Regional gross domestic product (GDP) by NUTS 2 regions in Million euro. GDP is an indicator of the output of a country or a region. It reflects the total value of all goods and services produced less the value of goods and services used for intermediate consumption in their production. Expressing GDP in PPS (purchasing power standards) eliminates differences in price levels between countries. Calculations on a per inhabitant basis allow for the comparison of economies and regions significantly different in absolute size. GDP per inhabitant in PPS is the key variable for determining the eligibility of NUTS 2 regions in the framework of the European Union's structural policy.

2.9.11.23 Regional gross domestic product (million PPS) by NUTS 2 regions (eu_gdp_mio_pps_nuts2)

Long tag: qog_eureg_wide2_eu_gdp_mio_pps_nuts2

Original tag: eu_gdp_mio_pps_nuts2

Description:

Regional gross domestic product (GDP) by NUTS 2 regions in Million PPS (purchasing power standards). GDP is an indicator of the output of a country or a region. It reflects the total value of all goods and services produced less the value of goods and services used for intermediate consumption in their production. Expressing GDP in PPS eliminates differences in price levels between countries. Calculations on a per inhabitant basis allow for the comparison of economies and regions significantly different in absolute size. GDP per inhabitant in PPS is the key variable for determining the eligibility of NUTS 2 regions in the framework of the European Union's structural policy.

2.9.11.24 Regional gross domestic product (PPS per inhabitant) by NUTS 2 regions (eu_gdp_pps_hab_nuts2)

Long tag: qog_eureg_wide2_eu_gdp_pps_hab_nuts2

Original tag: eu_gdp_pps_hab_nuts2

Description:

Regional gross domestic product (GDP) by NUTS 2 regions in PPS (purchasing power standards) per inhabitant. GDP is an indicator of the output of a country or a region. It reflects the total value of all goods and services produced less the value of goods and services used for intermediate consumption in their production. Expressing GDP in PPS eliminates differences in price levels between countries. Calculations on a per inhabitant basis allow for the comparison of economies and regions significantly different in absolute size. GDP per inhabitant in PPS is the key variable for determining the eligibility of NUTS 2 regions in the framework of the European Union's structural policy.

2.9.11.25 Regional gross domestic product. PPS per inhabitant in percentage of EU27 (eu_gdp_pps_hab_eu27_2020_nuts2)

Long tag: qog_eureg_wide2_eu_gdp_pps_hab_eu27_2020_nuts2

Original tag: eu_gdp_pps_hab_eu27_2020_nuts2

Description:

Regional gross domestic product (GDP) by NUTS 2 regions in PPS (purchasing power standards) per inhabitant, as percent of EU27 (from 2020) average. GDP is an indicator of the output of a country or a region. It reflects the total value of all goods and services produced less the value of goods and services used for intermediate consumption in their production. Expressing GDP in PPS eliminates differences in price levels between countries. Calculations on a per inhabitant basis allow for the comparison of economies and regions significantly different in absolute size. GDP per inhabitant in PPS is the key variable for determining the eligibility of NUTS 2 regions in the framework of the European Union's structural policy.

2.9.11.26 Disposable income of private households by NUTS 2 regions (eu_dinc_pps_hab_nuts0)

Long tag: qog_eureg_wide2_eu_dinc_pps_hab_nuts0

Original tag: eu_dinc_pps_hab_nuts0

Description:

Disposable income of private households by NUTS 2 regions in PPS (purchasing power standards) based on final consumption per inhabitant. The disposable income of private households is the balance of primary income (operating surplus/mixed income plus compensation of employees plus property income received minus property income paid) and the redistribution of income in cash. These transactions comprise social contributions paid, social benefits in cash received, current taxes on income and wealth paid, as well as other current transfers. Disposable income does not include social transfers in kind coming from public administrations or non-profit institutions serving households. The data for NUTS 1 and NUTS 0 regions has been calculated by computing a mean of the NUTS 2 values within each region.

2.9.11.27 Disposable income of private households by NUTS 2 regions (eu_dinc_pps_hab_nuts2)

Long tag: qog_eureg_wide2_eu_dinc_pps_hab_nuts2

Original tag: eu_dinc_pps_hab_nuts2

Description:

Disposable income of private households by NUTS 2 regions in PPS (purchasing power standards) based on final consumption per inhabitant. The data for NUTS 1 and NUTS 0 regions has been calculated by computing a mean of the NUTS 2 values within each region.

2.9.11.28 Primary income of private households by NUTS 2 regions (eu_pinc_pps_hab_nuts2)

Long tag: qog_eureg_wide2_eu_pinc_pps_hab_nuts2

Original tag: eu_pinc_pps_hab_nuts2

Description:

Primary income of private households by NUTS 2 regions in PPS (purchasing power standards) based on final consumption per inhabitant. The disposable income of private households is the balance of primary income (operating surplus/mixed income plus compensation of employees plus property income received minus property income paid) and the redistribution of income in cash. These transactions comprise social contributions paid, social benefits in cash received, current taxes on income and wealth paid, as well as other current transfers. Disposable income does not include social transfers in kind coming from public administrations or non-profit institutions serving households.

2.9.11.29 Real growth rate of regional gross value added (GVA) at basic prices (eu_rgva_pch_pre_nuts2)

Long tag: qog_eureg_wide2_eu_rgva_pch_pre_nuts2

Original tag: eu_rgva_pch_pre_nuts2

Description:

Real growth rate of regional gross value added (GVA) at basic prices by NUTS 2 regions, percentage change on previous year. GVA is an indicator of the economic activity of a country or a region. It reflects the total value of all goods and services produced less the value of goods and services used for intermediate consumption in their production. Several years ago Eurostat has started to collect real growth rates of regional GVA at NUTS level 2 from those Member States which calculate this already. The indicator is part of the ESA 2010 data transmission programme, but the transmission will be obligatory only as from the end of 2017.

2.9.12 Tourism

This category includes information about avaliable hotel beds as well as the number of days spent in tourist accomodation.

2.9.12.1 Number of bed-places in hotels, camping places and other (eu_tour_nstour_bedpl_nuts0)

Long tag: qog_eureg_wide2_eu_tour_nstour_bedpl_nuts0

Original tag: eu_tour_nstour_bedpl_nuts0

Description:

Number of bed-places in hotels, camping places and other. The number of bed-places in an establishment or dwelling is determined by the number of persons who can stay overnight in the beds set up in the establishment (dwelling), ignoring any extra beds that may be set up by customer request. The term bed place applies to a single bed, double beds are counted as two bed-places. The unit serves to measure the capacity of any type of accommodation. A bed place is also a place on a pitch or in a boat on a mooring to accommodate one person. One camping pitch should equal four bed-places if the actual number of bed-places is not known.

2.9.12.2 Number of bed-places in hotels, camping places and other (eu_tour_nstour_bedpl_nuts2)

Long tag: qog_eureg_wide2_eu_tour_nstour_bedpl_nuts2

Original tag: eu_tour_nstour_bedpl_nuts2

Description:

A bed place is also a place on a pitch or in a boat on a mooring to accommodate one person. One camping pitch should equal four bed-places if the actual number of bed-places is not known.

2.9.12.3 Number of establishments in hotels, camping places and other (eu_tour_nstour_estbl_nuts0)

Long tag: qog_eureg_wide2_eu_tour_nstour_estbl_nuts0

Original tag: eu_tour_nstour_estbl_nuts0

Description:

Number of establishments in hotels, camping places and other. A tourist accommodation establishment is defined as any facility that regularly or occasionally provides short-term accommodation for tourists as a paid service (although the price might be partially or fully subsidised). Data is reported at the level of a local kind-of-activity unit. The local unit is an enterprise or part thereof situated in a geographically identified place. At or from this place economic activity is carried out for which - save for certain exceptions - one or more persons work (even if only part-time) for one and the same enterprise. The accommodation establishment conforms to the definition of local unit as the production unit. This is irrespective of whether the accommodation of tourists is the main or secondary activity. This means that all establishments are classified in the accommodation sector if their capacity exceeds the national minimum even if the major part of turnover may come from restaurant or other services.

2.9.12.4 Number of establishments in hotels, camping places and other (eu_tour_nstour_estbl_nuts2)

Long tag: qog_eureg_wide2_eu_tour_nstour_estbl_nuts2

Original tag: eu_tour_nstour_estbl_nuts2

2.9.12.5 Net occupancy rate of bed-places in hotels and similar (eu_tour_bedpl_nuts0)

Long tag: qog_eureg_wide2_eu_tour_bedpl_nuts0

Original tag: eu_tour_bedpl_nuts0

Description:

Net occupancy rate of bed-places in hotels and similar. The occupancy rate of bed-places in reference period is obtained by dividing the total number of overnight stays by the number of the bed-places on offer (excluding extra beds) and the number of days when the bed-places are actually available for use (net of seasonal closures and other temporary closures for decoration, by police order, etc.). The result is multiplied by 100 to express the occupancy rate as a percentage. From reference period 2012 onwards, tourism occupancy statistics consist of harmonised data collected by the Member States in the frame of the Regulation (EU) 692/2011 of the European Parliament and of the Council. Up to reference period 2011, tourism occupancy statistics consist of harmonised data collected by the Member States in the frame of the Council Directive on tourism statistics 95/57/EC .

2.9.12.6 Net occupancy rate of bed-places in hotels and similar (eu_tour_bedpl_nuts2)

Long tag: qog_eureg_wide2_eu_tour_bedpl_nuts2

Original tag: eu_tour_bedpl_nuts2

Description:

Net occupancy rate of bed-places in hotels and similar. 2.9.12.9 Number of nights spent at camping grounds, recreational vehicle and trailer park (eu_tour_nscamp_nuts0)

Long tag: qog_eureg_wide2_eu_tour_nscamp_nuts0

Original tag: eu_tour_nscamp_nuts0

Description:

Number of nights spent at camping grounds, recreational vehicle parks and trailer parks. A night spent (or overnight stay) is each night a guest / tourist (resident or non-resident) actually spends (sleeps or stays) in a

tourist accommodation establishment or non-rented accommodation. Normally the date of arrival is different from the date of departure but persons arriving after midnight and leaving on the same day are included in overnight stays. A person should not be registered in two or more accommodation establishments at the same time. From reference period 2012 onwards, tourism occupancy statistics consist of harmonised data collected by the Member States in the frame of the Regulation (EU) 692/2011 of the European Parliament and of the Council. Up to reference period 2011, tourism occupancy statistics consist of harmonised data collected by the Member States in the frame of the Council Directive on tourism statistics 95/57/EC .

2.9.13 Transport

This category provides information on the means of transportation used as well as available vehicles and the road infrastructure.

2.9.13.1 Injured victims in road accidents, per million inhabitants (eu_rac_inj_nuts0)

Long tag: qog_eureg_wide2_eu_rac_inj_nuts0

Original tag: eu_rac_inj_nuts0

Description:

Injured victims in road accidents, per million inhabitants. It includes any person who as result of an injury accident was not killed immediately or not dying within 30 days, but sustained an injury, normally needing medical treatment, excluding attempted suicides. Persons with lesser wounds, such as minor cuts and bruises are not normally recorded as injured. An injured person is excluded if the competent authority declares the cause of the injury to be attempted suicide by that person, i.e. a deliberate act to injure oneself resulting in injury, but not in death.

2.9.13.2 Injured victims in road accidents, per million inhabitants (eu_rac_inj_nuts2)

Long tag: qog_eureg_wide2_eu_rac_inj_nuts2

Original tag: eu_rac_inj_nuts2

Description:

Original tag: eu_mtp_pas_crd_nuts2

Description:

Air transport of passengers carried in thousand passengers. The air transport regional data have been calculated using data collected at the airport level in the frame of Commission Regulation (EC) No 1358/2003. They are aggregated at regional level (NUTS 1 and NUTS 2) and also at national level (NUTS0), excluding double counting within each region.

2.9.13.13 Passengers carried by air transport, in thousand passengers (eu_mtp_pas_crd_arr_nuts0)

Long tag: qog_eureg_wide2_eu_mtp_pas_crd_arr_nuts0

Original tag: eu_mtp_pas_crd_arr_nuts0

Description:

Air transport of passengers carried (arrival) in thousand passengers. The air transport regional data have been calculated using data collected at the airport level in the frame of Commission Regulation (EC) No 1358/2003. They are aggregated at regional level (NUTS 1 and NUTS 2) and also at national level (NUTS0), excluding double counting within each region.

2.9.13.14 Passengers carried by air transport, in thousand passengers (eu_mtp_pas_crd_arr_nuts2)

Long tag: qog_eureg_wide2_eu_mtp_pas_crd_arr_nuts2

Original tag: eu_mtp_pas_crd_arr_nuts2

Description:

Air transport of passengers carried (arrival) in thousand passengers. The air transport regional data have been calculated using data collected at the airport level in the frame of Commission Regulation (EC) No 1358/2003. They are aggregated at regional level (NUTS 1 and NUTS 2) and also at national level (NUTS0), excluding double counting within each region.

2.9.13.15 Passengers carried by air transport (arrival), in thousand passengers (eu_mtp_pas_crd_dep_nuts0)

Long tag: qog_eureg_wide2_eu_mtp_pas_crd_dep_nuts0

Original tag: eu_mtp_pas_crd_dep_nuts0

Description:

Air transport of passengers carried (departures), in thousand passengers. The air transport regional data have been calculated using data collected at the airport level in the frame of Commission Regulation (EC) No 1358/2003. They are aggregated at regional level (NUTS 1 and NUTS 2) and also at national level (NUTS0), excluding double counting within each region.

2.9.13.16 Passengers carried by air transport (arrival), in thousand passengers (eu_mtp_pas_crd_dep_nuts2)

Long tag: qog_eureg_wide2_eu_mtp_pas_crd_dep_nuts2

Original tag: eu_mtp_pas_crd_dep_nuts2

Description:

Air transport of passengers carried (departures), in thousand passengers. The air transport regional data have been calculated using data collected at the airport level in the frame of Commission Regulation (EC) No 1358/2003. They are aggregated at regional level (NUTS 1 and NUTS 2) and also at national level (NUTS0), excluding double counting within each region.

2.9.13.17 Maritime transport of freight and mail loaded, in thousand tonnes (eu_mtf_fr_ld_nuts0)

Long tag: qog_eureg_wide2_eu_mtf_fr_ld_nuts0

Original tag: eu_mtf_fr_ld_nuts0

Description:

Maritime transport of freight loaded in thousand tonnes. The maritime transport regional data have been calculated using data collected at the port level in the frame of Council Directive 2009/42/EC (6.5.2009). They are aggregated at regional level (NUTS 1 and NUTS 2) and also at national level (NUTS0), excluding double counting within each region.

2.9.13.18 Maritime transport of freight and mail loaded, in thousand tonnes (eu_mtf_fr_ld_nuts2)

Long tag: qog_eureg_wide2_eu_mtf_fr_ld_nuts2

Original tag: eu_mtf_fr_ld_nuts2

Description:

Maritime transport of freight loaded in thousand tonnes. The maritime transport regional data have been calculated using data collected at the port level in the frame of Council Directive 2009/42/EC (6.5.2009). They are aggregated at regional level (NUTS 1 and NUTS 2) and also at national level (NUTS0), excluding double counting within each region.

2.9.13.19 Maritime transport of freight and mail loaded, in thousand tonnes (eu_mtf_fr_ld_nld_nuts0)

Long tag: qog_eureg_wide2_eu_mtf_fr_ld_nld_nuts0

Original tag: eu_mtf_fr_ld_nld_nuts0

Description:

Maritime transport of freight loaded and unloaded in thousand tonnes. The maritime transport regional data have been calculated using data collected at the port level in the frame of Council Directive 2009/42/EC (6.5.2009). They are aggregated at regional level (NUTS 1 and NUTS 2) and also at national level (NUTS0), excluding double counting within each region.

2.9.13.20 Maritime transport of freight and mail loaded, in thousand tonnes (eu_mtf_fr_ld_nld_nuts2)

Long tag: qog_eureg_wide2_eu_mtf_fr_ld_nld_nuts2

Original tag: eu_mtf_fr_ld_nld_nuts2

Description:

Maritime transport of freight loaded and unloaded in thousand tonnes. The maritime transport regional data have been calculated using data collected at the port level in the frame of Council Directive 2009/42/EC (6.5.2009). They are aggregated at regional level (NUTS 1 and NUTS 2) and also at national level (NUTS0), excluding double counting within each region.

2.9.13.21 Maritime transport of freight and mail loaded and unloaded, in thousand tonnes (eu_mtf_fr_nld_nuts0)

Long tag: qog_eureg_wide2_eu_mtf_fr_nld_nuts0

Original tag: eu_mtf_fr_nld_nuts0

Description:

Maritime transport of freight unloaded in thousand tonnes. The maritime transport regional data have been calculated using data collected at the port level in the frame of Council Directive 2009/42/EC (6.5.2009). They

are aggregated at regional level (NUTS 1 and NUTS 2) and also at national level (NUTS0), excluding double counting within each region.

2.9.13.22 Maritime transport of freight and mail loaded and unloaded, in thousand tonnes (eu_mtf_fr_nld_nuts2)

Long tag: qog_eureg_wide2_eu_mtf_fr_nld_nuts2

Original tag: eu_mtf_fr_nld_nuts2

Description:

Maritime transport of freight unloaded in thousand tonnes. The maritime transport regional data have been calculated using data collected at the port level in the frame of Council Directive 2009/42/EC (6.5.2009). They are aggregated at regional level (NUTS 1 and NUTS 2) and also at national level (NUTS0), excluding double counting within each region.

2.9.13.23 Maritime transport of passengers embarked and disembarked, in thousand passengers (eu_mtp_pas_nuts0)

Long tag: qog_eureg_wide2_eu_mtp_pas_nuts0

Original tag: eu_mtp_pas_nuts0

Description:

Maritime transport of passengers embarked and disembarked in thousand passengers. The maritime transport regional data have been calculated using data collected at the port level in the frame of Council Directive 2009/42/EC (6.5.2009). They are aggregated at regional level (NUTS 1 and NUTS 2) and also at national level (NUTS0), excluding double counting within each region.

2.9.13.24 Maritime transport of passengers embarked and disembarked, in thousand passengers (eu_mtp_pas_nuts2)

Long tag: qog_eureg_wide2_eu_mtp_pas_nuts2

Original tag: eu_mtp_pas_nuts2

Description:

Maritime transport of passengers embarked and disembarked in thousand passengers. The maritime transport regional data have been calculated using data collected at the port level in the frame of Council Directive 2009/42/EC (6.5.2009). They are aggregated at regional level (NUTS 1 and NUTS 2) and also at national level (NUTS0), excluding double counting within each region.

2.9.13.25 Maritime transport of passengers, in thousand passengers (eu_mtp_pas_demb_nuts0)

Long tag: qog_eureg_wide2_eu_mtp_pas_demb_nuts0

Original tag: eu_mtp_pas_demb_nuts0

Description:

Maritime transport of passengers disembarked in thousand passengers. The maritime transport regional data have been calculated using data collected at the port level in the frame of Council Directive 2009/42/EC (6.5.2009). They are aggregated at regional level (NUTS 1 and NUTS 2) and also at national level (NUTS0), excluding double counting within each region.

2.9.13.26 Maritime transport of passengers, in thousand passengers (eu_mtp_pas_demb_nuts2)

Long tag: qog_eureg_wide2_eu_mtp_pas_demb_nuts2

Original tag: eu_mtp_pas_demb_nuts2

Description:

Maritime transport of passengers disembarked in thousand passengers. The maritime transport regional data have been calculated using data collected at the port level in the frame of Council Directive 2009/42/EC (6.5.2009). They are aggregated at regional level (NUTS 1 and NUTS 2) and also at national level (NUTS0), excluding double counting within each region.

2.9.13.27 Maritime transport of passengers disembarked, in thousand passengers (eu_mtp_pas_emb_nuts0)

Long tag: qog_eureg_wide2_eu_mtp_pas_emb_nuts0

Original tag: eu_mtp_pas_emb_nuts0

Description:

Maritime transport of passengers embarked in thousand passengers. The maritime transport regional data have been calculated using data collected at the port level in the frame of Council Directive 2009/42/EC (6.5.2009). They are aggregated at regional level (NUTS 1 and NUTS 2) and also at national level (NUTS0), excluding double counting within each region.

2.9.13.28 Maritime transport of passengers disembarked, in thousand passengers (eu_mtp_pas_emb_nuts2)

Long tag: qog_eureg_wide2_eu_mtp_pas_emb_nuts2

Original tag: eu_mtp_pas_emb_nuts2

Description:

Maritime transport of passengers embarked in thousand passengers. The maritime transport regional data have been calculated using data collected at the port level in the frame of Council Directive 2009/42/EC (6.5.2009). They are aggregated at regional level (NUTS 1 and NUTS 2) and also at national level (NUTS0), excluding double counting within each region.

2.9.13.29 Navigable canals, in kilometers (eu_troad_cnl_nuts0)

Long tag: qog_eureg_wide2_eu_troad_cnl_nuts0

Original tag: eu_troad_cnl_nuts0

Description:

Navigable canal – waterway built primarily for navigation.

2.9.13.30 Navigable canals, in kilometers (eu_troad_cnl_nuts2)

Long tag: qog_eureg_wide2_eu_troad_cnl_nuts2

Original tag: eu_troad_cnl_nuts2

Description:

Navigable canal – waterway built primarily for navigation.

2.9.13.31 Navigable canals, in kilometers (eu_troad_mway_nuts0)

Long tag: qog_eureg_wide2_eu_troad_mway_nuts0

Original tag: eu_troad_mway_nuts0

Description:

Motorway / freeway – road, specially designed and built for motor traffic, which does not serve properties bordering on it, and which: i) is provided, except at special points or temporarily, with separate carriageways for traffic in two directions, separated from each other, either by a dividing strip not intended for traffic, or exceptionally by other means; ii) has no crossings at the same level with any road, railway or tramway track, or footpath; and iii) is especially sign-posted as a motorway and is reserved for specific categories of road motor vehicles.

2.9.13.32 Navigable canals, in kilometers (eu_troad_mway_nuts2)

Long tag: qog_eureg_wide2_eu_troad_mway_nuts2

Original tag: eu_troad_mway_nuts2

Description:

Motorway / freeway – road, specially designed and built for motor traffic, which does not serve properties bordering on it, and which: i) is provided, except at special points or temporarily, with separate carriageways for traffic in two directions, separated from each other, either by a dividing strip not intended for traffic, or exceptionally by other means; ii) has no crossings at the same level with any road, railway or tramway track, or footpath; and iii) is especially sign-posted as a motorway and is reserved for specific categories of road motor vehicles.

2.9.13.33 Motorways, in kilometers (eu_troad_rd_oth_nuts0)

Long tag: qog_eureg_wide2_eu_troad_rd_oth_nuts0

Original tag: eu_troad_rd_oth_nuts0

Description:

Other roads, in kilometers.

2.9.13.34 Motorways, in kilometers (eu_troad_rd_oth_nuts2)

Long tag: qog_eureg_wide2_eu_troad_rd_oth_nuts2

Original tag: eu_troad_rd_oth_nuts2

Description:

Other roads, in kilometers.

2.9.13.35 Other roads, in kilometers (eu_troad_riv_nuts0)

Long tag: qog_eureg_wide2_eu_troad_riv_nuts0

Original tag: eu_troad_riv_nuts0

Description:

Navigable river – natural waterway open for navigation, irrespective of whether it has been improved for that purpose.

2.9.13.36 Other roads, in kilometers (eu_troad_riv_nuts2)

Long tag: qog_eureg_wide2_eu_troad_riv_nuts2

Original tag: eu_troad_riv_nuts2

Description:
Navigable river – natural waterway open for navigation, irrespective of whether it has been improved for that purpose.

2.9.13.37 Navigable rivers, in kilometers (eu_troad_rl_nuts0)

Long tag: qog_eureg_wide2_eu_troad_rl_nuts0

Original tag: eu_troad_rl_nuts0

Description:
Railway line – line of communication made up by rail exclusively for the use of railway vehicles. Line of communication is an area equipped for the performance of rail transport.

2.9.13.38 Navigable rivers, in kilometers (eu_troad_rl_nuts2)

Long tag: qog_eureg_wide2_eu_troad_rl_nuts2

Original tag: eu_troad_rl_nuts2

Description:
Railway line – line of communication made up by rail exclusively for the use of railway vehicles. Line of communication is an area equipped for the performance of rail transport.

2.9.13.39 Total railway lines, in kilometers (eu_troad_rl_elc_nuts0)

Long tag: qog_eureg_wide2_eu_troad_rl_elc_nuts0

Original tag: eu_troad_rl_elc_nuts0

Description:
Electrified railway lines in kilometers.

2.9.13.40 Total railway lines, in kilometers (eu_troad_rl_elc_nuts2)

Long tag: qog_eureg_wide2_eu_troad_rl_elc_nuts2

Original tag: eu_troad_rl_elc_nuts2

Description:
Electrified railway lines in kilometers.

2.9.13.41 Electrified railway lines, in kilometers (eu_troad_rl_tge2_nuts0)

Long tag: qog_eureg_wide2_eu_troad_rl_tge2_nuts0

Original tag: eu_troad_rl_tge2_nuts0

Description:
Railway lines with double and more tracks in kilometers.

2.9.13.42 Electrified railway lines, in kilometers (eu_troad_rl_tge2_nuts2)

Long tag: qog_eureg_wide2_eu_troad_rl_tge2_nuts2

Original tag: eu_troad_rl_tge2_nuts2

Description:
Railway lines with double and more tracks in kilometers.

2.9.13.43 Total number of motor coaches, buses and trolley buses (eu_vs_bus_tot_nuts0)

Long tag: qog_eureg_wide2_eu_vs_bus_tot_nuts0

Original tag: eu_vs_bus_tot_nuts0

Description:
Total number of motor coaches, buses and trolley buses. Motor coach is passenger road motor vehicle designed to seat 24 or more persons (including the driver) and constructed exclusively for the carriage of seated passengers. Bus is defined as passenger road motor vehicle designed to carry more than 24 persons (including the driver), and with provision to carry seated as well as standing passengers. Trolleybus is passenger road vehicle designed to seat more than nine persons (including the driver), which is connected to electric conductors and which is not rail-borne. This term covers vehicles which may be used either as trolleybuses or as buses, if they have a motor independent of the main electric power supply.

2.9.13.44 Total number of motor coaches, buses and trolley buses (eu_vs_bus_tot_nuts2)

Long tag: qog_eureg_wide2_eu_vs_bus_tot_nuts2

Original tag: eu_vs_bus_tot_nuts2

Description:
Total number of motor coaches, buses and trolley buses. Motor coach is passenger road motor vehicle designed to seat 24 or more persons (including the driver) and constructed exclusively for the carriage of seated passengers.

Bus is defined as passenger road motor vehicle designed to carry more than 24 persons (including the driver), and with provision to carry seated as well as standing passengers. Trolleybus is passenger road vehicle designed to seat more than nine persons (including the driver), which is connected to electric conductors and which is not rail-borne. This term covers vehicles which may be used either as trolleybuses or as buses, if they have a motor independent of the main electric power supply.

2.9.13.45 Total number of motor coaches, buses and trolley buses (eu_vs_car_nuts0)

Long tag: qog_eureg_wide2_eu_vs_car_nuts0

Original tag: eu_vs_car_nuts0

Description:

Total number of passenger cars. Passenger car is a road motor vehicle, other than a moped or a motor cycle, intended for the carriage of passengers and designed to seat no more than nine persons (including the driver). Included are: passenger cars, vans designed and used primarily for transport of passengers, taxis, hire cars, ambulances, motor homes. Excluded are light goods road vehicles, as well as motor-coaches and buses, and mini-buses/mini-coaches. "Passenger car" includes micro cars (needing no permit to be driven), taxis and passenger hire cars, provided that they have fewer than ten seats.

2.9.13.46 Total number of motor coaches, buses and trolley buses (eu_vs_car_nuts2)

Long tag: qog_eureg_wide2_eu_vs_car_nuts2

Original tag: eu_vs_car_nuts2

Description:

Total number of passenger cars. Passenger car is a road motor vehicle, other than a moped or a motor cycle, intended for the carriage of passengers and designed to seat no more than nine persons (including the driver). Included are: passenger cars, vans designed and used primarily for transport of passengers, taxis, hire cars, ambulances, motor homes. Excluded are light goods road vehicles, as well as motor-coaches and buses, and mini-buses/mini-coaches. "Passenger car" includes micro cars (needing no permit to be driven), taxis and passenger hire cars, provided that they have fewer than ten seats.

2.9.13.47 Total number of passenger cars (eu_vs_lor_nuts0)

Long tag: qog_eureg_wide2_eu_vs_lor_nuts0

Original tag: eu_vs_lor_nuts0

Description:

Total number of lorries. Lorry / truck is rigid road motor vehicle designed, exclusively or primarily, to carry goods.

2.9.13.48 Total number of passenger cars (eu_vs_lor_nuts2)

Long tag: qog_eureg_wide2_eu_vs_lor_nuts2

Original tag: eu_vs_lor_nuts2

Description:

Total number of lorries. Lorry / truck is rigid road motor vehicle designed, exclusively or primarily, to carry goods.

2.9.13.49 Total number of lorries (eu_vs_moto_nuts0)

Long tag: qog_eureg_wide2_eu_vs_moto_nuts0

Original tag: eu_vs_moto_nuts0

Description:

Total number of motorcycles. Motorcycle is defined as two-, three- or four-wheeled road motor vehicle not exceeding 400 kg (900 lb) of unladen weight. All such vehicles with a cylinder capacity of 50 cc or over are included, as are those under 50 cc which do not meet the definition of moped.

2.9.13.50 Total number of lorries (eu_vs_moto_nuts2)

Long tag: qog_eureg_wide2_eu_vs_moto_nuts2

Original tag: eu_vs_moto_nuts2

Description:

Total number of motorcycles. Motorcycle is defined as two-, three- or four-wheeled road motor vehicle not exceeding 400 kg (900 lb) of unladen weight. All such vehicles with a cylinder capacity of 50 cc or over are included, as are those under 50 cc which do not meet the definition of moped.

2.9.13.51 Total number of motorcycles (eu_vs_spe_nuts0)

Long tag: qog_eureg_wide2_eu_vs_spe_nuts0

Original tag: eu_vs_spe_nuts0

Description:

Total number of special vehicles. Special purpose road motor vehicle is road motor vehicle designed for purposes

other than the carriage of passengers or goods. This category includes: fire brigade vehicles, mobile cranes, self-propelled rollers, bulldozers with metallic wheels or track, vehicles for recording film, radio and TV broadcasting, mobile library vehicles, towing vehicles for vehicles in need of repair, other special purpose road motor vehicles.

2.9.13.52 Total number of motorcycles (eu_vs_spe_nuts2)

Long tag: qog_eureg_wide2_eu_vs_spe_nuts2

Original tag: eu_vs_spe_nuts2

Description:

Total number of special vehicles. Special purpose road motor vehicle is road motor vehicle designed for purposes other than the carriage of passengers or goods. This category includes: fire brigade vehicles, mobile cranes, self-propelled rollers, bulldozers with metallic wheels or track, vehicles for recording film, radio and TV broadcasting, mobile library vehicles, towing vehicles for vehicles in need of repair, other special purpose road motor vehicles.

2.9.13.53 Total number of special vehicles (eu_vs_tot_x_tm_nuts0)

Long tag: qog_eureg_wide2_eu_vs_tot_x_tm_nuts0

Original tag: eu_vs_tot_x_tm_nuts0

Description:

Total number of all vehicles except trailers and motorcycles.

2.9.13.54 Total number of special vehicles (eu_vs_tot_x_tm_nuts2)

Long tag: qog_eureg_wide2_eu_vs_tot_x_tm_nuts2

Original tag: eu_vs_tot_x_tm_nuts2

Description:

Total number of all vehicles except trailers and motorcycles.

2.9.13.55 Total number of all vehicles (except trailers and motorcycles) (eu_vs_trc_nuts0)

Long tag: qog_eureg_wide2_eu_vs_trc_nuts0

Original tag: eu_vs_trc_nuts0

Description:

Total number of road tractors. Road tractor is road motor vehicle designed, exclusively or primarily, to haul other road vehicles which are not power-driven (mainly semi-trailers). Agricultural tractors are excluded.

2.9.13.56 Total number of all vehicles (except trailers and motorcycles) (eu_vs_trc_nuts2)

Long tag: qog_eureg_wide2_eu_vs_trc_nuts2

Original tag: eu_vs_trc_nuts2

Description:

Total number of road tractors. Road tractor is road motor vehicle designed, exclusively or primarily, to haul other road vehicles which are not power-driven (mainly semi-trailers). Agricultural tractors are excluded.

2.9.13.57 Total number of road tractors (eu_vs_trl_strl_nuts0)

Long tag: qog_eureg_wide2_eu_vs_trl_strl_nuts0

Original tag: eu_vs_trl_strl_nuts0

Description:

Total number of trailers and semi-trailers. Trailer is goods road vehicle designed to be hauled by a road motor vehicle. This category excludes agricultural trailers and caravans. Semi-trailer describes goods road vehicle with no front axle designed in such way that part of the vehicle and a substantial part of its loaded weight rests on a road tractor.

2.9.13.58 Total number of road tractors (eu_vs_trl_strl_nuts2)

Long tag: qog_eureg_wide2_eu_vs_trl_strl_nuts2

Original tag: eu_vs_trl_strl_nuts2

Description:

Total number of trailers and semi-trailers. Trailer is goods road vehicle designed to be hauled by a road motor vehicle. This category excludes agricultural trailers and caravans. Semi-trailer describes goods road vehicle with no front axle designed in such way that part of the vehicle and a substantial part of its loaded weight rests on a road tractor.

2.9.13.59 Total number of trailers and semi-trailers (eu_vs_utl_nuts0)

Long tag: qog_eureg_wide2_eu_vs_utl_nuts0

Original tag: eu_vs_utl_nuts0

Description:

Total number of total utility vehicles.

2.9.13.60 Total number of trailers and semi-trailers (eu_vs_utl_nuts2)

Long tag: qog_eureg_wide2_eu_vs_utl_nuts2

Original tag: eu_vs_utl_nuts2

Description:
Total number of total utility vehicles.

2.10 QoG Expert Survey 2020

Dataset tag: qog_exp

Description: The Quality of Government Expert Survey (QoG Expert Survey) is a research project aimed at documenting the organizational design of public bureaucracies and bureaucratic behavior in countries around the world. The third wave of the QoG Expert Survey covers 117 countries and is based on a web survey of 996 experts.

Dataset citation: Nistotskaya, Marina, Stefan Dahlberg, Carl Dahlström, Aksel Sundström, Sofia Axelsson, Cem Mert Dalli Natalia Alvarado Pachon. 2021. The Quality of Government Expert Survey 2020 Dataset: Wave III. University of Gothenburg: The Quality of Government Institute, http://www.qog.pol.gu.se DOI: 10.18157/qoges2020

License: The QoG datasets are open and available, free of charge and without a need to register your data. You can use them for your analysis, graphs, teaching, and other academic-related and non-commercial purposes. We ask our users to cite always the original source(s) of the data and our datasets.

We do not allow other uses of these data including but not limited to redistribution, commercialization and other for-profit usage. If a user is interested in such use or has doubts about the license, they will have to refer to the original source and check with them if this is allowed and what requirements they need to fulfill.

Be mindful that the original data sources are the only owners of their data and they can adjust their license without previous warning.

More detailed information on the dataset can be found at the following web page: `https://www.gu.se/en/quality-government/qog-data/data-downloads/qog-expert-survey`

2.10.1 Identification Variables

This section includes ID variables such as country names, codes, and years.

2.10.1.1 Year (year)

Long tag: qog_exp_year

Original tag: year

Description:
Year for which the answers are submitted.

2.10.1.2 Country Name (cname)

Long tag: qog_exp_cname

Original tag: cname

Description:
The name of the country.

2.10.1.3 ISO-3166-1 Country Code (ccode)

Long tag: qog_exp_ccode

Original tag: ccode

Description:
Numeric country code based on the ISO-3166-1.

2.10.1.4 Correlates of War Country Code (ccodecow)

Long tag: qog_exp_ccodecow

Original tag: ccodecow

Description:
Country code from the Correlates of War.

2.10.1.5 World Bank Country Code (ccodewb)

Long tag: qog_exp_ccodewb

Original tag: ccodewb

Description:
Country code from the World Bank.

2.10.1.6 ISO-3166-1 alpha3 Country Code (ccodealp)

Long tag: qog_exp_ccodealp

Original tag: ccodealp

Description:
A three-letter country code based on the ISO-3166-1 alpha3 standard.

2.10.1.7 OECD Member (oecd)

Long tag: qog_exp_oecd

Original tag: oecd

Description:
Is the country a member of the OECD?
(0) No
(1) Yes

2.10.1.8 EU27 Member (eu27)

Long tag: qog_exp_eu27

Original tag: eu27

Description:
Is the country a member of the EU?
(0) No
(1) Yes

2.10.1.9 Region (region)

Long tag: qog_exp_region

Original tag: region

Description:
A tenfold politico-geographic classification of world regions. The categories are as follow:
(1) Eastern Europe and post-Soviet Union (including Central Asia)
(2) Latin America (including Cuba, Haiti & the Dominican Republic)
(3) North Africa & the Middle East (including Israel, Turkey & Cyprus)
(4) Sub-Saharan Africa
(5) Western Europe and North America (including Australia & New Zeeland)
(6) East Asia (including Japan & Mongolia)
(7) South-East Asia
(8) South Asia
(9) The Pacific (excluding Australia & New Zealand)
(10) The Caribbean (including Belize, Guyana & Suriname, but excluding
Cuba, Haiti & the Dominican Republic)

2.10.2 Expert Survey Variables

This section includes the variables from the QoG Expert Survey 2020

2.10.2.1 Professionalism Index (proff_pca)

Long tag: qog_exp_proff_pca

Original tag: proff_pca

Description:
Professionalism Index is constructed from Patronage, Merit and Tenure with the help of Principal Component Analysis (PCA). Merit, Patronage and Tenure are load on the same dimension, which predicted scores are used as Professionalism Index.

2.10.2.2 Patronage (proff1)

Long tag: qog_exp_proff1

Original tag: proff1

Description:
Country-level estimate for Patronage, constructed with an IRT model that accounts for differential item functioning (DIF) and variation in expert reliability. Higher values stand for more patronage in recruitment.

2.10.2.3 Patronage, lower limit of 95percent credible interval (proff1_lowci)

Long tag: qog_exp_proff1_lowci

Original tag: proff1_lowCI

Description:
Lower boundary of 95percent credible interval for Patronage.

2.10.2.4 Patronage, upper limit of 95percent credible interval (proff1_upci)

Long tag: qog_exp_proff1_upci

Original tag: proff1_upCI

Description:

Upper boundary of 95percent credible interval for Patronage.

2.10.2.5 Merit (proff2)

Long tag: qog_exp_proff2

Original tag: proff2

Description:

Country-level estimate for Merit, constructed with an IRT model that accounts for DIF and variation in expert reliability. Higher values stand for more merit-based appointment.

2.10.2.6 Merit, lower limit of 95percent credible interval (proff2_lowci)

Long tag: qog_exp_proff2_lowci

Original tag: proff2_lowCI

Description:

Lower boundary of 95percent credible interval for Merit.

2.10.2.7 Merit, upper limit of 95percent credible interval (proff2_upci)

Long tag: qog_exp_proff2_upci

Original tag: proff2_upCI

Description:

Upper boundary of 95percent credible interval for Merit.

2.10.2.8 Tenure (proff3)

Long tag: qog_exp_proff3

Original tag: proff3

Description:

Country-level estimate for Tenure, constructed with an IRT model that accounts for DIF and variation in expert reliability. Higher values stand for stronger security of tenure.

2.10.2.9 Tenure, lower limit of 95percent credible interval (proff3_lowci)

Long tag: qog_exp_proff3_lowci

Original tag: proff3_lowCI

Description:

Lower boundary of 95percent credible interval for Tenure.

2.10.2.10 Tenure, upper limit of 95percent credible interval (proff3_upci)

Long tag: qog_exp_proff3_upci

Original tag: proff3_upCI

Description:

Upper boundary of 95percent credible interval for Tenure.

2.10.2.11 Closedness Index (close_pca)

Long tag: qog_exp_close_pca

Original tag: close_pca

Description:

Closedness Index is constructed from Entry at the lowest level only, Entry via examination and Special Laws with the help of Principal Component Analysis (PCA). Entry at the lowest level only, Entry via examination and Special Laws variables are load on the same dimension, which predicted scores are used as Closedness Index.

2.10.2.12 Entry at the lowest level only (close1)

Long tag: qog_exp_close1

Original tag: close1

Description:

Country-level estimate for Entry at the lowest level only, scaled between 0 and 1. Highest score refers to cases where entry to bureaucratic positions is possible at the lowest level of hierarchy only, and positions at middle and higher levels of hierarchy are filled by individuals from within the bureaucracy.

2.10.2.13 Entry via examination (close2)

Long tag: qog_exp_close2

Original tag: close2

Description:

Country-level estimate for Entry via examination, scaled between 0 and 1. Countries in which formal examination is usually part of the hiring process have higher scores.

2.10.2.14 Special Laws (close3)

Long tag: qog_exp_close3

Original tag: close3

Description:

Country-level estimate for Special Laws, scaled between 0 and 1. Higher scores mean that human resource management in public administration is regulated by a set of laws and regulations applicable only to the public sector (including government), which is different from the country's labor code.

2.10.2.15 Political Interference (impar1)

Long tag: qog_exp_impar1

Original tag: impar1

Description:

Country-level estimate for Political Interference, constructed with an IRT model that accounts for DIF and variation in expert reliability. Higher values stand for more political interference.

2.10.2.16 Political Interference, lower limit of 95percent credible interval (impar1_lowci)

Long tag: qog_exp_impar1_lowci

Original tag: impar1_lowCI

Description:

Lower boundary of 95percent credible interval for Political Interference.

2.10.2.17 Political Interference, upper limit of 95percent credible interval (impar1_upci)

Long tag: qog_exp_impar1_upci

Original tag: impar1_upCI

Description:

Upper boundary of 95percent credible interval for Political Interference.

2.10.2.18 Impartiality (impar2)

Long tag: qog_exp_impar2

Original tag: impar2

Description:

Country-level estimate for Impartiality, constructed with an IRT model that accounts for DIF and variation in expert reliability. Higher values stand for more impartiality.

2.10.2.19 Impartiality, lower limit of 95percent credible interval (impar2_lowci)

Long tag: qog_exp_impar2_lowci

Original tag: impar2_lowCI

Description:

Lower boundary of 95percent credible interval for Impartiality.

2.10.2.20 Impartiality, upper limit of 95percent credible interval (impar2_upci)

Long tag: qog_exp_impar2_upci

Original tag: impar2_upCI

Description:

Upper boundary of 95percent credible interval for Impartiality.

2.11 QoG OECD Dataset Cross-Section

Dataset tag: qog_oecd_cs

Description: The QoG OECD dataset consists of approximately 1300 variables from 100 data sources. The dataset includes OECD member countries and has high data coverage in terms of geography and time.
In the QoG OECD CS dataset, data from and around 2018 is included. Data from 2018 is prioritized, however, if no data is available for a country for 2018, data for 2019 is included. If no data exists for 2019, data for 2017 is included,

and so on up to a maximum of +/- 3 years.

Dataset citation: Teorell, Jan, Staffan Kumlin, Aksel Sundström, Sören Holmberg, Bo Rothstein, Natalia Alvarado Pachon Cem Mert Dalli. 2021. The Quality of Government OECD Dataset, version Jan21. University of Gothenburg: The Quality of Government Institute, http://www.qog.pol.gu.se doi:10.18157/qogoecdjan21

License: The QoG datasets are open and available, free of charge and without a need to register your data. You can use them for your analysis, graphs, teaching, and other academic-related and non-commercial purposes. We ask our users to cite always the original source(s) of the data and our datasets.

We do not allow other uses of these data including but not limited to redistribution, commercialization and other for-profit usage. If a user is interested in such use or has doubts about the license, they will have to refer to the original source and check with them if this is allowed and what requirements they need to fulfill.

Be mindful that the original data sources are the only owners of their data and they can adjust their license without previous warning.

More detailed information on the dataset can be found at the following web page: `https://www.gu.se/en/quality-government/qog-data/data-downloads/oecd-dataset`

2.11.1 Identification Variables

Identification variables in the dataset.

2.11.1.1 Country Code (ccode)

Long tag: qog_oecd_cs_ccode

Original tag: ccode

Description:

Numeric country code based on the ISO-3166-1 standard. All the numeric country codes are unique and this is thus the variable best suitable to use when merging files (in combination with year for time-series data). (http://en.wikipedia.org/wiki/ISO_3166-1_numeric)

2.11.1.2 Country Name (cname)

Long tag: qog_oecd_cs_cname

Original tag: cname

Description:

The name of the country based in the ISO standard.

2.11.1.3 Country Code QoG (ccode_qog)

Long tag: qog_oecd_cs_ccode_qog

Original tag: ccode_qog

Description:

The country code using the QoG standard.

2.11.1.4 Country Name QoG (cname_qog)

Long tag: qog_oecd_cs_cname_qog

Original tag: cname_qog

Description:

The name of the country using the QoG standard.

2.11.1.5 3-letter Country Code (ccodealp)

Long tag: qog_oecd_cs_ccodealp

Original tag: ccodealp

Description:

A three-letter country code based on the ISO-3166-1 alpha3 standard. Please note that the ccodealp variable does not uniquely identify all countries.

2.11.1.6 Country Code COW (ccodecow)

Long tag: qog_oecd_cs_ccodecow

Original tag: ccodecow

Description:

Country code from the Correlates of War.

2.11.1.7 Version of the Dataset (version)

Long tag: qog_oecd_cs_version

Original tag: version

Description:
Version of the QoG dataset.

2.11.2 Civil Society, Population and Culture

This category includes variables that relate to social capital, personal beliefs, size and distribution of the population as well as ethnic and linguistic fractionalization.

2.11.2.1 Ethnic Fractionalization in the year 2000 (al_ethnic2000)

Long tag: qog_oecd_cs_al_ethnic2000

Original tag: al_ethnic2000

Description:
Ethnic Fractionalization in the year 2000. The definition of ethnicity involves a combination of racial and linguistic characteristics. The result is a higher degree of fractionalization than the commonly used ELF-index (see el_elf60) in for example Latin America, where people of many races speak the same language.

Variable citation: Alesina, A., Devleeschauwer, A., Easterly, W., Kurlat, S., & Wacziarg, R. (2003). Fractionalization [O. Galor (ed.) (2011), Inequality and Economic Development: The Modern Perspective, Edward Elgar, UK.]. *Journal of Economic Growth*, 8(2), 155–194

2.11.2.2 Language Fractionalization in the year 2000 (al_language2000)

Long tag: qog_oecd_cs_al_language2000

Original tag: al_language2000

Description:
Linguistic Fractionalization in the year 2000. Reflects probability that two randomly selected people from a given country will not belong to the same linguistic group. The higher the number, the more fractionalized society.

Variable citation: Alesina, A., Devleeschauwer, A., Easterly, W., Kurlat, S., & Wacziarg, R. (2003). Fractionalization [O. Galor (ed.) (2011), Inequality and Economic Development: The Modern Perspective, Edward Elgar, UK.]. *Journal of Economic Growth*, 8(2), 155–194

2.11.2.3 Religion Fractionalization in the year 2000 (al_religion2000)

Long tag: qog_oecd_cs_al_religion2000

Original tag: al_religion2000

Description:
Religious Fractionalization in the year 2000. Reflects probability that two randomly selected people from a given country will not belong to the same religious group. The higher the number, the more fractionalized society.

Variable citation: Alesina, A., Devleeschauwer, A., Easterly, W., Kurlat, S., & Wacziarg, R. (2003). Fractionalization [O. Galor (ed.) (2011), Inequality and Economic Development: The Modern Perspective, Edward Elgar, UK.]. *Journal of Economic Growth*, 8(2), 155–194

2.11.2.4 Right to Marry in Constitution (ccp_marriage)

Long tag: qog_oecd_cs_ccp_marriage

Original tag: ccp_marriage

Description:
Does the constitution provide for the right to marry?

1. Yes, general provision
2. Yes, marriage allowed between a man and a woman
3. No
90. Left explicitly to non-constitution law
96. Other

Variable citation: Elkins, Z., & Ginsburg, T. (2021). Characteristics of national constitutions, version 3.0 [Last modified: May 20, 2021. Available at comparativeconstitutionsproject.org]. `http://www.comparativeconstitutionsproject.org`

2.11.2.5 Right to Same-Sex Marriages in Constitution (ccp_samesexm)

Long tag: qog_oecd_cs_ccp_samesexm

Original tag: ccp_samesexm

Description:
Does the constitution provide the right for same sex marriages?

1. Yes
2. No
96. Other

Variable citation: Elkins, Z., & Ginsburg, T. (2021). Characteristics of national constitutions, version 3.0 [Last modified: May 20, 2021. Available at comparativeconstitutionsproject.org]. `http://www.comparativeconstitutionsproject.org`

2.11.2.6 Social Globalization (dr_sg)

Long tag: qog_oecd_cs_dr_sg

Original tag: dr_sg

Description:

Social globalization (scale of 1 to 100) is comprised of three segments, each with its own de facto and de jure segment. Interpersonal contact is measured within the de facto segment with reference to international telephone connections, tourist numbers and migration. Within the de jure segment, it is measured with reference to telephone subscriptions, international airports and visa restrictions. Flows of information are determined within the de facto segment with reference to international patent applications, international students and trade in high technology goods. The de jure segment measures access to TV and the internet, freedom of the press and international internet connections. Cultural proximity is measured in the de facto segment from trade in cultural goods, international trade mark registrations and the number of McDonald's restaurants and IKEA stores. The de jure area focuses on civil rights (freedom of citizens), gender equality and public spending on school education.

Variable citation: Gygli, S., Haelg, F., Potrafke, N., & Sturm, J.-E. (2019). The KOF Globalisation Index - Revisited. `https://doi.org/10.1007/s11558-019-09344-2` Dreher, A. (2006). Does globalization affect growth? evidence from a new index of globalization. *Applied Economics*, 38(10), 1091–1110

2.11.2.7 Cultural Diversity (fe_cultdiv)

Long tag: qog_oecd_cs_fe_cultdiv

Original tag: fe_cultdiv

Description:

This measure modifies fractionalization (fe_etfra) so as to take some account of cultural distances between groups, measured as the structural distance between languages spoken by different groups in a country. If the groups in a country speak structurally unrelated languages, their cultural diversity index will be the same as their level of ethnic fractionalization (fe_etfra). The more similar are the languages spoken by different ethnic groups, however, the more will this measure be reduced below the level of ethnic fractionalization for that country. The values are assumed to be constant for all years.

Variable citation: Fearon, J. D. (2003). Ethnic and cultural diversity by country. *Journal of Economic Growth*, 8(2), 195–222

2.11.2.8 Ethnic Fractionalization (fe_etfra)

Long tag: qog_oecd_cs_fe_etfra

Original tag: fe_etfra

Description:

Restricting attention to groups that had at least 1 percent of country population in the 1990s, Fearon identifies 822 ethnic and "ethnoreligious" groups in 160 countries. This variable reflects the probability that two randomly selected people from a given country will belong to different such groups. The variable thus ranges from 0 (perfectly homogeneous) to 1 (highly fragmented). The values are assumed to be constant for all years.

Variable citation: Fearon, J. D. (2003). Ethnic and cultural diversity by country. *Journal of Economic Growth*, 8(2), 195–222

2.11.2.9 Plurality Group (fe_plural)

Long tag: qog_oecd_cs_fe_plural

Original tag: fe_plural

Description:

Based on the same set of groups, this variable reflects the population share of the largest group (plurality group) in the country. The values are assumed to be constant for all years.

Variable citation: Fearon, J. D. (2003). Ethnic and cultural diversity by country. *Journal of Economic Growth*, 8(2), 195–222

2.11.2.10 Overall Global Gender Gap Index (gggi_ggi)

Long tag: qog_oecd_cs_gggi_ggi

Original tag: gggi_ggi

Description:

The Global Gender Gap Index (0 to 1, where 1 indicates no gap) examines the gap between men and women in four fundamental categories (subindexes): Economic Participation and Opportunity, Educational Attainment, Health and Survival and Political Empowerment.

Variable citation: World Economic Forum. (2021). The global gender gap report 2021 [All Rights Reserved]. `https://www.weforum.org/reports/ab6795a1-960c-42b2-b3d5-587eccda6023`

2.11.2.11 Displaced people (1-5 Higher displacement) (gpi_dic)

Long tag: qog_oecd_cs_gpi_dic

Original tag: gpi_dic

Description:

Refugees by territory of origin (starting in 2010 this indicator also includes the number of internally displaced people by country) as percentage of the country's total population. Sclaed 1 to 5, 5 being a higher percentage of internal displacement. Source: UNHCR Statistical Yearbook and Internal Displacement Monitoring Center.

Variable citation: Institute for Economics and Peace. (2021). Global peace index 2021: Measuring peace in a complex world [Accessed 09-11-2021]. `http://visionofhumanity.org/reports`

2.11.2.12 Global Peace Index (1-5 Less peaceful) (gpi_gpi)

Long tag: qog_oecd_cs_gpi_gpi

Original tag: gpi_gpi

Description:

The GPI (Scaled 1 to 5, 5 being least peaceful) measures a country's level of Negative Peace using three domains of peacefulness. The first domain, Ongoing Domestic and International Conflict, investigates the extent to which countries are involved in internal and external conflicts, as well as their role and duration of involvement in conflicts.

The second domain evaluates the level of harmony or discord within a nation; ten indicators broadly assess what might be described as Societal Safety and Security. The assertion is that low crime rates, minimal terrorist activity and violent demonstrations, harmonious relations with neighbouring countries, a stable political scene and a small proportion of the population being internally displaced or made refugees can be equated with peacefulness.

Seven further indicators are related to a country's Militarisation-reflecting the link between a country's level of military build-up and access to weapons and its level of peacefulness, both domestically and internationally. Comparable data on military expenditure as a percentage of GDP and the number of armed service officers per head are gauged, as are financial contributions to UN peacekeeping missions.

Variable citation: Institute for Economics and Peace. (2021). Global peace index 2021: Measuring peace in a complex world [Accessed 09-11-2021]. `http://visionofhumanity.org/reports`

2.11.2.13 Incarceration (1-5 Higher incarceration) (gpi_jail)

Long tag: qog_oecd_cs_gpi_jail

Original tag: gpi_jail

Description:

Prison population rates per 100,000 of the national population. Sclaed 1 to 5, 5 having a higher incarceration rate. Source: International Centre for Prison Studies, King's College London, World Prison Population List.

Variable citation: Institute for Economics and Peace. (2021). Global peace index 2021: Measuring peace in a complex world [Accessed 09-11-2021]. `http://visionofhumanity.org/reports`

2.11.2.14 Safety and Security (1-5 Less secure) (gpi_ss)

Long tag: qog_oecd_cs_gpi_ss

Original tag: gpi_ss

Description:

Societal Safety and Security (Scaled 1 to 5, 5 being less secure) is one of the three subdomains of the GPI. Low crime rates, minimal terrorist activity and violent demonstrations, harmonious relations with neighbouring countries, a stable political scene and a small proportion of the population being internally displaced or made refugees can be equated with peacefulness.

Variable citation: Institute for Economics and Peace. (2021). Global peace index 2021: Measuring peace in a complex world [Accessed 09-11-2021]. `http://visionofhumanity.org/reports`

2.11.2.15 Population (in millions) (pwt_pop)

Long tag: qog_oecd_cs_pwt_pop

Original tag: pwt_pop

Description:
Population (in millions).

Variable citation: Feenstra, R. C., Inklaar, R., & Timmer, M. P. (2015). The next generation of the penn world table. *The American Economic Review*, 105(10), 3150–3182. `www.ggdc.net/pwt`

2.11.2.16 Ethnolinguistic fractionalization (1985) (r_elf85)

Long tag: qog_oecd_cs_r_elf85

Original tag: r_elf85

Description:
Ethnolinguistic fractionalization 1985: Reflects probability that two randomly selected people from a given country will not belong to the same ethnolinguistic group, where the latter is defined without collapsing any sub-groups in the sources. Original source: Roeder (2001).

Variable citation: Roeder, P. G. (2001). Ethnolinguistic fractionalization (ELF) indices, 1961 and 1985. `http://pages.ucsd.edu//elf.htm`

2.11.2.17 Cinema expenditure per capita (une_cinexp)

Long tag: qog_oecd_cs_une_cinexp

Original tag: une_cinexp

Description:
Cinema expenditure per capita.

Variable citation: UNESCO. (2020). Unesco institute for statistics. `http://data.uis.unesco.org/`

2.11.2.18 Screen per capita (per 100,000 inhabitants) (une_screen)

Long tag: qog_oecd_cs_une_screen

Original tag: une_screen

Description:
Number of cinema screen per capita (per 100,000 inhabitants).

Variable citation: UNESCO. (2020). Unesco institute for statistics. `http://data.uis.unesco.org/`

2.11.2.19 Women political empowerment index (vdem_gender)

Long tag: qog_oecd_cs_vdem_gender

Original tag: vdem_gender

Description:
Women political empowerment index. Question: How politically empowered are women?

Clarifications: Women's political empowerment is defined as a process of increasing capacity for women, leading to greater choice, agency, and participation in societal decision-making. It is understood to incorporate three equally-weighted dimensions: fundamental civil liberties, women's open discussion of political issues and participation in civil society organizations, and the descriptive representation of women in formal political positions. Aggregation: The index is formed by taking the average of women's civil liberties index, women's civil society participation index, and women's political participation index.

Variable citation: Coppedge, M., Gerring, J., Knutsen, C. H., Lindberg, S. I., Teorell, J., Alizada, N., Altman, D., Bernhard, M., Cornell, A., Fish, M. S., Gastaldi, L., Gjerløw, H., Glynn, A., Hicken, A., Hindle, G., Ilchenko, N., Krusell, J., Luhrmann, A., Maerz, S. F., . . . Ziblatt, D. (2021). V-dem [country-year/country-date] dataset v11.1. `https://doi.org/10.23696/vdemds21` Pemstein, D., Marquardt, K. L., Tzelgov, E., Wang, Y.-t., Medzihorsky, J., Krusell, J., Miri, F., & von Römer, J. (2021). The V-Dem measurement model: Latent variable analysis for crossnational and cross-temporal expert-coded data

2.11.2.20 Birth rate, crude (per 1,000 people) (wdi_birth)

Long tag: qog_oecd_cs_wdi_birth

Original tag: wdi_birth

Description:
Crude birth rate indicates the number of live births occurring during the year, per 1,000 population estimated at midyear. Subtracting the crude death rate from the crude birth rate provides the rate of natural increase, which is equal to the rate of population change in the absence of migration.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.2.21 Completeness of birth registration (percent) (wdi_birthreg)

Long tag: qog_oecd_cs_wdi_birthreg

Original tag: wdi_birthreg

Description:

Completeness of birth registration is the percentage of children under age 5 whose births were registered at the time of the survey. The numerator of completeness of birth registration includes children whose birth certificate was seen by the interviewer or whose mother or caretaker says the birth has been registered.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.2.22 Death rate, crude (per 1,000 people) (wdi_death)

Long tag: qog_oecd_cs_wdi_death

Original tag: wdi_death

Description:

Crude death rate indicates the number of deaths occurring during the year, per 1,000 population estimated at midyear. Subtracting the crude death rate from the crude birth rate provides the rate of natural increase, which is equal to the rate of population change in the absence of migration.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.2.23 Completeness of death registration with cause-of-death information (percent) (wdi_deathreg)

Long tag: qog_oecd_cs_wdi_deathreg

Original tag: wdi_deathreg

Description:

Completeness of death registration is the estimated percentage of deaths that are registered with their cause of death information in the vital registration system of a country.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.2.24 Fertility rate, total (births per woman) (wdi_fertility)

Long tag: qog_oecd_cs_wdi_fertility

Original tag: wdi_fertility

Description:

Total fertility rate represents the number of children that would be born to a woman if she were to live to the end of her childbearing years and bear children in accordance with age-specific fertility rates of the specified year.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.2.25 Life expectancy at birth, total (years) (wdi_lifexp)

Long tag: qog_oecd_cs_wdi_lifexp

Original tag: wdi_lifexp

Description:

Life expectancy at birth indicates the number of years a newborn infant would live if prevailing patterns of mortality at the time of its birth were to stay the same throughout its life.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.2.26 Life expectancy at birth, female (years) (wdi_lifexpf)

Long tag: qog_oecd_cs_wdi_lifexpf

Original tag: wdi_lifexpf

Description:

Life expectancy at birth for females indicates the number of years a newborn infant would live if prevailing patterns of mortality at the time of its birth were to stay the same throughout its life.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.2.27 Life expectancy at birth, male (years) (wdi_lifexpm)

Long tag: qog_oecd_cs_wdi_lifexpm

Original tag: wdi_lifexpm

Description:

Life expectancy at birth for males indicates the number of years a newborn infant would live if prevailing patterns of mortality at the time of its birth were to stay the same throughout its life.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.2.28 Mortality rate, adult, female (per 1,000 female adults) (wdi_mortf)

Long tag: qog_oecd_cs_wdi_mortf

Original tag: wdi_mortf

Description:

Adult mortality rate is the probability of dying between the ages of 15 and 60 – that is, the probability of a 15-year-old dying before reaching age 60, if subject to age-specific mortality rates of the specified year between those ages.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.2.29 Mortality rate, infant (per 1,000 live births) (wdi_mortinf)

Long tag: qog_oecd_cs_wdi_mortinf

Original tag: wdi_mortinf

Description:

Infant mortality rate is the number of infants dying before reaching one year of age, per 1,000 live births in a given year.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.2.30 Mortality rate, infant, female (per 1,000 live births) (wdi_mortinff)

Long tag: qog_oecd_cs_wdi_mortinff

Original tag: wdi_mortinff

Description:

Infant mortality rate, female is the number of female infants dying before reaching one year of age, per 1,000 female live births in a given year.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.2.31 Mortality rate, infant, male (per 1,000 live births) (wdi_mortinfm)

Long tag: qog_oecd_cs_wdi_mortinfm

Original tag: wdi_mortinfm

Description:

Infant mortality rate, male is the number of male infants dying before reaching one year of age, per 1,000 male live births in a given year.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.2.32 Mortality rate, adult, male (per 1,000 male adults) (wdi_mortm)

Long tag: qog_oecd_cs_wdi_mortm

Original tag: wdi_mortm

Description:

Adult mortality rate is the probability of dying between the ages of 15 and 60–that is, the probability of a 15-year-old dying before reaching age 60, if subject to age-specific mortality rates of the specified year between those ages.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.2.33 Mortality rate, neonatal (per 1,000 live births) (wdi_mortnn)

Long tag: qog_oecd_cs_wdi_mortnn

Original tag: wdi_mortnn

Description:

Neonatal mortality rate is the number of neonates dying before reaching 28 days of age, per 1,000 live births in a given year.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.2.34 Mortality rate, under-5 (per 1,000 live births) (wdi_mortu5)

Long tag: qog_oecd_cs_wdi_mortu5

Original tag: wdi_mortu5

Description:

Under-five mortality rate is the probability per 1,000 that a newborn baby will die before reaching age five, if subject to age-specific mortality rates of the specified year.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.2.35 Mortality rate, under-5, female (per 1,000 live births) (wdi_mortu5f)

Long tag: qog_oecd_cs_wdi_mortu5f

Original tag: wdi_mortu5f

Description:

Under-five mortality rate, female is the probability per 1,000 that a newborn female baby will die before reaching age five, if subject to female age-specific mortality rates of the specified year.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.2.36 Mortality rate, under-5, male (per 1,000 live births) (wdi_mortu5m)

Long tag: qog_oecd_cs_wdi_mortu5m

Original tag: wdi_mortu5m

Description:

Under-five mortality rate, male is the probability per 1,000 that a newborn male baby will die before reaching age five, if subject to male age-specific mortality rates of the specified year.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.2.37 Population, total (wdi_pop)

Long tag: qog_oecd_cs_wdi_pop

Original tag: wdi_pop

Description:

Total population is based on the de facto definition of population, which counts all residents regardless of legal status or citizenship. The values shown are midyear estimates.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.2.38 Population ages 0-14 (percent of total population) (wdi_pop14)

Long tag: qog_oecd_cs_wdi_pop14

Original tag: wdi_pop14

Description:

Total population between the ages 0 to 14 as a percentage of the total population. Population is based on the de facto definition of population, which counts all residents regardless of legal status or citizenship.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.2.39 Population ages 15-64 (percent of total population) (wdi_pop1564)

Long tag: qog_oecd_cs_wdi_pop1564

Original tag: wdi_pop1564

Description:
Total population between the ages 15 to 64 as a percentage of the total population. Population is based on the de facto definition of population, which counts all residents regardless of legal status or citizenship.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.2.40 Population ages 65 and above (percent of total population) (wdi_pop65)

Long tag: qog_oecd_cs_wdi_pop65

Original tag: wdi_pop65

Description:
Population ages 65 and above as a percentage of the total population. Population is based on the de facto definition of population, which counts all residents regardless of legal status or citizenship.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.2.41 Population density (people per sq. km of land area) (wdi_popden)

Long tag: qog_oecd_cs_wdi_popden

Original tag: wdi_popden

Description:
Population density is midyear population divided by land area in square kilometers. Population is based on the de facto definition of population, which counts all residents regardless of legal status or citizenship–except for refugees not permanently settled in the country of asylum, who are generally considered part of the population of their country of origin. Land area is a country's total area, excluding area under inland water bodies, national claims to continental shelf, and exclusive economic zones. In most cases the definition of inland water bodies includes major rivers and lakes.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.2.42 Population, female (percent of total population) (wdi_popf)

Long tag: qog_oecd_cs_wdi_popf

Original tag: wdi_popf

Description:
Female population is the percentage of the population that is female. Population is based on the de facto definition of population, which counts all residents regardless of legal status or citizenship.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.2.43 Population growth (annual percent) (wdi_popgr)

Long tag: qog_oecd_cs_wdi_popgr

Original tag: wdi_popgr

Description:
Annual population growth rate for year t is the exponential rate of growth of midyear population from year t-1 to t, expressed as a percentage. Population is based on the de facto definition of population, which counts all residents regardless of legal status or citizenship.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.2.44 Rural population (percent of total population) (wdi_poprul)

Long tag: qog_oecd_cs_wdi_poprul

Original tag: wdi_poprul

Description:
Rural population refers to people living in rural areas as defined by national statistical offices. It is calculated as the difference between total population and urban population.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.2.45 Rural population growth (annual percent) (wdi_poprulgr)

Long tag: qog_oecd_cs_wdi_poprulgr

Original tag: wdi_poprulgr

Description:
Rural population growth. Rural population refers to people living in rural areas as defined by national statistical offices. It is calculated as the difference between total population and urban population.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.2.46 Urban population (percent of total population) (wdi_popurb)

Long tag: qog_oecd_cs_wdi_popurb

Original tag: wdi_popurb

Description:
Urban population refers to people living in urban areas as defined by national statistical offices. The data are collected and smoothed by United Nations Population Division.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.2.47 Urban population growth (annual percent) (wdi_popurbagr)

Long tag: qog_oecd_cs_wdi_popurbagr

Original tag: wdi_popurbagr

Description:
Urban population growth. Urban population refers to people living in urban areas as defined by national statistical offices. It is calculated using World Bank population estimates and urban ratios from the United Nations World Urbanization Prospects.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.2.48 E-Participation Index . 0-1 (best) (wef_epi)

Long tag: qog_oecd_cs_wef_epi

Original tag: wef_epi

Description:
E-Participation Index . 0-1 (best). This indicator assesses the use of online services to facilitate the provision of information by governments to citizens ("e-information sharing"), interaction with stakeholders ("e-consultation"), and engagement in decision-making processes. Original sources: United Nations, Department of Economic and Social Affairs (UNDESA)

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. `http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf`

2.11.2.49 Justifiable: someone accepting a bribe (wvs_jabribe)

Long tag: qog_oecd_cs_wvs_jabribe

Original tag: wvs_jabribe

Description:
Please tell me for each of the following actions whether you think it can always be justified, never be justified, or something in between: Someone accepting a bribe in the course of their duties

1. Never justifiable
2.
3.
4.
5.
6.
7.
8.
9.
10. Always justifiable

2.11.2.52 Satisfaction with your life (wvs_satlif)

Long tag: qog_oecd_cs_wvs_satlif

Original tag: wvs_satlif

Description:

All things considered, how satisfied are you with your life as a whole these days?

1. Completely dissatisfied
2.
3.
4.
5.
6.
7.
8.
9.
10. Completely satisfied

Variable citation: Haerpfer, C., Inglehart, R., Moreno, A., Welzel, C., Kizilova, K., Diez-Medrano, J., Lagos, M., Norris, P., Ponarin, E., & et al., B. P. (2021). 2.11.3 Conflict and Military Service

This category includes variables concerning armed conflict, including civil war and terrorism, govern- ment revenue and spending related to violent conflict (military expenditure, arms imports, military personnel).

2.11.3.1 Member of an Alliance (atop_ally)

Long tag: qog_oecd_cs_atop_ally

Original tag: atop_ally

Description:
Member of an Alliance

0. Not a member of an alliance
1. Member of an alliance

Variable citation: Leeds, B., Ashley, J., Ritter, S. M., McLaughlin, M., & Long, A. G. (2002). Alliance treaty obligations and provisions, 1815–1944. *International Interactions*, 28, 237–260

2.11.3.2 Consultancy Obligation (atop_consult)

Long tag: qog_oecd_cs_atop_consult

Original tag: atop_consult

Description:
Consultancy Obligation

0. Has no Consultancy obligations
1. Has Consultancy obligations

Variable citation: Leeds, B., Ashley, J., Ritter, S. M., McLaughlin, M., & Long, A. G. (2002). Alliance treaty obligations and provisions, 1815–1944. *International Interactions*, 28, 237–260

2.11.3.3 Defensive Obligation (atop_defensive)

Long tag: qog_oecd_cs_atop_defensive

Original tag: atop_defensive

Description:
Defensive Obligation

0. Has no defensive obligations
1. Has defensive obligations

Variable citation: Leeds, B., Ashley, J., Ritter, S. M., McLaughlin, M., & Long, A. G. (2002). Alliance treaty obligations and provisions, 1815–1944. *International Interactions*, 28, 237–260

2.11.3.4 Neutrality Obligation (atop_neutrality)

Long tag: qog_oecd_cs_atop_neutrality

Original tag: atop_neutrality

Description:
Neutrality Obligation

0. Has no Neutrality obligations
1. Has Neutrality obligations

Variable citation: Leeds, B., Ashley, J., Ritter, S. M., McLaughlin, M., & Long, A. G. (2002). Alliance treaty obligations and provisions, 1815–1944. *International Interactions*, 28, 237–260

2.11.3.5 Non-Aggression Obligation (atop_nonagg)

Long tag: qog_oecd_cs_atop_nonagg

Original tag: atop_nonagg

Description:

Non-Agression Obligation

0. Has no Non-Agression obligations
1. Has Non-Agression obligations

Variable citation: Leeds, B., Ashley, J., Ritter, S. M., McLaughlin, M., & Long, A. G. (2002). Alliance treaty obligations and provisions, 1815–1944. *International Interactions*, 28, 237–260

2.11.3.6 Number of Alliances (atop_number)

Long tag: qog_oecd_cs_atop_number

Original tag: atop_number

Description:

Number of Alliances

Variable citation: Leeds, B., Ashley, J., Ritter, S. M., McLaughlin, M., & Long, A. G. (2002). Alliance treaty obligations and provisions, 1815–1944. *International Interactions*, 28, 237–260

2.11.3.7 Offensive Obligation (atop_offensive)

Long tag: qog_oecd_cs_atop_offensive

Original tag: atop_offensive

Description:

Offensive Obligation

0. Has no offensive obligations
1. Has offensive obligations

Variable citation: Leeds, B., Ashley, J., Ritter, S. M., McLaughlin, M., & Long, A. G. (2002). Alliance treaty obligations and provisions, 1815–1944. *International Interactions*, 28, 237–260

2.11.3.8 Transition Year (atop_transyr)

Long tag: qog_oecd_cs_atop_transyr

Original tag: atop_transyr

Description:

Transition Year

Variable citation: Leeds, B., Ashley, J., Ritter, S. M., McLaughlin, M., & Long, A. G. (2002). Alliance treaty obligations and provisions, 1815–1944. *International Interactions*, 28, 237–260

2.11.3.9 Global Militarization Index (bicc_gmi)

Long tag: qog_oecd_cs_bicc_gmi

Original tag: bicc_gmi

Description:

The Global Militarization Index is divided into three overarching categories: expenditure, personnel and heavy weapons. (See variables bicc_milexp, bicc_milper, and bicc_hw).

In order to increase the compatibility between different indicators and preventing extreme values from crating distortions when normalizing data, in a first step every indicator was represented in a logarithm with the factor 10. Second, all data was normalized using the formula x=(y-min)/(max-min), with min and max representing, respectively, the lowest and the highest value of the logarithm. In a third step, every indicator was weighted in accordance to a subjective factor, reflecting the relative importance attributed to it by BICC researchers. In order to calculate the final score, the weighted indicators were added together and then normalized one last time on a scale ranging from 0 to 1,000. For better comparison of individual years, all years were finally normalized.

Weighting Factors used:
Military expenditures as percentage of GDP - 5
Military expenditures in relation to health spending - 3
Military and paramilitary personnel in relation to population - 4
Military reservers in relation to population - 2
Military and paramilitary personnel in relation to physicians - 2
Heavy weapons in relation to population - 4

Variable citation: Mutschler, Max. M and Marius Bales. (2020). *Global Militarization Index 2020*. Bonn International Center for Conversion BICC. https://gmi.bicc.de/

2.11.3.10 Heavy Weapons Index (bicc_hw)

Long tag: qog_oecd_cs_bicc_hw

Original tag: bicc_hw

Description:

The GMI takes into consideration the number of an armed forces' heavy weapons in relation to the total population. Heavy weapons are defined here as any piece of military equipment which fits into either one of four categories: armored vehicles (armored personnel carriers, light tanks, main battle tanks), artillery (multiple rocket launchers, self-propelled artillery, towed artillery) above 100mm caliber, combat aircraft (attack helicopters, fixed-wing fighter aircraft), and major fighting ships (submarines, major surface combatants above corvette size).

Data on weapons holdings was collected by BICC from different sources, mainly the Military Balance from ISS. Data on small arms and light weapons (SALW) is not only extremely difficult to obtain but also unreliable and was thus not included in the GMI.

Variable citation: Mutschler, Max. M and Marius Bales. (2020). *Global Militarization Index 2020*. Bonn International Center for Conversion BICC. https://gmi.bicc.de/

2.11.3.11 Military Expenditure Index (bicc_milexp)

Long tag: qog_oecd_cs_bicc_milexp

Original tag: bicc_milexp

Description:

Military spending in relation to GDP and health spending are the most important indicators for determining the level of militarization. Financial resources which are made available via the military budget by a government are an important factor which affects capacities and size of a state's armed forces. The other indicator the GMI uses is the comparison between the total military budget and government spending on health services.

Figures for military expenditure are compiled from the data base of the Stockholm Peace Research Institute SIPRI. Even though SIPRI may currently be regarded as the most reliable source, data on military expenditure has to be treated with extreme caution. For many countries, especially in the developing world and autocratic states, the figures are but rough estimates. In cases where SIPRI does not provide any up-to-date information, we adopted the latest available figures provided they were no older than three years.

Data on gross domestic product was taken from the International Monetary Fund. Data on health expenditure used have been extracted from the data base of the World Health Organization.

Variable citation: Mutschler, Max. M and Marius Bales. (2020). *Global Militarization Index 2020*. Bonn International Center for Conversion BICC. https://gmi.bicc.de/

2.11.3.12 Military Personnel Index (bicc_milper)

Long tag: qog_oecd_cs_bicc_milper

Original tag: bicc_milper

Description:

The level of militarization is also represented by the relation of military personnel to the total population and physicians. The first and most important indicator in this category is the active (para)military personnel to the total population. Paramilitary personnel were included here, since in many countries the regular military alone does not adequately reflect the total size of the armed forces.

The main criterion for coding an organizational entity as either military or paramilitary is that the forces in question are under the direct control of the government in addition to being armed, uniformed and garrisoned.

For a comprehensive presentation of the available personnel and an adequate representation of the relative level of militarization, a second indicator in this category takes into account the percentage of reserve forces in the total population. This factor is relevant for some countries, such as Switzerland that have a comparably small standing army but a more substantial amount of available reserves within society. The third indicator compares the total amount of military and paramilitary forces with the number of physicians in a country in order to express the relation between military and non-military expertise in a society.

All data on military personnel was compiled from the Military Balance, the yearbook published by the Institute for Strategic and International Studies (IISS). Population size figures were taken from the Vital Statistics Report of the United Nations; data on the number of physicians from the World Health Organization.

Variable citation: Mutschler, Max. M and Marius Bales. (2020). *Global Militarization Index 2020*. Bonn International Center for Conversion BICC. https://gmi.bicc.de/

2.11.3.13 Political Terror Scale - Amnesty International (gd_ptsa)

Long tag: qog_oecd_cs_gd_ptsa

Original tag: gd_ptsa

Description:

Political Terror Scale Levels from the yearly country reports of Amnesty International:

1. Countries under a secure rule of law, people are not imprisoned for their view, and torture is rare or exceptional. Political murders are extremely rare.
2. There is a limited amount of imprisonment for nonviolent political activity. However, few persons are affected, torture and beatings are exceptional. Political murder is rare.
3. There is extensive political imprisonment, or a recent history of such imprisonment. Execution or other political murders and brutality may be common. Unlimited detention, with or without a trial, for political views is accepted.
4. Civil and political rights violations have expanded to large numbers of the population. Murders, disappearances, and torture are a common part of life. In spite of its generality, on this level terror affects those who interest themselves in politics or ideas.
5. Terror has expanded to the whole population. The leaders of these societies place no limits on the means or thoroughness with which they pursue personal or ideological goals.

Variable citation: Gibney, M., Cornett, L., Wood, R., Haschke, P., Arnon, D., Pisanò, A., Barrett, G., & Park, B. (2020). The political terror scale 1976-2019 [Data retrieved from the Political Terror Scale website]. `http://www.politicalterrorscale.org`

2.11.3.14 Political Terror Scale - US State Department (gd_ptss)

Long tag: qog_oecd_cs_gd_ptss

Original tag: gd_ptss

Description:

Political Terror Scale Levels from the the U.S. State Department Country Reports on Human Rights Practices:

1. Countries under a secure rule of law, people are not imprisoned for their view, and torture is rare or exceptional. Political murders are extremely rare.
2. There is a limited amount of imprisonment for nonviolent political activity. However, few persons are affected, torture and beatings are exceptional. Political murder is rare.
3. There is extensive political imprisonment, or a recent history of such imprisonment. Execution or other political murders and brutality may be common. Unlimited detention, with or without a trial, for political views is accepted.
4. Civil and political rights violations have expanded to large numbers of the population. Murders, disappearances, and torture are a common part of life. In spite of its generality, on this level terror affects those who interest themselves in politics or ideas.
5. Terror has expanded to the whole population. The leaders of these societies place no limits on the means or thoroughness with which they pursue personal or ideological goals.

2.11.3.15 Expenditure on defense, as percent of total gen. gov. exp. (gfs_def)

Long tag: qog_oecd_cs_gfs_def

Original tag: gfs_def

Description:

Total expenditure on defense, as the percentage of general government expenditure.

Variable citation: International Monetary Fund. (2019). Government finance statistics yearbook (gfsy) 2019. `https://data.imf.org/?sk=a0867067-d23c-4ebc-ad23-d3b015045405`

2.11.3.16 Ongoing Conflict (1-5 Higher intensity of conflict) (gpi_conf)

Long tag: qog_oecd_cs_gpi_conf

Original tag: gpi_conf

Description:

Ongoing Domestic and International Conflict (1 to 5, 5 refers to higher intensity of conflict) is one of the three subdomains of the GPI. It investigates the extent to which countries are involved in internal and external conflicts, as well as their role and duration of involvement in conflicts.

Variable citation: Institute for Economics and Peace. (2021). Global peace index 2021: Measuring peace in a complex world [Accessed 09-11-2021]. `http://visionofhumanity.org/reports`

2.11.3.17 Militarisation (1-5 Higher militarisation) (gpi_mil)

Long tag: qog_oecd_cs_gpi_mil

Original tag: gpi_mil

Description:
Militarisation (Scaled 1 to 5, 5 being more militarised) is one of the three subdomains of the GPI. It reflects the link between a country's level of military build-up and access to weapons and its level of peacefulness, both domestically and internationally.

Variable citation: Institute for Economics and Peace. (2021). Global peace index 2021: Measuring peace in a complex world [Accessed 09-11-2021]. `http://visionofhumanity.org/reports`

2.11.3.18 Riots and Protests after Election (nelda_rpae)

Long tag: qog_oecd_cs_nelda_rpae

Original tag: nelda_rpae

Description:
If there are protests and riots after elections, a "Yes" is coded. The riots and protests should at least somewhat be related to the handling or outcome of the election.

Variable citation: Hyde, S. D., & Marinov, N. (2012). Which elections can be lost? *Political Analysis*, 20(2), 191–201 Hyde, S. D., & Marinov, N. (2021). Codebook for national elections across democracy and autocracy dataset, 5.0. `https://nelda.co/`

2.11.3.19 Violence and Civilian Deaths before Election (nelda_vcdbe)

Long tag: qog_oecd_cs_nelda_vcdbe

Original tag: nelda_vcdbe

Description:
If there was any significant violence relating to the elections that resulted in civilian deaths, a "Yes" is coded. These deaths should be at least plausibly related to the election, though sometimes it is difficult to be certain. Deaths related to civil war that are not intended to influence the election, and are not caused by the election, should not be counted.

Variable citation: Hyde, S. D., & Marinov, N. (2012). Which elections can be lost? *Political Analysis*, 20(2), 191–201 Hyde, S. D., & Marinov, N. (2021). Codebook for national elections across democracy and autocracy dataset, 5.0. `https://nelda.co/`

2.11.3.20 Structure of central gov. expenditures, defence (oecd_gengovdistri_t1b)

Long tag: qog_oecd_cs_oecd_gengovdistri_t1b

Original tag: oecd_gengovdistri_t1b

Description:
Structure of central government expenditures, defence.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. `https://doi.org/10.1787/20752288`

2.11.3.21 Societal Violence Scale Index 1-5 (svs_ind)

Long tag: qog_oecd_cs_svs_ind

Original tag: svs_ind

Description:
The Societal Violence Scale is coded on a 5-point scale where:
1 Societal violence is limited in scope and severity, with relatively few victims and few perpetrators.
2 Societal violence is a problem, affecting a significant number of victims, albeit across few victim categories and of a less severe nature.
3 Societal violence is widespread and serious in nature. It affects a significant number of people across several victim categories.
4 Societal violence is pervasive in scope, severe in nature, assumes a variety of forms and affects a large proportion of the population typically across several victim categories and perpetrators.
5 Societal violence is ubiquitous in scope, egregious in nature and assumes a variety of forms. If affects a large proportion of the population, commonly crossing numerous victim groups and perpetrators.

Variable citation: Gibney, M., Cornett, L., & Haschke, P. (2021). The societal violence scale [Data retrieved from the Political Terror Scale website]. `http://www.politicalterrorscale.org/Data/Documentation-SVS.html`

2.11.3.22 Global Terrorism Index (voh_gti)

Long tag: qog_oecd_cs_voh_gti

Original tag: voh_gti

Description:
Global Terrorism Index.

2.11.3.23 Political Stability and Absence of Violence/Terrorism, Estimate (wbgi_pve)

Long tag: qog_oecd_cs_wbgi_pve

Original tag: wbgi_pve

Description:
Political Stability and Absence of Violence- Estimate: "Political Stability and Absence of Violence/Terrorism" measures perceptions of the likelihood of political instability and/or politically-motivated violence, including terrorism.

Variable citation: Kaufmann, D., Kraay, A., & Mastruzzi, M. (2010). The worldwide governance indicators: A summary of methodology, data and analytical issues. *World Bank Policy Research Working Paper, 5430*

2.11.3.24 Political Stability and Absence of Violence/Terrorism, Number of Sources (wbgi_pvn)

Long tag: qog_oecd_cs_wbgi_pvn

Original tag: wbgi_pvn

Description:
Political Stability and Absence of Violence - Number of Sources.

Variable citation: Kaufmann, D., Kraay, A., & Mastruzzi, M. (2010). The worldwide governance indicators: A summary of methodology, data and analytical issues. *World Bank Policy Research Working Paper, 5430*

2.11.3.25 Political Stability and Absence of Violence/Terrorism, Standard Error (wbgi_pvs)

Long tag: qog_oecd_cs_wbgi_pvs

Original tag: wbgi_pvs

Description:
Political Stability and Absence of Violence - Standard Errors.

Variable citation: Kaufmann, D., Kraay, A., & Mastruzzi, M. (2010). The worldwide governance indicators: A summary of methodology, data and analytical issues. *World Bank Policy Research Working Paper, 5430*

2.11.3.26 Armed forces personnel (percent of total labor force) (wdi_afp)

Long tag: qog_oecd_cs_wdi_afp

Original tag: wdi_afp

Description:
Armed forces personnel are active duty military personnel, including paramilitary forces if the training, organization, equipment, and control suggest they may be used to support or replace regular military forces. Labor force comprises all people who meet the International Labour Organization's definition of the economically active population.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.3.27 Armed forces personnel, total (wdi_afpt)

Long tag: qog_oecd_cs_wdi_afpt

Original tag: wdi_afpt

Description:
Armed forces personnel are active duty military personnel, including paramilitary forces if the training, organization, equipment, and control suggest they may be used to support or replace regular military forces.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.3.28 Arms exports (SIPRI trend indicator values) (wdi_armexp)

Long tag: qog_oecd_cs_wdi_armexp

Original tag: wdi_armexp

Description:
Exports - Arms transfers cover the supply of military weapons through sales, aid, gifts, and those made through manufacturing licenses. Data cover major conventional weapons such as aircraft, armored vehicles, artillery, radar systems, missiles, and ships designed for military use. Excluded are transfers of other military

equipment such as small arms and light weapons, trucks, small artillery, ammunition, support equipment, technology transfers, and other services.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.3.29 Arms imports (SIPRI trend indicator values) (wdi_armimp)

Long tag: qog_oecd_cs_wdi_armimp

Original tag: wdi_armimp

Description:

Imports - Arms transfers cover the supply of military weapons through sales, aid, gifts, and those made through manufacturing licenses. Data cover major conventional weapons such as aircraft, armored vehicles, artillery, radar systems, missiles, and ships designed for military use. Excluded are transfers of other military equipment such as small arms and light weapons, trucks, small artillery, ammunition, support equipment, technology transfers, and other services.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.3.30 Military expenditure (percent of GDP) (wdi_expmil)

Long tag: qog_oecd_cs_wdi_expmil

Original tag: wdi_expmil

Description:

Military expenditure (percent of GDP). Military expenditures data from SIPRI are derived from the NATO definition, which includes all current and capital expenditures on the armed forces, including peacekeeping forces; defense ministries and other government agencies engaged in defense projects; paramilitary forces, if these are judged to be trained and equipped for military operations; and military space activities. Such expenditures include military and civil personnel, including retirement pensions of military personnel and social services for personnel; operation and maintenance; procurement; military research and development; and military aid (in the military expenditures of the donor country). Excluded are civil defense and current expenditures for previous military activities, such as for veterans' benefits, demobilization, conversion, and destruction of weapons. This definition cannot be applied for all countries, however, since that would require much more detailed information than is available about what is included in military budgets and off-budget military expenditure items. (For example, military budgets might or might not cover civil defense, reserves and auxiliary forces, police and paramilitary forces, dual-purpose forces such as military and civilian police, military grants in kind, pensions for military personnel, and social security contributions paid by one part of government to another).

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.3.31 Military expenditure (percent of general government expenditure) (wdi_expmilge)

Long tag: qog_oecd_cs_wdi_expmilge

Original tag: wdi_expmilge

Description:

Military expenditure (percent of central government expenditure). Military expenditures data from SIPRI are derived from the NATO definition, which includes all current and capital expenditures on the armed forces, including peacekeeping forces; defense ministries and other government agencies engaged in defense projects; paramilitary forces, if these are judged to be trained and equipped for military operations; and military space activities. Such expenditures include military and civil personnel, including retirement pensions of military personnel and social services for personnel; operation and maintenance; procurement; military research and development; and military aid (in the military expenditures of the donor country). Excluded are civil defense and current expenditures for previous military activities, such as for veterans' benefits, demobilization, conversion, and destruction of weapons. This definition cannot be applied for all countries, however, since that would require much more detailed information than is available about what is included in military budgets and off-budget military expenditure items. (For example, military budgets might or might not cover civil defense, reserves and auxiliary forces, police and paramilitary forces, dual-purpose forces such as military and civilian police, military grants in kind, pensions for military personnel, and social security contributions paid by one part of government to another.)

2.11.3.32 Terrorism incidence. 1 (very high) - 100 (no incidence) (wef_ti)

Long tag: qog_oecd_cs_wef_ti

Original tag: wef_ti

Description:
Terrorism incidence. 1 (very high) - 100 (no incidence). This custom-built index is the weighted average of the number of terrorism-related casualties (injuries and fatalities) and the number of terrorist attacks, discounted by time. Each component is normalized separately and then averaged. Values range from 1 [highest incidence] to 100 [no incidence]. Original sources: National Consortium for the Study of Terrorism and Responses to Terrorism (START)

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. `http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf`

2.11.3.33 Number of cabinet ministers with a military title (wgov_minmil)

Long tag: qog_oecd_cs_wgov_minmil

Original tag: wgov_minmil

Description:
The number of cabinet ministers with a military title. It should be noted that the authors have not done any extra checks on this variable, and solely have relied on the information provided in the "Chief of State And Cabinet Members Of Foreign Governments" directory. The information is based on national customs. Thus, in some countries military titles are consistently used, while this is not the case in other countries, and the authors therefore encourage researchers to be cautious when using this variable.

Variable citation: Nyrup, J., & Bramwell, S. (2020). Who governs? a new global dataset on members of cabinets. *American Political Science Review*, 114(4), 1366–1374

2.11.3.34 Number of people with a military title, based on all entries for the country in (wgov_totmil)

Long tag: qog_oecd_cs_wgov_totmil

Original tag: wgov_totmil

Description:
The number of people with a military title, based on all entries for the country in the dataset. It should be noted that the authors have not done any extra checks on this variable, and solely have relied on the information provided in the "Chief of State And Cabinet Members Of Foreign Governments" directory. The information is based on national customs. Thus, in some countries military titles are consistently used, while this is not the case in other countries, and the authors therefore encourage researchers to be cautious when using this variable.

2.11.4 Quality of Government

This category includes variables that are the core features of QoG (impartiality, bureaucratic quality and corruption) as well as measures that are broader (rule of law and transparency).

2.11.4.1 The Bayesian Corruption Indicator (bci_bci)

Long tag: qog_oecd_cs_bci_bci

Original tag: bci_bci

Description:
The BCI index values lie between 0 and 100, with an increase in the index corresponding to a raise in the level

of corruption. This is a first difference with CPI and WGI where an increase means that the level of corruption has decreased.

There exists no objective scale on which to measure the perception of corruption and the exact scaling you use is to a large extent arbitrary. However, the authors were able to give the index an absolute scale: zero corresponds to a situation where all surveys say that there is absolutely no corruption. On the other hand, when the index is one, all surveys say that corruption is as bad as it gets according to their scale. This is another difference with CPI and WGI, where the scaling is relative. They are rescaled such that WGI has mean 0 and a standard deviation of 1 in each year, while CPI always lies between 0 and 100.

In contrast, the actual range of values of the BCI will change in each year, depending how close countries come to the situation where everyone agrees there is no corruption at all (0), or that corruption is as bad as it can get (100).

The absolute scale of the BCI index was obtained by rescaling all the individual survey data such that zero corresponds to the lowest possible level of corruption and 1 to the highest one. We subsequently rescaled the BCI index such that when all underlying indicators are zero (one), the expected value of the BCI index is zero (hundred).

2.11.4.2 The standard deviation of The Bayesian Corruption Indicator (bci_bcistd)

Long tag: qog_oecd_cs_bci_bcistd

Original tag: bci_bcistd

Description:
The standard deviation of the Bayesian Corruption Index.

Variable citation: Standaert, S. (2015). Divining the level of corruption: A bayesian state-space approach. *Journal of Comparative Economics*, 43(3), 782–803. https://doi.org/10.1016/j.jce.2014.05.007

2.11.4.3 State Fragility Index (cspf_sfi)

Long tag: qog_oecd_cs_cspf_sfi

Original tag: cspf_sfi

Description:
A country's fragility is closely associated with its state capacity to manage conflict; make and implement public policy; and deliver essential services and its systemic resilience in maintaining system coherence, cohesion, and quality of life; responding effectively to challenges and crises, and sustaining progressive development. State Fragility = Effectiveness Score + Legitimacy Score (25 points possible).

Variable citation: Marshall, M. G., & Elzinga-Marshall, G. (2017). Global report 2017: Conflict, governance, and state fragility

2.11.4.4 Functioning of Government (fh_fog)

Long tag: qog_oecd_cs_fh_fog

Original tag: fh_fog

Description:
Functioning of Government - The variable examines in what extent the freely elected head of government and a national legislative representative determine the policies of the government; if the government is free from pervasive corruption; and if the government is accountable to the electorate between elections and operates with openness and transparency. Countries are graded between 0 (worst) and 12 (best).

Variable citation: Freedom House. (2021a). Freedom in the world 2021. `https://freedomhouse.org/report/freedom-world`

2.11.4.5 ICRG Indicator of Quality of Government (icrg_qog)

Long tag: qog_oecd_cs_icrg_qog

Original tag: icrg_qog

Description:
The mean value of the ICRG variables "Corruption", "Law and Order" and "Bureaucracy Quality", scaled 0-1. Higher values indicate higher quality of government.

Corruption (originally 6 points)
This is an assessment of corruption within the political system. Such corruption is a threat to foreign investment for several reasons: it distorts the economic and financial environment; it reduces the efficiency of government and business by enabling people to assume positions of power through patronage rather than ability; and, last but not least, it introduces an inherent instability into the political process. The most

common form of corruption met directly by business is financial corruption in the form of demands for special payments and bribes connected with import and export licenses, exchange controls, tax assessments, police protection, or loans. Such corruption can make it difficult to conduct business effectively, and in some cases may force the withdrawal or withholding of an investment. Although the measure takes such corruption into account, it is more concerned with actual or potential corruption in the form of excessive patronage, nepotism, job reservations, "favor-for-favors", secret party funding, and suspiciously close ties between politics and business. According to ICRG, these insidious sorts of corruption are potentially of much greater risk to foreign business in that they can lead to popular discontent, unrealistic and inefficient controls on the state economy, and encourage the development of the black market. The greatest risk in such corruption is that at some time it will become so overweening, or some major scandal will be suddenly revealed, so as to provoke a popular backlash, resulting in a fall or overthrow of the government, a major reorganizing or restructuring of the country's political institutions, or, at worst, a breakdown in law and order, rendering the country ungovernable.

Law and order (originally 6 points)
Law and Order are assessed separately, with each sub-component comprising zero to three points. The Law sub-component is an assessment of the strength and impartiality of the legal system, while the Order sub-component is an assessment of popular observance of the law. Thus, a country can enjoy a high rating in terms of its judicial system, but a low rating if it suffers from a very high crime rate or if the law is routinely ignored without effective sanction (for example, widespread illegal strikes).

Bureaucracy Quality (originally 4 points)
The institutional strength and quality of the bureaucracy is another shock absorber that tends to minimize revisions of policy when governments change. Therefore, high points are given to countries where the bureaucracy has the strength and expertise to govern without drastic changes in policy or interruptions in government services. In these low-risk countries, the bureaucracy tends to be somewhat autonomous from political pressure and to have an established mechanism for recruitment and training. Countries that lack the cushioning effect of a strong bureaucracy receive low points because a change in government tends to be traumatic in terms of policy formulation and day-to-day administrative functions.

The component variables can be purchased at http://epub.prsgroup.com/products/icrg

Variable citation: PRS Group et al. (2021). International country risk guide

2.11.4.6 Hanson Sigman State Capacity Index (lld_capacity)

Long tag: qog_oecd_cs_lld_capacity

Original tag: lld_capacity

Description:
Hanson and Sigman's State Capacity Estimate. Three dimensions of state capacity that their estimate relies on are extractive capacity, coercive capacity, and administrative capacity. The authors use Bayesian latent variable analysis to estimate state capacity at the conjunction of indicators related to these dimensions.

Variable citation: Hanson, J. K., & Sigman, R. (2021). Leviathans latent dimensions: Measuring state capacity for comparative political research. *The Journal of Politics*, 83(4), 1495–1510

2.11.4.7 Standard Deviation for Hanson Sigman State Capacity Index (lld_capstd)

Long tag: qog_oecd_cs_lld_capstd

Original tag: lld_capstd

Description:
Standard Deviation for Hanson and Sigman's State Capacity Estimate.

Variable citation: Hanson, J. K., & Sigman, R. (2021). Leviathans latent dimensions: Measuring state capacity for comparative political research. *The Journal of Politics*, 83(4), 1495–1510

2.11.4.8 The Property Right Protection Index (prp_prp)

Long tag: qog_oecd_cs_prp_prp

Original tag: prp_prp

Description:
The Poperty Rights Index measures (the perception of) the security of property rights, separately from other aspects of the rule of law. It combines all publicly available information on the perception of the security of property rights (18 singular indicators of property rights).

Variable citation: Ouattara, B., & Standaert, S. (2020). Property rights revisited. *European Journal of Political Economy*, 64, 101895. `https://doi.org/https://doi.org/10.1016/j.ejpoleco.2020.101895`

2.11.4.9 Estimated variance of the PRP point estimate (prp_std)

Long tag: qog_oecd_cs_prp_std

Original tag: prp_std

Description:
Estimated variance of the Property Rights Protection estimate.

Variable citation: Ouattara, B., & Standaert, S. (2020). Property rights revisited. *European Journal of Political Economy*, 64, 101895. https://doi.org/https://doi.org/10.1016/j.ejpoleco.2020.101895

2.11.4.10 Sustainable Policies (sgi_pp)

Long tag: qog_oecd_cs_sgi_pp

Original tag: sgi_pp

Description:
This pillar of the SGI examines each country's sustainable policy performance in terms of three dimensions of sustainable development. If the goal of politics is to promote sustainable development, and if citizens are to be empowered to live their lives in accordance with their own individual talents, then governments must be able to establish and maintain the social, economic and environmental conditions for such well-being and empowerment. The conditions for social progress must be generated by suitable outcomes in certain policy fields. Such outcomes are examined by the Policy Performance pillar, which is comprised of 16 policy fields grouped in terms of economic, social and environmental sustainability. Each policy field is addressed by a qualitative assessment and additional quantitative data. The point here is to examine domestic policymaking as well as the extent to which governments actively contribute to the provision of global public goods. The areas examined are:

1. Economic Policies: economy, labor markets, taxes, budgets, research and innovation, global financial system.
2. Social Policies: education, social inclusion, health, families, pensions, integration policy, safe living conditions, global inequalities.
3. Environmental Policies: environment policy, global environmental protection.

Variable citation: Schiller, C., & Hellmann, T. (2020). Sustainable governance indicators 2020 [Date accessed: 12 December 2021]. *Bertelsmann Stiftung*. https://www.sgi-network.org

2.11.4.11 Basic Human Needs (SPI) (spi_bn)

Long tag: qog_oecd_cs_spi_bn

Original tag: spi_bn

Description:
Basic Human Needs is one of the three components of the SPI, which are used to calculate the overall Social Progress Index. It assesses a population's capacity to survive with adequate nourishment and basic medical care, clean water, sanitation, adequate shelter, and personal safety.

Variable citation: The Social Progress Imperative. (2020). Social progress index. www.socialprogress.org

2.11.4.12 Foundations of Wellbeing (SPI) (spi_fob)

Long tag: qog_oecd_cs_spi_fob

Original tag: spi_fob

Description:
Foundations of Wellbeing is one of the three components of the SPI, which are used to calculate the overall Social Progress Index. It highlights the extent to which a country's residents can gain a basic education, obtain information and communicate freely, benefit from a modern healthcare system, and live in a healthy environment conducive to a long life.

Variable citation: The Social Progress Imperative. (2020). Social progress index. www.socialprogress.org

2.11.4.13 Opportunity (SPI) (spi_opp)

Long tag: qog_oecd_cs_spi_opp

Original tag: spi_opp

Description:
Opportunity is one of the three components of the SPI, which are used to calculate the overall Social Progress Index. Indicators on personal rights, personal freedom and choice, inclusiveness, and access to advanced education are used to assess the level of opportunity.

Variable citation: The Social Progress Imperative. (2020). Social progress index. www.socialprogress.org

2.11.4.14 Social Progress Index (spi_ospi)

Long tag: qog_oecd_cs_spi_ospi

Original tag: spi_ospi

Description:
Overall Social Progress Index. It aims to assess the capacity of a society to meet the basic human needs of its citizens, establish the building blocks that allow citizens and communities to enhance and sustain the quality of their lives, and create the conditions for all individuals to reach their full potential.

Variable citation: The Social Progress Imperative. (2020). Social progress index. `www.socialprogress.org`

2.11.4.15 Corruption Perceptions Index (ti_cpi)

Long tag: qog_oecd_cs_ti_cpi

Original tag: ti_cpi

Description:
Corruption Perceptions Index. Scale of 0-100 where a 0 equals the highest level of perceived corruption and 100 equals the lowest level of perceived corruption.

Variable citation: Transparency International. (2021). Corruption perception index 2020 [Licensed under CC-BY-ND 4.0]. `http://www.transparency.org/cpi`

2.11.4.16 Corruption Perceptions Index - max range (ti_cpi_max)

Long tag: qog_oecd_cs_ti_cpi_max

Original tag: ti_cpi_max

Description:
Corruption Perceptions Index - Max Range. Highest possible value of the CPI for a country according to the 95percent confidence interval.

Variable citation: Transparency International. (2021). Corruption perception index 2020 [Licensed under CC-BY-ND 4.0]. `http://www.transparency.org/cpi`

2.11.4.17 Corruption Perceptions Index - min range (ti_cpi_min)

Long tag: qog_oecd_cs_ti_cpi_min

Original tag: ti_cpi_min

Description:
Corruption Perceptions Index - Min Range. Lowest possible value of the CPI for a country according to the 95percent confidence interval.

Variable citation: Transparency International. (2021). Corruption perception index 2020 [Licensed under CC-BY-ND 4.0]. `http://www.transparency.org/cpi`

2.11.4.18 Standard Error for Corruption Perceptions Index (ti_se)

Long tag: qog_oecd_cs_ti_se

Original tag: ti_se

Description:
Standard Error for Corruption Perceptions Index.

Variable citation: Transparency International. (2021). Corruption perception index 2020 [Licensed under CC-BY-ND 4.0]. `http://www.transparency.org/cpi`

2.11.4.19 Academic Freedom Index (vdem_academ)

Long tag: qog_oecd_cs_vdem_academ

Original tag: vdem_academ

Description:
Academic freedom index. To what extent is academic freedom respected?

Clarifications: Academic freedom is understood as the right of academics, without constriction by prescribed doctrine, to freedom of teaching and discussion, freedom in carrying out research and disseminating and publishing the results thereof, freedom to express freely their opinion about the institution or system in which they work, freedom from institutional censorship and freedom to participate in professional or representative academic bodies (UNESCO 1997 Recommendation concerning the Status of Higher-Education Teaching Personnel). The Academic
Freedom Index is designed to provide an aggregated measure that captures the de facto realization of academic freedom, including the degree to which higher-education institutions are autonomous. Aggregation: The index is formed by point estimates drawn from a Bayesian factor analysis model including the following indicators: freedom to research and teach, freedom of academic exchange and dissemination, institutional autonomy, campus integrity, freedom of academic and cultural expression.

2.11.4.20 Political corruption index (vdem_corr)

Long tag: qog_oecd_cs_vdem_corr

Original tag: vdem_corr

Description:

Political corruption. Question: How pervasive is political corruption?

Clarification: The directionality of the V-Dem corruption index runs from less corrupt to more corrupt (unlike the other V-Dem variables that generally run from less democratic to more democratic situation). The corruption index includes measures of six distinct types of corruption that cover both different areas and levels of the polity realm, distinguishing between executive, legislative and judicial corruption. Within the executive realm, the measures also distinguish between corruption mostly pertaining to bribery and corruption due to embezzlement. Finally, they differentiate between corruption in the highest echelons of the executive (at the level of the rulers/cabinet) on the one hand, and in the public sector at large on the other. The measures thus tap into several distinguished types of corruption: both 'petty' and 'grand'; both bribery and theft; both corruption aimed and influencing law making and that affecting implementation. Aggregation: The index is arrived at by taking the average of (a) public sector corruption index; (b) executive corruption index; (c) the indicator for legislative corruption; and (d) the indicator for judicial corruption. In other words, these four different government spheres are weighted equally in the resulting index. V-Dem replaces missing values for countries with no legislature by only taking the average of (a), (b) and (d).

Variable citation: Coppedge, M., Gerring, J., Knutsen, C. H., Lindberg, S. I., Teorell, J., Alizada, N., Altman, D., Bernhard, M., Cornell, A., Fish, M. (2021). The V-Dem measurement model: Latent variable analysis for crossnational and cross-temporal expert-coded data

2.11.4.21 Election vote buying (vdem_elvotbuy)

Long tag: qog_oecd_cs_vdem_elvotbuy

Original tag: vdem_elvotbuy

Description:

Election vote buying. Question: In this national election, was there evidence of vote and/or turnout buying?

Clarification: Vote and turnout buying refers to the distribution of money or gifts to individuals, families, or small groups in order to influence their decision to vote/not vote or whom to vote for. It does not include legislation targeted at specific constituencies, i.e., "porkbarrel" legislation. V-Dem uses a specifically designed measurement model to provide country-year point estimates, aggregated from multiple codings submitted by country experts by taking disagreement and measurement error into account. In this version of the variable, used in the QoG dataset, V-Dem has linearly translated the measurement model point estimates back to the original ordinal scale of each variable as an interval measure.

Variable citation: Coppedge, M., Gerring, J., Knutsen, C. H., Lindberg, S. I., Teorell, J., Alizada, N., Altman, D., Bernhard, M., Cornell, A., Fish, M. S., Gastaldi, L., Gjerløw, H., Glynn, A., Hicken, A., Hindle, G., Ilchenko, N., Krusell, J., Luhrmann, A., Maerz, S. F., . . . Ziblatt, D. (2021). 2.11.4.22 Executive bribery and corrupt exchanges (vdem_exbribe)

Long tag: qog_oecd_cs_vdem_exbribe

Original tag: vdem_exbribe

Description:

Executive bribery and corrupt exchanges. Question: How routinely do members of the executive (the head of state, the head of government, and cabinet ministers), or their agents, grant favors in exchange for bribes, kickbacks, or other material inducements? V-Dem uses a specifically designed measurement model to provide country-year point estimates, aggregated from multiple codings submitted by country experts by taking disagreement and measurement error into account. In this version of the variable, used in the QoG dataset, V-Dem has linearly translated the measurement model point estimates back to the original ordinal scale of each variable as an interval measure.

Variable citation: Coppedge, M., Gerring, J., Knutsen, C. H., Lindberg, S. I., Teorell, J., Alizada, N., Altman, D., Bernhard, M., Cornell, A., Fish, M. 2.11.4.23 Public sector corrupt exchanges (vdem_excrptps)

Long tag: qog_oecd_cs_vdem_excrptps

Original tag: vdem_excrptps

Description:

Public sector corrupt exchanges. Question: How routinely do public sector employees grant favors in exchange for bribes, kickbacks, or other material inducements?

Clarification: When responding to this question, we would like you to think about a typical person employed by the public sector, excluding the military. If you think there are large discrepancies between branches of the public sector, between the national/federal and subnational/state level, or between the core bureaucracy and employees working with public service delivery, please try to average them out before stating your response. V-Dem uses a specifically designed measurement model to provide country-year point estimates, aggregated from multiple codings submitted by country experts by taking disagreement and measurement error into account. In this version of the variable, used in the QoG dataset, V-Dem has linearly translated the measurement model point estimates back to the original ordinal scale of each variable as an interval measure.

2.11.4.24 Executive corruption index (vdem_execorr)

Long tag: qog_oecd_cs_vdem_execorr

Original tag: vdem_execorr

Description:

Executive corruption index. Question: How routinely do members of the executive, or their agents grant favors in exchange for bribes, kickbacks, or other material inducements, and how often do they steal, embezzle, or misappropriate public funds or other state resources for personal or family use?

Clarification: The directionality of the V-Dem corruption index runs from less corrupt to more corrupt (unlike the other V-Dem variables that generally run from less democratic to more democratic situation). Aggregation: The index is formed by taking the average of the point estimates from a Bayesian factor analysis model of the indicators for executive bribery and executive embezzlement.

Variable citation: Coppedge, M., Gerring, J., Knutsen, C. H., Lindberg, S. I., Teorell, J., Alizada, N., Altman, D., Bernhard, M., Cornell, A., Fish, M. S., Gastaldi, L., Gjerløw, H., Glynn, A., Hicken, A., Hindle, G., Ilchenko, N., Krusell, J., Luhrmann, A., Maerz, S. F., . . . Ziblatt, D. (2021). 2.11.4.29 Control of Corruption, Estimate (wbgi_cce)

Long tag: qog_oecd_cs_wbgi_cce

Original tag: wbgi_cce

Description:
Control of Corruption - Estimate: "Control of Corruption" measures perceptions of corruption, conventionally defined as the exercise of public power for private gain. The particular aspect of corruption measured by the various sources differs somewhat, ranging from the frequency of "additional payments to get things done", to the effects of corruption on the business environment, to measuring "grand corruption" in the political arena or in the tendency of elite forms to engage in "state capture".

Variable citation: Kaufmann, D., Kraay, A., & Mastruzzi, M. (2010). The worldwide governance indicators: A summary of methodology, data and analytical issues. *World Bank Policy Research Working Paper, 5430*

2.11.4.30 Control of Corruption, Number of Sources (wbgi_ccn)

Long tag: qog_oecd_cs_wbgi_ccn

Original tag: wbgi_ccn

Description:
Control of Corruption - Number of Sources.

Variable citation: Kaufmann, D., Kraay, A., & Mastruzzi, M. (2010). The worldwide governance indicators: A summary of methodology, data and analytical issues. *World Bank Policy Research Working Paper, 5430*

2.11.4.31 Control of Corruption, Standard Error (wbgi_ccs)

Long tag: qog_oecd_cs_wbgi_ccs

Original tag: wbgi_ccs

Description:
Control of Corruption - Standard Errors.

Variable citation: Kaufmann, D., Kraay, A., & Mastruzzi, M. (2010). The worldwide governance indicators: A summary of methodology, data and analytical issues. *World Bank Policy Research Working Paper, 5430*

2.11.4.32 Government Effectiveness, Estimate (wbgi_gee)

Long tag: qog_oecd_cs_wbgi_gee

Original tag: wbgi_gee

Description:
Government Effectiveness - Estimate: "Government Effectiveness" combines into a single grouping responses on the quality of public service provision, the quality of the bureaucracy, the competence of civil servants, the independence of the civil service from political pressures, and the credibility of the government's commitment to policies. The main focus of this index is on "inputs" required for the government to be able to produce and implement good policies and deliver public goods.

Variable citation: Kaufmann, D., Kraay, A., & Mastruzzi, M. (2010). The worldwide governance indicators: A summary of methodology, data and analytical issues. *World Bank Policy Research Working Paper, 5430*

2.11.4.33 Government Effectiveness, Number of Sources (wbgi_gen)

Long tag: qog_oecd_cs_wbgi_gen

Original tag: wbgi_gen

Description:
Government Effectiveness - Number of Sources.

Variable citation: Kaufmann, D., Kraay, A., & Mastruzzi, M. (2010). The worldwide governance indicators: A summary of methodology, data and analytical issues. *World Bank Policy Research Working Paper, 5430*

2.11.4.34 Government Effectiveness, Standard Error (wbgi_ges)

Long tag: qog_oecd_cs_wbgi_ges

Original tag: wbgi_ges

Description:
Government Effectiveness - Standard Errors.

Variable citation: Kaufmann, D., Kraay, A., & Mastruzzi, M. (2010). The worldwide governance indicators: A summary of methodology, data and analytical issues. *World Bank Policy Research Working Paper, 5430*

2.11.4.35 Incidence of corruption. 0-100 (best) (wef_cor)

Long tag: qog_oecd_cs_wef_cor

Original tag: wef_cor

Description:
Incidence of corruption. 0-100 (best). The Corruption Perceptions Index aggregates data from a number of different sources that provide perceptions of business people and country experts of the level on corruption in the public sector. The scale ranges from 0 [highly corrupt] to 100 [very clean]. Original sources: Transparency International

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. `http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf`

2.11.5 Environment

This category includes geographical characteristics such as the geographical region, land area etc. as well as indicators describing the state of the environment, ecosystems and materials, the impact of human beings on the environment, and environmental protection.

2.11.5.1 Threatened Species: Amphibians (bi_amphibians)

Long tag: qog_oecd_cs_bi_amphibians

Original tag: bi_amphibians

Description:
Threatened Species: Amphibians (Total number of species reported as endangered per country)

Variable citation: International Union for Conservation of Nature and Natural Resources. (2021). The IUCN Red List of Threatened Species. Version 2021-3. http://www.iucnredlist.org

2.11.5.12 Built-up land footprint- Ecological Footprint of Consumption (GHA per person) (ef_bul)

Long tag: qog_oecd_cs_ef_bul

Original tag: ef_bul

Description:
Built-up Land - Ecological Footprint in consumption. The built-up land Footprint is calculated based on the area of land covered by human infrastructure: transportation, housing, and industrial structures. Built-up land may occupy what would previously have been cropland. Measured in Global Hectares (GHA) per person.

Variable citation: Global Footprint Network. (2021). National footprint accounts data set (1961-2017), 2021 edition [c 2021 Global Footprint Network. National Footprint Accounts, 2021 Edition, www.footprintnetwork.org.]. `http://www.footprintnetwork.org`

2.11.5.13 Carbon footprint - Ecological Footprint of Consumption (GHA per person) (ef_carb)

Long tag: qog_oecd_cs_ef_carb

Original tag: ef_carb

Description:
Carbon - Ecological Footprint in consumption. The carbon Footprint, which represents the carbon dioxide emissions from burning fossil fuels in addition to the embodied carbon in imported goods. The carbon Footprint component is represented by the area of forest land required to sequester these carbon emissions.

Currently, the carbon Footprint is the largest portion of humanity's Footprint.

Variable citation: Global Footprint Network. (2021). National footprint accounts data set (1961-2017), 2021 edition [c 2021 Global Footprint Network. National Footprint Accounts, 2021 Edition, www.footprintnetwork.org.]. `http://www.footprintnetwork.org`

2.11.5.14 Cropland footprint - Ecological Footprint of Consumption (GHA per person) (ef_crop)

Long tag: qog_oecd_cs_ef_crop

Original tag: ef_crop

Description:

Cropland - Ecological Footprint in consumption. Cropland is the most bioproductive of all the land-use types and consists of areas used to produce food and fibre for human consumption, feed for livestock, oil crops, and rubber. The cropland Footprint includes crop products allocated to livestock and aquaculture feed mixes, and those used for fibres and materials. Due to lack of globally consistent data sets, current cropland Footprint calculations do not yet take into account the extent to which farming techniques or unsustainable agricultural practices may cause long-term degradation of soil.

Variable citation: Global Footprint Network. (2021). National footprint accounts data set (1961-2017), 2021 edition [c 2021 Global Footprint Network. National Footprint Accounts, 2021 Edition, www.footprintnetwork.org.]. `http://www.footprintnetwork.org`

2.11.5.15 Total Ecological Footprint of Consumption (GHA per person) (ef_ef)

Long tag: qog_oecd_cs_ef_ef

Original tag: ef_ef

Description:

Total - Ecological Footprint in consumption. Measured in Global Hectares (GHA) per person.

Variable citation: Global Footprint Network. (2021). National footprint accounts data set (1961-2017), 2021 edition [c 2021 Global Footprint Network. National Footprint Accounts, 2021 Edition, www.footprintnetwork.org.]. `http://www.footprintnetwork.org`

2.11.5.16 Fish footprint - Ecological Footprint of Consumption (GHA per person) (ef_fg)

Long tag: qog_oecd_cs_ef_fg

Original tag: ef_fg

Description:

Fishing Ground - Ecological Footprint in consumption. The fishing grounds Footprint is calculated based on estimates of the maximum sustainable catch for a variety of fish species. These sustainable catch estimates are converted into an equivalent mass of primary production based on the various species' trophic levels. This estimate of maximum harvestable primary production is then divided amongst the continental shelf areas of the world. Fish caught and used in aquaculture feed mixes are included. Measured in Global Hectares (GHA) per person.

Variable citation: Global Footprint Network. (2021). National footprint accounts data set (1961-2017), 2021 edition [c 2021 Global Footprint Network. National Footprint Accounts, 2021 Edition, www.footprintnetwork.org.]. `http://www.footprintnetwork.org`

2.11.5.17 Forest product footprint - Ecological Footprint of Consumption (GHA per person) (ef_for)

Long tag: qog_oecd_cs_ef_for

Original tag: ef_for

Description:

Forest Production - Ecological Footprint in consumption. The forest product Footprint, which is calculated based on the amount of lumber, pulp, timber products, and fuel wood consumed by a population on a yearly basis. Measured in Global Hectares (GHA) per person.

Variable citation: Global Footprint Network. (2021). National footprint accounts data set (1961-2017), 2021 edition [c 2021 Global Footprint Network. National Footprint Accounts, 2021 Edition, www.footprintnetwork.org.]. `http://www.footprintnetwork.org`

2.11.5.18 Grazing footprint - Ecological Footprint of Consumption (GHA per person) (ef_gl)

Long tag: qog_oecd_cs_ef_gl

Original tag: ef_gl

Description:
Grazing - Ecological Footprint in consumption. Grazing land is used to raise livestock for meat, dairy, hide, and wool products. The grazing land Footprint is calculated by comparing the amount of livestock feed available in a country with the amount of feed required for all livestock in that year, with the remainder of feed demand assumed to come from grazing land. Measured in Global Hectares (GHA) per person.

Variable citation: Global Footprint Network. (2021). National footprint accounts data set (1961-2017), 2021 edition [c 2021 Global Footprint Network. National Footprint Accounts, 2021 Edition, www.footprintnetwork.org.]. `http://www.footprintnetwork.org`

2.11.5.19 Agriculture (0-100) (epi_agr)

Long tag: qog_oecd_cs_epi_agr

Original tag: epi_agr

Description:
Agriculture. It is constructed from the Sustainable Nitrogen Management Index, which measures the Euclidean distance from an ideal point with optimal nitrogen use efficiency (NUE) and crop yield.

Variable citation: Wendling, Z., Emerson, J., de Sherbinin, A., Esty, D., & M.A. Levy, e. a. (2020). 2020 environmental performance index [Date accessed: 20 December 2021]. *New Haven, CT: Yale Center for Environmental Law and Policy.* `https://epi.envirocenter.yale.edu/`

2.11.5.20 Air Quality (0-100) (epi_air)

Long tag: qog_oecd_cs_epi_air

Original tag: epi_air

Description:
Air Quality. It measures household air pollution (HAP) as the health risk posed by the incomplete combustion of solid fuels, using the number of age-standardized disability-adjusted life-years (DALYs) lost per 100,000 persons due to this risk. PM2.5 exposure: as a measure of chronic exposure, it uses the population-weighted average ambient concentration of PM2.5 in each country. PM2.5 exceedance: as a measure of acute exposure, it uses the proportion of the population in each year that is exposed to ambient PM2.5 concentrations that exceed World Health Organization (WHO) thresholds of 10, 15, 25, and 35 micrograms per meter cubed. These four proportions are averaged to produce a summary of the distribution of exposure levels in the country's population.

Variable citation: Wendling, Z., Emerson, J., de Sherbinin, A., Esty, D., & M.A. Levy, e. a. (2020). 2020 environmental performance index [Date accessed: 20 December 2021]. *New Haven, CT: Yale Center for Environmental Law and Policy.* `https://epi.envirocenter.yale.edu/`

2.11.5.21 Pollution Emissions (0-100) (epi_ape)

Long tag: qog_oecd_cs_epi_ape

Original tag: epi_ape

Description:
Air Pollution. The Pollution Emissions issue category measures progress on managing the emissions of two primary air pollutants. It is composed of two indicators, adjusted emission growth rates for SO2 and NOX.

Variable citation: Wendling, Z., Emerson, J., de Sherbinin, A., Esty, D., & M.A. Levy, e. a. (2020). 2020 environmental performance index [Date accessed: 20 December 2021]. *New Haven, CT: Yale Center for Environmental Law and Policy.* `https://epi.envirocenter.yale.edu/`

2.11.5.22 Biodiversity and Habitat (0-100) (epi_bdh)

Long tag: qog_oecd_cs_epi_bdh

Original tag: epi_bdh

Description:
Biodiversity and Habitat. This indicator includes:

1 Terrestrial biome protection (national weights). The percentage of biomes in protected areas, weighted by national composition of biomes.
2 Terrestrial biome protection (global weights). The percentage of biomes in protected areas, weighted by global composition of biomes.
3 Marine protected areas. The percentage of marine protected areas (MPAs) within a country's exclusive economic zone (EEZ).
4 Species Protection Index. The average area of species' distributions in a country with protected areas.
5 Protected Area Representativeness Index. The extent to which terrestrial protected areas are ecologically representative.
6 Species Habitat Index. The proportion of habitat within a country remaining, relative to a baseline set in the year 2001.
7 Biodiversity Habitat Index. The effects of habitat loss, degradation, and

fragmentation on the expected retention of terrestrial biodiversity.

Variable citation: Wendling, Z., Emerson, J., de Sherbinin, A., Esty, D., & M.A. Levy, e. a. (2020). 2020 environmental performance index [Date accessed: 20 December 2021]. *New Haven, CT: Yale Center for Environmental Law and Policy*. `https://epi.envirocenter.yale.edu/`

2.11.5.23 Climate Change (0-100) (epi_cch)

Long tag: qog_oecd_cs_epi_cch

Original tag: epi_cch

Description:

The Climate Change issue category measures progress to combat global climate change, which exacerbates all other environmental threats and imperils human health and safety. It is composed of eight indicators: adjusted emission growth rates for four greenhouse gases (CO2, CH4, F-gases, and N2O) and one climate pollutant (black carbon); growth rate in CO2 emissions from land cover; greenhouse gas intensity growth rate; and greenhouse gas emissions per capita.

Variable citation: Wendling, Z., Emerson, J., de Sherbinin, A., Esty, D., & M.A. Levy, e. a. (2020). 2020 environmental performance index [Date accessed: 20 December 2021]. *New Haven, CT: Yale Center for Environmental Law and Policy*. `https://epi.envirocenter.yale.edu/`

2.11.5.24 Ecosystem Services (0-100) (epi_ecs)

Long tag: qog_oecd_cs_epi_ecs

Original tag: epi_ecs

Description:

The new Ecosystem Services issue category recognizes the important services ecosystems provide to human and environmental well-being, including carbon sequestration and storage, biodiversity habitat, nutrient cycling, and coastal protection. It consists of three indicators to evaluate the state of these ecosystems: tree cover loss (percent90), along with two new pilot indicators for 2020 - grassland loss (percent5) and wetland loss (percent5).

Variable citation: Wendling, Z., Emerson, J., de Sherbinin, A., Esty, D., & M.A. Levy, e. a. (2020). 2020 environmental performance index [Date accessed: 20 December 2021]. *New Haven, CT: Yale Center for Environmental Law and Policy*. `https://epi.envirocenter.yale.edu/`

2.11.5.25 Environmental Performance Index (0-100) (epi_epi)

Long tag: qog_oecd_cs_epi_epi

Original tag: epi_epi

Description:

The 2020 Environmental Performance Index (EPI) scores 180 countries on 32 performance indicators across ten issue categories covering environmental health and ecosystem vitality. The 2020 EPI represents a composite index. The EPI researchers begin by gathering data on 32 individual metrics of environmental performance. These metrics are aggregated into a hierarchy beginning with eleven issue categories: Air Quality, Sanitation
Drinking Water, Heavy Metals, Waste Management, Biodiversity and Habitat, Ecosystem Services, Fisheries, Climate Change, Pollution Emissions, Water Resources, and Agriculture.

These issue categories are then combined into two policy objectives, Environmental Health and Ecosystem Vitality, and then finally consolidated into the overall EPI. To allow for meaningful comparisons, the EPI researchers construct scores for each of the 32 indicators, placing them onto a common scale where 0 indicates worst performance and 100 indicates best performance. How far a country is from achieving international targets of sustainability determines its placement on this scale.

Variable citation: Wendling, Z., Emerson, J., de Sherbinin, A., Esty, D., & M.A. Levy, e. a. (2020). 2020 environmental performance index [Date accessed: 20 December 2021]. *New Haven, CT: Yale Center for Environmental Law and Policy*. `https://epi.envirocenter.yale.edu/`

2.11.5.26 Ecosystem Vitality (0-100) (epi_ev)

Long tag: qog_oecd_cs_epi_ev

Original tag: epi_ev

Description:

The Ecosystem Vitality policy objective measures how well countries are preserving, protecting, and enhancing ecosystems and the services they provide. It comprises 60percent of the total EPI score and is made up of seven issue categories: Biodiversity
Habitat (25percent), Ecosystem Services (10percent), Fisheries (10percent), Climate Change (40percent), Pollution Emissions (5percent), Agriculture (5percent), and Water Resources (5percent).

Variable citation: Wendling, Z., Emerson, J., de Sherbinin, A., Esty, D., & M.A. Levy, e. a. (2020). 2020 environmental performance index [Date accessed: 20 December 2021]. *New Haven, CT: Yale Center for Environmental Law and Policy.* `https://epi.envirocenter.yale.edu/`

2.11.5.27 Sanitation and Drinking Water (0-100) (epi_h2o)

Long tag: qog_oecd_cs_epi_h2o

Original tag: epi_h2o

Description:

Sanitation
Drinking Water. This indicator includes:

1 Unsafe sanitation. EPI researchers measure sanitation as the proportion of a country's population exposed to health risks from their access to sanitation, defined by the primary toilet type used by households.
2 Unsafe drinking water. EPI researchers measure drinking water as the proportion of a country's population exposed to health risks from their access to drinking water, defined by the primary water source used by households and the household water treatment, or the treatment that happens at the point of water collection.

Both sanitation and drinking water are measured using the number of age-standardized disability-adjusted life-years (DALYs) lost per 100,000 persons. Minimizing the health risks posed from unsafe sanitation and drinking water is a vital step in evaluating a country's ability to maintain clean water systems and minimize contact with dangerous bacteria and viruses.

Variable citation: Wendling, Z., Emerson, J., de Sherbinin, A., Esty, D., & M.A. Levy, e. a. (2020). 2020 environmental performance index [Date accessed: 20 December 2021]. *New Haven, CT: Yale Center for Environmental Law and Policy.* `https://epi.envirocenter.yale.edu/`

2.11.5.28 Heavy Metals (0-100) (epi_hmt)

Long tag: qog_oecd_cs_epi_hmt

Original tag: epi_hmt

Description:

Heavy Metals. It includes the indicator Lead Exposure. EPI researchers measure lead exposure using the number of age-standardized disability-adjusted life-years (DALYs) lost per 100,000 persons due to this risk.

Variable citation: Wendling, Z., Emerson, J., de Sherbinin, A., Esty, D., & M.A. Levy, e. a. (2020). 2020 environmental performance index [Date accessed: 20 December 2021]. *New Haven, CT: Yale Center for Environmental Law and Policy.* `https://epi.envirocenter.yale.edu/`

2.11.5.29 Waste Management (0-100) (epi_wmg)

Long tag: qog_oecd_cs_epi_wmg

Original tag: epi_wmg

Description:

The Waste Management issue category recognizes the threats of solid waste to human health. It is based on one indicator, controlled solid waste.

Variable citation: Wendling, Z., Emerson, J., de Sherbinin, A., Esty, D., & M.A. Levy, e. a. (2020). 2020 environmental performance index [Date accessed: 20 December 2021]. *New Haven, CT: Yale Center for Environmental Law and Policy.* `https://epi.envirocenter.yale.edu/`

2.11.5.30 Water Resources (0-100) (epi_wrs)

Long tag: qog_oecd_cs_epi_wrs

Original tag: epi_wrs

Description:

The Water Resources issue category measures the extent to which humans are mitigating our threats to aquatic ecosystems. It is based on one indicator: wastewater treatment.

Variable citation: Wendling, Z., Emerson, J., de Sherbinin, A., Esty, D., & M.A. Levy, e. a. (2020). 2020 environmental performance index [Date accessed: 20 December 2021]. *New Haven, CT: Yale Center for Environmental Law and Policy.* `https://epi.envirocenter.yale.edu/`

2.11.5.31 Agricultural land (percent of Land area) (fao_luagr)

2.11.5.44 Expenditure on environment protection, as percent of total gen. gov. exp. (gfs_envr)

Long tag: qog_oecd_cs_gfs_envr

Original tag: gfs_envr

Description:
Total expenditure on environment protection, as the percentage of general government expenditure.

Variable citation: International Monetary Fund. (2019). Government finance statistics yearbook (gfsy) 2019. `https://data.imf.org/?sk=a0867067-d23c-4ebc-ad23-d3b015045405`

2.11.5.45 The Region of the Country (ht_region)

Long tag: qog_oecd_cs_ht_region

Original tag: ht_region

Description:
This is a tenfold politico-geographic classification of world regions, based on a mixture of two considerations: geographical proximity (with the partial exception of category 5 below) and demarcation by area specialists having contributed to a regional understanding of democratization. The categories are as follow:
1. Eastern Europe and post Soviet Union (including Central Asia)
2. Latin America (including Cuba, Haiti
the Dominican Republic)
3. North Africa
the Middle East (including Israel, Turkey
Cyprus)
4. Sub-Saharan Africa
5. Western Europe and North America (including Australia
New Zealand)
6. East Asia (including Japan
Mongolia)
7. South-East Asia
8. South Asia
9. The Pacific (excluding Australia
New Zealand)
10. The Caribbean (including Belize, Guyana
Suriname, but excluding Cuba, Haiti
the Dominican Republic)

2.11.5.46 Natural Resource Protection Indicator (nrmi_nrpi)

Long tag: qog_oecd_cs_nrmi_nrpi

Original tag: nrmi_nrpi

Description:
Natural Resource Protection Indicator assesses whether a country is protecting at least 17percent of all of its biomes (e.g. deserts, forests, grasslands, aquatic, and tundra). It is designed to capture the comprehensiveness of a government's commitment to habitat preservation and biodiversity protection. The World Wildlife Fund provides the underlying biome data, and the United Nations Environment Program World Conservation Monitoring Center provides the underlying data on protected areas.

Variable citation: Center for International Earth Science Information Network - CIESIN - Columbia University. (2019). Natural resource protection and child health indicators, 2020 release [Accessed on: 20-12-2021]. `https://doi.org/10.7927/r6mv-sv82`

2.11.5.47 Percentage of desert in 2012 (nunn_desert)

Long tag: qog_oecd_cs_nunn_desert

Original tag: nunn_desert

Description:

The percentage of the land surface area of each country covered by sandy desert, dunes, rocky or lava flows, was calculated on the basis of the desert layer of the Collins Bartholomew World Premium digital map data (Collins Bartholomew, 2005) and the country boundaries described above. This was initially computed as a cruder measure of soil (in)fertility for an early draft of the paper and is no longer used in the final version. Nunn and Puga have left it in the dataset in case it is of use to other researchers.

Variable citation: Nunn, N., & Puga, D. (2012). Ruggedness: The blessing of bad geography in Africa. *Review of Economics and Statistics*, 94(1), 20–36

2.11.5.48 Average distance to nearest ice-free coast (1000 km) in 2012 (nunn_dist_coast)

Long tag: qog_oecd_cs_nunn_dist_coast

Original tag: nunn_dist_coast

Description:

Average distance to nearest ice-free coast (1000 km). To calculate the average distance to the closest ice-free coast in each country, Nunn and Puga first compute the distance to the nearest ice-free coast for every point in the country in equi-rectangular projection with standard parallels at 30 degrees, on the basis of sea and sea ice area features contained in the fifth edition of the Digital Chart of the World (US National Imagery and Mapping Agency, 2000) and the country boundaries described above. Then Nunn and Puga average this distance across all land in each country not covered by inland water features. Units are thousands of kilometres.

Variable citation: Nunn, N., & Puga, D. (2012). Ruggedness: The blessing of bad geography in Africa. *Review of Economics and Statistics*, 94(1), 20–36

2.11.5.49 Percentage within 100 km of ice-free coast in 2012 (nunn_near_coast)

Long tag: qog_oecd_cs_nunn_near_coast

Original tag: nunn_near_coast

Description:

Within 100 km of ice-free coast. On the basis of the same data used to calculate the average distance to nearest ice-free coast, Nunn and Puga calculate the percentage of the land surface area of each country that is within 100 km of the nearest ice-free coast.

Variable citation: Nunn, N., & Puga, D. (2012). Ruggedness: The blessing of bad geography in Africa. *Review of Economics and Statistics*, 94(1), 20–36

2.11.5.50 Ruggedness (Terrain Ruggedness Index, 100 m) in 2012 (nunn_rugged)

Long tag: qog_oecd_cs_nunn_rugged

Original tag: nunn_rugged

Description:

This is the Terrain Ruggedness Index originally devised by Riley, DeGloria, and Elliot (1999) to quantify topographic heterogeneity in wildlife habitats providing concealment for preys and lookout posts. The source of elevation data is GTOPO30 (US Geological Survey, 1996), a global elevation data set developed through a collaborative international effort led by staff at the US Geological Survey's Center for Earth Resources Observation and Science (EROS). Elevations in GTOPO30 are regularly spaced at 30 arc-seconds across the entire surface of the Earth on a map using a geographic projection, so the sea-level surface distance between two adjacent grid points on a meridian is half a nautical mile or, equivalently, 926 metres. After calculating the Terrain Ruggedness Index for each point on the grid, Nunn and Puga average across all grid cells in the country not covered by water to obtain the average terrain ruggedness of the country's land area. Since the sea-level surface that corresponds to a 30 by 30 arcsecond cell varies in proportion to the cosine of its latitude, when calculating the average terrain ruggedness — or the average of any other variable — for each country, Nunn and Puga weigh each cell by its latitude-varying sea-level surface. Nunn and Puga assign land to countries — for this and other variables — using digital boundary data based on the fifth edition of the Digital Chart of the World (US National Imagery and Mapping Agency, 2000), which they have updated to reflect 2000 country boundaries using information from the International Organization for Standardization ISO 3166 Maintenance Agency and other sources. Nunn and Puga exclude areas covered by permanent inland water area features contained in the same edition of the Digital Chart of the World. The units for the terrain ruggedness index correspond to the units used to measure elevation differences. In our calculation, ruggedness is measured in hundreds of metres of elevation difference for grid points 30 arc-seconds (926 metres on the equator or any meridian) apart.

Variable citation: Nunn, N., & Puga, D. (2012). Ruggedness: The blessing of bad geography in Africa. *Review of Economics and Statistics*, 94(1), 20–36

2.11.5.51 Percentage of tropical climate in 2012 (nunn_tropical)

Long tag: qog_oecd_cs_nunn_tropical

Original tag: nunn_tropical

Description:

Tropical climate. Using detailed temperature and precipitation data from the Climatic Research Unit of the University of East Anglia and the Global Precipitation Climatology Centre of the German Nunn and Pugaather Service, Kottek, Grieser, Beck, Rudolf, and Rubel (2006) classify each cell on a 30 arc-minute grid covering the entire land area of the Earth into one of 31 climates in the widely-used Köppen-Geiger climate classification. Based on these data and the country boundaries described above, Nunn and Puga calculate the percentage of the land surface area of each country that has any of the four Köppen-Geiger tropical climates.

Variable citation: Nunn, N., & Puga, D. (2012). Ruggedness: The blessing of bad geography in Africa. *Review of Economics and Statistics*, 94(1), 20–36

Total amount generated of municipal waste.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. https://doi.org/10.1787/20752288

2.11.5.58 The Ocean Health Index (ohi_ohi)

Long tag: qog_oecd_cs_ohi_ohi

Original tag: ohi_ohi

Description:
The Ocean Health Index establishes reference points for achieving ten widely accepted socio-ecological objectives, and scores the oceans adjacent to 171 countries and territories on how successfully they deliver these goals. Evaluated globally and by country, these ten public goals represent the wide range of benefits that a healthy ocean can provide; each country's overall score is the average of its respective goal scores. The ten socio-ecological objectives are: Food Provision, Artisanal Fishing Opportunities, Natural Products, Carbon Storage, Coastal Protection, Coastal Livelihoods
Economies, Tourism
Recreation, Sense of Place, Clean Waters, Biodiversity.

2.11.5.59 Sustainable Policies: Environmental Policies - Overall (sgi_en)

Long tag: qog_oecd_cs_sgi_en

Original tag: sgi_en

Description:
Sustainable Policies: Environmental Policies (Environment, Global Environmental Protection).

Variable citation: Schiller, C., & Hellmann, T. (2020). Sustainable governance indicators 2020 [Date accessed: 12 December 2021]. *Bertelsmann Stiftung*. https://www.sgi-network.org

2.11.5.60 Sustainable Policies: Environmental Policies - Environment (sgi_enen)

Long tag: qog_oecd_cs_sgi_enen

Original tag: sgi_enen

Description:
Sustainable Policies: Environmental Policies - Environment (Environmental Policy, Energy Productivity, Greenhouse Gas Emissions, Particulate Matter, Water Usage, Waste Generation, Material Recycling, Biodiversity, Renewable Energy).

Variable citation: Schiller, C., & Hellmann, T. (2020). Sustainable governance indicators 2020 [Date accessed: 12 December 2021]. *Bertelsmann Stiftung*. https://www.sgi-network.org

2.11.5.61 Sustainable Policies: Environmental Policies - Global Environmental Protection (sgi_enge)

Long tag: qog_oecd_cs_sgi_enge

Original tag: sgi_enge

Description:
Sustainable Policies: Environmental Policies - Global Environmental Protection (Global Environmental Policy, Multilateral Environmental Agreements, Kyoto Participation and Achievements).

Variable citation: Schiller, C., & Hellmann, T. (2020). Sustainable governance indicators 2020 [Date accessed: 12 December 2021]. *Bertelsmann Stiftung*. https://www.sgi-network.org

2.11.5.62 Arable land (percent of land area) (wdi_araland)

Long tag: qog_oecd_cs_wdi_araland

Original tag: wdi_araland

Description:
Arable land includes land defined by the FAO as land under temporary crops (double-cropped areas are counted once), temporary meadows for mowing or for pasture, land under market or kitchen gardens, and land temporarily fallow. Land abandoned as a result of shifting cultivation is excluded.

Variable citation: World Bank. (2021). World development indicators. https://databank.worldbank.org/source/world-development-indicators

2.11.5.63 Land area (sq. km) (wdi_area)

Long tag: qog_oecd_cs_wdi_area

Original tag: wdi_area

Description:

Land area is a country's total area, excluding area under inland water bodies, national claims to continental shelf, and exclusive economic zones. In most cases the definition of inland water bodies includes major rivers and lakes.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.5.64 CO2 emissions (metric tons per capita) (wdi_co2)

Long tag: qog_oecd_cs_wdi_co2

Original tag: wdi_co2

Description:

Carbon dioxide emissions are those stemming from the burning of fossil fuels and the manufacture of cement. They include carbon dioxide produced during consumption of solid, liquid, and gas fuels and gas flaring.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.5.65 Forest area (percent of land area) (wdi_forest)

Long tag: qog_oecd_cs_wdi_forest

Original tag: wdi_forest

Description:

Forest area is land under natural or planted stands of trees of at least 5 meters in situ, whether productive or not, and excludes tree stands in agricultural production systems (for example, in fruit plantations and agroforestry systems) and trees in urban parks and gardens.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.5.66 Internally displaced persons, new displacement-disasters (number) (wdi_idpdis)

Long tag: qog_oecd_cs_wdi_idpdis

Original tag: wdi_idpdis

Description:

Internally displaced persons, new displacement associated with disasters (number of people). Internally displaced persons are defined according to the 1998 Guiding Principles (http://www.internal-displacement.org/publications/1998/ocha-guiding-principles-on-internal-displacement) as people or groups of people who have been forced or obliged to flee or to leave their homes or places of habitual residence, in particular as a result of armed conflict, or to avoid the effects of armed conflict, situations of generalized violence, violations of human rights, or natural or human-made disasters and who have not crossed an international border. "New Displacement" refers to the number of new cases or incidents of displacement recorded, rather than the number of people displaced. This is done because people may have been displaced more than once.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.5.67 Average precipitation in depth (mm per year) (wdi_precip)

Long tag: qog_oecd_cs_wdi_precip

Original tag: wdi_precip

Description:

Average precipitation is the long-term average in depth (over space and time) of annual precipitation in the country. Precipitation is defined as any kind of water that falls from clouds as a liquid or a solid.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.5.68 Confidence: The Environmental Protection Movement (wvs_confenv)

Long tag: qog_oecd_cs_wvs_confenv

Original tag: wvs_confenv

Description:

I am going to name a number of organizations. For each one, could you tell me how much confidence you have

in them: The Environmental Protection Movement

1. None at all
2. Not very much
3. Quite a lot
4. A great deal

2.11.6 Education

This category includes a variety of indicators related to education, such as key characteristics of the educational system (public expenditure, gross enrollment, number of teachers), the students (age, gender, educational level), and educational outcomes (mean scores, literacy rates, numbers of researchers and scientists).

2.11.6.1 Average Schooling Years, Female (bl_asyf)

Long tag: qog_oecd_cs_bl_asyf

Original tag: bl_asyf

Description:
Average schooling years, females between 15 and 64 years old.

Variable citation: Barro, R. J., & Lee, J. W. (2013). A new data set of educational attainment in the world, 1950–2010. *Journal of Development Economics*, 104, 184–198

2.11.6.2 Average Schooling Years, Male (bl_asym)

Long tag: qog_oecd_cs_bl_asym

Original tag: bl_asym

Description:
Average schooling years, males between 15 and 64 years old.

Variable citation: Barro, R. J., & Lee, J. W. (2013). A new data set of educational attainment in the world, 1950–2010. *Journal of Development Economics*, 104, 184–198

2.11.6.3 Average Schooling Years, Female and Male (bl_asymf)

Long tag: qog_oecd_cs_bl_asymf

Original tag: bl_asymf

Description:
Average schooling years, females and males between 15 and 64 years old.

Variable citation: Barro, R. J., & Lee, J. W. (2013). A new data set of educational attainment in the world, 1950–2010. *Journal of Development Economics*, 104, 184–198

2.11.6.4 Percentage with Tertiary Schooling, Female (bl_lhf)

Long tag: qog_oecd_cs_bl_lhf

Original tag: bl_lhf

Description:
Percentage with tertiary schooling, females between 15 and 64 years old.

Variable citation: Barro, R. J., & Lee, J. W. (2013). A new data set of educational attainment in the world, 1950–2010. *Journal of Development Economics*, 104, 184–198

2.11.6.5 Percentage with Tertiary Schooling, Male (bl_lhm)

Long tag: qog_oecd_cs_bl_lhm

Original tag: bl_lhm

Description:
Percentage with tertiary schooling, males between 15 and 64 years old.

Variable citation: Barro, R. J., & Lee, J. W. (2013). A new data set of educational attainment in the world, 1950–2010. *Journal of Development Economics*, 104, 184–198

2.11.6.6 Percentage with Tertiary Schooling, Female and Male (bl_lhmf)

Long tag: qog_oecd_cs_bl_lhmf

Original tag: bl_lhmf

Description:
Percentage with tertiary schooling, females and males between 15 and 64 years old.

Variable citation: Barro, R. J., & Lee, J. W. (2013). A new data set of educational attainment in the world, 1950–2010. *Journal of Development Economics*, 104, 184–198

2.11.6.7 Percentage with Primary Schooling, Female (bl_lpf)

Long tag: qog_oecd_cs_bl_lpf

Original tag: bl_lpf

Description:
Percentage with primary schooling, females between 15 and 64 years old.

Variable citation: Barro, R. J., & Lee, J. W. (2013). A new data set of educational attainment in the world, 1950–2010. *Journal of Development Economics*, 104, 184–198

2.11.6.8 Percentage with Primary Schooling, Male (bl_lpm)

Long tag: qog_oecd_cs_bl_lpm

Original tag: bl_lpm

Description:
Percentage with primary schooling, males between 15 and 64 years old.

Variable citation: Barro, R. J., & Lee, J. W. (2013). A new data set of educational attainment in the world, 1950–2010. *Journal of Development Economics*, 104, 184–198

2.11.6.9 Percentage with Primary Schooling, Female and Male (bl_lpmf)

Long tag: qog_oecd_cs_bl_lpmf

Original tag: bl_lpmf

Description:
Percentage with primary schooling, females and males between 15 and 64 years old.

Variable citation: Barro, R. J., & Lee, J. W. (2013). A new data set of educational attainment in the world, 1950–2010. *Journal of Development Economics*, 104, 184–198

2.11.6.10 Percentage with Secondary Schooling, Female (bl_lsf)

Long tag: qog_oecd_cs_bl_lsf

Original tag: bl_lsf

Description:
Percentage with secondary schooling, females between 15 and 64 years old.

Variable citation: Barro, R. J., & Lee, J. W. (2013). A new data set of educational attainment in the world, 1950–2010. *Journal of Development Economics*, 104, 184–198

2.11.6.11 Percentage with Secondary Schooling, Male (bl_lsm)

Long tag: qog_oecd_cs_bl_lsm

Original tag: bl_lsm

Description:
Percentage with secondary schooling, males between 15 and 64 years old.

Variable citation: Barro, R. J., & Lee, J. W. (2013). A new data set of educational attainment in the world, 1950–2010. *Journal of Development Economics*, 104, 184–198

2.11.6.12 Percentage with Secondary Schooling, Female and Male (bl_lsmf)

Long tag: qog_oecd_cs_bl_lsmf

Original tag: bl_lsmf

Description:
Percentage with secondary schooling, females and males between 15 and 64 years old.

Variable citation: Barro, R. J., & Lee, J. W. (2013). A new data set of educational attainment in the world, 1950–2010. *Journal of Development Economics*, 104, 184–198

2.11.6.13 Percentage with No Schooling, Female (bl_luf)

Long tag: qog_oecd_cs_bl_luf

Original tag: bl_luf

Description:
Percentage with no schooling, females between 15 and 64 years old.

Variable citation: Barro, R. J., & Lee, J. W. (2013). A new data set of educational attainment in the world, 1950–2010. *Journal of Development Economics*, 104, 184–198

2.11.6.14 Percentage with No Schooling, Male (bl_lum)

Long tag: qog_oecd_cs_bl_lum

Original tag: bl_lum

Description:
Percentage with no schooling, males between 15 and 64 years old.

Variable citation: Barro, R. J., & Lee, J. W. (2013). A new data set of educational attainment in the world, 1950–2010. *Journal of Development Economics*, 104, 184–198

2.11.6.28 Expenditure on education, as percent of total gen. gov. exp. (gfs_educ)

Long tag: qog_oecd_cs_gfs_educ

Original tag: gfs_educ

Description:
Total expenditure on education, as the percentage of general government expenditure.

Variable citation: International Monetary Fund. (2019). Government finance statistics yearbook (gfsy) 2019. `https://data.imf.org/?sk=a0867067-d23c-4ebc-ad23-d3b015045405`

2.11.6.29 Global Gender Gap Educational Attainment Subindex (gggi_eas)

Long tag: qog_oecd_cs_gggi_eas

Original tag: gggi_eas

Description:
Educational Attainment (0 to 1, where 1 indicates no gap). This subindex captures the gap between women's and men's current access to education through ratios of women to men in primary-, secondary- and tertiary-level education. A longer-term view of the country's ability to educate women and men in equal numbers is captured through the ratio of the female literacy rate to the male literacy rate.

2.11.6.38 Official entrance age to early childhood education (years) (une_oaeece)

Long tag: qog_oecd_cs_une_oaeece

Original tag: une_oaeece

Description:

Official entrance age to early childhood education (years). Age at which students would enter a given programme or level of education assuming they start at the official entrance age for the lowest level of education, study full-time throughout and progressed through the system without repeating or skipping a grade. The theoretical entrance age to a given programme or level is typically, but not always, the most common entrance age.

Variable citation: UNESCO. (2020). Unesco institute for statistics. `http://data.uis.unesco.org/`

2.11.6.39 Official entrance age to primary education (years) (une_oaepe)

Long tag: qog_oecd_cs_une_oaepe

Original tag: une_oaepe

Description:

Official entrance age to primary education (years). Age at which students would enter a given programme or level of education assuming they start at the official entrance age for the lowest level of education, study full-time throughout and progressed through the system without repeating or skipping a grade. The theoretical entrance age to a given programme or level is typically, but not always, the most common entrance age.

Variable citation: UNESCO. (2020). Unesco institute for statistics. `http://data.uis.unesco.org/`

2.11.6.40 Official entrance age to compulsory education (years) (une_oeace)

Long tag: qog_oecd_cs_une_oeace

Original tag: une_oeace

Description:

Official entrance age to compulsory education (years). Age at which students would enter a given programme or level of education assuming they start at the official entrance age for the lowest level of education, study full-time throughout and progressed through the system without repeating or skipping a grade. The theoretical entrance age to a given programme or level is typically, but not always, the most common entrance age.

Variable citation: UNESCO. (2020). Unesco institute for statistics. `http://data.uis.unesco.org/`

2.11.6.41 Official entrance age to lower secondary education (years) (une_oeals)

Long tag: qog_oecd_cs_une_oeals

Original tag: une_oeals

Description:

Official entrance age to lower secondary education (years). Age at which students would enter a given programme or level of education assuming they start at the official entrance age for the lowest level of education, study full-time throughout and progressed through the system without repeating or skipping a grade. The theoretical entrance age to a given programme or level is typically, but not always, the most common entrance age.

Variable citation: UNESCO. (2020). Unesco institute for statistics. `http://data.uis.unesco.org/`

2.11.6.42 Official entrance age to post-secondary non-tertiary education (years) (une_oeapsnt)

Long tag: qog_oecd_cs_une_oeapsnt

Original tag: une_oeapsnt

Description:

Official entrance age to post-secondary non-tertiary education (years). Age at which students would enter a given programme or level of education assuming they start at the official entrance age for the lowest level of education, study full-time throughout and progressed through the system without repeating or skipping a grade. The theoretical entrance age to a given programme or level is typically, but not always, the most common entrance age.

Variable citation: UNESCO. (2020). Unesco institute for statistics. `http://data.uis.unesco.org/`

2.11.6.43 Official entrance age to upper secondary education (years) (une_oeaus)

Long tag: qog_oecd_cs_une_oeaus

Original tag: une_oeaus

Description:

Official entrance age to upper secondary education (years). Age at which students would enter a given programme or level of education assuming they start at the official entrance age for the lowest level of education, study full-time throughout and progressed through the system without repeating or skipping a grade. The theoretical entrance age to a given programme or level is typically, but not always, the most common entrance age.

