Summary of Table of Contents

1 Explanatory Notes	48
1.1 Release Notes v2	48
1.2 New in Demscore version 2	48
1.3 The Demscore Codebook	49
1.4 Methodology	49
1.5 Citations	49
1.6 Missing Data	49
1.7 Download ID	50
1.8 Unit Identifier Variables	50
2 V-DEM	51
2.1 V-Dem Country-Date v13	51
2.1.1 Identifier Variables in the V-Dem Datasets	51
2.1.2 V-Dem Democracy Indices - V-Dem High-Level Democracy Indices	56
2.1.3 V-Dem Democracy Indices - V-Dem Mid-Level Indices: Components of the Democracy Indices	59
2.1.4 V-Dem Indicators - Elections	73
2.1.5 V-Dem Indicators - Political Parties	117
2.1.6 V-Dem Indicators - Direct Democracy	124
2.1.7 V-Dem Indicators - The Executive	139
2.1.8 V-Dem Indicators - The Legislature	178
2.1.9 V-Dem Indicators - Deliberation	195
2.1.10 V-Dem Indicators - The Judiciary	199
2.1.11 V-Dem Indicators - Civil Liberty	209
2.1.12 V-Dem Indicators - Sovereignty and State	224
2.1.13 V-Dem Indicators - Civil Society	231
2.1.14 V-Dem Indicators - The Media	237
2.1.15 V-Dem Indicators - Political Equality	243
2.1.16 V-Dem Indicators - Exclusion	248
2.1.17 V-Dem Indicators - Legitimation	261
2.1.18 V-Dem Indicators - Civic and Academic Space	264
2.1.19 Historical V-Dem - Elections	277
2.1.20 Historical V-Dem - Political Parties	294
2.1.21 Historical V-Dem - The Legislature	297
2.1.22 Historical V-Dem - The Judiciary	301
2.1.23 Historical V-Dem - Civil Liberty	301
2.1.24 Historical V-Dem - Sovereignty and State	303
2.1.25 Historical V-Dem - Political Equality	309
2.1.26 Historical V-Dem - Historical V-Dem Modified	312
2.1.27 Historical V-Dem - Overlap Period Discrepancies	330
2.1.28 Other Indices Created Using V-Dem Data - Neopatrimonialism	341
2.1.29 Other Indices Created Using V-Dem Data - Civil Liberties	344
2.1.30 Other Indices Created Using V-Dem Data - Exclusion	346
2.1.31 Other Indices Created Using V-Dem Data - Corruption	349
2.1.32 Other Indices Created Using V-Dem Data - Women's Empowerment	351
2.1.33 Other Indices Created Using V-Dem Data - Rule of Law	353
2.1.34 Other Indices Created Using V-Dem Data - Direct Democracy	354

2.1.35	Other Indices Created Using V-Dem Data - Civil Society	360
2.1.36	Other Indices Created Using V-Dem Data - Elections	361
2.1.37	Other Indices Created Using V-Dem Data - Consensual Democracy Dimensions	369
2.1.38	Other Indices Created Using V-Dem Data - Academic Freedom	370
2.1.39	Digital Society Survey - Coordinated Information Operations	370
2.1.40	Digital Society Survey - Digital Media Freedom	375
2.1.41	Digital Society Survey - State Internet Regulation Capacity and Approach . .	381
2.1.42	Digital Society Survey - Online Media Polarization	386
2.1.43	Digital Society Survey - Social Cleavages	388
2.1.44	Varieties of Indoctrination	394
2.2	V-Dem Coder-Level v13	395
2.2.1	Identifier Variables in the V-Dem Datasets	395
2.2.2	V-Dem Indicators - Civic and Academic Space	396
2.2.3	V-Dem Indicators - Civil Liberty	407
2.2.4	V-Dem Indicators - Exclusion	422
2.2.5	V-Dem Indicators - Civil Society	435
2.2.6	V-Dem Indicators - Deliberation	442
2.2.7	V-Dem Indicators - Elections	447
2.2.8	V-Dem Indicators - The Executive	462
2.2.9	V-Dem Indicators - Legitimation	484
2.2.10	V-Dem Indicators - The Judiciary	487
2.2.11	V-Dem Indicators - The Legislature	494
2.2.12	V-Dem Indicators - The Media	501
2.2.13	V-Dem Indicators - Political Equality	507
2.2.14	V-Dem Indicators - Political Parties	511
2.2.15	Digital Society Survey - Social Cleavages	518
2.2.16	Digital Society Survey - State Internet Regulation Capacity and Approach . .	524
2.2.17	Digital Society Survey - Coordinated Information Operations	529
2.2.18	Digital Society Survey - Digital Media Freedom	533
2.2.19	Digital Society Survey - Online Media Polarization	539
2.2.20	V-Dem Indicators - Sovereignty and State	542
2.2.21	Historical V-Dem - Civil Liberty	548
2.2.22	Historical V-Dem - Elections	548
2.2.23	Historical V-Dem - Political Equality	553
2.2.24	Historical V-Dem - The Legislature	554
2.2.25	Historical V-Dem - Historical V-Dem Modified	557
2.2.26	Historical V-Dem - Political Parties	563
2.2.27	Historical V-Dem - Sovereignty and State	564
2.2.28	Varieties of Indoctrination	565
2.3	V-Dem Country-Year: V-Dem Full+Others v13	583
2.3.1	Identifier Variables in the V-Dem Datasets	584
2.3.2	V-Dem Democracy Indices - V-Dem High-Level Democracy Indices	588
2.3.3	V-Dem Democracy Indices - V-Dem Mid-Level Indices: Components of the Democracy Indices	592
2.3.4	V-Dem Indicators - Elections	606
2.3.5	V-Dem Indicators - Political Parties	649
2.3.6	V-Dem Indicators - Direct Democracy	656
2.3.7	V-Dem Indicators - The Executive	671

2.3.8	V-Dem Indicators - The Legislature	710
2.3.9	V-Dem Indicators - Deliberation	727
2.3.10	V-Dem Indicators - The Judiciary	731
2.3.11	V-Dem Indicators - Civil Liberty	741
2.3.12	V-Dem Indicators - Sovereignty and State	756
2.3.13	V-Dem Indicators - Civil Society	763
2.3.14	V-Dem Indicators - The Media	769
2.3.15	V-Dem Indicators - Political Equality	775
2.3.16	V-Dem Indicators - Exclusion	780
2.3.17	V-Dem Indicators - Legitimation	793
2.3.18	V-Dem Indicators - Civic and Academic Space	796
2.3.19	Historical V-Dem - Elections	809
2.3.20	Historical V-Dem - Political Parties	826
2.3.21	Historical V-Dem - The Legislature	829
2.3.22	Historical V-Dem - The Judiciary	833
2.3.23	Historical V-Dem - Civil Liberty	833
2.3.24	Historical V-Dem - Sovereignty and State	835
2.3.25	Historical V-Dem - Political Equality	841
2.3.26	Historical V-Dem - Historical V-Dem Modified	844
2.3.27	Historical V-Dem - Overlap Period Discrepancies	862
2.3.28	Other Indices Created Using V-Dem Data - Regimes of the World (RoW)	873
2.3.29	Other Indices Created Using V-Dem Data - Accountability	876
2.3.30	Other Indices Created Using V-Dem Data - Executive Bases of Power	879
2.3.31	Other Indices Created Using V-Dem Data - Neopatrimonialism	883
2.3.32	Other Indices Created Using V-Dem Data - Civil Liberties	886
2.3.33	Other Indices Created Using V-Dem Data - Exclusion	888
2.3.34	Other Indices Created Using V-Dem Data - Corruption	891
2.3.35	Other Indices Created Using V-Dem Data - Women's Empowerment	893
2.3.36	Other Indices Created Using V-Dem Data - Rule of Law	895
2.3.37	Other Indices Created Using V-Dem Data - Direct Democracy	896
2.3.38	Other Indices Created Using V-Dem Data - Civil Society	902
2.3.39	Other Indices Created Using V-Dem Data - Elections	903
2.3.40	Other Indices Created Using V-Dem Data - Party Institutionalization	911
2.3.41	Other Indices Created Using V-Dem Data - Consensual Democracy Dimensions	911
2.3.42	Other Indices Created Using V-Dem Data - Academic Freedom	913
2.3.43	Digital Society Survey - Coordinated Information Operations	914
2.3.44	Digital Society Survey - Digital Media Freedom	918
2.3.45	Digital Society Survey - State Internet Regulation Capacity and Approach	924
2.3.46	Digital Society Survey - Online Media Polarization	929
2.3.47	Digital Society Survey - Social Cleavages	932
2.3.48	Other Democracy Indices and Indicators - Ordinal Versions of Indices	937
2.3.49	Other Democracy Indices and Indicators - Political Regimes	958
2.3.50	Other Democracy Indices and Indicators - Freedom House	959
2.3.51	Other Democracy Indices and Indicators - World Bank Governance Indicators	961
2.3.52	Other Democracy Indices and Indicators - Lexical Index of Electoral Democracy	963
2.3.53	Other Democracy Indices and Indicators - Unified Democracy Score	964
2.3.54	Other Democracy Indices and Indicators - Political Institutions and Political Events	964

2.3.55	Other Democracy Indices and Indicators - Polity5	966
2.3.56	Other Democracy Indices and Indicators - Others	969
2.3.57	Background Factors (E) - Education	971
2.3.58	Background Factors (E) - Geography	972
2.3.59	Background Factors (E) - Economics	974
2.3.60	Background Factors (E) - Natural Resource Wealth	976
2.3.61	Background Factors (E) - Infrastructure	977
2.3.62	Background Factors (E) - Demography	978
2.3.63	Background Factors (E) - Conflict	981
2.3.64	Varieties of Indoctrination	983
2.4	V-Dem Episodes of Regime Transformation Dataset	1010
2.4.1	Regime Type Variables	1010
2.4.2	Democratization Episodes	1014
2.4.3	Autocratization Episodes	1019
2.5	V-Dem V-Party Coder Level v2	1023
2.5.1	Identifier Variables	1024
2.5.2	Party Organisation	1025
2.5.3	Party Identity	1029
2.5.4	Party Basics	1038
2.6	V-Dem V-Party v2	1039
2.6.1	Identifier Variables	1039
2.6.2	Indices	1047
2.6.3	Party Basics	1048
2.6.4	Party Identity	1052
2.6.5	Party Organisation	1061
2.6.6	Populism	1065
2.6.7	Liberal-Traditional Scaling	1068
2.6.8	Party Systems	1069

Table of Contents

1 Explanatory Notes	48
1.1 Release Notes v2	48
1.2 New in Demscore version 2	48
1.3 The Demscore Codebook	49
1.4 Methodology	49
1.5 Citations	49
1.6 Missing Data	49
1.7 Download ID	50
1.8 Unit Identifier Variables	50
2 V-DEM	51
2.1 V-Dem Country-Date v13	51
2.1.1 Identifier Variables in the V-Dem Datasets	51
2.1.1.1 Country Name (country_name)	52
2.1.1.2 Country Name Abbreviation (country_text_id)	52
2.1.1.3 V-Dem Country ID (country_id)	52
2.1.1.4 Year (year)	52
2.1.1.5 V-Dem Project (project)	53
2.1.1.6 Historical V-Dem coding (historical)	53
2.1.1.7 Start of Coding Period (codingstart)	53
2.1.1.8 End of Coding Period (codingend)	54
2.1.1.9 Contemporary Start of Coding Period (codingstart_contemp)	54
2.1.1.10 Contemporary End of Coding Period (codingend_contemp)	54
2.1.1.11 Historical Start of Coding Period (codingstart_hist)	54
2.1.1.12 Historical End of Coding Period (codingend_hist)	55
2.1.1.13 Gap index (gap_index)	55
2.1.1.14 Country code (cowcode)	55
2.1.2 V-Dem Democracy Indices - V-Dem High-Level Democracy Indices	56
2.1.2.1 Electoral Democracy Index (v2x_polyarchy)	56
2.1.2.2 Liberal Democracy Index (v2x_libdem)	57
2.1.2.3 Participatory Democracy Index (v2x_partipdem)	57
2.1.2.4 Deliberative Democracy Index (v2x_delibdem)	58
2.1.2.5 Egalitarian Democracy Index (v2x_egaldem)	59
2.1.3 V-Dem Democracy Indices - V-Dem Mid-Level Indices: Components of the Democracy Indices	59
2.1.3.1 Additive polyarchy index (v2x_api)	59
2.1.3.2 Multiplicative polyarchy index (v2x_mpi)	60
2.1.3.3 Freedom of Expression and Alternative Sources of Information Index (v2x_freexp_altinf)	60
2.1.3.4 Freedom of association index (thick) (v2x_frassoc_thick)	61
2.1.3.5 Share of population with suffrage (v2x_suffr)	61
2.1.3.6 Clean elections index (v2xel_frefair)	62
2.1.3.7 Elected officials index (v2x_elecoff)	63
2.1.3.8 Liberal Component Index (v2x_liberal)	64
2.1.3.9 Equality before the law and individual liberty index (v2xcl_rol)	64
2.1.3.10 Judicial constraints on the executive index (v2x_jucon)	65
2.1.3.11 Legislative constraints on the executive index (v2xlg_legcon)	66

2.1.3.12	Participatory Component Index (v2x_partip)	66
2.1.3.13	Civil society participation index (v2x_cspart)	67
2.1.3.14	Direct Popular Vote Index (v2xdd_dd)	67
2.1.3.15	Local government index (v2xel_locelec)	69
2.1.3.16	Regional government index (v2xel_regelec)	70
2.1.3.17	Deliberative Component Index (v2xdl_delib)	70
2.1.3.18	Egalitarian Component Index (v2x_egal)	71
2.1.3.19	Equal protection index (v2xeg_eqprotec)	71
2.1.3.20	Equal access index (v2xeg_eqaccess)	72
2.1.3.21	Equal distribution of resources index (v2xeg_eqdr)	73
2.1.4	V-Dem Indicators - Elections	73
2.1.4.1	Election type (v2eltype)	74
2.1.4.2	Suffrage (v2asuffrage)	75
2.1.4.3	Minimum voting age (v2elage)	76
2.1.4.4	Compulsory voting (v2elcomvot)	76
2.1.4.5	Female suffrage restricted (v2elfemrst)	76
2.1.4.6	Suffrage level (v2elgvssuffvl)	77
2.1.4.7	Percent of population with suffrage (v2elsuffrage)	78
2.1.4.8	Fraud allegations by Western election monitors (v2elwestmon)	79
2.1.4.9	Female suffrage (most can vote) (v2fsuffrage)	79
2.1.4.10	Male suffrage (most can vote) (v2msuffrage)	79
2.1.4.11	Disclosure of campaign donations (v2eldonate)	80
2.1.4.12	Public campaign finance (v2elpubfin)	80
2.1.4.13	EMB autonomy (v2elembaut)	81
2.1.4.14	EMB capacity (v2elembcap)	82
2.1.4.15	Elections multiparty (v2elmulpar)	82
2.1.4.16	Election voter registry (v2elrgstry)	83
2.1.4.17	Election vote buying (v2elvotbuy)	83
2.1.4.18	Election other voting irregularities (v2elirreg)	84
2.1.4.19	Election government intimidation (v2elintim)	85
2.1.4.20	Election other electoral violence (v2elpeace)	85
2.1.4.21	Election boycotts (v2elboycot)	86
2.1.4.22	Election free campaign media (v2elfrcamp)	87
2.1.4.23	Election paid campaign advertisements (v2elpdcamp)	87
2.1.4.24	Election paid interest group media (v2elpaidig)	88
2.1.4.25	Election free and fair (v2elfrfair)	88
2.1.4.26	Election domestic election monitors (v2eldommon)	89
2.1.4.27	Election international monitors (v2elintmon)	89
2.1.4.28	Election international monitors denied (v2elmonden)	90
2.1.4.29	Monitors refuse to be present (v2elmonref)	90
2.1.4.30	Candidate restriction by ethnicity, race, religion, or language (v2elrstrct)	90
2.1.4.31	Election losers accept results (v2elaccept)	91
2.1.4.32	Election assume office (v2elasmoff)	91
2.1.4.33	Election turnout (v2eltrnout)	92
2.1.4.34	Election VAP turnout (v2elvaptrn)	92
2.1.4.35	Name of largest party (v2lpname)	93
2.1.4.36	Name of second largest party (v2slpname)	93

2.1.4.37	Name of third largest party (v2tlpname)	94
2.1.4.38	Presidential elections consecutive (v2elprescons)	94
2.1.4.39	Presidential elections cumulative (v2elprescumul)	95
2.1.4.40	HOG restriction by ethnicity, race, religion, or language (v2elrsthog)	95
2.1.4.41	HOS restriction by ethnicity, race, religion, or language (v2elrsthos)	96
2.1.4.42	Election HOG turnover ordinal (v2elturnhog)	96
2.1.4.43	Elections HOS turnover ordinal (v2elturnhos)	97
2.1.4.44	Election executive turnover ordinal (v2eltvrexo)	97
2.1.4.45	Presidential election vote share of largest vote-getter (v2elvotlrg)	98
2.1.4.46	Presidential election vote share of second-largest vote-getter (v2elvotsml)	99
2.1.4.47	Lower chamber election consecutive (v2ellocons)	99
2.1.4.48	Lower chamber election cumulative (v2ellocumul)	99
2.1.4.49	Lower chamber election district magnitude (v2elloeldm)	100
2.1.4.50	Lower chamber electoral system (v2elloelsy)	100
2.1.4.51	Lower chamber election seats (v2elloseat)	102
2.1.4.52	Lower chamber election seats won by largest party (v2ellostlg)	102
2.1.4.53	Lower chamber election seat share won by largest party (v2ellostsl)	103
2.1.4.54	Lower chamber election seats won by second largest party (v2ellostsm)	103
2.1.4.55	Lower chamber election seat share won by second largest party (v2ellostss)	104
2.1.4.56	Lower chamber election seats won by third largest party (v2ellosttm)	104
2.1.4.57	Lower chamber election seat share won by third largest party (v2ellostts)	105
2.1.4.58	Lower chamber election vote share of largest vote-getter (v2ellovtlg)	105
2.1.4.59	Lower chamber election vote share of second-largest vote-getter (v2ellovtsm)	106
2.1.4.60	Lower chamber election vote share of third-largest vote-getter (v2ellovttm)	106
2.1.4.61	Lower chamber electoral system (v2elparlel)	107
2.1.4.62	Lower chamber election statutory threshold (v2elthresh)	107
2.1.4.63	Lower chamber election turnover (v2eltvrig)	108
2.1.4.64	Regional government exists (v2elreggov)	108
2.1.4.65	Regional government name (v2elregnam)	109
2.1.4.66	Regional government elected (v2elsrgel)	109
2.1.4.67	Regional offices relative power (v2elrgpwr)	110
2.1.4.68	Local government exists (v2ellocgov)	111
2.1.4.69	Local government name (v2ellocnam)	111
2.1.4.70	Local government elected (v2ellocele)	112
2.1.4.71	Local offices relative power (v2ellocpwr)	113
2.1.4.72	Subnational elections free and fair (v2elffehr)	113
2.1.4.73	Subnational elections held (v2elffelrbin)	114
2.1.4.74	Subnational election unevenness (v2elsnlsff)	115
2.1.4.75	Subnational election area less free and fair characteristics (v2elsnlfc)	115
2.1.4.76	Subnational election area more free and fair characteristics (v2elsnmrfc)	116
2.1.5	V-Dem Indicators - Political Parties	117
2.1.5.1	Barriers to parties (v2psbars)	117
2.1.5.2	Party Ban (v2psparban)	118
2.1.5.3	Opposition parties autonomy (v2psoppaut)	118
2.1.5.4	Party organizations (v2psorgs)	119

2.1.5.5	Party Branches (v2psprbrch)	119
2.1.5.6	Party linkages (v2psprlnks)	120
2.1.5.7	Distinct party platforms (v2psplats)	120
2.1.5.8	Candidate selection–National/local (v2pscnslnl)	121
2.1.5.9	Legislative party cohesion (v2pscohesv)	121
2.1.5.10	Party competition across regions (v2pscomprg)	122
2.1.5.11	National party control (v2psnatpar)	122
2.1.5.12	Subnational party control (v2pssunpar)	123
2.1.5.13	Party ban target (v2psbantar)	124
2.1.6	V-Dem Indicators - Direct Democracy	124
2.1.6.1	Initiatives permitted (v2ddlexci)	124
2.1.6.2	Initiatives signatures (v2ddsignci)	125
2.1.6.3	Initiatives signatures percent (v2ddsigpci)	125
2.1.6.4	Initiatives signature-gathering period (v2ddsigdci)	126
2.1.6.5	Initiatives signature-gathering time limit (v2ddsiglci)	126
2.1.6.6	Initiatives participation threshold (v2ddpartci)	126
2.1.6.7	Initiatives approval threshold (v2ddapprci)	127
2.1.6.8	Initiatives administrative threshold (v2ddadmci)	127
2.1.6.9	Initiatives super majority (v2ddspmci)	127
2.1.6.10	Popular initiative credible threat (v2ddthreci)	128
2.1.6.11	Referendums permitted (v2ddlexrf)	128
2.1.6.12	Referendums signatures (v2ddsignrf)	129
2.1.6.13	Referendums signatures percent (v2ddsigprf)	129
2.1.6.14	Referendums signature-gathering period (v2ddsigdrf)	129
2.1.6.15	Referendums signature-gathering limit (v2ddsiglrf)	130
2.1.6.16	Referendums participation threshold (v2ddpartrf)	130
2.1.6.17	Referendums approval threshold (v2ddapprrf)	131
2.1.6.18	Referendums administrative threshold (v2ddadmrf)	131
2.1.6.19	Referendums super majority (v2ddspmrf)	131
2.1.6.20	Popular referendum credible threat (v2ddthrerf)	132
2.1.6.21	Constitutional changes popular vote (v2ddlexor)	132
2.1.6.22	Obligatory referendum participation threshold (v2ddpartor)	133
2.1.6.23	Obligatory referendum approval threshold (v2ddappor)	133
2.1.6.24	Obligatory referendum administrative threshold (v2ddadmor)	133
2.1.6.25	Obligatory referendum super majority (v2ddspmor)	134
2.1.6.26	Obligatory referendum credible threat (v2ddthreor)	134
2.1.6.27	Plebiscite permitted (v2ddlexpl)	134
2.1.6.28	Plebiscite participation threshold (v2ddpartpl)	135
2.1.6.29	Plebiscite approval threshold (v2ddapprpl)	135
2.1.6.30	Plebiscite administrative threshold (v2ddadmpl)	136

1 Explanatory Notes

1.1 Release Notes v2

Demscore provides worldwide free access to harmonized data on Democracy, Environment, Migration, Social Policy, Conflict and Representation from several of the world's most prominent social science research institutes. The interdisciplinary nature of Demscore data facilitates large-scale comparative analyses. This is essential to advance adequate policy responses to complex societal challenges associated with the Sustainable Development Goals (SDGs) and beyond, facing Sweden, Europe, and the world today.

With a firm commitment to transparency and openness, Demscore v2 enables users to gain comprehensive insights into various topics across the social sciences. The joint infrastructure ensures data integrity and quality at the highest international standards and maximizes usability in the measurement of contextual data with more than 25.000 variables across nearly all countries in the world, from 1750 to the present.

This creates critical time- and cost saving advantages in data collection, management, distribution, and not the least for end-users in the scientific community. Demscore's unique approach to translating and merging data scales up to a total of 365.097 variable versions available in the infrastructure, storing a total of 9.2 billion non-missing observations.

This collaborative effort between leading Swedish universities pushes the scale of social science data to a new level and offers unprecedented possibilities for interdisciplinary research and knowledge advancement.

These are the key features of Demscore:

1. **Customized Download:** A fully normalized, joint PostgreSQL database, sophisticated programming, and a user-friendly web-based interface for users to generate custom-designed datasets and codebooks for download.
2. **Translations and Data Merges:** Demscore currently offers 1015 merges for dataset and Output Unit combinations.
3. **Metadata:** Demscore takes information on and organization of metadata to new heights with the inclusion of customized codebooks, a detailed methodology document, and a comprehensive handbook.
4. **Handling of Missing Data:** Demscore pioneers in developing an innovative approach to tackle missing data. Researchers can now account for missing values with increased precision, leading to more robust and reliable analyses.
5. **Merge Scores:** Demscore introduces a unique merge mechanism. This powerful tool enables researchers to combine datasets effortlessly, uncovering connections and patterns that were previously hidden in isolated data silos.
6. **Thematic Datasets:** Demscore provides researchers with curated thematic datasets, each focused on a specific topic. These datasets bring together relevant variables from across the Demscore partners, facilitating in-depth investigations and comprehensive analyses of specific domains.
7. **Interactive Web Portal:** In addition to all the above, Demscore's web portal offers interactive visualization tools, user support and additional information on all partners and data sources.

For more information, please visit <https://www.demscore.se/> or contact contact@demscore.se.

1.2 New in Demscore version 2

A detailed description of changes and additions made for version 2 compared to version 1 can be found in the Methodology Document.

1.3 The Demscore Codebook

The autogenerated Demscore Codebook lists variable entries for those variables chosen by the user along with citation guidelines and licenses per variable.

The meta data is extracted from the codebooks per dataset stored in a table in the Demscore PostgreSQL database with one row per variable for all datasets. This table includes codebook entries, variable tags, labels, and other variable information in LaTeX format used to generate an automated codebook.

Demscore maintains a single set of standard entries for metadata across all datasets, to which all project members contribute their information. Additionally, variables within different datasets may have varying sets of additional information requirements specific to each dataset. These dataset-specific entries are also included, but they are presented as variable-specific metadata beneath the standard entries.

At the outset of the harmonization process, Demscore underwent a thorough variable name cleanup. This involved tasks such as replacing spaces or dots in variable names with underscores and converting all letters to lowercase. Notably, the original tags remain preserved and stored in the PostgreSQL table. Each variable in Demscore is accessible in both short and long forms. The short form comprises the cleaned version of the original variable tag, while the long form starts with the dataset name from which it originates, followed by the cleaned variable name.

For instance, the original name of the variable *MinisterPersonalID* from the H-DATA Foreign Minister Dataset is included as *ministerpersonalid* (short form) and *hdata_fomin_ministerpersonalid* (long form) in Demscore.

In addition, each dataset includes Demscore unit-identifier variables which are named according to the following naming scheme: Beginning with *u_*, followed by the name of the primary unit and finally the variable tag. The *year-* variable from the COMPLAB SPIN The Out-of-Work Benefits Dataset (OUTWB), which is part of the primary unit *u_complab_country_year* has the Demscore unit identifier name *u_complab_country_year_year*.

1.4 Methodology

For details on our methodology please see the Demscore Methodology document which is included in the zip file retrieved from the download interface.

1.5 Citations

The Demscore project does not have a formal citation of its own. Hence, when using Demscore, we suggest that you cite the respective projects and datasets. We indicate how every dataset is to be cited in the autogenerated codebook you retrieve with your data download, both in the dataset description and the codebook entry for each variable. Most often it is sufficient to cite the dataset a variable originates from, but sometimes there is a variable specific citation listed in the codebook entry in addition to that. For these cases, please also add the variable specific citation to the reference list of your publication. Full references are linked in the codebook entries of the variables and listed in the codebook's bibliography. We suggest you to also cite the Demscore Methodology Document when using data retrieved through Demscore.

1.6 Missing Data

Demscore indicates different types of missingness for observations in the customized datasets:
Missing in original data = Whenever an observation in the original variable is a missing (NA, missing code such as 7777, blank cell), we preserve this missing value. When the original source has special codes for various types of missing, those are preserved.

Missing code: -11111 = Demscore code for observation is missing due to the translation/merge, i.e., missing data due to no data being included for this combination of identifiers in the end Output Unit.

Missing code: -22222 = No observation is merged/translated, but the original data contains information for these identifier combinations elsewhere. For these cases, we use a different code. The

user needs to consult the reference documents (Methodology Document Section 5.1. or the Demscore Handbook) to clarify why the translation to the identifier combinations in the end Output Unit was not possible.

Please note that an observation that is missing in its original output unit does not take the value -11111, but appears as NA/blank cell in the customized dataset.

1.7 Download ID

The download ID allows the user to share the ID with other users for replication purposes. A user can type the download ID into the Demscore website and retrieve the same download selection and files as the original user. This ID is autogenerated for each download from the Demscore website and will always retrieve the same data, even if the Demscore version was updated in the meantime.

Download ID:

1.8 Unit Identifier Variables

An Output Unit is defined as an output format in which variables can be retrieved from one or more datasets through a strictly defined output grid. A unit table defining this output grid contains unit identifier columns with `u_` prefixes and the table is sorted based on these unit identifier columns and has a fixed number of rows. Unit columns are based on the columns that constitute the unit of analysis in a dataset. They are added to the original dataset and marked by a unit prefix (consisting of a `u_` and the dataset unit name) before the original variable name. Unit columns can contain slightly modified data, e.g., missing values are replaced by a default value. Sometimes we add additional columns to the unit table, for instance if a dataset includes both a `country_id` column with a numeric country code, we add the variable storing the full country name to the unit table as well for better readability.

2 V-DEM

Based at the University of Gothenburg, the **Varieties of Democracy (V-Dem)** Research Project takes a comprehensive approach to understanding democratization. This approach encompasses multiple core principles: electoral, liberal, majoritarian, consensual, participatory, deliberative, and egalitarian. Each Principle is represented by a separate index, and each is regarded as a separate outcome in the proposed study. In this manner V-Dem reconceptualizes democracy from a single outcome to a set of outcomes. In addition, V-Dem breaks down each core principle into its constituent components, each to be measured separately. Components include features such as free and fair elections, civil liberties, judicial independence, executive constraints, gender equality, media freedom, and civil society. Finally, each component is disaggregated into specific indicators. This fundamentally different approach to democratization is made possible by the V-Dem Database, which measures 450+ indicators annually from 1789 to the present for all countries of the world. The V-Dem approach stands out, first, as a large global collaboration among scholars with diverse areas of expertise; second, as the first project attempting to explain different varieties of democracy; and third, thanks to the highly disaggregated V-Dem data, the first project to explore causal mechanisms linking different aspects of democracy together. With five Principal Investigators, 19 Project Managers with special responsibility for issue areas covered in the V-Dem dataset, around 23 Regional Managers, 134 Country Coordinators and more than 4000 Country Experts, the V-Dem project is one of the world's largest social science data collection projects on democracy. More information is available on the project's website: <https://www.v-dem.net/>

2.1 V-Dem Country-Date v13

Dataset tag: vdem_cd

Output Unit: V-Dem Country-Date, i.e., data is collected per country and date.

Description: All 483 V-Dem indicators and indices.

Dataset citation: Coppedge, Michael, John Gerring, Carl Henrik Knutsen, Staffan I. Lindberg, Jan Teorell, David Altman, Michael Bernhard, Agnes Cornell, M. 2.1.1 Identifier Variables in the V-Dem Datasets

Variables in this section identify the observations in the dataset.

2.1.1.1 Country Name (`country_name`)

Long tag: vdem_cd_country_name

Original tag: country_name

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: A*

QUESTION: Name of coded country.

CLARIFICATION: A V-Dem country is a political unit enjoying at least some degree of functional and/or formal sovereignty.

RESPONSES:

Text

NOTES: For more details on country units consult the *V-Dem Country Coding Units* document.

DATA RELEASE: 10-13.

CITATION: *V-Dem Codebook* (see suggested citation at the top of this document).

2.1.1.2 Country Name Abbreviation (`country_text_id`)

Long tag: vdem_cd_country_text_id

Original tag: country_text_id

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: A*

QUESTION: Abbreviated country names.

RESPONSES:

Text

DATA RELEASE: 10-13.

CITATION: *V-Dem Codebook* (see suggested citation at the top of this document).

2.1.1.3 V-Dem Country ID (`country_id`)

Long tag: vdem_cd_country_id

Original tag: country_id

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: A*

QUESTION: Unique country ID designated for each country.

RESPONSES:

Numeric

NOTES: A list of countries and their corresponding IDs used in the V-Dem dataset can be found in the country table in the codebook, as well as in the *V-Dem Country Coding Units* document.

DATA RELEASE: 10-13.

CITATION: *V-Dem Codebook* (see suggested citation at the top of this document).

2.1.1.4 Year (`year`)

Long tag: vdem_cd_year

Original tag: year

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: A*

QUESTION: Four-digit designation of the year for which an observation is given that ranges from the start to the end of the coding period.

RESPONSES:

Numeric

NOTES: This variable is included in the V-Dem Country Year as well as Country Date datasets.

DATA RELEASE: 10-13.

CITATION: *V-Dem Codebook* (see suggested citation at the top of this document).

2.1.1.5 V-Dem Project (project)

Long tag: vdem_cd_project

Original tag: project

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: A*

QUESTION: Indication what project team has coded country in respective year.

RESPONSES:

0: Contemporary.

1: Historical.

2: Both (overlap).

DATA RELEASE: 10-13.

CITATION: *V-Dem Codebook* (see suggested citation at the top of this document).

2.1.1.6 Historical V-Dem coding (historical)

Long tag: vdem_cd_historical

Original tag: historical

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: A*

QUESTION: Binary indication whether the country in question has been coded by the team of Historical V-Dem project.

RESPONSES:

0: No.

1: Yes.

DATA RELEASE: 10-13.

CITATION: *V-Dem Codebook* (see suggested citation at the top of this document).

2.1.1.7 Start of Coding Period (codingstart)

Long tag: vdem_cd_codingstart

Original tag: codingstart

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: A*

QUESTION: Year in which coding of the country in question starts.

CLARIFICATION: V-Dem country coding starts in 1789, or from when a country first enjoyed at least some degree of functional and/or formal sovereignty.

RESPONSES:

Numeric

NOTES: For detailed information, please see the *V-Dem Country Coding Units* document.

DATA RELEASE: 10-13.

CITATION: *V-Dem Codebook* (see suggested citation at the top of this document).

2.1.1.8 End of Coding Period (codingend)

Long tag: vdem_cd_codingend

Original tag: codingend

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: A*

QUESTION: Either a maximum year of country coding period or the year when the country ceased to exist because it lost functional or formal sovereignty.

RESPONSES:

Numeric

NOTES: For more details about V-Dem country coding periods, please see the *V-Dem Country Coding Units* document.

DATA RELEASE: 10-13.

CITATION: *V-Dem Codebook* (see suggested citation at the top of this document).

2.1.1.9 Contemporary Start of Coding Period (codingstart_contemp)

Long tag: vdem_cd_codingstart_contemp

Original tag: codingstart_contemp

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

This variable indicates the coding start for the countries coded by Contemporary V-Dem.

Response: Date.

2.1.1.10 Contemporary End of Coding Period (codingend_contemp)

Long tag: vdem_cd_codingend_contemp

Original tag: codingend_contemp

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: A*

QUESTION: Year in which the coding of Contemporary V-Dem project ends.

CLARIFICATION: Variables from “Contemporary” project can have different question formulation, variable type, or number of coders as opposed to the “Historical” one.

RESPONSES:

Numeric

DATA RELEASE: 10-13.

CITATION: *V-Dem Codebook* (see suggested citation at the top of this document).

2.1.1.11 Historical Start of Coding Period (codingstart_hist)

Long tag: vdem_cd_codingstart_hist

Original tag: codingstart_hist

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: A*

QUESTION: Year in which the coding of Historical V-Dem project starts.

CLARIFICATION: Variables from “Historical” project can have different question formulation, variable type, or number of coders as opposed to the “Contemporary” one.

RESPONSES:

Numeric

DATA RELEASE: 10-13.

CITATION: *V-Dem Codebook* (see suggested citation at the top of this document).

2.1.1.12 Historical End of Coding Period (codingend_hist)

Long tag: vdem_cd_codingend_hist

Original tag: codingend_hist

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: A*

QUESTION: Year in which the coding of Historical V-Dem project ends.

CLARIFICATION: Variables from “Historical” project can have different question formulation, variable type, or number of coders as opposed to the “Contemporary” one.

RESPONSES:

Numeric

DATA RELEASE: 10-13.

CITATION: *V-Dem Codebook* (see suggested citation at the top of this document).

2.1.1.13 Gap index (gap_index)

Long tag: vdem_cd_gap_index

Original tag: gap_index

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: A*

CLARIFICATION: Indication that party was not present in national legislature.

RESPONSES:

Numeric

DATA RELEASE: 11-13.

2.1.1.14 Country code (cowcode)

Long tag: vdem_cd_cowcode

Original tag: COWcode

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Correlates of War Project (2017)

Description:

VARIABLE TYPE: E

QUESTION: Correlates of War (COW) project country codes.

RESPONSES:

Numeric

SOURCE(S): Correlates of War Project (2017)

DATA RELEASE: 10-13.

CITATION: Correlates of War Project (2017)

YEARS: 1789-2022

2.1.2 V-Dem Democracy Indices - V-Dem High-Level Democracy Indices

This section groups together macro-level indices that describe features of democracy at the highest (most abstract) level. Please see Appendix A of the V-Dem codebook (<https://www.v-dem.net/static/website/img/refs/codebookv12.pdf>) for an overview of all indices, component-indices, and lower-level indices.

2.1.2.1 Electoral Democracy Index (v2x_polyarchy)

Long tag: vdem_cd_v2x_polyarchy

Original tag: v2x_polyarchy

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Teorell et al. (2019), v2x_freexp_altinf v2x_frassoc_thick v2x_suffr v2xel_frefair v2x_elecoff

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): Jan Teorell

ADDITIONAL VERSIONS: *_codelow, *_codehigh, *_sd

QUESTION: To what extent is the ideal of electoral democracy in its fullest sense achieved?

CLARIFICATION: The electoral principle of democracy seeks to embody the core value of making rulers responsive to citizens, achieved through electoral competition for the electorate's approval under circumstances when suffrage is extensive; political and civil society organizations can operate freely; elections are clean and not marred by fraud or systematic irregularities; and elections affect the composition of the chief executive of the country. In between elections, there is freedom of expression and an independent media capable of presenting alternative views on matters of political relevance. In the V-Dem conceptual scheme, electoral democracy is understood as an essential element of any other conception of representative democracy — liberal, participatory, deliberative, egalitarian, or some other.

SCALE: Interval, from low to high (0-1).

SOURCE(S): v2x_freexp_altinf v2x_frassoc_thick v2x_suffr v2xel_frefair v2x_elecoff

DATA RELEASE: 1-13. Release 1-5 used a different, preliminary aggregation formula.

AGGREGATION: The index is formed by taking the average of, on the one hand, the weighted average of the indices measuring freedom of association thick (v2x_frassoc_thick), clean elections (v2xel_frefair), freedom of expression (v2x_freexp_altinf), elected officials (v2x_elecoff), and suffrage (v2x_suffr) and, on the other, the five-way multiplicative interaction between those indices. This is half way between a straight average and strict multiplication, meaning the average of the two. It is thus a compromise between the two most well known aggregation formulas in the literature, both allowing partial "compensation" in one sub-component for lack of polyarchy in the others, but also punishing countries not strong in one sub-component according to the "weakest link" argument. The aggregation is done at the level of Dahl's sub-components with the one

exception of the non-electoral component. The index is aggregated using this formula:

$$\begin{aligned}
 v2x_polyarchy &= .5 * MPI + .5 * API \\
 &= .5 * (v2x_elecoff * v2xel_refair * v2x_frassoc_thick * \\
 &\quad v2x_suffr * v2x_freexp_altinf) \\
 &+ .5 * ((1/8) * v2x_elecoff + (1/4) * v2xel_refair \\
 &\quad + (1/4) * v2x_frassoc_thick + (1/8) * v2x_suffr \\
 &\quad + (1/4) * v2x_freexp_altinf)
 \end{aligned}$$

CITATION: Teorell *et al.* (2019); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

2.1.2.2 Liberal Democracy Index (v2x_libdem)

Long tag: vdem_cd_v2x_libdem

Original tag: v2x_libdem

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Coppedge *et al.* (2015), v2x_liberal v2x_polyarchy

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): Jan Teorell

ADDITIONAL VERSIONS: *_codelow, *_codehigh, *_sd

QUESTION: To what extent is the ideal of liberal democracy achieved?

CLARIFICATION: The liberal principle of democracy emphasizes the importance of protecting individual and minority rights against the tyranny of the state and the tyranny of the majority. The liberal model takes a "negative" view of political power insofar as it judges the quality of democracy by the limits placed on government. This is achieved by constitutionally protected civil liberties, strong rule of law, an independent judiciary, and effective checks and balances that, together, limit the exercise of executive power. To make this a measure of liberal democracy, the index also takes the level of electoral democracy into account.

SCALE: Interval, from low to high (0-1).

SOURCE(S): v2x_liberal v2x_polyarchy

DATA RELEASE: 1-13. Release 1, 2, and 3 used a different, preliminary aggregation formula.

AGGREGATION: The index is aggregated using this formula:

$$\begin{aligned}
 v2x_libdem &= \\
 &.25 * v2x_polyarchy^{1.585} + .25 * v2x_liberal + .5 * v2x_polyarchy^{1.585} * v2x_liberal
 \end{aligned}$$

CITATION: Coppedge *et al.* (2015, *V-Dem Working Paper Series* 2015:6); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

2.1.2.3 Participatory Democracy Index (v2x_partipdem)

Long tag: vdem_cd_v2x_partipdem

Original tag: v2x_partipdem

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Coppedge et al. (2015), v2x_polyarchy v2x_partip

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): Jan Teorell

ADDITIONAL VERSIONS: *_codelow, *_codehigh, *_sd

QUESTION: To what extent is the ideal of participatory democracy achieved?

CLARIFICATION: The participatory principle of democracy emphasizes active participation by citizens in all political processes, electoral and non-electoral. It is motivated by uneasiness about a bedrock practice of electoral democracy: delegating authority to representatives. Thus, direct rule by citizens is preferred, wherever practicable. This model of democracy thus takes suffrage for granted, emphasizing engagement in civil society organizations, direct democracy, and subnational elected bodies. To make it a measure of participatory democracy, the index also takes the level of electoral democracy into account.

SCALE: Interval, from low to high (0-1).

SOURCE(S): v2x_polyarchy v2x_partip

DATA RELEASE: 1-13. Release 1-3 used a different, preliminary aggregation formula.

AGGREGATION: The index is aggregated using this formula:

$v2x_partipdem =$

$.25 * v2x_polyarchy^{1.585} + .25 * v2x_partip + .5 * v2x_polyarchy^{1.585} * v2x_partip$

2.1.2.4 Deliberative Democracy Index (v2x_delibdem)

Long tag: vdem_cd_v2x_delibdem

Original tag: v2x_delibdem

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Coppedge et al. (2015), v2xdl_delib v2x_polyarchy

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): Jan Teorell

ADDITIONAL VERSIONS: *_codelow, *_codehigh, *_sd

QUESTION: To what extent is the ideal of deliberative democracy achieved?

CLARIFICATION: The deliberative principle of democracy focuses on the process by which decisions are reached in a polity. A deliberative process is one in which public reasoning focused on the common good motivates political decisions—as contrasted with emotional appeals, solidary attachments, parochial interests, or coercion. According to this principle, democracy requires more than an aggregation of existing preferences. There should also be respectful dialogue at all levels—from preference formation to final decision—among informed and competent participants who are open to persuasion. To make it a measure of not only the deliberative principle but also of democracy, the index also takes the level of electoral democracy into account.

SCALE: Interval, from low to high (0-1).

SOURCE(S): v2xdl_delib v2x_polyarchy

DATA RELEASE: 1-13. Release 1-3 used a different, preliminary aggregation formula.

AGGREGATION: The index is aggregated using this formula:

$v2x_delibdem =$

2.1.2.5 Egalitarian Democracy Index (v2x_egaldem)

Long tag: vdem_cd_v2x_egaldem

Original tag: v2x_egaldem

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Sigman & Lindberg (2015), Coppedge et al. (2015), v2x_egal v2x_polyarchy

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): Rachel Sigman, Staffan Lindberg

ADDITIONAL VERSIONS: *_codelow, *_codehigh, *_sd

QUESTION: To what extent is the ideal of egalitarian democracy achieved?

CLARIFICATION: The egalitarian principle of democracy holds that material and immaterial inequalities inhibit the exercise of formal rights and liberties, and diminish the ability of citizens from all social groups to participate. Egalitarian democracy is achieved when 1 rights and freedoms of individuals are protected equally across all social groups; and 2 resources are distributed equally across all social groups; 3 groups and individuals enjoy equal access to power. To make it a measure of egalitarian democracy, the index also takes the level of electoral democracy into account.

SCALE: Interval, from low to high (0-1).

SOURCE(S): v2x_egal v2x_polyarchy

DATA RELEASE: 1-13. Release 1-4 used a different, preliminary aggregation formula.

AGGREGATION: The index is aggregated using this formula:

$v2x_egaldem =$

$.25 * v2x_polyarchy^{1.585} + .25 * v2x_egal + .5 * v2x_polyarchy^{1.585} * v2x_egal$

CITATION: Sigman *et al.* (2015, *V-Dem Working Paper Series* 2015:22); Coppedge *et al.* 2015, *V-Dem Working Paper Series* 2015:6; *V-Dem Codebook* (see suggested citation at the top of this document).

2.1.3 V-Dem Democracy Indices - V-Dem Mid-Level Indices: Components of the Democracy Indices

This section includes the V-Dem mid-level indices, subcomponents of the V-Dem Democracy Indices. Please see Appendix A of the V-Dem codebook (<https://www.v-dem.net/static/website/img/refs/codebookv12.pdf>) for an overview of all indices, component-indices, and lower-level indices.

2.1.3.1 Additive polyarchy index (v2x_api)

Long tag: vdem_cd_v2x_api

Original tag: v2x_api

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Teorell et al. (2019), v2x_frassoc_thick v2x_suffr v2xel_frefair v2x_elecoff v2x_freexp_altinf

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): Jan Teorell

ADDITIONAL VERSIONS: *_codelow, *_codehigh, *_sd

QUESTION: To what extent is the electoral principle of democracy achieved?

CLARIFICATION: The electoral principle of democracy seeks to achieve responsiveness and accountability between leaders and citizens through the mechanism of competitive elections. This is presumed to be achieved when suffrage is extensive; political and civil society organizations can operate freely; elections are clean and not marred by fraud or systematic irregularities; and the chief executive of a country is selected directly or indirectly through elections.

SCALE: Interval, from low to high (0-1).

SOURCE(S): v2x_frassoc_thick v2x_suffr v2xel_frefair v2x_elecoff v2x_freexp_altinf

DATA RELEASE: 6-13.

AGGREGATION: The index is operationalized by taking the weighted average of the indices measuring freedom of association thick (v2x_frassoc_thick), clean elections (v2xel_frefair), freedom of expression (v2x_freexp_altinf), elected executive (v2x_elecoff), and suffrage (v2x_suffr). The weights are constructed so as to sum to 1 and weigh elected executive and suffrage half as much as the other three, respectively.

