (wdi_precip)

Long tag: qog_std_ts_wdi_precip

Original tag: wdi_precip

Description:
Average precipitation is the long-term average in depth (over space and time) of annual precipitation in the

country. Precipitation is defined as any kind of water that falls from clouds as a liquid or a solid.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.15.47 Cool Water Index (wel_cwi)

Long tag: qog_std_ts_wel_cwi

Original tag: wel_cwi

Description:

Meaning: The indicator measures the prevalence of relatively cool temperatures in each season combined with abundant fresh water resources throughout the year, on a country's historically most populated areas.
Source: Index construction based on geo-climate data from the Harvard Geography Project, as documented in the appendix to Welzel's (2013) Freedom Rising, online at www.cambirdge.org/welzel, pp. 105-112.
Scaling: Scores range from 0 for the hottest and driest countries to 1 for countries combining highly consistent precipitation with cold temperatures.

Variable citation: Welzel, C. (2013). *Freedom rising: Human empowerment and the quest for emancipation (1st ed.)*. Cambridge University Press

2.18.15.48 Confidence: The Environmental Protection Movement (wvs_confenv)

Long tag: qog_std_ts_wvs_confenv

Original tag: wvs_confenv

Description:

I am going to name a number of organizations. For each one, could you tell me how much confidence you have in them: The Environmental Protection Movement

1. None at all
2. Not very much
3. Quite a lot
4. A great deal

2.18.16.27 International migrant stock (percent of population) (wdi_imig)

Long tag: qog_std_ts_wdi_imig

Original tag: wdi_imig

Description:
International migrant stock is the number of people born in a country other than that in which they live. It also includes refugees. The data used to estimate the international migrant stock at a particular time are obtained mainly from population censuses. The estimates are derived from the data on foreign-born population–people who have residence in one country but were born in another country. When data on the foreign-born population are not available, data on foreign population–that is, people who are citizens of a country other than the country in which they reside–are used as estimates. After the breakup of the Soviet Union in 1991 people living in one of the newly independent countries who were born in another were classified as international migrants. Estimates of migrant stock in the newly independent states from 1990 on are based on the 1989 census of the Soviet Union. For countries with information on the international migrant stock for at least two points in time, interpolation or extrapolation was used to estimate the international migrant stock on July 1 of the reference years. For countries with only one observation, estimates for the reference years were derived using rates of change in the migrant stock in the years preceding or following the single observation available. A model was used to estimate migrants for countries that had no data.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.16.28 Net migration (wdi_migration)

Long tag: qog_std_ts_wdi_migration

Original tag: wdi_migration

Description:
Net migration is the net total of migrants during the period, that is, the total number of immigrants less the annual number of emigrants, including both citizens and noncitizens. Data are five-year estimates.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.16.29 Refugee population by country or territory of asylum (wdi_refasy)

Long tag: qog_std_ts_wdi_refasy

Original tag: wdi_refasy

Description:
Refugees are people who are recognized as refugees under the 1951 Convention Relating to the Status of Refugees or its 1967 Protocol, the 1969 Organization of African Unity Convention Governing the Specific Aspects of Refugee Problems in Africa, people recognized as refugees in accordance with the UNHCR statute, people granted refugee-like humanitarian status, and people provided temporary protection. Asylum seekers–people who have applied for asylum or refugee status and who have not yet received a decision or who are registered as asylum seekers–are excluded. Palestinian refugees are people (and their descendants) whose residence was Palestine between June 1946 and May 1948 and who lost their homes and means of livelihood as a result of the 1948 Arab-Israeli conflict. Country of asylum is the country where an asylum claim was filed and granted.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.16.30 Refugee population by country or territory of origin (wdi_refori)

Long tag: qog_std_ts_wdi_refori

Original tag: wdi_refori

Description:
Refugees are people who are recognized as refugees under the 1951 Convention Relating to the Status of

Refugees or its 1967 Protocol, the 1969 Organization of African Unity Convention Governing the Specific Aspects of Refugee Problems in Africa, people recognized as refugees in accordance with the UNHCR statute, people granted refugee-like humanitarian status, and people provided temporary protection. Asylum seekers–people who have applied for asylum or refugee status and who have not yet received a decision or who are registered as asylum seekers–are excluded. Palestinian refugees are people (and their descendants) whose residence was Palestine between June 1946 and May 1948 and who lost their homes and means of livelihood as a result of the 1948 Arab-Israeli conflict. Country of origin generally refers to the nationality or country of citizenship of a claimant.

2.18.17.136 Age dependency ratio (percent of working-age pop.) (wdi_agedr)

Long tag: qog_std_ts_wdi_agedr

Original tag: wdi_agedr

Description:
Age dependency ratio is the ratio of dependents–people younger than 15 or older than 64–to the working-age population–those ages 15-64. Data are shown as the proportion of dependents per 100 working-age population.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.17.137 Employers, total (percent of total employment) (modeled ILO) (wdi_emp)

Long tag: qog_std_ts_wdi_emp

Original tag: wdi_emp

Description:
Employers are those workers who, working on their own account or with one or a few partners, hold the type of jobs defined as a "self-employment jobs" i.e. jobs where the remuneration is directly dependent upon the profits derived from the goods and services produced, and, in this capacity, have engaged, on a continuous

basis, one or more persons to work for them as employee(s). Modeled ILO estimate.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.17.138 Employment in agriculture (percent of total employment) (modeled ILO) (wdi_empagr)

Long tag: qog_std_ts_wdi_empagr

Original tag: wdi_empagr

Description:

Employment in agriculture as a percentage of all employment. Employment is defined as persons of working age who were engaged in any activity to produce goods or provide services for pay or profit, whether at work during the reference period or not at work due to temporary absence from a job, or to working-time arrangement. The agriculture sector consists of activities in agriculture, hunting, forestry and fishing, in accordance with division 1 (ISIC 2) or categories A-B (ISIC 3) or category A (ISIC 4). Modeled ILO estimate.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.17.139 Employment in agriculture, female (percent female employment) (modeled ILO) (wdi_empagrf)

Long tag: qog_std_ts_wdi_empagrf

Original tag: wdi_empagrf

Description:

Female employment in agriculture as a percentage of all female employment. Employment is defined as persons of working age who were engaged in any activity to produce goods or provide services for pay or profit, whether at work during the reference period or not at work due to temporary absence from a job, or to working-time arrangement. The agriculture sector consists of activities in agriculture, hunting, forestry and fishing, in accordance with division 1 (ISIC 2) or categories A-B (ISIC 3) or category A (ISIC 4). Modeled ILO estimate.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.17.140 Employment in agriculture, male (percent male employment) (modeled ILO) (wdi_empagrm)

Long tag: qog_std_ts_wdi_empagrm

Original tag: wdi_empagrm

Description:

Male employment in agriculture as a percentage of all male employment. Employment is defined as persons of working age who were engaged in any activity to produce goods or provide services for pay or profit, whether at work during the reference period or not at work due to temporary absence from a job, or to working-time arrangement. The agriculture sector consists of activities in agriculture, hunting, forestry and fishing, in accordance with division 1 (ISIC 2) or categories A-B (ISIC 3) or category A (ISIC 4). Modeled ILO estimate.