Variable citation: UNESCO. (2020). Unesco institute for statistics. `http://data.uis.unesco.org/`

2.11.6.44 Repetition rate in lower secondary general education (all grades), female (percent) (une_reprlsef)

Long tag: qog_oecd_cs_une_reprlsef

Original tag: une_reprlsef

Description:

Repetition rate in lower secondary general education (all grades), female (percent).

Variable citation: UNESCO. (2020). Unesco institute for statistics. `http://data.uis.unesco.org/`

2.11.6.45 Repetition rate in lower secondary general education (all grades), male (percent) (une_reprlsem)

Long tag: qog_oecd_cs_une_reprlsem

Original tag: une_reprlsem

Description:
Repetition rate in lower secondary general education (all grades), male (percent).

Variable citation: UNESCO. (2020). Unesco institute for statistics. `http://data.uis.unesco.org/`

2.11.6.46 Repetition rate in lower secondary general education (all grades), both sexes (percent (une_reprlset)

Long tag: qog_oecd_cs_une_reprlset

Original tag: une_reprlset

Description:
Repetition rate in lower secondary general education (all grades), both sexes (percent).

Variable citation: UNESCO. (2020). Unesco institute for statistics. `http://data.uis.unesco.org/`

2.11.6.47 Repetition rate in primary education (all grades), female (percent) (une_reprpef)

Long tag: qog_oecd_cs_une_reprpef

Original tag: une_reprpef

Description:
Repetition rate in primary education (all grades), female (percent).

Variable citation: UNESCO. (2020). Unesco institute for statistics. `http://data.uis.unesco.org/`

2.11.6.48 Repetition rate in primary education (all grades), male (percent) (une_reprpem)

Long tag: qog_oecd_cs_une_reprpem

Original tag: une_reprpem

Description:
Repetition rate in primary education (all grades), male (percent).

Variable citation: UNESCO. (2020). Unesco institute for statistics. `http://data.uis.unesco.org/`

2.11.6.49 Repetition rate in primary education (all grades), both sexes (percent) (une_reprpet)

Long tag: qog_oecd_cs_une_reprpet

Original tag: une_reprpet

Description:
Repetition rate in primary education (all grades), both sexes (percent).

Variable citation: UNESCO. (2020). Unesco institute for statistics. `http://data.uis.unesco.org/`

2.11.6.50 Theoretical duration of primary education (years) (une_tdurce)

Long tag: qog_oecd_cs_une_tdurce

Original tag: une_tdurce

Description:
Theoretical duration of primary education (years). Number of grades or years in a given level of education.

Variable citation: UNESCO. (2020). Unesco institute for statistics. `http://data.uis.unesco.org/`

2.11.6.51 Theoretical duration of early childhood education (years) (une_tdurece)

Long tag: qog_oecd_cs_une_tdurece

Original tag: une_tdurece

Description:
Theoretical duration of early childhood education (years). Number of grades or years in a given level of education.

Variable citation: UNESCO. (2020). Unesco institute for statistics. `http://data.uis.unesco.org/`

2.11.6.52 Theoretical duration of lower secondary education (years) (une_tdurls)

Long tag: qog_oecd_cs_une_tdurls

Original tag: une_tdurls

Description:
Theoretical duration of lower secondary education (years). Number of grades or years in a given level of education.

Variable citation: UNESCO. (2020). Unesco institute for statistics. `http://data.uis.unesco.org/`

2.11.6.53 Theoretical duration of post-secondary non-tertiary education (years) (une_tdurpsnt)

Long tag: qog_oecd_cs_une_tdurpsnt

Original tag: une_tdurpsnt

Description:
Theoretical duration of post-secondary non-tertiary education (years). Number of grades or years in a given level of education.

Variable citation: UNESCO. (2020). Unesco institute for statistics. `http://data.uis.unesco.org/`

2.11.6.54 Theoretical duration of upper secondary education (years) (une_tdurused)

Long tag: qog_oecd_cs_une_tdurused

Original tag: une_tdurused

Description:
Theoretical duration of upper secondary education (years). Number of grades or years in a given level of education.

Variable citation: UNESCO. (2020). Unesco institute for statistics. `http://data.uis.unesco.org/`

2.11.6.55 Teachers in lower secondary education, female (number) (une_tilsef)

Long tag: qog_oecd_cs_une_tilsef

Original tag: une_tilsef

Description:
Teachers in lower secondary education, female (number).

Variable citation: UNESCO. (2020). Unesco institute for statistics. `http://data.uis.unesco.org/`

2.11.6.56 Teachers in lower secondary education, both sexes (number) (une_tilset)

Long tag: qog_oecd_cs_une_tilset

Original tag: une_tilset

Description:
Teachers in lower secondary education, both sexes (number).

Variable citation: UNESCO. (2020). Unesco institute for statistics. `http://data.uis.unesco.org/`

2.11.6.57 Teachers in primary education, female (number) (une_tipef)

Long tag: qog_oecd_cs_une_tipef

Original tag: une_tipef

Description:
Teachers in primary education, female (number).

Variable citation: UNESCO. (2020). Unesco institute for statistics. `http://data.uis.unesco.org/`

2.11.6.58 Teachers in primary education, both sexes (number) (une_tipet)

Long tag: qog_oecd_cs_une_tipet

Original tag: une_tipet

Description:
Teachers in primary education, both sexes (number).

Variable citation: UNESCO. (2020). Unesco institute for statistics. `http://data.uis.unesco.org/`

2.11.6.59 Teachers in pre-primary education, both sexes (number) (une_tiprepet)

Long tag: qog_oecd_cs_une_tiprepet

Original tag: une_tiprepet

Description:
Teachers in pre-primary education, both sexes (number).

Variable citation: UNESCO. (2020). Unesco institute for statistics. `http://data.uis.unesco.org/`

2.11.6.60 Teachers in secondary education, both sexes (number) (une_tiset)

Long tag: qog_oecd_cs_une_tiset

Original tag: une_tiset

Description:
Teachers in secondary education, both sexes (number).

Variable citation: UNESCO. (2020). Unesco institute for statistics. `http://data.uis.unesco.org/`

2.11.6.61 Teachers in upper secondary education, female (number) (une_tiusef)

Long tag: qog_oecd_cs_une_tiusef

Original tag: une_tiusef

Description:
Teachers in upper secondary education, female (number).

Variable citation: UNESCO. (2020). Unesco institute for statistics. `http://data.uis.unesco.org/`

2.11.6.62 Teachers in upper secondary education, both sexes (number) (une_tiuset)

Long tag: qog_oecd_cs_une_tiuset

Original tag: une_tiuset

Description:
Teachers in upper secondary education, both sexes (number).

Variable citation: UNESCO. (2020). Unesco institute for statistics. `http://data.uis.unesco.org/`

2.11.6.63 School enrollment, primary, private (percent of total primary) (wdi_eduprp)

Long tag: qog_oecd_cs_wdi_eduprp

Original tag: wdi_eduprp

Description:
Percentage of enrollment in primary education in private institutions (percent).

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.6.64 School enrollment, secondary, private (percent of total secondary) (wdi_eduprs)

Long tag: qog_oecd_cs_wdi_eduprs

Original tag: wdi_eduprs

Description:
Percentage of enrollment in secondary education in private institutions (percent).

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.6.65 Government expenditure on education, total (percent of GDP) (wdi_expedu)

Long tag: qog_oecd_cs_wdi_expedu

Original tag: wdi_expedu

Description:
General government expenditure on education (current, capital, and transfers) is expressed as a percentage of GDP. It includes expenditure funded by transfers from international sources to government. General government usually refers to local, regional and central governments.

Note: The value for Tuvalu in 1997 has been recoded to missing due to an extreme and very unlikely value.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.6.66 Government expenditure on education, total (percent of government expenditure) (wdi_expeduge)

Long tag: qog_oecd_cs_wdi_expeduge

Original tag: wdi_expeduge

Description:

Total general (local, regional and central) government expenditure on education (current, capital, and transfers), expressed as a percentage of total general government expenditure on all sectors (including health, education, social services, etc.). It includes expenditure funded by transfers from international sources to government. Public education expenditure includes spending by local/municipal, regional and national governments (excluding household contributions) on educational institutions (both public and private), education administration, and subsidies for private entities (students/households and other privates entities). In some instances data on total public expenditure on education refers only to the ministry of education and can exclude other ministries that spend a part of their budget on educational activities. The indicator is calculated by dividing total public expenditure on education incurred by all government agencies/departments by the total government expenditure and multiplying by 100. For more information, consult the UNESCO Institute of Statistics website: http://www.uis.unesco.org/Education/

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.6.67 Expenditure on primary education (percent of government expenditure on edu.) (wdi_expedup)

Long tag: qog_oecd_cs_wdi_expedup

Original tag: wdi_expedup

Description:

Expenditure on Primary education, expressed as a percentage of total general government expenditure on education. Divide government expenditure on a given level of education (ex. primary, secondary) by total government expenditure on education (all levels combined), and multiply by 100. A high percentage of government expenditure on education spent on a given level denotes a high priority given to that level compared to others. When interpreting this indicator, one should take into account enrollment at that level, and the relative costs per student between different levels of education. For more information, consult the UNESCO Institute of Statistics website: http://www.uis.unesco.org/Education/

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.6.68 Expenditure on tertiary education (percent of government expenditure on edu.) (wdi_expedut)

Long tag: qog_oecd_cs_wdi_expedut

Original tag: wdi_expedut

Description:

Expenditure on Tertiary education, expressed as a percentage of total general government expenditure on education. Divide government expenditure on a given level of education (ex. primary, secondary) by total government expenditure on education (all levels combined), and multiply by 100. A high percentage of government expenditure on education spent on a given level denotes a high priority given to that level compared to others. When interpreting this indicator, one should take into account enrollment at that level, and the relative costs per student between different levels of education. For more information, consult the UNESCO Institute of Statistics website: http://www.uis.unesco.org/Education/

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.6.69 Government expenditure per student, primary (percent of GDP per capita) (wdi_expstup)

Long tag: qog_oecd_cs_wdi_expstup

Original tag: wdi_expstup

Description:

Government expenditure per student is the average general government expenditure (current, capital, and transfers) per student in the primary level of education, expressed as a percentage of GDP per capita.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.6.70 Government expenditure per student, secondary (percent of GDP per capita) (wdi_expstus)

Long tag: qog_oecd_cs_wdi_expstus

Original tag: wdi_expstus

Description:
Government expenditure per student is the average general government expenditure (current, capital, and transfers) per student in the secondary level of education, expressed as a percentage of GDP per capita.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.6.71 Government expenditure per student, tertiary (percent of GDP per capita) (wdi_expstut)

Long tag: qog_oecd_cs_wdi_expstut

Original tag: wdi_expstut

Description:
Government expenditure per student is the average general government expenditure (current, capital, and transfers) per student in the given tertiary of education, expressed as a percentage of GDP per capita.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.6.72 School enrollment, primary (percent gross) (wdi_gerp)

Long tag: qog_oecd_cs_wdi_gerp

Original tag: wdi_gerp

Description:
Total enrollment in primary education, regardless of age, expressed as a percentage of the population of official primary education age. GER can exceed 100percent due to the inclusion of over-aged and under-aged students because of early or late school entrance and grade repetition.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.6.73 School enrollment, primary, female (percent gross) (wdi_gerpf)

Long tag: qog_oecd_cs_wdi_gerpf

Original tag: wdi_gerpf

Description:
Total female enrollment in primary education, regardless of age, expressed as a percentage of the total female population of official primary education age. GER can exceed 100percent due to the inclusion of over-aged and under-aged students because of early or late school entrance and grade repetition.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.6.74 School enrollment, primary, male (percent gross) (wdi_gerpm)

Long tag: qog_oecd_cs_wdi_gerpm

Original tag: wdi_gerpm

Description:
Total male enrollment in primary education, regardless of age, expressed as a percentage of the total male population of official primary education age. GER can exceed 100percent due to the inclusion of over-aged and under-aged students because of early or late school entrance and grade repetition.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.6.75 School enrollment, preprimary (percent gross) (wdi_gerpp)

Long tag: qog_oecd_cs_wdi_gerpp

Original tag: wdi_gerpp

Description:
Total enrollment in pre-primary education, regardless of age, expressed as a percentage of the total population of official pre-primary education age. GER can exceed 100percent due to the inclusion of over-aged and under-aged students because of early or late school entrance and grade repetition.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.6.76 School enrollment, preprimary, female (percent gross) (wdi_gerppf)

Long tag: qog_oecd_cs_wdi_gerppf

Original tag: wdi_gerppf

Description:
Total female enrollment in pre-primary education, regardless of age, expressed as a percentage of the total female population of official pre-primary education age. GER can exceed 100percent due to the inclusion of over-aged and under-aged students because of early or late school entrance and grade repetition.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.6.77 School enrollment, preprimary, male (percent gross) (wdi_gerppm)

Long tag: qog_oecd_cs_wdi_gerppm

Original tag: wdi_gerppm

Description:
Total male enrollment in pre-primary education, regardless of age, expressed as a percentage of the total male population of official pre-primary education age. GER can exceed 100percent due to the inclusion of over-aged and under-aged students because of early or late school entrance and grade repetition.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.6.78 School enrollment, secondary (percent gross) (wdi_gers)

Long tag: qog_oecd_cs_wdi_gers

Original tag: wdi_gers

Description:
Total enrollment in secondary education, regardless of age, expressed as a percentage of the population of official secondary education age. GER can exceed 100percent due to the inclusion of over-aged and under-aged students because of early or late school entrance and grade repetition.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.6.79 School enrollment, secondary, female (percent gross) (wdi_gersf)

Long tag: qog_oecd_cs_wdi_gersf

Original tag: wdi_gersf

Description:
Total female enrollment in secondary education, regardless of age, expressed as a percentage of the female population of official secondary education age. GER can exceed 100percent due to the inclusion of over-aged and under-aged students because of early or late school entrance and grade repetition.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.6.80 School enrollment, secondary, male (percent gross) (wdi_gersm)

Long tag: qog_oecd_cs_wdi_gersm

Original tag: wdi_gersm

Description:
Total male enrollment in secondary education, regardless of age, expressed as a percentage of the male population of official secondary education age. GER can exceed 100percent due to the inclusion of over-aged and under-aged students because of early or late school entrance and grade repetition.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.6.81 School enrollment, tertiary (percent gross) (wdi_gert)

Long tag: qog_oecd_cs_wdi_gert

Original tag: wdi_gert

Description:
Total enrollment in tertiary education (ISCED 5 to 8), regardless of age, expressed as a percentage of the total population of the five-year age group following on from secondary school leaving.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.6.82 School enrollment, tertiary, female (percent gross) (wdi_gertf)

Long tag: qog_oecd_cs_wdi_gertf

Original tag: wdi_gertf

Description:
Total female enrollment in tertiary education (ISCED 5 to 8), regardless of age, expressed as a percentage of the total female population of the five-year age group following on from secondary school leaving.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.6.83 School enrollment, tertiary, male (percent gross) (wdi_gertm)

Long tag: qog_oecd_cs_wdi_gertm

Original tag: wdi_gertm

Description:
Total male enrollment in tertiary education (ISCED 5 to 8), regardless of age, expressed as a percentage of the total male population of the five-year age group following on from secondary school leaving.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.6.84 School enrollment, primary (percent net) (wdi_nerp)

Long tag: qog_oecd_cs_wdi_nerp

Original tag: wdi_nerp

Description:
Net enrollment rate is the ratio of children of official school age who are enrolled in school to the population of the corresponding official school age. Primary education provides children with basic reading, writing, and mathematics skills along with an elementary understanding of such subjects as history, geography, natural science, social science, art, and music.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.6.85 Adjusted net enrollment rate, primary (percent of primary school children) (wdi_nerpr)

Long tag: qog_oecd_cs_wdi_nerpr

Original tag: wdi_nerpr

Description:
Adjusted net enrollment is the number of pupils of the school-age group for primary education, enrolled either in primary or secondary education, expressed as a percentage of the total population in that age group.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.6.86 School enrollment, secondary (percent net) (wdi_ners)

Long tag: qog_oecd_cs_wdi_ners

Original tag: wdi_ners

Description:
Net enrollment rate is the ratio of children of official school age who are enrolled in school to the population of the corresponding official school age. Secondary education completes the provision of basic education that began at the primary level, and aims at laying the foundations for lifelong learning and human development, by offering more subject- or skill-oriented instruction using more specialized teachers.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.6.87 School enrollment, secondary, female (percent net) (wdi_nersf)

Long tag: qog_oecd_cs_wdi_nersf

Original tag: wdi_nersf

Description:
Net enrollment rate is the ratio of girls of official school age who are enrolled in school to the population of the corresponding official school age. Secondary education completes the provision of basic education that began at the primary level, and aims at laying the foundations for lifelong learning and human development, by offering more subject- or skill-oriented instruction using more specialized teachers. Female.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.6.88 School enrollment, secondary, male (percent net) (wdi_nersm)

Long tag: qog_oecd_cs_wdi_nersm

Original tag: wdi_nersm

Description:

Net enrollment rate is the ratio of boys of official school age who are enrolled in school to the population of the corresponding official school age. Secondary education completes the provision of basic education that began at the primary level, and aims at laying the foundations for lifelong learning and human development, by offering more subject- or skill-oriented instruction using more specialized teachers. Male.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.6.89 Digital skills among active population. 1-7 (best) (wef_dsap)

Long tag: qog_oecd_cs_wef_dsap

Original tag: wef_dsap

Description:

Digital skills among active population. 1-7 (best). In your country, to what extent does the active population possess sufficient digital skills (e.g., computer skills, basic coding, digital reading)? [1 = not all; 7 = to a great extent] Original sources: World Economic Forum, Executive Opinion Survey

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. `http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf`

2.11.6.90 School life expectancy. Years (wef_lse)

Long tag: qog_oecd_cs_wef_lse

Original tag: wef_lse

Description:

School life expectancy. Years. Total number of years of schooling (primary through tertiary) that a child can expect to receive, assuming that the probability of his or her being enrolled in school at any particular future age is equal to the current enrollment ratio at that age. Original sources: United Nations Educational, Scientific and Cultural Organization (UNESCO)

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. `http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf`

2.11.6.91 Quality of vocational training. 1-7 (best) (wef_qvt)

Long tag: qog_oecd_cs_wef_qvt

Original tag: wef_qvt

Description:

Quality of vocational training. 1-7 (best). In your country, how do you assess the quality of vocational training? [1 = extremely poor-among the worst in the world; 7 = excellent-among the best in the world] Original sources: World Economic Forum, Executive Opinion Survey

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. `http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf`

2.11.6.92 Skillset of secondary-education graduates. 1-7 (best) (wef_shg)

Long tag: qog_oecd_cs_wef_shg

Original tag: wef_shg

Description:

Skillset of secondary-education graduates. 1-7 (best). "In your country, to what extent do graduating students possess the skills needed by businesses at the following levels: Secondary education" [1 = Not at all; 7 = To a great extent]. Original sources: World Economic Forum, Executive Opinion Survey

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. `http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf`

2.11.6.93 Skillset of university graduates. 1-7 (best) (wef_sug)

Long tag: qog_oecd_cs_wef_sug

Original tag: wef_sug

Description:
Skillset of university graduates. 1-7 (best). In your country, to what extent do graduating students possess the skills needed by businesses at the following levels: b. University-level (1 = Not at all; 7 = To a great extent). Original sources: World Economic Forum, Executive Opinion Survey

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. `http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf`

2.11.6.94 University-industry collaboration in R D (1-7) (wef_uic)

Long tag: qog_oecd_cs_wef_uic

Original tag: wef_uic

Description:
University-industry collaboration in R
D. 1-7 (best). In your country, to what extent do business and universities collaborate on research and development (R
D)? [1 = do not collaborate at all; 7 = collaborate extensively] Original sources: World Economic Forum, Executive Opinion Survey

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. `http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf`

2.11.7 Political System

This category includes variables describing the rules of the political system (presidential or parlia- mentary system), the chief executive (years in office), regime type, stability (age of present regime), and checks and balances as well as aspects of federalism.

2.11.7.1 Dichotomous democracy measure (bmr_dem)

Long tag: qog_oecd_cs_bmr_dem

Original tag: bmr_dem

Description:
Dichotomous democracy measure.

Variable citation: Boix, C., Miller, M. K., & Rosato, S. (2022). Boix-miller-rosato dichotomous coding of democracy, 1800-2020 [UNF:6:6u8JNSHqP+yYKbLzrgFDug== [fileUNF]]. *Harvard Dataverse, V1.* https://doi.org/https://doi.org/10.7910/DVN/FENWWR Boix, C., Miller, M. K., & Rosato, S. (2013). A complete data set of political regimes, 1800-2007. *Comparative Political Studies*, 46(12), 1523–54

2.11.7.2 Number of previous democratic breakdowns (bmr_dembr)

Long tag: qog_oecd_cs_bmr_dembr

Original tag: bmr_dembr

Description:
Previous number of democratic breakdowns.

Variable citation: Boix, C., Miller, M. K., & Rosato, S. (2022). Boix-miller-rosato dichotomous coding of democracy, 1800-2020 [UNF:6:6u8JNSHqP+yYKbLzrgFDug== [fileUNF]]. *Harvard Dataverse, V1.* https://doi.org/https://doi.org/10.7910/DVN/FENWWR Boix, C., Miller, M. K., & Rosato, S. (2013). A complete data set of political regimes, 1800-2007. *Comparative Political Studies*, 46(12), 1523–54

2.11.7.3 Consecutive years of current regime type (bmr_demdur)

Long tag: qog_oecd_cs_bmr_demdur

Original tag: bmr_demdur

Description:
Consecutive years of current regime type.

Variable citation: Boix, C., Miller, M. K., & Rosato, S. (2022). Boix-miller-rosato dichotomous coding of democracy, 1800-2020 [UNF:6:6u8JNSHqP+yYKbLzrgFDug== [fileUNF]]. *Harvard Dataverse, V1.* https://doi.org/https://doi.org/10.7910/DVN/FENWWR Boix, C., Miller, M. K., & Rosato, S. (2013). A complete data set of political regimes, 1800-2007. *Comparative Political Studies*, 46(12), 1523–54

2.11.7.4 Democracy measure, requiring min. 50percent of adult women have the right to vote (bmr_demfsuf)

Long tag: qog_oecd_cs_bmr_demfsuf

Original tag: bmr_demfsuf

Description:
This adjusts democracy by also requiring that at least half of adult women have the right to vote.

Variable citation: Boix, C., Miller, M. K., & Rosato, S. (2022). Boix-miller-rosato dichotomous coding of democracy, 1800-2020 [UNF:6:6u8JNSHqP+yYKbLzrgFDug== [fileUNF]]. *Harvard Dataverse, V1.* https://doi.org/https://doi.org/10.7910/DVN/FENWWR Boix, C., Miller, M. K., & Rosato, S. (2013). A complete data set of political regimes, 1800-2007. *Comparative Political Studies*, 46(12), 1523–54

2.11.7.5 Dichotomous democracy measure (incl. missing for some countries) (bmr_demmis)

Long tag: qog_oecd_cs_bmr_demmis

Original tag: bmr_demmis

Description:
This is the same measure as democracy (bmr_dem), except it records an NA for countries occupied during an international war (e.g., the Netherlands 1940-44) or experiencing state collapse during a civil war (e.g., Lebanon 1976-89). The democracy variable instead fills in these years as continuations of the same regime type.

Variable citation: Boix, C., Miller, M. K., & Rosato, S. (2022). Boix-miller-rosato dichotomous coding of democracy, 1800-2020 [UNF:6:6u8JNSHqP+yYKbLzrgFDug== [fileUNF]]. *Harvard Dataverse, V1.* https://doi.org/https://doi.org/10.7910/DVN/FENWWR Boix, C., Miller, M. K., & Rosato, S. (2013). A complete data set of political regimes, 1800-2007. *Comparative Political Studies*, 46(12), 1523–54

2.11.7.6 Democratic transition (bmr_demtran)

Long tag: qog_oecd_cs_bmr_demtran

Original tag: bmr_demtran

Description:
(-1) Democratic breakdown
(0) No change
(1) Democratic transition

Variable citation: Boix, C., Miller, M. K., & Rosato, S. (2022). Boix-miller-rosato dichotomous coding of democracy, 1800-2020 [UNF:6:6u8JNSHqP+yYKbLzrgFDug== [fileUNF]]. *Harvard Dataverse, V1.* https://doi.org/https://doi.org/10.7910/DVN/FENWWR Boix, C., Miller, M. K., & Rosato, S. (2013). A complete data set of political regimes, 1800-2007. *Comparative Political Studies*, 46(12), 1523–54

2.11.7.7 No. of chambers in parliament (br_chpar)

Long tag: qog_oecd_cs_br_chpar

Original tag: br_chpar

Description:
Total number of chambers in parliament.

Variable citation: Bjørnskov, C., & Rode, M. (2020). Regime types and regime change: A new dataset on democracy, coups, and political institutions. *Review of International Organizations*, 15, 531–551

2.11.7.8 Is the country a colony (br_col)

Long tag: qog_oecd_cs_br_col

Original tag: br_col

Description:
Is the country a colony? (0: No; 1: Yes)

Variable citation: Bjørnskov, C., & Rode, M. (2020). Regime types and regime change: A new dataset on democracy, coups, and political institutions. *Review of International Organizations*, 15, 531–551

2.11.7.9 Is the country communist / socialist (br_com)

Long tag: qog_oecd_cs_br_com

Original tag: br_com

Description:
Is the country's regime communist / socialist? (0: No; 1: Yes)

Variable citation: Bjørnskov, C., & Rode, M. (2020). Regime types and regime change: A new dataset on democracy, coups, and political institutions. *Review of International Organizations*, 15, 531–551

2.11.7.10 Is the country a democracy (br_dem)

Long tag: qog_oecd_cs_br_dem

Original tag: br_dem

Description:

Is the country democratic or not? following Cheibub, Ghandi and Vreeland (2010). Dichotomous indicator of democracy based on a minimalist definition. A country is defined as democratic, if elections were conducted, these were free and fair, and if there was a peaceful turnover of legislative and executive offices following those elections. (0: No; 1: Yes)

Variable citation: Bjørnskov, C., & Rode, M. (2020). Regime types and regime change: A new dataset on democracy, coups, and political institutions. *Review of International Organizations*, 15, 531–551

2.11.7.11 New constitution implemented (br_newconst)

Long tag: qog_oecd_cs_br_newconst

Original tag: br_newconst

Description:

Whether a new constitution was implemented (0: No; 1: Yes)

Variable citation: Bjørnskov, C., & Rode, M. (2020). Regime types and regime change: A new dataset on democracy, coups, and political institutions. *Review of International Organizations*, 15, 531–551

2.11.7.12 Reference in Constitution to Democracy (ccp_democ)

Long tag: qog_oecd_cs_ccp_democ

Original tag: ccp_democ

Description:

Does the constitution refer to "democracy" or "democratic"?

1. Yes
2. No

Variable citation: Elkins, Z., & Ginsburg, T. (2021). Characteristics of national constitutions, version 3.0 [Last modified: May 20, 2021. Available at comparativeconstitutionsproject.org]. `http://www.comparativeconstitutionsproject.org`

2.11.7.13 Legislative Initiative Allowed (ccp_initiat)

Long tag: qog_oecd_cs_ccp_initiat

Original tag: ccp_initiat

Description:

Does the constitution provide for the ability of individuals to propose legislative initiatives?

1. Yes
2. No
96. Other

Variable citation: Elkins, Z., & Ginsburg, T. (2021). Characteristics of national constitutions, version 3.0 [Last modified: May 20, 2021. Available at comparativeconstitutionsproject.org]. `http://www.comparativeconstitutionsproject.org`

2.11.7.14 Reference in Constitution to Socialism (ccp_socialsm)

Long tag: qog_oecd_cs_ccp_socialsm

Original tag: ccp_socialsm

Description:

Does the constitution refer to "socialism" or "socialist"?

1. Yes
2. No
96. Other

Variable citation: Elkins, Z., & Ginsburg, T. (2021). Characteristics of national constitutions, version 3.0 [Last modified: May 20, 2021. Available at comparativeconstitutionsproject.org]. `http://www.comparativeconstitutionsproject.org`

2.11.7.15 Index of Globalization (dr_ig)

Long tag: qog_oecd_cs_dr_ig

Original tag: dr_ig

Description:
The overall index of globalization (scale of 1 to 100) is the weighted average of the following variables: economic globalization, social globalization and political globalization (dr_eg, dr_sg and dr_pg). Most weight has been given to economic followed by social globalization.

Variable citation: Gygli, S., Haelg, F., Potrafke, N., & Sturm, J.-E. (2019). The KOF Globalisation Index - Revisited. `https://doi.org/10.1007/s11558-019-09344-2` Dreher, A. (2006). Does globalization affect growth? evidence from a new index of globalization. *Applied Economics*, 38(10), 1091–1110

2.11.7.16 Political Globalization (dr_pg)

Long tag: qog_oecd_cs_dr_pg

Original tag: dr_pg

Description:
Political globalisation (scale of 1 to 100) regards the de facto segment measured with reference to the number of embassies and international non-governmental organisations (NGOs), along with partici-pation in UN peacekeeping missions. The de jure segment contains variables focussing on membership of international organisations and international treaties.

Variable citation: Gygli, S., Haelg, F., Potrafke, N., & Sturm, J.-E. (2019). The KOF Globalisation Index - Revisited. `https://doi.org/10.1007/s11558-019-09344-2` Dreher, A. (2006). Does globalization affect growth? evidence from a new index of globalization. *Applied Economics*, 38(10), 1091–1110

2.11.7.17 E-Government Index (egov_egov)

Long tag: qog_oecd_cs_egov_egov

Original tag: egov_egov

Description:
The E-Government Development Index (EGDI) is a weighted average of normalised scores on the three most important dimensions of e-government, namely: scope and quality of online services (Online Service Index, OSI), status of the development of telecommunication infrastructure (Telecommunication Infrastructure Index, TII) and inherent human capital (Human Capital Index, HCI). Each of these sets of indices is in itself a composite measure that can be extracted and analysed independently.

Variable citation: Department of Economic and Social Affairs. (2020). United nations e-government survey. `https://publicadministration.un.org/egovkb/en-us/Reports/UN-E-Government-Survey-2020`

2.11.7.18 E-Participation Index (egov_epar)

Long tag: qog_oecd_cs_egov_epar

Original tag: egov_epar

Description:
The E-Participation Index (EPI) is derived as a supplementary index to the UN E-Government Survey. It extends the dimension of the Survey by focusing on the use of online services to facilitate provision of information by governments to citizens (e-information sharing), interaction with stakeholders (e-consultation) and engagement in decision-making processes.

A country's EPI reflects the e-participation mechanisms that are deployed by the government as compared to all other countries. The purpose of this measure is not to prescribe any specific practice, but rather to offer insight into how different countries are using online tools in promoting interaction between the government and its people, as well as among the people, for the benefit of all.

Variable citation: Department of Economic and Social Affairs. (2020). United nations e-government survey. `https://publicadministration.un.org/egovkb/en-us/Reports/UN-E-Government-Survey-2020`

2.11.7.19 Human Capital Index (egov_hci)

Long tag: qog_oecd_cs_egov_hci

Original tag: egov_hci

Description:
The Human Capital Index (HCI) consists of four components:

(i)adult literacy rate;
(ii)the combined primary, secondary and tertiary gross enrolment ratio;
(iii)expected years of schooling; and
(iv)average years of schooling.

Data for HCI components was extracted from the UNESCO-UIS source.

Variable citation: Department of Economic and Social Affairs. (2020). United nations e-government survey. `https://publicadministration.un.org/egovkb/en-us/Reports/UN-E-Government-Survey-2020`

2.11.7.20 Online Service Index (egov_osi)

Long tag: qog_oecd_cs_egov_osi

Original tag: egov_osi

Description:

The Online Service Index (OSI) values were constructed by researchers, including UN experts and online United Nations Volunteers (UNVs) from over 60 countries with coverage of 66 languages assessed each country's national website in the native language, including the national portal, e-services portal and e-participation portal, as well as the websites of the related ministries of education, labour, social services, health, finance and environment as applicable. The UNVs included qualified graduate students and volunteers from universities in the field of public administration.

Variable citation: Department of Economic and Social Affairs. (2020). United nations e-government survey. `https://publicadministration.un.org/egovkb/en-us/Reports/UN-E-Government-Survey-2020`

2.11.7.21 Telecommunication Infrastructure Index (egov_tii)

Long tag: qog_oecd_cs_egov_tii

Original tag: egov_tii

Description:

The Telecommunication Infrastructure Index (TII) is an arithmetic average composite of five indicators:

(i) estimated internet users per 100 inhabitants;
(ii) number of main fixed telephone lines per 100 inhabitants;
(iii) number of mobile subscribers per 100 inhabitants;
(iv) number of wireless broadband subscriptions per 100 inhabitants; and
(v) number of fixed broadband subscriptions per 100 inhabitants.

Data for each component was extracted from the ITU source.

Variable citation: Department of Economic and Social Affairs. (2020). United nations e-government survey. `https://publicadministration.un.org/egovkb/en-us/Reports/UN-E-Government-Survey-2020`

2.11.7.22 Level of Democracy (Freedom House/Imputed Polity) (fh_ipolity2)

Long tag: qog_oecd_cs_fh_ipolity2

Original tag: fh_ipolity2

Description:

Scale ranges from 0-10 where 0 is least democratic and 10 most democratic. Average of Freedom House (fh_pr and fh_cl) is transformed to a scale 0-10 and Polity (p_polity2) is transformed to a scale 0-10. These variables are averaged into fh_polity2. The imputed version has imputed values for countries where data on Polity is missing by regressing Polity on the average Freedom House measure. Hadenius
Teorell (2005) show that this average index performs better both in terms of validity and reliability than its constituent parts.

Variable citation: Freedom House. (2021a). Freedom in the world 2021. `https://freedomhouse.org/report/freedom-world`

2.11.7.23 Level of Democracy (Freedom House/Polity) (fh_polity2)

Long tag: qog_oecd_cs_fh_polity2

Original tag: fh_polity2

Description:

Scale ranges from 0-10 where 0 is least democratic and 10 most democratic. Average of Freedom House (fh_pr and fh_cl) is transformed to a scale 0-10 and Polity (p_polity2) is transformed to a scale 0-10. These variables are averaged into fh_polity2.

Variable citation: Freedom House. (2021a). Freedom in the world 2021. `https://freedomhouse.org/report/freedom-world`

2.11.7.24 Political Pluralism and Participation (fh_ppp)

Long tag: qog_oecd_cs_fh_ppp

Original tag: fh_ppp

Description:

Political Pluralism and Participation - This variable encompasses an examination of the right of the people to freely organize in political parties; the existence of an opposition with a realistic possibility to increase its support; the ability of the people to make political choices free from domination by the military, totalitarian

parties or other powerful groups; and the existence of full political rights for all minorities. Countries are graded between 0 (worst) and 16 (best).

Variable citation: Freedom House. (2021a). Freedom in the world 2021. `https://freedomhouse.org/report/freedom-world`

2.11.7.25 Political Rights (fh_pr)

Long tag: qog_oecd_cs_fh_pr

Original tag: fh_pr

Description:

Political Rights Rating - Political rights enable people to participate freely in the political process, including the right to vote freely for distinct alternatives in legitimate elections, compete for public office, join political parties and organizations, and elect representatives who have a decisive impact on public policies and are accountable to the electorate. The specific list of rights considered varies over the years. Countries are graded between 1 (most free) and 7 (least free).

Variable citation: Freedom House. (2021a). Freedom in the world 2021. `https://freedomhouse.org/report/freedom-world`

2.11.7.26 Freedom Status (fh_status)

Long tag: qog_oecd_cs_fh_status

Original tag: fh_status

Description:

1. Free
2. Partly Free
3. Not Free

Until 2003, countries whose combined average ratings for Political Rights and Civil Liberties fell between 1.0 and 2.5 were designated "Free"; between 3.0 and 5.5 "Partly Free", and between 5.5 and 7.0 "Not Free". Since then, countries whose ratings average 1.0 to 2.5 are considered "Free", 3.0 to 5.0 "Partly Free", and 5.5 to 7.0 "Not Free".

Variable citation: Freedom House. (2021a). Freedom in the world 2021. `https://freedomhouse.org/report/freedom-world`

2.11.7.27 Global Gender Gap Political Empowerment subindex (gggi_pes)

Long tag: qog_oecd_cs_gggi_pes

Original tag: gggi_pes

Description:

Political Empowerment (0 to 1, where 1 indicates no gap). This subindex measures the gap between men and women at the highest level of political decision-making through the ratio of women to men in ministerial positions and the ratio of women to men in parliamentary positions. In addition, we've included the ratio of women to men in terms of years in executive office (prime minister or president) for the last 50 years. A clear drawback in this category is the absence of any indicators capturing differences between the participation of women and men at local levels of government. Should such data become available at a globally comparative level in future years, it will be considered for inclusion in the Index.

Variable citation: World Economic Forum. (2021). The global gender gap report 2021 [All Rights Reserved]. `https://www.weforum.org/reports/ab6795a1-960c-42b2-b3d5-587eccda6023`

2.11.7.28 Independent Sub-Federal Unit (h_f)

Long tag: qog_oecd_cs_h_f

Original tag: h_f

Description:

Dummy variable coded 1 if there are independent sub-federal units (states, provinces, regions etc.) that impose substantive constraints on national fiscal policy.

Variable citation: Henisz, W. J. (2017). The Political Constraint Index (POLCON) Dataset 2017 release. `https://mgmt.wharton.upenn.edu/profile/1327`

2.11.7.29 Legislative Chamber (h_l1)

Long tag: qog_oecd_cs_h_l1

Original tag: h_l1

Description:

Dummy variable coded 1 if there is an effective legislative chamber (based on information from Polity's

Executive Constraints, p_xconst).

Variable citation: Henisz, W. J. (2017). The Political Constraint Index (POLCON) Dataset 2017 release. `https://mgmt.wharton.upenn.edu/profile/1327`

2.11.7.30 Political Constraints Index III (h_polcon3)

Long tag: qog_oecd_cs_h_polcon3

Original tag: h_polcon3

Description:

This index measures the feasibility of policy change, i.e. the extent to which a change in the prefer-ences of any one political actor may lead to a change in government policy. The index is composed from the following information: the number of independent branches of government with veto power over policy change, counting the executive and the presence of an effective lower and upper house in the legislature (more branches leading to more constraint); the extent of party alignment across branches of government, measured as the extent to which the same party or coalition of parties control each branch (decreasing the level of constraint); and the extent of preference heterogeneity within each legislative branch, measured as legislative fractionalization in the relevant house (increasing constraint for aligned executives, decreasing it for opposed executives). The index scores are derived from a simple spatial model and theoretically ranges from 0 to 1, with higher scores indicating more political constraint and thus less feasibility of policy change. Note that the coding reflects information as of January 1 in any given year. Henisz (2002) uses this index to demonstrate that political environments that limit the feasibility of policy change are an important determinant of investment in infrastructure.

Variable citation: Henisz, W. J. (2017). The Political Constraint Index (POLCON) Dataset 2017 release. `https://mgmt.wharton.upenn.edu/profile/1327`

2.11.7.31 Political Constraints Index V (h_polcon5)

Long tag: qog_oecd_cs_h_polcon5

Original tag: h_polcon5

Description:

This index follows the same logic as Political Constraints Index III (h_polcon3) but also includes two additional veto points: the judiciary and sub-federal entities. Note that the coding reflects in-formation as of January 1 in any given year. Henisz (2000) uses this index to measure the impact on cross-national growth rates of a government's ability to provide credible commitment.

Variable citation: Henisz, W. J. (2017). The Political Constraint Index (POLCON) Dataset 2017 release. `https://mgmt.wharton.upenn.edu/profile/1327`

2.11.7.32 Regime Durability (p_durable)

Long tag: qog_oecd_cs_p_durable

Original tag: p_durable

Description:

Regime Durability: The number of years since the most recent regime change (defined by a three point change in the p_polity score over a period of three years or less) or the end of a transition period defined by the lack of stable political institutions (denoted by a standardized authority score). In calculating the p_durable value, the first year during which a new (post-change) polity is established is coded as the baseline "year zero" (value = 0) and each subsequent year adds one to the value of the p_durable variable consecutively until a new regime change or transition period occurs.

Variable citation: Marshall, M. G., & Gurr, T. R. (2020). Polity v project, political regime characteristics and transitions, 1800-2018

2.11.7.33 Revised Combined Polity Score (p_polity2)

Long tag: qog_oecd_cs_p_polity2

Original tag: p_polity2

Description:

Revised Combined Polity Score: The polity score is computed by subtracting the p_autoc score from the p_democ score; the resulting unified polity scale ranges from +10 (strongly democratic) to -10 (strongly autocratic). The revised version of the polity variable is designed to facilitate the use of the polity regime measure in time-series analyses. It modifies the combined annual polity score by applying a simple treatment, or "fix" to convert instances of "standardized authority scores" (i.e., -66, -77, and -88) to conventional polity scores (i.e., within the range, -10 to +10). The values have been converted according to the following rule set:

(-66) Cases of foreign "interruption" are treated as "system missing."
(-77) Cases of "interregnum", or anarchy, are converted to a "neutral" Polity score of "0."
(-88) Cases of "transition" are prorated across the span of the transition.

For example, country X has a p_polity score of -7 in 1957, followed by three years of -88 and, finally, a score of +5 in 1961. The change (+12) would be prorated over the intervening three years at a rate of per year, so that the converted scores would be as follow: 1957 -7; 1958 -4; 1959 -1; 1960 +2; and 1961 +5.

Variable citation: Marshall, M. G., & Gurr, T. R. (2020). Polity v project, political regime characteristics and transitions, 1800-2018

2.11.7.34 Entry at the lowest level only (qs20_close1)

Long tag: qog_oecd_cs_qs20_close1

Original tag: qs20_close1

Description:

Country-level estimate for Entry at the lowest level only, scaled between 0 and 1. Highest score refers to cases where entry to bureaucratic positions is possible at the lowest level of hierarchy only, and positions at middle and higher levels of hierarchy are filled by individuals from within the bureaucracy.

Variable citation: Nistotskaya, M., Dahlberg, S., Dahlström, C., Sundström, A., Axelsson, S., Dalli, C. M., & Alvarado, N. (2021). The Quality of Government Expert Survey 2020 Dataset: Wave III. `https://doi.org/10.18157/qoges2020`

2.11.7.35 Entry via examination (qs20_close2)

Long tag: qog_oecd_cs_qs20_close2

Original tag: qs20_close2

Description:

Country-level estimate for Entry via examination, scaled between 0 and 1. Countries in which formal examination is usually part of the hiring process have higher scores.

Variable citation: Nistotskaya, M., Dahlberg, S., Dahlström, C., Sundström, A., Axelsson, S., Dalli, C. M., & Alvarado, N. (2021). The Quality of Government Expert Survey 2020 Dataset: Wave III. `https://doi.org/10.18157/qoges2020`

2.11.7.36 Special Laws (qs20_close3)

Long tag: qog_oecd_cs_qs20_close3

Original tag: qs20_close3

Description:

Country-level estimate for Special Laws, scaled between 0 and 1. Higher scores mean that human resource management in public administration is regulated by a set of laws and regulations applicable only to the public sector (including government), which is different from the country's labor code.

Variable citation: Nistotskaya, M., Dahlberg, S., Dahlström, C., Sundström, A., Axelsson, S., Dalli, C. M., & Alvarado, N. (2021). The Quality of Government Expert Survey 2020 Dataset: Wave III. `https://doi.org/10.18157/qoges2020`

2.11.7.37 Closedness Index, constructed with PCA (qs20_close_pca)

Long tag: qog_oecd_cs_qs20_close_pca

Original tag: qs20_close_pca

Description:

Closedness Index is constructed from Entry at the lowest level only, Entry via examination and Special Laws with the help of Principal Component Analysis (PCA). Entry at the lowest level only, Entry via examination and Special Laws variables are load on the same dimension, which predicted scores are used as Closedness Index.

2.11.7.53 Professionalism Index, constructed with PCA (qs20_proff_pca)

Long tag: qog_oecd_cs_qs20_proff_pca

Original tag: qs20_proff_pca

Description:
Professionalism Index is constructed from Patronage, Merit and Tenure with the help of Principal Component Analysis (PCA). Merit, Patronage and Tenure are load on the same dimension, which predicted scores are used as Professionalism Index.

Variable citation: Nistotskaya, M., Dahlberg, S., Dahlström, C., Sundström, A., Axelsson, S., Dalli, C. M., & Alvarado, N. (2021). The Quality of Government Expert Survey 2020 Dataset: Wave III. `https://doi.org/10.18157/qoges2020`

2.11.7.54 Good Governance (sgi_go)

Long tag: qog_oecd_cs_sgi_go

Original tag: sgi_go

Description:
This pillar of the SGI examines the good governance capacities of a political system in terms of its executive capability and accountability. Sustainable governance is defined here as the political management of public affairs that adopts a long-term view of societal development, takes into account the interests of future generations, and facilitates capacities for social change.

The Governance index examines how effective governments are in directing and implementing policies appropriate to these three goals. As a measuring tool grounded in practical evidence, the Governance index draws on 37 qualitative indicators posed in an expert survey that measure a country's institutional arrangements against benchmarks of good practices in governance. Governance in this context implies both the capacity to act ("executive capacity") and the extent to which non-governmental actors and institutions are endowed with the participatory competence to hold the government accountable to its actions ("executive accountability"). This includes citizens, legislatures, parties, associations and the media, that is, actors that monitor the government's activities and whose effective inclusion in the political process improve the quality of governance.

The dimension of Executive Capacity draws on the categories of steering capability, policy implementation and institutional learning. Steering capability questions explore the roles of strategic planning and expert advice, the effectiveness of interministerial coordination and regulatory impact assessments, and the quality of consultation and communication policies. Questions about implementation assess the government's ability to ensure effective and efficient task delegation to ministers, agencies or subnational governments. Questions on institutional learning refer to a government's ability to reform its own institutional arrangements and improve its strategic orientation.

The dimension of Executive Accountability is comprised of three categories corresponding to actors or groups of actors considered to be important agents of oversight and accountability in theories of democracy and governance. The questions here are designed to examine the extent to which citizens are informed of government policies, whether the legislature is capable of evaluating and acting as a "check" on the executive branch, and whether intermediary organizations (i.e., media, parties, interest associations) demonstrate relevance and policy know-how in exercising oversight. This approach is based on a dynamic understanding of governance in which power and authority is dispersed throughout the institutions, processes and structures of government. In order to account for the diversity of institutional arrangements, the index explicitly considers functional equivalencies in different countries, and pays equal attention to formal and informal as well as hierarchical and non-hierarchical institutional arrangements.

2.11.7.57 Robust Democracy (sgi_qd)

Long tag: qog_oecd_cs_sgi_qd

Original tag: sgi_qd

Description:
This pillar of the SGI examines the quality of democracy in each country. From the perspective of long-term system stability and political performance, the quality of democracy and political participation are crucial aspects of a society's success. The stability and performance of a political system depends in large part upon the assent and confidence of its citizens. Democratic participation and oversight are also essential to genuine learning and adaptation processes, and to the ability to change. In this sense, guaranteeing opportunities for democratic participation and oversight, as well as the presence of due process and respect for civil rights, are fundamental prerequisites for the legitimacy of a political system. The quality of democracy in each country is measured against a definitional norm that considers issues relating to participation rights, electoral competition, access to information and the rule of law. Given that all OECD and EU member states constitute democracies, the questions posed here focus on the quality rather than the presence of democracy. Individual indicators monitor the following criteria:

1. Electoral processes.
2. Access to information.
3. Civil rights and political liberties.
4. Rule of law.

Variable citation: Schiller, C., & Hellmann, T. (2020). Sustainable governance indicators 2020 [Date accessed: 12 December 2021]. *Bertelsmann Stiftung*. `https://www.sgi-network.org`

2.11.7.58 Robust Democracy: Access to Information (sgi_qdai)

Long tag: qog_oecd_cs_sgi_qdai

Original tag: sgi_qdai

Description:
Robust Democracy: Access to Information (Media Freedom, Media Pluralism, Access to Government Information).

2.11.7.59 Robust Democracy: Civil Rights and Political Liberties (sgi_qdcr)

Long tag: qog_oecd_cs_sgi_qdcr

Original tag: sgi_qdcr

Description:
Robust Democracy: Civil Rights and Political Liberties (Civil Rights, Political Liberties, Non-discrimination).

Variable citation: Schiller, C., & Hellmann, T. (2020). Sustainable governance indicators 2020 [Date accessed: 12 December 2021]. *Bertelsmann Stiftung*. `https://www.sgi-network.org`

2.11.7.60 Robust Democracy: Rule of Law (sgi_qdrl)

Long tag: qog_oecd_cs_sgi_qdrl

Original tag: sgi_qdrl

Description:
Robust Democracy: Rule of Law (Legal Certainty, Judicial Review, Appointment of Justices, Corruption Prevention).

Variable citation: Schiller, C., & Hellmann, T. (2020). Sustainable governance indicators 2020 [Date accessed: 12 December 2021]. *Bertelsmann Stiftung*. `https://www.sgi-network.org`

2.11.7.61 Robust Democracy: Rule of Law - Corruption Prevention (sgi_qdrlc)

Long tag: qog_oecd_cs_sgi_qdrlc

Original tag: sgi_qdrlc

Description:
Robust Democracy: Rule of Law - Corruption Prevention. To what extent are public officeholders prevented from abusing their position for private interests? This question addresses how the state and society prevent public servants and politicians from accepting bribes by applying mechanisms to guarantee the integrity of officeholders: auditing of state spending; regulation of party financing; citizen and media access to information; accountability of officeholders (asset declarations, conflict of interest rules, codes of conduct); transparent public procurement systems; effective prosecution of corruption. (1, 2): Public officeholders can exploit their offices for private gain as they see fit without fear of legal consequences or adverse publicity. (3, 4, 5): Some integrity mechanisms function, but do not effectively prevent public officeholders from abusing their positions. (6, 7, 8): Most integrity mechanisms function effectively and provide disincentives for public officeholders willing to abuse their positions. (9, 10): Legal, political and public integrity mechanisms effectively prevent public officeholders from abusing their positions.

Variable citation: Schiller, C., & Hellmann, T. (2020). Sustainable governance indicators 2020 [Date accessed: 12 December 2021]. *Bertelsmann Stiftung*. `https://www.sgi-network.org`

2.11.7.62 Deliberative democracy index (vdem_delibdem)

Long tag: qog_oecd_cs_vdem_delibdem

Original tag: vdem_delibdem

Description:
Deliberative democracy index. Question: To what extent is the ideal of deliberative democracy achieved?

Clarification: The deliberative principle of democracy focuses on the process by which decisions are reached in a polity. A deliberative process is one in which public reasoning focused on the common good motivates political decisions - as contrasted with emotional appeals, solidary attachments, parochial interests, or coercion. According to this principle, democracy requires more than an aggregation of existing preferences. There should also be respectful dialogue at all levels - from preference formation to final decision - among informed and competent participants who are open to persuasion. To make it a measure of not only the deliberative principle but also of democracy, the index also takes the level of electoral democracy into account.

Variable citation: Coppedge, M., Gerring, J., Knutsen, C. H., Lindberg, S. I., Teorell, J., Alizada, N., Altman, D., Bernhard, M., Cornell, A., Fish, M. S., Gastaldi, L., Gjerløw, H., Glynn, A., Hicken, A., Hindle, G., Ilchenko, N., Krusell, J., Luhrmann, A., Maerz, S. F., . . . Ziblatt, D. (2021). (2021). The V-Dem measurement model: Latent variable analysis for crossnational and cross-temporal expert-coded data

2.11.7.63 Deliberative component index (vdem_dl_delib)

Long tag: qog_oecd_cs_vdem_dl_delib

Original tag: vdem_dl_delib

Description:
Deliberative component index. Question: To what extent is the deliberative principle of democracy achieved?

Clarification: The deliberative principle of democracy focuses on the process by which decisions are reached in a polity. A deliberative process is one in which public reasoning focused on the common good motivates political decisions - as contrasted with emotional appeals, solidary attachments, parochial interests, or coercion. According to this principle, democracy requires more than an aggregation of existing preferences. There should also be respectful dialogue at all levels - from preference formation to final decision - among informed and competent participants who are open to persuasion. To measure these features of a polity, we try to determine the extent to which political elites give public justifications for their positions on matters of public policy, justify their positions in terms of the public good, acknowledge and respect counter-arguments; and how wide the range of consultation is at elite levels. Aggregation: The index is formed by point estimates drawn from a Bayesian factor analysis model including the following indicators: reasoned justification, common good justification, respect for counterarguments, range of consultation, and engaged society.

Variable citation: Coppedge, M., Gerring, J., Knutsen, C. H., Lindberg, S. I., Teorell, J., Alizada, N., Altman, D., Bernhard, M., Cornell, A., Fish, M. S., Gastaldi, L., Gjerløw, H., Glynn, A., Hicken, A., Hindle, G., Ilchenko, N., Krusell, J., Luhrmann, A., Maerz, S. F., . . . Ziblatt, D. (2021). 2.11.7.64 Electoral component index (vdem_edcomp_thick)

Long tag: qog_oecd_cs_vdem_edcomp_thick

Original tag: vdem_edcomp_thick

Description:

Electoral component index. Question: To what extent is the electoral principle of democracy achieved?

Clarifications: The electoral principle of democracy seeks to achieve responsiveness and accountability between leaders and citizens through the mechanism of competitive elections. This is presumed to be achieved when suffrage is extensive; political and civil society organizations can operate freely; elections are clean and not marred by fraud or systematic irregularities; and the chief executive of a country is selected directly or indirectly through elections. Aggregation: The electoral component index is operationalized as a chain defined by its weakest link of freedom of association, suffrage, clean elections, and elected executive.

Variable citation: Coppedge, M., Gerring, J., Knutsen, C. H., Lindberg, S. I., Teorell, J., Alizada, N., Altman, D., Bernhard, M., Cornell, A., Fish, M. S., Gastaldi, L., Gjerløw, H., Glynn, A., Hicken, A., Hindle, G., Ilchenko, N., Krusell, J., Luhrmann, A., Maerz, S. F., . . . Ziblatt, D. (2021). V-dem [country-year/country-date] dataset v11.1. `https://doi.org/10.23696/vdemds21` Pemstein, D., Marquardt, K. L., Tzelgov, E., Wang, Y.-t., Medzihorsky, J., Krusell, J., Miri, F., & von Römer, J. (2021). The V-Dem measurement model: Latent variable analysis for crossnational and cross-temporal expert-coded data

2.11.7.65 Egalitarian component index (vdem_egal)

Long tag: qog_oecd_cs_vdem_egal

Original tag: vdem_egal

Description:

Egalitarian component index. Question: To what extent is the egalitarian principle achieved?

Clarifications: The egalitarian principle of democracy holds that material and immaterial inequalities inhibit the exercise of formal rights and liberties, and diminish the ability of citizens from all social groups to participate. Egalitarian democracy is achieved when 1) rights and freedoms of individuals are protected equally across all social groups; 2) resources are distributed equally across all social groups; and 3) access to power is equally distributed by gender, socioeconomic class and social group. Aggregation: This index is formed by averaging the following indices: equal protection index and equal distribution of resources.

Variable citation: Coppedge, M., Gerring, J., Knutsen, C. H., Lindberg, S. I., Teorell, J., Alizada, N., Altman, D., Bernhard, M., Cornell, A., Fish, M. S., Gastaldi, L., Gjerløw, H., Glynn, A., Hicken, A., Hindle, G., Ilchenko, N., Krusell, J., Luhrmann, A., Maerz, S. F., . . . Ziblatt, D. (2021). V-dem [country-year/country-date] dataset v11.1. `https://doi.org/10.23696/vdemds21` Pemstein, D., Marquardt, K. L., Tzelgov, E., Wang, Y.-t., Medzihorsky, J., Krusell, J., Miri, F., & von Römer, J. (2021). The V-Dem measurement model: Latent variable analysis for crossnational and cross-temporal expert-coded data

2.11.7.66 Egalitarian democracy index (vdem_egaldem)

Long tag: qog_oecd_cs_vdem_egaldem

Original tag: vdem_egaldem

Description:

Egalitarian democracy index. Question: To what extent is the ideal of egalitarian democracy achieved?

Clarifications: The egalitarian principle of democracy holds that material and immaterial inequalities inhibit the exercise of formal rights and liberties, and diminish the ability of citizens from all social groups to participate. Egalitarian democracy is achieved when 1) rights and freedoms of individuals are protected equally across all social groups; and 2) resources are distributed equally across all social groups. The distribution of resources must be sufficient to ensure that citizens' basic needs are met in a way that enables their meaningful participation. Additionally, an equal distribution of resources ensures the potential for greater equality in the distribution of power. To make it a measure of egalitarian democracy, the index also takes the level of electoral democracy into account.

Variable citation: Coppedge, M., Gerring, J., Knutsen, C. H., Lindberg, S. I., Teorell, J., Alizada, N., Altman, D., Bernhard, M., Cornell, A., Fish, M. S., Gastaldi, L., Gjerløw, H., Glynn, A., Hicken, A., Hindle, G., Ilchenko, N., Krusell, J., Luhrmann, A., Maerz, S. F., . . . Ziblatt, D. (2021). (2021). The V-Dem measurement model: Latent variable analysis for crossnational and cross-temporal expert-coded data

2.11.7.67 Liberal democracy index (vdem_libdem)

Long tag: qog_oecd_cs_vdem_libdem

Original tag: vdem_libdem

Description:
Liberal democracy index. Question: To what extent is the ideal of liberal democracy achieved?
Clarifications: The liberal principle of democracy emphasizes the importance of protecting individual and minority rights against the tyranny of the state and the tyranny of the majority. The liberal model takes a "negative" view of political power insofar as it judges the quality of democracy by the limits placed on government. This is achieved by constitutionally protected civil liberties, strong rule of law, an independent judiciary, and effective checks and balances that, together, limit the exercise of executive power. To make this a measure of liberal democracy, the index also takes the level of electoral democracy into account.

Variable citation: Coppedge, M., Gerring, J., Knutsen, C. H., Lindberg, S. I., Teorell, J., Alizada, N., Altman, D., Bernhard, M., Cornell, A., Fish, M. S., Gastaldi, L., Gjerløw, H., Glynn, A., Hicken, A., Hindle, G., Ilchenko, N., Krusell, J., Luhrmann, A., Maerz, S. F., . . . Ziblatt, D. (2021). 2.11.7.69 Participatory component index (vdem_partip)

Long tag: qog_oecd_cs_vdem_partip

Original tag: vdem_partip

Description:
Participatory component index. Question: To what extent is the participatory principle achieved?

Clarification: The participatory principle of democracy emphasizes active participation by citizens in all political processes, electoral and non-electoral. It is motivated by uneasiness about a bedrock practice of electoral democracy: delegating authority to representatives. Thus, direct rule by citizens is preferred, wherever practicable. This model of democracy thus takes suffrage for granted, emphasizing engagement in civil society organizations, direct democracy, and subnational elected bodies. Aggregation: This index is formed by averaging the following indices: civil society participation, direct popular vote, elected local government power, and elected regional government power.

Variable citation: Coppedge, M., Gerring, J., Knutsen, C. H., Lindberg, S. I., Teorell, J., Alizada, N., Altman, D., Bernhard, M., Cornell, A., Fish, M. S., Gastaldi, L., Gjerløw, H., Glynn, A., Hicken, A., Hindle, G., Ilchenko, N., Krusell, J., Luhrmann, A., Maerz, S. F., . . . Ziblatt, D. (2021). 2.11.7.70 Participatory democracy index (vdem_partipdem)

Long tag: qog_oecd_cs_vdem_partipdem

Original tag: vdem_partipdem

Description:
Participatory democracy index. Question: To what extent is the ideal of participatory democracy achieved?

Clarifications: The participatory principle of democracy emphasizes active participation by citizens in all political processes, electoral and non-electoral. It is motivated by uneasiness about a bedrock practice of electoral democracy: delegating authority to representatives. Thus, direct rule by citizens is preferred, wherever practicable. This model of democracy thus takes suffrage for granted, emphasizing engagement in civil society organizations, direct democracy, and subnational elected bodies. To make it a measure of

participatory democracy, the index also takes the level of electoral democracy into account.

Variable citation: Coppedge, M., Gerring, J., Knutsen, C. H., Lindberg, S. I., Teorell, J., Alizada, N., Altman, D., Bernhard, M., Cornell, A., Fish, M. S., Gastaldi, L., Gjerløw, H., Glynn, A., Hicken, A., Hindle, G., Ilchenko, N., Krusell, J., Luhrmann, A., Maerz, S. F., . . . Ziblatt, D. (2021). V-dem [country-year/country-date] dataset v11.1. `https://doi.org/10.23696/vdemds21` Pemstein, D., Marquardt, K. L., Tzelgov, E., Wang, Y.-t., Medzihorsky, J., Krusell, J., Miri, F., & von Römer, J. (2021). The V-Dem measurement model: Latent variable analysis for crossnational and cross-temporal expert-coded data

2.11.7.71 Electoral democracy index (vdem_polyarchy)

Long tag: qog_oecd_cs_vdem_polyarchy

Original tag: vdem_polyarchy

Description:

Electoral democracy index. Question: To what extent is the ideal of electoral democracy in its fullest sense achieved?

Clarifications: The electoral principle of democracy seeks to embody the core value of making rulers responsive to citizens, achieved through electoral competition for the electorate's approval under circumstances when suffrage is extensive; political and civil society organizations can operate freely; elections are clean and not marred by fraud or systematic irregularities; and elections affect the composition of the chief executive of the country. In between elections, there is freedom of expression and an independent media capable of presenting alternative views on matters of political relevance. In the V-Dem conceptual scheme, electoral democracy is understood as an essential element of any other conception of (representative) democracy - liberal, participatory, deliberative, egalitarian, or some other. Aggregation: The index is formed by taking the average of, on the one hand, the sum of the indices measuring freedom of association (thick), suffrage, clean elections, elected executive (de jure) and freedom of expression; and, on the other, the five-way interaction between those indices. This is half way between a straight average and strict multiplication, meaning the average of the two. It is thus a compromise between the two most well known aggregation formulas in the literature, both allowing "compensation" in one sub-component for lack of polyarchy in the others, but also punishing countries not strong in one sub-component according to the "weakest link" argument. The aggregation is done at the level of Dahl's sub-components (with the one exception of the non-electoral component).

2.11.7.72 Voice and Accountability, Estimate (wbgi_vae)

Long tag: qog_oecd_cs_wbgi_vae

Original tag: wbgi_vae

Description:

Voice and Accountability - Estimate: "Voice and Accountability" includes a number of indicators measuring various aspects of the political process, civil liberties and political rights. These indicators measure the extent to which citizens of a country are able to participate in the selection of governments. This category also includes indicators measuring the independence of the media, which serves an important role in monitoring those in authority and holding them accountable for their actions.

2.11.8 Political Parties and Elections

This category includes variables describing various aspects of the legislature and political parties in the legislature (number of seats) as well as variables related to the election for the executive and variables on the outcomes of elections.

2.11.8.1 No. of coups (br_coup)

Long tag: qog_oecd_cs_br_coup

Original tag: br_coup

Description:

Total number of coups

Variable citation: Bjørnskov, C., & Rode, M. (2020). Regime types and regime change: A new dataset on democracy, coups, and political institutions. *Review of International Organizations*, 15, 531–551

2.11.8.2 Is the country in the Commonwealth (br_cw)

Long tag: qog_oecd_cs_br_cw

Original tag: br_cw

Description:

Is the country a member of the British Commonwealth? (0: No; 1: Yes)

Variable citation: Bjørnskov, C., & Rode, M. (2020). Regime types and regime change: A new dataset on democracy, coups, and political institutions. *Review of International Organizations*, 15, 531–551

2.11.8.3 Whether an election was postponed (br_elecpost)

Long tag: qog_oecd_cs_br_elecpost

Original tag: br_elecpost

Description:

Whether an election held in that year was postponed from an earlier date (0: No, 1: Yes)

Variable citation: Bjørnskov, C., & Rode, M. (2020). Regime types and regime change: A new dataset on democracy, coups, and political institutions. *Review of International Organizations*, 15, 531–551

2.11.8.4 Typology of political institutions (br_elect)

Long tag: qog_oecd_cs_br_elect

Original tag: br_elect

Description:

Alternative democracy indicator capturing degree of multi-party competition. (No elections=0, Single-party

elections=1, non-democratic multi-party elections=2, democratic elections= 3)

Variable citation: Bjørnskov, C., & Rode, M. (2020). Regime types and regime change: A new dataset on democracy, coups, and political institutions. *Review of International Organizations*, 15, 531–551

2.11.8.5 Whether an election was held during the year (br_elecyear)

Long tag: qog_oecd_cs_br_elecyear

Original tag: br_elecyear

Description:
Whether an election was held that year (0: No, 1: Yes)

Variable citation: Bjørnskov, C., & Rode, M. (2020). Regime types and regime change: A new dataset on democracy, coups, and political institutions. *Review of International Organizations*, 15, 531–551

2.11.8.6 No. of failed coups (br_fcoup)

Long tag: qog_oecd_cs_br_fcoup

Original tag: br_fcoup

Description:
Number of failed coups

Variable citation: Bjørnskov, C., & Rode, M. (2020). Regime types and regime change: A new dataset on democracy, coups, and political institutions. *Review of International Organizations*, 15, 531–551

2.11.8.7 Is the country a monarchy (br_mon)

Long tag: qog_oecd_cs_br_mon

Original tag: br_mon

Description:
Is the country a hereditary monarchy? (0: No; 1: Yes)

Variable citation: Bjørnskov, C., & Rode, M. (2020). Regime types and regime change: A new dataset on democracy, coups, and political institutions. *Review of International Organizations*, 15, 531–551

2.11.8.8 Is the political system presidential (br_pres)

Long tag: qog_oecd_cs_br_pres

Original tag: br_pres

Description:
Is the political system presidential? (0: No; 1: Yes)

Variable citation: Bjørnskov, C., & Rode, M. (2020). Regime types and regime change: A new dataset on democracy, coups, and political institutions. *Review of International Organizations*, 15, 531–551

2.11.8.9 Does the country have proportional voting (br_pvote)

Long tag: qog_oecd_cs_br_pvote

Original tag: br_pvote

Description:
Is the electoral system characterized by including proportional representation? (0: No; 1: Yes)

Variable citation: Bjørnskov, C., & Rode, M. (2020). Regime types and regime change: A new dataset on democracy, coups, and political institutions. *Review of International Organizations*, 15, 531–551

2.11.8.10 Did the main regime change (br_regch)

Long tag: qog_oecd_cs_br_regch

Original tag: br_regch

Description:
If a coded event, such as a change in the Presidency, took place after 01.07 it is assigned to the following calendar year in the data. In this case, the lag variable will be equal to one. For all change events before that date, the lag dummy is equal to zero. (0: No; 1: Yes)

Variable citation: Bjørnskov, C., & Rode, M. (2020). Regime types and regime change: A new dataset on democracy, coups, and political institutions. *Review of International Organizations*, 15, 531–551

2.11.8.11 No. of successful coups (br_scoup)

Long tag: qog_oecd_cs_br_scoup

Original tag: br_scoup

Description:
Number of successful coups

Variable citation: Bjørnskov, C., & Rode, M. (2020). Regime types and regime change: A new dataset on democracy, coups, and political institutions. *Review of International Organizations*, 15, 531–551

2.11.8.12 Full suffrage (br_suff)

Long tag: qog_oecd_cs_br_suff

Original tag: br_suff

Description:
Whether electoral system attributes full suffrage (0: No; 1: Yes)

Variable citation: Bjørnskov, C., & Rode, M. (2020). Regime types and regime change: A new dataset on democracy, coups, and political institutions. *Review of International Organizations*, 15, 531–551

2.11.8.13 Number of changes in government per year (cpds_chg)

Long tag: qog_oecd_cs_cpds_chg

Original tag: cpds_chg

Description:
Number of changes in government per year [termination of government due to (a) elections, (b) voluntary resignation of the Prime Minister, (c) resignation of Prime Minister due to health reasons, (d) dissension within government (break up of the coalition), (e) lack of parliamentary support, (f) intervention by the head of state, or (g) broadening of the coalition (inclusion of new parties).

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.11.8.14 Effective number of parties on the seats level (cpds_enps)

Long tag: qog_oecd_cs_cpds_enps

Original tag: cpds_enps

Description:
Effective number of parties on the seats level according to the formula proposed by Laakso and Taagepera (1979).

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.11.8.15 Effective number of parties on the votes level (cpds_enpv)

Long tag: qog_oecd_cs_cpds_enpv

Original tag: cpds_enpv

Description:
Effective number of parties on the votes level according to the formula proposed by Laakso and Taagepera (1979).

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.11.8.16 Electoral fractionalization of the party system (Rae index) (cpds_frel)

Long tag: qog_oecd_cs_cpds_frel

Original tag: cpds_frel

Description:
Index of electoral fractionalization of the party system according to the formula proposed by Rae (1968). The index can take values between 1 (maximal fractionalization) and 0 (minimal fractionalization).

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.11.8.17 Legislative fractionalization of the party system (Rae index) (cpds_frleg)

Long tag: qog_oecd_cs_cpds_frleg

Original tag: cpds_frleg

Description:
Index of legislative fractionalization of the party system according to the formula proposed by Rae (1968). The index can take values between 1 (maximal fractionalization) and 0 (minimal fractionalization).

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.11.8.18 Cabinet composition (Schmidt index) (cpds_govlr)

Long tag: qog_oecd_cs_cpds_govlr

Original tag: cpds_govlr

Description:

Cabinet composition (Schmidt-Index):

1. Hegemony of right-wing (and centre) parties.
2. Dominance of right-wing (and centre) parties.
3. Balance of power between left and right.
4. Dominance of social-democratic and other left parties.
5. Hegemony of social-democratic and other left parties.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.11.8.19 Government support (seat share of all parties in government) (cpds_govsup)

Long tag: qog_oecd_cs_cpds_govsup

Original tag: cpds_govsup

Description:

Total government support: seat share of all parties in government. Weighted by the numbers of days in office in a given year.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.11.8.20 Share of seats in parliament: agrarian (cpds_la)

Long tag: qog_oecd_cs_cpds_la

Original tag: cpds_la

Description:

Share of seats in parliament for the political parties classified as agrarian.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.11.8.21 Share of seats in parliament: electoral alliance (cpds_lall)

Long tag: qog_oecd_cs_cpds_lall

Original tag: cpds_lall

Description:

Share of seats in parliament for the political parties classified as electoral alliance.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.11.8.22 Share of seats in parliament: communist (cpds_lcom)

Long tag: qog_oecd_cs_cpds_lcom

Original tag: cpds_lcom

Description:

Share of seats in parliament for the political parties classified as communist.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.11.8.23 Share of seats in parliament: conservative (cpds_lcon)

Long tag: qog_oecd_cs_cpds_lcon

Original tag: cpds_lcon

Description:

Share of seats in parliament for the political parties classified as conservative.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.11.8.24 Share of seats in parliament: ethnic (cpds_le)

Long tag: qog_oecd_cs_cpds_le

Original tag: cpds_le

Description:

Share of seats in parliament for the political parties classified as ethnic.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.11.8.25 Share of seats in parliament: feminist (cpds_lfe)

Long tag: qog_oecd_cs_cpds_lfe

Original tag: cpds_lfe

Description:

Share of seats in parliament for the political parties classified as feminist.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.11.8.26 Share of seats in parliament: green (cpds_lg)

Long tag: qog_oecd_cs_cpds_lg

Original tag: cpds_lg

Description:

Share of seats in parliament for the political parties classified as green.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.11.8.27 Share of seats in parliament: liberal (cpds_ll)

Long tag: qog_oecd_cs_cpds_ll

Original tag: cpds_ll

Description:

Share of seats in parliament for the political parties classified as liberal.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.11.8.28 Share of seats in parliament: left-socialist (cpds_lls)

Long tag: qog_oecd_cs_cpds_lls

Original tag: cpds_lls

Description:

Share of seats in parliament for the political parties classified as left-socialist.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.11.8.29 Share of seats in parliament: monarchist (cpds_lmo)

Long tag: qog_oecd_cs_cpds_lmo

Original tag: cpds_lmo

Description:

Share of seats in parliament for the political parties classified as monarchist.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.11.8.30 Share of seats in parliament: non-labelled (cpds_lnl)

Long tag: qog_oecd_cs_cpds_lnl

Original tag: cpds_lnl

Description:

Share of seats in parliament for the political parties classified as non-labelled.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.11.8.31 Share of seats in parliament: other (cpds_lo)

Long tag: qog_oecd_cs_cpds_lo

Original tag: cpds_lo

Description:

Share of seats in parliament for the political parties classified as other.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.11.8.32 Share of seats in parliament: protest (cpds_lp)

Long tag: qog_oecd_cs_cpds_lp

Original tag: cpds_lp

Description:

Share of seats in parliament for the political parties classified as protest.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.11.8.33 Share of seats in parliament: post-communist (cpds_lpc)

Long tag: qog_oecd_cs_cpds_lpc

Original tag: cpds_lpc

Description:

Share of seats in parliament for the political parties classified as post-communist.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.11.8.34 Share of seats in parliament: pensioners (cpds_lpen)

Long tag: qog_oecd_cs_cpds_lpen

Original tag: cpds_lpen

Description:

Share of seats in parliament for the political parties classified as pensioners.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.11.8.35 Share of seats in parliament: personalist (cpds_lper)

Long tag: qog_oecd_cs_cpds_lper

Original tag: cpds_lper

Description:

Share of seats in parliament for the political parties classified as personalist.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.11.8.36 Share of seats in parliament: right (cpds_lr)

Long tag: qog_oecd_cs_cpds_lr

Original tag: cpds_lr

Description:

Share of seats in parliament for the political parties classified as right.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.11.8.37 Share of seats in parliament: regionalist (cpds_lreg)

Long tag: qog_oecd_cs_cpds_lreg

Original tag: cpds_lreg

Description:

Share of seats in parliament for the political parties classified as regionalist.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.11.8.38 Share of seats in parliament: religious (cpds_lrel)

Long tag: qog_oecd_cs_cpds_lrel

Original tag: cpds_lrel

Description:

Share of seats in parliament for the political parties classified as religious.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.11.8.39 Share of seats in parliament: social democratic (cpds_ls)

Long tag: qog_oecd_cs_cpds_ls

Original tag: cpds_ls

Description:

Share of seats in parliament for the political parties classified as social democratic.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.11.8.40 Type of Government (cpds_tg)

Long tag: qog_oecd_cs_cpds_tg

Original tag: cpds_tg

Description:
Type of government based on the following classification:

1. Single-party majority government: One party takes all governments seats and has a parliamentary majority.
2. Minimal winning coalition: All participating parties are necessary to form a majority government [>50.0percent].
3. Surplus coalition: Coalition governments which exceed the minimal-winning criterion [>50.0percent].
4. Single-party minority government: The party in government does not possess a majority in Parliament [<50.0percent].
5. Multi-party minority government: The parties in government do not possess a majority in Parliament [<50.0percent].
6. Caretaker government: Governments which should simply maintain the status quo.
7. Technocratic government: Led by technocratic prime minister, consists of a majority of technocratic ministers and is in possession of a mandate to change the status quo.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.11.8.41 Share of votes: agrarian (cpds_va)

Long tag: qog_oecd_cs_cpds_va

Original tag: cpds_va

Description:
Share of votes of the political parties classified as agrarian.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.11.8.42 Share of votes: electoral alliance (cpds_vall)

Long tag: qog_oecd_cs_cpds_vall

Original tag: cpds_vall

Description:
Share of votes of the political parties classified as electoral alliance.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.11.8.43 Share of votes: communist (cpds_vcom)

Long tag: qog_oecd_cs_cpds_vcom

Original tag: cpds_vcom

Description:
Share of votes of the political parties classified as communist.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.11.8.44 Share of votes: conservative (cpds_vcon)

Long tag: qog_oecd_cs_cpds_vcon

Original tag: cpds_vcon

Description:
Share of votes of the political parties classified as conservative.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.11.8.45 Share of votes: ethnic (cpds_ve)

Long tag: qog_oecd_cs_cpds_ve

Original tag: cpds_ve

Description:
Share of votes of the political parties classified as ethnic.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.11.8.46 Share of votes: feminist (cpds_vfe)

Long tag: qog_oecd_cs_cpds_vfe

Original tag: cpds_vfe

Description:
Share of votes of the political parties classified as feminist.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.11.8.47 Share of votes: green (cpds_vg)

Long tag: qog_oecd_cs_cpds_vg

Original tag: cpds_vg

Description:
Share of votes of the political parties classified as green.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.11.8.48 Share of votes: liberal (cpds_vl)

Long tag: qog_oecd_cs_cpds_vl

Original tag: cpds_vl

Description:
Share of votes of the political parties classified as liberal.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.11.8.49 Share of votes: left-socialist (cpds_vls)

Long tag: qog_oecd_cs_cpds_vls

Original tag: cpds_vls

Description:
Share of votes of the political parties classified as left-socialist.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.11.8.50 Share of votes: monarchist (cpds_vmo)

Long tag: qog_oecd_cs_cpds_vmo

Original tag: cpds_vmo

Description:
Share of votes of the political parties classified as monarchist.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.11.8.51 Share of votes: non-labelled (cpds_vnl)

Long tag: qog_oecd_cs_cpds_vnl

Original tag: cpds_vnl

Description:
Share of votes of the political parties classified as non-labelled.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.11.8.52 Share of votes: other (cpds_vo)

Long tag: qog_oecd_cs_cpds_vo

Original tag: cpds_vo

Description:
Share of votes of the political parties classified as other.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.11.8.53 Share of votes: protest (cpds_vp)

Long tag: qog_oecd_cs_cpds_vp

Original tag: cpds_vp

Description:
Share of votes of the political parties classified as protest.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.11.8.54 Share of votes: post-communist (cpds_vpcom)

Long tag: qog_oecd_cs_cpds_vpcom

Original tag: cpds_vpcom

Description:
Share of votes of the political parties classified as post-communist.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.11.8.55 Share of votes: pensioners (cpds_vpen)

Long tag: qog_oecd_cs_cpds_vpen

Original tag: cpds_vpen

Description:

Share of votes of the political parties classified as pensioners.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.11.8.56 Share of votes: personalist (cpds_vper)

Long tag: qog_oecd_cs_cpds_vper

Original tag: cpds_vper

Description:

Share of votes of the political parties classified as personalist.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.11.8.57 Share of votes: right (cpds_vr)

Long tag: qog_oecd_cs_cpds_vr

Original tag: cpds_vr

Description:

Share of votes of the political parties classified as right.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.11.8.58 Share of votes: regionalist (cpds_vreg)

Long tag: qog_oecd_cs_cpds_vreg

Original tag: cpds_vreg

Description:

Share of votes of the political parties classified as regionalist.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.11.8.59 Share of votes: religious (cpds_vrel)

Long tag: qog_oecd_cs_cpds_vrel

Original tag: cpds_vrel

Description:

Share of votes of the political parties classified as religious.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.11.8.60 Share of votes: social democratic (cpds_vs)

Long tag: qog_oecd_cs_cpds_vs

Original tag: cpds_vs

Description:

Share of votes of the political parties classified as social democratic.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.11.8.61 Voter turnout in election (cpds_vt)

Long tag: qog_oecd_cs_cpds_vt

Original tag: cpds_vt

Description:

Voter turnout in election.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.11.8.62 Electoral Volatility - Parties above 1percent (2nd election in year) (dev_altv2)

Long tag: qog_oecd_cs_dev_altv2

Original tag: dev_altv2

Description:
Electoral volatility caused by vote switching between existing parties in a second election in the same year.

Variable citation: Williams, A. (2015). A global index of information transparency and accountability. *Journal of Comparative Economics*, 43(3), 804–824. https://doi.org/10.1016/j.jce.2014.10.004

2.11.8.63 Electoral Volatility - Parties below 1percent (2nd election in year) (dev_othv2)

Long tag: qog_oecd_cs_dev_othv2

Original tag: dev_othv2

Description:
Electoral volatility caused by vote switching between parties falling below 1percent of the national share in both the elections at time t and t+1 in a second election in the same year.

Variable citation: Williams, A. (2015). A global index of information transparency and accountability. *Journal of Comparative Economics*, 43(3), 804–824. https://doi.org/10.1016/j.jce.2014.10.004

2.11.8.64 Electoral Volatility - Parties entering/exiting party system (2nd election in ye (dev_regv2)

Long tag: qog_oecd_cs_dev_regv2

Original tag: dev_regv2

Description:
Electoral volatility caused by vote switching between parties that enter or exit from the party system in a second election in the same year.

Variable citation: Williams, A. (2015). A global index of information transparency and accountability. *Journal of Comparative Economics*, 43(3), 804–824. https://doi.org/10.1016/j.jce.2014.10.004

2.11.8.65 Electoral Volatility - Total (2nd election in year) (dev_tv2)

Long tag: qog_oecd_cs_dev_tv2

Original tag: dev_tv2

Description:
Total electoral volatility in the party system in a second election in the same year.

Variable citation: Williams, A. (2015). A global index of information transparency and accountability. *Journal of Comparative Economics*, 43(3), 804–824. https://doi.org/10.1016/j.jce.2014.10.004

2.11.8.66 Electoral Process (fh_ep)

Long tag: qog_oecd_cs_fh_ep

Original tag: fh_ep

Description:
Electoral Process - The variable measures to what extent the national legislative representatives and the national chief authority are elected through free and fair elections. Countries are graded between 0 (worst) and 12 (best).

Variable citation: Freedom House. (2021a). Freedom in the world 2021. https://freedomhouse.org/report/freedom-world

2.11.8.67 Average District Magnitude (gol_adm)

Long tag: qog_oecd_cs_gol_adm

Original tag: gol_adm

Description:
Average district magnitude in an electoral tier. This is calculated as the total number of seats allocated in an electoral tier divided by the total number of districts in that tier.

2.11.8.68 Districts (gol_dist)

Long tag: qog_oecd_cs_gol_dist

Original tag: gol_dist

Description:
This is the number of electoral districts or constituencies in an electoral tier.

2.11.8.69 Effective Number of Electoral Parties (gol_enep)

Long tag: qog_oecd_cs_gol_enep

Original tag: gol_enep

Description:
Effective number of electoral parties.

2.11.8.70 Effective Number of Electoral Parties 1 (gol_enep1)

Long tag: qog_oecd_cs_gol_enep1

Original tag: gol_enep1

Description:
The effective number of electoral parties once the "other" category has been "corrected" by using the least component method of bounds.

2.11.8.71 Effective Number of Electoral Parties (Others) (gol_enepo)

Long tag: qog_oecd_cs_gol_enepo

Original tag: gol_enepo

Description:
The percentage of the vote going to parties that are collectively known as "others" in official election results.

2.11.8.72 Effective Number of Parliamentary or Legislative Parties (gol_enpp)

Long tag: qog_oecd_cs_gol_enpp

Original tag: gol_enpp

Description:
The effective number of parliamentary (legislative) parties.

2.11.8.73 Effective Number of Parliamentary or Legislative Parties 1 (gol_enpp1)

Long tag: qog_oecd_cs_gol_enpp1

Original tag: gol_enpp1

Description:
This is the effective number of parliamentary (legislative) parties once the "other" category has been "corrected" by using the least component method of bounds.

2.11.8.74 Effective Number of Parliamentary or Legislative Parties (Others) (gol_enppo)

Long tag: qog_oecd_cs_gol_enppo

Original tag: gol_enppo

Description:
The percentage of seats won by parties that are collectively known as "others" in official election results.

2.11.8.75 Electoral System Type-3 classes (gol_est)

Long tag: qog_oecd_cs_gol_est

Original tag: gol_est

Description:
This is a categorical variable that takes on one of three values indicating the basic type of electoral system used in the elections.

1. Majoritarian
2. Proportional
3. Mixed

2.11.8.76 Electoral System Type-11 classes (gol_est_spec)

Long tag: qog_oecd_cs_gol_est_spec

Original tag: gol_est_spec

Description:
This is a categorical variable that provides a more detailed indication of the type of electoral system used in the election.

1. Single-Member-District-Plurality (SMDP)
2. Two-Round System (TRS)
3. Alternative Vote (AV)
4. Borda Count (BC)
5. Block Vote (BV)
6. Party Block Vote (PBV)
7. Limited Vote (LV)
8. Single Nontransferable Vote (SNTV)
9. List Proportional Representation (List PR)

10. Single Transferable Vote (STV)
11. Mixed Dependent (or Mixed Member Proportional)
12. Mixed Independent (or Mixed Parallel)

2.11.8.77 Institution (gol_inst)

Long tag: qog_oecd_cs_gol_inst

Original tag: gol_inst

Description:

This is a categorical variable indicating a country's regime type at the end of a given year. The data for this variable come from Cheibub, Gandhi and Vreeland (2010), which we updated through 2011.

0. Parliamentary democracy
1. Semi-presidential democracy
2. Presidential democracy
3. Civilian dictatorship
4. Military dictatorship
5. Royal dictatorship

Not all elections that occur when a regime is classified as a dictatorship (regime = 4-6) are dictatorial. This apparent anomaly has to do with the fact that a country's regime type is coded based on its status at the end of a given year. Elections like those in Argentina 1962, Nicaragua 1983, Philippines 1965, and Thailand 1976 all preceded a democratic collapse in the same year. Although these countries are considered dictatorial at the end of these years, we code these particular elections as democratic and therefore include them in our data set. We should note that we code the 1997 elections in Kenya, the 1999 elections in Guinea Bissau, the 2005 elections in Liberia, the 2006 elections in Mauritania, and the 2008 elections in Bangladesh as democratic even though Cheibub, Gandhi and Vreeland (2010) do not code these countries as democratic until the following year. The reason for this is that these elections are the primary reason cited by Cheibub, Gandhi and Vreeland (2010) for their eventual recoding of these countries as democratic. As an example, Cheibub, Gandhi and Vreeland (2010) do not code Liberia as democratic until 2006 despite the fact that presidential elections took place in October 2005, because the winner of these elections, Ellen Johnson-Sirleaf, did not officially take office until January 2006. The bottom line is that there are a few observations in our data set of democratic elections where regime indicates that the country was a dictatorship by the end of the year.

2.11.8.78 Multi-Tier Type (gol_mt)

Long tag: qog_oecd_cs_gol_mt

Original tag: gol_mt

Description:

This is a dichotomous variable that indicates whether different electoral tiers are linked (1) or not (0). Electoral tiers are linked if the unused votes from one electoral tier are used to allocate seats in another electoral tier, or if the allocation of seats in one electoral tier is conditional on the seats received in a different electoral tier.

2.11.8.79 Number of Seats (gol_nos)

Long tag: qog_oecd_cs_gol_nos

Original tag: gol_nos

Description:

This indicates the total number of seats in the lower house of the national legislature.

2.11.8.80 Electoral Formula used in an Electoral Tier (gol_pr)

Long tag: qog_oecd_cs_gol_pr

Original tag: gol_pr

Description:

This is a categorical variable that indicates the precise electoral formula used in an electoral tier.

1. Single-Member-District-Plurality (SMDP)
2. Two Round Majority-Plurality
3. Two Round Qualified Majority
4. Two Round Majority Runoff
5. Alternative Vote (AV)
6. Borda Count (BC)
7. Modified Borda Count (mBC)
8. Block Vote (BV)
9. Party Block Vote (PBV)
10. Limited Vote (LV)
11. Single Nontransferable Vote (SNTV)
12. Hare quota
13. Hare quota with largest remainders
14. Hare quota with highest average remainders
15. Hagenbach-Bischoff quota

16. Hagenbach-Bischoff quota with largest remainders
17. Hagenbach-Bischoff quota with highest average remainders
18. Droop quota
19. Droop quota with largest remainders
20. Droop quota with highest average remainders
21. Imperiali quota
22. Imperiali quota with largest remainders
23. Imperiali quota with highest average remainders
24. Reinforced Imperiali quota
25. D'Hondt
26. Sainte-Laguë
27. Modified Sainte-Laguë
28. Single Transferable Vote.

Note: Users can find a detailed description of the difference between types in the original codebook.

2.11.8.81 Presidential Election (gol_preel)

Long tag: qog_oecd_cs_gol_preel

Original tag: gol_preel

Description:
This is a dichotomous variable that takes on the value 1 if the election is presidential and 0 if the election is legislative.

2.11.8.82 Upper Seats (gol_upseat)

Long tag: qog_oecd_cs_gol_upseat

Original tag: gol_upseat

Description:
This indicates the number of legislative seats allocated in electoral districts above the lowest electoral tier.

2.11.8.83 Alignment Executive/Legislative Chamber (lower) (h_alignl1)

Long tag: qog_oecd_cs_h_alignl1

Original tag: h_alignl1

Description:
Dummy variable indicating alignment between the executive and the lower legislative chamber, coded 1 when the party controlling the executive branch is either the largest party in the lower legislative chamber or is a member of a ruling coalition in that chamber.

Variable citation: Henisz, W. J. (2017). The Political Constraint Index (POLCON) Dataset 2017 release. `https://mgmt.wharton.upenn.edu/profile/1327`

2.11.8.84 2nd Legislative Chamber (h_l2)

Long tag: qog_oecd_cs_h_l2

Original tag: h_l2

Description:
Dummy variable coded 1 if there is an effective second legislative chamber, namely, where h_l1=1 and records on the composition of a second chamber exist - where that chamber is elected under a distinct electoral system and has a substantive (not merely delaying) role in the implementation of fiscal policy.

Variable citation: Henisz, W. J. (2017). The Political Constraint Index (POLCON) Dataset 2017 release. `https://mgmt.wharton.upenn.edu/profile/1327`

2.11.8.85 Legislative Fractionalization (lower) (h_lflo)

Long tag: qog_oecd_cs_h_lflo

Original tag: h_lflo

Description:
Legislative fractionalization is approximately the probability that two random draws from the lower legislative chamber will be from different parties.

Variable citation: Henisz, W. J. (2017). The Political Constraint Index (POLCON) Dataset 2017 release. `https://mgmt.wharton.upenn.edu/profile/1327`

2.11.8.86 Electoral System Family (ideaesd_esf)

Long tag: qog_oecd_cs_ideaesd_esf

Original tag: ideaesd_esf

Description:
Electoral System Family

1. Proportional Representation
2. Plurality/Majority
3. Plurality/Majority and Proportional Representation
4. Mixed
5. Transition
6. Other
7. Not Applicable

Variable citation: The International Institute for Democracy and Electoral Assistance. (2021a). Electoral system design database. `https://www.idea.int/data-tools/data/electoral-system-design`

2.11.8.87 Electoral System for the National Legislature (ideaesd_esnl)

Long tag: qog_oecd_cs_ideaesd_esnl

Original tag: ideaesd_esnl

Description:
Electoral System for National Legislature:

1. List Proportional Representation (List PR)
Under a List Proportional Representation (List PR) system each party or grouping presents a list of candidates for a multi-member electoral district, the voters vote for a party, and parties receive seats in proportion to their overall share of the vote. In some (closed list) systems the winning candidates are taken from the lists in order of their position on the lists. If the lists are 'open' or 'free' the voters can influence the order of the candidates by marking individual preferences.

2. Block Vote (BV)
Block Vote is a plurality/majority system used in multi-member districts. Electors have as many votes as there are candidates to be elected. The candidates with the highest vote totals win the seats. Usually voters vote for candidates rather than parties and in most systems may use as many, or as few, of their votes as they wish.

3. First Past the Post (FPTP)
First Past The Post is the simplest form of plurality/majority electoral system. The winning candidate is the one who gains more votes than any other candidate, even if this is not an absolute majority of valid votes. The system uses single-member districts and the voters vote for candidates rather than political parties.

4. Two-Round System (TRS)
The Two-Round System is a plurality/majority system in which a second election is held if no candidate or party achieves a given level of votes, most commonly an absolute majority (50 per cent plus one), in the first election round. A Two-Round System may take a majority-plurality form-more than two candidates contest the second round and the one wins the highest number of votes in the second round is elected, regardless of whether they have won an absolute majority-or a majority run-off form-only the top two candidates in the first round contest the second round.

5. Mixed Member Proportional (MMP)
Mixed Member Proportional is a mixed system in which the choices expressed by the voters are used to elect representatives through two different systems-one List PR system and (usually) one plurality/majority system-where the List PR system compensates for the disproportionality in the results from the plurality/majority system.

6. Single Transferable Vote (STV)
The Single Transferable Vote is a preferential system in which the voter has one vote in a multi-member district and the candidates that surpass a specified quota of first preference votes are immediately elected. In successive counts, votes are redistributed from least successful candidates, who are eliminated, and votes surplus to the quota are redistributed from successful candidates, until sufficient candidates are declared elected. Voters normally vote for candidates rather than political parties, although a party-list option is possible.

7. Alternative Vote (AV)
The Alternative Vote is a preferential plurality/majority system used in single-member districts. Voters use numbers to mark their preferences on the ballot paper. A candidate who receives an absolute majority (50 per cent plus 1) of valid first preference votes is declared elected. If no candidate achieves an absolute majority of first preferences, the least successful candidates are eliminated and their votes reallocated according to their second preferences until one candidate has an absolute majority. Voters vote for candidates rather than political parties.

8. Single Non-Transferable Vote (SNTV)
Under the Single Non-Transferable Vote system voters cast a single vote in a multi-member district. The candidates with the highest vote totals are declared elected. Voters vote for candidates rather than political parties.

9. Two-Round System, Party Block Vote (TRS PBV)
Party Block Vote (PBV) is a plurality/majority system using multi-member districts in which voters cast a single party-centered vote for a party of choice, and do not choose between candidates. The party with the most votes will win every seat in the electoral district.

10. Limited Vote (LV)
Limited Vote is a candidate-centred electoral system used in multi-member districts in which electors have more than one vote, but fewer votes than there are candidates to be elected. The candidates with the highest vote totals win the seats.

11. First Past The Post, Party Block Vote (FPTP PBV)

12. First Past the Post, List Proportional Representation (FPTP List PR)

13. First Past the Post, Block Vote (FPTP BV)

14. First Past the Post, Party Block Vote, List Proportional Representation (FPTP PBV List PR)

15. Parallel
A Parallel System is a mixed system in which the choices expressed by the voters are used to elect representatives through two different systems-one List PR system and (usually) one plurality/majority system-but where no account is taken of the seats allocated under the first system in calculating the results in the second system.

16. In transition

17. Modified Borda Count (Modified BC)
Borda Count (BC) - A candidate-centred preferential system used in either single- or multimember districts in which voters use numbers to mark their preferences on the ballot paper and each preference marked is then assigned a value using equal steps. These are summed and the candidate(s) with the highest total(s) is/are declared elected.

18. Two-Round System, Party Block Vote, List Proportional Representation (TRS PBV List PR)

19. No direct elections.

Variable citation: The International Institute for Democracy and Electoral Assistance. (2021a). Electoral system design database. `https://www.idea.int/data-tools/data/electoral-system-design`

2.11.8.88 Electoral System for the President (ideaesd_esp)

Long tag: qog_oecd_cs_ideaesd_esp

Original tag: ideaesd_esp

Description:
Electoral System for the President:

1. Two-Round System (TRS)
The Two-Round System is a plurality/majority system in which a second election is held if no candidate or party achieves a given level of votes, most commonly an absolute majority (50 per cent plus one), in the first election round. A Two-Round System may take a majority-plurality form-more than two candidates contest the second round and the one who wins the highest number of votes in the second round is elected, regardless of whether they have won an absolute majority-or a majority run-off form-only the top two candidates in the first round contest the second round.

2. First Past the Post (FPTP)
First Past The Post is the simplest form of plurality/majority electoral system. The winning candidate is the one who gains more votes than any other candidate, even if this is not an absolute majority of valid votes. The system uses single-member districts and the voters vote for candidates rather than political parties.

3. Supplementary Vote (SV)
Supplementary vote: Voters can rank up to three candidates, and if no candidate wins a majority in the first round of voting, second and third preferences from ballots whose first preference candidate has been eliminated are used to determine the winner.

4. Single Transferable Vote (STV)
The Single Transferable Vote is a preferential system in which the voter has one vote in a multi-member district and the candidates that surpass a specified quota of first preference votes are immediately elected. In successive counts, votes are redistributed from least successful candidates, who are eliminated, and votes surplus to the quota are redistributed from successful candidates, until sufficient candidates are declared elected. Voters normally vote for candidates rather than political parties, although a party-list option is possible.

5. In Transition

6. Other

7. Not applicable

2.11.8.89 Legislative Size (Directly Elected) (ideaesd_lsde)

Long tag: qog_oecd_cs_ideaesd_lsde

Original tag: ideaesd_lsde

Description:
Legislative size, directly elected. Total number of directly elected representatives, excluding those appointed or indirectly elected.

Variable citation: The International Institute for Democracy and Electoral Assistance. (2021a). Electoral system design database. `https://www.idea.int/data-tools/data/electoral-system-design`

2.11.8.90 Legislative Size (Voting Members) (ideaesd_lsvm)

Long tag: qog_oecd_cs_ideaesd_lsvm

Original tag: ideaesd_lsvm

Description:
Legislative size, voting members. Total number of directly elected representatives, including those appointed or indirectly elected.

Variable citation: The International Institute for Democracy and Electoral Assistance. (2021a). Electoral system design database. `https://www.idea.int/data-tools/data/electoral-system-design`

2.11.8.91 Number of Tiers (ideaesd_tiers)

Long tag: qog_oecd_cs_ideaesd_tiers

Original tag: ideaesd_tiers

Description:
Number of tiers. The tiers of an electoral system can be understood as the sets of representatives that are elected to the same chamber by the entire electorate of a country. 99 indicates a hybrid system, where one part of the country elects representatives using one electoral system, while another distinct part of the country elects representatives using a different system.

Variable citation: The International Institute for Democracy and Electoral Assistance. (2021a). Electoral system design database. `https://www.idea.int/data-tools/data/electoral-system-design`

2.11.8.92 Parliamentary Election: Compulsory Voting (ideavt_legcv)

Long tag: qog_oecd_cs_ideavt_legcv

Original tag: ideavt_legcv

Description:
Parliamentary Election: Compulsory Voting

Variable citation: The International Institute for Democracy and Electoral Assistance. (2021b). Voter turnout database. `https://www.idea.int/data-tools/data/voter-turnout`

2.11.8.93 Parliamentary Election: Voter Turnout (ideavt_legvt)

Long tag: qog_oecd_cs_ideavt_legvt

Original tag: ideavt_legvt

Description:
Parliamentary Election: Voter Turnout

Variable citation: The International Institute for Democracy and Electoral Assistance. (2021b). Voter turnout database. `https://www.idea.int/data-tools/data/voter-turnout`

2.11.8.94 Number of Seats (Lower and Single Houses) (ipu_l_s)

Long tag: qog_oecd_cs_ipu_l_s

Original tag: ipu_l_s

Description:
Number of Seats (Lower and Single Houses).

Variable citation: Inter-Parliamentary Union. (2021). Parline database: Monthly ranking of women in national parliaments. `https://data.ipu.org/women-ranking`

2.11.8.95 Share of Women (Lower and Single Houses) (ipu_l_sw)

Long tag: qog_oecd_cs_ipu_l_sw

Original tag: ipu_l_sw

Description:
Share of Women (Lower and Single Houses).

Variable citation: Inter-Parliamentary Union. (2021). Parline database: Monthly ranking of women in national parliaments. `https://data.ipu.org/women-ranking`

2.11.8.96 Number of Women (Lower and Single Houses) (ipu_l_w)

Long tag: qog_oecd_cs_ipu_l_w

Original tag: ipu_l_w

Description:
Number of Women (Lower and Single Houses).

Variable citation: Inter-Parliamentary Union. (2021). Parline database: Monthly ranking of women in national parliaments. `https://data.ipu.org/women-ranking`

2.11.8.97 First Multiparty Election (nelda_fme)

Long tag: qog_oecd_cs_nelda_fme

Original tag: nelda_fme

Description:
This indicates when a newly independent country is having its first elections, when a country holds the first multiparty elections after a significant period of non-democratic rule, or when a country transitions from single-party elections to multiparty elections. Multiparty means that more than one party is allowed to contest the election, and that at least some of the parties are both nominally and effectively independent of the ruling actors.

Variable citation: Hyde, S. D., & Marinov, N. (2012). Which elections can be lost? *Political Analysis*, 20(2), 191–201 Hyde, S. D., & Marinov, N. (2021). Codebook for national elections across democracy and autocracy dataset, 5.0. `https://nelda.co/`

2.11.8.98 Media Bias before Election (nelda_mbbe)

Long tag: qog_oecd_cs_nelda_mbbe

Original tag: nelda_mbbe

Description:
If there were reports by either domestic or outside actors of media bias in favor of the incumbent or ruling party, it is coded as a "Yes". In cases where the media is totally controlled by the government, and/or no opposition is allowed, the answer is "Yes". It is possible that the answer is "No" even if the political system is tightly controlled.

Variable citation: Hyde, S. D., & Marinov, N. (2012). Which elections can be lost? *Political Analysis*, 20(2), 191–201 Hyde, S. D., & Marinov, N. (2021). Codebook for national elections across democracy and autocracy dataset, 5.0. `https://nelda.co/`

2.11.8.99 Was More Than One Party Legal (nelda_mtop)

Long tag: qog_oecd_cs_nelda_mtop

Original tag: nelda_mtop

Description:
This variable indicates whether multiple political parties were technically legal. The legalization of multiple parties need not necessarily mean the existence of a functioning opposition party, as there may be other non-legal barriers to the development of an opposition party. Similarly, a well organized opposition party may exist but may not be legal.

Variable citation: Hyde, S. D., & Marinov, N. (2012). Which elections can be lost? *Political Analysis*, 20(2), 191–201 Hyde, S. D., & Marinov, N. (2021). Codebook for national elections across democracy and autocracy dataset, 5.0. `https://nelda.co/`

2.11.8.100 Number of Elections, Total (nelda_noe)

Long tag: qog_oecd_cs_nelda_noe

Original tag: nelda_noe

Description:
The number of elections during the year (counting legislative, executive and constituent assembly elections).

Variable citation: Hyde, S. D., & Marinov, N. (2012). Which elections can be lost? *Political Analysis*, 20(2), 191–201 Hyde, S. D., & Marinov, N. (2021). Codebook for national elections across democracy and autocracy dataset, 5.0. `https://nelda.co/`

2.11.8.101 Number of Elections, Constituent Assembly (nelda_noea)

Long tag: qog_oecd_cs_nelda_noea

Original tag: nelda_noea

Description:
Number of constituent assembly elections during the year.

Variable citation: Hyde, S. D., & Marinov, N. (2012). Which elections can be lost? *Political Analysis*, 20(2), 191–201 Hyde, S. D., & Marinov, N. (2021). Codebook for national elections across democracy and autocracy dataset, 5.0. `https://nelda.co/`

2.11.8.102 Number of Elections, Executive (nelda_noee)

Long tag: qog_oecd_cs_nelda_noee

Original tag: nelda_noee

Description:
Number of executive elections during the year.

Variable citation: Hyde, S. D., & Marinov, N. (2012). Which elections can be lost? *Political Analysis*, 20(2), 191–201 Hyde, S. D., & Marinov, N. (2021). Codebook for national elections across democracy and autocracy dataset, 5.0. `https://nelda.co/`

2.11.8.103 Number of Elections, Legislative (nelda_noel)

Long tag: qog_oecd_cs_nelda_noel

Original tag: nelda_noel

Description:
Number of legislative elections during the year.

Variable citation: Hyde, S. D., & Marinov, N. (2012). Which elections can be lost? *Political Analysis*, 20(2), 191–201 Hyde, S. D., & Marinov, N. (2021). Codebook for national elections across democracy and autocracy dataset, 5.0. `https://nelda.co/`

2.11.8.104 Was Opposition Allowed (nelda_oa)

Long tag: qog_oecd_cs_nelda_oa

Original tag: nelda_oa

Description:
This variable indicates whether at least one opposition political party existed to contest the election. Some countries have multiple government parties but no opposition political party. An opposition party is one that is not in the government, meaning it is not affiliated with the incumbent party in power.

Variable citation: Hyde, S. D., & Marinov, N. (2012). Which elections can be lost? *Political Analysis*, 20(2), 191–201 Hyde, S. D., & Marinov, N. (2021). Codebook for national elections across democracy and autocracy dataset, 5.0. `https://nelda.co/`

2.11.8.105 Electoral Integrity Rating (pei_eir)

Long tag: qog_oecd_cs_pei_eir

Original tag: pei_eir

Description:
Overall how would you rate the integrity of this election on a scale from 1 (very poor) to 10 (very good)?

Variable citation: Norris, P., & Groemping, M. (2019). Perceptions of Electoral Integrity, (PEI-7.0) [V2, UNF:6:2wnukYraCZzg+gojPE [fileUNF]]. `https://doi.org/10.7910/DVN/EWYTZ7`

2.11.8.106 Electoral Integrity Rating, Higher C.I. (pei_eirhci)

Long tag: qog_oecd_cs_pei_eirhci

Original tag: pei_eirhci

Description:
The higher bound of the 95percent confidence interval for either the election or the country level.

Variable citation: Norris, P., & Groemping, M. (2019). Perceptions of Electoral Integrity, (PEI-7.0) [V2, UNF:6:2wnukYraCZzg+gojPE [fileUNF]]. https://doi.org/10.7910/DVN/EWYTZ7

2.11.8.107 Electoral Integrity Rating, Lower C.I. (pei_eirlci)

Long tag: qog_oecd_cs_pei_eirlci

Original tag: pei_eirlci

Description:

The lower bound of the 95percent confidence interval for either the election or the country level.

Variable citation: Norris, P., & Groemping, M. (2019). Perceptions of Electoral Integrity, (PEI-7.0) [V2, UNF:6:2wnukYraCZzg+gojPE [fileUNF]]. https://doi.org/10.7910/DVN/EWYTZ7

2.11.8.108 Elected Office (pei_off)

Long tag: qog_oecd_cs_pei_off

Original tag: pei_off

Description:

What government body was this election for?

0. Legislative
1. Presidential
2. Both

Variable citation: Norris, P., & Groemping, M. (2019). Perceptions of Electoral Integrity, (PEI-7.0) [V2, UNF:6:2wnukYraCZzg+gojPE [fileUNF]]. https://doi.org/10.7910/DVN/EWYTZ7

2.11.8.109 Perception of Electoral Integrity Index (pei_peii)

Long tag: qog_oecd_cs_pei_peii

Original tag: pei_peii

Description:

The PEI index is designed to provide an overall summary evaluation of expert perceptions that an election meets international standards and global norms. It is generated at the individual level using experts' answers to the 49 substantive variables below. Therefore, an Index score is missing if an expert does not answer a question. The 49 scores are summed and then standardized to a 100 point scale.

Variable citation: Norris, P., & Groemping, M. (2019). Perceptions of Electoral Integrity, (PEI-7.0) [V2, UNF:6:2wnukYraCZzg+gojPE [fileUNF]]. https://doi.org/10.7910/DVN/EWYTZ7

2.11.8.110 Perception of Electoral Integrity Index Type (pei_peit)

Long tag: qog_oecd_cs_pei_peit

Original tag: pei_peit

Description:

Classification of the PEI Index on five categories.

1. Very Low
2. Low
3. Moderate
4. High
5. Very High

Variable citation: Norris, P., & Groemping, M. (2019). Perceptions of Electoral Integrity, (PEI-7.0) [V2, UNF:6:2wnukYraCZzg+gojPE [fileUNF]]. https://doi.org/10.7910/DVN/EWYTZ7

2.11.8.111 Robust Democracy: Electoral Process (sgi_qdep)

Long tag: qog_oecd_cs_sgi_qdep

Original tag: sgi_qdep

Description:

Robust Democracy: Electoral Process (Candidacy Procedures, Media Access, Voting and Registration Rights, Party Financing, Popular Decision-making).

Variable citation: Schiller, C., & Hellmann, T. (2020). Sustainable governance indicators 2020 [Date accessed: 12 December 2021]. *Bertelsmann Stiftung*. https://www.sgi-network.org

2.11.8.112 Competition (van_comp)

Long tag: qog_oecd_cs_van_comp

Original tag: van_comp

Description:
The competition variable portrays the electoral success of smaller parties, that is, the percentage of votes gained by the smaller parties in parliamentary and/or presidential elections. The variable is calculated by subtracting from 100 the percentage of votes won by the largest party (the party which wins most votes) in parliamentary elections or by the party of the successful candidate in presidential elections. Depending on their importance, either parliamentary or presidential elections are used in the calculation of the variable, or both elections are used, with weights. If information on the distribution of votes is not available, or if the distribution does not portray the reality accurately, the distribution of parliamentary seats is used instead. If parliament members are elected but political parties are not allowed to take part in elections, it is assumed that one party has taken all votes or seats. In countries where parties are not banned but yet only independent candidates participate in elections, it is assumed that the share of the largest party is not over 30 percent.

2.11.8.113 Index of Democratization (van_index)

Long tag: qog_oecd_cs_van_index

Original tag: van_index

Description:
The index of democratization is formed by multiplying the competition and the participation variables and then dividing the outcome by 100.

2.11.8.114 Participation (van_part)

Long tag: qog_oecd_cs_van_part

Original tag: van_part

Description:
The political participation variable portrays the voting turnout in each election, and is calculated as the percentage of the total population who actually voted in the election. In the case of indirect elections, only votes cast in the final election are taken into account. If electors have not been elected by citizens, only the number of actual electors is taken into account, which means that the degree of participation drops to the value 0. If an election to choose electors has been held, the participation variable is calculated from the number and distribution of votes in that election. National referendums raise the variable value by five percent and state (regional) referendums by one percent for the year they are held. Referendums can add the degree of participation at maximum by 30 percent a year. The value of the combined degree of participation cannot be higher than 70 percent, even in cases where the sum of participation and referendums would be higher than 70.

2.11.8.115 Proportion of seats held by women in national parliaments (percent) (wdi_wip)

Long tag: qog_oecd_cs_wdi_wip

Original tag: wdi_wip

Description:
Women in parliaments are the percentage of parliamentary seats in a single or lower chamber held by women.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.8.116 Number of years the leader in office continuously (wgov_leadexp)

Long tag: qog_oecd_cs_wgov_leadexp

Original tag: wgov_leadexp

Description:
The number of years the person has been leader of the country in a row, continuous. Thus, it starts over if the leader is removed. The count starts at 1, when the leader first appear as leader in the dataset. Therefore, the measure is imprecise for leaders, who came to power before 1966.

Variable citation: Nyrup, J., & Bramwell, S. (2020). Who governs? a new global dataset on members of cabinets. *American Political Science Review*, 114(4), 1366–1374

2.11.8.117 Number of cabinet ministers (wgov_min)

Long tag: qog_oecd_cs_wgov_min

Original tag: wgov_min

Description:
Number of cabinet ministers. This number only include cabinet ministers.

Variable citation: Nyrup, J., & Bramwell, S. (2020). Who governs? a new global dataset on members of cabinets. *American Political Science Review*, 114(4), 1366–1374

2.11.8.118 Average age of cabinet members (wgov_minage)

Long tag: qog_oecd_cs_wgov_minage

Original tag: wgov_minage

Description:
Average age of cabinet ministers.

Variable citation: Nyrup, J., & Bramwell, S. (2020). Who governs? a new global dataset on members of cabinets. *American Political Science Review*, 114(4), 1366–1374

2.11.8.119 Number of women among cabinet ministers (wgov_minfem)

Long tag: qog_oecd_cs_wgov_minfem

Original tag: wgov_minfem

Description:
The number of women among cabinet ministers.

Variable citation: Nyrup, J., & Bramwell, S. (2020). Who governs? a new global dataset on members of cabinets. *American Political Science Review*, 114(4), 1366–1374

2.11.8.120 Average tenure of cabinet members (wgov_minten)

Long tag: qog_oecd_cs_wgov_minten

Original tag: wgov_minten

Description:
The average tenure of cabinet ministers.

Variable citation: Nyrup, J., & Bramwell, S. (2020). Who governs? a new global dataset on members of cabinets. *American Political Science Review*, 114(4), 1366–1374

2.11.8.121 Adjusted retention rate of cabinet members (wgov_mret)

Long tag: qog_oecd_cs_wgov_mret

Original tag: wgov_mret

Description:
The share of cabinet ministers, who where in the list of cabinet ministers for the previous year. This measure is adjusted for an expansion of number of cabinet members, so the number of cabinet ministers stays constant and the retention rate is therefore not influenced by an expansion of the cabinet.

Variable citation: Nyrup, J., & Bramwell, S. (2020). Who governs? a new global dataset on members of cabinets. *American Political Science Review*, 114(4), 1366–1374

2.11.8.122 Total number of government positions (inc. unoccupied and multiple positions hel (wgov_tot)

Long tag: qog_oecd_cs_wgov_tot

Original tag: wgov_tot

Description:
Number of entries for the country in the dataset. This number includes unoccupied positions and multiple positions held by the same persons.

Variable citation: Nyrup, J., & Bramwell, S. (2020). Who governs? a new global dataset on members of cabinets. *American Political Science Review*, 114(4), 1366–1374

2.11.8.123 Average age for all entries for the country in the dataset (wgov_totage)

Long tag: qog_oecd_cs_wgov_totage

Original tag: wgov_totage

Description:
Average age for people, based on all entries for the country in the dataset. This includes unoccupied positions and multiple positions held by the same persons.

Variable citation: Nyrup, J., & Bramwell, S. (2020). Who governs? a new global dataset on members of cabinets. *American Political Science Review*, 114(4), 1366–1374

2.11.8.124 Number of women in the total number of entries for the country in the dataset (wgov_totfem)

Long tag: qog_oecd_cs_wgov_totfem

Original tag: wgov_totfem

Description:
The number of women in the total number of entries for the country in the dataset. This includes unoccupied

positions and multiple positions held by the same persons.

Variable citation: Nyrup, J., & Bramwell, S. (2020). Who governs? a new global dataset on members of cabinets. *American Political Science Review*, 114(4), 1366–1374

2.11.8.125 Average tenure for all entries for the country in the dataset (wgov_totten)

Long tag: qog_oecd_cs_wgov_totten

Original tag: wgov_totten

Description:
The average tenure for people, based on all entries for the country in the dataset. This includes unoccupied positions and multiple positions held by the same persons.

Variable citation: Nyrup, J., & Bramwell, S. (2020). Who governs? a new global dataset on members of cabinets. *American Political Science Review*, 114(4), 1366–1374

2.11.8.126 Adjusted retention rate for all entries for the country in the dataset (wgov_tret)

Long tag: qog_oecd_cs_wgov_tret

Original tag: wgov_tret

Description:
The share of people in total number of entries for the country, who were also listed in the previous year. This measure is adjusted for an expansion of the size of total number of entries, so the number of entries for the country stays constant and the retention rate is therefore not influenced by an expansion of the total number of entries.

Variable citation: Nyrup, J., & Bramwell, S. (2020). Who governs? a new global dataset on members of cabinets. *American Political Science Review*, 114(4), 1366–1374

2.11.8.127 Confidence: The Political Parties (wvs_confpp)

Long tag: qog_oecd_cs_wvs_confpp

Original tag: wvs_confpp

Description:
I am going to name a number of organizations. For each one, could you tell me how much confidence you have in them: The Political Parties

1. None at all
2. Not very much
3. Quite a lot
4. A great deal

2.11.8.128 Year of election (yri_yoe)

Long tag: qog_oecd_cs_yri_yoe

Original tag: yri_yoe

Description:
Year of election

Variable citation: Sundström, A., & Stockemer, D. (2020). Conceptualizing, measuring, and explaining youths' relative absence in legislatures. *PS: Political Science and Politics*, 1–7. `https://doi.org/10.1017/S1049096520000906`

2.11.8.129 Youth Representation Index (35 years or younger) (yri_yri35)

Long tag: qog_oecd_cs_yri_yri35

Original tag: yri_yri35

Description:
The YRI 35 is a measure in which the percentage of youth in parliament - MPs ages 18 to 35 years - is divided by the proportion of youth (ages 18 to 35) within the eligible voting-age population and then multiplying by 100. A higher score on this measure indicates a larger correspondence between youth in the

population and their presence in parliaments. A score of 100 suggest that the share of young MPs is on par with the share of young people in voting-age youth in the population. A score of zero indicates that not a single individual Member of Parliament (MP) is considered to be young.

Variable citation: Sundström, A., & Stockemer, D. (2020). Conceptualizing, measuring, and explaining youths' relative absence in legislatures. *PS: Political Science and Politics*, 1–7. `https://doi.org/10.1017/S1049096520000906`

2.11.8.130 Youth Representation Index (40 years or younger) (yri_yri40)

Long tag: qog_oecd_cs_yri_yri40

Original tag: yri_yri40

Description:

The YRI 40 is a measure in which the percentage of youth in parliament - MPs ages 18 to 40 years - is divided by the proportion of youth (ages 18 to 40) within the eligible voting-age population and then multiplying by 100. A higher score on this measure indicates a larger correspondence between youth in the population and their presence in parliaments. A score of 100 suggest that the share of young MPs is on par with the share of young people in voting-age youth in the population. A score of zero indicates that not a single individual Member of Parliament (MP) is considered to be young.

Variable citation: Sundström, A., & Stockemer, D. (2020). Conceptualizing, measuring, and explaining youths' relative absence in legislatures. *PS: Political Science and Politics*, 1–7. `https://doi.org/10.1017/S1049096520000906`

2.11.9 Health

This category includes indicators describing the health of a population in a given country. These include reports about self-perceived health (state of health), policies and provided infrastructure concerning health (expenditure, number of hospitals), the prevalence of diseases (HIV, tuberculosis), and indicators such as birth rate, death rate and life expectancy.

2.11.9.1 Comparative Abortion Index 1 (0 to 7) (cai_cai1)

Long tag: qog_oecd_cs_cai_cai1

Original tag: cai_cai1

Description:

The scale quantifies grounds on which a country might grant legal access to abortion: saving a woman's life, preserving a woman's physical health, preserving a woman's mental health, in case of rape or incest, in case of fetal impairment, for social or economic reasons, and on request. 0 represents a country with a complete ban on abortions. 7 represents a country that allows abortions on request.

Variable citation: Forman–Rabinovici, A., & Sommer, U. (2018). Reproductive health policymakers: Comparing the influences of international and domestic institutions on abortion policy. *Public Administration*, 96(1), 185–199

2.11.9.2 Comparative Abortion Index 2 (0 to 1) (cai_cai2)

Long tag: qog_oecd_cs_cai_cai2

Original tag: cai_cai2

Description:

Using the 7 grounds for legal abortion, the weight of each grounds (Wi) will be determined based on the percentage (Pi) of countries that allow it. In the weighted index, countries are given a score on a scale of 0-1, where 0 represents countries in which there are no conditions for legal abortion, and 1 represents a country that accepts all criteria for abortion, including on request. The need for a weighted scale is as follows: It would be imprecise, for instance, to suggest that the criterion of saving a woman's life is equivalent to (and thus carries the same weight as) allowing abortion on demand. The more permissive the criterion, the less likely that it is universally accepted. Thus, the scale accounts for the different degrees of acceptance that each criterion represents.

Variable citation: Forman–Rabinovici, A., & Sommer, U. (2018). Reproductive health policymakers: Comparing the influences of international and domestic institutions on abortion policy. *Public Administration*, 96(1), 185–199

2.11.9.3 Foetal impairment is accepted as grounds for legal abortion (cai_foetal)

Long tag: qog_oecd_cs_cai_foetal

Original tag: cai_foetal

Description:

Binary variable that codes whether or not foetal impairment is accepted as grounds for a legal abortion. 1 means that it is accepted as grounds for abortion. 0 means that it is illegal, and not accepted as grounds for legal abortion.

Variable citation: Forman–Rabinovici, A., & Sommer, U. (2018). Reproductive health policymakers: Comparing the influences of international and domestic institutions on abortion policy. *Public Administration*, 96(1), 185–199

2.11.9.4 Threat to mother's life is accepted as grounds for legal abortion (cai_life)

Long tag: qog_oecd_cs_cai_life

Original tag: cai_life

Description:

Binary variable that codes whether or not threat to a mother's life is accepted as grounds for a legal abortion. 1 means that it is accepted as grounds for abortion. 0 means that it is illegal, and not accepted as grounds for legal abortion.

Variable citation: Forman–Rabinovici, A., & Sommer, U. (2018). Reproductive health policymakers: Comparing the influences of international and domestic institutions on abortion policy. *Public Administration*, 96(1), 185–199

2.11.9.5 Threat to mother's mental health is accepted as grounds for legal abortion (cai_mental)

Long tag: qog_oecd_cs_cai_mental

Original tag: cai_mental

Description:

Binary variable that codes whether or not threat to a mother's mental health is accepted as grounds for a legal abortion. 1 means that it is accepted as grounds for abortion. 0 means that it is illegal, and not accepted as grounds for legal abortion.

Variable citation: Forman–Rabinovici, A., & Sommer, U. (2018). Reproductive health policymakers: Comparing the influences of international and domestic institutions on abortion policy. *Public Administration*, 96(1), 185–199

2.11.9.6 Threat to mother's physical health is accepted as grounds for legal abortion (cai_physical)

Long tag: qog_oecd_cs_cai_physical

Original tag: cai_physical

Description:

Binary variable that codes whether or not threat to a mother's physical health is accepted as grounds for a legal abortion. 1 means that it is accepted as grounds for abortion. 0 means that it is illegal, and not accepted as grounds for legal abortion.

Variable citation: Forman–Rabinovici, A., & Sommer, U. (2018). Reproductive health policymakers: Comparing the influences of international and domestic institutions on abortion policy. *Public Administration*, 96(1), 185–199

2.11.9.7 Pregnancy as result of rape or incest is accepted as grounds for legal abortion (cai_rape)

Long tag: qog_oecd_cs_cai_rape

Original tag: cai_rape

Description:

Binary variable that codes whether or not pregnancy as a result of rape or incest is accepted as grounds for a legal abortion. 1 means that they are accepted as grounds for abortion. 0 means that it is illegal, and they are not accepted as grounds for legal abortion.

Variable citation: Forman–Rabinovici, A., & Sommer, U. (2018). Reproductive health policymakers: Comparing the influences of international and domestic institutions on abortion policy. *Public Administration*, 96(1), 185–199

2.11.9.8 Abortion is available on request (cai_request)

Long tag: qog_oecd_cs_cai_request

Original tag: cai_request

Description:

Binary variable that codes whether abortion is available on request. In other words, if there is complete legal access to abortion. 1 implies that there is complete access to abortion. 0 implies that there are limitations, and abortion services are not legally available upon request.

Variable citation: Forman–Rabinovici, A., & Sommer, U. (2018). Reproductive health policymakers: Comparing the influences of international and domestic institutions on abortion policy. *Public Administration*, 96(1), 185–199

2.11.9.9 Social or economic reasons are accepted as grounds for legal abortion (cai_social)

Long tag: qog_oecd_cs_cai_social

Original tag: cai_social

Description:
Binary variable that codes whether or not social or economic reasons are accepted as grounds for a legal abortion. 1 means that they are accepted as grounds for abortion. 0 means that it is illegal, and they are not accepted as grounds for legal abortion.

Variable citation: Forman–Rabinovici, A., & Sommer, U. (2018). Reproductive health policymakers: Comparing the influences of international and domestic institutions on abortion policy. *Public Administration*, 96(1), 185–199

2.11.9.10 Environmental Health (0-100) (epi_eh)

Long tag: qog_oecd_cs_epi_eh

Original tag: epi_eh

Description:
The Environmental Health policy objective measures how well countries are protecting their populations from environmental health risks. It comprises 40percent of the total EPI score and is made up of four issue categories: Air Quality (50percent), Sanitation
Drinking Water (percent40), Heavy Metals (percent5), and Waste Management (percent5).

Variable citation: Wendling, Z., Emerson, J., de Sherbinin, A., Esty, D., & M.A. Levy, e. a. (2020). 2020 environmental performance index [Date accessed: 20 December 2021]. *New Haven, CT: Yale Center for Environmental Law and Policy*. `https://epi.envirocenter.yale.edu/`

2.11.9.11 Expenditure on health, as percent of total gen. gov. exp. (gfs_heal)

Long tag: qog_oecd_cs_gfs_heal

Original tag: gfs_heal

Description:
Total expenditure on health, as the percentage of general government expenditure.

Variable citation: International Monetary Fund. (2019). Government finance statistics yearbook (gfsy) 2019. `https://data.imf.org/?sk=a0867067-d23c-4ebc-ad23-d3b015045405`

2.11.9.12 Global Gender Gap Health and Survival Subindex (gggi_hss)

Long tag: qog_oecd_cs_gggi_hss

Original tag: gggi_hss

Description:
Health and Survival (0 to 1, where 1 indicates no gap). This subindex provides an overview of the differences between women's and men's health through the use of two indicators. The first is the sex ratio at birth, which aims specifically to capture the phenomenon of "missing women", prevalent in many countries with a strong son preference. Second, we use the gap between women's and men's healthy life expectancy. This measure provides an estimate of the number of years that women and men can expect to live in good health by taking into account the years lost to violence, disease, malnutrition and other relevant factors.

Variable citation: World Economic Forum. (2021). The global gender gap report 2021 [All Rights Reserved]. `https://www.weforum.org/reports/ab6795a1-960c-42b2-b3d5-587eccda6023`

2.11.9.13 Healthy Life Years, Female, Age 1-4 years (ihme_hle_0104f)

Long tag: qog_oecd_cs_ihme_hle_0104f

Original tag: ihme_hle_0104f

Description:
Healthy Life Years, Female, Age 1-4 years. HALE is often referred to as healthy life expectancy. Unlike life expectancy, HALE takes into account mortality and nonfatal outcomes. HALE does this by summarizing years lived in less than ideal health (YLDs) and years lost due to premature mortality (YLLs) in a single measure of average population health for individual countries.

Variable citation: Global Burden of Disease Collaborative Network. (2020). Global burden of disease study 2019 (gbd 2019) results. `http://ghdx.healthdata.org/gbd-results-tool`

2.11.9.14 Healthy Life Years, Male, Age 1-4 years (ihme_hle_0104m)

Long tag: qog_oecd_cs_ihme_hle_0104m

Original tag: ihme_hle_0104m

Description:
Healthy Life Years, Male, Age 1-4 years. HALE is often referred to as healthy life expectancy. Unlike life expectancy, HALE takes into account mortality and nonfatal outcomes. HALE does this by summarizing years lived in less than ideal health (YLDs) and years lost due to premature mortality (YLLs) in a single measure of average population health for individual countries.

Variable citation: Global Burden of Disease Collaborative Network. (2020). Global burden of disease study 2019 (gbd 2019) results. `http://ghdx.healthdata.org/gbd-results-tool`

2.11.9.15 Healthy Life Years, Both sexes, Age 1-4 years (ihme_hle_0104t)

Long tag: qog_oecd_cs_ihme_hle_0104t

Original tag: ihme_hle_0104t

Description:

Healthy Life Years, Both sexes, Age 1-4 years. HALE is often referred to as healthy life expectancy. Unlike life expectancy, HALE takes into account mortality and nonfatal outcomes. HALE does this by summarizing years lived in less than ideal health (YLDs) and years lost due to premature mortality (YLLs) in a single measure of average population health for individual countries.

2.11.9.31 Human Development Index (undp_hdi)

Long tag: qog_oecd_cs_undp_hdi

Original tag: undp_hdi

Description:
The HDI was created to emphasize that people and their capabilities should be the ultimate criteria for assessing the development of a country, not economic growth alone. The HDI can also be used to question national policy choices, asking how two countries with the same level of GNI per capita can end up with different human development outcomes. These contrasts can stimulate debate about government policy priorities.

The Human Development Index (HDI) is a summary measure of average achievement in key dimensions of human development: a long and healthy life, being knowledgeable and having a decent standard of living. The HDI is the geometric mean of normalized indices for each of the three dimensions.

The health dimension is assessed by life expectancy at birth, the education dimension is measured by mean of years of schooling for adults aged 25 years and more and expected years of schooling for children of school entering age. The standard of living dimension is measured by gross national income per capita. The HDI uses the logarithm of income, to reflect the diminishing importance of income with increasing GNI. The scores for the three HDI dimension indices are then aggregated into a composite index using geometric mean. Refer to Technical notes for more details.

The HDI simplifies and captures only part of what human development entails. It does not reflect on inequalities, poverty, human security, empowerment, etc. The HDRO offers the other composite indices as broader proxy on some of the key issues of human development, inequality, gender disparity and human poverty.

2.11.9.32 Current health expenditure (percent of GDP) (wdi_chexppgdp)

Long tag: qog_oecd_cs_wdi_chexppgdp

Original tag: wdi_chexppgdp

Description:
Current health expenditure (percent of GDP). Level of current health expenditure expressed as a percentage of GDP. Estimates of current health expenditures include healthcare goods and services consumed during each year. This indicator does not include capital health expenditures such as buildings, machinery, IT and stocks of vaccines for emergency or outbreaks.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.9.33 Prevalence of severe food insecurity in the population (percent) (wdi_foodins)

Long tag: qog_oecd_cs_wdi_foodins

Original tag: wdi_foodins

Description:

The percentage of people in the population who live in households classified as severely food insecure. A household is classified as severely food insecure when at least one adult in the household has reported to have been exposed, at times during the year, to several of the most severe experiences described in the FIES questions, such as to have been forced to reduce the quantity of the food, to have skipped meals, having gone hungry, or having to go for a whole day without eating because of a lack of money or other resources.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.9.34 Intentional homicides, female (per 100,000 female) (wdi_homicidesf)

Long tag: qog_oecd_cs_wdi_homicidesf

Original tag: wdi_homicidesf

Description:

Intentional homicides, female (per 100,000 female). Intentional homicides, female are estimates of unlawful female homicides purposely inflicted as a result of domestic disputes, interpersonal violence, violent conflicts over land resources, intergang violence over turf or control, and predatory violence and killing by armed groups. Intentional homicide does not include all intentional killing; the difference is usually in the organization of the killing. Individuals or small groups usually commit homicide, whereas killing in armed conflict is usually committed by fairly cohesive groups of up to several hundred members and is thus usually excluded.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.9.35 Intentional homicides, male (per 100,000 male) (wdi_homicidesm)

Long tag: qog_oecd_cs_wdi_homicidesm

Original tag: wdi_homicidesm

Description:

Intentional homicides, male (per 100,000 male). Intentional homicides, male are estimates of unlawful male homicides purposely inflicted as a result of domestic disputes, interpersonal violence, violent conflicts over land resources, intergang violence over turf or control, and predatory violence and killing by armed groups. Intentional homicide does not include all intentional killing; the difference is usually in the organization of the killing. Individuals or small groups usually commit homicide, whereas killing in armed conflict is usually committed by fairly cohesive groups of up to several hundred members and is thus usually excluded.

2.11.9.36 Lifetime risk of maternal death (percent) (wdi_lrmd)

Long tag: qog_oecd_cs_wdi_lrmd

Original tag: wdi_lrmd

Description:

Life time risk of maternal death is the probability that a 15-year-old female will die eventually from a maternal cause assuming that current levels of fertility and mortality (including maternal mortality) do not change in the future, taking into account competing causes of death.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.9.37 Out-of-pocket expenditure (percent of current health expenditure) (wdi_ophexp)

Long tag: qog_oecd_cs_wdi_ophexp

Original tag: wdi_ophexp

Description:

Out-of-pocket expenditure (percent of current health expenditure). Share of out-of-pocket payments of total current health expenditures. Out-of-pocket payments are spending on health directly out-of-pocket by households.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.9.38 Smoking prevalence, females (percent of adults) (wdi_smokf)

Long tag: qog_oecd_cs_wdi_smokf

Original tag: wdi_smokf

Description:
Prevalence of smoking, female is the percentage of women ages 15 and over who smoke any form of tobacco, including cigarettes, cigars, pipes or any other smoked tobacco products. Data include daily and non-daily or occasional smoking.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.9.39 Smoking prevalence, males (percent of adults) (wdi_smokm)

Long tag: qog_oecd_cs_wdi_smokm

Original tag: wdi_smokm

Description:
Prevalence of smoking, male is the percentage of men ages 15 and over who smoke any form of tobacco, including cigarettes, cigars, pipes or any other smoked tobacco products. Data include daily and non-daily or occasional smoking.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.9.40 Homicide rate. /100,000 pop. (wef_hom)

Long tag: qog_oecd_cs_wef_hom

Original tag: wef_hom

Description:
Homicide rate. /100,000 pop.. Number of homicide cases per 100,000 population Original sources: United Nations Office on Drugs and Crime (UNODC)

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. `http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf`

2.11.9.41 Alcohol consumption per capita (in litres) (who_alcohol10)

Long tag: qog_oecd_cs_who_alcohol10

Original tag: who_alcohol10

Description:
Alcohol, recorded per capita (15+) consumption (in litres of pure alcohol).

2.11.10 Judicial

This category includes judicial indicators, generally covering legal rights granted by a state to its citizens and their compliance, as well as measures of crimes and the overall state of the judicial system.

2.11.10.1 Duty of the People is to Build Country in Constitution (ccp_buildsoc)

Long tag: qog_oecd_cs_ccp_buildsoc

Original tag: ccp_buildsoc

Description:
Does the constitution refer to a duty of the people to take part in building society or to work for the development of the country?

1. Yes
2. No
96. Other

Variable citation: Elkins, Z., & Ginsburg, T. (2021). Characteristics of national constitutions, version 3.0 [Last modified: May 20, 2021. Available at comparativeconstitutionsproject.org]. `http://www.comparativeconstitutionsproject.org`

2.11.10.2 Corruption Commission Present in Constitution (ccp_cc)

Long tag: qog_oecd_cs_ccp_cc

Original tag: ccp_cc

Description:
Does the constitution contain provisions for a counter corruption commission?

1. Yes
2. No
96. Other
97. Unable to determine

Variable citation: Elkins, Z., & Ginsburg, T. (2021). Characteristics of national constitutions, version 3.0 [Last modified: May 20, 2021. Available at comparativeconstitutionsproject.org]. `http://www.comparativeconstitutionsproject.org`

2.11.10.3 Limits on Child Work in Constitution (ccp_childwrk)

Long tag: qog_oecd_cs_ccp_childwrk

Original tag: ccp_childwrk

Description:
Does the constitution place limits on child employment?

1. Yes
2. No
90. Left explicitly to non-constitutional law
96. Other

Variable citation: Elkins, Z., & Ginsburg, T. (2021). Characteristics of national constitutions, version 3.0 [Last modified: May 20, 2021. Available at comparativeconstitutionsproject.org]. `http://www.comparativeconstitutionsproject.org`

2.11.10.4 Meritocratic Recruitment of Civil Servants Mentioned in Constitution (ccp_civil)

Long tag: qog_oecd_cs_ccp_civil

Original tag: ccp_civil

Description:
Does the constitution include provisions for the meritocratic recruitment of civil servants (e.g. exams or credential requirements)?

1. Yes
2. No
96. Other

Variable citation: Elkins, Z., & Ginsburg, T. (2021). Characteristics of national constitutions, version 3.0 [Last modified: May 20, 2021. Available at comparativeconstitutionsproject.org]. `http://www.comparativeconstitutionsproject.org`

2.11.10.5 Equality Before the Law Mentioned in Constitution (ccp_equal)

Long tag: qog_oecd_cs_ccp_equal

Original tag: ccp_equal

Description:
Does the constitution refer to equality before the law, the equal rights of men, or non-discrimination?

1. Yes
2. No
96. Other

Variable citation: Elkins, Z., & Ginsburg, T. (2021). Characteristics of national constitutions, version 3.0 [Last modified: May 20, 2021. Available at comparativeconstitutionsproject.org]. `http://www.comparativeconstitutionsproject.org`

2.11.10.6 Freedom of Religion in Constitution (ccp_freerel)

Long tag: qog_oecd_cs_ccp_freerel

Original tag: ccp_freerel

Description:
Does the constitution provide for freedom of religion?

1. Yes
2. No

96. Other

Variable citation: Elkins, Z., & Ginsburg, T. (2021). Characteristics of national constitutions, version 3.0 [Last modified: May 20, 2021. Available at comparativeconstitutionsproject.org]. `http://www.comparativeconstitutionsproject.org`

2.11.10.7 Human Rights Commission Present in Constitution (ccp_hr)

Long tag: qog_oecd_cs_ccp_hr

Original tag: ccp_hr

Description:

Does the constitution contain provisions for a human rights commission?

1. Yes
2. No
96. Other

Variable citation: Elkins, Z., & Ginsburg, T. (2021). Characteristics of national constitutions, version 3.0 [Last modified: May 20, 2021. Available at comparativeconstitutionsproject.org]. `http://www.comparativeconstitutionsproject.org`

2.11.10.8 Right to Government Documents in Constitution (ccp_infoacc)

Long tag: qog_oecd_cs_ccp_infoacc

Original tag: ccp_infoacc

Description:

Does the constitution provide for an individual right to view government files or documents under at least some conditions?

1. Yes
2. No
96. Other

Variable citation: Elkins, Z., & Ginsburg, T. (2021). Characteristics of national constitutions, version 3.0 [Last modified: May 20, 2021. Available at comparativeconstitutionsproject.org]. `http://www.comparativeconstitutionsproject.org`

2.11.10.9 Reference in Constitution to Capitalism (ccp_market)

Long tag: qog_oecd_cs_ccp_market

Original tag: ccp_market

Description:

Does the constitution refer to the “free market,” “capitalism,” or an analogous term?

1. Yes
2. No
96. Other

Variable citation: Elkins, Z., & Ginsburg, T. (2021). Characteristics of national constitutions, version 3.0 [Last modified: May 20, 2021. Available at comparativeconstitutionsproject.org]. `http://www.comparativeconstitutionsproject.org`

2.11.10.10 Status of Slavery in Constitution (ccp_slave)

Long tag: qog_oecd_cs_ccp_slave

Original tag: ccp_slave

Description:

Does the constitution prohibit slavery, servitude, or forced labor?

1. Universally prohibited
2. Prohibited except in the case of war
3. Prohibited with other exception(s)n
90. Left explicitly to non-constitutional law
96. Other
98. Not specified

Variable citation: Elkins, Z., & Ginsburg, T. (2021). Characteristics of national constitutions, version 3.0 [Last modified: May 20, 2021. Available at comparativeconstitutionsproject.org]. `http://www.comparativeconstitutionsproject.org`

2.11.10.11 Right to Strike in Constitution (ccp_strike)

Long tag: qog_oecd_cs_ccp_strike

Original tag: ccp_strike

Description:
Does the constitution provide for a right to strike?

1. Yes
2. Yes, but with limitations
3. No
96. Other

Variable citation: Elkins, Z., & Ginsburg, T. (2021). Characteristics of national constitutions, version 3.0 [Last modified: May 20, 2021. Available at comparativeconstitutionsproject.org]. `http://www.comparativeconstitutionsproject.org`

2.11.10.12 New Constitutional System (ccp_syst)

Long tag: qog_oecd_cs_ccp_syst

Original tag: ccp_syst

Description:
Identifies new constitutional systems.

Variable citation: Elkins, Z., & Ginsburg, T. (2021). Characteristics of national constitutions, version 3.0 [Last modified: May 20, 2021. Available at comparativeconstitutionsproject.org]. `http://www.comparativeconstitutionsproject.org`

2.11.10.13 Year in which the Constitutional System was Promulgated (ccp_systyear)

Long tag: qog_oecd_cs_ccp_systyear

Original tag: ccp_systyear

Description:
Year in which the constitutional system was promulgated.

Variable citation: Elkins, Z., & Ginsburg, T. (2021). Characteristics of national constitutions, version 3.0 [Last modified: May 20, 2021. Available at comparativeconstitutionsproject.org]. `http://www.comparativeconstitutionsproject.org`

2.11.10.14 Duty of People is to Pay Taxes in Constitution (ccp_taxes)

Long tag: qog_oecd_cs_ccp_taxes

Original tag: ccp_taxes

Description:
Does the constitution refer to a duty to pay taxes?

1. Yes
2. No
96. Other

Variable citation: Elkins, Z., & Ginsburg, T. (2021). Characteristics of national constitutions, version 3.0 [Last modified: May 20, 2021. Available at comparativeconstitutionsproject.org]. `http://www.comparativeconstitutionsproject.org`

2.11.10.15 Associational and Organizational Rights (fh_aor)

Long tag: qog_oecd_cs_fh_aor

Original tag: fh_aor

Description:
Associational and Organizational Rights - The variable evaluates the freedom of assembly, demonstrations and open public discussion; the freedom for nongovernmental organizations; and the freedom for trade unions, peasant organizations and other professional and private organizations. Countries are graded between 0 (worst) and 12 (best).

Variable citation: Freedom House. (2021a). Freedom in the world 2021. `https://freedomhouse.org/report/freedom-world`

2.11.10.16 Civil Liberties (fh_cl)

Long tag: qog_oecd_cs_fh_cl

Original tag: fh_cl

Description:
Civil Liberties Rating - Civil liberties allow for the freedoms of expression and belief, associational and

organizational rights, rule of law, and personal autonomy without interference from the state. The more specific list of rights considered vary over the years. Countries are graded between 1 (most free) and 7 (least free).

Variable citation: Freedom House. (2021a). Freedom in the world 2021. `https://freedomhouse.org/report/freedom-world`

2.11.10.17 Freedom of Expression and Belief (fh_feb)

Long tag: qog_oecd_cs_fh_feb

Original tag: fh_feb

Description:

Freedom of Expression and Belief - The variable measures the freedom and independence of the media and other cultural expressions; the freedom of religious groups to practice their faith and express themselves; the academic freedom and freedom from extensive political indoctrination in the educational system; and the ability of the people to engage in private (political) discussions without fear of harassment or arrest by the authorities. Countries are graded between 0 (worst) and 16 (best).

Variable citation: Freedom House. (2021a). Freedom in the world 2021. `https://freedomhouse.org/report/freedom-world`

2.11.10.18 Personal Autonomy and Individual Rights (fh_pair)

Long tag: qog_oecd_cs_fh_pair

Original tag: fh_pair

Description:

Personal Autonomy and Individual Rights - The variable evaluates the extent of state control over travel, choice of residence, employment or institution of higher education; the right of citizens to own property and establish private businesses; the private business' freedom from unduly influence by government officials, security forces, political parties or organized crime; gender equality, freedom of choice of marriage partners and size of family; equality of opportunity and absence of economic exploitation. Countries are graded between 0 (worst) and 16 (best).

Variable citation: Freedom House. (2021a). Freedom in the world 2021. `https://freedomhouse.org/report/freedom-world`

2.11.10.19 Rule of Law (fh_rol)

Long tag: qog_oecd_cs_fh_rol

Original tag: fh_rol

Description:

Rule of Law - The variable measures the independence of the judiciary; the extent to which rule of law prevails in civil and criminal matters; the existence of direct civil control over the police; the protection from political terror, unjustified imprisonment, exile and torture; absence of war and insurgencies; and the extent to which laws, policies and practices guarantee equal treatment of various segments of the population. Countries are graded between 0 (worst) and 16 (best).

Variable citation: Freedom House. (2021a). Freedom in the world 2021. `https://freedomhouse.org/report/freedom-world`

2.11.10.20 Legal Structure and Security of Property Rights (current) (fi_legprop)

Long tag: qog_oecd_cs_fi_legprop

Original tag: fi_legprop

Description:

The index ranges from 0-10 where 0 corresponds to "no judicial independence", "no trusted legal framework exists", "no protection of intellectual property", "military interference in rule of law", and "no integrity of the legal system" and 10 corresponds to "high judicial independence", "trusted legal framework exists", "protection of intellectual property", "no military interference in rule of law", and "integrity of the legal system". The index consists of the following indicators: Judicial independence: The judiciary is independent and not subject to interference by the government or parties in dispute, Impartial courts: A trusted legal framework exists for private businesses to challenge the legality of government actions or regulations, Protection of intellectual property, Military interference in rule of law and the political process, Integrity of the legal system.

Variable citation: Gwartney, J., Lawson, R., Hall, J., Murphy, R., Callais, J. T., Fike, R., Geloso, V., Kahli, N. S., McMahon, F., & van Staden, M. (2021). 2.11.10.22 Minority Shareholder Rights (gc_shr)

Long tag: qog_oecd_cs_gc_shr

Original tag: gc_shr

Description:

The ten key legal provisions identified as most relevant to the protection of minority shareholder rights are coded by a team of legal scholars coded between 0 and 1. The measures are not dichotomous because intermediate scores between 0 and 1 are possible. The sum of the scores for each of the ten legal provisions are the value of the variable, ranging from 0 to 10.

The ten legal provisions protecting the rights of minority shareholders:
1. Powers of the general meeting for de facto changes
2. Agenda-setting power
3. Anticipation of shareholder decision facilitated
4. Prohibition of multiple voting rights (super voting rights)
5. Independent board members
6. Feasibility of directors' dismissal
7. Private enforcement of directors' duties (derivative suit)
8. Shareholder action against resolutions of the general meeting
9. Mandatory bid
10. Disclosure of major share ownership

Variable citation: Guillen, M., & Capron, L. (2016). State capacity, minority shareholder protections, and stock market development. *Administrative Science Quarterly*, 61(1), 125–160

2.11.10.23 Independent Judiciary (h_j)

Long tag: qog_oecd_cs_h_j

Original tag: h_j

Description:

Dummy variable coded 1 if there is an independent judiciary (based on information from Polity's Executive Constraints, p_xconst) and - where available - on ICRG's index of Law
Order.

Variable citation: Henisz, W. J. (2017). The Political Constraint Index (POLCON) Dataset 2017 release. `https://mgmt.wharton.upenn.edu/profile/1327`

2.11.10.24 Index of Public Integrity (overall) (ipi_ipi)

Long tag: qog_oecd_cs_ipi_ipi

Original tag: ipi_ipi

Description:

The Index of Public Integrity (IPI) aims to capture a snapshot of this balance in 114 countries for which data is available. It is a composite index consisting of six components. For the 2015, 2017 and 2019 editions, the components were: administrative burden, trade openness, budget transparency for opportunities, and judicial independence, e-citizenship and freedom of the press for constraints.

Starting from the 2021 edition, administrative burden and trade openness have been replaced by administrative transparency and online services, due to unavailable alternative data on the original components (based on the World Bank Doing Business project, which closed).. Below you will find an outline of the methodology behind the IPI, detailing recent changes.

A more extensive explanation of the methodology and the original composition of the IPI can be found in the following peer-reviewed publication:

Measuring Control of Corruption by a New Index of Public Integrity - Mungiu-Pippidi, A., Dadašov, R. Measuring Control of Corruption by a New Index of Public Integrity. European Journal on Criminal Policy Research 22, 415-438 (2016).

Variable citation: Mungiu–Pippidi, A., Dadasov, R., Martinez–Kukutschka, R., Alvarado–Pachon, N., Dykes, V., Kossow, N., & Khaghaghordyan, A. (2019). Index of public integrity. `http://www.integrity-index.org`

2.11.10.25 Structure of central gov. expenditures, public order and safety (oecd_gengovdistri_t1c)

Long tag: qog_oecd_cs_oecd_gengovdistri_t1c

Original tag: oecd_gengovdistri_t1c

Description:

Structure of central government expenditures, public order and safety.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. `https://doi.org/10.1787/20752288`

2.11.10.26 Legislature corrupt activities (vdem_gcrrpt)

Long tag: qog_oecd_cs_vdem_gcrrpt

Original tag: vdem_gcrrpt

Description:

Legislature corrupt activities. Do members of the legislature abuse their position for financial gain?

Clarification: This includes any of the following: (a) accepting bribes, (b) helping to obtain government contracts for firms that the legislator (or his/her family/friends/political supporters) own, (c) doing favors for firms in exchange for the opportunity of employment after leaving the legislature, (d) stealing money from the state or from campaign donations for personal use. V-Dem uses a specifically designed measurement model to provide country-year point estimates, aggregated from multiple codings submitted by country experts by taking disagreement and measurement error into account. In this version of the variable, used in the QoG dataset, V-Dem has linearly translated the measurement model point estimates back to the original ordinal scale of each variable as an interval measure.

Variable citation: Coppedge, M., Gerring, J., Knutsen, C. H., Lindberg, S. I., Teorell, J., Alizada, N., Altman, D., Bernhard, M., Cornell, A., Fish, M. S., Gastaldi, L., Gjerløw, H., Glynn, A., Hicken, A., Hindle, G., Ilchenko, N., Krusell, J., Luhrmann, A., Maerz, S. F., . . . Ziblatt, D. (2021). V-dem [country-year/country-date] dataset v11.1. `https://doi.org/10.23696/vdemds21` Pemstein, D., Marquardt, K. L., Tzelgov, E., Wang, Y.-t., Medzihorsky, J., Krusell, J., Miri, F., & von Römer, J. (2021). The V-Dem measurement model: Latent variable analysis for crossnational and cross-temporal expert-coded data

2.11.10.27 Judicial corruption decision (vdem_jucorrdc)

Long tag: qog_oecd_cs_vdem_jucorrdc

Original tag: vdem_jucorrdc

Description:

Judicial corruption decision. Question: How often do individuals or businesses make undocumented extra payments or bribes in order to speed up or delay the process or to obtain a favorable judicial decision? V-Dem uses a specifically designed measurement model to provide country-year point estimates, aggregated from multiple codings submitted by country experts by taking disagreement and measurement error into account. In this version of the variable, used in the QoG dataset, V-Dem has linearly translated the measurement model point estimates back to the original ordinal scale of each variable as an interval measure.

Variable citation: Coppedge, M., Gerring, J., Knutsen, C. H., Lindberg, S. I., Teorell, J., Alizada, N., Altman, D., Bernhard, M., Cornell, A., Fish, M. V-dem [country-year/country-date] dataset v11.1. `https://doi.org/10.23696/vdemds21` Pemstein, D., Marquardt, K. L., Tzelgov, E., Wang, Y.-t., Medzihorsky, J., Krusell, J., Miri, F., & von Römer, J. (2021). The V-Dem measurement model: Latent variable analysis for crossnational and cross-temporal expert-coded data

2.11.10.28 Rule of Law, Estimate (wbgi_rle)

Long tag: qog_oecd_cs_wbgi_rle

Original tag: wbgi_rle

Description:

Rule of Law - Estimate: "Rule of Law" includes several indicators which measure the extent to which agents have confidence in and abide by the rules of society. These include perceptions of the incidence of crime, the

effectiveness and predictability of the judiciary, and the enforceability of contracts. Together, these indicators measure the success of a society in developing an environment in which fair and predictable rules form the basis for economic and social interactions and the extent to which property rights are protected.

2.11.10.29 Rule of Law, Number of Sources (wbgi_rln)

Long tag: qog_oecd_cs_wbgi_rln

Original tag: wbgi_rln

Description:
Rule of Law - Number of Sources.

Variable citation: Kaufmann, D., Kraay, A., & Mastruzzi, M. (2010). The worldwide governance indicators: A summary of methodology, data and analytical issues. *World Bank Policy Research Working Paper, 5430*

2.11.10.30 Rule of Law, Standard Error (wbgi_rls)

Long tag: qog_oecd_cs_wbgi_rls

Original tag: wbgi_rls

Description:
Rule of Law - Standard Errors.

Variable citation: Kaufmann, D., Kraay, A., & Mastruzzi, M. (2010). The worldwide governance indicators: A summary of methodology, data and analytical issues. *World Bank Policy Research Working Paper, 5430*

2.11.10.31 Intentional homicides (per 100,000 people) (wdi_homicides)

Long tag: qog_oecd_cs_wdi_homicides

Original tag: wdi_homicides

Description:
Intentional homicides are estimates of unlawful homicides purposely inflicted as a result of domestic disputes, interpersonal violence, violent conflicts over land resources, intergang violence over turf or control, and predatory violence and killing by armed groups. Intentional homicide does not include all intentional killing; the difference is usually in the organization of the killing. Individuals or small groups usually commit homicide, whereas killing in armed conflict is usually committed by fairly cohesive groups of up to several hundred members and is thus usually excluded.