The index is aggregated using this formula:

$$v2x_api = (1/4) * v2x_frassoc_thick + (1/4) * v2xel_frefair + (1/4) * v2x_freexp_altinf + (1/8) * v2x_elecoff + (1/8) * v2x_suffr$$

CITATION: Teorell *et al.* (2019); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

2.1.3.2 Multiplicative polyarchy index (v2x_mpi)

Long tag: vdem_cd_v2x_mpi

Original tag: v2x_mpi

2.1.3.5 Share of population with suffrage (v2x_suffr)

Long tag: vdem_cd_v2x_suffr

Original tag: v2x_suffr

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: v2elsuffrage

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): Svend-Erik Skaaning

QUESTION: What share of adult citizens as defined by statute has the legal right to vote in national elections?

CLARIFICATION: This question does not take into consideration restrictions based on age, residence, having been convicted for crime, or being legally incompetent. It covers legal *de jure* restrictions, not restrictions that may be operative in practice *de facto*. The adult population as defined by statute is defined by citizens in the case of independent countries or the people living in the territorial entity in the case of colonies. Universal suffrage is coded as 100percent. Universal male suffrage only is coded as 50percent. Years before electoral provisions are introduced are scored 0percent. The scores do not reflect whether an electoral regime was interrupted or not. Only if new constitutions, electoral laws, or the like explicitly introduce new regulations of suffrage, the scores were adjusted accordingly if the changes suggested doing so. If qualifying criteria other than gender apply such as property, tax payments, income, literacy, region, race, ethnicity, religion, and/or 'economic independence', estimates have been calculated by combining information on the restrictions with different kinds of statistical information on population size, age distribution, wealth distribution, literacy rates, size of ethnic groups, etc., secondary country-specific sources, and — in the case of very poor information — the conditions in similar countries or colonies. The scores reflect *de jure* provisions of suffrage extension in percentage of the adult population. If the suffrage law is revised in a way that affects the extension, the scores reflect this change as of the calendar year the law was enacted.

RESPONSES:

Percent.

SCALE: Interval, from low to high (0-1).

2.1.3.6 Clean elections index (v2xel_frefair)

Long tag: vdem_cd_v2xel_frefair

Original tag: v2xel_frefair

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023), v2elembaut v2elembcap v2elrgstry v2elvotbuy v2elirreg v2elintim v2elpeace v2elfrfair v2x_elecreg

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): Staffan Lindberg, Jan Teorell

ADDITIONAL VERSIONS: *_codelow, *_codehigh, *_sd

QUESTION: To what extent are elections free and fair?

CLARIFICATION: Free and fair connotes an absence of registration fraud, systematic irregularities, government intimidation of the opposition, vote buying, and election violence.

SCALE: Interval, from low to high (0-1).

SOURCE(S): v2elembaut v2elembcap v2elrgstry v2elvotbuy v2elirreg v2elintim v2elpeace v2elfrfair v2x_elecreg

DATA RELEASE: 1-13.

AGGREGATION: The index is formed by taking the point estimates from a Bayesian factor analysis model of the indicators for EMB autonomy (v2elembaut), EMB capacity (v2elembcap), election voter registry (v2elrgstry), election vote buying (v2elvotbuy), election other voting irregularities (v2elirreg), election government intimidation (v2elintim), non-state electoral violence (v2elpeace), and election free and fair (v2elfrfair). Since the bulk of these indicators are only observed in election years, the index scores have then been repeated within election regime periods as defined by v2x_elecreg. If a country is recorded as an electoral regime (v2x_elecreg) at the beginning of the time series until the first election that we record, then the scores for this election are backfilled towards the beginning of the time series.

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): Jan Teorell

QUESTION: Is the chief executive and legislature appointed through popular elections?

CLARIFICATION: This index attempts to measure (a) whether the chief executive is elected, either directly elected through popular elections or indirectly through a popularly elected legislature that then appoints the chief executive; and (b) whether the legislature, in presidential systems with a directly elected president that is also chief executive, is directly or indirectly elected. Note that a popular election is minimally defined and also includes sham elections with limited suffrage and no competition. Similarly, "appointment" by legislature only implies selection and/or approval, not the power to dismiss. This index is useful primarily for aggregating higher-order indices and should not necessarily be interpreted as an important element of democracy in its own right.

SCALE: Interval.

SOURCE(S): v2ex_elechos v2ex_elechog v2exdfcbhs_rec v2ex_hosw v2ex_elecleg v2lgbicam v2lgello v2lgelecup v2lginello v2lginelup v2exaphos v2expathhs v2exaphogp v2expathhg v2exdjcbhg v2exdfdmhs v2exdfdshg v2exhoshog v2exapupap v2exapup

DATA RELEASE: 1-13. 1-3 preliminary aggregation formula, 4-6 as v2x_accex, 7 renamed to v2x_elecoff and modified aggregation, 8.

AGGREGATION: The index is formed in two steps. First, there are six different chains of appointment/selection to take into account in constructing this index, all of which are scaled to vary from 0 to 1. First, whether the head of state is directly elected ($a = 1$) or not ($a = 0$) (from v2ex_elechos). Second, the extent to which the legislature is popularly elected (b). If the legislature is unicameral, b is measured as the proportion of legislators directly elected + half of the proportion that are indirectly elected. If the legislature is bicameral and the upper house is involved in the appointment of the chief executive, the same proportion of directly and half of the indirectly elected legislators is calculated for the upper house; the scores for the lower and upper houses are then averaged. Third, whether the head of state is appointed by the legislature, or the approval of the legislature is necessary for the appointment of the head of state ($c1 = 1$, otherwise 0). Fourth, whether the head of government is appointed by the legislature, or the approval of the legislature is necessary for the appointment of the head of government ($c2 = 1$, otherwise 0). Fifth, whether the head of government is appointed by the head of state ($d = 1$) or not ($d = 0$). Sixth, whether the head of government is directly elected ($e = 1$) or not ($e = 0$) (from v2ex_elechog).

In the second step, the extent to which the legislature is elected (b) is also independently taken into account in order to penalize presidential systems with unelected legislatures, or legislatures with a large share of presidential appointees, for example.

Define *hosw* as the weight for the head of state. If the head of state is also head of government (*v2exhoshog* = 1, *hosw* = 1). If the head of state has more power than the head of government over the appointment and dismissal of cabinet ministers, then *hosw* = 1; if the reverse is true, *hosw* = 0. If they share equal power, *hosw* = .5. Define the weight for the head of government as *hogw* = 1 – *hosw*. The formula then is:

$$v2x_elecoff = \& amp; \; hosw \times \max(a, b \times c1) + hogw \times \max(a \times d, b \times c1 \times d, e, b \times c2),$$

unless the head of state is directly elected (*v2ex_elech* = 1) and the chief executive (*v2ex_hosw* = 1), in case of which:

$$v2x_elecoff = \& amp; \; [hosw \times \max(a, b \times c1) + hogw \times \max(a \times d, b \times c1 \times d, e, b \times c2) + b]/2$$

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): Jan Teorell

ADDITIONAL VERSIONS: *_codelow, *_codehigh, *_sd

QUESTION: To what extent is the liberal principle of democracy achieved?

CLARIFICATION: The liberal principle of democracy emphasizes the importance of protecting individual and minority rights against the tyranny of the state and the tyranny of the majority. The liberal model takes a “negative” view of political power insofar as it judges the quality of democracy by the limits placed on government. This is achieved by constitutionally protected civil liberties, strong rule of law, an independent judiciary, and effective checks and balances that, together, limit the exercise of executive power.

SCALE: Interval, from low to high (0-1).

SOURCE(S): v2xcl_rol v2x_jucon v2xlg_legcon v2lgbicam

DATA RELEASE: 1-13.

AGGREGATION: This index is formed by averaging the following indices: equality before the law and individual liberties (v2xcl_rol), judicial constraints on the executive (v2x_jucon), and legislative constraints on the executive (v2xlg_legcon). Prior to the calculation v2xlg_legcon gets set to 0 whenever v2lgbicam is 0.

2.1.3.12 Participatory Component Index (v2x_partip)

Long tag: vdem_cd_v2x_partip

Original tag: v2x_partip

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Coppedge et al. (2015), v2x_cspart v2xdd_dd v2xel_locelec v2xel_regelec

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): Jan Teorell

ADDITIONAL VERSIONS: *_codelow, *_codehigh, *_sd

QUESTION: To what extent is the participatory principle achieved?

CLARIFICATION: The participatory principle of democracy emphasizes active participation by citizens in all political processes, electoral and non-electoral. It is motivated by uneasiness about a bedrock practice of electoral democracy: delegating authority to representatives. Thus, direct rule by citizens is preferred, wherever practicable. This model of democracy thus takes suffrage for granted, emphasizing engagement in civil society organizations, direct democracy, and subnational elected bodies.

SCALE: Interval, from low to high (0-1).

SOURCE(S): v2x_cspart v2xdd_dd v2xel_locelec v2xel_regelec

DATA RELEASE: 1-13.

AGGREGATION: This index is formed by averaging the following indices: civil society participation (v2x_cspart), elected local government power (v2xel_locelec) or elected regional government power (v2xel_regelec) — whichever has higher score — and direct popular vote (v2xdd_dd).

CITATION: Coppedge *et al.* (2015, *V-Dem Working Paper Series* 2015:6); *V-Dem Codebook* (see suggested citation at the top of this document).

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): Michael Bernhard

ADDITIONAL VERSIONS: *_codelow, *_codehigh, *_sd

QUESTION: Are major CSOs routinely consulted by policymakers; how large is the involvement of people in CSOs; are women prevented from participating; and is legislative candidate nomination within party organization highly decentralized or made through party primaries?

CLARIFICATION: The sphere of civil society lies in the public space between the private sphere and the state. Here, citizens organize in groups to pursue their collective interests and ideals. We call these groups civil society organizations CSOs. CSOs include, but are by no means limited to, interest groups, labor unions, spiritual organizations if they are engaged in civic or political activities, social movements, professional associations, charities, and other non-governmental organizations.

The core civil society index CCSI is designed to provide a measure of a robust civil society, understood as one that enjoys autonomy from the state and in which citizens freely and actively pursue their political and civic goals, however conceived.

SCALE: Interval, from low to high (0-1).

SOURCE(S): v2pscnslnl v2cscnsult v2csptrcpt v2csgender

DATA RELEASE: 1-13.

AGGREGATION: The index is formed by taking the point estimates from a Bayesian factor analysis model of the indicators for candidate selection — national/local (v2pscnslnl), CSO consultation (v2cscnsult), CSO participatory environment (v2csptrcpt), and CSO women participation (v2csgender).

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): David Altman

QUESTION: To what extent is the direct popular vote utilized?

CLARIFICATION: Direct popular voting refers here to an institutionalized process by which citizens of a region or country register their choice or opinion on specific issues through a ballot. It is intended to embrace initiatives, referendums, and plebiscites, as those terms are usually understood. It captures some aspects of the more general concept of direct democracy at the national level. The term does not encompass recall elections, deliberative assemblies, or settings in which the vote is not secret or the purview is restricted. Likewise, it

does not apply to elections for representatives.

SCALE: Interval, from low to high (0-1).

SOURCE(S): v2ddlexci v2ddsigpci v2ddsiglci v2ddsigdci v2ddpartci v2ddapprci v2ddspmc
 v2ddadmci v2ddyrci v2ddlexrf v2ddsigprf v2ddsigdrf v2ddpartrf v2ddapprf v2ddspmr

 v2ddlexor v2ddpartor v2ddappor v2ddspmor v2ddadmor v2ddyror v2ddthreor v2ddthref
 v2ddthrepl

DATA RELEASE: 1-13. New aggregation formula in version 7.

AGGREGATION: This index results from the addition of the weighted scores of each type of popular votes studied (popular initiatives $\times 1.5$, referendums $\times 1.5$, plebiscites, and obligatory referendums). Each type of popular vote receives a maximum score of two resulting from the addition of two terms (easiness of initiation and easiness of approval), where each term obtains a maximum value of one. As we are studying four types of popular votes, the minimum value is 0, and the maximum is 8. In the v2xdd_dd all scores are normalized to range between 0 and 1. For an elaboration of the weighting factor of each component, see: Altman, David. 2017.

The index is aggregated using this formula:

$$v2xdd_dd = \& amp; (v2xdd_i_ci) \times 1.5 + (v2xdd_i_rf) \times 1.5 \\
 \& amp; + (v2xdd_i_pl) + (v2xdd_i_or)$$

Regarding each type of citizen initiated popular vote (i.e., popular initiative), the ease of initiation is measured by (a) the existence of a direct democracy process (v2ddlexci), (b) the number of signatures needed (v2ddsigpci), and (c) time-limits to circulate the signatures (v2ddsigdci). Easiness of approval is measured by the surface of the polygon determined by (a) participation quorum (v2ddsigdci), (b) approval quorum (v2ddpartci), and (c) supermajority (v2ddspmc). The resulting score is then multiplied with (d) district majority (v2ddadmci). Consequences are measured by (a) the legal status of the decision made by citizens (binding or merely consultative) (v2ddlexci), and (b) the frequency and degree of success with which direct popular votes have been held in the past (v2ddthreci). The index is aggregated using this formula:

$$v2xdd_dd = \& \text{amp; } [(IF\ v2ddlexigt; 0, 1, 0) \times (1 - (v2ddsigpci)) \times (IF\ v2ddlexici = 2, 1, 0.75, v2ddlexici = 0, 0) \times (IF\ v2ddthreci = 1, \text{ afterwards decreases by } 0.06 \text{ units per year until } 0.1; \text{ if the event was not successful during the first years } v2ddapprci = 0.9, \text{ afterwards decreases by } 0.1 \text{ units per year until } 0.1)]$$

In case the vote originates from above (i.e., authorities), there is no need to account for v2ddsigpci and v2ddsigdci. For an elaboration of the interaction among quorums, $(v2ddsigdci) \cap (v2ddpartci) \cap (v2ddspmcici)$, see Altman, David. 2017.

2.1.3.15 Local government index (v2xel_locelec)

Long tag: vdem_cd_v2xel_locelec

Original tag: v2xel_locelec

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: v2ellocelc v2ellocpwr v2ellocgov

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): Kelly McMann, Jan Teorell

ADDITIONAL VERSIONS: *_codelow, *_codehigh, *_sd

QUESTION: Are there elected local governments, and — if so — to what extent can they operate without interference from unelected bodies at the local level?

CLARIFICATION: The lowest score would be reserved for a country that has no elected local governments. A medium score would be accorded a country that has elected local governments but where those governments are subordinate to unelected officials at the local level perhaps appointed by a higher-level body. A high score would be accorded to a country in which local governments are elected and able to operate without restrictions from unelected actors at the local level with the exception of judicial bodies. Naturally, local governments remain subordinate to the regional and national governments.

SCALE: Interval, from low to high (0-1).

SOURCE(S): v2ellocelc v2ellocpwr v2ellocgov

DATA RELEASE: 1-13.

AGGREGATION: First, local government elected (v2ellocelc) is recoded so that 0=none elected, 1=only executive elected, 2=only assembly elected, and 3=both elected.

This new construct is then scaled to vary from 0-1 and multiplied by local offices relative power (v2ellocpwr) scaled to vary from 0-1. v2xel_locelec is set to 0 whenever v2ellocgv is 0 (there is no local government).

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): Jan Teorell

ADDITIONAL VERSIONS: *_codelow, *_codehigh, *_sd

QUESTION: To what extent is the deliberative principle of democracy achieved?

CLARIFICATION: The deliberative principle of democracy focuses on the process by which decisions are reached in a polity. A deliberative process is one in which public reasoning

focused on the common good motivates political decisions—as contrasted with emotional appeals, solidary attachments, parochial interests, or coercion. According to this principle, democracy requires more than an aggregation of existing preferences. There should also be respectful dialogue at all levels—from preference formation to final decision—among informed and competent participants who are open to persuasion.

To measure these features of a polity we try to determine the extent to which political elites give public justifications for their positions on matters of public policy, justify their positions in terms of the public good, acknowledge and respect counter-arguments; and how wide the range of consultation is at elite levels.

SCALE: Interval, from low to high (0-1).

SOURCE(S): v2dlreason v2dlcommon v2dlcountr v2dlconslt v2dlengage

DATA RELEASE: 1-13.

AGGREGATION: The index is formed by point estimates drawn from a Bayesian factor analysis model including the following indicators: reasoned justification (v2dlreason), common good justification (v2dlcommon), respect for counterarguments (v2dlcountr), range of consultation (v2dlconslt), and engaged society (v2dlengage).

CITATION: Coppedge *et al.* (2015, *V-Dem Working Paper Series* 2015:6); Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

Variable citation: Sigman & Lindberg (2015), Coppedge *et al.* (2015), v2xeg_eqprotec v2xeg_eqaccess v2xeg_eqdr

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): Rachel Sigman, Staffan Lindberg

ADDITIONAL VERSIONS: *_codelow, *_codehigh, *_sd

QUESTION: To what extent is the egalitarian principle achieved?

CLARIFICATION: The egalitarian principle of democracy holds that material and immaterial inequalities inhibit the exercise of formal rights and liberties, and diminish the ability of citizens from all social groups to participate. Egalitarian democracy is achieved when 1 rights and freedoms of individuals are protected equally across all social groups; 2 resources are distributed equally across all social groups; and 3 access to power is equally distributed by gender, socioeconomic class and social group.

SCALE: Interval, from low to high (0-1).

SOURCE(S): v2xeg_eqprotec v2xeg_eqaccess v2xeg_eqdr

DATA RELEASE: 1-13. Release 1-4 used a different, preliminary aggregation formula, 5-8 modified aggregation formula including v2xeg_eqaccess.

AGGREGATION: This index is formed by averaging the following indices: equal protection index (v2xeg_eqprotec), equal access index (v2xeg_eqaccess) and equal distribution of resources (v2xeg_eqdr).

CITATION: Sigman *et al.* (2015, *V-Dem Working Paper Series* 2015:22); Coppedge *et al.* 2015, *V-Dem Working Paper Series* 2015:6; *V-Dem Codebook* (see suggested citation at the top of this document).

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Sigman & Lindberg (2015), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023), v2dlencmps v2dlunivl v2peedueq v2pehealth

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): Rachel Sigman, Staffan Lindberg

ADDITIONAL VERSIONS: *_codelow, *_codehigh, *_sd

QUESTION: How equal is the distribution of resources?

CLARIFICATION: This component measures the extent to which resources — both tangible and intangible — are distributed in society. An equal distribution of resources supports egalitarian democracy in two ways. First, lower poverty rates and the distribution of goods and services such as food, water, housing, education and healthcare ensure that all individuals are capable of participating in politics and government. In short, basic needs must be met in order for individuals to effectively exercise their rights and freedoms see, for example, Sen 1999, Maslow 1943. Second, high levels of resource inequality undermine the ability of poorer populations to participate meaningfully Aristotle, Dahl 2006. Thus, it is necessary to include not only measures of poverty and the distribution of goods and services, but also the levels of inequality in these distributions, and the proportion of the population who are not eligible for social services *i.e.* means-tests, particularistic distribution, etc.. This principle also implies that social or economic inequalities can translate into political inequalities, an issue addressed most notably by Walzer 1983, who argues that overlapping "spheres" of inequality are particularly harmful to society. To address these overlapping "spheres", this component also includes measures of the distribution of power in society amongst different socio-economic groups, genders, etc.

SCALE: Interval, from low to high (0-1).

SOURCE(S): v2dlencmps v2dlunivl v2peedueq v2pehealth

DATA RELEASE: 5, 7-13. Release 7 modified: v2pepwrse, v2pepwrso and v2pepwrge now form a separate subcomponent index.

AGGREGATION: The index is formed by taking the point estimates from a Bayesian factor analysis model of the indicators for particularistic or public goods v2dlencmps, means tested vs. universalistic welfare policies v2dlunivl, educational equality v2peedueq and health equality v2pehealth.

YEARS: 1900-2022

CONVERGENCE: Model parameters with convergence issues: intercept.

2.1.4 V-Dem Indicators - Elections

Instructions to the coders (as shown in the surveys) Elections: Among national elections we distinguish elections to: (i) the lower or unicameral chamber of the legislature (including constituent or constitutional assemblies), (ii) the upper chamber of the legislature, and (iii) the presidency. For present purposes an executive who is elected by a legislature is considered a *prime minister*, not a president. In order to be considered a *president*, an executive must, under ordinary circumstances, be chosen directly by the electorate (perhaps mediated by an electoral college).

Non-election specific coding: The following questions are not election-specific and should be coded for every year from 1900 (or when applicable) to the present.

Election specific questions: The following questions pertain to specific national elections. The date of each election is pre-coded. In cases where more than one election is held on the same day(s), the questions in this section are for all elections taking place on that date. If you have coded for V-Dem in the past, your previous scores will be displayed in the survey. You are welcome to revise previously submitted scores in all surveys. For this section, we kindly ask you make sure that you have coded all election years.

Election specific questions – Historical clarification: The following questions pertain to specific national elections. National elections include elections to the presidency (if applicable) and legislature (lower and upper house, whatever applies), whether direct or indirect, as well as constituent assembly elections. It does not include other elections, *e.g.*, subnational elections, plebiscites, initiatives, referendums, or by-elections. The date of each election is pre-coded. In cases where more than one election is held on the same day(s), the questions in this section are for all elections taking place on that date."

Subnational elections and offices: This section of the survey asks a small number of questions about *subnational* elections and offices. You will be instructed to identify two subnational levels, referred to as "regional government" and "local government". Questions in this section should be answered for every year, rather than for specific elections.

Lower chamber election: The following questions pertain to specific lower chamber or unicameral legislative elections. The dates of these elections have been pre-coded.

Executive and legislative versions of Election specific variables

- In order to subset election specific variables for executive elections only (previously *_ex) – keep only those observations where v2xel_elecpres is 1.
- In order to subset election specific variables for legislative elections only (previously *_leg) – keep only those observations where v2xel_elecparl is 1.

2.1.4.1 Election type (v2eltype)

Long tag: vdem_cd_v2eltype

Original tag: v2eltype

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Hyde & Marinov (2012), Marshall & Jagers (2020)

NELDA (Hyde and Marinov 2012); Chronicle of Parliamentary Elections (IPU); IFES; IDEA; Reif (2011, 2012); Polity IV (Marshall, Jagers 2007); *Keesings Records*; *CIA Factbook*; Wikipedia.

Description:

VARIABLE TYPE: A*

PROJECT MANAGER(S): Staffan I. Lindberg

QUESTION: What type of election was held on this date?

CLARIFICATION: Choose all that apply. Whenever possible, specify the exact date of each election. If the election unfolds across more than one day, enter the date for the first day. If the precise date is unavailable, enter the first of the month; if the month is unknown, enter January 1. Multiple-round elections (*e.g.*, two-round elections) are counted separately. (More than one election in a single year can be accommodated.)

RESPONSES:

0: Legislative; lower, sole, or both chambers, first or only round. (0=No, 1=Yes) [v2eltype_0]

1: Legislative, lower, sole, or both chambers, second round. (0=No, 1=Yes) [v2eltype_1]

2: Legislative, upper chamber only, first or only round. (0=No, 1=Yes) [v2eltype_2] (Not yet coded)

3: Legislative, upper chamber only, second round. (0=No, 1=Yes) [v2eltype_3] (Not yet coded)

4: Constituent Assembly, first or only round. (0=No, 1=Yes) [v2eltype_4]

5: Constituent Assembly, second round. (0=No, 1=Yes) [v2eltype_5]

6: Presidential, first or only round. (0=No, 1=Yes) [v2eltype_6]

7: Presidential, second round. (0=No, 1=Yes) [v2eltype_7]

8: Metropolitan or supranational legislative, first or only round. (0=No, 1=Yes) [v2eltype_8]

(Not yet coded)

9: Metropolitan or supranational legislative, second round. (0=No, 1=Yes) [v2eltype_9] (Not yet coded)

SCALE: Series of dichotomous scales.

ANSWER-TYPE: Multiple selection.

SOURCE(S): NELDA (Hyde and Marinov 2012); Chronicle of Parliamentary Elections (IPU); IFES; IDEA; Reif (2011, 2012); Polity IV (Marshall, Jaggers 2007); *Keesings Records*; *CIA Factbook*; Wikipedia.

NOTES: All direct elections and elections by an electoral college that is elected by the people and has the sole purpose of electing an executive or members of parliament are coded. Note that single-party elections, elections held under limited suffrage and for only parts of a parliament, as well as elections of which the results are subsequently cancelled are included. Elections for constituent assemblies that come to perform functions beyond drafting and adopting a new constitution (*e.g.* legislating, electing president, adopting budget, etc) are also included and coded under category 0 and 1 (Legislative; lower, sole, or both chambers; first or second round). Excluded are elections that are not decisive, *i. e.* when the HOS alone is selecting the candidate(s). The variable includes elections where results were declared invalid after the fact, *e.g.* by a constitutional court, since they also provide information on the quality of democracy.

DATA RELEASE: 1-13.

Description:

VARIABLE TYPE: A

PROJECT MANAGER(S): Staffan I. Lindberg

QUESTION: What is the approximate percentage of enfranchised adults older than the minimal voting age?

CLARIFICATION: This question does not take into consideration restrictions based on age, residence, having been convicted for crime, being in the military service or being legally incompetent.

This variable, in contrast to v2elsuffrage, covers *de facto* enfranchised adults and not *de jure*. For example, the scores reflect whether an electoral regime was interrupted or not. If an electoral regime is interrupted (see v2x_elecreg), v2asuffrage is zero while v2elsuffrage may still be 100.

The adult population (as defined by statute) is defined by citizens in the case of independent countries or the people living in the territorial entity in the case of colonies.

RESPONSES:

Percent.

SCALE: Interval.

Description:

VARIABLE TYPE: A

PROJECT MANAGER(S): Megan Reif

QUESTION: What is the level of suffrage practiced?

CLARIFICATION: Note that this question applies to citizens only. Note also that we are interested in legal (*de jure*) restrictions, not restrictions that may be operative in practice (*de facto*). In cases where married people are allowed to vote at a younger age than single people, the higher (older) age minimum for single voters is given (see v2elage).

RESPONSES:

0: Indirect suffrage and/or offices filled by appointment only

1: Propertied ethnic males

2: Ethnic males

3: Propertied/educated males

4: Ethnic males and females

5: Propertied/educated males and females

6: All males

7: Spatially variant

8: Universal

9: Occupational categories/Party membership

10: Only citizens of colonial metropole

11: Propertied/tax-paying colons and non-colons

12: Propertied males and military females

13: Propertied/landowning households

14: All households
15: All males and married Females
16: Age differential: Married people vote at younger age than single
SCALE: Nominal.

2.1.4.7 Percent of population with suffrage (v2elsuffrage)

Long tag: vdem_cd_v2elsuffrage

Original tag: v2elsuffrage

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Elkins *et al.* (2014), IDEA, Nohlen *et al.* (1999, 2002), Nohlen (2005), Nohlen & Stöver (2010), country-specific sources

Description:

VARIABLE TYPE: A

PROJECT MANAGER(S): Svend-Erik Skaaning

QUESTION: What percentage (percent) of adult citizens (as defined by statute) has the legal right to vote in national elections?

CLARIFICATION: This question does not take into consideration restrictions based on age, residence, having been convicted for crime, being in the military service or being legally incompetent. It covers legal (*de jure*) restrictions, not restrictions that may be operative in practice (*de facto*). The adult population (as defined by statute) is defined by citizens in the case of independent countries or the people living in the territorial entity in the case of colonies.

Universal suffrage is coded as 100percent. Universal male suffrage is only coded as 50percent. Years before electoral provisions are introduced are scored 0percent. The scores do not reflect whether an electoral regime was interrupted or not. Only if new constitutions, electoral laws, or the like explicitly introduce new regulations of suffrage, the scores were adjusted accordingly if the changes suggested doing so. If qualifying criteria other than gender apply (such as property, tax payments, income, literacy, region, race, ethnicity, religion, and/or 'economic independence'), estimates have been calculated by combining information on the restrictions with different kinds of statistical information (on population size, age distribution, wealth distribution, literacy rates, size of ethnic groups, etc.), secondary country-specific sources, and — in the case of very poor information — the conditions in similar countries or colonies.

The scores reflect *de jure* provisions of suffrage extension in percentage of the adult population. If the suffrage law is revised in a way that affects the extension, the scores reflect this change as of the calendar year the law was enacted.

RESPONSES:

Percent.

SCALE: Interval.

SOURCE(S): CCP (Elkins *et al.* 2012); IDEA; Nohlen *et al.* (1999, 2002, 2005, 2010); country-specific sources.

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Staffan I. Lindberg

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Does the Election Management Body (EMB) have autonomy from government to apply election laws and administrative rules impartially in national elections?

CLARIFICATION: The EMB refers to whatever body (or bodies) is charged with administering national elections.

RESPONSES:

0: No. The EMB is controlled by the incumbent government, the military, or other *de facto* ruling body.

1: Somewhat. The EMB has some autonomy on some issues but on critical issues that influence the outcome of elections, the EMB is partial to the *de facto* ruling body.

2: Ambiguous. The EMB has some autonomy but is also partial, and it is unclear to what extent this influences the outcome of the election.

3: Almost. The EMB has autonomy and acts impartially almost all the time. It may be influenced by the *de facto* ruling body in some minor ways that do not influence the outcome of elections.

4: Yes. The EMB is autonomous and impartially applies elections laws and administrative rules.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

2.1.4.15 Elections multiparty (v2elmulpar)

Long tag: vdem_cd_v2elmulpar

Original tag: v2elmulpar

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Staffan I. Lindberg

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Was this national election multiparty?

RESPONSES:

0: No. No-party or single-party and there is no meaningful competition (includes situations where a few parties are legal but they are all *de facto* controlled by the dominant party).

1: Not really. No-party or single-party (defined as above) but multiple candidates from the

same party and/or independents contest legislative seats or the presidency.

2: Constrained. At least one real opposition party is allowed to contest but competition is highly constrained — legally or informally.

3: Almost. Elections are multiparty in principle but either one main opposition party is prevented (*de jure* or *de facto*) from contesting, or conditions such as civil unrest (excluding natural disasters) prevent competition in a portion of the territory.

4: Yes. Elections are multiparty, even though a few marginal parties may not be permitted to contest (*e.g.* far-right/left extremist parties, anti-democratic religious or ethnic parties).

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

DATE SPECIFIC: Election-specific dates (v2eltype).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

2.1.4.16 Election voter registry (v2elrgstry)

Long tag: vdem_cd_v2elrgstry

Original tag: v2elrgstry

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Staffan I. Lindberg

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: In this national election, was there a reasonably accurate voter registry in place and was it used?

RESPONSES:

0: No. There was no registry, or the registry was not used.

1: No. There was a registry but it was fundamentally flawed (meaning 20percent or more of eligible voters could have been disenfranchised or the outcome could have been affected significantly by double-voting and impersonation).

2: Uncertain. There was a registry but it is unclear whether potential flaws in the registry had much impact on electoral outcomes.

3: Yes, somewhat. The registry was imperfect but less than 10percent of eligible voters may have been disenfranchised, and double-voting and impersonation could not have affected the results significantly.

4: Yes. The voter registry was reasonably accurate (less than 1percent of voters were affected by any flaws) and it was applied in a reasonable fashion.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

DATE SPECIFIC: Election-specific dates (v2eltype).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

2.1.4.17 Election vote buying (v2elvotbuy)

Long tag: vdem_cd_v2elvotbuy

Original tag: v2elvotbuy

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Staffan I. Lindberg

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: In this national election, was there evidence of vote and/or turnout buying?

CLARIFICATION: Vote and turnout buying refers to the distribution of money or gifts to individuals, families, or small groups in order to influence their decision to vote/not vote or whom to vote for. It does not include legislation targeted at specific constituencies, *i.e.*, 'porkbarrel' legislation.

RESPONSES:

0: Yes. There was systematic, widespread, and almost nationwide vote/turnout buying by almost all parties and candidates.

1: Yes, some. There were non-systematic but rather common vote-buying efforts, even if only in some parts of the country or by one or a few parties.

2: Restricted. Money and/or personal gifts were distributed by parties or candidates but these offerings were more about meeting an 'entry-ticket' expectation and less about actual vote choice or turnout, even if a smaller number of individuals may also be persuaded.

3: Almost none. There was limited use of money and personal gifts, or these attempts were limited to a few small areas of the country. In all, they probably affected less than a few percent of voters.

4: None. There was no evidence of vote/turnout buying.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

DATE SPECIFIC: Election-specific dates (v2eltype).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

2.1.4.18 Election other voting irregularities (v2elirreg)

Long tag: vdem_cd_v2elirreg

Original tag: v2elirreg

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Staffan I. Lindberg

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: In this national election, was there evidence of other *intentional* irregularities by incumbent and/or opposition parties, and/or vote fraud?

CLARIFICATION: Examples include use of double IDs, intentional lack of voting materials, ballot-stuffing, misreporting of votes, and false collation of votes. This question does not refer to lack of access to registration, harassment of opposition parties, manipulations of the voter registry or vote-buying (dealt with in previous questions).

RESPONSES:

0: Yes. There were systematic and almost nationwide other irregularities.

1: Yes, some. There were non-systematic, but rather common other irregularities, even if only in some parts of the country.

2: Sporadic. There were a limited number of sporadic other irregularities, and it is not clear whether they were intentional or disfavored particular groups.

3: Almost none. There were only a limited number of irregularities, and many were probably unintentional or did not disfavor particular groups' access to participation.

4: None. There was no evidence of intentional other irregularities. Unintentional irregularities resulting from human error and/or natural conditions may still have occurred.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

DATE SPECIFIC: Election-specific dates (v2eltype).

2.1.4.19 Election government intimidation (v2elintim)

Long tag: vdem_cd_v2elintim

Original tag: v2elintim

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Staffan I. Lindberg

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: In this national election, were opposition candidates/parties/campaign workers subjected to repression, intimidation, violence, or harassment by the government, the ruling party, or their agents?

CLARIFICATION: Other types of clearly distinguishable civil violence, even if politically motivated, during the election period should *not* be factored in when scoring this indicator (it is dealt with separately).

RESPONSES:

0: Yes. The repression and intimidation by the government or its agents was so strong that the entire period was quiet.

1: Yes, frequent: There was systematic, frequent and violent harassment and intimidation of the opposition by the government or its agents during the election period.

2: Yes, some. There was periodic, not systematic, but possibly centrally coordinated — harassment and intimidation of the opposition by the government or its agents.

3: Restrained. There were sporadic instances of violent harassment and intimidation by the government or its agents, in at least one part of the country, and directed at only one or two local branches of opposition groups.

4: None. There was no harassment or intimidation of opposition by the government or its agents, during the election campaign period and polling day.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

DATE SPECIFIC: Election-specific dates (v2eltype).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

CONVERGENCE: Model parameters with convergence issues: universal thresholds.

2.1.4.20 Election other electoral violence (v2elpeace)

Long tag: vdem_cd_v2elpeace

Original tag: v2elpeace

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Staffan I. Lindberg

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: In this national election, was the campaign period, election day, and post-election process free from other types (*not* by the government, the ruling party, or their agents) of violence related to the conduct of the election and the campaigns (but not conducted by the government and its agents)?

RESPONSES:

0: No. There was widespread violence between civilians occurring throughout the election period, or in an intense period of more than a week and in large swaths of the country. It resulted in a large number of deaths or displaced refugees.

1: Not really. There were significant levels of violence but not throughout the election period or beyond limited parts of the country. A few people may have died as a result, and some people may have been forced to move temporarily.

2: Somewhat. There were some outbursts of limited violence for a day or two, and only in a small part of the country. The number of injured and otherwise affected was relatively small.

3: Almost. There were only a few instances of isolated violent acts, involving only a few people; no one died and very few were injured.

4: Peaceful. No election-related violence between civilians occurred.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

DATE SPECIFIC: Election-specific dates (v2eltype).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

CONVERGENCE: Model parameters with convergence issues: universal thresholds.

2.1.4.21 Election boycotts (v2elboycot)

Long tag: vdem_cd_v2elboycot

Original tag: v2elboycot

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Staffan I. Lindberg

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: In this national election, did any registered opposition candidates or parties boycott?

CLARIFICATION: A boycott is a deliberate and public refusal to participate in an election by a candidate or party who is eligible to participate.

RESPONSES:

0: Total. All opposition parties and candidates boycotted the election.

1: Significant. Some but not all opposition parties or candidates boycotted but they constituted a major opposition force.

2: Ambiguous. Some but not all opposition parties or candidates boycotted but it is unclear whether they would have constituted a major electoral force.

3: Minor. A few opposition parties or candidates boycotted and they were relatively insignificant ones.

4: Nonexistent. No parties or candidates boycotted the elections.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

DATE SPECIFIC: Election-specific dates (v2eltype).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

2.1.4.22 Election free campaign media (v2elfrcamp)

Long tag: vdem_cd_v2elfrcamp

Original tag: v2elfrcamp

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Staffan I. Lindberg

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: In this national election, did parties or candidates receive either free or publicly financed access to national broadcast media?

RESPONSES:

0: Either no parties or only the governing party receives free access.

1: Some parties in addition to the governing party receive free access.

2: All parties receive free access.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

DATE SPECIFIC: Election-specific dates (v2eltype).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1900-2022

2.1.4.23 Election paid campaign advertisements (v2elpdcamp)

Long tag: vdem_cd_v2elpdcamp

Original tag: v2elpdcamp

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Staffan I. Lindberg

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: In this national election, were parties or candidates able to run paid campaign ads on national broadcast media?

RESPONSES:

0: Not at all.

1: It is permitted but regulated in ways that, in practice, favor the government and its allies.

2: It is permitted without limit.

3: It is permitted but regulated in ways that, in practice, foster fair competition.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

DATE SPECIFIC: Election-specific dates (v2eltype).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1900-2022

CONVERGENCE: Model parameters with convergence issues: universal thresholds, expert thresholds, main-country-coded thresholds.

2.1.4.24 Election paid interest group media (v2elpaidig)

Long tag: vdem_cd_v2elpaidig

Original tag: v2elpaidig

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Michael Coppedge

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: In this election, were interest groups and individuals able to run paid campaign ads on national broadcast media?

RESPONSES:

0: Not at all.

1: It is permitted but regulated in ways that, in practice, favor groups allied with the government.

2: It is permitted without limit.

3: It is permitted but regulated in ways that, in practice, foster representation of diverse perspectives.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

DATE SPECIFIC: Election-specific dates (v2eltype).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1900-2022

2.1.4.25 Election free and fair (v2elfrfair)

Long tag: vdem_cd_v2elfrfair

Original tag: v2elfrfair

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Staffan I. Lindberg

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Taking all aspects of the pre-election period, election day, and the post-election process into account, would you consider this national election to be free and fair?

CLARIFICATION: The only thing that should *not* be considered in coding this is the extent of suffrage (by law). Thus, a free and fair election may occur even if the law excludes significant groups (an issue measured separately).

RESPONSES:

0: No, not at all. The elections were fundamentally flawed and the official results had little if anything to do with the 'will of the people' (*i.e.*, who became president; or who won the legislative majority).

1: Not really. While the elections allowed for some competition, the irregularities in the end affected the outcome of the election (*i.e.*, who became president; or who won the legislative majority).

2: Ambiguous. There was substantial competition and freedom of participation but there were also significant irregularities. It is hard to determine whether the irregularities affected the outcome or not (as defined above).

3: Yes, somewhat. There were deficiencies and some degree of fraud and irregularities but these did not in the end affect the outcome (as defined above).

4: Yes. There was some amount of human error and logistical restrictions but these were largely unintentional and without significant consequences.

SCALE: Ordinal, converted to interval by the measurement model.
DATA RELEASE: 1-13.
CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).
DATE SPECIFIC: Election-specific dates (v2eltype).
CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).
YEARS: 1789-2022

2.1.4.26 Election domestic election monitors (v2eldommon)

Long tag: vdem_cd_v2eldommon

Original tag: v2eldommon

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: A
PROJECT MANAGER(S): Staffan I. Lindberg
QUESTION: In this national election, were election monitors from all parties and independent domestic election monitors allowed to monitor the vote at polling stations across the country?
RESPONSES:
0: No
1: Yes
SCALE: Dichotomous.
DATA RELEASE: 1-13.
COUNTRY-YEAR AGGREGATION: Maximum
DATE SPECIFIC: Election-specific dates (v2eltype).
CITATION: *V-Dem Codebook* (see suggested citation at the top of this document).
YEARS: 1900-2022

2.1.4.27 Election international monitors (v2elintmon)

Long tag: vdem_cd_v2elintmon

Original tag: v2elintmon

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Hyde & Marinov (2012), IDEA, websites by international election monitors

Description:

VARIABLE TYPE: A
PROJECT MANAGER(S): Staffan I. Lindberg
QUESTION: In this national election, were international election monitors present?
RESPONSES:
0: No/Unclear
1: Yes
SCALE: Dichotomous.
SOURCE(S): NELDA 45 (Hyde and Marinov 2012); IDEA; websites by international election monitors.
DATA RELEASE: 1-13.
COUNTRY-YEAR AGGREGATION: Maximum
DATE SPECIFIC: Election-specific dates (v2eltype).
CITATION: *V-Dem Codebook* (see suggested citation at the top of this document).
YEARS: 1900-2022

2.1.4.28 Election international monitors denied (v2elmonden)

Long tag: vdem_cd_v2elmonden

Original tag: v2elmonden

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Hyde & Marinov (2012), IDEA, websites by international election monitors

Description:

VARIABLE TYPE: A

PROJECT MANAGER(S): Staffan I. Lindberg

QUESTION: In this national election, were some international election monitors denied opportunity to be present by the government holding the election?

RESPONSES:

0: No/Unclear

1: Yes

SCALE: Dichotomous.

SOURCE(S): NELDA 48 (Hyde and Marinov 2012); IDEA; websites by international election monitors.

DATA RELEASE: 1-13.

2.1.4.30 Candidate restriction by ethnicity, race, religion, or language (v2elrstrct)

Long tag: vdem_cd_v2elrstrct

Original tag: v2elrstrct

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: V-Dem country coordinators, Chronicle of Parliamentary Elections (IPU), Elkins et al. (2014), Constitute Project, ACE Electoral Knowledge Network

Description:

VARIABLE TYPE: A
PROJECT MANAGER(S): Staffan I. Lindberg
QUESTION: Is the eligibility of candidates for national legislative office (when elected) formally restricted (by constitution or statute) by ethnicity, race, religion, or language?
CLARIFICATION: Language restriction should be understood as a restriction of spoken language, not literacy.
RESPONSES:
0: Yes, there are such statutory restrictions.
1: No, there are no such restrictions or the candidates are not elected.
SCALE: Dichotomous.
SOURCE(S): V-Dem country coordinators; Chronicle of Parliamentary Elections (IPU); CCP (Elkins *et al.* 2012), v221, v250; Constitute Project; ACE Electoral Knowledge Network.
NOTES: Converted from (B) to (A) coding.
DATA RELEASE: 1-13.
COUNTRY-YEAR AGGREGATION: Last
CITATION: *V-Dem Codebook* (see suggested citation at the top of this document).
YEARS: 1900-2022

2.1.4.31 Election losers accept results (v2elaccept)

Long tag: vdem_cd_v2elaccept

Original tag: v2elaccept

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C
PROJECT MANAGER(S): Staffan I. Lindberg
ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr
QUESTION: Did losing parties and candidates accept the result of this national election within three months?
RESPONSES:
0: None. None of the losing parties or candidates accepted the results the election, or all opposition was banned.
1: A few. Some but not all losing parties or candidates accepted the results but those who constituted the main opposition force did not.
2: Some. Some but not all opposition parties or candidates accepted the results but it is unclear whether they constituted a major opposition force or were relatively insignificant.
3: Most. Many but not all opposition parties or candidates accepted the results and those who did not had little electoral support.
4: All. All parties and candidates accepted the results.
SCALE: Ordinal, converted to interval by the measurement model.
DATA RELEASE: 1-13.
CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).
DATE SPECIFIC: Election-specific dates (v2eltype).
CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).
YEARS: 1789-2022

2.1.4.32 Election assume office (v2elasmoff)

Long tag: vdem_cd_v2elasmoff

Original tag: v2elasmoff

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Staffan I. Lindberg

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Following this national election, did winners assume office according to prescribed constitutional rules and norms?

RESPONSES:

0: No. The official winner of the election was prevented from assuming office by *unconstitutional* means.

1: Partially. The official winner/winning party or largest vote-getter was forced at least in part by unconstitutional means to share power, or delay assuming power for more than 6 months.

2: Yes. Constitutional rules and norms were followed and the official winner/winning party or largest vote-getter assumed office accordingly (or continued in office).

SCALE: Ordinal, converted to interval by the measurement model.

NOTES: The question text between contemporary and historical differ in inclusion of "within 12 months of the election". In contemporary it is excluded while included in historical.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

DATE SPECIFIC: Election-specific dates (v2eltype).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

2.1.4.33 Election turnout (v2eltrnout)

Long tag: vdem_cd_v2eltrnout

Original tag: v2eltrnout

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: IDEA; Nohlen *et al.* (1999, 2002), Nohlen (2005), Nohlen & Stöver (2010), Hyde & Marinov (2012), IPU Parline, Election Guide

Description:

VARIABLE TYPE: A

PROJECT MANAGER(S): Pamela Paxton

QUESTION: In this national election, what percentage (percent) of all registered voters cast a vote according to official results?

RESPONSES:

Percent.

SOURCE(S): IDEA; Nohlen *et al.* (1999, 2002, 2005, 2010); NELDA (Hyde and Marinov 2012); IPU Parline; Election Guide.

NOTES: In cases where executive and legislative elections were held on the same day but there is a different turnout for each election, the turnout for this date is coded for the executive elections only. The turnout data for the legislative elections, in these cases, can be found in the IDEA Voter turnout database (see references).

DATA RELEASE: 6-13.

COUNTRY-YEAR AGGREGATION: Maximum

DATE SPECIFIC: Election-specific dates (v2eltype).

CITATION: *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1790-2022

2.1.4.34 Election VAP turnout (v2elvaptrn)

Long tag: vdem_cd_v2elvaptrn

Original tag: v2elvaptrn

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: IDEA (VAP figures are estimates and should be treated as such)

Description:

VARIABLE TYPE: A

PROJECT MANAGER(S): Pamela Paxton

QUESTION: In this national election, what percentage (percent) of the adult voting-age population cast a vote according to official results?

CLARIFICATION: The VAP can reflect irregularities such as problems with the voters' register or registration system. VAP numbers are estimates since they do not take into account legal or systemic barriers to the exercise of the franchise or account for non-eligible members of the population. Thus, it can occur that VAP values surpass 100 which is not an error but reflects such conditions.

RESPONSES:

Percent.

SCALE: Interval.

SOURCE(S): IDEA (VAP figures are estimates and should be treated as such).

NOTES: In cases where executive and legislative elections were held on the same day but there is a different VAP turnout for each election, the VAP turnout for this date is coded for the executive elections only. The VAP turnout data for the legislative elections, in these cases, can be found in the IDEA Voter turnout database (see references).

DATA RELEASE: 1-13.