2.18.17.145 Employment in industry (percent of total employment) (modeled ILO) (wdi_empind)

Long tag: qog_std_ts_wdi_empind

Original tag: wdi_empind

Description:

Employment in industry as a percentage of all employment. Employment is defined as persons of working age who were engaged in any activity to produce goods or provide services for pay or profit, whether at work during the reference period or not at work due to temporary absence from a job, or to working-time arrangement. The industry sector consists of mining and quarrying, manufacturing, construction, and public utilities (electricity, gas, and water), in accordance with divisions 2-5 (ISIC 2) or categories C-F (ISIC 3) or categories B-F (ISIC 4). Modeled ILO estimate.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.17.146 Employment in industry, female (percent female employment) (modeled ILO) (wdi_empindf)

Long tag: qog_std_ts_wdi_empindf

Original tag: wdi_empindf

Description:

Female employment in industry as a percentage of all female employment. Employment is defined as persons of working age who were engaged in any activity to produce goods or provide services for pay or profit, whether at work during the reference period or not at work due to temporary absence from a job, or to working-time arrangement. The industry sector consists of mining and quarrying, manufacturing, construction, and public utilities (electricity, gas, and water), in accordance with divisions 2-5 (ISIC 2) or categories C-F (ISIC 3) or categories B-F (ISIC 4). Modeled ILO estimate.

Description:

Labor force participation rate 15-24, total (percent) (national estimate). Labor force participation rate for ages 15-24 is the proportion of the population ages 15-24 that is economically active: all people who supply labor for the production of goods and services during a specified period.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.17.189 Part time employment, total (percent of total employment) (wdi_pte)

Long tag: qog_std_ts_wdi_pte

Original tag: wdi_pte

Description:
Part time employment, total (percent of total employment). Part time employment refers to regular employment in which working time is substantially less than normal. Definitions of part time employment differ by country.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.17.190 Part time employment, female (percent of total female employment) (wdi_ptef)

Long tag: qog_std_ts_wdi_ptef

Original tag: wdi_ptef

Description:
Part time employment, female (percent of total female employment). Part time employment refers to regular employment in which working time is substantially less than normal. Definitions of part time employment differ by country.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.17.191 Part time employment, male (percent of total male employment) (wdi_ptem)

Long tag: qog_std_ts_wdi_ptem

Original tag: wdi_ptem

Description:
Part time employment, male (percent of total male employment). Part time employment refers to regular employment in which working time is substantially less than normal. Definitions of part time employment differ by country.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.17.192 Self-employed, total (percent of total employment) (modeled ILO) (wdi_semp)

Long tag: qog_std_ts_wdi_semp

Original tag: wdi_semp

Description:
Self-employed workers are those workers who, working on their own account or with one or a few partners or in cooperative, hold the type of jobs defined as a "self-employment jobs". i.e. jobs where the remuneration is directly dependent upon the profits derived from the goods and services produced. Self-employed workers include four sub-categories of employers, own-account workers, members of producers' cooperatives, and contributing family workers. Modeled ILO estimate.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.17.193 Self-employed, female (percent of female employment) (modeled ILO) (wdi_sempf)

Long tag: qog_std_ts_wdi_sempf

Original tag: wdi_sempf

Description:
Self-employed female workers are those workers who, working on their own account or with one or a few partners or in cooperative, hold the type of jobs defined as a "self-employment jobs". i.e. jobs where the remuneration is directly dependent upon the profits derived from the goods and services produced. Self-employed workers include four sub-categories of employers, own-account workers, members of producers' cooperatives, and contributing family workers. Modeled ILO estimate.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.17.194 Self-employed, male (percent of male employment) (modeled ILO) (wdi_sempm)

Long tag: qog_std_ts_wdi_sempm

Original tag: wdi_sempm

Description:
Self-employed male workers are those workers who, working on their own account or with one or a few partners or in cooperative, hold the type of jobs defined as a "self-employment jobs". i.e. jobs where the remuneration is directly dependent upon the profits derived from the goods and services produced. Self-employed workers include four sub-categories of employers, own-account workers, members of producers' cooperatives, and contributing family workers. Modeled ILO estimate.

2.18.17.195 Unemployment with advanced education (percent of total labor force) (wdi_unempedua)

Long tag: qog_std_ts_wdi_unempedua

Original tag: wdi_unempedua

Description:
The percentage of the labor force with an advanced level of education who are unemployed. Advanced education comprises short-cycle tertiary education, a bachelor's degree or equivalent education level, a master's degree or equivalent education level, or doctoral degree or equivalent education level according to the International Standard Classification of Education 2011 (ISCED 2011).

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.17.196 Unemployment with advanced education (percent of female labor force) (wdi_unempeduaf)

Long tag: qog_std_ts_wdi_unempeduaf

Original tag: wdi_unempeduaf

Description:
The percentage of the labor force with an advanced level of education who are unemployed. Advanced education comprises short-cycle tertiary education, a bachelor's degree or equivalent education level, a master's degree or equivalent education level, or doctoral degree or equivalent education level according to the International Standard Classification of Education 2011 (ISCED 2011). Female.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.17.197 Unemployment with advanced education (percent of male labor force) (wdi_unempeduam)

Long tag: qog_std_ts_wdi_unempeduam

Original tag: wdi_unempeduam

Description:
The percentage of the labor force with an advanced level of education who are unemployed. Advanced education comprises short-cycle tertiary education, a bachelor's degree or equivalent education level, a master's degree or equivalent education level, or doctoral degree or equivalent education level according to the International Standard Classification of Education 2011 (ISCED 2011). Male.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.17.198 Unemployment with basic education (percent of total labor force) (wdi_unempedub)

Long tag: qog_std_ts_wdi_unempedub

Original tag: wdi_unempedub

Description:
The percentage of the labor force with a basic level of education who are unemployed. Basic education comprises primary education or lower secondary education according to the International Standard Classification of Education 2011 (ISCED 2011).

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.17.199 Unemployment with basic education (percent of female labor force) (wdi_unempedubf)

Long tag: qog_std_ts_wdi_unempedubf

Original tag: wdi_unempedubf

Description:
The percentage of the labor force with a basic level of education who are unemployed. Basic education comprises primary education or lower secondary education according to the International Standard Classification of Education 2011 (ISCED 2011). Female.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.17.200 Unemployment with basic education (percent of male labor force) (wdi_unempedubm)

Long tag: qog_std_ts_wdi_unempedubm

Original tag: wdi_unempedubm

Description:
The percentage of the labor force with a basic level of education who are unemployed. Basic education comprises primary education or lower secondary education according to the International Standard Classification of Education 2011 (ISCED 2011). Male.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.17.201 Unemployment with intermediate education (percent of total labor force) (wdi_unempedui)

Long tag: qog_std_ts_wdi_unempedui

Original tag: wdi_unempedui

Description:
The percentage of the labor force with an intermediate level of education who are unemployed. Intermediate education comprises upper secondary or post-secondary non tertiary education according to the International Standard Classification of Education 2011 (ISCED 2011).