2.11.10.32 Judicial independence. 1-7 (best) (wef_ji)

Long tag: qog_oecd_cs_wef_ji

Original tag: wef_ji

Description:
Judicial independence. 1-7 (best). In your country, how independent is the judicial system from influences of the government, individuals, or companies? [1 = not independent at all; 7 = entirely independent] Original sources: World Economic Forum, Executive Opinion Survey

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. `http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf`

2.11.10.33 Organized crime. 1-7 (best) (wef_oc)

Long tag: qog_oecd_cs_wef_oc

Original tag: wef_oc

Description:
Organized crime. 1-7 (best). In your country, to what extent does organized crime (mafia-oriented racketeering, extortion) impose costs on businesses? [1 = to a great extent-imposes huge costs; 7 = not at all-imposes no costs] Original sources: World Economic Forum, Executive Opinion Survey

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. `http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf`

2.11.10.34 Reliability of police services. 1-7 (best) (wef_rps)

Long tag: qog_oecd_cs_wef_rps

Original tag: wef_rps

Description:
Reliability of police services. 1-7 (best). In your country, to what extent can police services be relied upon to enforce law and order? [1 = not at all; 7 = to a great extent] Original sources: World Economic Forum, Executive Opinion Survey

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. `http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf`

2.11.10.35 Workers' rights. 1-100 (best) (wef_wr)

Long tag: qog_oecd_cs_wef_wr

Original tag: wef_wr

Description:
Workers' rights. 1-100 (best). This index is adapted from the ITUC Global Rights Index, which measures the level of protection of internationally recognized core Labour standards including civil rights, the right to bargain collectively, the right to strike, the right to associate freely, and access to due process rights. It does not take into account any element of firing regulations. The scale ranges from 1 [no protection] to 100 [high protection]. Original sources: International Trade Union Confederation (ITUC), World Economic Forum

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. `http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf`

2.11.10.36 Confidence: Justice System/Courts (wvs_confjs)

Long tag: qog_oecd_cs_wvs_confjs

Original tag: wvs_confjs

Description:
I am going to name a number of organizations. For each one, could you tell me how much confidence you have in them: Justice System/Courts

1. None at all
2. Not very much
3. Quite a lot
4. A great deal

2.11.11 Public Economy

This category includes economic indicators that reflect the involvement of the government in the economy (taxes, tariff rates and government expenditures), economic key figures of a state (GDP, inflation, and economic inequality),

and indicators that characterize the state of the economy (aid- flows, debt).

2.11.11.1 Economic Globalization (dr_eg)

Long tag: qog_oecd_cs_dr_eg

Original tag: dr_eg

Description:

Economic globalisation (scale of 1 to 100) covers both trade flows as well as financial flows. De facto trade is determined with reference to the trade in goods and services. De jure trade covers customs duties, taxes and restrictions on trade.

Variable citation: Gygli, S., Haelg, F., Potrafke, N., & Sturm, J.-E. (2019). The KOF Globalisation Index - Revisited. `https://doi.org/10.1007/s11558-019-09344-2` Dreher, A. (2006). Does globalization affect growth? evidence from a new index of globalization. *Applied Economics*, 38(10), 1091–1110

2.11.11.2 Economic Freedom of the World Index (panel data) (fi_index_pd)

Long tag: qog_oecd_cs_fi_index_pd

Original tag: fi_index_pd

Description:

The index is founded upon objective components that reflect the presence (or absence) of economic freedom. The index ranges from 0-10 where 0 corresponds to "less economic freedom" and 10 to "more economic freedom". Panel-data adjusted.

Variable citation: Gwartney, J., Lawson, R., Hall, J., Murphy, R., Callais, J. T., Fike, R., Geloso, V., Kahli, N. S., McMahon, F., & van Staden, M. (2021). 2.11.11.5 Expenditure on economic affairs, as percent of total gen. gov. exp. (gfs_ecaf)

Long tag: qog_oecd_cs_gfs_ecaf

Original tag: gfs_ecaf

Description:

Total expenditure on economic affairs, as the percentage of general government expenditure.

Variable citation: International Monetary Fund. (2019). Government finance statistics yearbook (gfsy) 2019. https://data.imf.org/?sk=a0867067-d23c-4ebc-ad23-d3b015045405

2.11.11.6 Expenditure on public order and safety, as percent of total gen. gov. exp. (gfs_pos)

Long tag: qog_oecd_cs_gfs_pos

Original tag: gfs_pos

Description:

Total expenditure on public order and safety, as the percentage of general government expenditure.

Variable citation: International Monetary Fund. (2019). Government finance statistics yearbook (gfsy) 2019. https://data.imf.org/?sk=a0867067-d23c-4ebc-ad23-d3b015045405

2.11.11.7 Expenditure on social protection, as percent of total gen. gov. exp. (gfs_sp)

Long tag: qog_oecd_cs_gfs_sp

Original tag: gfs_sp

Description:

Total expenditure on social protection, as the percentage of general government expenditure.

Variable citation: International Monetary Fund. (2019). Government finance statistics yearbook (gfsy) 2019. https://data.imf.org/?sk=a0867067-d23c-4ebc-ad23-d3b015045405

2.11.11.8 Economic Complexity Index (SITC product classification) (gpcr_eci)

Long tag: qog_oecd_cs_gpcr_eci

Original tag: gpcr_eci

Description:

The Economic Complexity Index (ECI) is a measure of the amount of capabilities and know-how of a given country determined by the diversity, ubiquity, and complexity of the products it exports.

A rank of countries based on how diversified and complex their export basket is. Countries that are home to a great diversity of productive know-how, particularly complex specialized know-how, are able to produce a great diversity of sophisticated products.

The complexity of a country's exports is found to highly predict current income levels, or where complexity exceed expectations for a country's income level, the country is predicted to experience more rapid growth in the future. ECI therefore provides a useful measure of economic development.

This Economic Complexity Index is computed using SITC product classification.

Variable citation: The Growth Lab at Harvard University. (2019). Growth projections and complexity rankings [UNF:6:+dXp8TMQz26OFv7ZOfIxSg== [fileUNF]]. https://doi.org/10.7910/DVN/XTAQMC

2.11.11.9 Forecasted annualized rate of growth for following decade (gpcr_growth)

Long tag: qog_oecd_cs_gpcr_growth

Original tag: gpcr_growth

Description:

A prediction of how much a country will grow based on its current level of Economic Complexity, its Complexity Outlook or connectedness to new complex products in the Product Space, as compared to its current income level in GDP per capita and expected natural resource exports.

Economic complexity alone helps explain the lion's share of variance in current income levels. But the value of economic complexity is in its predictive power on future growth, where a simple measure of current complexity and connectedness to new complex products, in relation to current income levels and expected natural resource exports, holds greater accuracy in predicting future growth than any other single economic indicator.

To calculate Economic Complexity Growth Projections, the authors consider four factors as explanatory variables: the Economic Complexity Index; the Complexity Outlook Index; the current level of income; and the expected growth in the value of natural resource exports per capita.

In effect, the growth projections show countries grow by expanding the know-how they have that allows them to produce more, and more complex products, depending on the connectedness of know-how and how many other products rely on similar capabilities, as well as the initial economic complexity the country held.

Growth projections are calculated through a process largely based on determining whether a country's economic complexity is higher or lower than expected given its level of income. The authors expect countries whose economic complexity is greater than the authors would expect for its level of income to grow faster than those that are "too rich" for their current level of complexity.

In this data, a country's growth projection value for a given year is for the decade beginning with that year. For example, a value in a 2017 row is the projection of annualized growth for 2017-2027.

2.11.11.10 Share Direct Taxes in 1800 (gtr_centaxdir1800)

Long tag: qog_oecd_cs_gtr_centaxdir1800

Original tag: gtr_centaxdir1800

Description:

Share of total central government tax revenue from direct taxes, in the year 1800. A direct tax is imposed directly upon an individual person (legal or natural) or property, in contrast to a tax imposed upon a transaction. Direct taxes include taxes on income, property, and other direct taxes.

Variable citation: Andersson, Per F. and Thomas Brambor. (2019). Financing the state: Government tax revenue from 1800 to 2012. version 2.0. `https://www.perfandersson.com/data`

2.11.11.11 Share Direct Taxes in 1850 (gtr_centaxdir1850)

Long tag: qog_oecd_cs_gtr_centaxdir1850

Original tag: gtr_centaxdir1850

Description:

Share of total central government tax revenue from direct taxes, in the year 1850. A direct tax is imposed directly upon an individual person (legal or natural) or property, in contrast to a tax imposed upon a transaction. Direct taxes include taxes on income, property, and other direct taxes.

2.11.11.12 Share Government Revenue of GDP in 1800 (gtr_centaxgdp1800)

Long tag: qog_oecd_cs_gtr_centaxgdp1800

Original tag: gtr_centaxgdp1800

Description:

Total central government tax revenue as a share of GDP, in the year 1800.

Variable citation: Andersson, Per F. and Thomas Brambor. (2019). Financing the state: Government tax revenue from 1800 to 2012. version 2.0. `https://www.perfandersson.com/data`

2.11.11.13 Share Government Revenue of GDP in 1850 (gtr_centaxgdp1850)

Long tag: qog_oecd_cs_gtr_centaxgdp1850

Original tag: gtr_centaxgdp1850

Description:

Total central government tax revenue as a share of GDP, in the year 1850.

Variable citation: Andersson, Per F. and Thomas Brambor. (2019). Financing the state: Government tax revenue from 1800 to 2012. version 2.0. `https://www.perfandersson.com/data`

2.11.11.14 Share Indirect Taxes in 1800 (gtr_centaxind1800)

Long tag: qog_oecd_cs_gtr_centaxind1800

Original tag: gtr_centaxind1800

Description:

Share of total central government tax revenue from property taxes, most importantly levies on land and real estate, in the year 1800. These include (i) recurrent taxes on immovable property, (ii) recurrent taxes on net wealth, (iii) estate, inheritance, and gift taxes, (iv) taxes in financial and capital transactions, (v) other taxes

on property.

Variable citation: Andersson, Per F. and Thomas Brambor. (2019). Financing the state: Government tax revenue from 1800 to 2012. version 2.0. `https://www.perfandersson.com/data`

2.11.11.15 Share Indirect Taxes in 1850 (gtr_centaxind1850)

Long tag: qog_oecd_cs_gtr_centaxind1850

Original tag: gtr_centaxind1850

Description:
Share of total central government tax revenue from property taxes, most importantly levies on land and real estate , in the year 1850. These include (i) recurrent taxes on immovable property, (ii) recurrent taxes on net wealth, (iii) estate, inheritance, and gift taxes, (iv) taxes in financial and capital transactions, (v) other taxes on property.

2.11.11.16 Total Central Govt Revenue in 1800 (millions, local currency) (gtr_centaxtot1800)

Long tag: qog_oecd_cs_gtr_centaxtot1800

Original tag: gtr_centaxtot1800

Description:
Total central government tax revenue (in millions of local currency), in the year 1800. Taxes are defined as compulsory and unrequited levies by the government, following the Organisation for Economic Co-operation and Development (OECD). Excluded are social security contributions and non-tax revenues.

Variable citation: Andersson, Per F. and Thomas Brambor. (2019). Financing the state: Government tax revenue from 1800 to 2012. version 2.0. `https://www.perfandersson.com/data`

2.11.11.17 Grants (ictd_grants)

Long tag: qog_oecd_cs_ictd_grants

Original tag: ictd_grants

Description:
Total grants received by the government.

Variable citation: ICTD/UNU-WIDER. (2020). Government revenue dataset. `https://www.wider.unu.edu/project/government-revenue-dataset`

2.11.11.18 Consolidated Non-Tax Revenue (ictd_nontax)

Long tag: qog_oecd_cs_ictd_nontax

Original tag: ictd_nontax

Description:
Total non-tax revenue, comprising data categorized as either "non-tax revenue" or "other revenue" depending on the underlying source. Includes revenue from both resource and non-resource sources.

Variable citation: ICTD/UNU-WIDER. (2020). Government revenue dataset. `https://www.wider.unu.edu/project/government-revenue-dataset`

2.11.11.19 Revenue (excluding social contributions) (ictd_revexsc)

Long tag: qog_oecd_cs_ictd_revexsc

Original tag: ictd_revexsc

Description:
Total government revenue, excluding social contributions.

Variable citation: ICTD/UNU-WIDER. (2020). Government revenue dataset. `https://www.wider.unu.edu/project/government-revenue-dataset`

2.11.11.20 Revenue (including social contributions) (ictd_revinsc)

Long tag: qog_oecd_cs_ictd_revinsc

Original tag: ictd_revinsc

Description:
Total government revenue including taxes, non-tax revenue, grants and social contributions.

Variable citation: ICTD/UNU-WIDER. (2020). Government revenue dataset. `https://www.wider.unu.edu/project/government-revenue-dataset`

2.11.11.21 Total Resource Revenue (ictd_revres)

Long tag: qog_oecd_cs_ictd_revres

Original tag: ictd_revres

Description:

Total natural resource revenues, including natural resource revenues reported as "tax revenue" or "non-tax revenue". Natural resources are here defined as natural resources that include a significant component of economic rent, primarily from oil and mining activities.

Variable citation: ICTD/UNU-WIDER. (2020). Government revenue dataset. `https://www.wider.unu.edu/project/government-revenue-dataset`

2.11.11.22 Social Contributions (ictd_soccon)

Long tag: qog_oecd_cs_ictd_soccon

Original tag: ictd_soccon

Description:

Total social contributions.

Variable citation: ICTD/UNU-WIDER. (2020). Government revenue dataset. `https://www.wider.unu.edu/project/government-revenue-dataset`

2.11.11.23 Taxes on Corporations and Other Enterprises (ictd_taxcorp)

Long tag: qog_oecd_cs_ictd_taxcorp

Original tag: ictd_taxcorp

Description:

Total income and profit taxes on corporations, including taxes on resource firms.

Variable citation: ICTD/UNU-WIDER. (2020). Government revenue dataset. `https://www.wider.unu.edu/project/government-revenue-dataset`

2.11.11.24 Taxes (excluding social contributions) (ictd_taxexsc)

Long tag: qog_oecd_cs_ictd_taxexsc

Original tag: ictd_taxexsc

Description:

Total tax revenue, excluding social contributions.

Variable citation: ICTD/UNU-WIDER. (2020). Government revenue dataset. `https://www.wider.unu.edu/project/government-revenue-dataset`

2.11.11.25 Taxes on Goods and Services (ictd_taxgs)

Long tag: qog_oecd_cs_ictd_taxgs

Original tag: ictd_taxgs

Description:

Total taxes on goods and services, which includes (but it not necessarily always equal to) sales taxes and excise taxes.

Variable citation: ICTD/UNU-WIDER. (2020). Government revenue dataset. `https://www.wider.unu.edu/project/government-revenue-dataset`

2.11.11.26 Taxes on Income, Profits, and Capital Gains (ictd_taxinc)

Long tag: qog_oecd_cs_ictd_taxinc

Original tag: ictd_taxinc

Description:

Total taxes on income, profits and capital gains, including taxes on natural resource firms. This figure is always exclusive of social contributions. The total value of Taxes on Income, Profits and Capital Gains may sometimes exceed the sum of Individuals and Corporations, due to revenues that are unallocated between the two.

Variable citation: ICTD/UNU-WIDER. (2020). Government revenue dataset. `https://www.wider.unu.edu/project/government-revenue-dataset`

2.11.11.27 Taxes on Individuals (ictd_taxind)

Long tag: qog_oecd_cs_ictd_taxind

Original tag: ictd_taxind

Description:

Total income, capital gains and profit taxes on individuals. This figure is always exclusive of resource revenues in available sources.

Variable citation: ICTD/UNU-WIDER. (2020). Government revenue dataset. `https://www.wider.unu.edu/project/government-revenue-dataset`

2.11.11.28 Indirect Taxes (ictd_taxindirect)

Long tag: qog_oecd_cs_ictd_taxindirect

Original tag: ictd_taxindirect

Description:

Total indirect taxes, including resource revenues. Includes taxes on goods and services, taxes on international trade and other taxes. Indirect may exceed the sum of Taxes on Goods and Services, Taxes on International Trade and Transactions and Other Taxes due to unallocated revenue not classified in any of these categories.

Variable citation: ICTD/UNU-WIDER. (2020). Government revenue dataset. `https://www.wider.unu.edu/project/government-revenue-dataset`

2.11.11.29 Taxes (including social contributions) (ictd_taxinsc)

Long tag: qog_oecd_cs_ictd_taxinsc

Original tag: ictd_taxinsc

Description:

Total tax revenue, including social contributions.

Variable citation: ICTD/UNU-WIDER. (2020). Government revenue dataset. `https://www.wider.unu.edu/project/government-revenue-dataset`

2.11.11.30 Non-resource Tax (excluding social contributions) (ictd_taxnresexsc)

Long tag: qog_oecd_cs_ictd_taxnresexsc

Original tag: ictd_taxnresexsc

Description:

Total non-resource tax revenue, excluding social contributions. Calculated as "Taxes excluding social contributions" minus "resource taxes". This is the variable recommended for econometric analysis, as it is most complete and consistent across countries.

Variable citation: ICTD/UNU-WIDER. (2020). Government revenue dataset. `https://www.wider.unu.edu/project/government-revenue-dataset`

2.11.11.31 Non-resource Tax (including social contributions) (ictd_taxnresinsc)

Long tag: qog_oecd_cs_ictd_taxnresinsc

Original tag: ictd_taxnresinsc

Description:

Total non-resource tax revenue, including social contributions. Calculated as "Taxes including social contributions" minus "resource taxes".

Variable citation: ICTD/UNU-WIDER. (2020). Government revenue dataset. `https://www.wider.unu.edu/project/government-revenue-dataset`

2.11.11.32 Other Taxes (ictd_taxother)

Long tag: qog_oecd_cs_ictd_taxother

Original tag: ictd_taxother

Description:

Total other taxes.

Variable citation: ICTD/UNU-WIDER. (2020). Government revenue dataset. `https://www.wider.unu.edu/project/government-revenue-dataset`

2.11.11.33 Taxes on Payroll and Workforce (ictd_taxpaywf)

Long tag: qog_oecd_cs_ictd_taxpaywf

Original tag: ictd_taxpaywf

Description:
Total taxes on payroll and workforce. This variable is entirely distinct from social contributions, though in underlying sources, social contributions are very occasionally reported as payroll taxes.

Variable citation: ICTD/UNU-WIDER. (2020). Government revenue dataset. `https://www.wider.unu.edu/project/government-revenue-dataset`

2.11.11.34 Taxes on Property (ictd_taxprop)

Long tag: qog_oecd_cs_ictd_taxprop

Original tag: ictd_taxprop

Description:
Total taxes on property.

Variable citation: ICTD/UNU-WIDER. (2020). Government revenue dataset. `https://www.wider.unu.edu/project/government-revenue-dataset`

2.11.11.35 Resource Taxes (ictd_taxres)

Long tag: qog_oecd_cs_ictd_taxres

Original tag: ictd_taxres

Description:
Component of reported tax revenue that is from natural resource sources, most often corporate taxation of resource firms.

Variable citation: ICTD/UNU-WIDER. (2020). Government revenue dataset. `https://www.wider.unu.edu/project/government-revenue-dataset`

2.11.11.36 Taxes on International Trade and Transactions (ictd_taxtrade)

Long tag: qog_oecd_cs_ictd_taxtrade

Original tag: ictd_taxtrade

Description:
Total taxes on international trade, including both import and export taxes. In some cases this figure may also include VAT collected at the border, where countries consistently report revenue in this way.

Variable citation: ICTD/UNU-WIDER. (2020). Government revenue dataset. `https://www.wider.unu.edu/project/government-revenue-dataset`

2.11.11.37 Real GDP per Capita (mad_gdppc)

Long tag: qog_oecd_cs_mad_gdppc

Original tag: mad_gdppc

Description:
Real GDP per capita in 2011 US dollars, multiple benchmarks.

Variable citation: Bolt, J., & van Zanden, J. L. (2020). Maddison project database, version 2020 [Maddison style estimates of the evolution of the world economy: A new 2020 update]. `https://www.rug.nl/ggdc/historicaldevelopment/maddison/research`

2.11.11.38 Current account balance (oecd_bop_t1)

Long tag: qog_oecd_cs_oecd_bop_t1

Original tag: oecd_bop_t1

Description:
Current account balance.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. `https://doi.org/10.1787/20752288`

2.11.11.132 Top 10percent income share (top_top10_income_share)

Long tag: qog_oecd_cs_top_top10_income_share

Original tag: top_top10_income_share

Description:
Income share of the top 10percent of the population. This refers to the share of pre-tax national income among equal-split adults for the top 10percent in each country-year.

The pre-tax national income is the sum of all pre-tax personal income flows accruing to the owners of the production factors, labor and capital, before taking into account the operation of the tax/transfer system, but after taking into account the operation of pension system.

The central difference between personal factor income and pre-tax income is the treatment of pensions, which are counted on a contribution basis by factor income and on a distribution basis by pre-tax income. The population is comprised of individuals over age 20. The base unit is the individual (rather than the

household) but resources are split equally within couples.

Variable citation: Alvaredo, F., Atkinson, A. B., Piketty, T., & Saez, E. (2020b). World inequality report 2020. `http://wid.world/` Alvaredo, F., Atkinson, A. B., Piketty, T., & Saez, E. (2020a). World inequality database. `http://wid.world/data`

2.11.11.133 Top 1percent income share (top_top1_income_share)

Long tag: qog_oecd_cs_top_top1_income_share

Original tag: top_top1_income_share

Description:

Income share of the top 1percent of the population. This refers to the share of pre-tax national income among equal-split adults for the top 1percent in each country-year.

The pre-tax national income is the sum of all pre-tax personal income flows accruing to the owners of the production factors, labor and capital, before taking into account the operation of the tax/transfer system, but after taking into account the operation of pension system.

The central difference between personal factor income and pre-tax income is the treatment of pensions, which are counted on a contribution basis by factor income and on a distribution basis by pre-tax income. Description:

Regulatory Quality - Standard Errors.

Variable citation: Kaufmann, D., Kraay, A., & Mastruzzi, M. (2010). The worldwide governance indicators: A summary of methodology, data and analytical issues. *World Bank Policy Research Working Paper, 5430*

2.11.11.137 Proportion of people living below 50 percent of median income (percent) (wdi_belmedinc)

Long tag: qog_oecd_cs_wdi_belmedinc

Original tag: wdi_belmedinc

Description:

The percentage of people in the population who live in households whose per capita income or consumption is below half of the median income or consumption per capita. The median is measured at 2011 Purchasing Power Parity (PPP) using PovcalNet (http://iresearch.worldbank.org/PovcalNet). For some countries, medians are not reported due to grouped and/or confidential data. The reference year is the year in which the underlying household survey data was collected. In cases for which the data collection period bridged two

calendar years, the first year in which data were collected is reported.

2.11.11.138 Domestic general government health expenditure (percent of GDP) (wdi_dgovhexp)

Long tag: qog_oecd_cs_wdi_dgovhexp

Original tag: wdi_dgovhexp

Description:

Domestic general government health expenditure (percent of GDP). Public expenditure on health from domestic sources as a share of the economy as measured by GDP.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.11.139 Domestic private health expenditure (percent of current health expenditure) (wdi_dprivhexp)

Long tag: qog_oecd_cs_wdi_dprivhexp

Original tag: wdi_dprivhexp

Description:

Domestic private health expenditure (percent of current health expenditure). Share of current health expenditures funded from domestic private sources. Domestic private sources include funds from households, corporations and non-profit organizations. Such expenditures can be either prepaid to voluntary health insurance or paid directly to healthcare providers.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.11.140 External health expenditure (percent of current health expenditure) (wdi_ehexpp)

Long tag: qog_oecd_cs_wdi_ehexpp

Original tag: wdi_ehexpp

Description:

External health expenditure (percent of current health expenditure). Share of current health expenditures funded from external sources. External sources compose of direct foreign transfers and foreign transfers distributed by government encompassing all financial inflows into the national health system from outside the country. External sources either flow through the government scheme or are channeled through non-governmental organizations or other schemes.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.11.141 Exports of goods and services (percent of GDP) (wdi_export)

Long tag: qog_oecd_cs_wdi_export

Original tag: wdi_export

Description:

Exports of goods and services represent the value of all goods and other market services provided to the rest of the world. They include the value of merchandise, freight, insurance, transport, travel, royalties, license fees, and other services, such as communication, construction, financial, information, business, personal, and government services. They exclude compensation of employees and investment income (formerly called factor services) and transfer payments.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.11.142 Foreign direct investment, net inflows (percent of GDP) (wdi_fdiin)

Long tag: qog_oecd_cs_wdi_fdiin

Original tag: wdi_fdiin

Description:

Foreign direct investment are the net inflows of investment to acquire a lasting management interest (10 percent or more of voting stock) in an enterprise operating in an economy other than that of the investor. It is the sum of equity capital, reinvestment of earnings, other long-term capital, and short-term capital as shown in the balance of payments. This series shows net inflows (new investment inflows less disinvestment) in the reporting economy from foreign investors, and is divided by GDP.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.11.143 Foreign direct investment, net outflows (percent of GDP) (wdi_fdiout)

Long tag: qog_oecd_cs_wdi_fdiout

Original tag: wdi_fdiout

Description:

Foreign direct investment are the net outflows of investment to acquire a lasting management interest (10 percent or more of voting stock) in an enterprise operating in an economy other than that of the investor. It is the sum of equity capital, reinvestment of earnings, other long-term capital, and short-term capital as shown in the balance of payments. This series shows net outflows of investment from the reporting economy to the rest of the world and is divided by GDP.

2.11.11.144 Agriculture, forestry, and fishing, value added (percent of GDP) (wdi_gdpagr)

Long tag: qog_oecd_cs_wdi_gdpagr

Original tag: wdi_gdpagr

Description:

Agriculture corresponds to ISIC divisions 1-5 and includes forestry, hunting, and fishing, as well as cultivation of crops and livestock production. Value added is the net output of a sector after adding up all outputs and subtracting intermediate inputs. It is calculated without making deductions for depreciation of fabricated assets or depletion and degradation of natural resources. The origin of value added is determined by the International Standard Industrial Classification (ISIC), revision 3 or 4.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.11.145 GDP per capita (constant 2010 US dollar) (wdi_gdpcapcon2010)

Long tag: qog_oecd_cs_wdi_gdpcapcon2010

Original tag: wdi_gdpcapcon2010

Description:

GDP per capita is gross domestic product divided by midyear population. GDP is the sum of gross value added by all resident producers in the economy plus any product taxes and minus any subsidies not included in the value of the products. It is calculated without making deductions for depreciation of fabricated assets or for depletion and degradation of natural resources. Data are in constant 2010 U.S. dollars.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.11.146 GDP per capita (current US dollar) (wdi_gdpcapcur)

Long tag: qog_oecd_cs_wdi_gdpcapcur

Original tag: wdi_gdpcapcur

Description:

GDP per capita is gross domestic product divided by midyear population. GDP is the sum of gross value added by all resident producers in the economy plus any product taxes and minus any subsidies not included in the value of the products. It is calculated without making deductions for depreciation of fabricated assets or for depletion and degradation of natural resources. Data are in current U.S. dollars.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.11.147 GDP per capita growth (annual percent) (wdi_gdpcapgr)

Long tag: qog_oecd_cs_wdi_gdpcapgr

Original tag: wdi_gdpcapgr

Description:

Annual percentage growth rate of GDP per capita based on constant local currency. Aggregates are based on constant 2010 U.S. dollars. GDP per capita is gross domestic product divided by midyear population. GDP at purchaser's prices is the sum of gross value added by all resident producers in the economy plus any product taxes and minus any subsidies not included in the value of the products. It is calculated without making deductions for depreciation of fabricated assets or for depletion and degradation of natural resources.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.11.148 GDP per capita, PPP (constant 2017 international dollar) (wdi_gdpcappppcon2017)

Long tag: qog_oecd_cs_wdi_gdpcappppcon2017

Original tag: wdi_gdpcappppcon2017

Description:

GDP per capita based on purchasing power parity (PPP). PPP GDP is gross domestic product converted to international dollars using purchasing power parity rates. An international dollar has the same purchasing power over GDP as the U.S. dollar has in the United States. GDP at purchaser's prices is the sum of gross value added by all resident producers in the economy plus any product taxes and minus any subsidies not included in the value of the products. It is calculated without making deductions for depreciation of fabricated assets or for depletion and degradation of natural resources. Data are in constant 2017 international dollars.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.11.149 GDP per capita, PPP (current international dollar) (wdi_gdpcappppcur)

Long tag: qog_oecd_cs_wdi_gdpcappppcur

Original tag: wdi_gdpcappppcur

Description:

GDP per capita based on purchasing power parity (PPP). PPP GDP is gross domestic product converted to international dollars using purchasing power parity rates. An international dollar has the same purchasing power over GDP as the U.S. dollar has in the United States. GDP at purchaser's prices is the sum of gross value added by all resident producers in the economy plus any product taxes and minus any subsidies not included in the value of the products. It is calculated without making deductions for depreciation of fabricated assets or for depletion and degradation of natural resources. Data are in current international dollars based on the 2011 ICP round.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.11.150 GDP growth (annual percent) (wdi_gdpgr)

Long tag: qog_oecd_cs_wdi_gdpgr

Original tag: wdi_gdpgr

Description:

Annual percentage growth rate of GDP at market prices based on constant local currency. Aggregates are based on constant 2010 U.S. dollars. GDP is the sum of gross value added by all resident producers in the economy plus any product taxes and minus any subsidies not included in the value of the products. It is calculated without making deductions for depreciation of fabricated assets or for depletion and degradation of natural resources.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.11.151 Industry (including construction), value added (percent of GDP) (wdi_gdpind)

Long tag: qog_oecd_cs_wdi_gdpind

Original tag: wdi_gdpind

Description:

Industry corresponds to ISIC divisions 10-45 and includes manufacturing (ISIC divisions 15-37). It comprises value added in mining, manufacturing (also reported as a separate subgroup), construction, electricity, water, and gas. Value added is the net output of a sector after adding up all outputs and subtracting intermediate inputs. It is calculated without making deductions for depreciation of fabricated assets or depletion and degradation of natural resources. The origin of value added is determined by the International Standard Industrial Classification (ISIC), revision 3. Note: For VAB countries, gross value added at factor cost is used as the denominator.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.11.152 GDP, PPP (constant 2017 international dollar) (wdi_gdppppcon2017)

Long tag: qog_oecd_cs_wdi_gdppppcon2017

Original tag: wdi_gdppppcon2017

Description:

PPP GDP is gross domestic product converted to international dollars using purchasing power parity rates. An international dollar has the same purchasing power over GDP as the U.S. dollar has in the United States.

GDP is the sum of gross value added by all resident producers in the economy plus any product taxes and minus any subsidies not included in the value of the products. It is calculated without making deductions for depreciation of fabricated assets or for depletion and degradation of natural resources. Data are in constant 2017 international dollars.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.11.153 GDP, PPP (current international dollar) (wdi_gdppppcur)

Long tag: qog_oecd_cs_wdi_gdppppcur

Original tag: wdi_gdppppcur

Description:

PPP GDP is gross domestic product converted to international dollars using purchasing power parity rates. An international dollar has the same purchasing power over GDP as the U.S. dollar has in the United States. GDP is the sum of gross value added by all resident producers in the economy plus any product taxes and minus any subsidies not included in the value of the products. It is calculated without making deductions for depreciation of fabricated assets or for depletion and degradation of natural resources. Data are in current international dollars. For most economies PPP figures are extrapolated from the 2011 International Comparison Program (ICP) benchmark estimates or imputed using a statistical model based on the 2011 ICP. For 47 high- and upper middle-income economies conversion factors are provided by Eurostat and the Organisation for Economic Co-operation and Development (OECD).

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.11.154 Gini index (World Bank estimate) (wdi_gini)

Long tag: qog_oecd_cs_wdi_gini

Original tag: wdi_gini

Description:

Gini index measures the extent to which the distribution of income (or, in some cases, consumption expenditure) among individuals or households within an economy deviates from a perfectly equal distribution. A Lorenz curve plots the cumulative percentages of total income received against the cumulative number of recipients, starting with the poorest individual or household. The Gini index measures the area between the Lorenz curve and a hypothetical line of absolute equality, expressed as a percentage of the maximum area under the line. Thus a Gini index of 0 represents perfect equality, while an index of 100 implies perfect inequality.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.11.155 GNI, Atlas method (current US dollar) (wdi_gniatlcur)

Long tag: qog_oecd_cs_wdi_gniatlcur

Original tag: wdi_gniatlcur

Description:

GNI (formerly GNP) is the sum of value added by all resident producers plus any product taxes (less subsidies) not included in the valuation of output plus net receipts of primary income (compensation of employees and property income) from abroad. Data are in current U.S. dollars. GNI, calculated in national currency, is usually converted to U.S. dollars at official exchange rates for comparisons across economies, although an alternative rate is used when the official exchange rate is judged to diverge by an exceptionally large margin from the rate actually applied in international transactions. To smooth fluctuations in prices and exchange rates, a special Atlas method of conversion is used by the World Bank. This applies a conversion factor that averages the exchange rate for a given year and the two preceding years, adjusted for differences in rates of inflation between the country, and through 2000, the G-5 countries (France, Germany, Japan, the United Kingdom, and the United States). From 2001, these countries include the Euro area, Japan, the United Kingdom, and the United States.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.11.156 GNI per capita, Atlas method (current US dollar) (wdi_gnicapatlcur)

Long tag: qog_oecd_cs_wdi_gnicapatlcur

Original tag: wdi_gnicapatlcur

Description:

GNI per capita (formerly GNP per capita) is the gross national income, converted to U.S. dollars using the World Bank Atlas method, divided by the midyear population. GNI is the sum of value added by all resident producers plus any product taxes (less subsidies) not included in the valuation of output plus net receipts of primary income (compensation of employees and property income) from abroad. GNI, calculated in national

currency, is usually converted to U.S. dollars at official exchange rates for comparisons across economies, although an alternative rate is used when the official exchange rate is judged to diverge by an exceptionally large margin from the rate actually applied in international transactions. To smooth fluctuations in prices and exchange rates, a special Atlas method of conversion is used by the World Bank. This applies a conversion factor that averages the exchange rate for a given year and the two preceding years, adjusted for differences in rates of inflation between the country, and through 2000, the G-5 countries (France, Germany, Japan, the United Kingdom, and the United States). 2.11.11.162 GNI (current US dollar) (wdi_gnicur)

Long tag: qog_oecd_cs_wdi_gnicur

Original tag: wdi_gnicur

Description:
GNI (formerly GNP) is the sum of value added by all resident producers plus any product taxes (less subsidies) not included in the valuation of output plus net receipts of primary income (compensation of employees and property income) from abroad. Data are in current U.S. dollars.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.11.163 GNI growth (annual percent) (wdi_gnigr)

Long tag: qog_oecd_cs_wdi_gnigr

Original tag: wdi_gnigr

Description:
GNI (formerly GNP) is the sum of value added by all resident producers plus any product taxes (less subsidies) not included in the valuation of output plus net receipts of primary income (compensation of employees and property income) from abroad.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.11.164 GNI, PPP (constant 2017 international dollar) (wdi_gnipppcon2017)

Long tag: qog_oecd_cs_wdi_gnipppcon2017

Original tag: wdi_gnipppcon2017

Description:
PPP GNI (formerly PPP GNP) is gross national income (GNI) converted to international dollars using purchasing power parity rates. An international dollar has the same purchasing power over GNI as a U.S. dollar has in the United States. Gross national income is the sum of value added by all resident producers plus any product taxes (less subsidies) not included in the valuation of output plus net receipts of primary income (compensation of employees and property income) from abroad. Data are in constant 2017 international dollars.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.11.165 GNI, PPP (current international dollar) (wdi_gnipppcur)

Long tag: qog_oecd_cs_wdi_gnipppcur

Original tag: wdi_gnipppcur

Description:
PPP GNI (formerly PPP GNP) is gross national income (GNI) converted to international dollars using purchasing power parity rates. An international dollar has the same purchasing power over GNI as a U.S. dollar has in the United States. Gross national income is the sum of value added by all resident producers plus any product taxes (less subsidies) not included in the valuation of output plus net receipts of primary income (compensation of employees and property income) from abroad. Data are in current international dollars. For most economies PPP figures are extrapolated from the 2011 International Comparison Program (ICP) benchmark estimates or imputed using a statistical model based on the 2011 ICP. For 47 high- and upper middle-income economies conversion factors are provided by Eurostat and the Organisation for Economic Co-operation and Development (OECD).

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.11.166 Imports of goods and services (percent of GDP) (wdi_import)

Long tag: qog_oecd_cs_wdi_import

Original tag: wdi_import

Description:
Imports of goods and services represent the value of all goods and other market services received from the rest of the world. They include the value of merchandise, freight, insurance, transport, travel, royalties, license fees, and other services, such as communication, construction, financial, information, business, personal, and government services. They exclude compensation of employees and investment income (formerly called factor services) and transfer payments.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.11.167 Income share held by highest 10percent (wdi_incsh10h)

Long tag: qog_oecd_cs_wdi_incsh10h

Original tag: wdi_incsh10h

Description:
Income share held by highest 10percent. Percentage share of income or consumption is the share that accrues to subgroups of population indicated by deciles or quintiles.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.11.168 Income share held by lowest 10percent (wdi_incsh10l)

Long tag: qog_oecd_cs_wdi_incsh10l

Original tag: wdi_incsh10l

Description:
Income share held by lowest 10percent. Percentage share of income or consumption is the share that accrues to subgroups of population indicated by deciles or quintiles.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.11.169 Income share held by second 20percent (wdi_incsh202)

Long tag: qog_oecd_cs_wdi_incsh202

Original tag: wdi_incsh202

Description:
Income share held by second 20percent. Percentage share of income or consumption is the share that accrues to subgroups of population indicated by deciles or quintiles. Percentage shares by quintile may not sum to 100 because of rounding.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.11.170 Income share held by third 20percent (wdi_incsh203)

Long tag: qog_oecd_cs_wdi_incsh203

Original tag: wdi_incsh203

Description:
Income share held by third 20percent. Percentage share of income or consumption is the share that accrues to subgroups of population indicated by deciles or quintiles. Percentage shares by quintile may not sum to 100 because of rounding.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.11.171 Income share held by fourth 20percent (wdi_incsh204)

Long tag: qog_oecd_cs_wdi_incsh204

Original tag: wdi_incsh204

Description:
Income share held by fourth 20percent. Percentage share of income or consumption is the share that accrues to subgroups of population indicated by deciles or quintiles. Percentage shares by quintile may not sum to 100 because of rounding.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.11.172 Income share held by highest 20percent (wdi_incsh20h)

Long tag: qog_oecd_cs_wdi_incsh20h

Original tag: wdi_incsh20h

Description:
Income share held by highest 20percent. Percentage share of income or consumption is the share that accrues to subgroups of population indicated by deciles or quintiles. Percentage shares by quintile may not sum to 100 because of rounding.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.11.173 Income share held by lowest 20percent (wdi_incsh20l)

Long tag: qog_oecd_cs_wdi_incsh20l

Original tag: wdi_incsh20l

Description:
Income share held by lowest 20percent. Percentage share of income or consumption is the share that accrues to subgroups of population indicated by deciles or quintiles. Percentage shares by quintile may not sum to 100 because of rounding.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.11.174 Inflation, consumer prices (annual percent) (wdi_inflation)

Long tag: qog_oecd_cs_wdi_inflation

Original tag: wdi_inflation

Description:
Inflation as measured by the consumer price index reflects the annual percentage change in the cost to the average consumer of acquiring a basket of goods and services that may be fixed or changed at specified intervals, such as yearly. The Laspeyres formula is generally used.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.11.175 Interest payments (percent of expense) (wdi_interexp)

Long tag: qog_oecd_cs_wdi_interexp

Original tag: wdi_interexp

Description:
Interest payments as percentage of expense include interest payments on government debt–including long-term bonds, long-term loans, and other debt instruments–to domestic and foreign residents.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.11.176 Interest payments (percent of revenue) (wdi_interrev)

Long tag: qog_oecd_cs_wdi_interrev

Original tag: wdi_interrev

Description:
Interest payments as percentage of revenue include interest payments on government debt–including long-term bonds, long-term loans, and other debt instruments–to domestic and foreign residents.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.11.177 Poverty gap at USD 3.20 a day (2011 PPP) (percent) (wdi_povgap320)

Long tag: qog_oecd_cs_wdi_povgap320

Original tag: wdi_povgap320

Description:
Poverty gap at 3.20 dollars a day (2011 PPP) is the mean shortfall in income or consumption from the poverty line 3.20 dollars a day (counting the nonpoor as having zero shortfall), expressed as a percentage of the poverty line. This measure reflects the depth of poverty as well as its incidence (percent of population).

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.11.178 Services, value added (constant 2010 US dollar) (wdi_sva2010)

Long tag: qog_oecd_cs_wdi_sva2010

Original tag: wdi_sva2010

Description:

Services, value added (constant 2010 US dollar). Services correspond to ISIC divisions 50-99. They include value added in wholesale and retail trade (including hotels and restaurants), transport, and government, financial, professional, and personal services such as education, health care, and real estate services. Also included are imputed bank service charges, import duties, and any statistical discrepancies noted by national compilers as well as discrepancies arising from rescaling. Value added is the net output of a sector after adding up all outputs and subtracting intermediate inputs. It is calculated without making deductions for depreciation of fabricated assets or depletion and degradation of natural resources. The industrial origin of value added is determined by the International Standard Industrial Classification (ISIC), revision 3 or 4. Data are in constant 2010 U.S. dollars.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.11.179 Services, value added (annual percent growth) (wdi_svapg)

Long tag: qog_oecd_cs_wdi_svapg

Original tag: wdi_svapg

Description:

Services, value added (annual percent growth). Annual growth rate for value added in services based on constant local currency. Aggregates are based on constant 2010 U.S. dollars. Services correspond to ISIC divisions 50-99. They include value added in wholesale and retail trade (including hotels and restaurants), transport, and government, financial, professional, and personal services such as education, health care, and real estate services. Also included are imputed bank service charges, import duties, and any statistical discrepancies noted by national compilers as well as discrepancies arising from rescaling. Value added is the net output of a sector after adding up all outputs and subtracting intermediate inputs. It is calculated without making deductions for depreciation of fabricated assets or depletion and degradation of natural resources. The industrial origin of value added is determined by the International Standard Industrial Classification (ISIC), revision 3 or 4.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.11.180 Services, value added (percent of GDP) (wdi_svapgdp)

Long tag: qog_oecd_cs_wdi_svapgdp

Original tag: wdi_svapgdp

Description:

Services, value added (percent of GDP). Services correspond to ISIC divisions 50-99 and they include value added in wholesale and retail trade (including hotels and restaurants), transport, and government, financial, professional, and personal services such as education, health care, and real estate services. Also included are imputed bank service charges, import duties, and any statistical discrepancies noted by national compilers as well as discrepancies arising from rescaling. Value added is the net output of a sector after adding up all outputs and subtracting intermediate inputs. It is calculated without making deductions for depreciation of fabricated assets or depletion and degradation of natural resources. The industrial origin of value added is determined by the International Standard Industrial Classification (ISIC), revision 3 or 4.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.11.181 Tax revenue (percent of GDP) (wdi_taxrev)

Long tag: qog_oecd_cs_wdi_taxrev

Original tag: wdi_taxrev

Description:

Tax revenue refers to compulsory transfers to the central government for public purposes. Certain compulsory transfers such as fines, penalties, and most social security contributions are excluded. Refunds and corrections of erroneously collected tax revenue are treated as negative revenue.

Note: The value for San Marino for 1995 was extremely high (44326) and has been recoded to missing.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.11.182 Trade (percent of GDP) (wdi_trade)

Long tag: qog_oecd_cs_wdi_trade

Original tag: wdi_trade

Description:

Trade is the sum of exports and imports of goods and services measured as a share of gross domestic product.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.11.183 Trade in services (percent of GDP) (wdi_tradeserv)

Long tag: qog_oecd_cs_wdi_tradeserv

Original tag: wdi_tradeserv

Description:

Trade in services is the sum of service exports and imports divided by the value of GDP, all in current U.S. dollars.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.11.184 Debt dynamics. 0-100 (best) (wef_ddyn)

Long tag: qog_oecd_cs_wef_ddyn

Original tag: wef_ddyn

Description:

Debt dynamics. 0-100 (best). Index measuring the change in public debt, weighted by a country's credit rating and debt level in relation to its GDP. Original sources: World Economic Forum; calculations based on data from International Monetary Fund and rating agencies

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. `http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf`

2.11.11.185 Gross domestic product (billions, PPP) (wef_gdpp2)

Long tag: qog_oecd_cs_wef_gdpp2

Original tag: wef_gdpp2

Description:

Gross domestic product (GDP) PPP dollar valued at purchasing power parity in billions of international dollars (constant 2011 prices). Original sources: International Monetary Fund (IMF)

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. `http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf`

2.11.11.186 Inflation. Annual percent change (wef_infl)

Long tag: qog_oecd_cs_wef_infl

Original tag: wef_infl

Description:

Inflation. Annual percent change. Annual percent change in consumer price index (year average). Original sources: International Monetary Fund (IMF)

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. `http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf`

2.11.11.187 Prevalence of non-tariff barriers. 1-7 (best) (wef_pntb)

Long tag: qog_oecd_cs_wef_pntb

Original tag: wef_pntb

Description:

Prevalence of non-tariff barriers. 1-7 (best). In your country, to what extent do non-tariff barriers (e.g., health and product standards, technical and labeling requirements, etc.) limit the ability of imported goods to compete in the domestic market? [1 = strongly limit; 7 = do not limit at all] Original sources: World Economic Forum, Executive Opinion Survey

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. `http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf`

2.11.11.188 Pay and productivity. 1-7 (best) (wef_pp)

Long tag: qog_oecd_cs_wef_pp

Original tag: wef_pp

Description:
Pay and productivity. 1-7 (best). In your country, to what extent is pay related to employee productivity? [1 = not at all; 7 = to a great extent] Original sources: World Economic Forum, Executive Opinion Survey

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. `http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf`

2.11.11.189 Scientific publications. H Index (wef_sp)

Long tag: qog_oecd_cs_wef_sp

Original tag: wef_sp

Description:
Scientific publications. H Index. Score on an index measuring the number of publications and their citations, expressed at the country level. Original sources: SCImago

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. `http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf`

2.11.12 Media

This category includes indicators on the freedom of the media in a given country (freedom of the press, regulation of the media) as well as the public access and confidence in the media.

2.11.12.1 Economic Influences over Media Content (2001-2016) (fhp_mcei5)

Long tag: qog_oecd_cs_fhp_mcei5

Original tag: fhp_mcei5

Description:
Economic Influences over Media Content (2001-2016). This category includes the structure of media ownership; transparency and concentration of ownership; the costs of establishing media as well as any impediments to news production and distribution; the selective withholding of advertising or subsidies by the state or other actors; the impact of corruption and bribery on content; and the extent to which the economic situation in a country or territory affects the development and sustainability of the media.

Variable citation: Freedom House. (2017). Freedom of the press 2017. `https://freedomhouse.org/report/freedompress/freedom-press-2017`

2.11.12.2 Laws and Regulations that Influence Media Content (2001-2016) (fhp_mclr5)

Long tag: qog_oecd_cs_fhp_mclr5

Original tag: fhp_mclr5

Description:
Laws and Regulations that Influence the Media Content (2001-2016). The variable encompasses an examination of both the laws and regulations that could influence media content and the government's inclination to use these laws and legal institutions to restrict the media's ability to operate. Freedom House assesses the positive impact of legal and constitutional guarantees for freedom of expression; the potentially negative aspects of security legislation, the penal code, and other criminal statutes; penalties for libel and defamation; the existence of and ability to use freedom of information legislation; the independence of the judiciary and of official media regulatory bodies; registration requirements for both media outlets and journalists; and the ability of journalists' groups to operate freely. The scale of the variable is 0-30. 0 indicates more freedom.

Variable citation: Freedom House. (2017). Freedom of the press 2017. `https://freedomhouse.org/report/freedompress/freedom-press-2017`

2.11.12.3 Political Pressures and Controls on Media Content (2001-2016) (fhp_mcpp5)

Long tag: qog_oecd_cs_fhp_mcpp5

Original tag: fhp_mcpp5

Description:
Political Pressures and Controls on Media Content (2001-2016). The variable evaluates the degree of political control over the content of news media. Issues examined include the editorial independence of both state-owned and privately owned media; access to information and sources; official censorship and self-censorship; the vibrancy of the media; the ability of both foreign and local reporters to cover the news freely and without harassment; and the intimidation of journalists by the state or other actors, including arbitrary detention and imprisonment, violent assaults, and other threats. The scale of the variable is 0-40. 0

indicates more freedom.

Variable citation: Freedom House. (2017). Freedom of the press 2017. https://freedomhouse.org/report/freedompress/freedom-press-2017

2.11.12.4 Freedom of the Press, Score (2001-2016) (fhp_score5)

Long tag: qog_oecd_cs_fhp_score5

Original tag: fhp_score5

Description:

Freedom of the Press, Score (2001-2016): The press freedom index is computed by adding four component ratings: Laws and regulations, Political pressures and controls, Economic Influences and Repressive actions. The scale ranges from 0 (most free) to 100 (least free).

Variable citation: Freedom House. (2017). Freedom of the press 2017. https://freedomhouse.org/report/freedompress/freedom-press-2017

2.11.12.5 Freedom of the Press, Status (2001-2016) (fhp_status5)

Long tag: qog_oecd_cs_fhp_status5

Original tag: fhp_status5

Description:

Freedom of the Press, Status (1988-2016):

1. Free
2. Partly Free
3. Not Free

Variable citation: Freedom House. (2017). Freedom of the press 2017. https://freedomhouse.org/report/freedompress/freedom-press-2017

2.11.12.6 Press Freedom Index (rsf_pfi)

Long tag: qog_oecd_cs_rsf_pfi

Original tag: rsf_pfi

Description:

The Press Freedom index measures the amount of freedom journalists and the media have in each country and the efforts made by governments to see that press freedom is respected. It does not take account of all human rights violations, only those that affect press freedom. Neither is it an indicator of the quality of a country's media.

Note: With the exception of the year 2012 the index ranges between 0 (total press freedom) and 100 (no press freedom). However for the 2012 data release RSF changed the scale so that negative values can be and indeed are assigned to countries with more press freedom. We have decided leave the data as is.

Variable citation: Reporters sans frontières. (2021). World press freedom index. https://rsf.org/en/ranking

2.11.12.7 Confidence: The Press (wvs_confpr)

Long tag: qog_oecd_cs_wvs_confpr

Original tag: wvs_confpr

Description:

I am going to name a number of organizations. For each one, could you tell me how much confidence you have in them: The Press

1. None at all
2. Not very much
3. Quite a lot
4. A great deal

Variable citation: Haerpfer, C., Inglehart, R., Moreno, A., Welzel, C., Kizilova, K., Diez-Medrano, J., Lagos, M., Norris, P., Ponarin, E., & et al., B. P. (2021). 2.11.13 Private Economy

This category includes variables characterizing the private sector in a country, inter alia: regulation of the private sector, indicators concerning economic characteristics of groups in the society, such as poverty and household consumption, as well as tax rates.

2.11.13.1 Freedom to Trade Internationally (current) (fi_ftradeint)

Long tag: qog_oecd_cs_fi_ftradeint

Original tag: fi_ftradeint

Description:

The index ranges from 0-10 where 0 corresponds to "increasing tax rate on international trade", "slow import or export process", "small trade sectors relative to the population and geographic size", "exchange rate controls are present and a black-market exists", and "restrictions on the freedom of citizens to engage in capital market exchange with foreigners" and 10 corresponds to "no specific taxes on international trade", "swift import or export process", "large trade sectors relative to the population and geographic size", "no black-market exchange rate", and "no restrictions on the freedom of citizens to engage in capital market exchange with foreigners". The index consists of the following indicators: Taxes on international trade, Regulatory trade barriers, Actual size of trade sector compared to expected size, Difference between official exchange rate and black market rate, and International capital market controls.

Variable citation: Gwartney, J., Lawson, R., Hall, J., Murphy, R., Callais, J. T., Fike, R., Geloso, V., Kahli, N. S., McMahon, F., & van Staden, M. (2021). 2.11.13.3 Economic Freedom of the World Index (current) (fi_index)

Long tag: qog_oecd_cs_fi_index

Original tag: fi_index

Description:

The index is founded upon objective components that reflect the presence (or absence) of economic freedom. The index comprises 21 components designed to identify the consistency of institutional arrangements and policies with economic freedom in five major areas: size of government (fi_sog), legal structure and security of property rights (fi_legprop), access to sound money (fi_sm), freedom to trade internationally (fi_ftradeint), regulation of credit, labor and business (fi_reg). The index ranges from 0-10 where 0 corresponds to "less economic freedom" and 10 to "more economic freedom". This is the version of the index published at the current year of measurement, without taking methodological changes over time into account.

Variable citation: Gwartney, J., Lawson, R., Hall, J., Murphy, R., Callais, J. T., Fike, R., Geloso, V., Kahli, N. S., McMahon, F., & van Staden, M. (2021). 2.11.13.4 Regulation of Credit, Labor and Business (current) (fi_reg)

Long tag: qog_oecd_cs_fi_reg

Original tag: fi_reg

Description:

The index ranges from 0-10 where 0 corresponds to "low percentage of deposits held in privately owned banks", "high foreign bank license denial rate", "private sector's share of credit is close to the base-year-minimum", "deposit and lending rates is fixed by the government and real rates is persistently negative", "high impact of minimum wage", "widespread use of price controls throughout various sectors of the economy", and "starting a new business is generally complicated" and 10 corresponds to "high percentage of deposits held in privately owned banks", "low foreign bank license denial rate", "private sector's share of

credit is close to the base-year-maximum", "interest rates is determined primarily by market forces and the real rates is positive", "low impact of minimum wage", "no price controls or marketing boards", and "starting a new business is generally easy". The index consists of the following indicators: Credit Market Regulations, Labor Market Regulations, Business Regulations.

2.11.13.8 Global Gender Gap Economic Participation and Opportunity Subindex (gggi_pos)

Long tag: qog_oecd_cs_gggi_pos

Original tag: gggi_pos

Description:

Economic Participation and Opportunity (0 to 1, where 1 indicates no gap). This subindex contains three concepts: the participation gap, the remuneration gap and the advancement gap. The participation gap is

captured using the difference between women and men in labour force participation rates. The remuneration gap is captured through a hard data indicator (ratio of estimated female-to-male earned income) and a qualitative indicator gathered through the World Economic Forum's annual Executive Opinion Survey (wage equality for similar work). Finally, the gap between the advancement of women and men is captured through two hard data statistics (the ratio of women to men among legislators, senior officials and managers, and the ratio of women to men among technical and professional workers).

Description:
Purchasing power parities.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. https://doi.org/10.1787/20752288

2.11.13.28 Indices of price levels (oecd_rtsconv_t1b)

Long tag: qog_oecd_cs_oecd_rtsconv_t1b

Original tag: oecd_rtsconv_t1b

Description:
Indices of price levels.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. https://doi.org/10.1787/20752288

2.11.13.29 Taxes on the average worker (oecd_taxapw_t1)

Long tag: qog_oecd_cs_oecd_taxapw_t1

Original tag: oecd_taxapw_t1

Description:
Taxes on the average worker.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. https://doi.org/10.1787/20752288

2.11.13.30 New business density (new registrations per 1,000 people ages 15-64) (wdi_busden)

Long tag: qog_oecd_cs_wdi_busden

Original tag: wdi_busden

Description:
New businesses registered are the number of new limited liability corporations registered in the calendar year.

Variable citation: World Bank. (2021). World development indicators. https://databank.worldbank.org/source/world-development-indicators

2.11.13.31 Ease of doing business index (1=most business-friendly regulations) (wdi_eodb)

Long tag: qog_oecd_cs_wdi_eodb

Original tag: wdi_eodb

Description:
Ease of doing business ranks economies from 1 to 189, with first place being the best. A high ranking (a low numerical rank) means that the regulatory environment is conducive to business operation. The index averages the country's percentile rankings on 10 topics covered in the World Bank's Doing Business. The ranking on each topic is the simple average of the percentile rankings on its component indicators.

Variable citation: World Bank. (2021). World development indicators. https://databank.worldbank.org/source/world-development-indicators

2.11.13.32 Poverty gap at USD 1.90 a day (2011 PPP) (percent) (wdi_povgap190)

Long tag: qog_oecd_cs_wdi_povgap190

Original tag: wdi_povgap190

Description:
Poverty gap at 1.90 dollars a day (2011 PPP) is the mean shortfall in income or consumption from the poverty line 1.90 dollars a day (counting the nonpoor as having zero shortfall), expressed as a percentage of the poverty line. This measure reflects the depth of poverty as well as its incidence. As a result of revisions in PPP exchange rates, poverty rates for individual countries cannot be compared with poverty rates reported in earlier editions. Note: five countries – Bangladesh, Cabo Verde, Cambodia, Jordan, and Lao PDR – use the 2005 PPP conversion factors and corresponding 1.25 dollars a day and 2 dollars a day poverty lines. This is due to the large deviations in the rate of change in PPP factors relative to the rate of change in domestic consumer price indexes. See Box 1.1 in the Global Monitoring Report 2015/2016 (http://www.worldbank.org/en/publication/global-monitoring-report) for a detailed explanation.

Variable citation: World Bank. (2021). World development indicators. https://databank.worldbank.org/source/world-development-indicators

2.11.13.33 Women Business and the Law Index Score (scale 1-100) (wdi_wombuslawi)

Long tag: qog_oecd_cs_wdi_wombuslawi

Original tag: wdi_wombuslawi

Description:
Women Business and the Law Index Score (1-100) measures how laws and regulations affect women's economic opportunity. Overall scores are calculated by taking the average score of each of the eight areas (Going Places, Starting a Job, Getting Paid, Getting Married, Having Children, Running a Business, Managing Assets and Getting a Pension), with 100 representing the highest possible score.

2.11.13.39 Growth of innovative companies. 1-7 (best) (wef_gic)

Long tag: qog_oecd_cs_wef_gic

Original tag: wef_gic

Description:
Growth of innovative companies. 1-7 (best). In your country, to what extent do new companies with innovative ideas grow rapidly? [1 = not at all; 7 = to a great extent] Original sources: World Economic Forum, Executive Opinion Survey

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. `http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf`

2.11.13.40 Intellectual property protection. 1-7 (best) (wef_ipr)

Long tag: qog_oecd_cs_wef_ipr

Original tag: wef_ipr

Description:
Intellectual property protection. 1-7 (best). In your country, to what extent is intellectual property protected? [1 = not at all; 7 = to a great extent] Original sources: World Economic Forum, Executive Opinion Survey

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. `http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf`

2.11.13.41 Extent of market dominance. 1-7 (best) (wef_md)

Long tag: qog_oecd_cs_wef_md

Original tag: wef_md

Description:
Extent of market dominance. 1-7 (best). In your country, how do you characterize corporate activity? [1 = dominated by a few business groups; 7 = spread among many firms] Original sources: World Economic Forum, Executive Opinion Survey

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. `http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf`

2.11.13.42 Property rights. 1-7 (best) (wef_pr)

Long tag: qog_oecd_cs_wef_pr

Original tag: wef_pr

Description:
Property rights. 1-7 (best). In your country, to what extent are property rights, including financial assets, protected? [1 = not at all; 7 = to a great extent] Original sources: World Economic Forum, Executive Opinion Survey

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. `http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf`

2.11.13.43 Financing of SMEs. 1-7 (best) (wef_smec)

Long tag: qog_oecd_cs_wef_smec

Original tag: wef_smec

Description:
Financing of SMEs. 1-7 (best). In your country, to what extent can small- and medium-sized enterprises (SMEs) access finance they need for their business operations through the financial sector? [1 = not at all; 7 = to a great extent] Original sources: World Economic Forum, Executive Opinion Survey

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. `http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf`

2.11.13.44 Venture capital availability. 1-7 (best) (wef_vca)

Long tag: qog_oecd_cs_wef_vca

Original tag: wef_vca

Description:
Venture capital availability. 1-7 (best). In your country, how easy is it for start-up entrepreneurs with innovative but risky projects to obtain equity funding? [1 = extremely difficult; 7 = extremely easy] Original sources: World Economic Forum, Executive Opinion Survey

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden].

2.11.14.7 Net social expenditure (oecd_socexpnd_t1c)

Long tag: qog_oecd_cs_oecd_socexpnd_t1c

Original tag: oecd_socexpnd_t1c

Description:
Net social expenditure.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. `https://doi.org/10.1787/20752288`

2.11.14.8 Sustainable Policies: Social Policies - Overall (sgi_so)

Long tag: qog_oecd_cs_sgi_so

Original tag: sgi_so

Description:
Sustainable Policies: Social Policies (Education, Social Inclusion, Health, Families, Pensions, Integration, Safe Living, Global Inequalities).

Variable citation: Schiller, C., & Hellmann, T. (2020). Sustainable governance indicators 2020 [Date accessed: 12 December 2021]. *Bertelsmann Stiftung*. `https://www.sgi-network.org`

2.11.14.9 Sustainable Policies: Social Policies - Families (sgi_sofa)

Long tag: qog_oecd_cs_sgi_sofa

Original tag: sgi_sofa

Description:
Sustainable Policies: Social Policies - Families (Family Policy, Child Care Density Age 0-2, Child Care Density Age 3-5, Fertility Rate, Child Poverty Rate).

Variable citation: Schiller, C., & Hellmann, T. (2020). Sustainable governance indicators 2020 [Date accessed: 12 December 2021]. *Bertelsmann Stiftung*. `https://www.sgi-network.org`

2.11.14.10 Sustainable Policies: Social Policies - Global Social Inequalities (sgi_sogi)

Long tag: qog_oecd_cs_sgi_sogi

Original tag: sgi_sogi

Description:
Sustainable Policies: Social Policies - Global Inequalities (Global Social Policy, Official Development Assistance (ODA)).

Variable citation: Schiller, C., & Hellmann, T. (2020). Sustainable governance indicators 2020 [Date accessed: 12 December 2021]. *Bertelsmann Stiftung*. `https://www.sgi-network.org`

2.11.14.11 Sustainable Policies: Social Policies - Integration Policy (sgi_soin)

Long tag: qog_oecd_cs_sgi_soin

Original tag: sgi_soin

Description:
Sustainable Policies: Social Policies - Integration (Integration Policy, Foreign-born to Native Upper Secondary Attainment, Foreign-born to Native Tertiary Attainment, Foreign-born to Native Unemployment, Foreign-born to Native Employment).

Variable citation: Schiller, C., & Hellmann, T. (2020). Sustainable governance indicators 2020 [Date accessed: 12 December 2021]. *Bertelsmann Stiftung*. `https://www.sgi-network.org`

2.11.14.12 Sustainable Policies: Social Policies - Pensions (sgi_sope)

Long tag: qog_oecd_cs_sgi_sope

Original tag: sgi_sope

Description:
Sustainable Policies: Social Policies - Pensions (Pension Policy, Older Employment, Old Age Dependency Ratio, Senior Citizen Poverty).

Variable citation: Schiller, C., & Hellmann, T. (2020). Sustainable governance indicators 2020 [Date accessed: 12 December 2021]. *Bertelsmann Stiftung*. `https://www.sgi-network.org`

2.11.14.13 Sustainable Policies: Social Policies - Social Inclusion (sgi_sosi)

Long tag: qog_oecd_cs_sgi_sosi

Original tag: sgi_sosi

Description:
Sustainable Policies: Social Policies - Social Inclusion (Social Inclusion Policy, Poverty Rate, NEET Rate, Gini Coefficient, Gender Equality in Parliaments, Life Satisfaction).

Variable citation: Schiller, C., & Hellmann, T. (2020). Sustainable governance indicators 2020 [Date accessed: 12 December 2021]. *Bertelsmann Stiftung*. `https://www.sgi-network.org`

2.11.14.14 Sustainable Policies: Social Policies - Safe Living Conditions (sgi_sosl)

Long tag: qog_oecd_cs_sgi_sosl

Original tag: sgi_sosl

Description:
Sustainable Policies: Social Policies - Safe Living (Internal Security Policy, Homicides, Thefts, Confidence in Police).

Variable citation: Schiller, C., & Hellmann, T. (2020). Sustainable governance indicators 2020 [Date accessed: 12 December 2021]. *Bertelsmann Stiftung*. `https://www.sgi-network.org`

2.11.15 Gender Equality

This category includes variables related to the differences of access and opportunities between women and men by country, such as access to education, overall employment and employment by specific sectors, and indexes that shine a light on the general differences in treatment between men and women.

2.11.15.1 Gender Inequality Index (0 to 1 higher disparity) (gii_gii)

Long tag: qog_oecd_cs_gii_gii

Original tag: gii_gii

Description:
The GII is an inequality index. It measures gender inequalities in three important aspects of human development-reproductive health, measured by maternal mortality ratio and adolescent birth rates; empowerment, measured by proportion of parliamentary seats occupied by females and proportion of adult females and males aged 25 years and older with at least some secondary education; and economic status, expressed as labour market participation and measured by labour force participation rate of female and male populations aged 15 years and older. The GII is built on the same framework as the IHDI-to better expose differences in the distribution of achievements between women and men. It measures the human development costs of gender inequality. Thus the higher the GII value the more disparities between females and males and the more loss to human development.

Variable citation: United Nations Development Program. (2020a). Gender inequality index. `http://hdr.undp.org/en/content/gender-inequality-index-gii`

2.11.15.2 Men make better political leaders than women do (wvs_menpol)

Long tag: qog_oecd_cs_wvs_menpol

Original tag: wvs_menpol

Description:
Men make better political leaders than women do

Variable citation: Haerpfer, C., Inglehart, R., Moreno, A., Welzel, C., Kizilova, K., Diez-Medrano, J., Lagos, M., Norris, P., Ponarin, E., & et al., B. P. (2021). 2.11.16 History

This category includes variables related to historical phenomena or situations, for example colonial origin, legal origin and GDP per capita in the year 1500.

2.11.16.1 Colonial Origin (ht_colonial)

Long tag: qog_oecd_cs_ht_colonial

Original tag: ht_colonial

Description:
This is a tenfold classification of the former colonial ruler of the country. Following Bernard et al. (2004), we have excluded the British settler colonies (the US, Canada, Australia, Israel and New Zealand), and exclusively focused on "Western overseas" colonialism. This implies that only Western colonizers (e.g.

excluding Japanese colonialism), and only countries located in the non-Western hemisphere "overseas" (e.g. excluding Ireland
Malta), have been coded. Each country that has been colonized since 1700 is coded. In cases of several colonial powers, the last one is counted, if it lasted for 10 years or longer. The categories are the following:

0. Never colonized by a Western overseas colonial power
1. Dutch
2. Spanish
3. Italian
4. US
5. British
6. French
7. Portuguese
8. Belgian
9. British-French
10. Australian

2.11.17.16 Age dependency ratio (percent of working-age pop.) (wdi_agedr)

Long tag: qog_oecd_cs_wdi_agedr

Original tag: wdi_agedr

Description:
Age dependency ratio is the ratio of dependents–people younger than 15 or older than 64–to the working-age population–those ages 15-64. Data are shown as the proportion of dependents per 100 working-age population.

Variable citation: World Bank. (2021). World development indicators. https://databank.worldbank.org/source/world-development-indicators

2.11.17.17 Employers, total (percent of total employment) (modeled ILO) (wdi_emp)

Long tag: qog_oecd_cs_wdi_emp

Original tag: wdi_emp

Description:
Employers are those workers who, working on their own account or with one or a few partners, hold the type of jobs defined as a "self-employment jobs" i.e. jobs where the remuneration is directly dependent upon the profits derived from the goods and services produced, and, in this capacity, have engaged, on a continuous basis, one or more persons to work for them as employee(s). Modeled ILO estimate.

Variable citation: World Bank. (2021). World development indicators. https://databank.worldbank.org/source/world-development-indicators

2.11.17.18 Employment in agriculture (percent of total employment) (modeled ILO) (wdi_empagr)

Long tag: qog_oecd_cs_wdi_empagr

Original tag: wdi_empagr

Description:

Employment in agriculture as a percentage of all employment. Employment is defined as persons of working age who were engaged in any activity to produce goods or provide services for pay or profit, whether at work during the reference period or not at work due to temporary absence from a job, or to working-time arrangement. The agriculture sector consists of activities in agriculture, hunting, forestry and fishing, in accordance with division 1 (ISIC 2) or categories A-B (ISIC 3) or category A (ISIC 4). Modeled ILO estimate.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.17.19 Employment in agriculture, female (percent female employment) (modeled ILO) (wdi_empagrf)

Long tag: qog_oecd_cs_wdi_empagrf

Original tag: wdi_empagrf

Description:

Female employment in agriculture as a percentage of all female employment. Employment is defined as persons of working age who were engaged in any activity to produce goods or provide services for pay or profit, whether at work during the reference period or not at work due to temporary absence from a job, or to working-time arrangement. The agriculture sector consists of activities in agriculture, hunting, forestry and fishing, in accordance with division 1 (ISIC 2) or categories A-B (ISIC 3) or category A (ISIC 4). Modeled ILO estimate.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.17.20 Employment in agriculture, male (percent male employment) (modeled ILO) (wdi_empagrm)

Long tag: qog_oecd_cs_wdi_empagrm

Original tag: wdi_empagrm

Description:

Male employment in agriculture as a percentage of all male employment. Employment is defined as persons of working age who were engaged in any activity to produce goods or provide services for pay or profit, whether at work during the reference period or not at work due to temporary absence from a job, or to working-time arrangement. The agriculture sector consists of activities in agriculture, hunting, forestry and fishing, in accordance with division 1 (ISIC 2) or categories A-B (ISIC 3) or category A (ISIC 4). Modeled ILO estimate.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.17.21 Employers, female (percent of female employment) (modeled ILO) (wdi_empf)

Long tag: qog_oecd_cs_wdi_empf

Original tag: wdi_empf

Description:

Employers refers are those workers who, working on their own account or with one or a few partners, hold the type of jobs defined as a "self-employment jobs" i.e. jobs where the remuneration is directly dependent upon the profits derived from the goods and services produced, and, in this capacity, have engaged, on a continuous basis, one or more persons to work for them as employee(s). Modeled ILO estimate.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.17.22 Employment in industry (percent of total employment) (modeled ILO) (wdi_empind)

Long tag: qog_oecd_cs_wdi_empind

Original tag: wdi_empind

Description:

Employment in industry as a percentage of all employment. Employment is defined as persons of working age who were engaged in any activity to produce goods or provide services for pay or profit, whether at work during the reference period or not at work due to temporary absence from a job, or to working-time arrangement. The industry sector consists of mining and quarrying, manufacturing, construction, and public utilities (electricity, gas, and water), in accordance with divisions 2-5 (ISIC 2) or categories C-F (ISIC 3) or

categories B-F (ISIC 4). Modeled ILO estimate.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.17.23 Employment in industry, female (percent female employment) (modeled ILO) (wdi_empindf)

Long tag: qog_oecd_cs_wdi_empindf

Original tag: wdi_empindf

Description:

Female employment in industry as a percentage of all female employment. Employment is defined as persons of working age who were engaged in any activity to produce goods or provide services for pay or profit, whether at work during the reference period or not at work due to temporary absence from a job, or to working-time arrangement. The industry sector consists of mining and quarrying, manufacturing, construction, and public utilities (electricity, gas, and water), in accordance with divisions 2-5 (ISIC 2) or categories C-F (ISIC 3) or categories B-F (ISIC 4). Modeled ILO estimate.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.17.24 Employment in industry, male (percent of male employment) (modeled ILO) (wdi_empindm)

Long tag: qog_oecd_cs_wdi_empindm

Original tag: wdi_empindm

Description:

Male employment in industry as a percentage of all male employment. Employment is defined as persons of working age who were engaged in any activity to produce goods or provide services for pay or profit, whether at work during the reference period or not at work due to temporary absence from a job, or to working-time arrangement. The industry sector consists of mining and quarrying, manufacturing, construction, and public utilities (electricity, gas, and water), in accordance with divisions 2-5 (ISIC 2) or categories C-F (ISIC 3) or categories B-F (ISIC 4). Modeled ILO estimate.

Description:

Employment to population ratio, ages 15-24, total (percent) (National estimation). Employment to population ratio is the proportion of a country's population that is employed. Ages 15-24 are generally considered the youth population.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.17.38 Employment in services (percent of total employment) (modeled ILO) (wdi_empser)

Long tag: qog_oecd_cs_wdi_empser

Original tag: wdi_empser

Description:

Total employment in services as percentage of total employment. Employment is defined as persons of working age who were engaged in any activity to produce goods or provide services for pay or profit, whether at work during the reference period or not at work due to temporary absence from a job, or to working-time arrangement. The services sector consists of wholesale and retail trade and restaurants and hotels; transport, storage, and communications; financing, insurance, real estate, and business services; and community, social, and personal services, in accordance with divisions 6-9 (ISIC 2) or categories G-Q (ISIC 3) or categories G-U (ISIC 4). Modeled ILO estimate.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.17.39 Employment in services, female (percent of female employment) (modeled ILO) (wdi_empserf)

Long tag: qog_oecd_cs_wdi_empserf

Original tag: wdi_empserf

Description:

Female employment in services (percent of female employment). Employment is defined as persons of working age who were engaged in any activity to produce goods or provide services for pay or profit, whether at work during the reference period or not at work due to temporary absence from a job, or to working-time arrangement. The services sector consists of wholesale and retail trade and restaurants and hotels; transport, storage, and communications; financing, insurance, real estate, and business services; and community, social, and personal services, in accordance with divisions 6-9 (ISIC 2) or categories G-Q (ISIC 3) or categories G-U (ISIC 4). Modeled ILO estimate.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.17.40 Employment in services, male (percent of male employment) (modeled ILO) (wdi_empserm)

Long tag: qog_oecd_cs_wdi_empserm

Original tag: wdi_empserm

Description:

Male employment in services (percent of male employment). Employment is defined as persons of working age who were engaged in any activity to produce goods or provide services for pay or profit, whether at work during the reference period or not at work due to temporary absence from a job, or to working-time arrangement. The services sector consists of wholesale and retail trade and restaurants and hotels; transport, storage, and communications; financing, insurance, real estate, and business services; and community, social, and personal services, in accordance with divisions 6-9 (ISIC 2) or categories G-Q (ISIC 3) or categories G-U (ISIC 4). Modeled ILO estimate.

Description:

The percentage of the labor force with an advanced level of education who are unemployed. Advanced

education comprises short-cycle tertiary education, a bachelor's degree or equivalent education level, a master's degree or equivalent education level, or doctoral degree or equivalent education level according to the International Standard Classification of Education 2011 (ISCED 2011). Male.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.17.75 Unemployment with basic education (percent of total labor force) (wdi_unempedub)

Long tag: qog_oecd_cs_wdi_unempedub

Original tag: wdi_unempedub

Description:

The percentage of the labor force with a basic level of education who are unemployed. Basic education comprises primary education or lower secondary education according to the International Standard Classification of Education 2011 (ISCED 2011).

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.17.76 Unemployment with basic education (percent of female labor force) (wdi_unempedubf)

Long tag: qog_oecd_cs_wdi_unempedubf

Original tag: wdi_unempedubf

Description:

The percentage of the labor force with a basic level of education who are unemployed. Basic education comprises primary education or lower secondary education according to the International Standard Classification of Education 2011 (ISCED 2011). Female.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.17.77 Unemployment with basic education (percent of male labor force) (wdi_unempedubm)

Long tag: qog_oecd_cs_wdi_unempedubm

Original tag: wdi_unempedubm

Description:

The percentage of the labor force with a basic level of education who are unemployed. Basic education comprises primary education or lower secondary education according to the International Standard Classification of Education 2011 (ISCED 2011). Male.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.17.78 Unemployment with intermediate education (percent of total labor force) (wdi_unempedui)

Long tag: qog_oecd_cs_wdi_unempedui

Original tag: wdi_unempedui

Description:

The percentage of the labor force with an intermediate level of education who are unemployed. Intermediate education comprises upper secondary or post-secondary non tertiary education according to the International Standard Classification of Education 2011 (ISCED 2011).

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.17.79 Unemployment with intermediate education (percent of female labor force) (wdi_unempeduif)

Long tag: qog_oecd_cs_wdi_unempeduif

Original tag: wdi_unempeduif

Description:

The percentage of the labor force with an intermediate level of education who are unemployed. Intermediate education comprises upper secondary or post-secondary non tertiary education according to the International Standard Classification of Education 2011 (ISCED 2011). Female.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.17.80 Unemployment with intermediate education (percent of male labor force) (wdi_unempeduim)

Long tag: qog_oecd_cs_wdi_unempeduim

Original tag: wdi_unempeduim

Description:

The percentage of the labor force with an intermediate level of education who are unemployed. Intermediate education comprises upper secondary or post-secondary non tertiary education according to the International Standard Classification of Education 2011 (ISCED 2011). Male.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.17.81 Unemployment, female (percent of female labor force) (modeled ILO) (wdi_unempfilo)

Long tag: qog_oecd_cs_wdi_unempfilo

Original tag: wdi_unempfilo

Description:

Unemployment refers to the share of the labor force that is without work but available for and seeking employment. Female.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.17.82 Unemployment, female (percent of female labor force) (national est.) (wdi_unempfne)

Long tag: qog_oecd_cs_wdi_unempfne

Original tag: wdi_unempfne

Description:

Unemployment refers to the share of the labor force that is without work but available for and seeking employment. Definitions of labor force and unemployment differ by country. Female.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.17.83 Unemployment, total (percent of total labor force) (modeled ILO) (wdi_unempilo)

Long tag: qog_oecd_cs_wdi_unempilo

Original tag: wdi_unempilo

Description:

Unemployment refers to the share of the labor force that is without work but available for and seeking employment. Total.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.17.84 Unemployment, male (percent of male labor force) (modeled ILO) (wdi_unempmilo)

Long tag: qog_oecd_cs_wdi_unempmilo

Original tag: wdi_unempmilo

Description:

Unemployment refers to the share of the labor force that is without work but available for and seeking employment. Male.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.17.85 Unemployment, male (percent of male labor force) (national est.) (wdi_unempmne)

Long tag: qog_oecd_cs_wdi_unempmne

Original tag: wdi_unempmne

Description:
Unemployment refers to the share of the labor force that is without work but available for and seeking employment. Definitions of labor force and unemployment differ by country. Male.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.17.86 Unemployment, total (percent of total labor force) (national est.) (wdi_unempne)

Long tag: qog_oecd_cs_wdi_unempne

Original tag: wdi_unempne

Description:
Unemployment refers to the share of the labor force that is without work but available for and seeking employment. Definitions of labor force and unemployment differ by country. Total.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.17.87 Unemployment, youth female (percent of female labor force 15-24) (modeled ILO) (wdi_unempyfilo)

Long tag: qog_oecd_cs_wdi_unempyfilo

Original tag: wdi_unempyfilo

Description:
Youth unemployment refers to the share of the labor force ages 15-24 without work but available for and seeking employment.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.17.88 Unemployment, youth female (percent of female labor force 15-24) (nation est.) (wdi_unempyfne)

Long tag: qog_oecd_cs_wdi_unempyfne

Original tag: wdi_unempyfne

Description:
Youth unemployment refers to the share of the labor force ages 15-24 without work but available for and seeking employment. Definitions of labor force and unemployment differ by country.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.17.89 Unemployment, youth total (percent of total labor force 15-24) (modeled ILO) (wdi_unempyilo)

Long tag: qog_oecd_cs_wdi_unempyilo

Original tag: wdi_unempyilo

Description:
Youth unemployment refers to the share of the labor force ages 15-24 without work but available for and seeking employment.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.17.90 Unemployment, youth male (percent of male labor force 15-24) (modeled ILO) (wdi_unempymilo)

Long tag: qog_oecd_cs_wdi_unempymilo

Original tag: wdi_unempymilo

Description:
Youth unemployment refers to the share of the labor force ages 15-24 without work but available for and seeking employment.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.17.91 Unemployment, youth male (percent of male labor force 15-24) (national est.) (wdi_unempymne)

Long tag: qog_oecd_cs_wdi_unempymne

Original tag: wdi_unempymne

Description:
Youth unemployment refers to the share of the labor force ages 15-24 without work but available for and seeking employment. Definitions of labor force and unemployment differ by country.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.17.92 Unemployment, youth total (percent of total labor force 15-24) (national est.) (wdi_unempyne)

Long tag: qog_oecd_cs_wdi_unempyne

Original tag: wdi_unempyne

Description:
Youth unemployment refers to the share of the labor force ages 15-24 without work but available for and seeking employment. Definitions of labor force and unemployment differ by country.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.17.93 Active labour market policies. 1-7 (best) (wef_alp)

Long tag: qog_oecd_cs_wef_alp

Original tag: wef_alp

Description:
Active labour policies. 1-7 (best). In your country, to what extent do Labour market policies help unemployed people to reskill and find new employment (including skills matching, retraining, etc.)? [1 = not at all; 7 = to a great extent] Original sources: World Economic Forum, Executive Opinion Survey

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. `http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf`

2.11.17.94 Ease of finding skilled employees. 1-7 (best) (wef_efs)

Long tag: qog_oecd_cs_wef_efs

Original tag: wef_efs

Description:
Ease of finding skilled employees. 1-7 (best). In your country, to what extent can companies find people with the skills required to fill their vacancies? [1 = not at all; 7 = to a great extent] Original sources: World Economic Forum, Executive Opinion Survey

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. `http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf`

2.11.17.95 Ease of hiring foreign labour. 1-7 (best) (wef_hfl)

Long tag: qog_oecd_cs_wef_hfl

Original tag: wef_hfl

Description:
Ease of hiring foreign labour. 1-7 (best). To what extent does labour regulation in your country limit the ability to hire foreign labour? (1 = very much limits hiring foreign labour, 7 = does not limit hiring foreign labour at all) Original sources: World Economic Forum, Executive Opinion Survey

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. `http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf`

2.11.17.96 Hiring and firing practices. 1-7 (best) (wef_hfp)

Long tag: qog_oecd_cs_wef_hfp

Original tag: wef_hfp

Description:
Hiring and firing practices. 1-7 (best). In your country, to what extent do regulations allow flexible hiring and firing of workers? [1 = not at all; 7 = to a great extent] Original sources: World Economic Forum, Executive Opinion Survey

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf

2.11.17.97 Cooperation in labour-employer relations. 1-7 (best) (wef_ler)

Long tag: qog_oecd_cs_wef_ler

Original tag: wef_ler

Description:

Cooperation in Labour-employer relations. 1-7 (best). In your country, how do you characterize Labour-employer relations? [1 = generally confrontational; 7 = generally cooperative] Original sources: World Economic Forum, Executive Opinion Survey

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf

2.11.17.98 Flexibility of wage determination. 1-7 (best) (wef_wbp)

Long tag: qog_oecd_cs_wef_wbp

Original tag: wef_wbp

Description:

Flexibility of wage determination. 1-7 (best). In your country, how are wages generally set? [1 = by a centralized bargaining process; 7 = by each individual company] Original sources: World Economic Forum, Executive Opinion Survey

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf

2.11.17.99 Ratio of wage and salaried female workers to male workers (wef_wlf)

Long tag: qog_oecd_cs_wef_wlf

Original tag: wef_wlf

Description:

Ratio of wage and salaried female workers to male workers. Ratio. The ratio of the percentage of women aged 15-64 participating in the labour force as wage and salaried workers to the percentage of men aged 15-64 participating in the labour force as wage and salaried workers. Original sources: International Labour Organization (ILO), World Economic Forum.

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf

2.11.17.100 Confidence: Labour Unions (wvs_conflu)

Long tag: qog_oecd_cs_wvs_conflu

Original tag: wvs_conflu

Description:

I am going to name a number of organizations. For each one, could you tell me how much confidence you have in them: Labour Unions

1. None at all
2. Not very much
3. Quite a lot
4. A great deal

Variable citation: Haerpfer, C., Inglehart, R., Moreno, A., Welzel, C., Kizilova, K., Diez-Medrano, J., Lagos, M., Norris, P., Ponarin, E., & et al., B. P. (2021). 2.11.18 Energy and Infrastructure

This category includes indicators that cover descriptions of different energy sources (production, con- sumption and trade) and variables related to quality and quantity of different sectors of infrastructure (transportation and communication).

2.11.18.1 Real value added: industry including energy (oecd_evova_t1b)

Long tag: qog_oecd_cs_oecd_evova_t1b

Original tag: oecd_evova_t1b

Description:
Real value added in industry including energy.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. `https://doi.org/10.1787/20752288`

2.11.18.2 Production of crude oil (oecd_oilprod_t1)

Long tag: qog_oecd_cs_oecd_oilprod_t1

Original tag: oecd_oilprod_t1

Description:
Production of crude oil.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. `https://doi.org/10.1787/20752288`

2.11.18.3 Contribution of renewables to energy supply (oecd_rnewable_t1)

Long tag: qog_oecd_cs_oecd_rnewable_t1

Original tag: oecd_rnewable_t1

Description:
Contribution of renewables to energy supply.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. `https://doi.org/10.1787/20752288`

2.11.18.4 Total primary energy supply per unit of GDP (oecd_tpes_t1)

Long tag: qog_oecd_cs_oecd_tpes_t1

Original tag: oecd_tpes_t1

Description:
Total primary energy supply per unit of GDP.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. `https://doi.org/10.1787/20752288`

2.11.18.5 Generation intensities of municipal waste (oecd_waste_t1a)

Long tag: qog_oecd_cs_oecd_waste_t1a

Original tag: oecd_waste_t1a

Description:
Generation intensities of municipal waste.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. `https://doi.org/10.1787/20752288`

2.11.18.6 Electricity generation (oecd_welecgen_t1)

Long tag: qog_oecd_cs_oecd_welecgen_t1

Original tag: oecd_welecgen_t1

Description:
Electricity generation.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. `https://doi.org/10.1787/20752288`

2.11.18.7 Total primary energy supply (oecd_wenergys_t1)

Long tag: qog_oecd_cs_oecd_wenergys_t1

Original tag: oecd_wenergys_t1

Description:
Total primary energy supply.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. `https://doi.org/10.1787/20752288`

2.11.18.8 Access to electricity (percent of population) (wdi_acel)

Long tag: qog_oecd_cs_wdi_acel

Original tag: wdi_acel

Description:
Access to electricity is the percentage of population with access to electricity. Electrification data are collected from industry, national surveys and international sources.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.18.9 Access to electricity, rural (percent of rural population) (wdi_acelr)

Long tag: qog_oecd_cs_wdi_acelr

Original tag: wdi_acelr

Description:
Access to electricity, rural is the percentage of rural population with access to electricity.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.18.10 Access to electricity, urban (percent of urban population) (wdi_acelu)

Long tag: qog_oecd_cs_wdi_acelu

Original tag: wdi_acelu

Description:
Access to electricity, urban is the percentage of urban population with access to electricity.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.18.11 Alternative and nuclear energy (percent of total energy use) (wdi_ane)

Long tag: qog_oecd_cs_wdi_ane

Original tag: wdi_ane

Description:
Clean energy is noncarbohydrate energy that does not produce carbon dioxide when generated. It includes hydropower and nuclear, geothermal, and solar power, among others.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.18.12 Fixed broadband subscriptions (per 100 people) (wdi_broadb)

Long tag: qog_oecd_cs_wdi_broadb

Original tag: wdi_broadb

Description:

Fixed broadband subscriptions refers to fixed subscriptions to high-speed access to the public Internet (a TCP/IP connection), at downstream speeds equal to, or greater than, 256 kbit/s. This includes cable modem, DSL, fiber-to-the-home/building, other fixed (wired)-broadband subscriptions, satellite broadband and terrestrial fixed wireless broadband. This total is measured irrespective of the method of payment. It excludes subscriptions that have access to data communications (including the Internet) via mobile-cellular networks. It should include fixed WiMAX and any other fixed wireless technologies. It includes both residential subscriptions and subscriptions for organizations.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.18.13 Renewable electricity output (percent of total electricity output) (wdi_elerenew)

Long tag: qog_oecd_cs_wdi_elerenew

Original tag: wdi_elerenew

Description:

Renewable electricity is the share of electrity generated by renewable power plants in total electricity generated by all types of plants.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.18.14 Electricity production from coal sources (percent of total) (wdi_elprodcoal)

Long tag: qog_oecd_cs_wdi_elprodcoal

Original tag: wdi_elprodcoal

Description:

Sources of electricity refer to the inputs used to generate electricity. Coal refers to all coal and brown coal, both primary (including hard coal and lignite-brown coal) and derived fuels (including patent fuel, coke oven coke, gas coke, coke oven gas, and blast furnace gas). Peat is also included in this category.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.18.15 Electricity production from natural gas sources (percent of total) (wdi_elprodgas)

Long tag: qog_oecd_cs_wdi_elprodgas

Original tag: wdi_elprodgas

Description:

Sources of electricity refer to the inputs used to generate electricity. Gas refers to natural gas but excludes natural gas liquids.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.18.16 Electricity production from hydroelectric sources (percent of total) (wdi_elprodhyd)

Long tag: qog_oecd_cs_wdi_elprodhyd

Original tag: wdi_elprodhyd

Description:

Sources of electricity refer to the inputs used to generate electricity. Hydropower refers to electricity produced by hydroelectric power plants.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.18.17 Electricity production from nuclear sources (percent of total) (wdi_elprodnuc)

Long tag: qog_oecd_cs_wdi_elprodnuc

Original tag: wdi_elprodnuc

Description:
Sources of electricity refer to the inputs used to generate electricity. Nuclear power refers to electricity produced by nuclear power plants.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.18.18 Electricity production from oil sources (percent of total) (wdi_elprodoil)

Long tag: qog_oecd_cs_wdi_elprodoil

Original tag: wdi_elprodoil

Description:
Sources of electricity refer to the inputs used to generate electricity. Oil refers to crude oil and petroleum products.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.18.19 Energy imports, net (percent of energy use) (wdi_eneimp)

Long tag: qog_oecd_cs_wdi_eneimp

Original tag: wdi_eneimp

Description:
Net energy imports are estimated as energy use less production, both measured in oil equivalents. A negative value indicates that the country is a net exporter. Energy use refers to use of primary energy before transformation to other end-use fuels, which is equal to indigenous production plus imports and stock changes, minus exports and fuels supplied to ships and aircraft engaged in international transport.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.18.20 Renewable energy consumption (percent of total final energy consumption) (wdi_enerenew)

Long tag: qog_oecd_cs_wdi_enerenew

Original tag: wdi_enerenew

Description:
Renewable energy consumption is the share of renewables energy in total final energy consumption.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.18.21 Energy use (kg of oil equivalent per capita) (wdi_eneuse)

Long tag: qog_oecd_cs_wdi_eneuse

Original tag: wdi_eneuse

Description:
Energy use refers to use of primary energy before transformation to other end-use fuels, which is equal to indigenous production plus imports and stock changes, minus exports and fuels supplied to ships and aircraft engaged in international transport.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.18.22 Fossil fuel energy consumption (percent of total) (wdi_fossil)

Long tag: qog_oecd_cs_wdi_fossil

Original tag: wdi_fossil

Description:
Fossil fuel comprises coal, oil, petroleum, and natural gas products.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.18.23 Individuals using the Internet (percent of population) (wdi_internet)

Long tag: qog_oecd_cs_wdi_internet

Original tag: wdi_internet

Description:
Internet users are individuals who have used the Internet (from any location) in the last 3 months. The

Internet can be used via a computer, mobile phone, personal digital assistant, games machine, digital TV etc.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.18.24 Mobile cellular subscriptions (per 100 people) (wdi_mobile)

Long tag: qog_oecd_cs_wdi_mobile

Original tag: wdi_mobile

Description:

Mobile cellular telephone subscriptions are subscriptions to a public mobile telephone service that provide access to the PSTN using cellular technology. The indicator includes (and is split into) the number of postpaid subscriptions, and the number of active prepaid accounts (i.e. that have been used during the last three months). The indicator applies to all mobile cellular subscriptions that offer voice communications. It excludes subscriptions via data cards or USB modems, subscriptions to public mobile data services, private trunked mobile radio, telepoint, radio paging and telemetry services.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.18.25 Oil rents (percent of GDP) (wdi_oilrent)

Long tag: qog_oecd_cs_wdi_oilrent

Original tag: wdi_oilrent

Description:

Oil rents are the difference between the value of crude oil production at world prices and total costs of production.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.18.26 Fixed telephone subscriptions (per 100 people) (wdi_tele)

Long tag: qog_oecd_cs_wdi_tele

Original tag: wdi_tele

Description:

Fixed telephone subscriptions refers to the sum of active number of analogue fixed telephone lines, voice-over-IP (VoIP) subscriptions, fixed wireless local loop (WLL) subscriptions, ISDN voice-channel equivalents and fixed public payphones.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.18.27 Efficiency of air transport services. 1-7 (best) (wef_eair)

Long tag: qog_oecd_cs_wef_eair

Original tag: wef_eair

Description:

Efficiency of air transport services. 1-7 (best). In your country, how efficient (i.e., frequency, punctuality, speed, price) are air transport services? [1 = extremely inefficient-among the worst in the world; 7 = extremely efficient-among the best in the world] Original sources: World Economic Forum, Executive Opinion Survey

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. `http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf`

2.11.18.28 Electricity. 0-100 (best) (wef_elec)

Long tag: qog_oecd_cs_wef_elec

Original tag: wef_elec

Description:

Electricity. 0-100 (best). This indicator is calculated by the World Economic Forum by aggregating two indicators that measure the electrification rate and electric power transmission and distribution losses. For more information, write to gcp@weforum.org.

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. `http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf`

2.11.18.29 Percentage of population with access to electricity percent pop. (wef_elr)

Long tag: qog_oecd_cs_wef_elr

Original tag: wef_elr

Description:

Electricity access entails a household having initial access to sufficient electricity to power a basic bundle of energy services-at a minimum, several lightbulbs, task lighting (such as a flashlight), phone.

Sources: International Energy Agency, World Energy Outlook 2018 (https://www.iea.org/weo2018/); The World Bank Group, Sustainable Energy for All database (https://datacatalog.worldbank.org/dataset/sustainable-energy-all, accessed 21 March 2019); national sources.

2.11.18.30 Efficiency of seaport services. 1-7 (best) (wef_eport)

Long tag: qog_oecd_cs_wef_eport

Original tag: wef_eport

Description:

Efficiency of seaport services. 1-7 (best). In your country, how efficient (i.e., frequency, punctuality, speed, price) are seaport services (ferries, boats) (for landlocked countries: assess access to seaport services) [1 = extremely inefficient-among the worst in the world; 7 = extremely efficient-among the best in the world] Original sources: World Economic Forum, Executive Opinion Survey

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. `http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf`

2.11.18.31 Efficiency of train services. 1-7 (best) (wef_erail)

Long tag: qog_oecd_cs_wef_erail

Original tag: wef_erail

Description:

Efficiency of train services. 1-7 (best). In your country, how efficient (i.e., frequency, punctuality, speed, price) are train transport services? [1 = extremely inefficient-among the worst in the world; 7 = extremely efficient-among the best in the world] Original sources: World Economic Forum, Executive Opinion Survey

2.11.18.32 Fixed-broadband Internet subscriptions/100 pop. (wef_fis)

Long tag: qog_oecd_cs_wef_fis

Original tag: wef_fis

Description:

Fixed-broadband Internet subscriptions. Fixed-broadband Internet subscriptions per 100 population Original sources: International Telecommunications Union (ITU)

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. `http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf`

2.11.18.33 Internet users. percent pop. (wef_iu)

Long tag: qog_oecd_cs_wef_iu

Original tag: wef_iu

Description:

Percentage of individuals using the Internet. Original sources: International Telecommunications Union (ITU)

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. `http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf`

2.11.18.34 Mobile-cellular telephone subscriptions/100 pop. (wef_mobile)

Long tag: qog_oecd_cs_wef_mobile

Original tag: wef_mobile

Description:
Mobile-cellular telephone subscriptions. Number of mobile-cellular telephone subscriptions per 100 population. Original sources: International Telecommunications Union (ITU)

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. `http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf`

2.11.18.35 Transport infrastructure. 0-100 (best) (wef_qoi)

Long tag: qog_oecd_cs_wef_qoi

Original tag: wef_qoi

Description:
Transport infrastructure. 0-100 (best). This indicator is calculated by the World Economic Forum by aggregating eight indicators that measure roads, railroads, air transport and water transport infrastructure. For more information, write to gcp@weforum.org. Original sources: World Economic Forum, Global Competitiveness Report 2018

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. `http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf`

2.11.18.36 Quality of road infrastructure. 1-7 (best) (wef_qroad)

Long tag: qog_oecd_cs_wef_qroad

Original tag: wef_qroad

Description:
Quality of roads. 1-7 (best). In your country, how is the quality (extensiveness and condition) of road infrastructure [1 = extremely poor-among the worst in the world; 7 = extremly good-among the best in the world]. Original sources: World Economic Forum, Executive Opinion Survey

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. `http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf`

2.11.18.37 Water. 0-100 (best) (wef_wi)

Long tag: qog_oecd_cs_wef_wi

Original tag: wef_wi

Description:
Water infrastructure. 0-100 (best). Original sources: World Economic Forum, Global Competitiveness Report 2018

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. `http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf`

2.11.19 Migration

This category includes indicators related to migratory phenomena such as immigration rates, level of education, brain drain, and refugee population.

2.11.19.1 Inward Remittances Flow, current (nominal) US dollar million (rd_inw)

Long tag: qog_oecd_cs_rd_inw

Original tag: rd_inw

Description:
Inward Remittances Flow, current (nominal) US dollar million.

Variable citation: The World Bank. (2021a). Remittances data. `https://datacatalog.worldbank.org/search/dataset/0038132`

2.11.19.2 Outward Remittances Flow, current (nominal) US dollar million (rd_outw)

Long tag: qog_oecd_cs_rd_outw

Original tag: rd_outw

Description:
Outward Remittances Flow, current (nominal) US dollar million.

Variable citation: The World Bank. (2021a). Remittances data. `https://datacatalog.worldbank.org/search/dataset/0038132`

2.11.19.3 International migrant stock (percent of population) (wdi_imig)

Long tag: qog_oecd_cs_wdi_imig

Original tag: wdi_imig

Description:

International migrant stock is the number of people born in a country other than that in which they live. It also includes refugees. The data used to estimate the international migrant stock at a particular time are obtained mainly from population censuses. The estimates are derived from the data on foreign-born population–people who have residence in one country but were born in another country. When data on the foreign-born population are not available, data on foreign population–that is, people who are citizens of a country other than the country in which they reside–are used as estimates. After the breakup of the Soviet Union in 1991 people living in one of the newly independent countries who were born in another were classified as international migrants. Estimates of migrant stock in the newly independent states from 1990 on are based on the 1989 census of the Soviet Union. For countries with information on the international migrant stock for at least two points in time, interpolation or extrapolation was used to estimate the international migrant stock on July 1 of the reference years. For countries with only one observation, estimates for the reference years were derived using rates of change in the migrant stock in the years preceding or following the single observation available. A model was used to estimate migrants for countries that had no data.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.19.4 Net migration (wdi_migration)

Long tag: qog_oecd_cs_wdi_migration

Original tag: wdi_migration

Description:

Net migration is the net total of migrants during the period, that is, the total number of immigrants less the annual number of emigrants, including both citizens and noncitizens. Data are five-year estimates.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.19.5 Refugee population by country or territory of asylum (wdi_refasy)

Long tag: qog_oecd_cs_wdi_refasy

Original tag: wdi_refasy

Description:

Refugees are people who are recognized as refugees under the 1951 Convention Relating to the Status of Refugees or its 1967 Protocol, the 1969 Organization of African Unity Convention Governing the Specific Aspects of Refugee Problems in Africa, people recognized as refugees in accordance with the UNHCR statute, people granted refugee-like humanitarian status, and people provided temporary protection. Asylum seekers–people who have applied for asylum or refugee status and who have not yet received a decision or who are registered as asylum seekers–are excluded. Palestinian refugees are people (and their descendants) whose residence was Palestine between June 1946 and May 1948 and who lost their homes and means of livelihood as a result of the 1948 Arab-Israeli conflict. Country of asylum is the country where an asylum claim was filed and granted.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.19.6 Refugee population by country or territory of origin (wdi_refori)

Long tag: qog_oecd_cs_wdi_refori

Original tag: wdi_refori

Description:

Refugees are people who are recognized as refugees under the 1951 Convention Relating to the Status of Refugees or its 1967 Protocol, the 1969 Organization of African Unity Convention Governing the Specific Aspects of Refugee Problems in Africa, people recognized as refugees in accordance with the UNHCR statute, people granted refugee-like humanitarian status, and people provided temporary protection. Asylum seekers–people who have applied for asylum or refugee status and who have not yet received a decision or who are registered as asylum seekers–are excluded. Palestinian refugees are people (and their descendants) whose residence was Palestine between June 1946 and May 1948 and who lost their homes and means of livelihood as a result of the 1948 Arab-Israeli conflict. Country of origin generally refers to the nationality or country of citizenship of a claimant.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.11.20 Religion

This category includes variables regarding numbers of followers of specific religions and the status of religion in the constitution.

2.11.20.1 Confidence: Churches (wvs_confch)

Long tag: qog_oecd_cs_wvs_confch

Original tag: wvs_confch

Description:

I am going to name a number of organizations. For each one, could you tell me how much confidence you have in them: Churches

1. None at all
2. Not very much
3. Quite a lot
4. A great deal

Variable citation: Haerpfer, C., Inglehart, R., Moreno, A., Welzel, C., Kizilova, K., Diez-Medrano, J., Lagos, M., Norris, P., Ponarin, E., & et al., B. P. (2021). 2.11.20.3 How important is God in your life (wvs_godimp)

Long tag: qog_oecd_cs_wvs_godimp

Original tag: wvs_godimp

Description:

How important is God in your life?

1. Not at all important
2.
3.
4.
5.
6.
7.
8.
9.
10. Very important

Variable citation: Haerpfer, C., Inglehart, R., Moreno, A., Welzel, C., Kizilova, K., Diez-Medrano, J., Lagos, M., Norris, P., Ponarin, E., & et al., B. P. (2021). 2.11.20.4 Important in life: Religion (wvs_imprel)

Long tag: qog_oecd_cs_wvs_imprel

Original tag: wvs_imprel

Description:
For each of the following, indicate how important it is in your life. Would you say it is: Religion

1. Not at all important
2. Not very important
3. Rather important
4. Very important

Variable citation: Haerpfer, C., Inglehart, R., Moreno, A., Welzel, C., Kizilova, K., Diez-Medrano, J., Lagos, M., Norris, P., Ponarin, E., & et al., B. P. (2021). 2.12 QoG OECD Dataset Time-Series

Dataset tag: qog_oecd_ts

Description: The QoG OECD dataset consists of approximately 1300 variables from 100 data sources. The dataset includes OECD member countries and has high data coverage in terms of geography and time.
In the QoG OECD TS dataset, data from 1946 to 2021 is included and the unit of analysis is country-year (e.g., Sweden-1946, Sweden-1947, etc.).

Dataset citation: Teorell, Jan, Staffan Kumlin, Aksel Sundström, Sören Holmberg, Bo Rothstein, Natalia Alvarado Pachon Cem Mert Dalli. 2021. The Quality of Government OECD Dataset, version Jan21. University of Gothenburg: The Quality of Government Institute, http://www.qog.pol.gu.se doi:10.18157/qogoecdjan21

License: The QoG datasets are open and available, free of charge and without a need to register your data. You can use them for your analysis, graphs, teaching, and other academic-related and non-commercial purposes. We ask our users to cite always the original source(s) of the data and our datasets.

We do not allow other uses of these data including but not limited to redistribution, commercialization and other for-profit usage. If a user is interested in such use or has doubts about the license, they will have to refer to the original source and check with them if this is allowed and what requirements they need to fulfill.

Be mindful that the original data sources are the only owners of their data and they can adjust their license without previous warning.

More detailed information on the dataset can be found at the following web page: `https://www.gu.se/en/quality-government/qog-data/data-downloads/oecd-dataset`

2.12.1 Identification Variables

Identification variables in the dataset.

2.12.1.1 Country Code (ccode)

Long tag: qog_oecd_ts_ccode

Original tag: ccode

Description:
Numeric country code based on the ISO-3166-1 standard. All the numeric country codes are unique and this is thus the variable best suitable to use when merging files (in combination with year for time-series data). (http://en.wikipedia.org/wiki/ISO_3166-1_numeric)

2.12.1.2 Country Name (cname)

Long tag: qog_oecd_ts_cname

Original tag: cname

Description:
The name of the country based in the ISO standard.

2.12.1.3 Year (year)

Long tag: qog_oecd_ts_year

Original tag: year

Description:
Year.

2.12.1.4 Country Code QoG (ccode_qog)

Long tag: qog_oecd_ts_ccode_qog

Original tag: ccode_qog

Description:
The country code using the QoG standard.

2.12.1.5 Country Name QoG (cname_qog)

Long tag: qog_oecd_ts_cname_qog

Original tag: cname_qog

Description:
The name of the country using the QoG standard.

2.12.1.6 3-letter Country Code (ccodealp)

Long tag: qog_oecd_ts_ccodealp

Original tag: ccodealp

Description:
A three-letter country code based on the ISO-3166-1 alpha3 standard. Please note that the ccodealp variable does not uniquely identify all countries.

2.12.1.7 Country Code COW (ccodecow)

Long tag: qog_oecd_ts_ccodecow

Original tag: ccodecow

Description:
Country code from the Correlates of War.

2.12.1.8 Version of the Dataset (version)

Long tag: qog_oecd_ts_version

Original tag: version

Description:
Version of the QoG dataset.

2.12.1.9 Country Name and Year (cname_year)

Long tag: qog_oecd_ts_cname_year

Original tag: cname_year

Description:
Country name and year.

2.12.1.10 3-letter Country Code and Year (ccodealp_year)

Long tag: qog_oecd_ts_ccodealp_year

Original tag: ccodealp_year

Description:
A three-letter country code and year.

2.12.2 Public Economy

This category includes economic indicators that reflect the involvement of the government in the economy (taxes, tariff rates and government expenditures), economic key figures of a state (GDP, inflation, and economic inequality), and indicators that characterize the state of the economy (aid- flows, debt).

2.12.2.1 Number of Recipients to whom Commitments were provided (not incl. Int. Org.) (aid_cpnc)

Long tag: qog_oecd_ts_aid_cpnc

Original tag: aid_cpnc

Description:
Number of Recipients to whom Commitments were provided, not including International Organizations

Variable citation: Tierney, M. J., Nielson, D. L., Hawkins, D. G., Roberts, J. T., Findley, M. G., Powers, R. M., Parks, B., Wilson, S. E., & Hicks, R. L. (2011). More dollars than sense: Refining our knowledge of development finance using aiddata. *World Development*, 39(11), 1891–1906 AidData. (2017). Aiddatacore_researchrelease_level1_v3.1 research releases dataset [Accessed on 2021-08-25]. `http://aiddata.org/research-datasets`

2.12.2.2 Sum of Commitments provided to Recipients (not incl. Int. Org.) (aid_cpsc)

Long tag: qog_oecd_ts_aid_cpsc

Original tag: aid_cpsc

Description:
Sum of Commitments provided to Recipients, not including International Organizations

Variable citation: Tierney, M. J., Nielson, D. L., Hawkins, D. G., Roberts, J. T., Findley, M. G., Powers, R. M., Parks, B., Wilson, S. E., & Hicks, R. L. (2011). 2.12.2.7 Economic Globalization (dr_eg)

Long tag: qog_oecd_ts_dr_eg

Original tag: dr_eg

Description:
Economic globalisation (scale of 1 to 100) covers both trade flows as well as financial flows. De facto trade is determined with reference to the trade in goods and services. De jure trade covers customs duties, taxes and restrictions on trade.

Variable citation: Gygli, S., Haelg, F., Potrafke, N., & Sturm, J.-E. (2019). The KOF Globalisation Index - Revisited. `https://doi.org/10.1007/s11558-019-09344-2` Dreher, A. (2006). Does globalization affect growth? evidence from a new index of globalization. *Applied Economics*, 38(10), 1091–1110

2.12.2.8 Economic Freedom of the World Index (panel data) (fi_index_pd)

Long tag: qog_oecd_ts_fi_index_pd

Original tag: fi_index_pd

Description:
The index is founded upon objective components that reflect the presence (or absence) of economic freedom. The index ranges from 0-10 where 0 corresponds to "less economic freedom" and 10 to "more economic freedom". Panel-data adjusted.

Variable citation: Gwartney, J., Lawson, R., Hall, J., Murphy, R., Callais, J. T., Fike, R., Geloso, V., Kahli, N. S., McMahon, F., & van Staden, M. (2021). Economic Freedom Dataset 2021, published in Economic Freedom of the World: 2021. *Fraser Institute*. `https://www.fraserinstitute.org/economicfreedom/dataset`

2.12.2.9 Size of Government: Expenditures, Taxes and Enterprises (current) (fi_sog)

Long tag: qog_oecd_ts_fi_sog

Original tag: fi_sog

Description:
The index ranges from 0-10 where 0 corresponds to "large general government consumption", "large transfer sector", "many government enterprises", and "high marginal tax rates and low income thresholds", and 10 to "small general government consumption", "small transfer sector", "few government enterprises", and "low marginal tax rates and high income thresholds". The index consists of the following indicators: General government consumption spending as a percentage of total consumption, Transfers and subsidies as a percentage of GDP, Government enterprises and investment as a percentage of total investment, Top marginal tax rate (and income threshold to which it applies).

Variable citation: Gwartney, J., Lawson, R., Hall, J., Murphy, R., Callais, J. T., Fike, R., Geloso, V., Kahli, N. S., McMahon, F., & van Staden, M. (2021). 2.12.2.11 Expenditure on economic affairs, as percent of total gen. gov. exp. (gfs_ecaf)

Long tag: qog_oecd_ts_gfs_ecaf

Original tag: gfs_ecaf

Description:
Total expenditure on economic affairs, as the percentage of general government expenditure.

Variable citation: International Monetary Fund. (2019). Government finance statistics yearbook (gfsy) 2019. `https://data.imf.org/?sk=a0867067-d23c-4ebc-ad23-d3b015045405`

2.12.2.12 Expenditure on public order and safety, as percent of total gen. gov. exp. (gfs_pos)

Long tag: qog_oecd_ts_gfs_pos

Original tag: gfs_pos

Description:
Total expenditure on public order and safety, as the percentage of general government expenditure.

Variable citation: International Monetary Fund. (2019). Government finance statistics yearbook (gfsy) 2019. `https://data.imf.org/?sk=a0867067-d23c-4ebc-ad23-d3b015045405`

2.12.2.13 Expenditure on social protection, as percent of total gen. gov. exp. (gfs_sp)

Long tag: qog_oecd_ts_gfs_sp

Original tag: gfs_sp

Description:
Total expenditure on social protection, as the percentage of general government expenditure.

Variable citation: International Monetary Fund. (2019). Government finance statistics yearbook (gfsy) 2019. `https://data.imf.org/?sk=a0867067-d23c-4ebc-ad23-d3b015045405`

2.12.2.14 GDP per Capita (Current Prices) (gle_cgdpc)

Long tag: qog_oecd_ts_gle_cgdpc

Original tag: gle_cgdpc

Description:
GDP per capita (Current prices).

Variable citation: Gleditsch, K. S. (2002). Expanded trade and GDP data (version 6.0). extitJournal of Conflict Resolution, 46(5), 712–724 Gleditsch, K., & Ward, M. D. (1999). Interstate system membership: A revised list of the independent states since 1816. *International Interactions*, 25, 393–413

2.12.2.15 Total Export (gle_exp)

Long tag: qog_oecd_ts_gle_exp

Original tag: gle_exp

Description:
This amounts to the total export of a country, in millions of current year US dollars, estimated as the sum of all dyadic export figures to that country using the imputation technique described above.

Variable citation: Gleditsch, K. S. (2002). Expanded trade and GDP data (version 6.0). extitJournal of Conflict Resolution, 46(5), 712–724 Gleditsch, K., & Ward, M. D. (1999). Interstate system membership: A revised list of the independent states since 1816. *International Interactions*, 25, 393–413

2.12.2.16 Real GDP (2005) (gle_gdp)

Long tag: qog_oecd_ts_gle_gdp

Original tag: gle_gdp

Description:
Real GDP (2005). This is Gleditsch's estimate of GDP per Capita in US dollars at current year international prices.

Variable citation: Gleditsch, K. S. (2002). Expanded trade and GDP data (version 6.0). extitJournal of Conflict Resolution, 46(5), 712–724 Gleditsch, K., & Ward, M. D. (1999). Interstate system membership: A revised list of the independent states since 1816. *International Interactions*, 25, 393–413

2.12.2.17 Total Import (gle_imp)

Long tag: qog_oecd_ts_gle_imp

Original tag: gle_imp

Description:
This amounts to the total import of a country, in millions of current year US dollars, estimated as the sum of all dyadic import figures to that country using the imputation technique described above.

Variable citation: Gleditsch, K. S. (2002). Expanded trade and GDP data (version 6.0). extitJournal of Conflict Resolution, 46(5), 712–724 Gleditsch, K., & Ward, M. D. (1999). Interstate system membership: A revised list of the independent states since 1816. *International Interactions*, 25, 393–413

2.12.2.18 Real GDP per Capita (2005) (gle_rgdpc)

Long tag: qog_oecd_ts_gle_rgdpc

Original tag: gle_rgdpc

Description:
This is the estimate of real GDP per Capita in constant US dollars at base year 2000, based on the imputation technique described above.

Variable citation: Gleditsch, K. S. (2002). Expanded trade and GDP data (version 6.0). extitJournal of Conflict Resolution, 46(5), 712–724 Gleditsch, K., & Ward, M. D. (1999). Interstate system membership: A revised list of the independent states since 1816. *International Interactions*, 25, 393–413

2.12.2.19 Total Trade (gle_trade)

Long tag: qog_oecd_ts_gle_trade

Original tag: gle_trade

Description:
This amounts to the sum of import and export of a country, in millions of current year US dollars, estimated as the sum of all dyadic import and export figures of that country using the imputation technique described above.

Variable citation: Gleditsch, K. S. (2002). Expanded trade and GDP data (version 6.0). extitJournal of Conflict Resolution, 46(5), 712–724 Gleditsch, K., & Ward, M. D. (1999). Interstate system membership: A revised list of the independent states since 1816. *International Interactions*, 25, 393–413

2.12.2.20 Economic Complexity Index (SITC product classification) (gpcr_eci)

Long tag: qog_oecd_ts_gpcr_eci

Original tag: gpcr_eci

Description:
The Economic Complexity Index (ECI) is a measure of the amount of capabilities and know-how of a given country determined by the diversity, ubiquity, and complexity of the products it exports.

A rank of countries based on how diversified and complex their export basket is. Countries that are home to a great diversity of productive know-how, particularly complex specialized know-how, are able to produce a great diversity of sophisticated products.

The complexity of a country's exports is found to highly predict current income levels, or where complexity exceed expectations for a country's income level, the country is predicted to experience more rapid growth in the future. ECI therefore provides a useful measure of economic development.

This Economic Complexity Index is computed using SITC product classification.

Variable citation: The Growth Lab at Harvard University. (2019). Growth projections and complexity rankings [UNF:6:+dXp8TMQz26OFv7ZOfIxSg== [fileUNF]]. `https://doi.org/10.7910/DVN/XTAQMC`

2.12.2.21 Forecasted annualized rate of growth for following decade (gpcr_growth)

Long tag: qog_oecd_ts_gpcr_growth

Original tag: gpcr_growth

Description:
A prediction of how much a country will grow based on its current level of Economic Complexity, its Complexity Outlook or connectedness to new complex products in the Product Space, as compared to its current income level in GDP per capita and expected natural resource exports.

Economic complexity alone helps explain the lion's share of variance in current income levels. But the value of economic complexity is in its predictive power on future growth, where a simple measure of current complexity and connectedness to new complex products, in relation to current income levels and expected natural resource exports, holds greater accuracy in predicting future growth than any other single economic indicator.

To calculate Economic Complexity Growth Projections, the authors consider four factors as explanatory variables: the Economic Complexity Index; the Complexity Outlook Index; the current level of income; and the expected growth in the value of natural resource exports per capita.

In effect, the growth projections show countries grow by expanding the know-how they have that allows them to produce more, and more complex products, depending on the connectedness of know-how and how many other products rely on similar capabilities, as well as the initial economic complexity the country held.

Growth projections are calculated through a process largely based on determining whether a country's economic complexity is higher or lower than expected given its level of income. The authors expect countries whose economic complexity is greater than the authors would expect for its level of income to grow faster than those that are "too rich" for their current level of complexity.

In this data, a country's growth projection value for a given year is for the decade beginning with that year. For example, a value in a 2017 row is the projection of annualized growth for 2017-2027.

Variable citation: The Growth Lab at Harvard University. (2019). Growth projections and complexity rankings [UNF:6:+dXp8TMQz26OFv7ZOfIxSg== [fileUNF]]. `https://doi.org/10.7910/DVN/XTAQMC`

2.12.2.22 Share Direct Taxes in 1800 (gtr_centaxdir1800)

Long tag: qog_oecd_ts_gtr_centaxdir1800

Original tag: gtr_centaxdir1800

Description:

Share of total central government tax revenue from direct taxes, in the year 1800. A direct tax is imposed directly upon an individual person (legal or natural) or property, in contrast to a tax imposed upon a transaction. Direct taxes include taxes on income, property, and other direct taxes.

Variable citation: Andersson, Per F. and Thomas Brambor. (2019). Financing the state: Government tax revenue from 1800 to 2012. version 2.0. `https://www.perfandersson.com/data`

2.12.2.23 Share Direct Taxes in 1850 (gtr_centaxdir1850)

Long tag: qog_oecd_ts_gtr_centaxdir1850

Original tag: gtr_centaxdir1850

Description:

Share of total central government tax revenue from direct taxes, in the year 1850. A direct tax is imposed directly upon an individual person (legal or natural) or property, in contrast to a tax imposed upon a transaction. Direct taxes include taxes on income, property, and other direct taxes.

Variable citation: Andersson, Per F. and Thomas Brambor. (2019). Financing the state: Government tax revenue from 1800 to 2012. version 2.0. `https://www.perfandersson.com/data`

2.12.2.24 Share Government Revenue of GDP in 1800 (gtr_centaxgdp1800)

Long tag: qog_oecd_ts_gtr_centaxgdp1800

Original tag: gtr_centaxgdp1800

Description:

Total central government tax revenue as a share of GDP, in the year 1800.

Variable citation: Andersson, Per F. and Thomas Brambor. (2019). Financing the state: Government tax revenue from 1800 to 2012. version 2.0. `https://www.perfandersson.com/data`

2.12.2.25 Share Government Revenue of GDP in 1850 (gtr_centaxgdp1850)

Long tag: qog_oecd_ts_gtr_centaxgdp1850

Original tag: gtr_centaxgdp1850

Description:

Total central government tax revenue as a share of GDP, in the year 1850.

Variable citation: Andersson, Per F. and Thomas Brambor. (2019). Financing the state: Government tax revenue from 1800 to 2012. version 2.0. `https://www.perfandersson.com/data`

2.12.2.26 Share Indirect Taxes in 1800 (gtr_centaxind1800)

Long tag: qog_oecd_ts_gtr_centaxind1800

Original tag: gtr_centaxind1800

Description:

Share of total central government tax revenue from property taxes, most importantly levies on land and real estate, in the year 1800. These include (i) recurrent taxes on immovable property, (ii) recurrent taxes on net wealth, (iii) estate, inheritance, and gift taxes, (iv) taxes in financial and capital transactions, (v) other taxes on property.

Variable citation: Andersson, Per F. and Thomas Brambor. (2019). Financing the state: Government tax revenue from 1800 to 2012. version 2.0. `https://www.perfandersson.com/data`

2.12.2.27 Share Indirect Taxes in 1850 (gtr_centaxind1850)

Long tag: qog_oecd_ts_gtr_centaxind1850

Original tag: gtr_centaxind1850

Description:
Share of total central government tax revenue from property taxes, most importantly levies on land and real estate , in the year 1850. These include (i) recurrent taxes on immovable property, (ii) recurrent taxes on net wealth, (iii) estate, inheritance, and gift taxes, (iv) taxes in financial and capital transactions, (v) other taxes on property.

Variable citation: Andersson, Per F. and Thomas Brambor. (2019). Financing the state: Government tax revenue from 1800 to 2012. version 2.0. `https://www.perfandersson.com/data`

2.12.2.28 Total Central Govt Revenue in 1800 (millions, local currency) (gtr_centaxtot1800)

Long tag: qog_oecd_ts_gtr_centaxtot1800

Original tag: gtr_centaxtot1800

Description:
Total central government tax revenue (in millions of local currency), in the year 1800. Taxes are defined as compulsory and unrequited levies by the government, following the Organisation for Economic Co-operation and Development (OECD). Excluded are social security contributions and non-tax revenues.

Variable citation: Andersson, Per F. and Thomas Brambor. (2019). Financing the state: Government tax revenue from 1800 to 2012. version 2.0. `https://www.perfandersson.com/data`

2.12.2.29 Grants (ictd_grants)

Long tag: qog_oecd_ts_ictd_grants

Original tag: ictd_grants

Description:
Total grants received by the government.

Variable citation: ICTD/UNU-WIDER. (2020). Government revenue dataset. `https://www.wider.unu.edu/project/government-revenue-dataset`

2.12.2.30 Consolidated Non-Tax Revenue (ictd_nontax)

Long tag: qog_oecd_ts_ictd_nontax

Original tag: ictd_nontax

Description:
Total non-tax revenue, comprising data categorized as either “non-tax revenue” or “other revenue” depending on the underlying source. Includes revenue from both resource and non-resource sources.

Variable citation: ICTD/UNU-WIDER. (2020). Government revenue dataset. `https://www.wider.unu.edu/project/government-revenue-dataset`

2.12.2.31 Revenue (excluding social contributions) (ictd_revexsc)

Long tag: qog_oecd_ts_ictd_revexsc

Original tag: ictd_revexsc

Description:
Total government revenue, excluding social contributions.

Variable citation: ICTD/UNU-WIDER. (2020). Government revenue dataset. `https://www.wider.unu.edu/project/government-revenue-dataset`

2.12.2.32 Revenue (including social contributions) (ictd_revinsc)

Long tag: qog_oecd_ts_ictd_revinsc

Original tag: ictd_revinsc

Description:
Total government revenue including taxes, non-tax revenue, grants and social contributions.

Variable citation: ICTD/UNU-WIDER. (2020). Government revenue dataset. `https://www.wider.unu.edu/project/government-revenue-dataset`

2.12.2.33 Total Resource Revenue (ictd_revres)

Long tag: qog_oecd_ts_ictd_revres

Original tag: ictd_revres

Description:

Total natural resource revenues, including natural resource revenues reported as "tax revenue" or "non-tax revenue". Natural resources are here defined as natural resources that include a significant component of economic rent, primarily from oil and mining activities.

Variable citation: ICTD/UNU-WIDER. (2020). Government revenue dataset. `https://www.wider.unu.edu/project/government-revenue-dataset`

2.12.2.34 Social Contributions (ictd_soccon)

Long tag: qog_oecd_ts_ictd_soccon

Original tag: ictd_soccon

Description:

Total social contributions.

Variable citation: ICTD/UNU-WIDER. (2020). Government revenue dataset. `https://www.wider.unu.edu/project/government-revenue-dataset`

2.12.2.35 Taxes on Corporations and Other Enterprises (ictd_taxcorp)

Long tag: qog_oecd_ts_ictd_taxcorp

Original tag: ictd_taxcorp

Description:

Total income and profit taxes on corporations, including taxes on resource firms.

Variable citation: ICTD/UNU-WIDER. (2020). Government revenue dataset. `https://www.wider.unu.edu/project/government-revenue-dataset`

2.12.2.36 Taxes (excluding social contributions) (ictd_taxexsc)

Long tag: qog_oecd_ts_ictd_taxexsc

Original tag: ictd_taxexsc

Description:

Total tax revenue, excluding social contributions.

Variable citation: ICTD/UNU-WIDER. (2020). Government revenue dataset. `https://www.wider.unu.edu/project/government-revenue-dataset`

2.12.2.37 Taxes on Goods and Services (ictd_taxgs)

Long tag: qog_oecd_ts_ictd_taxgs

Original tag: ictd_taxgs

Description:

Total taxes on goods and services, which includes (but it not necessarily always equal to) sales taxes and excise taxes.

Variable citation: ICTD/UNU-WIDER. (2020). Government revenue dataset. `https://www.wider.unu.edu/project/government-revenue-dataset`

2.12.2.38 Taxes on Income, Profits, and Capital Gains (ictd_taxinc)

Long tag: qog_oecd_ts_ictd_taxinc

Original tag: ictd_taxinc

Description:

Total taxes on income, profits and capital gains, including taxes on natural resource firms. This figure is always exclusive of social contributions. The total value of Taxes on Income, Profits and Capital Gains may sometimes exceed the sum of Individuals and Corporations, due to revenues that are unallocated between the two.

Variable citation: ICTD/UNU-WIDER. (2020). Government revenue dataset. `https://www.wider.unu.edu/project/government-revenue-dataset`

2.12.2.39 Taxes on Individuals (ictd_taxind)

Long tag: qog_oecd_ts_ictd_taxind

Original tag: ictd_taxind

Description:
Total income, capital gains and profit taxes on individuals. This figure is always exclusive of resource revenues in available sources.

Variable citation: ICTD/UNU-WIDER. (2020). Government revenue dataset. `https://www.wider.unu.edu/project/government-revenue-dataset`

2.12.2.40 Indirect Taxes (ictd_taxindirect)

Long tag: qog_oecd_ts_ictd_taxindirect

Original tag: ictd_taxindirect

Description:
Total indirect taxes, including resource revenues. Includes taxes on goods and services, taxes on international trade and other taxes. Indirect may exceed the sum of Taxes on Goods and Services, Taxes on International Trade and Transactions and Other Taxes due to unallocated revenue not classified in any of these categories.

Variable citation: ICTD/UNU-WIDER. (2020). Government revenue dataset. `https://www.wider.unu.edu/project/government-revenue-dataset`

2.12.2.41 Taxes (including social contributions) (ictd_taxinsc)

Long tag: qog_oecd_ts_ictd_taxinsc

Original tag: ictd_taxinsc

Description:
Total tax revenue, including social contributions.

Variable citation: ICTD/UNU-WIDER. (2020). Government revenue dataset. `https://www.wider.unu.edu/project/government-revenue-dataset`

2.12.2.42 Non-resource Tax (excluding social contributions) (ictd_taxnresexsc)

Long tag: qog_oecd_ts_ictd_taxnresexsc

Original tag: ictd_taxnresexsc

Description:
Total non-resource tax revenue, excluding social contributions. Calculated as "Taxes excluding social contributions" minus "resource taxes". This is the variable recommended for econometric analysis, as it is most complete and consistent across countries.

Variable citation: ICTD/UNU-WIDER. (2020). Government revenue dataset. `https://www.wider.unu.edu/project/government-revenue-dataset`

2.12.2.43 Non-resource Tax (including social contributions) (ictd_taxnresinsc)

Long tag: qog_oecd_ts_ictd_taxnresinsc

Original tag: ictd_taxnresinsc

Description:
Total non-resource tax revenue, including social contributions. Calculated as "Taxes including social contributions" minus "resource taxes".

Variable citation: ICTD/UNU-WIDER. (2020). Government revenue dataset. `https://www.wider.unu.edu/project/government-revenue-dataset`

2.12.2.44 Other Taxes (ictd_taxother)

Long tag: qog_oecd_ts_ictd_taxother

Original tag: ictd_taxother

Description:
Total other taxes.

Variable citation: ICTD/UNU-WIDER. (2020). Government revenue dataset. `https://www.wider.unu.edu/project/government-revenue-dataset`

2.12.2.45 Taxes on Payroll and Workforce (ictd_taxpaywf)

Long tag: qog_oecd_ts_ictd_taxpaywf

Original tag: ictd_taxpaywf

Description:
Total taxes on payroll and workforce. This variable is entirely distinct from social contributions, though in underlying sources, social contributions are very occasionally reported as payroll taxes.

Variable citation: ICTD/UNU-WIDER. (2020). Government revenue dataset. https://www.wider.unu.edu/project/government-revenue-dataset

2.12.2.46 Taxes on Property (ictd_taxprop)

Long tag: qog_oecd_ts_ictd_taxprop

Original tag: ictd_taxprop

Description:
Total taxes on property.

Variable citation: ICTD/UNU-WIDER. (2020). Government revenue dataset. https://www.wider.unu.edu/project/government-revenue-dataset

2.12.2.47 Resource Taxes (ictd_taxres)

Long tag: qog_oecd_ts_ictd_taxres

Original tag: ictd_taxres

Description:
Component of reported tax revenue that is from natural resource sources, most often corporate taxation of resource firms.

Variable citation: ICTD/UNU-WIDER. (2020). Government revenue dataset. https://www.wider.unu.edu/project/government-revenue-dataset

2.12.2.48 Taxes on International Trade and Transactions (ictd_taxtrade)

Long tag: qog_oecd_ts_ictd_taxtrade

Original tag: ictd_taxtrade

Description:
Total taxes on international trade, including both import and export taxes. In some cases this figure may also include VAT collected at the border, where countries consistently report revenue in this way.

Variable citation: ICTD/UNU-WIDER. (2020). Government revenue dataset. https://www.wider.unu.edu/project/government-revenue-dataset

2.12.2.49 Absolute economic institutional quality(simple averages) (kun_ecoabs)

Long tag: qog_oecd_ts_kun_ecoabs

Original tag: kun_ecoabs

Description:
Absolute economic institutional quality(simple averages).

Variable citation: Kuncic, A. (2014). Institutional quality dataset. *Journal of Institutional Economics*, 10(01), 135–161. https://doi.org/10.1017/S1744137413000192

2.12.2.50 Economic institutional quality (relative factor scores) (kun_ecorel)

Long tag: qog_oecd_ts_kun_ecorel

Original tag: kun_ecorel

Description:
Economic institutional quality (relative factor scores).

Variable citation: Kuncic, A. (2014). Institutional quality dataset. *Journal of Institutional Economics*, 10(01), 135–161. https://doi.org/10.1017/S1744137413000192

2.12.2.51 Economic World Institutional Quality Ranking (all countries) (kun_wiqreco_all)

Long tag: qog_oecd_ts_kun_wiqreco_all

Original tag: kun_wiqreco_all

Description:
Economic World Institutional Quality Ranking (all countries).

Variable citation: Kuncic, A. (2014). Institutional quality dataset. *Journal of Institutional Economics*, 10(01), 135–161. https://doi.org/10.1017/S1744137413000192

2.12.2.52 Economic World Institutional Quality Ranking (full obs.) (kun_wiqreco_full)

Long tag: qog_oecd_ts_kun_wiqreco_full

Original tag: kun_wiqreco_full

Description:
Economic World Institutional Quality Ranking (countries with full observations).

Variable citation: Kuncic, A. (2014). Institutional quality dataset. *Journal of Institutional Economics*, 10(01), 135–161. https://doi.org/10.1017/S1744137413000192

2.12.2.53 Atkinson Coefficient (epsilon=0.5) (lis_atk05)

Long tag: qog_oecd_ts_lis_atk05

Original tag: lis_atk05

Description:
Atkinson Coefficient (epsilon=0.5).

Variable citation: LIS Cross-National Data Center in Luxembourg. (2021). Lis inequality and poverty key figures [Accessed on 2021-12-09]. https://www.lisdatacenter.org/download-key-figures/

2.12.2.54 Atkinson Coefficient (epsilon=1) (lis_atk1)

Long tag: qog_oecd_ts_lis_atk1

Original tag: lis_atk1

Description:
Atkinson Coefficient (epsilon=1).

Variable citation: LIS Cross-National Data Center in Luxembourg. (2021). Lis inequality and poverty key figures [Accessed on 2021-12-09]. https://www.lisdatacenter.org/download-key-figures/

2.12.2.55 Gini Coefficient (lis_gini)

Long tag: qog_oecd_ts_lis_gini

Original tag: lis_gini

Description:
Gini Coefficient.

Variable citation: LIS Cross-National Data Center in Luxembourg. (2021). Lis inequality and poverty key figures [Accessed on 2021-12-09]. https://www.lisdatacenter.org/download-key-figures/

2.12.2.56 Mean Equivalized Income (lis_meaneqi)

Long tag: qog_oecd_ts_lis_meaneqi

Original tag: lis_meaneqi

Description:
Mean Equivalized Income.

Variable citation: LIS Cross-National Data Center in Luxembourg. (2021). Lis inequality and poverty key figures [Accessed on 2021-12-09]. https://www.lisdatacenter.org/download-key-figures/

2.12.2.57 Median Equivalized Income (lis_medeqi)

Long tag: qog_oecd_ts_lis_medeqi

Original tag: lis_medeqi

Description:
Median Equivalized Income.

Variable citation: LIS Cross-National Data Center in Luxembourg. (2021). Lis inequality and poverty key figures [Accessed on 2021-12-09]. https://www.lisdatacenter.org/download-key-figures/

2.12.2.58 Percentile Ratio (80/20) (lis_pr8020)

Long tag: qog_oecd_ts_lis_pr8020

Original tag: lis_pr8020

Description:
Percentile Ratio (80/20).

Variable citation: LIS Cross-National Data Center in Luxembourg. (2021). Lis inequality and poverty key figures [Accessed on 2021-12-09]. https://www.lisdatacenter.org/download-key-figures/

2.12.2.59 Percentile Ratio (90/10) (lis_pr9010)

Long tag: qog_oecd_ts_lis_pr9010

Original tag: lis_pr9010

Description:
Percentile Ratio (90/10).

Variable citation: LIS Cross-National Data Center in Luxembourg. (2021). Lis inequality and poverty key figures [Accessed on 2021-12-09]. `https://www.lisdatacenter.org/download-key-figures/`

2.12.2.60 Percentile Ratio (90/50) (lis_pr9050)

Long tag: qog_oecd_ts_lis_pr9050

Original tag: lis_pr9050

Description:
Percentile Ratio (90/50).

Variable citation: LIS Cross-National Data Center in Luxembourg. (2021). Lis inequality and poverty key figures [Accessed on 2021-12-09]. `https://www.lisdatacenter.org/download-key-figures/`

2.12.2.61 Real GDP per Capita (mad_gdppc)

Long tag: qog_oecd_ts_mad_gdppc

Original tag: mad_gdppc

Description:
Real GDP per capita in 2011 US dollars, multiple benchmarks.

Variable citation: Bolt, J., & van Zanden, J. L. (2020). Maddison project database, version 2020 [Maddison style estimates of the evolution of the world economy: A new 2020 update]. `https://www.rug.nl/ggdc/historicaldevelopment/maddison/research`

2.12.2.62 Current account balance (oecd_bop_t1)

Long tag: qog_oecd_ts_oecd_bop_t1

Original tag: oecd_bop_t1

Description:
Current account balance.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. `https://doi.org/10.1787/20752288`

2.12.2.63 Real GDP growth (oecd_evogdp_t1)

Long tag: qog_oecd_ts_oecd_evogdp_t1

Original tag: oecd_evogdp_t1

Description:
Real GDP growth.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. `https://doi.org/10.1787/20752288`

2.12.2.64 Real value added: agriculture, fishing, hunting and forestry (oecd_evova_t1a)

Long tag: qog_oecd_ts_oecd_evova_t1a

Original tag: oecd_evova_t1a

Description:
Real value added in agriculture, fishing, hunting and forestry.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. `https://doi.org/10.1787/20752288`

2.12.2.65 Real value added: construction (oecd_evova_t1c)

Long tag: qog_oecd_ts_oecd_evova_t1c

Original tag: oecd_evova_t1c

Description:
Real value added in construction.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. `https://doi.org/10.1787/20752288`

2.12.2.66 Real value added: trade, repairs, transport, accommodation and food serv. (oecd_evova_t1d)

Long tag: qog_oecd_ts_oecd_evova_t1d

Original tag: oecd_evova_t1d

Description:
Real value added in distributive trade, repairs, transport, accommodation and food services activities.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. https://doi.org/10.1787/20752288

2.12.2.67 Real value added: Information and communication (oecd_evova_t1e)

Long tag: qog_oecd_ts_oecd_evova_t1e

Original tag: oecd_evova_t1e

Description:
Real value added in Information and communication.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. https://doi.org/10.1787/20752288

2.12.2.68 Real value added: financial and insurance activities (oecd_evova_t1f)

Long tag: qog_oecd_ts_oecd_evova_t1f

Original tag: oecd_evova_t1f

Description:
Real value added in financial and insurance activities.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. https://doi.org/10.1787/20752288

2.12.2.69 Real value added: real estate activities (oecd_evova_t1g)

Long tag: qog_oecd_ts_oecd_evova_t1g

Original tag: oecd_evova_t1g

Description:
Real value added in real estate activities.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. https://doi.org/10.1787/20752288

2.12.2.70 Real value added in professional, scientific, technical, administration (oecd_evova_t1h)

Long tag: qog_oecd_ts_oecd_evova_t1h

Original tag: oecd_evova_t1h

Description:
Real value added in professional, scientific, technical, administration and support services activities.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. https://doi.org/10.1787/20752288

2.12.2.71 Real value added in public administration, defence, education human health (oecd_evova_t1i)

Long tag: qog_oecd_ts_oecd_evova_t1i

Original tag: oecd_evova_t1i

Description:
Real value added in public administration, defence, education human health and social work activities.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. https://doi.org/10.1787/20752288

2.12.2.72 Real value added in other services activities (oecd_evova_t1j)

Long tag: qog_oecd_ts_oecd_evova_t1j

Original tag: oecd_evova_t1j

Description:
Real value added in other services activities.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. https://doi.org/10.1787/20752288

2.12.2.73 Total FDI Index (oecd_fdindex_t1a)

Long tag: qog_oecd_ts_oecd_fdindex_t1a

Original tag: oecd_fdindex_t1a

Description:
Total FDI Index.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. https://doi.org/10.1787/20752288

2.12.2.74 Primary sector (oecd_fdindex_t1b)

Long tag: qog_oecd_ts_oecd_fdindex_t1b

Original tag: oecd_fdindex_t1b

Description:
FDI Index: Primary sector.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. https://doi.org/10.1787/20752288

2.12.2.75 Manufacturing (oecd_fdindex_t1c)

Long tag: qog_oecd_ts_oecd_fdindex_t1c

Original tag: oecd_fdindex_t1c

Description:
FDI Index: Manufacturing.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. https://doi.org/10.1787/20752288

2.12.2.76 Electricity (oecd_fdindex_t1d)

Long tag: qog_oecd_ts_oecd_fdindex_t1d

Original tag: oecd_fdindex_t1d

Description:
FDI Index: Electricity.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. https://doi.org/10.1787/20752288

2.12.2.77 Distribution (oecd_fdindex_t1e)

Long tag: qog_oecd_ts_oecd_fdindex_t1e

Original tag: oecd_fdindex_t1e

Description:
FDI Index: Distribution.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. https://doi.org/10.1787/20752288

2.12.2.78 Transport (oecd_fdindex_t1f)

Long tag: qog_oecd_ts_oecd_fdindex_t1f

Original tag: oecd_fdindex_t1f

Description:
FDI Index: Transport.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. https://doi.org/10.1787/20752288

2.12.2.79 Media (oecd_fdindex_t1g)

Long tag: qog_oecd_ts_oecd_fdindex_t1g

Original tag: oecd_fdindex_t1g

Description:
FDI Index: Media.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. https://doi.org/10.1787/20752288

2.12.2.80 Communications (oecd_fdindex_t1h)

Long tag: qog_oecd_ts_oecd_fdindex_t1h

Original tag: oecd_fdindex_t1h

Description:
FDI Index: Communications.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. https://doi.org/10.1787/20752288

2.12.2.81 Financial services (oecd_fdindex_t1i)

Long tag: qog_oecd_ts_oecd_fdindex_t1i

Original tag: oecd_fdindex_t1i

Description:
FDI Index: Financial services.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. https://doi.org/10.1787/20752288

2.12.2.82 Business services (oecd_fdindex_t1j)

Long tag: qog_oecd_ts_oecd_fdindex_t1j

Original tag: oecd_fdindex_t1j

Description:
FDI Index: Business services.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. https://doi.org/10.1787/20752288

2.12.2.83 Structure of central gov. expenditures, general public serv. (oecd_gengovdistri_t1a)

Long tag: qog_oecd_ts_oecd_gengovdistri_t1a

Original tag: oecd_gengovdistri_t1a

Description:
Structure of central government expenditures, general public services.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. https://doi.org/10.1787/20752288

2.12.2.84 Structure of central gov. expenditures, economic affairs (oecd_gengovdistri_t1d)

Long tag: qog_oecd_ts_oecd_gengovdistri_t1d

Original tag: oecd_gengovdistri_t1d

Description:
Structure of central government expenditures, economic affairs.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. https://doi.org/10.1787/20752288

2.12.2.85 Structure of central gov. expenditures, housing and community (oecd_gengovdistri_t1f)

Long tag: qog_oecd_ts_oecd_gengovdistri_t1f

Original tag: oecd_gengovdistri_t1f

Description:
Structure of central government expenditures, housing and community amenities.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. https://doi.org/10.1787/20752288

2.12.2.147 Top 10percent income share (top_top10_income_share)

Long tag: qog_oecd_ts_top_top10_income_share

Original tag: top_top10_income_share

Description:
Income share of the top 10percent of the population. This refers to the share of pre-tax national income among equal-split adults for the top 10percent in each country-year.

The pre-tax national income is the sum of all pre-tax personal income flows accruing to the owners of the production factors, labor and capital, before taking into account the operation of the tax/transfer system, but after taking into account the operation of pension system.

The central difference between personal factor income and pre-tax income is the treatment of pensions, which are counted on a contribution basis by factor income and on a distribution basis by pre-tax income. The population is comprised of individuals over age 20. The base unit is the individual (rather than the household) but resources are split equally within couples.

2.12.2.152 Proportion of people living below 50 percent of median income (percent) (wdi_belmedinc)

Long tag: qog_oecd_ts_wdi_belmedinc

Original tag: wdi_belmedinc

Description:
The percentage of people in the population who live in households whose per capita income or consumption is below half of the median income or consumption per capita. The median is measured at 2011 Purchasing Power Parity (PPP) using PovcalNet (http://iresearch.worldbank.org/PovcalNet). For some countries, medians are not reported due to grouped and/or confidential data. The reference year is the year in which the underlying household survey data was collected. In cases for which the data collection period bridged two calendar years, the first year in which data were collected is reported.

2.12.2.153 Domestic general government health expenditure (percent of GDP) (wdi_dgovhexp)

Long tag: qog_oecd_ts_wdi_dgovhexp

Original tag: wdi_dgovhexp

Description:
Domestic general government health expenditure (percent of GDP). Public expenditure on health from domestic sources as a share of the economy as measured by GDP.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.2.154 Domestic private health expenditure (percent of current health expenditure) (wdi_dprivhexp)

Long tag: qog_oecd_ts_wdi_dprivhexp

Original tag: wdi_dprivhexp

Description:
Domestic private health expenditure (percent of current health expenditure). Share of current health expenditures funded from domestic private sources. Domestic private sources include funds from households, corporations and non-profit organizations. Such expenditures can be either prepaid to voluntary health insurance or paid directly to healthcare providers.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.2.155 External health expenditure (percent of current health expenditure) (wdi_ehexpp)

Long tag: qog_oecd_ts_wdi_ehexpp

Original tag: wdi_ehexpp

Description:
External health expenditure (percent of current health expenditure). Share of current health expenditures funded from external sources. External sources compose of direct foreign transfers and foreign transfers distributed by government encompassing all financial inflows into the national health system from outside the country. External sources either flow through the government scheme or are channeled through non-governmental organizations or other schemes.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.2.156 Exports of goods and services (percent of GDP) (wdi_export)

Long tag: qog_oecd_ts_wdi_export

Original tag: wdi_export

Description:
Exports of goods and services represent the value of all goods and other market services provided to the rest of the world. They include the value of merchandise, freight, insurance, transport, travel, royalties, license fees, and other services, such as communication, construction, financial, information, business, personal, and government services. They exclude compensation of employees and investment income (formerly called factor services) and transfer payments.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.2.157 Foreign direct investment, net inflows (percent of GDP) (wdi_fdiin)

Long tag: qog_oecd_ts_wdi_fdiin

Original tag: wdi_fdiin

Description:
Foreign direct investment are the net inflows of investment to acquire a lasting management interest (10 percent or more of voting stock) in an enterprise operating in an economy other than that of the investor. It is the sum of equity capital, reinvestment of earnings, other long-term capital, and short-term capital as shown in the balance of payments. This series shows net inflows (new investment inflows less disinvestment) in the reporting economy from foreign investors, and is divided by GDP.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.2.158 Foreign direct investment, net outflows (percent of GDP) (wdi_fdiout)

Long tag: qog_oecd_ts_wdi_fdiout

Original tag: wdi_fdiout

Description:
Foreign direct investment are the net outflows of investment to acquire a lasting management interest (10 percent or more of voting stock) in an enterprise operating in an economy other than that of the investor. It is the sum of equity capital, reinvestment of earnings, other long-term capital, and short-term capital as shown in the balance of payments. This series shows net outflows of investment from the reporting economy to the rest of the world and is divided by GDP.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.2.159 Agriculture, forestry, and fishing, value added (percent of GDP) (wdi_gdpagr)

Long tag: qog_oecd_ts_wdi_gdpagr

Original tag: wdi_gdpagr

Description:
Agriculture corresponds to ISIC divisions 1-5 and includes forestry, hunting, and fishing, as well as cultivation of crops and livestock production. Value added is the net output of a sector after adding up all outputs and subtracting intermediate inputs. It is calculated without making deductions for depreciation of fabricated assets or depletion and degradation of natural resources. The origin of value added is determined by the International Standard Industrial Classification (ISIC), revision 3 or 4.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.2.160 GDP per capita (constant 2010 US dollar) (wdi_gdpcapcon2010)

Long tag: qog_oecd_ts_wdi_gdpcapcon2010

Original tag: wdi_gdpcapcon2010

Description:
GDP per capita is gross domestic product divided by midyear population. GDP is the sum of gross value added by all resident producers in the economy plus any product taxes and minus any subsidies not included in the value of the products. It is calculated without making deductions for depreciation of fabricated assets or for depletion and degradation of natural resources. Data are in constant 2010 U.S. dollars.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.2.161 GDP per capita (current US dollar) (wdi_gdpcapcur)

Long tag: qog_oecd_ts_wdi_gdpcapcur

Original tag: wdi_gdpcapcur

Description:
GDP per capita is gross domestic product divided by midyear population. GDP is the sum of gross value added by all resident producers in the economy plus any product taxes and minus any subsidies not included in the value of the products. It is calculated without making deductions for depreciation of fabricated assets or for depletion and degradation of natural resources. Data are in current U.S. dollars.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.2.162 GDP per capita growth (annual percent) (wdi_gdpcapgr)

Long tag: qog_oecd_ts_wdi_gdpcapgr

Original tag: wdi_gdpcapgr

Description:
Annual percentage growth rate of GDP per capita based on constant local currency. Aggregates are based on constant 2010 U.S. dollars. GDP per capita is gross domestic product divided by midyear population. GDP at purchaser's prices is the sum of gross value added by all resident producers in the economy plus any product taxes and minus any subsidies not included in the value of the products. It is calculated without making deductions for depreciation of fabricated assets or for depletion and degradation of natural resources.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.2.163 GDP per capita, PPP (constant 2017 international dollar) (wdi_gdpcappppcon2017)

Long tag: qog_oecd_ts_wdi_gdpcappppcon2017

Original tag: wdi_gdpcappppcon2017

Description:
GDP per capita based on purchasing power parity (PPP). PPP GDP is gross domestic product converted to international dollars using purchasing power parity rates. An international dollar has the same purchasing power over GDP as the U.S. dollar has in the United States. GDP at purchaser's prices is the sum of gross value added by all resident producers in the economy plus any product taxes and minus any subsidies not included in the value of the products. It is calculated without making deductions for depreciation of fabricated assets or for depletion and degradation of natural resources. Data are in constant 2017 international dollars.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.2.164 GDP per capita, PPP (current international dollar) (wdi_gdpcappppcur)

Long tag: qog_oecd_ts_wdi_gdpcappppcur

Original tag: wdi_gdpcappppcur

Description:
GDP per capita based on purchasing power parity (PPP). PPP GDP is gross domestic product converted to international dollars using purchasing power parity rates. An international dollar has the same purchasing power over GDP as the U.S. dollar has in the United States. GDP at purchaser's prices is the sum of gross value added by all resident producers in the economy plus any product taxes and minus any subsidies not included in the value of the products. It is calculated without making deductions for depreciation of fabricated assets or for depletion and degradation of natural resources. Data are in current international dollars based on the 2011 ICP round.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.2.165 GDP growth (annual percent) (wdi_gdpgr)

Long tag: qog_oecd_ts_wdi_gdpgr

Original tag: wdi_gdpgr

Description:
Annual percentage growth rate of GDP at market prices based on constant local currency. Aggregates are based on constant 2010 U.S. dollars. GDP is the sum of gross value added by all resident producers in the economy plus any product taxes and minus any subsidies not included in the value of the products. It is calculated without making deductions for depreciation of fabricated assets or for depletion and degradation of natural resources.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.2.166 Industry (including construction), value added (percent of GDP) (wdi_gdpind)

Long tag: qog_oecd_ts_wdi_gdpind

Original tag: wdi_gdpind

Description:

Industry corresponds to ISIC divisions 10-45 and includes manufacturing (ISIC divisions 15-37). It comprises value added in mining, manufacturing (also reported as a separate subgroup), construction, electricity, water, and gas. Value added is the net output of a sector after adding up all outputs and subtracting intermediate inputs. It is calculated without making deductions for depreciation of fabricated assets or depletion and degradation of natural resources. The origin of value added is determined by the International Standard Industrial Classification (ISIC), revision 3. Note: For VAB countries, gross value added at factor cost is used as the denominator.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.2.167 GDP, PPP (constant 2017 international dollar) (wdi_gdppppcon2017)

Long tag: qog_oecd_ts_wdi_gdppppcon2017

Original tag: wdi_gdppppcon2017

Description:

PPP GDP is gross domestic product converted to international dollars using purchasing power parity rates. An international dollar has the same purchasing power over GDP as the U.S. dollar has in the United States. GDP is the sum of gross value added by all resident producers in the economy plus any product taxes and minus any subsidies not included in the value of the products. It is calculated without making deductions for depreciation of fabricated assets or for depletion and degradation of natural resources. Data are in constant 2017 international dollars.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.2.168 GDP, PPP (current international dollar) (wdi_gdppppcur)

Long tag: qog_oecd_ts_wdi_gdppppcur

Original tag: wdi_gdppppcur

Description:

PPP GDP is gross domestic product converted to international dollars using purchasing power parity rates. An international dollar has the same purchasing power over GDP as the U.S. dollar has in the United States. GDP is the sum of gross value added by all resident producers in the economy plus any product taxes and minus any subsidies not included in the value of the products. It is calculated without making deductions for depreciation of fabricated assets or for depletion and degradation of natural resources. Data are in current international dollars. For most economies PPP figures are extrapolated from the 2011 International Comparison Program (ICP) benchmark estimates or imputed using a statistical model based on the 2011 ICP. For 47 high- and upper middle-income economies conversion factors are provided by Eurostat and the Organisation for Economic Co-operation and Development (OECD).