COUNTRY-YEAR AGGREGATION: Maximum

DATE SPECIFIC: Election-specific dates (v2eltype).

CITATION: *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1830-2022

2.1.4.39 Presidential elections cumulative (v2elprescumul)

Long tag: vdem_cd_v2elprescumul

Original tag: v2elprescumul

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: v2eltype

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): Staffan I. Lindberg

QUESTION: How many presidential elections including the current election have been held since 1900?

CLARIFICATION: This counts the cumulative number of presidential elections, regardless of any constitutional or unconstitutional changes and interruptions that may have taken place. Do not code if there is no office of the presidency. However, if there is a presidency, and no elections have ever occurred, this should be recorded as 0.

SCALE: Interval, from low to high (0-1).

SOURCE(S): v2eltype

DATA RELEASE: 5-13.

DATE SPECIFIC: Presidential election dates (v2eltype_6, v2eltype_7)

CITATION: *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1900-2022

2.1.4.40 HOG restriction by ethnicity, race, religion, or language (v2elrsthog)

Long tag: vdem_cd_v2elrsthog

Original tag: v2elrsthog

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Elkins et al. (2014), National constitutions, IPU Parline, IDEA, ACE Electoral Knowledge Network

Description:

VARIABLE TYPE: A

PROJECT MANAGER(S): Staffan I. Lindberg

QUESTION: Is the eligibility of candidates for the office of head of government (when elected) formally restricted (by constitution or statute) by ethnicity, race, religion, or language?

CLARIFICATION: Language restriction should be understood as a restriction of spoken language, not literacy.

RESPONSES:

0: Yes, there are such statutory restrictions.

1: No, there are no such restrictions or the candidates are not elected.

Description:

VARIABLE TYPE: A

PROJECT MANAGER(S): Staffan I. Lindberg

QUESTION: Is the eligibility of candidates for the office of head of state (when elected) formally restricted (by constitution or statute) by ethnicity, race, religion, or language?

CLARIFICATION: Language restriction should be understood as a restriction of spoken language, not literacy.

RESPONSES:

0: Yes, there are such statutory restrictions.

1: No, there are no such restrictions or the candidates are not elected.

SCALE: Dichotomous.

2.1.4.42 Election HOG turnover ordinal (v2elturnhog)

Long tag: vdem_cd_v2elturnhog

Original tag: v2elturnhog

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Henisz (2000, 2002), Lentz (1994, 1999), www.worldstatesmen.org, Election Guide, IDEA IPU Parline, V-Dem Country Coordinators

Description:

VARIABLE TYPE: A

PROJECT MANAGER(S): Staffan I. Lindberg

QUESTION: Was there turnover in the office of the head of government (HOG) as a result of this national election?

CLARIFICATION: Turnover can occur in presidential, semi-presidential, as well as parliamentary systems, and it refers not only to the individual person holding office but also to that person's party. If the HOS and HOG are the same person, the coding is the same for the two variables. The second round of election is coded as the first.

RESPONSES:

0: No. The head of government- retained his/her position either as a result of the outcome of the election, or because the elections do not affect the HOG.

1: Half. The head of government is a different individual than before the election but from the same party that was in power before the election, or a new independent candidate is elected. In parliamentary systems this code applies when the head of government changes as an effect of alternations in the ruling coalition, changes in party leadership.

2: Yes. The executive(s) - head of state and head of government- lost their position(s) as a result of the outcome of the election. In presidential systems this code applies when the new president is both a different person and from a different party than before the election or an independent candidate is elected. In parliamentary systems the ruling party or coalition of parties lost and the new head of government is from a different party or from a new coalition. This code also applies if this is the first head of government elected for a newly (semi-) independent state country.

SCALE: Ordinal.

2.1.4.44 Election executive turnover ordinal (v2eltvrexo)

Long tag: vdem_cd_v2eltvrexo

Original tag: v2eltvrexo

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Henisz (2000, 2002), Lentz (1994, 1999), www.worldstatesmen.org, Election Guide, IDEA IPU Parline, V-Dem Country Coordinators

Description:

VARIABLE TYPE: A

PROJECT MANAGER(S): Staffan I. Lindberg

QUESTION: Was there turnover in the executive office as a result of this national election?

CLARIFICATION: Turnover in the executive can occur in presidential, semi-presidential, as well as parliamentary systems, and it refers not only to the individual person holding office but also to that person's party. This question considers whether turnover occurs both in the office of head of state and head of government, even if one of the positions is not contested in the particular elections.

RESPONSES:

0: No. The executive(s) — head of state and head of government — retained their position either as a result of the outcome of the election, or because the elections do not affect the executive.

1: Half. The head of state or head of government is a different individual than before the election but from the same party (or independent) that was in power before the election. In parliamentary systems this code applies when the head of government changes as an effect of alternations in the ruling coalition, changes in party leadership, or a new independent head of government. In semi-presidential regimes, this code applies when the elections result in co-habitation after a period when one party (or independent) has held both offices, or if one of the executive office holders — the head of state or head of government changes, while the other retains their position.

2: Yes. The executive(s) — head of state and head of government — lost their position(s) as a result of the outcome of the election. In presidential systems this code applies when the new president is both a different person and from a different party (or independent) than before the election. In parliamentary systems the ruling party or coalition of parties lost and the new head of government is from a different party or from a new coalition. In semi-presidential regimes, this code applies when one party holds both the office of the head of state and head of government after a period of co-habitation, or if the holders of both offices change in terms of person and party (or independent) in the same election. This code also applies if this is the first head of state and/or head of government elected for a newly (semi-) independent state country.

Variable citation: Nohlen (2005), Nohlen et al. (2002), Nohlen & Stöver (2010), (?), Colomer & Grofman (2016), Chronicle of Parliamentary Elections (IPU), IDEA

Description:

VARIABLE TYPE: A

PROJECT MANAGER(S): Staffan I. Lindberg, Carl Henrik Knutsen, Jan Teorell

QUESTION: What was the electoral system used in this election for the lower or unicameral chamber of the legislature?

CLARIFICATION: Mixed majoritarian systems were coded as a two-round system.

Regarding multi-member districts we coded list PR with large multi-member districts when the mean district size = 7. Constituent Assembly elections are excluded from the coding, since they often use specifically designed electoral systems. Further information on the following electoral system types can be found in Reynolds/Reilly, *The New International IDEA Handbook* (2005), chapter two and Annex B (Glossary of Terms) — downloadable, free of charge, at www.idea.int/publications/esd/.

RESPONSES:

0: First-past-the-post (FPP, aka plurality) in single-member constituencies. The candidate with the most votes wins the seat.

1: Two-round system in single-member constituencies. Like FPP except that a threshold — usually 50percent + 1 — is required to avoid a runoff between the two top vote-getters.

2: Alternative vote in single-member districts. Voters rank-order their preferences for the candidates who compete for a single seat. If any candidate receives an absolute majority of first preferences, s/he is elected.

If not, then the least successful candidates (based on first-preferences) are eliminated and their votes reallocated to the second-preferences. This process is repeated until a candidate reaches 50percent +1 of the votes.

3: Block vote in multi-member districts. Electors have as many votes as there are seats within that district and can rank-order them (within or across parties) as they please.

4: Party block vote in multi-member districts. Voters cast a vote for a single party (but not for individual candidates within the party's list). The party with the most votes (*i.e.*, a plurality) wins all the seats in that district.

5: Parallel (SMD/PR). Some seats are in single-member districts (allocated by FPP or two-round electoral rules) and other seats are in multimember districts (allocated by some form of PR). These districts are overlapping, meaning that each elector votes twice: once in the single-member district race and once in the multi-member district race. Results are independent.

6: Mixed-member proportional (SMD with PR compensatory seats). Some seats are in single-member districts (allocated by FPP or two-round electoral rules) and other seats are in multimember districts (allocated by some form of PR). These districts are overlapping, meaning that each elector votes twice: once in the single-member district race and once in the multi-member district race. Results are not independent. Specifically, the multimember seats are used to rectify disproportionalities achieved in the single-member district election — by adding seats, as necessary.

This means that the representation of parties in the legislature is determined entirely by the PR ballot. It also means that the result of an MMP election is similar to the result of a PR election: parties achieve representation according to their nationwide vote share (on the PR ballot).

7: List PR with small multi-member districts (mean district size lt; 7). Each party presents a list of candidates for election within a district. Electors vote for a party, and parties receive seats in (rough) proportion to their overall share of the vote. Mean district size is less than seven.

8: List PR with large multi-member districts (mean district size gt; 7). Each party presents a list of candidates for election within a district. Electors vote for a party, and parties receive seats in (rough) proportion to their overall share of the vote. Mean district size is greater than seven.

9: Single-transferable vote (STV) in multi-member districts. Electors rank-order candidates nominated for a district. Candidates that surpass a specified quota of first-preference votes are elected. The remaining seats are chosen by reallocating the votes of the least successful candidates to elector's second- (or third-) preferences until the specified quota is reached. This process is repeated until all seats for that district are filled.

10: Single non-transferable vote (SNTV) in multi-member districts. Each elector chooses a single candidate. The candidates with the most votes (a plurality) win. (The number of winners is of course determined by the size of the district.)

11: Limited vote in multi-member districts.

Electors have more than one vote but fewer votes than the number of seats in the district. The candidates with the most votes (a plurality) win. (The number of winners is of course determined by the size of the district.)

12: Borda Count in single- or multi-member districts. Electors use numbers to mark preferences among candidates and each preference is assigned a value. For example, in a ten-candidate field a first preference is worth one, a second preference is worth .9, and so forth. These are summed and the candidate(s) with the highest total(s) is/are elected.

Description:

VARIABLE TYPE: A

PROJECT MANAGER(S): Carl Henrik Knutsen

QUESTION: In this election, what percentage (percent) of the total seats in the lower (or unicameral) chamber of the legislature was obtained by the next-largest party?

CLARIFICATION: Candidates elected as independents are treated as one group, with the name of independent (see party name variables). Does not include appointed (nonelected) seats. Leave this question blank if election was nonpartisan, i.e., no parties (not even pro-government parties) were allowed.

RESPONSES:

Numeric.

SOURCE(S): Nohlen *et al.* (1999, 2002, 2005, 2010); IPU Parline; Election Guide.

Description:

VARIABLE TYPE: A

PROJECT MANAGER(S): Staffan I. Lindberg

QUESTION: Did control of the lower (or unicameral) chamber of the legislature change as a result of this election, according to official results?

RESPONSES:

0: No. The majority party or ruling coalition includes the same or substantially the same parties, even if some minor parties (holding less than 10 percent of the seats in the legislature) left or joined the coalition, or because the elections do not affect the lower chamber.

1: Half. A minority party or coalition who was not in control of the chamber before the elections assumed the leading position in the legislature but is dependent on other parties for support. Or, a post-election ruling coalition includes some old parties and some new parties and the new parties represent more than 10 percent of the seats in the legislature.

2: Yes. The incumbent party or coalition lost its majority or plurality-dominant position in the legislature and a different party or coalition assumes the majority position.

SCALE: Ordinal.

2.1.4.64 Regional government exists (v2elreggov)

Long tag: vdem_cd_v2elreggov

Original tag: v2elreggov

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Country expert coding (C data)

Description:

VARIABLE TYPE: A,C

PROJECT MANAGER(S): Kelly McMann

QUESTION: Is there a regional government?

CLARIFICATION: Regional government is typically the second-highest level of government, just below the national government. There are many names for units at this level; some common ones are regions, provinces, states, departments, and cantons.

Countries with more than two subnational levels may have multiple levels that fit the

definition of regional government. If this is the case, for all questions about regional government please code the regional level that, in practice, has the most responsibilities (*e.g.* making laws, providing primary, education, maintaining roads, policing, etc.) and resources to carry out those responsibilities.

Some countries are so small that, now or in earlier time periods, they have only local government and not regional government. If this is the case, please code this question as "0"; for the appropriate time period.

If you have questions about identifying the regional government for your country, please send an email inquiry to your V-Dem contact.

RESPONSES:

0: No.

1: Yes.

ORDERING: If coded "0" for entire period, skip the following questions focused on regional government.

SCALE: Dichotomous.

SOURCE(S): Country expert coding (C data).

NOTES: Converted from (C) to (A (C)) coding as of December 2014. The part of the time series coming from Historical V-Dem is of variable type A*.

DATA RELEASE: 3-13.

2.1.4.66 Regional government elected (v2elsrgel)

Long tag: vdem_cd_v2elsrgel

Original tag: v2elsrgel

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky,

Krusell, Miri & von Römer (2023)

Variable citation: Country expert coding (C data)

Description:

VARIABLE TYPE: A,C

PROJECT MANAGER(S): Kelly McMann

QUESTION: At the regional level, are government offices elected in practice?

CLARIFICATION: *quot*;Government offices*quot*; here refers to a regional executive and a regional assembly, *not* a judiciary and *not* minor bureaucrats. An *executive* is a single individual (or a very small group) (*e.g.*, a governor). An *assembly* is a larger body of officials, who may be divided into two chambers.

quot;Elected*quot*; refers to offices that are directly elected by citizens or indirectly elected by a regional elected assembly. All other methods of obtaining office — including appointment by higher or lower levels of government — are considered to be *non-elected*.

In classifying a position as elected one is making no judgments about the freeness/fairness of the election or the relative extent of suffrage. One is simply indicating that there is an election and that the winner of that election (however conducted) generally takes office.

RESPONSES:

0: Generally, offices at the regional level are not elected.

1: Generally, the regional executive is elected but not the assembly.

2: Generally, the regional assembly is elected but not the executive.

3: Generally, the regional executive is elected and there is no assembly.

4: Generally, the regional assembly is elected and there is no executive.

5: Generally, the regional executive and assembly are elected.

SCALE: Nominal.

SOURCE(S): Country expert coding (C data).

NOTES: Converted from (C) to (A (C)) coding as of December 2014. The part of the time series coming from Historical V-Dem is of variable type A*.

2.1.4.67 Regional offices relative power (v2elrgpwr)

Long tag: vdem_cd_v2elrgpwr

Original tag: v2elrgpwr

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Kelly McMann

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: How would you characterize the relative power, in practice, of elected and non-elected offices at the regional level?

CLARIFICATION: We are concerned with the relative power of regional offices to each other, *not* the power of regional offices relative to higher or lower levels of government.

Please consider only major offices, such as the executive, assembly, and judiciary, *not* those of minor bureaucrats. (A body of government officials, such as an assembly or judiciary, counts as one office.)

An office is "subordinate" if its officeholders can be chosen and removed by another office or if its decisions can be blocked or modified by another office, but it cannot similarly constrain the other office.

RESPONSES:

0: All or nearly all elected offices are subordinate to non-elected offices at the regional level.

1: Some elected offices are subordinate to non-elected offices at the regional level.

2: Elected and non-elected offices are approximately equal in power at the regional level.

3: Most non-elected offices are subordinate to elected offices at the regional level.

4: All or nearly all non-elected offices are subordinate to elected offices at the regional level.

SCALE: Ordinal, converted to interval by the measurement model.

2.1.4.72 Subnational elections free and fair (v2elffelr)

Long tag: vdem_cd_v2elffelr

Original tag: v2elffelr

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Kelly McMann

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Taking all aspects of the pre-election period, election day, and the post-election process into account, would you consider subnational elections (regional and local, as previously identified) to be free and fair on average?

CLARIFICATION: This question refers to subnational levels that have elected offices and elections. It does not refer to subnational levels without elected offices and elections. If there were no subnational elections in any of the years covered in this survey, choose option 5.

quot;Free and fairquot; refers to all aspects of the election process *except* the extent of suffrage (by law). Thus, a free and fair election may occur even if the law excludes significant groups (we measure that issue separately).

RESPONSES:

0: No, not at all. The elections were fundamentally flawed and the official results had little if anything to do with the 'will of the people' (who won office).

1: Not really. While the elections allowed for some competition, the irregularities in the end affected the outcome of the elections (who won office).

2: Ambiguous. There was substantial competition and freedom of participation but there were also significant irregularities. It is hard to determine whether the irregularities affected the outcome or not (who won office).

3: Yes, somewhat. There were deficiencies and some degree of fraud and irregularities but these did not in the end affect the outcome (who won office).

4: Yes. There was some amount of human error and logistical restrictions but these were largely unintentional and without significant consequences.

SCALE: Ordinal, converted to interval by the measurement model.

NOTES: As of December 2014, the former category quot;5quot; is recoded as a separate variable (v2elffelrbin).

DATA RELEASE: 3-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CLEANING: Set to missing when v2elffelrbin_ord is 0.

2.1.4.73 Subnational elections held (v2elffelrbin)

Long tag: vdem_cd_v2elffelrbin

Original tag: v2elffelrbin

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Kelly McMann

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Are subnational elections held?

RESPONSES:

0: No.

1: Yes.

SCALE: Dichotomous, converted to interval by the measurement model.

NOTES: As of December 2014, the former category quot;5quot; from variable v2elffelr is recoded as a separate variable (v2elffelrbin). If a coder chose the 5th category in the original question, it receives 0 in the new quot;v2elffelrbinquot; variable (corresponding to the answer, no, there were no subnational elections); otherwise it receives 1 (yes, there are subnational elections held). The resulting series of 0-1 country-coder time-series is run in the measurement model, which calculates the final value of v2elffelrbin while taking into account background coder characteristics.

DATA RELEASE: 3-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

PROJECT MANAGER(S): Kelly McMann

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Does the freeness and fairness of subnational elections vary across different areas of the country?

CLARIFICATION: Subnational elections refer to elections to regional or local offices, as specified above.

RESPONSES:

0: Yes. Subnational elections in some areas of the country are significantly more free and fair (or, alternatively, significantly less free and fair) than subnational elections in other areas of the country.

1: Somewhat. Subnational elections in some areas of the country are somewhat more free and fair (or, alternatively, somewhat less free and fair) than subnational elections in other areas of the country.

2: No. Subnational elections in most or all areas of the country are equally free and fair (or, alternatively, equally not free and not fair).

ORDERING: If answer is "2", skip remaining questions in this section.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

2.1.5 V-Dem Indicators - Political Parties

Instructions to the coders (as shown in the surveys)

Political parties:

A "political party" refers to an organization that nominates candidates for public office. A party may refer to a longstanding coalition such as the CDU/CSU in Germany if that coalition functions in most respects like a single party. Sometimes, the identity of a party is obscured by name changes. However, if the party/coalition changes names but retains key personnel and is still run by and for the same constituency then it should be considered the same organization. Our notion of a party includes loose factional groupings such as the Tories and Whigs in the 19th-century Britain or the Caps and Hats in 18th-century Sweden. Unless stated otherwise the following questions pertain to parties that compete for seats in the national legislature or for the presidency.

Most of the questions in the following section ask you to generalize across parties in a particular country (and at a particular point in time). We realize that practices vary from party to party; these are, after all, highly diverse organizations. However, for our purposes it is important to consider what the most common practices are.

In answering these questions it is sometimes important to distinguish between formal rules (as stipulated by statute, legislative rules, the constitution, or common law precedent) and actual practice (what happens on the ground). In order to clarify the *de jure/de facto* distinction, we employ the terms "by law..." and "in practice..." Please pay close attention to these cues wherever you see them. And if there is no clarification of the issue, assume that the question is referring to practices rather than formal rules.

2.1.5.1 Barriers to parties (v2psbars)

Long tag: vdem_cd_v2psbars

Original tag: v2psbars

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Allen Hicken

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: How restrictive are the barriers to forming a party?

CLARIFICATION: Barriers include legal requirements such as requirements for membership or financial deposits, as well as harassment.

RESPONSES:

0: Parties are not allowed.

1: It is impossible, or virtually impossible, for parties not affiliated with the government to form (legally).

2: There are significant obstacles (*e.g.* party leaders face high levels of regular political harassment by authorities).

3: There are modest barriers (*e.g.* party leaders face occasional political harassment by authorities).

4: There are no substantial barriers.

ORDERING: If your answer is 1-4, proceed to the next question [v2psoppaut]. If your answer

is 0, skip to the question about Party organization [v2psorgs].
SCALE: Ordinal, converted to interval by the measurement model.
DATA RELEASE: 1-13.
CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

2.1.5.2 Party Ban (v2psparban)

Long tag: vdem_cd_v2psparban

Original tag: v2psparban

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Allen Hicken

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Are any parties banned?

CLARIFICATION: This does not apply to parties that are barred from competing for failing to meet registration requirements or support thresholds.

RESPONSES:

0: Yes. All parties except the state-sponsored party (and closely allied parties) are banned.

1: Yes. Elections are non-partisan or there are no officially recognized parties.

2: Yes. Many parties are banned.

3: Yes. But only a few parties are banned.

4: No. No parties are officially banned.

ORDERING: If your answer is 4, skip the next question [v2psbantar].

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

2.1.5.3 Opposition parties autonomy (v2psoppaut)

Long tag: vdem_cd_v2psoppaut

Original tag: v2psoppaut

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Allen Hicken

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Are opposition parties independent and autonomous of the ruling regime?

CLARIFICATION: An opposition party is any party that is not part of the government, *i.e.*, that has no control over the executive.

RESPONSES:

0: Opposition parties are not allowed.

1: There are no autonomous, independent opposition parties. Opposition parties are either selected or co-opted by the ruling regime.

2: At least some opposition parties are autonomous and independent of the ruling regime.

3: Most significant opposition parties are autonomous and independent of the ruling regime.

4: All opposition parties are autonomous and independent of the ruling regime.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

2.1.5.4 Party organizations (v2psorgs)

Long tag: vdem_cd_v2psorgs

Original tag: v2psorgs

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Allen Hicken

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: How many political parties for national-level office have permanent organizations?

CLARIFICATION: A permanent organization connotes a substantial number of personnel who are responsible for carrying out party activities outside of the election season.

RESPONSES:

0: No parties.

1: Fewer than half of the parties.

2: About half of the parties.

3: More than half of the parties.

4: All parties.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

2.1.5.5 Party Branches (v2psprbrch)

Long tag: vdem_cd_v2psprbrch

Original tag: v2psprbrch

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Allen Hicken

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: How many parties have permanent local party branches?

RESPONSES:

0: None.

1: Fewer than half.

2: About half.

3: More than half.

4: All.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

2.1.5.6 Party linkages (v2psprlnks)

Long tag: vdem_cd_v2psprlnks

Original tag: v2psprlnks

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Allen Hicken

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Among the major parties, what is the main or most common form of linkage to their constituents?

CLARIFICATION: A party-constituent linkage refers to the sort of "good" that the party offers in exchange for political support and participation in party activities.

RESPONSES:

0: Clientelistic. Constituents are rewarded with goods, cash, and/or jobs.

1: Mixed clientelistic and local collective.

2: Local collective. Constituents are rewarded with local collective goods, *e.g.*, wells, toilets, markets, roads, bridges, and local development.

3: Mixed local collective and policy/programmatic.

4: Policy/programmatic. Constituents respond to a party's positions on national policies, general party programs, and visions for society.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

CONVERGENCE: Model parameters with convergence issues: country-date latent trait estimates, universal thresholds, expert reliability, expert thresholds, main-country-coded thresholds.

2.1.5.7 Distinct party platforms (v2psplats)

Long tag: vdem_cd_v2psplats

Original tag: v2psplats

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Allen Hicken

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: How many political parties with representation in the national legislature or presidency have publicly available party platforms (manifestos) that are publicized and relatively distinct from one another?

CLARIFICATION: In order to be counted in the affirmative, parties must have platforms that are both distinct (either in terms of content or generalized ideology) and publicly disseminated.

This question is *not* intended to measure how much the public actually knows about these

platforms or whether they are important in structuring policymaking.

RESPONSES:

0: None, or nearly none.

1: Fewer than half.

2: About half.

3: More than half.

4: All, or nearly all.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

2.1.5.8 Candidate selection–National/local (v2pscnslnl)

Long tag: vdem_cd_v2pscnslnl

Original tag: v2pscnslnl

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Allen Hicken

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: How centralized is legislative candidate selection within the parties?

CLARIFICATION: The power to select candidates for national legislative elections is often divided between local/municipal party actors, regional/state-level party organizations, and national party leaders. One level usually dominates the selection process, while sometimes candidate selection is the outcome of bargaining between the different levels of party organization.

RESPONSES:

0: National legislative candidates are selected exclusively by national party leaders.

1: National legislative candidate selection is dominated by national party leaders but with some limited influence from local or state level organizations.

2: National legislative candidates are chosen through bargaining across different levels of party organization.

3: National legislative candidates are chosen by regional or state-level organizations, perhaps with some input from local party organizations or constituency groups.

4: National legislative candidates are chosen by a small cadre of local or municipal level actors.

5: National legislative candidates are chosen by constituency groups or direct primaries.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

2.1.5.9 Legislative party cohesion (v2pscohesv)

Long tag: vdem_cd_v2pscohesv

Original tag: v2pscohesv

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C
PROJECT MANAGER(S): Allen Hicken
ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr
QUESTION: Is it normal for members of the legislature to vote with other members of their party on important bills?
RESPONSES:
0: Not really. Many members are elected as independents and party discipline is very weak.
1: More often than not. Members are more likely to vote with their parties than against them, but defections are common.
2: Mostly. Members vote with their parties most of the time.
3: Yes, absolutely. Members vote with their parties almost all the time.
SCALE: Ordinal, converted to interval by the measurement model.
DATA RELEASE: 1-13.
CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).
CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

2.1.5.10 Party competition across regions (v2pscomprg)

Long tag: vdem_cd_v2pscomprg

Original tag: v2pscomprg

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C
PROJECT MANAGER(S): Allen Hicken
ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr
QUESTION: Which of the following best describes the nature of electoral support for major parties (those gaining over 10 percent of the vote)?
CLARIFICATION: Leave this question blank if election was nonpartisan, *i.e.*, no parties (not even pro-government parties) were allowed.
RESPONSES:
0: Most major parties are competitive in only one or two regions of the country, *i.e.*, their support is heavily concentrated in a few areas.
1: Most major parties are competitive in some regions of the country, but not in others.
2: Most major parties are competitive in most regions of the country.
SCALE: Ordinal, converted to interval by the measurement model.
DATA RELEASE: 1-13.
CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).
CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

2.1.5.11 National party control (v2psnatpar)

Long tag: vdem_cd_v2psnatpar

Original tag: v2psnatpar

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C
PROJECT MANAGER(S): Allen Hicken

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: How unified is party control of the national government?

CLARIFICATION: With respect to the executive, consider only those offices that have effective power over policymaking. (If there is a monarch or president with very little policymaking power, this office should not be considered.) With respect to bicameral legislatures, consider only the chamber, or chambers, that have effective policymaking power. (If the upper chamber is inactive or clearly subordinate, consider only the lower chamber.) Leave this question blank if election was nonpartisan, *i.e.*, no parties (not even pro-government parties) were allowed.

RESPONSES:

0: Unified coalition control. A single multi-party coalition controls the executive and legislative branches of the national government. (This is true almost by definition in a parliamentary system where a single coalition gathers together a majority of seats.)

1: Divided party control. (A) Different parties or individuals (unconnected to parties) control the executive and the legislature or (B) Executive power is divided between a president/monarch and a prime minister, each of which belongs to different parties; or between a non-partisan monarch and a prime minister.

2: Unified party control. A single party controls the executive and legislative branches of the national government. (This is true almost by definition in a parliamentary system where a single party has a majority of seats.)

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

2.1.6 V-Dem Indicators - Direct Democracy

Instructions to the coders (as shown in the surveys)

Direct democracy: This set of questions focuses on direct popular votes. Four mechanisms are distinguished: a. Measures placed on the ballot by the executive and/or the legislature for which the constitution or basic laws require a vote. These are referred to as *constitutional referendums* (*i.e. obligatory referendums*). b. Measures placed on the ballot by the executive and/or the legislature that for which the constitution or basic laws does not require a vote. These are referred to as *plebiscites*. c. Measures placed on the ballot through a citizen petition process that concern the possible adoption of a new law or constitutional amendment. These are referred to as *popular initiatives*. d. Measures placed on the ballot through a citizen petition process that concern the possible rejection of a recently approved law or a bill discussed in parliament. These are referred to as *referendums*.

Note that we do not consider recall elections or citizen petitions to the legislature even they may also involve a gathering of signatures or a popular vote. Note also that in coding these questions it is sometimes important to distinguish between formal rules (as stipulated by statute, legislative rules, the constitution, or common law precedent) and actual practice. In order to clarify the *de jure/de facto* distinction, we employ the terms "by law..." and "in practice..."

2.1.6.1 Initiatives permitted (v2ddlexci)

Long tag: vdem_cd_v2ddlexci

Original tag: v2ddlexci

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: A

PROJECT MANAGER(S): David Altman

QUESTION: Is there legal provision for initiatives?

CLARIFICATION: These are measures placed on the ballot through a citizen petition process, not by the legislature or the executive. They may concern either a new law or a constitutional amendment.

RESPONSES:

0: Not allowed.

1: Allowed but non-binding (or with an intervening institutional veto).

2: Allowed and binding.

ORDERING: If no legal provision exists (option 0), skip to question "Referendums permitted"; [v2ddlexrf].

SCALE: Ordinal.

NOTES: Converted from (B) to (A) coding by David Altman.

DATA RELEASE: 1-13.

COUNTRY-YEAR AGGREGATION: Last

CITATION: *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1900-2022

2.1.6.2 Initiatives signatures (v2ddsignci)

Long tag: vdem_cd_v2ddsignci

Original tag: v2ddsignci

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: A

PROJECT MANAGER(S): David Altman

QUESTION: How many signatures are required in order to place an initiative on the ballot?

RESPONSES:

Numeric.

SCALE: Interval.

NOTES: Converted from (B) to (A) coding by David Altman.

DATA RELEASE: 1-13.

COUNTRY-YEAR AGGREGATION: Last

CITATION: *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1900-2022

2.1.6.3 Initiatives signatures percent (v2ddsigpci)

Long tag: vdem_cd_v2ddsigpci

Original tag: v2ddsigpci

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: A

PROJECT MANAGER(S): David Altman

QUESTION: How many signatures — expressed as the percentage (percent) of registered voters — are required in order to place an initiative on the ballot?

RESPONSES:

Percent.

SCALE: Interval.

NOTES: Converted from (B) to (A) coding by David Altman.

DATA RELEASE: 1-13.

COUNTRY-YEAR AGGREGATION: Day-weighted mean

CITATION: *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1900-2022

2.1.6.4 Initiatives signature-gathering period (v2ddsigdci)

Long tag: vdem_cd_v2ddsigdci

Original tag: v2ddsigdci

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: A

PROJECT MANAGER(S): David Altman

QUESTION: If you answered yes to the previous question, how long is the period allowed for gathering signatures (expressed as a number of days) for an initiative?

RESPONSES:

Numeric.

ORDERING: Answer only if answered 1 for previous question.

SCALE: Interval.

NOTES: Converted from (B) to (A) coding by David Altman.

DATA RELEASE: 1-13.

COUNTRY-YEAR AGGREGATION: Last

CITATION: *V-Dem Codebook* (see suggested citation at the top of this document).

2.1.7 V-Dem Indicators - The Executive

Instructions to the coders (as shown in the surveys)

Executive:

In this section, we distinguish between the head of state (HOS) and the head of government (HOG). The *head of state* is an individual or collective body that serves as the chief public representative of the country. Sometimes this is a largely ceremonial role, *e.g.* a monarch who reigns but does not rule, or a president whose powers are strictly circumscribed. The *head of government* is the chief officer(s) of the executive branch of government, typically presiding over a cabinet. In a parliamentary system, this is usually the prime minister. In a presidential system, this is usually the president, who then serves as both, head of state and head of government. In a typical semi-presidential system, the president serves as head of state and the prime minister serves as head of government.

These definitions are grounded in the *functions* that each office performs, as described above. Titles can be confusing. Do not assume, for example, that simply because an individual holds the title of "president" s/he is serving as the chief public representative of the country. Likewise, it may be that the *effective* head of state/head of government is someone other than the *official* head of state/head of government. In this instance, the following questions apply to the person who effectively wields this power. In some socialist systems, for example, the official head of state was a person within the state bureaucracy, but in practice the chief public representative of the country was the chairman of the communist party. It is the latter who is the "effective" head of state, and hence should be the focus of your answers. The same applies if the head of state/head of government is so old, sick or perhaps mentally disabled that s/he cannot perform his/her functions, which are instead performed by someone else. It is the latter person who is the effective head of state/head of government.

If you are considering a semi sovereign territory, such as a colony, an annexed territory or a member of the British Commonwealth, please answer the following questions with respect to the head of state and (if separate) the head of government who is located in the territory in question. Thus, in a typical British colony the governor-general—not the King/Queen of England—would be understood as the head of state. Likewise, in a British colony the local prime minister in the colony—not the prime minister in London—would be understood as the head of government.

In order to mitigate potential misunderstandings, the identities of the head of state and head of government for each country have been pre-coded for as many years as possible. Thus, when conducting your coding make sure to pay close attention to the names of these individuals, which you can see by clicking on the year grid for a particular year in the first question of this section, "HOS name." This is your key to what we mean by "head of state" or "head of government."

Note also that when the two functions are fused in the same office, we ask you to code only the

head of state section of the survey. Any precoded years contain an orange triangle. This means that either the score or text and/or specific date have already been entered, so we are asking you only to add your confidence in the precoded rating; we do not want you to change the rating, as we need all the Country Experts to answer the subsequent questions for the same executives. If you feel strongly that the precoded information is wrong, please rate your confidence in the preloaded information and then consult your V-Dem contact. You will have to rate confidence in all the available years in order to proceed to the next question.

In order to avoid spending time on short-lived executives, we have included only executives who held office for at least 100 days.

2.1.7.1 HOS name (v2exnamhos)

Long tag: vdem_cd_v2exnamhos

Original tag: v2exnamhos

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Henisz (2000, 2002), Lentz (1994, 1999), www.worldstatesmen.org

Description:

VARIABLE TYPE: A*

PROJECT MANAGER(S): Jan Teorell

QUESTION: What is the name of the head of state?

CLARIFICATION: If the head of state is a collective body, provide the name of the person exercising the most effective power within this body, or, if no such person exists, enter the expression "collective body". Do not include nicknames. If multiple Heads of State were appointed in a given year, please answer this question with respect to each one of them; also make sure you enter the specific date of appointment and *reappointment* for each one of them. Only heads of state that have been in office for at least 100 days should be included. Once again, the identities of the head of state for each country have been pre-coded for as many years as possible. Any pre-coded years contain an orange triangle. This means that either the score or text and/or specific date have already been entered, so we are asking you only to add your confidence in the pre-coded rating; we do not want you to change the rating, as we need all the Country Experts to answer the subsequent questions for the same executives.

Variable citation: www.electionguide.org, www.data.ipu.org, www.worldstatesmen.org, Lentz (1994, 1999), Henisz (2000, 2002), Government's websites

Description:

VARIABLE TYPE: A*

PROJECT MANAGER(S): Jan Teorell

QUESTION: What is the title of the head of state?

CLARIFICATION: If the head of state and the head of government are the same person or body, this and the following questions refer to both. Please provide a literal translation of the

title in English, with the title in the native language, or a transcription thereof, within parentheses. If the head of state temporarily fills the role, this will be excluded from the answer; they should be called e.g. *quot;Presidentquot;* and not *quot;Acting Presidentquot;*. Only heads of state that have been in office for at least 100 days should be included. If the head of state is a collective body, provide the title of the person exercising the most effective power over this body, or, if no such person exists, enter the expression *quot;collective body.quot;* If multiple Heads of State with different titles were appointed any given year, please answer this question with respect to each one of them; also make sure you enter the specific date of appointment for each one of them. Once again, the identities of the head of state for each country have been pre-coded for as many years as possible. Any pre-coded years contain an orange triangle. This means that either the score or text and/or specific date have already been entered, so we are asking you only to add your confidence in the pre-coded rating; we do not want you to change the rating, as we need all the Country Experts to answer the subsequent questions for the same executives.

2.1.7.3 HOS removal by legislature in practice (v2exremhsp)

Long tag: vdem_cd_v2exremhsp

Original tag: v2exremhsp

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Jan Teorell

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: If the legislature, or either chamber of the legislature, took actions to remove the head of state from office, would it be likely to succeed even without having to level accusations of unlawful activity *and* without the involvement of any other agency?

CLARIFICATION: The question refers to whether the legislature (or either of its chambers) is considered to hold this power of removal in practice, regardless of whether this is regulated by law and whether this power has been exercised or not. Moreover, the question refers to removal other than through an impeachment process.

RESPONSES:

0: No, under no circumstances.

1: No, unlikely, but there is a chance it would happen.

2: Yes, probably, but there is a chance it would fail.

3: Yes, most likely.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

2.1.7.4 HOS dissolution in practice (v2exdfdshs)

Long tag: vdem_cd_v2exdfdshs

Original tag: v2exdfds

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Jan Teorell

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: If the head of state took actions to dissolve the legislature, would he/she be likely to succeed?

CLARIFICATION: The question refers to whether the head of state is considered to hold this power in practice, regardless of whether this is regulated by law and whether this power has been exercised or not. By “dissolving the legislature” we refer to the ability of the head of state to call a new election for the legislature.

RESPONSES:

0: No.

1: Yes, but not at his/her own discretion, only when prompted to as a response to specific events (for example, after a certain number of votes of no confidence, or after a certain number of failed attempts to form a cabinet).

2: Yes, at his/her own discretion, but with restrictions (for example, by frequency, such as “once a year”, by time point within term, such as “not within the last sixth months of the head of state’s term”, and by the requirement that the head of state must then himself/herself stand for election).

3: Yes, at his/her own discretion and without restrictions.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

2.1.7.5 HOS appoints cabinet in practice (v2exdfcbhs)

Long tag: vdem_cd_v2exdfcbhs

Original tag: v2exdfcbhs

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Jan Teorell

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: In practice, does the head of state have the power to appoint — or is the approval of the head of state necessary for the appointment of — cabinet ministers?

CLARIFICATION: The question refers to whether the head of state is considered to hold this power in practice, regardless of whether this is regulated by law and whether this power has been exercised or not. If confirmation of the legislature is needed, this should be coded as such also when the HOS controls the majority of the legislature (“tacit consent”). Moreover, by the “legislature” in this case, we mean either house of the legislature (in the case of bicameralism).

RESPONSES:

0: No.

1: Yes, but only with respect to the head of the cabinet, and only with the tacit consent or explicit confirmation by the legislature.

2: Yes, but only with the tacit consent or explicit confirmation by the legislature.

3: Yes, without any need for confirmation by the legislature, but only with respect to the head of the cabinet.

4: Yes, without any need for confirmation by the legislature.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

2.1.7.6 HOS veto power in practice (v2exdfvths)

Long tag: vdem_cd_v2exdfvths

Original tag: v2exdfvths

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Jan Teorell

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: If the head of state took actions to veto a piece of legislation, would he/she be likely to succeed?

CLARIFICATION: By "veto", we mean either a partial veto (concerning any parts of a bill) or package vetoes (concerning whole bills) of bills that have already been passed by the legislature. The question refers to whether the head of state is considered to hold this power in practice, regardless of whether this is regulated by law and whether this power has been exercised or not.

RESPONSES:

0: No.

1: Yes, but the legislature can override the veto by a simple majority vote (a vote of more than half of those voting).

2: Yes, but the legislature can override the veto by an absolute majority vote (a vote of more than half of the members of the legislature).

3: Yes, but the legislature can override the veto by a qualified/extraordinary majority vote (a super-majority — *e.g.*, 2/3 or 3/4 — of those voting).

4: Yes, with no possibility of override.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

Description:

VARIABLE TYPE: A
PROJECT MANAGER(S): Jan Teorell, Pamela Paxton

QUESTION: What is the gender of the head of state?
CLARIFICATION: If the head of state is a collective body, provide the gender of the person executing the most effective power over this body, or, if no such person exists, answer if any persons in the body are female.
RESPONSES:
0: Male
1: Female
SCALE: Dichotomous.
SOURCE(S): worldstatesman.org; Melander (2005); Paxton and Hughes (2007).
DATA RELEASE: 1-13.
COUNTRY-YEAR AGGREGATION: Maximum
DATE SPECIFIC: Coded on HOS appointment dates and December 31 (v2exnamhos).
CITATION: *V-Dem Codebook* (see suggested citation at the top of this document).
YEARS: 1789-2022

2.1.7.14 HOS term length by law (v2exfxtmhs)

Long tag: vdem_cd_v2exfxtmhs

Original tag: v2exfxtmhs

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Elkins et al. (2014), National constitutions

Description:

VARIABLE TYPE: A

PROJECT MANAGER(S): Jan Teorell

QUESTION: What is the maximum term length of the Head of State, in years?

RESPONSES:

Numeric, number of years.

0: Term length not specified in constitution.

99: Not Applicable.

100: Term length for life or there is no term length.

SOURCE(S): CCP (Elkins *et al.* 2012); National constitutions.

NOTES: *De jure* term lengths for Head of State and Head of Government, coded for each head of state and head of government as coded in v2exnamhos and v2exnamhog. In the case of a single office representing both Head of State and Head of Government, HOS is coded to the appropriate term length while HOG is coded as 99. For colonies, if there was no official local constitution, HOS/HOG is coded by their constitutional status according to the colonial power. Finally, for sovereign states lacking a constitution or having suspended their constitution, HOS/HOG is coded to 99 as not applicable for those relevant years.

Changes to term lengths are recorded as occurring on the date that a new constitution or constitutional amendment takes force, or, if unavailable, date of promulgation.

DATA RELEASE: 5-13.

COUNTRY-YEAR AGGREGATION: Last

CITATION: *V-Dem Codebook* (see suggested citation at the top of this document).

2.1.7.15 HOS appointment in practice (v2expathhs)

Long tag: vdem_cd_v2expathhs

Original tag: v2expathhs

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: V-Dem country coordinators, www.constituteproject.org, IPU Parline

Description:

VARIABLE TYPE: A

PROJECT MANAGER(S): Jan Teorell

QUESTION: How did the head of state reach office?

CLARIFICATION: If several bodies were involved in the appointment process, select the one that exerted the most critical impact on the decision. However, in the next question we ask separately about whether the approval of the legislature was necessary. Response category 7 should only be selected if the head of state is directly elected, not if he or she was appointed by the legislature after an election. We count as direct elections (category 7) also those indirect elections carried out by an electoral college, whose only purpose is to elect the president.

RESPONSES:

0: Through the threat of or application of force, such as a coup or rebellion.

1: Appointed by a foreign power.

2: Appointed by the ruling party (in a one-party system).

3: Appointed by a royal council.

4: Through hereditary succession.

5: Appointed by the military.

6: Appointed by the legislature.

7: Directly through a popular election (regardless of the extension of the suffrage).

8: Other.

ORDERING: If you select 0 or 8, proceed to the next question [v2exothhs]. If you select 1-5, skip to question "HOS selection by legislature in practice [v2exaphos]"; If you selected 6-7, skip to question [v2excomhs].

SCALE: Nominal (v2expathhs), or a series of dichotomous scales.

SOURCE(S): V-Dem country coordinators; constituteproject.org; IPU Parline.

NOTES: Converted from B to A coding. v2expathhs is coded according to appointment dates of the Head of State. The same is true for coups or rebellions where the date when the HOS was appointed through a coup, or the first day in office after the coup, is coded.

DATA RELEASE: 1-13.

COUNTRY-YEAR AGGREGATION: Maximum

DATE SPECIFIC: Coded on HOS appointment dates and December 31 (v2exnamhos).

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Jan Teorell

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: If the legislature, or either chamber of the legislature, took actions to remove the head of government from office, would it be likely to succeed even without having to level accusations of unlawful activity *and* without the involvement of any other agency?

CLARIFICATION: The question refers to whether the legislature (or either of its chambers) is considered to hold this power of removal in practice, regardless of whether this is regulated by law and whether this power has been exercised or not. Moreover, the question refers to removal other than through an impeachment process.

RESPONSES:

0: No, under no circumstances.

1: No, unlikely, but there is a chance it would happen.

2: Yes, probably, but there is a chance it would fail.

3: Yes, most likely.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CLEANING: Set to missing when v2exhoshog is 1

PROJECT MANAGER(S): Jan Teorell

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: If the head of government took actions to dissolve the legislature, would he/she be likely to succeed?

CLARIFICATION: The question refers to whether the head of government is considered to hold this power in practice, regardless of whether this is regulated by law and whether this power has been exercised or not. By "dissolving the legislature" we refer to the ability of the head of government to call a new election for the legislature.

RESPONSES:

0: No.

1: Yes, but not at his/her own discretion, only when prompted to as a response to specific events (for example, after a certain number of votes of no confidence, or after a certain number of failed attempts to form a cabinet).

2: Yes, at his/her own discretion, but with restrictions (for example, by frequency, such as "once a year", by time point within term, such as "not within the last sixth months of the head of government's term", and by the requirement that the head of government must then himself/herself stand for election).

3: Yes, at his/her own discretion and without restrictions.

SCALE: Ordinal, converted to interval by the measurement model.

2.1.7.26 HOG veto power in practice (v2exdfvthg)

Long tag: vdem_cd_v2exdfvthg

Original tag: v2exdfvthg

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Jan Teorell

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: If the head of government took actions to veto a piece of legislation, would he/she be likely to succeed?

CLARIFICATION: By "veto", we mean either a partial veto (concerning any parts of a bill) or package vetoes (concerning whole bills) of bills that have already been passed by the legislature. The question refers to whether the head of government is considered to hold this power in practice, regardless of whether this is regulated by law and whether this power has been exercised or not.

RESPONSES:

0: No.

1: Yes, but the legislature can override the veto by a simple majority vote (a vote of more than half of those voting).

2: Yes, but the legislature can override the veto by an absolute majority vote (a vote of more than half of the members of the legislature).

3: Yes, but the legislature can override the veto by a qualified/extraordinary majority vote (a super-majority — *e.g.*, 2/3 or 3/4 — of those voting).

4: Yes, with no possibility of override.

SCALE: Ordinal, converted to interval by the measurement model.

2.1.7.35 HOG appointment in practice (v2expathhg)

Long tag: vdem_cd_v2expathhg

Original tag: v2expathhg

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: V-Dem country coordinators, www.constituteproject.org, IPU Parline

Description:

VARIABLE TYPE: A
PROJECT MANAGER(S): Jan Teorell
QUESTION: How did the head of government gain access to office?
CLARIFICATION: If several bodies were involved in the appointment process, select the one that exerted the most critical impact on the decision. However, in the next question we ask separately about whether the approval of the legislature was necessary. Response category 8 should only be selected if the head of government is directly elected, not if he or she was appointed by the legislature after an election. If the same person or body is both head of state and head of government, they are only coded as head of state.
RESPONSES:
0: Through the threat of or application of force, such as a coup or rebellion.
1: Appointed by a foreign power.
2: Appointed by the ruling party (in a one-party system).