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.17.202 Unemployment with intermediate education (percent of female labor force) (wdi_unempeduif)

Long tag: qog_std_ts_wdi_unempeduif

Original tag: wdi_unempeduif

Description:
The percentage of the labor force with an intermediate level of education who are unemployed. Intermediate education comprises upper secondary or post-secondary non tertiary education according to the International Standard Classification of Education 2011 (ISCED 2011). Female.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.17.203 Unemployment with intermediate education (percent of male labor force) (wdi_unempeduim)

Long tag: qog_std_ts_wdi_unempeduim

Original tag: wdi_unempeduim

Description:
The percentage of the labor force with an intermediate level of education who are unemployed. Intermediate education comprises upper secondary or post-secondary non tertiary education according to the International Standard Classification of Education 2011 (ISCED 2011). Male.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.17.204 Unemployment, female (percent of female labor force) (modeled ILO) (wdi_unempfilo)

Long tag: qog_std_ts_wdi_unempfilo

Original tag: wdi_unempfilo

Description:
Unemployment refers to the share of the labor force that is without work but available for and seeking employment. Female.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.17.205 Unemployment, female (percent of female labor force) (national est.) (wdi_unempfne)

Long tag: qog_std_ts_wdi_unempfne

Original tag: wdi_unempfne

Description:
Unemployment refers to the share of the labor force that is without work but available for and seeking employment. Definitions of labor force and unemployment differ by country. Female.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.17.206 Unemployment, total (percent of total labor force) (modeled ILO) (wdi_unempilo)

Long tag: qog_std_ts_wdi_unempilo

Original tag: wdi_unempilo

Description:
Unemployment refers to the share of the labor force that is without work but available for and seeking employment. Total.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.17.207 Unemployment, male (percent of male labor force) (modeled ILO) (wdi_unempmilo)

Long tag: qog_std_ts_wdi_unempmilo

Original tag: wdi_unempmilo

Description:
Unemployment refers to the share of the labor force that is without work but available for and seeking employment. Male.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.17.208 Unemployment, male (percent of male labor force) (national est.) (wdi_unempmne)

Long tag: qog_std_ts_wdi_unempmne

Original tag: wdi_unempmne

Description:
Unemployment refers to the share of the labor force that is without work but available for and seeking employment. Definitions of labor force and unemployment differ by country. Male.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.17.209 Unemployment, total (percent of total labor force) (national est.) (wdi_unempne)

Long tag: qog_std_ts_wdi_unempne

Original tag: wdi_unempne

Description:
Unemployment refers to the share of the labor force that is without work but available for and seeking employment. Definitions of labor force and unemployment differ by country. Total.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.17.210 Unemployment, youth female (percent of female labor force 15-24) (modeled ILO) (wdi_unempyfilo)

Long tag: qog_std_ts_wdi_unempyfilo

Original tag: wdi_unempyfilo

Description:
Youth unemployment refers to the share of the labor force ages 15-24 without work but available for and

seeking employment.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.17.211 Unemployment, youth female (percent of female labor force 15-24) (nation est.) (wdi_unempyfne)

Long tag: qog_std_ts_wdi_unempyfne

Original tag: wdi_unempyfne

Description:
Youth unemployment refers to the share of the labor force ages 15-24 without work but available for and seeking employment. Definitions of labor force and unemployment differ by country.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.17.212 Unemployment, youth total (percent of total labor force 15-24) (modeled ILO) (wdi_unempyilo)

Long tag: qog_std_ts_wdi_unempyilo

Original tag: wdi_unempyilo

Description:
Youth unemployment refers to the share of the labor force ages 15-24 without work but available for and seeking employment.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.17.213 Unemployment, youth male (percent of male labor force 15-24) (modeled ILO) (wdi_unempymilo)

Long tag: qog_std_ts_wdi_unempymilo

Original tag: wdi_unempymilo

Description:
Youth unemployment refers to the share of the labor force ages 15-24 without work but available for and seeking employment.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.17.214 Unemployment, youth male (percent of male labor force 15-24) (national est.) (wdi_unempymne)

Long tag: qog_std_ts_wdi_unempymne

Original tag: wdi_unempymne

Description:
Youth unemployment refers to the share of the labor force ages 15-24 without work but available for and seeking employment. Definitions of labor force and unemployment differ by country.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.17.215 Unemployment, youth total (percent of total labor force 15-24) (national est.) (wdi_unempyne)

Long tag: qog_std_ts_wdi_unempyne

Original tag: wdi_unempyne

Description:
Youth unemployment refers to the share of the labor force ages 15-24 without work but available for and seeking employment. Definitions of labor force and unemployment differ by country.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.17.216 Confidence: Labour Unions (wvs_conflu)

Long tag: qog_std_ts_wvs_conflu

Original tag: wvs_conflu

Description:
I am going to name a number of organizations. For each one, could you tell me how much confidence you have in them: Labour Unions

1. None at all
2. Not very much
3. Quite a lot
4. A great deal

Description:
Share of public paid employees with union membership

Variable citation: The World Bank. (2021b). Worldwide bureacracy indicators version 2.0. `https://www.worldbank.org/en/topic/migrationremittancesdiasporaissues/brief/migration-remittances-data`

2.18.17.242 Rural residents as a share of private paid employees (wwbi_rrespripemp)

Long tag: qog_std_ts_wwbi_rrespripemp

Original tag: wwbi_rrespripemp

Description:
Rural residents, as a share of private paid employees

Variable citation: The World Bank. (2021b). Worldwide bureacracy indicators version 2.0. `https://www.worldbank.org/en/topic/migrationremittancesdiasporaissues/brief/migration-remittances-data`

2.18.17.243 Rural residents as a share of public paid employees (wwbi_rrespubpemp)

Long tag: qog_std_ts_wwbi_rrespubpemp

Original tag: wwbi_rrespubpemp

Description:
Rural residents, as a share of public paid employees

Variable citation: The World Bank. (2021b). Worldwide bureacracy indicators version 2.0. `https://www.worldbank.org/en/topic/migrationremittancesdiasporaissues/brief/migration-remittances-data`

2.18.18 Energy and Infrastructure

This category includes indicators that cover descriptions of different energy sources (production, con- sumption and trade) and variables related to quality and quantity of different sectors of infrastructure (transportation and communication).