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.2.169 Gini index (World Bank estimate) (wdi_gini)

Long tag: qog_oecd_ts_wdi_gini

Original tag: wdi_gini

Description:

Gini index measures the extent to which the distribution of income (or, in some cases, consumption expenditure) among individuals or households within an economy deviates from a perfectly equal distribution. A Lorenz curve plots the cumulative percentages of total income received against the cumulative number of recipients, starting with the poorest individual or household. The Gini index measures the area between the Lorenz curve and a hypothetical line of absolute equality, expressed as a percentage of the maximum area under the line. Thus a Gini index of 0 represents perfect equality, while an index of 100 implies perfect inequality.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.2.170 GNI, Atlas method (current US dollar) (wdi_gniatlcur)

Long tag: qog_oecd_ts_wdi_gniatlcur

Original tag: wdi_gniatlcur

Description:

GNI (formerly GNP) is the sum of value added by all resident producers plus any product taxes (less

subsidies) not included in the valuation of output plus net receipts of primary income (compensation of employees and property income) from abroad. Data are in current U.S. dollars. GNI, calculated in national currency, is usually converted to U.S. dollars at official exchange rates for comparisons across economies, although an alternative rate is used when the official exchange rate is judged to diverge by an exceptionally large margin from the rate actually applied in international transactions. To smooth fluctuations in prices and exchange rates, a special Atlas method of conversion is used by the World Bank. This applies a conversion factor that averages the exchange rate for a given year and the two preceding years, adjusted for differences in rates of inflation between the country, and through 2000, the G-5 countries (France, Germany, Japan, the United Kingdom, and the United States). From 2001, these countries include the Euro area, Japan, the United Kingdom, and the United States.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.2.171 GNI per capita, Atlas method (current US dollar) (wdi_gnicapatlcur)

Long tag: qog_oecd_ts_wdi_gnicapatlcur

Original tag: wdi_gnicapatlcur

Description:

GNI per capita (formerly GNP per capita) is the gross national income, converted to U.S. dollars using the World Bank Atlas method, divided by the midyear population. GNI is the sum of value added by all resident producers plus any product taxes (less subsidies) not included in the valuation of output plus net receipts of primary income (compensation of employees and property income) from abroad. GNI, calculated in national currency, is usually converted to U.S. dollars at official exchange rates for comparisons across economies, although an alternative rate is used when the official exchange rate is judged to diverge by an exceptionally large margin from the rate actually applied in international transactions. To smooth fluctuations in prices and exchange rates, a special Atlas method of conversion is used by the World Bank. This applies a conversion factor that averages the exchange rate for a given year and the two preceding years, adjusted for differences in rates of inflation between the country, and through 2000, the G-5 countries (France, Germany, Japan, the United Kingdom, and the United States). From 2001, these countries include the Euro area, Japan, the United Kingdom, and the United States.

2.12.2.181 Imports of goods and services (percent of GDP) (wdi_import)

Long tag: qog_oecd_ts_wdi_import

Original tag: wdi_import

Description:

Imports of goods and services represent the value of all goods and other market services received from the rest of the world. They include the value of merchandise, freight, insurance, transport, travel, royalties, license fees, and other services, such as communication, construction, financial, information, business, personal, and government services. They exclude compensation of employees and investment income (formerly called factor services) and transfer payments.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.2.182 Income share held by highest 10percent (wdi_incsh10h)

Long tag: qog_oecd_ts_wdi_incsh10h

Original tag: wdi_incsh10h

Description:

Income share held by highest 10percent. Percentage share of income or consumption is the share that accrues to subgroups of population indicated by deciles or quintiles.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.2.183 Income share held by lowest 10percent (wdi_incsh10l)

Long tag: qog_oecd_ts_wdi_incsh10l

Original tag: wdi_incsh10l

Description:

Income share held by lowest 10percent. Percentage share of income or consumption is the share that accrues to subgroups of population indicated by deciles or quintiles.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.2.184 Income share held by second 20percent (wdi_incsh202)

Long tag: qog_oecd_ts_wdi_incsh202

Original tag: wdi_incsh202

Description:

Income share held by second 20percent. Percentage share of income or consumption is the share that accrues to subgroups of population indicated by deciles or quintiles. Percentage shares by quintile may not sum to 100 because of rounding.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.2.185 Income share held by third 20percent (wdi_incsh203)

Long tag: qog_oecd_ts_wdi_incsh203

Original tag: wdi_incsh203

Description:
Income share held by third 20percent. Percentage share of income or consumption is the share that accrues to subgroups of population indicated by deciles or quintiles. Percentage shares by quintile may not sum to 100 because of rounding.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.2.186 Income share held by fourth 20percent (wdi_incsh204)

Long tag: qog_oecd_ts_wdi_incsh204

Original tag: wdi_incsh204

Description:
Income share held by fourth 20percent. Percentage share of income or consumption is the share that accrues to subgroups of population indicated by deciles or quintiles. Percentage shares by quintile may not sum to 100 because of rounding.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.2.187 Income share held by highest 20percent (wdi_incsh20h)

Long tag: qog_oecd_ts_wdi_incsh20h

Original tag: wdi_incsh20h

Description:
Income share held by highest 20percent. Percentage share of income or consumption is the share that accrues to subgroups of population indicated by deciles or quintiles. Percentage shares by quintile may not sum to 100 because of rounding.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.2.188 Income share held by lowest 20percent (wdi_incsh20l)

Long tag: qog_oecd_ts_wdi_incsh20l

Original tag: wdi_incsh20l

Description:
Income share held by lowest 20percent. Percentage share of income or consumption is the share that accrues to subgroups of population indicated by deciles or quintiles. Percentage shares by quintile may not sum to 100 because of rounding.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.2.189 Inflation, consumer prices (annual percent) (wdi_inflation)

Long tag: qog_oecd_ts_wdi_inflation

Original tag: wdi_inflation

Description:
Inflation as measured by the consumer price index reflects the annual percentage change in the cost to the average consumer of acquiring a basket of goods and services that may be fixed or changed at specified intervals, such as yearly. The Laspeyres formula is generally used.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.2.190 Interest payments (percent of expense) (wdi_interexp)

Long tag: qog_oecd_ts_wdi_interexp

Original tag: wdi_interexp

Description:
Interest payments as percentage of expense include interest payments on government debt–including long-term bonds, long-term loans, and other debt instruments–to domestic and foreign residents.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.2.191 Interest payments (percent of revenue) (wdi_interrev)

Long tag: qog_oecd_ts_wdi_interrev

Original tag: wdi_interrev

Description:

Interest payments as percentage of revenue include interest payments on government debt–including long-term bonds, long-term loans, and other debt instruments–to domestic and foreign residents.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.2.192 Poverty gap at USD 3.20 a day (2011 PPP) (percent) (wdi_povgap320)

Long tag: qog_oecd_ts_wdi_povgap320

Original tag: wdi_povgap320

Description:

Poverty gap at 3.20 dollars a day (2011 PPP) is the mean shortfall in income or consumption from the poverty line 3.20 dollars a day (counting the nonpoor as having zero shortfall), expressed as a percentage of the poverty line. This measure reflects the depth of poverty as well as its incidence (percent of population).

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.2.193 Services, value added (constant 2010 US dollar) (wdi_sva2010)

Long tag: qog_oecd_ts_wdi_sva2010

Original tag: wdi_sva2010

Description:

Services, value added (constant 2010 US dollar). Services correspond to ISIC divisions 50-99. They include value added in wholesale and retail trade (including hotels and restaurants), transport, and government, financial, professional, and personal services such as education, health care, and real estate services. Also included are imputed bank service charges, import duties, and any statistical discrepancies noted by national compilers as well as discrepancies arising from rescaling. Value added is the net output of a sector after adding up all outputs and subtracting intermediate inputs. It is calculated without making deductions for depreciation of fabricated assets or depletion and degradation of natural resources. The industrial origin of value added is determined by the International Standard Industrial Classification (ISIC), revision 3 or 4. Data are in constant 2010 U.S. dollars.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.2.194 Services, value added (annual percent growth) (wdi_svapg)

Long tag: qog_oecd_ts_wdi_svapg

Original tag: wdi_svapg

Description:

Services, value added (annual percent growth). Annual growth rate for value added in services based on constant local currency. Aggregates are based on constant 2010 U.S. dollars. Services correspond to ISIC divisions 50-99. They include value added in wholesale and retail trade (including hotels and restaurants), transport, and government, financial, professional, and personal services such as education, health care, and real estate services. Also included are imputed bank service charges, import duties, and any statistical discrepancies noted by national compilers as well as discrepancies arising from rescaling. Value added is the net output of a sector after adding up all outputs and subtracting intermediate inputs. It is calculated without making deductions for depreciation of fabricated assets or depletion and degradation of natural resources. The industrial origin of value added is determined by the International Standard Industrial Classification (ISIC), revision 3 or 4.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.2.195 Services, value added (percent of GDP) (wdi_svapgdp)

Long tag: qog_oecd_ts_wdi_svapgdp

Original tag: wdi_svapgdp

Description:

Services, value added (percent of GDP). Services correspond to ISIC divisions 50-99 and they include value added in wholesale and retail trade (including hotels and restaurants), transport, and government, financial, professional, and personal services such as education, health care, and real estate services. Also included are imputed bank service charges, import duties, and any statistical discrepancies noted by national compilers as well as discrepancies arising from rescaling. Value added is the net output of a sector after adding up all outputs and subtracting intermediate inputs. It is calculated without making deductions for depreciation of fabricated assets or depletion and degradation of natural resources. The industrial origin of value added is

determined by the International Standard Industrial Classification (ISIC), revision 3 or 4.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.2.196 Tax revenue (percent of GDP) (wdi_taxrev)

Long tag: qog_oecd_ts_wdi_taxrev

Original tag: wdi_taxrev

Description:

Tax revenue refers to compulsory transfers to the central government for public purposes. Certain compulsory transfers such as fines, penalties, and most social security contributions are excluded. Refunds and corrections of erroneously collected tax revenue are treated as negative revenue.

Note: The value for San Marino for 1995 was extremely high (44326) and has been recoded to missing.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.2.197 Trade (percent of GDP) (wdi_trade)

Long tag: qog_oecd_ts_wdi_trade

Original tag: wdi_trade

Description:

Trade is the sum of exports and imports of goods and services measured as a share of gross domestic product.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.2.198 Trade in services (percent of GDP) (wdi_tradeserv)

Long tag: qog_oecd_ts_wdi_tradeserv

Original tag: wdi_tradeserv

Description:

Trade in services is the sum of service exports and imports divided by the value of GDP, all in current U.S. dollars.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.3 Civil Society, Population and Culture

This category includes variables that relate to social capital, personal beliefs, size and distribution of the population as well as ethnic and linguistic fractionalization.

2.12.3.1 Ethnic Fractionalization in the year 2000 (al_ethnic2000)

Long tag: qog_oecd_ts_al_ethnic2000

Original tag: al_ethnic2000

Description:

Ethnic Fractionalization in the year 2000. The definition of ethnicity involves a combination of racial and linguistic characteristics. The result is a higher degree of fractionalization than the commonly used ELF-index (see el_elf60) in for example Latin America, where people of many races speak the same language.

Variable citation: Alesina, A., Devleeschauwer, A., Easterly, W., Kurlat, S., & Wacziarg, R. (2003). Fractionalization [O. Galor (ed.) (2011), Inequality and Economic Development: The Modern Perspective, Edward Elgar, UK.]. *Journal of Economic Growth*, 8(2), 155–194

2.12.3.2 Language Fractionalization in the year 2000 (al_language2000)

Long tag: qog_oecd_ts_al_language2000

Original tag: al_language2000

Description:

Linguistic Fractionalization in the year 2000. Reflects probability that two randomly selected people from a given country will not belong to the same linguistic group. The higher the number, the more fractionalized society.

Variable citation: Alesina, A., Devleeschauwer, A., Easterly, W., Kurlat, S., & Wacziarg, R. (2003). Fractionalization [O. Galor (ed.) (2011), Inequality and Economic Development: The Modern Perspective, Edward Elgar, UK.]. *Journal of Economic Growth*, 8(2), 155–194

2.12.3.3 Religion Fractionalization in the year 2000 (al_religion2000)

Long tag: qog_oecd_ts_al_religion2000

Original tag: al_religion2000

Description:

Religious Fractionalization in the year 2000. Reflects probability that two randomly selected people from a given country will not belong to the same religious group. The higher the number, the more fractionalized society.

Variable citation: Alesina, A., Devleeschauwer, A., Easterly, W., Kurlat, S., & Wacziarg, R. (2003). Fractionalization [O. Galor (ed.) (2011), Inequality and Economic Development: The Modern Perspective, Edward Elgar, UK.]. *Journal of Economic Growth*, 8(2), 155–194

2.12.3.4 Right to Marry in Constitution (ccp_marriage)

Long tag: qog_oecd_ts_ccp_marriage

Original tag: ccp_marriage

Description:

Does the constitution provide for the right to marry?

1. Yes, general provision
2. Yes, marriage allowed between a man and a woman
3. No
90. Left explicitly to non-constitution law
96. Other

Variable citation: Elkins, Z., & Ginsburg, T. (2021). Characteristics of national constitutions, version 3.0 [Last modified: May 20, 2021. Available at comparativeconstitutionsproject.org]. `http://www.comparativeconstitutionsproject.org`

2.12.3.5 Right to Same-Sex Marriages in Constitution (ccp_samesexm)

Long tag: qog_oecd_ts_ccp_samesexm

Original tag: ccp_samesexm

Description:

Does the constitution provide the right for same sex marriages?

1. Yes
2. No
96. Other

Variable citation: Elkins, Z., & Ginsburg, T. (2021). Characteristics of national constitutions, version 3.0 [Last modified: May 20, 2021. Available at comparativeconstitutionsproject.org]. `http://www.comparativeconstitutionsproject.org`

2.12.3.6 Freedom of Assembly and Association (ciri_assn)

Long tag: qog_oecd_ts_ciri_assn

Original tag: ciri_assn

Description:

It is an internationally recognized right of citizens to assemble freely and to associate with other persons in political parties, trade unions, cultural organizations, or other special-interest groups. This variable indicates the extent to which the freedoms of assembly and association are subject to actual governmental limitations or restrictions (as opposed to strictly legal protections). A score of 0 indicates that citizens' rights to freedom of assembly or association were severely restricted or denied completely to all citizens; a score of 1 indicates that these rights were limited for all citizens or severely restricted or denied for select groups; and a score of 2 indicates that these rights were virtually unrestricted and freely enjoyed by practically all citizens in a given year.

2.12.3.7 Social Globalization (dr_sg)

Long tag: qog_oecd_ts_dr_sg

Original tag: dr_sg

Description:

Social globalization (scale of 1 to 100) is comprised of three segments, each with its own de facto and de jure segment. Interpersonal contact is measured within the de facto segment with reference to international telephone connections, tourist numbers and migration. Within the de jure segment, it is measured with

reference to telephone subscriptions, international airports and visa restrictions. Flows of information are determined within the de facto segment with reference to international patent applications, international students and trade in high technology goods. The de jure segment measures access to TV and the internet, freedom of the press and international internet connections. Cultural proximity is measured in the de facto segment from trade in cultural goods, international trade mark registrations and the number of McDonald's restaurants and IKEA stores. The de jure area focuses on civil rights (freedom of citizens), gender equality and public spending on school education.

Variable citation: Gygli, S., Haelg, F., Potrafke, N., & Sturm, J.-E. (2019). The KOF Globalisation Index - Revisited. `https://doi.org/10.1007/s11558-019-09344-2` Dreher, A. (2006). Does globalization affect growth? evidence from a new index of globalization. *Applied Economics*, 38(10), 1091–1110

2.12.3.8 Cultural Diversity (fe_cultdiv)

Long tag: qog_oecd_ts_fe_cultdiv

Original tag: fe_cultdiv

Description:

This measure modifies fractionalization (fe_etfra) so as to take some account of cultural distances between groups, measured as the structural distance between languages spoken by different groups in a country. If the groups in a country speak structurally unrelated languages, their cultural diversity index will be the same as their level of ethnic fractionalization (fe_etfra). The more similar are the languages spoken by different ethnic groups, however, the more will this measure be reduced below the level of ethnic fractionalization for that country. The values are assumed to be constant for all years.

Variable citation: Fearon, J. D. (2003). Ethnic and cultural diversity by country. *Journal of Economic Growth*, 8(2), 195–222

2.12.3.9 Ethnic Fractionalization (fe_etfra)

Long tag: qog_oecd_ts_fe_etfra

Original tag: fe_etfra

Description:

Restricting attention to groups that had at least 1 percent of country population in the 1990s, Fearon identifies 822 ethnic and "ethnoreligious" groups in 160 countries. This variable reflects the probability that two randomly selected people from a given country will belong to different such groups. The variable thus ranges from 0 (perfectly homogeneous) to 1 (highly fragmented). The values are assumed to be constant for all years.

Variable citation: Fearon, J. D. (2003). Ethnic and cultural diversity by country. *Journal of Economic Growth*, 8(2), 195–222

2.12.3.10 Plurality Group (fe_plural)

Long tag: qog_oecd_ts_fe_plural

Original tag: fe_plural

Description:

Based on the same set of groups, this variable reflects the population share of the largest group (plurality group) in the country. The values are assumed to be constant for all years.

Variable citation: Fearon, J. D. (2003). Ethnic and cultural diversity by country. *Journal of Economic Growth*, 8(2), 195–222

2.12.3.11 Overall Global Gender Gap Index (gggi_ggi)

Long tag: qog_oecd_ts_gggi_ggi

Original tag: gggi_ggi

Description:

The Global Gender Gap Index (0 to 1, where 1 indicates no gap) examines the gap between men and women in four fundamental categories (subindexes): Economic Participation and Opportunity, Educational Attainment, Health and Survival and Political Empowerment.

Variable citation: World Economic Forum. (2021). The global gender gap report 2021 [All Rights Reserved]. `https://www.weforum.org/reports/ab6795a1-960c-42b2-b3d5-587eccda6023`

2.12.3.12 Population (in the 1000's) (gle_pop)

Long tag: qog_oecd_ts_gle_pop

Original tag: gle_pop

Description:

Size of the population in the years 1000's.

Variable citation: Gleditsch, K. S. (2002). Expanded trade and GDP data (version 6.0). extitJournal of Conflict Resolution, 46(5), 712–724 Gleditsch, K., & Ward, M. D. (1999). Interstate system membership: A revised list of the independent states since 1816. *International Interactions*, 25, 393–413

2.12.3.13 Displaced people (1-5 Higher displacement) (gpi_dic)

Long tag: qog_oecd_ts_gpi_dic

Original tag: gpi_dic

Description:

Refugees by territory of origin (starting in 2010 this indicator also includes the number of internally displaced people by country) as percentage of the country's total population. Sclaed 1 to 5, 5 being a higher percentage of internal displacement. Source: UNHCR Statistical Yearbook and Internal Displacement Monitoring Center.

Variable citation: Institute for Economics and Peace. (2021). Global peace index 2021: Measuring peace in a complex world [Accessed 09-11-2021]. `http://visionofhumanity.org/reports`

2.12.3.14 Global Peace Index (1-5 Less peaceful) (gpi_gpi)

Long tag: qog_oecd_ts_gpi_gpi

Original tag: gpi_gpi

Description:

The GPI (Scaled 1 to 5, 5 being least peaceful) measures a country's level of Negative Peace using three domains of peacefulness. The first domain, Ongoing Domestic and International Conflict, investigates the extent to which countries are involved in internal and external conflicts, as well as their role and duration of involvement in conflicts.

The second domain evaluates the level of harmony or discord within a nation; ten indicators broadly assess what might be described as Societal Safety and Security. The assertion is that low crime rates, minimal terrorist activity and violent demonstrations, harmonious relations with neighbouring countries, a stable political scene and a small proportion of the population being internally displaced or made refugees can be equated with peacefulness.

Seven further indicators are related to a country's Militarisation-reflecting the link between a country's level of military build-up and access to weapons and its level of peacefulness, both domestically and internationally. Comparable data on military expenditure as a percentage of GDP and the number of armed service officers per head are gauged, as are financial contributions to UN peacekeeping missions.

Variable citation: Institute for Economics and Peace. (2021). Global peace index 2021: Measuring peace in a complex world [Accessed 09-11-2021]. `http://visionofhumanity.org/reports`

2.12.3.15 Incarceration (1-5 Higher incarceration) (gpi_jail)

Long tag: qog_oecd_ts_gpi_jail

Original tag: gpi_jail

Description:

Prison population rates per 100,000 of the national population. Sclaed 1 to 5, 5 having a higher incarceration rate. Source: International Centre for Prison Studies, King's College London, World Prison Population List.

Variable citation: Institute for Economics and Peace. (2021). Global peace index 2021: Measuring peace in a complex world [Accessed 09-11-2021]. `http://visionofhumanity.org/reports`

2.12.3.16 Safety and Security (1-5 Less secure) (gpi_ss)

Long tag: qog_oecd_ts_gpi_ss

Original tag: gpi_ss

Description:

Societal Safety and Security (Scaled 1 to 5, 5 being less secure) is one of the three subdomains of the GPI. Low crime rates, minimal terrorist activity and violent demonstrations, harmonious relations with neighbouring countries, a stable political scene and a small proportion of the population being internally displaced or made refugees can be equated with peacefulness.

Variable citation: Institute for Economics and Peace. (2021). Global peace index 2021: Measuring peace in a complex world [Accessed 09-11-2021]. `http://visionofhumanity.org/reports`

2.12.3.17 Children Living in Single-Mother Families (percent) (lis_clsmf)

Long tag: qog_oecd_ts_lis_clsmf

Original tag: lis_clsmf

Description:

Children Living in Single-Mother Families (percent).

Variable citation: LIS Cross-National Data Center in Luxembourg. (2021). Lis inequality and poverty key figures [Accessed on 2021-12-09]. https://www.lisdatacenter.org/download-key-figures/

2.12.3.18 Population growth rates (oecd_evopop_g1)

Long tag: qog_oecd_ts_oecd_evopop_g1

Original tag: oecd_evopop_g1

Description:
Population growth rates.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. https://doi.org/10.1787/20752288

2.12.3.19 Population levels (oecd_evopop_t1)

Long tag: qog_oecd_ts_oecd_evopop_t1

Original tag: oecd_evopop_t1

Description:
Population levels.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. https://doi.org/10.1787/20752288

2.12.3.24 Cinema expenditure per capita (une_cinexp)

Long tag: qog_oecd_ts_une_cinexp

Original tag: une_cinexp

Description:
Cinema expenditure per capita.

Variable citation: UNESCO. (2020). Unesco institute for statistics. `http://data.uis.unesco.org/`

2.12.3.25 Screen per capita (per 100,000 inhabitants) (une_screen)

Long tag: qog_oecd_ts_une_screen

Original tag: une_screen

Description:
Number of cinema screen per capita (per 100,000 inhabitants).

Variable citation: UNESCO. (2020). Unesco institute for statistics. `http://data.uis.unesco.org/`

2.12.3.26 Women political empowerment index (vdem_gender)

Long tag: qog_oecd_ts_vdem_gender

Original tag: vdem_gender

Description:
Women political empowerment index. Question: How politically empowered are women?

Clarifications: Women's political empowerment is defined as a process of increasing capacity for women, leading to greater choice, agency, and participation in societal decision-making. It is understood to incorporate three equally-weighted dimensions: fundamental civil liberties, women's open discussion of political issues and participation in civil society organizations, and the descriptive representation of women in formal political positions. Aggregation: The index is formed by taking the average of women's civil liberties index, women's civil society participation index, and women's political participation index.

Variable citation: Coppedge, M., Gerring, J., Knutsen, C. H., Lindberg, S. I., Teorell, J., Alizada, N., Altman, D., Bernhard, M., Cornell, A., Fish, M. 2.12.3.27 Birth rate, crude (per 1,000 people) (wdi_birth)

Long tag: qog_oecd_ts_wdi_birth

Original tag: wdi_birth

Description:
Crude birth rate indicates the number of live births occurring during the year, per 1,000 population estimated at midyear. Subtracting the crude death rate from the crude birth rate provides the rate of natural increase, which is equal to the rate of population change in the absence of migration.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.3.28 Births attended by skilled health staff (percent of total) (wdi_birthskill)

Long tag: qog_oecd_ts_wdi_birthskill

Original tag: wdi_birthskill

Description:
Births attended by skilled health staff are the percentage of deliveries attended by personnel trained to give the necessary supervision, care, and advice to women during pregnancy, labor, and the postpartum period; to conduct deliveries on their own; and to care for newborns.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.3.29 Death rate, crude (per 1,000 people) (wdi_death)

Long tag: qog_oecd_ts_wdi_death

Original tag: wdi_death

Description:
Crude death rate indicates the number of deaths occurring during the year, per 1,000 population estimated at midyear. Subtracting the crude death rate from the crude birth rate provides the rate of natural increase, which is equal to the rate of population change in the absence of migration.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.3.30 Fertility rate, total (births per woman) (wdi_fertility)

Long tag: qog_oecd_ts_wdi_fertility

Original tag: wdi_fertility

Description:

Total fertility rate represents the number of children that would be born to a woman if she were to live to the end of her childbearing years and bear children in accordance with age-specific fertility rates of the specified year.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.3.31 Life expectancy at birth, total (years) (wdi_lifexp)

Long tag: qog_oecd_ts_wdi_lifexp

Original tag: wdi_lifexp

Description:

Life expectancy at birth indicates the number of years a newborn infant would live if prevailing patterns of mortality at the time of its birth were to stay the same throughout its life.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.3.32 Life expectancy at birth, female (years) (wdi_lifexpf)

Long tag: qog_oecd_ts_wdi_lifexpf

Original tag: wdi_lifexpf

Description:

Life expectancy at birth for females indicates the number of years a newborn infant would live if prevailing patterns of mortality at the time of its birth were to stay the same throughout its life.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.3.33 Life expectancy at birth, male (years) (wdi_lifexpm)

Long tag: qog_oecd_ts_wdi_lifexpm

Original tag: wdi_lifexpm

Description:

Life expectancy at birth for males indicates the number of years a newborn infant would live if prevailing patterns of mortality at the time of its birth were to stay the same throughout its life.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.3.34 Mortality rate, adult, female (per 1,000 female adults) (wdi_mortf)

Long tag: qog_oecd_ts_wdi_mortf

Original tag: wdi_mortf

Description:

Adult mortality rate is the probability of dying between the ages of 15 and 60 – that is, the probability of a 15-year-old dying before reaching age 60, if subject to age-specific mortality rates of the specified year between those ages.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.3.35 Mortality rate, infant (per 1,000 live births) (wdi_mortinf)

Long tag: qog_oecd_ts_wdi_mortinf

Original tag: wdi_mortinf

Description:

Infant mortality rate is the number of infants dying before reaching one year of age, per 1,000 live births in a given year.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.3.36 Mortality rate, infant, female (per 1,000 live births) (wdi_mortinff)

Long tag: qog_oecd_ts_wdi_mortinff

Original tag: wdi_mortinff

Description:
Infant mortality rate, female is the number of female infants dying before reaching one year of age, per 1,000 female live births in a given year.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.3.37 Mortality rate, infant, male (per 1,000 live births) (wdi_mortinfm)

Long tag: qog_oecd_ts_wdi_mortinfm

Original tag: wdi_mortinfm

Description:
Infant mortality rate, male is the number of male infants dying before reaching one year of age, per 1,000 male live births in a given year.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.3.38 Mortality rate, adult, male (per 1,000 male adults) (wdi_mortm)

Long tag: qog_oecd_ts_wdi_mortm

Original tag: wdi_mortm

Description:
Adult mortality rate is the probability of dying between the ages of 15 and 60–that is, the probability of a 15-year-old dying before reaching age 60, if subject to age-specific mortality rates of the specified year between those ages.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.3.39 Mortality rate, neonatal (per 1,000 live births) (wdi_mortnn)

Long tag: qog_oecd_ts_wdi_mortnn

Original tag: wdi_mortnn

Description:
Neonatal mortality rate is the number of neonates dying before reaching 28 days of age, per 1,000 live births in a given year.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.3.40 Mortality rate, under-5 (per 1,000 live births) (wdi_mortu5)

Long tag: qog_oecd_ts_wdi_mortu5

Original tag: wdi_mortu5

Description:
Under-five mortality rate is the probability per 1,000 that a newborn baby will die before reaching age five, if subject to age-specific mortality rates of the specified year.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.3.41 Mortality rate, under-5, female (per 1,000 live births) (wdi_mortu5f)

Long tag: qog_oecd_ts_wdi_mortu5f

Original tag: wdi_mortu5f

Description:
Under-five mortality rate, female is the probability per 1,000 that a newborn female baby will die before reaching age five, if subject to female age-specific mortality rates of the specified year.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.3.42 Mortality rate, under-5, male (per 1,000 live births) (wdi_mortu5m)

Long tag: qog_oecd_ts_wdi_mortu5m

Original tag: wdi_mortu5m

Description:
Under-five mortality rate, male is the probability per 1,000 that a newborn male baby will die before reaching

age five, if subject to male age-specific mortality rates of the specified year.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.3.43 Population, total (wdi_pop)

Long tag: qog_oecd_ts_wdi_pop

Original tag: wdi_pop

Description:

Total population is based on the de facto definition of population, which counts all residents regardless of legal status or citizenship. The values shown are midyear estimates.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.3.44 Population ages 0-14 (percent of total population) (wdi_pop14)

Long tag: qog_oecd_ts_wdi_pop14

Original tag: wdi_pop14

Description:

Total population between the ages 0 to 14 as a percentage of the total population. Population is based on the de facto definition of population, which counts all residents regardless of legal status or citizenship.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.3.45 Population ages 15-64 (percent of total population) (wdi_pop1564)

Long tag: qog_oecd_ts_wdi_pop1564

Original tag: wdi_pop1564

Description:

Total population between the ages 15 to 64 as a percentage of the total population. Population is based on the de facto definition of population, which counts all residents regardless of legal status or citizenship.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.3.46 Population ages 65 and above (percent of total population) (wdi_pop65)

Long tag: qog_oecd_ts_wdi_pop65

Original tag: wdi_pop65

Description:

Population ages 65 and above as a percentage of the total population. Population is based on the de facto definition of population, which counts all residents regardless of legal status or citizenship.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.3.47 Population density (people per sq. km of land area) (wdi_popden)

Long tag: qog_oecd_ts_wdi_popden

Original tag: wdi_popden

Description:

Population density is midyear population divided by land area in square kilometers. Population is based on the de facto definition of population, which counts all residents regardless of legal status or citizenship–except for refugees not permanently settled in the country of asylum, who are generally considered part of the population of their country of origin. Land area is a country's total area, excluding area under inland water bodies, national claims to continental shelf, and exclusive economic zones. In most cases the definition of inland water bodies includes major rivers and lakes.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.3.48 Population, female (percent of total population) (wdi_popf)

Long tag: qog_oecd_ts_wdi_popf

Original tag: wdi_popf

Description:

Female population is the percentage of the population that is female. Population is based on the de facto

definition of population, which counts all residents regardless of legal status or citizenship.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.3.49 Population growth (annual percent) (wdi_popgr)

Long tag: qog_oecd_ts_wdi_popgr

Original tag: wdi_popgr

Description:

Annual population growth rate for year t is the exponential rate of growth of midyear population from year t-1 to t, expressed as a percentage. Population is based on the de facto definition of population, which counts all residents regardless of legal status or citizenship.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.3.50 Rural population (percent of total population) (wdi_poprul)

Long tag: qog_oecd_ts_wdi_poprul

Original tag: wdi_poprul

Description:

Rural population refers to people living in rural areas as defined by national statistical offices. It is calculated as the difference between total population and urban population.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.3.51 Rural population growth (annual percent) (wdi_poprulgr)

Long tag: qog_oecd_ts_wdi_poprulgr

Original tag: wdi_poprulgr

Description:

Rural population growth. Rural population refers to people living in rural areas as defined by national statistical offices. It is calculated as the difference between total population and urban population.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.3.52 Urban population (percent of total population) (wdi_popurb)

Long tag: qog_oecd_ts_wdi_popurb

Original tag: wdi_popurb

Description:

Urban population refers to people living in urban areas as defined by national statistical offices. The data are collected and smoothed by United Nations Population Division.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.3.53 Urban population growth (annual percent) (wdi_popurbagr)

Long tag: qog_oecd_ts_wdi_popurbagr

Original tag: wdi_popurbagr

Description:

Urban population growth. Urban population refers to people living in urban areas as defined by national statistical offices. It is calculated using World Bank population estimates and urban ratios from the United Nations World Urbanization Prospects.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.3.54 Citizen Rights (wel_citrig)

Long tag: qog_oecd_ts_wel_citrig

Original tag: wel_citrig

Description:

Meaning: Conditional index that measures the prevalence of citizen rights as the presence of respect of political participation rights on the condition of the presence of respect of personal autonomy rights, using multiplication to combine the two [CitRig = PAR * PPR].

Source: Welzel's (2013: 254-263) "citizen rights index", available annually for most countries in the world from 1981 to 2010.
Scaling: Index scores range from 0 for the complete absence of citizen rights in law and practice to 1 for their full presence in law and practice, with proper fractions for intermediate positions.
Links: Data sources, rescaling procedures and replication data are meticulously documented in the Online Appendix to Welzel's (2013) Freedom Rising at www.cambridge.com/welzel (p. 72). Test statistics documenting this index's superior validity in comparison to alternative democracy measures are reported in Welzel (2013: 267-271).
Note: the missing code (-99) has been recoded to missing (.).

Variable citation: Welzel, C. (2013). *Freedom rising: Human empowerment and the quest for emancipation (1st ed.)*. Cambridge University Press

2.12.4 Religion

This category includes variables regarding numbers of followers of specific religions and the status of religion in the constitution.

2.12.4.1 Animist religions: Total (percent Adherents) (arda_angenpct)

Long tag: qog_oecd_ts_arda_angenpct

Original tag: arda_angenpct

Description:
Animist religions: Total (percent Adherents).

Variable citation: Maoz, Z., & Henderson, E. A. (2013). The world religion dataset, 1945-2010: Logic, estimates, and trends. *International Interactions*, 39(3)

2.12.4.2 Baha'i: Total (percent Adherents) (arda_bagenpct)

Long tag: qog_oecd_ts_arda_bagenpct

Original tag: arda_bagenpct

Description:
Baha'i: Total (percent Adherents).

Variable citation: Maoz, Z., & Henderson, E. A. (2013). The world religion dataset, 1945-2010: Logic, estimates, and trends. *International Interactions*, 39(3)

2.12.4.3 Buddhism: Total (percent Adherents) (arda_bugenpct)

Long tag: qog_oecd_ts_arda_bugenpct

Original tag: arda_bugenpct

Description:
Buddhism: Total (percent Adherents).

Variable citation: Maoz, Z., & Henderson, E. A. (2013). The world religion dataset, 1945-2010: Logic, estimates, and trends. *International Interactions*, 39(3)

2.12.4.4 Buddhism: Mahayana (percent Adherents) (arda_bumahpct)

Long tag: qog_oecd_ts_arda_bumahpct

Original tag: arda_bumahpct

Description:
Buddhism: Mahayana (percent Adherents).

Variable citation: Maoz, Z., & Henderson, E. A. (2013). The world religion dataset, 1945-2010: Logic, estimates, and trends. *International Interactions*, 39(3)

2.12.4.5 Buddhism: Other (percent Adherents) (arda_buothpct)

Long tag: qog_oecd_ts_arda_buothpct

Original tag: arda_buothpct

Description:
Buddhism: Other (percent Adherents).

Variable citation: Maoz, Z., & Henderson, E. A. (2013). The world religion dataset, 1945-2010: Logic, estimates, and trends. *International Interactions*, 39(3)

2.12.4.6 Buddhism: Theravada (percent Adherents) (arda_buthrpct)

Long tag: qog_oecd_ts_arda_buthrpct

Original tag: arda_buthrpct

Description:
Buddhism: Theravada (percent Adherents).

Variable citation: Maoz, Z., & Henderson, E. A. (2013). The world religion dataset, 1945-2010: Logic, estimates, and trends. *International Interactions*, 39(3)

2.12.4.7 Christianity: Anglican (percent Adherents) (arda_changpct)

Long tag: qog_oecd_ts_arda_changpct

Original tag: arda_changpct

Description:
Christianity: Anglican (percent Adherents).

Variable citation: Maoz, Z., & Henderson, E. A. (2013). The world religion dataset, 1945-2010: Logic, estimates, and trends. *International Interactions*, 39(3)

2.12.4.8 Christianity: Roman Catholics (percent Adherents) (arda_chcatpct)

Long tag: qog_oecd_ts_arda_chcatpct

Original tag: arda_chcatpct

Description:
Christianity: Roman Catholics (percent Adherents).

Variable citation: Maoz, Z., & Henderson, E. A. (2013). The world religion dataset, 1945-2010: Logic, estimates, and trends. *International Interactions*, 39(3)

2.12.4.9 Christianity: Total (percent Adherents) (arda_chgenpct)

Long tag: qog_oecd_ts_arda_chgenpct

Original tag: arda_chgenpct

Description:
Christianity: Total (percent Adherents).

Variable citation: Maoz, Z., & Henderson, E. A. (2013). The world religion dataset, 1945-2010: Logic, estimates, and trends. *International Interactions*, 39(3)

2.12.4.10 Christianity: Eastern Orthodox (percent Adherents) (arda_chortpct)

Long tag: qog_oecd_ts_arda_chortpct

Original tag: arda_chortpct

Description:
Christianity: Eastern Orthodox (percent Adherents).

Variable citation: Maoz, Z., & Henderson, E. A. (2013). The world religion dataset, 1945-2010: Logic, estimates, and trends. *International Interactions*, 39(3)

2.12.4.11 Christianity: Other (percent Adherents) (arda_chothpct)

Long tag: qog_oecd_ts_arda_chothpct

Original tag: arda_chothpct

Description:
Christianity: Other (percent Adherents).

Variable citation: Maoz, Z., & Henderson, E. A. (2013). The world religion dataset, 1945-2010: Logic, estimates, and trends. *International Interactions*, 39(3)

2.12.4.12 Christianity: Protestants (percent Adherents) (arda_chprtpct)

Long tag: qog_oecd_ts_arda_chprtpct

Original tag: arda_chprtpct

Description:
Christianity: Protestants (percent Adherents).

Variable citation: Maoz, Z., & Henderson, E. A. (2013). The world religion dataset, 1945-2010: Logic, estimates, and trends. *International Interactions*, 39(3)

2.12.4.13 Confucianism: Total (percent Adherents) (arda_cogenpct)

Long tag: qog_oecd_ts_arda_cogenpct

Original tag: arda_cogenpct

Description:
Confucianism: Total (percent Adherents).

Variable citation: Maoz, Z., & Henderson, E. A. (2013). The world religion dataset, 1945-2010: Logic, estimates, and trends. *International Interactions*, 39(3)

2.12.4.14 Hindu: Total (percent Adherents) (arda_higenpct)

Long tag: qog_oecd_ts_arda_higenpct

Original tag: arda_higenpct

Description:
Hindu: Total (percent Adherents).

Variable citation: Maoz, Z., & Henderson, E. A. (2013). The world religion dataset, 1945-2010: Logic, estimates, and trends. *International Interactions*, 39(3)

2.12.4.15 Islam: Ahmadiyya (percent Adherents) (arda_isahmpct)

Long tag: qog_oecd_ts_arda_isahmpct

Original tag: arda_isahmpct

Description:
Islam: Ahmadiyya (percent Adherents).

Variable citation: Maoz, Z., & Henderson, E. A. (2013). The world religion dataset, 1945-2010: Logic, estimates, and trends. *International Interactions*, 39(3)

2.12.4.16 Islam: Alawite (percent Adherents) (arda_isalapct)

Long tag: qog_oecd_ts_arda_isalapct

Original tag: arda_isalapct

Description:
Islam: Alawite (percent Adherents).

Variable citation: Maoz, Z., & Henderson, E. A. (2013). The world religion dataset, 1945-2010: Logic, estimates, and trends. *International Interactions*, 39(3)

2.12.4.17 Islam: Total (percent Adherents) (arda_isgenpct)

Long tag: qog_oecd_ts_arda_isgenpct

Original tag: arda_isgenpct

Description:
Islam: Total (percent Adherents).

Variable citation: Maoz, Z., & Henderson, E. A. (2013). The world religion dataset, 1945-2010: Logic, estimates, and trends. *International Interactions*, 39(3)

2.12.4.18 Islam: Ibadhi (percent Adherents) (arda_isibdpct)

Long tag: qog_oecd_ts_arda_isibdpct

Original tag: arda_isibdpct

Description:
Islam: Ibadhi (percent Adherents).

Variable citation: Maoz, Z., & Henderson, E. A. (2013). The world religion dataset, 1945-2010: Logic, estimates, and trends. *International Interactions*, 39(3)

2.12.4.19 Islam: Other (percent Adherents) (arda_islotpct)

Long tag: qog_oecd_ts_arda_islotpct

Original tag: arda_islotpct

Description:
Islam: Other (percent Adherents).

Variable citation: Maoz, Z., & Henderson, E. A. (2013). The world religion dataset, 1945-2010: Logic, estimates, and trends. *International Interactions*, 39(3)

2.12.4.20 Islam: Nation of Islam (percent Adherents) (arda_isnatpct)

Long tag: qog_oecd_ts_arda_isnatpct

Original tag: arda_isnatpct

Description:
Islam: Nation of Islam (percent Adherents).

Variable citation: Maoz, Z., & Henderson, E. A. (2013). The world religion dataset, 1945-2010: Logic, estimates, and trends. *International Interactions*, 39(3)

2.12.4.21 Islam: Shi'a (percent Adherents) (arda_isshipct)

Long tag: qog_oecd_ts_arda_isshipct

Original tag: arda_isshipct

Description:
Islam: Shi'a (percent Adherents).

Variable citation: Maoz, Z., & Henderson, E. A. (2013). The world religion dataset, 1945-2010: Logic, estimates, and trends. *International Interactions*, 39(3)

2.12.4.22 Islam: Sunni (percent Adherents) (arda_issunpct)

Long tag: qog_oecd_ts_arda_issunpct

Original tag: arda_issunpct

Description:
Islam: Sunni (percent Adherents).

Variable citation: Maoz, Z., & Henderson, E. A. (2013). The world religion dataset, 1945-2010: Logic, estimates, and trends. *International Interactions*, 39(3)

2.12.4.23 Jain: Total (percent Adherents) (arda_jagenpct)

Long tag: qog_oecd_ts_arda_jagenpct

Original tag: arda_jagenpct

Description:
Jain: Total (percent Adherents).

Variable citation: Maoz, Z., & Henderson, E. A. (2013). The world religion dataset, 1945-2010: Logic, estimates, and trends. *International Interactions*, 39(3)

2.12.4.24 Judaism: Conservative (percent Adherents) (arda_jdcnpct)

Long tag: qog_oecd_ts_arda_jdcnpct

Original tag: arda_jdcnpct

Description:
Judaism: Conservative (percent Adherents).

Variable citation: Maoz, Z., & Henderson, E. A. (2013). The world religion dataset, 1945-2010: Logic, estimates, and trends. *International Interactions*, 39(3)

2.12.4.25 Judaism: Total (percent Adherents) (arda_jdgenpct)

Long tag: qog_oecd_ts_arda_jdgenpct

Original tag: arda_jdgenpct

Description:
Judaism: Total (percent Adherents).

Variable citation: Maoz, Z., & Henderson, E. A. (2013). The world religion dataset, 1945-2010: Logic, estimates, and trends. *International Interactions*, 39(3)

2.12.4.26 Judaism: Orthodox (percent Adherents) (arda_jdorpct)

Long tag: qog_oecd_ts_arda_jdorpct

Original tag: arda_jdorpct

Description:
Judaism: Orthodox (percent Adherents).

Variable citation: Maoz, Z., & Henderson, E. A. (2013). The world religion dataset, 1945-2010: Logic, estimates, and trends. *International Interactions*, 39(3)

2.12.4.27 Judaism: Other (percent Adherents) (arda_jdotpct)

Long tag: qog_oecd_ts_arda_jdotpct

Original tag: arda_jdotpct

Description:
Judaism: Other (percent Adherents).

Variable citation: Maoz, Z., & Henderson, E. A. (2013). The world religion dataset, 1945-2010: Logic, estimates, and trends. *International Interactions*, 39(3)

2.12.4.28 Judaism: Reform (percent Adherents) (arda_jdrfpct)

Long tag: qog_oecd_ts_arda_jdrfpct

Original tag: arda_jdrfpct

Description:
Judaism: Reform (percent Adherents).

Variable citation: Maoz, Z., & Henderson, E. A. (2013). The world religion dataset, 1945-2010: Logic, estimates, and trends. *International Interactions*, 39(3)

2.12.4.29 Non-religious: Total (percent Adherents) (arda_norelpct)

Long tag: qog_oecd_ts_arda_norelpct

Original tag: arda_norelpct

Description:
Non-religious: Total (percent Adherents).

Variable citation: Maoz, Z., & Henderson, E. A. (2013). The world religion dataset, 1945-2010: Logic, estimates, and trends. *International Interactions*, 39(3)

2.12.4.30 Other religions: Total (percent Adherents) (arda_otgenpct)

Long tag: qog_oecd_ts_arda_otgenpct

Original tag: arda_otgenpct

Description:
Other religions: Total (percent Adherents).

Variable citation: Maoz, Z., & Henderson, E. A. (2013). The world religion dataset, 1945-2010: Logic, estimates, and trends. *International Interactions*, 39(3)

2.12.4.31 Shinto: Total (percent Adherents) (arda_shgenpct)

Long tag: qog_oecd_ts_arda_shgenpct

Original tag: arda_shgenpct

Description:
Shinto: Total (percent Adherents).

Variable citation: Maoz, Z., & Henderson, E. A. (2013). The world religion dataset, 1945-2010: Logic, estimates, and trends. *International Interactions*, 39(3)

2.12.4.32 Sikh: Total (percent Adherents) (arda_sigenpct)

Long tag: qog_oecd_ts_arda_sigenpct

Original tag: arda_sigenpct

Description:
Sikh: Total (percent Adherents).

Variable citation: Maoz, Z., & Henderson, E. A. (2013). The world religion dataset, 1945-2010: Logic, estimates, and trends. *International Interactions*, 39(3)

2.12.4.33 Syncretic religions: Total (percent Adherents) (arda_sygenpct)

Long tag: qog_oecd_ts_arda_sygenpct

Original tag: arda_sygenpct

Description:
Syncretic religions: Total (percent Adherents).

Variable citation: Maoz, Z., & Henderson, E. A. (2013). The world religion dataset, 1945-2010: Logic, estimates, and trends. *International Interactions*, 39(3)

2.12.4.34 Taoism: Total (percent Adherents) (arda_tagenpct)

Long tag: qog_oecd_ts_arda_tagenpct

Original tag: arda_tagenpct

Description:
Taoism: Total (percent Adherents).

Variable citation: Maoz, Z., & Henderson, E. A. (2013). The world religion dataset, 1945-2010: Logic, estimates, and trends. *International Interactions*, 39(3)

2.12.4.35 Zoroastrian: Total (percent Adherents) (arda_zogenpct)

Long tag: qog_oecd_ts_arda_zogenpct

Original tag: arda_zogenpct

Description:
Zoroastrian: Total (percent Adherents).

Variable citation: Maoz, Z., & Henderson, E. A. (2013). The world religion dataset, 1945-2010: Logic, estimates, and trends. *International Interactions*, 39(3)

2.12.4.36 Religious Legislation (biu_relleg)

Long tag: qog_oecd_ts_biu_relleg

Original tag: biu_relleg

Description:
Composite measure of religious legislation, 2014 (higher scores indicate higher levels of religious legislation).

Variable citation: Fox, J. (2011). Building composite measures of religion and state. *Interdisciplinary Journal of Research on Religion*, 7, 1–39 Fox, J. (2015). *Political secularism, religion, and the state: A time series analysis of worldwide data.* Cambridge University Press Fox, J. (2017). Religion and state dataset: Round 3. `http://www.religionandstate.org/` Fox, J., Finke, R., & Mataic, D. R. (2018). New data and measures on societal discrimination and religious minorities. *Interdisciplinary Journal of Research on Religion*, 2(14)

2.12.5 Conflict and Military Service

This category includes variables concerning armed conflict, including civil war and terrorism, govern- ment revenue and spending related to violent conflict (military expenditure, arms imports, military personnel).

2.12.5.1 Member of an Alliance (atop_ally)

Long tag: qog_oecd_ts_atop_ally

Original tag: atop_ally

Description:
Member of an Alliance

0. Not a member of an alliance
1. Member of an alliance

Variable citation: Leeds, B., Ashley, J., Ritter, S. M., McLaughlin, M., & Long, A. G. (2002). Alliance treaty obligations and provisions, 1815–1944. *International Interactions*, 28, 237–260

2.12.5.2 Consultancy Obligation (atop_consult)

Long tag: qog_oecd_ts_atop_consult

Original tag: atop_consult

Description:
Consultancy Obligation

0. Has no Consultancy obligations
1. Has Consultancy obligations

Variable citation: Leeds, B., Ashley, J., Ritter, S. M., McLaughlin, M., & Long, A. G. (2002). Alliance treaty obligations and provisions, 1815–1944. *International Interactions*, 28, 237–260

2.12.5.3 Defensive Obligation (atop_defensive)

Long tag: qog_oecd_ts_atop_defensive

Original tag: atop_defensive

Description:
Defensive Obligation

0. Has no defensive obligations
1. Has defensive obligations

Variable citation: Leeds, B., Ashley, J., Ritter, S. M., McLaughlin, M., & Long, A. G. (2002). Alliance treaty obligations and provisions, 1815–1944. *International Interactions*, 28, 237–260

2.12.5.4 Neutrality Obligation (atop_neutrality)

Long tag: qog_oecd_ts_atop_neutrality

Original tag: atop_neutrality

Description:
Neutrality Obligation

0. Has no Neutrality obligations
1. Has Neutrality obligations

Variable citation: Leeds, B., Ashley, J., Ritter, S. M., McLaughlin, M., & Long, A. G. (2002). Alliance treaty obligations and provisions, 1815–1944. *International Interactions*, 28, 237–260

2.12.5.5 Non-Aggression Obligation (atop_nonagg)

Long tag: qog_oecd_ts_atop_nonagg

Original tag: atop_nonagg

Description:
Non-Agression Obligation

0. Has no Non-Agression obligations
1. Has Non-Agression obligations

Variable citation: Leeds, B., Ashley, J., Ritter, S. M., McLaughlin, M., & Long, A. G. (2002). Alliance treaty obligations and provisions, 1815–1944. *International Interactions*, 28, 237–260

2.12.5.6 Number of Alliances (atop_number)

Long tag: qog_oecd_ts_atop_number

Original tag: atop_number

Description:
Number of Alliances

Variable citation: Leeds, B., Ashley, J., Ritter, S. M., McLaughlin, M., & Long, A. G. (2002). Alliance treaty obligations and provisions, 1815–1944. *International Interactions*, 28, 237–260

2.12.5.7 Offensive Obligation (atop_offensive)

Long tag: qog_oecd_ts_atop_offensive

Original tag: atop_offensive

Description:
Offensive Obligation

0. Has no offensive obligations
1. Has offensive obligations

Variable citation: Leeds, B., Ashley, J., Ritter, S. M., McLaughlin, M., & Long, A. G. (2002). Alliance treaty obligations and provisions, 1815–1944. *International Interactions*, 28, 237–260

2.12.5.8 Transition Year (atop_transyr)

Long tag: qog_oecd_ts_atop_transyr

Original tag: atop_transyr

Description:
Transition Year

Variable citation: Leeds, B., Ashley, J., Ritter, S. M., McLaughlin, M., & Long, A. G. (2002). Alliance treaty obligations and provisions, 1815–1944. *International Interactions*, 28, 237–260

2.12.5.9 Global Militarization Index (bicc_gmi)

Long tag: qog_oecd_ts_bicc_gmi

Original tag: bicc_gmi

Description:
The Global Militarization Index is divided into three overarching categories: expenditure, personnel and

heavy weapons. (See variables bicc_milexp, bicc_milper, and bicc_hw).

In order to increase the compatibility between different indicators and preventing extreme values from crating distortions when normalizing data, in a first step every indicator was represented in a logarithm with the factor 10. Second, all data was normalized using the formula x=(y-min)/(max-min), with min and max representing, respectively, the lowest and the highest value of the logarithm. In a third step, every indicator was weighted in accordance to a subjective factor, reflecting the relative importance attributed to it by BICC researchers. In order to calculate the final score, the weighted indicators were added together and then normalized one last time on a scale ranging from 0 to 1,000. For better comparison of individual years, all years were finally normalized.

Weighting Factors used:
Military expenditures as percentage of GDP - 5
Military expenditures in relation to health spending - 3
Military and paramilitary personnel in relation to population - 4
Military reservers in relation to population - 2
Military and paramilitary personnel in relation to physicians - 2
Heavy weapons in relation to population - 4

Variable citation: Mutschler, Max. M and Marius Bales. (2020). *Global Militarization Index 2020*. Bonn International Center for Conversion BICC. https://gmi.bicc.de/

2.12.5.10 Heavy Weapons Index (bicc_hw)

Long tag: qog_oecd_ts_bicc_hw

Original tag: bicc_hw

Description:

The GMI takes into consideration the number of an armed forces' heavy weapons in relation to the total population. Heavy weapons are defined here as any piece of military equipment which fits into either one of four categories: armored vehicles (armored personnel carriers, light tanks, main battle tanks), artillery (multiple rocket launchers, self-propelled artillery, towed artillery) above 100mm caliber, combat aircraft (attack helicopters, fixed-wing fighter aircraft), and major fighting ships (submarines, major surface combatants above corvette size).

Data on weapons holdings was collected by BICC from different sources, mainly the Military Balance from ISS. Data on small arms and light weapons (SALW) is not only extremely difficult to obtain but also unreliable and was thus not included in the GMI.

Variable citation: Mutschler, Max. M and Marius Bales. (2020). *Global Militarization Index 2020*. Bonn International Center for Conversion BICC. https://gmi.bicc.de/

2.12.5.11 Military Expenditure Index (bicc_milexp)

Long tag: qog_oecd_ts_bicc_milexp

Original tag: bicc_milexp

Description:

Military spending in relation to GDP and health spending are the most important indicators for determining the level of militarization. Financial resources which are made available via the military budget by a government are an important factor which affects capacities and size of a state's armed forces. The other indicator the GMI uses is the comparison between the total military budget and government spending on health services.

Figures for military expenditure are compiled from the data base of the Stockholm Peace Research Institute SIPRI. Even though SIPRI may currently be regarded as the most reliable source, data on military expenditure has to be treated with extreme caution. For many countries, especially in the developing world and autocratic states, the figures are but rough estimates. In cases where SIPRI does not provide any up-to-date information, we adopted the latest available figures provided they were no older than three years.

Data on gross domestic product was taken from the International Monetary Fund. Data on health expenditure used have been extracted from the data base of the World Health Organization.

Variable citation: Mutschler, Max. M and Marius Bales. (2020). *Global Militarization Index 2020*. Bonn International Center for Conversion BICC. https://gmi.bicc.de/

2.12.5.12 Military Personnel Index (bicc_milper)

Long tag: qog_oecd_ts_bicc_milper

Original tag: bicc_milper

Description:

The level of militarization is also represented by the relation of military personnel to the total population and physicians. The first and most important indicator in this category is the active (para)military personnel to the total population. Paramilitary personnel were included here, since in many countries the regular military

alone does not adequately reflect the total size of the armed forces.

The main criterion for coding an organizational entity as either military or paramilitary is that the forces in question are under the direct control of the government in addition to being armed, uniformed and garrisoned.

For a comprehensive presentation of the available personnel and an adequate representation of the relative level of militarization, a second indicator in this category takes into account the percentage of reserve forces in the total population. This factor is relevant for some countries, such as Switzerland that have a comparably small standing army but a more substantial amount of available reserves within society. The third indicator compares the total amount of military and paramilitary forces with the number of physicians in a country in order to express the relation between military and non-military expertise in a society.

All data on military personnel was compiled from the Military Balance, the yearbook published by the Institute for Strategic and International Studies (IISS). Population size figures were taken from the Vital Statistics Report of the United Nations; data on the number of physicians from the World Health Organization.

2.12.5.13 Political Terror Scale - Amnesty International (gd_ptsa)

Long tag: qog_oecd_ts_gd_ptsa

Original tag: gd_ptsa

Description:

Political Terror Scale Levels from the yearly country reports of Amnesty International:

1. Countries under a secure rule of law, people are not imprisoned for their view, and torture is rare or exceptional. Political murders are extremely rare.
2. There is a limited amount of imprisonment for nonviolent political activity. However, few persons are affected, torture and beatings are exceptional. Political murder is rare.
3. There is extensive political imprisonment, or a recent history of such imprisonment. Execution or other political murders and brutality may be common. Unlimited detention, with or without a trial, for political views is accepted.
4. Civil and political rights violations have expanded to large numbers of the population. Murders, disappearances, and torture are a common part of life. In spite of its generality, on this level terror affects those who interest themselves in politics or ideas.
5. Terror has expanded to the whole population. The leaders of these societies place no limits on the means or thoroughness with which they pursue personal or ideological goals.

Variable citation: Gibney, M., Cornett, L., Wood, R., Haschke, P., Arnon, D., Pisanò, A., Barrett, G., & Park, B. (2020). The political terror scale 1976-2019 [Data retrieved from the Political Terror Scale website]. `http://www.politicalterrorscale.org`

2.12.5.14 Political Terror Scale - US State Department (gd_ptss)

Long tag: qog_oecd_ts_gd_ptss

Original tag: gd_ptss

Description:

Political Terror Scale Levels from the the U.S. State Department Country Reports on Human Rights Practices:

1. Countries under a secure rule of law, people are not imprisoned for their view, and torture is rare or exceptional. Political murders are extremely rare.
2. There is a limited amount of imprisonment for nonviolent political activity. However, few persons are affected, torture and beatings are exceptional. Political murder is rare.
3. There is extensive political imprisonment, or a recent history of such imprisonment. Execution or other political murders and brutality may be common. Unlimited detention, with or without a trial, for political views is accepted.
4. Civil and political rights violations have expanded to large numbers of the population. Murders, disappearances, and torture are a common part of life. In spite of its generality, on this level terror affects those who interest themselves in politics or ideas.
5. Terror has expanded to the whole population. The leaders of these societies place no limits on the means or thoroughness with which they pursue personal or ideological goals.

2.12.5.15 Expenditure on defense, as percent of total gen. gov. exp. (gfs_def)

Long tag: qog_oecd_ts_gfs_def

Original tag: gfs_def

Description:
Total expenditure on defense, as the percentage of general government expenditure.

Variable citation: International Monetary Fund. (2019). Government finance statistics yearbook (gfsy) 2019. `https://data.imf.org/?sk=a0867067-d23c-4ebc-ad23-d3b015045405`

2.12.5.16 Ongoing Conflict (1-5 Higher intensity of conflict) (gpi_conf)

Long tag: qog_oecd_ts_gpi_conf

Original tag: gpi_conf

Description:
Ongoing Domestic and International Conflict (1 to 5, 5 refers to higher intensity of conflict) is one of the three subdomains of the GPI. It investigates the extent to which countries are involved in internal and external conflicts, as well as their role and duration of involvement in conflicts.

Variable citation: Institute for Economics and Peace. (2021). Global peace index 2021: Measuring peace in a complex world [Accessed 09-11-2021]. `http://visionofhumanity.org/reports`

2.12.5.17 Militarisation (1-5 Higher militarisation) (gpi_mil)

Long tag: qog_oecd_ts_gpi_mil

Original tag: gpi_mil

Description:
Militarisation (Scaled 1 to 5, 5 being more militarised) is one of the three subdomains of the GPI. It reflects the link between a country's level of military build-up and access to weapons and its level of peacefulness, both domestically and internationally.

Variable citation: Institute for Economics and Peace. (2021). Global peace index 2021: Measuring peace in a complex world [Accessed 09-11-2021]. `http://visionofhumanity.org/reports`

2.12.5.18 Executive Power over Military Force (iaep_epmf)

Long tag: qog_oecd_ts_iaep_epmf

Original tag: iaep_epmf

Description:
Does an executive have the power to use military force abroad without legislative approval?

0. No
1. Yes

Source: IAEP (Wig et al., 2015)

Variable citation: Wig, T., Hegre, H., & Regan, P. M. (2015). Updated data on institutions and elections 1960–2012: Presenting the iaep dataset version 2.0. *Research & Politics*, 2(2). `https://doi.org/10.1177/2053168015579120`

2.12.5.19 Some other executive have the power to use force abroad (iaep_milo)

Long tag: qog_oecd_ts_iaep_milo

Original tag: iaep_milo

Description:
Is the power to use military force vested in some other executive?

0. No
1. Yes

Source: IAEP (Wig et al., 2015)

Variable citation: Wig, T., Hegre, H., & Regan, P. M. (2015). Updated data on institutions and elections 1960–2012: Presenting the iaep dataset version 2.0. *Research & Politics*, 2(2). `https://doi.org/10.1177/2053168015579120`

2.12.5.20 Riots and Protests after Election (nelda_rpae)

Long tag: qog_oecd_ts_nelda_rpae

Original tag: nelda_rpae

Description:
If there are protests and riots after elections, a "Yes" is coded. The riots and protests should at least somewhat be related to the handling or outcome of the election.

Variable citation: Hyde, S. D., & Marinov, N. (2012). Which elections can be lost? *Political Analysis*, 20(2), 191–201 Hyde, S. D., & Marinov, N. (2021). Codebook for national elections across democracy and autocracy dataset, 5.0. `https://nelda.co/`

2.12.5.21 Violence and Civilian Deaths before Election (nelda_vcdbe)

Long tag: qog_oecd_ts_nelda_vcdbe

Original tag: nelda_vcdbe

Description:
If there was any significant violence relating to the elections that resulted in civilian deaths, a "Yes" is coded. These deaths should be at least plausibly related to the election, though sometimes it is difficult to be certain. Deaths related to civil war that are not intended to influence the election, and are not caused by the election, should not be counted.

Variable citation: Hyde, S. D., & Marinov, N. (2012). Which elections can be lost? *Political Analysis*, 20(2), 191–201 Hyde, S. D., & Marinov, N. (2021). Codebook for national elections across democracy and autocracy dataset, 5.0. `https://nelda.co/`

2.12.5.22 Structure of central gov. expenditures, defence (oecd_gengovdistri_t1b)

Long tag: qog_oecd_ts_oecd_gengovdistri_t1b

Original tag: oecd_gengovdistri_t1b

Description:
Structure of central government expenditures, defence.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. `https://doi.org/10.1787/20752288`

2.12.5.23 Internationalized internal armed conflict (ucdp_type4)

Long tag: qog_oecd_ts_ucdp_type4

Original tag: ucdp_type4

Description:
Number of internationalized internal armed conflicts per country in a given year. An internationalized internal armed conflict occurs between the government of a state and one or more internal opposition group(s) with intervention from other states (secondary parties) on one or both sides.

Variable citation: Pemstein, D., Meserve, S. A., & Melton, J. (2017). Democratic compromise: A latent variable analysis of ten measures of regime type. *Political Analysis*, 18(4), 426–449. `https://doi.org/10.1093/pan/mpq020`

2.12.5.24 Global Terrorism Index (voh_gti)

Long tag: qog_oecd_ts_voh_gti

Original tag: voh_gti

Description:
Global Terrorism Index.

2.12.5.25 Political Stability and Absence of Violence/Terrorism, Estimate (wbgi_pve)

Long tag: qog_oecd_ts_wbgi_pve

Original tag: wbgi_pve

Description:
Political Stability and Absence of Violence- Estimate: "Political Stability and Absence of Violence/Terrorism" measures perceptions of the likelihood of political instability and/or politically-motivated violence, including terrorism.

Variable citation: Kaufmann, D., Kraay, A., & Mastruzzi, M. (2010). The worldwide governance indicators: A summary of methodology, data and analytical issues. *World Bank Policy Research Working Paper, 5430*

2.12.5.26 Political Stability and Absence of Violence/Terrorism, Number of Sources (wbgi_pvn)

Long tag: qog_oecd_ts_wbgi_pvn

Original tag: wbgi_pvn

Description:
Political Stability and Absence of Violence - Number of Sources.

Variable citation: Kaufmann, D., Kraay, A., & Mastruzzi, M. (2010). The worldwide governance indicators: A summary of methodology, data and analytical issues. *World Bank Policy Research Working Paper, 5430*

2.12.5.27 Political Stability and Absence of Violence/Terrorism, Standard Error (wbgi_pvs)

Long tag: qog_oecd_ts_wbgi_pvs

Original tag: wbgi_pvs

Description:
Political Stability and Absence of Violence - Standard Errors.

Variable citation: Kaufmann, D., Kraay, A., & Mastruzzi, M. (2010). The worldwide governance indicators: A summary of methodology, data and analytical issues. *World Bank Policy Research Working Paper, 5430*

2.12.5.28 Armed forces personnel (percent of total labor force) (wdi_afp)

Long tag: qog_oecd_ts_wdi_afp

Original tag: wdi_afp

Description:
Armed forces personnel are active duty military personnel, including paramilitary forces if the training, organization, equipment, and control suggest they may be used to support or replace regular military forces. Labor force comprises all people who meet the International Labour Organization's definition of the economically active population.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.5.29 Armed forces personnel, total (wdi_afpt)

Long tag: qog_oecd_ts_wdi_afpt

Original tag: wdi_afpt

Description:
Armed forces personnel are active duty military personnel, including paramilitary forces if the training, organization, equipment, and control suggest they may be used to support or replace regular military forces.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.5.30 Arms exports (SIPRI trend indicator values) (wdi_armexp)

Long tag: qog_oecd_ts_wdi_armexp

Original tag: wdi_armexp

Description:
Exports - Arms transfers cover the supply of military weapons through sales, aid, gifts, and those made through manufacturing licenses. Data cover major conventional weapons such as aircraft, armored vehicles, artillery, radar systems, missiles, and ships designed for military use. Excluded are transfers of other military equipment such as small arms and light weapons, trucks, small artillery, ammunition, support equipment, technology transfers, and other services.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.5.31 Arms imports (SIPRI trend indicator values) (wdi_armimp)

Long tag: qog_oecd_ts_wdi_armimp

Original tag: wdi_armimp

Description:
Imports - Arms transfers cover the supply of military weapons through sales, aid, gifts, and those made through manufacturing licenses. Data cover major conventional weapons such as aircraft, armored vehicles, artillery, radar systems, missiles, and ships designed for military use. Excluded are transfers of other military equipment such as small arms and light weapons, trucks, small artillery, ammunition, support equipment, technology transfers, and other services.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.5.32 Military expenditure (percent of GDP) (wdi_expmil)

Long tag: qog_oecd_ts_wdi_expmil

Original tag: wdi_expmil

Description:
Military expenditure (percent of GDP). Military expenditures data from SIPRI are derived from the NATO definition, which includes all current and capital expenditures on the armed forces, including peacekeeping forces; defense ministries and other government agencies engaged in defense projects; paramilitary forces, if

these are judged to be trained and equipped for military operations; and military space activities. Such expenditures include military and civil personnel, including retirement pensions of military personnel and social services for personnel; operation and maintenance; procurement; military research and development; and military aid (in the military expenditures of the donor country). Excluded are civil defense and current expenditures for previous military activities, such as for veterans' benefits, demobilization, conversion, and destruction of weapons. This definition cannot be applied for all countries, however, since that would require much more detailed information than is available about what is included in military budgets and off-budget military expenditure items. (For example, military budgets might or might not cover civil defense, reserves and auxiliary forces, police and paramilitary forces, dual-purpose forces such as military and civilian police, military grants in kind, pensions for military personnel, and social security contributions paid by one part of government to another).

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.5.33 Military expenditure (percent of general government expenditure) (wdi_expmilge)

Long tag: qog_oecd_ts_wdi_expmilge

Original tag: wdi_expmilge

Description:

Military expenditure (percent of central government expenditure). Military expenditures data from SIPRI are derived from the NATO definition, which includes all current and capital expenditures on the armed forces, including peacekeeping forces; defense ministries and other government agencies engaged in defense projects; paramilitary forces, if these are judged to be trained and equipped for military operations; and military space activities. Such expenditures include military and civil personnel, including retirement pensions of military personnel and social services for personnel; operation and maintenance; procurement; military research and development; and military aid (in the military expenditures of the donor country). Excluded are civil defense and current expenditures for previous military activities, such as for veterans' benefits, demobilization, conversion, and destruction of weapons. This definition cannot be applied for all countries, however, since that would require much more detailed information than is available about what is included in military budgets and off-budget military expenditure items. (For example, military budgets might or might not cover civil defense, reserves and auxiliary forces, police and paramilitary forces, dual-purpose forces such as military and civilian police, military grants in kind, pensions for military personnel, and social security contributions paid by one part of government to another.)

2.12.5.34 Number of cabinet ministers with a military title (wgov_minmil)

Long tag: qog_oecd_ts_wgov_minmil

Original tag: wgov_minmil

Description:

The number of cabinet ministers with a military title. It should be noted that the authors have not done any extra checks on this variable, and solely have relied on the information provided in the "Chief of State And Cabinet Members Of Foreign Governments" directory. The information is based on national customs. Thus, in some countries military titles are consistently used, while this is not the case in other countries, and the authors therefore encourage researchers to be cautious when using this variable.

Variable citation: Nyrup, J., & Bramwell, S. (2020). Who governs? a new global dataset on members of cabinets. *American Political Science Review*, 114(4), 1366–1374

2.12.5.35 Number of people with a military title, based on all entries for the country in (wgov_totmil)

Long tag: qog_oecd_ts_wgov_totmil

Original tag: wgov_totmil

Description:

The number of people with a military title, based on all entries for the country in the dataset. It should be noted that the authors have not done any extra checks on this variable, and solely have relied on the information provided in the "Chief of State And Cabinet Members Of Foreign Governments" directory. The information is based on national customs. Thus, in some countries military titles are consistently used, while this is not the case in other countries, and the authors therefore encourage researchers to be cautious when using this variable.

2.12.6 Quality of Government

This category includes variables that are the core features of QoG (impartiality, bureaucratic quality and corruption) as well as measures that are broader (rule of law and transparency).

2.12.6.1 The Bayesian Corruption Indicator (bci_bci)

Long tag: qog_oecd_ts_bci_bci

Original tag: bci_bci

Description:

The BCI index values lie between 0 and 100, with an increase in the index corresponding to a raise in the level of corruption. This is a first difference with CPI and WGI where an increase means that the level of corruption has decreased.

There exists no objective scale on which to measure the perception of corruption and the exact scaling you use is to a large extent arbitrary. However, the authors were able to give the index an absolute scale: zero corresponds to a situation where all surveys say that there is absolutely no corruption. On the other hand, when the index is one, all surveys say that corruption is as bad as it gets according to their scale. This is another difference with CPI and WGI, where the scaling is relative. They are rescaled such that WGI has mean 0 and a standard deviation of 1 in each year, while CPI always lies between 0 and 100.

In contrast, the actual range of values of the BCI will change in each year, depending how close countries come to the situation where everyone agrees there is no corruption at all (0), or that corruption is as bad as it can get (100).

The absolute scale of the BCI index was obtained by rescaling all the individual survey data such that zero corresponds to the lowest possible level of corruption and 1 to the highest one. We subsequently rescaled the BCI index such that when all underlying indicators are zero (one), the expected value of the BCI index is zero (hundred).

Variable citation: Standaert, S. (2015). Divining the level of corruption: A bayesian state-space approach. *Journal of Comparative Economics*, 43(3), 782–803. https://doi.org/10.1016/j.jce.2014.05.007

2.12.6.2 The standard deviation of The Bayesian Corruption Indicator (bci_bcistd)

Long tag: qog_oecd_ts_bci_bcistd

Original tag: bci_bcistd

Description:

The standard deviation of the Bayesian Corruption Index.

Variable citation: Standaert, S. (2015). Divining the level of corruption: A bayesian state-space approach. *Journal of Comparative Economics*, 43(3), 782–803. https://doi.org/10.1016/j.jce.2014.05.007

2.12.6.3 State Fragility Index (cspf_sfi)

Long tag: qog_oecd_ts_cspf_sfi

Original tag: cspf_sfi

Description:

A country's fragility is closely associated with its state capacity to manage conflict; make and implement public policy; and deliver essential services and its systemic resilience in maintaining system coherence, cohesion, and quality of life; responding effectively to challenges and crises, and sustaining progressive development. State Fragility = Effectiveness Score + Legitimacy Score (25 points possible).

Variable citation: Marshall, M. G., & Elzinga-Marshall, G. (2017). Global report 2017: Conflict, governance, and state fragility

2.12.6.4 Functioning of Government (fh_fog)

Long tag: qog_oecd_ts_fh_fog

Original tag: fh_fog

Description:

Functioning of Government - The variable examines in what extent the freely elected head of government and a national legislative representative determine the policies of the government; if the government is free from pervasive corruption; and if the government is accountable to the electorate between elections and operates with openness and transparency. Countries are graded between 0 (worst) and 12 (best).

Variable citation: Freedom House. (2021a). Freedom in the world 2021. `https://freedomhouse.org/report/freedom-world`

2.12.6.5 ICRG Indicator of Quality of Government (icrg_qog)

Long tag: qog_oecd_ts_icrg_qog

Original tag: icrg_qog

Description:

The mean value of the ICRG variables "Corruption", "Law and Order" and "Bureaucracy Quality", scaled 0-1. Higher values indicate higher quality of government.

Corruption (originally 6 points)
This is an assessment of corruption within the political system. Such corruption is a threat to foreign investment for several reasons: it distorts the economic and financial environment; it reduces the efficiency of government and business by enabling people to assume positions of power through patronage rather than ability; and, last but not least, it introduces an inherent instability into the political process. The most common form of corruption met directly by business is financial corruption in the form of demands for special payments and bribes connected with import and export licenses, exchange controls, tax assessments, police protection, or loans. Such corruption can make it difficult to conduct business effectively, and in some cases may force the withdrawal or withholding of an investment. Although the measure takes such corruption into account, it is more concerned with actual or potential corruption in the form of excessive patronage, nepotism, job reservations, "favor-for-favors", secret party funding, and suspiciously close ties between politics and business. According to ICRG, these insidious sorts of corruption are potentially of much greater risk to foreign business in that they can lead to popular discontent, unrealistic and inefficient controls on the state economy, and encourage the development of the black market. The greatest risk in such corruption is that at some time it will become so overweening, or some major scandal will be suddenly revealed, so as to provoke a popular backlash, resulting in a fall or overthrow of the government, a major reorganizing or restructuring of the country's political institutions, or, at worst, a breakdown in law and order, rendering the country ungovernable.

Law and order (originally 6 points)
Law and Order are assessed separately, with each sub-component comprising zero to three points. The Law sub-component is an assessment of the strength and impartiality of the legal system, while the Order sub-component is an assessment of popular observance of the law. Thus, a country can enjoy a high rating in terms of its judicial system, but a low rating if it suffers from a very high crime rate or if the law is routinely ignored without effective sanction (for example, widespread illegal strikes).

Bureaucracy Quality (originally 4 points)
The institutional strength and quality of the bureaucracy is another shock absorber that tends to minimize revisions of policy when governments change. Therefore, high points are given to countries where the bureaucracy has the strength and expertise to govern without drastic changes in policy or interruptions in government services. In these low-risk countries, the bureaucracy tends to be somewhat autonomous from political pressure and to have an established mechanism for recruitment and training. Countries that lack the cushioning effect of a strong bureaucracy receive low points because a change in government tends to be traumatic in terms of policy formulation and day-to-day administrative functions.

The component variables can be purchased at http://epub.prsgroup.com/products/icrg

Variable citation: PRS Group et al. (2021). International country risk guide

2.12.6.6 Hanson Sigman State Capacity Index (lld_capacity)

Long tag: qog_oecd_ts_lld_capacity

Original tag: lld_capacity

Description:

Hanson and Sigman's State Capacity Estimate. Three dimensions of state capacity that their estimate relies on are extractive capacity, coercive capacity, and administrative capacity. The authors use Bayesian latent variable analysis to estimate state capacity at the conjunction of indicators related to these dimensions.

Variable citation: Hanson, J. K., & Sigman, R. (2021). Leviathans latent dimensions: Measuring state capacity for comparative political research. *The Journal of Politics*, 83(4), 1495–1510

2.12.6.7 Standard Deviation for Hanson Sigman State Capacity Index (lld_capstd)

Long tag: qog_oecd_ts_lld_capstd

Original tag: lld_capstd

Description:

Standard Deviation for Hanson and Sigman's State Capacity Estimate.

Variable citation: Hanson, J. K., & Sigman, R. (2021). Leviathans latent dimensions: Measuring state capacity for comparative political research. *The Journal of Politics*, 83(4), 1495–1510

2.12.6.8 The Property Right Protection Index (prp_prp)

Long tag: qog_oecd_ts_prp_prp

Original tag: prp_prp

Description:
The Poperty Rights Index measures (the perception of) the security of property rights, separately from other aspects of the rule of law. It combines all publicly available information on the perception of the security of property rights (18 singular indicators of property rights).

Variable citation: Ouattara, B., & Standaert, S. (2020). Property rights revisited. *European Journal of Political Economy*, 64, 101895. `https://doi.org/https://doi.org/10.1016/j.ejpoleco.2020.101895`

2.12.6.9 Estimated variance of the PRP point estimate (prp_std)

Long tag: qog_oecd_ts_prp_std

Original tag: prp_std

Description:
Estimated variance of the Property Rights Protection estimate.

Variable citation: Ouattara, B., & Standaert, S. (2020). Property rights revisited. *European Journal of Political Economy*, 64, 101895. `https://doi.org/https://doi.org/10.1016/j.ejpoleco.2020.101895`

2.12.6.10 Basic Human Needs (SPI) (spi_bn)

Long tag: qog_oecd_ts_spi_bn

Original tag: spi_bn

Description:
Basic Human Needs is one of the three components of the SPI, which are used to calculate the overall Social Progress Index. It assesses a population's capacity to survive with adequate nourishment and basic medical care, clean water, sanitation, adequate shelter, and personal safety.

Variable citation: The Social Progress Imperative. (2020). Social progress index. `www.socialprogress.org`

2.12.6.11 Foundations of Wellbeing (SPI) (spi_fob)

Long tag: qog_oecd_ts_spi_fob

Original tag: spi_fob

Description:
Foundations of Wellbeing is one of the three components of the SPI, which are used to calculate the overall Social Progress Index. It highlights the extent to which a country's residents can gain a basic education, obtain information and communicate freely, benefit from a modern healthcare system, and live in a healthy environment conducive to a long life.

Variable citation: The Social Progress Imperative. (2020). Social progress index. `www.socialprogress.org`

2.12.6.12 Opportunity (SPI) (spi_opp)

Long tag: qog_oecd_ts_spi_opp

Original tag: spi_opp

Description:
Opportunity is one of the three components of the SPI, which are used to calculate the overall Social Progress Index. Indicators on personal rights, personal freedom and choice, inclusiveness, and access to advanced education are used to assess the level of opportunity.

Variable citation: The Social Progress Imperative. (2020). Social progress index. `www.socialprogress.org`

2.12.6.13 Social Progress Index (spi_ospi)

Long tag: qog_oecd_ts_spi_ospi

Original tag: spi_ospi

Description:
Overall Social Progress Index. It aims to assess the capacity of a society to meet the basic human needs of its citizens, establish the building blocks that allow citizens and communities to enhance and sustain the quality of their lives, and create the conditions for all individuals to reach their full potential.

Variable citation: The Social Progress Imperative. (2020). Social progress index. `www.socialprogress.org`

2.12.6.14 Corruption Perceptions Index (ti_cpi)

Long tag: qog_oecd_ts_ti_cpi

Original tag: ti_cpi

Description:
Corruption Perceptions Index. Scale of 0-100 where a 0 equals the highest level of perceived corruption and 100 equals the lowest level of perceived corruption.

Variable citation: Transparency International. (2021). Corruption perception index 2020 [Licensed under CC-BY-ND 4.0]. `http://www.transparency.org/cpi`

2.12.6.15 Corruption Perceptions Index - max range (old method.) (ti_cpi_max_om)

Long tag: qog_oecd_ts_ti_cpi_max_om

Original tag: ti_cpi_max_om

Description:
Corruption Perceptions Index - Max Range (Old methodology). Highest possible value of the CPI for a country according to the 95percent confidence interval.

Variable citation: Transparency International. (2021). Corruption perception index 2020 [Licensed under CC-BY-ND 4.0]. `http://www.transparency.org/cpi`

2.12.6.16 Corruption Perceptions Index - min range (old method.) (ti_cpi_min_om)

Long tag: qog_oecd_ts_ti_cpi_min_om

Original tag: ti_cpi_min_om

Description:
Corruption Perceptions Index - Min Range (Old methodology). Lowest possible value of the CPI for a country according to the 95percent confidence interval.

Variable citation: Transparency International. (2021). Corruption perception index 2020 [Licensed under CC-BY-ND 4.0]. `http://www.transparency.org/cpi`

2.12.6.17 Corruption Perceptions Index (old methodology) (ti_cpi_om)

Long tag: qog_oecd_ts_ti_cpi_om

Original tag: ti_cpi_om

Description:
Corruption Perceptions Index (Old methodology). Scale of 0-10 where a 0 equals the highest level of perceived corruption and 10 equals the lowest level of perceived corruption.

Variable citation: Transparency International. (2021). Corruption perception index 2020 [Licensed under CC-BY-ND 4.0]. `http://www.transparency.org/cpi`

2.12.6.18 Standard Error for Corruption Perceptions Index (ti_se)

Long tag: qog_oecd_ts_ti_se

Original tag: ti_se

Description:
Standard Error for Corruption Perceptions Index.

Variable citation: Transparency International. (2021). Corruption perception index 2020 [Licensed under CC-BY-ND 4.0]. `http://www.transparency.org/cpi`

2.12.6.19 Academic Freedom Index (vdem_academ)

Long tag: qog_oecd_ts_vdem_academ

Original tag: vdem_academ

Description:
Academic freedom index. To what extent is academic freedom respected?

Clarifications: Academic freedom is understood as the right of academics, without constriction by prescribed doctrine, to freedom of teaching and discussion, freedom in carrying out research and disseminating and publishing the results thereof, freedom to express freely their opinion about the institution or system in which they work, freedom from institutional censorship and freedom to participate in professional or representative academic bodies (UNESCO 1997 Recommendation concerning the Status of Higher-Education Teaching Personnel). The Academic
Freedom Index is designed to provide an aggregated measure that captures the de facto realization of academic freedom, including the degree to which higher-education institutions are autonomous. Aggregation: The index is formed by point estimates drawn from a Bayesian factor analysis model including the following indicators: freedom to research and teach, freedom of academic exchange and dissemination, institutional autonomy, campus integrity, freedom of academic and cultural expression.

Variable citation: Coppedge, M., Gerring, J., Knutsen, C. H., Lindberg, S. I., Teorell, J., Alizada, N., Altman, D., Bernhard, M., Cornell, A., Fish, M. S., Gastaldi, L., Gjerløw, H., Glynn, A., Hicken, A., Hindle, G., Ilchenko, N., Krusell, J., Luhrmann, A., Maerz, S. F., . . . Ziblatt, D. (2021). 2.12.6.20 Political corruption index (vdem_corr)

Long tag: qog_oecd_ts_vdem_corr

Original tag: vdem_corr

Description:

Political corruption. Question: How pervasive is political corruption?

Clarification: The directionality of the V-Dem corruption index runs from less corrupt to more corrupt (unlike the other V-Dem variables that generally run from less democratic to more democratic situation). The corruption index includes measures of six distinct types of corruption that cover both different areas and levels of the polity realm, distinguishing between executive, legislative and judicial corruption. Within the executive realm, the measures also distinguish between corruption mostly pertaining to bribery and corruption due to embezzlement. Finally, they differentiate between corruption in the highest echelons of the executive (at the level of the rulers/cabinet) on the one hand, and in the public sector at large on the other. The measures thus tap into several distinguished types of corruption: both 'petty' and 'grand'; both bribery and theft; both corruption aimed and influencing law making and that affecting implementation. Aggregation: The index is arrived at by taking the average of (a) public sector corruption index; (b) executive corruption index; (c) the indicator for legislative corruption; and (d) the indicator for judicial corruption. In other words, these four different government spheres are weighted equally in the resulting index. V-Dem replaces missing values for countries with no legislature by only taking the average of (a), (b) and (d).

Variable citation: Coppedge, M., Gerring, J., Knutsen, C. H., Lindberg, S. I., Teorell, J., Alizada, N., Altman, D., Bernhard, M., Cornell, A., Fish, M. S., Gastaldi, L., Gjerløw, H., Glynn, A., Hicken, A., Hindle, G., Ilchenko, N., Krusell, J., Luhrmann, A., Maerz, S. F., . . . Ziblatt, D. (2021). V-dem [country-year/country-date] dataset v11.1. `https://doi.org/10.23696/vdemds21` Pemstein, D., Marquardt, K. L., Tzelgov, E., Wang, Y.-t., Medzihorsky, J., Krusell, J., Miri, F., & von Römer, J. (2021). The V-Dem measurement model: Latent variable analysis for crossnational and cross-temporal expert-coded data

2.12.6.21 Election vote buying (vdem_elvotbuy)

Long tag: qog_oecd_ts_vdem_elvotbuy

Original tag: vdem_elvotbuy

Description:

Election vote buying. Question: In this national election, was there evidence of vote and/or turnout buying?

Clarification: Vote and turnout buying refers to the distribution of money or gifts to individuals, families, or small groups in order to influence their decision to vote/not vote or whom to vote for. It does not include legislation targeted at specific constituencies, i.e., "porkbarrel" legislation. V-Dem uses a specifically designed measurement model to provide country-year point estimates, aggregated from multiple codings submitted by country experts by taking disagreement and measurement error into account. In this version of the variable, used in the QoG dataset, V-Dem has linearly translated the measurement model point estimates back to the original ordinal scale of each variable as an interval measure.

Variable citation: Coppedge, M., Gerring, J., Knutsen, C. H., Lindberg, S. I., Teorell, J., Alizada, N., Altman, D., Bernhard, M., Cornell, A., Fish, M. S., Gastaldi, L., Gjerløw, H., Glynn, A., Hicken, A., Hindle, G., Ilchenko, N., Krusell, J., Luhrmann, A., Maerz, S. F., . . . Ziblatt, D. (2021). (2021). The V-Dem measurement model: Latent variable analysis for crossnational and cross-temporal expert-coded data

2.12.6.22 Executive bribery and corrupt exchanges (vdem_exbribe)

Long tag: qog_oecd_ts_vdem_exbribe

Original tag: vdem_exbribe

Description:

Executive bribery and corrupt exchanges. Question: How routinely do members of the executive (the head of state, the head of government, and cabinet ministers), or their agents, grant favors in exchange for bribes, kickbacks, or other material inducements? V-Dem uses a specifically designed measurement model to provide country-year point estimates, aggregated from multiple codings submitted by country experts by taking disagreement and measurement error into account. In this version of the variable, used in the QoG dataset, V-Dem has linearly translated the measurement model point estimates back to the original ordinal scale of each variable as an interval measure.

Variable citation: Coppedge, M., Gerring, J., Knutsen, C. H., Lindberg, S. I., Teorell, J., Alizada, N., Altman, D., Bernhard, M., Cornell, A., Fish, M. S., Gastaldi, L., Gjerløw, H., Glynn, A., Hicken, A., Hindle, G., Ilchenko, N., Krusell, J., Luhrmann, A., Maerz, S. F., . . . Ziblatt, D. (2021). V-dem [country-year/country-date] dataset v11.1. `https://doi.org/10.23696/vdemds21` Pemstein, D., Marquardt, K. L., Tzelgov, E., Wang, Y.-t., Medzihorsky, J., Krusell, J., Miri, F., & von Römer, J. (2021). The V-Dem measurement model: Latent variable analysis for crossnational and cross-temporal expert-coded data

2.12.6.23 Public sector corrupt exchanges (vdem_excrptps)

Long tag: qog_oecd_ts_vdem_excrptps

Original tag: vdem_excrptps

Description:

Public sector corrupt exchanges. Question: How routinely do public sector employees grant favors in exchange for bribes, kickbacks, or other material inducements?

Clarification: When responding to this question, we would like you to think about a typical person employed by the public sector, excluding the military. If you think there are large discrepancies between branches of the public sector, between the national/federal and subnational/state level, or between the core bureaucracy and employees working with public service delivery, please try to average them out before stating your response. V-Dem uses a specifically designed measurement model to provide country-year point estimates, aggregated from multiple codings submitted by country experts by taking disagreement and measurement error into account. In this version of the variable, used in the QoG dataset, V-Dem has linearly translated the measurement model point estimates back to the original ordinal scale of each variable as an interval measure.

Variable citation: Coppedge, M., Gerring, J., Knutsen, C. H., Lindberg, S. I., Teorell, J., Alizada, N., Altman, D., Bernhard, M., Cornell, A., Fish, M. S., Gastaldi, L., Gjerløw, H., Glynn, A., Hicken, A., Hindle, G., Ilchenko, N., Krusell, J., Luhrmann, A., Maerz, S. F., . . . Ziblatt, D. (2021). (2021). The V-Dem measurement model: Latent variable analysis for crossnational and cross-temporal expert-coded data

2.12.6.24 Executive corruption index (vdem_execorr)

Long tag: qog_oecd_ts_vdem_execorr

Original tag: vdem_execorr

Description:

Executive corruption index. Question: How routinely do members of the executive, or their agents grant favors in exchange for bribes, kickbacks, or other material inducements, and how often do they steal, embezzle, or misappropriate public funds or other state resources for personal or family use?

Clarification: The directionality of the V-Dem corruption index runs from less corrupt to more corrupt (unlike the other V-Dem variables that generally run from less democratic to more democratic situation). Aggregation: The index is formed by taking the average of the point estimates from a Bayesian factor analysis model of the indicators for executive bribery and executive embezzlement.

Variable citation: Coppedge, M., Gerring, J., Knutsen, C. H., Lindberg, S. I., Teorell, J., Alizada, N., Altman, D., Bernhard, M., Cornell, A., Fish, M. S., Gastaldi, L., Gjerløw, H., Glynn, A., Hicken, A., Hindle, G., Ilchenko, N., Krusell, J., Luhrmann, A., Maerz, S. F., . . . Ziblatt, D. (2021). V-dem [country-year/country-date] dataset v11.1. `https://doi.org/10.23696/vdemds21` Pemstein, D., Marquardt, K. L., Tzelgov, E., Wang, Y.-t., Medzihorsky, J., Krusell, J., Miri, F., & von Römer, J. (2021). The V-Dem measurement model: Latent variable analysis for crossnational and cross-temporal expert-coded data

2.12.6.25 Executive embezzlement and theft (vdem_exembez)

Long tag: qog_oecd_ts_vdem_exembez

Original tag: vdem_exembez

Description:

Executive embezzlement and theft. Question: How often do members of the executive (the head of state, the head of government, and cabinet ministers), or their agents, steal, embezzle, or misappropriate public funds or other state resources for personal or family use? V-Dem uses a specifically designed measurement model to provide country-year point estimates, aggregated from multiple codings submitted by country experts by taking disagreement and measurement error into account. In this version of the variable, used in the QoG dataset, V-Dem has linearly translated the measurement model point estimates back to the original ordinal scale of each variable as an interval measure.

Variable citation: Coppedge, M., Gerring, J., Knutsen, C. H., Lindberg, S. I., Teorell, J., Alizada, N., Altman, D., Bernhard, M., Cornell, A., Fish, M. S., Gastaldi, L., Gjerløw, H., Glynn, A., Hicken, A., Hindle, G., Ilchenko, N., Krusell, J., Luhrmann, A., Maerz, S. F., . . . Ziblatt, D. (2021). (2021). The V-Dem measurement model: Latent variable analysis for crossnational and cross-temporal expert-coded data

2.12.6.27 Media corrupt (vdem_mecorrpt)

Long tag: qog_oecd_ts_vdem_mecorrpt

Original tag: vdem_mecorrpt

Description:

Media corrupt. Question: Do journalists, publishers, or broadcasters accept payments in exchange for altering news coverage? V-Dem uses a specifically designed measurement model to provide country-year point estimates, aggregated from multiple codings submitted by country experts by taking disagreement and measurement error into account. In this version of the variable, used in the QoG dataset, V-Dem has linearly translated the measurement model point estimates back to the original ordinal scale of each variable as an interval measure.

Variable citation: Coppedge, M., Gerring, J., Knutsen, C. H., Lindberg, S. I., Teorell, J., Alizada, N., Altman, D., Bernhard, M., Cornell, A., Fish, M. S., Gastaldi, L., Gjerløw, H., Glynn, A., Hicken, A., Hindle, G., Ilchenko, N., Krusell, J., Luhrmann, A., Maerz, S. F., . . . Ziblatt, D. (2021). V-dem [country-year/country-date] dataset v11.1. `https://doi.org/10.23696/vdemds21` Pemstein, D., Marquardt, K. L., Tzelgov, E., Wang, Y.-t., Medzihorsky, J., Krusell, J., Miri, F., & von Römer, J. (2021). The V-Dem measurement model: Latent variable analysis for crossnational and cross-temporal expert-coded data

2.12.6.28 Public sector corruption index (vdem_pubcorr)

Long tag: qog_oecd_ts_vdem_pubcorr

Original tag: vdem_pubcorr

Description:

Public sector corruption index. Question: To what extent do public sector employees grant favors in exchange for bribes, kickbacks, or other material inducements, and how often do they steal, embezzle, or misappropriate public funds or other state resources for personal or family use?

Clarification: The directionality of the V-Dem corruption index runs from less corrupt to more corrupt (unlike the other V-Dem variables that generally run from less democratic to more democratic situation). Aggregation: The index is formed by taking the average of the point estimates from a Bayesian factor analysis model of the indicators for public sector bribery and embezzlement.

Variable citation: Coppedge, M., Gerring, J., Knutsen, C. H., Lindberg, S. I., Teorell, J., Alizada, N., Altman, D., Bernhard, M., Cornell, A., Fish, M. S., Gastaldi, L., Gjerløw, H., Glynn, A., Hicken, A., Hindle, G., Ilchenko, N., Krusell, J., Luhrmann, A., Maerz, S. F., . . . Ziblatt, D. (2021). (2021). The V-Dem measurement model: Latent variable analysis for crossnational and cross-temporal expert-coded data

2.12.6.29 Control of Corruption, Estimate (wbgi_cce)

Long tag: qog_oecd_ts_wbgi_cce

Original tag: wbgi_cce

Description:

Control of Corruption - Estimate: "Control of Corruption" measures perceptions of corruption, conventionally defined as the exercise of public power for private gain. The particular aspect of corruption measured by the various sources differs somewhat, ranging from the frequency of "additional payments to get things done", to the effects of corruption on the business environment, to measuring "grand corruption" in the political arena or in the tendency of elite forms to engage in "state capture".

Variable citation: Kaufmann, D., Kraay, A., & Mastruzzi, M. (2010). The worldwide governance indicators: A summary of methodology, data and analytical issues. *World Bank Policy Research Working Paper, 5430*

2.12.6.30 Control of Corruption, Number of Sources (wbgi_ccn)

Long tag: qog_oecd_ts_wbgi_ccn

Original tag: wbgi_ccn

Description:
Control of Corruption - Number of Sources.

Variable citation: Kaufmann, D., Kraay, A., & Mastruzzi, M. (2010). The worldwide governance indicators: A summary of methodology, data and analytical issues. *World Bank Policy Research Working Paper, 5430*

2.12.6.31 Control of Corruption, Standard Error (wbgi_ccs)

Long tag: qog_oecd_ts_wbgi_ccs

Original tag: wbgi_ccs

Description:
Control of Corruption - Standard Errors.

Variable citation: Kaufmann, D., Kraay, A., & Mastruzzi, M. (2010). The worldwide governance indicators: A summary of methodology, data and analytical issues. *World Bank Policy Research Working Paper, 5430*

2.12.6.32 Government Effectiveness, Estimate (wbgi_gee)

Long tag: qog_oecd_ts_wbgi_gee

Original tag: wbgi_gee

Description:
Government Effectiveness - Estimate: "Government Effectiveness" combines into a single grouping responses on the quality of public service provision, the quality of the bureaucracy, the competence of civil servants, the independence of the civil service from political pressures, and the credibility of the government's commitment to policies. The main focus of this index is on "inputs" required for the government to be able to produce and implement good policies and deliver public goods.

Variable citation: Kaufmann, D., Kraay, A., & Mastruzzi, M. (2010). The worldwide governance indicators: A summary of methodology, data and analytical issues. *World Bank Policy Research Working Paper, 5430*

2.12.6.33 Government Effectiveness, Number of Sources (wbgi_gen)

Long tag: qog_oecd_ts_wbgi_gen

Original tag: wbgi_gen

Description:
Government Effectiveness - Number of Sources.

Variable citation: Kaufmann, D., Kraay, A., & Mastruzzi, M. (2010). The worldwide governance indicators: A summary of methodology, data and analytical issues. *World Bank Policy Research Working Paper, 5430*

2.12.6.34 Government Effectiveness, Standard Error (wbgi_ges)

Long tag: qog_oecd_ts_wbgi_ges

Original tag: wbgi_ges

Description:
Government Effectiveness - Standard Errors.

Variable citation: Kaufmann, D., Kraay, A., & Mastruzzi, M. (2010). The worldwide governance indicators: A summary of methodology, data and analytical issues. *World Bank Policy Research Working Paper, 5430*

2.12.6.35 Control of Corruption (wel_coc)

Long tag: qog_oecd_ts_wel_coc

Original tag: wel_coc

Description:
Meaning: Factor scale from the World Bank's "global governance indicators" measuring the degree of corruption control in a country.
Source: Alexander and Welzel (2011); Alexander, Inglehart and Welzel (2012). Categorization is available in annual measures for most countries of the world from 1996 to 2006.
Scaling: The factor scores are standardized into a range from minimum 0 (for the lowest ever observed corruption control) to maximum 1.0 (for the highest ever observed corruption control), with fractions for intermediate positions. Note: In the original data there exists two different observations for Dominica, the value has been recoded to missing for this country.

Variable citation: Welzel, C. (2013). *Freedom rising: Human empowerment and the quest for emancipation (1st ed.)*. Cambridge University Press

2.12.7 Political System

This category includes variables describing the rules of the political system (presidential or parlia- mentary system), the chief executive (years in office), regime type, stability (age of present regime), and checks and balances as well as aspects of federalism.

2.12.7.1 Official Religion (biu_offrel)

Long tag: qog_oecd_ts_biu_offrel

Original tag: biu_offrel

Description:

Official Religion measures whether the government has an established religion. For a religion to be established there must be a constitutional clause, a law, or the equivalent explicitly stating that a specific religion or specific religions are the official religions of that state. This variable is coded on the following scale:

0. The State has no official religion
1. The state has multiple established religions
2. The state has one established religion

Variable citation: Fox, J. (2011). Building composite measures of religion and state. *Interdisciplinary Journal of Research on Religion*, 7, 1–39 Fox, J. (2015). *Political secularism, religion, and the state: A time series analysis of worldwide data.* Cambridge University Press Fox, J. (2017). New data and measures on societal discrimination and religious minorities. *Interdisciplinary Journal of Research on Religion*, 2(14)

2.12.7.2 Dichotomous democracy measure (bmr_dem)

Long tag: qog_oecd_ts_bmr_dem

Original tag: bmr_dem

Description:

Dichotomous democracy measure.

Variable citation: Boix, C., Miller, M. K., & Rosato, S. (2022). Boix-miller-rosato dichotomous coding of democracy, 1800-2020 [UNF:6:6u8JNSHqP+yYKbLzrgFDug== [fileUNF]]. *Harvard Dataverse, V1.* https://doi.org/https://doi.org/10.7910/DVN/FENWWR Boix, C., Miller, M. K., & Rosato, S. (2013). A complete data set of political regimes, 1800-2007. *Comparative Political Studies*, 46(12), 1523–54

2.12.7.3 Number of previous democratic breakdowns (bmr_dembr)

Long tag: qog_oecd_ts_bmr_dembr

Original tag: bmr_dembr

Description:

Previous number of democratic breakdowns.

Variable citation: Boix, C., Miller, M. K., & Rosato, S. (2022). Boix-miller-rosato dichotomous coding of democracy, 1800-2020 [UNF:6:6u8JNSHqP+yYKbLzrgFDug== [fileUNF]]. *Harvard Dataverse, V1.* https://doi.org/https://doi.org/10.7910/DVN/FENWWR Boix, C., Miller, M. K., & Rosato, S. (2013). A complete data set of political regimes, 1800-2007. *Comparative Political Studies*, 46(12), 1523–54

2.12.7.4 Consecutive years of current regime type (bmr_demdur)

Long tag: qog_oecd_ts_bmr_demdur

Original tag: bmr_demdur

Description:

Consecutive years of current regime type.

Variable citation: Boix, C., Miller, M. K., & Rosato, S. (2022). Boix-miller-rosato dichotomous coding of democracy, 1800-2020 [UNF:6:6u8JNSHqP+yYKbLzrgFDug== [fileUNF]]. *Harvard Dataverse, V1.* https://doi.org/https://doi.org/10.7910/DVN/FENWWR Boix, C., Miller, M. K., & Rosato, S. (2013). A complete data set of political regimes, 1800-2007. *Comparative Political Studies*, 46(12), 1523–54

2.12.7.5 Democracy measure, requiring min. 50percent of adult women have the right to vote (bmr_demfsuf)

Long tag: qog_oecd_ts_bmr_demfsuf

Original tag: bmr_demfsuf

Description:

This adjusts democracy by also requiring that at least half of adult women have the right to vote.

Variable citation: Boix, C., Miller, M. K., & Rosato, S. (2022). Boix-miller-rosato dichotomous coding of democracy, 1800-2020 [UNF:6:6u8JNSHqP+yYKbLzrgFDug== [fileUNF]]. *Harvard Dataverse, V1.*

https://doi.org/https://doi.org/10.7910/DVN/FENWWR Boix, C., Miller, M. K., & Rosato, S. (2013). A complete data set of political regimes, 1800-2007. *Comparative Political Studies*, 46(12), 1523–54

2.12.7.6 Dichotomous democracy measure (incl. missing for some countries) (bmr_demmis)

Long tag: qog_oecd_ts_bmr_demmis

Original tag: bmr_demmis

Description:

This is the same measure as democracy (bmr_dem), except it records an NA for countries occupied during an international war (e.g., the Netherlands 1940-44) or experiencing state collapse during a civil war (e.g., Lebanon 1976-89). The democracy variable instead fills in these years as continuations of the same regime type.

Variable citation: Boix, C., Miller, M. K., & Rosato, S. (2022). Boix-miller-rosato dichotomous coding of democracy, 1800-2020 [UNF:6:6u8JNSHqP+yYKbLzrgFDug== [fileUNF]]. *Harvard Dataverse, V1.* https://doi.org/https://doi.org/10.7910/DVN/FENWWR Boix, C., Miller, M. K., & Rosato, S. (2013). A complete data set of political regimes, 1800-2007. *Comparative Political Studies*, 46(12), 1523–54

2.12.7.7 Democratic transition (bmr_demtran)

Long tag: qog_oecd_ts_bmr_demtran

Original tag: bmr_demtran

Description:

(-1) Democratic breakdown
(0) No change
(1) Democratic transition

Variable citation: Boix, C., Miller, M. K., & Rosato, S. (2022). Boix-miller-rosato dichotomous coding of democracy, 1800-2020 [UNF:6:6u8JNSHqP+yYKbLzrgFDug== [fileUNF]]. *Harvard Dataverse, V1.* https://doi.org/https://doi.org/10.7910/DVN/FENWWR Boix, C., Miller, M. K., & Rosato, S. (2013). A complete data set of political regimes, 1800-2007. *Comparative Political Studies*, 46(12), 1523–54

2.12.7.8 Democratic Breakdown (bnr_dem)

Long tag: qog_oecd_ts_bnr_dem

Original tag: bnr_dem

Description:

The variable is a binary coding of all democracies from 1913 until 2005 (included in the QoG dataset are only the years 1946-2005) prepared for use in event history analysis. Countries that meet the minimum conditions for democracy (see below) enter the dataset and are coded "0". When countries cease to meet those minimum criteria they are coded "1" and exit from the dataset. If, after a democratic breakdown, a country again meets our minimum criteria it re-enters the data as a new democratic episode. The time frame onset in 1913 is a function of when the first country (Norway) meets the minimum conditions. All series terminate in either in a breakdown in various years or right censorship in 2005. The minimal conditions are based on Dahl's notion of polyarchy (competitiveness, inclusiveness) combined with Linz and Stepan's stateness criteria.

Competitiveness: Countries that hold elections for both the executive and legislature, and in which more than one party contests the elections, are included. However, we exclude cases in which we detected outcome changing vote fraud, in which there was either extensive or extreme violence that inhibited voters' preference expression, or in which political parties representing a substantial portion of the population were banned.

Inclusiveness: We only include competitive polities in which at least fifty percent of all adult citizens are enfranchised to vote in our set of democracies.

Stateness: We also considered questions of sovereignty, not including colonial states, where founding elections were held prior to the granting of independence, and countries experiencing internal wars in which twenty percent or greater of the population or territory was out of control of the state.

2.12.7.9 No. of chambers in parliament (br_chpar)

Long tag: qog_oecd_ts_br_chpar

Original tag: br_chpar

Description:

Total number of chambers in parliament.

Variable citation: Bjørnskov, C., & Rode, M. (2020). Regime types and regime change: A new dataset on democracy, coups, and political institutions. *Review of International Organizations*, 15, 531–551

2.12.7.10 Is the country a colony (br_col)

Long tag: qog_oecd_ts_br_col

Original tag: br_col

Description:
Is the country a colony? (0: No; 1: Yes)

Variable citation: Bjørnskov, C., & Rode, M. (2020). Regime types and regime change: A new dataset on democracy, coups, and political institutions. *Review of International Organizations*, 15, 531–551

2.12.7.11 Is the country communist / socialist (br_com)

Long tag: qog_oecd_ts_br_com

Original tag: br_com

Description:
Is the country's regime communist / socialist? (0: No; 1: Yes)

Variable citation: Bjørnskov, C., & Rode, M. (2020). Regime types and regime change: A new dataset on democracy, coups, and political institutions. *Review of International Organizations*, 15, 531–551

2.12.7.12 Is the country a democracy (br_dem)

Long tag: qog_oecd_ts_br_dem

Original tag: br_dem

Description:
Is the country democratic or not? following Cheibub, Ghandi and Vreeland (2010). Dichotomous indicator of democracy based on a minimalist definition. A country is defined as democratic, if elections were conducted, these were free and fair, and if there was a peaceful turnover of legislative and executive offices following those elections. (0: No; 1: Yes)

Variable citation: Bjørnskov, C., & Rode, M. (2020). Regime types and regime change: A new dataset on democracy, coups, and political institutions. *Review of International Organizations*, 15, 531–551

2.12.7.13 New constitution implemented (br_newconst)

Long tag: qog_oecd_ts_br_newconst

Original tag: br_newconst

Description:
Whether a new constitution was implemented (0: No; 1: Yes)

Variable citation: Bjørnskov, C., & Rode, M. (2020). Regime types and regime change: A new dataset on democracy, coups, and political institutions. *Review of International Organizations*, 15, 531–551

2.12.7.14 Central Bank Independence unweighted index (cbi_cbiu)

Long tag: qog_oecd_ts_cbi_cbiu

Original tag: cbi_cbiu

Description:
CBI unweighted index: Raw average of the four components: Chief Executive Officer, Objectives, Policy Formulation and Limitations on lending to the government. It ranges from 0 (minimum) to 1 (maximum) CBI.

Variable citation: Garriga, A. C. (2016). Central bank independence in the world: A new dataset. *International Interactions*, 42(5), 849–868. `https://doi.org/10.1080/03050629.2016.1188813`

2.12.7.15 Central Bank Independence weighted index (cbi_cbiw)

Long tag: qog_oecd_ts_cbi_cbiw

Original tag: cbi_cbiw

Description:
CBI weighted index: Weighted average of the four components (weights between parentheses), following Cukierman, Webb and Neyapti's (1992) criteria: Chief Executive Officer (0.20), Objectives (0.15), Policy Formulation (0.15), and Limitations on lending to the government (0.5). It ranges from 0 (minimum) to 1 (maximum) CBI.

Variable citation: Garriga, A. C. (2016). Central bank independence in the world: A new dataset. *International Interactions*, 42(5), 849–868. `https://doi.org/10.1080/03050629.2016.1188813`

2.12.7.16 Component 1: Chief executive officer (cbi_cceo)

Long tag: qog_oecd_ts_cbi_cceo

Original tag: cbi_cceo

Description:

Component 1: Chief executive officer. Weighted average of the following variables (weights between parentheses): Term of office of CEO (0.25), Who appoints the CEO (0.25), Provisions for dismissal of CEO (0.25), CEO allowed to hold another office in government (0.25).

Variable citation: Garriga, A. C. (2016). Central bank independence in the world: A new dataset. *International Interactions*, 42(5), 849–868. `https://doi.org/10.1080/03050629.2016.1188813`

2.12.7.17 Component 4: Limitations on lending to the government (cbi_cll)

Long tag: qog_oecd_ts_cbi_cll

Original tag: cbi_cll

Description:

Component 4: Limitations on lending to the government. Weighted average of the following variables (weights between parentheses): Limitations on advances (0.30); Limitations on securitized lending (0.20); Who decides the terms of lending to government (0.20); Beneficiaries of central bank lending (0.10); Type of limits when they exist (0.05); Maturity of loans (0.05); Restrictions on interest rates (0.05); Prohibition on central bank lending in primary market to Government (0.05).

Variable citation: Garriga, A. C. (2016). Central bank independence in the world: A new dataset. *International Interactions*, 42(5), 849–868. `https://doi.org/10.1080/03050629.2016.1188813`

2.12.7.18 Component 2: Objectives (cbi_cobj)

Long tag: qog_oecd_ts_cbi_cobj

Original tag: cbi_cobj

Description:

Component 2: Objectives. Central bank objectives as stated in the law (coding between parentheses): Price stability is the major or only objective, and in case of conflict with other objectives, the Central Bank has final authority (1); Price stability is the only objective (0.8); Price stability is one of the objectives, with other compatible objectives (0.6); Price stability is one of the objectives, with other potentially conflicting goals (0.4); Central Bank charter does not contain any objective (0.2); Some objectives appear in the charter but price stability is not one of them (0).

Variable citation: Garriga, A. C. (2016). Central bank independence in the world: A new dataset. *International Interactions*, 42(5), 849–868. `https://doi.org/10.1080/03050629.2016.1188813`

2.12.7.19 Component 3: Policy formulation (cbi_cpol)

Long tag: qog_oecd_ts_cbi_cpol

Original tag: cbi_cpol

Description:

Component 3: Policy formulation. Weighted average of the following variables (weights between parentheses): Who formulates monetary policy (0.25); Who has the final decision in monetary policy (0.50), Role of the central bank in the budget process (0.25).

Variable citation: Garriga, A. C. (2016). Central bank independence in the world: A new dataset. *International Interactions*, 42(5), 849–868. `https://doi.org/10.1080/03050629.2016.1188813`

2.12.7.20 Year of law creating the central bank (cbi_create)

Long tag: qog_oecd_ts_cbi_create

Original tag: cbi_create

Description:

1 indicates the year of the law creating the central bank, 0 otherwise.

Variable citation: Garriga, A. C. (2016). Central bank independence in the world: A new dataset. *International Interactions*, 42(5), 849–868. `https://doi.org/10.1080/03050629.2016.1188813`

2.12.7.21 Year of a reform that decreased central bank independence (cbi_dec)

Long tag: qog_oecd_ts_cbi_dec

Original tag: cbi_dec

Description:

1 indicates the year of a reform that decreased CBI, according to the CBI weighted index, 0 otherwise

Variable citation: Garriga, A. C. (2016). Central bank independence in the world: A new dataset. *International Interactions*, 42(5), 849–868. `https://doi.org/10.1080/03050629.2016.1188813`

2.12.7.22 Effect of the central bank reform on the weighted index (cbi_dir)

Long tag: qog_oecd_ts_cbi_dir

Original tag: cbi_dir

Description:

Effect of the central bank reform on the CBI weighted index: 1 indicates an increase in CBI; 0 indicates no changes in the level of CBI; 1 indicates the presence of a central bank reform that increased CBI.

Variable citation: Garriga, A. C. (2016). Central bank independence in the world: A new dataset. *International Interactions*, 42(5), 849–868. `https://doi.org/10.1080/03050629.2016.1188813`

2.12.7.23 Year of a reform that increased central bank independence (cbi_inc)

Long tag: qog_oecd_ts_cbi_inc

Original tag: cbi_inc

Description:

1 indicates the year of a reform that increased CBI, according to the CBI weighted index, 0 otherwise.

Variable citation: Garriga, A. C. (2016). Central bank independence in the world: A new dataset. *International Interactions*, 42(5), 849–868. `https://doi.org/10.1080/03050629.2016.1188813`

2.12.7.24 Year of a reform that affects the central bank independence (cbi_ref)

Long tag: qog_oecd_ts_cbi_ref

Original tag: cbi_ref

Description:

1 indicates the year of a reform that affects CBI, 0 otherwise.

Variable citation: Garriga, A. C. (2016). Central bank independence in the world: A new dataset. *International Interactions*, 42(5), 849–868. `https://doi.org/10.1080/03050629.2016.1188813`

2.12.7.25 Whether the central bank is a regional organization (cbi_reg)

Long tag: qog_oecd_ts_cbi_reg

Original tag: cbi_reg

Description:

Indicates whether the central bank is a regional organization (1), or a national central bank (0).

Variable citation: Garriga, A. C. (2016). Central bank independence in the world: A new dataset. *International Interactions*, 42(5), 849–868. `https://doi.org/10.1080/03050629.2016.1188813`

2.12.7.26 Reference in Constitution to Democracy (ccp_democ)

Long tag: qog_oecd_ts_ccp_democ

Original tag: ccp_democ

Description:

Does the constitution refer to “democracy” or “democratic”?

1. Yes
2. No

Variable citation: Elkins, Z., & Ginsburg, T. (2021). Characteristics of national constitutions, version 3.0 [Last modified: May 20, 2021. Available at comparativeconstitutionsproject.org]. `http://www.comparativeconstitutionsproject.org`

2.12.7.27 Legislative Initiative Allowed (ccp_initiat)

Long tag: qog_oecd_ts_ccp_initiat

Original tag: ccp_initiat

Description:

Does the constitution provide for the ability of individuals to propose legislative initiatives?

1. Yes
2. No
96. Other

Variable citation: Elkins, Z., & Ginsburg, T. (2021). Characteristics of national constitutions, version 3.0 [Last modified: May 20, 2021. Available at comparativeconstitutionsproject.org]. `http://www.comparativeconstitutionsproject.org`

2.12.7.28 Reference in Constitution to Socialism (ccp_socialsm)

Long tag: qog_oecd_ts_ccp_socialsm

Original tag: ccp_socialsm

Description:

Does the constitution refer to "socialism" or "socialist"?

1. Yes
2. No
96. Other

Variable citation: Elkins, Z., & Ginsburg, T. (2021). Characteristics of national constitutions, version 3.0 [Last modified: May 20, 2021. Available at comparativeconstitutionsproject.org]. `http://www.comparativeconstitutionsproject.org`

2.12.7.29 Democracy (chga_demo)

Long tag: qog_oecd_ts_chga_demo

Original tag: chga_demo

Description:

A regime is considered a democracy if the executive and the legislature is directly or indirectly elected by popular vote, multiple parties are allowed, there is de facto existence of multiple parties outside of regime front, there are multiple parties within the legislature, and there has been no consolidation of incumbent advantage (e.g. unconstitutional closing of the lower house or extension of incumbent's term by postponing of subsequent elections). Transition years are coded as the regime that emerges in that year.

0. No Democracy
1. Democracy

Variable citation: Cheibub, J. A., Gandhi, J., & Vreeland, J. R. (2010). Democracy and dictatorship revisited. *Public Choice*, 143(1-2), 67–101

2.12.7.30 Regime Institutions (chga_hinst)

Long tag: qog_oecd_ts_chga_hinst

Original tag: chga_hinst

Description:

Six-fold classification of political regimes:

0. Parliamentary Democracy.
1. Mixed (semi-presidential) democracy.
2. Presidential democracy.
3. Civilian dictatorship.
4. Military dictatorship.
5. Royal dictatorship.

Variable citation: Cheibub, J. A., Gandhi, J., & Vreeland, J. R. (2010). Democracy and dictatorship revisited. *Public Choice*, 143(1-2), 67–101

2.12.7.31 Accountability Transparency (diat_ati)

Long tag: qog_oecd_ts_diat_ati

Original tag: diat_ati

Description:

Accountability Transparency. The author has 16 separate indicators for the Accountability Transparency Index (six for the measurement of a free media, four for fiscal transparency, and six for political constraints). 1980 is considered to be the base year. The Accountability Transparency Index has 115 countries in 1980, but rising to up to 189 countries towards the end of the period.

2.12.7.32 Information Transparency (diat_iti)

Long tag: qog_oecd_ts_diat_iti

Original tag: diat_iti

Description:

Information Transparency. Sub-indicators are constructed to reflect the nuances of this type of transparency. Specifically, three sub-components are constructed: (1) the existence of a free and independent media; (2) fiscal (budgetary) transparency; (3) political constraints. The author has 13 separate indicators for the Information Transparency Index (six for the quantity of information, four for the processes that generate that information, and three for the infrastructure required to disseminate that information). 1980 is considered to be the base year. The Information Transparency Index (ITI) has scores for initially 153 countries in 1980, increasing over time to 191 by the year 2010.

2.12.7.33 Transparency Index (diat_ti)

Long tag: qog_oecd_ts_diat_ti

Original tag: diat_ti

Description:

Transparency Index. Combined index of Information Transparency Index and Accountability Transparency Index.

2.12.7.34 Index of Globalization (dr_ig)

Long tag: qog_oecd_ts_dr_ig

Original tag: dr_ig

Description:

The overall index of globalization (scale of 1 to 100) is the weighted average of the following variables: economic globalization, social globalization and political globalization (dr_eg, dr_sg and dr_pg). Most weight has been given to economic followed by social globalization.

Variable citation: Gygli, S., Haelg, F., Potrafke, N., & Sturm, J.-E. (2019). The KOF Globalisation Index - Revisited. `https://doi.org/10.1007/s11558-019-09344-2` Dreher, A. (2006). Does globalization affect growth? evidence from a new index of globalization. *Applied Economics*, 38(10), 1091–1110

2.12.7.35 Political Globalization (dr_pg)

Long tag: qog_oecd_ts_dr_pg

Original tag: dr_pg

Description:

Political globalisation (scale of 1 to 100) regards the de facto segment measured with reference to the number of embassies and international non-governmental organisations (NGOs), along with partici-pation in UN peacekeeping missions. The de jure segment contains variables focussing on membership of international organisations and international treaties.

Variable citation: Gygli, S., Haelg, F., Potrafke, N., & Sturm, J.-E. (2019). The KOF Globalisation Index - Revisited. `https://doi.org/10.1007/s11558-019-09344-2` Dreher, A. (2006). Does globalization affect growth? evidence from a new index of globalization. *Applied Economics*, 38(10), 1091–1110

2.12.7.36 E-Government Index (egov_egov)

Long tag: qog_oecd_ts_egov_egov

Original tag: egov_egov

Description:

The E-Government Development Index (EGDI) is a weighted average of normalised scores on the three most important dimensions of e-government, namely: scope and quality of online services (Online Service Index, OSI), status of the development of telecommunication infrastructure (Telecommunication Infrastructure Index, TII) and inherent human capital (Human Capital Index, HCI). Each of these sets of indices is in itself a composite measure that can be extracted and analysed independently.

Variable citation: Department of Economic and Social Affairs. (2020). United nations e-government survey. `https://publicadministration.un.org/egovkb/en-us/Reports/UN-E-Government-Survey-2020`

2.12.7.37 E-Participation Index (egov_epar)

Long tag: qog_oecd_ts_egov_epar

Original tag: egov_epar

Description:

The E-Participation Index (EPI) is derived as a supplementary index to the UN E-Government Survey. It extends the dimension of the Survey by focusing on the use of online services to facilitate provision of information by governments to citizens (e-information sharing), interaction with stakeholders (e-consultation) and engagement in decision-making processes.

A country's EPI reflects the e-participation mechanisms that are deployed by the government as compared to all other countries. The purpose of this measure is not to prescribe any specific practice, but rather to offer insight into how different countries are using online tools in promoting interaction between the government and its people, as well as among the people, for the benefit of all.

Variable citation: Department of Economic and Social Affairs. (2020). United nations e-government survey. `https://publicadministration.un.org/egovkb/en-us/Reports/UN-E-Government-Survey-2020`

2.12.7.38 Human Capital Index (egov_hci)

Long tag: qog_oecd_ts_egov_hci

Original tag: egov_hci

Description:
The Human Capital Index (HCI) consists of four components:

(i)adult literacy rate;
(ii)the combined primary, secondary and tertiary gross enrolment ratio;
(iii)expected years of schooling; and
(iv)average years of schooling.

Data for HCI components was extracted from the UNESCO-UIS source.

Variable citation: Department of Economic and Social Affairs. (2020). United nations e-government survey. `https://publicadministration.un.org/egovkb/en-us/Reports/UN-E-Government-Survey-2020`

2.12.7.39 Online Service Index (egov_osi)

Long tag: qog_oecd_ts_egov_osi

Original tag: egov_osi

Description:
The Online Service Index (OSI) values were constructed by researchers, including UN experts and online United Nations Volunteers (UNVs) from over 60 countries with coverage of 66 languages assessed each country's national website in the native language, including the national portal, e-services portal and e-participation portal, as well as the websites of the related ministries of education, labour, social services, health, finance and environment as applicable. The UNVs included qualified graduate students and volunteers from universities in the field of public administration.

Variable citation: Department of Economic and Social Affairs. (2020). United nations e-government survey. `https://publicadministration.un.org/egovkb/en-us/Reports/UN-E-Government-Survey-2020`

2.12.7.40 Telecommunication Infrastructure Index (egov_tii)

Long tag: qog_oecd_ts_egov_tii

Original tag: egov_tii

Description:
The Telecommunication Infrastructure Index (TII) is an arithmetic average composite of five indicators:

(i) estimated internet users per 100 inhabitants;
(ii) number of main fixed telephone lines per 100 inhabitants;
(iii) number of mobile subscribers per 100 inhabitants;
(iv) number of wireless broadband subscriptions per 100 inhabitants; and
(v) number of fixed broadband subscriptions per 100 inhabitants.

Data for each component was extracted from the ITU source.

Variable citation: Department of Economic and Social Affairs. (2020). United nations e-government survey. `https://publicadministration.un.org/egovkb/en-us/Reports/UN-E-Government-Survey-2020`

2.12.7.41 Level of Democracy (Freedom House/Imputed Polity) (fh_ipolity2)

Long tag: qog_oecd_ts_fh_ipolity2

Original tag: fh_ipolity2

Description:
Scale ranges from 0-10 where 0 is least democratic and 10 most democratic. Average of Freedom House (fh_pr and fh_cl) is transformed to a scale 0-10 and Polity (p_polity2) is transformed to a scale 0-10. These variables are averaged into fh_polity2. The imputed version has imputed values for countries where data on Polity is missing by regressing Polity on the average Freedom House measure. Hadenius
Teorell (2005) show that this average index performs better both in terms of validity and reliability than its constituent parts.

Variable citation: Freedom House. (2021a). Freedom in the world 2021. `https://freedomhouse.org/report/freedom-world`

2.12.7.42 Level of Democracy (Freedom House/Polity) (fh_polity2)

Long tag: qog_oecd_ts_fh_polity2

Original tag: fh_polity2

Description:
Scale ranges from 0-10 where 0 is least democratic and 10 most democratic. Average of Freedom House (fh_pr and fh_cl) is transformed to a scale 0-10 and Polity (p_polity2) is transformed to a scale 0-10. These variables are averaged into fh_polity2.

Variable citation: Freedom House. (2021a). Freedom in the world 2021. `https://freedomhouse.org/report/freedom-world`

2.12.7.43 Political Pluralism and Participation (fh_ppp)

Long tag: qog_oecd_ts_fh_ppp

Original tag: fh_ppp

Description:

Political Pluralism and Participation - This variable encompasses an examination of the right of the people to freely organize in political parties; the existence of an opposition with a realistic possibility to increase its support; the ability of the people to make political choices free from domination by the military, totalitarian parties or other powerful groups; and the existence of full political rights for all minorities. Countries are graded between 0 (worst) and 16 (best).

Variable citation: Freedom House. (2021a). Freedom in the world 2021. `https://freedomhouse.org/report/freedom-world`

2.12.7.44 Political Rights (fh_pr)

Long tag: qog_oecd_ts_fh_pr

Original tag: fh_pr

Description:

Political Rights Rating - Political rights enable people to participate freely in the political process, including the right to vote freely for distinct alternatives in legitimate elections, compete for public office, join political parties and organizations, and elect representatives who have a decisive impact on public policies and are accountable to the electorate. The specific list of rights considered varies over the years. Countries are graded between 1 (most free) and 7 (least free).

Variable citation: Freedom House. (2021a). Freedom in the world 2021. `https://freedomhouse.org/report/freedom-world`

2.12.7.45 Freedom Status (fh_status)

Long tag: qog_oecd_ts_fh_status

Original tag: fh_status

Description:

1. Free
2. Partly Free
3. Not Free

Until 2003, countries whose combined average ratings for Political Rights and Civil Liberties fell between 1.0 and 2.5 were designated "Free"; between 3.0 and 5.5 "Partly Free", and between 5.5 and 7.0 "Not Free". Since then, countries whose ratings average 1.0 to 2.5 are considered "Free", 3.0 to 5.0 "Partly Free", and 5.5 to 7.0 "Not Free".

Variable citation: Freedom House. (2021a). Freedom in the world 2021. `https://freedomhouse.org/report/freedom-world`

2.12.7.46 Global Gender Gap Political Empowerment subindex (gggi_pes)

Long tag: qog_oecd_ts_gggi_pes

Original tag: gggi_pes

Description:

Political Empowerment (0 to 1, where 1 indicates no gap). This subindex measures the gap between men and women at the highest level of political decision-making through the ratio of women to men in ministerial positions and the ratio of women to men in parliamentary positions. In addition, we've included the ratio of women to men in terms of years in executive office (prime minister or president) for the last 50 years. A clear drawback in this category is the absence of any indicators capturing differences between the participation of women and men at local levels of government. Should such data become available at a globally comparative level in future years, it will be considered for inclusion in the Index.

Variable citation: World Economic Forum. (2021). The global gender gap report 2021 [All Rights Reserved]. `https://www.weforum.org/reports/ab6795a1-960c-42b2-b3d5-587eccda6023`

2.12.7.47 Parliamentarism (gtm_parl)

Long tag: qog_oecd_ts_gtm_parl

Original tag: gtm_parl

Description:

The parliamentary/presidential distinction is conceptualized as a continuum with two dimensions: (a) the

degree of separation (independence) between president and parliament (unity = parliamentary, separation = presidential) and, if there is any separation at all, (b) the relative power of the two players (the more power the president possesses, the more presidential is the resulting system). This complex reality is captured with a three-part coding scheme:

0. Presidential
1. Semi-presidential
2. Parliamentary

2.12.7.48 Unitarism (gtm_unit)

Long tag: qog_oecd_ts_gtm_unit

Original tag: gtm_unit

Description:

Average of Nonfederalism and Nonbicameralism: Nonfederalism is coded as 0 = federal (elective regional legislatures plus conditional recognition of subnational authority), 1 = semifederal (where there are elective legislatures at the regional level but in which constitutional sovereignty is reserved to the national government), or 2 = non-federal. Nonbicameralism is coded as 0 = strong bicameral (upper house has some effective veto power; the two houses are incongruent), 1 = weak bicameral (upper house has some effective veto power, though not necessarily a formal veto; the two houses are congruent), or 2 = unicameral (no upper house or weak upper house).

2.12.7.49 Independent Sub-Federal Unit (h_f)

Long tag: qog_oecd_ts_h_f

Original tag: h_f

Description:

Dummy variable coded 1 if there are independent sub-federal units (states, provinces, regions etc.) that impose substantive constraints on national fiscal policy.

Variable citation: Henisz, W. J. (2017). The Political Constraint Index (POLCON) Dataset 2017 release. `https://mgmt.wharton.upenn.edu/profile/1327`

2.12.7.50 Legislative Chamber (h_l1)

Long tag: qog_oecd_ts_h_l1

Original tag: h_l1

Description:

Dummy variable coded 1 if there is an effective legislative chamber (based on information from Polity's Executive Constraints, p_xconst).

Variable citation: Henisz, W. J. (2017). The Political Constraint Index (POLCON) Dataset 2017 release. `https://mgmt.wharton.upenn.edu/profile/1327`

2.12.7.51 Political Constraints Index III (h_polcon3)

Long tag: qog_oecd_ts_h_polcon3

Original tag: h_polcon3

Description:

This index measures the feasibility of policy change, i.e. the extent to which a change in the prefer-ences of any one political actor may lead to a change in government policy. The index is composed from the following information: the number of independent branches of government with veto power over policy change, counting the executive and the presence of an effective lower and upper house in the legislature (more branches leading to more constraint); the extent of party alignment across branches of government, measured as the extent to which the same party or coalition of parties control each branch (decreasing the level of constraint); and the extent of preference heterogeneity within each legislative branch, measured as legislative fractionalization in the relevant house (increasing constraint for aligned executives, decreasing it for opposed executives). The index scores are derived from a simple spatial model and theoretically ranges from 0 to 1, with higher scores indicating more political constraint and thus less feasibility of policy change. Note that the coding reflects information as of January 1 in any given year. Henisz (2002) uses this index to demonstrate that political environments that limit the feasibility of policy change are an important determinant of investment in infrastructure.

Variable citation: Henisz, W. J. (2017). The Political Constraint Index (POLCON) Dataset 2017 release. `https://mgmt.wharton.upenn.edu/profile/1327`

2.12.7.52 Political Constraints Index V (h_polcon5)

Long tag: qog_oecd_ts_h_polcon5

Original tag: h_polcon5

Description:

This index follows the same logic as Political Constraints Index III (h_polcon3) but also includes two

additional veto points: the judiciary and sub-federal entities. Note that the coding reflects in-formation as of January 1 in any given year. Henisz (2000) uses this index to measure the impact on cross-national growth rates of a government's ability to provide credible commitment.

Variable citation: Henisz, W. J. (2017). The Political Constraint Index (POLCON) Dataset 2017 release. `https://mgmt.wharton.upenn.edu/profile/1327`

2.12.7.53 Regime Type (ht_regtype)

Long tag: qog_oecd_ts_ht_regtype

Original tag: ht_regtype

Description:

This typology of authoritarian regimes is based on a distinction between three modes of political power maintenance (probably the three most widely used throughout history): hereditary succession (lineage), corresponding to monarchies; the actual or threatened use of military force, corresponding to military regimes; and popular elections, designating electoral regimes. Among the latter we distinguish among no-party regimes (where all parties are prohibited), one-party regimes (where all but one party is prohibited), and limited multiparty regimes (where multiple parties are allowed but the system still does not pass as democratic); a subtype of these regimes where no parties are present, although not being prohibited, are coded as "partyless" regimes. A subtype of military regimes are coded "rebel regimes", where a rebel movement has taken power by military means. We also code hybrids (or amalgams) combining elements from more than one regime type, as well as several minor types of regimes: "theocracies", "transitional" regimes, "civil war", foreign "occupation", and a residual "other" category. Using the mean of the Freedom House and Polity scales (fh_ipolity2), the line between democracies and autocracies is drawn at 7.5. This threshold value was chosen by estimating the mean cutoff point separating democracy from autocracy in five well-known categorical measures of democracy: those of Przeworski et al. (2000), Mainwaring et al. (2001), and Reich (2002), together with Freedom House's and Polity's own categorical thresholds for democracy.

1. Limited Multiparty
2. Partyless
3. No-Party
4. Military
5. Military No-Party
6. Military Multiparty
7. Military One-party
8. One-Party
9. Other
16. One-Party Monarchy
17. Monarchy
18. Rebel Regime
19. Civil War
20. Occupation
21. Theocracy
22. Transitional Regime
23. No-Party Monarchy
24. Multiparty Monarchy
25. Multiparty-Occupied
100. Democracy

2.12.7.54 Regime Type (simplified) (ht_regtype1)

Long tag: qog_oecd_ts_ht_regtype1

Original tag: ht_regtype1

Description:

A simplified, collapsed version of ht_regtype, where all monarchical regimes with amalgams [ht_regtype =16, 17, 23 or 24] are treated as monarchies, all military regimes with sub-types and amalgams [ht_regtype=4, 5, 6, 7 or 18] are treated as military regimes, and multiparty regimes with sub-types are treated as multiparty regimes [ht_regtype=1 or 2]. Only pure noparty [ht_regtype=3] and one-party [ht_regtype=8] regimes are treated as no-party and one-party regimes, respectively. The minor types [ht_regtype=9, 19, 20, 21, 22 or 25] are treated as other.

1. Monarchy
2. Military
3. One party
4. Multi-party
9. No-party

99. Other
100. Democracy

2.12.7.55 Appointment of Executive (iaep_ae)

Long tag: qog_oecd_ts_iaep_ae

Original tag: iaep_ae

Description:

Is there an executive appointed either by a PM (that is, an executive who is also a member of the legislature) or a president (an independently selected executive)?

0. No
1. Yes

Source: IAEP (Wig et al., 2015)

Variable citation: Wig, T., Hegre, H., & Regan, P. M. (2015). Updated data on institutions and elections 1960–2012: Presenting the iaep dataset version 2.0. *Research & Politics*, 2(2). `https://doi.org/10.1177/2053168015579120`

2.12.7.56 Appointment of Regional Representatives (iaep_arr)

Long tag: qog_oecd_ts_iaep_arr

Original tag: iaep_arr

Description:

This variable examine the relationship between the central and regional governments, those which are immediately below the central government. We focus exclusively on states or provincial levels of government, municipalities are not coded. In practice, do regions or provinces:

1. Appoint, elect or otherwise choose their own representatives autonomous from decisions by the central government
2. Have their administrators appointed by the central government
3. No regional/provincial governments

Source: IAEP (Wig et al., 2015)

Variable citation: Wig, T., Hegre, H., & Regan, P. M. (2015). Updated data on institutions and elections 1960–2012: Presenting the iaep dataset version 2.0. *Research & Politics*, 2(2). `https://doi.org/10.1177/2053168015579120`

2.12.7.57 Constitutional Court (iaep_cc)

Long tag: qog_oecd_ts_iaep_cc

Original tag: iaep_cc

Description:

According to the constitution, does the country have a national constitutional court? In some cases, a council with the powers of a constitutional court may exist, though it may not be part of the formal judiciary. In such cases, this non-judicial council with the powers of a constitutional court is coded as the constitutional court.

0. No
1. Yes

2.12.7.60 Executive Can Change Domestic Taxes (iaep_eccdt)

Long tag: qog_oecd_ts_iaep_eccdt

Original tag: iaep_eccdt

Description:
Can an executive change domestic taxes (excluding import/export tariffs) without legislative approval?

0. No
1. Yes

Source: IAEP (Wig et al., 2015)

Variable citation: Wig, T., Hegre, H., & Regan, P. M. (2015). Updated data on institutions and elections 1960–2012: Presenting the iaep dataset version 2.0. *Research & Politics*, 2(2). https://doi.org/10.1177/2053168015579120

2.12.7.61 Executive Can Dissolve Legislature (iaep_ecdl)

Long tag: qog_oecd_ts_iaep_ecdl

Original tag: iaep_ecdl

Description:
According to the constitution, can an executive dissolve the legislature?

0. No
1. Yes

Source: IAEP (Wig et al., 2015)

Variable citation: Wig, T., Hegre, H., & Regan, P. M. (2015). Updated data on institutions and elections 1960–2012: Presenting the iaep dataset version 2.0. *Research & Politics*, 2(2). https://doi.org/10.1177/2053168015579120

2.12.7.62 Executive is Member of Legislature (iaep_eml)

Long tag: qog_oecd_ts_iaep_eml

Original tag: iaep_eml

Description:
Is there an executive who is also a member of the legislature (like a prime minister, for example)? We consider membership in the legislature if either an explicit rule exists which requires an executive to maintain a seat in the legislature, or if practice and/or convention determines membership.

0. No
1. Yes

2.12.7.64 Legislature Approves Budget (iaep_lap)

Long tag: qog_oecd_ts_iaep_lap

Original tag: iaep_lap

Description:

Does an executive have to secure legislative approval for the budget?

0. No
1. Yes

Source: IAEP (Wig et al., 2015)

Variable citation: Wig, T., Hegre, H., & Regan, P. M. (2015). Updated data on institutions and elections 1960–2012: Presenting the iaep dataset version 2.0. *Research & Politics*, 2(2). https://doi.org/10.1177/2053168015579120

2.12.7.65 Legislature Can Remove Executive (iaep_lcre)

Long tag: qog_oecd_ts_iaep_lcre

Original tag: iaep_lcre

Description:

According to the constitution, can the legislature remove an executive from office?

0. No
1. Yes

Source: IAEP (Wig et al., 2015)

Variable citation: Wig, T., Hegre, H., & Regan, P. M. (2015). Updated data on institutions and elections 1960–2012: Presenting the iaep dataset version 2.0. *Research & Politics*, 2(2). https://doi.org/10.1177/2053168015579120

2.12.7.66 Some other executive have the power to introduce legislation (iaep_lego)

Long tag: qog_oecd_ts_iaep_lego

Original tag: iaep_lego

Description:

Does some other executive have the power to introduce legislation in the legislature?

0. No
1. Yes

Source: IAEP (Wig et al., 2015)

Variable citation: Wig, T., Hegre, H., & Regan, P. M. (2015). Updated data on institutions and elections 1960–2012: Presenting the iaep dataset version 2.0. *Research & Politics*, 2(2). https://doi.org/10.1177/2053168015579120

2.12.7.67 Legislature's Ratification of International Treaties (iaep_lrit)

Long tag: qog_oecd_ts_iaep_lrit

Original tag: iaep_lrit

Description:

Does the legislature have the constitutional authority to ratify international treaties negotiated by an executive?

0. No authority
1. One chamber approval necessary
2. Both chambers' approval necessary.

Source: IAEP (Wig et al., 2015)

Variable citation: Wig, T., Hegre, H., & Regan, P. M. (2015). Updated data on institutions and elections 1960–2012: Presenting the iaep dataset version 2.0. *Research & Politics*, 2(2). `https://doi.org/10.1177/2053168015579120`

2.12.7.68 Legislature Veto Power (iaep_lvp)

Long tag: qog_oecd_ts_iaep_lvp

Original tag: iaep_lvp

Description:

Does the legislature have the constitutional power to stop executive action, in effect a legislative veto?

0. No
1. Yes

Source: IAEP (Wig et al., 2015)

Variable citation: Wig, T., Hegre, H., & Regan, P. M. (2015). Updated data on institutions and elections 1960–2012: Presenting the iaep dataset version 2.0. *Research & Politics*, 2(2). `https://doi.org/10.1177/2053168015579120`

2.12.7.69 Official State Party (iaep_osp)

Long tag: qog_oecd_ts_iaep_osp

Original tag: iaep_osp

Description:

Is there an official state party?

0. No
1. Yes

Source: IAEP (Wig et al., 2015)

Variable citation: Wig, T., Hegre, H., & Regan, P. M. (2015). Updated data on institutions and elections 1960–2012: Presenting the iaep dataset version 2.0. *Research & Politics*, 2(2). `https://doi.org/10.1177/2053168015579120`

2.12.7.70 Unitary or Federal State (iaep_ufs)

Long tag: qog_oecd_ts_iaep_ufs

Original tag: iaep_ufs

Description:

This variable examines the relationship between the central and regional governments, those which are immediately below the central government. We focus exclusively on states or provincial levels of government, municipalities are not coded. Is the government structure a:

1. Unitary system
2. Confederation
3. Federal system

Source: IAEP (Wig et al., 2015)

Variable citation: Wig, T., Hegre, H., & Regan, P. M. (2015). Updated data on institutions and elections 1960–2012: Presenting the iaep dataset version 2.0. *Research & Politics*, 2(2). `https://doi.org/10.1177/2053168015579120`

2.12.7.71 Cluster memberships based on means (kun_cluster)

Long tag: qog_oecd_ts_kun_cluster

Original tag: kun_cluster

Description:

Cluster membership based on means.

Variable citation: Kuncic, A. (2014). Institutional quality dataset. *Journal of Institutional Economics*, 10(01), 135–161. https://doi.org/10.1017/S1744137413000192

2.12.7.72 Absolute political institutional quality (simple averages) (kun_polabs)

2.12.7.75 Classification of Executives (no_ce)

Long tag: qog_oecd_ts_no_ce

Original tag: no_ce

Description:
Classification of Executives:

1. Parliamentary Monarchy
2. Presidential Republic
3. Mixed Executive
4. Monarchy
5. Military State

Variable citation: Norris, P. (2009). Democracy Timeseries Data Release 3.0. http://www.hks.harvard.edu/fs/pnorris/Data/Data.htm

2.12.7.76 Unitary or Federal State (no_ufs)

Long tag: qog_oecd_ts_no_ufs

Original tag: no_ufs

Description:
Unitary or Federal State:

1. Unitary
2. Hybrid unions
3. Federal

Variable citation: Norris, P. (2009). Democracy Timeseries Data Release 3.0. http://www.hks.harvard.edu/fs/pnorris/Data/Data.htm

2.12.7.77 Regime Durability (p_durable)

Long tag: qog_oecd_ts_p_durable

Original tag: p_durable

Description:
Regime Durability: The number of years since the most recent regime change (defined by a three point change in the p_polity score over a period of three years or less) or the end of a transition period defined by the lack of stable political institutions (denoted by a standardized authority score). In calculating the p_durable value, the first year during which a new (post-change) polity is established is coded as the baseline "year zero" (value = 0) and each subsequent year adds one to the value of the p_durable variable consecutively until a new regime change or transition period occurs.

Variable citation: Marshall, M. G., & Gurr, T. R. (2020). Polity v project, political regime characteristics and transitions, 1800-2018

2.12.7.78 Revised Combined Polity Score (p_polity2)

Long tag: qog_oecd_ts_p_polity2

Original tag: p_polity2

Description:
Revised Combined Polity Score: The polity score is computed by subtracting the p_autoc score from the p_democ score; the resulting unified polity scale ranges from +10 (strongly democratic) to -10 (strongly autocratic). The revised version of the polity variable is designed to facilitate the use of the polity regime measure in time-series analyses. It modifies the combined annual polity score by applying a simple treatment, or "fix" to convert instances of "standardized authority scores" (i.e., -66, -77, and -88) to conventional polity scores (i.e., within the range, -10 to +10). The values have been converted according to the following rule set:

(-66) Cases of foreign "interruption" are treated as "system missing."
(-77) Cases of "interregnum", or anarchy, are converted to a "neutral" Polity score of "0."
(-88) Cases of "transition" are prorated across the span of the transition.

For example, country X has a p_polity score of -7 in 1957, followed by three years of -88 and, finally, a score of +5 in 1961. The change (+12) would be prorated over the intervening three years at a rate of per year, so that the converted scores would be as follow: 1957 -7; 1958 -4; 1959 -1; 1960 +2; and 1961 +5.

Variable citation: Marshall, M. G., & Gurr, T. R. (2020). Polity v project, political regime characteristics and transitions, 1800-2018

2.12.7.79 Unified Demo. Score Posterior (Mean) (uds_mean)

Long tag: qog_oecd_ts_uds_mean

Original tag: uds_sd

Description:
Unified Democracy Score Posterior (Std. Dev.).

2.12.7.84 Deliberative democracy index (vdem_delibdem)

Long tag: qog_oecd_ts_vdem_delibdem

Original tag: vdem_delibdem

Description:

Deliberative democracy index. Question: To what extent is the ideal of deliberative democracy achieved?

Clarification: The deliberative principle of democracy focuses on the process by which decisions are reached in a polity. A deliberative process is one in which public reasoning focused on the common good motivates political decisions - as contrasted with emotional appeals, solidary attachments, parochial interests, or coercion. According to this principle, democracy requires more than an aggregation of existing preferences. There should also be respectful dialogue at all levels - from preference formation to final decision - among informed and competent participants who are open to persuasion. To make it a measure of not only the deliberative principle but also of democracy, the index also takes the level of electoral democracy into account.

Variable citation: Coppedge, M., Gerring, J., Knutsen, C. H., Lindberg, S. I., Teorell, J., Alizada, N., Altman, D., Bernhard, M., Cornell, A., Fish, M. (2021). The V-Dem measurement model: Latent variable analysis for crossnational and cross-temporal expert-coded data

2.12.7.85 Deliberative component index (vdem_dl_delib)

Long tag: qog_oecd_ts_vdem_dl_delib

Original tag: vdem_dl_delib

Description:

Deliberative component index. Question: To what extent is the deliberative principle of democracy achieved?

Clarification: The deliberative principle of democracy focuses on the process by which decisions are reached in a polity. A deliberative process is one in which public reasoning focused on the common good motivates political decisions - as contrasted with emotional appeals, solidary attachments, parochial interests, or coercion. According to this principle, democracy requires more than an aggregation of existing preferences. There should also be respectful dialogue at all levels - from preference formation to final decision - among informed and competent participants who are open to persuasion. To measure these features of a polity, we try to determine the extent to which political elites give public justifications for their positions on matters of public policy, justify their positions in terms of the public good, acknowledge and respect counter-arguments; and how wide the range of consultation is at elite levels. Aggregation: The index is formed by point estimates drawn from a Bayesian factor analysis model including the following indicators: reasoned justification, common good justification, respect for counterarguments, range of consultation, and engaged society.

Variable citation: Coppedge, M., Gerring, J., Knutsen, C. H., Lindberg, S. I., Teorell, J., Alizada, N., Altman, D., Bernhard, M., Cornell, A., Fish, M. S., Gastaldi, L., Gjerløw, H., Glynn, A., Hicken, A., Hindle, G., Ilchenko, N., Krusell, J., Luhrmann, A., Maerz, S. F., . . . Ziblatt, D. (2021). (2021). The V-Dem measurement model: Latent variable analysis for crossnational and cross-temporal expert-coded data

2.12.7.86 Electoral component index (vdem_edcomp_thick)

Long tag: qog_oecd_ts_vdem_edcomp_thick

Original tag: vdem_edcomp_thick

Description:

Electoral component index. Question: To what extent is the electoral principle of democracy achieved?

Clarifications: The electoral principle of democracy seeks to achieve responsiveness and accountability between leaders and citizens through the mechanism of competitive elections. This is presumed to be achieved when suffrage is extensive; political and civil society organizations can operate freely; elections are clean and not marred by fraud or systematic irregularities; and the chief executive of a country is selected directly or indirectly through elections. Aggregation: The electoral component index is operationalized as a chain defined by its weakest link of freedom of association, suffrage, clean elections, and elected executive.

2.12.7.87 Egalitarian component index (vdem_egal)

Long tag: qog_oecd_ts_vdem_egal

Original tag: vdem_egal

Description:

Egalitarian component index. Question: To what extent is the egalitarian principle achieved?

Clarifications: The egalitarian principle of democracy holds that material and immaterial inequalities inhibit the exercise of formal rights and liberties, and diminish the ability of citizens from all social groups to participate. Egalitarian democracy is achieved when 1) rights and freedoms of individuals are protected equally across all social groups; 2) resources are distributed equally across all social groups; and 3) access to power is equally distributed by gender, socioeconomic class and social group. Aggregation: This index is formed by averaging the following indices: equal protection index and equal distribution of resources.

Variable citation: Coppedge, M., Gerring, J., Knutsen, C. H., Lindberg, S. I., Teorell, J., Alizada, N., Altman, D., Bernhard, M., Cornell, A., Fish, M. S., Gastaldi, L., Gjerløw, H., Glynn, A., Hicken, A., Hindle, G., Ilchenko, N., Krusell, J., Luhrmann, A., Maerz, S. F., . . . Ziblatt, D. (2021). 2.12.7.88 Egalitarian democracy index (vdem_egaldem)

Long tag: qog_oecd_ts_vdem_egaldem

Original tag: vdem_egaldem

Description:

Egalitarian democracy index. Question: To what extent is the ideal of egalitarian democracy achieved?

Clarifications: The egalitarian principle of democracy holds that material and immaterial inequalities inhibit the exercise of formal rights and liberties, and diminish the ability of citizens from all social groups to participate. Egalitarian democracy is achieved when 1) rights and freedoms of individuals are protected equally across all social groups; and 2) resources are distributed equally across all social groups. The distribution of resources must be sufficient to ensure that citizens' basic needs are met in a way that enables their meaningful participation. Additionally, an equal distribution of resources ensures the potential for greater equality in the distribution of power. To make it a measure of egalitarian democracy, the index also takes the level of electoral democracy into account.

Variable citation: Coppedge, M., Gerring, J., Knutsen, C. H., Lindberg, S. I., Teorell, J., Alizada, N., Altman, D., Bernhard, M., Cornell, A., Fish, M. S., Gastaldi, L., Gjerløw, H., Glynn, A., Hicken, A., Hindle, G., Ilchenko, N., Krusell, J., Luhrmann, A., Maerz, S. F., . . . Ziblatt, D. (2021). 2.12.7.89 Liberal democracy index (vdem_libdem)

Long tag: qog_oecd_ts_vdem_libdem

Original tag: vdem_libdem

Description:

Liberal democracy index. Question: To what extent is the ideal of liberal democracy achieved?
Clarifications: The liberal principle of democracy emphasizes the importance of protecting individual and minority rights against the tyranny of the state and the tyranny of the majority. The liberal model takes a "negative" view of political power insofar as it judges the quality of democracy by the limits placed on government. This is achieved by constitutionally protected civil liberties, strong rule of law, an independent judiciary, and effective checks and balances that, together, limit the exercise of executive power. To make this a measure of liberal democracy, the index also takes the level of electoral democracy into account.

Variable citation: Coppedge, M., Gerring, J., Knutsen, C. H., Lindberg, S. I., Teorell, J., Alizada, N., Altman, D., Bernhard, M., Cornell, A., Fish, M. 2.12.7.91 Participatory component index (vdem_partip)

Long tag: qog_oecd_ts_vdem_partip

Original tag: vdem_partip

Description:

Participatory component index. Question: To what extent is the participatory principle achieved?

Clarification: The participatory principle of democracy emphasizes active participation by citizens in all political processes, electoral and non-electoral. It is motivated by uneasiness about a bedrock practice of electoral democracy: delegating authority to representatives. Thus, direct rule by citizens is preferred, wherever practicable. This model of democracy thus takes suffrage for granted, emphasizing engagement in civil society organizations, direct democracy, and subnational elected bodies. Aggregation: This index is formed by averaging the following indices: civil society participation, direct popular vote, elected local government power, and elected regional government power.

Variable citation: Coppedge, M., Gerring, J., Knutsen, C. H., Lindberg, S. I., Teorell, J., Alizada, N., Altman, D., Bernhard, M., Cornell, A., Fish, M. S., Gastaldi, L., Gjerløw, H., Glynn, A., Hicken, A., Hindle, G., Ilchenko, N., Krusell, J., Luhrmann, A., Maerz, S. F., . . . Ziblatt, D. (2021). 2.12.7.93 Electoral democracy index (vdem_polyarchy)

Long tag: qog_oecd_ts_vdem_polyarchy

Original tag: vdem_polyarchy

Description:

Electoral democracy index. Question: To what extent is the ideal of electoral democracy in its fullest sense achieved?