3: Appointed by a royal council.
4: Through hereditary succession.
5: Appointed by the military.
6: Appointed by the head of state.
7: Appointed by the legislature.
8: Directly through a popular election (regardless of the extension of the suffrage).
9: Other.
ORDERING: If you select 0 or 9, proceed to the next question [v2exothhgl]. If you selected 1-6, skip to question "HOG selection by legislature in practice"; [v2exaphogp]. If you selected 7-8, skip to question [v2excomex].
SCALE: Nominal (v2expathhg), or a series of dichotomous scales.
SOURCE(S): V-Dem country coordinators; constituteproject.org; IPU Parline.
NOTES: Converted from (B) to (A) coding. v2expathhg is coded according to appointment dates of the Head of Government. The same is true for coups or rebellions where the date when the HOG was appointed through a coup, or the first day in office after the coup, is coded.
DATA RELEASE: 1-13.
COUNTRY-YEAR AGGREGATION: Maximum
DATE SPECIFIC: Coded on HOG appointment dates and December 31 (v2exnamhog).
CLEANING: Set to missing when v2exhoshog is 1
CITATION: *V-Dem Codebook* (see suggested citation at the top of this document).
YEARS: 1789-2022

2.1.7.36 HOG control over (v2exctlhg)

Long tag: vdem_cd_v2exctlhg

Original tag: v2exctlhg

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Jan Teorell

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Do members of the executive (the head of state, the head of government, and cabinet ministers) respect the constitution?

RESPONSES:

0: Members of the executive violate the constitution whenever they want to, without legal consequences.

1: Members of the executive violate most provisions of the constitution without legal consequences, but still must respect certain provisions.

2: Somewhere in between (1) and (3). Members of the executive would face legal consequences for violating most provisions of the constitution, but can disregard some provisions without any legal consequences.

3: Members of the executive rarely violate the constitution, and when it happens they face legal charges.

4: Members of the executive never violate the constitution.
SCALE: Ordinal, converted to interval by the measurement model.
DATA RELEASE: 1-13.
CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).
CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Jan Teorell

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: How routinely do members of the executive (the head of state, the head of government, and cabinet ministers), or their agents, grant favors in exchange for bribes, kickbacks, or other material inducements?

RESPONSES:

0: It is routine and expected.

1: It happens more often than not in dealings with the executive.

2: It happens but is unpredictable: those dealing with the executive find it hard to predict when an inducement will be necessary.

3: It happens occasionally but is not expected.

4: It never, or hardly ever, happens.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*, posted at V-Dem.net).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Jan Teorell

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: How routinely do public sector employees grant favors in exchange for bribes, kickbacks, or other material inducements?

CLARIFICATION: When responding to this question, we would like to you think about a typical person employed by the public sector, excluding the military. If you think there are large discrepancies between branches of the public sector, between the national/federal and subnational/state level, or between the core bureaucracy and employees working with public service delivery, please try to average them out before stating your response.

RESPONSES:

0: Extremely common. Most public sector employees are systematically involved in petty but corrupt exchanges almost all the time.

1: Common. Such petty but corrupt exchanges occur regularly involving a majority of public employees.

2: Sometimes. About half or less than half of public sector employees engage in such exchanges for petty gains at times.

3: Scattered. A small minority of public sector employees engage in petty corruption from time to time.

4: No. Never, or hardly ever.

SCALE: Ordinal, converted to interval by the measurement model.

DEFAULT DATE: Default date for this variable is January 1.

2.1.7.48 Regime end type (v2regendtype)

Long tag: vdem_cd_v2regendtype

Original tag: v2regendtype

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: A*

PROJECT MANAGER(S): Carl Henrik Knutsen, Tore Wig, Vilde Lunna Djuve

QUESTION: Could you specify the type of process that you consider the most important in leading to the end of the regime?

CLARIFICATION: The information on this question has been pre-coded for as many years as possible. Any pre-coded years contain an orange triangle. This means that what is considered the most important process that eventually ended the relevant regime has already been entered. We are asking you only to add your confidence in the pre-coded information. This means that the information has already been entered, so we are asking you only to add your confidence in the pre-coded rating; we do not want you to change the rating, as we need all the Country Experts to answer the subsequent questions for the same regime.

RESPONSES:

0: A military coup d'état.

1: A coup d'état conducted by other groups than the military.

2: A self-coup (autogolpe) conducted by the sitting leader.

3: Assassination of the sitting leader (but not related to a coup d'état)

4: Natural death of the sitting leader

5: Loss in civil war.

6: Loss in inter-state war.

7: Foreign intervention (other than loss in inter-state war)

8: Popular uprising.

9: Substantial political liberalization/democratization with some form of guidance by sitting regime leaders

10: Other type of directed and intentional transformational process of the regime under the guidance of sitting regime leaders (excluding political liberalization/democratization)

11: Substantial political liberalization/democratization without guidance by sitting regime leaders, occurring from some other process (such as an unexpected election loss for the sitting regime) than those specified by categories 1–10

12: Other process than those specified by categories 1–11.

13: The regime still exists

DATA RELEASE: 9-13.

2.1.7.49 Regime interregnum (v2regint)

Long tag: vdem_cd_v2regint

Original tag: v2regint

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Encyclopedia Britannica, Wikipedia, various region- and country-specific sources

Description:

VARIABLE TYPE: A

PROJECT MANAGER(S): Carl Henrik Knutsen, Tore Wig, Vilde Lunna Djuve

QUESTION: Does there exist an identifiable political regime?

CLARIFICATION: This question is used to identify so-called interregnum periods, where no political regime is in control over the entity. Different types of political situations can lead to periods of time under which there is no identifiable political regime, one example being a civil war in which none of the parties have clear control over political bodies and processes in the

country. However, the interregnum coding is employed conservatively, meaning that partial control over political bodies and processes in fairly large parts of the country (which is often the case also during civil wars) is sufficient for a 0 score.

Please note that the expert coded (C) questions on support and opposition groups in the regime survey are only coded when v2regint=1.

RESPONSES:

0: No.

1: Yes.

SCALE: Dichotomous

SOURCE(S): Encyclopedia Britannica; Wikipedia; various region- and country-specific sources.

DATA RELEASE: 8-13.

COUNTRY-YEAR AGGREGATION: Last

CITATION: Djuve, Knutsen, and Wig (2020); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

Long tag: vdem_cd_v2regimpgroup

Original tag: v2regimpgroup

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C
PROJECT MANAGER(S): Carl Henrik Knutsen
ADDITIONAL VERSIONS: *_nr
QUESTION: Which (one) group does the current political regime rely on most strongly in order to maintain power?
CLARIFICATION: Choose the group that, if it were to retract its support to the regime, would most endanger the regime (most strongly increase the chance that it loses power).
RESPONSES:
0: The aristocracy, including high status hereditary social groups and castes.
1: Agrarian elites, including rich peasants and large landholders.
2: Party elites (of the party or parties that control the executive).
3: Business elites.
4: Civil servants.
5: The military.
6: An ethnic or racial group(s).
7: A religious group(s).
8: Local elites, including chiefs.
9: Urban working classes, including labor unions.
10: Urban middle classes
11: Rural working classes (e.g., peasants).
12: Rural middle classes (e.g., family farmers)
13: A foreign government or colonial power.
DATA RELEASE: 9-13.
CROSS-CODER AGGREGATION: Mode.
quot;Tiesquot; between categories are resolved so that the corresponding category in v2regsupgroups with the highest mean for the same country-date is chosen.
CLEANING: Set to missing where v2regint is 0.

YEARS: 1789-2022
DEFAULT DATE: Default date for this variable is January 1.

2.1.7.53 Regime support groups size (v2regsupgroupssize)

Long tag: vdem_cd_v2regsupgroupssize

Original tag: v2regsupgroupssize

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C
PROJECT MANAGER(S): Carl Henrik Knutsen

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr
QUESTION: In total, how large is the percentage share of the domestic adult (18+) population that belongs to the political regime's supporting groups?

CLARIFICATION: You should consider the sum of all the groups (excepting foreign governments and colonial powers) entered in v2regsupgroups. Hence, your answer should take into account the total size of the/those groups that are supportive of the regime, and, if it/they were to retract support would substantially increase the chance that the regime would lose power. Regarding the issue of overlapping identities, and one individual potentially belonging to more than one groups: Individuals should only be "counted" once; thus if the two relevant supporting groups are (4) civil servants, which total about 5percent, and all of them belong to a particular ethnic group (6) also coded as a relevant, the overall total size of the supporting groups is still 5percent (presuming that no other members of that ethnic group are essential for the regime staying in power).

RESPONSES:

0: Extremely small

(About 1 percent of the population or less; examples of this could include regimes supported by — and needing the support from — a handful of higher-rank military officers, or by only a royal council and a few hundred landowners)

1: Very small

(Between 1 percent and 5 percent of the population; examples of this could include regimes supported by — and needing the support from — higher ranking civil servants and the military, or by moderately sized business and agrarian elites)

2: Small

(Between 5 percent and 15 percent; examples of this could include regimes supported by — and needing the support from — relatively small ethnic groups, or by urban elites and the urban middle classes in predominantly rural societies)

3: Moderate

(Between 15 percent and 30 percent; examples of this could include regimes supported by — and needing the support from — moderately sized ethnic groups, by rural middle classes in rural societies, or by urban middle classes in urban societies)

4: Large

(More than 30 percent; examples of this could include regimes supported by — and needing the support from — large ethnic groups (and then not only the elites/leaders of such groups), or by rural working classes in rural societies.)

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 9-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see V-Dem Methodology).

CLEANING: Set to missing where v2regint is 0

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

DEFAULT DATE: Default date for this variable is January 1.

2.1.7.54 Regime support location (v2regsuploc)

Long tag: vdem_cd_v2regsuploc

Original tag: v2regsuploc

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Carl Henrik Knutsen

ADDITIONAL VERSIONS: *_nr

QUESTION: In which geographic area do the support groups for the current political regime mainly reside?

RESPONSES:

0: Abroad.
1: In the capital.
2: In urban areas outside the capital.
3: In rural areas.
4: The groups are not concentrated in any particular area.
SCALE: Nominal
DATA RELEASE: 11-13.
CROSS-CODER AGGREGATION: Mode.
quot;Tiesquot; between categories receive the value 4.
CLEANING: Set to missing where v2regint is 0.
CITATION: V-Dem Codebook (see suggested citation at the top of this document).

DEFAULT DATE: Default date for this variable is January 1.

2.1.7.55 Regime most important opposition group (v2regimpoppgroup)

Long tag: vdem_cd_v2regimpoppgroup

Original tag: v2regimpoppgroup

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Carl Henrik Knutsen

ADDITIONAL VERSIONS: *_nr

QUESTION: Which (one) group constitutes the greatest threat to the current regime?

CLARIFICATION: Choose the one group (among those you registered as opposition groups under the v2regoppgroups question) that is the most dangerous threat to the regime in a given year. That is, the group that could most strongly increase the chance that the regime loses power. The importance/danger associated with an opposition group will be affected both by its level of hostility towards the regime and its power resources/how capable it is of removing the regime should it try to do so. We remind you that groups need not be actively mobilized or explicitly engaged in high-level opposition activities to be counted; key opposition groups may include actors who oppose the regime and constitute a dormant threat to the regime, even though they do not take particular actions in a given year.

RESPONSES:

0: The aristocracy, including high status hereditary social groups and castes.

1: Agrarian elites, including rich peasants and large landholders.

2: Party elites (of the party or parties that control the executive).

3: Business elites.

4: Civil servants.

5: The military.

6: An ethnic or racial group(s).

7: A religious group(s).

8: Local elites, including chiefs.

9: Urban working classes, including labor unions.

10: Urban middle classes

11: Rural working classes (e.g., peasants).

12: Rural middle classes (e.g., family farmers)

13: A foreign government or colonial power.

DATA RELEASE: 11-13.

CROSS-CODER AGGREGATION: Mode.

quot;Tiesquot; between categories are resolved so that the corresponding category in v2regoppgroups with the highest mean for the same country-date is chosen.

CLEANING: Set to missing where v2regint is 0.

CITATION: *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1900-2022

DEFAULT DATE: Default date for this variable is January 1.

2.1.7.56 Regime opposition groups size (v2regoppgroupsize)

Long tag: vdem_cd_v2regoppgroupsize

Original tag: v2regoppgroupsize

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Carl Henrik Knutsen

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: In total, how large is the share of the domestic adult (18+) population that are noteworthy opposition actors to the current political regime?

CLARIFICATION: Consider the sum total of all the groups (excepting foreign governments and colonial powers) entered in v2regoppgroups. Hence, your answer should take into account the total size/number of the actors that oppose the regime and pose a threat to the regime maintaining power.

We remind you that groups need not be actively mobilized or explicitly engaged in high-level opposition activities to be counted; key opposition groups may include actors who oppose the regime and constitute a dormant threat to the regime, even though they do not take particular actions in a given year.

Regarding the issue of individuals potentially belonging to more than one “opposition group”: Individuals should only be counted once for the purpose of this question. For example, if the two relevant opposition groups are (4) civil servants, which total about 5percent of the population, and all of them belong to a particular ethnic group (6) also coded as a relevant, the overall total size of the opposition groups is still 5percent (presuming that there are no other members of that ethnic group who oppose the regime).

We remind you of the definition of a regime as the set of formal and/or informal rules that are essential for choosing political leaders and/or maintaining political leaders in power. Hence, we are not asking about which groups oppose the current government in a democracy (and who would vote for another party), but still accept the democratic rules as legitimate. We are, instead, asking about groups that want to see the wider political regime removed and replaced.

RESPONSES:

0: Extremely small (About 1 percent of the population or less)

1: Very small (Between 1 percent and 5 percent of the population)

2: Small (Between 5 percent and 15 percent)

3: Moderate (Between 15 percent and 30 percent)

4: Large (More than 30 percent)

SCALE: Ordinal, converted to interval by the measurement model.

2.1.7.58 Strongest pro-regime preferences (v2regproreg)

Long tag: vdem_cd_v2regproreg

Original tag: v2regproreg

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Carl Henrik Knutsen

ADDITIONAL VERSIONS: *_nr

QUESTION: Which (one) group has the strongest pro-regime preferences, irrespective of the group’s resources and capabilities for affecting the regime’s hold on power?

CLARIFICATION: Consider only the pro-regime preferences of individuals in this group, and do not take into consideration the abilities of this group to actually affect regime survival. Hence, the group with the strongest pro-regime preferences need not be the most important support group.

One way to think about what pro-/anti-regime preferences means is: what would individuals hypothetically (honestly) answer if asked in a survey: “On a scale from 0-10, how pleased are you with the current political regime, with 10 indicating the strongest support.” Select the group with the highest average score in this hypothetical survey.

We remind you of the definition of a regime as the set of formal and/or informal rules that are essential for choosing political leaders and/or maintaining political leaders in power. Hence, we are not asking about which groups oppose the current government in a democracy (and who would vote for another party), but still accept the democratic rules as legitimate. We are, instead, asking about groups that want to see the wider political regime removed and

replaced.

RESPONSES:

0: The aristocracy, including high status hereditary social groups and castes.

1: Agrarian elites, including rich peasants and large landholders.

2: Party elites (of the party or parties that control the executive).

3: Business elites.

4: Civil servants.

5: The military.

6: An ethnic or racial group(s).

7: A religious group(s).

8: Local elites, including chiefs.

9: Urban working classes, including labor unions.

10: Urban middle classes

11: Rural working classes (e.g., peasants).

12: Rural middle classes (e.g., family farmers)

13: A foreign government or colonial power.

DATA RELEASE: 11-13.

DEFAULT DATE: Default date for this variable is January 1.

2.1.7.59 Strongest anti-regime preferences (v2regantireg)

Long tag: vdem_cd_v2regantireg

Original tag: v2regantireg

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Carl Henrik Knutsen

ADDITIONAL VERSIONS: *_nr

QUESTION: Which (one) group has the strongest anti-regime preferences/antipathy against the current regime, irrespective of the group's resources and capabilities for affecting the regime's hold on power?

CLARIFICATION: Consider only the anti-regime preferences of the actors in this group, and do not take into consideration the abilities of this group to actually affect regime survival and change. Hence, the group with the strongest anti-regime preferences need not be the most important opposition group. Both capable and incapable political actors may have strong anti-regime preferences and want to see the regime removed from power. We also remind that the group needs not be currently mobilized or explicitly engaged in high-level opposition activities to be counted; individuals may strongly resent a regime, without taking particular actions, in a given year.

One way to think about what pro-/anti-regime preferences mean, independently of ability to affect regime survival is: what would individuals hypothetically (honestly) answer if asked in a survey: "On a scale from 0-10, how pleased are you with the current political regime".

We remind you of the definition of a regime as the set of formal and/or informal rules that are essential for choosing political leaders and/or maintaining political leaders in power. Hence, we are not asking about which groups oppose the current government in a democracy (and who would vote for another party), but still accept the democratic rules as legitimate. We are, instead, asking about groups that want to see the wider political regime removed and replaced.

RESPONSES:

0: The aristocracy, including high status hereditary social groups and castes.

- 1: Agrarian elites, including rich peasants and large landholders.
- 2: Party elites (of the party or parties that control the executive).
- 3: Business elites.
- 4: Civil servants.
- 5: The military.
- 6: An ethnic or racial group(s).
- 7: A religious group(s).
- 8: Local elites, including chiefs.
- 9: Urban working classes, including labor unions.

2.1.7.60 Most powerful group in affecting regime duration and change (v2regpower)

Long tag: vdem_cd_v2regpower

Original tag: v2regpower

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Carl Henrik Knutsen

ADDITIONAL VERSIONS: *_nr

QUESTION: Irrespective of its stance toward the regime (pro-, anti-, or neutral), which one group is the most important for affecting the current regime's chances of staying in power?

CLARIFICATION: Here we ask you to disregard group preferences, and only consider a group's resources and capabilities vis-a-vis affecting regime survival. In other words, do not consider whether this group is pro-regime, anti-regime, or neutral to the regime. Take only into consideration the capabilities of this group to affect regime survival, if key members of the group were to hypothetically mobilize the group in an effort to remove the regime. Politically neutral, as well as pro- and anti-regime groups, may have ample resources and be capable of organizing coordinated action. As a result, all three types of groups may have great influence over regime survival and change.

RESPONSES:

0: The aristocracy, including high status hereditary social groups and castes.

- 1: Agrarian elites, including rich peasants and large landholders.
- 2: Party elites (of the party or parties that control the executive).
- 3: Business elites.
- 4: Civil servants.
- 5: The military.
- 6: An ethnic or racial group(s).
- 7: A religious group(s).
- 8: Local elites, including chiefs.
- 9: Urban working classes, including labor unions.
- 10: Urban middle classes
- 11: Rural working classes (e.g., peasants).
- 12: Rural middle classes (e.g., family farmers)
- 13: A foreign government or colonial power.

DATA RELEASE: 11-13.
CROSS-CODER AGGREGATION: Mode.
quot;Tiesquot; between categories are resolved so that the corresponding category in v2regsupgroups with the highest mean for the same country-date is chosen.

11: Rural working classes (e.g., peasants). [v2regoppgroups_11]

12: Rural middle classes (e.g., family farmers). [v2regoppgroups_12]

13: A foreign government or colonial power. [v2regoppgroups_13]

SCALE: Series of dichotomous scales.

ANSWER-TYPE: Multiple-selection.

DATA RELEASE: 11-13.

CROSS-CODER AGGREGATION: Mean.

CLEANING: Set to missing where v2regint is 0.

CITATION: *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1900-2022

DEFAULT DATE: Default date for this variable is January 1.

2.1.7.63 Explicit and active regime opposition groups (v2regoppgroupsact)

Long tag: vdem_cd_v2regoppgroupsact

Original tag: v2regoppgroupsact

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Sirianne Dahlum, Tore Wig

ADDITIONAL VERSIONS: *_nr

QUESTION: Which (if any) groups include a significant share of individuals who explicitly and actively mobilize against the regime in a particular year? (Check all that apply.)

CLARIFICATION: Consider which group(s) include a significant share of individuals who engage in active and explicit opposition to the regime to promote its removal. These actors make explicit statements of dissent from the regime, publicly voice their preference for regime change, and may possibly engage in other actions intended to further the removal of the regime such as anti-regime demonstrations, sit-ins, boycotts, strikes, the formation of anti-system parties, acts of sabotage, or armed rebellion. Please note that only years when anti-regime speech or activity occurs should be coded. In years when groups probably oppose the regime, but are not engaged in any explicit acts of opposition, the group should not be selected. We remind you of the definition of a regime as the set of formal and/or informal rules that are essential for choosing political leaders and/or maintaining political leaders in power. Hence, we are not asking about which groups oppose the current government in a democracy (and who would vote for another party), but still accept the democratic rules as legitimate. We are, instead, asking about groups that want to see the wider political regime removed and replaced.

RESPONSES:

0: The aristocracy, including high status hereditary social groups and castes. [v2regoppgroupsact_0]

1: Agrarian elites, including rich peasants and large landholders. [v2regoppgroupsact_1]

2: Party elites (of the party or parties that control the executive). [v2regoppgroupsact_2]

3: Business elites. [v2regoppgroupsact_3]

4: The state bureaucracy. [v2regoppgroupsact_4]

5: The military. [v2regoppgroupsact_5]

6: An ethnic or racial group(s). [v2regoppgroupsact_6]

7: A religious group(s). [v2regoppgroupsact_7]

8: Local elites, including customary chiefs. [v2regoppgroupsact_8]

9: Urban working classes, including labor unions. [v2regoppgroupsact_9]

10: Urban middle classes. [v2regoppgroupsact_10]

11: Rural working classes (e.g., peasants). [v2regoppgroupsact_11]

12: Rural middle classes (e.g., family farmers). [v2regoppgroupsact_12]

13: A foreign government or colonial power. [v2regoppgroupsact_13]

SCALE: Series of dichotomous scales.

ANSWER-TYPE: Multiple-selection.

DATA RELEASE: 11-13.

CROSS-CODER AGGREGATION: Mean.

CLEANING: Set to missing where v2regint is 0.

CITATION: *V-Dem Codebook* (see suggested citation at the top of this document).

2.1.7.64 Regime support groups (v2regsupgroups)

Long tag: vdem_cd_v2regsupgroups

Original tag: v2regsupgroups

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Carl Henrik Knutsen

ADDITIONAL VERSIONS: *_nr

QUESTION: Which groups does the current political regime rely on in order to maintain power? (Check all that apply.)

CLARIFICATION: Consider which group(s) is supportive of the regime, and, if it/they were to retract support would substantially increase the chance that the regime would lose power.

RESPONSES:

- 0: The aristocracy, including high status hereditary social groups and castes. [v2regsupgroups_0]
1: Agrarian elites, including rich peasants and large landholders. [v2regsupgroups_1]
2: Party elites (of the party or parties that control the executive). [v2regsupgroups_2]
3: Business elites. [v2regsupgroups_3]
4: The state bureaucracy. [v2regsupgroups_4]
5: The military. [v2regsupgroups_5]
6: An ethnic or racial group(s). [v2regsupgroups_6]
7: A religious group(s). [v2regsupgroups_7]
8: Local elites, including customary chiefs. [v2regsupgroups_8]
9: Urban working classes, including labor unions. [v2regsupgroups_9]
10: Urban middle classes. [v2regsupgroups_10]
11: Rural working classes (e.g., peasants). [v2regsupgroups_11]
12: Rural middle classes (e.g., family farmers). [v2regsupgroups_12]
13: A foreign government or colonial power. [v2regsupgroups_13]
SCALE: Series of dichotomous scales.
ANSWER-TYPE: Multiple-selection.
DATA RELEASE: 9-13.
CROSS-CODER AGGREGATION: Mean.
CLEANING: Set to missing where v2regint is 0.
CITATION: *V-Dem Codebook* (see suggested citation at the top of this document).
YEARS: 1789-2022
DEFAULT DATE: Default date for this variable is January 1.

2.1.8 V-Dem Indicators - The Legislature

Instructions to the coders (as shown in the surveys)

The Legislature:

The following questions pertain to the legislature, an assembly of deputies or representatives with powers to consider, pass, amend, or repeal laws. If there is no legislature in the country you are coding for some period of years, do not code any questions for those years. If you are considering a semi-sovereign territory such as a colony please answer this question with respect to the legislature that is seated within the territory in question (such as the local legislative assembly in a British colony, not the Parliament in London). A popular election need not involve universal suffrage; indeed, suffrage may be highly restricted. A "direct election" can include seats reserved for special groups (*e.g.*, ethnic groups or women) so long as these members are chosen by popular election.

Frequently, it is important to distinguish between formal rules (as stipulated by statute, legislative rules, the constitution, or common law precedent) and actual practice (what happens on the ground). In order to clarify the *de jure/de facto* distinction, we employ the terms "by law..." and "in practice..." Please pay close attention to these cues. Note that sometimes we ask different coders to code different aspects of a question. So, you might get a question about the *de facto* state of affairs, but another source might provide the answer to the *de jure* state of affairs.

2.1.8.1 Legislature bicameral (v2lgbicam)

Long tag: vdem_cd_v2lgbicam

Original tag: v2lgbicam

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Nohlen et al. (1999, 2002), Nohlen (2005), Nohlen & Stöver (2010), Chronicle of Parliamentary Elections (IPU), IFES, Websites of national parliaments, National constitutions, Elkins et al. (2014)

Description:

VARIABLE TYPE: A*

PROJECT MANAGER(S): Steven Fish, Matthew Kroenig

QUESTION: How many chambers does the legislature contain?

CLARIFICATION: The number of chambers have been pre-coded for as many years as possible. This means that the score has already been entered, so we are asking you only to add your confidence in the pre-coded rating. If there is a change in the number of chambers, this is coded on the exact date of when the change occurred, for example the exact date of when a legislature was dissolved, or when the lower and/or upper chamber was established (usually coded on the date when the new legislature first meets; otherwise on the date of the legislative election where the composition of the new legislature was decided).

RESPONSES:

0: 0 chambers.

1: 1 chamber.

2: 2 or more chambers.

SCALE: Ordinal.

SOURCE(S): Nohlen *et al.* (1999, 2002, 2005, 2010); Chronicle of Parliamentary Elections (IPU); IFES; Websites of national parliaments; National constitutions; CCP (Elkins *et al.* 2012), v191.

NOTES: For the country-year aggregation of the dataset, we have taken the minimum value of `v2lgbicam`. Constituent assemblies that perform other functions except for drafting and adopting a new constitution (*e.g.* legislating, electing president, adopting budget, etc) are coded as 1 (1 chamber). In cases when a parliament consists of three or more chambers, one of the chamber names is coded in the variable "Lower chamber legislature name" (`v2lgnamelo`), while the others are listed in the variable "Upper chamber name" (`v2lgnameup`). South Africa had a three-chamber parliament during the period of 1984-1994. Subsequently, variable `v2lgbicam` is coded 2, `v2lgnamelo` is coded "House of Assembly", and `v2lgnameup` enlists "House of Representatives, House of Delegates".

DATA RELEASE: 1-13.

COUNTRY-YEAR AGGREGATION: Last

CITATION: *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

2.1.8.2 Legislature dominant chamber (`v2lghdomchm`)

Long tag: `vdem_cd_v2lghdomchm`

Original tag: `v2lghdomchm`

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Steven Fish, Matthew Kroenig

ADDITIONAL VERSIONS: `*_osp`, `*_ord`, `*_codelow`, `*_codehigh`, `*_sd`, `*_mean`, `*_nr`

QUESTION: If the legislature is bicameral, which chamber is dominant?

RESPONSES:

0: The lower chamber is clearly dominant.

1: The lower chamber is somewhat more powerful on most issues.

2: They are roughly co-equal in power.

3: The upper chamber is somewhat more powerful on most issues.

4: The upper chamber is clearly dominant.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CLEANING: Set to missing when `v2lgbicam` is 0 or 1

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

CONVERGENCE: Model parameters with convergence issues: universal thresholds.

2.1.8.3 Legislature questions officials in practice (v2lgqstexp)

Long tag: vdem_cd_v2lgqstexp

Original tag: v2lgqstexp

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Steven Fish, Matthew Kroenig

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: In practice, does the legislature routinely question executive branch officials?

CLARIFICATION: By "question" we mean, for example, the power of summons through which the head of state or head of government could be forced to explain its policies or testify.

RESPONSES:

0: No — never or very rarely.

1: Yes — routinely.

SCALE: Dichotomous, converted to interval by the measurement model.

DATA RELEASE: 3-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CLEANING: Set to missing when v2lgbicam is 0

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

2.1.8.4 Legislature investigates in practice (v2lginvstp)

Long tag: vdem_cd_v2lginvstp

Original tag: v2lginvstp

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Steven Fish, Matthew Kroenig

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: If the executive were engaged in unconstitutional, illegal, or unethical activity, how likely is it that a legislative body (perhaps a whole chamber, perhaps a committee, whether aligned with government or opposition) would conduct an investigation that would result in a decision or report that is unfavorable to the executive?

RESPONSES:

0: Extremely unlikely.

1: Unlikely.

2: As likely as not.

3: Likely.

4: Certain or nearly certain.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

CONVERGENCE: Model parameters with convergence issues: universal thresholds, main-country-coded thresholds.

2.1.8.5 Executive oversight (v2lgotovst)

Long tag: vdem_cd_v2lgotovst

Original tag: v2lgotovst

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Jan Teorell

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: If executive branch officials were engaged in unconstitutional, illegal, or unethical activity, how likely is it that a body *other than the legislature*, such as a comptroller general, general prosecutor, or ombudsman, would question or investigate them and issue an unfavorable decision or report?

RESPONSES:

0: Extremely unlikely.

1: Unlikely.

2: Very uncertain.

3: Likely.

4: Certain or nearly certain.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

2.1.8.6 Legislature corrupt activities (v2lgcrrpt)

Long tag: vdem_cd_v2lgcrrpt

Original tag: v2lgcrrpt

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Steven Fish, Matthew Kroenig

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Do members of the legislature abuse their position for financial gain?

CLARIFICATION: This includes any of the following: (a) accepting bribes, (b) helping to obtain government contracts for firms that the legislator (or his/her family/friends/political supporters) own, (c) doing favors for firms in exchange for the opportunity of employment after leaving the legislature, (d) stealing money from the state or from campaign donations for personal use.

Please make your best estimate, based upon what is known or suspected to be true.

RESPONSES:

0: Commonly. Most legislators probably engage in these activities.

1: Often. Many legislators probably engage in these activities.

2: Sometimes. Some legislators probably engage in these activities.

3: Very occasionally. There may be a few legislators who engage in these activities but the vast majority do not.

4: Never, or hardly ever.

SCALE: Ordinal, converted to interval by the measurement model.

NOTES: For reasons of consistency, as of December, 2014, responses to this question are reversed so that the least democratic response is "0" and the most democratic is "4".

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see

V-Dem Methodology).

CLEANING: Set to missing when v2lgbicam is 0

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

2.1.8.7 Legislature opposition parties (v2lgoppart)

Long tag: vdem_cd_v2lgoppart

Original tag: v2lgoppart

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Steven Fish, Matthew Kroenig

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Are opposition parties (those not in the ruling party or coalition) able to exercise oversight and investigatory functions against the wishes of the governing party or coalition?

RESPONSES:

0: No, not at all.

1: Occasionally.

2: Yes, for the most part.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CLEANING: Set to missing when v2lgbicam is 0

YEARS: 1789-2022

2.1.8.8 Legislature controls resources (v2lgrfunds)

Long tag: vdem_cd_v2lgrfunds

Original tag: v2lgrfunds

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Steven Fish, Matthew Kroenig

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: In practice, does the legislature control the resources that finance its own internal operations and the perquisites of its members?

RESPONSES:

0: No. The benefits legislators receive or the finances needed for the legislature's operation depend on remaining in good standing with an outside authority, such as the executive.

1: Yes.

SCALE: Dichotomous, converted to interval by the measurement model.

DATA RELEASE: 3-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CLEANING: Set to missing when v2lgbicam is 0

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

2.1.8.9 Representation of disadvantaged social groups (v2lgdsadlo)

Long tag: vdem_cd_v2lgdsadlo

Original tag: v2lgdsadlo

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Pamela Paxton

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Considering all disadvantaged social groups in the country, how well represented are these groups, as a whole, in the national legislature?

CLARIFICATION: Disadvantage refers to socioeconomic disadvantage. Specifically, in order to be considered disadvantaged members of a social group must have an average income that is significantly below the median national income.

RESPONSES:

0 (1): They have no representation at all.

1 (2): They are highly under-represented relative to their proportion of the general population.

2 (3): They are slightly under-represented relative to their proportion of the general population.

3 (4): They are represented roughly equal relative to their proportion of the general population.

4 (5): They are over-represented relative to their proportion of the general population.

SCALE: Ordinal, converted to interval by the measurement model.

NOTES: As of December 2014, the former category 0: There are no disadvantaged groups in the society, is coded as a separate variable (v2lgdsadlobin). The variable is then rebased to zero.

DATA RELEASE: 3-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CLEANING: Set to missing when v2lgbicam is 0

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1900-2022

2.1.8.10 Representation of disadvantaged groups binary (v2lgdsadlobin)

Long tag: vdem_cd_v2lgdsadlobin

2.1.8.16 Upper chamber name (v2lgnameup)

Long tag: vdem_cd_v2lgnameup

Original tag: v2lgnameup

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: A*

PROJECT MANAGER(S): Steven Fish, Matthew Kroenig

QUESTION: What is the name of the upper chamber of the legislature?

CLARIFICATION: Please provide an as accurate as possible literal translation of the name of the upper chamber of the legislature in English, with the name in the native language, or a transcription thereof, within parentheses.

The legislature names have been pre-coded for as many years as possible. This means that the text and specific date have already been entered, so we are asking you only to add your confidence in the pre-coded rating.

RESPONSES:

Text.

NOTES: In cases when a parliament consists of three or more chambers, one of the chamber names is coded in the variable "Lower chamber legislature name" (v2lgnameo), while the others are enlisted in the variable "Upper chamber name" (v2lgnameup). Example: South Africa had a three-chamber parliament during the period of 1984-1994. Subsequently, variable v2lgbicam is coded 2, v2lgnameo is coded "House of Assembly", and v2lgnameup enlists "House of Representatives, House of Delegates".

DATA RELEASE: 3-13.

VARIABLE TYPE: C

PROJECT MANAGER(S): Steven Fish, Matthew Kroenig

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: In practice, is the approval of the upper chamber of the legislature required to pass legislation?

RESPONSES:

0: No. Legislation is routinely passed without the approval of the upper chamber of the legislature.

1: Yes, usually. Legislation is usually passed with the approval of the upper chamber of the legislature, but occasionally the legislature is by-passed.

2: Yes, always. Legislation of any consequence is always approved by the upper chamber of the legislature.

SCALE: Ordinal, converted to interval by the measurement model.

2.1.8.30 Lower chamber gender quota (v2lgqugen)

Long tag: vdem_cd_v2lgqugen

Original tag: v2lgqugen

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Hughes *et al.* (2017), Quota Project (n.d.), International IDEA (2018a), Coding by project manager

Description:

VARIABLE TYPE: A

PROJECT MANAGER(S): Pamela Paxton

QUESTION: Is there a national-level gender quota for the lower (or unicameral) chamber of the legislature?

CLARIFICATION: National-level quotas either reserve some seats for women in the legislature (as a whole or per district) or mandate through statutory law that all political parties must nominate a certain percentage of female candidates or candidates considered for nomination. A sanction for noncompliance imposes a penalty on a party that fails to meet the quota provisions. Examples of sanctions for noncompliance include rejection of the party list, loss of public campaign funds, or other financial penalties. Weak sanctions are those that parties may be able to ignore, such as a very weak financial penalty. Strong sanctions provide strong deterrents for noncompliance. An example of a strong sanction would be the rejection of a party's list. Countries with both candidate quotas and reserved seats are recorded at the stronger level. This variable records quotas from the date of implementation. The quota adoption date may be earlier, sometimes by several years. Data on quota adoption is available from the QAROT dataset (Hughes, Paxton, Clayton, and Zetterberg 2017) while the theoretical implications of adoption vs. implementation are discussed in Hughes, Paxton, Clayton, and Zetterberg (2018).

RESPONSES:

0: No national level gender quota.

1: Yes, a statutory gender quota for all parties without sanctions for noncompliance.

2: Yes, statutory gender quota for all parties with weak sanctions for noncompliance.

3: Yes, statutory gender quota for all parties with strong sanctions for noncompliance.

4: Yes, there are reserved seats in the legislature for women.

ORDERING: If you answer 1-4, proceed to the next question [v2lgqugens]. If you answer 0, skip to question [v2lglegllo].

SCALE: Ordinal.

2.1.8.31 Lower chamber gender quota placement mandate (v2lgqgens)

Long tag: vdem_cd_v2lgqgens

Original tag: v2lgqgens

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Hughes et al. (2017), Quota Project (n.d.), International IDEA (2018a), Coding by project manager

Description:

VARIABLE TYPE: A

PROJECT MANAGER(S): Pamela Paxton

QUESTION: Does the national-level quota for the lower (or unicameral) chamber of the legislature contain a placement mandate?

CLARIFICATION: A placement mandate is a rule concerning rank order on the party list, usually to ensure that women are placed in electable positions on the party list. An example would a rule stating that no more than three of the top five candidates can be of the same gender. Coded only for years where a gender quota was present.

RESPONSES:

0: No.

1: Yes.

ORDERING: Only answer this question if you answered 1-4 on previous question [v2lgqgen].

SCALE: Dichotomous.

2.1.9 V-Dem Indicators - Deliberation

Instructions to the coders (as shown in the surveys)

Deliberation:

The following questions address the deliberative or non-deliberative nature of a country's politics, with particular focus on elite levels. Some of these questions focus on the quality of discourse and others focus on public policies.

2.1.9.1 Reasoned justification (v2dlreason)

Long tag: vdem_cd_v2dlreason

Original tag: v2dlreason

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Michael Coppedge, John Gerring, Staffan Lindberg

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: When important policy changes are being considered, *i.e.* before a decision has been made, to what extent do political elites give public and reasoned justifications for their positions?

CLARIFICATION: Because discourse varies greatly from person to person, base your answer on the style that is most typical of prominent national political leaders.

RESPONSES:

0: No justification. Elites almost always only dictate that something should or should not be done, but no reasoning about justification is given. For example, "We must cut spending."

1: Inferior justification. Elites tend to give reasons why someone should or should not be for doing or not doing something, but the reasons tend to be illogical or false, although they may appeal to many voters. For example, "We must cut spending. The state is inefficient." [The inference is incomplete because addressing inefficiencies would not necessarily reduce spending and it might undermine essential services.]

2: Qualified justification. Elites tend to offer a single simple reason justifying why the proposed policies contribute to or detract from an outcome. For example, "We must cut spending because taxpayers cannot afford to pay for current programs."

3: Sophisticated justification. Elites tend to offer more than one or more complex, nuanced and complete justification. For example, "We must cut spending because taxpayers cannot afford to pay for current government programs. Raising taxes would hurt economic growth, and deficit spending would lead to inflation."

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

2.1.9.2 Common good (v2dlcommon)

Long tag: vdem_cd_v2dlcommon

Original tag: v2dlcommon

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Michael Coppedge, John Gerring, Staffan Lindberg

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: When important policy changes are being considered, to what extent do political elites justify their positions in terms of the common good?

CLARIFICATION: Because discourse varies greatly from person to person, base your answer on the style that is most typical of prominent national political leaders.

RESPONSES:

0: Little or no justification in terms of the common good is usually offered.

1: Specific business, geographic, group, party, or constituency interests are for the most part offered as justifications.

2: Justifications are for the most part a mix of specific interests and the common good and it is impossible to say which justification is more common than the other.

3: Justifications are based on a mixture of references to constituency/party/group interests and on appeals to the common good.

4: Justifications are for the most part almost always based on explicit statements of the common good for society, understood either as the greatest good for the greatest number or as helping the least advantaged in a society.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

QUESTION: When important policy changes are being considered, to what extent do political elites acknowledge and respect counterarguments?

CLARIFICATION: Because discourse varies greatly from person to person, base your answer on the style that is most typical of prominent national political leaders.

RESPONSES:

0: Counterarguments are not allowed or if articulated, punished.

1: Counterarguments are allowed at least from some parties, but almost always are ignored.

2: Elites tend to acknowledge counterarguments but then explicitly degrade them by making a negative statement about them or the individuals and groups that propose them.

3: Elites tend to acknowledge counterarguments without making explicit negative or positive statements about them.

4: Elites almost always acknowledge counterarguments and explicitly value them, even if they ultimately reject them for the most part.

5: Elites almost always acknowledge counterarguments and explicitly value them, and frequently also even accept them and change their position.

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: When important policy changes are being considered, how wide is the range of consultation at *elite levels*?

CLARIFICATION: Because practices vary greatly from policy to policy, base your answer on the style that is most typical of policymaking.

RESPONSES:

0: No consultation. The leader or a very small group (*e.g.* military council) makes authoritative decisions on their own.

1: Very little and narrow. Consultation with only a narrow circle of loyal party/ruling elites.

2: Consultation includes the former plus a larger group that is loyal to the government, such as the ruling party's or parties' local executives and/or women, youth and other branches.

3: Consultation includes the former plus leaders of other parties.

4: Consultation includes the former plus a select range of society/labor/business representatives.

5: Consultation engages elites from essentially all parts of the political spectrum and all politically relevant sectors of society and business.

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: When important policy changes are being considered, how wide and how independent are public deliberations?

CLARIFICATION: This question refers to deliberation as manifested in discussion, debate,

and other public forums such as popular media.

RESPONSES:

0: Public deliberation is never, or almost never allowed.

1: Some limited public deliberations are allowed but the public below the elite levels is almost always either unaware of major policy debates or unable to take part in them.

2: Public deliberation is not repressed but nevertheless infrequent and non-elite actors are typically controlled and/or constrained by the elites.

3: Public deliberation is actively encouraged and some autonomous non-elite groups participate, but it is confined to a small slice of specialized groups that tends to be the same across issue-areas.

4: Public deliberation is actively encouraged and a relatively broad segment of non-elite groups often participate and vary with different issue-areas.

5: Large numbers of non-elite groups as well as ordinary people tend to discuss major policies among themselves, in the media, in associations or neighborhoods, or in the streets. Grass-roots deliberation is common and unconstrained.

2.1.9.6 Particularistic or public goods (v2dlencmps)

Long tag: vdem_cd_v2dlencmps

Original tag: v2dlencmps

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Michael Coppedge, John Gerring, Staffan Lindberg

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Considering the profile of social and infrastructural spending in the national budget, how *quot;particularisticquot;* or *quot;public goodsquot;* are most expenditures?

CLARIFICATION: Particularistic spending is narrowly targeted on a specific corporation, sector, social group, region, party, or set of constituents. Such spending may be referred to as *quot;porkquot;*, *quot;clientelisticquot;*, or *quot;private goods.quot;*

Public-goods spending is intended to benefit all communities within a society, though it may be means-tested so as to target poor, needy, or otherwise underprivileged constituents. The key point is that all who satisfy the means-test are allowed to receive the benefit.

Your answer should consider the entire budget of social and infrastructural spending. We are interested in the relative value of particularistic and public-goods spending, not the number of bills or programs that fall into either category.

RESPONSES:

0: Almost all of the social and infrastructure expenditures are particularistic.

1: Most social and infrastructure expenditures are particularistic, but a significant portion (*e.g.* 1/4 or 1/3) is public-goods.

2: Social and infrastructure expenditures are evenly divided between particularistic and public-goods programs.

3: Most social and infrastructure expenditures are public-goods but a significant portion (*e.g.*, 1/4 or 1/3) is particularistic.

4: Almost all social and infrastructure expenditures are public-goods in character. Only a small portion is particularistic.

SCALE: Ordinal, converted to interval by the measurement model.

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Michael Coppedge, John Gerring, Staffan Lindberg

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: How many welfare programs are means-tested and how many benefit all (or virtually all) members of the polity?

CLARIFICATION: A means-tested program targets poor, needy, or otherwise underprivileged constituents. Cash-transfer programs are normally means-tested.

A universal (non-means tested) program potentially benefits everyone. This includes free education, national health care schemes, and retirement programs. Granted, some may benefit more than others from these programs (*e.g.*, when people with higher salaries get higher unemployment benefits). The key point is that practically everyone is a beneficiary, or potential beneficiary.

The purpose of this question is not to gauge the size of the welfare state but rather its quality. So, your answer should be based on whatever programs exist.

RESPONSES:

0: There are no, or extremely limited, welfare state policies (education, health, retirement, unemployment, poverty programs).

1: Almost all of the welfare state policies are means-tested.

2: Most welfare state policies means-tested, but a significant portion (*e.g.* 1/4 or 1/3) is universalistic and potentially benefits everyone in the population.

3: The welfare state policies are roughly evenly divided between means-tested and universalistic.

4: Most welfare state policies are universalistic, but a significant portion (*e.g.*, 1/4 or 1/3) are means-tested.

5: Almost all welfare state policies are universal in character. Only a small portion is means-tested.

2.1.10 V-Dem Indicators - The Judiciary

Instructions to the coders (as shown in the surveys)

Judiciary: This set of questions pertains to the judiciary. Before you proceed, we would like to clarify several general points. First, some questions below refer to the judiciary in general, whereas others ask for specific evaluations of particular courts or types of courts. Unless otherwise prompted, please consider the judiciary as a whole. This includes all courts in the judicial system at every level, both general jurisdiction courts and more specialized courts. However, with potentially one exception, it excludes specialized courts that are located outside the judiciary, *e.g.* an immigration court that

lies inside the executive branch. The one potential exception is the peak constitutional court of the country. Please include this court in your considerations, even though it will be located outside of the judiciary in some countries. If the country you are coding is a federal state, please focus only on the federal judiciary and the federal government.

Seven of the questions about the judiciary concern high courts. By "high court" we are asking you to consider the country's constitutional court, if one exists. If there is no constitutional court, please consider the court of last resort for constitutional matters. If there is no court in your country with constitutional jurisdiction, please consider the highest ordinary court of the state.

For example, in Mexico in 2004, you would consider the Supreme Court of Justice of the Nation and not the Electoral Tribunal for the Federal Judiciary. In Russia in the same year, you would consider the Constitutional Court of the Russian Federation and not the Supreme Court of the Russian Federation. In Sweden, you would ignore the Supreme Administrative Court and instead focus on the Supreme Court. Germany has both a constitutional court, the Federal Constitutional Court, and a court of last resort for ordinary matters, the Federal Court of Justice. The Federal Constitutional Court is the high court for our purposes. In the United States, there is no separate constitutional court or review body. The Supreme Court is both the highest ordinary court and the highest court in the state with constitutional jurisdiction. Therefore, we consider it to be the high court of the United States. If your country's highest judicial body has separate divisions, only one of which is dedicated to final constitutional review, please consider that division to be the high court if its judges are permanently assigned to that division only. For example, the Supreme Court of Justice of Costa Rica has four chambers. The Fourth Chamber reviews constitutional matters, its judges are appointed to it specifically and the other judges of the Supreme Court do not rotate onto the Fourth Chamber. Therefore, the high court for Costa Rica is the constitutional chamber of the Supreme Court of Justice.