2.18.18.1 Resident population percent not connected to urban and wastewater treatment plants (eu_envnc)

Long tag: qog_std_ts_eu_envnc

Original tag: eu_envnc

Description:
Percentage of resident population not connected to urban and other wastewater treatment plants

Variable citation: European Commission. (2021). Eurostat. `http://ec.europa.eu/eurostat/data/database`

2.18.18.2 Households with broadband access (percent of households with Internet access) (eu_ispchhiacc)

Long tag: qog_std_ts_eu_ispchhiacc

Original tag: eu_ispchhiacc

Description:
Households with broadband access (percent of households with Internet access)

Variable citation: European Commission. (2021). Eurostat. `http://ec.europa.eu/eurostat/data/database`

2.18.18.3 Employment in Electricity, Gas, Steam, Air Con. supply (Female) percent tot (eu_sctdff)

Long tag: qog_std_ts_eu_sctdff

Original tag: eu_sctdff

Description:
Employment in Electricity, Gas, Steam, Air conditioning supply (Female) percent total employment

Variable citation: European Commission. (2021). Eurostat. `http://ec.europa.eu/eurostat/data/database`

2.18.18.4 Employment in Electricity, Gas, Steam, Air Con. supply (Male) percent tot (eu_sctdfm)

Long tag: qog_std_ts_eu_sctdfm

Original tag: eu_sctdfm

Description:
Employment in Electricity, Gas, Steam, Air conditioning supply (Male) percent total employment

Variable citation: European Commission. (2021). Eurostat. `http://ec.europa.eu/eurostat/data/database`

2.18.18.5 Employment in Electricity, Gas, Steam, Air Con. supply (Total) percent tot (eu_sctdft)

Long tag: qog_std_ts_eu_sctdft

Original tag: eu_sctdft

Description:
Employment in Electricity, Gas, Steam, Air conditioning supply (Total) percent total employment

Variable citation: European Commission. (2021). Eurostat. `http://ec.europa.eu/eurostat/data/database`

2.18.18.6 Employment in Land, Water, Air transport, Warehouse Female percent tot employ. (eu_scth52n79f)

Long tag: qog_std_ts_eu_scth52n79f

Original tag: eu_scth52n79f

Description:
Employment in Land, Water, Air transport, Warehouse (Female) percent total employment

Variable citation: European Commission. (2021). Eurostat. `http://ec.europa.eu/eurostat/data/database`

2.18.18.7 Employment in Land, Water, Air transport, Warehouse Male percent tot employ. (eu_scth52n79m)

Long tag: qog_std_ts_eu_scth52n79m

Original tag: eu_scth52n79m

Description:
Employment in Land, Water, Air transport, Warehouse (Male) percent total employment

Variable citation: European Commission. (2021). Eurostat. `http://ec.europa.eu/eurostat/data/database`

2.18.18.8 Employment in Land, Water, Air transport, Warehouse Total percent tot employ. (eu_scth52n79t)

Long tag: qog_std_ts_eu_scth52n79t

Original tag: eu_scth52n79t

Description:
Employment in Land, Water, Air transport, Warehouse (Total) percent total employment

Variable citation: European Commission. (2021). Eurostat. `http://ec.europa.eu/eurostat/data/database`

2.18.18.9 Navigable canals (kilometre) (eu_trcnlkm)

Long tag: qog_std_ts_eu_trcnlkm

Original tag: eu_trcnlkm

Description:
Navigable canals (kilometre)

Variable citation: European Commission. (2021). Eurostat. `http://ec.europa.eu/eurostat/data/database`

2.18.18.10 Maritime transport, freight loaded and unloaded (1000's tonnes) (eu_trfrldnld)

Long tag: qog_std_ts_eu_trfrldnld

Original tag: eu_trfrldnld

Description:
Maritime transport, freight loaded and unloaded (1000's tonnes)

Variable citation: European Commission. (2021). Eurostat. `http://ec.europa.eu/eurostat/data/database`

2.18.18.11 Air transport, freight and mail loaded and unloaded (tonnes) (eu_trldnld)

Long tag: qog_std_ts_eu_trldnld

Original tag: eu_trldnld

Description:
Air transport, freight and mail loaded and unloaded (tonnes)

Variable citation: European Commission. (2021). Eurostat. http://ec.europa.eu/eurostat/data/database

2.18.18.12 Motorways (kilometre) (eu_trmwaykm)

Long tag: qog_std_ts_eu_trmwaykm

Original tag: eu_trmwaykm

Description:
Motorways (kilometre)

Variable citation: European Commission. (2021). Eurostat. http://ec.europa.eu/eurostat/data/database

2.18.18.13 Other roads (kilometre) (eu_trrdothkm)

Long tag: qog_std_ts_eu_trrdothkm

Original tag: eu_trrdothkm

Description:
Other roads (kilometre)

Variable citation: European Commission. (2021). Eurostat. http://ec.europa.eu/eurostat/data/database

2.18.18.14 Navigable rivers (kilometre) (eu_trrivkm)

Long tag: qog_std_ts_eu_trrivkm

Original tag: eu_trrivkm

Description:
Navigable rivers (kilometre)

Variable citation: European Commission. (2021). Eurostat. http://ec.europa.eu/eurostat/data/database

2.18.18.15 Electrified railway lines (kilometre) (eu_trrlelckm)

Long tag: qog_std_ts_eu_trrlelckm

Original tag: eu_trrlelckm

Description:
Electrified railway lines (kilometre)

Variable citation: European Commission. (2021). Eurostat. http://ec.europa.eu/eurostat/data/database

2.18.18.16 Total railway lines (kilometre) (eu_trrlkm)

Long tag: qog_std_ts_eu_trrlkm

Original tag: eu_trrlkm

Description:
Total railway lines (kilometre)

Variable citation: European Commission. (2021). Eurostat. http://ec.europa.eu/eurostat/data/database

2.18.18.17 Railway lines with double and more tracks (kilometre) (eu_trrltge2km)

Long tag: qog_std_ts_eu_trrltge2km

Original tag: eu_trrltge2km

Description:
Railway lines with double and more tracks (kilometre)

Variable citation: European Commission. (2021). Eurostat. http://ec.europa.eu/eurostat/data/database

2.18.18.18 Paid Bribe: Utilities (gcb_butil)

Long tag: qog_std_ts_gcb_butil

Original tag: gcb_butil

Description:
In the past 12 months have you or anyone living in your household paid a bribe in any form to each of the following institutions/organizations? Utilities. Share of population answering Yes.

Variable citation: Transparency International (2017). Global corruption barometer 9th edition. https://www.transparency.org/research/gcb

2.18.18.19 Corruption Perception: Utilities (gcb_putil)

Long tag: qog_std_ts_gcb_putil

Original tag: gcb_putil

Description:
To what extent do you perceive the following categories in this country to be affected by corruption? Utilities. 1 (Not at all corrupt) - 5 (Extremely corrupt).

Variable citation: Transparency International (2017). Global corruption barometer 9th edition. `https://www.transparency.org/research/gcb`

2.18.18.20 Infrastructure (iiag_inf)

Long tag: qog_std_ts_iiag_inf

Original tag: iiag_inf

Description:
Infrastructure is one of the four sub-categories that are used to calculate the Foundations for Economic Opportunity category score. It consists of four indicators from four data sources.