Clarifications: The electoral principle of democracy seeks to embody the core value of making rulers responsive to citizens, achieved through electoral competition for the electorate's approval under circumstances when suffrage is extensive; political and civil society organizations can operate freely; elections are clean and not marred by fraud or systematic irregularities; and elections affect the composition of the chief executive of the country. In between elections, there is freedom of expression and an independent media capable of presenting alternative views on matters of political relevance. In the V-Dem conceptual scheme, electoral democracy is understood as an essential element of any other conception of (representative) democracy - liberal, participatory, deliberative, egalitarian, or some other. Aggregation: The index is formed by taking the average of, on the one hand, the sum of the indices measuring freedom of association (thick), suffrage, clean elections, elected executive (de jure) and freedom of expression; and, on the other, the five-way interaction between those indices. This is half way between a straight average and strict multiplication, meaning the average of the two. It is thus a compromise between the two most well known aggregation

formulas in the literature, both allowing "compensation" in one sub-component for lack of polyarchy in the others, but also punishing countries not strong in one sub-component according to the "weakest link" argument. The aggregation is done at the level of Dahl's sub-components (with the one exception of the non-electoral component).

(2021). The V-Dem measurement model: Latent variable analysis for crossnational and cross-temporal expert-coded data

2.12.7.94 Voice and Accountability, Estimate (wbgi_vae)

Long tag: qog_oecd_ts_wbgi_vae

Original tag: wbgi_vae

Description:

Voice and Accountability - Estimate: "Voice and Accountability" includes a number of indicators measuring various aspects of the political process, civil liberties and political rights. These indicators measure the extent to which citizens of a country are able to participate in the selection of governments. This category also includes indicators measuring the independence of the media, which serves an important role in monitoring those in authority and holding them accountable for their actions.

Variable citation: Kaufmann, D., Kraay, A., & Mastruzzi, M. (2010). The worldwide governance indicators: A summary of methodology, data and analytical issues. *World Bank Policy Research Working Paper, 5430*

2.12.7.95 Voice and Accountability, Number of Sources (wbgi_van)

Long tag: qog_oecd_ts_wbgi_van

Original tag: wbgi_van

Description:

Voice and Accountability - Number of Sources.

Variable citation: Kaufmann, D., Kraay, A., & Mastruzzi, M. (2010). The worldwide governance indicators: A summary of methodology, data and analytical issues. *World Bank Policy Research Working Paper, 5430*

2.12.7.96 Voice and Accountability, Standard Error (wbgi_vas)

Long tag: qog_oecd_ts_wbgi_vas

Original tag: wbgi_vas

Description:

Voice and Accountability - Standard Errors.

Variable citation: Kaufmann, D., Kraay, A., & Mastruzzi, M. (2010). The worldwide governance indicators: A summary of methodology, data and analytical issues. *World Bank Policy Research Working Paper, 5430*

2.12.7.97 Democratic Rights (wel_dr)

Long tag: qog_oecd_ts_wel_dr

Original tag: wel_dr

Description:

Meaning: 14-point index measuring the prevalence of democratic rights based on Freedom House's "civil liberties" and "political rights" ratings.
Source: Alexander and Welzel (2011); Alexander, Inglehart and Welzel (2012). Categorization is available in annual measures for most countries of the world from 1996 to 2006.
Scaling: The two Freedom House scales are inverted, averaged and standardized into a range from minimum 0 (no democratic rights) to 100 (maximum democratic rights), with percentages of the maximum rights for intermediate positions. Note: In the original data there exists two different observations for Dominica, the value has been recoded to missing for this country.

Variable citation: Welzel, C. (2013). *Freedom rising: Human empowerment and the quest for emancipation (1st ed.)*. Cambridge University Press

2.12.7.98 Effective Democracy Index (wel_edi)

Long tag: qog_oecd_ts_wel_edi

Original tag: wel_edi

Description:

Meaning: Conditional multi-point index measuring the extent of effective democracy, understood as the presence of democratic rights on the condition that honest governance puts them into real practice [EDI = DemRig * HonGov].

Source: Alexander and Welzel (2011); Alexander, Inglehart and Welzel (2012). Categorization is available in annual measures for most countries of the world from 1996 to 2006.
Scaling: Scores are weighted percentages ranging from a theoretical minimum of 0 for the least effective or absent democracy to 100 for the most effective democracy. Note: In the original data there exists two different observations for Dominica, the value has been recoded to missing for this country.

Variable citation: Welzel, C. (2013). *Freedom rising: Human empowerment and the quest for emancipation (1st ed.)*. Cambridge University Press

2.12.7.99 Regime Type (wel_regtype)

Long tag: qog_oecd_ts_wel_regtype

Original tag: wel_regtype

Description:

Meaning: Regime types measure the 4-fold combination of personal autonomy rights and political participation rights, resulting in four combinations.
Source: Welzel, Freedom Rising (2013: 257-258). Typology is available in annual measures for most countries of the world from 1981 to 2010.
Scaling: 1 "Pure Autocracy": both personal autonomy rights and political participation rights below the scale midpoint (0.50); 2 "Inclusive Autocracy": personal autonomy rights below the scale midpoint, political participation rights above the scale midpoint; 3 "Liberal Autocracy": personal autonomy rights above the scale midpoint, political participation rights below; 4 "Minimal Democracy": both personal autonomy rights and political participation rights above the scale midpoint.
Links: Data sources, rescaling procedures and replication data are meticulously documented in the Online Appendix to Welzel's (2013) Freedom Rising at www.cambridge.com/welzel (p. 72). Test statistics documenting this index's superior validity in comparison to alternative democracy measures are reported in Welzel (2013: 267-271).

Variable citation: Welzel, C. (2013). *Freedom rising: Human empowerment and the quest for emancipation (1st ed.)*. Cambridge University Press

2.12.7.100 Political System Type (wel_sys)

Long tag: qog_oecd_ts_wel_sys

Original tag: wel_sys

Description:

Meaning: 4-fold system typology derived from cross-tabulating democratic rights and honest governance.
Source: Alexander and Welzel (2011); Alexander, Inglehart and Welzel (2012). Categorization is available in annual measures for most countries of the world from 1996 to 2006.

1. "Unbound Autocracy": both democratic rights and honest governance below their scale midpoints
2. "Bounded Autocracy": democratic rights below, honest governance above the scale midpoint
3. "Ineffective Democracy": democratic rights above, honest governance below the scale midpoint
4. "Effective Democracy": both democratic rights and honest governance above the scale midpoint.

Note: In the original data there exists two different observations for Dominica, the value has been recoded to missing for this country.

Variable citation: Welzel, C. (2013). *Freedom rising: Human empowerment and the quest for emancipation (1st ed.)*. Cambridge University Press

2.12.7.101 Non-Autocracy (wr_nonautocracy)

Long tag: qog_oecd_ts_wr_nonautocracy

Original tag: wr_nonautocracy

Description:

Variable on what substituted the autocracy. Classes are:

1. Democracy
2. Foreign-Occupied
3. Not-Independent
4. Provisional
5. Warlord
6. Warlord/Foreign-occupied

Variable citation: Geddes, B., Wright, J., & Frantz, E. (2014). Autocratic breakdown and regime transitions: A new data set. *Perspectives on Politics*, 12(2), 313–331

2.12.8 Education

This category includes a variety of indicators related to education, such as key characteristics of the educational system (public expenditure, gross enrollment, number of teachers), the students (age, gender, educational level), and educational outcomes (mean scores, literacy rates, numbers of researchers and scientists).

2.12.8.1 Average Schooling Years, Female (bl_asyf)

Long tag: qog_oecd_ts_bl_asyf

Original tag: bl_asyf

Description:

Average schooling years, females between 15 and 64 years old.

Variable citation: Barro, R. J., & Lee, J. W. (2013). A new data set of educational attainment in the world, 1950–2010. *Journal of Development Economics*, 104, 184–198

2.12.8.2 Average Schooling Years, Male (bl_asym)

Long tag: qog_oecd_ts_bl_asym

Original tag: bl_asym

Description:

Average schooling years, males between 15 and 64 years old.

Variable citation: Barro, R. J., & Lee, J. W. (2013). A new data set of educational attainment in the world, 1950–2010. *Journal of Development Economics*, 104, 184–198

Variable citation: Institute for Health Metrics and Evaluation (IHME). (2015). Global educational attainment 1970-2015

2.12.8.28 Expenditure on education, as percent of total gen. gov. exp. (gfs_educ)

Long tag: qog_oecd_ts_gfs_educ

Original tag: gfs_educ

Description:
Total expenditure on education, as the percentage of general government expenditure.

Variable citation: International Monetary Fund. (2019). Government finance statistics yearbook (gfsy) 2019. `https://data.imf.org/?sk=a0867067-d23c-4ebc-ad23-d3b015045405`

2.12.8.29 Global Gender Gap Educational Attainment Subindex (gggi_eas)

Long tag: qog_oecd_ts_gggi_eas

Original tag: gggi_eas

Description:
Educational Attainment (0 to 1, where 1 indicates no gap). This subindex captures the gap between women's and men's current access to education through ratios of women to men in primary-, secondary- and tertiary-level education. A longer-term view of the country's ability to educate women and men in equal numbers is captured through the ratio of the female literacy rate to the male literacy rate.

Variable citation: World Economic Forum. (2021). The global gender gap report 2021 [All Rights Reserved]. `https://www.weforum.org/reports/ab6795a1-960c-42b2-b3d5-587eccda6023`

2.12.8.30 Structure of central gov. expenditures, education (oecd_gengovdistri_t1i)

Long tag: qog_oecd_ts_oecd_gengovdistri_t1i

Original tag: oecd_gengovdistri_t1i

Description:
Structure of central government expenditures, education.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. `https://doi.org/10.1787/20752288`

2.12.8.31 Employment rates of native-born pop. by edu. attainment: total (oecd_migeduemp_t1c)

Long tag: qog_oecd_ts_oecd_migeduemp_t1c

Original tag: oecd_migeduemp_t1c

Description:
Employment rates of native-born population by educational attainment: Total.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. `https://doi.org/10.1787/20752288`

2.12.8.32 Employment rates of foreign-born pop. by edu. attainment: total (oecd_migeduemp_t1f)

Long tag: qog_oecd_ts_oecd_migeduemp_t1f

Original tag: oecd_migeduemp_t1f

Description:
Employment rates of foreign-born population by educational attainment: Total.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. `https://doi.org/10.1787/20752288`

2.12.8.33 Human capital index, see note hc (pwt_hci)

Long tag: qog_oecd_ts_pwt_hci

Original tag: pwt_hci

Description:
Human capital index, based on years of schooling (Barro
Lee, 2010) and assumed returns, based on Mincer equation estimates around the world.

Variable citation: Feenstra, R. C., Inklaar, R., & Timmer, M. P. (2015). The next generation of the penn world table. *The American Economic Review*, 105(10), 3150–3182. `www.ggdc.net/pwt`

2.12.8.34 Gross intake ratio to the last grade of lower secondary general education, femal (une_girlglsf)

Long tag: qog_oecd_ts_une_girlglsf

Original tag: une_girlglsf

Description:
Gross intake ratio to the last grade of lower secondary general education, female (percent).

Variable citation: UNESCO. (2020). Unesco institute for statistics. `http://data.uis.unesco.org/`

2.12.8.35 Gross intake ratio to the last grade of lower secondary general education, male (une_girlglsm)

Long tag: qog_oecd_ts_une_girlglsm

Original tag: une_girlglsm

Description:

Gross intake ratio to the last grade of lower secondary general education, male (percent).

2.12.8.81 Government expenditure on education, total (percent of GDP) (wdi_expedu)

Long tag: qog_oecd_ts_wdi_expedu

Original tag: wdi_expedu

Description:

General government expenditure on education (current, capital, and transfers) is expressed as a percentage of GDP. It includes expenditure funded by transfers from international sources to government. General government usually refers to local, regional and central governments.

Note: The value for Tuvalu in 1997 has been recoded to missing due to an extreme and very unlikely value.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.8.82 Government expenditure on education, total (percent of government expenditure) (wdi_expeduge)

Long tag: qog_oecd_ts_wdi_expeduge

Original tag: wdi_expeduge

Description:

Total general (local, regional and central) government expenditure on education (current, capital, and transfers), expressed as a percentage of total general government expenditure on all sectors (including health, education, social services, etc.). It includes expenditure funded by transfers from international sources to government. Public education expenditure includes spending by local/municipal, regional and national governments (excluding household contributions) on educational institutions (both public and private), education administration, and subsidies for private entities (students/households and other privates entities). In some instances data on total public expenditure on education refers only to the ministry of education and can exclude other ministries that spend a part of their budget on educational activities. The indicator is calculated by dividing total public expenditure on education incurred by all government agencies/departments by the total government expenditure and multiplying by 100. For more information, consult the UNESCO Institute of Statistics website: http://www.uis.unesco.org/Education/

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.8.83 Expenditure on primary education (percent of government expenditure on edu.) (wdi_expedup)

Long tag: qog_oecd_ts_wdi_expedup

Original tag: wdi_expedup

Description:

Expenditure on Primary education, expressed as a percentage of total general government expenditure on education. Divide government expenditure on a given level of education (ex. primary, secondary) by total government expenditure on education (all levels combined), and multiply by 100. A high percentage of government expenditure on education spent on a given level denotes a high priority given to that level compared to others. When interpreting this indicator, one should take into account enrollment at that level, and the relative costs per student between different levels of education. For more information, consult the UNESCO Institute of Statistics website: http://www.uis.unesco.org/Education/

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.8.84 Expenditure on secondary education (percent of government expenditure on edu.) (wdi_expedus)

Long tag: qog_oecd_ts_wdi_expedus

Original tag: wdi_expedus

Description:

Expenditure on Secondary education, expressed as a percentage of total general government expenditure on education. Divide government expenditure on a given level of education (ex. primary, secondary) by total government expenditure on education (all levels combined), and multiply by 100. A high percentage of government expenditure on education spent on a given level denotes a high priority given to that level compared to others. When interpreting this indicator, one should take into account enrollment at that level, and the relative costs per student between different levels of education. For more information, consult the UNESCO Institute of Statistics website: http://www.uis.unesco.org/Education/

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.8.85 Expenditure on tertiary education (percent of government expenditure on edu.) (wdi_expedut)

Long tag: qog_oecd_ts_wdi_expedut

Original tag: wdi_expedut

Description:

Expenditure on Tertiary education, expressed as a percentage of total general government expenditure on education. Divide government expenditure on a given level of education (ex. primary, secondary) by total government expenditure on education (all levels combined), and multiply by 100. A high percentage of government expenditure on education spent on a given level denotes a high priority given to that level compared to others. When interpreting this indicator, one should take into account enrollment at that level,

and the relative costs per student between different levels of education. For more information, consult the UNESCO Institute of Statistics website: http://www.uis.unesco.org/Education/

2.12.8.86 Government expenditure per student, primary (percent of GDP per capita) (wdi_expstup)

Long tag: qog_oecd_ts_wdi_expstup

Original tag: wdi_expstup

Description:

Government expenditure per student is the average general government expenditure (current, capital, and transfers) per student in the primary level of education, expressed as a percentage of GDP per capita.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.8.87 Government expenditure per student, secondary (percent of GDP per capita) (wdi_expstus)

Long tag: qog_oecd_ts_wdi_expstus

Original tag: wdi_expstus

Description:

Government expenditure per student is the average general government expenditure (current, capital, and transfers) per student in the secondary level of education, expressed as a percentage of GDP per capita.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.8.88 Government expenditure per student, tertiary (percent of GDP per capita) (wdi_expstut)

Long tag: qog_oecd_ts_wdi_expstut

Original tag: wdi_expstut

Description:

Government expenditure per student is the average general government expenditure (current, capital, and transfers) per student in the given tertiary of education, expressed as a percentage of GDP per capita.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.8.89 School enrollment, primary (percent gross) (wdi_gerp)

Long tag: qog_oecd_ts_wdi_gerp

Original tag: wdi_gerp

Description:

Total enrollment in primary education, regardless of age, expressed as a percentage of the population of official primary education age. GER can exceed 100percent due to the inclusion of over-aged and under-aged students because of early or late school entrance and grade repetition.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.8.90 School enrollment, primary, female (percent gross) (wdi_gerpf)

Long tag: qog_oecd_ts_wdi_gerpf

Original tag: wdi_gerpf

Description:

Total female enrollment in primary education, regardless of age, expressed as a percentage of the total female population of official primary education age. GER can exceed 100percent due to the inclusion of over-aged and under-aged students because of early or late school entrance and grade repetition.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.8.91 School enrollment, primary, male (percent gross) (wdi_gerpm)

Long tag: qog_oecd_ts_wdi_gerpm

Original tag: wdi_gerpm

Description:
Total male enrollment in primary education, regardless of age, expressed as a percentage of the total male population of official primary education age. GER can exceed 100percent due to the inclusion of over-aged and under-aged students because of early or late school entrance and grade repetition.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.8.92 School enrollment, preprimary (percent gross) (wdi_gerpp)

Long tag: qog_oecd_ts_wdi_gerpp

Original tag: wdi_gerpp

Description:
Total enrollment in pre-primary education, regardless of age, expressed as a percentage of the total population of official pre-primary education age. GER can exceed 100percent due to the inclusion of over-aged and under-aged students because of early or late school entrance and grade repetition.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.8.93 School enrollment, preprimary, female (percent gross) (wdi_gerppf)

Long tag: qog_oecd_ts_wdi_gerppf

Original tag: wdi_gerppf

Description:
Total female enrollment in pre-primary education, regardless of age, expressed as a percentage of the total female population of official pre-primary education age. GER can exceed 100percent due to the inclusion of over-aged and under-aged students because of early or late school entrance and grade repetition.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.8.94 School enrollment, preprimary, male (percent gross) (wdi_gerppm)

Long tag: qog_oecd_ts_wdi_gerppm

Original tag: wdi_gerppm

Description:
Total male enrollment in pre-primary education, regardless of age, expressed as a percentage of the total male population of official pre-primary education age. GER can exceed 100percent due to the inclusion of over-aged and under-aged students because of early or late school entrance and grade repetition.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.8.95 School enrollment, secondary (percent gross) (wdi_gers)

Long tag: qog_oecd_ts_wdi_gers

Original tag: wdi_gers

Description:
Total enrollment in secondary education, regardless of age, expressed as a percentage of the population of official secondary education age. GER can exceed 100percent due to the inclusion of over-aged and under-aged students because of early or late school entrance and grade repetition.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.8.96 School enrollment, secondary, female (percent gross) (wdi_gersf)

Long tag: qog_oecd_ts_wdi_gersf

Original tag: wdi_gersf

Description:
Total female enrollment in secondary education, regardless of age, expressed as a percentage of the female population of official secondary education age. GER can exceed 100percent due to the inclusion of over-aged and under-aged students because of early or late school entrance and grade repetition.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.8.97 School enrollment, secondary, male (percent gross) (wdi_gersm)

Long tag: qog_oecd_ts_wdi_gersm

Original tag: wdi_gersm

Description:
Total male enrollment in secondary education, regardless of age, expressed as a percentage of the male population of official secondary education age. GER can exceed 100percent due to the inclusion of over-aged and under-aged students because of early or late school entrance and grade repetition.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.8.98 School enrollment, tertiary (percent gross) (wdi_gert)

Long tag: qog_oecd_ts_wdi_gert

Original tag: wdi_gert

Description:
Total enrollment in tertiary education (ISCED 5 to 8), regardless of age, expressed as a percentage of the total population of the five-year age group following on from secondary school leaving.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.8.99 School enrollment, tertiary, female (percent gross) (wdi_gertf)

Long tag: qog_oecd_ts_wdi_gertf

Original tag: wdi_gertf

Description:
Total female enrollment in tertiary education (ISCED 5 to 8), regardless of age, expressed as a percentage of the total female population of the five-year age group following on from secondary school leaving.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.8.100 School enrollment, tertiary, male (percent gross) (wdi_gertm)

Long tag: qog_oecd_ts_wdi_gertm

Original tag: wdi_gertm

Description:
Total male enrollment in tertiary education (ISCED 5 to 8), regardless of age, expressed as a percentage of the total male population of the five-year age group following on from secondary school leaving.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.8.101 School enrollment, primary (percent net) (wdi_nerp)

Long tag: qog_oecd_ts_wdi_nerp

Original tag: wdi_nerp

Description:
Net enrollment rate is the ratio of children of official school age who are enrolled in school to the population of the corresponding official school age. Primary education provides children with basic reading, writing, and mathematics skills along with an elementary understanding of such subjects as history, geography, natural science, social science, art, and music.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.8.102 School enrollment, primary, female (percent net) (wdi_nerpf)

Long tag: qog_oecd_ts_wdi_nerpf

Original tag: wdi_nerpf

Description:
Net enrollment rate is the ratio of girls of official school age who are enrolled in school to the population of the corresponding official school age. Primary education provides children with basic reading, writing, and mathematics skills along with an elementary understanding of such subjects as history, geography, natural science, social science, art, and music. Female.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.8.103 School enrollment, primary, male (percent net) (wdi_nerpm)

Long tag: qog_oecd_ts_wdi_nerpm

Original tag: wdi_nerpm

Description:
Net enrollment rate is the ratio of boys of official school age who are enrolled in school to the population of the corresponding official school age. Primary education provides children with basic reading, writing, and mathematics skills along with an elementary understanding of such subjects as history, geography, natural science, social science, art, and music. Male.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.8.104 Adjusted net enrollment rate, primary (percent of primary school children) (wdi_nerpr)

Long tag: qog_oecd_ts_wdi_nerpr

Original tag: wdi_nerpr

Description:
Adjusted net enrollment is the number of pupils of the school-age group for primary education, enrolled either in primary or secondary education, expressed as a percentage of the total population in that age group.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.8.105 Adjusted net enrollment rate, primary female (percent of primary school children) (wdi_nerprf)

Long tag: qog_oecd_ts_wdi_nerprf

Original tag: wdi_nerprf

Description:
Adjusted net enrollment is the number of female pupils of the school-age group for primary education, enrolled either in primary or secondary education, expressed as a percentage of the total population in that age group. Female.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.8.106 Adjusted net enrollment rate, primary male (percent of primary school children) (wdi_nerprm)

Long tag: qog_oecd_ts_wdi_nerprm

Original tag: wdi_nerprm

Description:
Adjusted net enrollment is the number of male pupils of the school-age group for primary education, enrolled either in primary or secondary education, expressed as a percentage of the total population in that age group. Male.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.8.107 School enrollment, secondary (percent net) (wdi_ners)

Long tag: qog_oecd_ts_wdi_ners

Original tag: wdi_ners

Description:
Net enrollment rate is the ratio of children of official school age who are enrolled in school to the population of the corresponding official school age. Secondary education completes the provision of basic education that began at the primary level, and aims at laying the foundations for lifelong learning and human development, by offering more subject- or skill-oriented instruction using more specialized teachers.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.8.108 School enrollment, secondary, female (percent net) (wdi_nersf)

Long tag: qog_oecd_ts_wdi_nersf

Original tag: wdi_nersf

Description:
Net enrollment rate is the ratio of girls of official school age who are enrolled in school to the population of the corresponding official school age. Secondary education completes the provision of basic education that began at the primary level, and aims at laying the foundations for lifelong learning and human development,

by offering more subject- or skill-oriented instruction using more specialized teachers. Female.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.8.109 School enrollment, secondary, male (percent net) (wdi_nersm)

Long tag: qog_oecd_ts_wdi_nersm

Original tag: wdi_nersm

Description:
Net enrollment rate is the ratio of boys of official school age who are enrolled in school to the population of the corresponding official school age. Secondary education completes the provision of basic education that began at the primary level, and aims at laying the foundations for lifelong learning and human development, by offering more subject- or skill-oriented instruction using more specialized teachers. Male.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.9 Political Parties and Elections

This category includes variables describing various aspects of the legislature and political parties in the legislature (number of seats) as well as variables related to the election for the executive and variables on the outcomes of elections.

2.12.9.1 No. of coups (br_coup)

Long tag: qog_oecd_ts_br_coup

Original tag: br_coup

Description:
Total number of coups

Variable citation: Bjørnskov, C., & Rode, M. (2020). Regime types and regime change: A new dataset on democracy, coups, and political institutions. *Review of International Organizations*, 15, 531–551

2.12.9.2 Is the country in the Commonwealth (br_cw)

Long tag: qog_oecd_ts_br_cw

Original tag: br_cw

Description:
Is the country a member of the British Commonwealth? (0: No; 1: Yes)

Variable citation: Bjørnskov, C., & Rode, M. (2020). Regime types and regime change: A new dataset on democracy, coups, and political institutions. *Review of International Organizations*, 15, 531–551

2.12.9.3 Whether an election was postponed (br_elecpost)

Long tag: qog_oecd_ts_br_elecpost

Original tag: br_elecpost

Description:
Whether an election held in that year was postponed from an earlier date (0: No, 1: Yes)

Variable citation: Bjørnskov, C., & Rode, M. (2020). Regime types and regime change: A new dataset on democracy, coups, and political institutions. *Review of International Organizations*, 15, 531–551

2.12.9.4 Typology of political institutions (br_elect)

Long tag: qog_oecd_ts_br_elect

Original tag: br_elect

Description:
Alternative democracy indicator capturing degree of multi-party competition. (No elections=0, Single-party elections=1, non-democratic multi-party elections=2, democratic elections= 3)

Variable citation: Bjørnskov, C., & Rode, M. (2020). Regime types and regime change: A new dataset on democracy, coups, and political institutions. *Review of International Organizations*, 15, 531–551

2.12.9.5 Whether an election was held during the year (br_elecyear)

Long tag: qog_oecd_ts_br_elecyear

Original tag: br_elecyear

Description:
Whether an election was held that year (0: No, 1: Yes)

Variable citation: Bjørnskov, C., & Rode, M. (2020). Regime types and regime change: A new dataset on democracy, coups, and political institutions. *Review of International Organizations*, 15, 531–551

2.12.9.6 No. of failed coups (br_fcoup)

Long tag: qog_oecd_ts_br_fcoup

Original tag: br_fcoup

Description:
Number of failed coups

Variable citation: Bjørnskov, C., & Rode, M. (2020). Regime types and regime change: A new dataset on democracy, coups, and political institutions. *Review of International Organizations*, 15, 531–551

2.12.9.7 Is the country a monarchy (br_mon)

Long tag: qog_oecd_ts_br_mon

Original tag: br_mon

Description:
Is the country a hereditary monarchy? (0: No; 1: Yes)

Variable citation: Bjørnskov, C., & Rode, M. (2020). Regime types and regime change: A new dataset on democracy, coups, and political institutions. *Review of International Organizations*, 15, 531–551

2.12.9.8 Is the political system presidential (br_pres)

Long tag: qog_oecd_ts_br_pres

Original tag: br_pres

Description:
Is the political system presidential? (0: No; 1: Yes)

Variable citation: Bjørnskov, C., & Rode, M. (2020). Regime types and regime change: A new dataset on democracy, coups, and political institutions. *Review of International Organizations*, 15, 531–551

2.12.9.9 Does the country have proportional voting (br_pvote)

Long tag: qog_oecd_ts_br_pvote

Original tag: br_pvote

Description:
Is the electoral system characterized by including proportional representation? (0: No; 1: Yes)

Variable citation: Bjørnskov, C., & Rode, M. (2020). Regime types and regime change: A new dataset on democracy, coups, and political institutions. *Review of International Organizations*, 15, 531–551

2.12.9.10 Did the main regime change (br_regch)

Long tag: qog_oecd_ts_br_regch

Original tag: br_regch

Description:
If a coded event, such as a change in the Presidency, took place after 01.07 it is assigned to the following calendar year in the data. In this case, the lag variable will be equal to one. For all change events before that date, the lag dummy is equal to zero. (0: No; 1: Yes)

Variable citation: Bjørnskov, C., & Rode, M. (2020). Regime types and regime change: A new dataset on democracy, coups, and political institutions. *Review of International Organizations*, 15, 531–551

2.12.9.11 No. of successful coups (br_scoup)

Long tag: qog_oecd_ts_br_scoup

Original tag: br_scoup

Description:
Number of successful coups

Variable citation: Bjørnskov, C., & Rode, M. (2020). Regime types and regime change: A new dataset on democracy, coups, and political institutions. *Review of International Organizations*, 15, 531–551

2.12.9.12 Full suffrage (br_suff)

Long tag: qog_oecd_ts_br_suff

Original tag: br_suff

Description:
Whether electoral system attributes full suffrage (0: No; 1: Yes)

Variable citation: Bjørnskov, C., & Rode, M. (2020). Regime types and regime change: A new dataset on democracy, coups, and political institutions. *Review of International Organizations*, 15, 531–551

2.12.9.13 Contestation (standardized version) (cam_contest)

Long tag: qog_oecd_ts_cam_contest

Original tag: cam_contest

Description:
Contestation standardized to be comparable across years.

Variable citation: Coppedge, M., Alvarez, A., & Maldonado, C. (2008). Two persistent dimensions of democracy: Contestation and inclusiveness. *The Journal of Politics*, 70(3), 632–647

2.12.9.14 Inclusiveness (standardized version) (cam_inclusive)

Long tag: qog_oecd_ts_cam_inclusive

Original tag: cam_inclusive

Description:
Inclusiveness standardized to be comparable across years.

Variable citation: Coppedge, M., Alvarez, A., & Maldonado, C. (2008). Two persistent dimensions of democracy: Contestation and inclusiveness. *The Journal of Politics*, 70(3), 632–647

2.12.9.15 Electoral Self-Determination (ciri_elecsd)

Long tag: qog_oecd_ts_ciri_elecsd

Original tag: ciri_elecsd

Description:
This variable indicates to what extent citizens enjoy freedom of political choice and the legal right and ability in practice to change the laws and officials that govern them through free and fair elections. This right is sometimes known as the right to self-determination. A score of 0 indicates that the right to self-determination through free and fair elections did not exist in law or practice during the year in question. A score of 1 indicates that while citizens had the legal right to self-determination, there were some limitations to the fulfillment of this right in practice. Therefore, in states receiving a 1, political participation was only moderately free and open. A score of 2 indicates that political participation was very free and open during the year in question and citizens had the right to self-determination through free and fair elections in both law and practice.

Variable citation: Cingranelli, D. L., Filippov, M., & Mark, S. (2019). The CIRIGHTS dataset [Version 2019.07.21]. *The Binghamton University Human Right Institute*. `www.binghamton.edu/institutes/hri` Cingranelli, D. L., Richards, D. L., & Clay, K. C. (2014). The CIRI Human Rights Dataset [Version 2014.04.14]. *CIRI Human Rights Data Project*, 6

2.12.9.16 Number of changes in government per year (cpds_chg)

Long tag: qog_oecd_ts_cpds_chg

Original tag: cpds_chg

Description:
Number of changes in government per year [termination of government due to (a) elections, (b) voluntary resignation of the Prime Minister, (c) resignation of Prime Minister due to health reasons, (d) dissension within government (break up of the coalition), (e) lack of parliamentary support, (f) intervention by the head of state, or (g) broadening of the coalition (inclusion of new parties).

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.12.9.17 Effective number of parties on the seats level (cpds_enps)

Long tag: qog_oecd_ts_cpds_enps

Original tag: cpds_enps

Description:
Effective number of parties on the seats level according to the formula proposed by Laakso and Taagepera (1979).

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.12.9.18 Effective number of parties on the votes level (cpds_enpv)

Long tag: qog_oecd_ts_cpds_enpv

Original tag: cpds_enpv

Description:

Effective number of parties on the votes level according to the formula proposed by Laakso and Taagepera (1979).

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.12.9.19 Electoral fractionalization of the party system (Rae index) (cpds_frel)

Long tag: qog_oecd_ts_cpds_frel

Original tag: cpds_frel

Description:

Index of electoral fractionalization of the party system according to the formula proposed by Rae (1968). The index can take values between 1 (maximal fractionalization) and 0 (minimal fractionalization).

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.12.9.20 Legislative fractionalization of the party system (Rae index) (cpds_frleg)

Long tag: qog_oecd_ts_cpds_frleg

Original tag: cpds_frleg

Description:

Index of legislative fractionalization of the party system according to the formula proposed by Rae (1968). The index can take values between 1 (maximal fractionalization) and 0 (minimal fractionalization).

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.12.9.21 Cabinet composition (Schmidt index) (cpds_govlr)

Long tag: qog_oecd_ts_cpds_govlr

Original tag: cpds_govlr

Description:

Cabinet composition (Schmidt-Index):

1. Hegemony of right-wing (and centre) parties.
2. Dominance of right-wing (and centre) parties.
3. Balance of power between left and right.
4. Dominance of social-democratic and other left parties.
5. Hegemony of social-democratic and other left parties.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.12.9.22 Government support (seat share of all parties in government) (cpds_govsup)

Long tag: qog_oecd_ts_cpds_govsup

Original tag: cpds_govsup

Description:

Total government support: seat share of all parties in government. Weighted by the numbers of days in office in a given year.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.12.9.23 Share of seats in parliament: agrarian (cpds_la)

Long tag: qog_oecd_ts_cpds_la

Original tag: cpds_la

Description:

Share of seats in parliament for the political parties classified as agrarian.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.12.9.24 Share of seats in parliament: electoral alliance (cpds_lall)

Long tag: qog_oecd_ts_cpds_lall

Original tag: cpds_lall

Description:
Share of seats in parliament for the political parties classified as electoral alliance.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.12.9.25 Share of seats in parliament: communist (cpds_lcom)

Long tag: qog_oecd_ts_cpds_lcom

Original tag: cpds_lcom

Description:
Share of seats in parliament for the political parties classified as communist.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.12.9.26 Share of seats in parliament: conservative (cpds_lcon)

Long tag: qog_oecd_ts_cpds_lcon

Original tag: cpds_lcon

Description:
Share of seats in parliament for the political parties classified as conservative.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.12.9.27 Share of seats in parliament: ethnic (cpds_le)

Long tag: qog_oecd_ts_cpds_le

Original tag: cpds_le

Description:
Share of seats in parliament for the political parties classified as ethnic.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.12.9.28 Share of seats in parliament: feminist (cpds_lfe)

Long tag: qog_oecd_ts_cpds_lfe

Original tag: cpds_lfe

Description:
Share of seats in parliament for the political parties classified as feminist.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.12.9.29 Share of seats in parliament: green (cpds_lg)

Long tag: qog_oecd_ts_cpds_lg

Original tag: cpds_lg

Description:
Share of seats in parliament for the political parties classified as green.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.12.9.30 Share of seats in parliament: liberal (cpds_ll)

Long tag: qog_oecd_ts_cpds_ll

Original tag: cpds_ll

Description:
Share of seats in parliament for the political parties classified as liberal.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.12.9.31 Share of seats in parliament: left-socialist (cpds_lls)

Long tag: qog_oecd_ts_cpds_lls

Original tag: cpds_lls

Description:
Share of seats in parliament for the political parties classified as left-socialist.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.12.9.32 Share of seats in parliament: monarchist (cpds_lmo)

Long tag: qog_oecd_ts_cpds_lmo

Original tag: cpds_lmo

Description:

Share of seats in parliament for the political parties classified as monarchist.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.12.9.33 Share of seats in parliament: non-labelled (cpds_lnl)

Long tag: qog_oecd_ts_cpds_lnl

Original tag: cpds_lnl

Description:

Share of seats in parliament for the political parties classified as non-labelled.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.12.9.34 Share of seats in parliament: other (cpds_lo)

Long tag: qog_oecd_ts_cpds_lo

Original tag: cpds_lo

Description:

Share of seats in parliament for the political parties classified as other.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.12.9.35 Share of seats in parliament: protest (cpds_lp)

Long tag: qog_oecd_ts_cpds_lp

Original tag: cpds_lp

Description:

Share of seats in parliament for the political parties classified as protest.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.12.9.36 Share of seats in parliament: post-communist (cpds_lpc)

Long tag: qog_oecd_ts_cpds_lpc

Original tag: cpds_lpc

Description:

Share of seats in parliament for the political parties classified as post-communist.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.12.9.37 Share of seats in parliament: pensioners (cpds_lpen)

Long tag: qog_oecd_ts_cpds_lpen

Original tag: cpds_lpen

Description:

Share of seats in parliament for the political parties classified as pensioners.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.12.9.38 Share of seats in parliament: personalist (cpds_lper)

Long tag: qog_oecd_ts_cpds_lper

Original tag: cpds_lper

Description:

Share of seats in parliament for the political parties classified as personalist.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.12.9.39 Share of seats in parliament: right (cpds_lr)

Long tag: qog_oecd_ts_cpds_lr

Original tag: cpds_lr

Description:

Share of seats in parliament for the political parties classified as right.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.12.9.40 Share of seats in parliament: regionalist (cpds_lreg)

Long tag: qog_oecd_ts_cpds_lreg

Original tag: cpds_lreg

Description:

Share of seats in parliament for the political parties classified as regionalist.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.12.9.41 Share of seats in parliament: religious (cpds_lrel)

Long tag: qog_oecd_ts_cpds_lrel

Original tag: cpds_lrel

Description:

Share of seats in parliament for the political parties classified as religious.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.12.9.42 Share of seats in parliament: social democratic (cpds_ls)

Long tag: qog_oecd_ts_cpds_ls

Original tag: cpds_ls

Description:

Share of seats in parliament for the political parties classified as social democratic.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.12.9.43 Type of Government (cpds_tg)

Long tag: qog_oecd_ts_cpds_tg

Original tag: cpds_tg

Description:

Type of government based on the following classification:

1. Single-party majority government: One party takes all governments seats and has a parliamentary majority.
2. Minimal winning coalition: All participating parties are necessary to form a majority government [>50.0percent].
3. Surplus coalition: Coalition governments which exceed the minimal-winning criterion [>50.0percent].
4. Single-party minority government: The party in government does not possess a majority in Parliament [<50.0percent].
5. Multi-party minority government: The parties in government do not possess a majority in Parliament [<50.0percent].
6. Caretaker government: Governments which should simply maintain the status quo.
7. Technocratic government: Led by technocratic prime minister, consists of a majority of technocratic ministers and is in possession of a mandate to change the status quo.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.12.9.44 Share of votes: agrarian (cpds_va)

Long tag: qog_oecd_ts_cpds_va

Original tag: cpds_va

Description:

Share of votes of the political parties classified as agrarian.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.12.9.45 Share of votes: electoral alliance (cpds_vall)

Long tag: qog_oecd_ts_cpds_vall

Original tag: cpds_vall

Description:

Share of votes of the political parties classified as electoral alliance.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.12.9.46 Share of votes: communist (cpds_vcom)

Long tag: qog_oecd_ts_cpds_vcom

Original tag: cpds_vcom
Description:
Share of votes of the political parties classified as communist.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.12.9.47 Share of votes: conservative (cpds_vcon)

Long tag: qog_oecd_ts_cpds_vcon
Original tag: cpds_vcon
Description:
Share of votes of the political parties classified as conservative.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.12.9.48 Share of votes: ethnic (cpds_ve)

Long tag: qog_oecd_ts_cpds_ve
Original tag: cpds_ve
Description:
Share of votes of the political parties classified as ethnic.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.12.9.49 Share of votes: feminist (cpds_vfe)

Long tag: qog_oecd_ts_cpds_vfe
Original tag: cpds_vfe
Description:
Share of votes of the political parties classified as feminist.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.12.9.50 Share of votes: green (cpds_vg)

Long tag: qog_oecd_ts_cpds_vg
Original tag: cpds_vg
Description:
Share of votes of the political parties classified as green.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.12.9.51 Share of votes: liberal (cpds_vl)

Long tag: qog_oecd_ts_cpds_vl
Original tag: cpds_vl
Description:
Share of votes of the political parties classified as liberal.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.12.9.52 Share of votes: left-socialist (cpds_vls)

Long tag: qog_oecd_ts_cpds_vls
Original tag: cpds_vls
Description:
Share of votes of the political parties classified as left-socialist.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.12.9.53 Share of votes: monarchist (cpds_vmo)

Long tag: qog_oecd_ts_cpds_vmo
Original tag: cpds_vmo
Description:
Share of votes of the political parties classified as monarchist.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.12.9.54 Share of votes: non-labelled (cpds_vnl)

Long tag: qog_oecd_ts_cpds_vnl

Original tag: cpds_vnl

Description:
Share of votes of the political parties classified as non-labelled.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.12.9.55 Share of votes: other (cpds_vo)

Long tag: qog_oecd_ts_cpds_vo

Original tag: cpds_vo

Description:
Share of votes of the political parties classified as other.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.12.9.56 Share of votes: protest (cpds_vp)

Long tag: qog_oecd_ts_cpds_vp

Original tag: cpds_vp

Description:
Share of votes of the political parties classified as protest.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.12.9.57 Share of votes: post-communist (cpds_vpcom)

Long tag: qog_oecd_ts_cpds_vpcom

Original tag: cpds_vpcom

Description:
Share of votes of the political parties classified as post-communist.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.12.9.58 Share of votes: pensioners (cpds_vpen)

Long tag: qog_oecd_ts_cpds_vpen

Original tag: cpds_vpen

Description:
Share of votes of the political parties classified as pensioners.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.12.9.59 Share of votes: personalist (cpds_vper)

Long tag: qog_oecd_ts_cpds_vper

Original tag: cpds_vper

Description:
Share of votes of the political parties classified as personalist.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.12.9.60 Share of votes: right (cpds_vr)

Long tag: qog_oecd_ts_cpds_vr

Original tag: cpds_vr

Description:
Share of votes of the political parties classified as right.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.12.9.61 Share of votes: regionalist (cpds_vreg)

Long tag: qog_oecd_ts_cpds_vreg

Original tag: cpds_vreg

Description:
Share of votes of the political parties classified as regionalist.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.12.9.62 Share of votes: religious (cpds_vrel)

Long tag: qog_oecd_ts_cpds_vrel

Original tag: cpds_vrel

Description:
Share of votes of the political parties classified as religious.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.12.9.63 Share of votes: social democratic (cpds_vs)

Long tag: qog_oecd_ts_cpds_vs

Original tag: cpds_vs

Description:
Share of votes of the political parties classified as social democratic.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.12.9.64 Voter turnout in election (cpds_vt)

Long tag: qog_oecd_ts_cpds_vt

Original tag: cpds_vt

Description:
Voter turnout in election.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.12.9.65 Electoral Volatility - Parties above 1percent (2nd election in year) (dev_altv2)

Long tag: qog_oecd_ts_dev_altv2

Original tag: dev_altv2

Description:
Electoral volatility caused by vote switching between existing parties in a second election in the same year.

Variable citation: Williams, A. (2015). A global index of information transparency and accountability. *Journal of Comparative Economics*, 43(3), 804–824. `https://doi.org/10.1016/j.jce.2014.10.004`

2.12.9.66 Electoral Volatility - Parties below 1percent (2nd election in year) (dev_othv2)

Long tag: qog_oecd_ts_dev_othv2

Original tag: dev_othv2

Description:
Electoral volatility caused by vote switching between parties falling below 1percent of the national share in both the elections at time t and t+1 in a second election in the same year.

Variable citation: Williams, A. (2015). A global index of information transparency and accountability. *Journal of Comparative Economics*, 43(3), 804–824. `https://doi.org/10.1016/j.jce.2014.10.004`

2.12.9.67 Electoral Volatility - Parties entering/exiting party system (2nd election in ye (dev_regv2)

Long tag: qog_oecd_ts_dev_regv2

Original tag: dev_regv2

Description:
Electoral volatility caused by vote switching between parties that enter or exit from the party system in a second election in the same year.

Variable citation: Williams, A. (2015). A global index of information transparency and accountability. *Journal of Comparative Economics*, 43(3), 804–824. `https://doi.org/10.1016/j.jce.2014.10.004`

2.12.9.68 Electoral Volatility - Total (2nd election in year) (dev_tv2)

Long tag: qog_oecd_ts_dev_tv2

Original tag: dev_tv2

Description:
Total electoral volatility in the party system in a second election in the same year.

Variable citation: Williams, A. (2015). A global index of information transparency and accountability. *Journal of Comparative Economics*, 43(3), 804–824. https://doi.org/10.1016/j.jce.2014.10.004

2.12.9.69 Electoral Process (fh_ep)

Long tag: qog_oecd_ts_fh_ep

Original tag: fh_ep

Description:
Electoral Process - The variable measures to what extent the national legislative representatives and the national chief authority are elected through free and fair elections. Countries are graded between 0 (worst) and 12 (best).

Variable citation: Freedom House. (2021a). Freedom in the world 2021. https://freedomhouse.org/report/freedom-world

2.12.9.70 Average District Magnitude (gol_adm)

Long tag: qog_oecd_ts_gol_adm

Original tag: gol_adm

Description:
Average district magnitude in an electoral tier. This is calculated as the total number of seats allocated in an electoral tier divided by the total number of districts in that tier.

2.12.9.71 Districts (gol_dist)

Long tag: qog_oecd_ts_gol_dist

Original tag: gol_dist

Description:
This is the number of electoral districts or constituencies in an electoral tier.

2.12.9.72 Effective Number of Electoral Parties (gol_enep)

Long tag: qog_oecd_ts_gol_enep

Original tag: gol_enep

Description:
Effective number of electoral parties.

2.12.9.73 Effective Number of Electoral Parties 1 (gol_enep1)

Long tag: qog_oecd_ts_gol_enep1

Original tag: gol_enep1

Description:
The effective number of electoral parties once the "other" category has been "corrected" by using the least component method of bounds.

2.12.9.74 Effective Number of Electoral Parties (Others) (gol_enepo)

Long tag: qog_oecd_ts_gol_enepo

Original tag: gol_enepo

Description:
The percentage of the vote going to parties that are collectively known as "others" in official election results.

2.12.9.75 Effective Number of Parliamentary or Legislative Parties (gol_enpp)

Long tag: qog_oecd_ts_gol_enpp

Original tag: gol_enpp

Description:
The effective number of parliamentary (legislative) parties.

2.12.9.76 Effective Number of Parliamentary or Legislative Parties 1 (gol_enpp1)

Long tag: qog_oecd_ts_gol_enpp1

Original tag: gol_enpp1

Description:
This is the effective number of parliamentary (legislative) parties once the "other" category has been "corrected" by using the least component method of bounds.

2.12.9.77 Effective Number of Parliamentary or Legislative Parties (Others) (gol_enppo)

Long tag: qog_oecd_ts_gol_enppo

Original tag: gol_enppo

Description:

The percentage of seats won by parties that are collectively known as "others" in official election results.

2.12.9.78 Electoral System Type-3 classes (gol_est)

Long tag: qog_oecd_ts_gol_est

Original tag: gol_est

Description:

This is a categorical variable that takes on one of three values indicating the basic type of electoral system used in the elections.

1. Majoritarian
2. Proportional
3. Mixed

2.12.9.79 Electoral System Type-11 classes (gol_est_spec)

Long tag: qog_oecd_ts_gol_est_spec

Original tag: gol_est_spec

Description:

This is a categorical variable that provides a more detailed indication of the type of electoral system used in the election.

1. Single-Member-District-Plurality (SMDP)
2. Two-Round System (TRS)
3. Alternative Vote (AV)
4. Borda Count (BC)
5. Block Vote (BV)
6. Party Block Vote (PBV)
7. Limited Vote (LV)
8. Single Nontransferable Vote (SNTV)
9. List Proportional Representation (List PR)
10. Single Transferable Vote (STV)
11. Mixed Dependent (or Mixed Member Proportional)
12. Mixed Independent (or Mixed Parallel)

2.12.9.80 Institution (gol_inst)

Long tag: qog_oecd_ts_gol_inst

Original tag: gol_inst

Description:

This is a categorical variable indicating a country's regime type at the end of a given year. The data for this variable come from Cheibub, Gandhi and Vreeland (2010), which we updated through 2011.

0. Parliamentary democracy
1. Semi-presidential democracy
2. Presidential democracy
3. Civilian dictatorship
4. Military dictatorship
5. Royal dictatorship

Not all elections that occur when a regime is classified as a dictatorship (regime = 4-6) are dictatorial. This apparent anomaly has to do with the fact that a country's regime type is coded based on its status at the end of a given year. Elections like those in Argentina 1962, Nicaragua 1983, Philippines 1965, and Thailand 1976 all preceded a democratic collapse in the same year. Although these countries are considered dictatorial at the end of these years, we code these particular elections as democratic and therefore include them in our data set. We should note that we code the 1997 elections in Kenya, the 1999 elections in Guinea Bissau, the 2005 elections in Liberia, the 2006 elections in Mauritania, and the 2008 elections in Bangladesh as democratic even though Cheibub, Gandhi and Vreeland (2010) do not code these countries as democratic until the following year. The reason for this is that these elections are the primary reason cited by Cheibub, Gandhi and Vreeland (2010) for their eventual recoding of these countries as democratic. As an example, Cheibub, Gandhi and Vreeland (2010) do not code Liberia as democratic until 2006 despite the fact that presidential elections took place in October 2005, because the winner of these elections, Ellen Johnson-Sirleaf, did not officially take office until January 2006. The bottom line is that there are a few observations in our data set of democratic elections where regime indicates that the country was a dictatorship by the end of the year.

2.12.9.81 Multi-Tier Type (gol_mt)

Long tag: qog_oecd_ts_gol_mt

Original tag: gol_mt

Description:

This is a dichotomous variable that indicates whether different electoral tiers are linked (1) or not (0). Electoral tiers are linked if the unused votes from one electoral tier are used to allocate seats in another electoral tier, or if the allocation of seats in one electoral tier is conditional on the seats received in a different electoral tier.

2.12.9.82 Number of Seats (gol_nos)

Long tag: qog_oecd_ts_gol_nos

Original tag: gol_nos

Description:

This indicates the total number of seats in the lower house of the national legislature.

2.12.9.83 Electoral Formula used in an Electoral Tier (gol_pr)

Long tag: qog_oecd_ts_gol_pr

Original tag: gol_pr

Description:

This is a categorical variable that indicates the precise electoral formula used in an electoral tier.

1. Single-Member-District-Plurality (SMDP)
2. Two Round Majority-Plurality
3. Two Round Qualified Majority
4. Two Round Majority Runoff
5. Alternative Vote (AV)
6. Borda Count (BC)
7. Modified Borda Count (mBC)
8. Block Vote (BV)
9. Party Block Vote (PBV)
10. Limited Vote (LV)
11. Single Nontransferable Vote (SNTV)
12. Hare quota
13. Hare quota with largest remainders
14. Hare quota with highest average remainders
15. Hagenbach-Bischoff quota
16. Hagenbach-Bischoff quota with largest remainders
17. Hagenbach-Bischoff quota with highest average remainders
18. Droop quota
19. Droop quota with largest remainders
20. Droop quota with highest average remainders
21. Imperiali quota
22. Imperiali quota with largest remainders
23. Imperiali quota with highest average remainders
24. Reinforced Imperiali quota
25. D'Hondt
26. Sainte-Laguë
27. Modified Sainte-Laguë
28. Single Transferable Vote.

Note: Users can find a detailed description of the difference between types in the original codebook.

2.12.9.84 Presidential Election (gol_preel)

Long tag: qog_oecd_ts_gol_preel

Original tag: gol_preel

Description:

This is a dichotomous variable that takes on the value 1 if the election is presidential and 0 if the election is legislative.

2.12.9.85 Upper Seats (gol_upseat)

Long tag: qog_oecd_ts_gol_upseat

Original tag: gol_upseat

Description:

This indicates the number of legislative seats allocated in electoral districts above the lowest electoral tier.

2.12.9.86 Upper Tier (gol_uptier)

Long tag: qog_oecd_ts_gol_uptier

Original tag: gol_uptier

Description:
This indicates the percentage of all legislative seats allocated in electoral districts above the lowest electoral tier.

2.12.9.87 Proportional Representation (gtm_pr)

Long tag: qog_oecd_ts_gtm_pr

Original tag: gtm_pr

Description:
The centripetal theory of democratic governance emphasizes the following three features of an electoral system: (a) district magnitude (M), (b) seat allocation rules (majoritarian or proportional), and (c) candidate selection rules. The centripetal ideal type is defined by M>1, proportional seat allocation rules, and party-controlled candidate selection. This is the closed-list-PR electoral system. Other systems are ranked lower in this coding according to their deviation from this ideal type. Thus, the coding for the list-PR variable is as follows:

0. Majoritarian or Preferential-vote.
1. Mixed-member majority or Block vote.
2. Closed-list-PR.

2.12.9.88 Alignment Executive/Legislative Chamber (lower) (h_alignl1)

Long tag: qog_oecd_ts_h_alignl1

Original tag: h_alignl1

Description:
Dummy variable indicating alignment between the executive and the lower legislative chamber, coded 1 when the party controlling the executive branch is either the largest party in the lower legislative chamber or is a member of a ruling coalition in that chamber.

Variable citation: Henisz, W. J. (2017). The Political Constraint Index (POLCON) Dataset 2017 release. `https://mgmt.wharton.upenn.edu/profile/1327`

2.12.9.89 2nd Legislative Chamber (h_l2)

Long tag: qog_oecd_ts_h_l2

Original tag: h_l2

Description:
Dummy variable coded 1 if there is an effective second legislative chamber, namely, where h_l1=1 and records on the composition of a second chamber exist - where that chamber is elected under a distinct electoral system and has a substantive (not merely delaying) role in the implementation of fiscal policy.

Variable citation: Henisz, W. J. (2017). The Political Constraint Index (POLCON) Dataset 2017 release. `https://mgmt.wharton.upenn.edu/profile/1327`

2.12.9.90 Legislative Fractionalization (lower) (h_lflo)

Long tag: qog_oecd_ts_h_lflo

Original tag: h_lflo

Description:
Legislative fractionalization is approximately the probability that two random draws from the lower legislative chamber will be from different parties.

Variable citation: Henisz, W. J. (2017). The Political Constraint Index (POLCON) Dataset 2017 release. `https://mgmt.wharton.upenn.edu/profile/1327`

2.12.9.91 Size of Largest Party in Legislature (in Fractions) (ht_partsz)

Long tag: qog_oecd_ts_ht_partsz

Original tag: ht_partsz

Description:
Counts the largest parties' number of seats divided by the legislative assemblies' total number of seats expressed in fractions. In countries with a two-chamber parliament the lower house is counted.

Variable citation: Wahman, M., Teorell, J., & Hadenius, A. (2013). 2.12.9.92 Banning of Anti-System Parties (iaep_basp)

Long tag: qog_oecd_ts_iaep_basp

Original tag: iaep_basp

Description:

Does an anti-system platform determine the banning of parties?

0. No
1. Yes

Source: IAEP (Wig et al., 2015)

Variable citation: Wig, T., Hegre, H., & Regan, P. M. (2015). Updated data on institutions and elections 1960–2012: Presenting the iaep dataset version 2.0. *Research & Politics*, 2(2). https://doi.org/10.1177/2053168015579120

2.12.9.93 Banned Parties (iaep_bp)

Long tag: qog_oecd_ts_iaep_bp

Original tag: iaep_bp

Description:

Are there banned parties?

0. No
1. Yes

Source: IAEP (Wig et al., 2015)

Variable citation: Wig, T., Hegre, H., & Regan, P. M. (2015). Updated data on institutions and elections 1960–2012: Presenting the iaep dataset version 2.0. *Research & Politics*, 2(2). https://doi.org/10.1177/2053168015579120

2.12.9.94 Some other executive have the power to call elections (iaep_callo)

Long tag: qog_oecd_ts_iaep_callo

Original tag: iaep_callo

Description:

Does some other executive have the power to call elections?

0. No
1. Yes

Source: IAEP (Wig et al., 2015)

Variable citation: Wig, T., Hegre, H., & Regan, P. M. (2015). Updated data on institutions and elections 1960–2012: Presenting the iaep dataset version 2.0. *Research & Politics*, 2(2). https://doi.org/10.1177/2053168015579120

2.12.9.95 Ethnicity Based Banning of Parties (iaep_ebbp)

Long tag: qog_oecd_ts_iaep_ebbp

Original tag: iaep_ebbp

Description:

Does ethnic makeup determine the banning of parties?

0. No
1. Yes

Source: IAEP (Wig et al., 2015)

Variable citation: Wig, T., Hegre, H., & Regan, P. M. (2015). Updated data on institutions and elections 1960–2012: Presenting the iaep dataset version 2.0. *Research & Politics*, 2(2). https://doi.org/10.1177/2053168015579120

2.12.9.96 Executive Nomination of Legislature Candidates (iaep_enlc)

Long tag: qog_oecd_ts_iaep_enlc

Original tag: iaep_enlc

Description:

Does executive nomination establish how the field of candidates who stand for legislative elections is determined?

0. No

1. Yes

Source: IAEP (Wig et al., 2015)

Variable citation: Wig, T., Hegre, H., & Regan, P. M. (2015). Updated data on institutions and elections 1960–2012: Presenting the iaep dataset version 2.0. *Research & Politics*, 2(2). https://doi.org/10.1177/2053168015579120

2.12.9.97 Electoral System (iaep_es)

Long tag: qog_oecd_ts_iaep_es

Original tag: iaep_es

Description:

What is the type of electoral system for legislative elections?

1. Plurality (First past the post)
2. Majority
3. Proportional representation
4. Mixed systems (combination of PR and either plurality or majority). This option includes situations in which a single chamber contains seats selected by different methods, or situations in which all of the seats in a chamber are chosen with the same method, but each chamber is selected through different methods.

Source: IAEP (Wig et al., 2015)

Variable citation: Wig, T., Hegre, H., & Regan, P. M. (2015). Updated data on institutions and elections 1960–2012: Presenting the iaep dataset version 2.0. *Research & Politics*, 2(2). https://doi.org/10.1177/2053168015579120

2.12.9.98 Independence of Selection of Executive (iaep_ise)

Long tag: qog_oecd_ts_iaep_ise

Original tag: iaep_ise

Description:

Is there an executive chosen independently of the legislature (like a president, for example)? If these processes that select the executive are distinct from that which selects the legislature, then the authors consider the two to be independent. The selection processes, moreover, can involve different - albeit competing or complimentary - forms of selection.

0. No
1. Yes

Source: IAEP (Wig et al., 2015)

Variable citation: Wig, T., Hegre, H., & Regan, P. M. (2015). Updated data on institutions and elections 1960–2012: Presenting the iaep dataset version 2.0. *Research & Politics*, 2(2). https://doi.org/10.1177/2053168015579120

2.12.9.99 National Elections for an Executive (iaep_nee)

Long tag: qog_oecd_ts_iaep_nee

Original tag: iaep_nee

Description:

Does the country hold national elections for an executive? We consider national elections to involve subjecting the executive to some form of popular plebiscite. This electoral process may or may not bear any relationship to the ultimate appointment of the executive. Executive council elections that select an executive are not considered national elections.

0. No
1. Yes

Source: IAEP (Wig et al., 2015)

Variable citation: Wig, T., Hegre, H., & Regan, P. M. (2015). Updated data on institutions and elections 1960–2012: Presenting the iaep dataset version 2.0. *Research & Politics*, 2(2). https://doi.org/10.1177/2053168015579120

2.12.9.100 National Elections for the Legislature (iaep_nel)

Long tag: qog_oecd_ts_iaep_nel

Original tag: iaep_nel

Description:

Does the country hold national elections for the legislature? We consider national elections to involve subjecting the members of the legislature to some form of popular plebiscite. While seats may be divided into districts, we consider national elections to occur when district-wide elections are organized at the national level.

0. No
1. Yes

Source: IAEP (Wig et al., 2015)

2012: Presenting the iaep dataset version 2.0. *Research & Politics*, 2(2). https://doi.org/10.1177/2053168015579120

2.12.9.109 Parliamentary Election: Compulsory Voting (ideavt_legcv)

Long tag: qog_oecd_ts_ideavt_legcv

Original tag: ideavt_legcv

Description:
Parliamentary Election: Compulsory Voting

Variable citation: The International Institute for Democracy and Electoral Assistance. (2021b). Voter turnout database. https://www.idea.int/data-tools/data/voter-turnout

2.12.9.110 Parliamentary Election: Voter Turnout (ideavt_legvt)

Long tag: qog_oecd_ts_ideavt_legvt

Original tag: ideavt_legvt

Description:
Parliamentary Election: Voter Turnout

Variable citation: The International Institute for Democracy and Electoral Assistance. (2021b). Voter turnout database. https://www.idea.int/data-tools/data/voter-turnout

2.12.9.111 Number of Seats (Lower and Single Houses) (ipu_l_s)

Long tag: qog_oecd_ts_ipu_l_s

Original tag: ipu_l_s

Description:
Number of Seats (Lower and Single Houses).

Variable citation: Inter-Parliamentary Union. (2021). Parline database: Monthly ranking of women in national parliaments. https://data.ipu.org/women-ranking

2.12.9.112 Share of Women (Lower and Single Houses) (ipu_l_sw)

Long tag: qog_oecd_ts_ipu_l_sw

Original tag: ipu_l_sw

Description:
Share of Women (Lower and Single Houses).

Variable citation: Inter-Parliamentary Union. (2021). Parline database: Monthly ranking of women in national parliaments. https://data.ipu.org/women-ranking

2.12.9.113 Number of Women (Lower and Single Houses) (ipu_l_w)

Long tag: qog_oecd_ts_ipu_l_w

Original tag: ipu_l_w

Description:
Number of Women (Lower and Single Houses).

Variable citation: Inter-Parliamentary Union. (2021). Parline database: Monthly ranking of women in national parliaments. https://data.ipu.org/women-ranking

2.12.9.114 Party Control over Ballot (lower/only house) (jw_avgballot)

Long tag: qog_oecd_ts_jw_avgballot

Original tag: jw_avgballot

Description:
Country-level weighted averages of Party Control over Ballot - SMD (lower/only house) (jw_smdballot) and Party Control over Ballot - MMD (lower/only house) (jw_mmdballot), where the weights are the percentage of members that originate from each tier. This variable thus reflects the value of ballots for the average member sitting in the lower house. The ballot variables focus on the amount of party control over candidates' access to a competitive position on the ballot. The variables equal (in order of increasing personal vote incentives): (0) where parties control access to ballots as well as the order in which individuals will fill the seats that the party wins (closed list multi-member districts, open list multi-member districts with little or no de facto change in list order); (1) where parties control access to the ballot, but not the order in which candidates will receive seats (open lists where intra-party preference votes seem to have a significant influence on which candidates are selected, and single-member districts where parties control access to the list); (2) where there are few or no impediments to individual candidates' ability to appear on the ballot (single-member districts where parties do not control access, e.g. allowing independent candidates and/or use

primaries to select candidates).

Variable citation: Johnson, J. W., & Wallack, J. S. (2012). Electoral systems and the personal vote. `https://doi.org/1902.1/17901`

2.12.9.115 Sharing of Votes among Candidates (lower/only house) (jw_avgpool)

Long tag: qog_oecd_ts_jw_avgpool

Original tag: jw_avgpool

Description:

Country-level weighted averages of Sharing of Votes among Candidates - SMD (lower/only house) (jw_smdpool) and Sharing of Votes among Candidates - MMD (lower/only house) (jw_mmdpool), where the weights are the percentage of members that originate from each tier. This variable thus reflects the value of the pooling of votes for the average member sitting in the lower house. The Pool variables measure the extent to which votes among candidates from the same party are shared. The variables equal (in order of increasing personal vote incentives): (0) where pooling of votes occurs across all candidates in a party in a district; (1) where pooling of votes occurs across some, but not all, candidates in a party in a district, or, where there is vote pooling across all candidates in a party in a district, but where the average district accounts for 5percent or less of a legislature's membership; (2) where no pooling of votes occurs across candidates in a party (including single-member districts).

Variable citation: Johnson, J. W., & Wallack, J. S. (2012). Electoral systems and the personal vote. `https://doi.org/1902.1/17901`

2.12.9.116 Candidate or Party-specific Voting (lower/only house) (jw_avgvote)

Long tag: qog_oecd_ts_jw_avgvote

Original tag: jw_avgvote

Description:

Country-level weighted averages of Candidate- or Party-specific Voting - SMD (lower/only house) (jw_smdvote) and Candidate- or Party-specific Voting - MMD (lower/only house) (jw_mmdvote), where the weights are the percentage of members that originate from each tier. This variable thus reflects the value of votes for the average member sitting in the lower house. The Vote variables focus attention on the distinction between casting votes for either parties or individual candidates. The variables equal (in order of increasing personal vote incentives): (0) where voters have only one vote for a party; (1) where voters can vote for a party or a candidate (as in open lists), where voters have multiple votes for multiple candidates (as in runoff or single-transferable vote systems), or where votes for a party or candidate are observationally equivalent (as in single-member districts); (2) where voters have one vote for an individual candidate.

Variable citation: Johnson, J. W., & Wallack, J. S. (2012). Electoral systems and the personal vote. `https://doi.org/1902.1/17901`

2.12.9.117 Bicameral System (jw_bicameral)

Long tag: qog_oecd_ts_jw_bicameral

Original tag: jw_bicameral

Description:

Equals 1 whenever a country has a bicameral legislature.

Variable citation: Johnson, J. W., & Wallack, J. S. (2012). Electoral systems and the personal vote. `https://doi.org/1902.1/17901`

2.12.9.118 Dominant or Populous Tier (jw_domr)

Long tag: qog_oecd_ts_jw_domr

Original tag: jw_domr

Description:

This variable ranks countries in increasing order of incentives to cultivate a personal vote according to their most dominant or populous tier (or tier with the greater number of legislators). The variable varies from 1 to 13, corresponding to the thirteen positions in Carey
Shugart's (1995) ranking. For example, a country with a ranking of 1 would have a tier with the lowest possible rank of personal vote incentives, and that tier would account for the majority of the members in the assembly.

Variable citation: Johnson, J. W., & Wallack, J. S. (2012). Electoral systems and the personal vote. `https://doi.org/1902.1/17901`

2.12.9.119 Year of Election (lower/only house) (jw_election)

Long tag: qog_oecd_ts_jw_election

Original tag: jw_election

Description:
Dummy variable, 1 if year of election to lower house.

Variable citation: Johnson, J. W., & Wallack, J. S. (2012). Electoral systems and the personal vote. `https://doi.org/1902.1/17901`

2.12.9.120 Ballot Access for Independent Candidates (lower/only house) (jw_indy)

Long tag: qog_oecd_ts_jw_indy

Original tag: jw_indy

Description:
Equals 1 wherever independent candidates are legally allowed (even where the legal requirements are strict), and 0 otherwise. This complements the cases where the ballot variables above equal 1 or 2, since they are adjusted to capture de facto practice. jw_indy instead captures the de jure rules. A user could adjust the ballot variables above to be de jure if (s)he replaced values of 2 with values of 1 when jw_indy = 0. Refers to lower house elections. The ballot variables focus on the amount of party control over candidates' access to a competitive position on the ballot. The variables equal (in order of increasing personal vote incentives): (0) where parties control access to ballots as well as the order in which individuals will fill the seats that the party wins (closed list multi-member districts, open list multi-member districts with little or no de facto change in list order); (1) where parties control access to the ballot, but not the order in which candidates will receive seats (open lists where intra-party preference votes seem to have a significant influence on which candidates are selected, and single-member districts where parties control access to the list); (2) where there are few or no impediments to individual candidates' ability to appear on the ballot (single-member districts where parties do not control access, e.g. allowing independent candidates and/or use primaries to select candidates).

Variable citation: Johnson, J. W., & Wallack, J. S. (2012). Electoral systems and the personal vote. `https://doi.org/1902.1/17901`

2.12.9.121 Number of Coded Legislators (lower/only house) (jw_legsize)

Long tag: qog_oecd_ts_jw_legsize

Original tag: jw_legsize

Description:
The number of legislators coded in the dataset. These may not account for the total number of legislators if there are appointed legislators that have no electoral rules to code.

Variable citation: Johnson, J. W., & Wallack, J. S. (2012). Electoral systems and the personal vote. `https://doi.org/1902.1/17901`

2.12.9.122 Average District Magnitude (lower/only house) (jw_mdist)

Long tag: qog_oecd_ts_jw_mdist

Original tag: jw_mdist

Description:
This is the standard magnitude of the average district in the lower house. For example: A country with 300 seats divided among one national district with 200 members and 100 single-member districts would have an average district magnitude (jw_mdist) of 2.97 (i.e., 300/101).

Variable citation: Johnson, J. W., & Wallack, J. S. (2012). Electoral systems and the personal vote. `https://doi.org/1902.1/17901`

2.12.9.123 Party Control over Ballot - MMD (lower/only house) (jw_mmdballot)

Long tag: qog_oecd_ts_jw_mmdballot

Original tag: jw_mmdballot

Description:
Ballot (coded as above) for multi-member district tiers in elections to the lower house. The ballot variables focus on the amount of party control over candidates' access to a competitive position on the ballot. The variables equal (in order of increasing personal vote incentives): (0) where parties control access to ballots as well as the order in which individuals will fill the seats that the party wins (closed list multi-member districts, open list multi-member districts with little or no de facto change in list order); (1) where parties control access to the ballot, but not the order in which candidates will receive seats (open lists where intra-party preference votes seem to have a significant influence on which candidates are selected, and single-member districts where parties control access to the list); (2) where there are few or no impediments to individual candidates' ability to appear on the ballot (single-member districts where parties do not control access, e.g. allowing independent candidates and/or use primaries to select candidates).

Variable citation: Johnson, J. W., & Wallack, J. S. (2012). Electoral systems and the personal vote. `https://doi.org/1902.1/17901`

2.12.9.124 Sharing of Votes among Candidates - MMD (lower/only house) (jw_mmdpool)

Long tag: qog_oecd_ts_jw_mmdpool

Original tag: jw_mmdpool

Description:

Pool for multi-member district tiers in elections to the lower house. The Pool variables measure the extent to which votes among candidates from the same party are shared. The variables equal (in order of increasing personal vote incentives): (0) where pooling of votes occurs across all candidates in a party in a district; (1) where pooling of votes occurs across some, but not all, candidates in a party in a district, or, where there is vote pooling across all candidates in a party in a district, but where the average district accounts for 5percent or less of a legislature's membership; (2) where no pooling of votes occurs across candidates in a party (including single-member districts).

Variable citation: Johnson, J. W., & Wallack, J. S. (2012). Electoral systems and the personal vote. `https://doi.org/1902.1/17901`

2.12.9.125 Candidate or Party-specific Voting - MMD (lower/only house) (jw_mmdvote)

Long tag: qog_oecd_ts_jw_mmdvote

Original tag: jw_mmdvote

Description:

Vote for multi-member district tiers in elections to the lower house. The Vote variables focus attention on the distinction between casting votes for either parties or individual candidates. The variables equal (in order of increasing personal vote incentives): (0) where voters have only one vote for a party; (1) where voters can vote for a party or a candidate (as in open lists), where voters have multiple votes for multiple candidates (as in runoff or single-transferable vote systems), or where votes for a party or candidate are observationally equivalent (as in single-member districts); (2) where voters have one vote for an individual candidate.

Variable citation: Johnson, J. W., & Wallack, J. S. (2012). Electoral systems and the personal vote. `https://doi.org/1902.1/17901`

2.12.9.126 Runoff Elections (jw_multiround)

Long tag: qog_oecd_ts_jw_multiround

Original tag: jw_multiround

Description:

The variable indicates whether there are run-off elections. These are usually for SMDs with absolute majority requirements. Where jw_multiround is equal to 1, voters have more than a single vote to cast, albeit votes occur on separate election days.

Variable citation: Johnson, J. W., & Wallack, J. S. (2012). Electoral systems and the personal vote. `https://doi.org/1902.1/17901`

2.12.9.127 Multi Tier (lower/only house) (jw_multitier)

Long tag: qog_oecd_ts_jw_multitier

Original tag: jw_multitier

Description:

Indicates whether there are two or more tiers to the legislature.

Variable citation: Johnson, J. W., & Wallack, J. S. (2012). Electoral systems and the personal vote. `https://doi.org/1902.1/17901`

2.12.9.128 Single Party System (jw_oneparty)

Long tag: qog_oecd_ts_jw_oneparty

Original tag: jw_oneparty

Description:

Dummy variable, 1 if single-party system.

Variable citation: Johnson, J. W., & Wallack, J. S. (2012). Electoral systems and the personal vote. `https://doi.org/1902.1/17901`

2.12.9.129 Personalistic Tier (jw_persr)

Long tag: qog_oecd_ts_jw_persr

Original tag: jw_persr

Description:

This variable ranks countries in increasing order of incentives to cultivate a personal vote according to their

more personalistic tier (or tier with the greater incentives to cultivate a personal vote). The variable varies from 1 to 13, corresponding to the thirteen positions in Carey
Shugart's (1995) ranking. For example, a country with a ranking of 13 would have a tier with the highest possible rank of incentives to cultivate a personal vote, although that tier may only account for a minority or small fraction of its members.

Variable citation: Johnson, J. W., & Wallack, J. S. (2012). Electoral systems and the personal vote. `https://doi.org/1902.1/17901`

2.12.9.130 Proportion Coded Legislators (lower/only house) (jw_propcoded)

Long tag: qog_oecd_ts_jw_propcoded

Original tag: jw_propcoded

Description:
Shows the proportion of total legislators (elected and non-elected) that are included in the database (i.e. those that are elected).

Variable citation: Johnson, J. W., & Wallack, J. S. (2012). Electoral systems and the personal vote. `https://doi.org/1902.1/17901`

2.12.9.131 Seats from Multi-Member Districts (lower/only house) (jw_propmmd)

Long tag: qog_oecd_ts_jw_propmmd

Original tag: jw_propmmd

Description:
Proportion of seats from Multi-Member District (lower/only house).

Variable citation: Johnson, J. W., & Wallack, J. S. (2012). Electoral systems and the personal vote. `https://doi.org/1902.1/17901`

2.12.9.132 Seats from a National District (lower/only house) (jw_propn)

Long tag: qog_oecd_ts_jw_propn

Original tag: jw_propn

Description:
The proportion of legislators that are elected via a national tier.

Variable citation: Johnson, J. W., & Wallack, J. S. (2012). Electoral systems and the personal vote. `https://doi.org/1902.1/17901`

2.12.9.133 Seats from Single-Member Districts (lower/only house) (jw_propsmd)

Long tag: qog_oecd_ts_jw_propsmd

Original tag: jw_propsmd

Description:
Proportion of seats from Single-Member Districts.

Variable citation: Johnson, J. W., & Wallack, J. S. (2012). Electoral systems and the personal vote. `https://doi.org/1902.1/17901`

2.12.9.134 Rank Vote (lower/only house) (jw_rank)

Long tag: qog_oecd_ts_jw_rank

Original tag: jw_rank

Description:
Equals 1 in two circumstances: where voters may rank order candidates according to preference, or where citizens have multiple preference votes for multiple candidates, even if they may not specifically rank the candidates. Otherwise, jw_rank is equal to zero. Refers to lower house elections.

Variable citation: Johnson, J. W., & Wallack, J. S. (2012). Electoral systems and the personal vote. `https://doi.org/1902.1/17901`

2.12.9.135 Tiervote (lower/only house) (jw_tiervote)

Long tag: qog_oecd_ts_jw_tiervote

Original tag: jw_tiervote

Description:
Equals 1 when citizens are given a separate vote for deputies in each legislative tier.

Variable citation: Johnson, J. W., & Wallack, J. S. (2012). Electoral systems and the personal vote. `https://doi.org/1902.1/17901`

2.12.9.136 First Multiparty Election (nelda_fme)

Long tag: qog_oecd_ts_nelda_fme

Original tag: nelda_fme

Description:

This indicates when a newly independent country is having its first elections, when a country holds the first multiparty elections after a significant period of non-democratic rule, or when a country transitions from single-party elections to multiparty elections. Multiparty means that more than one party is allowed to contest the election, and that at least some of the parties are both nominally and effectively independent of the ruling actors.

Variable citation: Hyde, S. D., & Marinov, N. (2012). Which elections can be lost? *Political Analysis*, 20(2), 191–201 Hyde, S. D., & Marinov, N. (2021). Codebook for national elections across democracy and autocracy dataset, 5.0. `https://nelda.co/`

2.12.9.137 Media Bias before Election (nelda_mbbe)

Long tag: qog_oecd_ts_nelda_mbbe

Original tag: nelda_mbbe

Description:

If there were reports by either domestic or outside actors of media bias in favor of the incumbent or ruling party, it is coded as a "Yes". In cases where the media is totally controlled by the government, and/or no opposition is allowed, the answer is "Yes". It is possible that the answer is "No" even if the political system is tightly controlled.

Variable citation: Hyde, S. D., & Marinov, N. (2012). Which elections can be lost? *Political Analysis*, 20(2), 191–201 Hyde, S. D., & Marinov, N. (2021). Codebook for national elections across democracy and autocracy dataset, 5.0. `https://nelda.co/`

2.12.9.138 Was More Than One Party Legal (nelda_mtop)

Long tag: qog_oecd_ts_nelda_mtop

Original tag: nelda_mtop

Description:

This variable indicates whether multiple political parties were technically legal. The legalization of multiple parties need not necessarily mean the existence of a functioning opposition party, as there may be other non-legal barriers to the development of an opposition party. Similarly, a well organized opposition party may exist but may not be legal.

Variable citation: Hyde, S. D., & Marinov, N. (2012). Which elections can be lost? *Political Analysis*, 20(2), 191–201 Hyde, S. D., & Marinov, N. (2021). Codebook for national elections across democracy and autocracy dataset, 5.0. `https://nelda.co/`

2.12.9.139 Number of Elections, Total (nelda_noe)

Long tag: qog_oecd_ts_nelda_noe

Original tag: nelda_noe

Description:

The number of elections during the year (counting legislative, executive and constituent assembly elections).

Variable citation: Hyde, S. D., & Marinov, N. (2012). Which elections can be lost? *Political Analysis*, 20(2), 191–201 Hyde, S. D., & Marinov, N. (2021). Codebook for national elections across democracy and autocracy dataset, 5.0. `https://nelda.co/`

2.12.9.140 Number of Elections, Constituent Assembly (nelda_noea)

Long tag: qog_oecd_ts_nelda_noea

Original tag: nelda_noea

Description:

Number of constituent assembly elections during the year.

Variable citation: Hyde, S. D., & Marinov, N. (2012). Which elections can be lost? *Political Analysis*, 20(2), 191–201 Hyde, S. D., & Marinov, N. (2021). Codebook for national elections across democracy and autocracy dataset, 5.0. `https://nelda.co/`

2.12.9.141 Number of Elections, Executive (nelda_noee)

Long tag: qog_oecd_ts_nelda_noee

Original tag: nelda_noee

Description:
Number of executive elections during the year.

Variable citation: Hyde, S. D., & Marinov, N. (2012). Which elections can be lost? *Political Analysis*, 20(2), 191–201 Hyde, S. D., & Marinov, N. (2021). Codebook for national elections across democracy and autocracy dataset, 5.0. `https://nelda.co/`

2.12.9.142 Number of Elections, Legislative (nelda_noel)

Long tag: qog_oecd_ts_nelda_noel

Original tag: nelda_noel

Description:
Number of legislative elections during the year.

Variable citation: Hyde, S. D., & Marinov, N. (2012). Which elections can be lost? *Political Analysis*, 20(2), 191–201 Hyde, S. D., & Marinov, N. (2021). Codebook for national elections across democracy and autocracy dataset, 5.0. `https://nelda.co/`

2.12.9.143 Was Opposition Allowed (nelda_oa)

Long tag: qog_oecd_ts_nelda_oa

Original tag: nelda_oa

Description:
This variable indicates whether at least one opposition political party existed to contest the election. Some countries have multiple government parties but no opposition political party. An opposition party is one that is not in the government, meaning it is not affiliated with the incumbent party in power.

Variable citation: Hyde, S. D., & Marinov, N. (2012). Which elections can be lost? *Political Analysis*, 20(2), 191–201 Hyde, S. D., & Marinov, N. (2021). Codebook for national elections across democracy and autocracy dataset, 5.0. `https://nelda.co/`

2.12.9.144 Electoral Family (no_ef)

Long tag: qog_oecd_ts_no_ef

Original tag: no_ef

Description:
Electoral Family:

1. Majoritarian
2. Combined (mixed)
3. Proportional
4. No competitive elections

Variable citation: Norris, P. (2009). Democracy Timeseries Data Release 3.0. `http://www.hks.harvard.edu/fs/pnorris/Data/Data.htm`

2.12.9.145 Competition (van_comp)

Long tag: qog_oecd_ts_van_comp

Original tag: van_comp

Description:
The competition variable portrays the electoral success of smaller parties, that is, the percentage of votes gained by the smaller parties in parliamentary and/or presidential elections. The variable is calculated by subtracting from 100 the percentage of votes won by the largest party (the party which wins most votes) in parliamentary elections or by the party of the successful candidate in presidential elections. Depending on their importance, either parliamentary or presidential elections are used in the calculation of the variable, or both elections are used, with weights. If information on the distribution of votes is not available, or if the distribution does not portray the reality accurately, the distribution of parliamentary seats is used instead. If parliament members are elected but political parties are not allowed to take part in elections, it is assumed that one party has taken all votes or seats. In countries where parties are not banned but yet only independent candidates participate in elections, it is assumed that the share of the largest party is not over 30 percent.

2.12.9.146 Index of Democratization (van_index)

Long tag: qog_oecd_ts_van_index

Original tag: van_index

Description:
The index of democratization is formed by multiplying the competition and the participation variables and then dividing the outcome by 100.

2.12.9.147 Participation (van_part)

Long tag: qog_oecd_ts_van_part

Original tag: van_part

Description:

The political participation variable portrays the voting turnout in each election, and is calculated as the percentage of the total population who actually voted in the election. In the case of indirect elections, only votes cast in the final election are taken into account. If electors have not been elected by citizens, only the number of actual electors is taken into account, which means that the degree of participation drops to the value 0. If an election to choose electors has been held, the participation variable is calculated from the number and distribution of votes in that election. National referendums raise the variable value by five percent and state (regional) referendums by one percent for the year they are held. Referendums can add the degree of participation at maximum by 30 percent a year. The value of the combined degree of participation cannot be higher than 70 percent, even in cases where the sum of participation and referendums would be higher than 70.

2.12.9.148 Proportion of seats held by women in national parliaments (percent) (wdi_wip)

Long tag: qog_oecd_ts_wdi_wip

Original tag: wdi_wip

Description:

Women in parliaments are the percentage of parliamentary seats in a single or lower chamber held by women.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.9.149 Number of years the leader in office continuously (wgov_leadexp)

Long tag: qog_oecd_ts_wgov_leadexp

Original tag: wgov_leadexp

Description:

The number of years the person has been leader of the country in a row, continuous. Thus, it starts over if the leader is removed. The count starts at 1, when the leader first appear as leader in the dataset. Therefore, the measure is imprecise for leaders, who came to power before 1966.

Variable citation: Nyrup, J., & Bramwell, S. (2020). Who governs? a new global dataset on members of cabinets. *American Political Science Review*, 114(4), 1366–1374

2.12.9.150 Number of cabinet ministers (wgov_min)

Long tag: qog_oecd_ts_wgov_min

Original tag: wgov_min

Description:

Number of cabinet ministers. This number only include cabinet ministers.

Variable citation: Nyrup, J., & Bramwell, S. (2020). Who governs? a new global dataset on members of cabinets. *American Political Science Review*, 114(4), 1366–1374

2.12.9.151 Average age of cabinet members (wgov_minage)

Long tag: qog_oecd_ts_wgov_minage

Original tag: wgov_minage

Description:

Average age of cabinet ministers.

Variable citation: Nyrup, J., & Bramwell, S. (2020). Who governs? a new global dataset on members of cabinets. *American Political Science Review*, 114(4), 1366–1374

2.12.9.152 Number of women among cabinet ministers (wgov_minfem)

Long tag: qog_oecd_ts_wgov_minfem

Original tag: wgov_minfem

Description:

The number of women among cabinet ministers.

Variable citation: Nyrup, J., & Bramwell, S. (2020). Who governs? a new global dataset on members of cabinets. *American Political Science Review*, 114(4), 1366–1374

2.12.9.153 Average tenure of cabinet members (wgov_minten)

Long tag: qog_oecd_ts_wgov_minten

Original tag: wgov_minten

Description:
The average tenure of cabinet ministers.

Variable citation: Nyrup, J., & Bramwell, S. (2020). Who governs? a new global dataset on members of cabinets. *American Political Science Review*, 114(4), 1366–1374

2.12.9.154 Adjusted retention rate of cabinet members (wgov_mret)

Long tag: qog_oecd_ts_wgov_mret

Original tag: wgov_mret

Description:
The share of cabinet ministers, who where in the list of cabinet ministers for the previous year. This measure is adjusted for an expansion of number of cabinet members, so the number of cabinet ministers stays constant and the retention rate is therefore not influenced by an expansion of the cabinet.

Variable citation: Nyrup, J., & Bramwell, S. (2020). Who governs? a new global dataset on members of cabinets. *American Political Science Review*, 114(4), 1366–1374

2.12.9.155 Total number of government positions (inc. unoccupied and multiple positions hel (wgov_tot)

Long tag: qog_oecd_ts_wgov_tot

Original tag: wgov_tot

Description:
Number of entries for the country in the dataset. This number includes unoccupied positions and multiple positions held by the same persons.

Variable citation: Nyrup, J., & Bramwell, S. (2020). Who governs? a new global dataset on members of cabinets. *American Political Science Review*, 114(4), 1366–1374

2.12.9.156 Average age for all entries for the country in the dataset (wgov_totage)

Long tag: qog_oecd_ts_wgov_totage

Original tag: wgov_totage

Description:
Average age for people, based on all entries for the country in the dataset. This includes unoccupied positions and multiple positions held by the same persons.

Variable citation: Nyrup, J., & Bramwell, S. (2020). Who governs? a new global dataset on members of cabinets. *American Political Science Review*, 114(4), 1366–1374

2.12.9.157 Number of women in the total number of entries for the country in the dataset (wgov_totfem)

Long tag: qog_oecd_ts_wgov_totfem

Original tag: wgov_totfem

Description:
The number of women in the total number of entries for the country in the dataset. This includes unoccupied positions and multiple positions held by the same persons.

Variable citation: Nyrup, J., & Bramwell, S. (2020). Who governs? a new global dataset on members of cabinets. *American Political Science Review*, 114(4), 1366–1374

2.12.9.158 Average tenure for all entries for the country in the dataset (wgov_totten)

Long tag: qog_oecd_ts_wgov_totten

Original tag: wgov_totten

Description:
The average tenure for people, based on all entries for the country in the dataset. This includes unoccupied positions and multiple positions held by the same persons.

Variable citation: Nyrup, J., & Bramwell, S. (2020). Who governs? a new global dataset on members of cabinets. *American Political Science Review*, 114(4), 1366–1374

2.12.9.159 Adjusted retention rate for all entries for the country in the dataset (wgov_tret)

Long tag: qog_oecd_ts_wgov_tret

Original tag: wgov_tret

Description:
The share of people in total number of entries for the country, who were also listed in the previous year. This measure is adjusted for an expansion of the size of total number of entries, so the number of entries for the country stays constant and the retention rate is therefore not influenced by an expansion of the total number of entries.

Variable citation: Nyrup, J., & Bramwell, S. (2020). Who governs? a new global dataset on members of cabinets. *American Political Science Review*, 114(4), 1366–1374

2.12.10 Health

This category includes indicators describing the health of a population in a given country. These include reports about self-perceived health (state of health), policies and provided infrastructure concerning health (expenditure, number of hospitals), the prevalence of diseases (HIV, tuberculosis), and indicators such as birth rate, death rate and life expectancy.

2.12.10.1 Comparative Abortion Index 1 (0 to 7) (cai_cai1)

Long tag: qog_oecd_ts_cai_cai1

Original tag: cai_cai1

Description:
The scale quantifies grounds on which a country might grant legal access to abortion: saving a woman's life, preserving a woman's physical health, preserving a woman's mental health, in case of rape or incest, in case of fetal impairment, for social or economic reasons, and on request. 0 represents a country with a complete ban on abortions. 7 represents a country that allows abortions on request.

Variable citation: Forman–Rabinovici, A., & Sommer, U. (2018). Reproductive health policymakers: Comparing the influences of international and domestic institutions on abortion policy. *Public Administration*, 96(1), 185–199

2.12.10.2 Comparative Abortion Index 2 (0 to 1) (cai_cai2)

Long tag: qog_oecd_ts_cai_cai2

Original tag: cai_cai2

Description:
Using the 7 grounds for legal abortion, the weight of each grounds (Wi) will be determined based on the percentage (Pi) of countries that allow it. In the weighted index, countries are given a score on a scale of 0-1, where 0 represents countries in which there are no conditions for legal abortion, and 1 represents a country that accepts all criteria for abortion, including on request. The need for a weighted scale is as follows: It would be imprecise, for instance, to suggest that the criterion of saving a woman's life is equivalent to (and thus carries the same weight as) allowing abortion on demand. The more permissive the criterion, the less likely that it is universally accepted. Thus, the scale accounts for the different degrees of acceptance that each criterion represents.

Variable citation: Forman–Rabinovici, A., & Sommer, U. (2018). Reproductive health policymakers: Comparing the influences of international and domestic institutions on abortion policy. *Public Administration*, 96(1), 185–199

2.12.10.3 Foetal impairment is accepted as grounds for legal abortion (cai_foetal)

Long tag: qog_oecd_ts_cai_foetal

Original tag: cai_foetal

Description:
Binary variable that codes whether or not foetal impairment is accepted as grounds for a legal abortion. 1 means that it is accepted as grounds for abortion. 0 means that it is illegal, and not accepted as grounds for legal abortion.

Variable citation: Forman–Rabinovici, A., & Sommer, U. (2018). Reproductive health policymakers: Comparing the influences of international and domestic institutions on abortion policy. *Public Administration*, 96(1), 185–199

2.12.10.4 Threat to mother's life is accepted as grounds for legal abortion (cai_life)

Long tag: qog_oecd_ts_cai_life

Original tag: cai_life

Description:
Binary variable that codes whether or not threat to a mother's life is accepted as grounds for a legal abortion. 1 means that it is accepted as grounds for abortion. 0 means that it is illegal, and not accepted as grounds for legal abortion.

Variable citation: Forman–Rabinovici, A., & Sommer, U. (2018). Reproductive health policymakers: Comparing the influences of international and domestic institutions on abortion policy. *Public Administration*, 96(1), 185–199

2.12.10.5 Threat to mother's mental health is accepted as grounds for legal abortion (cai_mental)

Long tag: qog_oecd_ts_cai_mental

Original tag: cai_mental

Description:

Binary variable that codes whether or not threat to a mother's mental health is accepted as grounds for a legal abortion. 1 means that it is accepted as grounds for abortion. 0 means that it is illegal, and not accepted as grounds for legal abortion.

Variable citation: Forman–Rabinovici, A., & Sommer, U. (2018). Reproductive health policymakers: Comparing the influences of international and domestic institutions on abortion policy. *Public Administration*, 96(1), 185–199

2.12.10.6 Threat to mother's physical health is accepted as grounds for legal abortion (cai_physical)

Long tag: qog_oecd_ts_cai_physical

Original tag: cai_physical

Description:

Binary variable that codes whether or not threat to a mother's physical health is accepted as grounds for a legal abortion. 1 means that it is accepted as grounds for abortion. 0 means that it is illegal, and not accepted as grounds for legal abortion.

Variable citation: Forman–Rabinovici, A., & Sommer, U. (2018). Reproductive health policymakers: Comparing the influences of international and domestic institutions on abortion policy. *Public Administration*, 96(1), 185–199

2.12.10.7 Pregnancy as result of rape or incest is accepted as grounds for legal abortion (cai_rape)

Long tag: qog_oecd_ts_cai_rape

Original tag: cai_rape

Description:

Binary variable that codes whether or not pregnancy as a result of rape or incest is accepted as grounds for a legal abortion. 1 means that they are accepted as grounds for abortion. 0 means that it is illegal, and they are not accepted as grounds for legal abortion.

Variable citation: Forman–Rabinovici, A., & Sommer, U. (2018). Reproductive health policymakers: Comparing the influences of international and domestic institutions on abortion policy. *Public Administration*, 96(1), 185–199

2.12.10.8 Abortion is available on request (cai_request)

Long tag: qog_oecd_ts_cai_request

Original tag: cai_request

Description:

Binary variable that codes whether abortion is available on request. In other words, if there is complete legal access to abortion. 1 implies that there is complete access to abortion. 0 implies that there are limitations, and abortion services are not legally available upon request.

Variable citation: Forman–Rabinovici, A., & Sommer, U. (2018). Reproductive health policymakers: Comparing the influences of international and domestic institutions on abortion policy. *Public Administration*, 96(1), 185–199

2.12.10.9 Social or economic reasons are accepted as grounds for legal abortion (cai_social)

Long tag: qog_oecd_ts_cai_social

Original tag: cai_social

Description:

Binary variable that codes whether or not social or economic reasons are accepted as grounds for a legal abortion. 1 means that they are accepted as grounds for abortion. 0 means that it is illegal, and they are not accepted as grounds for legal abortion.

Variable citation: Forman–Rabinovici, A., & Sommer, U. (2018). Reproductive health policymakers: Comparing the influences of international and domestic institutions on abortion policy. *Public Administration*, 96(1), 185–199

2.12.10.10 Expenditure on health, as percent of total gen. gov. exp. (gfs_heal)

Long tag: qog_oecd_ts_gfs_heal

Original tag: gfs_heal

Description:
Total expenditure on health, as the percentage of general government expenditure.

Variable citation: International Monetary Fund. (2019). Government finance statistics yearbook (gfsy) 2019. `https://data.imf.org/?sk=a0867067-d23c-4ebc-ad23-d3b015045405`

2.12.10.11 Global Gender Gap Health and Survival Subindex (gggi_hss)

Long tag: qog_oecd_ts_gggi_hss

Original tag: gggi_hss

Description:
Health and Survival (0 to 1, where 1 indicates no gap). This subindex provides an overview of the differences between women's and men's health through the use of two indicators. The first is the sex ratio at birth, which aims specifically to capture the phenomenon of "missing women", prevalent in many countries with a strong son preference. Second, we use the gap between women's and men's healthy life expectancy. This measure provides an estimate of the number of years that women and men can expect to live in good health by taking into account the years lost to violence, disease, malnutrition and other relevant factors.

Variable citation: World Economic Forum. (2021). The global gender gap report 2021 [All Rights Reserved]. `https://www.weforum.org/reports/ab6795a1-960c-42b2-b3d5-587eccda6023`

2.12.10.12 Healthy Life Years, Female, Age 1-4 years (ihme_hle_0104f)

Long tag: qog_oecd_ts_ihme_hle_0104f

Original tag: ihme_hle_0104f

Description:
Healthy Life Years, Female, Age 1-4 years. HALE is often referred to as healthy life expectancy. Unlike life expectancy, HALE takes into account mortality and nonfatal outcomes. HALE does this by summarizing years lived in less than ideal health (YLDs) and years lost due to premature mortality (YLLs) in a single measure of average population health for individual countries.

Variable citation: Global Burden of Disease Collaborative Network. (2020). Global burden of disease study 2019 (gbd 2019) results. `http://ghdx.healthdata.org/gbd-results-tool`

2.12.10.13 Healthy Life Years, Male, Age 1-4 years (ihme_hle_0104m)

Long tag: qog_oecd_ts_ihme_hle_0104m

Original tag: ihme_hle_0104m

Description:
Healthy Life Years, Male, Age 1-4 years. HALE is often referred to as healthy life expectancy. Unlike life expectancy, HALE takes into account mortality and nonfatal outcomes. HALE does this by summarizing years lived in less than ideal health (YLDs) and years lost due to premature mortality (YLLs) in a single measure of average population health for individual countries.

Variable citation: Global Burden of Disease Collaborative Network. (2020). Global burden of disease study 2019 (gbd 2019) results. `http://ghdx.healthdata.org/gbd-results-tool`

2.12.10.14 Healthy Life Years, Both sexes, Age 1-4 years (ihme_hle_0104t)

Long tag: qog_oecd_ts_ihme_hle_0104t

Original tag: ihme_hle_0104t

Description:
Healthy Life Years, Both sexes, Age 1-4 years. HALE is often referred to as healthy life expectancy. Unlike life expectancy, HALE takes into account mortality and nonfatal outcomes. HALE does this by summarizing years lived in less than ideal health (YLDs) and years lost due to premature mortality (YLLs) in a single measure of average population health for individual countries.

2.12.10.31 Human Development Index (undp_hdi)

Long tag: qog_oecd_ts_undp_hdi

Original tag: undp_hdi

Description:
The HDI was created to emphasize that people and their capabilities should be the ultimate criteria for assessing the development of a country, not economic growth alone. The HDI can also be used to question national policy choices, asking how two countries with the same level of GNI per capita can end up with different human development outcomes. These contrasts can stimulate debate about government policy priorities.

The Human Development Index (HDI) is a summary measure of average achievement in key dimensions of human development: a long and healthy life, being knowledgeable and having a decent standard of living. The HDI is the geometric mean of normalized indices for each of the three dimensions.

The health dimension is assessed by life expectancy at birth, the education dimension is measured by mean of years of schooling for adults aged 25 years and more and expected years of schooling for children of school entering age. The standard of living dimension is measured by gross national income per capita. The HDI uses the logarithm of income, to reflect the diminishing importance of income with increasing GNI. The scores for the three HDI dimension indices are then aggregated into a composite index using geometric mean. Refer to Technical notes for more details.

The HDI simplifies and captures only part of what human development entails. It does not reflect on inequalities, poverty, human security, empowerment, etc. The HDRO offers the other composite indices as broader proxy on some of the key issues of human development, inequality, gender disparity and human poverty.

2.12.10.32 Current health expenditure (percent of GDP) (wdi_chexppgdp)

Long tag: qog_oecd_ts_wdi_chexppgdp

Original tag: wdi_chexppgdp

Description:
Current health expenditure (percent of GDP). Level of current health expenditure expressed as a percentage of GDP. Estimates of current health expenditures include healthcare goods and services consumed during each year. This indicator does not include capital health expenditures such as buildings, machinery, IT and stocks of vaccines for emergency or outbreaks.

2.12.10.33 Intentional homicides, female (per 100,000 female) (wdi_homicidesf)

Long tag: qog_oecd_ts_wdi_homicidesf

Original tag: wdi_homicidesf

Description:
Intentional homicides, female (per 100,000 female). Intentional homicides, female are estimates of unlawful female homicides purposely inflicted as a result of domestic disputes, interpersonal violence, violent conflicts over land resources, intergang violence over turf or control, and predatory violence and killing by armed groups. Intentional homicide does not include all intentional killing; the difference is usually in the organization of the killing. Individuals or small groups usually commit homicide, whereas killing in armed conflict is usually committed by fairly cohesive groups of up to several hundred members and is thus usually excluded.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.10.34 Intentional homicides, male (per 100,000 male) (wdi_homicidesm)

Long tag: qog_oecd_ts_wdi_homicidesm

Original tag: wdi_homicidesm

Description:
Intentional homicides, male (per 100,000 male). Intentional homicides, male are estimates of unlawful male homicides purposely inflicted as a result of domestic disputes, interpersonal violence, violent conflicts over land resources, intergang violence over turf or control, and predatory violence and killing by armed groups. Intentional homicide does not include all intentional killing; the difference is usually in the organization of the killing. Individuals or small groups usually commit homicide, whereas killing in armed conflict is usually committed by fairly cohesive groups of up to several hundred members and is thus usually excluded.

Year in which the constitutional system was promulgated.

Variable citation: Elkins, Z., & Ginsburg, T. (2021). Characteristics of national constitutions, version 3.0 [Last modified: May 20, 2021. Available at comparativeconstitutionsproject.org]. `http://www.comparativeconstitutionsproject.org`

2.12.11.14 Duty of People is to Pay Taxes in Constitution (ccp_taxes)

Long tag: qog_oecd_ts_ccp_taxes

Original tag: ccp_taxes

Description:

Does the constitution refer to a duty to pay taxes?

1. Yes
2. No
96. Other

Variable citation: Elkins, Z., & Ginsburg, T. (2021). Characteristics of national constitutions, version 3.0 [Last modified: May 20, 2021. Available at comparativeconstitutionsproject.org]. `http://www.comparativeconstitutionsproject.org`

2.12.11.15 Disappearance (ciri_disap)

Long tag: qog_oecd_ts_ciri_disap

Original tag: ciri_disap

Description:

Disappearances are cases in which people have disappeared, political motivation appears likely, and the victims have not been found. Knowledge of the whereabouts of the disappeared is, by definition, not public knowledge. However, while there is typically no way of knowing where victims are, it is typically known by whom they were taken and under what circumstances. A score of 0 indicates that disappearances have occurred frequently in a given year; a score of 1 indicates that disappearances occasionally occurred; and a score of 2 indicates that disappearances did not occur in a given year.

2.12.11.16 Freedom of Domestic Movement (ciri_dommov)

Long tag: qog_oecd_ts_ciri_dommov

Original tag: ciri_dommov

Description:

This variable indicates citizens' freedom to travel within their own country. A score of 0 indicates that this freedom was severely restricted; a score of 1 indicates the freedom was somewhat restricted, and a score of 2 indicates unrestricted freedom of foreign movement.

Variable citation: Cingranelli, D. L., Filippov, M., & Mark, S. (2019). 2.12.11.17 Empowerment Index (ciri_empinx)

Long tag: qog_oecd_ts_ciri_empinx

Original tag: ciri_empinx

Description:

This is an additive index constructed from the Foreign Movement, Domestic Movement, Freedom of Speech, Freedom of Assembly and Association, Workers' Rights, Electoral Self-Determination, and Freedom of Religion indicators. It ranges from 0 (no government respect for these seven rights) to 14 (full government respect for these seven rights).

Variable citation: Cingranelli, D. L., Filippov, M., & Mark, S. (2019). The CIRIGHTS dataset [Version 2019.07.21]. *The Binghamton University Human Right Institute*. `www.binghamton.edu/institutes/hri` Cingranelli, D. L., Richards, D. L., & Clay, K. C. (2014). 2.12.11.18 Freedom of Foreign Movement (ciri_formov)

Long tag: qog_oecd_ts_ciri_formov

Original tag: ciri_formov

Description:

This variable indicates citizens' freedom to leave and return to their country. A score of 0 indicates that this freedom was severely restricted, a score of 1 indicates the freedom was somewhat restricted, and a score of 2 indicates unrestricted freedom of foreign movement.

Variable citation: Cingranelli, D. L., Filippov, M., & Mark, S. (2019). The CIRIGHTS dataset [Version 2019.07.21].

2.12.11.19 Independence of the Judiciary (ciri_injud)

Long tag: qog_oecd_ts_ciri_injud

Original tag: ciri_injud

Description:

This variable indicates the extent to which the judiciary is independent of control from other sources, such as another branch of the government or the military. A score of 0 indicates "not independent", a score of 1 indicates "partially independent" and a score of 2 indicates "generally independent".

Variable citation: Cingranelli, D. L., Filippov, M., & Mark, S. (2019). The CIRIGHTS dataset [Version 2019.07.21]. *The Binghamton University Human Right Institute.* `www.binghamton.edu/institutes/hri` Cingranelli, D. L., Richards, D. L., & Clay, K. C. (2014). The CIRI Human Rights Dataset [Version 2014.04.14]. *CIRI Human Rights Data Project*, 6

2.12.11.20 Extrajudicial Killing (ciri_kill)

Long tag: qog_oecd_ts_ciri_kill

Original tag: ciri_kill

Description:

Extrajudicial killings are killings by government officials without due process of law. They include murders by private groups if instigated by government. These killings may result from the deliberate, illegal, and excessive use of lethal force by the police, security forces, or other agents of the state whether against criminal suspects, detainees, prisoners, or others. A score of 0 indicates that extrajudicial killings were practiced frequently in a given year; a score of 1 indicates that extrajudicial killings were practiced occasionally; and a score of 2 indicates that such killings did not occur in a given year.

Variable citation: Cingranelli, D. L., Filippov, M., & Mark, S. (2019). The CIRIGHTS dataset [Version 2019.07.21]. *The Binghamton University Human Right Institute.* `www.binghamton.edu/institutes/hri` Cingranelli, D. L., Richards, D. L., & Clay, K. C. (2014). The CIRI Human Rights Dataset [Version 2014.04.14]. *CIRI Human Rights Data Project*, 6

2.12.11.21 Physical Integrity Rights (ciri_physint)

Long tag: qog_oecd_ts_ciri_physint

Original tag: ciri_physint

Description:

This is an additive index constructed from the Torture, Extrajudicial Killing, Political Imprisonment, and Disappearance indicators. It ranges from 0 (no government respect for these four rights) to 8 (full government respect for these four rights).

Variable citation: Cingranelli, D. L., Filippov, M., & Mark, S. (2019). The CIRIGHTS dataset [Version 2019.07.21]. *The Binghamton University Human Right Institute.* `www.binghamton.edu/institutes/hri` Cingranelli, D. L., Richards, D. L., & Clay, K. C. (2014). The CIRI Human Rights Dataset [Version 2014.04.14]. *CIRI Human Rights Data Project*, 6

2.12.11.22 Political Imprisonment (ciri_polpris)

Long tag: qog_oecd_ts_ciri_polpris

Original tag: ciri_polpris

Description:

Political imprisonment refers to the incarceration of people by government officials because of: their speech; their non-violent opposition to government policies or leaders; their religious beliefs; their non-violent religious practices including proselytizing; or their membership in a group, including an ethnic or racial group. A score of 0 indicates that there were many people imprisoned because of their religious, political, or other beliefs in a given year; a score of 1indicates that a few people were imprisoned; and a score of 2 indicates that no persons were imprisoned for any of the above reasons in a given year.

Variable citation: Cingranelli, D. L., Filippov, M., & Mark, S. (2019). The CIRIGHTS dataset [Version 2019.07.21]. *The Binghamton University Human Right Institute.* `www.binghamton.edu/institutes/hri` Cingranelli, D. L., Richards, D. L., & Clay, K. C. (2014). The CIRI Human Rights Dataset [Version 2014.04.14]. *CIRI Human Rights Data Project*, 6

2.12.11.23 New Freedom of Religion (ciri_relfre)

Long tag: qog_oecd_ts_ciri_relfre

Original tag: ciri_relfre

Description:
This variable indicates the extent to which the freedom of citizens to exercise and practice the irreligious beliefs is subject to actual government restrictions. Citizens should be able to freely practice their religion and proselytize (attempt to convert) other citizens to their religion as long as such attempts are done in a non-coercive, peaceful manner. A score of 0 indicates that government restrictions on religious practices are severe and widespread. A score of 1 indicates such practices are moderate, and a 0 indicates such practices are practically absent.

Variable citation: Cingranelli, D. L., Filippov, M., & Mark, S. (2019). The CIRIGHTS dataset [Version 2019.07.21]. *The Binghamton University Human Right Institute*. `www.binghamton.edu/institutes/hri` Cingranelli, D. L., Richards, D. L., & Clay, K. C. (2014). The CIRI Human Rights Dataset [Version 2014.04.14]. *CIRI Human Rights Data Project*, 6

2.12.11.24 Freedom of Speech (ciri_speech)

Long tag: qog_oecd_ts_ciri_speech

Original tag: ciri_speech

Description:
This variable indicates the extent to which freedoms of speech and press are affected by government censorship, including ownership of media outlets. Censorship is any form of restriction that is placed on freedom of the press, speech or expression. Expression may be in the form of art or music. A score of 0 indicates that government censorship of the media was complete; a score of 1 indicates that there was some government censorship of the media; and a score of 2 indicates that there was no government censorship of the media in a given year.

Variable citation: Cingranelli, D. L., Filippov, M., & Mark, S. (2019). The CIRIGHTS dataset [Version 2019.07.21]. *The Binghamton University Human Right Institute*. `www.binghamton.edu/institutes/hri` Cingranelli, D. L., Richards, D. L., & Clay, K. C. (2014). The CIRI Human Rights Dataset [Version 2014.04.14]. *CIRI Human Rights Data Project*, 6

2.12.11.25 Torture (ciri_tort)

Long tag: qog_oecd_ts_ciri_tort

Original tag: ciri_tort

Description:
Torture refers to the purposeful inflicting of extreme pain, whether mental or physical, by government officials or by private individuals at the instigation of government officials. Torture includes the use of physical and other force by police and prison guards that is cruel, inhuman, or degrading. This also includes deaths in custody due to negligence by government officials. A score of 0 indicates that torture was practiced frequently in a given year; a score of 1 indicates that torture was practiced occasionally; and a score of 2 indicates that torture did not occur in a given year.

Variable citation: Cingranelli, D. L., Filippov, M., & Mark, S. (2019). The CIRIGHTS dataset [Version 2019.07.21]. *The Binghamton University Human Right Institute*. `www.binghamton.edu/institutes/hri` Cingranelli, D. L., Richards, D. L., & Clay, K. C. (2014). The CIRI Human Rights Dataset [Version 2014.04.14]. *CIRI Human Rights Data Project*, 6

2.12.11.26 Women's Economic Rights (ciri_wecon)

Long tag: qog_oecd_ts_ciri_wecon

Original tag: ciri_wecon

Description:
Women's economic rights include a number of internationally recognized rights. These rights include:

- Equal pay for equal work,
- Free choice of profession or employment without the need to obtain a husband or male relative's consent,
- The right to gainful employment without the need to obtain a husband or male relative's consent,
- Equality in hiring and promotion practices,
- Job security (maternity leave, unemployment benefits, no arbitrary firing or layoffs, etc.),
Non-discrimination by employers,
- The right to be free from sexual harassment in the workplace,
- The right to work at night,
- The right to work in occupations classified as dangerous,
- The right to work in the military and the police force.

A score of 0 indicates that there were no economic rights for women in law and that systematic discrimination based on sex may have been built into law. A score of 1 indicates that women had some economic rights under law, but these rights were not effectively enforced. A score of 2 indicates that women had some economic rights under law, and the government effectively enforced these rights in practice while still allowing a low level of discrimination against women in economic matters. Finally, a score of 3 indicates that all or nearly all of women's economic rights were guaranteed by law and the government fully and vigorously

enforces these laws in practice.

Variable citation: Cingranelli, D. L., Filippov, M., & Mark, S. (2019). The CIRIGHTS dataset [Version 2019.07.21]. *The Binghamton University Human Right Institute*. `www.binghamton.edu/institutes/hri` Cingranelli, D. L., Richards, D. L., & Clay, K. C. (2014). The CIRI Human Rights Dataset [Version 2014.04.14]. *CIRI Human Rights Data Project*, 6

2.12.11.27 Women's Political Rights (ciri_wopol)

Long tag: qog_oecd_ts_ciri_wopol

Original tag: ciri_wopol

Description:

Women's political rights include a number of internationally recognized rights. These rights include:

- The right to vote
- The right to run for political office
- The right to hold elected and appointed government positions
- The right to join political parties
- The right to petition government officials.

A score of 0 indicates that women's political rights were not guaranteed by law during a given year. A score of 1 indicates that women's political rights were guaranteed in law, but severely prohibited in practice. A score of 2 indicates that women's political rights were guaranteed in law, but were still moderately prohibited in practice. Finally, a score of 3 indicates that women's political rights were guaranteed in both law and practice.

Variable citation: Cingranelli, D. L., Filippov, M., & Mark, S. (2019). The CIRIGHTS dataset [Version 2019.07.21]. *The Binghamton University Human Right Institute*. `www.binghamton.edu/institutes/hri` Cingranelli, D. L., Richards, D. L., & Clay, K. C. (2014). The CIRI Human Rights Dataset [Version 2014.04.14]. *CIRI Human Rights Data Project*, 6

2.12.11.28 Workers' Rights (ciri_worker)

Long tag: qog_oecd_ts_ciri_worker

Original tag: ciri_worker

Description:

Workers should have freedom of association at their workplaces and the right to bargain collectively with their employers. This variable indicates the extent to which workers enjoy these and other internationally recognized rights at work, including a prohibition on the use of any form of forced or compulsory labor; a minimum age for the employment of children; and acceptable conditions of work with respect to minimum wages, hours of work, and occupational safety and health. A score of 0 indicates that workers' rights were severely restricted; a score of 1 indicates that workers' rights were somewhat restricted; and a score of 2 indicates that workers' rights were fully protected during the year in question.

Variable citation: Cingranelli, D. L., Filippov, M., & Mark, S. (2019). The CIRIGHTS dataset [Version 2019.07.21]. *The Binghamton University Human Right Institute*. `www.binghamton.edu/institutes/hri` Cingranelli, D. L., Richards, D. L., & Clay, K. C. (2014). The CIRI Human Rights Dataset [Version 2014.04.14]. *CIRI Human Rights Data Project*, 6

2.12.11.29 Women's Social Rights (ciri_wosoc)

Long tag: qog_oecd_ts_ciri_wosoc

Original tag: ciri_wosoc

Description:

Women's social rights include a number of internationally recognized rights. These rights include:

- The right to equal inheritance
- The right to enter into marriage on a basis of equality with men
- The right to travel abroad
- The right to obtain a passport
- The right to confer citizenship to children or a husband
- The right to initiate a divorce
- The right to own, acquire, manage, and retain property brought into marriage
- The right to participate in social, cultural, and community activities
- The right to an education
- The freedom to choose a residence/domicile
- Freedom from female genital mutilation of children and of adults without their consent
- Freedom from forced sterilization.

A score of 0 indicates that there were no social rights for women in law and that systematic discrimination based on sex may have been built into law. A score of 1 indicates that women had some social rights under law, but these rights were not effectively enforced. A score of 2indicates that women had some social rights under law and the government effectively enforced these rights in practice while still allowing a low level of

discrimination against women in social matters. Finally, a score of 3 indicates that all or nearly all of women's social rights were guaranteed by law and the government fully and vigorously enforced these laws in practice. This variable was retired as of 2005.

Variable citation: Cingranelli, D. L., Filippov, M., & Mark, S. (2019). The CIRIGHTS dataset [Version 2019.07.21]. *The Binghamton University Human Right Institute*. `www.binghamton.edu/institutes/hri` Cingranelli, D. L., Richards, D. L., & Clay, K. C. (2014). The CIRI Human Rights Dataset [Version 2014.04.14]. *CIRI Human Rights Data Project*, 6

2.12.11.30 Associational and Organizational Rights (fh_aor)

Long tag: qog_oecd_ts_fh_aor

Original tag: fh_aor

Description:

Associational and Organizational Rights - The variable evaluates the freedom of assembly, demonstrations and open public discussion; the freedom for nongovernmental organizations; and the freedom for trade unions, peasant organizations and other professional and private organizations. Countries are graded between 0 (worst) and 12 (best).

Variable citation: Freedom House. (2021a). Freedom in the world 2021. `https://freedomhouse.org/report/freedom-world`

2.12.11.31 Civil Liberties (fh_cl)

Long tag: qog_oecd_ts_fh_cl

Original tag: fh_cl

Description:

Civil Liberties Rating - Civil liberties allow for the freedoms of expression and belief, associational and organizational rights, rule of law, and personal autonomy without interference from the state. The more specific list of rights considered vary over the years. Countries are graded between 1 (most free) and 7 (least free).

Variable citation: Freedom House. (2021a). Freedom in the world 2021. `https://freedomhouse.org/report/freedom-world`

2.12.11.32 Freedom of Expression and Belief (fh_feb)

Long tag: qog_oecd_ts_fh_feb

Original tag: fh_feb

Description:

Freedom of Expression and Belief - The variable measures the freedom and independence of the media and other cultural expressions; the freedom of religious groups to practice their faith and express themselves; the academic freedom and freedom from extensive political indoctrination in the educational system; and the ability of the people to engage in private (political) discussions without fear of harassment or arrest by the authorities. Countries are graded between 0 (worst) and 16 (best).

Variable citation: Freedom House. (2021a). Freedom in the world 2021. `https://freedomhouse.org/report/freedom-world`

2.12.11.33 Personal Autonomy and Individual Rights (fh_pair)

Long tag: qog_oecd_ts_fh_pair

Original tag: fh_pair

Description:

Personal Autonomy and Individual Rights - The variable evaluates the extent of state control over travel, choice of residence, employment or institution of higher education; the right of citizens to own property and establish private businesses; the private business' freedom from unduly influence by government officials, security forces, political parties or organized crime; gender equality, freedom of choice of marriage partners and size of family; equality of opportunity and absence of economic exploitation. Countries are graded between 0 (worst) and 16 (best).

Variable citation: Freedom House. (2021a). Freedom in the world 2021. `https://freedomhouse.org/report/freedom-world`

2.12.11.34 Rule of Law (fh_rol)

Long tag: qog_oecd_ts_fh_rol

Original tag: fh_rol

Description:

Rule of Law - The variable measures the independence of the judiciary; the extent to which rule of law prevails in civil and criminal matters; the existence of direct civil control over the police; the protection from

political terror, unjustified imprisonment, exile and torture; absence of war and insurgencies; and the extent to which laws, policies and practices guarantee equal treatment of various segments of the population. Countries are graded between 0 (worst) and 16 (best).

Variable citation: Freedom House. (2021a). Freedom in the world 2021. `https://freedomhouse.org/report/freedom-world`

2.12.11.35 Legal Structure and Security of Property Rights (current) (fi_legprop)

Long tag: qog_oecd_ts_fi_legprop

Original tag: fi_legprop

Description:

The index ranges from 0-10 where 0 corresponds to "no judicial independence", "no trusted legal framework exists", "no protection of intellectual property", "military interference in rule of law", and "no integrity of the legal system" and 10 corresponds to "high judicial independence", "trusted legal framework exists", "protection of intellectual property", "no military interference in rule of law", and "integrity of the legal system". The index consists of the following indicators: Judicial independence: The judiciary is independent and not subject to interference by the government or parties in dispute, Impartial courts: A trusted legal framework exists for private businesses to challenge the legality of government actions or regulations, Protection of intellectual property, Military interference in rule of law and the political process, Integrity of the legal system.

Variable citation: Gwartney, J., Lawson, R., Hall, J., Murphy, R., Callais, J. T., Fike, R., Geloso, V., Kahli, N. S., McMahon, F., & van Staden, M. (2021). 2.12.11.37 Minority Shareholder Rights (gc_shr)

Long tag: qog_oecd_ts_gc_shr

Original tag: gc_shr

Description:

The ten key legal provisions identified as most relevant to the protection of minority shareholder rights are coded by a team of legal scholars coded between 0 and 1. The measures are not dichotomous because intermediate scores between 0 and 1 are possible. The sum of the scores for each of the ten legal provisions are the value of the variable, ranging from 0 to 10.

The ten legal provisions protecting the rights of minority shareholders:
1. Powers of the general meeting for de facto changes
2. Agenda-setting power
3. Anticipation of shareholder decision facilitated
4. Prohibition of multiple voting rights (super voting rights)
5. Independent board members
6. Feasibility of directors' dismissal
7. Private enforcement of directors' duties (derivative suit)
8. Shareholder action against resolutions of the general meeting
9. Mandatory bid
10. Disclosure of major share ownership

Variable citation: Guillen, M., & Capron, L. (2016). State capacity, minority shareholder protections, and stock market development. *Administrative Science Quarterly*, 61(1), 125–160

2.12.11.38 Independent Judiciary (h_j)

Long tag: qog_oecd_ts_h_j

Original tag: h_j

Description:

Dummy variable coded 1 if there is an independent judiciary (based on information from Polity's Executive Constraints, p_xconst) and - where available - on ICRG's index of Law
Order.

Variable citation: Henisz, W. J. (2017). The Political Constraint Index (POLCON) Dataset 2017 release. `https://mgmt.wharton.upenn.edu/profile/1327`

2.12.11.39 Appointments/Elections to Constitutional Court (iaep_aecc)

Long tag: qog_oecd_ts_iaep_aecc

Original tag: iaep_aecc

Description:

Are members of this court (see iaep_cc) appointed or elected? "Elected" here refers to a popular election. Elections by legislative bodies are considered appointments.

1. Appointed
2. Elected

Source: IAEP (Wig et al., 2015)

Legal World Institutional Quality Ranking (all countries).

Variable citation: Kuncic, A. (2014). Institutional quality dataset. *Journal of Institutional Economics*, 10(01), 135–161. https://doi.org/10.1017/S1744137413000192

2.12.11.48 Legal World Institutional Quality Ranking (full obs.) (kun_wiqrleg_full)

Long tag: qog_oecd_ts_kun_wiqrleg_full

Original tag: kun_wiqrleg_full

Description:
Legal World Institutional Quality Ranking (countries with full observations).

Variable citation: Kuncic, A. (2014). Institutional quality dataset. *Journal of Institutional Economics*, 10(01), 135–161. https://doi.org/10.1017/S1744137413000192

2.12.11.49 Structure of central gov. expenditures, public order and safety (oecd_gengovdistri_t1c)

Long tag: qog_oecd_ts_oecd_gengovdistri_t1c

Original tag: oecd_gengovdistri_t1c

Description:
Structure of central government expenditures, public order and safety.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. `https://doi.org/10.1787/20752288`

2.12.11.50 Legislature corrupt activities (vdem_gcrrpt)

Long tag: qog_oecd_ts_vdem_gcrrpt

Original tag: vdem_gcrrpt

Description:
Legislature corrupt activities. Do members of the legislature abuse their position for financial gain?

Clarification: This includes any of the following: (a) accepting bribes, (b) helping to obtain government contracts for firms that the legislator (or his/her family/friends/political supporters) own, (c) doing favors for firms in exchange for the opportunity of employment after leaving the legislature, (d) stealing money from the state or from campaign donations for personal use. V-Dem uses a specifically designed measurement model to provide country-year point estimates, aggregated from multiple codings submitted by country experts by taking disagreement and measurement error into account. In this version of the variable, used in the QoG dataset, V-Dem has linearly translated the measurement model point estimates back to the original ordinal scale of each variable as an interval measure.

Variable citation: Coppedge, M., Gerring, J., Knutsen, C. H., Lindberg, S. I., Teorell, J., Alizada, N., Altman, D., Bernhard, M., Cornell, A., Fish, M. S., Gastaldi, L., Gjerløw, H., Glynn, A., Hicken, A., Hindle, G., Ilchenko, N., Krusell, J., Luhrmann, A., Maerz, S. F., . . . Ziblatt, D. (2021). V-dem [country-year/country-date] dataset v11.1. `https://doi.org/10.23696/vdemds21` Pemstein, D., Marquardt, K. L., Tzelgov, E., Wang, Y.-t., Medzihorsky, J., Krusell, J., Miri, F., & von Römer, J. 2.12.11.51 Judicial corruption decision (vdem_jucorrdc)

Long tag: qog_oecd_ts_vdem_jucorrdc

Original tag: vdem_jucorrdc

Description:
Judicial corruption decision. Question: How often do individuals or businesses make undocumented extra payments or bribes in order to speed up or delay the process or to obtain a favorable judicial decision? V-Dem uses a specifically designed measurement model to provide country-year point estimates, aggregated from multiple codings submitted by country experts by taking disagreement and measurement error into account. In this version of the variable, used in the QoG dataset, V-Dem has linearly translated the measurement model point estimates back to the original ordinal scale of each variable as an interval measure.

Variable citation: Coppedge, M., Gerring, J., Knutsen, C. H., Lindberg, S. I., Teorell, J., Alizada, N., Altman, D., Bernhard, M., Cornell, A., Fish, M. 2.12.11.52 Rule of Law, Estimate (wbgi_rle)

Long tag: qog_oecd_ts_wbgi_rle

Original tag: wbgi_rle

Description:
Rule of Law - Estimate: "Rule of Law" includes several indicators which measure the extent to which agents have confidence in and abide by the rules of society. These include perceptions of the incidence of crime, the effectiveness and predictability of the judiciary, and the enforceability of contracts. Together, these indicators measure the success of a society in developing an environment in which fair and predictable rules form the basis for economic and social interactions and the extent to which property rights are protected.

Variable citation: Kaufmann, D., Kraay, A., & Mastruzzi, M. (2010). The worldwide governance indicators: A summary of methodology, data and analytical issues. *World Bank Policy Research Working Paper, 5430*

2.12.11.53 Rule of Law, Number of Sources (wbgi_rln)

Long tag: qog_oecd_ts_wbgi_rln

Original tag: wbgi_rln

Description:
Rule of Law - Number of Sources.

Variable citation: Kaufmann, D., Kraay, A., & Mastruzzi, M. (2010). The worldwide governance indicators: A summary of methodology, data and analytical issues. *World Bank Policy Research Working Paper, 5430*

2.12.11.54 Rule of Law, Standard Error (wbgi_rls)

Long tag: qog_oecd_ts_wbgi_rls

Original tag: wbgi_rls

Description:
Rule of Law - Standard Errors.

Variable citation: Kaufmann, D., Kraay, A., & Mastruzzi, M. (2010). The worldwide governance indicators: A summary of methodology, data and analytical issues. *World Bank Policy Research Working Paper, 5430*

2.12.11.55 Intentional homicides (per 100,000 people) (wdi_homicides)

Long tag: qog_oecd_ts_wdi_homicides

Original tag: wdi_homicides

Description:
Intentional homicides are estimates of unlawful homicides purposely inflicted as a result of domestic disputes, interpersonal violence, violent conflicts over land resources, intergang violence over turf or control, and predatory violence and killing by armed groups. Intentional homicide does not include all intentional killing; the difference is usually in the organization of the killing. Individuals or small groups usually commit homicide, whereas killing in armed conflict is usually committed by fairly cohesive groups of up to several hundred members and is thus usually excluded.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.11.56 Personal Autonomy Rights (wel_par)

Long tag: qog_oecd_ts_wel_par

Original tag: wel_par

Description:
Meaning: The indicator measures to what extent a country enacts personal autonomy rights by law and respects them in practice.
Source: Welzel's (2013: 254-263) "personal autonomy rights index" based on Freedom House's "civil liberties" as well as Cingranelli/Richards' "integrity rights". Freedom House civil liberties are inverted and then standardized into a range from minimum 0 to maximum 1.0. CIRI integrity rights are also standardized into a range from minimum 0 to maximum 1.0. Then the average of the two is taken to measure personal autonomy rights. Measures exist on an annual basis from 1981 to 2010 for most countries in the world.
Scaling: Index scores range from 0 for the completely absent or disrespected personal autonomy rights to 1.0 for their full presence and respect, with proper fractions for intermediate positions.
Links: Data sources, rescaling procedures and replication data are meticulously documented in the Online Appendix to Welzel's (2013) Freedom Rising at www.cambridge.com/welzel (p. 72). Test statistics documenting this index's superior validity in comparison to alternative democracy measures are reported in Welzel (2013: 267-271).
Note: the missing code (-99) has been recoded to missing (.).

Variable citation: Welzel, C. (2013). *Freedom rising: Human empowerment and the quest for emancipation (1st ed.)*. Cambridge University Press

2.12.11.57 Political Participation Rights (wel_ppr)

Long tag: qog_oecd_ts_wel_ppr

Original tag: wel_ppr

Description:
Meaning: The indicator measures to what extent a country enacts political participation rights by law and respects them in practice.
Source: Welzel's (2013: 254-263) "political participation rights index" based on Freedom House's "political rights" as well as Cingranelli/Richards' "empowerment rights". Freedom House political rights are inverted and then standardized into a range from minimum 0 to maximum 1.0. CIRI empowerment rights are also standardized into a range from minimum 0 to maximum 1.0. Then the average of the two is taken to measure political participation rights. Measures exist on an annual basis from 1981 to 2010 for most countries in the world.
Scaling: Index scores range from 0 for completely absent or disrespected political participation rights to 1.0 for their full presence and respect, with proper fractions for intermediate positions.
Links: Data sources, rescaling procedures and replication data are meticulously documented in the Online Appendix to Welzel's (2013) Freedom Rising at www.cambridge.com/welzel (p. 72). Test statistics

documenting this index's superior validity in comparison to alternative democracy measures are reported in Welzel (2013: 267-271).
Note: the missing code (-99) has been recoded to missing (.).

Variable citation: Welzel, C. (2013). *Freedom rising: Human empowerment and the quest for emancipation (1st ed.)*. Cambridge University Press

2.12.11.58 Rule of Law Index (wel_rli)

Long tag: qog_oecd_ts_wel_rli

Original tag: wel_rli

Description:
(Rule of Law + Control of Corruption) / 2

Variable citation: Welzel, C. (2013). *Freedom rising: Human empowerment and the quest for emancipation (1st ed.)*. Cambridge University Press

2.12.11.59 Rule of Law (wel_rol)

Long tag: qog_oecd_ts_wel_rol

Original tag: wel_rol

Description:
Meaning: Factor scale from the World Bank's "global governance indicators" measuring the degree of law enforcement in a country.
Source: Alexander and Welzel (2011); Alexander, Inglehart and Welzel (2012). Categorization is available in annual measures for most countries of the world from 1996 to 2006.
Scaling: The factor scores are standardized into a range from minimum 0 (for the lowest ever observed rule of law score) to maximum 1.0 (for the highest ever observed rule of law score), with fractions for intermediate positions. Note: In the original data there exists two different observations for Dominica, the value has been recoded to missing for this country.

Variable citation: Welzel, C. (2013). *Freedom rising: Human empowerment and the quest for emancipation (1st ed.)*. Cambridge University Press

2.12.11.60 Scalezone on Citizen Rights (wel_scalezone)

Long tag: qog_oecd_ts_wel_scalezone

Original tag: wel_scalezone

Description:
Meaning: Categorical scale zones on the citizen rights index, distinguishing four categories from more completely to less completely autocratic, and then from less completely to more completely democratic.
Source: Welzel, Freedom Rising (2013: 255-256). Categorization is available in annual measures for most countries of the world from 1981 to 2010.
Scaling: 1 "Complete Autocracy": citizen rights score less equal 0.25; 2 "Incomplete Autocracy": citizen rights score above 0.25 and less equal 0.50; 3 "Incomplete Democracy": citizen rights score above 0.50 and less equal 0.75; 4 "Complete Democracy": citizen rights score above 0.75.
Links: Data sources, rescaling procedures and replication data are meticulously documented in the Online Appendix to Welzel's (2013) Freedom Rising at www.cambridge.com/welzel (p. 72). Test statistics documenting this index's superior validity in comparison to alternative democracy measures are reported in Welzel (2013: 267-271).

Variable citation: Welzel, C. (2013). *Freedom rising: Human empowerment and the quest for emancipation (1st ed.)*. Cambridge University Press

2.12.12 Environment

This category includes geographical characteristics such as the geographical region, land area etc. as well as indicators describing the state of the environment, ecosystems and materials, the impact of human beings on the environment, and environmental protection.

2.12.12.1 Built-up land footprint- Ecological Footprint of Consumption (GHA per person) (ef_bul)

Long tag: qog_oecd_ts_ef_bul

Original tag: ef_bul

Description:
Built-up Land - Ecological Footprint in consumption. The built-up land Footprint is calculated based on the area of land covered by human infrastructure: transportation, housing, and industrial structures. Built-up land may occupy what would previously have been cropland. Measured in Global Hectares (GHA) per person.

Variable citation: Global Footprint Network. (2021). National footprint accounts data set (1961-2017), 2021 edition [c 2021 Global Footprint Network. National Footprint Accounts, 2021 Edition, www.footprintnetwork.org.]. `http://www.footprintnetwork.org`

2.12.12.2 Carbon footprint - Ecological Footprint of Consumption (GHA per person) (ef_carb)

Long tag: qog_oecd_ts_ef_carb

Original tag: ef_carb

Description:

Carbon - Ecological Footprint in consumption. The carbon Footprint, which represents the carbon dioxide emissions from burning fossil fuels in addition to the embodied carbon in imported goods. The carbon Footprint component is represented by the area of forest land required to sequester these carbon emissions. Currently, the carbon Footprint is the largest portion of humanity's Footprint.

Variable citation: Global Footprint Network. (2021). National footprint accounts data set (1961-2017), 2021 edition [c 2021 Global Footprint Network. National Footprint Accounts, 2021 Edition, www.footprintnetwork.org.]. `http://www.footprintnetwork.org`

2.12.12.3 Cropland footprint - Ecological Footprint of Consumption (GHA per person) (ef_crop)

Long tag: qog_oecd_ts_ef_crop

Original tag: ef_crop

Description:

Cropland - Ecological Footprint in consumption. Cropland is the most bioproductive of all the land-use types and consists of areas used to produce food and fibre for human consumption, feed for livestock, oil crops, and rubber. The cropland Footprint includes crop products allocated to livestock and aquaculture feed mixes, and those used for fibres and materials. Due to lack of globally consistent data sets, current cropland Footprint calculations do not yet take into account the extent to which farming techniques or unsustainable agricultural practices may cause long-term degradation of soil.

Variable citation: Global Footprint Network. (2021). National footprint accounts data set (1961-2017), 2021 edition [c 2021 Global Footprint Network. National Footprint Accounts, 2021 Edition, www.footprintnetwork.org.]. `http://www.footprintnetwork.org`

2.12.12.4 Total Ecological Footprint of Consumption (GHA per person) (ef_ef)

Long tag: qog_oecd_ts_ef_ef

Original tag: ef_ef

Description:

Total - Ecological Footprint in consumption. Measured in Global Hectares (GHA) per person.

Variable citation: Global Footprint Network. (2021). National footprint accounts data set (1961-2017), 2021 edition [c 2021 Global Footprint Network. National Footprint Accounts, 2021 Edition, www.footprintnetwork.org.]. `http://www.footprintnetwork.org`

2.12.12.5 Fish footprint - Ecological Footprint of Consumption (GHA per person) (ef_fg)

Long tag: qog_oecd_ts_ef_fg

Original tag: ef_fg

Description:

Fishing Ground - Ecological Footprint in consumption. The fishing grounds Footprint is calculated based on estimates of the maximum sustainable catch for a variety of fish species. These sustainable catch estimates are converted into an equivalent mass of primary production based on the various species' trophic levels. This estimate of maximum harvestable primary production is then divided amongst the continental shelf areas of the world. Fish caught and used in aquaculture feed mixes are included. Measured in Global Hectares (GHA) per person.

Variable citation: Global Footprint Network. (2021). National footprint accounts data set (1961-2017), 2021 edition [c 2021 Global Footprint Network. National Footprint Accounts, 2021 Edition, www.footprintnetwork.org.]. `http://www.footprintnetwork.org`

2.12.12.6 Forest product footprint - Ecological Footprint of Consumption (GHA per person) (ef_for)

Long tag: qog_oecd_ts_ef_for

Original tag: ef_for

Description:

Forest Production - Ecological Footprint in consumption. The forest product Footprint, which is calculated

based on the amount of lumber, pulp, timber products, and fuel wood consumed by a population on a yearly basis. Measured in Global Hectares (GHA) per person.

Variable citation: Global Footprint Network. (2021). National footprint accounts data set (1961-2017), 2021 edition [c 2021 Global Footprint Network. National Footprint Accounts, 2021 Edition, www.footprintnetwork.org.]. `http://www.footprintnetwork.org`

2.12.12.7 Grazing footprint - Ecological Footprint of Consumption (GHA per person) (ef_gl)

Long tag: qog_oecd_ts_ef_gl

Original tag: ef_gl

Description:

Grazing - Ecological Footprint in consumption. Grazing land is used to raise livestock for meat, dairy, hide, and wool products. The grazing land Footprint is calculated by comparing the amount of livestock feed available in a country with the amount of feed required for all livestock in that year, with the remainder of feed demand assumed to come from grazing land. Measured in Global Hectares (GHA) per person.

Variable citation: Global Footprint Network. (2021). National footprint accounts data set (1961-2017), 2021 edition [c 2021 Global Footprint Network. National Footprint Accounts, 2021 Edition, www.footprintnetwork.org.]. `http://www.footprintnetwork.org`

2.12.12.8 Agricultural land (percent of Land area) (fao_luagr)

2.12.12.21 Expenditure on environment protection, as percent of total gen. gov. exp. (gfs_envr)

Long tag: qog_oecd_ts_gfs_envr

Original tag: gfs_envr

Description:
Total expenditure on environment protection, as the percentage of general government expenditure.

Variable citation: International Monetary Fund. (2019). Government finance statistics yearbook (gfsy) 2019. https://data.imf.org/?sk=a0867067-d23c-4ebc-ad23-d3b015045405

2.12.12.22 The Region of the Country (ht_region)

Long tag: qog_oecd_ts_ht_region

Original tag: ht_region

Description:
This is a tenfold politico-geographic classification of world regions, based on a mixture of two considerations: geographical proximity (with the partial exception of category 5 below) and demarcation by area specialists having contributed to a regional understanding of democratization. The categories are as follow:
1. Eastern Europe and post Soviet Union (including Central Asia)
2. Latin America (including Cuba, Haiti
the Dominican Republic)
3. North Africa
the Middle East (including Israel, Turkey
Cyprus)
4. Sub-Saharan Africa
5. Western Europe and North America (including Australia
New Zealand)

6. East Asia (including Japan
Mongolia)
7. South-East Asia
8. South Asia
9. The Pacific (excluding Australia
New Zealand)
10. The Caribbean (including Belize, Guyana
Suriname, but excluding Cuba, Haiti
the Dominican Republic)

Variable citation: Wahman, M., Teorell, J., & Hadenius, A. (2013). 2.12.12.23 Latitude (lp_lat_abst)

Long tag: qog_oecd_ts_lp_lat_abst

Original tag: lp_lat_abst

Description:
Latitude: The absolute value of the latitude of the capital city, divided by 90 (to take values between 0 and 1).

Variable citation: Porta, R. L., Lopez-de-Silanes, F., Shleifer, A., & Vishny, R. (1999). The quality of government. *Journal of Law, Economics, and Organization*, 15(1), 222–279

2.12.12.24 Natural Resource Protection Indicator (nrmi_nrpi)

Long tag: qog_oecd_ts_nrmi_nrpi

Original tag: nrmi_nrpi

Description:
Natural Resource Protection Indicator assesses whether a country is protecting at least 17percent of all of its biomes (e.g. deserts, forests, grasslands, aquatic, and tundra). It is designed to capture the comprehensiveness of a government's commitment to habitat preservation and biodiversity protection. The World Wildlife Fund provides the underlying biome data, and the United Nations Environment Program World Conservation Monitoring Center provides the underlying data on protected areas.

Variable citation: Center for International Earth Science Information Network - CIESIN - Columbia University. (2019). Natural resource protection and child health indicators, 2020 release [Accessed on: 20-12-2021]. `https://doi.org/10.7927/r6mv-sv82`

2.12.12.25 CO2 emissions from fuel combustion (oecd_airqty_t1)

Long tag: qog_oecd_ts_oecd_airqty_t1

Original tag: oecd_airqty_t1

Description:
CO2 emissions from fuel combustion.

Description:
Structure of central government expenditures, environmental protection.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. `https://doi.org/10.1787/20752288`

2.12.12.27 Greenhouse gas emissions (oecd_greenhouse_t1)

Long tag: qog_oecd_ts_oecd_greenhouse_t1

Original tag: oecd_greenhouse_t1

Description:
Greenhouse gas emissions.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. `https://doi.org/10.1787/20752288`

2.12.12.28 Sulphur Oxides Emmissions (oecd_soxnox_t1a)

Long tag: qog_oecd_ts_oecd_soxnox_t1a

Original tag: oecd_soxnox_t1a

Description:
Sulphur oxides emmissions.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. `https://doi.org/10.1787/20752288`

2.12.12.29 Nitrogene Oxides Emmissions (oecd_soxnox_t1b)

Long tag: qog_oecd_ts_oecd_soxnox_t1b

Original tag: oecd_soxnox_t1b

Description:
Nitrogene oxides emmissions.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. `https://doi.org/10.1787/20752288`

2.12.12.30 Total amount generated of municipal waste (oecd_waste_t1b)

Long tag: qog_oecd_ts_oecd_waste_t1b

Original tag: oecd_waste_t1b

Description:
Total amount generated of municipal waste.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. `https://doi.org/10.1787/20752288`

2.12.12.31 Arable land (percent of land area) (wdi_araland)

Long tag: qog_oecd_ts_wdi_araland

Original tag: wdi_araland

Description:
Arable land includes land defined by the FAO as land under temporary crops (double-cropped areas are counted once), temporary meadows for mowing or for pasture, land under market or kitchen gardens, and land temporarily fallow. Land abandoned as a result of shifting cultivation is excluded.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.12.32 Land area (sq. km) (wdi_area)

Long tag: qog_oecd_ts_wdi_area

Original tag: wdi_area

Description:
Land area is a country's total area, excluding area under inland water bodies, national claims to continental shelf, and exclusive economic zones. In most cases the definition of inland water bodies includes major rivers and lakes.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.12.33 CO2 emissions (metric tons per capita) (wdi_co2)

Long tag: qog_oecd_ts_wdi_co2

Original tag: wdi_co2

Description:
Carbon dioxide emissions are those stemming from the burning of fossil fuels and the manufacture of cement. They include carbon dioxide produced during consumption of solid, liquid, and gas fuels and gas flaring.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.12.34 Forest area (percent of land area) (wdi_forest)

Long tag: qog_oecd_ts_wdi_forest

Original tag: wdi_forest

Description:
Forest area is land under natural or planted stands of trees of at least 5 meters in situ, whether productive or

not, and excludes tree stands in agricultural production systems (for example, in fruit plantations and agroforestry systems) and trees in urban parks and gardens.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.12.35 Average precipitation in depth (mm per year) (wdi_precip)

Long tag: qog_oecd_ts_wdi_precip

Original tag: wdi_precip

Description:
Average precipitation is the long-term average in depth (over space and time) of annual precipitation in the country. Precipitation is defined as any kind of water that falls from clouds as a liquid or a solid.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.13 Labour Market

This category includes variables about employment, unemployment and union density rate, in general, as well as in subgroups of the population.

2.12.13.1 Researchers in all sectors percent tot. emloyment - full-time (Total) (eu_resallt)

Long tag: qog_oecd_ts_eu_resallt

Original tag: eu_resallt

Description:
Researchers in all sectors percent tot. emloyment - full-time equivalent (total)

Variable citation: European Commission. (2021). Eurostat. `http://ec.europa.eu/eurostat/data/database`

2.12.13.2 Researchers in Higher Education percent tot. emloyment - full-time (Total) (eu_resedut)

2.12.13.20 Age dependency ratio (percent of working-age pop.) (wdi_agedr)

Long tag: qog_oecd_ts_wdi_agedr

Original tag: wdi_agedr

Description:
Age dependency ratio is the ratio of dependents–people younger than 15 or older than 64–to the working-age population–those ages 15-64. Data are shown as the proportion of dependents per 100 working-age population.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.13.21 Employers, total (percent of total employment) (modeled ILO) (wdi_emp)

Long tag: qog_oecd_ts_wdi_emp

Original tag: wdi_emp

Description:
Employers are those workers who, working on their own account or with one or a few partners, hold the type of jobs defined as a "self-employment jobs" i.e. jobs where the remuneration is directly dependent upon the profits derived from the goods and services produced, and, in this capacity, have engaged, on a continuous basis, one or more persons to work for them as employee(s). Modeled ILO estimate.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.13.22 Employment in agriculture (percent of total employment) (modeled ILO) (wdi_empagr)

Long tag: qog_oecd_ts_wdi_empagr

Original tag: wdi_empagr

Description:
Employment in agriculture as a percentage of all employment. Employment is defined as persons of working age who were engaged in any activity to produce goods or provide services for pay or profit, whether at work during the reference period or not at work due to temporary absence from a job, or to working-time arrangement. The agriculture sector consists of activities in agriculture, hunting, forestry and fishing, in accordance with division 1 (ISIC 2) or categories A-B (ISIC 3) or category A (ISIC 4). Modeled ILO estimate.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.13.23 Employment in agriculture, female (percent female employment) (modeled ILO) (wdi_empagrf)

Long tag: qog_oecd_ts_wdi_empagrf

Original tag: wdi_empagrf

Description:
Female employment in agriculture as a percentage of all female employment. Employment is defined as persons of working age who were engaged in any activity to produce goods or provide services for pay or profit, whether at work during the reference period or not at work due to temporary absence from a job, or to working-time arrangement. The agriculture sector consists of activities in agriculture, hunting, forestry and fishing, in accordance with division 1 (ISIC 2) or categories A-B (ISIC 3) or category A (ISIC 4). Modeled ILO estimate.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.13.24 Employment in agriculture, male (percent male employment) (modeled ILO) (wdi_empagrm)

Long tag: qog_oecd_ts_wdi_empagrm

Original tag: wdi_empagrm

Description:
Male employment in agriculture as a percentage of all male employment. Employment is defined as persons of working age who were engaged in any activity to produce goods or provide services for pay or profit, whether at work during the reference period or not at work due to temporary absence from a job, or to working-time arrangement. The agriculture sector consists of activities in agriculture, hunting, forestry and fishing, in accordance with division 1 (ISIC 2) or categories A-B (ISIC 3) or category A (ISIC 4). Modeled ILO estimate.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.13.25 Employers, female (percent of female employment) (modeled ILO) (wdi_empf)

Long tag: qog_oecd_ts_wdi_empf

Original tag: wdi_empf

Description:
Employers refers are those workers who, working on their own account or with one or a few partners, hold the type of jobs defined as a "self-employment jobs" i.e. jobs where the remuneration is directly dependent upon the profits derived from the goods and services produced, and, in this capacity, have engaged, on a continuous basis, one or more persons to work for them as employee(s). Modeled ILO estimate.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.13.26 Employment in industry (percent of total employment) (modeled ILO) (wdi_empind)

Long tag: qog_oecd_ts_wdi_empind

Original tag: wdi_empind

Description:
Employment in industry as a percentage of all employment. Employment is defined as persons of working age who were engaged in any activity to produce goods or provide services for pay or profit, whether at work during the reference period or not at work due to temporary absence from a job, or to working-time arrangement. The industry sector consists of mining and quarrying, manufacturing, construction, and public utilities (electricity, gas, and water), in accordance with divisions 2-5 (ISIC 2) or categories C-F (ISIC 3) or categories B-F (ISIC 4). Modeled ILO estimate.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.13.27 Employment in industry, female (percent female employment) (modeled ILO) (wdi_empindf)

Long tag: qog_oecd_ts_wdi_empindf

Original tag: wdi_empindf

Description:
Female employment in industry as a percentage of all female employment. Employment is defined as persons of working age who were engaged in any activity to produce goods or provide services for pay or profit, whether at work during the reference period or not at work due to temporary absence from a job, or to working-time arrangement. The industry sector consists of mining and quarrying, manufacturing, construction, and public utilities (electricity, gas, and water), in accordance with divisions 2-5 (ISIC 2) or categories C-F (ISIC 3) or categories B-F (ISIC 4). Modeled ILO estimate.

2.12.13.42 Employment in services (percent of total employment) (modeled ILO) (wdi_empser)

Long tag: qog_oecd_ts_wdi_empser

Original tag: wdi_empser

Description:
Total employment in services as percentage of total employment. Employment is defined as persons of working age who were engaged in any activity to produce goods or provide services for pay or profit, whether at work during the reference period or not at work due to temporary absence from a job, or to working-time arrangement. The services sector consists of wholesale and retail trade and restaurants and hotels; transport, storage, and communications; financing, insurance, real estate, and business services; and community, social, and personal services, in accordance with divisions 6-9 (ISIC 2) or categories G-Q (ISIC 3) or categories G-U (ISIC 4). Modeled ILO estimate.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.13.43 Employment in services, female (percent of female employment) (modeled ILO) (wdi_empserf)

Long tag: qog_oecd_ts_wdi_empserf

Original tag: wdi_empserf

Description:
Female employment in services (percent of female employment). Employment is defined as persons of working age who were engaged in any activity to produce goods or provide services for pay or profit, whether at work during the reference period or not at work due to temporary absence from a job, or to working-time arrangement. The services sector consists of wholesale and retail trade and restaurants and hotels; transport, storage, and communications; financing, insurance, real estate, and business services; and community, social, and personal services, in accordance with divisions 6-9 (ISIC 2) or categories G-Q (ISIC 3) or categories G-U (ISIC 4). Modeled ILO estimate.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.13.44 Employment in services, male (percent of male employment) (modeled ILO) (wdi_empserm)

Long tag: qog_oecd_ts_wdi_empserm

Original tag: wdi_empserm

Description:

Male employment in services (percent of male employment). Employment is defined as persons of working age who were engaged in any activity to produce goods or provide services for pay or profit, whether at work during the reference period or not at work due to temporary absence from a job, or to working-time arrangement. The services sector consists of wholesale and retail trade and restaurants and hotels; transport, storage, and communications; financing, insurance, real estate, and business services; and community, social, and personal services, in accordance with divisions 6-9 (ISIC 2) or categories G-Q (ISIC 3) or categories G-U (ISIC 4). Modeled ILO estimate.

2.12.13.45 Labor force with advanced education percent of total working-age pop. (wdi_lfpedua)

Long tag: qog_oecd_ts_wdi_lfpedua

Original tag: wdi_lfpedua

Description:

The percentage of the working age population with an advanced level of education who are in the labor force. Advanced education comprises short-cycle tertiary education, a bachelor's degree or equivalent education level, a master's degree or equivalent education level, or doctoral degree or equivalent education level according to the International Standard Classification of Education 2011 (ISCED 2011).

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.13.46 Labor force with advanced education percent of female working-age pop. (wdi_lfpeduaf)

Long tag: qog_oecd_ts_wdi_lfpeduaf

Original tag: wdi_lfpeduaf

Description:

The percentage of the working age female population with an advanced level of education who are in the labor force. Advanced education comprises short-cycle tertiary education, a bachelor's degree or equivalent education level, a master's degree or equivalent education level, or doctoral degree or equivalent education level according to the International Standard Classification of Education 2011 (ISCED 2011).

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.13.47 Labor force with advanced education percent of male working-age pop. (wdi_lfpeduam)

Long tag: qog_oecd_ts_wdi_lfpeduam

Original tag: wdi_lfpeduam

Description:

The percentage of the working age male population with an advanced level of education who are in the labor force. Advanced education comprises short-cycle tertiary education, a bachelor's degree or equivalent education level, a master's degree or equivalent education level, or doctoral degree or equivalent education level according to the International Standard Classification of Education 2011 (ISCED 2011).

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.13.48 Labor force with basic education percent of total working-age pop. basic edu. (wdi_lfpedub)

Long tag: qog_oecd_ts_wdi_lfpedub

Original tag: wdi_lfpedub

Description:

The percentage of the working age population with a basic level of education who are in the labor force. Basic education comprises primary education or lower secondary education according to the International Standard Classification of Education 2011 (ISCED 2011).

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.13.49 Labor force with basic education percent of female working-age pop. basic edu. (wdi_lfpedubf)

Long tag: qog_oecd_ts_wdi_lfpedubf

Original tag: wdi_lfpedubf

Description:
The percentage of the working age female population with a basic level of education who are in the labor force. Basic education comprises primary education or lower secondary education according to the International Standard Classification of Education 2011 (ISCED 2011).

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.13.50 Labor force with basic education percent of male working-age pop. w. basic edu. (wdi_lfpedubm)

Long tag: qog_oecd_ts_wdi_lfpedubm

Original tag: wdi_lfpedubm

Description:
The percentage of the working age male population with a basic level of education who are in the labor force. Basic education comprises primary education or lower secondary education according to the International Standard Classification of Education 2011 (ISCED 2011).

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.13.51 Labor force with intermediate education percent of total working-age pop. (wdi_lfpedui)

Long tag: qog_oecd_ts_wdi_lfpedui

Original tag: wdi_lfpedui

Description:
The percentage of the working age population with an intermediate level of education who are in the labor force. Intermediate education comprises upper secondary or post-secondary non tertiary education according to the International Standard Classification of Education 2011 (ISCED 2011).