If a new high court was established in a given year, please consider that court as the high court for the purposes of these questions only if the court was functioning for the majority of the calendar year. If a new high court was established in a given year, but did not start functioning until a subsequent year, please do not consider the new court as the high court until it was functioning for the majority of the given calendar year. If you are considering a semi sovereign territory, such as a colony, please answer this question with respect to the government or judicial bodies seated within the territory in question (*e.g.*, the governor-general and his local administration in a British colony or a Commonwealth country), not abroad (*e.g.*, the King/Queen or government of England).

In coding the following questions it is sometimes important to distinguish between formal rules (as stipulated by statute, legislative rules, the constitution, or common law precedent) and actual practice (what happens "on the ground"). In order to clarify the *de jure/de facto* distinction, we employ the terms "by law..." and "in practice..." Please pay close attention to these cues wherever you see them.

2.1.10.1 Judicial reform (v2jreform)

Long tag: vdem_cd_v2jreform

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Were the judiciary's formal powers altered this year in ways that affect its ability to control the arbitrary use of state authority?

CLARIFICATION: Evidence of this kind of reform could include the creation or removal of various forms of constitutional review, new rules increasing or decreasing access to the judiciary, changes in available judicial remedies, and any other formal institution (procedural or otherwise) that influences the ability of courts to control the arbitrary use of power.

RESPONSES:

0: The judiciary's ability to control arbitrary power was *reduced* via institutional reform.

1: There was no change to the judiciary's ability to control arbitrary power via institutional

review.

2: The judiciary's ability to control arbitrary power was *enhanced* via institutional reform.

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Judges are sometimes removed from their posts for cause, as when there is strong evidence of corruption; however, some judges are removed arbitrarily, typically for political reasons. With this distinction in mind, please describe the removal of judges that occurred this calendar year.

CLARIFICATION: The second and third response categories permit you to distinguish among limited arbitrary removals (*i.e.*, when only a few judges are targeted) by the political importance of the removal. For example, you may consider the arbitrary removal of a few high court judges as more important than the arbitrary removal of a few lower court judges.

RESPONSES:

0: There was a massive, arbitrary purge of the judiciary.

1: There were limited but very important arbitrary removals.

2: There were limited arbitrary removals.

3: Judges were removed from office, but there is no evidence that the removals were arbitrary.

4: Judges were not removed from their posts.

SCALE: Ordinal, converted to interval by the measurement model.

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Jeffrey Staton

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: How often did the government attack the judiciary's integrity in public?

CLARIFICATION: Attacks on the judiciary's integrity can include claims that it is corrupt, incompetent or that decisions were politically motivated. These attacks can manifest in various ways including, but not limited to prepared statements reported by the media, press

conferences, interviews, and stump speeches.

RESPONSES:

0: Attacks were carried out on a daily or weekly basis.

1: Attacks were common and carried out in nearly every month of the year.

2: Attacks occurred more than once.

3: There were attacks, but they were rare.

4: There were no attacks on the judiciary's integrity.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CONVERGENCE: Model parameters with convergence issues: universal thresholds.

2.1.10.4 Court packing (v2jupack)

Long tag: vdem_cd_v2jupack

Original tag: v2jupack

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Jeffrey Staton

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: The size of the judiciary is sometimes increased for very good reasons, as when judges are added to manage an increasing caseload; however, sometimes judges are added purely for political reasons. With this distinction in mind, please describe any increases in the size of the judiciary that occurred this calendar year.

CLARIFICATION: The second and third response categories permit you to distinguish among limited court packing efforts (*i.e.* when relatively few judgeships are added) by the political importance of the packing. For example, you may consider the packing of the high court to be more important than the packing of a lower court.

RESPONSES:

0: There was a massive, politically motivated increase in the number of judgeships across the entire judiciary.

1: There was a limited, politically motivated increase in the number of judgeships on very important courts.

2: There was a limited, politically motivated increase in the number of judgeships.

3: Judgeships were added to the judiciary, but there is no evidence that the increase was politically motivated; or there was no increase.

SCALE: Ordinal, converted to interval by the measurement model.

NOTES: A previous version of the variable contained category '4: There was no increase'. As of November 2014, all responses in category '4' are assigned to category '3', since the two responses have the same meaning in practice.

DATA RELEASE: 1-13.

QUESTION: When the high court in the judicial system is ruling in cases that are salient to the government, how often would you say that it makes decisions that merely reflect government wishes regardless of its sincere view of the legal record?

CLARIFICATION: We are seeking to identify autonomous judicial decision-making and its absence. Decisions certainly can reflect government wishes without “merely reflecting”; those wishes, *i.e.* a court can be autonomous when its decisions support the government’s position. This is because a court can be fairly persuaded that the government’s position is meritorious. By “merely reflect the wishes of the government” we mean that the court’s own view of the record, its sincere evaluation of the record, is irrelevant to the outcome. The court simply adopts the government’s position regardless of its sincere view of the record.

2.1.10.13 Codeable (v2jucodable)

Long tag: vdem_cd_v2jucodable

Original tag: v2jucodable

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: V-Dem coding of constitutional texts in Elkins *et al.* (2014)

Description:

VARIABLE TYPE: A
PROJECT MANAGER(S): Jeffrey Staton
QUESTION: Can we generate a flowchart describing the appointment process from this constitutional event?
CLARIFICATION: This variable indicates the reasons we could or could not create a visual flowchart representing the selection procedure.
RESPONSES:
1. Yes
2. No, the event is in a language the coder can not read
3. No, there is no appointment or removal information
4. No, the process is explicitly left to be developed via a statute
5. Yes, but much of the process is left to law
SCALE: Ordinal.

2.1.10.16 Team translated (v2juteamtr)

Long tag: vdem_cd_v2juteamtr

Original tag: v2juteamtr

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: V-Dem coding of constitutional texts in, Elkins et al. (2014)

Description:

VARIABLE TYPE: A

PROJECT MANAGER(S): Jeffrey Staton

QUESTION: For constitutions not available in English, did our coders translate the relevant sections of a non-English event?

CLARIFICATION: This variable indicates whether someone on our coding team read the constitutional event in a non-English language and translated information in order to collect the necessary information.

RESPONSES:

0: No

1: Yes, this event was translated by our team

SCALE: Dichotomous

SOURCE(S): V-Dem coding of constitutional texts in CCP (Elkins *et al.* 2012).
DATA RELEASE: 9-13.
COUNTRY-YEAR AGGREGATION: Last
CITATION: *V-Dem Codebook* (see suggested citation at the top of this document).
YEARS: 1901-2015

2.1.11 V-Dem Indicators - Civil Liberty

Instructions to the coders (as shown in the surveys)

Civil Liberty: The following questions are focused on actual practices (*de facto*) rather than formal legal or constitutional rights (*de jure*). Note that if there is significant variation in the respect for a particular civil liberty across the territory, the score should reflect the "average situation" across the territorial scope of the country unit (for each period) as defined in the coder instructions.

2.1.11.1 Freedom from torture (v2cltort)

Long tag: vdem_cd_v2cltort

Original tag: v2cltort

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Svend-Erik Skaaning

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Is there freedom from torture?

CLARIFICATION: Torture refers to the purposeful inflicting of extreme pain, whether mental or physical, with an aim to extract information or intimidate victims, who are in a state of incarceration. Here, we are concerned with torture practiced by state officials or other agents of the state (*e.g.*, police, security forces, prison guards, and paramilitary groups).

RESPONSES:

0: Not respected by public authorities. Torture is practiced systematically and is incited and approved by the leaders of government.

1: Weakly respected by public authorities. Torture is practiced frequently but is often not incited or approved by top leaders of government. At the same time, leaders of government are not actively working to prevent it.

2: Somewhat. Torture is practiced occasionally but is typically not approved by top leaders of government.

3: Mostly respected by public authorities. Torture is practiced in a few isolated cases but is not incited or approved by top government leaders.

4: Fully respected by public authorities. Torture is non-existent.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

2.1.11.2 Freedom from political killings (v2clkill)

Long tag: vdem_cd_v2clkill

Original tag: v2clkill

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Svend-Erik Skaaning
ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr
QUESTION: Is there freedom from political killings?
CLARIFICATION: Political killings are killings by the state or its agents without due process of law for the purpose of eliminating political opponents. These killings are the result of deliberate use of lethal force by the police, security forces, prison officials, or other agents of the state (including paramilitary groups).
RESPONSES:
0: Not respected by public authorities. Political killings are practiced systematically and they are typically incited and approved by top leaders of government.
1: Weakly respected by public authorities. Political killings are practiced frequently and top leaders of government are not actively working to prevent them.
2: Somewhat respected by public authorities. Political killings are practiced occasionally but they are typically not incited and approved by top leaders of government.
3: Mostly respected by public authorities. Political killings are practiced in a few isolated cases but they are not incited or approved by top leaders of government.
4: Fully respected by public authorities. Political killings are non-existent.
SCALE: Ordinal, converted to interval by the measurement model.
DATA RELEASE: 1-13.

YEARS: 1789-2022

2.1.11.3 Freedom from forced labor for men (v2clslavem)

Long tag: vdem_cd_v2clslavem

Original tag: v2clslavem

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C
PROJECT MANAGER(S): Svend-Erik Skaaning
ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr
QUESTION: Are adult men free from servitude and other kinds of forced labor?
CLARIFICATION: Involuntary servitude occurs when an adult is unable to quit a job s/he desires to leave — not by reason of economic necessity but rather by reason of employer's coercion. This includes labor camps but not work or service which forms part of normal civic obligations such as conscription or employment in command economies.
RESPONSES:
0: Male servitude or other kinds of forced labor is widespread and accepted (perhaps even organized) by the state.
1: Male servitude or other kinds of forced labor is substantial. Although officially opposed by the public authorities, the state is unwilling or unable to effectively contain the practice.
2: Male servitude or other kinds of forced labor exists but is not widespread and usually actively opposed by public authorities, or only tolerated in some particular areas or among particular social groups.
3: Male servitude or other kinds of forced labor is infrequent and only found in the criminal underground. It is actively and sincerely opposed by the public authorities.
4: Male servitude or other kinds of forced labor is virtually non-existent.
SCALE: Ordinal, converted to interval by the measurement model.
DATA RELEASE: 1-13.
CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).
CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

2.1.11.4 Freedom from forced labor for women (v2clsлавef)

Long tag: vdem_cd_v2clsлавef

Original tag: v2clsлавef

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Pamela Paxton, Svend-Erik Skaaning

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Are adult women free from servitude and other kinds of forced labor?

CLARIFICATION: Involuntary servitude occurs when an adult is unable to quit a job s/he desires to leave — not by reason of economic necessity but rather by reason of employer's coercion. This includes labor camps but not work or service which forms part of normal civic obligations such as conscription or employment in command economies.

This question does not ask you to assess the *relative* freedom of men and women from forced labor. Thus, a country in which both men and women suffer the same conditions of servitude might be coded a (0) for women, even though there is equality across the sexes.

RESPONSES:

0: Female servitude or other kinds of forced labor is widespread and accepted (perhaps even organized) by the state.

1: Female servitude or other kinds of forced labor is substantial. Although officially opposed by the public authorities, the state is unwilling or unable to effectively contain the practice.

2: Female servitude or other kinds of forced labor exists but is not widespread and usually actively opposed by public authorities, or only tolerated in some particular areas or among particular social groups.

3: Female servitude or other kinds of forced labor is infrequent and only found in the criminal underground. It is actively and sincerely opposed by the public authorities.

4: Female servitude or other kinds of forced labor is virtually non-existent.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

2.1.11.5 Transparent laws with predictable enforcement (v2cltrnslw)

Long tag: vdem_cd_v2cltrnslw

Original tag: v2cltrnslw

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Svend-Erik Skaaning

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Are the laws of the land clear, well publicized, coherent (consistent with each other), relatively stable from year to year, and enforced in a predictable manner?

CLARIFICATION: This question focuses on the transparency and predictability of the laws of the land.

RESPONSES:

0: Transparency and predictability are almost non-existent. The laws of the land are created and/or enforced in completely arbitrary fashion.

1: Transparency and predictability are severely limited. The laws of the land are more often than not created and/or enforced in arbitrary fashion.

2: Transparency and predictability are somewhat limited. The laws of the land are mostly created in a non-arbitrary fashion but enforcement is rather arbitrary in some parts of the country.

3: Transparency and predictability are fairly strong. The laws of the land are usually created and enforced in a non-arbitrary fashion.

4: Transparency and predictability are very strong. The laws of the land are created and enforced in a non-arbitrary fashion.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*

2.1.11.6 Rigorous and impartial public administration (v2clrspct)

Long tag: vdem_cd_v2clrspct

Original tag: v2clrspct

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Svend-Erik Skaaning

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Are public officials rigorous and impartial in the performance of their duties?

CLARIFICATION: This question focuses on the extent to which public officials generally abide by the law and treat like cases alike, or conversely, the extent to which public administration is characterized by arbitrariness and biases (*i.e.*, nepotism, cronyism, or discrimination).

The question covers the public officials that handle the cases of ordinary people. If no functioning public administration exists, the lowest score (0) applies.

RESPONSES:

0: The law is not respected by public officials. Arbitrary or biased administration of the law is rampant.

1: The law is weakly respected by public officials. Arbitrary or biased administration of the law is widespread.

2: The law is modestly respected by public officials. Arbitrary or biased administration of the law is moderate.

3: The law is mostly respected by public officials. Arbitrary or biased administration of the law is limited.

4: The law is generally fully respected by the public officials. Arbitrary or biased administration of the law is very limited.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

2.1.11.7 Access to justice for men (v2clacjstm)

Long tag: vdem_cd_v2clacjstm

Original tag: v2clacjstm

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Svend-Erik Skaaning

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Do men enjoy secure and effective access to justice?

CLARIFICATION: This question specifies the extent to which men can bring cases before the courts without risk to their personal safety, trials are fair, and men have effective ability to seek redress if public authorities violate their rights, including the rights to counsel, defense, and appeal.

This question does not ask you to assess the *relative* access to justice men and women. Thus, it is possible to assign the lowest possible score to a country even if men and women enjoy equal — and extremely limited — access to justice.

RESPONSES:

0: Secure and effective access to justice for men is non-existent.

1: Secure and effective access to justice for men is usually not established or widely respected.

2: Secure and effective access to justice for men is inconsistently observed. Minor problems characterize most cases or occur rather unevenly across different parts of the country.

3: Secure and effective access to justice for men is usually observed.

4: Secure and effective access to justice for men is almost always observed.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

2.1.11.14 Weaker civil liberties characteristics (v2clrgwkch)

Long tag: vdem_cd_v2clrgwkch

Original tag: v2clrgwkch

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Kelly McMann

ADDITIONAL VERSIONS: *_nr

QUESTION: How would you describe the areas of the country where government officials' respect for civil liberties is significantly *weaker*?

CLARIFICATION: Choose all that apply.

RESPONSES:

0: Rural. (0=No, 1=Yes) [v2clrgwkch_0]

1: Urban. (0=No, 1=Yes) [v2clrgwkch_1]

2: Areas that are less economically developed. (0=No, 1=Yes) [v2clrgwkch_2]

3: Areas that are more economically developed. (0=No, 1=Yes) [v2clrgwkch_3]

4: Inside the capital city. (0=No, 1=Yes) [v2clrgwkch_4]

5: Outside the capital city. (0=No, 1=Yes) [v2clrgwkch_5]

6: North. (0=No, 1=Yes) [v2clrgwkch_6]

7: South. (0=No, 1=Yes) [v2clrgwkch_7]

8: West. (0=No, 1=Yes) [v2clrgwkch_8]

9: East. (0=No, 1=Yes) [v2clrgwkch_9]

10: Areas of civil unrest (including areas where insurgent groups are active). (0=No, 1=Yes) [v2clrgwkch_10]

11: Areas where illicit activity is widespread. (0=No, 1=Yes) [v2clrgwkch_11]

12: Areas that are very sparsely populated. (0=No, 1=Yes) [v2clrgwkch_12]

13: Areas that are remote (difficult to reach by available transportation, for example). (0=No, 1=Yes) [v2clrgwkch_13]

14: Areas where there are indigenous populations. (0=No, 1=Yes) [v2clrgwkch_14]

15: Areas where the national ruling party or group is strong. (0=No, 1=Yes) [v2clrgwkch_15]

16: Areas where the national ruling party or group is weak. (0=No, 1=Yes) [v2clrgwkch_16]

17: Areas that were subject to a longer period of foreign rule. (0=No, 1=Yes) [v2clrgwkch_17]

18: Areas that were subject to a shorter period of foreign rule. (0=No, 1=Yes) [v2clrgwkch_18]

19: Areas that were recently subject to foreign rule. (0=No, 1=Yes) [v2clrgwkch_19]

20: Areas that have not recently been subject to foreign rule. (0=No, 1=Yes) [v2clrgwkch_20]

21: None of the above. (0=No, 1=Yes) [v2clrgwkch_21]

2.1.11.15 Freedom of discussion for men (v2cldiscm)

Long tag: vdem_cd_v2cldiscm

Original tag: v2cldiscm

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Svend-Erik Skaaning

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Are men able to openly discuss political issues in private homes and in public spaces?

CLARIFICATION: This indicator specifies the extent to which men are able to engage in private discussions, particularly on political issues, in private homes and public spaces (restaurants, public transportation, sports events, work etc.) without fear of harassment by other members of the polity or the public authorities. We are interested in restrictions by the government and its agents but also cultural restrictions or customary laws that are enforced by other members of the polity, sometimes in informal ways.

This question does not ask you to assess the *relative* freedom of men and women. Thus, it is possible to assign the lowest possible score to a country even if men and women enjoy equal — and extremely low — rights to freedom of discussion.

RESPONSES:

0: Not respected. Hardly any freedom of expression exists for men. Men are subject to immediate and harsh intervention and harassment for expression of political opinion.

1: Weakly respected. Expressions of political opinions by men are frequently exposed to intervention and harassment.

2: Somewhat respected. Expressions of political opinions by men are occasionally exposed to intervention and harassment.

3: Mostly respected. There are minor restraints on the freedom of expression in the private sphere, predominantly limited to a few isolated cases or only linked to soft sanctions. But as a rule there is no intervention or harassment if men make political statements.

4: Fully respected. Freedom of speech for men in their homes and in public spaces is not restricted.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

2.1.11.17 Freedom of academic and cultural expression (v2clacfree)

Long tag: vdem_cd_v2clacfree

Original tag: v2clacfree

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Svend-Erik Skaaning

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Is there academic freedom and freedom of cultural expression related to political issues?

RESPONSES:

0: Not respected by public authorities. Censorship and intimidation are frequent. Academic activities and cultural expressions are severely restricted or controlled by the government.

1: Weakly respected by public authorities. Academic freedom and freedom of cultural expression are practiced occasionally, but direct criticism of the government is mostly met with repression.

2: Somewhat respected by public authorities. Academic freedom and freedom of cultural expression are practiced routinely, but strong criticism of the government is sometimes met with repression.

3: Mostly respected by public authorities. There are few limitations on academic freedom and freedom of cultural expression, and resulting sanctions tend to be infrequent and soft.

4: Fully respected by public authorities. There are no restrictions on academic freedom or cultural expression.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

2.1.11.18 Freedom of religion (v2clrelig)

Long tag: vdem_cd_v2clrelig

Original tag: v2clrelig

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky,

Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Svend-Erik Skaaning

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Is there freedom of religion?

CLARIFICATION: This indicator specifies the extent to which individuals and groups have the right to choose a religion, change their religion, and practice that religion in private or in public as well as to proselytize peacefully without being subject to restrictions by public authorities.

RESPONSES:

0: Not respected by public authorities. Hardly any freedom of religion exists. Any kind of religious practice is outlawed or at least controlled by the government to the extent that religious leaders are appointed by and subjected to public authorities, who control the activities of religious communities in some detail.

1: Weakly respected by public authorities. Some elements of autonomous organized religious practices exist and are officially recognized. But significant religious communities are repressed, prohibited, or systematically disabled, voluntary conversions are restricted, and instances of discrimination or intimidation of individuals or groups due to their religion are common.

2: Somewhat respected by public authorities. Autonomous organized religious practices exist and are officially recognized. Yet, minor religious communities are repressed, prohibited, or systematically disabled, and/or instances of discrimination or intimidation of individuals or groups due to their religion occur occasionally.

3: Mostly respected by public authorities. There are minor restrictions on the freedom of religion, predominantly limited to a few isolated cases. Minority religions face denial of registration, hindrance of foreign missionaries from entering the country, restrictions against proselytizing, or hindrance to access to or construction of places of worship.

4: Fully respected by public authorities. The population enjoys the right to practice any religious belief they choose. Religious groups may organize, select, and train personnel; solicit and receive contributions; publish; and engage in consultations without undue interference. If religious communities have to register, public authorities do not abuse the process to discriminate against a religion and do not constrain the right to worship before registration.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

2.1.11.19 Freedom of foreign movement (v2clfmov)

Long tag: vdem_cd_v2clfmov

Original tag: v2clfmov

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Svend-Erik Skaaning

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Is there freedom of foreign travel and emigration?

CLARIFICATION: This indicator specifies the extent to which citizens are able to travel freely to and from the country and to emigrate without being subject to restrictions by public authorities.

RESPONSES:

0: Not respected by public authorities. Citizens are rarely allowed to emigrate or travel out

of the country. Transgressors (or their families) are severely punished. People discredited by the public authorities are routinely exiled or prohibited from traveling.

1: Weakly respected by public authorities. The public authorities systematically restrict the right to travel, especially for political opponents or particular social groups. This can take the form of general restrictions on the duration of stays abroad or delays/refusals of visas.

2: Somewhat respected by the public authorities. The right to travel for leading political opponents or particular social groups is occasionally restricted but ordinary citizens only met minor restrictions.

3: Mostly respected by public authorities. Limitations on freedom of movement and residence are not directed at political opponents but minor restrictions exist. For example, exit visas may be required and citizens may be prohibited from traveling outside the country when accompanied by other members of their family.

4: Fully respected by the government. The freedom of citizens to travel from and to the country, and to emigrate and repatriate, is not restricted by public authorities.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Svend-Erik Skaaning

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Do men enjoy freedom of movement within the country?

CLARIFICATION: This indicator specifies the extent to which all men are able to move freely, in daytime and nighttime, in public thoroughfares, across regions within a country, and to establish permanent residency where they wish. Note that restrictions in movement might be imposed by the state and/or by informal norms and practices. Such restrictions sometimes fall on rural residents, on specific social groups, or on dissidents.

This question does not ask you to assess the *relative* freedom of men and women. Thus, it is possible to assign the lowest possible score to a country even if men and women enjoy equal — and extremely low — freedom of movement.

Do *not* consider restrictions in movement that are placed on ordinary (non-political) criminals. Do not consider restrictions in movement that result from crime or unrest.

RESPONSES:

0: Virtually no men enjoy full freedom of movement (*e.g.*, North Korea).

1: Some men enjoy full freedom of movement, but most do not (*e.g.*, Apartheid South Africa).

2: Most men enjoy some freedom of movement but a sizeable minority does not. Alternatively all men enjoy partial freedom of movement.

3: Most men enjoy full freedom of movement but a small minority does not.

4: Virtually all men enjoy full freedom of movement.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

2.1.11.22 State ownership of economy (v2clstown)

Long tag: vdem_cd_v2clstown

Original tag: v2clstown

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Svend-Erik Skaaning

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Does the state own or directly control important sectors of the economy?

CLARIFICATION: This question gauges the degree to which the state owns and controls capital (including land) in the industrial, agricultural, and service sectors.

It does *not* measure the extent of government revenue and expenditure as a share of total output; indeed, it is quite common for states with expansive fiscal policies to exercise little direct control (and virtually no ownership) over the economy.

RESPONSES:

0: Virtually all valuable capital belongs to the state or is directly controlled by the state. Private property may be officially prohibited.

1: Most valuable capital either belongs to the state or is directly controlled by the state.

2: Many sectors of the economy either belong to the state or are directly controlled by the state, but others remain relatively free of direct state control.

3: Some valuable capital either belongs to the state or is directly controlled by the state, but most remains free of direct state control.

4: Very little valuable capital belongs to the state or is directly controlled by the state.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

2.1.11.23 Property rights for men (v2clprptym)

Long tag: vdem_cd_v2clprptym

Original tag: v2clprptym

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Svend-Erik Skaaning

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Do men enjoy the right to private property?

CLARIFICATION: Private property includes the right to acquire, possess, inherit, and sell private property, including land. Limits on property rights may come from the state (which may legally limit rights or fail to enforce them); customary laws and practices; or religious or social norms. This question concerns the right to private property, not actual ownership of property.

This question does not ask you to assess the *relative* rights of men and women. Thus, it is possible to assign the lowest possible score to a country even if men and women enjoy equal — and very minimal — property rights.

RESPONSES:

0: Virtually no men enjoy private property rights of any kind.

1: Some men enjoy some private property rights, but most have none.

2: Many men enjoy many private property rights, but a smaller proportion enjoys few or none.

3: More than half of men enjoy most private property rights, yet a smaller share of men have much more restricted rights.

4: Most men enjoy most private property rights but a small minority does not.

5: Virtually all men enjoy all, or almost all property rights.

2.1.12 V-Dem Indicators - Sovereignty and State

Instructions to the coders (as shown in the surveys)

Sovereignty: This section addresses a number of issues concerning the sovereignty of the state. A state is political organization that organizes compulsory domination over a fixed territory on a continual basis. With respect to state sovereignty, we are interested in measuring two distinct areas of sovereignty. The first is an attribute of states within the context of the international system. Here, we are interested in the state's autonomy from other actors in the system. The second component of sovereignty concerns the relationship of the state to the population and territory over which it claims to rule. Here, we want to gauge the extent of recognition of the preeminent authority of the state over its claimed territory and population.

Sovereignty – Historical clarification: This section addresses a number of issues concerning the state. A state is a political organization that organizes compulsory domination over a fixed territory on a continual basis. The questions concern two general themes: state sovereignty and state administration.

With respect to state sovereignty, we are interested in measuring two distinct areas of sovereignty. The first is an attribute of states within the context of the international system. Here, we are interested in the state's autonomy from and recognition by other actors in the system. The second component of sovereignty concerns the relationship of the state to the population and territory over which it claims to rule. Here, we want to gauge the extent of recognition of the preeminent authority of the state over its claimed territory and population.

A second attribute of states is the state administration: the set of institutions that administer and

implement governmental decisions. Here we are mainly interested in the professionalization, or lack thereof, of the state administrative staff – in this context termed the state administrators.

The State: “This section addresses a number of issues concerning the state. A state is a political organization that organizes compulsory domination over a fixed territory on a continual basis. The questions concern two general themes: state sovereignty and state administration.

With respect to state sovereignty, we are interested in measuring two distinct areas of sovereignty. The first is an attribute of states within the context of the international system. Here, we are interested in the state’s autonomy from and recognition by other actors in the system. The second component of sovereignty concerns the relationship of the state to the population and territory over which it claims to rule. Here, we want to gauge the extent of recognition of the preeminent authority of the state over its claimed territory and population.

A second attribute of states is the state administration: the set of institutions that administer and implement governmental decisions. Here we are mainly interested in the professionalization, or lack thereof, of the state administrative staff—in this context termed the state administrators.”

2.1.12.1 Domestic Autonomy (v2svdomaut)

Long tag: vdem_cd_v2svdomaut

Original tag: v2svdomaut

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Michael Bernhard

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Is the state autonomous from the control of other states with respect to the conduct of domestic policy?

CLARIFICATION: The question of domestic autonomy does not include restrictions emanating from treaties (*e.g.*, NATO), international organizations (*e.g.*, the WTO), or confederations (*e.g.*, the European Union) if these agreements are freely negotiated by the state and if the state is free to exit from that treaty, organization, or confederation. Nor does it include restrictions on policymaking emanating from international market forces and trans-national corporations.

RESPONSES:

0: Non-autonomous. National level authority is exercised by an external power, either by law or in practice. The most common examples of this are direct colonial rule and military occupation (*e.g.* quadripartite occupation of Germany in 1945). It also includes situations in which domestic actors provide *de jure* cover for *de facto* control by a foreign power (*e.g.* Vichy France). However, control of some part of the territory of a state by an enemy during war is not considered control by external actors if the sovereign government remains on scene and continues to wage conventional war (*e.g.*, the USSR during WW II).

1: Semi-autonomous. An external political actor directly constrains the ability of domestic actors to rule, decides who can or cannot rule through formal rules or informal understandings, or precludes certain policies through explicit treaty provisions or well-understood rules of the game from which the subject state cannot withdraw. Examples include Soviet “satellite” states in Eastern Europe, and situations where colonial powers grant limited powers of national self-government to their possessions (*e.g.*, protectorates and limited home government).

2: Autonomous. Domestic political actors exercise political authority free of the direct control of external political actors.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

PROJECT MANAGER(S): Michael Bernhard

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Is the state autonomous from the control of other states with respect to the conduct of its foreign policy?

RESPONSES:

0: Non-autonomous. Foreign policy is controlled by an external power, either *de facto* or *de jure*. The most common examples of this are colonial rule and military occupation (*e.g.* quadripartite occupation of Germany in 1945). Situations in which domestic actors provide *de jure* cover for *de facto* control by a foreign power should not be construed as semi-autonomy (*e.g.* Vichy France). Governments in exile that control underground forces waging unconventional warfare are not considered as mitigating an occupation regime (*e.g.* countries under German occupation during WWII).

1: Semi-autonomous. An external political actor directly constrains the ability of domestic actors to pursue an independent foreign policy course in some important areas. This may be the product of explicit treaty provisions or well-understood rules of the game from which the subject state cannot withdraw. Examples would include Soviet strictures over rule in so-called "satellite" states in Eastern Europe, and explicitly negotiated postwar settlements (*e.g.* Austria following WWII).

2: Autonomous. Domestic political actors exercise foreign policy free of the direct control of external political actors. Direct control is meant to exclude the exercise of constraint or the impact of interdependence in the international system. Treaties in which states concede some part of that control to a supra- or international organization voluntarily, and from which there is a possibility of exit should not be interpreted as a violation of autonomy.

2.1.12.3 State authority over territory (v2svstterr)

Long tag: vdem_cd_v2svstterr

Original tag: v2svstterr

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Michael Bernhard

ADDITIONAL VERSIONS: *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Over what percentage (percent) of the territory does the state have effective control?

CLARIFICATION: With this question we seek to judge the extent of recognition of the preeminent authority of the state over its territory. We are not interested here in perfect control by the state, or whether it is relatively effective in comparison to other states, but an assessment of the areas over which it is hegemonic, *e.g.* where it is recognized as the

preeminent authority and in a contest of wills it can assert its control over political forces that reject its authority. Several illustrative examples may help in this coding. During civil wars the claim of the state to rule is effectively neutralized by insurgent groups (*e.g.*, the Tamil Tigers in Sri Lanka). There are also situations in which criminals or warlords exert control in contravention of state authority (*e.g.* opium growers in parts of Indochina). There are also cases of failed states where the central government cannot assert control over a share of its territory (*e.g.*, contemporary Somalia). Here, we ask you to estimate the size of the territory that the state has effective control over, as a percentage (percent) of the total territory that is officially part of the country.

By “officially part of the country” we refer to international law. In cases where international law is not entirely clear, we refer you to general understandings. For example, China claims sovereignty over Taiwan, but it remains under the control of its own government. For purposes of this question, Taiwan should not be considered a failure to control its territory by the government of the PRC.

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: On which of the following sources of revenue does the central government primarily rely to finance its activities?

RESPONSES:

0: The state is not capable of raising revenue to finance itself.

1: The state primarily relies on external sources of funding (loans and foreign aid) to finance its activities.

2: The state primarily relies on directly controlling economic assets (natural resource rents, public monopolies, and the expropriation of assets within and outside the country) to finance its activities.

3: The state primarily relies on taxes on property (land taxes) and trade (customs duties).

4: The state primarily relies on taxes on economic transactions (such as sales taxes) and/or taxes on income, corporate profits and capital.

2.1.12.9 Independent states (v2svindep)

Long tag: vdem_cd_v2svindep

Original tag: v2svindep

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Gleditsch & Ward (2013), IPU Parline, IDEA

Description:

VARIABLE TYPE: A

PROJECT MANAGER(S): Svend-Erik Skaaning, Michael Bernhard

QUESTION: Is the polity an independent state?

CLARIFICATION: We use Gleditsch and Ward's (1999) coding of independent states. Their definition recognizes that listing independent states relies at least in part on subjective evaluations. A state is considered to be an independent polity if it (a) has a relatively autonomous administration over some territory, (b) is considered a distinct entity by local actors or the state it is dependent on. Polities excluded from the list are: colonies; states that have some form of limited autonomy (*e.g.* Scotland); are alleged to be independent but are contiguous to the dominant entity (Ukraine and Belarus prior to 1991); *de facto* independent polities but recognized by at most one other state (Turkish Republic of Northern Cyprus). Occupations or foreign rule are considered to be an actual loss of statehood when they extend beyond a decade. This means that cases such as the Baltic Republic during Soviet occupation are not considered independent states, but independent statehood is retained for European countries occupied during World War II.

RESPONSES:

0: No

1: Yes

SCALE: Dichotomous.

SOURCE(S): Gleditsch and Ward (1999; 2013); IPU Parline; IDEA.

NOTES: V-Dem uses the updated List of independent states (v.5.0), including the tentative list of microstates, posted on Gleditsch's webpage on 14 March 2013. We have reconciled Gleditsch and Ward's data with the V-Dem country definitions (see the document "V-Dem Countries v1.1");).

2.1.13 V-Dem Indicators - Civil Society

Instructions to the coders (as shown in the surveys)

Civil society organization:

The following set of questions focus on civil society organizations (CSOs). These include interest groups, labor unions, religiously inspired organizations (if they are engaged in civic or political activities), social movements, professional associations, and classic non-governmental organizations (NGOs), but *not* businesses, political parties, government agencies, or religious organizations that are primarily focused on spiritual practices. A CSO must also be at least nominally independent of government and economic institutions.

Civil society organization – Historical clarification: The following set of questions focus on civil society organizations (CSOs). These include interest groups, labor unions, religiously inspired organizations (if they are engaged in civic or political activities), social movements, professional associations, and classic non-governmental organizations (NGOs), but not businesses, political parties, government agencies, or religious organizations that are primarily focused on spiritual practices. A CSO must also be at least nominally independent of government and economic institutions.

If no CSOs exist at all for a particular time period, code the following relevant questions as giving the "lowest score" (indicating, for instance, strong repression or no consultation, a 0).

Religious organizations: In this section, we ask two questions regarding religious organizations. These may be religiously inspired civil society organizations (CSOs) or organizations whose purpose is primarily spiritual.

2.1.13.1 CSO entry and exit (v2cseeorgs)

Long tag: vdem_cd_v2cseeorgs

Original tag: v2cseeorgs

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Michael Bernhard

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: To what extent does the government achieve control over entry and exit by civil society organizations (CSOs) into public life?

RESPONSES:

0: Monopolistic control. The government exercises an explicit monopoly over CSOs. The only organizations allowed to engage in political activity such as endorsing parties or politicians, sponsoring public issues forums, organizing rallies or demonstrations, engaging in strikes, or publicly commenting on public officials and policies are government-sponsored organizations. The government actively represses those who attempt to defy its monopoly on political activity.

1: Substantial control. The government licenses all CSOs and uses political criteria to bar organizations that are likely to oppose the government. There are at least some citizen-based organizations that play a limited role in politics independent of the government. The government actively represses those who attempt to flout its political criteria and bars them from any political activity.

2: Moderate control. Whether the government ban on independent CSOs is partial or full, some prohibited organizations manage to play an active political role. Despite its ban on organizations of this sort, the government does not or cannot repress them, due to either its weakness or political expedience.

3: Minimal control. Whether or not the government licenses CSOs, there exist constitutional provisions that allow the government to ban organizations or movements that have a history of anti-democratic action in the past (*e.g.* the banning of neo-fascist or communist

organizations in the Federal Republic of Germany). Such banning takes place under strict rule of law and conditions of judicial independence.

4: Unconstrained. Whether or not the government licenses CSOs, the government does not impede their formation and operation unless they are engaged in activities to violently overthrow the government.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Bernhard *et al.* (2017); Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

2.1.13.2 CSO repression (v2csreprss)

Long tag: vdem_cd_v2csreprss

Original tag: v2csreprss

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Michael Bernhard

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Does the government attempt to repress civil society organizations (CSOs)?

RESPONSES:

0: Severely. The government violently and actively pursues all real and even some imagined members of CSOs. They seek not only to deter the activity of such groups but to effectively liquidate them. Examples include Stalinist Russia, Nazi Germany, and Maoist China.

1: Substantially. In addition to the kinds of harassment outlined in responses 2 and 3 below, the government also arrests, tries, and imprisons leaders of and participants in oppositional CSOs who have acted lawfully. Other sanctions include disruption of public gatherings and violent sanctions of activists (beatings, threats to families, destruction of valuable property). Examples include Mugabe's Zimbabwe, Poland under Martial Law, Serbia under Milosevic.

2: Moderately. In addition to material sanctions outlined in response 3 below, the government also engages in minor legal harassment (detentions, short-term incarceration) to dissuade CSOs from acting or expressing themselves. The government may also restrict the scope of their actions through measures that restrict association of civil society organizations with each other or political parties, bar civil society organizations from taking certain actions, or block international contacts. Examples include post-Martial Law Poland, Brazil in the early 1980s, the late Franco period in Spain.

3: Weakly. The government uses material sanctions (fines, firings, denial of social services) to deter oppositional CSOs from acting or expressing themselves. They may also use burdensome registration or incorporation procedures to slow the formation of new civil society organizations and sidetrack them from engagement. The government may also organize Government Organized Movements or NGOs (GONGOs) to crowd out independent organizations. One example would be Singapore in the post-Yew phase or Putin's Russia.

4: No. Civil society organizations are free to organize, associate, strike, express themselves, and to criticize the government without fear of government sanctions or harassment.

SCALE: Ordinal, converted to interval by the measurement model.

NOTES: For reasons of consistency, as of December 2014, responses to this question are reversed so that the least democratic response is "0" and the most democratic is "4".

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Are major civil society organizations (CSOs) routinely consulted by policymakers on policies relevant to their members?

RESPONSES:

0: No. There is a high degree of insulation of the government from CSO input. The government may sometimes enlist or mobilize CSOs after policies are adopted to sell them to the public at large. But it does not often consult with them in formulating policies.

1: To some degree. CSOs are but one set of voices that policymakers sometimes take into account.

2: Yes. Important CSOs are recognized as stakeholders in important policy areas and given voice on such issues. This can be accomplished through formal corporatist arrangements or through less formal arrangements.

2.1.13.6 CSO anti-system movements (v2csantimv)

Long tag: vdem_cd_v2csantimv

Original tag: v2csantimv

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Michael Bernhard

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Among civil society organizations, are there anti-system opposition movements?

CLARIFICATION: An anti-system opposition movement is any movement — peaceful or armed — that is based in the country (not abroad) and is organized in opposition to the current political system. That is, it aims to change the polity in fundamental ways, *e.g.*, from democratic to autocratic (or vice-versa), from capitalist to communist (or vice-versa), from secular to fundamentalist (or vice-versa). This movement may be linked to a political party that competes in elections but it must also have a "movement" character, which is to say a mass base and an existence separate from normal electoral competition.

If there are several movements, please answer in a general way about the relationship of those movements to the regime.

RESPONSES:

0: No, or very minimal. Anti-system movements are practically nonexistent.

1: There is only a low-level of anti-system movement activity but it does not pose much of a threat to the regime.

2: There is a modest level of anti-system movement activity, posing some threat to the regime.

3: There is a high level of anti-system movement activity, posing substantial threat to the

regime.

4: There is a very high level of anti-system movement activity, posing a real and present threat to the regime.

ORDERING: If coded "0", skip the following questions focused on anti-system movements.

PROJECT MANAGER(S): Michael Coppedge

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Are major religious organizations routinely consulted by policymakers on policies relevant to their members?

RESPONSES:

0: No. There is a high degree of insulation of the government from input from religious organizations. The government may sometimes enlist or mobilize religious organizations after policies are adopted to sell them to the public at large. But typically, it does not consult with them in formulating policies.

1: To some degree. Religious organizations are but one set of voices that policymakers sometimes take into account.

2: Yes. Important religious organizations are recognized as stakeholders in important policy areas and given voice on such issues. This can be accomplished through formal corporatist arrangements or through less formal arrangements.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Bernhard *et al.* (2017); Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

2.1.13.9 CSO anti-system movement character (v2csanmvch)

Long tag: vdem_cd_v2csanmvch

Original tag: v2csanmvch

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Michael Bernhard

ADDITIONAL VERSIONS: *_nr

QUESTION: How would you characterize the anti-system movement(s) identified in the previous question?

CLARIFICATION: Check all that apply.

RESPONSES:

0: Works through legal channels, for the most part. (0=No, 1=Yes) [v2csanmvch_0]

1: Participates in elections. (0=No, 1=Yes) [v2csanmvch_1]

2: Works through a mix of legal and extra-legal channels. (0=No, 1=Yes) [v2csanmvch_2]

3: Insurrectionary. (0=No, 1=Yes) [v2csanmvch_3]

4: Democratic. Perceived by most disinterested observers as willing to play by the rules of the democratic game, willing to respect constitutional provisions or electoral outcomes, and willing to relinquish power (under democratic auspices). (0=No, 1=Yes) [v2csanmvch_4]

5: Anti-democratic. Perceived by most disinterested observers as unwilling to play by the rules of the democratic game, not willing to respect constitutional provisions or electoral outcomes, and/or not willing to relinquish power (under democratic auspices). (0=No, 1=Yes) [v2csanmvch_5]

6: Leftist, socialist, communist. (0=No, 1=Yes) [v2csanmvch_6]

7: Rightist, conservative, party of order. (0=No, 1=Yes) [v2csanmvch_7]

8: Ethnolinguistic, tribe, kinship, clan. (0=No, 1=Yes) [v2csanmvch_8]
9: Separatist or autonomist. (0=No, 1=Yes) [v2csanmvch_9]
10: Religious. (0=No, 1=Yes) [v2csanmvch_10]
11: Paramilitary. (0=No, 1=Yes) [v2csanmvch_11]
12: Heavily engaged in criminal activity, *e.g.*, narcotics, bootlegging, illegal exploitation of natural resources, extortion, kidnapping. (0=No, 1=Yes) [v2csanmvch_12]
SCALE: Series of dichotomous scales.
ANSWER-TYPE: Multiple-selection.

2.1.13.10 CSO structure (v2csstruc)

Long tag: vdem_cd_v2csstruc

Original tag: v2csstruc

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Michael Bernhard

ADDITIONAL VERSIONS: *_nr

QUESTION: Civil societies inevitably involve a mix of larger and smaller organizations. Please characterize the relative influence of large mass constituency civil society organizations (CSOs) versus smaller, more local, or narrowly construed CSOs.

RESPONSES:

0: The state does not allow autonomous CSOs. (0=No, 1=Yes) [v2csstruc_0]

1: Large encompassing organizations dominate. The government and CSOs are linked formally through a corporatist system of interest intermediation; or, due to historical circumstances, particular large CSOs are highly influential. The voice of such organizations is recognized by the government and is accorded special weight by policymakers. (0=No, 1=Yes) [v2csstruc_1]

2: Neither large encompassing nor small CSOs dominate. Influence is contingent on circumstances. Organizations, both large and small, contend with one another to have their voice considered by policymakers. (0=No, 1=Yes) [v2csstruc_2]

3: Small CSOs dominate. Many small organizations contend with one another to have their voices heard by policymakers. (0=No, 1=Yes) [v2csstruc_3]

SCALE: Series of dichotomous scales.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Mean.

CITATION: Bernhard *et al.* (2017); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

2.1.14 V-Dem Indicators - The Media

Instructions to the coders (as shown in the surveys)

Media: Two types of media are distinguished in this section: (1) print (newspapers and magazines) and broadcast (radio and television), and (2) online media. We ask that you evaluate these categories as a whole. Thus, "the print and broadcast media" can provide a wide range of perspectives in a country even when individual publications or programs take a consistently narrow perspective.

Historical clarification: Two types of media are distinguished in this section: (1) print (newspapers and magazines) and (2) broadcast (radio) media. The latter is, however, only for

reference to the contemporary era, and should of course be ignored before it appeared. But when applicable, we ask that you evaluate these categories as a whole. If there is no print or broadcast media at all in a given time period, leave the following questions blank (missing) for this time period. Please also explicitly note in the comments section at the end for which years there was no print or broadcast media at all.

2.1.14.1 Government censorship effort - Media (v2mecenefm)

Long tag: vdem_cd_v2mecenefm

Original tag: v2mecenefm

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Michael Coppedge

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Does the government directly or indirectly attempt to censor the print or broadcast media?

CLARIFICATION: Indirect forms of censorship might include politically motivated awarding of broadcast frequencies, withdrawal of financial support, influence over printing facilities and distribution networks, selected distribution of advertising, onerous registration requirements, prohibitive tariffs, and bribery.

We are not concerned with censorship of non-political topics such as child pornography, statements offensive to a particular religion, or defamatory speech unless this sort of censorship is used as a pretext for censoring political speech.

RESPONSES:

0: Attempts to censor are direct and routine.

1: Attempts to censor are indirect but nevertheless routine.

2: Attempts to censor are direct but limited to especially sensitive issues.

3: Attempts to censor are indirect and limited to especially sensitive issues.

4: The government rarely attempts to censor major media in any way, and when such exceptional attempts are discovered, the responsible officials are usually punished.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*)

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1900-2022

2.1.14.2 Internet censorship effort (v2mecenefi)

Long tag: vdem_cd_v2mecenefi

Original tag: v2mecenefi

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Michael Coppedge

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Does the government attempt to censor information (text, audio, or visuals) on the Internet?

CLARIFICATION: Censorship attempts include Internet filtering (blocking access to certain websites or browsers), denial-of-service attacks, and partial or total Internet shutdowns. We are not concerned with censorship of topics such as child pornography, highly classified information such as military or intelligence secrets, statements offensive to a particular religion, or defamatory speech unless this sort of censorship is used as a pretext for censoring

political information or opinions. We are also not concerned with the *extent* of internet access, unless there is absolutely no access at all (in which case the coding should be 0).

RESPONSES:

0 (1): The government successfully blocks Internet access except to sites that are pro-government or devoid of political content.

1 (2): The government attempts to block Internet access except to sites that are pro-government or devoid of political content, but many users are able to circumvent such controls.

2 (3): The government allows Internet access, including to some sites that are critical of the government, but blocks selected sites that deal with especially politically sensitive issues.

3 (4): The government allows Internet access that is unrestricted, with the exceptions mentioned above.

SCALE: Ordinal, converted to interval by the measurement model.

NOTES: As of December 2014, the former category "0 There is no internet"; is coded separately as v2mecenefibin. The variable is then rebased to zero.

DATA RELEASE: 3-13.

2.1.14.9 Media bias (v2mebias)

Long tag: vdem_cd_v2mebias

Original tag: v2mebias

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Michael Coppedge

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Is there media bias against opposition parties or candidates?