Variable citation: Mo Ibrahim Foundation. (2020). The Ibrahim Index of African Governance. `http://mo.ibrahim.foundation/iiag/`

2.18.18.21 Real value added: industry including energy (oecd_evova_t1b)

Long tag: qog_std_ts_oecd_evova_t1b

Original tag: oecd_evova_t1b

Description:
Real value added in industry including energy.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. `https://doi.org/10.1787/20752288`

2.18.18.22 Crude oil import prices (oecd_oilprices_t1)

Long tag: qog_std_ts_oecd_oilprices_t1

Original tag: oecd_oilprices_t1

Description:
Crude oil import prices.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. `https://doi.org/10.1787/20752288`

2.18.18.23 Production of crude oil (oecd_oilprod_t1)

Long tag: qog_std_ts_oecd_oilprod_t1

Original tag: oecd_oilprod_t1

Description:
Production of crude oil.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. `https://doi.org/10.1787/20752288`

2.18.18.24 Contribution of renewables to energy supply (oecd_rnewable_t1)

Long tag: qog_std_ts_oecd_rnewable_t1

Original tag: oecd_rnewable_t1

Description:
Contribution of renewables to energy supply.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. `https://doi.org/10.1787/20752288`

2.18.18.25 Re-exported intermediates: Transport storage, post telecom. (oecd_tiva_inter_t1i)

Long tag: qog_std_ts_oecd_tiva_inter_t1i

Original tag: oecd_tiva_inter_t1i

Description:
Re-exported intermediates: transport and storage, post and telecommunication.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. https://doi.org/10.1787/20752288

2.18.18.26 Total primary energy supply per unit of GDP (oecd_tpes_t1)

Long tag: qog_std_ts_oecd_tpes_t1

Original tag: oecd_tpes_t1

Description:
Total primary energy supply per unit of GDP.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. https://doi.org/10.1787/20752288

2.18.18.27 Inland goods transport (oecd_transpgood_t1)

Long tag: qog_std_ts_oecd_transpgood_t1

Original tag: oecd_transpgood_t1

Description:
Inland goods transport.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. https://doi.org/10.1787/20752288

2.18.18.28 Inland passenger transport (oecd_transppasseng_t1)

Long tag: qog_std_ts_oecd_transppasseng_t1

Original tag: oecd_transppasseng_t1

Description:
Inland passenger transport.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. https://doi.org/10.1787/20752288

2.18.18.29 Generation intensities of municipal waste (oecd_waste_t1a)

Long tag: qog_std_ts_oecd_waste_t1a

Original tag: oecd_waste_t1a

Description:
Generation intensities of municipal waste.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. https://doi.org/10.1787/20752288

2.18.18.30 Water abstractions per capita (oecd_water_t1a)

Long tag: qog_std_ts_oecd_water_t1a

Original tag: oecd_water_t1a

Description:
Water abstractions per capita.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. https://doi.org/10.1787/20752288

2.18.18.31 Total abstractions of water (oecd_water_t1b)

Long tag: qog_std_ts_oecd_water_t1b

Original tag: oecd_water_t1b

Description:
Total abstractions of water.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. https://doi.org/10.1787/20752288

2.18.18.32 Electricity generation (oecd_welecgen_t1)

Long tag: qog_std_ts_oecd_welecgen_t1

Original tag: oecd_welecgen_t1

Description:
Electricity generation.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. https://doi.org/10.1787/20752288

2.18.18.33 Total primary energy supply (oecd_wenergys_t1)

Long tag: qog_std_ts_oecd_wenergys_t1

Original tag: oecd_wenergys_t1

Description:
Total primary energy supply.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. https://doi.org/10.1787/20752288

2.18.18.34 Gas exports, billion cubic feet per year (ross_gas_exp)

Long tag: qog_std_ts_ross_gas_exp

Original tag: ross_gas_exp

Description:
Gas exports, billion cubic feet per year.

Variable citation: Ross, M., & Mahdavi, P. (2015). Oil and gas data, 1932-2014. https://doi.org/10.7910/DVN/ZTPW0Y

2.18.18.35 Net gas exports value, constant 2000 dollar (ross_gas_netexp)

Long tag: qog_std_ts_ross_gas_netexp

Original tag: ross_gas_netexp

Description:
Net gas exports value, constant 2000 dollar.

Variable citation: Ross, M., & Mahdavi, P. (2015). Oil and gas data, 1932-2014. https://doi.org/10.7910/DVN/ZTPW0Y

2.18.18.36 Net gas exports value per capita, constant 2000 dollar (ross_gas_netexpc)

Long tag: qog_std_ts_ross_gas_netexpc

Original tag: ross_gas_netexpc

Description:
Net gas exports value per capita, constant.

Variable citation: Ross, M., & Mahdavi, P. (2015). Oil and gas data, 1932-2014. https://doi.org/10.7910/DVN/ZTPW0Y

2.18.18.37 Constant price of gas in 2000 dollar/mboe (ross_gas_price)

Long tag: qog_std_ts_ross_gas_price

Original tag: ross_gas_price

Description:
Constant price of gas in 2000 dollar/mboe.

Variable citation: Ross, M., & Mahdavi, P. (2015). Oil and gas data, 1932-2014. https://doi.org/10.7910/DVN/ZTPW0Y

2.18.18.38 Gas production, million barrels oil equiv. (ross_gas_prod)

Long tag: qog_std_ts_ross_gas_prod

Original tag: ross_gas_prod

Description:
Gas production, million barrels oil equiv.

Variable citation: Ross, M., & Mahdavi, P. (2015). Oil and gas data, 1932-2014. https://doi.org/10.7910/DVN/ZTPW0Y

2.18.18.39 Gas production value in 2000 dollars (ross_gas_value_2000)

Long tag: qog_std_ts_ross_gas_value_2000

Original tag: ross_gas_value_2000

Description:
Gas production value in 2000 dollars.

Variable citation: Ross, M., & Mahdavi, P. (2015). Oil and gas data, 1932-2014. https://doi.org/10.7910/DVN/ZTPW0Y

2.18.18.40 Gas production value in 2014 dollars (ross_gas_value_2014)

Long tag: qog_std_ts_ross_gas_value_2014

Original tag: ross_gas_value_2014

Description:
Gas production value in 2014 dollars.

Variable citation: Ross, M., & Mahdavi, P. (2015). Oil and gas data, 1932-2014. https://doi.org/10.7910/DVN/ZTPW0Y

2.18.18.41 Oil exports, thousands of barrels per day (ross_oil_exp)

Long tag: qog_std_ts_ross_oil_exp

Original tag: ross_oil_exp

Description:
Oil exports, thousands of barrel per day.

Variable citation: Ross, M., & Mahdavi, P. (2015). Oil and gas data, 1932-2014. https://doi.org/10.7910/DVN/ZTPW0Y

2.18.18.42 Net oil exports value, constant 2000 dollar (ross_oil_netexp)

Long tag: qog_std_ts_ross_oil_netexp

Original tag: ross_oil_netexp

Description:
Net oil exports value, constant 2000 dollar.

Variable citation: Ross, M., & Mahdavi, P. (2015). Oil and gas data, 1932-2014. https://doi.org/10.7910/DVN/ZTPW0Y

2.18.18.43 Net oil exports value per capita, constant 2000 dollar (ross_oil_netexpc)

Long tag: qog_std_ts_ross_oil_netexpc

Original tag: ross_oil_netexpc

Description:
Net oil exports value per capita, constant.