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.13.52 Labor force with intermediate education percent of female working-age pop. (wdi_lfpeduif)

Long tag: qog_oecd_ts_wdi_lfpeduif

Original tag: wdi_lfpeduif

Description:
The percentage of the working age female population with an intermediate level of education who are in the labor force. Intermediate education comprises upper secondary or post-secondary non tertiary education according to the International Standard Classification of Education 2011 (ISCED 2011).

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.13.53 Labor force with intermediate education percent of male working-age pop. (wdi_lfpeduim)

Long tag: qog_oecd_ts_wdi_lfpeduim

Original tag: wdi_lfpeduim

Description:
The percentage of the working age male population with an intermediate level of education who are in the labor force. Intermediate education comprises upper secondary or post-secondary non tertiary education according to the International Standard Classification of Education 2011 (ISCED 2011).

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.13.54 Labor force, female (percent of total labor force) (wdi_lfpf)

Long tag: qog_oecd_ts_wdi_lfpf

Original tag: wdi_lfpf

Description:
Female labor force as a percentage of the total show the extent to which women are active in the labor force.

Labor force comprises people ages 15 and older who meet the International Labour Organization's definition of the economically active population.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.13.55 Labor force participation rate (percent female ages 15+) (modeled ILO) (wdi_lfpfilo15)

Long tag: qog_oecd_ts_wdi_lfpfilo15

Original tag: wdi_lfpfilo15

Description:

Labor force participation rate (percent of female ages 15+) (modeled ILO est.). Labor force participation rate is the proportion of the population ages 15 and older that is economically active: all people who supply labor for the production of goods and services during a specified period.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.13.56 Labor force participation rate (percent of female ages 15+) (national est.) (wdi_lfpfne15)

Long tag: qog_oecd_ts_wdi_lfpfne15

Original tag: wdi_lfpfne15

Description:

Labor force participation rate (percent of female ages 15+) (national est.). Labor force participation rate is the proportion of the population ages 15 and older that is economically active: all people who supply labor for the production of goods and services during a specified period.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.13.57 Labor force participation rate (percent of total ages 15+) (modeled ILO) (wdi_lfpilo15)

Long tag: qog_oecd_ts_wdi_lfpilo15

Original tag: wdi_lfpilo15

Description:

Labor force participation rate (percent of total ages 15+) (modeled ILO est.). Labor force participation rate is the proportion of the population ages 15 and older that is economically active: all people who supply labor for the production of goods and services during a specified period.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.13.58 Labor force participation rate (percent of male ages 15+) (modeled ILO) (wdi_lfpmilo15)

Long tag: qog_oecd_ts_wdi_lfpmilo15

Original tag: wdi_lfpmilo15

Description:

Labor force participation rate (percent of male ages 15+) (modeled ILO est.). Labor force participation rate is the proportion of the population ages 15 and older that is economically active: all people who supply labor for the production of goods and services during a specified period.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.13.59 Labor force participation rate (percent of male ages 15+) (national est.) (wdi_lfpmne15)

Long tag: qog_oecd_ts_wdi_lfpmne15

Original tag: wdi_lfpmne15

Description:

Labor force participation rate (percent of male ages 15+) (national est.). Labor force participation rate is the proportion of the population ages 15 and older that is economically active: all people who supply labor for the production of goods and services during a specified period.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.13.60 Labor force participation rate (percent of total ages 15+) (national est.) (wdi_lfpne15)

Long tag: qog_oecd_ts_wdi_lfpne15

Original tag: wdi_lfpne15

Description:

Labor force participation rate (percent of total ages 15+) (national est.). Labor force participation rate is the proportion of the population ages 15 and older that is economically active: all people who supply labor for the production of goods and services during a specified period.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.13.61 Labor force participation rate, total (percent of total pop. ages 15-64) (ILO) (wdi_lfpr)

Long tag: qog_oecd_ts_wdi_lfpr

Original tag: wdi_lfpr

Description:

Labor force participation rate, total (percent of total population ages 15-64) (modeled ILO estimate). Labor force participation rate is the proportion of the population ages 15-64 that is economically active: all people who supply labor for the production of goods and services during a specified period.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.13.62 Labor force participation rate, female (percent of female pop. ages 15-64) (ILO) (wdi_lfprf)

Long tag: qog_oecd_ts_wdi_lfprf

Original tag: wdi_lfprf

Description:

Labor force participation rate, female (percent of female population ages 15-64) (modeled ILO estimate). Labor force participation rate is the proportion of the population ages 15-64 that is economically active: all people who supply labor for the production of goods and services during a specified period.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.13.63 Labor force participation rate, male (percent of male pop. ages 15-64) (ILO) (wdi_lfprm)

Long tag: qog_oecd_ts_wdi_lfprm

Original tag: wdi_lfprm

Description:

Labor force participation rate, male (percent of male population ages 15-64) (modeled ILO estimate). Labor force participation rate is the proportion of the population ages 15-64 that is economically active: all people who supply labor for the production of goods and services during a specified period.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.13.64 Labor force participation rate 15-24, female (percent) (modeled ILO) (wdi_lfpyfilo)

Long tag: qog_oecd_ts_wdi_lfpyfilo

Original tag: wdi_lfpyfilo

Description:

Labor force participation rate 15-24, female (percent) (modeled ILO estimate). Labor force participation rate for ages 15-24 is the proportion of the population ages 15-24 that is economically active: all people who supply labor for the production of goods and services during a specified period.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.13.65 Labor force participation rate 15-24, female (percent) (national est.) (wdi_lfpyfne)

Long tag: qog_oecd_ts_wdi_lfpyfne

Original tag: wdi_lfpyfne

Description:
Labor force participation rate 15-24, female (percent) (national estimate). Labor force participation rate for ages 15-24 is the proportion of the population ages 15-24 that is economically active: all people who supply labor for the production of goods and services during a specified period.

2.12.14.3 Freedom to Trade Internationally (current) (fi_ftradeint)

Long tag: qog_oecd_ts_fi_ftradeint

Original tag: fi_ftradeint

Description:

The index ranges from 0-10 where 0 corresponds to "increasing tax rate on international trade", "slow import or export process", "small trade sectors relative to the population and geographic size", "exchange rate controls are present and a black-market exists", and "restrictions on the freedom of citizens to engage in capital market exchange with foreigners" and 10 corresponds to "no specific taxes on international trade", "swift import or export process", "large trade sectors relative to the population and geographic size", "no black-market exchange rate", and "no restrictions on the freedom of citizens to engage in capital market exchange with foreigners". The index consists of the following indicators: Taxes on international trade, Regulatory trade barriers, Actual size of trade sector compared to expected size, Difference between official exchange rate and black market rate, and International capital market controls.

Variable citation: Gwartney, J., Lawson, R., Hall, J., Murphy, R., Callais, J. T., Fike, R., Geloso, V., Kahli, N. S., McMahon, F., & van Staden, M. (2021). 2.12.14.5 Economic Freedom of the World Index (current) (fi_index)

Long tag: qog_oecd_ts_fi_index

Original tag: fi_index

Description:

The index is founded upon objective components that reflect the presence (or absence) of economic freedom. The index comprises 21 components designed to identify the consistency of institutional arrangements and policies with economic freedom in five major areas: size of government (fi_sog), legal structure and security of property rights (fi_legprop), access to sound money (fi_sm), freedom to trade internationally (fi_ftradeint), regulation of credit, labor and business (fi_reg). The index ranges from 0-10 where 0 corresponds to "less economic freedom" and 10 to "more economic freedom". This is the version of the index published at the current year of measurement, without taking methodological changes over time into account.

Variable citation: Gwartney, J., Lawson, R., Hall, J., Murphy, R., Callais, J. T., Fike, R., Geloso, V., Kahli, N. S., McMahon, F., & van Staden, M. (2021). Economic Freedom Dataset 2021, published in Economic Freedom of the World: 2021. *Fraser Institute*. `https://www.fraserinstitute.org/economicfreedom/dataset`

2.12.14.6 Regulation of Credit, Labor and Business (current) (fi_reg)

Long tag: qog_oecd_ts_fi_reg

Original tag: fi_reg

Description:
The index ranges from 0-10 where 0 corresponds to "low percentage of deposits held in privately owned banks", "high foreign bank license denial rate", "private sector's share of credit is close to the base-year-minimum", "deposit and lending rates is fixed by the government and real rates is persistently negative", "high impact of minimum wage", "widespread use of price controls throughout various sectors of the economy", and "starting a new business is generally complicated" and 10 corresponds to "high percentage of deposits held in privately owned banks", "low foreign bank license denial rate", "private sector's share of credit is close to the base-year-maximum", "interest rates is determined primarily by market forces and the real rates is positive", "low impact of minimum wage", "no price controls or marketing boards", and "starting a new business is generally easy". The index consists of the following indicators: Credit Market Regulations, Labor Market Regulations, Business Regulations.

Variable citation: Gwartney, J., Lawson, R., Hall, J., Murphy, R., Callais, J. T., Fike, R., Geloso, V., Kahli, N. S., McMahon, F., & van Staden, M. (2021). 2.12.14.8 Access to Sound Money (current) (fi_sm)

Long tag: qog_oecd_ts_fi_sm

Original tag: fi_sm

Description:
The index ranges from 0-10 where 0 corresponds to "high annual money growth", "high variation in the annual rate of inflation", "high inflation rate", and "restricted foreign currency bank accounts" and 10 corresponds to "low annual money growth", "low or no variation in the annual rate of inflation", "low inflation rate", and "foreign currency bank accounts are permissible without restrictions". The index consists of the following indicators: Average annual growth of the money supply in the last five years minus average annual growth of real GDP in the last ten years, Standard inflation variability in the last five years, Recent inflation rate, Freedom to own foreign currency bank accounts domestically and abroad.

Variable citation: Gwartney, J., Lawson, R., Hall, J., Murphy, R., Callais, J. T., Fike, R., Geloso, V., Kahli, N. S., McMahon, F., & van Staden, M. (2021). Economic Freedom Dataset 2021, published in Economic Freedom of the World: 2021. *Fraser Institute*. `https://www.fraserinstitute.org/economicfreedom/dataset`

2.12.14.9 Access to Sound Money (chain_linked) (fi_sm_pd)

Long tag: qog_oecd_ts_fi_sm_pd

Original tag: fi_sm_pd

Description:
The index ranges from 0-10 where 0 corresponds to "high annual money growth", "high variation in the annual rate of inflation", "high inflation rate", and "restricted foreign currency bank accounts" and 10 corresponds to "low annual money growth", "low or no variation in the annual rate of inflation", "low inflation rate", and "foreign currency bank accounts are permissible without restrictions". The index consists of the following indicators: Average annual growth of the money supply in the last five years minus average annual growth of real GDP in the last ten years, Standard inflation variability in the last five years, Recent inflation rate, Freedom to own foreign currency bank accounts domestically and abroad. Panel-data adjusted.

2.12.14.10 Global Gender Gap Economic Participation and Opportunity Subindex (gggi_pos)

Long tag: qog_oecd_ts_gggi_pos

Original tag: gggi_pos

Description:
Economic Participation and Opportunity (0 to 1, where 1 indicates no gap). This subindex contains three concepts: the participation gap, the remuneration gap and the advancement gap. The participation gap is captured using the difference between women and men in labour force participation rates. The remuneration gap is captured through a hard data indicator (ratio of estimated female-to-male earned income) and a qualitative indicator gathered through the World Economic Forum's annual Executive Opinion Survey (wage equality for similar work). Finally, the gap between the advancement of women and men is captured through two hard data statistics (the ratio of women to men among legislators, senior officials and managers, and the ratio of women to men among technical and professional workers).

Variable citation: World Economic Forum. (2021). The global gender gap report 2021 [All Rights Reserved]. `https://www.weforum.org/reports/ab6795a1-960c-42b2-b3d5-587eccda6023`

2.12.14.43 New business density (new registrations per 1,000 people ages 15-64) (wdi_busden)

Long tag: qog_oecd_ts_wdi_busden

Original tag: wdi_busden

Description:
New businesses registered are the number of new limited liability corporations registered in the calendar year.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.14.44 Poverty gap at USD 1.90 a day (2011 PPP) (percent) (wdi_povgap190)

Long tag: qog_oecd_ts_wdi_povgap190

Original tag: wdi_povgap190

Description:
Poverty gap at 1.90 dollars a day (2011 PPP) is the mean shortfall in income or consumption from the poverty line 1.90 dollars a day (counting the nonpoor as having zero shortfall), expressed as a percentage of the poverty line. This measure reflects the depth of poverty as well as its incidence. As a result of revisions in PPP exchange rates, poverty rates for individual countries cannot be compared with poverty rates reported in earlier editions. Note: five countries – Bangladesh, Cabo Verde, Cambodia, Jordan, and Lao PDR – use the 2005 PPP conversion factors and corresponding 1.25 dollars a day and 2 dollars a day poverty lines. This is due to the large deviations in the rate of change in PPP factors relative to the rate of change in domestic consumer price indexes. See Box 1.1 in the Global Monitoring Report 2015/2016 (http://www.worldbank.org/en/publication/global-monitoring-report) for a detailed explanation.

2.12.14.45 Women Business and the Law Index Score (scale 1-100) (wdi_wombuslawi)

Long tag: qog_oecd_ts_wdi_wombuslawi

Original tag: wdi_wombuslawi

Description:
Women Business and the Law Index Score (1-100) measures how laws and regulations affect women's economic opportunity. Overall scores are calculated by taking the average score of each of the eight areas (Going Places, Starting a Job, Getting Paid, Getting Married, Having Children, Running a Business, Managing Assets and Getting a Pension), with 100 representing the highest possible score.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.15 Media

This category includes indicators on the freedom of the media in a given country (freedom of the press, regulation of the media) as well as the public access and confidence in the media.

2.12.15.1 Economic Influences over Media Content (2001-2016) (fhp_mcei5)

Long tag: qog_oecd_ts_fhp_mcei5

Original tag: fhp_mcei5

Description:
Economic Influences over Media Content (2001-2016). This category includes the structure of media ownership; transparency and concentration of ownership; the costs of establishing media as well as any impediments to news production and distribution; the selective withholding of advertising or subsidies by the state or other actors; the impact of corruption and bribery on content; and the extent to which the economic situation in a country or territory affects the development and sustainability of the media.

Variable citation: Freedom House. (2017). Freedom of the press 2017. `https://freedomhouse.org/report/freedompress/freedom-press-2017`

2.12.15.2 Laws and Regulations that Influence Media Content (2001-2016) (fhp_mclr5)

Long tag: qog_oecd_ts_fhp_mclr5

Original tag: fhp_mclr5

Description:
Laws and Regulations that Influence the Media Content (2001-2016). The variable encompasses an examination of both the laws and regulations that could influence media content and the government's inclination to use these laws and legal institutions to restrict the media's ability to operate. Freedom House assesses the positive impact of legal and constitutional guarantees for freedom of expression; the potentially negative aspects of security legislation, the penal code, and other criminal statutes; penalties for libel and defamation; the existence of and ability to use freedom of information legislation; the independence of the judiciary and of official media regulatory bodies; registration requirements for both media outlets and journalists; and the ability of journalists' groups to operate freely. The scale of the variable is 0-30. 0

indicates more freedom.

Variable citation: Freedom House. (2017). Freedom of the press 2017. `https://freedomhouse.org/report/freedompress/freedom-press-2017`

2.12.15.3 Political Pressures and Controls on Media Content (2001-2016) (fhp_mcpp5)

Long tag: qog_oecd_ts_fhp_mcpp5

Original tag: fhp_mcpp5

Description:

Political Pressures and Controls on Media Content (2001-2016). The variable evaluates the degree of political control over the content of news media. Issues examined include the editorial independence of both state-owned and privately owned media; access to information and sources; official censorship and self-censorship; the vibrancy of the media; the ability of both foreign and local reporters to cover the news freely and without harassment; and the intimidation of journalists by the state or other actors, including arbitrary detention and imprisonment, violent assaults, and other threats. The scale of the variable is 0-40. 0 indicates more freedom.

Variable citation: Freedom House. (2017). Freedom of the press 2017. `https://freedomhouse.org/report/freedompress/freedom-press-2017`

2.12.15.4 Freedom of the Press, Score (2001-2016) (fhp_score5)

Long tag: qog_oecd_ts_fhp_score5

Original tag: fhp_score5

Description:

Freedom of the Press, Score (2001-2016): The press freedom index is computed by adding four component ratings: Laws and regulations, Political pressures and controls, Economic Influences and Repressive actions. The scale ranges from 0 (most free) to 100 (least free).

Variable citation: Freedom House. (2017). Freedom of the press 2017. `https://freedomhouse.org/report/freedompress/freedom-press-2017`

2.12.15.5 Freedom of the Press, Status (2001-2016) (fhp_status5)

Long tag: qog_oecd_ts_fhp_status5

Original tag: fhp_status5

Description:

Freedom of the Press, Status (1988-2016):

1. Free
2. Partly Free
3. Not Free

Variable citation: Freedom House. (2017). Freedom of the press 2017. `https://freedomhouse.org/report/freedompress/freedom-press-2017`

2.12.15.6 Press Freedom Index (rsf_pfi)

Long tag: qog_oecd_ts_rsf_pfi

Original tag: rsf_pfi

Description:

The Press Freedom index measures the amount of freedom journalists and the media have in each country and the efforts made by governments to see that press freedom is respected. It does not take account of all human rights violations, only those that affect press freedom. Neither is it an indicator of the quality of a country's media.

Note: With the exception of the year 2012 the index ranges between 0 (total press freedom) and 100 (no press freedom). However for the 2012 data release RSF changed the scale so that negative values can be and indeed are assigned to countries with more press freedom. We have decided leave the data as is.

Variable citation: Reporters sans frontières. (2021). World press freedom index. `https://rsf.org/en/ranking`

2.12.16 Welfare

This category includes indicators on government expenditure related to social welfare (pension, sick- ness coverage and accidents coverage).

2.12.16.1 Expenditure on general public services, as percent of total gen. gov. exp. (gfs_gps)

Long tag: qog_oecd_ts_gfs_gps

Original tag: gfs_gps

Description:
Total expenditure on general public services, as the percentage of general government expenditure.

Variable citation: International Monetary Fund. (2019). Government finance statistics yearbook (gfsy) 2019. `https://data.imf.org/?sk=a0867067-d23c-4ebc-ad23-d3b015045405`

2.12.16.2 Expenditure on housing and comm. amenities, as percent of total gen. gov. exp. (gfs_hca)

Long tag: qog_oecd_ts_gfs_hca

Original tag: gfs_hca

Description:
Total expenditure on housing and community amenities, as the percentage of general government expenditure.

Variable citation: International Monetary Fund. (2019). Government finance statistics yearbook (gfsy) 2019. `https://data.imf.org/?sk=a0867067-d23c-4ebc-ad23-d3b015045405`

2.12.16.3 Expenditure on recreation, culture and religion, as percent of total gen. gov. exp. (gfs_rcr)

Long tag: qog_oecd_ts_gfs_rcr

Original tag: gfs_rcr

Description:
Total expenditure on recreation, culture and religion, as the percentage of general government expenditure.

Variable citation: International Monetary Fund. (2019). Government finance statistics yearbook (gfsy) 2019. `https://data.imf.org/?sk=a0867067-d23c-4ebc-ad23-d3b015045405`

2.12.16.4 Structure of central gov. expenditures, social protection (oecd_gengovdistri_t1j)

Long tag: qog_oecd_ts_oecd_gengovdistri_t1j

Original tag: oecd_gengovdistri_t1j

Description:
Structure of central government expenditures, social protection.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. `https://doi.org/10.1787/20752288`

2.12.16.5 Public social expenditure (oecd_socexpnd_t1a)

Long tag: qog_oecd_ts_oecd_socexpnd_t1a

Original tag: oecd_socexpnd_t1a

Description:
Public social expenditure.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. `https://doi.org/10.1787/20752288`

2.12.16.6 Private social expenditure (oecd_socexpnd_t1b)

Long tag: qog_oecd_ts_oecd_socexpnd_t1b

Original tag: oecd_socexpnd_t1b

Description:
Private social expenditure.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. `https://doi.org/10.1787/20752288`

2.12.17 Gender Equality

This category includes variables related to the differences of access and opportunities between women and men by country, such as access to education, overall employment and employment by specific sectors, and indexes that shine a light on the general differences in treatment between men and women.

2.12.17.1 Gender Inequality Index (0 to 1 higher disparity) (gii_gii)

Long tag: qog_oecd_ts_gii_gii

Original tag: gii_gii

Description:

The GII is an inequality index. It measures gender inequalities in three important aspects of human development-reproductive health, measured by maternal mortality ratio and adolescent birth rates; empowerment, measured by proportion of parliamentary seats occupied by females and proportion of adult females and males aged 25 years and older with at least some secondary education; and economic status, expressed as labour market participation and measured by labour force participation rate of female and male populations aged 15 years and older. The GII is built on the same framework as the IHDI-to better expose differences in the distribution of achievements between women and men. It measures the human development costs of gender inequality. Thus the higher the GII value the more disparities between females and males and the more loss to human development.

Variable citation: United Nations Development Program. (2020a). Gender inequality index. `http://hdr.undp.org/en/content/gender-inequality-index-gii`

2.12.18 History

This category includes variables related to historical phenomena or situations, for example colonial origin, legal origin and GDP per capita in the year 1500.

2.12.18.1 Colonial Origin (ht_colonial)

Long tag: qog_oecd_ts_ht_colonial

Original tag: ht_colonial

Description:

This is a tenfold classification of the former colonial ruler of the country. Following Bernard et al. (2004), we have excluded the British settler colonies (the US, Canada, Australia, Israel and New Zealand), and exclusively focused on "Western overseas" colonialism. This implies that only Western colonizers (e.g. excluding Japanese colonialism), and only countries located in the non-Western hemisphere "overseas" (e.g. excluding Ireland
Malta), have been coded. Each country that has been colonized since 1700 is coded. In cases of several colonial powers, the last one is counted, if it lasted for 10 years or longer. The categories are the following:

0. Never colonized by a Western overseas colonial power
1. Dutch
2. Spanish
3. Italian
4. US
5. British
6. French
7. Portuguese
8. Belgian
9. British-French
10. Australian

2.12.18.2 Religion: Catholic (lp_catho80)

Long tag: qog_oecd_ts_lp_catho80

Original tag: lp_catho80

Description:

Religion: Catholic: Catholics as percentage of population in 1980.

Variable citation: Porta, R. L., Lopez-de-Silanes, F., Shleifer, A., & Vishny, R. (1999). The quality of government. *Journal of Law, Economics, and Organization*, 15(1), 222–279

2.12.18.3 Legal Origin (lp_legor)

Long tag: qog_oecd_ts_lp_legor

Original tag: lp_legor

Description:

Legal origin: Identifies the legal origin of the Company Law or Commercial code of each country. There are five possible origins:
1. English Common Law

2. French Commercial Code
3. Socialist/Communist Laws
4. German Commercial Code
5. Scandinavian Commercial Code

Variable citation: Porta, R. L., Lopez-de-Silanes, F., Shleifer, A., & Vishny, R. (1999). The quality of government. *Journal of Law, Economics, and Organization*, 15(1), 222–279

2.12.18.4 Religion: Muslim (lp_muslim80)

Long tag: qog_oecd_ts_lp_muslim80

Original tag: lp_muslim80

Description:
Religion: Muslim: Muslims as percentage of population in 1980.

Variable citation: Porta, R. L., Lopez-de-Silanes, F., Shleifer, A., & Vishny, R. (1999). The quality of government. *Journal of Law, Economics, and Organization*, 15(1), 222–279

2.12.18.5 Religion: Other Denomination (lp_no_cpm80)

Long tag: qog_oecd_ts_lp_no_cpm80

Original tag: lp_no_cpm80

Description:
Religion: Other Denomination: Percentage of population belonging to other denominations in 1980. Defined as 100 - lp_catho80 - lp_muslim80 - lp_protmg80.

Variable citation: Porta, R. L., Lopez-de-Silanes, F., Shleifer, A., & Vishny, R. (1999). The quality of government. *Journal of Law, Economics, and Organization*, 15(1), 222–279

2.12.18.6 Religion: Protestant (lp_protmg80)

Long tag: qog_oecd_ts_lp_protmg80

Original tag: lp_protmg80

Description:
Religion: Protestant: Protestants as percentage of population in 1980.

Variable citation: Porta, R. L., Lopez-de-Silanes, F., Shleifer, A., & Vishny, R. (1999). The quality of government. *Journal of Law, Economics, and Organization*, 15(1), 222–279

2.12.19 Energy and Infrastructure

This category includes indicators that cover descriptions of different energy sources (production, con- sumption and trade) and variables related to quality and quantity of different sectors of infrastructure (transportation and communication).

2.12.19.1 Real value added: industry including energy (oecd_evova_t1b)

Long tag: qog_oecd_ts_oecd_evova_t1b

Original tag: oecd_evova_t1b

Description:
Real value added in industry including energy.

2.12.19.25 Access to electricity (percent of population) (wdi_acel)

Long tag: qog_oecd_ts_wdi_acel

Original tag: wdi_acel

Description:
Access to electricity is the percentage of population with access to electricity. Electrification data are collected from industry, national surveys and international sources.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.19.26 Access to electricity, rural (percent of rural population) (wdi_acelr)

Long tag: qog_oecd_ts_wdi_acelr

Original tag: wdi_acelr

Description:
Access to electricity, rural is the percentage of rural population with access to electricity.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.19.27 Access to electricity, urban (percent of urban population) (wdi_acelu)

Long tag: qog_oecd_ts_wdi_acelu

Original tag: wdi_acelu

Description:
Access to electricity, urban is the percentage of urban population with access to electricity.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.19.28 Alternative and nuclear energy (percent of total energy use) (wdi_ane)

Long tag: qog_oecd_ts_wdi_ane

Original tag: wdi_ane

Description:
Clean energy is noncarbohydrate energy that does not produce carbon dioxide when generated. It includes hydropower and nuclear, geothermal, and solar power, among others.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.19.29 Fixed broadband subscriptions (per 100 people) (wdi_broadb)

Long tag: qog_oecd_ts_wdi_broadb

Original tag: wdi_broadb

Description:
Fixed broadband subscriptions refers to fixed subscriptions to high-speed access to the public Internet (a TCP/IP connection), at downstream speeds equal to, or greater than, 256 kbit/s. This includes cable modem, DSL, fiber-to-the-home/building, other fixed (wired)-broadband subscriptions, satellite broadband and terrestrial fixed wireless broadband. This total is measured irrespective of the method of payment. It excludes subscriptions that have access to data communications (including the Internet) via mobile-cellular networks. It should include fixed WiMAX and any other fixed wireless technologies. It includes both residential subscriptions and subscriptions for organizations.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.19.30 Renewable electricity output (percent of total electricity output) (wdi_elerenew)

Long tag: qog_oecd_ts_wdi_elerenew

Original tag: wdi_elerenew

Description:
Renewable electricity is the share of electrity generated by renewable power plants in total electricity generated by all types of plants.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.19.31 Electricity production from coal sources (percent of total) (wdi_elprodcoal)

Long tag: qog_oecd_ts_wdi_elprodcoal

Original tag: wdi_elprodcoal

Description:
Sources of electricity refer to the inputs used to generate electricity. Coal refers to all coal and brown coal, both primary (including hard coal and lignite-brown coal) and derived fuels (including patent fuel, coke oven coke, gas coke, coke oven gas, and blast furnace gas). Peat is also included in this category.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.19.32 Electricity production from natural gas sources (percent of total) (wdi_elprodgas)

Long tag: qog_oecd_ts_wdi_elprodgas

Original tag: wdi_elprodgas

Description:
Sources of electricity refer to the inputs used to generate electricity. Gas refers to natural gas but excludes natural gas liquids.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.19.33 Electricity production from hydroelectric sources (percent of total) (wdi_elprodhyd)

Long tag: qog_oecd_ts_wdi_elprodhyd

Original tag: wdi_elprodhyd

Description:
Sources of electricity refer to the inputs used to generate electricity. Hydropower refers to electricity produced by hydroelectric power plants.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.19.34 Electricity production from nuclear sources (percent of total) (wdi_elprodnuc)

Long tag: qog_oecd_ts_wdi_elprodnuc

Original tag: wdi_elprodnuc

Description:
Sources of electricity refer to the inputs used to generate electricity. Nuclear power refers to electricity produced by nuclear power plants.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.19.35 Electricity production from oil sources (percent of total) (wdi_elprodoil)

Long tag: qog_oecd_ts_wdi_elprodoil

Original tag: wdi_elprodoil

Description:
Sources of electricity refer to the inputs used to generate electricity. Oil refers to crude oil and petroleum products.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.19.36 Energy imports, net (percent of energy use) (wdi_eneimp)

Long tag: qog_oecd_ts_wdi_eneimp

Original tag: wdi_eneimp

Description:
Net energy imports are estimated as energy use less production, both measured in oil equivalents. A negative value indicates that the country is a net exporter. Energy use refers to use of primary energy before transformation to other end-use fuels, which is equal to indigenous production plus imports and stock changes, minus exports and fuels supplied to ships and aircraft engaged in international transport.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.19.37 Renewable energy consumption (percent of total final energy consumption) (wdi_enerenew)

Long tag: qog_oecd_ts_wdi_enerenew

Original tag: wdi_enerenew

Description:
Renewable energy consumption is the share of renewables energy in total final energy consumption.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.19.38 Energy use (kg of oil equivalent per capita) (wdi_eneuse)

Long tag: qog_oecd_ts_wdi_eneuse

Original tag: wdi_eneuse

Description:
Energy use refers to use of primary energy before transformation to other end-use fuels, which is equal to indigenous production plus imports and stock changes, minus exports and fuels supplied to ships and aircraft engaged in international transport.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.19.39 Fossil fuel energy consumption (percent of total) (wdi_fossil)

Long tag: qog_oecd_ts_wdi_fossil

Original tag: wdi_fossil

Description:
Fossil fuel comprises coal, oil, petroleum, and natural gas products.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.19.40 Individuals using the Internet (percent of population) (wdi_internet)

Long tag: qog_oecd_ts_wdi_internet

Original tag: wdi_internet

Description:
Internet users are individuals who have used the Internet (from any location) in the last 3 months. The Internet can be used via a computer, mobile phone, personal digital assistant, games machine, digital TV etc.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.19.41 Mobile cellular subscriptions (per 100 people) (wdi_mobile)

Long tag: qog_oecd_ts_wdi_mobile

Original tag: wdi_mobile

Description:
Mobile cellular telephone subscriptions are subscriptions to a public mobile telephone service that provide access to the PSTN using cellular technology. The indicator includes (and is split into) the number of postpaid subscriptions, and the number of active prepaid accounts (i.e. that have been used during the last three months). The indicator applies to all mobile cellular subscriptions that offer voice communications. It excludes subscriptions via data cards or USB modems, subscriptions to public mobile data services, private trunked mobile radio, telepoint, radio paging and telemetry services.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.19.42 Oil rents (percent of GDP) (wdi_oilrent)

Long tag: qog_oecd_ts_wdi_oilrent

Original tag: wdi_oilrent

Description:
Oil rents are the difference between the value of crude oil production at world prices and total costs of production.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.19.43 Electric power consumption (kWh per capita) (wdi_powcon)

Long tag: qog_oecd_ts_wdi_powcon

Original tag: wdi_powcon

Description:
Electric power consumption measures the production of power plants and combined heat and power plants less transmission, distribution, and transformation losses and own use by heat and power plants.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.19.44 Fixed telephone subscriptions (per 100 people) (wdi_tele)

Long tag: qog_oecd_ts_wdi_tele

Original tag: wdi_tele

Description:
Fixed telephone subscriptions refers to the sum of active number of analogue fixed telephone lines, voice-over-IP (VoIP) subscriptions, fixed wireless local loop (WLL) subscriptions, ISDN voice-channel equivalents and fixed public payphones.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.20 Migration

This category includes indicators related to migratory phenomena such as immigration rates, level of education, brain drain, and refugee population.

2.12.20.1 Foreign population (oecd_migforpop_t1b)

Long tag: qog_oecd_ts_oecd_migforpop_t1b

Original tag: oecd_migforpop_t1b

Description:
Foreign population.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. `https://doi.org/10.1787/20752288`

2.12.20.2 Inward Remittances Flow, current (nominal) US dollar million (rd_inw)

Long tag: qog_oecd_ts_rd_inw

Original tag: rd_inw

Description:
Inward Remittances Flow, current (nominal) US dollar million.

Variable citation: The World Bank. (2021a). Remittances data. `https://datacatalog.worldbank.org/search/dataset/0038132`

2.12.20.3 Outward Remittances Flow, current (nominal) US dollar million (rd_outw)

Long tag: qog_oecd_ts_rd_outw

Original tag: rd_outw

Description:
Outward Remittances Flow, current (nominal) US dollar million.

Variable citation: The World Bank. (2021a). Remittances data. `https://datacatalog.worldbank.org/search/dataset/0038132`

2.12.20.4 Net migration (wdi_migration)

Long tag: qog_oecd_ts_wdi_migration

Original tag: wdi_migration

Description:

Net migration is the net total of migrants during the period, that is, the total number of immigrants less the annual number of emigrants, including both citizens and noncitizens. Data are five-year estimates.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.20.5 Refugee population by country or territory of asylum (wdi_refasy)

Long tag: qog_oecd_ts_wdi_refasy

Original tag: wdi_refasy

Description:

Refugees are people who are recognized as refugees under the 1951 Convention Relating to the Status of Refugees or its 1967 Protocol, the 1969 Organization of African Unity Convention Governing the Specific Aspects of Refugee Problems in Africa, people recognized as refugees in accordance with the UNHCR statute, people granted refugee-like humanitarian status, and people provided temporary protection. Asylum seekers–people who have applied for asylum or refugee status and who have not yet received a decision or who are registered as asylum seekers–are excluded. Palestinian refugees are people (and their descendants) whose residence was Palestine between June 1946 and May 1948 and who lost their homes and means of livelihood as a result of the 1948 Arab-Israeli conflict. Country of asylum is the country where an asylum claim was filed and granted.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.12.20.6 Refugee population by country or territory of origin (wdi_refori)

Long tag: qog_oecd_ts_wdi_refori

Original tag: wdi_refori

Description:

Refugees are people who are recognized as refugees under the 1951 Convention Relating to the Status of Refugees or its 1967 Protocol, the 1969 Organization of African Unity Convention Governing the Specific Aspects of Refugee Problems in Africa, people recognized as refugees in accordance with the UNHCR statute, people granted refugee-like humanitarian status, and people provided temporary protection. Asylum seekers–people who have applied for asylum or refugee status and who have not yet received a decision or who are registered as asylum seekers–are excluded. Palestinian refugees are people (and their descendants) whose residence was Palestine between June 1946 and May 1948 and who lost their homes and means of livelihood as a result of the 1948 Arab-Israeli conflict. Country of origin generally refers to the nationality or country of citizenship of a claimant.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.13 QoG PERCEIVE Survey Dataset

Dataset tag: qog_perceive_survey17

Description: The PERCEIVE original survey is intended to help researchers better understand the micro and macro-level dynamics that drive support (or lack thereof) of EU regional policies.

The survey includes over 35 substantive questions as well as seven demographic and background questions of the respondent. Each respondent is geo-coded at the NUTS 1, NUTS 2, and NUTS 3 levels. The survey questionnaire was originally written by scholars at the University of Gothenburg, Nicholas Charron, and Monika Bauhr, with help and feedback from various PERCEIVE partners. The fieldwork was conducted during the summer of 2017 by an international survey firm and the results were returned to the University of Gothenburg in September, 2017.

Dataset citation: Bauhr, Monika and Nicholas Charron. 2019. "The EU as a Savior and a Saint? Corruption and Public Support for Redistribution." Journal of European Public Policy 0 (0): 1–19. https://doi.org/10.1080/13501763.2019.1578816

License: The QoG datasets are open and available, free of charge and without a need to register your data. You can use them for your analysis, graphs, teaching, and other academic-related and non-commercial purposes. We ask our users to cite always the original source(s) of the data and our datasets.

We do not allow other uses of these data including but not limited to redistribution, commercialization and other for-profit usage. If a user is interested in such use or has doubts about the license, they will have to refer to the original source and check with them if this is allowed and what requirements they need to fulfill.

Be mindful that the original data sources are the only owners of their data and they can adjust their license without previous warning.

More detailed information on the dataset can be found at the following web page: `https://www.gu.se/en/quality-government/qog-data/data-downloads/perceive-survey-dataset`

2.13.1 Identification Variables

These variables identify the observations in the dataset.

2.13.1.1 Response ID (id)

Long tag: qog_perceive_survey17_id

Original tag: ID

Description:

Unique and anonymous ID assigned to each respondent.

2.13.1.2 Type of Interview (typetel_)

Long tag: qog_perceive_survey17_typetel_

Original tag: TYPETEL_

Description:

whether mobile or landline was used in the interview.

1. Landline

2. Mobile

2.13.1.3 Country of Respondent (country)

Long tag: qog_perceive_survey17_country

Original tag: COUNTRY

Description:

Unique country code, numeric.

2.13.1.4 Language of Interview (language)

Long tag: qog_perceive_survey17_language

Original tag: LANGUAGE

Description:

The language in which the interview was conducted, numeric.

2.13.1.5 Sample (sample)

Long tag: qog_perceive_survey17_sample

Original tag: SAMPLE

Description:

whether the response is a part of the general population sample or control sample.

0. General population sample

1. Control sample (respondent from select region)

2.13.1.6 NUTS1 Abbreviation Code (d8_nuts1)

Long tag: qog_perceive_survey17_d8_nuts1

Original tag: D8_NUTS1

Description:

Abbreviation code of NUTS1-level region to which the observation belongs. The Nomenclature of Territorial Units for Statistics, (NUTS), is a geocode standard for referencing the administrative divisions of countries for statistical purposes. NUTS 1: major socio-economic regions.

2.13.1.7 NUTS2 Abbreviation Code (d8_nuts2)

Long tag: qog_perceive_survey17_d8_nuts2

Original tag: D8_NUTS2

Description:

Abbreviation code of NUTS2-level region to which the observation belongs. The Nomenclature of Territorial Units for Statistics, (NUTS), is a geocode standard for referencing the administrative divisions of countries for statistical purposes. NUTS 2: basic regions for the application of regional policies.

2.13.1.8 NUTS3 Abbreviation Code (d8_nuts3)

Long tag: qog_perceive_survey17_d8_nuts3

Original tag: D8_NUTS3

Description:

Abbreviation code of NUTS3-level region to which the observation belongs. The Nomenclature of Territorial Units for Statistics, (NUTS), is a geocode standard for referencing the administrative divisions of countries for statistical purposes. NUTS 3: small regions for specific diagnoses.

2.13.1.9 Region Code (region_code_n)

Long tag: qog_perceive_survey17_region_code_n

Original tag: region_code_n

Description:

Regional geocode for merging with PERCEIVE regional dataset.

2.13.1.10 Case Study Region (csregion)

Long tag: qog_perceive_survey17_csregion

Original tag: CSregion

Description:

Is the respondent from the selected case-study region?

0. No

1. Yes

2.13.2 Survey Questions

Survey Question included in the QoG PERCEIVE Survey

2.13.2.1 EU Cohesion Policy (q1_1)

Long tag: qog_perceive_survey17_q1_1

Original tag: Q1_1

Description:

In general, have you ever heard about the EU Cohesion Policy?

0. No

1. Yes

2.13.2.2 EU Regional Policy (q1_2)

Long tag: qog_perceive_survey17_q1_2

Original tag: Q1_2

Description:

In general, have you ever heard about the EU Regional Policy?

0. No

1. Yes

2.13.2.3 EU Structural Funds (q1_3)

Long tag: qog_perceive_survey17_q1_3

Original tag: Q1_3

Description:

In general, have you ever heard about the EU Structural Funds?

0. No

1. Yes

2.13.2.4 EU funded project in your region or area (q1_4)

Long tag: qog_perceive_survey17_q1_4

Original tag: Q1_4

Description:

In general, have you ever heard about any EU funded project in your region or area?

0. No

1. Yes

2.13.2.5 Aggregate Results for Knowledge on EU Policies (q1_5)

Long tag: qog_perceive_survey17_q1_5

Original tag: Q1_5

Description:

Has the respondent ever heard of any of these four EU policies asked in Q1.1-4 (EU Cohesion Policy, EU Regional Policy, EU Structural Funds

and any EU-funded project in your region or area)?

0. No

1. Yes

2.13.2.6 Source of Information (q2)

Long tag: qog_perceive_survey17_q2

Original tag: Q2

Description:

Where did you hear about the project in your region? (Follow-up question if the answer was "yes" in Q1)

1. TV

2. Billboard

3. Print or online newspaper

4. Social media

5. Workplace

6. Radio

98. Other

2.13.2.7 Benefit from EU Funds (q3)

Long tag: qog_perceive_survey17_q3

Original tag: Q3

Description:

To your knowledge, have you ever benefited in your daily life from any project funded by the EU?

1. Yes

2. No

99. (Don<92>t know/Refused)

2.13.2.8 Biggest problem in the region (q4)

Long tag: qog_perceive_survey17_q4

Original tag: Q4

Description:

In the past 5 years or so, which of the following do you think has been the biggest problem facing your region? (asked in randomized order)

1. Poor education

2. Poor infrastructure & transportation

3. Corruption and poor governance

4. Unemployment

5. Environmental concerns

6. Poor wages / poverty

98. (other)

2.13.2.9 EU and Biggest Problem of Regions (q5_1)

Long tag: qog_perceive_survey17_q5_1

Original tag: Q5_1

Description:

How effective do you think the European Union will be at dealing with the biggest problem in your region?

1. Very effective

2. Somewhat effective

3. Not so effective

2.13.2.10 National Institutions and Biggest Problem of Regions (q5_2)

Long tag: qog_perceive_survey17_q5_2

Original tag: Q5_2

Description:

How effective do you think (COUNTRY<92>s) national governing institutions will be at dealing with the biggest problem in your region?

1. Very effective

2. Somewhat effective

3. Not so effective

2.13.2.11 Regional/local Institutions and Biggest Problem of Regions (q5_3)

Long tag: qog_perceive_survey17_q5_3

Original tag: Q5_3

Description:

How effective do you think your regional/local governing institutions will be at dealing with the biggest problem in your region?

1. Very effective

2. Somewhat effective

3. Not so effective

2.13.2.12 Supported Political Party (q6)

Long tag: qog_perceive_survey17_q6

Original tag: Q6

Description:

Turning a bit to politics, what political party would you vote for if the national parliamentary election were tomorrow?

Selection is made from the provided current party list by country.

2.13.2.13 Participation in EU Elections (q7)

Long tag: qog_perceive_survey17_q7

Original tag: Q7

Description:

Now thinking about EU elections, have you voted in either of the last two EU parliamentary elections?

(referring to 2009 and 2014 elections)

0. Neither

1. Once

2- Both times

99. Don<b4>t know/Refused

2.13.2.14 EU Membership (q8)

Long tag: qog_perceive_survey17_q8

Original tag: Q8

Description:

In general, do you think that (YOUR COUNTRY<92>S) EU membership is a good thing, a bad thing, neither good nor bad, not sure?

1. A good thing

2. A bad thing

3. Neither good nor bad

4. Not sure

Note: This question is not included in the UK survey.

2.13.2.15 Regional Identity (q9_1)

Long tag: qog_perceive_survey17_q9_1

Original tag: Q9_1

Description:

On a 0-10 scale, with <91>0<92> being <91>I don<92>t identify at all, and <91>10<92> being <91>I identify very strongly<92>, how strongly do you identify yourself with your region?

0. I don<92>t identify at all

10. I identify very strongly

2.13.2.16 National Identity (q9_2)

Long tag: qog_perceive_survey17_q9_2

Original tag: Q9_2

Description:

On a 0-10 scale, with <91>0<92> being <91>I don<92>t identify at all, and <91>10<92> being <91>I identify very strongly<92>, how strongly do you identify yourself with your country?

0. I don<92>t identify at all

10. I identify very strongly

2.13.2.17 European Identity (q9_3)

Long tag: qog_perceive_survey17_q9_3

Original tag: Q9_3

Description:

On a 0-10 scale, with <91>0<92> being <91>I don<92>t identify at all, and <91>10<92> being <91>I identify very strongly<92>, how strongly do you identify yourself with Europe?

0. I don<92>t identify at all

10. I identify very strongly

2.13.2.18 Being European: Right to Leave and Work in Abroad (q10_1)

Long tag: qog_perceive_survey17_q10_1

Original tag: Q10_1

Description:

People have many different opinions about what <91>being European<92> means. On a scale from 0-10, where <91>0<92> means <93>not at all important<94> and <91>10<92> means <93>very important<94>, how important is the following statement for you in terms of <91>being European<92>?

"The right for all EU citizens to live and work in any other EU country"

0. Not important at all

10. Very important

2.13.2.19 Being European: Euro Currency (q10_2)

Long tag: qog_perceive_survey17_q10_2

Original tag: Q10_2

Description:

People have many different opinions about what <91>being European<92> means. On a scale from 0-10, where <91>0<92> means <93>not at all important<94> and <91>10<92> means <93>very important<94>, how important is to have the common Euro currency for you in terms of <91>being European<92>?

0. Not important at all

10. Very important

2.13.2.20 Being European: Christianity (q10_3)

Long tag: qog_perceive_survey17_q10_3

Original tag: Q10_3

Description:

People have many different opinions about what <91>being European<92> means. On a scale from 0-10,

where <91>0<92> means <93>not at all important<94> and <91>10<92> means <93>very important<94>, how important is the Christian religion for you in terms of <91>being European<92>?

0. Not important at all

10. Very important

2.13.2.21 Being European: European Flag (q10_4)

Long tag: qog_perceive_survey17_q10_4

Original tag: Q10_4

Description:

People have many different opinions about what <91>being European<92> means. On a scale from 0-10, where <91>0<92> means <93>not at all important<94> and <91>10<92> means <93>very important<94>, how important is the European flag for you in terms of <91>being European<92>?

0. Not important at all

10. Very important

2.13.2.22 Being European: Common European History and Culture (q10_5)

Long tag: qog_perceive_survey17_q10_5

Original tag: Q10_5

Description:

People have many different opinions about what <91>being European<92> means. On a scale from 0-10, where <91>0<92> means <93>not at all important<94> and <91>10<92> means <93>very important<94>, how important is to share a common European history and culture for you in terms of <91>being European<92>?

0. Not important at all

10. Very important

2.13.2.23 Trust in Other People (q11)

Long tag: qog_perceive_survey17_q11

Original tag: Q11

Description:

Generally speaking, using a scale on which 0 means that <93>people cannot be trusted<94> and 10 means that <93>most people can be trusted<94>, where would you locate yourself on this scale?

0. People cannot be trusted

10. Most people can be trusted

2.13.2.24 Immigration (q12)

Long tag: qog_perceive_survey17_q12

Original tag: Q12

Description:

(COUNTRY) should have more restrictions on immigration than it does today.

0. Fully disagree

10. Fully agree

2.13.2.25 Income Inequality (q13)

Long tag: qog_perceive_survey17_q13

Original tag: Q13

Description:

(COUNTRY<92>s) national government should take measures to reduce differences in income levels among people in (COUNTRY).

0. Fully disagree

10. Fully agree

2.13.2.26 Strong Leaders (q14)

Long tag: qog_perceive_survey17_q14

Original tag: Q14

Description:

(COUNTRY) should have a strong leader that can solve problems quickly, who does not have to worry about elections and parliamentary rules.

0. Fully disagree

10. Fully agree

2.13.2.27 EU Enlargement - Randomized Question A (q15_1)

Long tag: qog_perceive_survey17_q15_1

Original tag: Q15_1

Description:

The following sentence is read to 25percent of survey respondents, who are randomly selected for the control group.

"The EU should continue to let more countries become members, under the condition that they meet all of EU<92>s membership requirements<94>

0. Fully disagree

10. Fully agree

2.13.2.28 EU Enlargement - Randomized Question B (q15_2)

Long tag: qog_perceive_survey17_q15_2

Original tag: Q15_2

Description:
The following sentence is read to 25percent of survey respondents, who are randomly selected for the first treatment group.

<93>The EU should continue to let more countries become members, SUCH AS NORWAY, under the condition that they meet all of EU<92>s membership requirements<94>

0. Fully disagree

10. Fully agree

2.13.2.29 EU Enlargement - Randomized Question D (q15_3)

Long tag: qog_perceive_survey17_q15_3

Original tag: Q15_3

Description:
The following sentence is read to 25percent of survey respondents, who are randomly selected for the third treatment group.

<93>The EU should continue to let more countries become members, SUCH AS SERBIA, under the condition that they meet all of EU<92>s membership requirements<94>

0. Fully disagree

10. Fully agree

2.13.2.30 EU Enlargement - Randomized Question C (q15_4)

Long tag: qog_perceive_survey17_q15_4

Original tag: Q15_4

Description:
The following sentence is read to 25percent of survey respondents, who are randomly selected for the second treatment group.

<93>The EU should continue to let more countries become members, SUCH AS TURKEY, under the condition that they meet all of EU<92>s membership requirements.<94>

0. Fully disagree

10. Fully agree

2.13.2.31 Control and Treatment Groups for Q15 (treatmentq15)

Long tag: qog_perceive_survey17_treatmentq15

Original tag: treatmentQ15

Description:

Which version of question 15 is asked to the respondent?

0. Control group with the generic statement

1. Treatment group mentioning Norway

2. Treatment group mentioning Turkey

3. Treatment group mentioning Serbia

2.13.2.32 EU Enlargement - Combined Responses (q15combined)

Long tag: qog_perceive_survey17_q15combined

Original tag: Q15combined

Description:

Combined responses from the randomized questions on EU Enlargement (per_q15.1, per_q15.2, per_q15.3, per_q15.4).

0. Fully disagree

10. Fully agree

2.13.2.33 Corruption in the EU (q16_1)

Long tag: qog_perceive_survey17_q16_1

Original tag: Q16_1

Description:

On a 0-10 scale, with <91>0<92> being that <91>there is no corruption<92> and <91>10<92> being that corruption is widespread, how would you rate the European Union?

0. There is no corruption

10. Corruption is widespread

2.13.2.34 Corruption in National Institutions (q16_2)

Long tag: qog_perceive_survey17_q16_2

Original tag: Q16_2

Description:

On a 0-10 scale, with <91>0<92> being that <91>there is no corruption<92> and <91>10<92> being that corruption is widespread, how would you rate (COUNTRY<92>S) national governing institutions?

0. There is no corruption

10. Corruption is widespread

2.13.2.35 Corruption in Regional/Local Institutions (q16_3)

Long tag: qog_perceive_survey17_q16_3

Original tag: Q16_3

Description:
On a 0-10 scale, with <91>0<92> being that <91>there is no corruption<92> and <91>10<92> being that corruption is widespread, how would you rate your regional/local governing institutions?

0. There is no corruption

10. Corruption is widespread

2.13.2.36 Economic Satisfaction (q17)

Long tag: qog_perceive_survey17_q17
Original tag: Q17
Description:
How satisfied are you with the current economic situation in your region today?

1. Very satisfied

2. Somewhat satisfied

3. Somewhat unsatisfied

4. Very unsatisfied

2.13.2.37 Current Economic Conditions vs Past (q18)

Long tag: qog_perceive_survey17_q18
Original tag: Q18
Description:
Compared with (5 years ago), do you think the economy in your region is:

1. Better

2. About the same

3. Worse

2.13.2.38 Classifying Economic Wealth of Region - Control Group (q19_1)

Long tag: qog_perceive_survey17_q19_1
Original tag: Q19_1
Description:
In terms of the per person economic wealth, as in GDP per head, if we were to rank all EU regions from wealthiest to poorest and put them into four equal groups, with group 1 being the wealthiest group and 4 the poorest group, which of the 4 groups do you believe your region is in today?

1. Group 1 (In the wealthiest 25percent of EU regions)

2. Group 2

3. Group 3

4. Group 4 (The poorest 25percent of EU regions)

2.13.2.39 Classifying Economic Wealth of Region - Treatment Group (q19_2)

Long tag: qog_perceive_survey17_q19_2

Original tag: Q19_2

Description:

In terms of the per person economic wealth, as in GDP per head, if we were to rank all EU regions from wealthiest to poorest and put them into four equal groups, with group 1 being the wealthiest group and 4 the poorest group, which of the 4 groups do you believe your region is in today?

1. Group 1 (In the wealthiest 25percent of EU regions)

2. Group 2

3. Group 3

4. Group 4 (The poorest 25percent of EU regions)

The treatment group receives the question and then receives the following information:

"In fact, according to the latest EU data, your region is in the _____ group."

2.13.2.40 Financial Contribution of Your Country to EU Cohesion Policies (treatmentq19)

Long tag: qog_perceive_survey17_treatmentq19

Original tag: treatmentQ19

Description:

As you might have heard, the EU cohesion policy aims to reduce regional differences within the EU in things like economic development, and employment. While all members contribute and receive some funds, the wealthier EU countries generally contribute more and poorer EU regions receive more funding on average.

In your opinion, compared with what it spends today, should (COUNTRY) contribute, more, about the same, or less to this EU policy?

1. More

2. About the same

3. Less

2.13.2.41 Control and Treatment Groups for Q19 (q19combined)

Long tag: qog_perceive_survey17_q19combined

Original tag: Q19Combined

Description:

Was the respondent in the control or treatment group?

0. Control group

1. Treatment group (received info)

2.13.2.42 Classifying Economic Wealth of Region - Combined Responses (info_q19)

Long tag: qog_perceive_survey17_info_q19

Original tag: INFO_Q19

Description:

In terms of the per person economic wealth, as in GDP per head, if we were to rank all EU regions from wealthiest to poorest and put them into four equal groups, with group 1 being the wealthiest group and 4 the poorest group, which of the 4 groups do you believe your region is in today?

1. Group 1 (In the wealthiest 25percent of EU regions)

2. Group 2

3. Group 3

4. Group 4 (The poorest 25percent of EU regions)

Note: This variable reflects the combined responses for q19.1 and q19.2.

2.13.2.43 Actual Economic Wealth of Region (q21)

Long tag: qog_perceive_survey17_q21

Original tag: Q21

Description:

Ranking all EU regions from wealthiest to poorest and put them into four equal groups, with group 1 being the wealthiest group and 4 the poorest group, which of the 4 groups does the region actually belong to?

1. Group 1 (In the wealthiest 25percent of EU regions)

2. Group 2

3. Group 3

4. Group 4 (The poorest 25percent of EU regions)

2.13.2.44 Less Contribution to EU Cohesion Policy - Argument 1 (q22a_1)

Long tag: qog_perceive_survey17_q22a_1

Original tag: Q22A_1

Description:
Could you just tell me on a scale from 0 to 10, where 0 means <93>Not agree at all<94> and 10 means <93>totally agree<94>, as to why you would want (COUNTRY<92>s) contribution to be less?

"The money (COUNTRY) pays would be better spent in (COUNTRY)."

0. Not agree at all

10. Totally agree

Note: Question 22A.1 is only asked the respondents who said the country should contribute less to EU Cohesion Policy.

2.13.2.45 Less Contribution to EU Cohesion Policy - Argument 2 (q22a_2)

Long tag: qog_perceive_survey17_q22a_2

Original tag: Q22A_2

Description:
Could you just tell me on a scale from 0 to 10, where 0 means <93>Not agree at all<94> and 10 means <93>totally agree<94>, as to why you would want (COUNTRY<92>s) contribution to be less?

"The money will be largely wasted due to corruption."

0. Not agree at all

10. Totally agree

Note: Question 22A.2 is only asked the respondents who said the country should contribute less to EU Cohesion Policy.

2.13.2.46 Less Contribution to EU Cohesion Policy - Argument 3 (q22a_3)

Long tag: qog_perceive_survey17_q22a_3

Original tag: Q22A_3

Description:
Could you just tell me on a scale from 0 to 10, where 0 means <93>Not agree at all<94> and 10 means <93>totally agree<94>, as to why you would want (COUNTRY<92>s) contribution to be less?

"The money only ends up helping wealthy EU regions in the end."

0. Not agree at all

10. Totally agree

Note: Question 22A.3 is only asked the respondents who said the country should contribute less to EU Cohesion Policy.

2.13.2.47 Less Contribution to EU Cohesion Policy - Argument 4 (q22a_4)

Long tag: qog_perceive_survey17_q22a_4

Original tag: Q22A_4

Description:

Could you just tell me on a scale from 0 to 10, where 0 means <93>Not agree at all<94> and 10 means <93>totally agree<94>, as to why you would want (COUNTRY<92>s) contribution to be less?

"(COUNTRY) pays too much while other EU countries do not pay their fair share."

0. Not agree at all

10. Totally agree

Note: Question 22A.4 is only asked the respondents who said the country should contribute less to EU Cohesion Policy.

2.13.2.48 Less Contribution to EU Cohesion Policy - Argument 5 (q22a_5)

Long tag: qog_perceive_survey17_q22a_5

Original tag: Q22A_5

Description:

Could you just tell me on a scale from 0 to 10, where 0 means <93>Not agree at all<94> and 10 means <93>totally agree<94>, as to why you would want (COUNTRY<92>s) contribution to be less?

"(COUNTRY) should instead be helping the worlds<92> poorest people, outside of the EU."

0. Not agree at all

10. Totally agree

Note: Question 22A.5 is only asked the respondents who said the country should contribute less to EU Cohesion Policy.

2.13.2.49 Same/More Contribution to EU Cohesion Policy - Argument 1 (q22b_1)

Long tag: qog_perceive_survey17_q22b_1

Original tag: Q22B_1

Description:

Could you just tell me on a scale from 0 to 10, where 0 means <93>Not agree at all<94> and 10 means <93>totally agree<94>, as to why you would want (COUNTRY<92>s) contribution to be (more/about the same)?

"It is in (COUNTRY<92>s) interest to invest in poorer regions."

0. Not agree at all

10. Totally agree

Note: Question 22B.1 is only asked the respondents who said the country should contribute about the same or more to EU Cohesion Policy.

2.13.2.50 Same/More Contribution to EU Cohesion Policy - Argument 2 (q22b_2)

Long tag: qog_perceive_survey17_q22b_2

Original tag: Q22B_2

Description:

Could you just tell me on a scale from 0 to 10, where 0 means <93>Not agree at all<94> and 10 means <93>totally agree<94>, as to why you would want (COUNTRY<92>s) contribution to be (more/about the same)?

"It benefits everyone in the EU to invest in poorer regions."

0. Not agree at all

10. Totally agree

Note: Question 22B.2 is only asked the respondents who said the country should contribute about the same or more to EU Cohesion Policy.

2.13.2.51 Same/More Contribution to EU Cohesion Policy - Argument 3 (q22b_3)

Long tag: qog_perceive_survey17_q22b_3

Original tag: Q22B_3

Description:

Could you just tell me on a scale from 0 to 10, where 0 means <93>Not agree at all<94> and 10 means <93>totally agree<94>, as to why you would want (COUNTRY<92>s) contribution to be (more/about the same)?

<93>(COUNTRY) has a humanitarian obligation to end poverty throughout the EU."

0. Not agree at all

10. Totally agree

Note: Question 22B.3 is only asked the respondents who said the country should contribute about the same or more to EU Cohesion Policy.

2.13.2.52 BREXIT Vote (UK Only) (ukq1)

Long tag: qog_perceive_survey17_ukq1

Original tag: UKQ1

Description:

What did you vote in the BREXIT referendum?

1. Remain

2. Leave

3. Didn<92>t vote

4. Refused

Note: This question was a part of the UK Survey only - in lieu of q8.

2.13.2.53 Current choice on BREXIT (ukq2)

Long tag: qog_perceive_survey17_ukq2

Original tag: UKQ2

Description:

If the BREXIT referendum were held today, how would you vote?

1. Remain
2. Leave
3. Didn<92>t vote
4. Refused

2.13.2.54 Support for EU Cohesion Policy (q20)

Long tag: qog_perceive_survey17_psweight

Original tag: PSweight

Description:

As you might have heard, the EU cohesion policy aims to reduce regional differences within the EU in things like economic development, and employment. While all members contribute and receive some funds, the wealthier EU countries generally contribute more and poorer EU regions receive more funding on average.

In your opinion, should the EU continue this policy, where wealthier countries contribute more, and poorer EU regions receive more funding?

1. Strongly agree
2. Agree
3. Disagree
4. Strongly disagree
99. Don<b4>t know

2.13.3 Demographic Variables

Variables in this section provide demographic information about the respondent.

2.13.3.1 Gender of Respondent (d1)

Long tag: qog_perceive_survey17_d1

Original tag: D1

Description:

Gender of the respondent.

0. Male

1. Female

2.13.3.2 Education of respondent (d2)

Long tag: qog_perceive_survey17_d2
Original tag: D2
Description:
Please tell me what is the highest level in school you have completed?

1. Elementary (primary) school or less (no diploma)

2. High (secondary) school (but did not graduated from it)

3. Graduation from high (secondary) school

4. Graduation from college, university or other third-level institute

5. Post-graduate degree (Masters, PhD) beyond your initial college degree

99. (Don<92>t know/Refused)

2.13.3.3 Education of respondent, recoded (d2recoded)

Long tag: qog_perceive_survey17_d2recoded
Original tag: D2recoded
Description:
What is the highest level in school you have completed?

1. Elementary, secondary school, or less

2. Graduation from high (secondary) school

3. Graduation from college, university or other third-level institute

4. Post-graduate degree (Masters, PhD) beyond your initial college degree

2.13.3.4 Age of Respondent (d3)

Long tag: qog_perceive_survey17_d3
Original tag: D3
Description:
Age of the respondent, 999 if refused.

2.13.3.5 Age of Respondent, recoded (d3recoded)

Long tag: qog_perceive_survey17_d3recoded
Original tag: D3recoded
Description:
Recoded categories for the age of respondents.

1. 18-29

2. 30-49

3. 50-64

4. 65+

2.13.3.6 Residency (d4)

Long tag: qog_perceive_survey17_d4

Original tag: D4

Description:

About how many years have you lived in the area where the interview was conducted?

999 if refused to answer.

2.13.3.7 Employment, binary (d5a)

Long tag: qog_perceive_survey17_d5a

Original tag: D5A

Description:

Are you currently in an employment situation?

1. Yes

2. No

2.13.3.8 Unemployment, detailed (d5b)

Long tag: qog_perceive_survey17_d5b

Original tag: D5B

Description:

If the respondent is not employed, what is your current status?

1. Currently unemployed

2. Housewife / Houseman

3. Pensioner, retired

4. Pupil / Student / Trainee

5. Other

2.13.3.9 Employment, sector (d5c)

Long tag: qog_perceive_survey17_d5c

Original tag: D5C

Description:

Do you work in the public or private sector?

1. Public sector

2. Private sector

2.13.3.10 Type of Employment (d5d)

Long tag: qog_perceive_survey17_d5d
Original tag: D5D
Description:
Do you work full time or part time?

1) Full time

2) Part time

2.13.3.11 Private Sector Employment, detailed (d5e)

Long tag: qog_perceive_survey17_d5e
Original tag: D5E
Description:
Are you <93>self-employed/small business owner/freelancer<94> or <93>a private sector employee<94>?

1. Self-employed/small business owner/freelancer

2. Other private sector employee

2.13.3.12 Employment, combined categories (d5recoded)

Long tag: qog_perceive_survey17_d5recoded
Original tag: D5recoded
Description:
Combined categories from employment questions.

1. Public sector

2. Private sector

3. Self-employed

4. Unemployed

5. Housewife/Houseman

6. Pensioner, retired

7. Student / Trainee

8. Other

2.13.3.13 Population (d6)

Long tag: qog_perceive_survey17_d6

Original tag: D6

Description:

About how many people live in the place the interview was conducted?

1. Less than 10,000 (rural)

2. 10,000-100,000 (small town or city)

3. 100,000-1,000,000 (large city or urban area)

4. Greater than 1,000,000 (Very large city or urban area)

99. (Don<92>t know/Refused)

2.13.3.14 Household Income (d7)

Long tag: qog_perceive_survey17_d7

Original tag: D7

Description:

Average total household net income per month (after taxes, in local currency).

Don<b4>t know/refused is coded as 999.

2.13.3.15 Household Income, categorical (d7b)

Long tag: qog_perceive_survey17_d7b

Original tag: D7B

Description:

Categorical variable for average total household net income per month (after taxes, in local currency).

Don<b4>t know/refused is coded as 999.

2.13.3.16 Household Income, recoded (d7recoded)

Long tag: qog_perceive_survey17_d7recoded

Original tag: D7recoded

Description:

Level of income, recoded.

1. Low

2. Medium

3. High

99. "Don<92>t know/Refused"

2.13.4 Weights

NA

2.13.4.1 Design Weight (dweight)

Long tag: qog_perceive_survey17_dweight

Original tag: Dweight

Description:

Design weight, regional proportion of the population within countries. Design weights are included to compensate for the fact that certain people have a higher or lower likelihood of being selected for the survey than others.

The Dweight is equal to (Population size aged 18 years and above in RegionX in CountryY) / (Net sample size of RegionX in CountryY). It, therefore, has a mean value of <91>1<92> in each country. In all cases but Germany, Sweden, and the UK (which use NUTS1) NUTS 2 weights are applied.

2.13.4.2 Iweight (iweight)

Long tag: qog_perceive_survey17_iweight

Original tag: Iweight

Description:

Age and gender weight by region. Population data is taken from Eurostat for all countries. Cross-tabulations from the population data were then collected and put together for each country and region and were compared with that of the cross-tabulations in the sample. The Iweights were calculated based on differences between the sample and population cells, such that demographic groups (older males for example) that were over (under) sampled relative to the population receive a lower (higher) weight.

2.13.4.3 Population Weight (pweight)

Long tag: qog_perceive_survey17_pweight

Original tag: Pweight

Description:

Population weight for multi-country aggregation. The population weight is included for comparisons across countries and is included to adjust for a country<92>s proportion in the sample relative to its actual population of the total population of all countries in the survey. The weights are thus at the country level and do not need to be included for single country, regional level analyses or analyses where comparing country averages of certain survey items are of interest where the country-level is the primary unit of comparison. However, in obtaining sample-wide (or EU-wide) means or proportions, it is recommended to use the population weights.

The Pweight helps to correct for any potential bias in obtaining means, proportion, etc when combining data from two or more countries. Without the Pweight, the researcher risks (most often) over-represent smaller countries at the expense of larger ones. The Pweight thus is included to adjust so that every country is represented in relative proportion to its population size of the countries in the sample for each year.

The population size weight is calculated as PWEIGHT= (Population size aged 18 years and above)/(Net sample size in the country). Population data of the population is taken from Eurostat for the year 2016.

2.13.4.4 Post-stratification weight (psweight)

Long tag: qog_perceive_survey17_q20

Original tag: Q20

Description:

The PSweights are a combination of the design weights and the individual level weight. PSweights are recommended when comparing means, proportions, etc. across regions and/or countries to correct for

sampling issues, in particular when comparing regions within countries with a select region which is over-sampled. However, for more sophisticated, multilevel statistical analyses, the researcher can/should include additional demographic controls as independent variables in the model, such as income or age for example.

2.14 QoG Politics, Institutions and Services in Swedish Municipalities

Dataset tag: qog_pol_mun

Description: This dataset consists of all the 290 Swedish municipalities between 1980 and 2015. The dataset contains, for example, information about the population in the municipality; information about welfare services, such as education and elder care; citizens satisfaction with services; election results; political organization; the municipal economy; and other information.

Dataset citation: Dahlström, Carl Maria Tyrberg (2016). Politics, Institutions and Services in Swedish Municipalities, 1980-2015, version 01April2016. University of Gothenburg: The Quality of Government Institute, https://www.gu.se/en/quality-government

License: The QoG datasets are open and available, free of charge and without a need to register your data. You can use them for your analysis, graphs, teaching, and other academic-related and non-commercial purposes. We ask our users to cite always the original source(s) of the data and our datasets.

We do not allow other uses of these data including but not limited to redistribution, commercialization and other for-profit usage. If a user is interested in such use or has doubts about the license, they will have to refer to the original source and check with them if this is allowed and what requirements they need to fulfill.

Be mindful that the original data sources are the only owners of their data and they can adjust their license without previous warning.

More detailed information on the dataset can be found at the following web page: `https://www.gu.se/en/quality-government/qog-data/data-downloads/politics-institutions-and-services-in-swedish-municipalities`

2.14.1 Unique Identification Variables

These variables uniquely identify the observations in the dataset.

2.14.1.1 Municipal Code (municipalcode)

Long tag: qog_pol_mun_municipalcode

Original tag: municipalcode

Description:
Unique municipal code.

2.14.1.2 Municipality name (municipality)

Long tag: qog_pol_mun_municipality

Original tag: municipality

Description:
Unique municipal name.

2.14.1.3 Year (year)

Long tag: qog_pol_mun_year

Original tag: year

Description:
Year

2.14.1.4 ID code for spmap (spmapid)

Long tag: qog_pol_mun_spmapid

Original tag: spmapid

Description:
ID code for spmap

Spmap is a command for creating maps in Stata. For more information about spmap please visit www.stata.com.

The municipality coordinates needed for creating the maps can be

downloaded here: http://www.qogdata.pol.gu.se/spmap/spmap_qog_municpality.dta.

Note: Gathered from The QoG Dataset of Swedish Municipalities, version 15Jan14. Original variable name: spmapid.

2.14.2 Municipality Information

These variables privide information on the municipality.

2.14.2.1 Municipality group (mungroup)

Long tag: qog_pol_mun_mungroup

Original tag: mungroup

Description:

Municipality group

1 = Metropolitan

2 = Suburban municipality to metropolitan

3 = Major city

4 = Suburban municipality to major city

5 = Commuter suburbs

6 = Tourism municipality

7 = Goods producing municipality

8 = Rural municipality

9 = Municipality in densely populated region

10 = Municipality in sparsely populated region

Source: SCB (www.scb.se)

Note: Gathered from The QoG Dataset of Swedish Municipalities, version 15Jan14. Original variable name: mungroup.

2.14.2.2 Neighbouring Municipality 1-11 (munneigh1)

Long tag: qog_pol_mun_munneigh1

Original tag: munneigh1

Description:

Neighbouring Municipality (1-11)

2.14.3 Population

These variables provide information on the population in each minicipality, such as on the share of the population having obtained highschool education, or on the share of population with a foreign background.

2.14.3.1 Share of population with low trust in others (percent) (kol_trust)

Long tag: qog_pol_mun_kol_trust

Original tag: kol_trust

Description:

The result is based on the following surveys: H<e4>lsa p<e5> lika villkor (Statens folkh<e4>lsoinstut), Liv och h<e4>lsa, Folkh<e4>lsa i Sk<e5>ne, H<e4>lsoenk<e4>t Stockholms l<e4>n. Question posed: "In general, do you think you can trust most people?". The indicator shows low trust, i.e. the share of respondents (age 16-84) that responded "no" to the question. Source: Kolada (www.kolada.se)

2007-2014

2.14.3.2 Long-term unemployment (percent) (kol_unemp)

Long tag: qog_pol_mun_kol_unemp

Original tag: kol_unemp

Description:

Number of people within the municipality aged 25-64 unemployed or in program with activity support (aktivitetsst<f6>d) for at least six months, divided by total municipal population

Source: Kolada (www.kolada.se)

2006-2015.

2.14.3.3 Educational level: High school (3 years) (scb_eduhs)

Long tag: qog_pol_mun_scb_eduhs

Original tag: scb_eduhs

Description:

EDUCATIONAL LEVEL, MUNICIPAL POPULATION:

Number of people with high school education (3 years).

Source: SCB (www.scb.se) 1985-2014.

2.14.3.4 Educational level: Post-secondary (less than 3 years) (scb_edups1)

Long tag: qog_pol_mun_scb_edups1

Original tag: scb_edups1

Description:

EDUCATIONAL LEVEL, MUNICIPAL POPULATION:

Number of people with post-secondary education (less than 3 years).

Source: SCB (www.scb.se) 1985-2014.

2.14.3.5 Educational level: Post-secondary (3 years or more) (scb_edups2)

Long tag: qog_pol_mun_scb_edups2

Original tag: scb_edups2

Description:
EDUCATIONAL LEVEL, MUNICIPAL POPULATION:

Number of people with post-secondary education (3 years or more).

Source: SCB (www.scb.se) 1985-2014.

2.14.3.6 Educational level: Post graduate studies (scb_edupd)

Long tag: qog_pol_mun_scb_edupd

Original tag: scb_edupd

Description:
EDUCATIONAL LEVEL, MUNICIPAL POPULATION:

Number of people with post graduate education.

Source: SCB (www.scb.se) 1985-2014.

2.14.3.7 Share of population with high education (percent) (scb_eduper)

Long tag: qog_pol_mun_scb_eduper

Original tag: scb_eduper

Description:
High education = 3 years post-secondary education or more, including post graduate studies. (Created variable)

Source: SCB (www.scb.se) 1985-2014.

2.14.3.8 Foreign Background (percent of total population) (scb_forbg)

Long tag: qog_pol_mun_scb_forbg

Original tag: scb_forbg

Description:
Foreign Background (percent of total population)

Source: SCB (www.scb.se)

2011

Note: Gathered from The QoG Dataset of Swedish Municipalities, version 15Jan14. Original variable name: pop_foreignbg.

2.14.3.9 Number of foreign born in municipal population (scb_forborn1)

Long tag: qog_pol_mun_scb_forborn1

Original tag: scb_forborn1

Description:
Number of foreign born in municipal population

2.14.3.10 Share of municipal population that are foreign born (percent) (scb_forborn2)

Long tag: qog_pol_mun_scb_forborn2

Original tag: scb_forborn2

Description:
Share of municipal population that are foreign born (percent) (created variable)

Source: SCB (www.scb.se)

2001-2014.

2.14.3.11 Number of people with foreign citizenship (scb_forcit1)

Long tag: qog_pol_mun_scb_forcit1

Original tag: scb_forcit1

Description:

Number of people with foreign citizenship.

Source: SCB (www.scb.se)

1980-2014.

2.14.3.12 Share of population with foreign citizenship (scb_forcit2)

Long tag: qog_pol_mun_scb_forcit2

Original tag: scb_forcit2

Description:

Share of population with foreign citizenship (created variable) Source: SCB (www.scb.se)

1980-2014.

2.14.3.13 Median income: female population (scb_incmedfem)

Long tag: qog_pol_mun_scb_incmedfem

Original tag: scb_incmedfem

Description:

MEDIAN INCOME IN MUNICIPALITY:

Female population.

Source: SCB (www.scb.se) 2011

Note: Gathered from The QoG Dataset of Swedish Municipalities, version 15Jan14. Original variable names: incmed_female, incmed_male, incmed_total.

2.14.3.14 Median income: male population (scb_incmedmal)

Long tag: qog_pol_mun_scb_incmedmal

Original tag: scb_incmedmal

Description:

MEDIAN INCOME IN MUNICIPALITY:

Male population.

Source: SCB (www.scb.se) 2011

Note: Gathered from The QoG Dataset of Swedish Municipalities, version 15Jan14. Original variable names: incmed_female, incmed_male, incmed_total.

2.14.3.15 Median income: total population (scb_incmedtot)

Long tag: qog_pol_mun_scb_incmedtot

Original tag: scb_incmedtot

Description:

MEDIAN INCOME IN MUNICIPALITY:

Total population.

Source: SCB (www.scb.se) 2011

Note: Gathered from The QoG Dataset of Swedish Municipalities, version 15Jan14. Original variable names: incmed_female, incmed_male, incmed_total.

2.14.3.16 Mean income, municipal citizens (scb_incmean)

Long tag: qog_pol_mun_scb_incmean

Original tag: scb_incmean

Description:

Mean income, municipal citizens

Citizens 16 years and older, in 1000 SEK Source: SCB (www.scb.se)

1991-2013.

2.14.3.17 Average life expectancy, men (scb_lifexpmen)

Long tag: qog_pol_mun_scb_lifexpmen

Original tag: scb_lifexpmen

Description:

Average life expectancy, men.

Remaining average life expectancy, from 0 years old. Source: SCB (www.scb.se)

2010-2014.

2.14.3.18 Average life expectancy, women (scb_lifexpwom)

Long tag: qog_pol_mun_scb_lifexpwom

Original tag: scb_lifexpwom

Description:

Average life expectancy, women

Remaining average life expectancy, from 0 years old. Source: SCB (www.scb.se)

2010-2014.

2.14.3.19 Mean age of population (scb_meanage)

Long tag: qog_pol_mun_scb_meanage

Original tag: scb_meanage

Description:

Mean age of population

Source: SCB (www.scb.se)

2011

Note: Gathered from The QoG Dataset of Swedish Municipalities, version 15Jan14. Original variable name: pop_meanage.

2.14.3.20 Net births (scb_netbirth)

Long tag: qog_pol_mun_scb_netbirth

Original tag: scb_netbirth

Description:

Net births

Source: SCB (www.scb.se)

2011

Note: Gathered from The QoG Dataset of Swedish Municipalities, version 15Jan14. Original variable name: pop_netbirth.

2.14.3.21 Net migrants (scb_netmig)

Long tag: qog_pol_mun_scb_netmig

Original tag: scb_netmig

Description:
Net migrants

Source: SCB (www.scb.se)

2011

Note: Gathered from The QoG Dataset of Swedish Municipalities, version 15Jan14. Original variable name: pop_migrant.

2.14.3.22 Population (scb_pop)

Long tag: qog_pol_mun_scb_pop

Original tag: scb_pop

Description:
Population:

Total municipal population Source: SCB (www.scb.se) 1974-2014.

2.14.3.23 Population increase in total numbers (scb_popinc1)

Long tag: qog_pol_mun_scb_popinc1

Original tag: scb_popinc1

Description:
Population increase in total numbers.

Source: SCB (www.scb.se)

1974-2014.

2.14.3.24 Population increase in percent (percent) (created variable) (scb_popinc2)

Long tag: qog_pol_mun_scb_popinc2

Original tag: scb_popinc2

Description:
Population increase in percent (percent) (created variable).

Source: SCB (www.scb.se)

1974-2014

2.14.3.25 Population 0-17 years (percent of total population) (scb_pop017)

Long tag: qog_pol_mun_scb_pop017

Original tag: scb_pop017

Description:
Population 0-17 years (percent of total population)

Source: SCB (www.scb.se)

2011

Note: Gathered from The QoG Dataset of Swedish Municipalities, version 15Jan14. Original variable name: pop_017.

2.14.3.26 Population 18-64 years (percent of total population) (scb_pop1864)

Long tag: qog_pol_mun_scb_pop1864

Original tag: scb_pop1864

Description:

Population 18-64 years (percent of total population)

Source: SCB (www.scb.se)

2011

Note: Gathered from The QoG Dataset of Swedish Municipalities, version 15Jan14. Original variable name: pop_1864.

2.14.3.27 Population 65+ years (percent of total population) (scb_pop65)

Long tag: qog_pol_mun_scb_pop65

Original tag: scb_pop65

Description:

Population 65+ years (percent of total population)

Source: SCB (www.scb.se)

2011

Note: Gathered from The QoG Dataset of Swedish Municipalities, version 15Jan14. Original variable name: pop_65.

2.14.3.28 Number of emigrants (scb_popem)

Long tag: qog_pol_mun_scb_popem

Original tag: scb_popem

Description:

Number of emigrants

Source: SCB (www.scb.se)

2011

Note: Gathered from The QoG Dataset of Swedish Municipalities, version 15Jan14. Original variable name: pop_emigrant.

2.14.3.29 Female population (percent of total population) (scb_popfem)

Long tag: qog_pol_mun_scb_popfem

Original tag: scb_popfem

Description:

Female population (percent of total population)

Source: SCB (www.scb.se)

2011

Note: Gathered from The QoG Dataset of Swedish Municipalities, version 15Jan14. Original variable name: pop_female.

2.14.3.30 Male Population (percent of total population) (scb_popmale)

Long tag: qog_pol_mun_scb_popmale

Original tag: scb_popmale

Description:

Male Population (percent of total population)

Source: SCB (www.scb.se)

2011

Note: Gathered from The QoG Dataset of Swedish Municipalities, version 15Jan14. Original variable name: pop_male.

2.14.3.31 Students continuing from high school to college (sv_coll)

Long tag: qog_pol_mun_sv_coll

Original tag: sv_coll

Description:

Share of students in municipality that have continued to college within 3 years after finished high school studies (percent)

Source: Skolverket (www.skolverket.se)

1992-2014

Note from source: The transition frequency is strikingly high 1998. This is due to the fact that fewer students received upper secondary school leaving certificate from vocational program in the spring of 1995 compared to other years.

2.14.4 Education and Child Care

Variables in this section provide information on e.g. the share of children on primary or secondary school in the municipality.

2.14.4.1 Number of students in elementary schools (situated in the municipality) (kol_esmun)

Long tag: qog_pol_mun_kol_esmun

Original tag: kol_esmun

Description:

Municipal elementary school

2.14.4.2 Number of students in elementary schools: Free-standing elementary school (kol_espr1)

Long tag: qog_pol_mun_kol_espr1

Original tag: kol_espr1

Description:

Number of students in elementary schools (situated in the municipality): Free-standing elementary school.

Source: Kolada (www.kolada.se)

2005-2014.

2.14.4.3 Share of students in free-standing elementary schools (percent) (kol_espr2)

Long tag: qog_pol_mun_kol_espr2

Original tag: kol_espr2

Description:
Number of students in elementary schools (situated in the municipality):

Share of students in free-standing elementary schools (percent) (created variable).

Source: Kolada (www.kolada.se)

2005-2014.

2.14.4.4 Total number of students (kol_estot)

Long tag: qog_pol_mun_kol_estot

Original tag: kol_estot

Description:
Number of students in elementary schools (situated in the municipality): Total number of students (created variable).

Source: Kolada (www.kolada.se)

2005-2014.

2.14.4.5 Share of children in private child care: After-school care (percent) (scb_prasc)

Long tag: qog_pol_mun_scb_prasc

Original tag: scb_prasc

Description:
Share of children in private child care: After-school care (percent).

Source: SCB (www.scb.se) 2000-2013.

2.14.4.6 Share of children in private child care: All kinds of child care included (percent) (scb_prchtot)

Long tag: qog_pol_mun_scb_prchtot

Original tag: scb_prchtot

Description:
Share of children in private child care: All kinds of child care included (percent).

Source: SCB (www.scb.se) 2000-2013.

2.14.4.7 Share of children in private child care: Pre-school (percent) (scb_prps)

Long tag: qog_pol_mun_scb_prps

Original tag: scb_prps

Description:
Share of children in private child care: Pre-school (percent).

Source: SCB (www.scb.se) 2000-2013.

2.14.4.8 Share of children in private child care: Pedagogic care (percent) (scb_prpc)

Long tag: qog_pol_mun_scb_prpc

Original tag: scb_prpc

Description:
Share of children in private child care: Pedagogic care (percent). Source: SCB (www.scb.se) 2000-2013.

2.14.4.9 Grades, school year 9 (sv_ames)

Long tag: qog_pol_mun_sv_ames

Original tag: sv_ames

Description:
Grades, school year 9

Average merit rating, all students included. Maximum merit rating = 320 points.

Source: Skolverket (www.skolverket.se)

1998-2015

2.14.4.10 Grades, high school graduates (sv_amhs)

Long tag: qog_pol_mun_sv_amhs

Original tag: sv_amhs

Description:

Grades, high school graduates

Average grade points, students with high school degree. Concerns the municipality where the school is located.

Source: Skolverket (www.skolverket.se)

2014.

2.14.4.11 Share of high school students graduating within 3 years (percent) (sv_grad)

Long tag: qog_pol_mun_sv_grad

Original tag: sv_grad

Description:

Share of high school students graduating within 3 years (percent)

Includes all students that started high school education for the first time, three years before 2014. Concerns the municipality where the school is located.

Source: Skolverket (www.skolverket.se) 2014.

2.14.4.12 Number of students in high schools: Private principals (sv_hspr1)

Long tag: qog_pol_mun_sv_hspr1

Original tag: sv_hspr1

Description:

Number of students in high schools: Private principals.

Source: Skolverket (www.skolverket.se)

2007-2014.

2.14.4.13 Number of students in high schools: Share of students in high schools run by private initiatives (percent). (sv_hspr2)

Long tag: qog_pol_mun_sv_hspr2

Original tag: sv_hspr2

Description:

Number of students in high schools: Share of students in high schools run by private initiatives (percent).

Source: Skolverket (www.skolverket.se)

2007-2014.

2.14.4.14 Number of students in high schools: All principals, total number (sv_hstot)

Long tag: qog_pol_mun_sv_hstot

Original tag: sv_hstot

Description:
Number of students in high schools: All principals, total number.

Source: Skolverket (www.skolverket.se)

2007-2014.

2.14.4.15 Share of children in pre-school run by private principals (percent) (sv_prps)

Long tag: qog_pol_mun_sv_prps
Original tag: sv_prps
Description:
Share of children in pre-school run by private principals (percent)

Source: Skolverket (www.skolverket.se)

1997-2014

Note from source: Skolverket classify private principals as pre-schools where the municipality has the overall responsibility but are run by another principal.

2.14.5 Elderly Care

Variables in this section provide information on elderly care in the municipality.

2.14.5.1 Number of persons aged 65 and older in ordinarily housing, granted home care/assisted living: in total (soc_hoctot)

Long tag: qog_pol_mun_soc_hoctot
Original tag: soc_hoctot
Description:
Number of persons aged 65 and older in ordinarily housing, granted home care/assisted living: in total.

Source: Socialstyrelsen (www.socialstyrelsen.se) 2009-2014.

2.14.5.2 Number of persons aged 65 and older in ordinarily housing, granted home care/assisted living: in privately run home care. (soc_hocpr1)

Long tag: qog_pol_mun_soc_hocpr1
Original tag: soc_hocpr1
Description:
Number of persons aged 65 and older in ordinarily housing, granted home care/assisted living: in privately run home care.

Source: Socialstyrelsen (www.socialstyrelsen.se) 2009-2014.

2.14.5.3 Number of persons aged 65 and older in ordinarily housing, granted home care/assisted living: share in privately run home care (percent) (soc_hocpr2)

Long tag: qog_pol_mun_soc_hocpr2
Original tag: soc_hocpr2
Description:
Number of persons aged 65 and older in ordinarily housing, granted home care/assisted living: share in privately run home care (percent).

Source: Socialstyrelsen (www.socialstyrelsen.se) 2009-2014.

2.14.6 Integration

Variables in this section provide information on the state of integration on the municipality.

2.14.6.1 Share of SFI students that passed highest course (percent) (kol_sfi)

Long tag: qog_pol_mun_kol_sfi

Original tag: kol_sfi

Description:

Share of SFI students that passed highest course (percent).

Swedish for immigrant, courses offered by the municipality to adult immigrants.

Source: Kolada (www.kolada.se) 2013-2014.

2.14.6.2 Share of population in long-term unemployment, born in foreign country (excluding EU/EFTA) (percent) (scb_unempfor)

Long tag: qog_pol_mun_scb_unempfor

Original tag: scb_unempfor

Description:

Share of population in long-term unemployment, born in foreign country (excluding EU/EFTA) (percent).

Share of foreign born municipal population aged 20-64 unemployed, for at least 100 days (if under 25 years) or six months (if 25+ years).

Source: SCB (www.scb.se) 1997-2014.

2.14.7 Citizen Contact with Municipality

Variables in this section provide information on how much contact citizens have with the municipality.

2.14.7.1 Share of citizens experiencing positive treatment when contacting the municipality with an easy question (percent) (kol_cont)

Long tag: qog_pol_mun_kol_cont

Original tag: kol_cont

Description:

Share of citizens experiencing positive treatment when contacting the municipality with an easy question (percent).

Survey carried out by an external company. A subjective judgement is made by the questioner, based on three levels; good, average and bad.

Source: Kolada (www.kolada.se) 2007-2014.

2.14.7.2 Share of people getting response to an easy question within two days when e-mailing municipality (percent) (kol_resp1)

Long tag: qog_pol_mun_kol_resp1

Original tag: kol_resp1

Description:

Share of people getting response to an easy question within two days when e-mailing municipality (percent).

Survey carried out by an external company. The questions are sent to the central e-mail address of the municipality. Time is measured in working days, from when the request has been received to when a reply has been sent.

Source: Kolada (www.kolada.se), 2007-2014.

2.14.7.3 Share of people getting a direct reply to an easy question when calling the municipality (percent) (kol_resp2)

Long tag: qog_pol_mun_kol_resp2

Original tag: kol_resp2

Description:

Share of people getting a direct reply to an easy question when calling the municipality (percent).

Survey carried out by an external company. A number of relevant and easy questions are asked via telephone to the municipality, through their switch board, during a set period.

Source: Kolada (www.kolada.se), 2007-2014.

2.14.8 Citizen Satisfaction with Service Delivery

Index showing citizens' judgement regarding service delivery in the municipality. Scale 1-100, where higher values = higher satisfaction. The respondents are asked their opinion of one or several aspects within each area, which are then added into a total index. Source: SCB's citizen survey, compiled by SCB (`www.scb.se`) and Kolada (`www.kolada.se`).

2.14.8.1 Citizen satisfaction with service delivery: Culture (indcult)

Long tag: qog_pol_mun_indcult

Original tag: indcult

Description:
Citizen satisfaction with service delivery: Culture. 2006-2015.

Index showing citizens' judgement regarding service delivery in the municipality. Scale 1-100, where higher values = higher satisfaction. The respondents are asked their opinion of one or several aspects within each area, which are then added into a total index. Source: SCB's citizen survey, compiled by SCB (www.scb.se) and Kolada (www.kolada.se).

2.14.8.2 Citizen satisfaction with service delivery: Elderly care (indec)

Long tag: qog_pol_mun_indec

Original tag: indec

Description:
Citizen satisfaction with service delivery: Elderly care. 2005-2015.

Index showing citizens' judgement regarding service delivery in the municipality. Scale 1-100, where higher values = higher satisfaction. The respondents are asked their opinion of one or several aspects within each area, which are then added into a total index. Source: SCB's citizen survey, compiled by SCB (www.scb.se) and Kolada (www.kolada.se).

2.14.8.3 Citizen satisfaction with service delivery: Emergency service (indems)

Long tag: qog_pol_mun_indems

Original tag: indems

Description:
Citizen satisfaction with service delivery: Emergency service. 2005-2015.

Index showing citizens' judgement regarding service delivery in the municipality. Scale 1-100, where higher values = higher satisfaction. The respondents are asked their opinion of one or several aspects within each area, which are then added into a total index. Source: SCB's citizen survey, compiled by SCB (www.scb.se) and Kolada (www.kolada.se).

2.14.8.4 Citizen satisfaction with service delivery: Environmental work (indenv)

Long tag: qog_pol_mun_indenv

Original tag: indenv

Description:
Citizen satisfaction with service delivery: Environmental work. 2006-2015.

Index showing citizens' judgement regarding service delivery in the municipality. Scale 1-100, where higher values = higher satisfaction. The respondents are asked their opinion of one or several aspects within each area, which are then added into a total index. Source: SCB's citizen survey, compiled by SCB (www.scb.se) and Kolada (www.kolada.se).

2.14.8.5 Citizen satisfaction with service delivery: Elementary school (indes)

Long tag: qog_pol_mun_indes

Original tag: indes

Description:

Citizen satisfaction with service delivery: Elementary school. 2005-2015

Index showing citizens' judgement regarding service delivery in the municipality. Scale 1-100, where higher values = higher satisfaction. The respondents are asked their opinion of one or several aspects within each area, which are then added into a total index. Source: SCB's citizen survey, compiled by SCB (www.scb.se) and Kolada (www.kolada.se).

2.14.8.6 Citizen satisfaction with service delivery: High school (indhs)

Long tag: qog_pol_mun_indhs

Original tag: indhs

Description:

Citizen satisfaction with service delivery: High school. 2005-2015.

Index showing citizens' judgement regarding service delivery in the municipality. Scale 1-100, where higher values = higher satisfaction. The respondents are asked their opinion of one or several aspects within each area, which are then added into a total index. Source: SCB's citizen survey, compiled by SCB (www.scb.se) and Kolada (www.kolada.se).

2.14.8.7 Citizen satisfaction with service delivery: Pre-school (indps)

Long tag: qog_pol_mun_indps

Original tag: indps

Description:

Citizen satisfaction with service delivery: Pre-school. 2005-2015.

Index showing citizens' judgement regarding service delivery in the municipality. Scale 1-100, where higher values = higher satisfaction. The respondents are asked their opinion of one or several aspects within each area, which are then added into a total index. Source: SCB's citizen survey, compiled by SCB (www.scb.se) and Kolada (www.kolada.se).

2.14.8.8 Citizen satisfaction with service delivery: Waste disposal and refuse collection (indrec)

Long tag: qog_pol_mun_indrec

Original tag: indrec

Description:

Citizen satisfaction with service delivery: Waste disposal and refuse collection. 2006-2015.

Index showing citizens' judgement regarding service delivery in the municipality. Scale 1-100, where higher values = higher satisfaction. The respondents are asked their opinion of one or several aspects within each area, which are then added into a total index. Source: SCB's citizen survey, compiled by SCB (www.scb.se) and Kolada (www.kolada.se).

2.14.8.9 Citizen satisfaction with service delivery: Streets and roads (indroad)

Long tag: qog_pol_mun_indroad

Original tag: indroad

Description:
Citizen satisfaction with service delivery: Streets and roads. 2006-2015.

Index showing citizens' judgement regarding service delivery in the municipality. Scale 1-100, where higher values = higher satisfaction. The respondents are asked their opinion of one or several aspects within each area, which are then added into a total index. Source: SCB's citizen survey, compiled by SCB (www.scb.se) and Kolada (www.kolada.se).

2.14.8.10 Citizen satisfaction with service delivery: Sport grounds (indsp)

Long tag: qog_pol_mun_indsp

Original tag: indsp

Description:
Citizen satisfaction with service delivery: Sport grounds. 2010-2015.

Index showing citizens' judgement regarding service delivery in the municipality. Scale 1-100, where higher values = higher satisfaction. The respondents are asked their opinion of one or several aspects within each area, which are then added into a total index. Source: SCB's citizen survey, compiled by SCB (www.scb.se) and Kolada (www.kolada.se).

2.14.8.11 Citizen satisfaction with service delivery: Sidewalks and cycle paths (indsw)

Long tag: qog_pol_mun_indsw

Original tag: indsw

Description:
Citizen satisfaction with service delivery: Sidewalks and cycle paths. 2006-2015.

Index showing citizens' judgement regarding service delivery in the municipality. Scale 1-100, where higher values = higher satisfaction. The respondents are asked their opinion of one or several aspects within each area, which are then added into a total index. Source: SCB's citizen survey, compiled by SCB (www.scb.se) and Kolada (www.kolada.se).

2.14.8.12 Citizen satisfaction with service delivery: Treatment and availability (indtr)

Long tag: qog_pol_mun_indtr

Original tag: indtr

Description:
Citizen satisfaction with service delivery: Treatment and availability. 2006-2015.

Index showing citizens' judgement regarding service delivery in the municipality. Scale 1-100, where higher values = higher satisfaction. The respondents are asked their opinion of one or several aspects within each area, which are then added into a total index. Source: SCB's citizen survey, compiled by SCB (www.scb.se) and Kolada (www.kolada.se).

2.14.8.13 Citizen satisfaction with service delivery: Support for vulnerable groups (indvul)

Long tag: qog_pol_mun_indvul

Original tag: indvul

Description:
Citizen satisfaction with service delivery: Support for vulnerable groups. 2005-2015.

Index showing citizens' judgement regarding service delivery in the municipality. Scale 1-100, where higher values = higher satisfaction. The respondents are asked their opinion of one or several aspects within each area, which are then added into a total index. Source: SCB's citizen survey, compiled by SCB (www.scb.se) and Kolada (www.kolada.se).

2.14.8.14 Citizen satisfaction with service delivery: Water and drainage (indwadr)

Long tag: qog_pol_mun_indwadr

Original tag: indwadr

Description:

Citizen satisfaction with service delivery: Water and drainage. 2006-2015.

Index showing citizens' judgement regarding service delivery in the municipality. Scale 1-100, where higher values = higher satisfaction. The respondents are asked their opinion of one or several aspects within each area, which are then added into a total index. Source: SCB's citizen survey, compiled by SCB (www.scb.se) and Kolada (www.kolada.se).

2.14.9 Elections

Variables in this section provide information on the election outcomes in each municipality.

2.14.9.1 Election result municipal assembly, share of votes: Centerpartiet (scb_ermun_c)

Long tag: qog_pol_mun_scb_ermun_c

Original tag: scb_ermun_c

Description:

Election result municipal assembly, share of votes: Centerpartiet.

Source: SCB (www.scb.se)

Years 1982-2014.

Note: Values have been transferred to cover all years within the mandate periods.

Note from source: The Sweden Democrats are categorised as "other parties" from 1988 years election until 1998.

2.14.9.2 Election result municipal assembly, share of votes: Folkpartiet (scb_ermun_fp)

Long tag: qog_pol_mun_scb_ermun_fp

Original tag: scb_ermun_fp

Description:

Election result municipal assembly, share of votes: Folkpartiet.

Source: SCB (www.scb.se)

Years 1982-2014.

Note: Values have been transferred to cover all years within the mandate periods.

Note from source: The Sweden Democrats are categorised as "other parties" from 1988 years election until 1998.

2.14.9.3 Election result municipal assembly, share of votes: Kristdemokraterna (scb_ermun_kd)

Long tag: qog_pol_mun_scb_ermun_kd

Original tag: scb_ermun_kd

Description:

Election result municipal assembly, share of votes: Kristdemokraterna.

Source: SCB (www.scb.se)

Years 1982-2014.

Note: Values have been transferred to cover all years within the mandate periods.

Note from source: The Sweden Democrats are categorised as "other parties" from 1988 years election until 1998.

2.14.9.4 Election result municipal assembly, share of votes: Moderaterna (scb_ermun_m)

Long tag: qog_pol_mun_scb_ermun_m

Original tag: scb_ermun_m

Description:

Election result municipal assembly, share of votes: Moderaterna.

Source: SCB (www.scb.se)

Years 1982-2014.

Note: Values have been transferred to cover all years within the mandate periods.

Note from source: The Sweden Democrats are categorised as "other parties" from 1988 years election until 1998.

2.14.9.5 Election result municipal assembly, share of votes: Milj<f6>partiet (scb_ermun_mp)

Long tag: qog_pol_mun_scb_ermun_mp

Original tag: scb_ermun_mp

Description:

Election result municipal assembly, share of votes: Milj<f6>partiet.

Source: SCB (www.scb.se)

Years 1982-2014.

Note: Values have been transferred to cover all years within the mandate periods.

Note from source: The Sweden Democrats are categorised as "other parties" from 1988 years election until 1998.

2.14.9.6 Election result municipal assembly, share of votes: Other parties (scb_ermun_oth)

Long tag: qog_pol_mun_scb_ermun_oth

Original tag: scb_ermun_oth

Description:

Election result municipal assembly, share of votes: Other parties.

Source: SCB (www.scb.se)

Years 1982-2014.

Note: Values have been transferred to cover all years within the mandate periods.

Note from source: The Sweden Democrats are categorised as "other parties" from 1988 years election until 1998.

2.14.9.7 Election result municipal assembly, share of votes: Socialdemokraterna (scb_ermun_s)

Long tag: qog_pol_mun_scb_ermun_s

Original tag: scb_ermun_s

Description:

Election result municipal assembly, share of votes: Socialdemokraterna.

Source: SCB (www.scb.se)

Years 1982-2014.

Note: Values have been transferred to cover all years within the mandate periods.

Note from source: The Sweden Democrats are categorised as "other parties" from 1988 years election until 1998.

2.14.9.8 Election result municipal assembly, share of votes: Sverigedemokraterna (scb_ermun_sd)

Long tag: qog_pol_mun_scb_ermun_sd

Original tag: scb_ermun_sd

Description:

Election result municipal assembly, share of votes: Sverigedemokraterna.

Source: SCB (www.scb.se)

Years 1982-2014.

Note: Values have been transferred to cover all years within the mandate periods.

Note from source: The Sweden Democrats are categorised as "other parties" from 1988 years election until 1998.

2.14.9.9 Election result municipal assembly, share of votes: V<e4>nsterpartiet (scb_ermun_v)

Long tag: qog_pol_mun_scb_ermun_v

Original tag: scb_ermun_v

Description:

Election result municipal assembly, share of votes: V<e4>nsterpartiet.

Source: SCB (www.scb.se)

Years 1982-2014.

Note: Values have been transferred to cover all years within the mandate periods.

Note from source: The Sweden Democrats are categorised as "other parties" from 1988 years election until 1998.

2.14.9.10 Number of seats in municipal assembly: Centerpartiet (scb_mas_c)

Concerns all monthly salaried, including vacant Source: SKL (www.skl.se)

2010-2014.

2.14.18 Local News Media

NA

2.14.18.1 Number of local newspapers distributed in the municipalities (locnews)

Long tag: qog_pol_mun_locnews

Original tag: locnews

Description:

Number of local newspapers distributed in the municipalities.

Source: Presst<f6>dsn<e4>mnden (www.radioochtv.se) 2014

2009-2014.

Note: Newspapers with several versions are counted as one. Additional information about distribution is available.

Note from source: Numbers regarding Dagens Nyheter's distribution is from year 2011.

2.14.19 KOLFU

Data from the surveys KOLFU 2008 and KOLFU 2012, distributed by Gothenburg University to politicians in all municipal assemblies and county councils. Number of responding municipalities: 290

Reference KOLFU 2008: Gilljam, Karlsson Sundell (2010) Politik på hemmaplan. Tiotusen fullmäktigeledamöter tycker om politik och demokrati. Stockholm: SKL Kommentus

Reference KOLFU 2012: Karlsson Gilljam (red) (2014) Svenska politiker. Om de folkvalda i riksdag, landsting och kommun. Stockholm: Santérus förlag

The three indices (kfu_index_bribe, kfu_index_part and kfu_index_rec) are gathered from The Quality of Government Dataset of Swedish Municipalities (Dahlström, Carl, Anders Sundell Richard Svensson 2014), version 15Jan14. Description of construction: Using factors analysis three factors were distinguished: one for impartiality, one for bribery and one for recruitment. Predicted factor scores were not used when constructing the indices since the factors will then be orthogonal to each other, which is theoretically unlikely. Instead, they are simple additive indices divided by the number of questions. Moreover, the impartiality questions are reversed so that higher values on the resulting index, as on the two other indices, reflect bad behavior. It is thus a partiality index. For more information on the construction of the indices, please see Dahlström, Carl and Anders Sundell (2013). Impartiality and Corruption in Sweden. QoG Working Paper Series 2013:14. Gothenburg: The Quality of Government Institute.

2.14.19.1 KOLFU: Civil Servant ask for money (kfu_aa1)

Long tag: qog_pol_mun_kfu_aa1

Original tag: kfu_aa1

Description:

KOLFU:

Civil Servant ask for money.

"A civil servant asks to be paid to perform a service that is actually part of his/her duties."

In your opinion, to what extent are the following actions acceptable? On a scale of 1 "Never acceptable" to 7 "Always acceptable".

Source: KOLFU 2012

Description:

Municipal corruption:

In your own opinion, to what degree do you agree with the following statements?

Are you familiar with the regulations regarding corruption in your municipality?

On a scale of 1 "Yes, fully" to 4 "No, not at all".

Data from survey distributed 2011 by Statskontoret (Swedish Agency for Public Management) to politicians and bureaucrats in all Swedish municipalities. Data has been aggregated to the municipal level. Number of responding municipalities: 290.

Reference: Statskontoret (2012). K<f6>pta relationer. Om korruption i det kommunala Sverige. Stockholm: Statskontoret.

2.14.21.22 Municipal corruption: Knowledge of the bureaucrats about regulations regarding corruption (sk_q16)

Long tag: qog_pol_mun_sk_q16

Original tag: sk_Q16

Description:

Municipal corruption:

In your own opinion, to what degree do you agree with the following statements?

If you would make a judgement of the bureaucrats in the municipality in general, how good would you say their knowledge is about regulations regarding corruption?

On a scale of 1 "Very good" to 4 "Very inadequate".

Data from survey distributed 2011 by Statskontoret (Swedish Agency for Public Management) to politicians and bureaucrats in all Swedish municipalities. Data has been aggregated to the municipal level. Number of responding municipalities: 290.

Reference: Statskontoret (2012). K<f6>pta relationer. Om korruption i det kommunala Sverige. Stockholm: Statskontoret.

2.14.21.23 Municipal corruption: Knowledge of the politicians about regulations regarding corruption (sk_q17)

Long tag: qog_pol_mun_sk_q17

Original tag: sk_Q17

Description:

Municipal corruption:

In your own opinion, to what degree do you agree with the following statements?

If you would make a judgement of the politicians in the municipality in general, how good would you say their knowledge is about regulations regarding corruption?

On a scale of 1 "Very good" to 4 "Very inadequate".

Data from survey distributed 2011 by Statskontoret (Swedish Agency for Public Management) to politicians

and bureaucrats in all Swedish municipalities. Data has been aggregated to the municipal level. Number of responding municipalities: 290.

Reference: Statskontoret (2012). K<f6>pta relationer. Om korruption i det kommunala Sverige. Stockholm: Statskontoret.

2.14.21.24 Municipal corruption: The need for education in order to enhance politicians' and bureaucrats' knowledge and awareness of corruption (sk_q18)

Long tag: qog_pol_mun_sk_q18

Original tag: sk_Q18

Description:

Municipal corruption:

In your own opinion, to what degree do you agree with the following statements?

How big is the need for education in the municipality in order to enhance politicians' and bureaucrats' knowledge and awareness of corruption?

On a scale of 1 "Very big" to 4 "No need at all".

Data from survey distributed 2011 by Statskontoret (Swedish Agency for Public Management) to politicians and bureaucrats in all Swedish municipalities. Data has been aggregated to the municipal level. Number of responding municipalities: 290.

Reference: Statskontoret (2012). K<f6>pta relationer. Om korruption i det kommunala Sverige. Stockholm: Statskontoret.

2.14.21.25 Municipal corruption: The municipality conveys information to the politicians and bureaucrats about rules regarding corruption (sk_q19)

Long tag: qog_pol_mun_sk_q19

Original tag: sk_Q19

Description:

Municipal corruption:

In your own opinion, to what degree do you agree with the following statements?

To what degree do you consider the municipality conveys information to the politicians and bureaucrats about rules regarding corruption?

On a scale of 1 "Very high degree" to 4 "Very low degree".

Data from survey distributed 2011 by Statskontoret (Swedish Agency for Public Management) to politicians and bureaucrats in all Swedish municipalities. Data has been aggregated to the municipal level. Number of

responding municipalities: 290.

Reference: Statskontoret (2012). K<f6>pta relationer. Om korruption i det kommunala Sverige. Stockholm: Statskontoret.

2.14.21.26 Municipal corruption: The existent regulation is supplemented with local regulations, aiming to prevent corruption (sk_q20)

Long tag: qog_pol_mun_sk_q20

Original tag: sk_Q20

Description:

Municipal corruption:

In your own opinion, to what degree do you agree with the following statements?

How important do you consider it to be that the existent regulation is supplemented with local regulations, aiming to prevent corruption in your municipality?

On a scale of 1 "Very important" to 4 "Not important at all".

Data from survey distributed 2011 by Statskontoret (Swedish Agency for Public Management) to politicians and bureaucrats in all Swedish municipalities. Data has been aggregated to the municipal level. Number of responding municipalities: 290.

Reference: Statskontoret (2012). K<f6>pta relationer. Om korruption i det kommunala Sverige. Stockholm: Statskontoret.

2.14.21.27 Municipal corruption: The regulations are sufficient in the guidelines for bribes (sk_q21_1)

Long tag: qog_pol_mun_sk_q21_1

Original tag: sk_Q21_1

Description:

Municipal corruption:

To what degree to you consider the regulations of the municipality, which aim to prevent corruption, are sufficient in the guidelines for bribes?

On a scale of 1 "Very high degree" to 3 "Neither high or low degree" to 5 "Not at all".

Data from survey distributed 2011 by Statskontoret (Swedish Agency for Public Management) to politicians and bureaucrats in all Swedish municipalities. Data has been aggregated to the municipal level. Number of responding municipalities: 290.

Reference: Statskontoret (2012). K<f6>pta relationer. Om korruption i det kommunala Sverige. Stockholm:

Statskontoret.

2.14.21.28 Municipal corruption: The regulations are sufficient in the guidelines for bias (sk_q21_2)

Long tag: qog_pol_mun_sk_q21_2

Original tag: sk_Q21_2

Description:

Municipal corruption:

To what degree to you consider the regulations of the municipality, which aim to prevent corruption, are sufficient in the guidelines for bias?

On a scale of 1 "Very high degree" to 3 "Neither high or low degree" to 5 "Not at all".

Data from survey distributed 2011 by Statskontoret (Swedish Agency for Public Management) to politicians and bureaucrats in all Swedish municipalities. Data has been aggregated to the municipal level. Number of responding municipalities: 290.

Reference: Statskontoret (2012). K<f6>pta relationer. Om korruption i det kommunala Sverige. Stockholm: Statskontoret.

2.14.21.29 Municipal corruption: The regulations are sufficient in the guidelines for representation (sk_q21_3)

Long tag: qog_pol_mun_sk_q21_3

Original tag: sk_Q21_3

Description:

Municipal corruption:

To what degree to you consider the regulations of the municipality, which aim to prevent corruption, are sufficient in the guidelines for representation?

On a scale of 1 "Very high degree" to 3 "Neither high or low degree" to 5 "Not at all".

Data from survey distributed 2011 by Statskontoret (Swedish Agency for Public Management) to politicians and bureaucrats in all Swedish municipalities. Data has been aggregated to the municipal level. Number of responding municipalities: 290.

Reference: Statskontoret (2012). K<f6>pta relationer. Om korruption i det kommunala Sverige. Stockholm: Statskontoret.

2.14.21.30 Municipal corruption: The regulations are sufficient in the guidelines for procurement (sk_q21_4)

Long tag: qog_pol_mun_sk_q21_4

Original tag: sk_Q21_4

Description:
Municipal corruption:

To what degree to you consider the regulations of the municipality, which aim to prevent corruption, are sufficient in the guidelines for procurement?

On a scale of 1 "Very high degree" to 3 "Neither high or low degree" to 5 "Not at all".

Data from survey distributed 2011 by Statskontoret (Swedish Agency for Public Management) to politicians and bureaucrats in all Swedish municipalities. Data has been aggregated to the municipal level. Number of responding municipalities: 290.

Reference: Statskontoret (2012). K<f6>pta relationer. Om korruption i det kommunala Sverige. Stockholm: Statskontoret.

2.14.21.31 Municipal corruption: The issue of preventative efforts towards corruption as a vivid issue (sk_q22)

Long tag: qog_pol_mun_sk_q22

Original tag: sk_Q22

Description:
Municipal corruption:

To what degree do you consider the issue of preventative efforts towards corruption as a vivid issue in your municipality?

On a scale of 1 "Very high degree" to 4 "Not at all".

Data from survey distributed 2011 by Statskontoret (Swedish Agency for Public Management) to politicians and bureaucrats in all Swedish municipalities. Data has been aggregated to the municipal level. Number of responding municipalities: 290.

Reference: Statskontoret (2012). K<f6>pta relationer. Om korruption i det kommunala Sverige. Stockholm: Statskontoret.

2.14.21.32 Municipal corruption: how often are you offered money or other favours (sk_q5)

Long tag: qog_pol_mun_sk_q5

Original tag: sk_Q5

Description:
Municipal corruption:

As an elected representative/in duty, how often are you offered money or other favours in order to make a decision that gains the person/persons offering?

On a scale of 1 "Never" to 3 "Quite rarely" to 5 "Very often"

Data from survey distributed 2011 by Statskontoret (Swedish Agency for Public Management) to politicians and bureaucrats in all Swedish municipalities. Data has been aggregated to the municipal level. Number of responding municipalities: 290.

Reference: Statskontoret (2012). K<f6>pta relationer. Om korruption i det kommunala Sverige. Stockholm: Statskontoret.

2.14.21.33 Municipal corruption: How often other politicians and bureaucrats are offered money or other favours (sk_q6)

Long tag: qog_pol_mun_sk_q6

Original tag: sk_Q6

Description:

Municipal corruption:

How often do you think other politicians and bureaucrats in your municipality are offered money or other favours in order to make a decision that gains the person/persons offering?

On a scale of 1 "Never" to 3 "Quite rarely" to 5 "Very often"

Data from survey distributed 2011 by Statskontoret (Swedish Agency for Public Management) to politicians and bureaucrats in all Swedish municipalities. Data has been aggregated to the municipal level. Number of responding municipalities: 290.

Reference: Statskontoret (2012). K<f6>pta relationer. Om korruption i det kommunala Sverige. Stockholm: Statskontoret.

2.14.21.34 Municipal corruption: How often other politicians and bureaucrats have actually accepted the favour (sk_q7)

Long tag: qog_pol_mun_sk_q7

Original tag: sk_Q7

Description:

Municipal corruption:

How often do you think other politicians and bureaucrats in your municipality have actually accepted the favour they have been offered?

On a scale of 1 "Never" to 3 "Quite rarely" to 5 "Very often"

Data from survey distributed 2011 by Statskontoret (Swedish Agency for Public Management) to politicians and bureaucrats in all Swedish municipalities. Data has been aggregated to the municipal level. Number of responding municipalities: 290.

Reference: Statskontoret (2012). K<f6>pta relationer. Om korruption i det kommunala Sverige. Stockholm: Statskontoret.

2.14.21.35 Municipal corruption: How often politicians and bureaucrats in other municipalities are offered money or other favours (sk_q8)

Long tag: qog_pol_mun_sk_q8

Original tag: sk_Q8

Description:

Municipal corruption:

How often do you think politicians and bureaucrats in other municipalities are offered money or other favours in order to make a decision that gains the person/persons offering?

On a scale of 1 "Never" to 3 "Quite rarely" to 5 "Very often"

Data from survey distributed 2011 by Statskontoret (Swedish Agency for Public Management) to politicians and bureaucrats in all Swedish municipalities. Data has been aggregated to the municipal level. Number of responding municipalities: 290.

Reference: Statskontoret (2012). K<f6>pta relationer. Om korruption i det kommunala Sverige. Stockholm: Statskontoret.

2.14.21.36 Municipal corruption: How often politicians and bureaucrats in other municipalities have actually accepted the favour (sk_q9)

Long tag: qog_pol_mun_sk_q9

Original tag: sk_Q9

Description:

Municipal corruption:

How often do you think politicians and bureaucrats in other municipalities have actually accepted the favour they have been offered?

On a scale of 1 "Never" to 3 "Quite rarely" to 5 "Very often"

Data from survey distributed 2011 by Statskontoret (Swedish Agency for Public Management) to politicians and bureaucrats in all Swedish municipalities. Data has been aggregated to the municipal level. Number of responding municipalities: 290.

Reference: Statskontoret (2012). K<f6>pta relationer. Om korruption i det kommunala Sverige. Stockholm: Statskontoret.

2.15 QoG Swedish Agency Database Budget Data

Dataset tag: qog_qad_bud

Description: This database consists of a comprehensive sample of administrative agencies in the Swedish executive bureaucracy between 1960 and 2014. The database is constituted by three distinct datasets: one that focuses on an agency's formal instruction; one that focuses on an agency's head; and one that focuses on an agency's budget. Note

that each dataset has its own unit of analysis. The agency's head data can be found at SND, but is not included in DEMSCORE.

Dataset citation: Dahlström, Carl, Mikael Holmgren, Christian Björkdahl, Kersti Hazell, Anna Khomenko, Richard Svensson, and Pär Åberg. 2018. "Swedish Administrative Agencies, 1960-2014." University of Gothenburg: The Quality of Government Institute.

License: The QoG datasets are open and available, free of charge and without a need to register your data. You can use them for your analysis, graphs, teaching, and other academic-related and non-commercial purposes. We ask our users to cite always the original source(s) of the data and our datasets.

We do not allow other uses of these data including but not limited to redistribution, commercialization and other for-profit usage. If a user is interested in such use or has doubts about the license, they will have to refer to the original source and check with them if this is allowed and what requirements they need to fulfill.

Be mindful that the original data sources are the only owners of their data and they can adjust their license without previous warning.

More detailed information on the dataset can be found at the following web page: `https://www.gu.se/en/quality-government/qog-data/data-downloads/qog-swedish-agency-database`

2.15.1 Identifiers

Variables in this section identify the agency. The agency identification number can be used to link variables across the *Agency Instructions* and the *Agency Budget* datasets.

2.15.1.1 Agency ID (agency_id)

Long tag: qog_qad_bud_agency_id

Original tag: agency_id

Description:

Denotes an agency<92>s identification number. By "agency" we mean any public organization formally authorized to exercise public authority on behalf of either the government or the parliament.

2.15.1.2 Agency Name (agency_name)

Long tag: qog_qad_bud_agency_name

Original tag: agency_name

Description:

Lists the name of an agency. Note that an agency can have more than one name throughout its lifespan.

2.15.1.3 Fiscal Year (agency_fy)

Long tag: qog_qad_bud_agency_fy

Original tag: agency_fy

Description:

Denotes the fiscal year. Note that the budget data covers all agencies with their own lines in the national budget. If an agency is missing budget information for an entire fiscal year, then the agency did not have an independent budget line during that year. If an agency is missing budget information for a particular variable, then the budget line did not report any information for that variable (we have only coded a variable as 0 when the budget actually reports a 0). Further note that the parliament confirmed a new comprehensive budget law in late 1996 (SFS 1996:1059, effective from 1997), which substantially reformed the appropriations process. Among many other changes, the law realigned the fiscal year to follow the calendar year, which meant that all agencies received a one-time budget increase in 1997 to cover an additional six month's worth of funding.

2.15.2 Budget

Variables in this section provide information on the agency's budget.

2.15.2.1 Initial Budget (budget_ibudget)

Long tag: qog_qad_bud_budget_ibudget

Original tag: budget_ibudget

Description:

Denotes the amount of funds granted to an agency at the start of a fiscal year (budgetanslag, anvisad budget). Note that the initial budget is part of the government's annual appropriation bill (budgetproposition)—which requires parliamentary confirmation to pass—and that the funds can be comprised of multiple grants, awarded from multiple departments, and manipulated in multiple ways throughout the fiscal year.

2.15.2.2 Final Budget (budget_fbudget)

Long tag: qog_qad_bud_budget_fbudget

Original tag: budget_fbudget

Description:

Denotes the sum of funds granted to an agency in a given fiscal year (totalt tilldelade medel). This variable is the sum of five other variables and corresponds to how the Swedish government calculates the grand total of an agency's annual grants. The five composite variables are:

4.2.1 Initial Budget

4.3.1 Amendment

4.3.2 Withdrawal

4.3.3 Reservation

4.3.4 Overrun

The composite variables capture an agency's budget at the start of the fiscal year, as well as any subsequent changes made to that budget throughout the remainder of the year. See the individual variable subsections for further notes.

2.15.2.3 Outcome Budget (budget_obudget)

Long tag: qog_qad_bud_budget_obudget

Original tag: budget_obudget

Description:

Denotes an agency's actual budget outcome (budgetutfall). Note that, while the budget outcome correlates almost perfectly with the final budget, they are rarely equal.

2.15.2.4 Inflation (budget_inflation)

Long tag: qog_qad_bud_budget_inflation

Original tag: budget_inflation

Description:

Denotes a CPI-based multiplier for transforming the budget data into 2014 SEK (from Statistics Sweden).

2.15.3 Budget Interventions

Variables in this section provide information on the agency's budget interventions.

2.15.3.1 Amendment (budget_amend)

Long tag: qog_qad_bud_budget_amend

Original tag: budget_amend

Description:

Denotes the amount of funds amended to an agency's budget (ändringsbudget, tidigare tilläggsbudget). The government can increase, decrease, or transfer an agency's funds by proposing an amendment to the appropriation bill. Amendments are subject to parliamentary confirmation and usually submitted twice per year: once during the spring; and once during the autumn.

2.15.3.2 Withdrawal (budget_withdr)

Long tag: qog_qad_bud_budget_withdr

Original tag: budget_withdr

Description:

Denotes the amount of funds withdrawn from an agency's budget (budgetindragning). From 1997 and onwards, the government can unilaterally withdraw an agency's funds and either re-appropriate them for other objectives, or return them to the parliament. Note that both expired reservations (see section 4.2.3) and claimed savings (see section 4.2.5) are filed as withdrawals during this period.

2.15.3.3 Reservation (budget_reserv)

Long tag: qog_qad_bud_budget_reserv

Original tag: budget_reserv

Description:
Denotes the amount of funds reserved from last year's budget (ingående reservationsanslag och ramöverföringsbelopp). Grants that cover multiple years have become increasingly common since the 1970s and now represent the most common type of grant. For these grants, the government first authorizes an agency in one year to use a given set of funds across multiple years, but with the caveat that the funds must be used for the same objective over the entire period. When the next fiscal year then eventually arrives, any potentially unresolved funds from the preceding year's grant are filed as an inbound budget reservation. Note that the reservation can be either a saving, in which case it corresponds to a positive amount, or a debt, in which case it corresponds to a negative amount. Further note that reservations can expire, after which they are filed as withdrawals (see section 4.2.2).

2.15.3.4 Overrun (budget_overrun)

Long tag: qog_qad_bud_budget_overrun

Original tag: budget_overrun

Description:
Denotes the amount of budget overrun covered by the government (medgivna budgetöverskridanden, merutgift). Note that, before 1997, the government could authorize budget overruns unilaterally without concern for any formal expenditure ceilings, so long as the government deemed the additional funds necessary to assure the realization of the original funding objective.
footnoteThe perhaps most notorious example of how these overruns could be used in practice are the so-called thousand crown grants (1000-kronorsanslag), which meant that an agency received about a hundred dollars for its initial budget, but with an implicit credit line to cover any additional expenditures. From 1997 and onwards, the government can still authorize budget overruns, but only within the current expenditure ceiling or with parliamentary confirmation.
footnoteFurther note that, for the years prior to 1981, this variable includes overruns financed via the Budget Equalization Fund (budgetutjämningsfonden) and regulated by special budgets (specialbudget).

2.15.3.5 Overrun (Equalization Fund) (budget_overrunef)

Long tag: qog_qad_bud_budget_overrunef

Original tag: budget_overrunef

Description:
Denotes the amount of overrun financed via the Budget Equalization Fund (budgetutjämningsfonden). Only relevant for the fiscal years prior to 1981.

2.15.3.6 Overrun (Special Budget) (budget_overrunsb)

Long tag: qog_qad_bud_budget_overrunsb

Original tag: budget_overrunsb

Description:
Denotes the amount of overrun financed via special budgets (specialbudget). Only relevant for the fiscal years prior 1981.

2.15.3.7 Saving (budget_saving)

Long tag: qog_qad_bud_budget_saving

Original tag: budget_saving

Description:
Denotes an agency's budget savings (anslagssparande, besparing). Note that, before 1997, all unspent funds went back to the government by default, after which the government could re-appropriate the funds for other objectives. From 1997 and onwards, an agency can save funds for future fiscal years, unless the government decides otherwise. During this latter period, if an agency decides to save part of their funds, the funds are filed as an outbound reservation (see section 4.2.3); if the government decides to re-appropriate an agency's savings, the funds are filed as a withdrawal (see section 4.2.2).
footnoteFurther note that, for the years prior to 1981, this variable includes savings transferred to the Budget Equalization Fund (budgetutjämningsfonden) and regulated by special budgets (specialbudget).

2.15.3.8 Saving (Eqialization Fund) (budget_savingef)

Long tag: qog_qad_bud_budget_savingef

Original tag: budget_savingef

Description:
Denotes an agency's budget savings via the Budget Equalization Fund ("budgetutjämningsfonden"). Only relevant for the fiscal years prior to 1981.

2.15.3.9 Saving (Special Budget) (budget_savingsb)

Long tag: qog_qad_bud_budget_savingsb

Original tag: budget_savingsb

Description:
Denotes an agency's savings via special budgets ("specialbudget"). Only relevant for the fiscal years prior 1981.

2.15.3.10 Credit (budget_credit)

Long tag: qog_qad_bud_budget_credit

Original tag: budget_credit

Description:

Denotes the amount of credit granted to an agency (anslagskredit). From 2011 and onwards, an agency has the right to take out a loan, with a corresponding reduction in the agency's budget allocation in the following year. The credit was initially to be set individually by the government, but now all agencies have a generalized base credit corresponding to three percent of their budget allocation.

2.16 QoG Swedish Agency Database Formal Instruction Data

Dataset tag: qog_qad_inst

Description: This database consists of a comprehensive sample of administrative agencies in the Swedish executive bureaucracy between 1960 and 2014. The database is constituted by three distinct datasets: one that focuses on an agency's formal instruction; one that focuses on an agency's head; and one that focuses on an agency's budget. Note that each dataset has its own unit of analysis. The agency's head data can be found at SND, but is not included in DEMSCORE.

Dataset citation: Dahlström, Carl, Mikael Holmgren, Christian Björkdahl, Kersti Hazell, Anna Khomenko, Richard Svensson, and Pär Åberg. 2018. "Swedish Administrative Agencies, 1960-2014." University of Gothenburg: The Quality of Government Institute.

License: The QoG datasets are open and available, free of charge and without a need to register your data. You can use them for your analysis, graphs, teaching, and other academic-related and non-commercial purposes. We ask our users to cite always the original source(s) of the data and our datasets.

We do not allow other uses of these data including but not limited to redistribution, commercialization and other for-profit usage. If a user is interested in such use or has doubts about the license, they will have to refer to the original source and check with them if this is allowed and what requirements they need to fulfill.

Be mindful that the original data sources are the only owners of their data and they can adjust their license without previous warning.

More detailed information on the dataset can be found at the following web page: `https://www.gu.se/en/quality-government/qog-data/data-downloads/qog-swedish-agency-database`

2.16.1 Identification

Variables in this section identify the agency. The agency identification number can be used to link variables across the *Agency Instructions* and the *Agency Budget* datasets.

2.16.1.1 Agency ID (agency_id)

Long tag: qog_qad_inst_agency_id

Original tag: agency_id

Description:

Denotes an agency<92>s identification number. By "agency" we mean any public organization formally authorized to exercise public authority on behalf of either the government or the parliament.

2.16.1.2 Agency Name (agency_name)

Long tag: qog_qad_inst_agency_name

Original tag: agency_name

Description:

Lists the name of an agency. Note that an agency can have more than one name throughout its lifespan.

2.16.1.3 Enactment (Year) (agency_startyear)

Long tag: qog_qad_inst_agency_startyear

Original tag: agency_startyear

Description:

Denotes an agency's enactment year. The determination of when exactly a new agency comes into existence is no trivial matter and should ideally be guided by an explicit theory of organizational boundaries. For this variable, we consider an agency to be a new agency if it receives a name, head, and instruction that differ from any previously existing agencies. So, for example, the National Board of Education (Skolöverstyrelsen), terminated in 1991, is considered a different agency from the National Agency of Education (Skolverket), enacted in 1991, because the two agencies have different names, heads, and instructions. For the agencies that

were enacted before our observation began, we have relied on the aforementioned yearbooks to determine enactment years and, failing that, encyclopaedias (a few agencies in the sample have existed in some capacity for centuries, e.g. the Riksbank).

9999 = Missing

2.16.1.4 Termination (Year) (agency_endyear)

Long tag: qog_qad_inst_agency_endyear

Original tag: agency_endyear

Description:

Denotes an agency's termination year. The determination of when exactly an agency ceases to exist is no trivial matter and should ideally be guided by an explicit theory of organizational boundaries. For this variable, we consider an agency to be terminated if its name, head, and instruction are revoked in the same year. So, for example, the National Board of Education (Skolöverstyrelsen), terminated in 1991, is considered a different agency from The National Agency of Education (Skolverket), enacted in 1991, because the two agencies have different names, heads, and instructions. For cases where we have been unable to acquire information on all three attributes, we have relied on the aforementioned yearbooks and other independent statements issued by the government to determine termination years.

9998 = Censored (i.e. still in operation by the end of the observation period)

9999 = Missing

2.16.2 Formal Authorization

Variables in this section cover the agency's formal authorization.

2.16.2.1 Political Principal (agency_principal)

Long tag: qog_qad_inst_agency_principal

Original tag: agency_principal

Description:

Denotes whether an agency is accountable to the parliament or the government. Note that, since the constitutional reform of 1974, all administrative agencies are accountable to the government, unless a law states otherwise.

0 = Government

1 = Parliament

9999 = Missing

2.16.2.2 Instruction Number (agency_instruction)

Long tag: qog_qad_inst_agency_instruction

Original tag: agency_instruction

Description:

Lists the document that formally authorizes an agency's operations. In the Swedish case, agencies can be authorized either by law or executive order (see section 2.2.7), with a given authorization formally referred to as an agency instruction (myndighetsinstruktion). Catalogue-wise, the instructions are denoted by (year:number) and published by the government in the Swedish Code of Statutes (Svensk författningssamling). Content-wise, they typically focus on an agency's overarching rights and responsibilities, but rarely contain any specific policy orders.
footnoteFor example, consider the instruction for the Health and Social Care Inspectorate (SFS2013:176). The instruction contains eleven paragraphs. 1
S states that the agency is responsible for supervising the provision of health and social care, processing public complaints against providers and their employees, and issuing permits in its policy domain. 2
S states that The purpose of the supervision is to assure that the public receives health and social care that is safe, of good quality, and compliant with the law. 3
S and $3a$
S states that the agency must deliver an annual report to the government and produce statistics of relevance for its mission. 4
S states that the agency must collaborate with other agencies operating in its policy domain. 5
S states that the agency is led by an agency head. 6

S states that the agency has an advisory council. 7
S states that the agency head is a Director-General. 8
S states that the agency has a disciplinary board (personalansvarsnämnd). 9
S and 10
S references two laws concerning internal auditing and employee rights that the agency must apply. 11
S states that the agency is allowed to offer certain goods and services in exchange for a fee. In practice, however, an agency will of course also be subject to a variety of additional laws and ordinances not covered by this dataset (e.g. the Administrative Procedures Act, the Instrument of Government, and the various appropriation directives). Note that, while the dataset includes all organizations authorized by an instruction during the observed period, it also excludes any organization not authorized by an instruction during the observed period.
footnoteFurther note that, since we only count an organization as an agency if it is authorized by an agency instruction, we automatically exclude many ad hoc delegations from the dataset. For example, in response to new political developments, the government can sometimes send out written departemental orders demanding the enactment of a new advisory council or commission of inquiry, but without any real expectations of permanence. Such delegations can sometimes also have their own budget lines and carry their own political appointees. However, they are only rarely authorized through unique agency instructions—which in the Swedish context would bestow them with a certain level of legal autonomy from the government thanks to higher-order constitutional rules. Instead, they are typically authorized through less formalized ordinances that never enter the Code of Statutes. And as long as they are excluded from the Code of Statutes, they will also be excluded from this dataset (for reference, the Swedish Agency for Public Management, which is the government's central agency for evaluating state-funded activities, also only counts an organization as an agency if the organization is authorized by an instruction).

2.16.2.3 Instruction Issued (Date) (agency_issued)

Long tag: qog_qad_inst_agency_issued

Original tag: agency_issued

Description:

Lists the date when an agency instruction was issued. Note that there is often a time-lag between the date of issue and the date of effect.

9999 = Missing

2.16.2.4 Instruction Effective (Date) (agency_effective)

Long tag: qog_qad_inst_agency_effective

Original tag: agency_effective

Description:

Lists the date by which an agency instruction takes effect. Note that there is often a time-lag between the date of issue and the date of effect.

9999 = Missing

2.16.2.5 Instruction Revoked (Date) (agency_revoked)

Long tag: qog_qad_inst_agency_revoked

Original tag: agency_revoked

Description:

Lists the date when an agency instruction was revoked. Permanent revocations are usually issued as a generic executive order or law (depending on how the agency was authorized). Note, however, that when an agency receives a new mission or is otherwise subjected to some form of major reorganization, the agency can also receive a new instruction that revokes the old instruction. Consequently, the variable does not necessarily indicate that an agency ceases its operations (i.e. while an agency can only have one instruction at a time, it might well receive several different instructions throughout its lifespan).

9998 = Censored (i.e. still in effect by the end of the observation period)

9999 = Missing

2.16.2.6 Instruction Legal Type (agency_law)

Long tag: qog_qad_inst_agency_law

Original tag: agency_law

Description:

Denotes whether an agency instruction is a law (lag). Note that the vast majority of agencies are authorized

by the government through executive order (förordning) without any direct involvement from the parliament. Of the handful of parliamentary agencies included in the sample, the most prominent are The Parliamentary Ombudsmen (Riksdagens Ombudsmän), The Riksbank (Riksbanken), and The Swedish National Audit Office (Riksrevisionen)—all three of which have their basic organizations defined in the constitution.

0 = Executive order

1 = Law

9999 = Missing

2.16.2.7 Minister Name (agency_minname)

Long tag: qog_qad_inst_agency_minname

Original tag: agency_minname

Description:

Lists the name of the minister that signed an agency's instruction.

9999 = Missing

2.16.2.8 Minister Department (agency_ministry)

Long tag: qog_qad_inst_agency_ministry

Original tag: agency_ministry

Description:

Lists the department of the minister that signed an agency's instruction. Note that the government can sometimes move an agency from one ministerial portfolio to another without issuing a new authorization. Consequently, the variable does not necessarily indicate an agency's current department.

9999 = Missing

2.16.2.9 Minister Party (agency_minparty)

Long tag: qog_qad_inst_agency_minparty

Original tag: agency_minparty

Description:

Lists the political party of the minister that signed an agency's instruction.

9999 = Missing

2.16.3 Management Structure

Variables in this section cover the agency's management structure.

2.16.3.1 Unitary Agency (agency_unitary)

Long tag: qog_qad_inst_agency_unitary

Original tag: agency_unitary

Description:

Denotes whether an agency is led by a single agency head. We distinguish unitary agencies from board agencies (see section 2.3.2) and committee agencies (see section 2.3.7). Additionally, we also distinguish agencies that include an advisory council (see section 2.3.12).

0 = No

1 = Yes

9999 = Missing

2.16.3.2 Board Agency (agency_board)

Long tag: qog_qad_inst_agency_board

Original tag: agency_board

Description:

Denotes whether an agency is led by a board (styrelse). A board agency (styrelsemyndighet) is an agency where the agency head is hierarchically subordinate to a collective decision-making body, similarly to the relationship between a board of directors and a chief executive officer in a firm. Note that the agency instruction rarely places any limitations on the type of individuals that can be appointed to the board (but see section 2.3.3, 2.3.4, 2.3.5, 2.3.6). Instead, the standard rule is usually some variant of the board is appointed by the government on a fixed-term. Obtaining information about individual board members thus usually requires delving into the agency's actual personnel records.

0 = No

1 = Yes

9999 = Missing

2.16.3.3 Board Business Representation (agency_brepco)

Long tag: qog_qad_inst_agency_brepco

Original tag: agency_brepbu

Description:

Denotes whether the board must include a business representative.
0 = No
1 = Yes
9999 = Missing

2.16.3.4 Board Union Representation (agency_brepun)

Long tag: qog_qad_inst_agency_brepun

Original tag: agency_brepun

Description:

Denotes whether the board must include a union representative.

0 = No

1 = Yes

9999 = Missing

2.16.3.5 Board Other Representation (agency_brepoth)

Long tag: qog_qad_inst_agency_brepoth

Original tag: agency_brepoth

Description:

Denotes whether the board must include a representative from a group other than a business or union (e.g. the chair might be required to have experience as a judge).

0 = No

1 = Yes

9999 = Missing

2.16.3.6 Board Chair (agency_bchair)

Long tag: qog_qad_inst_agency_bchair

Original tag: agency_bchair

Description:

Denotes whether the agency head is also the chairman of the board (styrelsens ordförande).

0 = No

1 = Yes

9999 = Missing

2.16.3.7 Committee Agency (agency_committee)

Long tag: qog_qad_inst_agency_committee

Original tag: agency_committee

Description:

Denotes whether an agency is a committee (nämnd). A committee agency (nämndmyndighet) is an agency that is nothing more than a collective decision-making body. In the Swedish case, committees can sometimes be authorized to create their own administrative offices, but if they do, they usually remain small, and with the committee chair taking on the role as agency head (alternatively, they can sometimes also be authorized to utilize the administrative offices of larger agencies). Note that the agency instruction rarely places any limitations on the type of individuals that can be appointed to the committee (but see section 2.3.8, 2.3.9, 2.3.10, 2.3.11). Instead, the standard rule is usually some variant of the committee is appointed by the government on a fixed-term. Obtaining information about individual committee members thus usually requires delving into the agency's actual personnel records.

0 = No

1 = Yes

9999 = Missing

2.16.3.8 Committee Business Representation (agency_crepco)

Long tag: qog_qad_inst_agency_crepco

Original tag: agency_crepbu

Description:

Denotes whether the committee must include a business representative.
0 = No
1 = Yes
9999 = Missing

2.16.3.9 Committee Union Representation (agency_crepun)

Long tag: qog_qad_inst_agency_crepun

Original tag: agency_crepun

Description:

Denotes whether the committee must have a union representative.

0 = No

1 = Yes

9999 = Missing

2.16.3.10 Committee Other Representation (agency_crepoth)

Long tag: qog_qad_inst_agency_crepoth

Original tag: agency_crepoth

Description:

Denotes whether the committee must include a representative from a group other than a business or union (e.g. the chair might be required to have experience as a judge).

0 = No

1 = Yes

9999 = Missing

2.16.3.11 Committee Chair (agency_cchair)

Long tag: qog_qad_inst_agency_cchair

Original tag: agency_cchair

Description:
Denotes whether the agency head is also the chairman of the committee (nämndens ordförande).

0 = No

1 = Yes

9999 = Missing

2.16.3.12 Advisory Council (agency_council)

Long tag: qog_qad_inst_agency_council

Original tag: agency_council

Description:
Denotes whether an agency includes an advisory council (insynsråd, rådgivande nämnd, expertråd, etc). An advisory council is a collective decision-making body that lacks formal agenda-setting powers but can offer recommendations to the agency's leadership. Advisory councils are the most common among agencies led by a single agency head, but can also feature in agencies led by a board. Note that the agency instruction rarely places any limitations on the type of individuals that can be appointed to the council (but see section 2.3.13, 2.3.14, 2.3.15, 2.3.16). Instead, the standard rule is usually some variant of the council is appointed by the government on a fixed-term. Obtaining information about individual council members thus usually requires delving into the agency's actual personnel records.

0 = No

1 = Yes

9999 = Missing

2.16.3.13 Advisory Council Business Representation (agency_acrepbu)

Long tag: qog_qad_inst_agency_acrepbu

Original tag: agency_acrepbu

Description:
Denotes whether the advisory council must include a business representative.

0 = No

1 = Yes

9999 = Missing

2.16.3.14 Advisory Council Union Representation (agency_acrepun)

Long tag: qog_qad_inst_agency_acrepun

Original tag: agency_acrepun

Description:
Denotes whether the council must have a union representative.

0 = No

1 = Yes

9999 = Missing

2.16.3.15 Advisory Council Other Representation (agency_acrepoth)

Long tag: qog_qad_inst_agency_acrepoth

Original tag: agency_acrepoth

Description:
Denotes whether the advisory council must include a representative from a group other than a business or union (e.g. the chair might be required to have experience as a judge).

0 = No

1 = Yes

9999 = Missing

2.16.3.16 Advisory Council Chair (agency_acchair)

Long tag: qog_qad_inst_agency_acchair

Original tag: agency_acchair

Description:

Denotes whether the agency head is also the chairman of the advisory council (rådets ordförande).

0 = No

1 = Yes

9999 = Missing

2.16.4 Functions

Variables in this section cover the agency's formal functions.

2.16.4.1 Adjudication (agency_adjud)

Long tag: qog_qad_inst_agency_adjud

Original tag: agency_adjud

Description:

Denotes whether an agency is authorized to resolve legal disputes (rättstvister). Swedish law distinguishes between court agencies and administrative agencies, yet some administrative agencies have nonetheless been granted rights that make them function quite similarly to courts. The National Board of Consumer Disputes (Allmänna reklamationsnämnden), for example, processes disputes between consumers and business operators and can submit recommendations on how a dispute should be resolved. If an agency is also tasked with supervision (see section 2.4.14), the resolution may also involve sanctions. The Health and Social Care Inspectorate (Inspektionen för vård och omsorg), for example, processes public charges against healthcare providers and can impose sanctions for non-compliance with the Patient Safety Act. Similarly, the Equality Ombudsman (Diskrimineringsombudsmannen) processes public charges of workplace discrimination and can impose sanctions for non-compliance with The Discrimination Act.

0 = No

1 = Yes

9999 = Missing

2.16.4.2 Collaboration (agency_collab)

Long tag: qog_qad_inst_agency_collab

Original tag: agency_collab

Description:

Denotes whether an agency is obligated to collaborate (samverka) with other agencies. While some agencies are allowed to operate without concern for other agencies, many agencies also face formal demands that they must somehow work together with other agencies. The Swedish Environmental Protection Agency (Naturvårdsverket), for example, is obligated to collaborate with the Swedish Agency for Marine and Water Management (Havs- och vattenmyndigheten) on issues of significance for the marine and water environment. Such requirements are rarely specified in any detail, however, typically leaving it up to the agencies themselves to determine the form of the collaboration (and to later demonstrate to their political principal that they have, in fact, collaborated adequately).

0 = No

1 = Yes

9999 = Missing

2.16.4.3 County Administration (agency_county)

Long tag: qog_qad_inst_agency_county

Original tag: agency_county

Description:

Denotes whether an agency is a county administration (länsstyrelse). The county administrations act as the national government's representatives on the local level and are usually headed by former politicians. Note that the county administrations have a shared instruction.

0 = No

1 = Yes

9999 = Missing

2.16.4.4 Education (agency_edu)

Long tag: qog_qad_inst_agency_edu

Original tag: agency_edu

Description:

Denotes whether an agency is a university or college (universitet eller högskola). Note that the universities and colleges have a shared instruction.

0 = No

1 = Yes

9999 = Missing

2.16.4.5 Evaluation (agency_eval)

Long tag: qog_qad_inst_agency_eval

Original tag: agency_eval

Description:

Denotes whether an agency is authorized to evaluate the performance of their policy domain (utvärdering). Many agencies have it as part of their mission to systematically appraise the effects of political interventions in public life, either to assure a satisfactory degree of achievement, or to lay a foundation for new reforms. Prominent examples include the Swedish Agency for Public Management (Statskontoret), the Swedish Consumer Agency (Konsumentverket), and the National Institute for Economic Research (Konjukturinstitutet).

0 = No

1 = Yes

9999 = Missing

2.16.4.6 Information-sharing (agency_info)

Long tag: qog_qad_inst_agency_info

Original tag: agency_info

Description:

Denotes whether an agency is obligated to disseminate information. Many agencies have it as part of their mission to ensure that affected stakeholders are well-informed about new policy developments. The National Agency for Education (Skolverket), for example, organises regular workshops aimed at keeping local practitioners up to date with the law. Such requirements are rarely specified in any detail, however, typically leaving it up to the agencies themselves to determine the form of the dissemination (and to later demonstrate to their political principal that they have, in fact, shared their information adequately).

0 = No

1 = Yes

9999 = Missing

2.16.4.7 Permissions (agency_permit)

Long tag: qog_qad_inst_agency_permit

Original tag: agency_permit

Description:

Denotes whether an agency is authorized to process and issue permits (tillståndsprövning). Many agencies are designed to function as gatekeepers, armed with the authority to either grant or deny people access to certain privileges. In Sweden, the currently perhaps most politically salient example is the Migration Agency (Migrationsverket), which determines which immigrants are allowed to take up long-term residence within the nation's borders. But many other agencies have analogous veto-powers within their respective policy domains: before launching a charter school, one must first apply for permission from the School Inspectorate (Skolinspektionen); before selling medical drugs, one must first apply for permission from the Medical Products Agency (Läkemedelsverket); before driving a car, one must first apply for permission from the Swedish Transport Agency (Transportstyrelsen); and so forth.

0 = No

1 = Yes

9999 = Missing

2.16.4.8 Police Authority (agency_police)

Long tag: qog_qad_inst_agency_police

Original tag: agency_police

Description:

Denotes whether an agency is a regional police authority (regional polismyndighet). For most of the observed period, Sweden had one police authority for each county. Note that the police authorities have a shared instruction.

0 = No

1 = Yes

9999 = Missing

2.16.4.9 Policy Proposals (agency_policy)

Long tag: qog_qad_inst_agency_policy

Original tag: agency_policy

Description:

Denotes whether an agency is obligated to provide its political principal with policy proposals. While it is well-known that Swedish ministers often have extensive informal contacts with many agencies regarding the government's choice of policies, some agencies also have it as part of their formal mission to supply their political principal with policy relevant advice, guidance, or support. Prominent examples include the Swedish Public Employment Agency (Arbetsförmedlingen), the Swedish Environmental Protection Agency (Naturvårdsverket), and the Swedish Energy Agency (Statens Energimyndighet).

0 = No

1 = Yes

9999 = Missing

2.16.4.10 Redistribution (agency_redist)

Long tag: qog_qad_inst_agency_redist

Original tag: agency_redist

Description:

Denotes whether an agency is authorized to redistribute government funds (statliga bidrag). Many agencies receive funds from their political principal under the obligation that those funds should then be redistributed to other individuals, groups, or organizations. A large part of the public universities' research projects, for example, are financed externally by the Swedish Research Council (Vetenskapsrådet). Other prominent examples include the National Board of Student Aid (Centrala Studiestödsnämnden), the National Board of Housing, Building and Planning (Boverket), and the Swedish Social Insurance Agency (Försäkringskassan).

0 = No

1 = Yes

9999 = Missing

2.16.4.11 Reporting Requirement (agency_report)

Long tag: qog_qad_inst_agency_report

Original tag: agency_report

Description:

Denotes whether an agency is obligated to deliver an annual report to its political principal. Note that an agency can also receive additional reporting requirements (e.g. regarding the implementation of a specific program) as part of the annual appropriations process. Consequently, this variable does not necessarily indicate whether an agency is subject to
textitany reporting requirement; it only denotes whether an agency is obligated to provide an annual report of its activities.

0 = No

1 = Yes

9999 = Missing

2.16.4.12 Research (agency_research)

Long tag: qog_qad_inst_agency_research

Original tag: agency_research

Description:

Denotes whether an agency is obligated to perform research (forskning). The most prominent research institutions are of course the universities. But many other agencies also perform research functions within their policy domains. Examples include the National Food Agency (Livesmedelsverket), the National Agency for Special Needs and Schools (Specialpedagogiska skolmyndigheten), and the Swedish Maritime Administration (Sjöfartsverket).

0 = No

1 = Yes

9999 = Missing

2.16.4.13 Rulemaking (agency_rule)

Long tag: qog_qad_inst_agency_rule

Original tag: agency_rule

Description:

Denotes whether an agency is authorized to issue legally binding regulations (föreskrifter). While some agencies only have the right to implement the law of the land, other agencies can have the right to write their own rules and publish their own Code of Statutes. Prominent examples include the National Agency for Higher Education (Högskoleverket), the National Board of Health and Welfare (Socialstyrelsen), and the Swedish Transport Administration (Trafikverket).

0 = No

1 = Yes

9999 = Missing

2.16.4.14 Supervision (agency_super)

Long tag: qog_qad_inst_agency_super

Original tag: agency_super

Description:

Denotes whether an agency is authorized to enforce the law. Supervision (tillsyn) does not have a precise legal definition, but when an agency is formally designated as a supervisory agency (tillsynsmyndighet), it typically

implies that the agency has the right to initiate its own investigations, demand information from regulatory subjects, and sanction non-compliance. Prominent examples include the Financial Supervisory Authority (Finansinspektionen), the School Inspectorate (Skolinspektionen), and the Swedish Competition Agency (Konkurrensverket).

0 = No

1 = Yes

9999 = Missing

2.17 QoG Standard Dataset Cross-Section

Dataset tag: qog_std_cs

Description: The QoG Standard dataset is our largest dataset. It consists of approximately 2100 variables from more than 100 data sources related to Quality of Government. In the QoG Standard CS dataset, data from and around 2018 is included. Data from 2018 is prioritized, however, if no data is available for a country for 2018, data for 2019 is included. If no data exists for 2019, data for 2017 is included, and so on up to a maximum of +/- 3 years.

Dataset citation: Teorell, Jan, Aksel Sundström, Sören Holmberg, Bo Rothstein, Natalia Alvarado Pachon Cem Mert Dalli. 2021. The Quality of Government Standard Dataset, version Jan21. University of Gothenburg: The Quality of Government Institute, http://www.qog.pol.gu.se doi:10.18157/qogstdjan21

License: The QoG datasets are open and available, free of charge and without a need to register your data. You can use them for your analysis, graphs, teaching, and other academic-related and non-commercial purposes. We ask our users to cite always the original source(s) of the data and our datasets.

We do not allow other uses of these data including but not limited to redistribution, commercialization and other for-profit usage. If a user is interested in such use or has doubts about the license, they will have to refer to the original source and check with them if this is allowed and what requirements they need to fulfill.

Be mindful that the original data sources are the only owners of their data and they can adjust their license without previous warning.

More detailed information on the dataset can be found at the following web page: `https://www.gu.se/en/quality-government/qog-data/data-downloads/standard-dataset`

2.17.1 Identification Variables

Identification variables in the dataset.

2.17.1.1 Country Code (ccode)

Long tag: qog_std_cs_ccode

Original tag: ccode

Description:

Numeric country code based on the ISO-3166-1 standard. All the numeric country codes are unique and this is thus the variable best suitable to use when merging files (in combination with year for time-series data). (http://en.wikipedia.org/wiki/ISO_3166-1_numeric)

2.17.1.2 Country Name (cname)

Long tag: qog_std_cs_cname

Original tag: cname

Description:

The name of the country based in the ISO standard.

2.17.1.3 Country Code QoG (ccode_qog)

Long tag: qog_std_cs_ccode_qog

Original tag: ccode_qog

Description:

The country code using the QoG standard.

2.17.1.4 Country Name QoG (cname_qog)

Long tag: qog_std_cs_cname_qog

Original tag: cname_qog

Description:
The name of the country using the QoG standard.

2.17.1.5 3-letter Country Code (ccodealp)

Long tag: qog_std_cs_ccodealp

Original tag: ccodealp

Description:
A three-letter country code based on the ISO-3166-1 alpha3 standard. Please note that the ccodealp variable does not uniquely identify all countries.

2.17.1.6 Country Code COW (ccodecow)

Long tag: qog_std_cs_ccodecow

Original tag: ccodecow

Description:
Country code from the Correlates of War.

2.17.1.7 Version of the Dataset (version)

Long tag: qog_std_cs_version

Original tag: version

Description:
Version of the QoG dataset.

2.17.2 Judicial

This category includes judicial indicators, generally covering legal rights granted by a state to its citizens and their compliance, as well as measures of crimes and the overall state of the judicial system.