CLARIFICATION: We ask you to take particular care in rating the year-to-year variation on this question if media bias tends to increase or decrease in election years. Coverage can be considered *quot;more or less impartialquot;* when the media as a whole present a mix of positive and negative coverage of each party or candidate.

RESPONSES:

0: The print and broadcast media cover only the official party or candidates, or have no political coverage, or there are no opposition parties or candidates to cover.

1: The print and broadcast media cover more than just the official party or candidates but all the opposition parties or candidates receive only negative coverage.

2: The print and broadcast media cover some opposition parties or candidates more or less impartially, but they give only negative or no coverage to at least one newsworthy party or candidate.

3: The print and broadcast media cover opposition parties or candidates more or less impartially, but they give an exaggerated *amount* of coverage to the governing party or candidates.

4: The print and broadcast media cover all newsworthy parties and candidates more or less impartially and in proportion to their newsworthiness.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

2.1.14.10 Media corrupt (v2mecorrpt)

Long tag: vdem_cd_v2mecorrpt

Original tag: v2mecorrpt

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Michael Coppedge

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Do journalists, publishers, or broadcasters accept payments in exchange for altering news coverage?

RESPONSES:

0: The media are so closely directed by the government that any such payments would be either unnecessary to ensure pro-government coverage or ineffective in producing anti-government coverage.

1: Journalists, publishers, and broadcasters routinely alter news coverage in exchange for payments.

2: It is common, but not routine, for journalists, publishers, and broadcasters to alter news coverage in exchange for payments.

3: It is not normal for journalists, publishers, and broadcasters to alter news coverage in exchange for payments, but it happens occasionally, without anyone being punished.

4: Journalists, publishers, and broadcasters rarely alter news coverage in exchange for payments, and if it becomes known, someone is punished for it.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

YEARS: 1900-2022

2.1.15 V-Dem Indicators - Political Equality

Instructions to the coders (as shown in the surveys)

Political Equality: This section pertains to political equality, that is, the extent to which members of a polity possess equal political power. It does not refer to the inevitable differentiation in power that occurs in all large societies between those who hold positions of power within the state (political elites) and lay citizens. It is, rather, about the distribution of political power among identifiable groups within the population.

What does it mean for a group of individuals to wield real political power? Although political power cannot be directly observed, one can infer that groups possess power to the extent that they: (a) actively participate in politics (by voting, etc.), (b) are involved in civil society organizations, (c) secure representation in government, (d) are able to set the political agenda, (e) influence political decisions, and (f) influence the implementation of those decisions. Please consider all these factors when answering the following questions. (Of course, the picture across these different dimensions may be mixed; your response should indicate the overall picture, taking all aspects of political power into account.)

2.1.15.1 Power distributed by socioeconomic position (v2pepwrse)

Long tag: vdem_cd_v2pepwrse

Original tag: v2pepwrse

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): John Gerring

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Is political power distributed according to socioeconomic position?

CLARIFICATION: All societies are characterized by some degree of economic (wealth and income) inequality. In some societies, income and wealth are distributed in a grossly unequal fashion. In others, the difference between rich and poor is not so great. Here, we are concerned not with the degree of social inequality but rather with the political effects of this inequality. Specifically, we are concerned with the extent to which wealth and income translates into political power.

RESPONSES:

0: Wealthy people enjoy a virtual monopoly on political power. Average and poorer people

have almost no influence.

1: Wealthy people enjoy a dominant hold on political power. People of average income have little say. Poorer people have essentially no influence.

2: Wealthy people have a very strong hold on political power. People of average or poorer income have some degree of influence but only on issues that matter less for wealthy people.

3: Wealthy people have more political power than others. But people of average income have almost as much influence and poor people also have a significant degree of political power.

4: Wealthy people have no more political power than those whose economic status is average or poor. Political power is more or less equally distributed across economic groups.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

2.1.15.2 Power distributed by social group (v2pepwrSOC)

Long tag: vdem_cd_v2pepwrSOC

Original tag: v2pepwrSOC

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): John Gerring

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Is political power distributed according to social groups?

CLARIFICATION: A social group is differentiated within a country by caste, ethnicity, language, race, region, religion, or some combination thereof. (It does *not* include identities grounded in sexual orientation or socioeconomic status.) Social group identity is contextually defined and is likely to vary across countries and through time. Social group identities are also likely to cross-cut, so that a given person could be defined in multiple ways, *i.e.*, as part of multiple groups. Nonetheless, at any given point in time there are social groups within a society that are understood — by those residing within that society — to be different, in ways that may be politically relevant.

RESPONSES:

0: Political power is monopolized by one social group comprising a minority of the population. This monopoly is institutionalized, *i.e.*, not subject to frequent change.

1: Political power is monopolized by several social groups comprising a minority of the population. This monopoly is institutionalized, *i.e.*, not subject to frequent change.

2: Political power is monopolized by several social groups comprising a majority of the population. This monopoly is institutionalized, *i.e.*, not subject to frequent change.

3: Either all social groups possess some political power, with some groups having more power than others; or different social groups alternate in power, with one group controlling much of the political power for a period of time, followed by another — but all significant groups have a turn at the seat of power.

4: All social groups have roughly equal political power *or* there are no strong ethnic, caste, linguistic, racial, religious, or regional differences to speak of. Social group characteristics are not relevant to politics.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

2.1.15.3 Power distributed by gender (v2pepwrngen)

Long tag: vdem_cd_v2pepwrngen

Original tag: v2pepwrngen

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): John Gerring

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Is political power distributed according to gender?

RESPONSES:

0: Men have a near-monopoly on political power.

1: Men have a dominant hold on political power. Women have only marginal influence.

2: Men have much more political power but women have some areas of influence.

3: Men have somewhat more political power than women.

4: Men and women have roughly equal political power.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

2.1.15.4 Power distributed by sexual orientation (v2pepwrort)

Long tag: vdem_cd_v2pepwrort

Original tag: v2pepwrort

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): John Gerring

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: To what extent is political power distributed according to sexual orientation?

CLARIFICATION: This question contrasts (A) the political power of heterosexuals and lesbian, gay, bisexual, and transgender (LGBT) members of the polity who are not open about their sexuality with (B) the political power of lesbian, gay, bisexual, and transgender (LGBT) members of the polity who are open about their sexuality. (A) will be referred to as "heterosexual" and (B) as "LGBT".

Note that in comparing the political power of these two groups we are comparing their power per person. So, when we say that LGBT have less, equal, or more power than heterosexuals we mean relative to their share of the population (as near as this can be estimated).

RESPONSES:

0: LGBTs are entirely excluded from the public sphere and thus deprived of any real political power (even though they may possess formal powers such as the ballot).

1: LGBTs have much less political power than heterosexuals. LGBTs enjoy formal rights to participate in politics but are subject to informal norms that often serve to exclude them from the halls of power.

2: LGBTs have somewhat less political power than heterosexual citizens.

3: LGBTs have about the same political power as heterosexuals. Each group enjoys a degree of political power that is roughly proportional to their population.

4: LGBTs enjoy somewhat more political power than heterosexuals by virtue of greater wealth, education, and high level of organization and mobilization.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

PROJECT MANAGER(S): Michael Coppedge, John Gerring, Staffan Lindberg

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: To what extent is high quality basic education guaranteed to all, sufficient to enable them to exercise their basic rights as adult citizens?

CLARIFICATION: Basic education refers to ages typically between 6 and 16 years of age but this varies slightly among countries.

RESPONSES:

0: Extreme. Provision of high quality basic education is extremely unequal and at least 75 percent (percent) of children receive such low-quality education that undermines their ability to exercise their basic rights as adult citizens.

1: Unequal. Provision of high quality basic education is extremely unequal and at least 25 percent (percent) of children receive such low-quality education that undermines their ability to exercise their basic rights as adult citizens.

2: Somewhat equal. Basic education is relatively equal in quality but ten to 25 percent (percent) of children receive such low-quality education that undermines their ability to exercise their basic rights as adult citizens.

3: Relatively equal. Basic education is overall equal in quality but five to ten percent (percent) of children receive such low-quality education that probably undermines their ability to exercise their basic rights as adult citizens.

4: Equal. Basic education is equal in quality and less than five percent (percent) of children receive such low-quality education that probably undermines their ability to exercise their basic rights as adult citizens.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

QUESTION: To what extent is high quality basic healthcare guaranteed to all, sufficient to enable them to exercise their basic political rights as adult citizens?

CLARIFICATION: Poor-quality healthcare can make citizens unable to exercise their basic rights as adult citizens by failing to adequately treat preventable and treatable illnesses that render them unable to work, participate in social or political organizations, or vote (where voting is allowed).

RESPONSES:

0: Extreme. Because of poor-quality healthcare, at least 75 percent (percent) of citizens' ability to exercise their political rights as adult citizens is undermined.

1: Unequal. Because of poor-quality healthcare, at least 25 percent (percent) of citizens' ability to exercise their political rights as adult citizens is undermined.

2: Somewhat equal. Because of poor-quality healthcare, ten to 25 percent (percent) of citizens' ability to exercise their political rights as adult citizens is undermined.

3: Relatively equal. Basic health care is overall equal in quality but because of poor-quality healthcare, five to ten percent (percent) of citizens' ability to exercise their political rights as adult citizens is undermined.

4: Equal. Basic health care is equal in quality and less than five percent (percent) of citizens cannot exercise their basic political rights as adult citizens.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

2.1.16 V-Dem Indicators - Exclusion

Instructions to the coders (as shown in the surveys)

Exclusion:

The following survey contains questions pertaining to exclusion. Political, economic and social well-being may depend on whether groups or individuals are excluded from positions of power, the state's protection of rights and freedoms, access to public goods and services, and opportunities to work or do business with the state.

Please bear in mind the following definitions as you respond to questions on this survey:

Exclusion is when individuals are denied access to services or participation in governed spaces based on their identity or belonging to a particular group. It is not necessary for all members of a group to be excluded in order for group-based exclusion to occur. Exclusion occurs even when only a single individual is excluded based on her or his identity or membership (perceived or actual) in a particular group.

Political groups are defined as those who are affiliated with a particular political party or candidate, or a group of parties/candidates. A common form of partisan exclusion is when state services or regulations are implemented in a way that seeks to reward the incumbent's political supporters and punish non-supporters.

Socio-Economic position defines groups based on attributes of wealth, occupation, or other

economic circumstances such as owning property. Exclusion of economic groups occurs when, for example, those who are not property owners are restricted from voting, or when fees associated with justice, health or education are set at a rate that is unaffordable for poorer individuals.

Social group is differentiated within a country by caste, ethnicity, language, race, region, religion, migration status, or some combination thereof. (It does not include identities grounded in sexual orientation, gender, or socioeconomic status.) Social group identity is contextually defined and is likely to vary across countries and through time. Social group identities are also likely to cross-cut, so that a given person could be defined in multiple ways, i.e., as part of multiple groups. Nonetheless, at any given point in time there are social groups within a society that are understood - by those residing within that society - to be different, in ways that may be politically relevant. Contrast Identity group.

Geographic group refers to those living in rural or urban areas. Urban areas are defined as an area that meets the following conditions: population density exceeds a threshold of 150 persons per square kilometer and there is access to a sizeable settlement of 50,000 people or more within some reasonable travel time, for example 60 minutes by road. (World Development Report, 2009: 54).

2.1.16.1 Access to public services distributed by socio-economic position (v2peapsecon)

Long tag: vdem_cd_v2peapsecon

Original tag: v2peapsecon

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Rachel Sigman

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Is access to basic public services, such as order and security, primary education, clean water, and healthcare, distributed equally according to socioeconomic position?

CLARIFICATION: This question asks if socio-economic position is an important cleavage in society for the distribution of public services. Thus, if there are inequalities in access to public services, but these are not mainly due to differentiation between particular socio-economic position, the code should be “4” (equal). The situation could of course vary by type of public service, such that a socio-economic group is denied access to some basic public services but not others. Please base your response on whether access to most of the aforementioned services are distributed equally or unequally.

RESPONSES:

0: Extreme. Because of poverty or low income, 75 percent (percent) or more of the population lack access to basic public services of good quality.

1: Unequal. Because of poverty or low income, 25 percent (percent) or more of the population lack access to basic public services of good quality.

2: Somewhat Equal. Because of poverty or low income, 10 to 25 percent (percent) of the population lack access to basic public services of good quality.

3: Relatively Equal. Because of poverty or low income, 5 to 10 percent (percent) of the population lack access to basic public services of good quality.

4: Equal. Because of poverty or low income, less than 5 percent (percent) of the population lack access to basic public services of good quality.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 9-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see V-Dem Methodology).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1900-2022

2.1.16.2 Access to state jobs by socio-economic position (v2peasjsoecon)

Long tag: vdem_cd_v2peasjsoecon

Original tag: v2peasjsoecon

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Rachel Sigman

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Are state jobs equally open to qualified individuals regardless of socio-economic position?

CLARIFICATION: Socio-economic position defines groups based on attributes of wealth, occupation, or other economic circumstances such as owning property.

RESPONSES:

0: Extreme. Because of poverty or low income, 75 percent (percent) or more of the population, even if qualified, lack access to state jobs.

1: Unequal. Because of poverty or low income, makes 25 percent (percent) or more of the population, even if qualified, lack access to state jobs.

2: Somewhat Equal. Because of poverty or low income, 10 to 25 percent (percent) of the population, even if qualified, lack access to state jobs.

3: Relatively Equal. Because of poverty or low income, 5 to 10 percent (percent) of the population, even if qualified, lack access to state jobs.

4: Equal. Because of poverty or low income, less than 5 percent (percent) of the population, even if qualified, lack access to state jobs.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 9-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see V-Dem Methodology).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

CONVERGENCE: Model parameters with convergence issues: country-date latent trait estimates, universal thresholds, expert reliability, expert thresholds, main-country-coded thresholds.

2.1.16.3 Access to state business opportunities by socio-economic position (v2peasbecon)

Long tag: vdem_cd_v2peasbecon

Original tag: v2peasbecon

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Rachel Sigman

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Are state business opportunities equally available to qualified individuals regardless of socio-economic position?

CLARIFICATION: State business opportunities refer to the ability to compete for or receive a public procurement contract, to partner with the government in public-private partnerships, etc. Socio-economic position defines groups based on attributes of wealth, occupation, or other economic circumstances such as owning property.

RESPONSES:

0: Extreme. Because of poverty or low income makes 75 percent (percent) or more of the population, even if qualified, lack access to state business opportunities.

1: Unequal. Because of poverty or low income makes 25 percent (percent) or more of the population, even if qualified, lack access to state business opportunities.

2: Somewhat Equal. Because of poverty or low income makes 10 to 25 percent (percent) of

the population, even if qualified, lack access to state business opportunities.
3: Relatively Equal. Because of poverty or low income makes 5 to 10 percent (percent) of the population, even if qualified, lack access to state business opportunities.
4: Equal. Because of poverty or low income makes less than 5 percent (percent) of the population, even if qualified, lack access to state business opportunities.
SCALE: Ordinal, converted to interval by the measurement model.
DATA RELEASE: 9-13.

2.1.16.8 Power distributed by urban-rural location (v2pepwrgeo)

Long tag: vdem_cd_v2pepwrgeo

Original tag: v2pepwrgeo

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Rachel Sigman

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Is political power distributed according to urban-rural location?

CLARIFICATION: Urban areas are defined as an area that meets the following conditions: population density exceeds a threshold of 150 persons per square kilometer, there is access to a sizeable settlement of 50,000 people or more within some reasonable travel time, for example 60 minutes by road. (World Development Report, 2009: 54)

RESPONSES:

0: People living in urban areas have a near-monopoly on political power.

1: People living in urban areas have a dominant hold on political power. Those living in rural areas have only marginal influence.

2: People living in urban areas have much more political power but those living in rural areas have some areas of influence.

3: People living in urban areas have somewhat more political power than those living in rural areas.

4: People living in any area have roughly equal political power or people living in rural areas have more access to political power than those in urban areas.

5: People living in rural areas have much more political power but those living in urban areas have some areas of influence.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 9-13.

2.1.16.11 Access to state jobs by urban-rural location (v2peasjgeo)

Long tag: vdem_cd_v2peasjgeo

Original tag: v2peasjgeo

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Rachel Sigman

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Are state jobs equally open to qualified individuals regardless of their rural or urban location?

CLARIFICATION: Urban areas are defined as an area that meets the following conditions: population density exceeds a threshold of 150 persons per square kilometer, there is access to a sizeable settlement of 50,000 people or more within some reasonable travel time, for example 60 minutes by road. (World Development Report, 2009: 54)

RESPONSES:

0: Extreme. Because they live in rural areas, 75 percent (percent) or more of the population, even if qualified, lack access to state jobs.

1: Unequal. Because they live in rural areas, 25 percent (percent) or more of the population, even if qualified, lack access to state jobs.

2: Somewhat Equal. Because they live in rural areas, 10 to 25 percent (percent) of the

population, even if qualified, lack access to state jobs.
3: Relatively Equal. Because they live in rural areas, only 5 to 10 percent (percent) of the population, even if qualified, lack access to state jobs.
4: Equal. Because they live in rural areas, less than 5 percent (percent) of the population, even if qualified, lack access to state jobs.
5: Rural-Bias. Because they live in urban areas, 25percent or more of the population, even if qualified, lack access to state jobs.
SCALE: Ordinal, converted to interval by the measurement model.
DATA RELEASE: 9-13.
CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see V-Dem Methodology).
CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).
YEARS: 1900-2022
CONVERGENCE: Model parameters with convergence issues: country-date latent trait estimates, universal thresholds, expert reliability, expert thresholds, main-country-coded thresholds.

2.1.16.12 Access to state business opportunities by urban-rural location (v2peasbegeo)

Long tag: vdem_cd_v2peasbegeo

Original tag: v2peasbegeo

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Rachel Sigman

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Are state business opportunities equally available to qualified individuals or firms regardless of their rural or urban locations?

CLARIFICATION: State business opportunities refer to the ability to compete for or receive a public procurement contract, to partner with the government in public-private partnerships, etc. Urban areas are defined as an area that meets the following conditions: population density exceeds a threshold of 150 persons per square kilometer, there is access to a sizeable settlement of 50,000 people or more within some reasonable travel time, for example 60 minutes by road. (World Development Report, 2009: 54)

RESPONSES:

0: Extreme. Because they live in rural areas, 75 percent (percent) or more of the population, even if qualified, lack access to state business opportunities.

1: Unequal. Because they live in rural areas, 25 percent (percent) or more of the population, even if qualified, lack access to state business opportunities.

2: Somewhat Equal. Because they live in rural areas, 10 to 25 percent (percent) of the population, even if qualified, lack access to state business opportunities.

3: Relatively Equal. Because they live in rural areas, 5 to 10 percent (percent) of the population, even if qualified, lack access to state business opportunities.

4: Equal. Because they live in rural areas, less than 5 percent (percent) of the population, even if qualified, lack access to state business opportunities.

5: Rural-Bias. Because they live in urban areas, 25 percent (percent) of the population, even if qualified, lack access to state business opportunities.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 9-13.

2.1.16.13 Political group equality in respect for civil liberties (v2clpolcl)

Long tag: vdem_cd_v2clpolcl

Original tag: v2clpolcl

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Rachel Sigman

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Do members of all political groups enjoy the same level of civil liberties, or are some groups generally in a more favorable position?

CLARIFICATION: A political group is defined as those who are affiliated with a particular political party or candidate, or a group of parties/candidates that can be distinguished from others in terms of enjoyment of civil liberties. Responses should not reflect which party controls the legislature and executive. Here, civil liberties are understood to include access to justice, private property rights, freedom of movement, and freedom from forced labor.

RESPONSES:

0: Some political groups enjoy much fewer civil liberties than other political groups.

1: Some political groups enjoy substantially fewer civil liberties than other political groups.

2: Some political groups enjoy moderately fewer civil liberties than other political groups.

3: Some political groups enjoy slightly fewer civil liberties than other political groups.

4: All political groups enjoy the same level of civil liberties.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 9-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see V-Dem Methodology).

2.1.16.14 Access to public services distributed by political group (v2peapspol)

Long tag: vdem_cd_v2peapspol

Original tag: v2peapspol

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Rachel Sigman

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Is access to basic public services, such as order and security, primary education, clean water, and healthcare, distributed equally across political groups?

CLARIFICATION: A political group is defined as those who are affiliated with a particular political party or candidate, or a group of parties/candidates. This question asks if political group is an important cleavage in society for the distribution of public services. Thus, if there are inequalities in access to public services, but these are not mainly due to differentiation between particular political groups, the code should be “4” (equal). The situation could of course vary by type of public service, such that a political group is denied access to some basic public services but not others. Please base your response on whether access to most of the aforementioned services are distributed equally or unequally.

RESPONSES:

0: Extreme. Because of their political group affiliation 75 percent (percent) or more of the population lack access to basic public services of good quality.

1: Unequal. Because of their political group affiliation 25 percent (percent) or more of the

population lack access to basic public services of good quality.
2: Somewhat Equal. Because of their political group affiliation 10 to 25 percent (percent) of the population lack access to basic public services of good quality.
3: Relatively Equal. Because of their political group affiliation only 5 to 10 percent (percent) of the population lack access to basic public services of good quality.
4: Equal. Because of their political group affiliation less than 5 percent (percent) of the population lack access to basic public services of good quality.
SCALE: Ordinal, converted to interval by the measurement model.
DATA RELEASE: 9-13.
CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see V-Dem Methodology).

2.1.17 V-Dem Indicators - Legitimation

Instructions to the coders (as shown in the surveys)

Legitimation strategies:

Governments make legitimacy claims—provide justifications for the form of rule under which they govern. In the following section we are interested in the nature of the legitimacy claims made by the sitting government. Please note that the government's claims to legitimacy - their legitimation strategies - are the object of inquiry here. We are not asking you to assess how ordinary people judge the legitimacy of their rulers. Do not assume that governments make legitimacy claims on only one basis. We are interested in multi-track and hybrid legitimation strategies. The regime is understood as a set of formal and/or informal rules that govern the choice of political leaders and their exercise of power. The government is understood as the chief executive along with the cabinet, ministries, and top civil servants.

2.1.17.1 Ideology (v2exl_legitideol)

Long tag: vdem_cd_v2exl_legitideol

2.1.18 V-Dem Indicators - Civic and Academic Space

Instructions to the coders (as shown in the surveys)

Civic and Academic Space:

In this survey, we ask you to assess several issues concerning the space for and state of civil society and academia. First, we ask about some general issues such as polarization and peaceful assembly. Then, we probe into mobilization for mass events and associations. Finally, we ask you to consider questions related to academia.

2.1.18.1 Political polarization (v2cacamps)

Long tag: vdem_cd_v2cacamps

Original tag: v2cacamps

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Sebastian Hellmeier

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Is society polarized into antagonistic, political camps?

CLARIFICATION: Here we refer to the extent to which political differences affect social relationships beyond political discussions. Societies are highly polarized if supporters of opposing political camps are reluctant to engage in friendly interactions, for example, in family functions, civic associations, their free time activities and workplaces

RESPONSES:

0: Not at all. Supporters of opposing political camps generally interact in a friendly manner.

1: Mainly not. Supporters of opposing political camps are more likely to interact in a friendly than a hostile manner.

2: Somewhat. Supporters of opposing political camps are equally likely to interact in a friendly or hostile manner.

3: Yes, to noticeable extent. Supporters of opposing political camps are more likely to interact in a hostile than friendly manner.

4: Yes, to a large extent. Supporters of opposing political camps generally interact in a hostile manner.

SCALE: Ordinal, converted to interval by the measurement model.

VARIABLE TYPE: C

PROJECT MANAGER(S): Katrin Kinzelbach

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: How often have non-state actors used political violence against persons this year?

CLARIFICATION: We understand political violence as the use of physical force to achieve political objectives by non-state actors. The restriction to political objectives excludes profit-driven crime-related violence, for instance. By non-state actors we refer to individuals or entities that are not formally part of the state. Thus, politically oriented militias and youth groups count as non-state actors even though they might potentially be informally affiliated with the ruling party or the state. Political violence against persons excludes psychological and symbolic violence (e.g. destruction of objects).

RESPONSES:

0: Not at all. Non-state actors did not use political violence.

1: Rare. Non-state actors rarely used political violence.

2: Occasionally. Non-state actors occasionally used political violence.

3: Frequently. Non-state actors frequently used political violence.

4: Often. Non-state actors often used political violence.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 10-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

2.1.18.3 Freedom of peaceful assembly (v2caassemb)

Long tag: vdem_cd_v2caassemb

Original tag: v2caassemb

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Katrin Kinzelbach

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: To what extent do state authorities respect and protect the right of peaceful assembly?

CLARIFICATION: This question focuses on the ability to assemble publicly in practice. An assembly is “an intentional and temporary presence of a number of individuals in a public place, for a common expressive purpose” (ODIHR and Venice Commission of the Council of Europe 2010). Authorities may limit the right to assembly only if limitations are necessary in the interests of national security or public safety, public order, the protection of public health or morals, or the protection of the rights and freedoms of others, and are lawful, necessary, and proportionate to the aim pursued. Such reasonable and legal restrictions should not be considered when answering. However, if there is evidence that restrictions are used as a pretext for political reasons, this evidence should be considered.

RESPONSES:

0: Never. State authorities do not allow peaceful assemblies and are willing to use lethal force to prevent them.

1: Rarely. State authorities rarely allow peaceful assemblies, but generally avoid using lethal

force to prevent them.

2: Sometimes. State authorities sometimes allow peaceful assemblies, but often arbitrarily deny citizens the right to assemble peacefully.

3: Mostly. State authorities generally allow peaceful assemblies, but in rare cases arbitrarily deny citizens the right to assemble peacefully.

4: Almost always. State authorities almost always allow and actively protect peaceful assemblies except in rare cases of lawful, necessary, and proportionate limitations.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 10-13.

2.1.18.4 State of emergency (v2casoe)

Long tag: vdem_cd_v2casoe

Original tag: v2casoe

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Katrin Kinzelbach

ADDITIONAL VERSIONS: *_nr

QUESTION: Was a national state of emergency in place at any point this year?

CLARIFICATION: A state of emergency is a formal legal act that enables state actors and institutions to change their roles during times of international or domestic crisis. Our definition of state of emergency includes the application of martial law. If there was more than one state of emergency, code the one that was in place for the longer time. Select one option.

RESPONSES:

0: The legal framework does not allow for a declaration of a national state of emergency. (0=No, 1=Yes) [v2casoe_0]

1: There was no state of emergency in place at any point this year, even though provisions for a declaration of a national state of emergency exist. (0=No, 1=Yes) [v2casoe_1]

2: A national state of emergency was in place due to a natural disaster. (0=No, 1=Yes) [v2casoe_2]

3: A national state of emergency was in place due to a terrorist attack. (0=No, 1=Yes) [v2casoe_3]

4: A national state of emergency was in place due to an armed conflict/war, domestically or internationally. (0=No, 1=Yes) [v2casoe_4]

5: A national state of emergency was in place due to mass protest/popular uprising. (0=No, 1=Yes) [v2casoe_5]

6: A national state of emergency was in place for reasons other than those listed above. (0=No, 1=Yes) [v2casoe_6]

SCALE: Series of dichotomous scales.

2.1.18.9 Engagement in state-administered mass organizations (v2castate)

Long tag: vdem_cd_v2castate

Original tag: v2castate

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Sebastian Hellmeier

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: What share of the population is regularly active in state-administered mass associations, such as women, worker or youth leagues?

CLARIFICATION: State-administered mass associations are civilian organizations created and led by the government or the ruling party. Large shares of specific societal groups are voluntary or compulsory members of these associations. Examples include youth leagues such as the Hitlerjugend in Nazi Germany and the pioneers in the Soviet Union, women leagues such as the Women's Federation in China or the Federacion de Mujeres Cubanas and official trade unions in the Soviet Union. Such organizations are formally or informally affiliated with the state and/or with the ruling party. We consider an individual as active if they attend a meeting, activity or event at least twice a year.

RESPONSES:

0: Virtually no one.

1: A small share of the population (less than 5percent).

2: A moderate share of the population (about 5 to 15 percent).

3: A large share of the population (about 16 percent to 25percent).

4: A very large share of the population (about 26percent or more).

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 10-13.

2.1.18.16 Freedom to research and teach (v2cafres)

Long tag: vdem_cd_v2cafres

Original tag: v2cafres

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Katrin Kinzelbach, Ilyas Saliba, Janika Spannagel

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: To what extent are scholars free to develop and pursue their own research and teaching agendas without interference?

CLARIFICATION: Examples of interference include research agendas or teaching curricula being drafted, restricted, or fully censored by a non-academic actor; scholars being externally induced, through possible reprisals, to self-censor; or the university administration abusing its position of power to impose research or teaching agendas on individual academics. It also includes public pressure on academics - offline and online. We do not consider as interference restrictions that are due to research priorities, as well as ethical and quality standards, freely defined by the scholarly community as well as the development of standardized curricula by academics that aim to structure and enhance teaching.

RESPONSES:

0: Completely restricted. When determining their research agenda or teaching curricula, scholars are, across all disciplines, consistently subject to interference or incentivized to self-censor.

1: Severely restricted. When determining their research agenda or teaching curricula, scholars are, in some disciplines, consistently subject to interference or incentivized to self-censor.

2: Moderately restricted. When determining their research agenda or teaching curricula, scholars are occasionally subject to interference or incentivized to self-censor.

3: Mostly free. When determining their research agenda or teaching curricula, scholars are rarely subject to interference or incentivized to self-censor.

4: Fully free. When determining their research agenda or teaching curricula, scholars are not subject to interference or incentivized to self-censor.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 10-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Katrin Kinzelbach, Ilyas Saliba, Janika Spannagel

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: To what extent are scholars free to exchange and communicate research ideas and findings?

CLARIFICATION: Free academic exchange includes uncensored access to research material, unhindered participation in national or international academic conferences, and the uncensored publication of academic material. Free dissemination refers to the unrestricted possibility for scholars to share and explain research findings in their field of expertise to non-academic audiences through media engagement or public lectures.

RESPONSES:

0: Completely restricted. Academic exchange and dissemination is, across all disciplines, consistently subject to censorship, self-censorship or other restrictions.

1: Severely restricted. Academic exchange and dissemination is, in some disciplines, consistently subject to censorship, self-censorship or other restrictions.

2: Moderately restricted. Academic exchange and dissemination is occasionally subject to censorship, self-censorship or other restrictions.

3: Mostly free. Academic exchange and dissemination is rarely subject to censorship, self-censorship or other restrictions.

4: Fully free. Academic exchange and dissemination is not subject to censorship, self-censorship or other restrictions.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 10-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

2.1.18.18 Institutional autonomy (v2cainsaut)

Long tag: vdem_cd_v2cainsaut

Original tag: v2cainsaut

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Katrin Kinzelbach, Ilyas Saliba, Janika Spannagel

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: To what extent do universities exercise institutional autonomy in practice?

CLARIFICATION: Institutional autonomy “means the independence of institutions of higher education from the State and all other forces of society, to make decisions regarding its internal government, finance, administration, and to establish its policies of education, research, extension work and other related activities” (Lima Declaration). Note that institutional autonomy does not preclude universities from accepting state or third party funding, but does require that they remain in charge of all types of decisions listed above. Institutional autonomy does also not preclude a public oversight role by the state over universities’ spending of public funds.

RESPONSES:

0: No autonomy at all. Universities do not exercise any degree of institutional autonomy; non-academic actors control decision-making.

1: Minimal autonomy. Universities exercise only very limited institutional autonomy; non-academic actors interfere extensively with decision-making.

2: Moderate autonomy. Universities exercise some institutional autonomy; non-academic actors interfere moderately with decision-making.

3: Substantial autonomy. Universities exercise institutional autonomy to a large extent; non-academic actors have only rare and minimal influence on decision-making.

4: Complete autonomy. Universities exercise complete institutional autonomy from non-academic actors.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 10-13.

QUESTION: To what extent are campuses free from politically motivated surveillance or security infringements?

CLARIFICATION: “Campus” refers to all university buildings as well as digital research and teaching platforms. Campus integrity means the preservation of an open learning and research environment marked by an absence of an externally induced climate of insecurity or intimidation on campus. Examples of infringements of campus integrity are politically motivated on-campus or digital surveillance, presence by intelligence or security forces, presence of student militias, or violent attacks by third parties, if specifically targeting universities to repress academic life on campus. Note that we are only interested in politically motivated infringements and targeted attacks on campus integrity, not in non-political security concerns or proportionate security measures taken on campus to address these.

RESPONSES:

0: Completely restricted. Campus integrity is fundamentally undermined by extensive surveillance and severe intimidation, including violence or closures.

1: Severely restricted. Campus integrity is to a large extent undermined by surveillance and intimidation, at times including violence or closures.

2: Moderately restricted. Campus integrity is challenged by some significant cases of surveillance or intimidation.

3: Mostly free. Campus integrity is to a large extent respected, with only minor cases of surveillance or intimidation.

4: Fully free. Campus integrity is comprehensively respected; there are no cases of surveillance or intimidation.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 10-13.

QUESTION: To what extent do scholars and university students publicly criticize government policies?

CLARIFICATION: This question is only about the extent scholars and students actually criticize government policies – irrespective of how free they are to do so and whether they are met with repression or not. We ask you simply to consider to what extent scholars and

students are noticeable as government critics in the public discourse.

Public criticism of government policies can be conveyed for example through the publication of op-eds or social media posts on current affairs, the signing of open letters or petitions, the taking part in or organization of public protests, or the holding of critical lectures to students or the public.

RESPONSES:

0: Not at all. Scholars and university students do not publicly express criticism of government policies.

1: To a small extent. Scholars and university students publicly express minor criticism of government policies.

2: To a moderate extent. Scholars and university students publicly express moderate criticism of government policies.

3: To a large extent. Scholars and university students publicly express substantive criticism of government policies.

4: To a major extent. Scholars and university students publicly express fundamental criticism of government policies.

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: <https://treaties.un.org>

Description:

VARIABLE TYPE: A

PROJECT MANAGER(S): Katrin Kinzelbach, Alicja Polakiewicz, Janika Spannagel

QUESTION: Is the state party to the International Covenant on Economic, Social and Cultural Rights (ICESCR) without reservations to article 15 (right to science)?

CLARIFICATION: This indicator captures the country's international legal commitment to academic freedom. It indicates whether the country is party to the International Covenant on Economic, Social and Cultural Rights without having made explicit reservations to its article 15 (right to science), which stipulates, among other things, that states parties "undertake to respect the freedom indispensable for scientific research".

RESPONSES:

0: State not a party to ICESCR, or made reservations to article 15.

1: State is party to ICESCR without reservations to article 15, but treaty not yet in force.

2: ICESCR in force and signed without reservations to article 15.

3: ICESCR in force and ratified without reservations to article 15.

SCALE: Ordinal.

2.1.19 Historical V-Dem - Elections

This part of the codebook contains variables pertaining to the Historical V-Dem data collection. A maximum of 91 countries are included in the sample (see the country table), but some variables (in particular C type variables) cover fewer countries, as coding is still ongoing. For more information on the Historical V-Dem project, please refer to the Organization and Management document (<https://www.v-dem.net/static/website/img/refs/orgmanv111.pdf>) or the Historical V-Dem page: <https://www.v-dem.net/hdata.html>. The vast majority of questions coded by Historical V-Dem are V-Dem indicators previously coded back to 1900, and these indicators are found in other sections of the codebook with merged time series extending all the way from 1789 to the present.

The *Historical V-Dem Elections*- section includes new A, A* and C type indicators that have (at least so far) only been coded for Historical V-Dem, with the modal time series spanning the years 1789-1920 (although time series coverage is different for some variables). This section also includes v3elcomvot, which is coded as a type C variable in Historical V-Dem, while v2elcomvot is coded as a type A variable in Contemporary V-Dem.

For instructions given to the coders (as shown in the surveys), please see introductions to the corresponding theme in the corresponding V-Dem Indicators section.

Long tag: vdem_cd_v3elmalalc

Original tag: v3elmalalc

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Daniel Ziblatt

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Is there a large discrepancy in the vote/seat ratio across electoral districts for the lower (or unicameral) chamber?

CLARIFICATION: "Malapportionment" characterizes a situation in which voters in some districts have more power by virtue of a more favorable vote/seat ratio. For example, if seats have not been reapportioned in a long time rural areas may be over-represented relative to urban areas simply because the latter have grown more rapidly than the former. (This question does not address inequality of votes based on class or other criteria.) Leave blank if there is no lower (or unicameral) chamber.

RESPONSES:

0: There is a high degree of malapportionment. Vote/seat ratios across districts differ by as

much as 50:1.

1: There is a substantial degree of malapportionment. *Vote/seat* ratios across districts differ as much as 10:1.

2: There is some degree of malapportionment. *Vote/seat* ratios across districts differ by as much as 2:1.

3: There is modest or no malapportionment. *Vote/seat* ratios across districts differ by less than 2:1.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 8-13.

Long tag: vdem_cd_v3elreappuc

Original tag: v3elreappuc

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky,

Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Daniel Ziblatt

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Is there a legal or constitutional statute, upheld in practice, stating that seats or electoral boundaries for elections to the upper chamber of the legislature should be regularly reapportioned?

CLARIFICATION: Reapportionment is the process of reallocating the number of seats or the boundaries of a district in order to reflect its relative share of the population. Answering yes does not imply perfect apportionment (see later question). Leave blank if no upper chamber. (This question is not about suffrage or informal restrictions to suffrage.)

RESPONSES:

0: No.

1: Yes, reapportionment is stipulated by constitution or law but not upheld in practice.

2: Yes, reapportionment is stipulated by constitution or law and upheld in practice.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 8-13.

Description:

VARIABLE TYPE: A

PROJECT MANAGER(S): Svend-Erik Skaaning

QUESTION: Is the right to run as a candidate to the lower (or unicameral) chamber of the national parliament restricted for any of the following reasons? (Check all that apply.)

CLARIFICATION: This question applies to citizens only and to legal (*de jure*) restrictions, not restrictions that may be operative in practice (*de facto*). Leave blank if there is no lower (or unicameral) chamber. Specify in comments section if some of the criteria are jointly necessary (*e.g.*, BOTH property AND literacy) or if some of them are mutually substitutable (*e.g.*, EITHER property OR literacy).

RESPONSES:

0: Literacy [v3elstrlc_0]

1: Property [v3elstrlc_1]

2: Income [v3elstrlc_2]

3: Tax payment [v3elstrlc_3]

4: Economic dependency (*e.g.*, personal servants/debtors/single sons living with their father) [v3elstrlc_4]

5: Slave [v3elstrlc_5]

6: Ethnicity, race [v3elstrlc_6]

7: Religion [v3elstrlc_7]

8: Region [v3elstrlc_8]

9: quot;Bad moral characterquot; [v3elstrlc_9]

10: Clergy/military personnel/police/civil servants [v3elstrlc_10]
11 : Incarcerated or ex-felons [v3elstrlc_11]
12: Gender – all women excluded [v3elstrlc_12]
13: Gender – women qualified on narrower basis than men. [v3elstrlc_13]
SCALE: Nominal
ANSWER-TYPE: Multiple-selection.

YEARS: 1790-1920

2.1.20 Historical V-Dem - Political Parties

This part of the codebook contains variables pertaining to the Historical V-Dem data collection. A maximum of 91 countries are included in the sample (see the country table), but some variables (in particular C type variables) cover fewer countries, as coding is still ongoing. For more information on the Historical V-Dem project, please refer to the Organization and Management document (<https://www.v-dem.net/static/website/img/refs/orgmanv111.pdf>) or the Historical V-Dem page: <https://www.v-dem.net/hdata.html>. The vast majority of questions coded by Historical V-Dem are V-Dem indicators previously coded back to 1900, and these indicators are found in other sections of the codebook with merged time series extending all the way from 1789 to the present.

The *Historical V-Dem - Political Parties*- section includes new A, A* and C type indicators that

have (at least so far) only been coded for Historical V-Dem, with the modal time series spanning the years 1789-1920 (although time series coverage is different for some variables). This section also includes `v3elcomvot`, which is coded as a type C variable in Historical V-Dem, while `v2elcomvot` is coded as a type A variable in Contemporary V-Dem.

For instructions given to the coders (as shown in the surveys), please see introductions to the corresponding theme in the corresponding V-Dem Indicators section.

2.1.20.1 Party identification (`v3partyid`)

Long tag: `vdem_cd_v3partyid`

Original tag: `v3partyid`

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): John Gerring

ADDITIONAL VERSIONS: `*_nr`

QUESTION: Do voters identify with a political party?

CLARIFICATION: When party identification is strong, vote choice is largely determined by a voter's party affiliation (and his/her affiliation with that party) rather than attachments to particular candidates, non-partisan issue-positions, or material incentives (*e.g.*, vote-buying). Likewise, when party identification is strong, voters retain loyalty to a single party rather than switching from one party to another across elections or across offices in the same election (ticket-splitting). In this fashion we can somewhat crudely distinguish between partisans and non-partisans. Note that this question refers only to voters, not to members of the population who do not vote (because they are disenfranchised, choose not to vote, or are discouraged from voting). Leave this question blank if there are no national elections.

RESPONSES:

0: There are national elections, but there are no political parties.

1: Only one party is allowed to participate in national elections.

2: More than one party participates, and nearly all voters are non-partisans.

3: More than one party participates, and most voters are non-partisans.

4: More than one party participates, and voters are equally divided between partisans and non-partisans.

5: More than one party participates, and most voters are partisans.

6: More than one party participates, and nearly all voters are partisans.

SCALE: Nominal, but categories 2–6 constitute ordinal.

DATA RELEASE: 8-13.

CROSS-CODER AGGREGATION: Mean.

2.1.21.1 Lower chamber budget (v3lgbudglo)

Long tag: vdem_cd_v3lgbudglo

Original tag: v3lgbudglo

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): John Gerring

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Is the lower chamber of the legislature required to approve the budget?

CLARIFICATION: The budget refers to major revenue (appropriations) and expenditure (spending) bills. Typically, these are passed annually or bi-annually. Approval is understood to mean a formal vote on the floor of the chamber in which at least 50percent of those voting approve the measure.

RESPONSES:

0: No. Includes situations in which (a) there are no formal budget bills, or (b) the executive entirely by-passes the lower house or ignores its actions.

1: Yes. Includes situations in which (a) the executive exercises selective (quot;line-itemquot;) vetoes, and (b) there is a prolonged period in which no budget is passed and the executive is unable to raise and spend money, or must operate under the terms of the previous budget.

SCALE: Dichotomous

2.1.21.6 Lower chamber quota for social groups (v3lgqumin)

Long tag: vdem_cd_v3lgqumin

Original tag: v3lgqumin

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: <https://www.constituteproject.org>, <http://countrystudies.us>, <https://en.wikipedia.org>

Description:

VARIABLE TYPE: A

PROJECT MANAGER(S): John Gerring

QUESTION: Is there a national-level quota for any social groups in the lower (or unicameral) chamber of the legislature?

CLARIFICATION: These quotas are sometimes informally known as "minority quotas." Do not record gender quotas here (as gender is not part of what we mean by a social group). Also, do not include special rules that benefit parties defined by social group but do not guarantee seats for these groups. For example, do not count a rule exempting parties from threshold requirements. Code "yes" only if the groups covered by the quota have full voting rights in the legislature.

RESPONSES:

0: No national level quota for any social group.

1: Yes, there are reserved seats for at least one social group.

2.1.23.1 Labor rights (v3cllabrig)

Long tag: vdem_cd_v3cllabrig

Original tag: v3cllabrig

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): John Gerring

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Does labor enjoy the right to organize freely and bargain collectively?

CLARIFICATION: Refers to actual practice not formal (*de jure*) rights. If practices vary across the country, or across sectors, please consider the overall situation of labor.

RESPONSES:

0: Independent labor unions (free from state or ruling party control) are not allowed.

1: Independent labor unions are allowed, at least in some sectors of the economy or some sections of the country. However, they are subject to harassment by the police, paramilitary groups, business associations, or other groups. Harassment refers to systematic beatings, imprisonment, outlawing of specific unions, and other actions that seriously impinge upon the ability of unions to organize and bargain collectively.

2: Independent labor unions are allowed and they do not face violent repression but the legal climate is not friendly (*e.g.*, "closed shop"; rules are widespread), making it difficult to organize and bargain collectively.

3: Independent labor unions are allowed and may organize freely in all sectors of the economy.

SCALE: Ordinal, converted to interval by the measurement model.

YEARS: 1789-2015

2.1.24 Historical V-Dem - Sovereignty and State

This part of the codebook contains variables pertaining to the Historical V-Dem data collection. A maximum of 91 countries are included in the sample (see the country table), but some variables (in particular C type variables) cover fewer countries, as coding is still ongoing. For more information on the Historical V-Dem project, please refer to the Organization and Management document (<https://www.v-dem.net/static/website/img/refs/orgmanv111.pdf>) or the Historical V-Dem page: <https://www.v-dem.net/hdata.html>. The vast majority of questions coded by Historical V-Dem are V-Dem indicators previously coded back to 1900, and these indicators are found in other sections of the codebook with merged time series extending all the way from 1789 to the present.

The *Historical V-Dem - Sovereignty and State*- section includes new A, A* and C type indicators that have (at least so far) only been coded for Historical V-Dem, with the modal time series spanning the years 1789-1920 (although time series coverage is different for some variables). This section also includes v3elcomvot, which is coded as a type C variable in Historical V-Dem, while v2elcomvot is coded as a type A variable in Contemporary V-Dem.

For instructions given to the coders (as shown in the surveys), please see introductions to the corresponding theme in the corresponding V-Dem Indicators section.

2.1.24.1 Census (v3stcensus)

Long tag: vdem_cd_v3stcensus

Original tag: v3stcensus

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Brambor et al. (2016), Various country-specific sources

Description:

VARIABLE TYPE: A

PROJECT MANAGER(S): Jan Teorell, Thomas Brambor, Agustín Goenaga, Johannes Lindvall

QUESTION: Was there a national census in this year?

CLARIFICATION: In order to count as a "census", the following four criteria needs to be satisfied:

1. UNIVERSALITY: the census attempted to cover the entire population and not just a sample.

2. INDIVIDUAL ENUMERATION: the census enumerates each individual separately and records his or her characteristics separately. If the census only produces aggregate or summarised information, it is only a population count and should not count as a census. For example, A population count of a household with 4 people would produce the following results:

Age—Adults: 2; Children: 2

Sex—Males: 2; Females: 2

Instead, an individual enumeration would look like this:

Head of household-male-adult

Spouse-female-adult

Son-male-child

Daughter-female-child

The key difference is that only in the individual enumeration the data on various characteristics can be cross-tabulated.

3. DEFINED TERRITORY: The territory covered, along with any changes in its area is clearly stated.

4. SIMULTANEITY AND SPECIFIED TIME: Each person is enumerated as nearly as possible to the same well-defined point in time, and the collected data should refer to a well-defined reference period.

Code "1" if a national census was completed in this year – but not if it was aborted or was not national in scope.