Variable citation: Ross, M., & Mahdavi, P. (2015). Oil and gas data, 1932-2014. https://doi.org/10.7910/DVN/ZTPW0Y

2.18.18.44 Constant price of oil in 2000 dollar/brl (ross_oil_price)

Long tag: qog_std_ts_ross_oil_price

Original tag: ross_oil_price

Description:
Constant price of oil in 2000 dollar/brl.

Variable citation: Ross, M., & Mahdavi, P. (2015). Oil and gas data, 1932-2014. https://doi.org/10.7910/DVN/ZTPW0Y

2.18.18.45 Oil production in metric tons (ross_oil_prod)

Long tag: qog_std_ts_ross_oil_prod

Original tag: ross_oil_prod

Description:
Oil production in metric tons.

Variable citation: Ross, M., & Mahdavi, P. (2015). Oil and gas data, 1932-2014. https://doi.org/10.7910/DVN/ZTPW0Y

2.18.18.46 Oil production value in 2000 dollars (ross_oil_value_2000)

Long tag: qog_std_ts_ross_oil_value_2000

Original tag: ross_oil_value_2000

Description:
Oil production value in 2000 dollars.

Variable citation: Ross, M., & Mahdavi, P. (2015). Oil and gas data, 1932-2014. `https://doi.org/10.7910/DVN/ZTPW0Y`

2.18.18.47 Oil production value in 2014 dollars (ross_oil_value_2014)

Long tag: qog_std_ts_ross_oil_value_2014

Original tag: ross_oil_value_2014

Description:
Oil production value in 2014 dollars.

Variable citation: Ross, M., & Mahdavi, P. (2015). Oil and gas data, 1932-2014. `https://doi.org/10.7910/DVN/ZTPW0Y`

2.18.18.48 Access to electricity (percent of population) (wdi_acel)

Long tag: qog_std_ts_wdi_acel

Original tag: wdi_acel

Description:
Access to electricity is the percentage of population with access to electricity. Electrification data are collected from industry, national surveys and international sources.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.18.49 Access to electricity, rural (percent of rural population) (wdi_acelr)

Long tag: qog_std_ts_wdi_acelr

Original tag: wdi_acelr

Description:
Access to electricity, rural is the percentage of rural population with access to electricity.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.18.50 Access to electricity, urban (percent of urban population) (wdi_acelu)

Long tag: qog_std_ts_wdi_acelu

Original tag: wdi_acelu

Description:
Access to electricity, urban is the percentage of urban population with access to electricity.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.18.51 Alternative and nuclear energy (percent of total energy use) (wdi_ane)

Long tag: qog_std_ts_wdi_ane

Original tag: wdi_ane

Description:
Clean energy is noncarbohydrate energy that does not produce carbon dioxide when generated. It includes hydropower and nuclear, geothermal, and solar power, among others.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.18.52 Fixed broadband subscriptions (per 100 people) (wdi_broadb)

Long tag: qog_std_ts_wdi_broadb

Original tag: wdi_broadb

Description:
Fixed broadband subscriptions refers to fixed subscriptions to high-speed access to the public Internet (a TCP/IP connection), at downstream speeds equal to, or greater than, 256 kbit/s. This includes cable modem, DSL, fiber-to-the-home/building, other fixed (wired)-broadband subscriptions, satellite broadband and terrestrial fixed wireless broadband. This total is measured irrespective of the method of payment. It excludes subscriptions that have access to data communications (including the Internet) via mobile-cellular networks. It should include fixed WiMAX and any other fixed wireless technologies. It includes both residential subscriptions and subscriptions for organizations.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.18.53 Renewable electricity output (percent of total electricity output) (wdi_elerenew)

Long tag: qog_std_ts_wdi_elerenew

Original tag: wdi_elerenew

Description:

Renewable electricity is the share of electrity generated by renewable power plants in total electricity generated by all types of plants.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.18.54 Electricity production from coal sources (percent of total) (wdi_elprodcoal)

Long tag: qog_std_ts_wdi_elprodcoal

Original tag: wdi_elprodcoal

Description:

Sources of electricity refer to the inputs used to generate electricity. Coal refers to all coal and brown coal, both primary (including hard coal and lignite-brown coal) and derived fuels (including patent fuel, coke oven coke, gas coke, coke oven gas, and blast furnace gas). Peat is also included in this category.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.18.55 Electricity production from natural gas sources (percent of total) (wdi_elprodgas)

Long tag: qog_std_ts_wdi_elprodgas

Original tag: wdi_elprodgas

Description:

Sources of electricity refer to the inputs used to generate electricity. Gas refers to natural gas but excludes natural gas liquids.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.18.56 Electricity production from hydroelectric sources (percent of total) (wdi_elprodhyd)

Long tag: qog_std_ts_wdi_elprodhyd

Original tag: wdi_elprodhyd

Description:

Sources of electricity refer to the inputs used to generate electricity. Hydropower refers to electricity produced by hydroelectric power plants.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.18.57 Electricity production from nuclear sources (percent of total) (wdi_elprodnuc)

Long tag: qog_std_ts_wdi_elprodnuc

Original tag: wdi_elprodnuc

Description:

Sources of electricity refer to the inputs used to generate electricity. Nuclear power refers to electricity produced by nuclear power plants.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.18.58 Electricity production from oil sources (percent of total) (wdi_elprodoil)

Long tag: qog_std_ts_wdi_elprodoil

Original tag: wdi_elprodoil

Description:

Sources of electricity refer to the inputs used to generate electricity. Oil refers to crude oil and petroleum

products.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.18.59 Energy imports, net (percent of energy use) (wdi_eneimp)

Long tag: qog_std_ts_wdi_eneimp

Original tag: wdi_eneimp

Description:

Net energy imports are estimated as energy use less production, both measured in oil equivalents. A negative value indicates that the country is a net exporter. Energy use refers to use of primary energy before transformation to other end-use fuels, which is equal to indigenous production plus imports and stock changes, minus exports and fuels supplied to ships and aircraft engaged in international transport.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.18.60 Renewable energy consumption (percent of total final energy consumption) (wdi_enerenew)

Long tag: qog_std_ts_wdi_enerenew

Original tag: wdi_enerenew

Description:

Renewable energy consumption is the share of renewables energy in total final energy consumption.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.18.61 Energy use (kg of oil equivalent per capita) (wdi_eneuse)

Long tag: qog_std_ts_wdi_eneuse

Original tag: wdi_eneuse

Description:

Energy use refers to use of primary energy before transformation to other end-use fuels, which is equal to indigenous production plus imports and stock changes, minus exports and fuels supplied to ships and aircraft engaged in international transport.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.18.62 Fossil fuel energy consumption (percent of total) (wdi_fossil)

Long tag: qog_std_ts_wdi_fossil

Original tag: wdi_fossil

Description:

Fossil fuel comprises coal, oil, petroleum, and natural gas products.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.18.63 Individuals using the Internet (percent of population) (wdi_internet)

Long tag: qog_std_ts_wdi_internet

Original tag: wdi_internet

Description:

Internet users are individuals who have used the Internet (from any location) in the last 3 months. The Internet can be used via a computer, mobile phone, personal digital assistant, games machine, digital TV etc.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.18.64 Mobile cellular subscriptions (per 100 people) (wdi_mobile)

Long tag: qog_std_ts_wdi_mobile

Original tag: wdi_mobile

Description:

Mobile cellular telephone subscriptions are subscriptions to a public mobile telephone service that provide access to the PSTN using cellular technology. The indicator includes (and is split into) the number of postpaid subscriptions, and the number of active prepaid accounts (i.e. that have been used during the last

three months). The indicator applies to all mobile cellular subscriptions that offer voice communications. It excludes subscriptions via data cards or USB modems, subscriptions to public mobile data services, private trunked mobile radio, telepoint, radio paging and telemetry services.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.18.65 Oil rents (percent of GDP) (wdi_oilrent)

Long tag: qog_std_ts_wdi_oilrent

Original tag: wdi_oilrent

Description:

Oil rents are the difference between the value of crude oil production at world prices and total costs of production.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.18.66 Electric power consumption (kWh per capita) (wdi_powcon)

Long tag: qog_std_ts_wdi_powcon

Original tag: wdi_powcon

Description:

Electric power consumption measures the production of power plants and combined heat and power plants less transmission, distribution, and transformation losses and own use by heat and power plants.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.18.67 Fixed telephone subscriptions (per 100 people) (wdi_tele)

Long tag: qog_std_ts_wdi_tele

Original tag: wdi_tele

Description:

Fixed telephone subscriptions refers to the sum of active number of analogue fixed telephone lines, voice-over-IP (VoIP) subscriptions, fixed wireless local loop (WLL) subscriptions, ISDN voice-channel equivalents and fixed public payphones.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.18.68 Electricity. 0-100 (best) (wef_elec)

Long tag: qog_std_ts_wef_elec

Original tag: wef_elec

Description:

Electricity. 0-100 (best). This indicator is calculated by the World Economic Forum by aggregating two indicators that measure the electrification rate and electric power transmission and distribution losses. For more information, write to gcp@weforum.org.

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. `http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf`

2.18.18.69 Transport infrastructure. 0-100 (best) (wef_qoi)

Long tag: qog_std_ts_wef_qoi

Original tag: wef_qoi

Description:

Transport infrastructure. 0-100 (best). This indicator is calculated by the World Economic Forum by aggregating eight indicators that measure roads, railroads, air transport and water transport infrastructure. For more information, write to gcp@weforum.org. Original sources: World Economic Forum, Global Competitiveness Report 2018

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. `http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf`

2.18.18.70 Water. 0-100 (best) (wef_wi)

Long tag: qog_std_ts_wef_wi

Original tag: wef_wi

Description:
Water infrastructure. 0-100 (best). Original sources: World Economic Forum, Global Competitiveness Report 2018

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. `http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf`

2.18.19 Private Economy

This category includes variables characterizing the private sector in a country, inter alia: regulation of the private sector, indicators concerning economic characteristics of groups in the society, such as poverty and household consumption, as well as tax rates.

2.18.19.1 Severe material deprivation rate (Female) (eu_povmatdeprf)

Long tag: qog_std_ts_eu_povmatdeprf

Original tag: eu_povmatdeprf

Description:
Severe material deprivation rate (Female)

Variable citation: European Commission. (2021). Eurostat. `http://ec.europa.eu/eurostat/data/database`

2.18.19.2 Severe material deprivation rate (Male) (eu_povmatdeprm)

Long tag: qog_std_ts_eu_povmatdeprm

Original tag: eu_povmatdeprm

Description:
Severe material deprivation rate (Male)

Variable citation: European Commission. (2021). Eurostat. `http://ec.europa.eu/eurostat/data/database`

2.18.19.3 Patent applications to the EPO, Per million inhabitants (eu_sctrtotpmin)

Long tag: qog_std_ts_eu_sctrtotpmin

Original tag: eu_sctrtotpmin

Description:
Patent applications to the EPO, Per million inhabitants

Variable citation: European Commission. (2021). Eurostat. `http://ec.europa.eu/eurostat/data/database`

2.18.19.4 Patent applications to the EPO, number (eu_scttotn)

Long tag: qog_std_ts_eu_scttotn

Original tag: eu_scttotn

Description:
Patent applications to the EPO, number

Variable citation: European Commission. (2021). Eurostat. `http://ec.europa.eu/eurostat/data/database`

2.18.19.5 Freedom to Trade Internationally (current) (fi_ftradeint)

Long tag: qog_std_ts_fi_ftradeint

Original tag: fi_ftradeint

Description:
The index ranges from 0-10 where 0 corresponds to "increasing tax rate on international trade", "slow import or export process", "small trade sectors relative to the population and geographic size", "exchange rate controls are present and a black-market exists", and "restrictions on the freedom of citizens to engage in capital market exchange with foreigners" and 10 corresponds to "no specific taxes on international trade", "swift import or export process", "large trade sectors relative to the population and geographic size", "no black-market exchange rate", and "no restrictions on the freedom of citizens to engage in capital market exchange with foreigners". The index consists of the following indicators: Taxes on international trade, Regulatory trade barriers, Actual size of trade sector compared to expected size, Difference between official exchange rate and black market rate, and International capital market controls.

Variable citation: Gwartney, J., Lawson, R., Hall, J., Murphy, R., Callais, J. T., Fike, R., Geloso, V., Kahli, N. S., McMahon, F., & van Staden, M. (2021). 2.18.19.7 Economic Freedom of the World Index (current) (fi_index)

Long tag: qog_std_ts_fi_index

Original tag: fi_index

Description:

The index is founded upon objective components that reflect the presence (or absence) of economic freedom. The index comprises 21 components designed to identify the consistency of institutional arrangements and policies with economic freedom in five major areas: size of government (fi_sog), legal structure and security of property rights (fi_legprop), access to sound money (fi_sm), freedom to trade internationally (fi_ftradeint), regulation of credit, labor and business (fi_reg). The index ranges from 0-10 where 0 corresponds to "less economic freedom" and 10 to "more economic freedom". This is the version of the index published at the current year of measurement, without taking methodological changes over time into account.

Variable citation: Gwartney, J., Lawson, R., Hall, J., Murphy, R., Callais, J. T., Fike, R., Geloso, V., Kahli, N. S., McMahon, F., & van Staden, M. (2021). Economic Freedom Dataset 2021, published in Economic Freedom of the World: 2021. *Fraser Institute*. `https://www.fraserinstitute.org/economicfreedom/dataset`

2.18.19.8 Regulation of Credit, Labor and Business (current) (fi_reg)

Long tag: qog_std_ts_fi_reg

Original tag: fi_reg

Description:

The index ranges from 0-10 where 0 corresponds to "low percentage of deposits held in privately owned banks", "high foreign bank license denial rate", "private sector's share of credit is close to the base-year-minimum", "deposit and lending rates is fixed by the government and real rates is persistently negative", "high impact of minimum wage", "widespread use of price controls throughout various sectors of the economy", and "starting a new business is generally complicated" and 10 corresponds to "high percentage of deposits held in privately owned banks", "low foreign bank license denial rate", "private sector's share of credit is close to the base-year-maximum", "interest rates is determined primarily by market forces and the real rates is positive", "low impact of minimum wage", "no price controls or marketing boards", and "starting a new business is generally easy". The index consists of the following indicators: Credit Market Regulations, Labor Market Regulations, Business Regulations.