2.17.2.1 Accountability sub-index (aii_acc)

Long tag: qog_std_cs_aii_acc

Original tag: aii_acc

Description:
Accountability. This sub index from 0 to 100 is composed of:

1. In law, the independence of the judiciary is guaranteed.
2. In practice, the independence of the judiciary is guaranteed.
3. In practice, national-level judges appointments (justices or magistrates) support the independence of the judiciary.
4. In practice, national-level judges give reasons for their decisions/judgments.
5. In law, there is a supreme audit institution.
6. In law, the independence of the supreme audit institution is guaranteed.
7. In practice, the independence of the supreme audit institution is guaranteed.
8. In practice, appointments to the supreme audit institution support the independence of the agency.
9. In practice, the supreme audit agency releases frequent reports that are accessible to citizens.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.17.2.2 Access to Information and Openness sub-index (aii_aio)

Long tag: qog_std_cs_aii_aio

Original tag: aii_aio

Description:
Access to Information and Openness. This sub index from 0 to 100 is composed of:

10. In law, corruption is criminalized as a specific offense.
11. In law, there is an independent body/bodies mandated to receive and investigate cases of alleged public sector corruption.
12. In practice, allegations of corruption against senior level politicians and/or civil servants of any level are investigated by an independent body.
13. In practice, the body/bodies that investigate/s allegations of public sector corruption is/are effective.
14. In practice, appointments to the body/bodies that investigate/s allegations of public sector corruption support/s the independence of the body.
15. In law, the head of state and government can be investigated and prosecuted while in office if evidence suggests they committed a crime.
16. In practice, heads of state and government are investigated and prosecuted while in office if evidence suggest they committed a crime.
17. In law, there is a mechanism for citizens to report police misconduct or abuse of force.
18. In practice, the mechanism for citizens to report police misconduct or abuse of force is effective.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.17.2.3 Law: the independence of the judiciary is guaranteed (aii_q01)

Long tag: qog_std_cs_aii_q01

Original tag: aii_q01

Description:

Sub-score (0-100). Question no. 1. In law, the independence of the judiciary is guaranteed.

A 100 score is earned where all the following conditions are met:
1) the law establishes that the judiciary is independent from the executive and legislative branches, and
2) the law establishes the judiciary's right, authority or mandate to review laws, issue judicial decisions, and choose the cases heard by courts.

A 0 score is earned where no such law exists, or a law exists but it does not include ALL of the elements described in 100.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.17.2.4 Practice: the independence of the judiciary is guaranteed (aii_q02)

Long tag: qog_std_cs_aii_q02

Original tag: aii_q02

Description:

Sub-score (0-100). Question no. 2. In practice, the independence of the judiciary is guaranteed.

A 100 score is earned where all the following conditions are met:
1) judges have autonomy to interpret and review existing laws, legislation and policy, and
2) judges operate without fear or favor, independent from other branches of government.

A 50 score is earned where any of the following conditions apply:
1) judges' autonomy to interpret and review existing laws is occasionally restricted, or
2) judges are occasionally subject to negative or positive political incentives (for example, judges are demoted/promoted or relocated to worse/better offices in retaliation/reward for making certain decisions).

A 0 score is earned where at least one of the following conditions apply:
1) judges rarely have autonomy to interpret and review existing laws, legislation and policy, or
2) judges are routinely subject to negative or positive political incentives (for example, judges are frequently demoted/promoted or relocated to worse/better offices in retaliation/reward for making certain decisions).

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.17.2.5 Practice: national-level judges support the independence of judiciary (aii_q03)

Long tag: qog_std_cs_aii_q03

Original tag: aii_q03

Description:

Sub-score (0-100). Question no. 3. In practice, national-level judges appointments (justices or magistrates) support the independence of the judiciary.

A 100 score is earned where all the following conditions are met:
1) national-level judges are chosen through a merit-based selection system,
2) they have security of tenure, and
3) they are disciplined/removed/transferred only through due process by a peer panel/independent oversight body.

A 50 score is earned where any of the following conditions apply:
1) national-level judges are occasionally appointed without following a merit-based selection system,
2) some judges are denied security of tenure, or
3) occasionally judges are disciplined/removed/transferred without due process or the peer panel/independent oversight body occasionally includes representatives of the executive or legislative branches.

A 0 score is earned where at least one of the following conditions apply:
1) there's a merit-based selection system but it fails to require basic skills (ex. legal education, litigation experience, etc.) or is so weak that individuals with less merit are usually appointed over those with more merit,
2) there is no security of tenure, or
3) the due process usually involves the Executive or Legislative branches.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.17.2.6 Practice: national-level judges give reasons for their decisions (aii_q04)

Long tag: qog_std_cs_aii_q04

Original tag: aii_q04

Description:

Sub-score (0-100). Question no. 4. In practice, national-level judges give reasons for their decisions/judgments.

A 100 score is earned where all the following conditions are met:
1) judges routinely provide formal reasoning for their rulings,
2) their reasoning references the laws/jurisprudence they considered and the specific interpretation they gave them in relation to the case, and
3) their reasoning is public (for this indicator, national security exceptions are allowed).

A 50 score is earned where any of the following conditions apply:
1) judges occasionally fail to provide formal reasoning for their decisions,
2) the reasoning occasionally lacks references to the laws/jurisprudence considered or the respective judges' interpretations, or
3) it takes more than two weeks for citizens to obtain the reasoning after requested.

A 0 score is earned where at least one of the following conditions apply:
1) judges rarely provide formal reasoning for their rulings, or
2) their reasoning rarely references the laws/jurisprudence they considered and/or the specific interpretations they gave them in relation to the case, or
3) the reasoning is not public.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.17.2.7 Law: there is a supreme audit institution (aii_q05)

Long tag: qog_std_cs_aii_q05

Original tag: aii_q05

Description:

Sub-score (0-100). Question no. 5. In law, there is a supreme audit institution.

A 100 score is earned where the law mandates the creation of a supreme audit institution or office of the Auditor General, tasked with auditing the government accounts.
A 0 score is earned where no such law exists.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.17.2.8 Law: the independence of supreme audit institution is guaranteed (aii_q06)

Long tag: qog_std_cs_aii_q06

Original tag: aii_q06

Description:

Sub-score (0-100). Question no. 6. In law, the independence of the supreme audit institution is guaranteed.

A 100 score is earned where all the following conditions are met:
1) the law establishes that the audit institution is independent from the executive and legislative branches,
2) the institution has the right, authority or mandate to audit any government account, issue recommendations and resolutions, and refer cases to the prosecutor's office, and
3) the institution has a consistent source of funding to operate.

A 0 score is earned where no such law exists, or a law exists but it doesn't establish ALL of the conditions described in 100.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.17.2.9 Practice: the independence of supreme audit institution is guaranteed (aii_q07)

Long tag: qog_std_cs_aii_q07

Original tag: aii_q07

Description:

Sub-score (0-100). Question no. 7. In practice, the independence of the supreme audit institution is guaranteed.

A 100 score is earned where all the following conditions are met:
1) auditors have autonomy to audit accounts,
2) auditors operate without fear or favor, independent from other offices of government, and
3) they have a predictable source of funding that is consistent from year to year.

A 50 score is earned where any of the following conditions apply:
1) auditors usually have autonomy to audit any account but exceptions exist,
2) auditors are occasionally subject to negative or positive political incentives (for example, auditors are demoted/promoted or relocated to worse/better offices in retaliation/reward for not auditing/not auditing or issuing favorable/unfavorable resolutions), or
3) funding is occasionally inconsistent.

A 0 score is earned where at least one of the following conditions apply:
1) auditors rarely have autonomy to audit accounts,
2) they routinely operate with fear or favor, dependent of other offices of government, or
3) the source of funding is usually inconsistent from year to year.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.17.2.10 Law: there are indep. bodies to investigate cases of pubsec. corruption (aii_q11)

Long tag: qog_std_cs_aii_q11

Original tag: aii_q11

Description:

Sub-score (0-100). Question no. 11. In law, there is an independent body/bodies mandated to receive and investigate cases of alleged public sector corruption.

A 100 score is earned where all of the following conditions are met:
1) a law mandates a specific body to receive and investigate citizens' allegations of public sector corruption, and
2) a law establishes that the body is independent from the Executive and Legislative branches.

A 0 score is earned where no such law exists, or a law exists but it doesn't meet the two conditions described in 100.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.17.2.11 Practice: corruption allegations are investigated by independent body (aii_q12)

Long tag: qog_std_cs_aii_q12

Original tag: aii_q12

Description:

Sub-score (0-100). Question no. 12. In practice, allegations of corruption against senior level politicians and/or civil servants of any level are investigated by an independent body.

A 100 score is earned where all the following conditions are met:
1) allegations against senior level politicians and/or civil servants of any level are investigated, and
2) the members of the body mandated to investigate the allegations work without fear or favor from other offices.

A 50 score is earned where any of the following conditions apply:
1) not all allegations against senior level politicians and/or civil servants of any level are investigated, or
2) the members of the body mandated to investigate the allegations are occasionally subjected to positive/negative incentives to rule in favor/against a senior level politician and/or civil servant.

A 0 score is earned where at least one of the following conditions apply:
1) allegations against senior level politicians and/or civil servants of any level are rarely or never investigated, or
2) the members of the body mandated to investigate the allegations routinely receive positive/negative incentives to rule in favor/against a senior level politician and/or civil servant.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.17.2.12 Practice: bodies investigating pubsector corruption allegations are effective (aii_q13)

Long tag: qog_std_cs_aii_q13

Original tag: aii_q13

Description:

Sub-score (0-100). Question no. 13. In practice, the body/bodies that investigate/s allegations of public sector corruption is/are effective.

A 100 score is earned where all the following conditions are met:

1) the body has a functioning system in place to receive citizens' allegations of public sector corruption,
2) it investigates most of the allegations within three months of being reported, and
3) it exercises its own initiative to start investigations when/if needed.

A 50 score is earned where any of the following conditions apply:
1) the system to receive citizens' allegations may not work for several days at a time,
2) not all cases reported are investigated or investigations take more than three months to start, or
3) the body rarely or never starts investigations out of its own initiative.

A 0 score is earned where at least one of the following conditions apply:
1) there's no system to receive citizens' allegations, or
2) cases reported are rarely or never investigated.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.17.2.13 Law: head of state and gov. can be investigated and prosecuted while in office (aii_q15)

Long tag: qog_std_cs_aii_q15

Original tag: aii_q15

Description:

Sub-score (0-100). Question no. 15. In law, the head of state and government can be investigated and prosecuted while in office if evidence suggests they committed a crime.

A 100 score is earned where the law doesn't protect the heads of state and government from being investigated and prosecuted while in office if evidence suggests they committed a crime.
A 0 score is earned where a law protects/gives immunity to the heads of state and government from being investigated and prosecuted while in office if evidence suggests they committed a crime.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.17.2.14 Practice: head of state and gov. can be investigated and prosecuted while in off (aii_q16)

Long tag: qog_std_cs_aii_q16

Original tag: aii_q16

Description:

Sub-score (0-100). Question no. 16. In practice, heads of state and government are investigated and prosecuted while in office if evidence suggest they committed a crime.

A 100 score is earned where all the following conditions are met:
1) criminal allegations against heads of state and government are investigated while they are in office,
2) heads of state and government are prosecuted when investigations find evidence of possible wrongdoing, and
3) legal punishment is imposed if/when they are found guilty.

A 50 score is earned where any of the following conditions apply:
1) not all allegations are investigated while they are in office,
2) not all investigations that find evidence of criminal activity result in prosecution, or
3) not all guilty verdicts result in legal punishment.

A 0 score is earned where at least one of the following conditions apply:
1) allegations against heads of state and government are rarely investigated while they are in office,
2) criminal evidence rarely results in prosecution, or
3) guilty verdicts rarely result in legal punishment.
A 0 also applies if the heads of state and government have immunity, therefore making it impossible in practice to investigate, prosecute or punish them.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.17.2.15 Law: there are mechanisms for citizens to report police force misconduct/abuse (aii_q17)

Long tag: qog_std_cs_aii_q17

Original tag: aii_q17

Description:

Sub-score (0-100). Question no. 17. In law, there is a mechanism for citizens to report police misconduct or abuse of force.

A 100 score is earned where a law establishes the existence of an oversight body/entity specifically mandated to investigate police misconduct or abuse of force.

A 0 score is earned when no such law exists.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.17.2.16 Practice: mechanisms for citizens to report police misconduct/abuse are effect. (aii_q18)

Long tag: qog_std_cs_aii_q18

Original tag: aii_q18

Description:

Sub-score (0-100). Question no. 18. In practice, the mechanism for citizens to report police misconduct or abuse of force is effective.

A 100 score is earned where all the following conditions are met:
1) the body has a functioning system in place to receive citizens' allegations of police misconduct or abuse of force,
2) it investigates most of the allegations within one week of being reported, and
3) it exercises its own initiative to start investigations when/if needed.

A 50 score is earned where any of the following conditions apply:
1) the system to receive citizens' allegations may not work for several days at a time,
2) not all cases reported are investigated or investigations take more than one week to start, or
3) none or only a minority of the investigations are self-started by the body.

A 0 score is earned where at least one of the following conditions are met:
1) there's no system to receive citizens' allegations, or
2) cases reported are rarely investigated.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.17.2.17 Law: independence of agencies that organize and monitor elections is guaranteed (aii_q19)

Long tag: qog_std_cs_aii_q19

Original tag: aii_q19

Description:

Sub-score (0-100). Question no. 19. In law, the independence of the agency/agencies mandated to organize and monitor national elections is guaranteed.

A 100 score is earned where all the following conditions are met:
1) the law establishes that the agency/agencies mandated to organize and monitor national elections is independent from the Executive, Legislative and Judicial branches, and
2) it establishes its right, authority or mandate to review elections, issue binding decisions, and choose the cases to be heard by the agency/agencies.

A 0 score is earned where no such law exists, or a law exists but it doesn't include all the conditions described in 100.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.17.2.18 Law: companies guilty of procurement violations can't participate in future bid (aii_q27)

Long tag: qog_std_cs_aii_q27

Original tag: aii_q27

Description:

Sub-score (0-100). Question no. 27. In law, companies found guilty of violations of procurement regulations are prohibited from participating in future bids.

A 100 score is earned where the law forbids companies found guilty of violating the law (procurement, tax, labor, corruption, etc.) from participating in future bidding in the country, whether indefinitely or for a limited period of time.

A 0 score is earned where no such law exists.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.17.2.19 Practice: companies guilty of violations cannot participate in future bids (aii_q28)

Long tag: qog_std_cs_aii_q28

Original tag: aii_q28

Description:
Sub-score (0-100). Question no. 28. In practice, companies found guilty of violating procurement regulations are prohibited from participating in future bids

A 100 score is earned where all the following conditions are met:
1) companies found guilty of violating the law (procurement, tax, labor, corruption, etc.) are forbidden from participating in future bidding in the country, whether indefinitely or for a limited period of time, and
2) there is a registry of companies forbidden from bidding that citizens can access immediately or in less than two weeks upon request. A 100 is also earned if there is a registry in place that at the time of this research is empty because no company has violated the law.

A 50 score is earned where any of the following conditions apply:
1) companies found guilty of violating the law (procurement, tax, labor, corruption, etc.) are generally forbidden from participating in future bidding, but there is evidence that some exceptions exist, or
2) citizen access to the full list of companies forbidden from participating takes more than two weeks.

A 0 score is earned where at least one of the following conditions apply:
1) companies found guilty of violating the law (procurement, tax, labor, corruption, etc.) are rarely forbidden from participating in future bidding, or
2) there is no registry of companies forbidden from participating or it exists but it's not public.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.17.2.20 Law: civil servants who report corruption cases are protected (aii_q36)

Long tag: qog_std_cs_aii_q36

Original tag: aii_q36

Description:
Sub-score (0-100). Question no. 36. In law, civil servants who report cases of corruption are protected from recrimination or other negative consequences.

A 100 score is earned where all the following conditions are met:
1) there is a law specifically created to protect public sector whistle-blowers, and
2) the law forbids termination, transfer, harassment or other negative consequences against whistle-blowers. Note: General protections for civil servants do not grant a 100.

A 0 score is earned if no such law exists.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.17.2.21 Law: senior officials of government are required to disclose records of assets (aii_q44)

Long tag: qog_std_cs_aii_q44

Original tag: aii_q44

Description:
Sub-score (0-100). Question no. 44. In law, senior officials of the three branches of government (including heads of state and government, ministers, members of Parliament, judges, etc.) are required to disclose records of their assets and disclosures are public.

A 100 score is earned where in law all the following conditions are met:
1) senior officials of the three branches of government (including heads of state and government, ministers, members of Parliament, judges, etc.) must file asset disclosures,
2) disclosures must contain all assets and income belonging to them and their immediate family (including real estate, movable property, cash, salaries, and income from investments), and
3) disclosures must be available to the public.

A 0 score is earned where at least one of the following conditions apply:
1) no such law exists or it exists but it doesn't apply to all senior officials of the three branches of government,
2) the law requires so little information as to render the disclosures useless (e.g. it doesn't require disclosing assets of the immediate family, or requires citing real estate but not movable property, cash, salaries, and income from investments), or
3) the law doesn't make the disclosures public.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.17.2.22 Law: civil service members are required to disclose assets and these are public (aii_q46)

Long tag: qog_std_cs_aii_q46

Original tag: aii_q46

Description:

Sub-score (0-100). Question no. 46. In law, members of the civil service are required to disclose records of their assets and the disclosures are public.

A 100 score is earned when in law all the following conditions are met:
1) members of the civil service must file asset disclosures,
2) disclosures must contain all assets and income belonging to them and their immediate family (including real estate, movable property, cash, salaries, and income from investments, both domestic and foreign), and
3) disclosures must be available to the public.

A 0 score is earned where at least one of the following conditions apply:
1) no such law exists or it exists but it doesn't apply to all members of the civil service,
2) the law requires so little information as to render the disclosures useless (e.g. it doesn't require disclosing assets of the immediate family, or requires citing real estate but not movable property, cash, salaries, and income from investments), or
3) the law doesn't make the disclosures public.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.17.2.23 Rule of law sub-index (aii_rol)

Long tag: qog_std_cs_aii_rol

Original tag: aii_rol

Description:

Rule of Law. This sub index from 0 to 100 is composed of:

41. In law, citizens have a right to request public information from state bodies.
42. In practice, citizen requests for public information are effective.
43. In practice, citizens can access legislative processes and documents.
44. In law, senior officials of the three branches of government (including heads of state and government, ministers, members of Parliament, judges, etc.) are required to disclose records of their assets and disclosures are public.
45. In practice, the asset disclosure process for senior officials of the three branches of government (heads of state and government, ministers, members of Parliament, judges, etc.) is effective.
46. In law, members of the civil service are required to disclose records of their assets and the disclosures are public.
47. In practice, the asset disclosure process for members of the civil service is effective.
48. In law, political parties are required to regularly disclose public donations (funds sourced from the government).
49. In practice, political parties regularly disclose public donations (funds that are sourced from the government) and the disclosures are easily available to the public.
50. In law, political parties are required to regularly disclose private donations.
51. In practice, political parties regularly disclose private donations and the disclosures are easily available to the public.
52. In practice, media organizations (print, broadcast, online) disclose the identities of their owners to the public.
53. In practice, journalists and editors adhere to strict, professional practices in their reporting.
54. In law, it is legal to report accurate news even if it damages the reputation of a public figure.
55. In practice, there is no prior government restraint (pre-publication censoring) and the government doesn't promote the media's self-censorship.
56. In practice, there is no prior government restraint (pre-publication censoring) of citizen-created content online and the government doesn't promote the self-censorship of citizens online (in blogs, social media, etc.).
57. In practice, the government does not block (or require ICT firms to block) online content.
58. In practice, ministries and autonomous agencies have websites.
59. In practice, the public services regulatory agencies and the national ombudsman (when and if there is one) have websites.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.17.2.24 Civil Rights (bti_cr)

Long tag: qog_std_cs_bti_cr

Original tag: bti_cr

Description:

To what extent are civil rights guaranteed and protected, and to what extent can citizens seek redress for violations of these rights? 1-10.

1. Civil rights are not guaranteed and frequently violated. There are no mechanisms and institutions to protect citizens against violations of their rights.
4. Civil rights are guaranteed only within limited enclaves or are violated over protracted periods of time. Some mechanisms and institutions to prosecute, punish and redress violations of civil rights are established formally, but do not function.
7. Civil rights are guaranteed, but are partially or temporarily violated or are not protected in some parts of

the country. Mechanisms and institutions to prosecute, punish and redress violations of civil rights are in place, but often prove to be ineffective.
10. Civil rights are guaranteed by the constitution and respected by all state institutions. Infringements present an extreme exception. Citizens are effectively protected by mechanisms and institutions established to prosecute, punish and redress violations of their rights.

Variable citation: Donner, S., Hartmann, H., & Schwarz, R. (2020). *Transformation index of the bertelsmann stiftung 2020*. Bertelsmann Stiftung. `http://www.bti-project.org`

2.17.2.25 Freedom of Expression (bti_foe)

Long tag: qog_std_cs_bti_foe

Original tag: bti_foe

Description:
To what extent can citizens, organizations and the mass media express opinions freely? 1-10.

1. Freedom of expression is denied. Independent media do not exist or are prohibited.
4. Freedom of expression is often subject to interference or government restrictions. Distortion and manipulation shape matters of public debate.
7. Freedom of expression is occasionally subject to interference or government restrictions, but there are generally no incidents of blatant intrusions like outright state censorship or media shutdowns.
10. Freedom of expression is guaranteed against interference or government restrictions. Individuals, groups and the press can fully exercise these rights.

Variable citation: Donner, S., Hartmann, H., & Schwarz, R. (2020). *Transformation index of the bertelsmann stiftung 2020*. Bertelsmann Stiftung. `http://www.bti-project.org`

2.17.2.26 Independent Judiciary (bti_ij)

Long tag: qog_std_cs_bti_ij

Original tag: bti_ij

Description:
To what extent does an independent judiciary exist? 1-10.

1. The judiciary is not independent and not institutionally differentiated.
4. The independence of the judiciary is heavily impaired by political authorities and high levels of corruption. It is to some extent institutionally differentiated, but severely restricted by functional deficits, insufficient territorial operability and scarce resources.
7. The judiciary is largely independent, even though occasionally its decisions are subordinated to political authorities or influenced by corruption. It is institutionally differentiated, but partially restricted by insufficient territorial or functional operability.
10. The judiciary is independent and free both from unconstitutional intervention by other institutions and from corruption. It is institutionally differentiated, and there are mechanisms for judicial review of legislative or executive acts.

Variable citation: Donner, S., Hartmann, H., & Schwarz, R. (2020). *Transformation index of the bertelsmann stiftung 2020*. Bertelsmann Stiftung. `http://www.bti-project.org`

2.17.2.27 Prosecution of Office Abuse (bti_poa)

Long tag: qog_std_cs_bti_poa

Original tag: bti_poa

Description:
To what extent are public officeholders who abuse their positions prosecuted or penalized? 1-10.

1. Office holders who break the law and engage in corruption can do so without fear of legal consequences or adverse publicity.
4. Office holders who break the law and engage in corruption are not prosecuted adequately under the law, but occasionally attract adverse publicity.
7. Officeholders who break the law and engage in corruption generally are prosecuted under established laws and often attract adverse publicity, but occasionally slip through political, legal or procedural loopholes.
10. Officeholders who break the law and engage in corruption are prosecuted rigorously under established laws and always attract adverse publicity.

Variable citation: Donner, S., Hartmann, H., & Schwarz, R. (2020). *Transformation index of the bertelsmann stiftung 2020*. Bertelsmann Stiftung. `http://www.bti-project.org`

2.17.2.28 Duty of the People is to Build Country in Constitution (ccp_buildsoc)

Long tag: qog_std_cs_ccp_buildsoc

Original tag: ccp_buildsoc

Description:
Does the constitution refer to a duty of the people to take part in building society or to work for the development of the country?

1. Yes
2. No
96. Other

Variable citation: Elkins, Z., & Ginsburg, T. (2021). Characteristics of national constitutions, version 3.0 [Last modified: May 20, 2021. Available at comparativeconstitutionsproject.org]. `http://www.comparativeconstitutionsproject.org`

2.17.2.29 Corruption Commission Present in Constitution (ccp_cc)

Long tag: qog_std_cs_ccp_cc

Original tag: ccp_cc

Description:
Does the constitution contain provisions for a counter corruption commission?

1. Yes
2. No
96. Other
97. Unable to determine

Variable citation: Elkins, Z., & Ginsburg, T. (2021). Characteristics of national constitutions, version 3.0 [Last modified: May 20, 2021. Available at comparativeconstitutionsproject.org]. `http://www.comparativeconstitutionsproject.org`

2.17.2.30 Limits on Child Work in Constitution (ccp_childwrk)

Long tag: qog_std_cs_ccp_childwrk

Original tag: ccp_childwrk

Description:
Does the constitution place limits on child employment?

1. Yes
2. No
90. Left explicitly to non-constitutional law
96. Other

Variable citation: Elkins, Z., & Ginsburg, T. (2021). Characteristics of national constitutions, version 3.0 [Last modified: May 20, 2021. Available at comparativeconstitutionsproject.org]. `http://www.comparativeconstitutionsproject.org`

2.17.2.31 Meritocratic Recruitment of Civil Servants Mentioned in Constitution (ccp_civil)

Long tag: qog_std_cs_ccp_civil

Original tag: ccp_civil

Description:
Does the constitution include provisions for the meritocratic recruitment of civil servants (e.g. exams or credential requirements)?

1. Yes
2. No
96. Other

Variable citation: Elkins, Z., & Ginsburg, T. (2021). Characteristics of national constitutions, version 3.0 [Last modified: May 20, 2021. Available at comparativeconstitutionsproject.org]. `http://www.comparativeconstitutionsproject.org`

2.17.2.32 Equality Before the Law Mentioned in Constitution (ccp_equal)

Long tag: qog_std_cs_ccp_equal

Original tag: ccp_equal

Description:
Does the constitution refer to equality before the law, the equal rights of men, or non-discrimination?

1. Yes
2. No
96. Other

Variable citation: Elkins, Z., & Ginsburg, T. (2021). Characteristics of national constitutions, version 3.0 [Last modified: May 20, 2021. Available at comparativeconstitutionsproject.org]. `http://www.comparativeconstitutionsproject.org`

2.17.2.33 Freedom of Religion in Constitution (ccp_freerel)

Long tag: qog_std_cs_ccp_freerel

Original tag: ccp_freerel

Description:

Does the constitution provide for freedom of religion?

1. Yes
2. No
96. Other

Variable citation: Elkins, Z., & Ginsburg, T. (2021). Characteristics of national constitutions, version 3.0 [Last modified: May 20, 2021. Available at comparativeconstitutionsproject.org]. `http://www.comparativeconstitutionsproject.org`

2.17.2.34 Human Rights Commission Present in Constitution (ccp_hr)

Long tag: qog_std_cs_ccp_hr

Original tag: ccp_hr

Description:

Does the constitution contain provisions for a human rights commission?

1. Yes
2. No
96. Other

Variable citation: Elkins, Z., & Ginsburg, T. (2021). Characteristics of national constitutions, version 3.0 [Last modified: May 20, 2021. Available at comparativeconstitutionsproject.org]. `http://www.comparativeconstitutionsproject.org`

2.17.2.35 Right to Government Documents in Constitution (ccp_infoacc)

Long tag: qog_std_cs_ccp_infoacc

Original tag: ccp_infoacc

Description:

Does the constitution provide for an individual right to view government files or documents under at least some conditions?

1. Yes
2. No
96. Other

Variable citation: Elkins, Z., & Ginsburg, T. (2021). Characteristics of national constitutions, version 3.0 [Last modified: May 20, 2021. Available at comparativeconstitutionsproject.org]. `http://www.comparativeconstitutionsproject.org`

2.17.2.36 Reference in Constitution to Capitalism (ccp_market)

Long tag: qog_std_cs_ccp_market

Original tag: ccp_market

Description:

Does the constitution refer to the “free market,” “capitalism,” or an analogous term?

1. Yes
2. No
96. Other

Variable citation: Elkins, Z., & Ginsburg, T. (2021). Characteristics of national constitutions, version 3.0 [Last modified: May 20, 2021. Available at comparativeconstitutionsproject.org]. `http://www.comparativeconstitutionsproject.org`

2.17.2.37 Status of Slavery in Constitution (ccp_slave)

Long tag: qog_std_cs_ccp_slave

Original tag: ccp_slave

Description:
Does the constitution prohibit slavery, servitude, or forced labor?

1. Universally prohibited
2. Prohibited except in the case of war
3. Prohibited with other exception(s)n
90. Left explicitly to non-constitutional law
96. Other
98. Not specified

Variable citation: Elkins, Z., & Ginsburg, T. (2021). Characteristics of national constitutions, version 3.0 [Last modified: May 20, 2021. Available at comparativeconstitutionsproject.org]. `http://www.comparativeconstitutionsproject.org`

2.17.2.38 Right to Strike in Constitution (ccp_strike)

Long tag: qog_std_cs_ccp_strike

Original tag: ccp_strike

Description:
Does the constitution provide for a right to strike?

1. Yes
2. Yes, but with limitations
3. No
96. Other

Variable citation: Elkins, Z., & Ginsburg, T. (2021). Characteristics of national constitutions, version 3.0 [Last modified: May 20, 2021. Available at comparativeconstitutionsproject.org]. `http://www.comparativeconstitutionsproject.org`

2.17.2.39 New Constitutional System (ccp_syst)

Long tag: qog_std_cs_ccp_syst

Original tag: ccp_syst

Description:
Identifies new constitutional systems.

Variable citation: Elkins, Z., & Ginsburg, T. (2021). Characteristics of national constitutions, version 3.0 [Last modified: May 20, 2021. Available at comparativeconstitutionsproject.org]. `http://www.comparativeconstitutionsproject.org`

2.17.2.40 Year in which the Constitutional System was Promulgated (ccp_systyear)

Long tag: qog_std_cs_ccp_systyear

Original tag: ccp_systyear

Description:
Year in which the constitutional system was promulgated.

Variable citation: Elkins, Z., & Ginsburg, T. (2021). Characteristics of national constitutions, version 3.0 [Last modified: May 20, 2021. Available at comparativeconstitutionsproject.org]. `http://www.comparativeconstitutionsproject.org`

2.17.2.41 Duty of People is to Pay Taxes in Constitution (ccp_taxes)

Long tag: qog_std_cs_ccp_taxes

Original tag: ccp_taxes

Description:
Does the constitution refer to a duty to pay taxes?

1. Yes
2. No
96. Other

Variable citation: Elkins, Z., & Ginsburg, T. (2021). Characteristics of national constitutions, version 3.0 [Last modified: May 20, 2021. Available at comparativeconstitutionsproject.org]. `http://www.comparativeconstitutionsproject.org`

2.17.2.42 Trust in Legal System (ess_trlegal)

Long tag: qog_std_cs_ess_trlegal

Original tag: ess_trlegal

Description:
Please tell me on a score of 0-10 how much you personally trust each of the institutions I read out. 0 means you do not trust an institution at all, and 10 means you have complete trust. The Legal System.

Variable citation: NSD - Norwegian Centre for Research Data. (2018). European social survey cumulative file, ess 1-8 [Data Archive and distributor of ESS data for ESS ERIC]. `http://www.europeansocialsurvey.org/`

2.17.2.43 Trust in Police (ess_trpolice)

Long tag: qog_std_cs_ess_trpolice

Original tag: ess_trpolice

Description:
Please tell me on a score of 0-10 how much you personally trust each of the institutions I read out. 0 means you do not trust an institution at all, and 10 means you have complete trust. The Police.

Variable citation: NSD - Norwegian Centre for Research Data. (2018). European social survey cumulative file, ess 1-8 [Data Archive and distributor of ESS data for ESS ERIC]. `http://www.europeansocialsurvey.org/`

2.17.2.44 Associational and Organizational Rights (fh_aor)

Long tag: qog_std_cs_fh_aor

Original tag: fh_aor

Description:
Associational and Organizational Rights - The variable evaluates the freedom of assembly, demonstrations and open public discussion; the freedom for nongovernmental organizations; and the freedom for trade unions, peasant organizations and other professional and private organizations. Countries are graded between 0 (worst) and 12 (best).

Variable citation: Freedom House. (2021a). Freedom in the world 2021. `https://freedomhouse.org/report/freedom-world`

2.17.2.45 Civil Liberties (fh_cl)

Long tag: qog_std_cs_fh_cl

Original tag: fh_cl

Description:
Civil Liberties Rating - Civil liberties allow for the freedoms of expression and belief, associational and organizational rights, rule of law, and personal autonomy without interference from the state. The more specific list of rights considered vary over the years. Countries are graded between 1 (most free) and 7 (least free).

Variable citation: Freedom House. (2021a). Freedom in the world 2021. `https://freedomhouse.org/report/freedom-world`

2.17.2.46 Freedom of Expression and Belief (fh_feb)

Long tag: qog_std_cs_fh_feb

Original tag: fh_feb

Description:
Freedom of Expression and Belief - The variable measures the freedom and independence of the media and other cultural expressions; the freedom of religious groups to practice their faith and express themselves; the academic freedom and freedom from extensive political indoctrination in the educational system; and the ability of the people to engage in private (political) discussions without fear of harassment or arrest by the authorities. Countries are graded between 0 (worst) and 16 (best).

Variable citation: Freedom House. (2021a). Freedom in the world 2021. `https://freedomhouse.org/report/freedom-world`

2.17.2.47 Personal Autonomy and Individual Rights (fh_pair)

Long tag: qog_std_cs_fh_pair

Original tag: fh_pair

Description:
Personal Autonomy and Individual Rights - The variable evaluates the extent of state control over travel, choice of residence, employment or institution of higher education; the right of citizens to own property and establish private businesses; the private business' freedom from unduly influence by government officials, security forces, political parties or organized crime; gender equality, freedom of choice of marriage partners and size of family; equality of opportunity and absence of economic exploitation. Countries are graded between 0 (worst) and 16 (best).

Variable citation: Freedom House. (2021a). Freedom in the world 2021. `https://freedomhouse.org/report/freedom-world`

2.17.2.48 Rule of Law (fh_rol)

Long tag: qog_std_cs_fh_rol

Original tag: fh_rol

Description:

Rule of Law - The variable measures the independence of the judiciary; the extent to which rule of law prevails in civil and criminal matters; the existence of direct civil control over the police; the protection from political terror, unjustified imprisonment, exile and torture; absence of war and insurgencies; and the extent to which laws, policies and practices guarantee equal treatment of various segments of the population. Countries are graded between 0 (worst) and 16 (best).

Variable citation: Freedom House. (2021a). Freedom in the world 2021. `https://freedomhouse.org/report/freedom-world`

2.17.2.49 Legal Structure and Security of Property Rights (current) (fi_legprop)

Long tag: qog_std_cs_fi_legprop

Original tag: fi_legprop

Description:

The index ranges from 0-10 where 0 corresponds to "no judicial independence", "no trusted legal framework exists", "no protection of intellectual property", "military interference in rule of law", and "no integrity of the legal system" and 10 corresponds to "high judicial independence", "trusted legal framework exists", "protection of intellectual property", "no military interference in rule of law", and "integrity of the legal system". The index consists of the following indicators: Judicial independence: The judiciary is independent and not subject to interference by the government or parties in dispute, Impartial courts: A trusted legal framework exists for private businesses to challenge the legality of government actions or regulations, Protection of intellectual property, Military interference in rule of law and the political process, Integrity of the legal system.

Variable citation: Gwartney, J., Lawson, R., Hall, J., Murphy, R., Callais, J. T., Fike, R., Geloso, V., Kahli, N. S., McMahon, F., & van Staden, M. (2021). 2.17.2.50 Legal Structure and Security of Property Rights (panel data) (fi_legprop_pd)

Long tag: qog_std_cs_fi_legprop_pd

Original tag: fi_legprop_pd

Description:

The index ranges from 0-10 where 0 corresponds to "no judicial independence", "no trusted legal framework exists", "no protection of intellectual property", "military interference in rule of law", and "no integrity of the legal system" and 10 corresponds to "high judicial independence", "trusted legal framework exists", "protection of intellectual property", "no military interference in rule of law", and "integrity of the legal system". The index consists of the following indicators: Judicial independence: The judiciary is independent and not subject to interference by the government or parties in dispute, Impartial courts: A trusted legal framework exists for private businesses to challenge the legality of government actions or regulations, Protection of intellectual property, Military interference in rule of law and the political process, Integrity of the legal system. Panel-data adjusted.

Variable citation: Gwartney, J., Lawson, R., Hall, J., Murphy, R., Callais, J. T., Fike, R., Geloso, V., Kahli, N. S., McMahon, F., & van Staden, M. (2021). 2.17.2.51 Minority Shareholder Rights (gc_shr)

Long tag: qog_std_cs_gc_shr

Original tag: gc_shr

Description:

The ten key legal provisions identified as most relevant to the protection of minority shareholder rights are coded by a team of legal scholars coded between 0 and 1. The measures are not dichotomous because intermediate scores between 0 and 1 are possible. The sum of the scores for each of the ten legal provisions are the value of the variable, ranging from 0 to 10.

The ten legal provisions protecting the rights of minority shareholders:
1. Powers of the general meeting for de facto changes
2. Agenda-setting power
3. Anticipation of shareholder decision facilitated
4. Prohibition of multiple voting rights (super voting rights)

5. Independent board members
6. Feasibility of directors' dismissal
7. Private enforcement of directors' duties (derivative suit)
8. Shareholder action against resolutions of the general meeting
9. Mandatory bid
10. Disclosure of major share ownership

Variable citation: Guillen, M., & Capron, L. (2016). State capacity, minority shareholder protections, and stock market development. *Administrative Science Quarterly*, 61(1), 125–160

2.17.2.52 Corruption Perception-Judges: Most (percent respondents) (gcb_pcjmost)

Long tag: qog_std_cs_gcb_pcjmost

Original tag: gcb_pcjmost

Description:
Percentage of respondents who answered 'Most or All' to the following question about Judges and Magistrates: How many of the following people do you think are involved in corruption, or haven't you heard enough about them to say?

Variable citation: Transparency International (2017). Global corruption barometer 9th edition. `https://www.transparency.org/research/gcb`

2.17.2.53 Corruption Perception-Judges: Some (percent respondents) (gcb_pcjsome)

Long tag: qog_std_cs_gcb_pcjsome

Original tag: gcb_pcjsome

Description:
Percentage of respondents who answered 'Some or None' to the following question about Judges and Magistrates: How many of the following people do you think are involved in corruption, or haven't you heard enough about them to say?

Variable citation: Transparency International (2017). Global corruption barometer 9th edition. `https://www.transparency.org/research/gcb`

2.17.2.54 Corruption Perception-Police: Most (percent respondents) (gcb_pcpolmost)

Long tag: qog_std_cs_gcb_pcpolmost

Original tag: gcb_pcpolmost

Description:
Percentage of respondents who answered 'Most or All' to the following question about the Police: How many of the following people do you think are involved in corruption, or haven't you heard enough about them to say?

Variable citation: Transparency International (2017). Global corruption barometer 9th edition. `https://www.transparency.org/research/gcb`

2.17.2.55 Corruption Perception-Police: Some (percent respondents) (gcb_pcpolsome)

Long tag: qog_std_cs_gcb_pcpolsome

Original tag: gcb_pcpolsome

Description:
Percentage of respondents who answered 'Some or None' to the following question about the Police: How many of the following people do you think are involved in corruption, or haven't you heard enough about them to say?

Variable citation: Transparency International (2017). Global corruption barometer 9th edition. `https://www.transparency.org/research/gcb`

2.17.2.56 Independent Judiciary (h_j)

Long tag: qog_std_cs_h_j

Original tag: h_j

Description:
Dummy variable coded 1 if there is an independent judiciary (based on information from Polity's Executive Constraints, p_xconst) and - where available - on ICRG's index of Law
Order.

Variable citation: Henisz, W. J. (2017). The Political Constraint Index (POLCON) Dataset 2017 release. `https://mgmt.wharton.upenn.edu/profile/1327`

2.17.2.57 Rights (iiag_rig)

Long tag: qog_std_cs_iiag_rig

Original tag: iiag_rig

Description:

Rights is one of the four sub-categories that are used to calculate the Participation, Rights Inclusion category score. It consists of five indicators from six data sources.

Variable citation: Mo Ibrahim Foundation. (2020). The Ibrahim Index of African Governance. `http://mo.ibrahim.foundation/iiag/`

2.17.2.58 Index of Public Integrity (overall) (ipi_ipi)

Long tag: qog_std_cs_ipi_ipi

Original tag: ipi_ipi

Description:

The Index of Public Integrity (IPI) aims to capture a snapshot of this balance in 114 countries for which data is available. It is a composite index consisting of six components. For the 2015, 2017 and 2019 editions, the components were: administrative burden, trade openness, budget transparency for opportunities, and judicial independence, e-citizenship and freedom of the press for constraints.

Starting from the 2021 edition, administrative burden and trade openness have been replaced by administrative transparency and online services, due to unavailable alternative data on the original components (based on the World Bank Doing Business project, which closed).. Below you will find an outline of the methodology behind the IPI, detailing recent changes.

A more extensive explanation of the methodology and the original composition of the IPI can be found in the following peer-reviewed publication:

Measuring Control of Corruption by a New Index of Public Integrity - Mungiu-Pippidi, A., Dadašov, R. Measuring Control of Corruption by a New Index of Public Integrity. European Journal on Criminal Policy Research 22, 415-438 (2016).

Variable citation: Mungiu–Pippidi, A., Dadasov, R., Martinez–Kukutschka, R., Alvarado–Pachon, N., Dykes, V., Kossow, N., & Khaghaghordyan, A. (2019). Index of public integrity. `http://www.integrity-index.org`

2.17.2.59 Structure of central gov. expenditures, public order and safety (oecd_gengovdistri_t1c)

Long tag: qog_std_cs_oecd_gengovdistri_t1c

Original tag: oecd_gengovdistri_t1c

Description:

Structure of central government expenditures, public order and safety.

Variable citation: Organisation for Economic Co-operation and Development. (2021). Country statistical profiles: Key tables from OECD. `https://doi.org/10.1787/20752288`

2.17.2.60 Legislature corrupt activities (vdem_gcrrpt)

Long tag: qog_std_cs_vdem_gcrrpt

Original tag: vdem_gcrrpt

Description:

Legislature corrupt activities. Do members of the legislature abuse their position for financial gain?

Clarification: This includes any of the following: (a) accepting bribes, (b) helping to obtain government contracts for firms that the legislator (or his/her family/friends/political supporters) own, (c) doing favors for firms in exchange for the opportunity of employment after leaving the legislature, (d) stealing money from the state or from campaign donations for personal use. V-Dem uses a specifically designed measurement model to provide country-year point estimates, aggregated from multiple codings submitted by country experts by taking disagreement and measurement error into account. In this version of the variable, used in the QoG dataset, V-Dem has linearly translated the measurement model point estimates back to the original ordinal scale of each variable as an interval measure.

Variable citation: Coppedge, M., Gerring, J., Knutsen, C. H., Lindberg, S. I., Teorell, J., Alizada, N., Altman, D., Bernhard, M., Cornell, A., Fish, M. S., Gastaldi, L., Gjerløw, H., Glynn, A., Hicken, A., Hindle, G., Ilchenko,

N., Krusell, J., Luhrmann, A., Maerz, S. F., . . . Ziblatt, D. (2021). V-dem [country-year/country-date] dataset v11.1. `https://doi.org/10.23696/vdemds21` Pemstein, D., Marquardt, K. The V-Dem measurement model: Latent variable analysis for crossnational and cross-temporal expert-coded data

2.17.2.61 Judicial corruption decision (vdem_jucorrdc)

Long tag: qog_std_cs_vdem_jucorrdc

Original tag: vdem_jucorrdc

Description:

Judicial corruption decision. Question: How often do individuals or businesses make undocumented extra payments or bribes in order to speed up or delay the process or to obtain a favorable judicial decision? V-Dem uses a specifically designed measurement model to provide country-year point estimates, aggregated from multiple codings submitted by country experts by taking disagreement and measurement error into account. In this version of the variable, used in the QoG dataset, V-Dem has linearly translated the measurement model point estimates back to the original ordinal scale of each variable as an interval measure.

Variable citation: Coppedge, M., Gerring, J., Knutsen, C. H., Lindberg, S. I., Teorell, J., Alizada, N., Altman, D., Bernhard, M., Cornell, A., Fish, M. V-dem [country-year/country-date] dataset v11.1. `https://doi.org/10.23696/vdemds21` Pemstein, D., Marquardt, K. L., Tzelgov, E., Wang, Y.-t., Medzihorsky, J., Krusell, J., Miri, F., & von Römer, J. (2021). The V-Dem measurement model: Latent variable analysis for crossnational and cross-temporal expert-coded data

2.17.2.62 Rule of Law, Estimate (wbgi_rle)

Long tag: qog_std_cs_wbgi_rle

Original tag: wbgi_rle

Description:

Rule of Law - Estimate: "Rule of Law" includes several indicators which measure the extent to which agents have confidence in and abide by the rules of society. These include perceptions of the incidence of crime, the effectiveness and predictability of the judiciary, and the enforceability of contracts. Together, these indicators measure the success of a society in developing an environment in which fair and predictable rules form the basis for economic and social interactions and the extent to which property rights are protected.

Variable citation: Kaufmann, D., Kraay, A., & Mastruzzi, M. (2010). The worldwide governance indicators: A summary of methodology, data and analytical issues. *World Bank Policy Research Working Paper, 5430*

2.17.2.63 Rule of Law, Number of Sources (wbgi_rln)

Long tag: qog_std_cs_wbgi_rln

Original tag: wbgi_rln

Description:

Rule of Law - Number of Sources.

Variable citation: Kaufmann, D., Kraay, A., & Mastruzzi, M. (2010). The worldwide governance indicators: A summary of methodology, data and analytical issues. *World Bank Policy Research Working Paper, 5430*

2.17.2.64 Rule of Law, Standard Error (wbgi_rls)

Long tag: qog_std_cs_wbgi_rls

Original tag: wbgi_rls

Description:

Rule of Law - Standard Errors.

Variable citation: Kaufmann, D., Kraay, A., & Mastruzzi, M. (2010). The worldwide governance indicators: A summary of methodology, data and analytical issues. *World Bank Policy Research Working Paper, 5430*

2.17.2.65 Intentional homicides (per 100,000 people) (wdi_homicides)

Long tag: qog_std_cs_wdi_homicides

Original tag: wdi_homicides

Description:

Intentional homicides are estimates of unlawful homicides purposely inflicted as a result of domestic disputes, interpersonal violence, violent conflicts over land resources, intergang violence over turf or control, and predatory violence and killing by armed groups. Intentional homicide does not include all intentional killing; the difference is usually in the organization of the killing. Individuals or small groups usually commit homicide, whereas killing in armed conflict is usually committed by fairly cohesive groups of up to several hundred members and is thus usually excluded.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.2.66 CPIA property rights and rule-based governance rating (1=low to 6=high) (wdi_prrbgr)

Long tag: qog_std_cs_wdi_prrbgr

Original tag: wdi_prrbgr

Description:

Property rights and rule-based governance assess the extent to which private economic activity is facilitated by an effective legal system and rule-based governance structure in which property and contract rights are reliably respected and enforced.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.2.67 Judicial independence. 1-7 (best) (wef_ji)

Long tag: qog_std_cs_wef_ji

Original tag: wef_ji

Description:

Judicial independence. 1-7 (best). In your country, how independent is the judicial system from influences of the government, individuals, or companies? [1 = not independent at all; 7 = entirely independent] Original sources: World Economic Forum, Executive Opinion Survey

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. `http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf`

2.17.2.68 Organized crime. 1-7 (best) (wef_oc)

Long tag: qog_std_cs_wef_oc

Original tag: wef_oc

Description:

Organized crime. 1-7 (best). In your country, to what extent does organized crime (mafia-oriented racketeering, extortion) impose costs on businesses? [1 = to a great extent-imposes huge costs; 7 = not at all-imposes no costs] Original sources: World Economic Forum, Executive Opinion Survey

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. `http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf`

2.17.2.69 Reliability of police services. 1-7 (best) (wef_rps)

Long tag: qog_std_cs_wef_rps

Original tag: wef_rps

Description:

Reliability of police services. 1-7 (best). In your country, to what extent can police services be relied upon to enforce law and order? [1 = not at all; 7 = to a great extent] Original sources: World Economic Forum, Executive Opinion Survey

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. `http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf`

2.17.2.70 Workers' rights. 1-100 (best) (wef_wr)

Long tag: qog_std_cs_wef_wr

Original tag: wef_wr

Description:

Workers' rights. 1-100 (best). This index is adapted from the ITUC Global Rights Index, which measures the level of protection of internationally recognized core Labour standards including civil rights, the right to bargain collectively, the right to strike, the right to associate freely, and access to due process rights. It does not take into account any element of firing regulations. The scale ranges from 1 [no protection] to 100 [high protection]. Original sources: International Trade Union Confederation (ITUC), World Economic Forum

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. `http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf`

2.17.2.71 Confidence: Justice System/Courts (wvs_confjs)

Long tag: qog_std_cs_wvs_confjs

Original tag: wvs_confjs

Description:

I am going to name a number of organizations. For each one, could you tell me how much confidence you have in them: Justice System/Courts

1. None at all
2. Not very much
3. Quite a lot
4. A great deal

2.17.3 Quality of Government

This category includes variables that are the core features of QoG (impartiality, bureaucratic quality and corruption) as well as measures that are broader (rule of law and transparency).

2.17.3.1 Civil Service Integrity sub-index (aii_cilser)

Long tag: qog_std_cs_aii_cilser

Original tag: aii_cilser

Description:

Civil Service Integrity. This sub index from 0 to 100 is composed of:

19. In law, the independence of the agency/agencies mandated to organize and monitor national elections is guaranteed.
20. In practice, appointments to the agency/agencies mandated to organize and monitor national elections support the independence of the agency/agencies.
21. In practice, the agency/agencies mandated to organize and monitor national elections is/are protected from political interference.
22. In practice, the agency/agencies mandated to organize and monitor national elections make/s timely, publicly available reports before and after a national election.
23. In practice, candidates/political parties have equitable access to state-owned media outlets.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.17.3.2 Elections sub-index (aii_elec)

Long tag: qog_std_cs_aii_elec

Original tag: aii_elec

Description:

Elections. This sub index from 0 to 100 is composed of:

24. In law, major public procurements require competitive bidding.
25. In practice, major public procurements involve competitive bidding.
26. In practice, citizens can access the results and documents associated with procurement contracts (full contract, proposals, execution reports, financial audits, etc.).
27. In law, companies found guilty of violations of procurement regulations are prohibited from participating in future bids.
28. In practice, companies found guilty of violating procurement regulations are prohibited from participating in future bids.
29. In practice, citizens can access the financial records of state-owned companies.
30. In practice, citizens can access the financial records associated with natural resources exploitation (gas, oil and mining), whether they involve the participation of public or private corporations.
31. In practice, significant public expenditure receives legislative approval on an annual basis.
32. In law, both the executive's budget proposal and the approved budget must be published in full every year.
33. In practice, a legislative committee exercises oversight of public funds.

2.17.3.3 Public management sub-index (aii_pubm)

Long tag: qog_std_cs_aii_pubm

Original tag: aii_pubm

Description:

Public Management. This sub index from 0 to 100 is composed of:

35. In law, civil servants are required to report cases of alleged corruption.
36. In law, civil servants who report cases of corruption are protected from recrimination or other negative consequences.
37. In law, there are formal rules to prevent conflicts of interest, nepotism, cronyism and patronage in all branches of government.
38. In practice, civil servants' work is not compromised by political interference.
39. In practice, civil servants are appointed and evaluated according to professional criteria.
40. In law, there are restrictions for civil servants entering the private sector after leaving the government.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.17.3.4 Practice: appointments to audit institution support agency's independ. (aii_q08)

Long tag: qog_std_cs_aii_q08

Original tag: aii_q08

Description:

Sub-score (0-100). Question no. 8. In practice, appointments to the supreme audit institution support the independence of the agency.

A 100 score is earned where all the following conditions are met:
1) appointments to positions in the agency follow a merit-based system,
2) appointees are free of conflicts of interest due to personal loyalties, family connections, political party affiliations or other biases, and
3) auditors are disciplined/removed/transferred only through due process by a peer panel/oversight body.

A 50 score is earned where any of the following conditions apply:
1) appointments don't always follow a merit-based system,
2) appointees sometimes have conflicts of interest, or
3) auditors are sometimes disciplined/removed/transferred without observing due process by a peer panel/oversight body.

A 0 score is earned where at least one of the following conditions apply:
1) appointments to positions in the agency rarely or never follow a merit-based system, or the merit-base system is so weak that individuals with less merit are usually appointed over those with more merit,
2) appointees usually have conflicts of interest due to personal loyalties, family connections, political party affiliations or other biases, or
3) appointees are usually disciplined/removed/transferred without observing due process by a peer panel/oversight body.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.17.3.5 Practice: the supreme audit agency releases frequent reports (aii_q09)

Long tag: qog_std_cs_aii_q09

Original tag: aii_q09

Description:
Sub-score (0-100). Question no. 9. In practice, the supreme audit agency releases frequent reports that are accessible to citizens.

A 100 score is earned where all the following conditions are met:
1) the agency in average publishes 10 reports or more per year, and
2) the reports are published less than one month after issued, and
3) they are accessible online or on paper within two weeks of requested at photocopying cost.

A 50 score is earned where any of the following conditions apply:
1) the agency publishes between three and nine reports per year,
2) the reports are published more than one month after issued, or
3) they are available on paper but it takes more than two weeks after requested to obtain them or costs are higher than photocopying.

A 0 score is earned where at least one of the following conditions apply:
1) the audit institution publishes one or less reports per year, or
2) the reports are not available to citizens.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.17.3.6 Law: corruption is criminalized as a specific offense (aii_q10)

Long tag: qog_std_cs_aii_q10

Original tag: aii_q10

Description:
Sub-score (0-100). Question no. 10. In law, corruption is criminalized as a specific offense.

A 100 score is earned where a national law criminalizes corruption as a specific offence(s) for at least three of the following: extortion, offering a bribe, accepting a bribe, kickbacks, using public resources for private gain, using confidential state information for private gain, money laundering, conspiring or attempting to commit any of the above, organized crime and trafficking.
A 0 score is earned where no such law exists, or a law exists but it alludes to corruption in general terms without criminalizing specific offences.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.17.3.7 Practice: appointees to bodies investigating pubsec corruption support independ. (aii_q14)

Long tag: qog_std_cs_aii_q14

Original tag: aii_q14

Description:
Sub-score (0-100). Question no. 14. In practice, appointments to the body/bodies that investigate/s allegations of public sector corruption support/s the independence of the body.

A 100 score is earned where all the following conditions are met:
1) appointments follow a merit-based system,
2) appointees are free of conflicts of interest due to personal loyalties, family connections, political party affiliations or other biases, and
3) appointees are disciplined/removed/transferred only through due process by a peer panel/oversight body.

A 50 score is earned where any of the following conditions apply:
1) appointments don't always follow the merit-based system,
2) appointees occasionally have conflicts of interest, or
3) appointees are occasionally disciplined/removed/transferred without observing due process by a peer panel/oversight body.

A 0 score is earned where at least one of the following conditions apply:
1) appointments to positions in the body rarely follow a merit-based system,
2) individuals appointed usually have conflicts of interest due to personal loyalties, family connections, political party affiliations or other biases, or
3) due process by a peer panel/oversight body is rarely or never followed to discipline/remove/transfer the appointees.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.17.3.8 Practice: appointees to agencies organizing elections support agencies' independ (aii_q20)

Long tag: qog_std_cs_aii_q20

Original tag: aii_q20

Description:
Sub-score (0-100). Question no. 20. In practice, appointments to the agency/agencies mandated to organize and monitor national elections support the independence of the agency/agencies.

A 100 score is earned where electoral officials are always chosen through merit-selection systems.

A 50 score is earned where electoral officials are generally chosen through merit-selection systems, but there are exceptions (e.g. sometimes candidates with less merit are selected over those with more merit).

A 0 score is earned where electoral officials are rarely chosen through merit-selection systems, or the selection system is so weak it can't guarantee candidates are appointed based on merit (e.g. no legal education is required, the President has discretion to decide who the top candidates are, etc.).

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.17.3.9 Practice: agencies that organize elections are protected from pol. interference (aii_q21)

Long tag: qog_std_cs_aii_q21

Original tag: aii_q21

Description:
Sub-score (0-100). Question no. 21. In practice, the agency/agencies mandated to organize and monitor national elections is/are protected from political interference.

A 100 score is earned where all the following conditions are met:
1) appointees are disciplined/removed only through due process by a peer panel/oversight body, and
2) appointees are not removed when a new administration takes power.

A 50 score is earned where any of the following conditions apply:
1) appointees are occasionally disciplined/removed/transferred without following due process by a peer panel/oversight body, or
2) appointees are occasionally removed when a new administration takes power.

A 0 score is earned where at least one of the following conditions apply:
1) appointees are usually disciplined/removed without following due process, or the due process is so weak it doesn't support independence (e.g. members of the Executive or Legislative branches are part of the panel that conducts the due process), or
2) appointees are usually removed when a new administration takes power.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.17.3.10 Practice: reports before after a national election are publicly available (aii_q22)

Long tag: qog_std_cs_aii_q22

Original tag: aii_q22

Description:
Sub-score (0-100). Question no. 22. In practice, the agency/agencies mandated to organize and monitor national elections make/s timely, publicly available reports before and after a national election.

A 100 score is earned where all the following conditions are met:
1) the agency/agencies publish/es at least one report before the election and one report after the election, and
2) the publications are easily accessible to citizens less than one month after issuance online or at cost of photocopying.

A 50 score is earned where any of the following conditions apply:
1) the agency only publishes one report before or after the election, or
2) the publication is generally accessible to citizens but published more than one month after issued or the cost is higher than photocopying.

A 0 score is earned where no reports about the elections are published or reports are not available to the public.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.17.3.11 Law: major public procurements require competitive bidding (aii_q24)

Long tag: qog_std_cs_aii_q24

Original tag: aii_q24

Description:
Sub-score (0-100). Question no. 24. In law, major public procurements require competitive bidding.

A 100 score is earned where all major procurements are required by law to follow competitive bidding.

A 0 score is earned where no such law exists.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.17.3.12 Practice: major public procurements involve competitive bidding (aii_q25)

Long tag: qog_std_cs_aii_q25

Original tag: aii_q25

Description:

Sub-score (0-100). Question no. 25. In practice, major public procurements involve competitive bidding.

A 100 score is earned where all the following conditions are met:
1) bids from competing contractors, suppliers, or vendors are invited through open advertising of the scope, specifications, and terms of the proposed contract, and
2) the criteria by which the bids are evaluated is available for scrutiny.

A 50 score is earned where any of the following conditions apply:
1) bids from competing contractors, suppliers, or vendors are invited through open advertising, but the advertising doesn't leave much time for bidders to prepare their offers or it lacks basic components (scope, specifications, or terms of the proposed contract), or
2) the criteria by which the bids are evaluated is not readily available for scrutiny.

A 0 score is earned where at least one of the following conditions apply:
1) bids from competing contractors, suppliers, or vendors are rarely or never invited through open advertising of the scope, specifications, and terms of the proposed contract, or
2) the criteria by which the bids are to be evaluated is rarely available for scrutiny.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.17.3.13 Practice: citizens can access results and procurement contracts related document (aii_q26)

Long tag: qog_std_cs_aii_q26

Original tag: aii_q26

Description:

Sub-score (0-100). Question no. 26. In practice, citizens can access the results and documents associated with procurement contracts (full contract, proposals, execution reports, financial audits, etc.).

A 100 score is earned where all the following conditions are met:
1) there is an archive containing full records of all procurement contracts, whether in a central government office or at each contracting institution, and
2) full records are readily available on or off line for scrutiny by journalists, auditors, competitors and any citizen who request them.

A 50 score is earned where any of the following conditions apply:
1) there is an archive but it doesn't contain complete records of all procurement contracts, whether in a central government office or at each contracting institution, and
2) full records are not readily available on/off line for scrutiny by journalists, auditors, competing contractors and any citizen who request them.

A 0 score is earned where at least one of the following conditions apply:
1) there's no archive containing full records of all procurement contracts, whether in a central government office or at each contracting institution, or
2) full records are rarely or never available on/off line for scrutiny by journalists, auditors, competitors or any citizen who request them.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.17.3.14 Practice: citizens can access the financial records of state-owned companies (aii_q29)

Long tag: qog_std_cs_aii_q29

Original tag: aii_q29

Description:

Sub-score (0-100). Question no. 29. In practice, citizens can access the financial records of state-owned companies.

A 100 score is earned where all the following conditions are met:
1) financial records of state-owned companies are available on/offline to journalists, auditors and citizens at

least quarterly, and
2) the records can be obtained immediately for free online or on paper in less than two weeks of requested at cost of photocopying.

A 50 score is earned where any of the following conditions apply:
1) financial records of state-owned companies are available less than quarterly, or
2) obtaining the records takes two weeks to a month, or costs are higher than photocopying.
A 0 score is earned where financial records of state-owned companies are rarely available to the public or don't exist.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.17.3.15 Practice: citizens can access natural resources exploitation financial records (aii_q30)

Long tag: qog_std_cs_aii_q30

Original tag: aii_q30

Description:

Sub-score (0-100). Question no. 30. In practice, citizens can access the financial records associated with natural resources exploitation (gas, oil and mining), whether they involve the participation of public or private corporations.

A 100 score is earned where all the following conditions are met:
1) financial records associated with natural resource projects are available on/offline to journalists, auditors and citizens at least quarterly, and
2) the records can be obtained immediately for free online or on paper in less than two weeks of requested at cost of photocopying.

A 50 score is earned where any of the following conditions apply:
1) financial records associated with natural resource projects are available less than quarterly, or
2) obtaining the records occasionally takes more than two weeks of requested, or costs are higher than photocopying.
A 0 score is earned where financial records associated with natural resource projects are rarely available to the public or don't exist.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.17.3.16 Law: civil servants are required to report cases of alleged corruption (aii_q35)

Long tag: qog_std_cs_aii_q35

Original tag: aii_q35

Description:

Sub-score (0-100). Question no. 35. In law, civil servants are required to report cases of alleged corruption.

A 100 score is earned where the law creates a explicit legal requirement for civil servants to report any cases of alleged corruption they are aware of.
A 0 score is earned if no such law exists.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.17.3.17 Law: there are formal rules to prevent conflict of interest, nepotism, etc. (aii_q37)

Long tag: qog_std_cs_aii_q37

Original tag: aii_q37

Description:

Sub-score (0-100). Question no. 37. In law, there are formal rules to prevent conflicts of interest, nepotism, cronyism and patronage in all branches of government.

A 100 score is earned where at least two of the following three conditions are met:
1) the law prohibits conflicts of interest, nepotism, cronyism, and patronage (at least two of these offenses must be prohibited),
2) the law applies to all branches of government, including the civil service, and
3) it mandates mechanisms such as competitive recruitment and promotion procedures, safeguards against arbitrary disciplinary actions and dismissal, and recusal procedures.

A 0 score is earned where no such law exist. It also scores 0 if only one of the three conditions described in 100 is met.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.17.3.18 Practice: civil servants' work is not compromised by political interference (aii_q38)

Long tag: qog_std_cs_aii_q38

Original tag: aii_q38

Description:

Sub-score (0-100). Question no. 38. In practice, civil servants' work is not compromised by political interference.

A 100 score is earned where all the following conditions are met:
1) civil servants are disciplined/removed/transferred only through due process by a peer panel/oversight body, and
2) civil servants are not removed when a new administration takes power.

A 50 score is earned where any of the following conditions apply:
1) civil servants are occasionally disciplined/removed/transferred without following due process by a peer panel/oversight body, or
2) civil servants are occasionally removed when a new administration takes power.

A 0 score is earned where at least one of the following conditions apply:
1) the due process is so weak it doesn't protect civil servants (e.g. the members of the panel that conducts the due process have a particular interest in how the issue is decided), or
2) civil servants are usually removed when a new administration takes power.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.17.3.19 Practice: civil servants are appointed and evaluated according to prof. criteria (aii_q39)

Long tag: qog_std_cs_aii_q39

Original tag: aii_q39

Description:

Sub-score (0-100). Question no. 39. In practice, civil servants are appointed and evaluated according to professional criteria.

A 100 score is earned where all the following conditions are met:
1) appointments to the civil service are made on a merit-based system,
2) individuals appointed are free of conflicts of interest due to personal loyalties, family connections, political party affiliations or other biases, and
3) performance evaluations are based on standard benchmarks.

A 50 score is earned where any of the following conditions apply:
1) not all civil servants are appointed because of their merits,
2) not all appointees are free of conflicts or interest, or
3) performance evaluations are not always based on standard benchmarks.

A 0 score is earned where at least one of the following conditions apply:
1) no merit-based system is in place or it's so weak it's useless,
2) civil servants frequently have conflicts of interest, or
3) performance evaluations are usually based on personal, discretionary criteria.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.17.3.20 Law: there are restrictions for civil servants after entering private sector (aii_q40)

Long tag: qog_std_cs_aii_q40

Original tag: aii_q40

Description:

Sub-score (0-100). Question no. 40. In law, there are restrictions for civil servants entering the private sector after leaving the government.

A 100 score is earned where the law forbids civil servants to take a position in the private sector for a period of time after leaving government if the position involves any of the following:
1) would present a conflict of interest,
2) would involve seeking to influence their former government colleagues, or
3) would establish a relationship between the former and the new office.

A 0 score is earned if no such law exists.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.17.3.21 Practice: citizen requests for public information are effective (aii_q42)

Long tag: qog_std_cs_aii_q42

Original tag: aii_q42

Description:

Sub-score (0-100). Question no. 42. In practice, citizen requests for public information are effective.

A 100 score is earned where all the following conditions are met:
1) records are available online or on paper less than two weeks after requested, and
2) costs are limited to photocopying. A 100 score is possible even if there are exceptions for information protected by national security or individual privacy laws.

A 50 score is earned where any of the following conditions apply:
1) many records are not online and/or it takes between two and four weeks for citizens' to obtain them, or
2) costs sometimes are higher than photocopying.

A 0 score is earned where at least one of the following conditions applies:
1) most records are not online and it takes more than a month for a citizen to obtain them, or
2) costs are usually higher than photocopying.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.17.3.22 Practice: asset disclosure process of senior officials branches is effective (aii_q45)

Long tag: qog_std_cs_aii_q45

Original tag: aii_q45

Description:

Sub-score (0-100). Question no. 45. In practice, the asset disclosure process for senior officials of the three branches of government (heads of state and government, ministers, members of Parliament, judges, etc.) is effective.

A 100 score is earned where all the following conditions are met:
1) senior officials of the three branches of government file their asset disclosures,
2) their disclosures contain detailed information about assets belonging to them and their immediate family (including real estate, movable property, cash, salaries, and income from investments), and
3) disclosures are available to the public online or within two weeks of requested at the cost of photocopying.

A 50 score is earned where any of the following conditions apply:
1) not all senior officials of the three branches of government file their asset disclosures,
2) their disclosures don't contain detailed information about them and their immediate family, or
3) disclosures are not always available to the public (they're not online, paper versions take more than two weeks to obtain, or costs are higher than photocopying).

A 0 score is earned where at least one of the following conditions apply:
1) senior officials of the three branches of government routinely fail to file asset disclosures,
2) asset disclosures contain so little information they are useless (e.g. they don't disclose assets of the immediate family, or cite real estate but not movable property, cash, salaries, and income from investments), or
3) asset disclosures are not available to the public. A 0 score is also earned where no law requires asset disclosures.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.17.3.23 Practice: the asset disclosure process for civil service members is effective (aii_q47)

Long tag: qog_std_cs_aii_q47

Original tag: aii_q47

Description:

Sub-score (0-100). Question no. 47. In practice, the asset disclosure process for members of the civil service is effective.

A 100 score is earned where all the following conditions are met:
1) all members of the civil service file their asset disclosures,
2) their disclosures contain detailed information about assets belonging to them and their immediate family (including real estate, movable property, cash, salaries, and income from investments), and
3) disclosures are available to the public online or within two weeks of requested at the cost of photocopying.

A 50 score is earned where any of the following conditions apply:
1) most but not all members of the civil service file their asset disclosures,
2) their disclosures are not complete (e.g. they contain real estate assets but not movable property, or list the asset but don't provide its estimated value), or

3) disclosures are not always available to the public (they're not online, paper versions take more than two weeks to obtain, or costs are higher than photocopying).

A 0 score is earned where at least one of the following conditions apply:
1) members of the civil service routinely fail to file asset disclosures,
2) asset disclosures contain so little information they are useless (e.g. they don't disclose assets of the immediate family, or cite real estate but not movable property, cash, salaries, and income from investments), or
3) asset disclosures are not available to the public. A 0 score is also earned where no law requires asset disclosures.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.17.3.24 The Bayesian Corruption Indicator (bci_bci)

Long tag: qog_std_cs_bci_bci

Original tag: bci_bci

Description:

The BCI index values lie between 0 and 100, with an increase in the index corresponding to a raise in the level of corruption. This is a first difference with CPI and WGI where an increase means that the level of corruption has decreased.

There exists no objective scale on which to measure the perception of corruption and the exact scaling you use is to a large extent arbitrary. However, the authors were able to give the index an absolute scale: zero corresponds to a situation where all surveys say that there is absolutely no corruption. On the other hand, when the index is one, all surveys say that corruption is as bad as it gets according to their scale. This is another difference with CPI and WGI, where the scaling is relative. They are rescaled such that WGI has mean 0 and a standard deviation of 1 in each year, while CPI always lies between 0 and 100.

In contrast, the actual range of values of the BCI will change in each year, depending how close countries come to the situation where everyone agrees there is no corruption at all (0), or that corruption is as bad as it can get (100).

The absolute scale of the BCI index was obtained by rescaling all the individual survey data such that zero corresponds to the lowest possible level of corruption and 1 to the highest one. We subsequently rescaled the BCI index such that when all underlying indicators are zero (one), the expected value of the BCI index is zero (hundred).

2.17.3.25 The standard deviation of The Bayesian Corruption Indicator (bci_bcistd)

Long tag: qog_std_cs_bci_bcistd

Original tag: bci_bcistd

Description:

The standard deviation of the Bayesian Corruption Index.

Variable citation: Standaert, S. (2015). Divining the level of corruption: A bayesian state-space approach. *Journal of Comparative Economics*, 43(3), 782–803. https://doi.org/10.1016/j.jce.2014.05.007

2.17.3.26 Anti-Corruption Policy (bti_acp)

Long tag: qog_std_cs_bti_acp

Original tag: bti_acp

Description:

To what extent does the government successfully contain corruption? 1-10.

1. The government fails to contain corruption, and there are no integrity mechanisms in place.
4. The government is only partly willing and able to contain corruption, while the few integrity mechanisms implemented are mostly ineffective.
7. The government is often successful in containing corruption. Most integrity mechanisms are in place, but some are functioning only with limited effectiveness.
10. The government is successful in containing corruption, and all integrity mechanisms are in place and effective.

2.17.3.29 Number of awarded contracts above EUR 130,000 (cri_contr)

Long tag: qog_std_cs_cri_contr

Original tag: cri_contr

Description:
Number of successfully awarded contracts within tenders published on TED above 130k EUR threshold.

Variable citation: Fazekas, M., & Kocsis, G. (2017). Uncovering high-level corruption: Cross-national objec- tive corruption risk indicators using public procurement data. `https://doi.org/doi:10.1017/S0007123417000461`

2.17.3.30 Final value of awarded tenders of over EUR 130,000 (cri_cvalue)

Long tag: qog_std_cs_cri_cvalue

Original tag: cri_cvalue

Description:
Sum of the final value of successfully awarded tenders published on TED above 130k EUR threshold.

Variable citation: Fazekas, M., & Kocsis, G. (2017). Uncovering high-level corruption: Cross-national objec- tive corruption risk indicators using public procurement data. `https://doi.org/doi:10.1017/S0007123417000461`

2.17.3.31 Number of contracts won by a supplier registered at a foreign address (cri_foreign)

Long tag: qog_std_cs_cri_foreign

Original tag: cri_foreign

Description:
Total number of contracts won by a supplier that is registered at a foreign address.

Variable citation: Fazekas, M., & Kocsis, G. (2017). Uncovering high-level corruption: Cross-national objec- tive corruption risk indicators using public procurement data. `https://doi.org/doi:10.1017/S0007123417000461`

2.17.3.32 Share of contracts with no published call for tender red flag (cri_nocall)

Long tag: qog_std_cs_cri_nocall

Original tag: cri_nocall

Description:
Share of contracts with "no published call for tender" red flag. Contract is considered to have "no call for tender" red flag if two conditions are met: i) sum of prior information notices and contract notices equals 0 and ii) country of a buyer is not on the list of countries in which "no call for tender publication" is not a risk factor. These countries are BG, DK, EE, ES, LT.

Variable citation: Fazekas, M., & Kocsis, G. (2017). Uncovering high-level corruption: Cross-national objec- tive corruption risk indicators using public procurement data. `https://doi.org/doi:10.1017/S0007123417000461`

2.17.3.33 Share of contracts with non-open procedure red flag (cri_nonopen)

Long tag: qog_std_cs_cri_nonopen

Original tag: cri_nonopen

Description:
Share of contracts with "non-open procedure" red flag. Whether procedure is considered non-open depends on procedure type as well as specific country regulation. Please refer to the "Non-open procedure details" sheet to search for country-procedure combinations.

Variable citation: Fazekas, M., & Kocsis, G. (2017). Uncovering high-level corruption: Cross-national objec- tive corruption risk indicators using public procurement data. `https://doi.org/doi:10.1017/S0007123417000461`

2.17.3.34 Share of contracts with only one bid in total (cri_singleb)

Long tag: qog_std_cs_cri_singleb

Original tag: cri_singleb

Description:
Share of contracts with only one bid in total.

Variable citation: Fazekas, M., & Kocsis, G. (2017). Uncovering high-level corruption: Cross-national objec- tive corruption risk indicators using public procurement data. `https://doi.org/doi:10.1017/S0007123417000461`

2.17.3.35 Share of contracts with tax haven red flag (cri_taxhav)

Long tag: qog_std_cs_cri_taxhav

Original tag: cri_taxhav

Description:
Share of contracts with "tax haven" red flag. Contract has "tax haven" red flag in case two conditions are met: i) buyer and supplier are from different countries and ii) according to Financial Secrecy Index (https://fsi.taxjustice.net/en/) supplier country was classified as tax haven.

Variable citation: Fazekas, M., & Kocsis, G. (2017). Uncovering high-level corruption: Cross-national objec- tive corruption risk indicators using public procurement data. `https://doi.org/doi:10.1017/S0007123417000461`

2.17.3.36 State Fragility Index (cspf_sfi)

Long tag: qog_std_cs_cspf_sfi

Original tag: cspf_sfi

Description:
A country's fragility is closely associated with its state capacity to manage conflict; make and implement public policy; and deliver essential services and its systemic resilience in maintaining system coherence, cohesion, and quality of life; responding effectively to challenges and crises, and sustaining progressive development. State Fragility = Effectiveness Score + Legitimacy Score (25 points possible).

Variable citation: Marshall, M. G., & Elzinga-Marshall, G. (2017). Global report 2017: Conflict, governance, and state fragility

2.17.3.37 Functioning of Government (fh_fog)

Long tag: qog_std_cs_fh_fog

Original tag: fh_fog

Description:
Functioning of Government - The variable examines in what extent the freely elected head of government and a national legislative representative determine the policies of the government; if the government is free from pervasive corruption; and if the government is accountable to the electorate between elections and operates with openness and transparency. Countries are graded between 0 (worst) and 12 (best).

Variable citation: Freedom House. (2021a). Freedom in the world 2021. `https://freedomhouse.org/report/freedom-world`

2.17.3.38 Total bribery rate, total population (gcb_br)

Long tag: qog_std_cs_gcb_br

Original tag: gcb_br

Description:
Total bribery rates by country. Total Bribery rate, total population. In percentage.

Variable citation: Transparency International (2017). Global corruption barometer 9th edition. `https://www.transparency.org/research/gcb`

2.17.3.39 Total bribery rate, contact rate (gcb_brcr)

Long tag: qog_std_cs_gcb_brcr

Original tag: gcb_brcr

Description:
Total bribery rates by country. Total Contact Rate in percentage.

Variable citation: Transparency International (2017). Global corruption barometer 9th edition. `https://www.transparency.org/research/gcb`

2.17.3.40 Total bribery rate, no contact rate (gcb_brnc)

Long tag: qog_std_cs_gcb_brnc

Original tag: gcb_brnc

Description:
Total bribery rates by country. Total Bribery Rate, excluding no contact in percentage.

Variable citation: Transparency International (2017). Global corruption barometer 9th edition. `https://www.transparency.org/research/gcb`

2.17.3.41 Fight aganist corruption: Badly (percent respondents) (gcb_fcbad)

Long tag: qog_std_cs_gcb_fcbad

Original tag: gcb_fcbad

Description:
Percentage of respondents who answered 'Badly' to the following question: How well or badly would you say the current government is handling the following matter: "fighting corruption in government"?

Variable citation: Transparency International (2017). Global corruption barometer 9th edition. `https://www.transparency.org/research/gcb`

2.17.3.42 Fight aganist corruption: Well (percent respondents) (gcb_fcwell)

Long tag: qog_std_cs_gcb_fcwell

Original tag: gcb_fcwell

Description:
Percentage of respondents who answered 'Well' to the following question: How well or badly would you say the current government is handling the following matter: "fighting corruption in government"?

Variable citation: Transparency International (2017). Global corruption barometer 9th edition. `https://www.transparency.org/research/gcb`

2.17.3.43 Corruption Perception-Business Executives: Most (percent respondents) (gcb_pcbmost)

Long tag: qog_std_cs_gcb_pcbmost

Original tag: gcb_pcbmost

Description:
Percentage of respondents who answered 'Most or All' to the following question about Business Executives: How many of the following people do you think are involved in corruption, or haven't you heard enough about them to say?

Variable citation: Transparency International (2017). Global corruption barometer 9th edition. `https://www.transparency.org/research/gcb`

2.17.3.44 Corruption Perception-Business Executives: Some (percent respondents) (gcb_pcbsome)

Long tag: qog_std_cs_gcb_pcbsome

Original tag: gcb_pcbsome

Description:
Percentage of respondents who answered 'Some or None' to the following question about Business Executives: How many of the following people do you think are involved in corruption, or haven't you heard enough about them to say?

Variable citation: Transparency International (2017). Global corruption barometer 9th edition. `https://www.transparency.org/research/gcb`

2.17.3.45 Corruption Perception-Gov Officials: Most (percent respondents) (gcb_pcgomost)

Long tag: qog_std_cs_gcb_pcgomost

Original tag: gcb_pcgomost

Description:
Percentage of respondents who answered 'Most or All' to the following question about Government Officials: How many of the following people do you think are involved in corruption, or haven't you heard enough about them to say?

Variable citation: Transparency International (2017). Global corruption barometer 9th edition. `https://www.transparency.org/research/gcb`

2.17.3.46 Corruption Perception-Gov Officials: Some (percent respondents) (gcb_pcgosome)

Long tag: qog_std_cs_gcb_pcgosome

Original tag: gcb_pcgosome

Description:
Percentage of respondents who answered 'Some or None' to the following question about Government Officials: How many of the following people do you think are involved in corruption, or haven't you heard enough about them to say?

Variable citation: Transparency International (2017). Global corruption barometer 9th edition. `https://www.transparency.org/research/gcb`

2.17.3.47 Corruption Perception-Local Gov Council: Most (percent respondents) (gcb_pclgcmost)

Long tag: qog_std_cs_gcb_pclgcmost

Original tag: gcb_pclgcmost

Description:
Percentage of respondents who answered 'Most or All' to the following question about Local government councilors: How many of the following people do you think are involved in corruption, or haven't you heard enough about them to say?

Variable citation: Transparency International (2017). Global corruption barometer 9th edition. `https://www.transparency.org/research/gcb`

2.17.3.48 Corruption Perception-Local Gov Council: Some (percent respondents) (gcb_pclgcsome)

Long tag: qog_std_cs_gcb_pclgcsome

Original tag: gcb_pclgcsome

Description:
Percentage of respondents who answered 'Some or None' to the following question about Local government councilors: How many of the following people do you think are involved in corruption, or haven't you heard enough about them to say?

Variable citation: Transparency International (2017). Global corruption barometer 9th edition. `https://www.transparency.org/research/gcb`

2.17.3.49 Corruption Perception Change: Decrease (percent respondents) (gcb_pcord)

Long tag: qog_std_cs_gcb_pcord

Original tag: gcb_pcord

Description:
Percentage of respondents who answered 'decreased' to the following question: In your opinion, over the past year, has the level of corruption in this country increased, decreased, or stayed the same?

Variable citation: Transparency International (2017). Global corruption barometer 9th edition. `https://www.transparency.org/research/gcb`

2.17.3.50 Corruption Perception Change: Increase (percent respondents) (gcb_pcori)

Long tag: qog_std_cs_gcb_pcori

Original tag: gcb_pcori

Description:
Percentage of respondents who answered 'increased' to the following question: In your opinion, over the past year, has the level of corruption in this country increased, decreased, or stayed the same?

Variable citation: Transparency International (2017). Global corruption barometer 9th edition. `https://www.transparency.org/research/gcb`

2.17.3.51 Corruption Perception-Head of State: Most (percent respondents) (gcb_pcpmost)

Long tag: qog_std_cs_gcb_pcpmost

Original tag: gcb_pcpmost

Description:

Percentage of respondents who answered 'Most or All' to the following question about the President or Prime Minister and Officials in his office: How many of the following people do you think are involved in corruption, or haven't you heard enough about them to say?

Variable citation: Transparency International (2017). Global corruption barometer 9th edition. `https://www.transparency.org/research/gcb`

2.17.3.52 Corruption Perception-Head of State: Some (percent respondents) (gcb_pcpsome)

Long tag: qog_std_cs_gcb_pcpsome

Original tag: gcb_pcpsome

Description:

Percentage of respondents who answered 'Some or None' to the following question about the President or Prime Minister and Officials in his office: How many of the following people do you think are involved in corruption, or haven't you heard enough about them to say?

Variable citation: Transparency International (2017). Global corruption barometer 9th edition. `https://www.transparency.org/research/gcb`

2.17.3.53 Corruption Perception-Religious Leaders: Most (percent respondents) (gcb_pcrmost)

Long tag: qog_std_cs_gcb_pcrmost

Original tag: gcb_pcrmost

Description:

Percentage of respondents who answered 'Most or All' to the following question about Religious Leaders: How many of the following people do you think are involved in corruption, or haven't you heard enough about them to say?

Variable citation: Transparency International (2017). Global corruption barometer 9th edition. `https://www.transparency.org/research/gcb`

2.17.3.54 Corruption Perception-Religious Leaders: Some (percent respondents) (gcb_pcrsome)

Long tag: qog_std_cs_gcb_pcrsome

Original tag: gcb_pcrsome

Description:

Percentage of respondents who answered 'Some or None' to the following question about Religious Leaders: How many of the following people do you think are involved in corruption, or haven't you heard enough about them to say?

Variable citation: Transparency International (2017). Global corruption barometer 9th edition. `https://www.transparency.org/research/gcb`

2.17.3.55 Corruption Perception-Tax officers: Most (percent respondents) (gcb_pctaxmost)

Long tag: qog_std_cs_gcb_pctaxmost

Original tag: gcb_pctaxmost

Description:

Percentage of respondents who answered 'Most or All' to the following question about Tax Officials, like Ministry of Finance officials or Local Government tax collectors: How many of the following people do you think are involved in corruption, or haven't you heard enough about them to say?

Variable citation: Transparency International (2017). Global corruption barometer 9th edition. `https://www.transparency.org/research/gcb`

2.17.3.56 Corruption Perception-Tax officers: Some (percent respondents) (gcb_pctaxsome)

Long tag: qog_std_cs_gcb_pctaxsome

Original tag: gcb_pctaxsome

Description:
Percentage of respondents who answered 'Some or None' to the following question about Tax Officials, like Ministry of Finance officials or Local Government tax collectors: How many of the following people do you think are involved in corruption, or haven't you heard enough about them to say?

Variable citation: Transparency International (2017). Global corruption barometer 9th edition. `https://www.transparency.org/research/gcb`

2.17.3.57 Information Capacity (year 1750) (icd_infcapirt1750)

Long tag: qog_std_cs_icd_infcapirt1750

Original tag: icd_infcapirt1750

Description:
The aggregate index score of information capacity for the year of 1750. It is based on a hybrid two-parameter and graded Item Response Model (IRT) that is based on five component indicators - when the country first established a statistical agency, whether the country had in place a civil register and a population register, and the graded indexes of census ability and yearbook ability.

Variable citation: Brambor, T., Goenaga, A., Lindvall, J., & JanTeorell. (2020). The lay of the land: Information capacity and the state. *Comparative Political Studies*, 53(2), 175–213. `https://doi.org/10.1177/0010414019843432`

2.17.3.58 Information Capacity (year 1800) (icd_infcapirt1800)

Long tag: qog_std_cs_icd_infcapirt1800

Original tag: icd_infcapirt1800

Description:

2.17.3.61 ICRG Indicator of Quality of Government (icrg_qog)

Long tag: qog_std_cs_icrg_qog

Original tag: icrg_qog

Description:
The mean value of the ICRG variables "Corruption", "Law and Order" and "Bureaucracy Quality", scaled 0-1. Higher values indicate higher quality of government.

Corruption (originally 6 points)
This is an assessment of corruption within the political system. Such corruption is a threat to foreign investment for several reasons: it distorts the economic and financial environment; it reduces the efficiency of government and business by enabling people to assume positions of power through patronage rather than ability; and, last but not least, it introduces an inherent instability into the political process. The most common form of corruption met directly by business is financial corruption in the form of demands for special payments and bribes connected with import and export licenses, exchange controls, tax assessments, police protection, or loans. Such corruption can make it difficult to conduct business effectively, and in some cases may force the withdrawal or withholding of an investment. Although the measure takes such corruption into account, it is more concerned with actual or potential corruption in the form of excessive patronage, nepotism, job reservations, "favor-for-favors", secret party funding, and suspiciously close ties between politics and business. According to ICRG, these insidious sorts of corruption are potentially of much greater risk to foreign business in that they can lead to popular discontent, unrealistic and inefficient controls on the state economy, and encourage the development of the black market. The greatest risk in such corruption is that at some time it will become so overweening, or some major scandal will be suddenly revealed, so as to provoke a popular backlash, resulting in a fall or overthrow of the government, a major reorganizing or restructuring of the country's political institutions, or, at worst, a breakdown in law and order, rendering the country ungovernable.

Law and order (originally 6 points)
Law and Order are assessed separately, with each sub-component comprising zero to three points. The Law sub-component is an assessment of the strength and impartiality of the legal system, while the Order sub-component is an assessment of popular observance of the law. Thus, a country can enjoy a high rating in terms of its judicial system, but a low rating if it suffers from a very high crime rate or if the law is routinely ignored without effective sanction (for example, widespread illegal strikes).

Bureaucracy Quality (originally 4 points)
The institutional strength and quality of the bureaucracy is another shock absorber that tends to minimize revisions of policy when governments change. Therefore, high points are given to countries where the bureaucracy has the strength and expertise to govern without drastic changes in policy or interruptions in government services. In these low-risk countries, the bureaucracy tends to be somewhat autonomous from political pressure and to have an established mechanism for recruitment and training. Countries that lack the cushioning effect of a strong bureaucracy receive low points because a change in government tends to be traumatic in terms of policy formulation and day-to-day administrative functions.

The component variables can be purchased at http://epub.prsgroup.com/products/icrg

2.17.3.62 Accountability and Transparency (iiag_acc)

Long tag: qog_std_cs_iiag_acc

Original tag: iiag_acc

Description:
Accountability
Transparency is one of the four sub-categories that are used to calculate the Security
Rule of Law category score. It consists of five indicators from six data sources.

Variable citation: Mo Ibrahim Foundation. (2020). The Ibrahim Index of African Governance. `http://mo.ibrahim.foundation/iiag/`

2.17.3.63 Anti-corruption (iiag_corr)

Long tag: qog_std_cs_iiag_corr

Original tag: iiag_corr

Description:
Anti-corruption is one of the four sub-categories that are used to calculate the Security
Rule of Law category score. It consists of five indicators from six data sources.

Variable citation: Mo Ibrahim Foundation. (2020). The Ibrahim Index of African Governance. `http://mo.ibrahim.foundation/iiag/`

2.17.3.64 Foundations for Economic Opportunity (iiag_feo)

Long tag: qog_std_cs_iiag_feo

Original tag: iiag_feo

Description:
Foundations for Economic Opportunity is one of the four categories that are used to calculate the Overall Governance score. It consists of four sub-categories, made up of 18 indicators.

Variable citation: Mo Ibrahim Foundation. (2020). The Ibrahim Index of African Governance. `http://mo.ibrahim.foundation/iiag/`

2.17.3.65 Overall Governance (iiag_gov)

Long tag: qog_std_cs_iiag_gov

Original tag: iiag_gov

Description:

The Overall Governance score is calculated by aggregating the four categories: Security
Rule of Law; Participation, Rights and Inclusion; Human Development and Foundations for Economic Opportunity. These categories are made up of 16 sub-categories, consisting of 79 IIAG indicators, from 40 data sources.

Variable citation: Mo Ibrahim Foundation. (2020). The Ibrahim Index of African Governance. `http://mo.ibrahim.foundation/iiag/`

2.17.3.66 Inclusion and Equality (iiag_ie)

Long tag: qog_std_cs_iiag_ie

Original tag: iiag_ie

Description:

Inclusion
Equality is one of the four sub-categories that are used to calculate the Participation, Rights
Inclusion category score. It consists of five indicators from four data sources.

Variable citation: Mo Ibrahim Foundation. (2020). The Ibrahim Index of African Governance. `http://mo.ibrahim.foundation/iiag/`

2.17.3.67 Public Administration (iiag_pa)

Long tag: qog_std_cs_iiag_pa

Original tag: iiag_pa

Description:

Public Administration is one of the four sub-categories that are used to calculate the Foundations for Economic Opportunity category score. It consists of five indicators from six data sources.

Variable citation: Mo Ibrahim Foundation. (2020). The Ibrahim Index of African Governance. `http://mo.ibrahim.foundation/iiag/`

2.17.3.68 Participation, Rights and Inclusion (iiag_pri)

Long tag: qog_std_cs_iiag_pri

Original tag: iiag_pri

Description:

Participation, Rights
Inclusion is one of the four categories that are used to calculate the Overall Governance score. It consists of four sub-categories, made up of 19 indicators.

Variable citation: Mo Ibrahim Foundation. (2020). The Ibrahim Index of African Governance. `http://mo.ibrahim.foundation/iiag/`

2.17.3.69 Rule of Law and Justice (iiag_rolf)

Long tag: qog_std_cs_iiag_rolf

Original tag: iiag_rolf

Description:

Rule of Law
Justice is one of the four sub-categories that are used to calculate the Security
Rule of Law category score. It consists of six indicators from six data sources.

Variable citation: Mo Ibrahim Foundation. (2020). The Ibrahim Index of African Governance. `http://mo.ibrahim.foundation/iiag/`

2.17.3.70 Sustainable Environment (iiag_se)

Long tag: qog_std_cs_iiag_se

Original tag: iiag_se

Description:

Sustainable Environment is one of the four sub-categories that are used to calculate the Human Development category score. It consists of five indicators from ten data sources.

Variable citation: Mo Ibrahim Foundation. (2020). The Ibrahim Index of African Governance. `http://mo.ibrahim.foundation/iiag/`

2.17.3.71 Social Protection (iiag_sp)

Long tag: qog_std_cs_iiag_sp

Original tag: iiag_sp

Description:
Social Protection is one of the four sub-categories that are used to calculate the Human Development category score. It consists of five indicators from eight data sources.

Variable citation: Mo Ibrahim Foundation. (2020). The Ibrahim Index of African Governance. `http://mo.ibrahim.foundation/iiag/`

2.17.3.72 Security and Rule of Law (iiag_srol)

Long tag: qog_std_cs_iiag_srol

Original tag: iiag_srol

Description:
Security
Rule of Law is one of the four categories that are used to calculate the Overall Governance score. It consists of four sub-categories, made up of 21 indicators.

Variable citation: Mo Ibrahim Foundation. (2020). The Ibrahim Index of African Governance. `http://mo.ibrahim.foundation/iiag/`

2.17.3.73 Security and Safety (iiag_ssaf)

Long tag: qog_std_cs_iiag_ssaf

Original tag: iiag_ssaf

Description:
Security
Safety is one of the four sub-categories that are used to calculate the Security
Rule of Law category score. It consists of five indicators from eight data sources.

Variable citation: Mo Ibrahim Foundation. (2020). The Ibrahim Index of African Governance. `http://mo.ibrahim.foundation/iiag/`

2.17.3.74 Hanson Sigman State Capacity Index (lld_capacity)

Long tag: qog_std_cs_lld_capacity

Original tag: lld_capacity

Description:
Hanson and Sigman's State Capacity Estimate. Three dimensions of state capacity that their estimate relies on are extractive capacity, coercive capacity, and administrative capacity. The authors use Bayesian latent variable analysis to estimate state capacity at the conjunction of indicators related to these dimensions.

Variable citation: Hanson, J. K., & Sigman, R. (2021). Leviathans latent dimensions: Measuring state capacity for comparative political research. *The Journal of Politics*, 83(4), 1495–1510

2.17.3.75 Standard Deviation for Hanson Sigman State Capacity Index (lld_capstd)

Long tag: qog_std_cs_lld_capstd

Original tag: lld_capstd

Description:
Standard Deviation for Hanson and Sigman's State Capacity Estimate.

Variable citation: Hanson, J. K., & Sigman, R. (2021). Leviathans latent dimensions: Measuring state capacity for comparative political research. *The Journal of Politics*, 83(4), 1495–1510

2.17.3.76 The Property Right Protection Index (prp_prp)

Long tag: qog_std_cs_prp_prp

Original tag: prp_prp

Description:
The Poperty Rights Index measures (the perception of) the security of property rights, separately from other aspects of the rule of law. It combines all publicly available information on the perception of the security of property rights (18 singular indicators of property rights).

Variable citation: Ouattara, B., & Standaert, S. (2020). Property rights revisited. *European Journal of Political Economy*, 64, 101895. `https://doi.org/https://doi.org/10.1016/j.ejpoleco.2020.101895`

2.17.3.77 Estimated variance of the PRP point estimate (prp_std)

Long tag: qog_std_cs_prp_std

Original tag: prp_std

Description:

Estimated variance of the Property Rights Protection estimate.

Variable citation: Ouattara, B., & Standaert, S. (2020). Property rights revisited. *European Journal of Political Economy*, 64, 101895. `https://doi.org/https://doi.org/10.1016/j.ejpoleco.2020.101895`

2.17.3.78 Sustainable Policies (sgi_pp)

Long tag: qog_std_cs_sgi_pp

Original tag: sgi_pp

Description:

This pillar of the SGI examines each country's sustainable policy performance in terms of three dimensions of sustainable development. If the goal of politics is to promote sustainable development, and if citizens are to be empowered to live their lives in accordance with their own individual talents, then governments must be able to establish and maintain the social, economic and environmental conditions for such well-being and empowerment. The conditions for social progress must be generated by suitable outcomes in certain policy fields. Such outcomes are examined by the Policy Performance pillar, which is comprised of 16 policy fields grouped in terms of economic, social and environmental sustainability. Each policy field is addressed by a qualitative assessment and additional quantitative data. The point here is to examine domestic policymaking as well as the extent to which governments actively contribute to the provision of global public goods. The areas examined are:

1. Economic Policies: economy, labor markets, taxes, budgets, research and innovation, global financial system.
2. Social Policies: education, social inclusion, health, families, pensions, integration policy, safe living conditions, global inequalities.
3. Environmental Policies: environment policy, global environmental protection.

2.17.3.79 Basic Human Needs (SPI) (spi_bn)

Long tag: qog_std_cs_spi_bn

Original tag: spi_bn

Description:

Basic Human Needs is one of the three components of the SPI, which are used to calculate the overall Social Progress Index. It assesses a population's capacity to survive with adequate nourishment and basic medical care, clean water, sanitation, adequate shelter, and personal safety.

Variable citation: The Social Progress Imperative. (2020). Social progress index. `www.socialprogress.org`

2.17.3.80 Foundations of Wellbeing (SPI) (spi_fob)

Long tag: qog_std_cs_spi_fob

Original tag: spi_fob

Description:

Foundations of Wellbeing is one of the three components of the SPI, which are used to calculate the overall Social Progress Index. It highlights the extent to which a country's residents can gain a basic education, obtain information and communicate freely, benefit from a modern healthcare system, and live in a healthy environment conducive to a long life.

Variable citation: The Social Progress Imperative. (2020). Social progress index. `www.socialprogress.org`

2.17.3.81 Opportunity (SPI) (spi_opp)

Long tag: qog_std_cs_spi_opp

Original tag: spi_opp

Description:

Opportunity is one of the three components of the SPI, which are used to calculate the overall Social Progress Index. Indicators on personal rights, personal freedom and choice, inclusiveness, and access to advanced education are used to assess the level of opportunity.

Variable citation: The Social Progress Imperative. (2020). Social progress index. `www.socialprogress.org`

2.17.3.82 Social Progress Index (spi_ospi)

Long tag: qog_std_cs_spi_ospi

Original tag: spi_ospi

Description:

Overall Social Progress Index. It aims to assess the capacity of a society to meet the basic human needs of its citizens, establish the building blocks that allow citizens and communities to enhance and sustain the quality of their lives, and create the conditions for all individuals to reach their full potential.

Variable citation: The Social Progress Imperative. (2020). Social progress index. `www.socialprogress.org`

2.17.3.83 Corruption Perceptions Index (ti_cpi)

Long tag: qog_std_cs_ti_cpi

Original tag: ti_cpi

Description:

Corruption Perceptions Index. Scale of 0-100 where a 0 equals the highest level of perceived corruption and 100 equals the lowest level of perceived corruption.

Variable citation: Transparency International. (2021). Corruption perception index 2020 [Licensed under CC-BY-ND 4.0]. `http://www.transparency.org/cpi`

2.17.3.84 Corruption Perceptions Index - max range (ti_cpi_max)

Long tag: qog_std_cs_ti_cpi_max

Original tag: ti_cpi_max

Description:

Corruption Perceptions Index - Max Range. Highest possible value of the CPI for a country according to the 95percent confidence interval.

Variable citation: Transparency International. (2021). Corruption perception index 2020 [Licensed under CC-BY-ND 4.0]. `http://www.transparency.org/cpi`

2.17.3.85 Corruption Perceptions Index - min range (ti_cpi_min)

Long tag: qog_std_cs_ti_cpi_min

Original tag: ti_cpi_min

Description:

Corruption Perceptions Index - Min Range. Lowest possible value of the CPI for a country according to the 95percent confidence interval.

Variable citation: Transparency International. (2021). Corruption perception index 2020 [Licensed under CC-BY-ND 4.0]. `http://www.transparency.org/cpi`

2.17.3.86 Standard Error for Corruption Perceptions Index (ti_se)

Long tag: qog_std_cs_ti_se

Original tag: ti_se

Description:

Standard Error for Corruption Perceptions Index.

Variable citation: Transparency International. (2021). Corruption perception index 2020 [Licensed under CC-BY-ND 4.0]. `http://www.transparency.org/cpi`

2.17.3.87 Academic Freedom Index (vdem_academ)

Long tag: qog_std_cs_vdem_academ

Original tag: vdem_academ

Description:

Academic freedom index. To what extent is academic freedom respected?

Clarifications: Academic freedom is understood as the right of academics, without constriction by prescribed doctrine, to freedom of teaching and discussion, freedom in carrying out research and disseminating and publishing the results thereof, freedom to express freely their opinion about the institution or system in which they work, freedom from institutional censorship and freedom to participate in professional or representative academic bodies (UNESCO 1997 Recommendation concerning the Status of Higher-Education Teaching Personnel). The Academic
Freedom Index is designed to provide an aggregated measure that captures the de facto realization of academic freedom, including the degree to which higher-education institutions are autonomous. Aggregation: The index is formed by point estimates drawn from a Bayesian factor analysis model including the following indicators: freedom to research and teach, freedom of academic exchange and dissemination, institutional

autonomy, campus integrity, freedom of academic and cultural expression.

Variable citation: Coppedge, M., Gerring, J., Knutsen, C. H., Lindberg, S. I., Teorell, J., Alizada, N., Altman, D., Bernhard, M., Cornell, A., Fish, M. S., Gastaldi, L., Gjerløw, H., Glynn, A., Hicken, A., Hindle, G., Ilchenko, N., Krusell, J., Luhrmann, A., Maerz, S. F., . . . Ziblatt, D. (2021). V-dem [country-year/country-date] dataset v11.1. `https://doi.org/10.23696/vdemds21` Pemstein, D., Marquardt, K. L., Tzelgov, E., Wang, Y.-t., Medzihorsky, J., Krusell, J., Miri, F., & von Römer, J. (2021). The V-Dem measurement model: Latent variable analysis for crossnational and cross-temporal expert-coded data

2.17.3.88 Political corruption index (vdem_corr)

Long tag: qog_std_cs_vdem_corr

Original tag: vdem_corr

Description:

Political corruption. Question: How pervasive is political corruption?

Clarification: The directionality of the V-Dem corruption index runs from less corrupt to more corrupt (unlike the other V-Dem variables that generally run from less democratic to more democratic situation). The corruption index includes measures of six distinct types of corruption that cover both different areas and levels of the polity realm, distinguishing between executive, legislative and judicial corruption. Within the executive realm, the measures also distinguish between corruption mostly pertaining to bribery and corruption due to embezzlement. Finally, they differentiate between corruption in the highest echelons of the executive (at the level of the rulers/cabinet) on the one hand, and in the public sector at large on the other. The measures thus tap into several distinguished types of corruption: both 'petty' and 'grand'; both bribery and theft; both corruption aimed and influencing law making and that affecting implementation. Aggregation: The index is arrived at by taking the average of (a) public sector corruption index; (b) executive corruption index; (c) the indicator for legislative corruption; and (d) the indicator for judicial corruption. In other words, these four different government spheres are weighted equally in the resulting index. V-Dem replaces missing values for countries with no legislature by only taking the average of (a), (b) and (d).

Variable citation: Coppedge, M., Gerring, J., Knutsen, C. H., Lindberg, S. I., Teorell, J., Alizada, N., Altman, D., Bernhard, M., Cornell, A., Fish, M. S., Gastaldi, L., Gjerløw, H., Glynn, A., Hicken, A., Hindle, G., Ilchenko, N., Krusell, J., Luhrmann, A., Maerz, S. F., . . . Ziblatt, D. (2021). V-dem [country-year/country-date] dataset v11.1. `https://doi.org/10.23696/vdemds21` Pemstein, D., Marquardt, K. L., Tzelgov, E., Wang, Y.-t., Medzihorsky, J., Krusell, J., Miri, F., & von Römer, J. (2021). The V-Dem measurement model: Latent variable analysis for crossnational and cross-temporal expert-coded data

2.17.3.89 Election vote buying (vdem_elvotbuy)

Long tag: qog_std_cs_vdem_elvotbuy

Original tag: vdem_elvotbuy

Description:

Election vote buying. Question: In this national election, was there evidence of vote and/or turnout buying?

Clarification: Vote and turnout buying refers to the distribution of money or gifts to individuals, families, or small groups in order to influence their decision to vote/not vote or whom to vote for. It does not include legislation targeted at specific constituencies, i.e., "porkbarrel" legislation. V-Dem uses a specifically designed measurement model to provide country-year point estimates, aggregated from multiple codings submitted by country experts by taking disagreement and measurement error into account. In this version of the variable, used in the QoG dataset, V-Dem has linearly translated the measurement model point estimates back to the original ordinal scale of each variable as an interval measure.

Variable citation: Coppedge, M., Gerring, J., Knutsen, C. H., Lindberg, S. I., Teorell, J., Alizada, N., Altman, D., Bernhard, M., Cornell, A., Fish, M. S., Gastaldi, L., Gjerløw, H., Glynn, A., Hicken, A., Hindle, G., Ilchenko, N., Krusell, J., Luhrmann, A., Maerz, S. F., . . . Ziblatt, D. (2021). V-dem [country-year/country-date] dataset v11.1. `https://doi.org/10.23696/vdemds21` Pemstein, D., Marquardt, K. L., Tzelgov, E., Wang, Y.-t., Medzihorsky, J., Krusell, J., Miri, F., & von Römer, J. (2021). The V-Dem measurement model: Latent variable analysis for crossnational and cross-temporal expert-coded data

2.17.3.90 Executive bribery and corrupt exchanges (vdem_exbribe)

Long tag: qog_std_cs_vdem_exbribe

Original tag: vdem_exbribe

Description:

Executive bribery and corrupt exchanges. Question: How routinely do members of the executive (the head of state, the head of government, and cabinet ministers), or their agents, grant favors in exchange for bribes, kickbacks, or other material inducements? V-Dem uses a specifically designed measurement model to provide country-year point estimates, aggregated from multiple codings submitted by country experts by taking disagreement and measurement error into account. In this version of the variable, used in the QoG dataset, V-Dem has linearly translated the measurement model point estimates back to the original ordinal scale of each variable as an interval measure.

Variable citation: Coppedge, M., Gerring, J., Knutsen, C. H., Lindberg, S. I., Teorell, J., Alizada, N., Altman, D., Bernhard, M., Cornell, A., Fish, M. V-dem [country-year/country-date] dataset v11.1. `https://doi.org/10.23696/vdemds21` Pemstein, D., Marquardt, K. L., Tzelgov, E., Wang, Y.-t., Medzihorsky, J., Krusell, J., Miri, F., & von Römer, J. (2021). The V-Dem measurement model: Latent variable analysis for crossnational and cross-temporal expert-coded data

2.17.3.91 Public sector corrupt exchanges (vdem_excrptps)

Long tag: qog_std_cs_vdem_excrptps

Original tag: vdem_excrptps

Description:

Public sector corrupt exchanges. Question: How routinely do public sector employees grant favors in exchange for bribes, kickbacks, or other material inducements?

Clarification: When responding to this question, we would like you to think about a typical person employed by the public sector, excluding the military. If you think there are large discrepancies between branches of the public sector, between the national/federal and subnational/state level, or between the core bureaucracy and employees working with public service delivery, please try to average them out before stating your response. V-Dem uses a specifically designed measurement model to provide country-year point estimates, aggregated from multiple codings submitted by country experts by taking disagreement and measurement error into account. In this version of the variable, used in the QoG dataset, V-Dem has linearly translated the measurement model point estimates back to the original ordinal scale of each variable as an interval measure.

Variable citation: Coppedge, M., Gerring, J., Knutsen, C. H., Lindberg, S. I., Teorell, J., Alizada, N., Altman, D., Bernhard, M., Cornell, A., Fish, M. S., Gastaldi, L., Gjerløw, H., Glynn, A., Hicken, A., Hindle, G., Ilchenko, N., Krusell, J., Luhrmann, A., Maerz, S. F., . . . Ziblatt, D. (2021). (2021). The V-Dem measurement model: Latent variable analysis for crossnational and cross-temporal expert-coded data

2.17.3.92 Executive corruption index (vdem_execorr)

Long tag: qog_std_cs_vdem_execorr

Original tag: vdem_execorr

Description:

Executive corruption index. Question: How routinely do members of the executive, or their agents grant favors in exchange for bribes, kickbacks, or other material inducements, and how often do they steal, embezzle, or misappropriate public funds or other state resources for personal or family use?

Clarification: The directionality of the V-Dem corruption index runs from less corrupt to more corrupt (unlike the other V-Dem variables that generally run from less democratic to more democratic situation). Aggregation: The index is formed by taking the average of the point estimates from a Bayesian factor analysis model of the indicators for executive bribery and executive embezzlement.

Variable citation: Coppedge, M., Gerring, J., Knutsen, C. H., Lindberg, S. I., Teorell, J., Alizada, N., Altman, D., Bernhard, M., Cornell, A., Fish, M. S., Gastaldi, L., Gjerløw, H., Glynn, A., Hicken, A., Hindle, G., Ilchenko, N., Krusell, J., Luhrmann, A., Maerz, S. F., . . . Ziblatt, D. (2021). V-dem [country-year/country-date] dataset v11.1. `https://doi.org/10.23696/vdemds21` Pemstein, D., Marquardt, K. L., Tzelgov, E., Wang, Y.-t., Medzihorsky, J., Krusell, J., Miri, F., & von Römer, J. (2021). The V-Dem measurement model: Latent variable analysis for crossnational and cross-temporal expert-coded data

2.17.3.93 Executive embezzlement and theft (vdem_exembez)

Long tag: qog_std_cs_vdem_exembez

Original tag: vdem_exembez

Description:

Executive embezzlement and theft. Question: How often do members of the executive (the head of state, the head of government, and cabinet ministers), or their agents, steal, embezzle, or misappropriate public funds or other state resources for personal or family use? V-Dem uses a specifically designed measurement model to provide country-year point estimates, aggregated from multiple codings submitted by country experts by taking disagreement and measurement error into account. In this version of the variable, used in the QoG dataset, V-Dem has linearly translated the measurement model point estimates back to the original ordinal scale of each variable as an interval measure.

2.17.3.97 Control of Corruption, Estimate (wbgi_cce)

Long tag: qog_std_cs_wbgi_cce

Original tag: wbgi_cce

Description:

Control of Corruption - Estimate: "Control of Corruption" measures perceptions of corruption, conventionally defined as the exercise of public power for private gain. The particular aspect of corruption measured by the various sources differs somewhat, ranging from the frequency of "additional payments to get things done", to the effects of corruption on the business environment, to measuring "grand corruption" in the political arena or in the tendency of elite forms to engage in "state capture".

Variable citation: Kaufmann, D., Kraay, A., & Mastruzzi, M. (2010). The worldwide governance indicators: A summary of methodology, data and analytical issues. *World Bank Policy Research Working Paper, 5430*

2.17.3.98 Control of Corruption, Number of Sources (wbgi_ccn)

Long tag: qog_std_cs_wbgi_ccn

Original tag: wbgi_ccn

Description:
Control of Corruption - Number of Sources.

Variable citation: Kaufmann, D., Kraay, A., & Mastruzzi, M. (2010). The worldwide governance indicators: A summary of methodology, data and analytical issues. *World Bank Policy Research Working Paper, 5430*

2.17.3.99 Control of Corruption, Standard Error (wbgi_ccs)

Long tag: qog_std_cs_wbgi_ccs

Original tag: wbgi_ccs

Description:
Control of Corruption - Standard Errors.

Variable citation: Kaufmann, D., Kraay, A., & Mastruzzi, M. (2010). The worldwide governance indicators: A summary of methodology, data and analytical issues. *World Bank Policy Research Working Paper, 5430*

2.17.3.100 Government Effectiveness, Estimate (wbgi_gee)

Long tag: qog_std_cs_wbgi_gee

Original tag: wbgi_gee

Description:
Government Effectiveness - Estimate: "Government Effectiveness" combines into a single grouping responses on the quality of public service provision, the quality of the bureaucracy, the competence of civil servants, the independence of the civil service from political pressures, and the credibility of the government's commitment to policies. The main focus of this index is on "inputs" required for the government to be able to produce and implement good policies and deliver public goods.

Variable citation: Kaufmann, D., Kraay, A., & Mastruzzi, M. (2010). The worldwide governance indicators: A summary of methodology, data and analytical issues. *World Bank Policy Research Working Paper, 5430*

2.17.3.101 Government Effectiveness, Number of Sources (wbgi_gen)

Long tag: qog_std_cs_wbgi_gen

Original tag: wbgi_gen

Description:
Government Effectiveness - Number of Sources.

Variable citation: Kaufmann, D., Kraay, A., & Mastruzzi, M. (2010). The worldwide governance indicators: A summary of methodology, data and analytical issues. *World Bank Policy Research Working Paper, 5430*

2.17.3.102 Government Effectiveness, Standard Error (wbgi_ges)

Long tag: qog_std_cs_wbgi_ges

Description:
Government Effectiveness - Standard Errors.

Variable citation: Kaufmann, D., Kraay, A., & Mastruzzi, M. (2010). The worldwide governance indicators: A summary of methodology, data and analytical issues. *World Bank Policy Research Working Paper, 5430*

2.17.3.103 Bribery incidence (percent of firms experiencing at least one bribe request) (wdi_bribfirm)

Long tag: qog_std_cs_wdi_bribfirm

Original tag: wdi_bribfirm

Description:
Bribery incidence is the percentage of firms experiencing at least one bribe payment request across six public transactions dealing with utilities access, permits, licenses, and taxes.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.3.104 CPIA efficiency of revenue mobilization rating (1=low to 6=high) (wdi_effrevmob)

Long tag: qog_std_cs_wdi_effrevmob

Original tag: wdi_effrevmob

Description:

Efficiency of revenue mobilization assesses the overall pattern of revenue mobilization–not only the de facto tax structure, but also revenue from all sources as actually collected.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.3.105 Firms expected to give gifts in meetings w. tax officials (percent of firms) (wdi_firgifttax)

Long tag: qog_std_cs_wdi_firgifttax

Original tag: wdi_firgifttax

Description:

Firms expected to give gifts in meetings with tax officials is the percentage of firms that answered positively to the question "Was a gift or informal payment expected or requested during a meeting with tax officials?".

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.3.106 Informal payments to public officials (percent of firms) (wdi_infpay)

Long tag: qog_std_cs_wdi_infpay

Original tag: wdi_infpay

Description:

Informal payments to public officials are the percentage of firms expected to make informal payments to public officials to "get things done" with regard to customs, taxes, licenses, regulations, services, and the like.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.3.107 CPIA public sector management and institution cluster average (1=low to 6=high) (wdi_psm)

Long tag: qog_std_cs_wdi_psm

Original tag: wdi_psm

Description:

The public sector management and institutions cluster includes property rights and rule-based governance, quality of budgetary and financial management, efficiency of revenue mobilization, quality of public administration, and transparency, accountability, and corruption in the public sector.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.3.108 CPIA quality of public administration rating (1=low to 6=high) (wdi_qpubadm)

Long tag: qog_std_cs_wdi_qpubadm

Original tag: wdi_qpubadm

Description:

Quality of public administration assesses the extent to which civilian central government staff is structured to design and implement government policy and deliver services effectively.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.3.109 Statistical Capacity score (Overall average) (wdi_statcap)

Long tag: qog_std_cs_wdi_statcap

Original tag: wdi_statcap

Description:

The Statistical Capacity Indicator provides an overview of the capacity of a country's national statistical system based on a diagnostic framework thereby assessing three dimensions: Methodology, Source Data, and Periodicity and Timeliness.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.3.110 Methodology assessment of statistical capacity (0 - 100) (wdi_statcapmet)

Long tag: qog_std_cs_wdi_statcapmet

Original tag: wdi_statcapmet

Description:
The Methodology score measures a country's ability to adhere to internationally recommended standards and methods.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.3.111 Periodicity and timeliness assessment of statistical capacity (0-100) (wdi_statcaptime)

Long tag: qog_std_cs_wdi_statcaptime

Original tag: wdi_statcaptime

Description:
The Periodicity score measures the availability and periodicity of key socioeconomic indicators.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.3.112 CPIA transparency-accountability-corruption in public sector rating (1-6) (wdi_tacpsr)

Long tag: qog_std_cs_wdi_tacpsr

Original tag: wdi_tacpsr

Description:
Transparency, accountability, and corruption in the public sector assess the extent to which the executive can be held accountable for its use of funds and for the results of its actions by the electorate and by the legislature and judiciary, and the extent to which public employees within the executive are required to account for administrative decisions, use of resources, and results obtained. The three main dimensions assessed here are the accountability of the executive to oversight institutions and of public employees for their performance, access of civil society to information on public affairs, and state capture by narrow vested interests.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.3.113 Budget transparency. 0-100 (best) (wef_bt)

Long tag: qog_std_cs_wef_bt

Original tag: wef_bt

Description:
Budget transparency. 0-100 (best). This indicator assesses on a scale of 0 to 100 [most transparent] the extent to which governments publish data related to budget and spending. Original sources: The World Bank Group

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. `http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf`

2.17.3.114 Incidence of corruption. 0-100 (best) (wef_cor)

Long tag: qog_std_cs_wef_cor

Original tag: wef_cor

Description:
Incidence of corruption. 0-100 (best). The Corruption Perceptions Index aggregates data from a number of different sources that provide perceptions of business people and country experts of the level on corruption in the public sector. The scale ranges from 0 [highly corrupt] to 100 [very clean]. Original sources: Transparency International

Variable citation: World Economic Forum. (2019). The global competetiveness report 2019 [Commercial use of data produced by the World Economic Forum is forbidden]. `http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf`

2.17.4 Media

This category includes indicators on the freedom of the media in a given country (freedom of the press, regulation of the media) as well as the public access and confidence in the media.

2.17.4.1 Practice: candidates/pol. parties have fair access to state-owned media outlets (aii_q23)

Long tag: qog_std_cs_aii_q23

Original tag: aii_q23

Description:

Sub-score (0-100). Question no. 23. In practice, candidates/political parties have equitable access to state-owned media outlets.

A 100 score is earned where all the following conditions are met:
1) candidates/political parties have equal access to and receive fair treatment in state-owned media outlets,
2) access is equal in both news reports and editorial commentary, and
3) candidates/political parties are offered the same rates for campaign advertising.

A 50 score is earned where any of the following conditions apply:
1) some candidates/political parties occasionally have more access to and receive better treatment in state-owned media outlets,
2) access is occasionally unequal in either news reports or editorial commentary, or
3) occasionally a candidate/political party is offered better rates for campaign advertising.

A 0 score is earned where at least one of the following conditions apply:
1) some candidates/political parties usually have more access to and/or receive better treatment in state-owned media outlets,
2) access is usually unequal in both news reports or editorial commentary, or
3) some candidates/political parties are usually offered better rates for campaign advertising.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.17.4.2 Practice: media organizations disclose their owner's identities to the public (aii_q52)

Long tag: qog_std_cs_aii_q52

Original tag: aii_q52

Description:

Sub-score (0-100). Question no. 52. In practice, media organizations (print, broadcast, online) disclose the identities of their owners to the public.

A 100 score is earned where all the following conditions are met:
1) major media organizations disclose the names of their owners to the public, and
2) the information is readily available to any citizen (online, in the newspaper, etc.).

A 50 score is earned where any of the following conditions apply:
1) only some major media organizations disclose the name of their owners or they disclose only some of the owners, or
2) the information is public but obtaining it takes two weeks or more.

A 0 score is earned where at least one of the following conditions apply:
1) major media organizations don't disclose the names of their owners, or
2) the information is available only to the government.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.17.4.3 Practice: journalists and editors adhere to professional practices in reporting (aii_q53)

Long tag: qog_std_cs_aii_q53

Original tag: aii_q53

Description:

Sub-score (0-100). Question no. 53. In practice, journalists and editors adhere to strict, professional practices in their reporting.

A 100 score is earned where all the following conditions are met:
1) major media organizations have a formal document with standards guiding journalistic work (Code of Ethics, Editorial Guidelines, Statement of Principles, Code of Conduct, etc.),
2) the document codifies standards for use of anonymous sources, conflicts of interest, and impartiality, and
3) major media organizations enforce this document.

A 50 score is earned where any of the following conditions apply:
1) some but not all major media organizations have a formal document,
2) the formal document contains only one of the three aspects mentioned in 100 (use of anonymous sources, conflicts of interest, and impartiality), or
3) major media organizations enforce this document but some exceptions exist.

A 0 score is earned where at least one of the following conditions apply:
1) most major media organizations lack a formal document,
2) the formal document is vague and doesn't provide guidance on use of anonymous sources, conflicts of interest, and impartiality, or
3) major media organizations rarely or never enforce this document.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.17.4.4 Law: it's legal to report accurate news even if it damages pub. figures' reput. (aii_q54)

Long tag: qog_std_cs_aii_q54

Original tag: aii_q54

Description:

Sub-score (0-100). Question no. 54. In law, it is legal to report accurate news even if it damages the reputation of a public figure.

A 100 score is earned where all the following conditions are met:
1) it is legal to report accurate information on public figures regardless of the damage to their reputations,
2) journalists can only be convicted if malice is proved (a story was published even though the journalist knew it was false or didn't try to verify it).

Note: Public figures include anyone in a position of responsibility in the government or civil service; political leaders; and leaders of civil society organizations, religious groups, trade unions, or large businesses.

A 0 score is earned where no such law exists, or a law exists but it doesn't include all the conditions described in 100. A 0 score is also earned where the law establishes the presumption of bad faith for all comments deemed defamatory and/or the burden of proof falls to journalists.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.17.4.5 Practice: the government does not promote the media's self-censorship (aii_q55)

Long tag: qog_std_cs_aii_q55

Original tag: aii_q55

Description:

Sub-score (0-100). Question no. 55. In practice, there is no prior government restraint (pre-publication censoring) and the government doesn't promote the media's self-censorship.

A 100 score is earned where all the following conditions are met:
1) the government never prevents the publication of information, and
2) the government doesn't promote the media's self-censorship (e.g. with threats, discrimination in the application of tax laws, government advertising, etc.).

A 50 score is earned where any of the following conditions apply:
1) the government occasionally prevents the publication of information, or
2) it occasionally encourages the media to self-censor (e.g. with threats, discrimination in the application of tax laws, government advertising, etc.).

A 0 score is earned where at least one of the following conditions apply:
1) the government usually prevents the publication of information, or
2) it usually encourages the media to self-censor (e.g. with threats, discrimination in the application of tax laws, government advertising, etc.).

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.17.4.6 Practice: ministries and autonomous agencies have websites (aii_q58)

Long tag: qog_std_cs_aii_q58

Original tag: aii_q58

Description:

Sub-score (0-100). Question no. 58. In practice, ministries and autonomous agencies have websites.

A 100 score is earned where all the following conditions are met:
1) all ministries and autonomous agencies (public service providers) have websites, and

2) are updated at least once a month.

A 50 score is earned where any of the following conditions apply:
1) about half of the ministries and autonomous agencies (public service providers) have websites, or
2) the websites are updated less than once a month.

A 0 score is earned where less than 10percent of the ministries and autonomous agencies (public service providers) have websites.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.17.4.7 Practice: the public services regulatory agencies have websites (aii_q59)

Long tag: qog_std_cs_aii_q59

Original tag: aii_q59

Description:

Sub-score (0-100). Question no. 59. In practice, the public services regulatory agencies and the national ombudsman (when and if there is one) have websites.

A 100 score is earned where all the following conditions are met:
1) all the public services regulatory agencies and the national ombudsman (if one exists) have websites,
2) the websites inform users of their rights and how to exercise them in a way that is easy to grasp for users with limited education, and
3) the websites allow users to file complaints online. Note: other digital methods to file complaints, such as mobile apps or phone lines, can also be considered for this indicator.

A 50 score is earned where any of the following conditions apply:
1) some but not all the public services regulatory agencies and the national ombudsman have websites,
2) the websites contain little information about users rights and how to exercise them or the information is difficult to grasp for users with limited education, or
3) the websites don't allow users to file complaints online.

A 0 score is earned where at least one of the following conditions apply:
1) the public services regulatory agencies and the national ombudsman lack websites, or
2) the websites generally lack basic information about users rights or how to exercise them.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.17.4.8 Freedom on the Net: Limits on content (fhn_fotnloc)

Long tag: qog_std_cs_fhn_fotnloc

Original tag: fhn_fotnloc

Description:

Limits on Content: Analyzes legal regulations on content, technical filtering and blocking of websites, self-censorship, the vibrancy/diversity of online news media, and the use of digital tools for civic mobilization. The score goes from 0 to 100, where 100 represents worst outcomes.

Variable citation: Freedom House. (2021b). Freedom on the net 2020: The global drive to control big tech. `https://freedomhouse.org/report/freedom-net/2021/global-drive-control-big-tech`

2.17.4.9 Freedom on the Net: Obstacles to Access (fhn_fotnota)

Long tag: qog_std_cs_fhn_fotnota

Original tag: fhn_fotnota

Description:

Obstacles to Access: Details infrastructural and economic barriers to access, legal and ownership control over internet service providers, and independence of regulatory bodies. The score goes from 0 to 100, where 100 represents worst outcomes.

Variable citation: Freedom House. (2021b). Freedom on the net 2020: The global drive to control big tech. `https://freedomhouse.org/report/freedom-net/2021/global-drive-control-big-tech`

2.17.4.10 Freedom on the Net: Score (fhn_fotnsc)

Long tag: qog_std_cs_fhn_fotnsc

Original tag: fhn_fotnsc

Description:

Freedom on the Net, Score: Measures the subtle and not-so-subtle ways that governments and non-state actors around the world restrict our intrinsic rights online by looking at Obstacles to Access, Limits on Content and Violations of User Rights. The scores are based on a scale of 0 to 100 with 0 representing the best level of freedom on the net progress and 100 the worst.

Variable citation: Freedom House. (2021b). Freedom on the net 2020: The global drive to control big tech. `https://freedomhouse.org/report/freedom-net/2021/global-drive-control-big-tech`

2.17.4.11 Freedom on the Net: Status (fhn_fotnst)

Long tag: qog_std_cs_fhn_fotnst

Original tag: fhn_fotnst

Description:

Freedom on the Net, Status:

1. Free
2. Partly Free
3. Not Free

Variable citation: Freedom House. (2021b). Freedom on the net 2020: The global drive to control big tech. `https://freedomhouse.org/report/freedom-net/2021/global-drive-control-big-tech`

2.17.4.12 Freedom on the Net: Violation of Users' rights (fhn_fotnvur)

Long tag: qog_std_cs_fhn_fotnvur

Original tag: fhn_fotnvur

Description:

Violations of User Rights: Tackles surveillance, privacy, and repercussions for online speech and activities, such as imprisonment, extralegal harassment, or cyberattacks. The score goes from 0 to 100, where 100 represents worst outcomes.

Variable citation: Freedom House. (2021b). Freedom on the net 2020: The global drive to control big tech. `https://freedomhouse.org/report/freedom-net/2021/global-drive-control-big-tech`

2.17.4.13 Economic Influences over Media Content (2001-2016) (fhp_mcei5)

Long tag: qog_std_cs_fhp_mcei5

Original tag: fhp_mcei5

Description:

Economic Influences over Media Content (2001-2016). This category includes the structure of media ownership; transparency and concentration of ownership; the costs of establishing media as well as any impediments to news production and distribution; the selective withholding of advertising or subsidies by the state or other actors; the impact of corruption and bribery on content; and the extent to which the economic situation in a country or territory affects the development and sustainability of the media.

Variable citation: Freedom House. (2017). Freedom of the press 2017. `https://freedomhouse.org/report/freedompress/freedom-press-2017`

2.17.4.14 Laws and Regulations that Influence Media Content (2001-2016) (fhp_mclr5)

Long tag: qog_std_cs_fhp_mclr5

Original tag: fhp_mclr5

Description:

Laws and Regulations that Influence the Media Content (2001-2016). The variable encompasses an examination of both the laws and regulations that could influence media content and the government's inclination to use these laws and legal institutions to restrict the media's ability to operate. Freedom House assesses the positive impact of legal and constitutional guarantees for freedom of expression; the potentially negative aspects of security legislation, the penal code, and other criminal statutes; penalties for libel and defamation; the existence of and ability to use freedom of information legislation; the independence of the judiciary and of official media regulatory bodies; registration requirements for both media outlets and journalists; and the ability of journalists' groups to operate freely. The scale of the variable is 0-30. 0 indicates more freedom.

Variable citation: Freedom House. (2017). Freedom of the press 2017. `https://freedomhouse.org/report/freedompress/freedom-press-2017`

2.17.4.15 Political Pressures and Controls on Media Content (2001-2016) (fhp_mcpp5)

Long tag: qog_std_cs_fhp_mcpp5

Original tag: fhp_mcpp5

Description:

Political Pressures and Controls on Media Content (2001-2016). The variable evaluates the degree of political control over the content of news media. Issues examined include the editorial independence of both

state-owned and privately owned media; access to information and sources; official censorship and self-censorship; the vibrancy of the media; the ability of both foreign and local reporters to cover the news freely and without harassment; and the intimidation of journalists by the state or other actors, including arbitrary detention and imprisonment, violent assaults, and other threats. The scale of the variable is 0-40. 0 indicates more freedom.

Variable citation: Freedom House. (2017). Freedom of the press 2017. `https://freedomhouse.org/report/freedompress/freedom-press-2017`

2.17.4.16 Freedom of the Press, Score (2001-2016) (fhp_score5)

Long tag: qog_std_cs_fhp_score5

Original tag: fhp_score5

Description:

Freedom of the Press, Score (2001-2016): The press freedom index is computed by adding four component ratings: Laws and regulations, Political pressures and controls, Economic Influences and Repressive actions. The scale ranges from 0 (most free) to 100 (least free).

Variable citation: Freedom House. (2017). Freedom of the press 2017. `https://freedomhouse.org/report/freedompress/freedom-press-2017`

2.17.4.17 Freedom of the Press, Status (2001-2016) (fhp_status5)

Long tag: qog_std_cs_fhp_status5

Original tag: fhp_status5

Description:

Freedom of the Press, Status (1988-2016):

1. Free
2. Partly Free
3. Not Free

Variable citation: Freedom House. (2017). Freedom of the press 2017. `https://freedomhouse.org/report/freedompress/freedom-press-2017`

2.17.4.18 Press Freedom Index (rsf_pfi)

Long tag: qog_std_cs_rsf_pfi

Original tag: rsf_pfi

Description:

The Press Freedom index measures the amount of freedom journalists and the media have in each country and the efforts made by governments to see that press freedom is respected. It does not take account of all human rights violations, only those that affect press freedom. Neither is it an indicator of the quality of a country's media.

Note: With the exception of the year 2012 the index ranges between 0 (total press freedom) and 100 (no press freedom). However for the 2012 data release RSF changed the scale so that negative values can be and indeed are assigned to countries with more press freedom. We have decided leave the data as is.

Variable citation: Reporters sans frontières. (2021). World press freedom index. `https://rsf.org/en/ranking`

2.17.4.19 Confidence: The Press (wvs_confpr)

Long tag: qog_std_cs_wvs_confpr

Original tag: wvs_confpr

Description:

I am going to name a number of organizations. For each one, could you tell me how much confidence you have in them: The Press

1. None at all
2. Not very much
3. Quite a lot
4. A great deal

Variable citation: Haerpfer, C., Inglehart, R., Moreno, A., Welzel, C., Kizilova, K., Diez-Medrano, J., Lagos, M., Norris, P., Ponarin, E., & et al., B. P. (2021). 2.17.5 Political System

This category includes variables describing the rules of the political system (presidential or parlia- mentary system), the chief executive (years in office), regime type, stability (age of present regime), and checks and balances as well as aspects of federalism.

2.17.5.1 Practice: significant public expenditure receives legislative approval yearly (aii_q31)

Long tag: qog_std_cs_aii_q31

Original tag: aii_q31

Description:

Sub-score (0-100). Question no. 31. In practice, significant public expenditure receives legislative approval on an annual basis.

A 100 score is earned where all the following conditions are met:
1) all significant government expenditure is approved by the legislature on an annual basis in open hearings, and
2) the legislature makes in-year budget amendments to the government proposed budget.
A 100 score is earned even if defense expenditure is approved in closed hearings.

A 50 score is earned where any of the following conditions apply:
1) not all significant government expenditure is approved annually by the legislature or it's not approved in open hearings, or
2) the legislature occasionally doesn't approve in-year budget amendments.

A 0 score is earned where at least one of the following conditions applies:
1) the legislative rarely approves significant government expenditure, or
2) the legislature rarely makes in-year budget amendments to the government proposed budget.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.17.5.2 Law: executive's proposal and approved budget must be published in full yearly (aii_q32)

Long tag: qog_std_cs_aii_q32

Original tag: aii_q32

Description:

Sub-score (0-100). Question no. 32. In law, both the executive's budget proposal and the approved budget must be published in full every year.

A 100 score is earned where in law both the budget proposed by the Executive (draft sent to Congress for approval) and the approved budget must be published in full every year.

A 0 score is earned where no such law exists.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.17.5.3 Practice: a legislative committee exercises oversight of public funds (aii_q34)

Long tag: qog_std_cs_aii_q34

Original tag: aii_q34

Description:

Sub-score (0-100). Question no. 34. In practice, a legislative committee exercises oversight of public funds.

A 100 score is earned where all the following conditions are met:
1) there is a functioning oversight committee that goes into session at least weekly, and
2) the committee has conducted at least one investigation in the last year (even if the investigation hasn't finished at the time of this research).

A 50 score is earned where any of the following conditions apply:
1) there is a functioning oversight committee but it goes into session at least biweekly, or
2) the committee has conducted only one investigation in the last two years.

A 0 score is earned where at least one of the following conditions applies:
1) no functioning oversight committee exists or it exists but it meets monthly or less frequently, or
2) the committee has not conducted any investigation in the last two years.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.17.5.4 Law: citizens have a right to request public information from state bodies (aii_q41)

Long tag: qog_std_cs_aii_q41

Original tag: aii_q41

Description:

Sub-score (0-100). Question no. 41. In law, citizens have a right to request public information from state bodies.

A 100 score is earned where all the following conditions are met:
1) a Constitutional principle guarantees citizens' rights to request and receive access to any public documents and information, and
2) there is a specific access to information law that establishes the process for this right to be implemented.
Note: It's possible to score 100 if national security or individual privacy information is protected, as long as the law defines the parameters and processes to declare what information is protected and they are limited in scope. Just the constitutional protection is not enough to score 100.

A 0 score is earned if there is no such law, or a law exists but it doesn't mandate all the conditions described in 100.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.17.5.5 Practice: citizens can access legislative processes and documents (aii_q43)

Long tag: qog_std_cs_aii_q43

Original tag: aii_q43

Description:

Sub-score (0-100). Question no. 43. In practice, citizens can access legislative processes and documents.

A 100 score is earned where all the following conditions are met:
1) legislative records (at least transcripts of debates/votes, roll call vote, and full text of bills) are accessible to the public online or at the cost of photocopying,
2) most records are available within a day of legislative proceedings, and
3) there is a complete, easily available legislative archive either on or off line.

A 50 score is earned where any of the following conditions apply:
1) occasionally legislative records (at least transcripts of debates/votes, roll call vote, and full text of bills) are not accessible to the public online or the cost is higher than photocopying;
2) records are usually available within a week of legislative proceedings, or
3) citizens have limited access to a legislative archive either on or off line or the archive is not complete.

A 0 score is earned where at least one of the following conditions apply:
1) legislative records (at least transcripts of debates/votes, roll call vote, and full text of bills) are rarely accessible to the public online,
2) records take more than a week after legislative proceedings to be available, or
3) there is no legislative archive or citizens don't have access to it.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.17.5.6 Practice: government doesn't promote the self-censorship of citizens online (aii_q56)

Long tag: qog_std_cs_aii_q56

Original tag: aii_q56

Description:

Sub-score (0-100). Question no. 56. In practice, there is no prior government restraint (pre-publication censoring) of citizen-created content online and the government doesn't promote the self-censorship of citizens online (in blogs, social media, etc.).

A 100 score is earned where all the following conditions are met:
1) the government never prevents the publication online of information by citizens, and
2) the government doesn't promote citizen's self-censorship (e.g. with arrests, threats to prosecute, interrogations, etc.).

A 50 score is earned where any of the following conditions apply:
1) the government occasionally prevents the publication online of information by citizens, or
2) it occasionally encourages citizens to self-censor (e.g. with arrests, threats to prosecute, interrogations, etc.).

A 0 score is earned where at least one of the following conditions apply:
1) the government usually prevents the publication online of information by citizens, or
2) it usually encourages citizens to self-censor (e.g. with arrests, threats to prosecute, interrogations, etc.).

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.17.5.7 Practice: government doesn't block (or ask ICT firms to block) online content (aii_q57)

Long tag: qog_std_cs_aii_q57

Original tag: aii_q57

Description:

Sub-score (0-100). Question no. 57. In practice, the government does not block (or require ICT firms to block) online content.

A 100 score is earned where all the following conditions are met:
1) there is no evidence that politically sensitive websites, keywords, search results or content are filtered, blocked or taken down, and
2) Web users in the country are able to access any website in the world without restriction. A 100 score can still be earned if child pornography or delinquent intellectual property websites have been taken down.

A 50 score is earned where any of the following conditions apply:
1) a small number of sites, keywords or search results on a specific issue are blocked (blocking cannot include widely used Internet tools such as Skype, Google, YouTube, or Facebook/Twitter), or
2) citizens are occasionally unable to access certain websites (national or international).

A 0 score is earned where at least one of the following conditions apply:
1) politically sensitive websites, keywords, search results or content are usually filtered, blocked or taken down, or
2) Web users in the country are usually unable to access many websites without restriction, including widely used Internet tools such as Skype, Google, YouTube, or Facebook/Twitter.

2.17.5.8 Dichotomous democracy measure (bmr_dem)

Long tag: qog_std_cs_bmr_dem

Original tag: bmr_dem

Description:

Dichotomous democracy measure.

Variable citation: Boix, C., Miller, M. K., & Rosato, S. (2022). Boix-miller-rosato dichotomous coding of democracy, 1800-2020 [UNF:6:6u8JNSHqP+yYKbLzrgFDug== [fileUNF]]. *Harvard Dataverse, V1*. https://doi.org/https://doi.org/10.7910/DVN/FENWWR Boix, C., Miller, M. K., & Rosato, S. (2013). A complete data set of political regimes, 1800-2007. *Comparative Political Studies*, 46(12), 1523–54

2.17.5.9 Number of previous democratic breakdowns (bmr_dembr)

Long tag: qog_std_cs_bmr_dembr

Original tag: bmr_dembr

Description:

Previous number of democratic breakdowns.

Variable citation: Boix, C., Miller, M. K., & Rosato, S. (2022). Boix-miller-rosato dichotomous coding of democ-

racy, 1800-2020 [UNF:6:6u8JNSHqP+yYKbLzrgFDug== [fileUNF]]. *Harvard Dataverse, V1.* https://doi.org/https://doi.org/10.7910/DVN/FENWWR Boix, C., Miller, M. K., & Rosato, S. (2013). A complete data set of political regimes, 1800-2007. *Comparative Political Studies*, 46(12), 1523–54

2.17.5.10 Consecutive years of current regime type (bmr_demdur)

Long tag: qog_std_cs_bmr_demdur

Original tag: bmr_demdur

Description:
Consecutive years of current regime type.

Variable citation: Boix, C., Miller, M. K., & Rosato, S. (2022). Boix-miller-rosato dichotomous coding of democracy, 1800-2020 [UNF:6:6u8JNSHqP+yYKbLzrgFDug== [fileUNF]]. *Harvard Dataverse, V1.* https://doi.org/https://doi.org/10.7910/DVN/FENWWR Boix, C., Miller, M. K., & Rosato, S. (2013). A complete data set of political regimes, 1800-2007. *Comparative Political Studies*, 46(12), 1523–54

2.17.5.11 Democracy measure, requiring min. 50percent of adult women have the right to vote (bmr_demfsuf)

Long tag: qog_std_cs_bmr_demfsuf

Original tag: bmr_demfsuf

Description:
This adjusts democracy by also requiring that at least half of adult women have the right to vote.

Variable citation: Boix, C., Miller, M. K., & Rosato, S. (2022). Boix-miller-rosato dichotomous coding of democracy, 1800-2020 [UNF:6:6u8JNSHqP+yYKbLzrgFDug== [fileUNF]]. *Harvard Dataverse, V1.* https://doi.org/https://doi.org/10.7910/DVN/FENWWR Boix, C., Miller, M. K., & Rosato, S. (2013). A complete data set of political regimes, 1800-2007. *Comparative Political Studies*, 46(12), 1523–54

2.17.5.12 Dichotomous democracy measure (incl. missing for some countries) (bmr_demmis)

Long tag: qog_std_cs_bmr_demmis

Original tag: bmr_demmis

Description:
This is the same measure as democracy (bmr_dem), except it records an NA for countries occupied during an international war (e.g., the Netherlands 1940-44) or experiencing state collapse during a civil war (e.g., Lebanon 1976-89). The democracy variable instead fills in these years as continuations of the same regime type.

Variable citation: Boix, C., Miller, M. K., & Rosato, S. (2022). Boix-miller-rosato dichotomous coding of democracy, 1800-2020 [UNF:6:6u8JNSHqP+yYKbLzrgFDug== [fileUNF]]. *Harvard Dataverse, V1.* https://doi.org/https://doi.org/10.7910/DVN/FENWWR Boix, C., Miller, M. K., & Rosato, S. (2013). A complete data set of political regimes, 1800-2007. *Comparative Political Studies*, 46(12), 1523–54

2.17.5.13 Democratic transition (bmr_demtran)

Long tag: qog_std_cs_bmr_demtran

Original tag: bmr_demtran

Description:
(-1) Democratic breakdown
(0) No change
(1) Democratic transition

Variable citation: Boix, C., Miller, M. K., & Rosato, S. (2022). Boix-miller-rosato dichotomous coding of democracy, 1800-2020 [UNF:6:6u8JNSHqP+yYKbLzrgFDug== [fileUNF]]. *Harvard Dataverse, V1.* https://doi.org/https://doi.org/10.7910/DVN/FENWWR Boix, C., Miller, M. K., & Rosato, S. (2013). A complete data set of political regimes, 1800-2007. *Comparative Political Studies*, 46(12), 1523–54

2.17.5.14 No. of chambers in parliament (br_chpar)

Long tag: qog_std_cs_br_chpar

Original tag: br_chpar

Description:
Total number of chambers in parliament.

Variable citation: Bjørnskov, C., & Rode, M. (2020). Regime types and regime change: A new dataset on democracy, coups, and political institutions. *Review of International Organizations*, 15, 531–551

2.17.5.15 Is the country a colony (br_col)

Long tag: qog_std_cs_br_col

Original tag: br_col

Description:
Is the country a colony? (0: No; 1: Yes)

Variable citation: Bjørnskov, C., & Rode, M. (2020). Regime types and regime change: A new dataset on democracy, coups, and political institutions. *Review of International Organizations*, 15, 531–551

2.17.5.16 Is the country communist / socialist (br_com)

Long tag: qog_std_cs_br_com

Original tag: br_com

Description:
Is the country's regime communist / socialist? (0: No; 1: Yes)

Variable citation: Bjørnskov, C., & Rode, M. (2020). Regime types and regime change: A new dataset on democracy, coups, and political institutions. *Review of International Organizations*, 15, 531–551

2.17.5.17 Is the country a democracy (br_dem)

Long tag: qog_std_cs_br_dem

Original tag: br_dem

Description:
Is the country democratic or not? following Cheibub, Ghandi and Vreeland (2010). Dichotomous indicator of democracy based on a minimalist definition. A country is defined as democratic, if elections were conducted, these were free and fair, and if there was a peaceful turnover of legislative and executive offices following those elections. (0: No; 1: Yes)

Variable citation: Bjørnskov, C., & Rode, M. (2020). Regime types and regime change: A new dataset on democracy, coups, and political institutions. *Review of International Organizations*, 15, 531–551

2.17.5.18 Is the monarch female (br_monf)

Long tag: qog_std_cs_br_monf

Original tag: br_monf

Description:
Is the monarch female? (0: No; 1: Yes)

Variable citation: Bjørnskov, C., & Rode, M. (2020). Regime types and regime change: A new dataset on democracy, coups, and political institutions. *Review of International Organizations*, 15, 531–551

2.17.5.19 New constitution implemented (br_newconst)

Long tag: qog_std_cs_br_newconst

Original tag: br_newconst

Description:
Whether a new constitution was implemented (0: No; 1: Yes)

Variable citation: Bjørnskov, C., & Rode, M. (2020). Regime types and regime change: A new dataset on democracy, coups, and political institutions. *Review of International Organizations*, 15, 531–551

2.17.5.20 Is the president female (br_presf)

Long tag: qog_std_cs_br_presf

Original tag: br_presf

Description:
Is the president female? (0: No; 1: Yes)

Variable citation: Bjørnskov, C., & Rode, M. (2020). Regime types and regime change: A new dataset on democracy, coups, and political institutions. *Review of International Organizations*, 15, 531–551

2.17.5.21 Approval of Democracy (bti_aod)

Long tag: qog_std_cs_bti_aod

Original tag: bti_aod

Description:
How strong is the citizens' approval of democratic norms and procedures? 1-10.

1. Approval of democratic norms and procedures is very low.
4. Approval of democratic norms and procedures is fairly low.

7. Approval of democratic norms and procedures is fairly high.
10. Approval of democratic norms and procedures is very high.

Variable citation: Donner, S., Hartmann, H., & Schwarz, R. (2020). *Transformation index of the bertelsmann stiftung 2020*. Bertelsmann Stiftung. `http://www.bti-project.org`

2.17.5.22 Basic Administration (bti_ba)

Long tag: qog_std_cs_bti_ba

Original tag: bti_ba

Description:
To what extent do basic administrative structures exist? 1-10.

1. The administrative structures of the state are limited to keeping the peace and maintaining law and order. Their territorial scope is very limited, and broad segments of the population are not covered.
4. The administrative structures of the state are extending beyond maintaining law and order, but their territorial scope and effectivity are limited.
7. The administrative structures of the state provide most basic public services throughout the country, but their operation is to some extent deficient.
10. The state has a differentiated administrative structure throughout the country which provides all basic public services.

Variable citation: Donner, S., Hartmann, H., & Schwarz, R. (2020). *Transformation index of the bertelsmann stiftung 2020*. Bertelsmann Stiftung. `http://www.bti-project.org`

2.17.5.23 Commitment to Democratic Institutions (bti_cdi)

Long tag: qog_std_cs_bti_cdi

Original tag: bti_cdi

Description:
To what extent are democratic institutions accepted as legitimate by the relevant actors? 1-10.

1. There are no democratic institutions as such (authoritarian regime).
4. Only individual institutions are accepted, while influential actors hold vetoes. Acceptance remains unstable over time.
7. Most democratic institutions are accepted as legitimate by most relevant actors.
10. All democratic institutions are accepted as legitimate by all relevant actors.

Variable citation: Donner, S., Hartmann, H., & Schwarz, R. (2020). *Transformation index of the bertelsmann stiftung 2020*. Bertelsmann Stiftung. `http://www.bti-project.org`

2.17.5.24 Democracy Status (bti_ds)

Long tag: qog_std_cs_bti_ds

Original tag: bti_ds

Description:
Democracy Status: The state of democracy is measured in terms of five criteria; including stateness, political participation, rule of law, stability of the democratic institutions, and political and social integration 1-10.

Variable citation: Donner, S., Hartmann, H., & Schwarz, R. (2020). *Transformation index of the bertelsmann stiftung 2020*. Bertelsmann Stiftung. `http://www.bti-project.org`

2.17.5.25 Effective Power to Govern (bti_epg)

Long tag: qog_std_cs_bti_epg

Original tag: bti_epg

Description:
To what extent do democratically elected political representatives have the effective power to govern, or to what extent are there veto powers and political enclaves? 1-10.

1. Political decision-makers are not democratically elected.
4. Democratically elected political representatives have limited power to govern. Strong veto groups are able to undermine fundamental elements of democratic procedures.
7. Democratically elected political representatives have considerable power to govern. However, individual power groups can set their own domains apart or enforce special-interest policies.
10. Democratically elected political representatives have the effective power to govern. No individual or group is holding any de facto veto power.

Variable citation: Donner, S., Hartmann, H., & Schwarz, R. (2020). *Transformation index of the bertelsmann stiftung 2020*. Bertelsmann Stiftung. `http://www.bti-project.org`

2.17.5.26 International Cooperation (bti_ic)

Long tag: qog_std_cs_bti_ic

Original tag: bti_ic

Description:

The political leadership is willing and able to cooperate with external supporters and organizations. Including "To what extent does the political leadership use the support of international partners to implement a long-term strategy of development?", "To what extent does the government act as a credible and reliable partner in its relations with the international community?" and "To what extent is the political leadership willing and able to cooperate with neighboring countries?".

Variable citation: Donner, S., Hartmann, H., & Schwarz, R. (2020). *Transformation index of the bertelsmann stiftung 2020*. Bertelsmann Stiftung. `http://www.bti-project.org`

2.17.5.27 Level of Difficulty (bti_lod)

Long tag: qog_std_cs_bti_lod

Original tag: bti_lod

Description:

Level of Difficulty in Management: it groups the scores of the structural constraints, the civil society traditions and the conflict intensity of a society 1-10. Higher scores indicate more constraints on management.

Variable citation: Donner, S., Hartmann, H., & Schwarz, R. (2020). *Transformation index of the bertelsmann stiftung 2020*. Bertelsmann Stiftung. `http://www.bti-project.org`

2.17.5.28 No Interference of Religious Dogmas (bti_nird)

Long tag: qog_std_cs_bti_nird

Original tag: bti_nird

Description:

To what extent are legal order and political institutions defined without interference by religious dogmas? 1-10.

1. The state is theocratic. Religious dogmas define legal order and political institutions.
4. Secular and religious norms are in conflict about the basic constitution of the state or are forming a hybrid system.
7. The state is largely secular. However, religious dogmas have considerable influence on legal order and political institutions.
10. The state is secular. Religious dogmas have no noteworthy influence on legal order or political institutions.

Variable citation: Donner, S., Hartmann, H., & Schwarz, R. (2020). *Transformation index of the bertelsmann stiftung 2020*. Bertelsmann Stiftung. `http://www.bti-project.org`

2.17.5.29 Performance of Democratic Institutions (bti_pdi)

Long tag: qog_std_cs_bti_pdi

Original tag: bti_pdi

Description:

Are democratic institutions capable of performing? 1-10.

1. There are no democratic institutions as such (authoritarian regime).
4. Democratic institutions exist, but they are unstable and ineffective.
7. Democratic institutions perform their functions in principle, but often are inefficient due to friction between institutions.
10. The ensemble of democratic institutions is effective and efficient. As a rule, political decisions are prepared, made, implemented and reviewed in legitimate procedures by the appropriate authorities.

Variable citation: Donner, S., Hartmann, H., & Schwarz, R. (2020). *Transformation index of the bertelsmann stiftung 2020*. Bertelsmann Stiftung. `http://www.bti-project.org`

2.17.5.30 Private Property (bti_prp)

Long tag: qog_std_cs_bti_prp

Original tag: bti_prp

Description:

There are adequate conditions to support a functional private sector. Including "To what extent do government authorities ensure well-defined rights of private property and regulate the acquisition, benefits, use and sale of property?" and "To what extent are private companies permitted and protected? Are privatization processes conducted in a manner consistent with market principles?".

Variable citation: Donner, S., Hartmann, H., & Schwarz, R. (2020). *Transformation index of the bertelsmann stiftung 2020*. Bertelsmann Stiftung. `http://www.bti-project.org`

2.17.5.31 Rule of Law (bti_rol)

Long tag: qog_std_cs_bti_rol

Original tag: bti_rol

Description:

Rule of Law: State powers check and balance one another and ensure civil rights. Including "To what extent is there a working separation of powers (checks and balances)", "To what extent does an independent judiciary exist?", "To what extent are public officeholders who abuse their positions prosecuted or penalized?" and "To what extent are civil rights guaranteed and protected, and to what extent can citizens seek redress for violations of these rights?".

Variable citation: Donner, S., Hartmann, H., & Schwarz, R. (2020). *Transformation index of the bertelsmann stiftung 2020*. Bertelsmann Stiftung. `http://www.bti-project.org`

2.17.5.32 Stability of Democratic Institutions (bti_sdi)

Long tag: qog_std_cs_bti_sdi

Original tag: bti_sdi

Description:

Stability of Democratic Institutions: Democratic institutions are capable of performing, and they are adequately accepted as legitimate 1-10.

Variable citation: Donner, S., Hartmann, H., & Schwarz, R. (2020). *Transformation index of the bertelsmann stiftung 2020*. Bertelsmann Stiftung. `http://www.bti-project.org`

2.17.5.33 Separation of Powers (bti_sop)

Long tag: qog_std_cs_bti_sop

Original tag: bti_sop

Description:

To what extent is there a working separation of powers (checks and balances)? 1-10.