RESPONSES:

0. No.

2.1.24.6 Rulers involvement in the state administration (v3struinvadm)

Long tag: vdem_cd_v3struinvadm

Original tag: v3struinvadm

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Agnes Cornell

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: To what extent are day-to-day decisions made by state administrators subject to intervention from political elites?

CLARIFICATION: By political elites we mean members of the executive, members of the legislature and political elites at local and regional levels. Note that the focus on the day-to-day decisions of the state administration implies interference in specific operational decisions in a meticulous manner. Decisions taken by rulers about the general direction of the state administration should not be considered. Note that the question refers to the *de facto* situation.

RESPONSES:

0: Constantly. Day-to-day decisions taken by state administrators are constantly subject to intervention.

1: Often. Day-to-day decisions in the state administration are often subject to intervention.

2: About half. Approximately half of the day-to-day decisions in the state administration are subject to intervention.

3: Occasionally. Day-to-day decisions in the state administration are occasionally subject to intervention.

4: Never, or hardly ever. Day-to-day decisions in the state administration are never or hardly ever subject to intervention.

SCALE: Ordinal.

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Jan Teorell

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Can the state oversee and regulate the economy?

CLARIFICATION: This refers to the state's ability to keep track of economic activities in its territory and potentially influence them by shaping the incentives and constraints that private firms face to do business; *e.g.*, through licensing, granting exploitation rights, taxing, imposing market barriers, building infrastructure, offering subsidies, adjudicating conflicts, or enforcing regulations.

RESPONSES:

0: Most economic activities happen outside the reach of the state

1: The state steers some economic activities

2: The state steers a substantial share – but less than half – of the national economy
3: The state steers about half or more than half, of the national economy
4: The state steers all or almost all economic activities
SCALE: Ordinal.

2.1.26 Historical V-Dem - Historical V-Dem Modified

This part of the codebook contains variables pertaining to the Historical V-Dem data collection. A maximum of 91 countries are included in the sample (see the country table), but some variables (in particular C type variables) cover fewer countries, as coding is still ongoing. For more information on the Historical V-Dem project, please refer to the Organization and Management document (<https://www.v-dem.net/static/website/img/refs/orgmanv111.pdf>) or the Historical V-Dem page: <https://www.v-dem.net/hdata.html>. The vast majority of questions coded by Historical V-Dem are V-Dem indicators previously coded back to 1900, and these indicators are found in other sections of the codebook with merged time series extending all the way from 1789 to the present.

V-Dem indicators that are different to their contemporary counterparts, for the purpose of gathering additional relevant information for the historical period in Historical V-Dem. These variables are also merged into their v2 equivalents.

First, In contrast to contemporary V-Dem, Historical V-Dem codes upper chamber elections and thus also includes eltype category 2. Those observations are treated as missing in the historical-contemporary merged version of v2eltype. Due to election specific variables being cleaned by v2eltype, these do not include upper chamber elections either. In order to include historical data on upper chamber elections we thus also provide v3eltype and v3 election specific variables that are cleaned by v3eltype.

Second, Historical V-Dem codes additional chambers compared to contemporary V-Dem. When merging v2lgbicam and v3lgbicam the categories get recoded as follows:

- Categories 3 (tricameral) and 4 (quadricameral) become category 2 for the merged v2lgbicam.
- Category 9 (Other types of legislature) becomes category 0 for the merged v2lgbicam.

In order to include historical data on additional chambers, we thus also provide v3lgbicam and v3 chamber specific variables that are cleaned by v3lgbicam.

2.1.26.1 Lower chamber electoral system (v3elloelsy)

Long tag: vdem_cd_v3elloelsy

Original tag: v3elloelsy

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Golder (2006), Kollman et al. (2011), Nohlen (2005), Nohlen et al. (2002), Nohlen & Stöver (2010), Nohlen et al. (1999), Chronicle of Parliamentary Elections (IPU), IDEA, IFES, various country-specific sources

Description:

VARIABLE TYPE: A

PROJECT MANAGER(S): Carl Henrik Knutsen

QUESTION: What was the electoral system used in this election for the lower or unicameral chamber of the legislature?

CLARIFICATION: Further information on the following electoral system types can be found in Reynolds/Reilly, The New International IDEA Handbook (2005), chapter two and Annex B (Glossary of Terms) – downloadable, free of charge, at www.idea.int/publications/esd/.

RESPONSES:

0: First-past-the-post (FPP, aka plurality) in single-member constituencies. The candidate with the most votes wins the seat.

1: Two-round system in single-member constituencies. Like FPP except that a threshold — usually 50percent + 1 — is required to avoid a runoff between the two top vote-getters.

2: Alternative vote in single-member districts. Voters rank-order their preferences for the

candidates who compete for a single seat. If any candidate receives an absolute majority of first preferences, s/he is elected. If not, then the least successful candidates (based on first-preferences) are eliminated and their votes reallocated to the second-preferences. This process is repeated until a candidate reaches 50percent +1 of the votes.

3: Block vote in multi-member districts. Electors have as many votes as there are seats within that district and can rank-order them (within or across parties) as they please.

4: Party block vote in multi-member districts. Voters cast a vote for a single party (but not for individual candidates within the party's list). The party with the most votes (*i.e.*, a plurality) wins all the seats in that district.

5: Parallel (SMD/PR). Some seats are in single-member districts (allocated by FPP or two-round electoral rules) and other seats are in multimember districts (allocated by some form of PR). These districts are overlapping, meaning that each elector votes twice: once in the single-member district race and once in the multi-member district race. Results are independent.

6: Mixed-member proportional (SMD with PR compensatory seats). Some seats are in single-member districts (allocated by FPP or two-round electoral rules) and other seats are in multimember districts (allocated by some form of PR). These districts are overlapping, meaning that each elector votes twice: once in the single-member district race and once in the multi-member district race. Results are not independent. Specifically, the multimember seats are used to rectify disproportionalities achieved in the single-member district election — by adding seats, as necessary. This means that the representation of parties in the legislature is determined entirely by the PR ballot. It also means that the result of an MMP election is similar to the result of a PR election: parties achieve representation according to their nationwide vote share (on the PR ballot)

7: List PR with small multi-member districts (mean district size ≤ 7). Each party presents a list of candidates for election within a district. Electors vote for a party, and parties receive seats in (rough) proportion to their overall share of the vote. Mean district size is less than seven.

8: List PR with large multi-member districts (mean district size > 7). Each party presents a list of candidates for election within a district. Electors vote for a party, and parties receive seats in (rough) proportion to their overall share of the vote. Mean district size is greater than seven.

9: Single-transferable vote (STV) in multi-member districts. Electors rank-order candidates nominated for a district. Candidates that surpass a specified quota of first-preference votes are elected. The remaining seats are chosen by reallocating the votes of the least successful candidates to elector's second- (or third-) preferences until the specified quota is reached. This process is repeated until all seats for that district are filled.

10: Single non-transferable vote (SNTV) in multi-member districts. Each elector chooses a single candidate. The candidates with the most votes (a plurality) win. (The number of winners is of course determined by the size of the district.)

11: Limited vote in multi-member districts.

Electors have more than one vote but fewer votes than the number of seats in the district. The candidates with the most votes (a plurality) win. (The number of winners is of course determined by the size of the district.)

12: Borda Count in single- or multi-member districts. Electors use numbers to mark preferences among candidates and each preference is assigned a value. For example, in a ten-candidate field a first preference is worth one, a second preference is worth .9, and so forth. These are summed and the candidate(s) with the highest total(s) is/are elected.

SCALE: Nominal

Description:

VARIABLE TYPE: A

PROJECT MANAGER(S): Carl Henrik Knutsen

QUESTION: Did control of the lower (or unicameral) chamber of the legislature change as a result of this election, according to official results?

RESPONSES:

0: No. The majority party or ruling coalition includes the same or substantially the same parties, even if some minor parties (holding less than 10 percent of the seats in the legislature) left or joined the coalition, or because the elections do not affect the lower chamber.

1: Half. A minority party or coalition who was not in control of the chamber before the elections assumed the leading position in the legislature but is dependent on other parties for support. Or, a post-election ruling coalition includes some old parties and some new parties and the new parties represent more than 10 percent of the seats in the legislature.

2: Yes. The incumbent party or coalition lost its majority or plurality-dominant position in the legislature and a different party or coalition assumes the majority position.

SCALE: Ordinal.

SOURCE(S): Nohlen and colleagues (1999, 2002, 2005, 2010). Caramani (2000). Websites of National Parliaments. Library of Congress - Country Studies. Various country-specific sources. Constitutions.

Long tag: vdem_cd_v3eltype

Original tag: v3eltype

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: A*

PROJECT MANAGER(S): Carl Henrik Knutsen

QUESTION: What type of election was held on this date?

CLARIFICATION: The date and type of each election has been pre-coded. Any pre-coded years contain an orange triangle. This means that the score or specific date have already been entered, so we are asking you only to add your confidence in the pre-coded rating; we do not want you to change the rating, as we need all the Country Experts to answer the subsequent questions for the same elections.

If the election unfolds across more than one day, the date for the first day is entered. If the

precise date was unavailable, the first of the month is entered. If the month is unknown, January 1 is entered. Multiple-round elections (*e.g.*, two-round elections) are counted separately, *i.e.*, as separate elections. More than one election in a single year is accommodated by listing each election with a separate calendar date. When elections to more than one office occur on the same day these are listed separately (though naturally with the same date).

RESPONSES:

- 0: Legislative; lower, sole, or both chambers, first or only round. [v3eltype_0]
- 1: Legislative, lower, sole, or both chambers, second round. [v3eltype_1]
- 2: Legislative, upper chamber only, first or only round. [v3eltype_2]
- 3: Legislative, upper chamber only, second round. [v3eltype_3]
- 4: Constituent Assembly, first or only round. [v3eltype_4]
- 5: Constituent Assembly, second round. [v3eltype_5]
- 6: Presidential, first or only round. [v3eltype_6]
- 7: Presidential, second round. [v3eltype_7]
- 8: Metropolitan or supranational legislative, first or only round. [v3eltype_8]
- 9: Metropolitan or supranational legislative, second round. [v3eltype_9]

ANSWER-TYPE: Multiple-selection

Description:

VARIABLE TYPE: A

PROJECT MANAGER(S): Carl Henrik Knutsen

QUESTION: What percentage of the lower (or unicameral) chamber of the legislature is directly elected in popular elections?

CLARIFICATION: Direct election includes seats reserved for special groups (*e.g.*, ethnic groups or women) so long as these members are chosen by popular election. Exceptions to the norm of direct election include members who are appointed, *e.g.*, by an executive, the military, or a theocratic body. Thus, if 10percent of a lower chamber is appointed in some fashion the correct answer to this question would be 90percent.

We are not concerned with non-voting members or with members of the legislature who do not possess the powers of most legislators.

2.1.27 Historical V-Dem - Overlap Period Discrepancies

This part of the codebook contains variables pertaining to the Historical V-Dem data collection. A maximum of 91 countries are included in the sample (see the country table), but some variables (in particular C type variables) cover fewer countries, as coding is still ongoing. For more information on the Historical V-Dem project, please refer to the Organization and Management document (<https://www.v-dem.net/static/website/img/refs/orgmanv111.pdf>) or the Historical V-Dem page: <https://www.v-dem.net/hdata.html>. The vast majority of questions coded by Historical V-Dem are V-Dem indicators previously coded back to 1900, and these indicators are found in other sections of the codebook with merged time series extending all the way from 1789 to the present.

This section includes A and A* variables where there is a discrepancy in the coding of some observations between the Historical and Contemporary V-Dem coding for the overlap period (typically 1900-1920). The v2-versions of these variables, reported elsewhere in the codebook, report the Contemporary V-Dem scores in cases of discrepancies in the overlap period.

Remaining inconsistencies in the Historical and Contemporary V-Dem coding, that are not due to

substantive differences in the indicators, will be sorted out for version 10 of the dataset.

2.1.27.1 Local government elected (v3ellocelc)

Long tag: vdem_cd_v3ellocelc

Original tag: v3ellocelc

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: www.statoids.com, www.hathitrust.org, Library of Congress - Country Studies, Wikipedia, various country-specific sources, including books, articles, constitutions and online sources

Description:

VARIABLE TYPE: A*

PROJECT MANAGER(S): Carl Henrik Knutsen

QUESTION: At the local level, are government offices elected in practice?

CLARIFICATION: The information on this question has been pre-coded. Any pre-coded years contain an orange triangle. This means that the score and/or specific date have already been entered, so we are asking you only to add your confidence in the pre-coded rating; we do not want you to change the rating as we need all the Country Experts to answer the subsequent questions for the same local governments.

quot;Government officesquot; here refers to a local executive and a local assembly, not a judiciary and not minor bureaucrats. An executive is a single individual (or a very small group) (*e.g.*, a mayor). An assembly is a larger body of officials.

quot;Electedquot; refers to offices that are directly elected by citizens or indirectly elected by a local elected assembly. All other methods of obtaining office – including appointment by a higher level of government – are considered to be non-elected.

In classifying a position as elected one is making no judgments about the freeness/fairness of the election or the relative extent of suffrage. One is simply indicating that there is an election and that the winner of that election (however conducted) generally takes office.

RESPONSES:

0: Generally, offices at the local level are not elected.

1: Generally, the local executive is elected but not the assembly.

2: Generally, the local assembly is elected but not the executive.

3: Generally, the local executive is elected and there is no assembly.

4: Generally, the local assembly is elected and there is no executive.

5: Generally, the local executive and assembly are elected.

2.1.27.4 Regional government exists (v3elreggov)

Long tag: vdem_cd_v3elreggov

Original tag: v3elreggov

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: www.statoids.com, www.hathitrust.org, Library of Congress - Country

Studies, Wikipedia, various country-specific sources, including books, articles, constitutions and online sources

Description:

VARIABLE TYPE: A*

PROJECT MANAGER(S): Carl Henrik Knutsen

QUESTION: Is there a regional government?

CLARIFICATION: The information on this question has been pre-coded. Any pre-coded years contain an orange triangle. This means that the score and/or specific date have already been entered, so we are asking you only to add your confidence in the pre-coded rating; we do not want you to change the rating as we need all the Country Experts to answer the subsequent questions for the same regional governments.

Regional government is typically the second-highest level of government, just below the national government. There are many names for units at this level; some common ones are regions, provinces, states, departments, and cantons.

Countries with more than two subnational levels may have multiple levels that fit the definition of regional government. If this is the case, for all questions about regional government please code the regional level that, in practice, has the most responsibilities (*e.g.* making laws, providing primary, education, maintaining roads, policing, etc.) and resources to carry out those responsibilities.

Some countries are so small that, now or in earlier time periods, they have only local government and not regional government. If this is the case, this question is coded as "0" for the appropriate time period.

RESPONSES:

0: No

1: Yes

ORDERING: If coded "0" for entire period, skip the following questions focused on regional government.

Description:

VARIABLE TYPE: A*

PROJECT MANAGER(S): Carl Henrik Knutsen

QUESTION: What is the term(s) for the regional government units?

CLARIFICATION: The information on this question has been pre-coded. Any pre-coded years contain an orange triangle. This means that the score and/or specific date have already been entered, so we are asking you only to add your confidence in the pre-coded rating; we do not want you to change the rating as we need all the Country Experts to answer the subsequent questions for the same regional governments.

ANSWER-TYPE: Text

Description:

VARIABLE TYPE: A*

PROJECT MANAGER(S): Carl Henrik Knutsen

QUESTION: At the regional level, are government offices elected in practice?

CLARIFICATION: The information on this question has been pre-coded. Any pre-coded years contain an orange triangle. This means that the score and/or specific date have already been entered, so we are asking you only to add your confidence in the pre-coded rating; we do not want you to change the rating as we need all the Country Experts to answer the subsequent questions for the same regional governments.

quot;Government officesquot; here refers to a regional executive and a regional assembly, not a judiciary and not minor bureaucrats. An executive is a single individual (or a very small group) (*e.g.*, a governor). An assembly is a larger body of officials, who may be divided into two chambers.

quot;Electedquot; refers to offices that are directly elected by citizens or indirectly elected by a regional elected assembly. All other methods of obtaining office – including appointment by higher or lower levels of government – are considered to be non-elected.

In classifying a position as elected one is making no judgments about the freeness/fairness of the election or the relative extent of suffrage. One is simply indicating that there is an election and that the winner of that election (however conducted) generally takes office.

RESPONSES:

0: Generally, offices at the regional level are not elected.

1: Generally, the regional executive is elected but not the assembly.

2: Generally, the regional assembly is elected but not the executive.

3: Generally, the regional executive is elected and there is no assembly.

4: Generally, the regional assembly is elected and there is no executive.

5: Generally, the regional executive and assembly are elected.

QUESTION: In what year was the head of state born?
SCALE: Interval
ANSWER-TYPE: Date - year only
SOURCE(S): worldstatesman.org.
DATA RELEASE: 8-13.
COUNTRY-YEAR AGGREGATION: Maximum
DATE SPECIFIC: Coded on HOS appointment dates and December 31 (v3exnamhos).
CITATION: *V-Dem Codebook* (see suggested citation at the top of this document).
YEARS: 1789-1938

2.1.27.8 HOS = HOG? (H) (v3exhoshog)

Long tag: vdem_cd_v3exhoshog

Original tag: v3exhoshog

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Elkins et al. (2014), Lentz (1994, 1999), Henisz (2000, 2002)

Description:

VARIABLE TYPE: A*

PROJECT MANAGER(S): Jan Teorell

QUESTION: Is the head of state (HOS) also head of government (HOG)?

CLARIFICATION: Once again, the identities of the head of government for each country have been pre-coded for as many years as possible. Any pre-coded years contain an orange triangle. This means that either the score or text and/or specific date have already been entered, so we are asking you only to add your confidence in the pre-coded rating; we do not want you to change the rating, as we need all the Country Experts to answer the subsequent questions for the same executives.

Note that this question only pertains to whether the head of state and the head of government are the same person or body, regardless of the relative powers of the two. Thus, in a constitutional monarchy, for example, the head of state and head of government are not the same even though the head of state may lack any real political power. If multiple head of states/head of governments were appointed in any year, the question pertains to each one of them.

RESPONSES:

0: No

1: Yes

ORDERING: If HOS=HOG (answer is "yes") for all years: skip to "Introduction to entire executive." (v2exintro3)

SOURCE(S): CCP (Elkins *et al.* 2012), v83-v87; Lentz (1994; 1999); Henisz (2000; 2002).

Description:

VARIABLE TYPE: A

PROJECT MANAGER(S): Jan Teorell

QUESTION: How did the head of state reach office?

CLARIFICATION: If several bodies were involved in the appointment process, select the one that exerted the most critical impact on the decision. However, in the next question we ask separately about whether the approval of the legislature was necessary. Response category 7 should only be selected if the head of state is directly elected, not if he or she was appointed by the legislature after an election.

RESPONSES:

0: Through the threat of or application of force, such as a coup or rebellion.

1: Appointed by a foreign power.

2: Appointed by the ruling party (in a one-party system).

3: Appointed by a royal council.

4: Through hereditary succession.

5: Appointed by the military.

6: Appointed by the legislature.

7: Directly through a popular election (regardless of the extension of the suffrage).

8: Other.

2.1.28 Other Indices Created Using V-Dem Data - Neopatrimonialism

The *Neopatrimonialism Index* uses V-Dem data but is not a subcomponent of the V-Dem Democracy Indices. Please see Appendix A of the V-Dem codebook (<https://www.v-dem.net/static/website/img/refs/codebookv12.pdf>) for an overview of all indices, component-indices, and lower-level indices.

2.1.28.1 Neopatrimonial Rule Index (v2x_neopat)

Long tag: vdem_cd_v2x_neopat

Original tag: v2x_neopat

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Sigman & Lindberg (2017, 2018), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023), v2elvotbuy v2dlencmps v2psprlnks v2exrescon v2lgotovst v2lgfunds v2lginvstp v2juhcind v2juncind v2juhccomp v2jucomp v2elembaut v2exembez v2exbribe v2lgcrrpt v2jucorrdc v2x_elecreg

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): Rachel Sigman, Staffan Lindberg

ADDITIONAL VERSIONS: *_codelow, *_codehigh, *_sd

QUESTION: To what extent is rule based on personal authority?

CLARIFICATION: Neopatrimonial rule reflects the idea that personalistic forms of authority pervade formal regime institutions (Clapham, 1985). According to Bratton and Van de Walle (1997) a neopatrimonialism regime is one that combines clientelistic political relationships, strong and unconstrained presidents and the use of public resources for political legitimation. The index is constructed using Bayesian Factor Analysis of 16 indicators representing these three concepts. The sixteen indicators are those included in the three sub-indices: Clientelism, Presidentialism and Regime Corruption. The point estimates for this index have been reversed such that the directionality is opposite to the input variables. That is, lower scores indicate a normatively better situation (e.g. more democratic) and higher scores a normatively worse situation (e.g. less democratic). Note that this directionality is opposite of that of other V-Dem indices, which generally run from normatively worse to better.

SCALE: Interval, from low to high (0-1).

SOURCE(S): v2elvotbuy v2dlencmps v2psprlnks v2exrescon v2lgotovst v2lgfunds v2lginvstp v2juhcind v2juncind v2juhccomp v2jucomp v2elembaut v2exembez v2exbribe v2lgcrrpt v2jucorrdc v2x_elecreg

DATA RELEASE: 9-13.

AGGREGATION: The index is formed by taking the reversed point estimates (so that higher scores = more neopatrimonialism) from a Bayesian factor analysis model of the indicators for vote buying (v2elvotbuy), particularistic vs. public goods (v2dlencmps), party linkages (v2psprlnks), executive respects constitution (v2exrescon), executive oversight (v2lgotovst), legislature controls resources (v2lgfunds), legislature investigates the executive in practice (v2lginvstp), high court independence (v2juhcind), low court independence (v2juncind), compliance with high court (v2juhccomp), compliance with judiciary (v2jucomp), electoral management body autonomy (v2elembaut), executive embezzlement and theft (v2exembez), executive bribes and corrupt exchanges (v2exbribe), legislative corruption (v2lgcrrpt) and judicial corruption (v2jucorrdc).

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): Rachel Sigman, Staffan Lindberg

ADDITIONAL VERSIONS: *_codelow, *_codehigh, *_sd

QUESTION: To what extent is the regime characterized by presidentialism?

CLARIFICATION: Presidentialism means the "systemic concentration of political power in the hands of one individual who resists delegating all but the most trivial decision making tasks" (Bratton and Van de Walle, 1997: 63). It relates closely to V-Dem's index of Horizontal Accountability (v2x_horacc) but focuses more specifically on the extent to which the President is free from constraints by other institutions or actors. The point estimates for this index have been reversed such that the directionality is opposite to the input variables. That is, lower scores indicate a normatively better situation (e.g. more democratic) and higher scores a normatively worse situation (e.g. less democratic). Note that this directionality is opposite of that of other V-Dem indices, which generally run from normatively worse to better.

SCALE: Interval, from low to high (0-1).

v2jucomp v2elembaut v2lgbicam
DATA RELEASE: 9-13.

AGGREGATION: The index is formed by taking the reversed point estimates (so that higher scores = more presidentialism) from a Bayesian factor analysis model of the indicators for executive respect for the constitution (v2exrescon), whether there are mechanisms for oversight of the executive other than the legislature (v2lgotovst). For legislative constraints, the index includes an indicator of whether the legislature controls its own resources (v2lgfunds) and investigates the executive in practice (v2lginvstp). There are four indicators of judicial constraints on the executive: high court independence (v2juhcind), lower court independence (v2jucnind), compliance with high court (v2juhccomp) and compliance with judiciary (v2jucomp). Finally, the index includes a measure of autonomy of the electoral management body (v2elembaut) that captures whether or not the President can influence its decisions and actions.

ADDITIONAL VERSIONS: *_codelow, *_codehigh, *_sd

QUESTION: To what extent do political actors use political office for private or political gain?

CLARIFICATION: In systems of neopatrimonial rule, politicians use their offices for private and/or political gain. This index relates closely to V-Dem's political corruption index (v2x_corr), but focuses on a more specific set of actors – those who occupy political offices - and a more specific set of corrupt acts that relate more closely to the conceptualization of corruption in literature on neopatrimonial rule. The point estimates for this index have been reversed such that the directionality is opposite to the input variables. That is, lower scores indicate a normatively better situation (e.g. more democratic) and higher scores a normatively worse situation (e.g. less democratic). Note that this directionality is opposite of that of other V-Dem indices, which generally run from normatively worse to better.

SCALE: Interval, from low to high (0-1).

SOURCE(S): v2exembez v2exbribe v2lgcrrpt v2jucorrdc

DATA RELEASE: 9-13.

AGGREGATION: The index is formed by taking the reversed point estimates (so that higher scores = more regime corruption) from a Bayesian factor analysis model of the indicators for executive executive embezzlement (v2exembez), executive bribes (v2exbribe), legislative corruption (v2xlgcrrpt) and judicial corruption (v2jucorrdc).

2.1.29 Other Indices Created Using V-Dem Data - Civil Liberties

The *Civil Liberties Index* uses V-Dem data but is not a subcomponent of the V-Dem Democracy Indices. Please see Appendix A of the V-Dem codebook (<https://www.v-dem.net/static/website/img/refs/codebookv12.pdf>) for an overview of all indices, component-indices, and lower-level indices.

2.1.29.1 Civil liberties index (v2x_civlib)

Long tag: vdem_cd_v2x_civlib

Original tag: v2x_civlib

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): Svend-Erik Skaaning

ADDITIONAL VERSIONS: *_codelow, *_codehigh, *_sd

QUESTION: To what extent is civil liberty respected?

CLARIFICATION: Civil liberty is understood as liberal freedom, where freedom is a property of individuals. Civil liberty is constituted by the absence of physical violence committed by government agents and the absence of constraints of private liberties and political liberties by the government.

SCALE: Interval, from low to high (0-1).

SOURCE(S): v2x_clpriv v2x_clphy v2x_clpol

DATA RELEASE: 6-13.

AGGREGATION: The index is formed by taking the average of physical violence index (v2x_clphy), political civil liberties index (v2x_clpol), and private civil liberties (v2x_clpriv).

CITATION: *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

2.1.29.2 Physical violence index (v2x_clphy)

Long tag: vdem_cd_v2x_clphy

Original tag: v2x_clphy

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): Svend-Erik Skaaning

ADDITIONAL VERSIONS: *_codelow, *_codehigh, *_sd

QUESTION: To what extent is physical integrity respected?

CLARIFICATION: Physical integrity is understood as freedom from political killings and torture by the government. Among the set of civil liberties, these liberal rights are the most relevant for political competition and accountability. The index is based on indicators that reflect violence committed by government agents and that are not directly referring to elections.

SCALE: Interval, from low to high (0-1).

SOURCE(S): v2cltort v2clkill

DATA RELEASE: 6-13.

AGGREGATION: We estimate the index by averaging two indicators: freedom from torture (v2cltort) and freedom from political killings (v2clkill).

CITATION: *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

2.1.31 Other Indices Created Using V-Dem Data - Corruption

The *Corruption Index* uses V-Dem data but is not a subcomponent of the V-Dem Democracy Indices. Please see Appendix A of the V-Dem codebook (<https://www.v-dem.net/static/website/img/refs/codebookv12.pdf>) for an overview of all indices, component-indices, and lower-level indices.

2.1.31.1 Political corruption (v2x_corr)

Long tag: vdem_cd_v2x_corr

Original tag: v2x_corr

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: McMann *et al.* (2016), v2x_pubcorr v2x_execorr v2lgcrrpt v2jucorrdc

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): Jan Teorell

ADDITIONAL VERSIONS: *_codelow, *_codehigh, *_sd

QUESTION: How pervasive is political corruption?

CLARIFICATION: The directionality of the V-Dem corruption index runs from less corrupt to more corrupt unlike the other V-Dem variables that generally run from less democratic to more democratic situation. The corruption index includes measures of six distinct types of corruption that cover both different areas and levels of the polity realm, distinguishing between executive, legislative and judicial corruption. Within the executive realm, the measures also distinguish between corruption mostly pertaining to bribery and corruption due to embezzlement. Finally, they differentiate between corruption in the highest echelons of the executive at the level of the rulers/cabinet on the one hand, and in the public sector at large on the other. The measures thus tap into several distinguished types of corruption: both ‘petty’ and ‘grand’; both bribery and theft; both corruption aimed and influencing law making and that affecting implementation.

SCALE: Interval, from low to high (0-1).

SOURCE(S): v2x_pubcorr v2x_execorr v2lgcrrpt v2jucorrdc

DATA RELEASE: 5-13.

AGGREGATION: The index is arrived at by taking the average of (a) public sector corruption index (v2x_pubcorr); (b) executive corruption index (v2x_execorr); (c) the indicator for legislative corruption (v2lgcrrpt); and (d) the indicator for judicial corruption (v2jucorrdc). In other words, these four different government spheres are weighted equally in the resulting index. We replace missing values for countries with no legislature by only taking

the average of a, b and d.

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): Pamela Paxton, Svend-Erik Skaaning

ADDITIONAL VERSIONS: *_codelow, *_codehigh, *_sd

QUESTION: Do citizens enjoy the right to private property?

CLARIFICATION: Private property includes the right to acquire, possess, inherit, and sell private property, including land. Limits on property rights may come from the state which may legally limit rights or fail to enforce them; customary laws and practices; or religious or social norms. This question concerns the right to private property, not actual ownership of property.

SCALE: Interval, from low to high (0-1).

SOURCE(S): v2clprptym v2clprptyw

DATA RELEASE: 1-13.

AGGREGATION: We estimate the index by averaging two indicators: property rights for men (v2clprptym) and women (v2clprptyw).

CITATION: *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

2.1.34 Other Indices Created Using V-Dem Data - Direct Democracy

The *Direct Democracy Index* uses V-Dem data but is not a subcomponent of the V-Dem Democracy Indices. Please see Appendix A of the V-Dem codebook (<https://www.v-dem.net/static/website/img/refs/codebookv12.pdf>) for an overview of all indices, component-indices, and lower-level indices.

2.1.34.1 Popular initiative index (v2xdd_i_ci)

Long tag: vdem_cd_v2xdd_i_ci

Original tag: v2xdd_i_ci

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: v2ddlexci v2ddsigpci v2ddsiglci v2ddsigdci v2ddpartci v2ddapprci v2ddspmci
v2ddadmci v2ddyrci v2ddthreci

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): David Altman

QUESTION: To what extent is the *popular initiative utilized*?

SCALE: Interval, from low to high (0-1).

SOURCE(S): v2ddlexci v2ddsigpci v2ddsiglci v2ddsigdci v2ddpartci v2ddapprci v2ddspmci
v2ddadmci v2ddyrci v2ddthreci

DATA RELEASE: 7-13.

AGGREGATION: This index receives a maximum score of two resulting from the addition of the two terms easiness of initiation and easiness of approval of popular initiatives, where each term obtains a maximum value of one.

The ease of initiation is measured by:

- The existence of a direct democracy process v2ddlexci,
- The number of signatures needed v2ddsigpci, and
- Time-limits to circulate the signatures v2ddsigdci.

Easiness of approval is measured by the surface of the polygon determined by:

- Participation quorum v2ddpartci,
- Approval quorum v2ddapprci, and
- Supermajority v2ddspmci.

For an elaboration of the interaction among quorums, see David Altman (2017). The resulting score is then multiplied with (d) district majority v2ddadmci.

Consequences are measured by:

- The legal status of the decision made by citizens binding or merely consultative v2ddlexci, and
- The frequency and degree of success with which direct popular votes have been held in the past v2ddthreci. The baseline for those countries that have the legal apparatus to hold a particular MDD but have never experienced one is 0.1.

The index is aggregated using this formula:

$$v2xdd_i_ci = \& \text{amp; } [(IF\ v2ddlexci\ gt; 0, 1, 0) \times (1 - v2ddsigpci)]$$

$$\& \text{amp; } \times (IF\ v2ddsigdci = 0, 1, 0.5 + v2ddsigdci/365/2)$$

$$\& \text{amp; } + (v2ddsigdci) \cap (v2ddpartci) \cap (v2ddspmc_i)]$$

$$\& \text{amp; } \times (0.5 + 1 - v2ddadmci/2)]$$

$$\& \text{amp; } \times (IF\ v2ddlexci = 1, 0.75, 1 \times IF\ \text{years since last successful}$$

$$\& \text{amp; } \text{eventlt; 6, then } v2ddthreci = 1, \text{ afterwards decreases by } 0.06 \text{ units per year}$$

$$\& \text{amp; } \text{until } 0.1; \text{ if the event was not successful during the first years}$$

$$\& \text{amp; } v2ddthreci=0.9, \text{ afterwards decreases by } 0.1$$

$$\& \text{amp; } \text{units per year until } 0.1)$$

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): David Altman

QUESTION: To what extent is the *obligatory referendum* utilized?

SCALE: Interval, from low to high (0-1).

SOURCE(S): v2ddlexor v2ddpartor v2ddappor v2ddspmor v2ddadmor v2ddthreor

DATA RELEASE: 7-13.

AGGREGATION: This index receives a maximum score of two resulting from the addition of the two terms easiness of initiation and easiness of approval of obligatory referendums, where each term obtains a maximum value of one.

The ease of initiation is measured by:

- The existence of a direct democracy process `v2ddlexor`.

Easiness of approval is measured by the surface of the polygon determined by:

- Participation quorum `v2ddpartor`
- Approval quorum `v2ddappor`, and
- Supermajority `V2ddspmor`. For an elaboration of the interaction among quorums, see David Altman 2017.

The resulting score is then multiplied with (d) district majority `v2ddadmor`.

Consequences are measured by:

- The legal status of the decision made by citizens binding or merely consultative `v2ddlexor`, and
- The frequency and degree of success with which direct popular votes have been held in the past `v2ddthreor`.

The index is aggregated using this formula:

$$v2xdd_i_or = \& (IF\ v2ddlexor > 0, 1, 0) + (v2ddpartor) \cap v2ddappor$$

$$\& \times ((.5 + (1 - v2ddadmor)/2) \times (IF\ v2ddlexor = 1, .75, 1))$$

$$\& \times (IF\ years\ since\ last\ successful\ event \leq 6, then\ v2ddthreor = 1,$$

$$\& afterwards\ decreases\ by\ .06\ units\ per\ year\ until\ .1,$$

$$\& if\ the\ event\ was\ not\ successful\ during\ the\ first\ years\ v2ddthreor = .9,$$

$$\& afterwards\ decreases\ by\ .1\ units\ per\ year\ until\ .1)$$

2.1.35 Other Indices Created Using V-Dem Data - Civil Society

The *Civil Society Index* uses V-Dem data but is not a subcomponent of the V-Dem Democracy Indices. Please see Appendix A of the V-Dem codebook (<https://www.v-dem.net/static/website/img/refs/codebookv12.pdf>) for an overview of all indices, component-indices, and lower-level indices.

2.1.35.1 Core Civil Society Index (v2xcs_ccsi)

Long tag: vdem_cd_v2xcs_ccsi

Original tag: v2xcs_ccsi

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Bernhard et al. (2017), ?, v2cseeorgs v2csreprss v2csprcpt

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): Michael Bernhard

ADDITIONAL VERSIONS: *_codelow, *_codehigh, *_sd

QUESTION: How robust is civil society?

CLARIFICATION: The sphere of civil society lies in the public space between the private

sphere and the state. Here, citizens organize in groups to pursue their collective interests and ideals. We call these groups civil society organizations CSOs. CSOs include, but are by no means limited to, interest groups, labor unions, spiritual organizations if they are engaged in civic or political activities, social movements, professional associations, charities, and other non-governmental organizations.

The core civil society index CCSI is designed to provide a measure of a robust civil society, understood as one that enjoys autonomy from the state and in which citizens freely and actively pursue their political and civic goals, however conceived.

SCALE: Interval, from low to high (0-1).

SOURCE(S): v2cseeorgs v2csreprss v2csptrcpt

DATA RELEASE: 1-13.

AGGREGATION: The index is formed by taking the point estimates from a Bayesian factor analysis model of the indicators for CSO entry and exit (v2cseeorgs), CSO repression (v2csreprss) and CSO participatory environment (v2csptrcpt).

CITATION: Bernhard *et al.* (2017); Pemstein *et al.* (2021, V-Dem Working Paper Series 2022:21); V-Dem Codebook (see suggested citation at the top of this document).

YEARS: 1789-2022

2.1.36 Other Indices Created Using V-Dem Data - Elections

The *Elections Index* uses V-Dem data but is not a subcomponent of the V-Dem Democracy Indices. Please see Appendix A of the V-Dem codebook (<https://www.v-dem.net/static/website/img/refs/codebookv12.pdf>) for an overview of all indices, component-indices, and lower-level indices.

2.1.36.1 Electoral Regime Index (v2x_elecreg)

Long tag: vdem_cd_v2x_elecreg

Original tag: v2x_elecreg

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: v2xel_elecparl v2xlg_leginter v2xel_elecpres v2x_hosinter v2x_hosabort v2x_legabort v2ex_elechos v2ex_elechog

Description:

VARIABLE TYPE: A

PROJECT MANAGER(S): Staffan I. Lindberg, Jan Teorell

QUESTION: At this time, are regularly scheduled national elections on course, as stipulated by election law or well-established precedent?

CLARIFICATION: Coded 0 until an executive or legislative election is held, defined by v2xel_elecpres and v2xel_elecparl, then set to 1 until any of the following two events occur (if they occur): (a) that the election was "aborted", meaning that those elected did not resume power, as defined by v2x_hosabort and v2x_legabort; or (b) an "electoral interruption", meaning that either the legislature was shut down, as defined by v2xlg_leginter, or there was an executive coup, as defined by v2x_hosinter; in the case of (a) or (b), v2x_elecreg is set to 0 until there is another election. The operational indicator of an "aborted" executive election (v2x_hosabort) is that v2expathhs did not turn 7 within 12 months after the election, for a legislative election (v2x_legabort) that v2lgbicam did not turn positive within 12 months after the election. An interruption of the electoral regime occurring through the HOS, *e.g.* a coup d'état, is indicated by v2x_hosinter as a change in v2xel_elecpres, meaning v2expathhs turned from 7 to something else, with the exception of 6, approval by the legislature (in case the legislature remained in place). An interruption of the electoral regime occurring through the legislature is defined by v2xlg_leginter based on v2lgbicam turning 0. We note that the coding of v2x_elecreg does not merely follow mechanically from the scores on these other variables, as the coding of v2x_elecreg has also been cross-checked and validated by research assistants. An executive and a legislative electoral regime cannot be separated since they form an integral part, where an aborted legislature is interpreted as a signal that also the executive is not standing for election any longer, and vice versa.

RESPONSES:

0: No.

2.1.36.2 Executive electoral regime index (v2xex_elecreg)

Long tag: vdem_cd_v2xex_elecreg

Original tag: v2xex_elecreg

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: v2xel_elecpres v2x_hosinter v2x_hosabort v2ex_elechog

Description:

VARIABLE TYPE: A

PROJECT MANAGER(S): Staffan I. Lindberg, Jan Teorell

QUESTION: At this time, are regularly scheduled national elections on the executive on course, as stipulated by election law or well-established precedent?

CLARIFICATION: Although we advice against it, since the executive and legislative electoral regime should be considered an integral part, for completeness we also provide this separate measure of executive electoral regimes. Coded 0 until an executive election is held, defined by v2x_elecpres, then set to 1 until any of the following two events occur (if they occur): (a) that the election was quot;abortedquot;, meaning that those elected did not resume power, as defined by v2x_hosabort; or (b) an quot;electoral interruptionquot;, meaning that there was an executive coup, as defined by v2x_hosinter; in the case of (a) or (b), v2xex_elecreg is set to 0 until there is another election.

RESPONSES:

0: No.

1: Yes.

SCALE: Dichotomous.

2.1.36.4 Electoral Component Index (`v2x_edcomp_thick`)

Long tag: `vdem_cd_v2x_edcomp_thick`

Original tag: `v2x_EDcomp_thick`

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: `v2x_frassoc_thick v2x_suffr v2xel_frefair v2x_elecoff`

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): Jan Teorell

ADDITIONAL VERSIONS: `*_codelow`, `*_codehigh`, `*_sd`

QUESTION: To what extent is the electoral principle of democracy achieved?

CLARIFICATION: The electoral principle of democracy seeks to achieve responsiveness and accountability between leaders and citizens through the mechanism of competitive elections. This is presumed to be achieved when suffrage is extensive; political and civil society organizations can operate freely; elections are clean and not marred by fraud or systematic irregularities; and the chief executive of a country is selected directly or indirectly through elections.

SCALE: Interval, from low to high (0-1).

SOURCE(S): `v2x_frassoc_thick v2x_suffr v2xel_frefair v2x_elecoff`

DATA RELEASE: 3-13.

AGGREGATION: The electoral component index is operationalized as a chain defined by its weakest link of freedom of association, suffrage, clean elections, and elected executive. The index is thus aggregated using this formula:

$v2x_EDcomp_thick =$

$.125 * v2x_frassoc_thick + .125 * v2x_suffr + .125 * v2xel_frefair + .125 * v2x_elecoff + .5 * v2x_frassoc_thick * v2x_suffr * v2xel_frefair * v2x_elecoff$

CITATION: *V-Dem Codebook* (see suggested citation at the top of this document).

2.1.36.14 Legislature directly elected (v2xex_elecleg)

Long tag: vdem_cd_v2xex_elecleg

Original tag: v2xex_elecleg

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: v2lgello v2lgelecup v2lginello v2lginelup v2exapup v2exapupap

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): Jan Teorell

QUESTION: To what extent is the legislature directly or indirectly elected?

CLARIFICATION: If the legislature is unicameral, v2xex_elecleg is measured as the proportion of legislators directly elected + half of the proportion that are indirectly elected. If the legislature is bicameral and the upper house is involved in the appointment of the chief

executive, the same proportion of directly and half of the indirectly elected legislators is calculated for the upper house; the scores for the lower and upper houses are then averaged. Note that a popular election is minimally defined and also includes sham elections with limited suffrage and no competition.

This index is useful primarily for aggregating higher-order indices and should not necessarily be interpreted as an important element of democracy in its own right. Since the variables coding the share of directly and indirectly elected legislators are not yet fully in sync for all country dates, a few observations now receive an index value larger than 1.

RESPONSES:

Proportion.

SCALE: Interval.

2.1.37 Other Indices Created Using V-Dem Data - Consensual Democracy Dimensions

The *Consensual Democracy Dimensions Index* uses V-Dem data but is not a subcomponent of the V-Dem Democracy Indices. Please see Appendix A of the V -Dem codebook (<https://www.v-dem.net/static/website/img/refs/codebookv12.pdf>) for an overview of all indices, component-indices, and lower-level indices.

2.1.37.1 Divided party control index (v2x_divparctrl)

Long tag: vdem_cd_v2x_divparctrl

Original tag: v2x_divparctrl

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: v2psnatpar v2psnatpar_ord

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): Michael Coppedge, Svend-Erik Skaaning

QUESTION: Are the executive and legislature controlled by different political parties?

CLARIFICATION: This variable is a reordered version of the continuous measurement model estimates for indicator v2psnatpar: National party control. After reordering, the positive extreme signifies Divided party control. A Different parties or individuals unconnected to parties control the executive and the legislature or B Executive power is divided between a president/monarch and a prime minister, each of which belongs to different parties; or between a non-partisan monarch and a prime minister. The intermediate values signify Unified coalition control. A single multi-party coalition controls the executive and legislative branches of the national government. This is true almost by definition in a parliamentary system where a single coalition gathers together a majority of seats. And the negative extreme signifies "Unified party control. A single party controls the executive and legislative branches of the national government. This is true almost by definition in a parliamentary system where a single party has a majority of seats."

SCALE: Interval, from low to high.

SOURCE(S): v2psnatpar v2psnatpar_ord

NOTES: V-Dem originally intended to generate indices to measure concepts inspired by Arend Lijphart's two dimensions of consensus vs. majoritarian democracy. The project no longer plans to produce such indices. Instead, it offers the two indices, the Divided party control index and the Division of power index, which are conceptually thinner than Lijphart's concepts and not equivalent substitutes for them. However, these alternatives are useful for some purposes.

DATA RELEASE: 6-13. For Version 6 as Divided party control of legislature index v2x_lgdivparctrl, 7 modified to Divided party control index.

AGGREGATION: The reordering is accomplished in two steps. First, 5 is subtracted from v2psnatpar when the ordinal version of this variable, v2psnatpar_ord, is 2. This moves the ordinal score corresponding to unified party control to the lowest values. Then the result is standardized to have a mean of 0 and a standard deviation of 1.

COUNTRY-YEAR AGGREGATION: Last

YEARS: 1900-2022

2.1.39 Digital Society Survey - Coordinated Information Operations

The Digital Society Survey, designed by the Digital Society Project, contains questions pertaining to the political environment of the internet and social media. The data collected through expert-coded surveys provides information on topics related to coordinated information operations, digital media freedom, online media polarization, social cleavages as well as state internet regulation capacity and approach.

Principal investigators for the Digital Society Project are Valeriya Mechkova, Daniel Pemstein, Brigitte Seim, Steven Wilson.

For more information, please visit www.digitalsocietyproject.org.

Instructions to the coders (as shown in the surveys)

Digital society: The following survey contains questions pertaining to the political environment of the Internet and social media. Please bear in mind the following definitions as you respond to

questions on this survey:

The government and its agents include official government organs, such as bureaucracies, courts, intelligence services, and the military, but also unofficial agents, such as officially unaffiliated cyber-warfare operatives who perform services, even “off-book” work, on behalf of the government.

Major political parties include the group of political parties that hold a significant number of seats in national legislative body(-ies), or earn a significant number of votes in elections for the executive. When we ask you to consider “major political parties,” you do not need to consider parties that run in elections but receive only a small minority of seats or votes, or those that receive no seats at all.

We define the Internet as all information that people access over public and private digital networks, worldwide. The Internet includes both publicly accessible digital spaces and private or gated information transmission platforms. The Internet does not include traditional media transmission mechanisms such as paper, television, traditional voice telephone, and radio.

Social media are a subset of Internet platforms that enable normal individuals to create and share content with networks of other people. Social media platforms are available to the public, although content on such networks may be shared privately within subgroups of users. Social media includes both publicly visible, or semi-public platforms, like Facebook, Flickr, Friendster, Google+, Instagram, Myspace, LinkedIn, Twitter, VKontakte, and Weibo and private social networking and messaging platforms like Signal, Slack, Snapchat, or WhatsApp.

Domestic online media is any media source originating in the country in question. For example, the New York Times’ website is domestic online media in the United States, but not in India, even though it operates bureaus in India. Media includes any source reporting on current events or political issues, ranging from well-established brands to newsletters and websites run by an individual.

Cyber security threats include penetration of private digital networks, using means ranging from exploiting software vulnerabilities, password cracking, or social engineering (e.g., tricking individuals into revealing passwords or other information necessary to break into a digital system) to obtain information or disrupt an organization or individual’s use of digital networks and tools. They also include unauthorized alterations of an individual or organization’s digital presence, such as defacing websites and commandeering social media accounts. These threats range from unsophisticated (e.g., exploitation of failure to password protect private networks or use of common passwords by authorized users, and spear phishing) to moderate (e.g., embedding malicious code in emails or exploiting well-known software flaws that organizations have failed to patch), to sophisticated (e.g., exploiting unknown exploits in commonly used software or even embedding exploits into commercial systems unbeknownst to their creators).