Variable citation: Gwartney, J., Lawson, R., Hall, J., Murphy, R., Callais, J. T., Fike, R., Geloso, V., Kahli, N. S., McMahon, F., & van Staden, M. (2021). Economic Freedom Dataset 2021, published in Economic Freedom of the World: 2021. *Fraser Institute*. `https://www.fraserinstitute.org/economicfreedom/dataset`

2.18.19.10 Access to Sound Money (current) (fi_sm)

Long tag: qog_std_ts_fi_sm

Original tag: fi_sm

Description:

The index ranges from 0-10 where 0 corresponds to "high annual money growth", "high variation in the annual rate of inflation", "high inflation rate", and "restricted foreign currency bank accounts" and 10 corresponds to "low annual money growth", "low or no variation in the annual rate of inflation", "low inflation rate", and "foreign currency bank accounts are permissible without restrictions". The index consists of the following indicators: Average annual growth of the money supply in the last five years minus average annual growth of real GDP in the last ten years, Standard inflation variability in the last five years, Recent inflation rate, Freedom to own foreign currency bank accounts domestically and abroad.

Variable citation: Gwartney, J., Lawson, R., Hall, J., Murphy, R., Callais, J. T., Fike, R., Geloso, V., Kahli, N. S., McMahon, F., & van Staden, M. (2021). Economic Freedom Dataset 2021, published in Economic Freedom of the World: 2021. *Fraser Institute*. `https://www.fraserinstitute.org/economicfreedom/dataset`

2.18.19.11 Access to Sound Money (chain_linked) (fi_sm_pd)

Long tag: qog_std_ts_fi_sm_pd

Original tag: fi_sm_pd

Description:

The index ranges from 0-10 where 0 corresponds to "high annual money growth", "high variation in the annual rate of inflation", "high inflation rate", and "restricted foreign currency bank accounts" and 10 corresponds to "low annual money growth", "low or no variation in the annual rate of inflation", "low inflation rate", and "foreign currency bank accounts are permissible without restrictions". The index consists of the following indicators: Average annual growth of the money supply in the last five years minus average annual growth of real GDP in the last ten years, Standard inflation variability in the last five years, Recent inflation rate, Freedom to own foreign currency bank accounts domestically and abroad. Panel-data adjusted.

2.18.19.12 Global Gender Gap Economic Participation and Opportunity Subindex (gggi_pos)

Long tag: qog_std_ts_gggi_pos

Original tag: gggi_pos

Description:

Economic Participation and Opportunity (0 to 1, where 1 indicates no gap). This subindex contains three concepts: the participation gap, the remuneration gap and the advancement gap. The participation gap is captured using the difference between women and men in labour force participation rates. The remuneration gap is captured through a hard data indicator (ratio of estimated female-to-male earned income) and a qualitative indicator gathered through the World Economic Forum's annual Executive Opinion Survey (wage equality for similar work). Finally, the gap between the advancement of women and men is captured through two hard data statistics (the ratio of women to men among legislators, senior officials and managers, and the ratio of women to men among technical and professional workers).

Variable citation: World Economic Forum. (2021). The global gender gap report 2021 [All Rights Reserved]. `https://www.weforum.org/reports/ab6795a1-960c-42b2-b3d5-587eccda6023`

2.18.19.13 Business Environment (iiag_be)

Long tag: qog_std_ts_iiag_be

Original tag: iiag_be

Description:

Business Environment is one of the four sub-categories that are used to calculate the Foundations for Economic Opportunity category score. It consists of five indicators from five data sources.

2.18.19.53 New business density (new registrations per 1,000 people ages 15-64) (wdi_busden)

Long tag: qog_std_ts_wdi_busden

Original tag: wdi_busden

Description:
New businesses registered are the number of new limited liability corporations registered in the calendar year.

Variable citation: World Bank. (2021). World development indicators. https://databank.worldbank.org/source/world-development-indicators

2.18.19.54 Poverty gap at USD 1.90 a day (2011 PPP) (percent) (wdi_povgap190)

Long tag: qog_std_ts_wdi_povgap190

Original tag: wdi_povgap190

Description:
Poverty gap at 1.90 dollars a day (2011 PPP) is the mean shortfall in income or consumption from the poverty line 1.90 dollars a day (counting the nonpoor as having zero shortfall), expressed as a percentage of the poverty line. This measure reflects the depth of poverty as well as its incidence. As a result of revisions in PPP exchange rates, poverty rates for individual countries cannot be compared with poverty rates reported in earlier editions. Note: five countries – Bangladesh, Cabo Verde, Cambodia, Jordan, and Lao PDR – use the 2005 PPP conversion factors and corresponding 1.25 dollars a day and 2 dollars a day poverty lines. This is due to the large deviations in the rate of change in PPP factors relative to the rate of change in domestic consumer price indexes. See Box 1.1 in the Global Monitoring Report 2015/2016

(http://www.worldbank.org/en/publication/global-monitoring-report) for a detailed explanation.

2.18.19.55 Women Business and the Law Index Score (scale 1-100) (wdi_wombuslawi)

Long tag: qog_std_ts_wdi_wombuslawi

Original tag: wdi_wombuslawi

Description:

Women Business and the Law Index Score (1-100) measures how laws and regulations affect women's economic opportunity. Overall scores are calculated by taking the average score of each of the eight areas (Going Places, Starting a Job, Getting Paid, Getting Married, Having Children, Running a Business, Managing Assets and Getting a Pension), with 100 representing the highest possible score.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.18.19.56 Innovation capability. 0-100 (best) (wef_ci)

Long tag: qog_std_ts_wef_ci

Original tag: wef_ci

Description:

2.18.20 Gender Equality

This category includes variables related to the differences of access and opportunities between women and men by country, such as access to education, overall employment and employment by specific sectors, and indexes that shine a light on the general differences in treatment between men and women.

2.18.20.1 Gender Inequality Index (0 to 1 higher disparity) (gii_gii)

Long tag: qog_std_ts_gii_gii

Original tag: gii_gii

Description:

The GII is an inequality index. It measures gender inequalities in three important aspects of human development-reproductive health, measured by maternal mortality ratio and adolescent birth rates; empowerment, measured by proportion of parliamentary seats occupied by females and proportion of adult females and males aged 25 years and older with at least some secondary education; and economic status, expressed as labour market participation and measured by labour force participation rate of female and male populations aged 15 years and older. The GII is built on the same framework as the IHDI-to better expose differences in the distribution of achievements between women and men. It measures the human development costs of gender inequality. Thus the higher the GII value the more disparities between females and males and the more loss to human development.