1. There is no separation of powers, neither de jure nor de facto.
4. One branch, generally the executive, has an ongoing and either informally or formally confirmed monopoly on power, which may include the colonization of other powers, even though they are institutionally differentiated.
7. The separation of powers generally is in place and functioning. Partial or temporary restrictions of checks and balances occur, but a restoration of balance is sought.
10. There is a clear separation of powers with mutual checks and balances.

Variable citation: Donner, S., Hartmann, H., & Schwarz, R. (2020). *Transformation index of the bertelsmann stiftung 2020*. Bertelsmann Stiftung. `http://www.bti-project.org`

2.17.5.34 Stateness (bti_st)

Long tag: qog_std_cs_bti_st

Original tag: bti_st

Description:

Stateness: There is clarity about the nation's existence as a state with adequately established and differentiated power structures 1-10.

Variable citation: Donner, S., Hartmann, H., & Schwarz, R. (2020). *Transformation index of the bertelsmann stiftung 2020*. Bertelsmann Stiftung. `http://www.bti-project.org`

2.17.5.35 Reference in Constitution to Democracy (ccp_democ)

Long tag: qog_std_cs_ccp_democ

Original tag: ccp_democ

Description:

Does the constitution refer to "democracy" or "democratic"?

1. Yes
2. No

Variable citation: Elkins, Z., & Ginsburg, T. (2021). Characteristics of national constitutions, version 3.0 [Last modified: May 20, 2021. Available at comparativeconstitutionsproject.org]. `http://www.comparativeconstitutionsproject.org`

2.17.5.36 Legislative Initiative Allowed (ccp_initiat)

Long tag: qog_std_cs_ccp_initiat

Original tag: ccp_initiat

Description:

Does the constitution provide for the ability of individuals to propose legislative initiatives?

1. Yes
2. No
96. Other

Variable citation: Elkins, Z., & Ginsburg, T. (2021). Characteristics of national constitutions, version 3.0 [Last modified: May 20, 2021. Available at comparativeconstitutionsproject.org]. `http://www.comparativeconstitutionsproject.org`

2.17.5.37 Reference in Constitution to Socialism (ccp_socialsm)

Long tag: qog_std_cs_ccp_socialsm

Original tag: ccp_socialsm

Description:

Does the constitution refer to "socialism" or "socialist"?

1. Yes
2. No
96. Other

Variable citation: Elkins, Z., & Ginsburg, T. (2021). Characteristics of national constitutions, version 3.0 [Last modified: May 20, 2021. Available at comparativeconstitutionsproject.org]. `http://www.comparativeconstitutionsproject.org`

2.17.5.38 Satisfaction with Democracy (cses_sd)

Long tag: qog_std_cs_cses_sd

Original tag: cses_sd

Description:

On the whole, are you very satisfied, fairly satisfied, not very satisfied, or not at all satisfied with the way democracy works in [COUNTRY]?

1. Not at all satisfied.
2. Not very satisfied.
3. Fairly satisfied.
4. Very satisfied.

Note: Refused to answer, Don't know and similar answers were coded as missing, and the average are based on the remaining answers.

2.17.5.39 Index of Globalization (dr_ig)

Long tag: qog_std_cs_dr_ig

Original tag: dr_ig

Description:

The overall index of globalization (scale of 1 to 100) is the weighted average of the following variables: economic globalization, social globalization and political globalization (dr_eg, dr_sg and dr_pg). Most weight has been given to economic followed by social globalization.

Variable citation: Gygli, S., Haelg, F., Potrafke, N., & Sturm, J.-E. (2019). The KOF Globalisation Index - Revisited. `https://doi.org/10.1007/s11558-019-09344-2` Dreher, A. (2006). Does globalization affect growth? evidence from a new index of globalization. *Applied Economics*, 38(10), 1091–1110

2.17.5.40 Political Globalization (dr_pg)

Long tag: qog_std_cs_dr_pg

Original tag: dr_pg

Description:
Political globalisation (scale of 1 to 100) regards the de facto segment measured with reference to the number of embassies and international non-governmental organisations (NGOs), along with partici-pation in UN peacekeeping missions. The de jure segment contains variables focussing on membership of international organisations and international treaties.

Variable citation: Gygli, S., Haelg, F., Potrafke, N., & Sturm, J.-E. (2019). The KOF Globalisation Index - Revisited. `https://doi.org/10.1007/s11558-019-09344-2` Dreher, A. (2006). Does globalization affect growth? evidence from a new index of globalization. *Applied Economics*, 38(10), 1091–1110

2.17.5.41 E-Government Index (egov_egov)

Long tag: qog_std_cs_egov_egov

Original tag: egov_egov

Description:
The E-Government Development Index (EGDI) is a weighted average of normalised scores on the three most important dimensions of e-government, namely: scope and quality of online services (Online Service Index, OSI), status of the development of telecommunication infrastructure (Telecommunication Infrastructure Index, TII) and inherent human capital (Human Capital Index, HCI). Each of these sets of indices is in itself a composite measure that can be extracted and analysed independently.

Variable citation: Department of Economic and Social Affairs. (2020). United nations e-government survey. `https://publicadministration.un.org/egovkb/en-us/Reports/UN-E-Government-Survey-2020`

2.17.5.42 E-Participation Index (egov_epar)

Long tag: qog_std_cs_egov_epar

Original tag: egov_epar

Description:
The E-Participation Index (EPI) is derived as a supplementary index to the UN E-Government Survey. It extends the dimension of the Survey by focusing on the use of online services to facilitate provision of information by governments to citizens (e-information sharing), interaction with stakeholders (e-consultation) and engagement in decision-making processes.

A country's EPI reflects the e-participation mechanisms that are deployed by the government as compared to all other countries. The purpose of this measure is not to prescribe any specific practice, but rather to offer insight into how different countries are using online tools in promoting interaction between the government and its people, as well as among the people, for the benefit of all.

Variable citation: Department of Economic and Social Affairs. (2020). United nations e-government survey. `https://publicadministration.un.org/egovkb/en-us/Reports/UN-E-Government-Survey-2020`

2.17.5.43 Human Capital Index (egov_hci)

Long tag: qog_std_cs_egov_hci

Original tag: egov_hci

Description:
The Human Capital Index (HCI) consists of four components:

(i)adult literacy rate;
(ii)the combined primary, secondary and tertiary gross enrolment ratio;
(iii)expected years of schooling; and
(iv)average years of schooling.

Data for HCI components was extracted from the UNESCO-UIS source.

Variable citation: Department of Economic and Social Affairs. (2020). United nations e-government survey. `https://publicadministration.un.org/egovkb/en-us/Reports/UN-E-Government-Survey-2020`

2.17.5.44 Online Service Index (egov_osi)

Long tag: qog_std_cs_egov_osi

Original tag: egov_osi

Description:
The Online Service Index (OSI) values were constructed by researchers, including UN experts and online United Nations Volunteers (UNVs) from over 60 countries with coverage of 66 languages assessed each country's national website in the native language, including the national portal, e-services portal and

e-participation portal, as well as the websites of the related ministries of education, labour, social services, health, finance and environment as applicable. The UNVs included qualified graduate students and volunteers from universities in the field of public administration.

Variable citation: Department of Economic and Social Affairs. (2020). United nations e-government survey. `https://publicadministration.un.org/egovkb/en-us/Reports/UN-E-Government-Survey-2020`

2.17.5.45 Telecommunication Infrastructure Index (egov_tii)

Long tag: qog_std_cs_egov_tii

Original tag: egov_tii

Description:

The Telecommunication Infrastructure Index (TII) is an arithmetic average composite of five indicators:

(i) estimated internet users per 100 inhabitants;
(ii) number of main fixed telephone lines per 100 inhabitants;
(iii) number of mobile subscribers per 100 inhabitants;
(iv) number of wireless broadband subscriptions per 100 inhabitants; and
(v) number of fixed broadband subscriptions per 100 inhabitants.

Data for each component was extracted from the ITU source.

Variable citation: Department of Economic and Social Affairs. (2020). United nations e-government survey. `https://publicadministration.un.org/egovkb/en-us/Reports/UN-E-Government-Survey-2020`

2.17.5.46 Level of Democracy (Freedom House/Imputed Polity) (fh_ipolity2)

Long tag: qog_std_cs_fh_ipolity2

Original tag: fh_ipolity2

Description:

Scale ranges from 0-10 where 0 is least democratic and 10 most democratic. Average of Freedom House (fh_pr and fh_cl) is transformed to a scale 0-10 and Polity (p_polity2) is transformed to a scale 0-10. These variables are averaged into fh_polity2. The imputed version has imputed values for countries where data on Polity is missing by regressing Polity on the average Freedom House measure. Hadenius
Teorell (2005) show that this average index performs better both in terms of validity and reliability than its constituent parts.

Variable citation: Freedom House. (2021a). Freedom in the world 2021. `https://freedomhouse.org/report/freedom-world`

2.17.5.47 Level of Democracy (Freedom House/Polity) (fh_polity2)

Long tag: qog_std_cs_fh_polity2

Original tag: fh_polity2

Description:

Scale ranges from 0-10 where 0 is least democratic and 10 most democratic. Average of Freedom House (fh_pr and fh_cl) is transformed to a scale 0-10 and Polity (p_polity2) is transformed to a scale 0-10. These variables are averaged into fh_polity2.

Variable citation: Freedom House. (2021a). Freedom in the world 2021. `https://freedomhouse.org/report/freedom-world`

2.17.5.48 Political Pluralism and Participation (fh_ppp)

Long tag: qog_std_cs_fh_ppp

Original tag: fh_ppp

Description:

Political Pluralism and Participation - This variable encompasses an examination of the right of the people to freely organize in political parties; the existence of an opposition with a realistic possibility to increase its support; the ability of the people to make political choices free from domination by the military, totalitarian parties or other powerful groups; and the existence of full political rights for all minorities. Countries are graded between 0 (worst) and 16 (best).

Variable citation: Freedom House. (2021a). Freedom in the world 2021. `https://freedomhouse.org/report/freedom-world`

2.17.5.49 Political Rights (fh_pr)

Long tag: qog_std_cs_fh_pr

Original tag: fh_pr

Description:
Political Rights Rating - Political rights enable people to participate freely in the political process, including the right to vote freely for distinct alternatives in legitimate elections, compete for public office, join political parties and organizations, and elect representatives who have a decisive impact on public policies and are accountable to the electorate. The specific list of rights considered varies over the years. Countries are graded between 1 (most free) and 7 (least free).

Variable citation: Freedom House. (2021a). Freedom in the world 2021. `https://freedomhouse.org/report/freedom-world`

2.17.5.50 Freedom Status (fh_status)

Long tag: qog_std_cs_fh_status

Original tag: fh_status

Description:
1. Free
2. Partly Free
3. Not Free

Until 2003, countries whose combined average ratings for Political Rights and Civil Liberties fell between 1.0 and 2.5 were designated "Free"; between 3.0 and 5.5 "Partly Free", and between 5.5 and 7.0 "Not Free". Since then, countries whose ratings average 1.0 to 2.5 are considered "Free", 3.0 to 5.0 "Partly Free", and 5.5 to 7.0 "Not Free".

Variable citation: Freedom House. (2021a). Freedom in the world 2021. `https://freedomhouse.org/report/freedom-world`

2.17.5.51 Global Gender Gap Political Empowerment subindex (gggi_pes)

Long tag: qog_std_cs_gggi_pes

Original tag: gggi_pes

Description:
Political Empowerment (0 to 1, where 1 indicates no gap). This subindex measures the gap between men and women at the highest level of political decision-making through the ratio of women to men in ministerial positions and the ratio of women to men in parliamentary positions. In addition, we've included the ratio of women to men in terms of years in executive office (prime minister or president) for the last 50 years. A clear drawback in this category is the absence of any indicators capturing differences between the participation of women and men at local levels of government. Should such data become available at a globally comparative level in future years, it will be considered for inclusion in the Index.

Variable citation: World Economic Forum. (2021). The global gender gap report 2021 [All Rights Reserved]. `https://www.weforum.org/reports/ab6795a1-960c-42b2-b3d5-587eccda6023`

2.17.5.52 Independent Sub-Federal Unit (h_f)

Long tag: qog_std_cs_h_f

Original tag: h_f

Description:
Dummy variable coded 1 if there are independent sub-federal units (states, provinces, regions etc.) that impose substantive constraints on national fiscal policy.

Variable citation: Henisz, W. J. (2017). The Political Constraint Index (POLCON) Dataset 2017 release. `https://mgmt.wharton.upenn.edu/profile/1327`

2.17.5.53 Legislative Chamber (h_l1)

Long tag: qog_std_cs_h_l1

Original tag: h_l1

Description:
Dummy variable coded 1 if there is an effective legislative chamber (based on information from Polity's Executive Constraints, p_xconst).

Variable citation: Henisz, W. J. (2017). The Political Constraint Index (POLCON) Dataset 2017 release. `https://mgmt.wharton.upenn.edu/profile/1327`

2.17.5.54 Political Constraints Index III (h_polcon3)

Long tag: qog_std_cs_h_polcon3

Original tag: h_polcon3

Description:
This index measures the feasibility of policy change, i.e. the extent to which a change in the prefer-ences of

any one political actor may lead to a change in government policy. The index is composed from the following information: the number of independent branches of government with veto power over policy change, counting the executive and the presence of an effective lower and upper house in the legislature (more branches leading to more constraint); the extent of party alignment across branches of government, measured as the extent to which the same party or coalition of parties control each branch (decreasing the level of constraint); and the extent of preference heterogeneity within each legislative branch, measured as legislative fractionalization in the relevant house (increasing constraint for aligned executives, decreasing it for opposed executives). The index scores are derived from a simple spatial model and theoretically ranges from 0 to 1, with higher scores indicating more political constraint and thus less feasibility of policy change. Note that the coding reflects information as of January 1 in any given year. Henisz (2002) uses this index to demonstrate that political environments that limit the feasibility of policy change are an important determinant of investment in infrastructure.

Variable citation: Henisz, W. J. (2017). The Political Constraint Index (POLCON) Dataset 2017 release. `https://mgmt.wharton.upenn.edu/profile/1327`

2.17.5.55 Political Constraints Index V (h_polcon5)

Long tag: qog_std_cs_h_polcon5

Original tag: h_polcon5

Description:

This index follows the same logic as Political Constraints Index III (h_polcon3) but also includes two additional veto points: the judiciary and sub-federal entities. Note that the coding reflects in-formation as of January 1 in any given year. Henisz (2000) uses this index to measure the impact on cross-national growth rates of a government's ability to provide credible commitment.

Variable citation: Henisz, W. J. (2017). The Political Constraint Index (POLCON) Dataset 2017 release. `https://mgmt.wharton.upenn.edu/profile/1327`

2.17.5.56 Regime Durability (p_durable)

Long tag: qog_std_cs_p_durable

Original tag: p_durable

Description:

Regime Durability: The number of years since the most recent regime change (defined by a three point change in the p_polity score over a period of three years or less) or the end of a transition period defined by the lack of stable political institutions (denoted by a standardized authority score). In calculating the p_durable value, the first year during which a new (post-change) polity is established is coded as the baseline "year zero" (value = 0) and each subsequent year adds one to the value of the p_durable variable consecutively until a new regime change or transition period occurs.

Variable citation: Marshall, M. G., & Gurr, T. R. (2020). Polity v project, political regime characteristics and transitions, 1800-2018

2.17.5.57 Revised Combined Polity Score (p_polity2)

Long tag: qog_std_cs_p_polity2

Original tag: p_polity2

Description:

Revised Combined Polity Score: The polity score is computed by subtracting the p_autoc score from the p_democ score; the resulting unified polity scale ranges from +10 (strongly democratic) to -10 (strongly autocratic). The revised version of the polity variable is designed to facilitate the use of the polity regime measure in time-series analyses. It modifies the combined annual polity score by applying a simple treatment, or "fix" to convert instances of "standardized authority scores" (i.e., -66, -77, and -88) to conventional polity scores (i.e., within the range, -10 to +10). The values have been converted according to the following rule set:

(-66) Cases of foreign "interruption" are treated as "system missing."
(-77) Cases of "interregnum", or anarchy, are converted to a "neutral" Polity score of "0."
(-88) Cases of "transition" are prorated across the span of the transition.

For example, country X has a p_polity score of -7 in 1957, followed by three years of -88 and, finally, a score of +5 in 1961. The change (+12) would be prorated over the intervening three years at a rate of per year, so that the converted scores would be as follow: 1957 -7; 1958 -4; 1959 -1; 1960 +2; and 1961 +5.

Variable citation: Marshall, M. G., & Gurr, T. R. (2020). Polity v project, political regime characteristics and transitions, 1800-2018

2.17.5.58 Entry at the lowest level only (qs20_close1)

Long tag: qog_std_cs_qs20_close1

Original tag: qs20_close1

Description:
Country-level estimate for Entry at the lowest level only, scaled between 0 and 1. Highest score refers to cases where entry to bureaucratic positions is possible at the lowest level of hierarchy only, and positions at middle and higher levels of hierarchy are filled by individuals from within the bureaucracy.

Variable citation: Nistotskaya, M., Dahlberg, S., Dahlström, C., Sundström, A., Axelsson, S., Dalli, C. M., & Alvarado, N. (2021). The Quality of Government Expert Survey 2020 Dataset: Wave III. `https://doi.org/10.18157/qoges2020`

2.17.5.59 Entry via examination (qs20_close2)

Long tag: qog_std_cs_qs20_close2

Original tag: qs20_close2

Description:
Country-level estimate for Entry via examination, scaled between 0 and 1. Countries in which formal examination is usually part of the hiring process have higher scores.

Variable citation: Nistotskaya, M., Dahlberg, S., Dahlström, C., Sundström, A., Axelsson, S., Dalli, C. M., & Alvarado, N. (2021). The Quality of Government Expert Survey 2020 Dataset: Wave III. `https://doi.org/10.18157/qoges2020`

2.17.5.60 Special Laws (qs20_close3)

Long tag: qog_std_cs_qs20_close3

Original tag: qs20_close3

Description:
Country-level estimate for Special Laws, scaled between 0 and 1. Higher scores mean that human resource management in public administration is regulated by a set of laws and regulations applicable only to the public sector (including government), which is different from the country's labor code.

Variable citation: Nistotskaya, M., Dahlberg, S., Dahlström, C., Sundström, A., Axelsson, S., Dalli, C. M., & Alvarado, N. (2021). The Quality of Government Expert Survey 2020 Dataset: Wave III. `https://doi.org/10.18157/qoges2020`

2.17.5.61 Closedness Index, constructed with PCA (qs20_close_pca)

Long tag: qog_std_cs_qs20_close_pca

Original tag: qs20_close_pca

Description:
Closedness Index is constructed from Entry at the lowest level only, Entry via examination and Special Laws with the help of Principal Component Analysis (PCA). Entry at the lowest level only, Entry via examination and Special Laws variables are load on the same dimension, which predicted scores are used as Closedness Index.

Variable citation: Nistotskaya, M., Dahlberg, S., Dahlström, C., Sundström, A., Axelsson, S., Dalli, C. M., & Alvarado, N. (2021). The Quality of Government Expert Survey 2020 Dataset: Wave III. `https://doi.org/10.18157/qoges2020`

2.17.5.62 Political Interference (qs20_impar1)

Long tag: qog_std_cs_qs20_impar1

Original tag: qs20_impar1

Description:
Country-level estimate for Political Interference, constructed with an IRT model that accounts for DIF and variation in expert reliability. Higher values stand for more political interference.

Variable citation: Nistotskaya, M., Dahlberg, S., Dahlström, C., Sundström, A., Axelsson, S., Dalli, C. M., & Alvarado, N. (2021). The Quality of Government Expert Survey 2020 Dataset: Wave III. `https://doi.org/10.18157/qoges2020`

2.17.5.63 Political Interference, lower limit of 95percent CI (qs20_impar1_lowci)

Long tag: qog_std_cs_qs20_impar1_lowci

Original tag: qs20_impar1_lowci

Description:
Lower boundary of 95percent credible interval for Political Interference.

Variable citation: Nistotskaya, M., Dahlberg, S., Dahlström, C., Sundström, A., Axelsson, S., Dalli, C. M., & Alvarado, N. (2021). The Quality of Government Expert Survey 2020 Dataset: Wave III. `https://doi.org/10.18157/qoges2020`

2.17.5.64 Political Interference, upper limit of 95percent CI (qs20_impar1_upci)

Long tag: qog_std_cs_qs20_impar1_upci

Original tag: qs20_impar1_upci

Description:
Upper boundary of 95percent credible interval for Political Interference.

Variable citation: Nistotskaya, M., Dahlberg, S., Dahlström, C., Sundström, A., Axelsson, S., Dalli, C. M., & Alvarado, N. (2021). The Quality of Government Expert Survey 2020 Dataset: Wave III. https://doi.org/10.18157/qoges2020

2.17.5.65 Impartiality (qs20_impar2)

Long tag: qog_std_cs_qs20_impar2

Original tag: qs20_impar2

Description:
Country-level estimate for Impartiality, constructed with an IRT model that accounts for DIF and variation in expert reliability. Higher values stand for more impartiality.

Variable citation: Nistotskaya, M., Dahlberg, S., Dahlström, C., Sundström, A., Axelsson, S., Dalli, C. M., & Alvarado, N. (2021). The Quality of Government Expert Survey 2020 Dataset: Wave III. https://doi.org/10.18157/qoges2020

2.17.5.66 Impartiality, lower limit of 95percent CI (qs20_impar2_lowci)

Long tag: qog_std_cs_qs20_impar2_lowci

Original tag: qs20_impar2_lowci

Description:
Lower boundary of 95percent credible interval for Impartiality.

Variable citation: Nistotskaya, M., Dahlberg, S., Dahlström, C., Sundström, A., Axelsson, S., Dalli, C. M., & Alvarado, N. (2021). The Quality of Government Expert Survey 2020 Dataset: Wave III. https://doi.org/10.18157/qoges2020

2.17.5.67 Impartiality, upper limit of 95percent CI (qs20_impar2_upci)

Long tag: qog_std_cs_qs20_impar2_upci

Original tag: qs20_impar2_upci

Description:
Upper boundary of 95percent credible interval for Impartiality.

Variable citation: Nistotskaya, M., Dahlberg, S., Dahlström, C., Sundström, A., Axelsson, S., Dalli, C. M., & Alvarado, N. (2021). The Quality of Government Expert Survey 2020 Dataset: Wave III. https://doi.org/10.18157/qoges2020

2.17.5.68 Patronage (qs20_proff1)

Long tag: qog_std_cs_qs20_proff1

Original tag: qs20_proff1

Description:
Country-level estimate for Patronage, constructed with an IRT model that accounts for differential item functioning (DIF) and variation in expert reliability. Higher values stand for more patronage in recruitment.

Variable citation: Nistotskaya, M., Dahlberg, S., Dahlström, C., Sundström, A., Axelsson, S., Dalli, C. M., & Alvarado, N. (2021). The Quality of Government Expert Survey 2020 Dataset: Wave III. https://doi.org/10.18157/qoges2020

2.17.5.69 Patronage, lower limit of 95percent CI (qs20_proff1_lowci)

Long tag: qog_std_cs_qs20_proff1_lowci

Original tag: qs20_proff1_lowci

Description:
Lower boundary of 95percent credible interval for Patronage.

Variable citation: Nistotskaya, M., Dahlberg, S., Dahlström, C., Sundström, A., Axelsson, S., Dalli, C. M., & Alvarado, N. (2021). The Quality of Government Expert Survey 2020 Dataset: Wave III. https://doi.org/10.18157/qoges2020

2.17.5.70 Patronage, upper limit of 95percent CI (qs20_proff1_upci)

Long tag: qog_std_cs_qs20_proff1_upci

Original tag: qs20_proff1_upci

Description:
Upper boundary of 95percent credible interval for Patronage.

Variable citation: Nistotskaya, M., Dahlberg, S., Dahlström, C., Sundström, A., Axelsson, S., Dalli, C. M., & Alvarado, N. (2021). The Quality of Government Expert Survey 2020 Dataset: Wave III. https://doi.org/10.18157/qoges2020

2.17.5.71 Merit (qs20_proff2)

Long tag: qog_std_cs_qs20_proff2

Original tag: qs20_proff2

Description:
Country-level estimate for Merit, constructed with an IRT model that accounts for DIF and variation in expert reliability. Higher values stand for more merit-based appointment.

Variable citation: Nistotskaya, M., Dahlberg, S., Dahlström, C., Sundström, A., Axelsson, S., Dalli, C. M., & Alvarado, N. (2021). The Quality of Government Expert Survey 2020 Dataset: Wave III. https://doi.org/10.18157/qoges2020

2.17.5.72 Merit, lower limit of 95percent CI (qs20_proff2_lowci)

Long tag: qog_std_cs_qs20_proff2_lowci

Original tag: qs20_proff2_lowci

Description:
Lower boundary of 95percent credible interval for Merit.

Variable citation: Nistotskaya, M., Dahlberg, S., Dahlström, C., Sundström, A., Axelsson, S., Dalli, C. M., & Alvarado, N. (2021). The Quality of Government Expert Survey 2020 Dataset: Wave III. https://doi.org/10.18157/qoges2020

2.17.5.73 Merit, upper limit of 95percent CI (qs20_proff2_upci)

Long tag: qog_std_cs_qs20_proff2_upci

Original tag: qs20_proff2_upci

Description:
Upper boundary of 95percent credible interval for Merit.

2.17.5.77 Professionalism Index, constructed with PCA (qs20_proff_pca)

Long tag: qog_std_cs_qs20_proff_pca

Original tag: qs20_proff_pca

Description:
Professionalism Index is constructed from Patronage, Merit and Tenure with the help of Principal Component Analysis (PCA). Merit, Patronage and Tenure are load on the same dimension, which predicted scores are used as Professionalism Index.

Variable citation: Nistotskaya, M., Dahlberg, S., Dahlström, C., Sundström, A., Axelsson, S., Dalli, C. M., & Alvarado, N. (2021). The Quality of Government Expert Survey 2020 Dataset: Wave III. https://doi.org/10.18157/qoges2020

2.17.5.78 Good Governance (sgi_go)

Long tag: qog_std_cs_sgi_go

Original tag: sgi_go

Description:
This pillar of the SGI examines the good governance capacities of a political system in terms of its executive capability and accountability. Sustainable governance is defined here as the political management of public affairs that adopts a long-term view of societal development, takes into account the interests of future generations, and facilitates capacities for social change.

The Governance index examines how effective governments are in directing and implementing policies appropriate to these three goals. As a measuring tool grounded in practical evidence, the Governance index draws on 37 qualitative indicators posed in an expert survey that measure a country's institutional arrangements against benchmarks of good practices in governance. Governance in this context implies both the capacity to act ("executive capacity") and the extent to which non-governmental actors and institutions are endowed with the participatory competence to hold the government accountable to its actions ("executive accountability"). This includes citizens, legislatures, parties, associations and the media, that is, actors that monitor the government's activities and whose effective inclusion in the political process improve the quality of governance.

The dimension of Executive Capacity draws on the categories of steering capability, policy implementation and institutional learning. Steering capability questions explore the roles of strategic planning and expert advice, the effectiveness of interministerial coordination and regulatory impact assessments, and the quality of consultation and communication policies. Questions about implementation assess the government's ability to ensure effective and efficient task delegation to ministers, agencies or subnational governments. Questions on institutional learning refer to a government's ability to reform its own institutional arrangements and improve its strategic orientation.

The dimension of Executive Accountability is comprised of three categories corresponding to actors or groups of actors considered to be important agents of oversight and accountability in theories of democracy and governance. The questions here are designed to examine the extent to which citizens are informed of government policies, whether the legislature is capable of evaluating and acting as a "check" on the executive branch, and whether intermediary organizations (i.e., media, parties, interest associations) demonstrate relevance and policy know-how in exercising oversight. This approach is based on a dynamic understanding of governance in which power and authority is dispersed throughout the institutions, processes and structures of government. In order to account for the diversity of institutional arrangements, the index explicitly considers functional equivalencies in different countries, and pays equal attention to formal and informal as well as hierarchical and non-hierarchical institutional arrangements.

2.17.5.81 Robust Democracy (sgi_qd)

Long tag: qog_std_cs_sgi_qd

Original tag: sgi_qd

Description:
This pillar of the SGI examines the quality of democracy in each country. From the perspective of long-term system stability and political performance, the quality of democracy and political participation are crucial aspects of a society's success. The stability and performance of a political system depends in large part upon the assent and confidence of its citizens. Democratic participation and oversight are also essential to genuine learning and adaptation processes, and to the ability to change. In this sense, guaranteeing opportunities for democratic participation and oversight, as well as the presence of due process and respect for civil rights, are fundamental prerequisites for the legitimacy of a political system. The quality of democracy in each country is measured against a definitional norm that considers issues relating to participation rights, electoral competition, access to information and the rule of law. Given that all OECD and EU member states constitute democracies, the questions posed here focus on the quality rather than the presence of democracy. Individual indicators monitor the following criteria:

1. Electoral processes.
2. Access to information.
3. Civil rights and political liberties.
4. Rule of law.

Variable citation: Schiller, C., & Hellmann, T. (2020). Sustainable governance indicators 2020 [Date accessed: 12 December 2021]. *Bertelsmann Stiftung*. `https://www.sgi-network.org`

2.17.5.82 Robust Democracy: Access to Information (sgi_qdai)

Long tag: qog_std_cs_sgi_qdai

Original tag: sgi_qdai

Description:
Robust Democracy: Access to Information (Media Freedom, Media Pluralism, Access to Government Information).

Variable citation: Schiller, C., & Hellmann, T. (2020). Sustainable governance indicators 2020 [Date accessed: 12 December 2021]. *Bertelsmann Stiftung*. `https://www.sgi-network.org`

2.17.5.83 Robust Democracy: Civil Rights and Political Liberties (sgi_qdcr)

Long tag: qog_std_cs_sgi_qdcr

Original tag: sgi_qdcr

Description:
Robust Democracy: Civil Rights and Political Liberties (Civil Rights, Political Liberties, Non-discrimination).

Variable citation: Schiller, C., & Hellmann, T. (2020). Sustainable governance indicators 2020 [Date accessed: 12 December 2021]. *Bertelsmann Stiftung*. `https://www.sgi-network.org`

2.17.5.84 Robust Democracy: Rule of Law (sgi_qdrl)

Long tag: qog_std_cs_sgi_qdrl

Original tag: sgi_qdrl

Description:
Robust Democracy: Rule of Law (Legal Certainty, Judicial Review, Appointment of Justices, Corruption Prevention).

Variable citation: Schiller, C., & Hellmann, T. (2020). Sustainable governance indicators 2020 [Date accessed: 12 December 2021]. *Bertelsmann Stiftung*. `https://www.sgi-network.org`

2.17.5.85 Robust Democracy: Rule of Law - Corruption Prevention (sgi_qdrlc)

Long tag: qog_std_cs_sgi_qdrlc

Original tag: sgi_qdrlc

Description:
Robust Democracy: Rule of Law - Corruption Prevention. To what extent are public officeholders prevented from abusing their position for private interests? This question addresses how the state and society prevent public servants and politicians from accepting bribes by applying mechanisms to guarantee the integrity of officeholders: auditing of state spending; regulation of party financing; citizen and media access to information; accountability of officeholders (asset declarations, conflict of interest rules, codes of conduct); transparent public procurement systems; effective prosecution of corruption. (1, 2): Public officeholders can exploit their offices for private gain as they see fit without fear of legal consequences or adverse publicity. (3, 4, 5): Some integrity mechanisms function, but do not effectively prevent public officeholders from abusing their positions. (6, 7, 8): Most integrity mechanisms function effectively and provide disincentives for public officeholders willing to abuse their positions. (9, 10): Legal, political and public integrity mechanisms effectively prevent public officeholders from abusing their positions.

2.17.5.86 Deliberative democracy index (vdem_delibdem)

Long tag: qog_std_cs_vdem_delibdem

Original tag: vdem_delibdem

Description:
Deliberative democracy index. Question: To what extent is the ideal of deliberative democracy achieved?

Clarification: The deliberative principle of democracy focuses on the process by which decisions are reached in a polity. A deliberative process is one in which public reasoning focused on the common good motivates political decisions - as contrasted with emotional appeals, solidary attachments, parochial interests, or coercion. According to this principle, democracy requires more than an aggregation of existing preferences. There should also be respectful dialogue at all levels - from preference formation to final decision - among informed and competent participants who are open to persuasion. To make it a measure of not only the deliberative principle but also of democracy, the index also takes the level of electoral democracy into account.

2.17.5.87 Deliberative component index (vdem_dl_delib)

Long tag: qog_std_cs_vdem_dl_delib

Original tag: vdem_dl_delib

Description:
Deliberative component index. Question: To what extent is the deliberative principle of democracy achieved?

Clarification: The deliberative principle of democracy focuses on the process by which decisions are reached in a polity. A deliberative process is one in which public reasoning focused on the common good motivates political decisions - as contrasted with emotional appeals, solidary attachments, parochial interests, or coercion. According to this principle, democracy requires more than an aggregation of existing preferences. There should also be respectful dialogue at all levels - from preference formation to final decision - among informed and competent participants who are open to persuasion. To measure these features of a polity, we try to determine the extent to which political elites give public justifications for their positions on matters of public policy, justify their positions in terms of the public good, acknowledge and respect counter-arguments; and how wide the range of consultation is at elite levels. Aggregation: The index is formed by point estimates drawn from a Bayesian factor analysis model including the following indicators: reasoned justification, common good justification, respect for counterarguments, range of consultation, and engaged society.

Variable citation: Coppedge, M., Gerring, J., Knutsen, C. H., Lindberg, S. I., Teorell, J., Alizada, N., Altman, D., Bernhard, M., Cornell, A., Fish, M. S., Gastaldi, L., Gjerløw, H., Glynn, A., Hicken, A., Hindle, G., Ilchenko, N., Krusell, J., Luhrmann, A., Maerz, S. F., . . . Ziblatt, D. (2021). (2021). The V-Dem measurement model: Latent variable analysis for crossnational and cross-temporal expert-coded data

2.17.5.88 Electoral component index (vdem_edcomp_thick)

Long tag: qog_std_cs_vdem_edcomp_thick

Original tag: vdem_edcomp_thick

Description:
Electoral component index. Question: To what extent is the electoral principle of democracy achieved?

Clarifications: The electoral principle of democracy seeks to achieve responsiveness and accountability

between leaders and citizens through the mechanism of competitive elections. This is presumed to be achieved when suffrage is extensive; political and civil society organizations can operate freely; elections are clean and not marred by fraud or systematic irregularities; and the chief executive of a country is selected directly or indirectly through elections. Aggregation: The electoral component index is operationalized as a chain defined by its weakest link of freedom of association, suffrage, clean elections, and elected executive.

Variable citation: Coppedge, M., Gerring, J., Knutsen, C. H., Lindberg, S. I., Teorell, J., Alizada, N., Altman, D., Bernhard, M., Cornell, A., Fish, M. S., Gastaldi, L., Gjerløw, H., Glynn, A., Hicken, A., Hindle, G., Ilchenko, N., Krusell, J., Luhrmann, A., Maerz, S. F., . . . Ziblatt, D. (2021). (2021). The V-Dem measurement model: Latent variable analysis for crossnational and cross-temporal expert-coded data

2.17.5.89 Egalitarian component index (vdem_egal)

Long tag: qog_std_cs_vdem_egal

Original tag: vdem_egal

Description:

Egalitarian component index. Question: To what extent is the egalitarian principle achieved?

Clarifications: The egalitarian principle of democracy holds that material and immaterial inequalities inhibit the exercise of formal rights and liberties, and diminish the ability of citizens from all social groups to participate. Egalitarian democracy is achieved when 1) rights and freedoms of individuals are protected equally across all social groups; 2) resources are distributed equally across all social groups; and 3) access to power is equally distributed by gender, socioeconomic class and social group. Aggregation: This index is formed by averaging the following indices: equal protection index and equal distribution of resources.

Variable citation: Coppedge, M., Gerring, J., Knutsen, C. H., Lindberg, S. I., Teorell, J., Alizada, N., Altman, D., Bernhard, M., Cornell, A., Fish, M. S., Gastaldi, L., Gjerløw, H., Glynn, A., Hicken, A., Hindle, G., Ilchenko, N., Krusell, J., Luhrmann, A., Maerz, S. F., . . . Ziblatt, D. (2021). V-dem [country-year/country-date] dataset v11.1. `https://doi.org/10.23696/vdemds21` Pemstein, D., Marquardt, K. L., Tzelgov, E., Wang, Y.-t., Medzihorsky, J., Krusell, J., Miri, F., & von Römer, J. (2021). The V-Dem measurement model: Latent variable analysis for crossnational and cross-temporal expert-coded data

2.17.5.90 Egalitarian democracy index (vdem_egaldem)

Long tag: qog_std_cs_vdem_egaldem

Original tag: vdem_egaldem

Description:

Egalitarian democracy index. Question: To what extent is the ideal of egalitarian democracy achieved?

Clarifications: The egalitarian principle of democracy holds that material and immaterial inequalities inhibit the exercise of formal rights and liberties, and diminish the ability of citizens from all social groups to participate. Egalitarian democracy is achieved when 1) rights and freedoms of individuals are protected equally across all social groups; and 2) resources are distributed equally across all social groups. The distribution of resources must be sufficient to ensure that citizens' basic needs are met in a way that enables their meaningful participation. Additionally, an equal distribution of resources ensures the potential for greater equality in the distribution of power. To make it a measure of egalitarian democracy, the index also takes the level of electoral democracy into account.

Variable citation: Coppedge, M., Gerring, J., Knutsen, C. H., Lindberg, S. I., Teorell, J., Alizada, N., Altman, D., Bernhard, M., Cornell, A., Fish, M. S., Gastaldi, L., Gjerløw, H., Glynn, A., Hicken, A., Hindle, G., Ilchenko, N., Krusell, J., Luhrmann, A., Maerz, S. F., . . . Ziblatt, D. (2021). (2021). The V-Dem measurement model: Latent variable analysis for crossnational and cross-temporal expert-coded data

2.17.5.91 Liberal democracy index (vdem_libdem)

Long tag: qog_std_cs_vdem_libdem

Original tag: vdem_libdem

Description:

Liberal democracy index. Question: To what extent is the ideal of liberal democracy achieved?
Clarifications: The liberal principle of democracy emphasizes the importance of protecting individual and minority rights against the tyranny of the state and the tyranny of the majority. The liberal model takes a "negative" view of political power insofar as it judges the quality of democracy by the limits placed on government. This is achieved by constitutionally protected civil liberties, strong rule of law, an independent judiciary, and effective checks and balances that, together, limit the exercise of executive power. To make this a measure of liberal democracy, the index also takes the level of electoral democracy into account.

Variable citation: Coppedge, M., Gerring, J., Knutsen, C. H., Lindberg, S. I., Teorell, J., Alizada, N., Altman, D., Bernhard, M., Cornell, A., Fish, M. S., Gastaldi, L., Gjerløw, H., Glynn, A., Hicken, A., Hindle, G., Ilchenko,

N., Krusell, J., Luhrmann, A., Maerz, S. F., . . . Ziblatt, D. (2021). V-dem [country-year/country-date] dataset v11.1. https://doi.org/10.23696/vdemds21 Pemstein, D., Marquardt, K. L., Tzelgov, E., Wang, Y.-t., Medzihorsky, J., Krusell, J., Miri, F., & von Römer, J. (2021). The V-Dem measurement model: Latent variable analysis for crossnational and cross-temporal expert-coded data

2.17.5.92 Liberal component index (vdem_liberal)

Long tag: qog_std_cs_vdem_liberal

Original tag: vdem_liberal

Description:

Liberal component index. Question: To what extent is the liberal principle of democracy achieved?

Clarification: The liberal principle of democracy emphasizes the importance of protecting individual and minority rights against the tyranny of the state and the tyranny of the majority. The liberal model takes a "negative" view of political power insofar as it judges the quality of democracy by the limits placed on government. This is achieved by constitutionally protected civil liberties, strong rule of law, an independent judiciary, and effective checks and balances that, together, limit the exercise of executive power. Aggregation: This index is formed by averaging the following indices: equality before the law and individual liberties, judicial constraints on the executive, and legislative constraints on the executive.

Variable citation: Coppedge, M., Gerring, J., Knutsen, C. H., Lindberg, S. I., Teorell, J., Alizada, N., Altman, D., Bernhard, M., Cornell, A., Fish, M. S., Gastaldi, L., Gjerløw, H., Glynn, A., Hicken, A., Hindle, G., Ilchenko, N., Krusell, J., Luhrmann, A., Maerz, S. F., . . . Ziblatt, D. (2021). (2021). The V-Dem measurement model: Latent variable analysis for crossnational and cross-temporal expert-coded data

2.17.5.93 Participatory component index (vdem_partip)

Long tag: qog_std_cs_vdem_partip

Original tag: vdem_partip

Description:

Participatory component index. Question: To what extent is the participatory principle achieved?

Clarification: The participatory principle of democracy emphasizes active participation by citizens in all political processes, electoral and non-electoral. It is motivated by uneasiness about a bedrock practice of electoral democracy: delegating authority to representatives. Thus, direct rule by citizens is preferred, wherever practicable. This model of democracy thus takes suffrage for granted, emphasizing engagement in civil society organizations, direct democracy, and subnational elected bodies. Aggregation: This index is formed by averaging the following indices: civil society participation, direct popular vote, elected local government power, and elected regional government power.

Variable citation: Coppedge, M., Gerring, J., Knutsen, C. H., Lindberg, S. I., Teorell, J., Alizada, N., Altman, D., Bernhard, M., Cornell, A., Fish, M. 2.17.5.95 Electoral democracy index (vdem_polyarchy)

Long tag: qog_std_cs_vdem_polyarchy

Original tag: vdem_polyarchy

Description:

Electoral democracy index. Question: To what extent is the ideal of electoral democracy in its fullest sense achieved?

Clarifications: The electoral principle of democracy seeks to embody the core value of making rulers responsive to citizens, achieved through electoral competition for the electorate's approval under circumstances when suffrage is extensive; political and civil society organizations can operate freely; elections are clean and not marred by fraud or systematic irregularities; and elections affect the composition of the chief executive of the country. In between elections, there is freedom of expression and an independent media capable of presenting alternative views on matters of political relevance. In the V-Dem conceptual scheme, electoral democracy is understood as an essential element of any other conception of (representative) democracy - liberal, participatory, deliberative, egalitarian, or some other. Aggregation: The index is formed by taking the average of, on the one hand, the sum of the indices measuring freedom of association (thick), suffrage, clean elections, elected executive (de jure) and freedom of expression; and, on the other, the five-way interaction between those indices. This is half way between a straight average and strict multiplication, meaning the average of the two. It is thus a compromise between the two most well known aggregation formulas in the literature, both allowing "compensation" in one sub-component for lack of polyarchy in the others, but also punishing countries not strong in one sub-component according to the "weakest link" argument. The aggregation is done at the level of Dahl's sub-components (with the one exception of the non-electoral component).

2.17.5.96 Voice and Accountability, Estimate (wbgi_vae)

Long tag: qog_std_cs_wbgi_vae

Original tag: wbgi_vae

Description:

Voice and Accountability - Estimate: "Voice and Accountability" includes a number of indicators measuring various aspects of the political process, civil liberties and political rights. These indicators measure the extent to which citizens of a country are able to participate in the selection of governments. This category also includes indicators measuring the independence of the media, which serves an important role in monitoring those in authority and holding them accountable for their actions.

2.17.6 Political Parties and Elections

This category includes variables describing various aspects of the legislature and political parties in the legislature (number of seats) as well as variables related to the election for the executive and variables on the outcomes of elections.

2.17.6.1 Law: political parties are required to disclose public donations (Gov. funds) (aii_q48)

Long tag: qog_std_cs_aii_q48

Original tag: aii_q48

Description:
Sub-score (0-100). Question no. 48. In law, political parties are required to regularly disclose public donations (funds sourced from the government).

A 100 score is earned where a law requires political parties to publish all public contributions.
A 0 score is earned where no such law exists.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.17.6.2 Practice: pol. parties disclose public donations and these are available to publ (aii_q49)

Long tag: qog_std_cs_aii_q49

Original tag: aii_q49

Description:
Sub-score (0-100). Question no. 49. In practice, political parties regularly disclose public donations (funds that are sourced from the government) and the disclosures are easily available to the public.

A 100 score is earned where all the following conditions are met:
1) political parties disclose public donations within a month of received, and
2) they are easily available online or at the cost of photocopy.

A 50 score is earned where any of the following conditions apply:
1) political parties don't always disclose public donations or disclose them more than a month of received, or
2) disclosures are not available online or the cost of paper versions is higher than photocopying.

A 0 score is earned where political parties rarely disclose public donations.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.17.6.3 Law: political parties are required to disclose private donations (aii_q50)

Long tag: qog_std_cs_aii_q50

Original tag: aii_q50

Description:
Sub-score (0-100). Question no. 50. In law, political parties are required to regularly disclose private donations.

A 100 score is earned where the law requires political parties to publish all private contributions.

A 0 score is earned where no such law exists.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.17.6.4 Practice: pol. parties disclose private donations and it is available to public (aii_q51)

Long tag: qog_std_cs_aii_q51

Original tag: aii_q51

Description:

Sub-score (0-100). Question no. 51. In practice, political parties regularly disclose private donations and the disclosures are easily available to the public.

A 100 score is earned where all the following conditions are met:
1) political parties disclose private donations within a one month of received, and
2) they are easily available online or at the cost of photocopy.

A 50 score is earned where any of the following conditions apply:
1) political parties don't always disclose private donations or disclose them more than a month of received, or
2) disclosures are not available online or the cost of paper versions is higher than photocopying.

A 0 score is earned where political parties rarely disclose private donations.

Variable citation: Global Integrity. (2021). Africa integrity indicators 2014-2021

2.17.6.5 No. of coups (br_coup)

Long tag: qog_std_cs_br_coup

Original tag: br_coup

Description:

Total number of coups

Variable citation: Bjørnskov, C., & Rode, M. (2020). Regime types and regime change: A new dataset on democracy, coups, and political institutions. *Review of International Organizations*, 15, 531–551

2.17.6.6 Is the country in the Commonwealth (br_cw)

Long tag: qog_std_cs_br_cw

Original tag: br_cw

Description:

Is the country a member of the British Commonwealth? (0: No; 1: Yes)

Variable citation: Bjørnskov, C., & Rode, M. (2020). Regime types and regime change: A new dataset on democracy, coups, and political institutions. *Review of International Organizations*, 15, 531–551

2.17.6.7 Whether an election was postponed (br_elecpost)

Long tag: qog_std_cs_br_elecpost

Original tag: br_elecpost

Description:

Whether an election held in that year was postponed from an earlier date (0: No, 1: Yes)

Variable citation: Bjørnskov, C., & Rode, M. (2020). Regime types and regime change: A new dataset on democracy, coups, and political institutions. *Review of International Organizations*, 15, 531–551

2.17.6.8 Typology of political institutions (br_elect)

Long tag: qog_std_cs_br_elect

Original tag: br_elect

Description:

Alternative democracy indicator capturing degree of multi-party competition. (No elections=0, Single-party elections=1, non-democratic multi-party elections=2, democratic elections= 3)

Variable citation: Bjørnskov, C., & Rode, M. (2020). Regime types and regime change: A new dataset on democracy, coups, and political institutions. *Review of International Organizations*, 15, 531–551

2.17.6.9 Whether an election was held during the year (br_elecyear)

Long tag: qog_std_cs_br_elecyear

Original tag: br_elecyear

Description:

Whether an election was held that year (0: No, 1: Yes)

Variable citation: Bjørnskov, C., & Rode, M. (2020). Regime types and regime change: A new dataset on democracy, coups, and political institutions. *Review of International Organizations*, 15, 531–551

2.17.6.10 No. of failed coups (br_fcoup)

Long tag: qog_std_cs_br_fcoup

Original tag: br_fcoup

Description:
Number of failed coups

Variable citation: Bjørnskov, C., & Rode, M. (2020). Regime types and regime change: A new dataset on democracy, coups, and political institutions. *Review of International Organizations*, 15, 531–551

2.17.6.11 Is the president interim/temporary (br_int)

Long tag: qog_std_cs_br_int

Original tag: br_int

Description:
Is the president interim / preliminary? (more than 2 Presidents/year=1, Otherwise=0)

Variable citation: Bjørnskov, C., & Rode, M. (2020). Regime types and regime change: A new dataset on democracy, coups, and political institutions. *Review of International Organizations*, 15, 531–551

2.17.6.12 Is the country a monarchy (br_mon)

Long tag: qog_std_cs_br_mon

Original tag: br_mon

Description:
Is the country a hereditary monarchy? (0: No; 1: Yes)

Variable citation: Bjørnskov, C., & Rode, M. (2020). Regime types and regime change: A new dataset on democracy, coups, and political institutions. *Review of International Organizations*, 15, 531–551

2.17.6.13 Is the political system presidential (br_pres)

Long tag: qog_std_cs_br_pres

Original tag: br_pres

Description:
Is the political system presidential? (0: No; 1: Yes)

Variable citation: Bjørnskov, C., & Rode, M. (2020). Regime types and regime change: A new dataset on democracy, coups, and political institutions. *Review of International Organizations*, 15, 531–551

2.17.6.14 Does the country have proportional voting (br_pvote)

Long tag: qog_std_cs_br_pvote

Original tag: br_pvote

Description:
Is the electoral system characterized by including proportional representation? (0: No; 1: Yes)

Variable citation: Bjørnskov, C., & Rode, M. (2020). Regime types and regime change: A new dataset on democracy, coups, and political institutions. *Review of International Organizations*, 15, 531–551

2.17.6.15 Did the main regime change (br_regch)

Long tag: qog_std_cs_br_regch

Original tag: br_regch

Description:
If a coded event, such as a change in the Presidency, took place after 01.07 it is assigned to the following calendar year in the data. In this case, the lag variable will be equal to one. For all change events before that date, the lag dummy is equal to zero. (0: No; 1: Yes)

Variable citation: Bjørnskov, C., & Rode, M. (2020). Regime types and regime change: A new dataset on democracy, coups, and political institutions. *Review of International Organizations*, 15, 531–551

2.17.6.16 No. of successful coups (br_scoup)

Long tag: qog_std_cs_br_scoup

Original tag: br_scoup

Description:
Number of successful coups

Variable citation: Bjørnskov, C., & Rode, M. (2020). Regime types and regime change: A new dataset on democracy, coups, and political institutions. *Review of International Organizations*, 15, 531–551

2.17.6.17 Full suffrage (br_suff)

Long tag: qog_std_cs_br_suff

Original tag: br_suff

Description:
Whether electoral system attributes full suffrage (0: No; 1: Yes)

Variable citation: Bjørnskov, C., & Rode, M. (2020). Regime types and regime change: A new dataset on democracy, coups, and political institutions. *Review of International Organizations*, 15, 531–551

2.17.6.18 Free and Fair Elections (bti_ffe)

Long tag: qog_std_cs_bti_ffe

Original tag: bti_ffe

Description:
To what extent are political representatives determined by general, free and fair elections? 1-10.

1. There are no elections on free and fair elections.
4. General, multi-party elections are held, conducted properly and accepted as the means of filling political posts. However, there are some constraints on the fairness of the elections with regard to registration, campaigning or media access.
7. General elections are held, but serious irregularities during voting process and ballot count occur. The rights to vote, campaign and run for office are restricted, and elections have de facto only limited influence over who governs.
10. National elections, if held at all, are entirely unfree and unfair.

Variable citation: Donner, S., Hartmann, H., & Schwarz, R. (2020). *Transformation index of the bertelsmann stiftung 2020*. Bertelsmann Stiftung. `http://www.bti-project.org`

2.17.6.19 Party System (bti_ps)

Long tag: qog_std_cs_bti_ps

Original tag: bti_ps

Description:
To what extent is there a stable and socially rooted party system able to articulate and aggregate societal interests? 1-10.

1. There is no party system to articulate and aggregate societal interest.
4. The party system is unstable with shallow roots in society: high fragmentation, high voter volatility and high polarization.
7. The party system is fairly stable and socially rooted: moderate fragmentation, moderate voter volatility and moderate polarization.
10. The party system is stable and socially rooted: it is able to articulate and aggregate societal interest with low fragmentation, low voter volatility and low polarization.

Variable citation: Donner, S., Hartmann, H., & Schwarz, R. (2020). *Transformation index of the bertelsmann stiftung 2020*. Bertelsmann Stiftung. `http://www.bti-project.org`

2.17.6.20 Number of changes in government per year (cpds_chg)

Long tag: qog_std_cs_cpds_chg

Original tag: cpds_chg

Description:
Number of changes in government per year [termination of government due to (a) elections, (b) voluntary resignation of the Prime Minister, (c) resignation of Prime Minister due to health reasons, (d) dissension within government (break up of the coalition), (e) lack of parliamentary support, (f) intervention by the head of state, or (g) broadening of the coalition (inclusion of new parties).

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.17.6.21 Effective number of parties on the seats level (cpds_enps)

Long tag: qog_std_cs_cpds_enps

Original tag: cpds_enps

Description:
Effective number of parties on the seats level according to the formula proposed by Laakso and Taagepera (1979).

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.17.6.22 Effective number of parties on the votes level (cpds_enpv)

Long tag: qog_std_cs_cpds_enpv

Original tag: cpds_enpv

Description:

Effective number of parties on the votes level according to the formula proposed by Laakso and Taagepera (1979).

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.17.6.23 Electoral fractionalization of the party system (Rae index) (cpds_frel)

Long tag: qog_std_cs_cpds_frel

Original tag: cpds_frel

Description:

Index of electoral fractionalization of the party system according to the formula proposed by Rae (1968). The index can take values between 1 (maximal fractionalization) and 0 (minimal fractionalization).

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.17.6.24 Legislative fractionalization of the party system (Rae index) (cpds_frleg)

Long tag: qog_std_cs_cpds_frleg

Original tag: cpds_frleg

Description:

Index of legislative fractionalization of the party system according to the formula proposed by Rae (1968). The index can take values between 1 (maximal fractionalization) and 0 (minimal fractionalization).

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.17.6.25 Cabinet composition (Schmidt index) (cpds_govlr)

Long tag: qog_std_cs_cpds_govlr

Original tag: cpds_govlr

Description:

Cabinet composition (Schmidt-Index):

1. Hegemony of right-wing (and centre) parties.
2. Dominance of right-wing (and centre) parties.
3. Balance of power between left and right.
4. Dominance of social-democratic and other left parties.
5. Hegemony of social-democratic and other left parties.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.17.6.26 Government support (seat share of all parties in government) (cpds_govsup)

Long tag: qog_std_cs_cpds_govsup

Original tag: cpds_govsup

Description:

Total government support: seat share of all parties in government. Weighted by the numbers of days in office in a given year.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.17.6.27 Share of seats in parliament: agrarian (cpds_la)

Long tag: qog_std_cs_cpds_la

Original tag: cpds_la

Description:

Share of seats in parliament for the political parties classified as agrarian.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.17.6.28 Share of seats in parliament: electoral alliance (cpds_lall)

Long tag: qog_std_cs_cpds_lall

Original tag: cpds_lall

Description:

Share of seats in parliament for the political parties classified as electoral alliance.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.17.6.29 Share of seats in parliament: communist (cpds_lcom)

Long tag: qog_std_cs_cpds_lcom

Original tag: cpds_lcom

Description:

Share of seats in parliament for the political parties classified as communist.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.17.6.30 Share of seats in parliament: conservative (cpds_lcon)

Long tag: qog_std_cs_cpds_lcon

Original tag: cpds_lcon

Description:

Share of seats in parliament for the political parties classified as conservative.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.17.6.31 Share of seats in parliament: ethnic (cpds_le)

Long tag: qog_std_cs_cpds_le

Original tag: cpds_le

Description:

Share of seats in parliament for the political parties classified as ethnic.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.17.6.32 Share of seats in parliament: feminist (cpds_lfe)

Long tag: qog_std_cs_cpds_lfe

Original tag: cpds_lfe

Description:

Share of seats in parliament for the political parties classified as feminist.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.17.6.33 Share of seats in parliament: green (cpds_lg)

Long tag: qog_std_cs_cpds_lg

Original tag: cpds_lg

Description:

Share of seats in parliament for the political parties classified as green.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.17.6.34 Share of seats in parliament: liberal (cpds_ll)

Long tag: qog_std_cs_cpds_ll

Original tag: cpds_ll

Description:

Share of seats in parliament for the political parties classified as liberal.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.17.6.35 Share of seats in parliament: left-socialist (cpds_lls)

Long tag: qog_std_cs_cpds_lls

Original tag: cpds_lls

Description:

Share of seats in parliament for the political parties classified as left-socialist.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.17.6.36 Share of seats in parliament: monarchist (cpds_lmo)

Long tag: qog_std_cs_cpds_lmo

Original tag: cpds_lmo

Description:
Share of seats in parliament for the political parties classified as monarchist.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.17.6.37 Share of seats in parliament: non-labelled (cpds_lnl)

Long tag: qog_std_cs_cpds_lnl

Original tag: cpds_lnl

Description:
Share of seats in parliament for the political parties classified as non-labelled.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.17.6.38 Share of seats in parliament: other (cpds_lo)

Long tag: qog_std_cs_cpds_lo

Original tag: cpds_lo

Description:
Share of seats in parliament for the political parties classified as other.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.17.6.39 Share of seats in parliament: protest (cpds_lp)

Long tag: qog_std_cs_cpds_lp

Original tag: cpds_lp

Description:
Share of seats in parliament for the political parties classified as protest.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.17.6.40 Share of seats in parliament: post-communist (cpds_lpc)

Long tag: qog_std_cs_cpds_lpc

Original tag: cpds_lpc

Description:
Share of seats in parliament for the political parties classified as post-communist.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.17.6.41 Share of seats in parliament: pensioners (cpds_lpen)

Long tag: qog_std_cs_cpds_lpen

Original tag: cpds_lpen

Description:
Share of seats in parliament for the political parties classified as pensioners.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.17.6.42 Share of seats in parliament: personalist (cpds_lper)

Long tag: qog_std_cs_cpds_lper

Original tag: cpds_lper

Description:
Share of seats in parliament for the political parties classified as personalist.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.17.6.43 Share of seats in parliament: right (cpds_lr)

Long tag: qog_std_cs_cpds_lr

Original tag: cpds_lr

Description:
Share of seats in parliament for the political parties classified as right.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.17.6.44 Share of seats in parliament: regionalist (cpds_lreg)

Long tag: qog_std_cs_cpds_lreg

Original tag: cpds_lreg

Description:

Share of seats in parliament for the political parties classified as regionalist.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.17.6.45 Share of seats in parliament: religious (cpds_lrel)

Long tag: qog_std_cs_cpds_lrel

Original tag: cpds_lrel

Description:

Share of seats in parliament for the political parties classified as religious.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.17.6.46 Share of seats in parliament: social democratic (cpds_ls)

Long tag: qog_std_cs_cpds_ls

Original tag: cpds_ls

Description:

Share of seats in parliament for the political parties classified as social democratic.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.17.6.47 Type of Government (cpds_tg)

Long tag: qog_std_cs_cpds_tg

Original tag: cpds_tg

Description:

Type of government based on the following classification:

1. Single-party majority government: One party takes all governments seats and has a parliamentary majority.
2. Minimal winning coalition: All participating parties are necessary to form a majority government [>50.0percent].
3. Surplus coalition: Coalition governments which exceed the minimal-winning criterion [>50.0percent].
4. Single-party minority government: The party in government does not possess a majority in Parliament [<50.0percent].
5. Multi-party minority government: The parties in government do not possess a majority in Parliament [<50.0percent].
6. Caretaker government: Governments which should simply maintain the status quo.
7. Technocratic government: Led by technocratic prime minister, consists of a majority of technocratic ministers and is in possession of a mandate to change the status quo.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.17.6.48 Share of votes: agrarian (cpds_va)

Long tag: qog_std_cs_cpds_va

Original tag: cpds_va

Description:

Share of votes of the political parties classified as agrarian.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.17.6.49 Share of votes: electoral alliance (cpds_vall)

Long tag: qog_std_cs_cpds_vall

Original tag: cpds_vall

Description:

Share of votes of the political parties classified as electoral alliance.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.17.6.50 Share of votes: communist (cpds_vcom)

Long tag: qog_std_cs_cpds_vcom

Original tag: cpds_vcom

Description:
Share of votes of the political parties classified as communist.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.17.6.51 Share of votes: conservative (cpds_vcon)

Long tag: qog_std_cs_cpds_vcon

Original tag: cpds_vcon

Description:
Share of votes of the political parties classified as conservative.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.17.6.52 Share of votes: ethnic (cpds_ve)

Long tag: qog_std_cs_cpds_ve

Original tag: cpds_ve

Description:
Share of votes of the political parties classified as ethnic.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.17.6.53 Share of votes: feminist (cpds_vfe)

Long tag: qog_std_cs_cpds_vfe

Original tag: cpds_vfe

Description:
Share of votes of the political parties classified as feminist.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.17.6.54 Share of votes: green (cpds_vg)

Long tag: qog_std_cs_cpds_vg

Original tag: cpds_vg

Description:
Share of votes of the political parties classified as green.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.17.6.55 Share of votes: liberal (cpds_vl)

Long tag: qog_std_cs_cpds_vl

Original tag: cpds_vl

Description:
Share of votes of the political parties classified as liberal.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.17.6.56 Share of votes: left-socialist (cpds_vls)

Long tag: qog_std_cs_cpds_vls

Original tag: cpds_vls

Description:
Share of votes of the political parties classified as left-socialist.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.17.6.57 Share of votes: monarchist (cpds_vmo)

Long tag: qog_std_cs_cpds_vmo

Original tag: cpds_vmo

Description:
Share of votes of the political parties classified as monarchist.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.17.6.58 Share of votes: non-labelled (cpds_vnl)

Long tag: qog_std_cs_cpds_vnl

Original tag: cpds_vnl

Description:
Share of votes of the political parties classified as non-labelled.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.17.6.59 Share of votes: other (cpds_vo)

Long tag: qog_std_cs_cpds_vo

Original tag: cpds_vo

Description:
Share of votes of the political parties classified as other.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.17.6.60 Share of votes: protest (cpds_vp)

Long tag: qog_std_cs_cpds_vp

Original tag: cpds_vp

Description:
Share of votes of the political parties classified as protest.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.17.6.61 Share of votes: post-communist (cpds_vpcom)

Long tag: qog_std_cs_cpds_vpcom

Original tag: cpds_vpcom

Description:
Share of votes of the political parties classified as post-communist.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.17.6.62 Share of votes: pensioners (cpds_vpen)

Long tag: qog_std_cs_cpds_vpen

Original tag: cpds_vpen

Description:
Share of votes of the political parties classified as pensioners.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.17.6.63 Share of votes: personalist (cpds_vper)

Long tag: qog_std_cs_cpds_vper

Original tag: cpds_vper

Description:
Share of votes of the political parties classified as personalist.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.17.6.64 Share of votes: right (cpds_vr)

Long tag: qog_std_cs_cpds_vr

Original tag: cpds_vr

Description:
Share of votes of the political parties classified as right.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.17.6.65 Share of votes: regionalist (cpds_vreg)

Long tag: qog_std_cs_cpds_vreg

Original tag: cpds_vreg

Description:
Share of votes of the political parties classified as regionalist.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.17.6.66 Share of votes: religious (cpds_vrel)

Long tag: qog_std_cs_cpds_vrel

Original tag: cpds_vrel

Description:

Share of votes of the political parties classified as religious.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.17.6.67 Share of votes: social democratic (cpds_vs)

Long tag: qog_std_cs_cpds_vs

Original tag: cpds_vs

Description:

Share of votes of the political parties classified as social democratic.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.17.6.68 Voter turnout in election (cpds_vt)

Long tag: qog_std_cs_cpds_vt

Original tag: cpds_vt

Description:

Voter turnout in election.

Variable citation: Armingeon, K., Engler, S., & Leemann, L. (2021). Comparative political data set 1960-2019

2.17.6.69 Close to Political Party (cses_pc)

Long tag: qog_std_cs_cses_pc

Original tag: cses_pc

Description:

Do you usually think of yourself as close to any particular party? Share of the population who answered Yes.

Note: Refused to answer, Don't know and similar answers were coded as missing, and the average are based on the remaining answers.

2.17.6.70 Electoral Volatility - Parties above 1percent (dev_altv1)

Long tag: qog_std_cs_dev_altv1

Original tag: dev_altv1

Description:

Electoral volatility caused by vote switching between existing parties, namely parties receiving at least 1percent of the national share in both elections under scrutiny.

Variable citation: Williams, A. (2015). A global index of information transparency and accountability. *Journal of Comparative Economics*, 43(3), 804–824. `https://doi.org/10.1016/j.jce.2014.10.004`

2.17.6.71 Electoral Volatility - Parties below 1percent (dev_othv1)

Long tag: qog_std_cs_dev_othv1

Original tag: dev_othv1

Description:

Electoral volatility caused by vote switching between parties falling below 1percent of the national share in both the elections at time t and t+1. It is important to clarify that this category is not computed by aggregating the scores of each party falling below 1percent and then comparing the overall sum at time t and t+1. Conversely, each party's volatility is counted separately - up to a specification of 0.1percent - and then added to the calculation of dev_othv. This choice has been made to avoid underestimation of Total Volatility

but at the same time to maintain a distinction between parties above 1percent and parties below 1percent for the calculation of the two components of dev_regv and dev_altv.

Variable citation: Williams, A. (2015). A global index of information transparency and accountability. *Journal of Comparative Economics*, 43(3), 804–824. https://doi.org/10.1016/j.jce.2014.10.004

2.17.6.72 Electoral Volatility - Parties entering/exiting party system (dev_regv1)

Long tag: qog_std_cs_dev_regv1

Original tag: dev_regv1

Description:

Electoral volatility caused by vote switching between parties that enter or exit from the party system. A party is considered as entering the party system where it receives at least 1percent of the national share in election at time t+1 (while it received less than 1percent in election at time t). Conversely, a party is considered as exiting the part system where it receives less than 1percent in election at time t+1 (while it received at least 1percent in election at time t).

Variable citation: Williams, A. (2015). A global index of information transparency and accountability. *Journal of Comparative Economics*, 43(3), 804–824. https://doi.org/10.1016/j.jce.2014.10.004

2.17.6.73 Electoral Volatility - Total (dev_tv1)

Long tag: qog_std_cs_dev_tv1

Original tag: dev_tv1

Description:

Total electoral volatility in the party system, given by the sum of the previous measures: dev_regv + dev_altv + dev_othv = dev_tv.

Variable citation: Williams, A. (2015). A global index of information transparency and accountability. *Journal of Comparative Economics*, 43(3), 804–824. https://doi.org/10.1016/j.jce.2014.10.004

2.17.6.74 Trust in Parliament (ess_trparl)

Long tag: qog_std_cs_ess_trparl

Original tag: ess_trparl

Description:

Please tell me on a score of 0-10 how much you personally trust each of the institutions I read out. 0 means you do not trust an institution at all, and 10 means you have complete trust. The Parliament.

Variable citation: NSD - Norwegian Centre for Research Data. (2018). European social survey cumulative file, ess 1-8 [Data Archive and distributor of ESS data for ESS ERIC]. http://www.europeansocialsurvey.org/

2.17.6.75 Trust in Political Parties (ess_trpart)

Long tag: qog_std_cs_ess_trpart

Original tag: ess_trpart

Description:

Please tell me on a score of 0-10 how much you personally trust each of the institutions I read out. 0 means you do not trust an institution at all, and 10 means you have complete trust. The Political Parties.

Variable citation: NSD - Norwegian Centre for Research Data. (2018). European social survey cumulative file, ess 1-8 [Data Archive and distributor of ESS data for ESS ERIC]. http://www.europeansocialsurvey.org/

2.17.6.76 Trust in Politicians (ess_trpolit)

Long tag: qog_std_cs_ess_trpolit

Original tag: ess_trpolit

Description:

Please tell me on a score of 0-10 how much you personally trust each of the institutions I read out. 0 means you do not trust an institution at all, and 10 means you have complete trust. The Politicians.

Variable citation: NSD - Norwegian Centre for Research Data. (2018). European social survey cumulative file, ess 1-8 [Data Archive and distributor of ESS data for ESS ERIC]. http://www.europeansocialsurvey.org/

2.17.6.77 Electoral Volatility in the EP - Parties above 1percent (evep_altv)

Long tag: qog_std_cs_evep_altv

Original tag: evep_altv

Description:

Electoral volatility in the European Parliament, caused by vote switching between parties that enter or exit

from the party system caused by vote switching between existing parties, namely parties receiving at least 1percent of the national share in both elections under scrutiny.

2.17.6.78 Net change in the agg. vote share for all parties in Class Bloc (EP) (evep_classbloc)

Long tag: qog_std_cs_evep_classbloc

Original tag: evep_classbloc

Description:

Net change in the aggregate vote share for all parties included in the Class Bloc. For the definition of the class bloc and the identification of parties included in such bloc, the author relies on Bartolini and Mair (1990) and Bartolini (1983; 2000). This includes 'those parties which are the historical product of the structuring of the working-class movement' (Bartolini and Mair 1990 [2007], 46). Full list of parties in the class bloc can be found in the original codebook.

2.17.6.79 Net change in the agg. vote share for all parties in Demarcation Bloc (EP) (evep_dembloc)

Long tag: qog_std_cs_evep_dembloc

Original tag: evep_dembloc

Description:

Net change in the aggregate vote share for all parties included in the Demarcation Bloc. Those political parties that defend anti-EU, anti-immigration and economically protectionist policies are included in the demarcation bloc. Full list of parties in the demarcation bloc can be found in the original codebook.

2.17.6.80 Electoral Volatility in the EP - Parties below 1percent (evep_othv)

Long tag: qog_std_cs_evep_othv

Original tag: evep_othv

Description:

Electoral volatility in the European Parliament, caused by vote switching between parties falling below 1percent of the national share in both the elections at time t and t+1. It is important to clarify that this category is not computed by aggregating the scores of each party falling below 1percent and then comparing the overall sum at time t and t+1. Conversely, each party's volatility is counted separately - up to a specification of 0.1percent - and then added to the calculation of evep_othv. This choice has been made to avoid underestimation of Total Volatility but at the same time to maintain a distinction between parties above 1percent and parties below 1percent for the calculation of the two components of evep_regv and evep_altv.

2.17.6.81 Electoral Volatility in the EP - Parties entering/exiting party system (evep_regv)

Long tag: qog_std_cs_evep_regv

Original tag: evep_regv

Description:

Electoral volatility in the European Parliament, caused by vote switching between parties that enter or exit from the party system. A party is considered as entering the party system where it receives at least 1percent of the national share in election at time t+1 (while it received less than 1percent in election at time t). Conversely, a party is considered as exiting the part system where it receives less than 1percent in election at time t+1 (while it received at least 1percent in election at time t).

2.17.6.82 Electoral Volatility in the EP - Total (evep_tv)

Long tag: qog_std_cs_evep_tv

Original tag: evep_tv

Description:

Total electoral volatility in the party system, given by the sum of the previous measures: evep_regv + evep_altv + evep_othv = evep_tv.

2.17.6.83 Electoral Process (fh_ep)

Long tag: qog_std_cs_fh_ep

Original tag: fh_ep

Description:

Electoral Process - The variable measures to what extent the national legislative representatives and the national chief authority are elected through free and fair elections. Countries are graded between 0 (worst) and 12 (best).

Variable citation: Freedom House. (2021a). Freedom in the world 2021. `https://freedomhouse.org/report/freedom-world`

2.17.6.84 Corruption Perception-Legislature: Most (percent respondents) (gcb_pclmost)

Long tag: qog_std_cs_gcb_pclmost

Original tag: gcb_pclmost

Description:

Percentage of respondents who answered 'Most or All' to the following question about the Members of Parliament or Senators: How many of the following people do you think are involved in corruption, or haven't you heard enough about them to say?

Variable citation: Transparency International (2017). Global corruption barometer 9th edition. `https://www.transparency.org/research/gcb`

2.17.6.85 Corruption Perception-Legislature: Some (percent respondents) (gcb_pclsome)

Long tag: qog_std_cs_gcb_pclsome

Original tag: gcb_pclsome

Description:

Percentage of respondents who answered 'Some or None' to the following question about the Members of Parliament or Senators: How many of the following people do you think are involved in corruption, or haven't you heard enough about them to say?

Variable citation: Transparency International (2017). Global corruption barometer 9th edition. `https://www.transparency.org/research/gcb`

2.17.6.86 Average District Magnitude (gol_adm)

Long tag: qog_std_cs_gol_adm

Original tag: gol_adm

Description:

Average district magnitude in an electoral tier. This is calculated as the total number of seats allocated in an electoral tier divided by the total number of districts in that tier.

2.17.6.87 Districts (gol_dist)

Long tag: qog_std_cs_gol_dist

Original tag: gol_dist

Description:

This is the number of electoral districts or constituencies in an electoral tier.

2.17.6.88 Effective Number of Electoral Parties (gol_enep)

Long tag: qog_std_cs_gol_enep

Original tag: gol_enep

Description:

Effective number of electoral parties.

2.17.6.89 Effective Number of Electoral Parties 1 (gol_enep1)

Long tag: qog_std_cs_gol_enep1

Original tag: gol_enep1

Description:

The effective number of electoral parties once the "other" category has been "corrected" by using the least component method of bounds.

2.17.6.90 Effective Number of Electoral Parties (Others) (gol_enepo)

Long tag: qog_std_cs_gol_enepo

Original tag: gol_enepo

Description:

The percentage of the vote going to parties that are collectively known as "others" in official election results.

2.17.6.91 Effective Number of Parliamentary or Legislative Parties (gol_enpp)

Long tag: qog_std_cs_gol_enpp

Original tag: gol_enpp

Description:

The effective number of parliamentary (legislative) parties.

2.17.6.92 Effective Number of Parliamentary or Legislative Parties 1 (gol_enpp1)

Long tag: qog_std_cs_gol_enpp1

Original tag: gol_enpp1

Description:

This is the effective number of parliamentary (legislative) parties once the "other" category has been "corrected" by using the least component method of bounds.

2.17.6.93 Effective Number of Parliamentary or Legislative Parties (Others) (gol_enppo)

Long tag: qog_std_cs_gol_enppo

Original tag: gol_enppo

Description:

The percentage of seats won by parties that are collectively known as "others" in official election results.

2.17.6.94 Effective Number of Presidential Candidates (gol_enpres)

Long tag: qog_std_cs_gol_enpres

Original tag: gol_enpres

Description:

The effective number of presidential candidates.

2.17.6.95 Electoral System Type-3 classes (gol_est)

Long tag: qog_std_cs_gol_est

Original tag: gol_est

Description:

This is a categorical variable that takes on one of three values indicating the basic type of electoral system used in the elections.

1. Majoritarian
2. Proportional
3. Mixed

2.17.6.96 Electoral System Type-11 classes (gol_est_spec)

Long tag: qog_std_cs_gol_est_spec

Original tag: gol_est_spec

Description:

This is a categorical variable that provides a more detailed indication of the type of electoral system used in the election.

1. Single-Member-District-Plurality (SMDP)
2. Two-Round System (TRS)
3. Alternative Vote (AV)
4. Borda Count (BC)
5. Block Vote (BV)
6. Party Block Vote (PBV)
7. Limited Vote (LV)
8. Single Nontransferable Vote (SNTV)
9. List Proportional Representation (List PR)
10. Single Transferable Vote (STV)
11. Mixed Dependent (or Mixed Member Proportional)
12. Mixed Independent (or Mixed Parallel)

2.17.6.97 Institution (gol_inst)

Long tag: qog_std_cs_gol_inst

Original tag: gol_inst

Description:

This is a categorical variable indicating a country's regime type at the end of a given year. The data for this variable come from Cheibub, Gandhi and Vreeland (2010), which we updated through 2011.

0. Parliamentary democracy
1. Semi-presidential democracy
2. Presidential democracy
3. Civilian dictatorship
4. Military dictatorship
5. Royal dictatorship

Not all elections that occur when a regime is classified as a dictatorship (regime = 4-6) are dictatorial. This

apparent anomaly has to do with the fact that a country's regime type is coded based on its status at the end of a given year. Elections like those in Argentina 1962, Nicaragua 1983, Philippines 1965, and Thailand 1976 all preceded a democratic collapse in the same year. Although these countries are considered dictatorial at the end of these years, we code these particular elections as democratic and therefore include them in our data set. We should note that we code the 1997 elections in Kenya, the 1999 elections in Guinea Bissau, the 2005 elections in Liberia, the 2006 elections in Mauritania, and the 2008 elections in Bangladesh as democratic even though Cheibub, Gandhi and Vreeland (2010) do not code these countries as democratic until the following year. The reason for this is that these elections are the primary reason cited by Cheibub, Gandhi and Vreeland (2010) for their eventual recoding of these countries as democratic. As an example, Cheibub, Gandhi and Vreeland (2010) do not code Liberia as democratic until 2006 despite the fact that presidential elections took place in October 2005, because the winner of these elections, Ellen Johnson-Sirleaf, did not officially take office until January 2006. The bottom line is that there are a few observations in our data set of democratic elections where regime indicates that the country was a dictatorship by the end of the year.

2.17.6.98 Mixed Type (gol_mix)

Long tag: qog_std_cs_gol_mix

Original tag: gol_mix

Description:

This is a categorical variable that indicates the precise type of mixed electoral system that is being used.

1. Coexistence
2. Superposition
3. Fusion
4. Correction
5. Conditional

2.17.6.99 Multi-Tier Type (gol_mt)

Long tag: qog_std_cs_gol_mt

Original tag: gol_mt

Description:

This is a dichotomous variable that indicates whether different electoral tiers are linked (1) or not (0). Electoral tiers are linked if the unused votes from one electoral tier are used to allocate seats in another electoral tier, or if the allocation of seats in one electoral tier is conditional on the seats received in a different electoral tier.

2.17.6.100 Number of Seats (gol_nos)

Long tag: qog_std_cs_gol_nos

Original tag: gol_nos

Description:

This indicates the total number of seats in the lower house of the national legislature.

2.17.6.101 Presidential Electoral System Type (gol_pest)

Long tag: qog_std_cs_gol_pest

Original tag: gol_pest

Description:

This is a categorical variable that indicates the electoral formula used in the presidential election.

1. Plurality
2. Absolute Majority
3. Qualified Majority
4. Electoral College
5. Alternative Vote

2.17.6.102 Electoral Formula used in an Electoral Tier (gol_pr)

Long tag: qog_std_cs_gol_pr

Original tag: gol_pr

Description:

This is a categorical variable that indicates the precise electoral formula used in an electoral tier.

1. Single-Member-District-Plurality (SMDP)
2. Two Round Majority-Plurality
3. Two Round Qualified Majority
4. Two Round Majority Runoff
5. Alternative Vote (AV)
6. Borda Count (BC)
7. Modified Borda Count (mBC)

2.17.6.103 Presidential Election (gol_preel)

Long tag: qog_std_cs_gol_preel

Original tag: gol_preel

Description:

This is a dichotomous variable that takes on the value 1 if the election is presidential and 0 if the election is legislative.

2.17.6.104 Upper Seats (gol_upseat)

Long tag: qog_std_cs_gol_upseat

Original tag: gol_upseat

Description:

This indicates the number of legislative seats allocated in electoral districts above the lowest electoral tier.

2.17.6.105 Upper Tier (gol_uptier)

Long tag: qog_std_cs_gol_uptier

Original tag: gol_uptier

Description:

This indicates the percentage of all legislative seats allocated in electoral districts above the lowest electoral tier.

2.17.6.106 Alignment Executive/Legislative Chamber (lower) (h_alignl1)

Long tag: qog_std_cs_h_alignl1

Original tag: h_alignl1

Description:

Dummy variable indicating alignment between the executive and the lower legislative chamber, coded 1 when the party controlling the executive branch is either the largest party in the lower legislative chamber or is a member of a ruling coalition in that chamber.

Variable citation: Henisz, W. J. (2017). The Political Constraint Index (POLCON) Dataset 2017 release. `https://mgmt.wharton.upenn.edu/profile/1327`

2.17.6.107 Alignment Lower/Upper Legislative Chamber (h_alignl1l2)

Long tag: qog_std_cs_h_alignl1l2

Original tag: h_alignl1l2

Description:

Dummy variable indicating alignment between the legislative chambers, coded 1 when the same party or a coalition of parties (when available) control a majority in both legislative chambers.

Variable citation: Henisz, W. J. (2017). The Political Constraint Index (POLCON) Dataset 2017 release. `https://mgmt.wharton.upenn.edu/profile/1327`

2.17.6.108 Alignment Executive/Legislative Chamber (upper) (h_alignl2)

Long tag: qog_std_cs_h_alignl2

Original tag: h_alignl2

Description:
Dummy variable indicating alignment between the executive and the upper legislative chamber, coded 1 when the party controlling the executive branch is either the largest party in the upper legislative chamber or is a member of a ruling coalition in that chamber.

Variable citation: Henisz, W. J. (2017). The Political Constraint Index (POLCON) Dataset 2017 release. `https://mgmt.wharton.upenn.edu/profile/1327`

2.17.6.109 2nd Legislative Chamber (h_l2)

Long tag: qog_std_cs_h_l2

Original tag: h_l2

Description:
Dummy variable coded 1 if there is an effective second legislative chamber, namely, where h_l1=1 and records on the composition of a second chamber exist - where that chamber is elected under a distinct electoral system and has a substantive (not merely delaying) role in the implementation of fiscal policy.

Variable citation: Henisz, W. J. (2017). The Political Constraint Index (POLCON) Dataset 2017 release. `https://mgmt.wharton.upenn.edu/profile/1327`

2.17.6.110 Legislative Fractionalization (lower) (h_lflo)

Long tag: qog_std_cs_h_lflo

Original tag: h_lflo

Description:
Legislative fractionalization is approximately the probability that two random draws from the lower legislative chamber will be from different parties.

Variable citation: Henisz, W. J. (2017). The Political Constraint Index (POLCON) Dataset 2017 release. `https://mgmt.wharton.upenn.edu/profile/1327`

2.17.6.111 Legislative Fractionalization (upper) (h_lfup)

Long tag: qog_std_cs_h_lfup

Original tag: h_lfup

Description:
Legislative fractionalization is approximately the probability that two random draws from the upper legislative chamber will be from different parties.

Variable citation: Henisz, W. J. (2017). The Political Constraint Index (POLCON) Dataset 2017 release. `https://mgmt.wharton.upenn.edu/profile/1327`

2.17.6.112 Electoral System Family (ideaesd_esf)

Long tag: qog_std_cs_ideaesd_esf

Original tag: ideaesd_esf

Description:
Electoral System Family

1. Proportional Representation
2. Plurality/Majority
3. Plurality/Majority and Proportional Representation
4. Mixed
5. Transition
6. Other
7. Not Applicable

Variable citation: The International Institute for Democracy and Electoral Assistance. (2021a). Electoral system design database. `https://www.idea.int/data-tools/data/electoral-system-design`

2.17.6.113 Electoral System for the National Legislature (ideaesd_esnl)

Long tag: qog_std_cs_ideaesd_esnl

Original tag: ideaesd_esnl

Description:
Electoral System for National Legislature:

1. List Proportional Representation (List PR)
Under a List Proportional Representation (List PR) system each party or grouping presents a list of candidates for a multi-member electoral district, the voters vote for a party, and parties receive seats in proportion to their overall share of the vote. In some (closed list) systems the winning candidates are taken

from the lists in order of their position on the lists. If the lists are 'open' or 'free' the voters can influence the order of the candidates by marking individual preferences.

2. Block Vote (BV)
Block Vote is a plurality/majority system used in multi-member districts. Electors have as many votes as there are candidates to be elected. The candidates with the highest vote totals win the seats. Usually voters vote for candidates rather than parties and in most systems may use as many, or as few, of their votes as they wish.

3. First Past the Post (FPTP)
First Past The Post is the simplest form of plurality/majority electoral system. The winning candidate is the one who gains more votes than any other candidate, even if this is not an absolute majority of valid votes. The system uses single-member districts and the voters vote for candidates rather than political parties.

4. Two-Round System (TRS)
The Two-Round System is a plurality/majority system in which a second election is held if no candidate or party achieves a given level of votes, most commonly an absolute majority (50 per cent plus one), in the first election round. A Two-Round System may take a majority-plurality form-more than two candidates contest the second round and the one wins the highest number of votes in the second round is elected, regardless of whether they have won an absolute majority-or a majority run-off form-only the top two candidates in the first round contest the second round.

5. Mixed Member Proportional (MMP)
Mixed Member Proportional is a mixed system in which the choices expressed by the voters are used to elect representatives through two different systems-one List PR system and (usually) one plurality/majority system-where the List PR system compensates for the disproportionality in the results from the plurality/majority system.

6. Single Transferable Vote (STV)
The Single Transferable Vote is a preferential system in which the voter has one vote in a multi-member district and the candidates that surpass a specified quota of first preference votes are immediately elected. In successive counts, votes are redistributed from least successful candidates, who are eliminated, and votes surplus to the quota are redistributed from successful candidates, until sufficient candidates are declared elected. Voters normally vote for candidates rather than political parties, although a party-list option is possible.

7. Alternative Vote (AV)
The Alternative Vote is a preferential plurality/majority system used in single-member districts. Voters use numbers to mark their preferences on the ballot paper. A candidate who receives an absolute majority (50 per cent plus 1) of valid first preference votes is declared elected. If no candidate achieves an absolute majority of first preferences, the least successful candidates are eliminated and their votes reallocated according to their second preferences until one candidate has an absolute majority. Voters vote for candidates rather than political parties.

8. Single Non-Transferable Vote (SNTV)
Under the Single Non-Transferable Vote system voters cast a single vote in a multi-member district. The candidates with the highest vote totals are declared elected. Voters vote for candidates rather than political parties.

9. Two-Round System, Party Block Vote (TRS PBV)
Party Block Vote (PBV) is a plurality/majority system using multi-member districts in which voters cast a single party-centered vote for a party of choice, and do not choose between candidates. The party with the most votes will win every seat in the electoral district.

10. Limited Vote (LV)
Limited Vote is a candidate-centred electoral system used in multi-member districts in which electors have more than one vote, but fewer votes than there are candidates to be elected. The candidates with the highest vote totals win the seats.

11. First Past The Post, Party Block Vote (FPTP PBV)

12. First Past the Post, List Proportional Representation (FPTP List PR)

13. First Past the Post, Block Vote (FPTP BV)

14. First Past the Post, Party Block Vote, List Proportional Representation (FPTP PBV List PR)

15. Parallel
A Parallel System is a mixed system in which the choices expressed by the voters are used to elect representatives through two different systems-one List PR system and (usually) one plurality/majority system-but where no account is taken of the seats allocated under the first system in calculating the results in the second system.

16. In transition

17. Modified Borda Count (Modified BC)
Borda Count (BC) - A candidate-centred preferential system used in either single- or multimember districts in which voters use numbers to mark their preferences on the ballot paper and each preference marked is then assigned a value using equal steps. These are summed and the candidate(s) with the highest total(s) is/are declared elected.

18. Two-Round System, Party Block Vote, List Proportional Representation (TRS PBV List PR)

19. No direct elections.

Variable citation: The International Institute for Democracy and Electoral Assistance. (2021a). Electoral system design database. `https://www.idea.int/data-tools/data/electoral-system-design`

2.17.6.114 Electoral System for the President (ideaesd_esp)

Long tag: qog_std_cs_ideaesd_esp

Original tag: ideaesd_esp

Description:
Electoral System for the President:

1. Two-Round System (TRS)
The Two-Round System is a plurality/majority system in which a second election is held if no candidate or party achieves a given level of votes, most commonly an absolute majority (50 per cent plus one), in the first election round. A Two-Round System may take a majority-plurality form-more than two candidates contest the second round and the one who wins the highest number of votes in the second round is elected, regardless of whether they have won an absolute majority-or a majority run-off form-only the top two candidates in the first round contest the second round.

2. First Past the Post (FPTP)
First Past The Post is the simplest form of plurality/majority electoral system. The winning candidate is the one who gains more votes than any other candidate, even if this is not an absolute majority of valid votes. The system uses single-member districts and the voters vote for candidates rather than political parties.

3. Supplementary Vote (SV)
Supplementary vote: Voters can rank up to three candidates, and if no candidate wins a majority in the first round of voting, second and third preferences from ballots whose first preference candidate has been eliminated are used to determine the winner.

4. Single Transferable Vote (STV)
The Single Transferable Vote is a preferential system in which the voter has one vote in a multi-member district and the candidates that surpass a specified quota of first preference votes are immediately elected. In successive counts, votes are redistributed from least successful candidates, who are eliminated, and votes surplus to the quota are redistributed from successful candidates, until sufficient candidates are declared elected. Voters normally vote for candidates rather than political parties, although a party-list option is possible.

5. In Transition

6. Other

7. Not applicable

2.17.6.115 Legislative Size (Directly Elected) (ideaesd_lsde)

Long tag: qog_std_cs_ideaesd_lsde

Original tag: ideaesd_lsde

Description:
Legislative size, directly elected. Total number of directly elected representatives, excluding those appointed or indirectly elected.

Variable citation: The International Institute for Democracy and Electoral Assistance. (2021a). Electoral system design database. `https://www.idea.int/data-tools/data/electoral-system-design`

2.17.6.116 Legislative Size (Voting Members) (ideaesd_lsvm)

Long tag: qog_std_cs_ideaesd_lsvm

Original tag: ideaesd_lsvm

Description:
Legislative size, voting members. Total number of directly elected representatives, including those appointed or indirectly elected.

Variable citation: The International Institute for Democracy and Electoral Assistance. (2021a). Electoral system design database. `https://www.idea.int/data-tools/data/electoral-system-design`

2.17.6.117 Number of Tiers (ideaesd_tiers)

Long tag: qog_std_cs_ideaesd_tiers

Original tag: ideaesd_tiers

Description:
Number of tiers. The tiers of an electoral system can be understood as the sets of representatives that are elected to the same chamber by the entire electorate of a country. 99 indicates a hybrid system, where one part of the country elects representatives using one electoral system, while another distinct part of the country elects representatives using a different system.

Description:
Share of Women (Lower and Single Houses).

Variable citation: Inter-Parliamentary Union. (2021). Parline database: Monthly ranking of women in national parliaments. `https://data.ipu.org/women-ranking`

2.17.6.127 Number of Women (Lower and Single Houses) (ipu_l_w)

Long tag: qog_std_cs_ipu_l_w

Original tag: ipu_l_w

Description:
Number of Women (Lower and Single Houses).

Variable citation: Inter-Parliamentary Union. (2021). Parline database: Monthly ranking of women in national parliaments. `https://data.ipu.org/women-ranking`

2.17.6.128 Number of Seats (Upper House) (ipu_u_s)

Long tag: qog_std_cs_ipu_u_s

Original tag: ipu_u_s

Description:
Number of Seats (Upper House).

Variable citation: Inter-Parliamentary Union. (2021). Parline database: Monthly ranking of women in national parliaments. `https://data.ipu.org/women-ranking`

2.17.6.129 Share of Women (Upper House) (ipu_u_sw)

Long tag: qog_std_cs_ipu_u_sw

Original tag: ipu_u_sw

Description:
Share of Women (Upper House).

Variable citation: Inter-Parliamentary Union. (2021). Parline database: Monthly ranking of women in national parliaments. `https://data.ipu.org/women-ranking`

2.17.6.130 Number of Women (Upper House) (ipu_u_w)

Long tag: qog_std_cs_ipu_u_w

Original tag: ipu_u_w

Description:
Number of Women (Upper House).

Variable citation: Inter-Parliamentary Union. (2021). Parline database: Monthly ranking of women in national parliaments. `https://data.ipu.org/women-ranking`

2.17.6.131 First Multiparty Election (nelda_fme)

Long tag: qog_std_cs_nelda_fme

Original tag: nelda_fme

Description:
This indicates when a newly independent country is having its first elections, when a country holds the first multiparty elections after a significant period of non-democratic rule, or when a country transitions from single-party elections to multiparty elections. Multiparty means that more than one party is allowed to contest the election, and that at least some of the parties are both nominally and effectively independent of the ruling actors.

Variable citation: Hyde, S. D., & Marinov, N. (2012). Which elections can be lost? *Political Analysis*, 20(2), 191–201 Hyde, S. D., & Marinov, N. (2021). Codebook for national elections across democracy and autocracy dataset, 5.0. `https://nelda.co/`

2.17.6.132 Media Bias before Election (nelda_mbbe)

Long tag: qog_std_cs_nelda_mbbe

Original tag: nelda_mbbe

Description:
If there were reports by either domestic or outside actors of media bias in favor of the incumbent or ruling party, it is coded as a "Yes". In cases where the media is totally controlled by the government, and/or no opposition is allowed, the answer is "Yes". It is possible that the answer is "No" even if the political system is tightly controlled.

Variable citation: Hyde, S. D., & Marinov, N. (2012). Which elections can be lost? *Political Analysis*, 20(2), 191–201 Hyde, S. D., & Marinov, N. (2021). Codebook for national elections across democracy and autocracy dataset, 5.0. `https://nelda.co/`

2.17.6.133 Was More Than One Party Legal (nelda_mtop)

Long tag: qog_std_cs_nelda_mtop

Original tag: nelda_mtop

Description:
This variable indicates whether multiple political parties were technically legal. The legalization of multiple parties need not necessarily mean the existence of a functioning opposition party, as there may be other non-legal barriers to the development of an opposition party. Similarly, a well organized opposition party may exist but may not be legal.

Variable citation: Hyde, S. D., & Marinov, N. (2012). Which elections can be lost? *Political Analysis*, 20(2), 191–201 Hyde, S. D., & Marinov, N. (2021). Codebook for national elections across democracy and autocracy dataset, 5.0. `https://nelda.co/`

2.17.6.134 Number of Elections, Total (nelda_noe)

Long tag: qog_std_cs_nelda_noe

Original tag: nelda_noe

Description:
The number of elections during the year (counting legislative, executive and constituent assembly elections).

Variable citation: Hyde, S. D., & Marinov, N. (2012). Which elections can be lost? *Political Analysis*, 20(2), 191–201 Hyde, S. D., & Marinov, N. (2021). Codebook for national elections across democracy and autocracy dataset, 5.0. `https://nelda.co/`

2.17.6.135 Number of Elections, Constituent Assembly (nelda_noea)

Long tag: qog_std_cs_nelda_noea

Original tag: nelda_noea

Description:
Number of constituent assembly elections during the year.

Variable citation: Hyde, S. D., & Marinov, N. (2012). Which elections can be lost? *Political Analysis*, 20(2), 191–201 Hyde, S. D., & Marinov, N. (2021). Codebook for national elections across democracy and autocracy dataset, 5.0. `https://nelda.co/`

2.17.6.136 Number of Elections, Executive (nelda_noee)

Long tag: qog_std_cs_nelda_noee

Original tag: nelda_noee

Description:
Number of executive elections during the year.

Variable citation: Hyde, S. D., & Marinov, N. (2012). Which elections can be lost? *Political Analysis*, 20(2), 191–201 Hyde, S. D., & Marinov, N. (2021). Codebook for national elections across democracy and autocracy dataset, 5.0. `https://nelda.co/`

2.17.6.137 Number of Elections, Legislative (nelda_noel)

Long tag: qog_std_cs_nelda_noel

Original tag: nelda_noel

Description:
Number of legislative elections during the year.

Variable citation: Hyde, S. D., & Marinov, N. (2012). Which elections can be lost? *Political Analysis*, 20(2), 191–201 Hyde, S. D., & Marinov, N. (2021). Codebook for national elections across democracy and autocracy dataset, 5.0. `https://nelda.co/`

2.17.6.138 Was Opposition Allowed (nelda_oa)

Long tag: qog_std_cs_nelda_oa

Original tag: nelda_oa

Description:
This variable indicates whether at least one opposition political party existed to contest the election. Some countries have multiple government parties but no opposition political party. An opposition party is one that is not in the government, meaning it is not affiliated with the incumbent party in power.

Variable citation: Hyde, S. D., & Marinov, N. (2012). Which elections can be lost? *Political Analysis*, 20(2), 191–201 Hyde, S. D., & Marinov, N. (2021). Codebook for national elections across democracy and autocracy dataset, 5.0. `https://nelda.co/`

2.17.6.139 Electoral Integrity Rating (pei_eir)

Long tag: qog_std_cs_pei_eir

Original tag: pei_eir

Description:
Overall how would you rate the integrity of this election on a scale from 1 (very poor) to 10 (very good)?

Variable citation: Norris, P., & Groemping, M. (2019). Perceptions of Electoral Integrity, (PEI-7.0) [V2, UNF:6:2wnukYraCZzg+gojPE [fileUNF]]. `https://doi.org/10.7910/DVN/EWYTZ7`

2.17.6.140 Electoral Integrity Rating, Higher C.I. (pei_eirhci)

Long tag: qog_std_cs_pei_eirhci

Original tag: pei_eirhci

Description:
The higher bound of the 95percent confidence interval for either the election or the country level.

Variable citation: Norris, P., & Groemping, M. (2019). Perceptions of Electoral Integrity, (PEI-7.0) [V2, UNF:6:2wnukYraCZzg+gojPE [fileUNF]]. `https://doi.org/10.7910/DVN/EWYTZ7`

2.17.6.141 Electoral Integrity Rating, Lower C.I. (pei_eirlci)

Long tag: qog_std_cs_pei_eirlci

Original tag: pei_eirlci

Description:
The lower bound of the 95percent confidence interval for either the election or the country level.

Variable citation: Norris, P., & Groemping, M. (2019). Perceptions of Electoral Integrity, (PEI-7.0) [V2, UNF:6:2wnukYraCZzg+gojPE [fileUNF]]. `https://doi.org/10.7910/DVN/EWYTZ7`

2.17.6.142 Elected Office (pei_off)

Long tag: qog_std_cs_pei_off

Original tag: pei_off

Description:

What government body was this election for?

0. Legislative
1. Presidential
2. Both

Variable citation: Norris, P., & Groemping, M. (2019). Perceptions of Electoral Integrity, (PEI-7.0) [V2, UNF:6:2wnukYraCZzg+gojPE [fileUNF]]. https://doi.org/10.7910/DVN/EWYTZ7

2.17.6.143 Perception of Electoral Integrity Index (pei_peii)

Long tag: qog_std_cs_pei_peii

Original tag: pei_peii

Description:

The PEI index is designed to provide an overall summary evaluation of expert perceptions that an election meets international standards and global norms. It is generated at the individual level using experts' answers to the 49 substantive variables below. Therefore, an Index score is missing if an expert does not answer a question. The 49 scores are summed and then standardized to a 100 point scale.

Variable citation: Norris, P., & Groemping, M. (2019). Perceptions of Electoral Integrity, (PEI-7.0) [V2, UNF:6:2wnukYraCZzg+gojPE [fileUNF]]. https://doi.org/10.7910/DVN/EWYTZ7

2.17.6.144 Perception of Electoral Integrity Index, Higher C.I. (pei_peiihci)

Long tag: qog_std_cs_pei_peiihci

Original tag: pei_peiihci

Description:

The higher bound of the 95percent confidence interval for either the election or the country level.

Variable citation: Norris, P., & Groemping, M. (2019). Perceptions of Electoral Integrity, (PEI-7.0) [V2, UNF:6:2wnukYraCZzg+gojPE [fileUNF]]. https://doi.org/10.7910/DVN/EWYTZ7

2.17.6.145 Perception of Electoral Integrity Index, Lower C.I. (pei_peiilci)

Long tag: qog_std_cs_pei_peiilci

Original tag: pei_peiilci

Description:

The lower bound of the 95percent confidence interval for either the election or the country level.

Variable citation: Norris, P., & Groemping, M. (2019). Perceptions of Electoral Integrity, (PEI-7.0) [V2, UNF:6:2wnukYraCZzg+gojPE [fileUNF]]. https://doi.org/10.7910/DVN/EWYTZ7

2.17.6.146 Perception of Electoral Integrity Index Type (pei_peit)

Long tag: qog_std_cs_pei_peit

Original tag: pei_peit

Description:

Classification of the PEI Index on five categories.

1. Very Low
2. Low
3. Moderate
4. High
5. Very High

2.17.6.147 Cummulative Party System Innovation (psi_cpsi1)

Long tag: qog_std_cs_psi_cpsi1

Original tag: psi_cpsi1

Description:

Cumulative Party System Innovation: sum of the vote share received by non-founder parties in each election. A party is considered as a founder if it has received at least 1percent of the national vote share in at least one of the first two post-WWII elections (or, in the case of Greece, Portugal and Spain, the first two democratic

elections). Otherwise, the party is counted as a non-founder. The rationale behind this choice is that we look at the first two post-WWII or post-authoritarian elections and make a dichotomous distinction between relevant parties that formed the system (those who received more than 1percent of the votes) and parties that emerged later or were only marginal actors (those below 1percent) at that time.

Variable citation: Emanuele, V. (2016). Dataset of new parties and party system innovation in western europe since 1945. `https://doi.org/10.7802/1363`

2.17.6.148 Cummulative Party System Innovation of a second election in a year (psi_cpsi2)

Long tag: qog_std_cs_psi_cpsi2

Original tag: psi_cpsi2

Description:

Cumulative Party System Innovation: sum of the vote share received by non-founder parties in each election. A party is considered as a founder if it has received at least 1percent of the national vote share in at least one of the first two post-WWII elections (or, in the case of Greece, Portugal and Spain, the first two democratic elections). Otherwise, the party is counted as a non-founder. The rationale behind this choice is that we look at the first two post-WWII or post-authoritarian elections and make a dichotomous distinction between relevant parties that formed the system (those who received more than 1percent of the votes) and parties that emerged later or were only marginal actors (those below 1percent) at that time. This variable (psi_cpsi2) refers to a second election held on the same year as an election reported on psi_cpsi1.

Variable citation: Emanuele, V. (2016). Dataset of new parties and party system innovation in western europe since 1945. `https://doi.org/10.7802/1363`

2.17.6.149 Exact date of the election (psi_edate1)

Long tag: qog_std_cs_psi_edate1

Original tag: psi_edate1

Description:

Exact date of the election

Variable citation: Emanuele, V. (2016). Dataset of new parties and party system innovation in western europe since 1945. `https://doi.org/10.7802/1363`

2.17.6.150 Exact date of the second election in a year (psi_edate2)

Long tag: qog_std_cs_psi_edate2

Original tag: psi_edate2

Description:

Exact date of a second election in a same year

Variable citation: Emanuele, V. (2016). Dataset of new parties and party system innovation in western europe since 1945. `https://doi.org/10.7802/1363`

2.17.6.151 Party System Innovation (overall vote share of new parties in given election) (psi_psi1)

Long tag: qog_std_cs_psi_psi1

Original tag: psi_psi1

Description:

Party System Innovation: overall vote share of new parties in a given election. It is calculated at time t with respect to time t-1 (namely, PSInn is calculated with respect to the status quo established at the previous election) and therefore each observation in each country is completely independent from the previous ones. In order to exclude marginal parties, the author has set a threshold at 1percent of the national share for a given party to be considered as part of the party system in a given election and has collected data starting from the third post-World War II or democratic election of each country, for a total of 209 new parties (see the complete list of new parties below) in 327 elections. The underlying assumption is that the party system innovation they are interested in is that occurring after the initial institutionalization of the party system. According to PSInn, a party is considered 'new' only in the first election when it enters the party system by receiving at least 1percent of the national share. Then, in the subsequent elections, it becomes 'old'.

Variable citation: Emanuele, V. (2016). Dataset of new parties and party system innovation in western europe since 1945. `https://doi.org/10.7802/1363`

2.17.6.152 Party System Innovation of a second election in a year (psi_psi2)

Long tag: qog_std_cs_psi_psi2

Original tag: psi_psi2

Description:
Party System Innovation: overall vote share of new parties in a given election. Variable citation: Swank, D. (2018). Comparative political parties dataset: Electoral, legislative, and government strength of political parties by ideological group in 21 capitalist democracies, 1950-2015. `http://www.marquette.edu/polisci/faculty_swank.shtml`

2.17.6.160 Cabinet Portfolios: Right-Wing Populist (sw_crwp)

Long tag: qog_std_cs_sw_crwp

Original tag: sw_crwp

Description:
Percentage of cabinet portfolios in national government held by right-wing populist parties.

Variable citation: Swank, D. (2018). Comparative political parties dataset: Electoral, legislative, and government strength of political parties by ideological group in 21 capitalist democracies, 1950-2015. `http://www.marquette.edu/polisci/faculty_swank.shtml`

2.17.6.161 Election Year (sw_ey)

Long tag: qog_std_cs_sw_ey

Original tag: sw_ey

Description:
Election Year. Dummy variable coded 1 for years in which elections occurred; otherwise, 0.

Variable citation: Swank, D. (2018). Comparative political parties dataset: Electoral, legislative, and government strength of political parties by ideological group in 21 capitalist democracies, 1950-2015. `http://www.marquette.edu/polisci/faculty_swank.shtml`

2.17.6.162 Governing Party Seats: Centrist Christian Democratic (sw_gccd)

Long tag: qog_std_cs_sw_gccd

Original tag: sw_gccd

Description:
Centrist Christian Democratic governing party seats as a percent of all legislative seats.

Variable citation: Swank, D. (2018). Comparative political parties dataset: Electoral, legislative, and government strength of political parties by ideological group in 21 capitalist democracies, 1950-2015. `http://www.marquette.edu/polisci/faculty_swank.shtml`

2.17.6.163 Governing Party Seats: Christian Democratic (sw_gcd)

Long tag: qog_std_cs_sw_gcd

Original tag: sw_gcd

Description:
Total Christian Democratic governing party seats as a percent of all legislative seats.

Variable citation: Swank, D. (2018). Comparative political parties dataset: Electoral, legislative, and government strength of political parties by ideological group in 21 capitalist democracies, 1950-2015. `http://www.marquette.edu/polisci/faculty_swank.shtml`

2.17.6.164 Governing Party Seats: Center (sw_gce)

Long tag: qog_std_cs_sw_gce

Original tag: sw_gce

Description:
Center governing party seats as a percent of all legislative seats.

Variable citation: Swank, D. (2018). Comparative political parties dataset: Electoral, legislative, and government strength of political parties by ideological group in 21 capitalist democracies, 1950-2015. `http://www.marquette.edu/polisci/faculty_swank.shtml`

2.17.6.165 Governing Party Seats: Left (sw_gl)

Long tag: qog_std_cs_sw_gl

Original tag: sw_gl

Description:
Left governing party seats as a percent of all legislative seats.

Variable citation: Swank, D. (2018). Comparative political parties dataset: Electoral, legislative, and government strength of political parties by ideological group in 21 capitalist democracies, 1950-2015. `http://www.marquette.edu/polisci/faculty_swank.shtml`

2.17.6.166 Governing Party Seats: Left-Libertarian (sw_gll)

Long tag: qog_std_cs_sw_gll

Original tag: sw_gll

Description:
Left libertarian governing party seats as a percent of all legislative seats.

Variable citation: Swank, D. (2018). Comparative political parties dataset: Electoral, legislative, and government strength of political parties by ideological group in 21 capitalist democracies, 1950-2015. `http://www.marquette.edu/polisci/faculty_swank.shtml`

2.17.6.167 Governing Party Seats: Right (sw_gr)

Long tag: qog_std_cs_sw_gr

Original tag: sw_gr

Description:
Right governing party seats as a percent of all legislative seats.

Variable citation: Swank, D. (2018). Comparative political parties dataset: Electoral, legislative, and government strength of political parties by ideological group in 21 capitalist democracies, 1950-2015. `http://www.marquette.edu/polisci/faculty_swank.shtml`

2.17.6.168 Governing Party Seats: Right-Wing Populist (sw_grwp)

Long tag: qog_std_cs_sw_grwp

Original tag: sw_grwp

Description:
Right-wing populist governing party seats as a percent of all legislative seats.

Variable citation: Swank, D. (2018). Comparative political parties dataset: Electoral, legislative, and government strength of political parties by ideological group in 21 capitalist democracies, 1950-2015. `http://www.marquette.edu/polisci/faculty_swank.shtml`

2.17.6.169 Legislative Seats: Centrist Christian Democratic (sw_lccd)

Long tag: qog_std_cs_sw_lccd

Original tag: sw_lccd

Description:
Centrist Christian Democratic party seats as a percent of all legislative seats.

Variable citation: Swank, D. (2018). Comparative political parties dataset: Electoral, legislative, and government strength of political parties by ideological group in 21 capitalist democracies, 1950-2015. `http://www.marquette.edu/polisci/faculty_swank.shtml`

2.17.6.170 Legislative Seats: Christian Democratic (sw_lcd)

Long tag: qog_std_cs_sw_lcd

Original tag: sw_lcd

Description:
Total Christian Democratic party seats as a percent of all legislative seats.

Variable citation: Swank, D. (2018). Comparative political parties dataset: Electoral, legislative, and government strength of political parties by ideological group in 21 capitalist democracies, 1950-2015. `http://www.marquette.edu/polisci/faculty_swank.shtml`

2.17.6.171 Legislative Seats: Center (sw_lce)

Long tag: qog_std_cs_sw_lce

Original tag: sw_lce

Description:
Center party seats as a percent of all legislative seats.

Variable citation: Swank, D. (2018). Comparative political parties dataset: Electoral, legislative, and government strength of political parties by ideological group in 21 capitalist democracies, 1950-2015. `http://www.marquette.edu/polisci/faculty_swank.shtml`

2.17.6.172 Legislative Seats: Left (sw_ll)

Long tag: qog_std_cs_sw_ll

Original tag: sw_ll

Description:
Left party legislative seats as a percent of all legislative seats.

Variable citation: Swank, D. (2018). Comparative political parties dataset: Electoral, legislative, and government strength of political parties by ideological group in 21 capitalist democracies, 1950-2015. `http://www.marquette.edu/polisci/faculty_swank.shtml`

2.17.6.173 Legislative Seats: Left-Libertarian (sw_lll)

Long tag: qog_std_cs_sw_lll

Original tag: sw_lll

Description:
Percentage of seats (lower chamber) for left-libertarian parties and various miscellaneous works.

Variable citation: Swank, D. (2018). Comparative political parties dataset: Electoral, legislative, and government strength of political parties by ideological group in 21 capitalist democracies, 1950-2015. `http://www.marquette.edu/polisci/faculty_swank.shtml`

2.17.6.174 Legislative Seats: Right (sw_lr)

Long tag: qog_std_cs_sw_lr

Original tag: sw_lr

Description:
Right party legislative seats as a percent of all legislative seats.

Variable citation: Swank, D. (2018). Comparative political parties dataset: Electoral, legislative, and government strength of political parties by ideological group in 21 capitalist democracies, 1950-2015. `http://www.marquette.edu/polisci/faculty_swank.shtml`

2.17.6.175 Legislative Seats: Right-Wing Populist (sw_lrwp)

Long tag: qog_std_cs_sw_lrwp

Original tag: sw_lrwp

Description:
Percentage of seats in lower chamber of national parliament held by right wing populist parties.

Variable citation: Swank, D. (2018). Comparative political parties dataset: Electoral, legislative, and government strength of political parties by ideological group in 21 capitalist democracies, 1950-2015. `http://www.marquette.edu/polisci/faculty_swank.shtml`

2.17.6.176 Votes: Centrist Christian Democratic (sw_vccd)

Long tag: qog_std_cs_sw_vccd

Original tag: sw_vccd

Description:
Centrist Christian Democratic party votes as a percent of all votes.

Variable citation: Swank, D. (2018). Comparative political parties dataset: Electoral, legislative, and government strength of political parties by ideological group in 21 capitalist democracies, 1950-2015. `http://www.marquette.edu/polisci/faculty_swank.shtml`

2.17.6.177 Votes: Christian Democratic (sw_vcd)

Long tag: qog_std_cs_sw_vcd

Original tag: sw_vcd

Description:
Total Christian Democratic party votes as a percent of all votes.

Variable citation: Swank, D. (2018). Comparative political parties dataset: Electoral, legislative, and government strength of political parties by ideological group in 21 capitalist democracies, 1950-2015. `http://www.marquette.edu/polisci/faculty_swank.shtml`

2.17.6.178 Votes: Center (sw_vce)

Long tag: qog_std_cs_sw_vce

Original tag: sw_vce

Description:
Center party votes as a percent of all votes.

Variable citation: Swank, D. (2018). Comparative political parties dataset: Electoral, legislative, and government strength of political parties by ideological group in 21 capitalist democracies, 1950-2015. `http://www.marquette.edu/polisci/faculty_swank.shtml`

2.17.6.179 Votes: Left (sw_vl)

Long tag: qog_std_cs_sw_vl

Original tag: sw_vl

Description:
Left party votes as a percent of total votes.

Variable citation: Swank, D. (2018). Comparative political parties dataset: Electoral, legislative, and government strength of political parties by ideological group in 21 capitalist democracies, 1950-2015. `http://www.marquette.edu/polisci/faculty_swank.shtml`

2.17.6.180 Votes: Left-Libertarian (sw_vll)

Long tag: qog_std_cs_sw_vll

Original tag: sw_vll

Description:
Percentage of votes (lower chamber) for left-libertarian parties.

Variable citation: Swank, D. (2018). Comparative political parties dataset: Electoral, legislative, and government strength of political parties by ideological group in 21 capitalist democracies, 1950-2015. `http://www.marquette.edu/polisci/faculty_swank.shtml`

2.17.6.181 Votes: Right (sw_vr)

Long tag: qog_std_cs_sw_vr

Original tag: sw_vr

Description:
Right party votes as a percent of total votes.

Variable citation: Swank, D. (2018). Comparative political parties dataset: Electoral, legislative, and government strength of political parties by ideological group in 21 capitalist democracies, 1950-2015. `http://www.marquette.edu/polisci/faculty_swank.shtml`

2.17.6.182 Votes: Right-Wing Populist (sw_vrwp)

Long tag: qog_std_cs_sw_vrwp

Original tag: sw_vrwp

Description:
Percentage of national vote for right-wing populist parties in elections to lower chamber.

Variable citation: Swank, D. (2018). Comparative political parties dataset: Electoral, legislative, and government strength of political parties by ideological group in 21 capitalist democracies, 1950-2015. `http://www.marquette.edu/polisci/faculty_swank.shtml`

2.17.6.183 Competition (van_comp)

Long tag: qog_std_cs_van_comp

Original tag: van_comp

Description:
The competition variable portrays the electoral success of smaller parties, that is, the percentage of votes gained by the smaller parties in parliamentary and/or presidential elections. The variable is calculated by subtracting from 100 the percentage of votes won by the largest party (the party which wins most votes) in parliamentary elections or by the party of the successful candidate in presidential elections. Depending on their importance, either parliamentary or presidential elections are used in the calculation of the variable, or both elections are used, with weights. If information on the distribution of votes is not available, or if the distribution does not portray the reality accurately, the distribution of parliamentary seats is used instead. If parliament members are elected but political parties are not allowed to take part in elections, it is assumed that one party has taken all votes or seats. In countries where parties are not banned but yet only independent candidates participate in elections, it is assumed that the share of the largest party is not over 30 percent.

2.17.6.184 Index of Democratization (van_index)

Long tag: qog_std_cs_van_index

Original tag: van_index

Description:
The index of democratization is formed by multiplying the competition and the participation variables and then dividing the outcome by 100.

2.17.6.185 Participation (van_part)

Long tag: qog_std_cs_van_part

Original tag: van_part

Description:
The political participation variable portrays the voting turnout in each election, and is calculated as the percentage of the total population who actually voted in the election. In the case of indirect elections, only votes cast in the final election are taken into account. If electors have not been elected by citizens, only the number of actual electors is taken into account, which means that the degree of participation drops to the value 0. If an election to choose electors has been held, the participation variable is calculated from the number and distribution of votes in that election. National referendums raise the variable value by five percent and state (regional) referendums by one percent for the year they are held. Referendums can add the degree of participation at maximum by 30 percent a year. The value of the combined degree of participation cannot be higher than 70 percent, even in cases where the sum of participation and referendums would be higher than 70.

2.17.6.186 Proportion of seats held by women in national parliaments (percent) (wdi_wip)

Long tag: qog_std_cs_wdi_wip

Original tag: wdi_wip

Description:
Women in parliaments are the percentage of parliamentary seats in a single or lower chamber held by women.

Variable citation: World Bank. (2021). World development indicators. `https://databank.worldbank.org/source/world-development-indicators`

2.17.6.187 Number of years the leader in office continuously (wgov_leadexp)

Long tag: qog_std_cs_wgov_leadexp

Original tag: wgov_leadexp

Description:
The number of years the person has been leader of the country in a row, continuous. Thus, it starts over if the leader is removed. The count starts at 1, when the leader first appear as leader in the dataset. Therefore, the measure is imprecise for leaders, who came to power before 1966.

2.17.6.188 Number of cabinet ministers (wgov_min)

Long tag: qog_std_cs_wgov_min

Original tag: wgov_min

Description:
Number of cabinet ministers. This number only include cabinet ministers.

Variable citation: Nyrup, J., & Bramwell, S. (2020). Who governs? a new global dataset on members of cabinets. *American Political Science Review*, 114(4), 1366–1374

2.17.6.189 Average age of cabinet members (wgov_minage)

Long tag: qog_std_cs_wgov_minage

Original tag: wgov_minage

Description:
Average age of cabinet ministers.

Variable citation: Nyrup, J., & Bramwell, S. (2020). Who governs? a new global dataset on members of cabinets. *American Political Science Review*, 114(4), 1366–1374

2.17.6.190 Number of women among cabinet ministers (wgov_minfem)

Long tag: qog_std_cs_wgov_minfem

Original tag: wgov_minfem

Description:
The number of women among cabinet ministers.

Variable citation: Nyrup, J., & Bramwell, S. (2020). Who governs? a new global dataset on members of cabinets. *American Political Science Review*, 114(4), 1366–1374

2.17.6.191 Average tenure of cabinet members (wgov_minten)

Long tag: qog_std_cs_wgov_minten

Original tag: wgov_minten

Description:
The average tenure of cabinet ministers.

Variable citation: Nyrup, J., & Bramwell, S. (2020). Who governs? a new global dataset on members of cabinets. *American Political Science Review*, 114(4), 1366–1374

2.17.6.192 Adjusted retention rate of cabinet members (wgov_mret)

Long tag: qog_std_cs_wgov_mret

Original tag: wgov_mret

Description:
The share of cabinet ministers, who where in the list of cabinet ministers for the previous year. This measure is adjusted for an expansion of number of cabinet members, so the number of cabinet ministers stays constant and the retention rate is therefore not influenced by an expansion of the cabinet.

Variable citation: Nyrup, J., & Bramwell, S. (2020). Who governs? a new global dataset on members of cabinets. *American Political Science Review*, 114(4), 1366–1374

2.17.6.193 Total number of government positions (inc. unoccupied and multiple positions hel (wgov_tot)

Long tag: qog_std_cs_wgov_tot

Original tag: wgov_tot

Description:
Number of entries for the country in the dataset. This number includes unoccupied positions and multiple positions held by the same persons.

Variable citation: Nyrup, J., & Bramwell, S. (2020). Who governs? a new global dataset on members of cabinets. *American Political Science Review*, 114(4), 1366–1374

2.17.6.194 Average age for all entries for the country in the dataset (wgov_totage)

Long tag: qog_std_cs_wgov_totage

Original tag: wgov_totage

Description:
Average age for people, based on all entries for the country in the dataset. This includes unoccupied positions and multiple positions held by the same persons.

Variable citation: Nyrup, J., & Bramwell, S. (2020). Who governs? a new global dataset on members of cabinets. *American Political Science Review*, 114(4), 1366–1374

2.17.6.195 Number of women in the total number of entries for the country in the dataset (wgov_totfem)

Long tag: qog_std_cs_wgov_totfem

Original tag: wgov_totfem

Description:
The number of women in the total number of entries for the country in the dataset. This includes unoccupied

positions and multiple positions held by the same persons.

Variable citation: Nyrup, J., & Bramwell, S. (2020). Who governs? a new global dataset on members of cabinets. *American Political Science Review*, 114(4), 1366–1374

2.17.6.196 Average tenure for all entries for the country in the dataset (wgov_totten)

Long tag: qog_std_cs_wgov_totten

Original tag: wgov_totten

Description:
The average tenure for people, based on all entries for the country in the dataset. This includes unoccupied positions and multiple positions held by the same persons.

Variable citation: Nyrup, J., & Bramwell, S. (2020). Who governs? a new global dataset on members of cabinets. *American Political Science Review*, 114(4), 1366–1374

2.17.6.197 Adjusted retention rate for all entries for the country in the dataset (wgov_tret)

Long tag: qog_std_cs_wgov_tret

Original tag: wgov_tret

Description:
The share of people in total number of entries for the country, who were also listed in the previous year. This measure is adjusted for an expansion of the size of total number of entries, so the number of entries for the country stays constant and the retention rate is therefore not influenced by an expansion of the total number of entries.

2.17.6.199 Year of election (yri_yoe)

Long tag: qog_std_cs_yri_yoe

Original tag: yri_yoe

Description:
Year of election

Variable citation: Sundström, A., & Stockemer, D. (2020). Conceptualizing, measuring, and explaining youths' relative absence in legislatures. *PS: Political Science and Politics*, 1–7. `https://doi.org/10.1017/S1049096520000906`

2.17.6.200 Youth Representation Index (35 years or younger) (yri_yri35)

Long tag: qog_std_cs_yri_yri35

Original tag: yri_yri35

Description:
The YRI 35 is a measure in which the percentage of youth in parliament - MPs ages 18 to 35 years - is divided by the proportion of youth (ages 18 to 35) within the eligible voting-age population and then multiplying by 100. A higher score on this measure indicates a larger correspondence between youth in the

population and their presence in parliaments. A score of 100 suggest that the share of young MPs is on par with the share of young people in voting-age youth in the population. A score of zero indicates that not a single individual Member of Parliament (MP) is considered to be young.

Variable citation: Sundström, A., & Stockemer, D. (2020). Conceptualizing, measuring, and explaining youths' relative absence in legislatures. *PS: Political Science and Politics*, 1–7. `https://doi.org/10.1017/S1049096520000906`

2.17.6.201 Youth Representation Index (40 years or younger) (yri_yri40)

Long tag: qog_std_cs_yri_yri40

Original tag: yri_yri40

Description:

The YRI 40 is a measure in which the percentage of youth in parliament - MPs ages 18 to 40 years - is divided by the proportion of youth (ages 18 to 40) within the eligible voting-age population and then multiplying by 100. A higher score on this measure indicates a larger correspondence between youth in the population and their presence in parliaments. A score of 100 suggest that the share of young MPs is on par with the share of young people in voting-age youth in the population. A score of zero indicates that not a single individual Member of Parliament (MP) is considered to be young.

Variable citation: Sundström, A., & Stockemer, D. (2020). Conceptualizing, measuring, and explaining youths' relative absence in legislatures. *PS: Political Science and Politics*, 1–7. `https://doi.org/10.1017/S1049096520000906`

2.17.7 History

This category includes variables related to historical phenomena or situations, for example colonial origin, legal origin and GDP per capita in the year 1500.

2.17.7.1 Log Settler Mortality (ajr_settmort)

Long tag: qog_std_cs_ajr_settmort

Original tag: ajr_settmort

Description:

Log of the mortality rate faced by European settlers at the time of colonization.

Note: The data for Ethiopia is used for both Ethiopia (-1992) and Ethiopia (1993-).

Variable citation: Acemoglu, D., Johnson, S., & Robinson, J. A. (2001). The colonial origins of comparative development: An empirical investigation. *The American Economic Review*, 91(5), 1369–1401

2.17.7.2 Colonial Origin (ht_colonial)

Long tag: qog_std_cs_ht_colonial

Original tag: ht_colonial

Description:

This is a tenfold classification of the former colonial ruler of the country. Following Bernard et al. (2004), we have excluded the British settler colonies (the US, Canada, Australia, Israel and New Zealand), and exclusively focused on "Western overseas" colonialism. This implies that only Western colonizers (e.g. excluding Japanese colonialism), and only countries located in the non-Western hemisphere "overseas" (e.g. excluding Ireland
Malta), have been coded. Each country that has been colonized since 1700 is coded. In cases of several colonial powers, the last one is counted, if it lasted for 10 years or longer. The categories are the following:

0. Never colonized by a Western overseas colonial power
1. Dutch
2. Spanish
3. Italian
4. US
5. British
6. French
7. Portuguese
8. Belgian
9. British-French
10. Australian

Variable citation: Wahman, M., Teorell, J., & Hadenius, A. (2013). Institutional stepping stones for democracy: How and why multipartyism enhances democratic change. *Democratization*, 25(1), 78–97

2.17.7.3 Religion: Catholic (lp_catho80)

Long tag: qog_std_cs_lp_catho80

Original tag: lp_catho80

Description:
Religion: Catholic: Catholics as percentage of population in 1980.

Variable citation: Porta, R. L., Lopez-de-Silanes, F., Shleifer, A., & Vishny, R. (1999). The quality of government. *Journal of Law, Economics, and Organization*, 15(1), 222–279

2.17.7.4 Latitude (lp_lat_abst)

Long tag: qog_std_cs_lp_lat_abst

Original tag: lp_lat_abst

Description:
Latitude: The absolute value of the latitude of the capital city, divided by 90 (to take values between 0 and 1).

Variable citation: Porta, R. L., Lopez-de-Silanes, F., Shleifer, A., & Vishny, R. (1999). The quality of government. *Journal of Law, Economics, and Organization*, 15(1), 222–279

2.17.7.5 Legal Origin (lp_legor)

Long tag: qog_std_cs_lp_legor

Original tag: lp_legor

Description:
Legal origin: Identifies the legal origin of the Company Law or Commercial code of each country. There are five possible origins:
1. English Common Law
2. French Commercial Code
3. Socialist/Communist Laws
4. German Commercial Code
5. Scandinavian Commercial Code

Variable citation: Porta, R. L., Lopez-de-Silanes, F., Shleifer, A., & Vishny, R. (1999). The quality of government. *Journal of Law, Economics, and Organization*, 15(1), 222–279

2.17.7.6 Religion: Muslim (lp_muslim80)

Long tag: qog_std_cs_lp_muslim80

Original tag: lp_muslim80

Description:
Religion: Muslim: Muslims as percentage of population in 1980.

Variable citation: Porta, R. L., Lopez-de-Silanes, F., Shleifer, A., & Vishny, R. (1999). The quality of government. *Journal of Law, Economics, and Organization*, 15(1), 222–279

2.17.7.7 Religion: Other Denomination (lp_no_cpm80)

Long tag: qog_std_cs_lp_no_cpm80

Original tag: lp_no_cpm80

Description:
Religion: Other Denomination: Percentage of population belonging to other denominations in 1980. Defined as 100 - lp_catho80 - lp_muslim80 - lp_protmg80.

Variable citation: Porta, R. L., Lopez-de-Silanes, F., Shleifer, A., & Vishny, R. (1999). The quality of government. *Journal of Law, Economics, and Organization*, 15(1), 222–279

2.17.7.8 Religion: Protestant (lp_protmg80)

Long tag: qog_std_cs_lp_protmg80

Original tag: lp_protmg80

Description:
Religion: Protestant: Protestants as percentage of population in 1980.

Variable citation: Porta, R. L., Lopez-de-Silanes, F., Shleifer, A., & Vishny, R. (1999). The quality of government. *Journal of Law, Economics, and Organization*, 15(1), 222–279

2.17.7.9 State History Index, with the discounting rates 0percent (sai_statehiste0)

Long tag: qog_std_cs_sai_statehiste0

Original tag: sai_statehiste0

Description:
State History Index. Discounted values of the overall country indicators with the discounting rates 0percent.

Variable citation: Borcan, O., Olsson, O., & Putterman, L. (2018). State history and economic development: Evidence from six millennia. *Journal of Economic Growth* 23(1): 1-40. `https://sites.google.com/site/econolaols/extended-state-history-index`

2.17.7.10 State History Index, with the discounting rates 1percent (sai_statehiste01)

Long tag: qog_std_cs_sai_statehiste01

Original tag: sai_statehiste01

Description:
State History Index. Discounted values of the overall country indicators with the discounting rates 1percent.

Variable citation: Borcan, O., Olsson, O., & Putterman, L. (2018). State history and economic development: Evidence from six millennia. *Journal of Economic Growth* 23(1): 1-40. `https://sites.google.com/site/econolaols/extended-state-history-index`

2.17.7.11 State History Index, with the discounting rates 10percent (sai_statehiste1)

Long tag: qog_std_cs_sai_statehiste1

Original tag: sai_statehiste1

Description:
State History Index. Discounted values of the overall country indicators with the discounting rates 10percent.

Variable citation: Borcan, O., Olsson, O., & Putterman, L. (2018). State history and economic development: Evidence from six millennia. *Journal of Economic Growth* 23(1): 1-40. `https://sites.google.com/site/econolaols/extended-state-history-index`

2.17.7.12 Normalized Values State History Index, with the discounting rates 0percent (sai_statehisten0)

Long tag: qog_std_cs_sai_statehisten0

Original tag: sai_statehisten0

Description:
Normalized Values State History Index, with the discounting rates 0percent.

Variable citation: Borcan, O., Olsson, O., & Putterman, L. (2018). State history and economic development: Evidence from six millennia. *Journal of Economic Growth* 23(1): 1-40. `https://sites.google.com/site/econolaols/extended-state-history-index`

2.17.7.13 Normalized Values State History Index, with the discounting rates 1percent (sai_statehisten01)

Long tag: qog_std_cs_sai_statehisten01

Original tag: sai_statehisten01

Description:
Normalized Values State History Index, with the discounting rates 1percent.

Variable citation: Borcan, O., Olsson, O., & Putterman, L. (2018). State history and economic development: Evidence from six millennia. *Journal of Economic Growth* 23(1): 1-40. `https://sites.google.com/site/econolaols/extended-state-history-index`

2.17.7.14 Normalized Values State History Index, with the discounting rates 10percent (sai_statehisten1)

Long tag: qog_std_cs_sai_statehisten1

Original tag: sai_statehisten1

Description:
Normalized Values State History Index, with the discounting rates 10percent.

Variable citation: Borcan, O., Olsson, O., & Putterman, L. (2018). State history and economic development: Evidence from six millennia. *Journal of Economic Growth* 23(1): 1-40. `https://sites.google.com/site/econolaols/extended-state-history-index`

2.17.7.15 Log Total Slave Export (Normalized by Land Area) (slavet_lnexparea)

Long tag: qog_std_cs_slavet_lnexparea

Original tag: slavet_lnexparea

Description:
Total number of slaves taken from each country during the four slave trades between 1400 and 1900 normalized by land area.

Variable citation: Nunn, N. (2008). The long term effects of africa's slave trades. *Quarterly Journal of Economics*, 123, 139–176

2.17.7.16 Log Total Slave Export (Normalized by Historic Population) (slavet_lnexppop)

Long tag: qog_std_cs_slavet_lnexppop

Original tag: slavet_lnexppop

Description:
Total number of slaves taken from each country during the four slave trades between 1400 and 1900 normalized by average population.

Variable citation: Nunn, N. (2008). The long term effects of africa's slave trades. *Quarterly Journal of Economics*, 123, 139–176

2.17.8 Civil Society, Population and Culture

This category includes variables related to civil society, population, and culture such as general demographics, general sentiments, birth and death rates, ethnic groups, and others.

2.17.8.1 Ethnic Fractionalization in the year 2000 (al_ethnic2000)

Long tag: qog_std_cs_al_ethnic2000

Original tag: al_ethnic2000

Description:
Ethnic Fractionalization in the year 2000. The definition of ethnicity involves a combination of racial and linguistic characteristics. The result is a higher degree of fractionalization than the commonly used ELF-index (see el_elf60) in for example Latin America, where people of many races speak the same language.

Variable citation: Alesina, A., Devleeschauwer, A., Easterly, W., Kurlat, S., & Wacziarg, R. (2003). Fractionalization [O. Galor (ed.) (2011), Inequality and Economic Development: The Modern Perspective, Edward Elgar, UK.]. *Journal of Economic Growth*, 8(2), 155–194

2.17.8.2 Language Fractionalization in the year 2000 (al_language2000)

Long tag: qog_std_cs_al_language2000

Original tag: al_language2000

Description:
Linguistic Fractionalization in the year 2000. Reflects probability that two randomly selected people from a given country will not belong to the same linguistic group. The higher the number, the more fractionalized society.

Variable citation: Alesina, A., Devleeschauwer, A., Easterly, W., Kurlat, S., & Wacziarg, R. (2003). Fractionalization [O. Galor (ed.) (2011), Inequality and Economic Development: The Modern Perspective, Edward Elgar, UK.]. *Journal of Economic Growth*, 8(2), 155–194

2.17.8.3 Religion Fractionalization in the year 2000 (al_religion2000)

Long tag: qog_std_cs_al_religion2000

Original tag: al_religion2000

Description:
Religious Fractionalization in the year 2000. Reflects probability that two randomly selected people from a given country will not belong to the same religious group. The higher the number, the more fractionalized society.

Variable citation: Alesina, A., Devleeschauwer, A., Easterly, W., Kurlat, S., & Wacziarg, R. (2003). Fractionalization [O. Galor (ed.) (2011), Inequality and Economic Development: The Modern Perspective, Edward Elgar, UK.]. *Journal of Economic Growth*, 8(2), 155–194

2.17.8.4 Associational/Assembly Rights (bti_aar)

Long tag: qog_std_cs_bti_aar

Original tag: bti_aar

Description:
To what extent can individuals form and join independent political or civic groups? To what extent can these

groups operate and assemble freely? 1-10.

1. Association and assembly rights are denied. Independent civic groups do not exist or are prohibited.
4. Association and assembly rights are severely limited. Oppositional political groups with any relevance are prohibited or systematically disabled. Independent civic groups can operate and assemble if they support the regime or are not outspokenly critical of it.
7. Association and assembly rights are partially limited, but generally there are no outright prohibitions of independent political or civic groups.
10. Association and assembly rights are unrestricted for individuals and independent political or civic groups within the basic democratic order.

Variable citation: Donner, S., Hartmann, H., & Schwarz, R. (2020). *Transformation index of the bertelsmann stiftung 2020*. Bertelsmann Stiftung. `http://www.bti-project.org`

2.17.8.5 Conflict Intensity (bti_ci)

Long tag: qog_std_cs_bti_ci

Original tag: bti_ci

Description:
How serious are social, ethnic and religious conflicts? 1-10.

1. There are no violent incidents based on social, ethnic or religious differences.
4. There are only few violent incidents. Radical political actors have limited success in mobilizing along existing cleavages. Society and the political elite, however, are divided along social, ethnic or religious lines.
7. There are violent incidents. Mobilized groups and protest movements dominate politics. Society and the political elite are deeply split into social classes, ethnic or religious communities.
10. There is civil war or a widespread violent conflict based on social, ethnic or religious differences.

Variable citation: Donner, S., Hartmann, H., & Schwarz, R. (2020). *Transformation index of the bertelsmann stiftung 2020*. Bertelsmann Stiftung. `http://www.bti-project.org`

2.17.8.6 Civil Society Participation (bti_csp)

Long tag: qog_std_cs_bti_csp

Original tag: bti_csp

Description:
To what extent does the political leadership enable the participation of civil society in the political process? 1-10.

1. The political leadership obstructs civil society participation. It suppresses civil society organizations and excludes its representatives from the policy process.
4. The political leadership neglects civil society participation. It frequently ignores civil society actors and formulates its policy autonomously.
7. The political leadership permits civil society participation. It takes into account and accommodates the interests of most civil society actors.
10. The political leadership actively enables civil society participation. It assigns an important role to civil society actors in deliberating and determining policies.

Variable citation: Donner, S., Hartmann, H., & Schwarz, R. (2020). *Transformation index of the bertelsmann stiftung 2020*. Bertelsmann Stiftung. `http://www.bti-project.org`

2.17.8.7 Civil Society Traditions (bti_cst)

Long tag: qog_std_cs_bti_cst

Original tag: bti_cst

Description:
To what extent are there traditions of civil society? 1-10.

1. Traditions of civil society are very strong.
4. Traditions of civil society are fairly strong.
7. Traditions of civil society are fairly weak.
10. Traditions of civil society are very weak.

Variable citation: Donner, S., Hartmann, H., & Schwarz, R. (2020). *Transformation index of the bertelsmann stiftung 2020*. Bertelsmann Stiftung. `http://www.bti-project.org`

2.17.8.8 Equal Opportunity (bti_eo)

Long tag: qog_std_cs_bti_eo

Original tag: bti_eo

Description:

To what extent does equality of opportunity exist? 1-10.

1. Equality of opportunity is not achieved. Women and/or members of ethnic or religious groups have only very limited access to education, public office and employment. There are no legal provisions against discrimination.
4.Equality of opportunity is only partially achieved. Women and/or members of ethnic, religious and other groups have limited access to education, public office and employment. There are some legal provisions against discrimination, but their implementation is highly deficient.
7. Equality of opportunity is largely achieved. Women and members of ethnic or religious groups have near-equal access to education, public office and employment. There are a number of legal provisions against discrimination, but their implementation is at times insufficient.
10. Equality of opportunity is achieved. Women and members of ethnic or religious groups have equal access to education, public office and employment. There is a comprehensive and effective legal and institutional framework for the protection against discrimination.

Variable citation: Donner, S., Hartmann, H., & Schwarz, R. (2020). *Transformation index of the bertelsmann stiftung 2020*. Bertelsmann Stiftung. `http://www.bti-project.org`

2.17.8.9 Interest Groups (bti_ig)

Long tag: qog_std_cs_bti_ig

Original tag: bti_ig

Description:

To what extent is there a network of cooperative associations or interest groups to mediate between society and the political system? 1-10.

1. Interest groups are present only in isolated social segments, are on the whole poorly balanced and cooperate little. A large number of social interests remain unrepresented.
4. There is a narrow range of interest groups, in which important social interests are underrepresented. Only a few players dominate, and there is a risk of polarization.
7. There is an average range of interest groups, which reflect most social interests. However, a few strong interests dominate, producing a latent risk of pooling conflicts.
10. There is a broad range of interest groups that reflect competing social interests, tend to balance one another and are cooperative.

Variable citation: Donner, S., Hartmann, H., & Schwarz, R. (2020). *Transformation index of the bertelsmann stiftung 2020*. Bertelsmann Stiftung. `http://www.bti-project.org`

2.17.8.10 Political Participation (bti_pp)

Long tag: qog_std_cs_bti_pp

Original tag: bti_pp

Description:

Political Participation: The populace decides who rules, and it has other political freedoms 1-10. Higher scores refer better conditions of political participation and other political freedoms.

Variable citation: Donner, S., Hartmann, H., & Schwarz, R. (2020). *Transformation index of the bertelsmann stiftung 2020*. Bertelsmann Stiftung. `http://www.bti-project.org`

2.17.8.11 Political and Social Integration (bti_psi)

Long tag: qog_std_cs_bti_psi

Original tag: bti_psi

Description:

Political and Social Integration: Stable patterns of representation exist for mediating between society and the state; there is also a consolidated civic culture 1-10.

Variable citation: Donner, S., Hartmann, H., & Schwarz, R. (2020). *Transformation index of the bertelsmann stiftung 2020*. Bertelsmann Stiftung. `http://www.bti-project.org`

2.17.8.12 Social Capital (bti_sc)

Long tag: qog_std_cs_bti_sc

Original tag: bti_sc

Description:

Social Capital: To what extent have social self-organization and the construction of social capital advanced? This question aims to assess the level of trust between citizens, which fosters cooperation and mutual support for purposes of self-help, rather than primarily to further political objectives.

1. There is a very low level of trust among the population, and civic self-organization is rudimentary.
4. There is a fairly low level of trust among the population. The small number of autonomous, self-organized

groups, associations and organizations is unevenly distributed or spontaneous and temporary.
7. There is a fairly high level of trust among the population and a substantial number of autonomous, self-organized groups, associations and organizations.
10. There is a very high level of trust among the population and a large number of autonomous, self-organized groups, associations and organizations.

Variable citation: Donner, S., Hartmann, H., & Schwarz, R. (2020). *Transformation index of the bertelsmann stiftung 2020*. Bertelsmann Stiftung. `http://www.bti-project.org`

2.17.8.13 Socio-Economic Barriers (bti_seb)

Long tag: qog_std_cs_bti_seb

Original tag: bti_seb

Description:
To what extent are significant parts of the population fundamentally excluded from society due to poverty and inequality? 1-10.

1. Poverty and inequality are extensive and structurally ingrained.
4. Poverty and inequality are pronounced and partly structurally ingrained.
7. Poverty and inequality are limited and barely structurally ingrained.
10. Poverty and inequality are minor and not structurally ingrained.

Variable citation: Donner, S., Hartmann, H., & Schwarz, R. (2020). *Transformation index of the bertelsmann stiftung 2020*. Bertelsmann Stiftung. `http://www.bti-project.org`

2.17.8.14 State Identity (bti_si)

Long tag: qog_std_cs_bti_si

Original tag: bti_si

Description:
To what extent do all relevant groups in society agree about citizenship and accept the nation-state as legitimate? 1-10.

1. The legitimacy of the nation-state is questioned fundamentally. Different population groups compete for hegemony and deny citizenship to others.
4. The legitimacy of the nation-state is frequently challenged. Significant aspects of citizenship are withheld from entire population groups.
7. The legitimacy of the nation-state is rarely questioned. Some groups are denied full citizenship rights.
10. The large majority of the population accepts the nation-state as legitimate. All individuals and groups enjoy the right to acquire citizenship without discrimination.

Variable citation: Donner, S., Hartmann, H., & Schwarz, R. (2020). *Transformation index of the bertelsmann stiftung 2020*. Bertelsmann Stiftung. `http://www.bti-project.org`

2.17.8.15 Right to Marry in Constitution (ccp_marriage)

Long tag: qog_std_cs_ccp_marriage

Original tag: ccp_marriage

Description:
Does the constitution provide for the right to marry?

1. Yes, general provision
2. Yes, marriage allowed between a man and a woman
3. No
90. Left explicitly to non-constitution law
96. Other

Variable citation: Elkins, Z., & Ginsburg, T. (2021). Characteristics of national constitutions, version 3.0 [Last modified: May 20, 2021. Available at comparativeconstitutionsproject.org]. `http://www.comparativeconstitutionsproject.org`

2.17.8.16 Right to Same-Sex Marriages in Constitution (ccp_samesexm)

Long tag: qog_std_cs_ccp_samesexm

Original tag: ccp_samesexm

Description:
Does the constitution provide the right for same sex marriages?

1. Yes
2. No
96. Other

Variable citation: Elkins, Z., & Ginsburg, T. (2021). Characteristics of national constitutions, version 3.0 [Last modified: May 20, 2021. Available at comparativeconstitutionsproject.org]. http://www.comparativeconstitutionsproject.org

2.17.8.17 Social Globalization (dr_sg)

Long tag: qog_std_cs_dr_sg

Original tag: dr_sg

Description:

Social globalization (scale of 1 to 100) is comprised of three segments, each with its own de facto and de jure segment. Interpersonal contact is measured within the de facto segment with reference to international telephone connections, tourist numbers and migration. Within the de jure segment, it is measured with reference to telephone subscriptions, international airports and visa restrictions. Flows of information are determined within the de facto segment with reference to international patent applications, international students and trade in high technology goods. The de jure segment measures access to TV and the internet, freedom of the press and international internet connections. Cultural proximity is measured in the de facto segment from trade in cultural goods, international trade mark registrations and the number of McDonald's restaurants and IKEA stores. The de jure area focuses on civil rights (freedom of citizens), gender equality and public spending on school education.

Variable citation: Gygli, S., Haelg, F., Potrafke, N., & Sturm, J.-E. (2019). The KOF Globalisation Index - Revisited. https://doi.org/10.1007/s11558-019-09344-2 Dreher, A. (2006). Does globalization affect growth? evidence from a new index of globalization. *Applied Economics*, 38(10), 1091–1110

2.17.8.18 Trust in Other People (ess_trpeople)

Long tag: qog_std_cs_ess_trpeople

Original tag: ess_trpeople

Description:

Generally speaking, would you say that most people can be trusted, or that you can't be too careful in dealing with people? Please tell me on a score of 0 to 10, where 0 means you can't be too careful and 10 means that most people can be trusted.

2.17.8.38 Severe material deprivation rate (Total) (eu_povmatdepr)

Long tag: qog_std_cs_eu_povmatdepr

Original tag: eu_povmatdepr

Description:
Severe material deprivation rate (Total)

Variable citation: European Commission. (2021). Eurostat. `http://ec.europa.eu/eurostat/data/database`

2.17.8.39 percent of people under 60(y) living in households w. very low work intensity (eu_povpoplwoin)

Long tag: qog_std_cs_eu_povpoplwoin

Original tag: eu_povpoplwoin

Description:
Percentage of people under 60 years old living in households with very low work intensity

Variable citation: European Commission. (2021). Eurostat. `http://ec.europa.eu/eurostat/data/database`

2.17.8.40 Cultural Diversity (fe_cultdiv)

Long tag: qog_std_cs_fe_cultdiv

Original tag: fe_cultdiv

Description:
This measure modifies fractionalization (fe_etfra) so as to take some account of cultural distances between groups, measured as the structural distance between languages spoken by different groups in a country. If the groups in a country speak structurally unrelated languages, their cultural diversity index will be the same as their level of ethnic fractionalization (fe_etfra). The more similar are the languages spoken by different ethnic groups, however, the more will this measure be reduced below the level of ethnic fractionalization for that country. The values are assumed to be constant for all years.

Variable citation: Fearon, J. D. (2003). Ethnic and cultural diversity by country. *Journal of Economic Growth*, 8(2), 195–222

2.17.8.41 Ethnic Fractionalization (fe_etfra)

Long tag: qog_std_cs_fe_etfra

Original tag: fe_etfra

Description:
Restricting attention to groups that had at least 1 percent of country population in the 1990s, Fearon identifies 822 ethnic and "ethnoreligious" groups in 160 countries. This variable reflects the probability that two randomly selected people from a given country will belong to different such groups. The variable thus ranges from 0 (perfectly homogeneous) to 1 (highly fragmented). The values are assumed to be constant for all years.

Variable citation: Fearon, J. D. (2003). Ethnic and cultural diversity by country. *Journal of Economic Growth*, 8(2), 195–222

2.17.8.42 Largest Minority (fe_lmin)

Long tag: qog_std_cs_fe_lmin

Original tag: fe_lmin

Description:
Based on the same set of groups, this variable reflects the population share of the second largest group (largest minority). The values are assumed to be constant for all years.

Variable citation: Fearon, J. D. (2003). Ethnic and cultural diversity by country. *Journal of Economic Growth*, 8(2), 195–222

2.17.8.43 Plurality Group (fe_plural)

Long tag: qog_std_cs_fe_plural

Original tag: fe_plural

Description:
Based on the same set of groups, this variable reflects the population share of the largest group (plurality group) in the country. The values are assumed to be constant for all years.

Variable citation: Fearon, J. D. (2003). Ethnic and cultural diversity by country. *Journal of Economic Growth*, 8(2), 195–222

2.17.8.44 Feel personally obliged to report corruption: agree (percent respondents) (gcb_orcag)

Long tag: qog_std_cs_gcb_orcag

Original tag: gcb_orcag

Description:

Percentage of respondents who answered 'Agree' to the following question: Would you agree or disagree with the following statement: If I would witness an act of corruption, I would feel personally obliged to report it.

Variable citation: Transparency International (2017). Global corruption barometer 9th edition. `https://www.transparency.org/research/gcb`

2.17.8.45 Feel personally obliged to report corruption: disagree (percent respondents) (gcb_orcdis)

Long tag: qog_std_cs_gcb_orcdis

Original tag: gcb_orcdis

Description:

Percentage of respondents who answered 'Disagree' to the following question: Would you agree or disagree with the following statement: If I would witness an act of corruption, I would feel personally obliged to report it.

Variable citation: Transparency International (2017). Global corruption barometer 9th edition. `https://www.transparency.org/research/gcb`

2.17.8.46 Can people fight aganist corruption: agree (percent respondents) (gcb_pfcaag)

Long tag: qog_std_cs_gcb_pfcaag

Original tag: gcb_pfcaag

Description:

Percentage of respondents who answered 'Agree' to the following question: Would you agree or disagree with the following statement: Ordinary people can make a difference in the fight against corruption.

Variable citation: Transparency International (2017). Global corruption barometer 9th edition. `https://www.transparency.org/research/gcb`

2.17.8.47 Can people fight aganist corruption: disagree (percent respondents) (gcb_pfcdis)

Long tag: qog_std_cs_gcb_pfcdis

Original tag: gcb_pfcdis

Description:

Percentage of respondents who answered 'Disagree' to the following question: Would you agree or disagree with the following statement: Ordinary people can make a difference in the fight against corruption.

Variable citation: Transparency International (2017). Global corruption barometer 9th edition. `https://www.transparency.org/research/gcb`

2.17.8.48 Is socially acceptable to report corruption: agree (percent respondents) (gcb_sarcag)

Long tag: qog_std_cs_gcb_sarcag

Original tag: gcb_sarcag

Description:

Percentage of respondents who answered 'Agree' to the following question: Would you agree or disagree with the following statement: In our society it is generally acceptable for people to report a case of corruption they witness.

Variable citation: Transparency International (2017). Global corruption barometer 9th edition. `https://www.transparency.org/research/gcb`

2.17.8.49 Is socially acceptable to report corruption: disagree (percent respondents) (gcb_sarcdis)

Long tag: qog_std_cs_gcb_sarcdis

Original tag: gcb_sarcdis

Description:

Percentage of respondents who answered 'Disagree' to the following question: Would you agree or disagree with the following statement: In our society it is generally acceptable for people to report a case of corruption

they witness.

Variable citation: Transparency International (2017). Global corruption barometer 9th edition. `https://www.transparency.org/research/gcb`

2.17.8.50 Would spend a whole day in court to give evidence: agree (percent respondents) (gcb_wsdag)

Long tag: qog_std_cs_gcb_wsdag

Original tag: gcb_wsdag

Description:

Percentage of respondents who answered 'Agree' to the following question: Would you agree or disagree with the following statement: I would report a case of corruption even if I would have to spend a day in court to give evidence.

Variable citation: Transparency International (2017). Global corruption barometer 9th edition. `https://www.transparency.org/research/gcb`

2.17.8.51 Would spend a whole day in court to give evidence: disagree (percent respondents) (gcb_wsddis)

Long tag: qog_std_cs_gcb_wsddis

Original tag: gcb_wsddis

Description:

Percentage of respondents who answered 'Disagree' to the following question: Would you agree or disagree with the following statement: I would report a case of corruption even if I would have to spend a day in court to give evidence.

Variable citation: Transparency International (2017). Global corruption barometer 9th edition. `https://www.transparency.org/research/gcb`

2.17.8.52 Overall Global Gender Gap Index (gggi_ggi)

Long tag: qog_std_cs_gggi_ggi

Original tag: gggi_ggi

Description:

The Global Gender Gap Index (0 to 1, where 1 indicates no gap) examines the gap between men and women in four fundamental categories (subindexes): Economic Participation and Opportunity, Educational Attainment, Health and Survival and Political Empowerment.

Variable citation: World Economic Forum. (2021). The global gender gap report 2021 [All Rights Reserved]. `https://www.weforum.org/reports/ab6795a1-960c-42b2-b3d5-587eccda6023`

2.17.8.53 Displaced people (1-5 Higher displacement) (gpi_dic)

Long tag: qog_std_cs_gpi_dic

Original tag: gpi_dic

Description:

Refugees by territory of origin (starting in 2010 this indicator also includes the number of internally displaced people by country) as percentage of the country's total population. Sclaed 1 to 5, 5 being a higher percentage of internal displacement. Source: UNHCR Statistical Yearbook and Internal Displacement Monitoring Center.