Clarification: When we discuss shutting down online content, please consider instances where a website (or websites) have been taken entirely offline as well as instances where a website (or websites) have been slowed down or had access similarly intentionally inhibited, such that use of this website is challenging. In other words, both outright shutting down and more subtle measures that inhibit access should be considered when answering these questions.

Clarification: When we discuss “censorship” or “censoring” content online, we are not concerned with censorship of topics such as child pornography, highly classified information such as military or intelligence secrets, or defamatory speech, unless this sort of censorship is used as a pretext for censoring political information or opinions.

2.1.39.1 Government dissemination of false information domestic (v2smgovdom)

2.1.40 Digital Society Survey - Digital Media Freedom

The Digital Society Survey, designed by the Digital Society Project, contains questions pertaining to the political environment of the internet and social media. The data collected through expert-coded surveys provides information on topics related to coordinated information operations, digital media freedom, online media polarization, social cleavages as well as state internet regulation capacity and approach.

Principal investigators for the Digital Society Project are Valeriya Mechkova, Daniel Pemstein, Brigitte Seim, Steven Wilson.

For more information, please visit www.digitalsocietyproject.org.

Instructions to the coders (as shown in the surveys)

Digital society: The following survey contains questions pertaining to the political environment of the Internet and social media. Please bear in mind the following definitions as you respond to questions on this survey:

The government and its agents include official government organs, such as bureaucracies, courts, intelligence services, and the military, but also unofficial agents, such as officially unaffiliated cyberwarfare operatives who perform services, even “off-book” work, on behalf of the government.

Major political parties include the group of political parties that hold a significant number of seats in national legislative body(-ies), or earn a significant number of votes in elections for the executive. When we ask you to consider “major political parties,” you do not need to consider parties that run in elections but receive only a small minority of seats or votes, or those that receive no seats at all.

We define the Internet as all information that people access over public and private digital networks, worldwide. The Internet includes both publicly accessible digital spaces and private or gated information transmission platforms. The Internet does not include traditional media transmission mechanisms such as paper, television, traditional voice telephone, and radio.

Social media are a subset of Internet platforms that enable normal individuals to create and share content with networks of other people. Social media platforms are available to the public, although content on such networks may be shared privately within subgroups of users. Social media includes both publicly visible, or semi-public platforms, like Facebook, Flickr, Friendster, Google+, Instagram, Myspace, LinkedIn, Twitter, VKontakte, and Weibo and private social networking and messaging platforms like Signal, Slack, Snapchat, or WhatsApp.

Domestic online media is any media source originating in the country in question. For example, the New York Times’ website is domestic online media in the United States, but not in India, even though it operates bureaus in India. Media includes any source reporting on current events or political issues, ranging from well-established brands to newsletters and websites run by an individual.

Cyber security threats include penetration of private digital networks, using means ranging from exploiting software vulnerabilities, password cracking, or social engineering (e.g., tricking individuals into revealing passwords or other information necessary to break into a digital system) to obtain information or disrupt an organization or individual’s use of digital networks and tools. They also include unauthorized alterations of an individual or organization’s digital presence, such as defacing websites and commandeering social media accounts. These threats range from unsophisticated (e.g., exploitation of failure to password protect private networks or use of common passwords by authorized users, and spear phishing) to moderate (e.g., embedding malicious code in emails or exploiting well-known software flaws that organizations have failed to patch), to sophisticated (e.g., exploiting unknown exploits in commonly used software or even embedding exploits into commercial systems unbeknownst to their creators).

Clarification: When we discuss shutting down online content, please consider instances where a website (or websites) have been taken entirely offline as well as instances where a website (or websites) have been slowed down or had access similarly intentionally inhibited, such that use of this website is challenging. In other words, both outright shutting down and more subtle measures that inhibit access should be considered when answering these questions.

Clarification: When we discuss “censorship” or “censoring” content online, we are not concerned with censorship of topics such as child pornography, highly classified information such as military or intelligence secrets, or defamatory speech, unless this sort of censorship is used as a pretext for censoring political information or opinions.

2.1.40.1 Government Internet filtering capacity (v2smgovfilcap)

Long tag: vdem_cd_v2smgovfilcap

Original tag: v2smgovfilcap

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Independent of whether it actually does so in practice, does the government have the technical capacity to censor information (text, audio, images, or video) on the Internet by filtering (blocking access to certain websites) if it decided to?

RESPONSES:

0: The government lacks any capacity to block access to any sites on the Internet.

1: The government has limited capacity to block access to a few sites on the Internet.

2: The government has adequate capacity to block access to most, but not all, specific sites on the Internet if it wanted to.

3: The government has the capacity to block access to any sites on the Internet if it wanted to.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 9-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see V-Dem Methodology).

CITATION: Mechkova *et al.* (2019, *Digital Society Project Working Paper* 2019:1); Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 2000-2022

2.1.40.2 Government Internet filtering in practice (v2smgovfilprc)

Long tag: vdem_cd_v2smgovfilprc

Original tag: v2smgovfilprc

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: How frequently does the government censor political information (text, audio, images, or video) on the Internet by filtering (blocking access to certain websites)?

RESPONSES:

0: Extremely often. It is a regular practice for the government to remove political content, except to sites that are pro-government.

1: Often. The government commonly removes online political content, except sites that are pro-government.

2: Sometimes. The government successfully removes about half of the critical online political content.

3: Rarely. There have been only a few occasions on which the government removed political content.

4: Never, or almost never. The government allows Internet access that is unrestricted, with the exceptions mentioned in the clarifications section.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 9-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see V-Dem Methodology).

CITATION: Mechkova *et al.* (2019, *Digital Society Project Working Paper* 2019:1); Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 2000-2022

2.1.40.3 Government Internet shut down capacity (v2smgovshutcap)

Long tag: vdem_cd_v2smgovshutcap

Original tag: v2smgovshutcap

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Independent of whether it actually does so in practice, does the government have the technical capacity to actively shut down domestic access to the Internet if it decided to?

CLARIFICATION: A domestic Internet connection is any connection originating physically within the country, whether over wired, wireless, or satellite networks. This question asks what proportion of potential Internet connections of domestic origin the government has the capacity to render inoperable.

RESPONSES:

0: The government lacks the capacity to shut down any domestic Internet connections.

1: The government has the capacity to shut down roughly a quarter of domestic access to the Internet.

2: The government has the capacity to shut down roughly half of domestic access to the Internet.

3: The government has the capacity to shut down roughly three quarters of domestic access to the Internet.

4: The government has the capacity to shut down all, or almost all, domestic access to the Internet.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 9-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see V-Dem Methodology).

CITATION: Mechkova *et al.* (2019, *Digital Society Project Working Paper* 2019:1); Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 2000-2022

2.1.40.4 Government Internet shut down in practice (v2smgovshut)

Long tag: vdem_cd_v2smgovshut

Original tag: v2smgovshut

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: How often does the government shut down domestic access to the Internet?

RESPONSES:

0: Extremely often. It is a regular practice for the government to shut down domestic access to the Internet.

1: Often. The government shut down domestic access to the Internet numerous times this year.

2: Sometimes. The government shut down domestic access to the Internet several times this year.

3: Rarely but there have been a few occasions throughout the year when the government shut down domestic access to Internet.

4: Never, or almost never. The government does not typically interfere with the domestic access to the Internet.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 9-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see V-Dem Methodology).

CITATION: Mechkova *et al.* (2019, *Digital Society Project Working Paper* 2019:1); Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 2000-2022

2.1.40.5 Government social media shut down in practice (v2smgovsm)

Long tag: vdem_cd_v2smgovsm

Original tag: v2smgovsm

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: How often does the government shut down access to social media platforms?

RESPONSES:

0: Extremely often. It is a regular practice for the government to shut down access to social media.

1: Often. The government shuts down access to social media numerous times this year.

2: Sometimes. The government shuts down access to social media several times this year.

3: Rarely. There have been a few occasions throughout the year when the government shuts down access to social media.

4: Never, or almost never. The government does not interfere with the access to social media, except in the cases mentioned in the clarifications section.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 9-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see V-Dem Methodology).

CITATION: Mechkova *et al.* (2019, *Digital Society Project Working Paper* 2019:1); Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

2.1.40.6 Government social media alternatives (v2smgovsmalt)

Long tag: vdem_cd_v2smgovsmalt

Original tag: v2smgovsmalt

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: How prevalent is the usage of social media platforms that are wholly controlled by either the government or its agents in this country?

RESPONSES:

0: Essentially all social media usage takes place on platforms controlled by the state.

1: Most usage of social media is on state-controlled platforms, although some groups use non-state-controlled alternatives.

2: There is significant usage of both state-controlled and non-state-controlled social media platforms.

3: While some state-controlled social media platforms exist, their usage only represents a small share of social media usage in the country.

4: Practically no one uses state-controlled social media platforms.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 9-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see V-Dem Methodology).

CITATION: Mechkova *et al.* (2019, *Digital Society Project Working Paper* 2019:1); Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 2000-2022

2.1.40.7 Government social media monitoring (v2smgovsmmon)

Long tag: vdem_cd_v2smgovsmmon

Original tag: v2smgovsmmon

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: How comprehensive is the surveillance of political content in social media by the government or its agents?

RESPONSES:

0: Extremely comprehensive. The government surveils virtually all content on social media.

1: Mostly comprehensive. The government surveils most content on social media, with comprehensive monitoring of most key political issues.

2: Somewhat comprehensive. The government does not universally surveil social media but can be expected to surveil key political issues about half the time.

3: Limited. The government only surveils political content on social media on a limited basis.

4: Not at all, or almost not at all. The government does not surveil political content on social media, with the exceptions mentioned in the clarifications section.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 9-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see V-Dem Methodology).

CITATION: Mechkova *et al.* (2019, *Digital Society Project Working Paper* 2019:1); Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 2000-2022

2.1.40.8 Government social media censorship in practice (v2smgovsmcenprc)

Long tag: vdem_cd_v2smgovsmcenprc

Original tag: v2smgovsmcenprc

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: To what degree does the government censor political content (i.e., deleting or filtering specific posts for political reasons) on social media in practice?

RESPONSES:

0: The government simply blocks all social media platforms.

1: The government successfully censors all social media with political content.

2: The government successfully censors a significant portion of political content on social

media, though not all of it.

3: The government only censors social media with political content that deals with especially sensitive issues.

4: The government does not censor political social media content, with the exceptions mentioned in the clarifications section.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 9-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see V-Dem Methodology).

CITATION: Mechkova *et al.* (2019, *Digital Society Project Working Paper* 2019:1); Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

Instructions to the coders (as shown in the surveys)

Digital society: The following survey contains questions pertaining to the political environment of the Internet and social media. Please bear in mind the following definitions as you respond to questions on this survey:

The government and its agents include official government organs, such as bureaucracies, courts, intelligence services, and the military, but also unofficial agents, such as officially unaffiliated cyber-warfare operatives who perform services, even “off-book” work, on behalf of the government.

Major political parties include the group of political parties that hold a significant number of seats in national legislative body(-ies), or earn a significant number of votes in elections for the executive. When we ask you to consider “major political parties,” you do not need to consider parties that run in elections but receive only a small minority of seats or votes, or those that receive no seats at all.

We define the Internet as all information that people access over public and private digital networks, worldwide. The Internet includes both publicly accessible digital spaces and private or gated information transmission platforms. The Internet does not include traditional media transmission mechanisms such as paper, television, traditional voice telephone, and radio.

Social media are a subset of Internet platforms that enable normal individuals to create and share content with networks of other people. Social media platforms are available to the public, although content on such networks may be shared privately within subgroups of users. Social media includes both publicly visible, or semi-public platforms, like Facebook, Flickr, Friendster, Google+, Instagram, Myspace, LinkedIn, Twitter, VKontakte, and Weibo and private social networking and messaging platforms like Signal, Slack, Snapchat, or WhatsApp.

Domestic online media is any media source originating in the country in question. For example, the New York Times’ website is domestic online media in the United States, but not in India, even though it operates bureaus in India. Media includes any source reporting on current events or political issues, ranging from well-established brands to newsletters and websites run by an individual.

Cyber security threats include penetration of private digital networks, using means ranging from

exploiting software vulnerabilities, password cracking, or social engineering (e.g., tricking individuals into revealing passwords or other information necessary to break into a digital system) to obtain information or disrupt an organization or individual's use of digital networks and tools. They also include unauthorized alterations of an individual or organization's digital presence, such as defacing websites and commandeering social media accounts. These threats range from unsophisticated (e.g., exploitation of failure to password protect private networks or use of common passwords by authorized users, and spear phishing) to moderate (e.g., embedding malicious code in emails or exploiting well-known software flaws that organizations have failed to patch), to sophisticated (e.g., exploiting unknown exploits in commonly used software or even embedding exploits into commercial systems unbeknownst to their creators).

Clarification: When we discuss shutting down online content, please consider instances where a website (or websites) have been taken entirely offline as well as instances where a website (or websites) have been slowed down or had access similarly intentionally inhibited, such that use of this website is challenging. In other words, both outright shutting down and more subtle measures that inhibit access should be considered when answering these questions.

Clarification: When we discuss "censorship" or "censoring" content online, we are not concerned with censorship of topics such as child pornography, highly classified information such as military or intelligence secrets, or defamatory speech, unless this sort of censorship is used as a pretext for censoring political information or opinions.

2.1.41.1 Internet legal regulation content (v2smregcon)

Long tag: vdem_cd_v2smregcon

Original tag: v2smregcon

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: What type of content is covered in the legal framework to regulate Internet?

RESPONSES:

0: The state can remove any content at will.

1: The state can remove most content, and the law protects speech in only specific, and politically uncontroversial contexts.

2: The legal framework is ambiguous. The state can remove some politically sensitive content, while other is protected by law.

3: The law protects most political speech, but the state can remove especially politically controversial content.

4: The law protects political speech, and the state can only remove content if it violates well-established legal criteria.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 9-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see V-Dem Methodology).

2.1.41.3 Privacy protection by law content (v2smprivcon)

Long tag: vdem_cd_v2smprivcon

Original tag: v2smprivcon

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: What does the legal framework to protect Internet users' privacy and their data stipulate?

RESPONSES:

0: The legal framework explicitly allows the government to access any type of personal data on the Internet.

1: The legal framework explicitly allows the government to access most types of personal data on the Internet.

2: The legal framework explicitly allows the government to access many types of personal data on the Internet.

3: The legal framework explicitly allows the government to access only a few types of personal information on the Internet.

4: The legal framework explicitly allows the government to access personal information on the Internet only in extraordinary circumstances.

2.1.41.4 Government capacity to regulate online content (v2smregcap)

Long tag: vdem_cd_v2smregcap

Original tag: v2smregcap

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Does the government have sufficient staff and resources to regulate Internet content in accordance with existing law?

RESPONSES:

0: No, almost all online activity happens outside of reach of the state, where it lacks the capacity to remove illegal content.

1: Not really. The state has extremely limited resources to regulate online content.

2: Somewhat. The state has the capacity to regulate only some online content or some portions of the law.

3: Mostly. The state has robust capacity to regulate online content, though not enough to regulate all content and all portions of the law.

4: Yes, the government has sufficient capacity to regulate all online content.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 9-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see V-Dem Methodology).

2.1.42 Digital Society Survey - Online Media Polarization

The Digital Society Survey, designed by the Digital Society Project, contains questions pertaining to the political environment of the internet and social media. The data collected through expert-coded surveys provides information on topics related to coordinated information operations, digital media freedom, online media polarization, social cleavages as well as state internet regulation capacity and approach.

Principal investigators for the Digital Society Project are Valeriya Mechkova, Daniel Pemstein, Brigitte Seim, Steven Wilson.

For more information, please visit www.digitalsocietyproject.org.

Instructions to the coders (as shown in the surveys)

Digital society: The following survey contains questions pertaining to the political environment of the Internet and social media. Please bear in mind the following definitions as you respond to questions on this survey:

The government and its agents include official government organs, such as bureaucracies, courts, intelligence services, and the military, but also unofficial agents, such as officially unaffiliated cyberwarfare operatives who perform services, even “off-book” work, on behalf of the government.

Major political parties include the group of political parties that hold a significant number of seats in national legislative body(-ies), or earn a significant number of votes in elections for the executive. When we ask you to consider “major political parties,” you do not need to consider parties that run in elections but receive only a small minority of seats or votes, or those that receive no seats at all.

We define the Internet as all information that people access over public and private digital networks, worldwide. The Internet includes both publicly accessible digital spaces and private or gated information transmission platforms. The Internet does not include traditional media transmission mechanisms such as paper, television, traditional voice telephone, and radio.

Social media are a subset of Internet platforms that enable normal individuals to create and share content with networks of other people. Social media platforms are available to the public, although content on such networks may be shared privately within subgroups of users. Social media includes both publicly visible, or semi-public platforms, like Facebook, Flickr, Friendster, Google+, Instagram, Myspace, LinkedIn, Twitter, VKontakte, and Weibo and private social networking and messaging platforms like Signal, Slack, Snapchat, or WhatsApp.

Domestic online media is any media source originating in the country in question. For example, the New York Times’ website is domestic online media in the United States, but not in India, even though it operates bureaus in India. Media includes any source reporting on current events or political issues, ranging from well-established brands to newsletters and websites run by an individual.

Cyber security threats include penetration of private digital networks, using means ranging from exploiting software vulnerabilities, password cracking, or social engineering (e.g., tricking individuals into revealing passwords or other information necessary to break into a digital system) to obtain information or disrupt an organization or individual’s use of digital networks and tools. They also include unauthorized alterations of an individual or organization’s digital presence, such as defacing websites and commandeering social media accounts. These threats range from unsophisticated (e.g., exploitation of failure to password protect private networks or use of common passwords by authorized users, and spear phishing) to moderate (e.g., embedding malicious code in emails or exploiting well-known software flaws that organizations have failed to patch), to sophisticated (e.g., exploiting unknown exploits in commonly used software or even embedding exploits into commercial systems unbeknownst to their creators).

Clarification: When we discuss shutting down online content, please consider instances where a website (or websites) have been taken entirely offline as well as instances where a website (or websites) have been slowed down or had access similarly intentionally inhibited, such that use of this website is challenging. In other words, both outright shutting down and more subtle measures that inhibit access should be considered when answering these questions.

Clarification: When we discuss “censorship” or “censoring” content online, we are not concerned with censorship of topics such as child pornography, highly classified information such as military or intelligence secrets, or defamatory speech, unless this sort of censorship is used as a pretext for censoring political information or opinions.

2.1.42.1 Online media existence (v2smonex)

Long tag: vdem_cd_v2smonex

Original tag: v2smonex

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Do people consume domestic online media?

RESPONSES:

0: Not at all. No one consumes domestic online media. Skip next question if this answer is selected.

1: Limited. Domestic online media consumption is limited.

2: Relatively extensive. Domestic online media consumption is common.

3: Extensive. Almost everyone consumes domestic online media.

ORDERING: if 0, skip v2smonper

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 9-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see V-Dem Methodology).

CITATION: Mechkova *et al.* (2019, *Digital Society Project Working Paper* 2019:1); Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 2000-2022

2.1.42.2 Online media perspectives (v2smonper)

Long tag: vdem_cd_v2smonper

Original tag: v2smonper

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Do the major domestic online media outlets represent a wide range of political perspectives?

RESPONSES:

0: The major domestic online media outlets represent only the government's perspective.

1: The major domestic online media outlets represent only the perspectives of the government and a government approved, semi-official opposition party.

2: The major domestic online media outlets represent a variety of political perspectives but they systematically ignore at least one political perspective that is important in this society.

3: All perspectives that are important in this society are represented in at least one of the major domestic online media outlets.

4: All perspectives that are important in this society are represented in many major domestic online media outlets.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 9-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see V-Dem Methodology).

CITATION: Mechkova *et al.* (2019, *Digital Society Project Working Paper* 2019:1); Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 2000-2022

2.1.42.3 Online media fractionalization (v2smmefra)

Long tag: vdem_cd_v2smmefra

Original tag: v2smmefra

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Do the major domestic online media outlets give a similar presentation of major (political) news?

RESPONSES:

0: No. The major domestic online media outlets give opposing presentation of major events.

1: Not really. The major domestic online media outlets differ greatly in the presentation of major events.

2: Sometimes. The major domestic online media outlets give a similar presentation of major events about half the time.

3: Mostly. The major domestic online media outlets mostly give a similar presentation of major events.

4: Yes. Although there are small differences in representation, the major domestic online media outlets give a similar presentation of major events.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 9-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see V-Dem Methodology).

CITATION: Mechkova *et al.* (2019, *Digital Society Project Working Paper* 2019:1); Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 2000-2022

2.1.43 Digital Society Survey - Social Cleavages

The Digital Society Survey, designed by the Digital Society Project, contains questions pertaining to the political environment of the internet and social media. The data collected through expert-coded surveys provides information on topics related to coordinated information operations, digital media freedom, online media polarization, social cleavages as well as state internet regulation capacity and approach.

Principal investigators for the Digital Society Project are Valeriya Mechkova, Daniel Pemstein, Brigitte Seim, Steven Wilson.

For more information, please visit www.digitalsocietyproject.org.

Instructions to the coders (as shown in the surveys)

Digital society: The following survey contains questions pertaining to the political environment of the Internet and social media. Please bear in mind the following definitions as you respond to questions on this survey:

The government and its agents include official government organs, such as bureaucracies, courts, intelligence services, and the military, but also unofficial agents, such as officially unaffiliated cyber-warfare operatives who perform services, even “off-book” work, on behalf of the government.

Major political parties include the group of political parties that hold a significant number of seats in national legislative body(-ies), or earn a significant number of votes in elections for the executive. When we ask you to consider “major political parties,” you do not need to consider parties that run in elections but receive only a small minority of seats or votes, or those that receive no seats at all.

We define the Internet as all information that people access over public and private digital networks, worldwide. The Internet includes both publicly accessible digital spaces and private or gated information transmission platforms. The Internet does not include traditional media transmission mechanisms such as paper, television, traditional voice telephone, and radio.

Social media are a subset of Internet platforms that enable normal individuals to create and share content with networks of other people. Social media platforms are available to the public, although content on such networks may be shared privately within subgroups of users. Social media includes both publicly visible, or semi-public platforms, like Facebook, Flickr, Friendster, Google+, Instagram, Myspace, LinkedIn, Twitter, VKontakte, and Weibo and private social networking and messaging platforms like Signal, Slack, Snapchat, or WhatsApp.

Domestic online media is any media source originating in the country in question. For example, the New York Times' website is domestic online media in the United States, but not in India, even though it operates bureaus in India. Media includes any source reporting on current events or political issues, ranging from well-established brands to newsletters and websites run by an individual.

Cyber security threats include penetration of private digital networks, using means ranging from exploiting software vulnerabilities, password cracking, or social engineering (e.g., tricking individuals into revealing passwords or other information necessary to break into a digital system) to obtain information or disrupt an organization or individual's use of digital networks and tools. They also include unauthorized alterations of an individual or organization's digital presence, such as defacing websites and commandeering social media accounts. These threats range from unsophisticated (e.g., exploitation of failure to password protect private networks or use of common passwords by authorized users, and spear phishing) to moderate (e.g., embedding malicious code in emails or exploiting well-known software flaws that organizations have failed to patch), to sophisticated (e.g., exploiting unknown exploits in commonly used software or even embedding exploits into commercial systems unbeknownst to their creators).

Clarification: When we discuss shutting down online content, please consider instances where a website (or websites) have been taken entirely offline as well as instances where a website (or websites) have been slowed down or had access similarly intentionally inhibited, such that use of this website is challenging. In other words, both outright shutting down and more subtle measures that inhibit access should be considered when answering these questions.

Clarification: When we discuss "censorship" or "censoring" content online, we are not concerned with censorship of topics such as child pornography, highly classified information such as military or intelligence secrets, or defamatory speech, unless this sort of censorship is used as a pretext for censoring political information or opinions.

2.1.43.1 Use of social media to organize offline violence (v2smorgviol)

Long tag: vdem_cd_v2smorgviol

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: If a citizen posts political content online that would run counter to the government and its policies, what is the likelihood that citizen is arrested?

RESPONSES:

0: Extremely likely.

1: Likely.

2: Unlikely.

3: Extremely unlikely.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 9-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see V-Dem Methodology).

CITATION: Mechkova *et al.* (2019, *Digital Society Project Working Paper* 2019:1); Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 2000-2022

2.1.43.6 Polarization of society (v2smpolsoc)

Long tag: vdem_cd_v2smpolsoc

Original tag: v2smpolsoc

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: How would you characterize the differences of opinions on major political issues in this society?

CLARIFICATION: While plurality of views exists in all societies, we are interested in knowing the extent to which these differences in opinions result in major clashes of views and polarization or, alternatively, whether there is general agreement on the general direction this society should develop.

RESPONSES:

0: Serious polarization. There are serious differences in opinions in society on almost all key political issues, which result in major clashes of views.

1: Moderate polarization. There are differences in opinions in society on many key political issues, which result in moderate clashes of views.

2: Medium polarization. Differences in opinions are noticeable on about half of the key political issues, resulting in some clashes of views.

3: Limited polarization. There are differences in opinions on only a few key political issues, resulting in few clashes of views.

4: No polarization. There are differences in opinions but there is a general agreement on the direction for key political issues.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 9-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see V-Dem Methodology).

CITATION: Mechkova *et al.* (2019, *Digital Society Project Working Paper* 2019:1); Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 2000-2022

2.1.43.7 Political parties hate speech (v2smpolhate)

Long tag: vdem_cd_v2smpolhate

Original tag: v2smpolhate

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: How often do major political parties use hate speech as part of their rhetoric?

CLARIFICATION: Hate speech is any speech that is intended to insult, offend, or intimidate members of specific groups, defined by race, religion, sexual orientation, national origin, disability, or similar trait.

RESPONSES:

0: Extremely often.

1: Often.

2: Sometimes.

3: Rarely.

4: Never, or almost never.

SCALE: Ordinal, converted to interval by the measurement model.
DATA RELEASE: 9-13.
CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see V-Dem Methodology).
CITATION: Mechkova *et al.* (2019, *Digital Society Project Working Paper* 2019:1); Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).
YEARS: 2000-2022
CONVERGENCE: Model parameters with convergence issues: country-date latent trait estimates, universal thresholds, expert reliability, expert thresholds, main-country-coded thresholds.

2.1.43.8 Online harassment groups (v2smhargr)

Long tag: vdem_cd_v2smhargr

Original tag: v2smhargr

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_nr

QUESTION: Which groups are targets of hate speech or harassment in online media?

CLARIFICATION: Multiple selection. Choose all that apply.

RESPONSES:

0: Women [v2smhargr_0]

1: LGBTQ groups and individuals [v2smhargr_1]

2: Specific religious groups [v2smhargr_2]

3: Specific ethnic groups [v2smhargr_3]

4: Specific caste [v2smhargr_4]

5: Specific language groups [v2smhargr_5]

6: Specific race [v2smhargr_6]

7: People with physical or cognitive disabilities [v2smhargr_7]

8: People from specific regions [v2smhargr_8]

9: Other (specify in the next question) [v2smhargr_9]

10: No group is a specific target [v2smhargr_10]

SCALE: Series of dichotomous scales.

DATA RELEASE: 9-13.

CROSS-CODER AGGREGATION: Mean.

2.1.43.9 Types of organization through social media (v2smorgtypes)

Long tag: vdem_cd_v2smorgtypes

Original tag: v2smorgtypes

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_nr

QUESTION: What types of offline political action are most commonly mobilized on social media?

CLARIFICATION: Multiple selection. Choose all that apply.

RESPONSES:

0: Petition signing [v2smorgtypes_0]

1: Voter turnout [v2smorgtypes_1]
2: Street protests [v2smorgtypes_2]
3: Strikes/labor actions [v2smorgtypes_3]
4: Riots [v2smorgtypes_4]
5: Organized rebellion [v2smorgtypes_5]
6: Vigilante Justice (e.g., mob lynching, stalking harassment) [v2smorgtypes_6]
7: Terrorism [v2smorgtypes_7]
8: Ethnic cleansing/genocide [v2smorgtypes_8]
9: Other (specify in the next question) [v2smorgtypes_9]
SCALE: Series of dichotomous scales.
DATA RELEASE: 9-13.
CROSS-CODER AGGREGATION: Mean.
CITATION: Mechkova *et al.* (2019, *Digital Society Project Working Paper* 2019:1); *V-Dem Codebook* (see suggested citation at the top of this document).
YEARS: 2000-2022

2.1.44 Varieties of Indoctrination

The Varieties of Indoctrination (V-Indoc) dataset is constructed based on an expert survey fielded in collaboration with V-Dem and led by the ERC-funded project “Democracy under Threat: How Education can Save it” (DEMED). The dataset contains indices and indicators that measure indoctrination efforts in education and the media across 160 countries from 1945 to 2021. The indices capture broad dimensions of indoctrination such as indoctrination potential and indoctrination content, while the indicators cover topics related to the curriculum, teachers, schools, and the media. The principal investigators are Anja Neundorf, Eugenia Nazrullaeva, Ksenia Northmore-Ball, Katerina Tertytchnaya, and Wooseok Kim. For more information, please visit <https://www.gla.ac.uk/research/az/democracyresearch/>.

2.1.44.1 Government censorship effort — Media (v3mecenefm)

Long tag: vdem_cd_v3mecenefm

Original tag: v3mecenefm

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Michael Coppedge

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Does the government directly or indirectly attempt to censor the print or broadcast media?

CLARIFICATION: Indirect forms of censorship might include politically motivated awarding of broadcast frequencies, withdrawal of financial support, influence over printing facilities and distribution networks, selected distribution of advertising, onerous registration requirements, prohibitive tariffs, and bribery.

We are not concerned with censorship of non-political topics such as child pornography, statements offensive to a particular religion, or defamatory speech unless this sort of censorship is used as a pretext for censoring political speech.

RESPONSES:

0: Attempts to censor are direct and routine.

1: Attempts to censor are indirect but nevertheless routine.

2: Attempts to censor are direct but limited to especially sensitive issues.

3: Attempts to censor are indirect and limited to especially sensitive issues.

4: The government rarely attempts to censor major media in any way, and when such exceptional attempts are discovered, the responsible officials are usually punished.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see

V-Dem Methodology)

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-1920

2.2 V-Dem Coder-Level v13

Dataset tag: vdem_coder_level

Output Unit: V-Dem Country-Date-Coder, i.e., data is collected per country, date and coder.

Description: Data coded by Country Experts and coder-reliability scores from the Measurement Model output.

Dataset citation: Coppedge, Michael, John Gerring, Carl Henrik Knutsen, Staffan I. Lindberg, Jan Teorell, David Altman, Michael Bernhard, Agnes Cornell, M. Steven Fish, Lisa Gastaldi, Haakon Gjerløw, Adam Glynn, Ana Good God, Sandra Grahn, Allen Hicken, Katrin Kinzelbach, Joshua Krusell, Kyle L. 2.2.1 Identifier Variables in the V-Dem Datasets

Variables in this section identify the observations in the dataset.

2.2.1.1 Country Name Abbreviation (country_text_id)

Long tag: vdem_coder_level_country_text_id

Original tag: country_text_id

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: A*

QUESTION: Abbreviated country names.

RESPONSES:

Text

DATA RELEASE: 10-13.

CITATION: *V-Dem Codebook* (see suggested citation at the top of this document).

2.2.1.2 V-Dem Country ID (`country_id`)

Long tag: `vdem_coder_level_country_id`

Original tag: `country_id`

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: A*

QUESTION: Unique country ID designated for each country.

RESPONSES:

Numeric

NOTES: A list of countries and their corresponding IDs used in the V-Dem dataset can be found in the country table in the codebook, as well as in the *V-Dem Country Coding Units* document.

DATA RELEASE: 10-13.

CITATION: *V-Dem Codebook* (see suggested citation at the top of this document).

2.2.1.3 Historical Date (`historical_date`)

Long tag: `vdem_coder_level_historical_date`

Original tag: `historical_date`

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: A*

QUESTION: Variable designating the date for which observation is given.

CLARIFICATION: The date is coded in *YYYY-MM-DD* format. December 31 observation always refers to the situation at the end of the year. There can be observations on other dates signifying other events, i.e. elections or executive appointments.

RESPONSES:

Date

NOTES: This variable is included in the V-Dem Country Date dataset.

DATA RELEASE: 10-13.

CITATION: *V-Dem Codebook* (see suggested citation at the top of this document).

2.2.2 V-Dem Indicators - Civic and Academic Space

Instructions to the coders (as shown in the surveys)

Civic and Academic Space:

In this survey, we ask you to assess several issues concerning the space for and state of civil society and academia. First, we ask about some general issues such as polarization and peaceful assembly. Then, we probe into mobilization for mass events and associations. Finally, we ask you to consider questions related to academia.

2.2.2.1 Freedom of peaceful assembly (`v2caasemb`)

Long tag: `vdem_coder_level_v2caasemb`

Original tag: `v2caasemb`

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Katrin Kinzelbach

ADDITIONAL VERSIONS: `*_osp`, `*_ord`, `*_codelow`, `*_codehigh`, `*_sd`, `*_mean`, `*_nr`

QUESTION: To what extent do state authorities respect and protect the right of peaceful

assembly?

CLARIFICATION: This question focuses on the ability to assemble publically in practice. An assembly is “an intentional and temporary presence of a number of individuals in a public place, for a common expressive purpose” (ODIHR and Venice Commission of the Council of Europe 2010). Authorities may limit the right to assembly only if limitations are necessary in the interests of national security or public safety, public order, the protection of public health or morals, or the protection of the rights and freedoms of others, and are lawful, necessary, and proportionate to the aim pursued. Such reasonable and legal restrictions should not be considered when answering. However, if there is evidence that restrictions are used as a pretext for political reasons, this evidence should be considered.

RESPONSES:

0: Never. State authorities do not allow peaceful assemblies and are willing to use lethal force to prevent them.

1: Rarely. State authorities rarely allow peaceful assemblies, but generally avoid using lethal force to prevent them.

2: Sometimes. State authorities sometimes allow peaceful assemblies, but often arbitrarily deny citizens the right to assemble peacefully.

3: Mostly. State authorities generally allow peaceful assemblies, but in rare cases arbitrarily deny citizens the right to assemble peacefully.

4: Almost always. State authorities almost always allow and actively protect peaceful assemblies except in rare cases of lawful, necessary, and proportionate limitations.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 10-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1900-2022

2.2.2.2 Mobilization for autocracy (v2caautmob)

Long tag: vdem_coder_level_v2caautmob

Original tag: v2caautmob

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Sebastian Hellmeier

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: In this year, how frequent and large have events of mass mobilization for pro-autocratic aims been?

CLARIFICATION: Events are pro-autocratic if they are organized explicitly in support of non-democratic rulers and forms of government such as a one-party state, monarchy, theocracy or military dictatorships. Events are also pro-autocratic if they are organized in support of leaders that question basic principles of democracy, or are generally aiming to undermine democratic ideas and institutions such as the rule of law, free and fair elections, or media freedom. This question concerns the mobilization of citizens for mass events such as demonstrations, strikes, sit. These events are typically organized by non-state actors, but the question also concerns also count state-orchestrated rallies (e.g. to show support of an autocratic government).

RESPONSES:

0: There have been virtually no events.

1: There have been several small-scale events.

2: There have been many small-scale events.

3: There have been several large-scale and small-scale events.

4: There have been many large-scale and small-scale events.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 10-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Hellmeier and Bernhard (2022, *V-Dem Working Paper Series* 2022:128); Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1900-2022

2.2.2.3 Political polarization (v2cacamps)

Long tag: vdem_coder_level_v2cacamps

Original tag: v2cacamps

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Sebastian Hellmeier

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Is society polarized into antagonistic, political camps?

CLARIFICATION: Here we refer to the extent to which political differences affect social relationships beyond political discussions. Societies are highly polarized if supporters of opposing political camps are reluctant to engage in friendly interactions, for example, in family functions, civic associations, their free time activities and workplaces

RESPONSES:

0: Not at all. Supporters of opposing political camps generally interact in a friendly manner.

1: Mainly not. Supporters of opposing political camps are more likely to interact in a friendly than a hostile manner.

2: Somewhat. Supporters of opposing political camps are equally likely to interact in a friendly or hostile manner.

3: Yes, to noticeable extent. Supporters of opposing political camps are more likely to interact in a hostile than friendly manner.

4: Yes, to a large extent. Supporters of opposing political camps generally interact in a hostile manner.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 10-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1900-2022

2.2.2.4 Mass mobilization concentration (v2caconmob)

Long tag: vdem_coder_level_v2caconmob

Original tag: v2caconmob

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Sebastian Hellmeier

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Were mass mobilization events concentrated in the capital?

CLARIFICATION: This question is about the geographic location of the events and not their intensity. In the unlikely event that no event at all took place, code option 2. This question concerns the mobilization of citizens for mass events such as demonstrations, strikes and sit-ins. These events are typically organized by non-state actors, but the question also

concerns state-orchestrated rallies (e.g. to show support of an autocratic government).

RESPONSES:

0: Yes. Events of mass mobilization were much more frequent in the capital.

1: Somewhat. Events of mass mobilization were somewhat more frequent in the capital.

2: No. Events of mass mobilization were as common in many cities across the country as in the capital or did not take place at all.

3: No. Events of mass mobilization were more common in cities other than the capital.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 10-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1900-2022

CONVERGENCE: Model parameters with convergence issues: universal thresholds.

2.2.2.5 Academics as critics (v2cacritic)

Long tag: vdem_coder_level_v2cacritic

Original tag: v2cacritic

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Katrin Kinzelbach, Ilyas Saliba, Janika Spannagel

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: To what extent do scholars and university students publicly criticize government policies?

CLARIFICATION: This question is only about the extent scholars and students actually criticize government policies – irrespective of how free they are to do so and whether they are met with repression or not. We ask you simply to consider to what extent scholars and students are noticeable as government critics in the public discourse.

Public criticism of government policies can be conveyed for example through the publication of op-eds or social media posts on current affairs, the signing of open letters or petitions, the taking part in or organization of public protests, or the holding of critical lectures to students or the public.

RESPONSES:

0: Not at all. Scholars and university students do not publicly express criticism of government policies.

1: To a small extent. Scholars and university students publicly express minor criticism of government policies.

2: To a moderate extent. Scholars and university students publicly express moderate criticism of government policies.

3: To a large extent. Scholars and university students publicly express substantive criticism of government policies.

4: To a major extent. Scholars and university students publicly express fundamental criticism of government policies.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 10-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1900-2022

2.2.2.6 Mobilization for democracy (v2cademmob)

Long tag: vdem_coder_level_v2cademmob

Original tag: v2cademmob

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Sebastian Hellmeier

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: In this year, how frequent and large have events of mass mobilization for pro-democratic aims been?

CLARIFICATION: Events are pro-democratic if they are organized with the explicit aim to advance and/or protect democratic institutions such as free and fair elections with multiple parties, and courts and parliaments; or if they are in support of civil liberties such as freedom of association and speech. This question concerns the mobilization of citizens for mass events such as demonstrations, strikes and sit-ins.

RESPONSES:

0: There have been virtually no events.

1: There have been several small-scale events.

2: There have been many small-scale events.

3: There have been several large-scale and small-scale events.

4: There have been many large-scale and small-scale events.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 10-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Hellmeier and Bernhard (2022, *V-Dem Working Paper Series* 2022:128); Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1900-2022

CONVERGENCE: Model parameters with convergence issues: universal thresholds.

2.2.2.7 Freedom of academic exchange and dissemination (v2cafexch)

Long tag: vdem_coder_level_v2cafexch

Original tag: v2cafexch

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Katrin Kinzelbach, Ilyas Saliba, Janika Spannagel

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: To what extent are scholars free to exchange and communicate research ideas and findings?

CLARIFICATION: Free academic exchange includes uncensored access to research material, unhindered participation in national or international academic conferences, and the uncensored publication of academic material. Free dissemination refers to the unrestricted possibility for scholars to share and explain research findings in their field of expertise to non-academic audiences through media engagement or public lectures.

RESPONSES:

0: Completely restricted. Academic exchange and dissemination is, across all disciplines, consistently subject to censorship, self-censorship or other restrictions.

1: Severely restricted. Academic exchange and dissemination is, in some disciplines, consistently subject to censorship, self-censorship or other restrictions.

2: Moderately restricted. Academic exchange and dissemination is occasionally subject to censorship, self-censorship or other restrictions.

3: Mostly free. Academic exchange and dissemination is rarely subject to censorship, self-censorship or other restrictions.

4: Fully free. Academic exchange and dissemination is not subject to censorship, self-censorship or other restrictions.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 10-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Spannagel and Kinzelbach (2022); Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1900-2022

2.2.2.8 Freedom to research and teach (v2cafres)

Long tag: vdem_coder_level_v2cafres

Original tag: v2cafres

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Katrin Kinzelbach, Ilyas Saliba, Janika Spannagel

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: To what extent are scholars free to develop and pursue their own research and teaching agendas without interference?

CLARIFICATION: Examples of interference include research agendas or teaching curricula being drafted, restricted, or fully censored by a non-academic actor; scholars being externally induced, through possible reprisals, to self-censor; or the university administration abusing its position of power to impose research or teaching agendas on individual academics. It also includes public pressure on academics - offline and online. We do not consider as interference restrictions that are due to research priorities, as well as ethical and quality standards, freely defined by the scholarly community as well as the development of standardized curricula by academics that aim to structure and enhance teaching.

RESPONSES:

0: Completely restricted. When determining their research agenda or teaching curricula, scholars are, across all disciplines, consistently subject to interference or incentivized to self-censor.

1: Severely restricted. When determining their research agenda or teaching curricula, scholars are, in some disciplines, consistently subject to interference or incentivized to self-censor.

2: Moderately restricted. When determining their research agenda or teaching curricula, scholars are occasionally subject to interference or incentivized to self-censor.

3: Mostly free. When determining their research agenda or teaching curricula, scholars are rarely subject to interference or incentivized to self-censor.

4: Fully free. When determining their research agenda or teaching curricula, scholars are not subject to interference or incentivized to self-censor.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 10-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

2.2.2.9 Mass mobilization (v2cagenmob)

Long tag: vdem_coder_level_v2cagenmob

Original tag: v2cagenmob

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Sebastian Hellmeier

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: In this year, how frequent and large have events of mass mobilization been?

CLARIFICATION: This question concerns the mobilization of citizens for mass events such as demonstrations, strikes and sit-ins. These events are typically organized by non-state actors, but the question also concerns state-orchestrated rallies (e.g. to show support of an autocratic government).

RESPONSES:

0: There have been virtually no events.

1: There have been several small-scale events.

2: There have been many small-scale events.

3: There have been several large-scale and small-scale events.

4: There have been many large-scale and small-scale events.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 10-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1900-2022

2.2.2.10 Institutional autonomy (v2cainsaut)

Long tag: vdem_coder_level_v2cainsaut

Original tag: v2cainsaut

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Katrin Kinzelbach, Ilyas Saliba, Janika Spannagel

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: To what extent do universities exercise institutional autonomy in practice?

CLARIFICATION: Institutional autonomy “means the independence of institutions of higher education from the State and all other forces of society, to make decisions regarding its internal government, finance, administration, and to establish its policies of education, research, extension work and other related activities” (Lima Declaration). Note that institutional autonomy does not preclude universities from accepting state or third party funding, but does require that they remain in charge of all types of decisions listed above. Institutional autonomy does also not preclude a public oversight role by the state over universities’ spending of public funds.

RESPONSES:

0: No autonomy at all. Universities do not exercise any degree of institutional autonomy; non-academic actors control decision-making.

1: Minimal autonomy. Universities exercise only very limited institutional autonomy; non-academic actors interfere extensively with decision-making.

2: Moderate autonomy. Universities exercise some institutional autonomy; non-academic actors interfere moderately with decision-making.

3: Substantial autonomy. Universities exercise institutional autonomy to a large extent; non-academic actors have only rare and minimal influence on decision-making.

4: Complete autonomy. Universities exercise complete institutional autonomy from non-academic actors.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 10-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Spannagel and Kinzelbach (2022); Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

2.2.2.11 Engagement in independent non-political associations (v2canonpol)

Long tag: vdem_coder_level_v2canonpol

Original tag: v2canonpol

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Sebastian Hellmeier

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: What share of the population is regularly active in independent non-political associations, such as sports clubs, literary societies, charities, fraternal groups, or support groups?

CLARIFICATION: Non-political associations include all associations whose main purpose is not the change of policy or practice at the state or societal level. It does NOT include political parties, or trade unions. An organization is independent if it is not controlled by the state or the ruling party and membership is voluntary. We consider an individual as active if they attend a meeting activity or event at least twice a year.

RESPONSES:

0: Virtually no one.

1: A small share of the population (less than 5percent).

2: A moderate share of the population (about 5 to 15 percent).

3: A large share of the population (about 16 percent to 25percent).

4: A very large share of the population (about 26percent or more).

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 10-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1900-2022

CONVERGENCE: Model parameters with convergence issues: country-date latent trait estimates, universal thresholds, expert reliability, expert thresholds, main-country-coded thresholds.

2.2.2.13 State of emergency (v2casoe)

Long tag: vdem_coder_level_v2casoe

Original tag: v2casoe

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Katrin Kinzelbach

ADDITIONAL VERSIONS: *_nr

QUESTION: Was a national state of emergency in place at any point this year?

CLARIFICATION: A state of emergency is a formal legal act that enables state actors and institutions to change their roles during times of international or domestic crisis. Our definition of state of emergency includes the application of martial law. If there was more than one state of emergency, code the one that was in place for the longer time. Select one option.

RESPONSES:

0: The legal framework does not allow for a declaration of a national state of emergency. (0=No, 1=Yes) [v2casoe_0]

1: There was no state of emergency in place at any point this year, even though provisions for a declaration of a national state of emergency exist. (0=No, 1=Yes) [v2casoe_1]

2: A national state of emergency was in place due to a natural disaster. (0=No, 1=Yes) [v2casoe_2]

3: A national state of emergency was in place due to a terrorist attack. (0=No, 1=Yes) [v2casoe_3]

4: A national state of emergency was in place due to an armed conflict/war, domestically or internationally. (0=No, 1=Yes) [v2casoe_4]

5: A national state of emergency was in place due to mass protest/popular uprising. (0=No, 1=Yes) [v2casoe_5]

6: A national state of emergency was in place for reasons other than those listed above. (0=No, 1=Yes) [v2casoe_6]

SCALE: Series of dichotomous scales.

DATA RELEASE: 10-13.

CROSS-CODER AGGREGATION: Mean.

CITATION: *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1900-2022

2.2.2.14 Engagement in state-administered mass organizations (v2castate)

Long tag: vdem_coder_level_v2castate

Original tag: v2castate

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Sebastian Hellmeier

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: What share of the population is regularly active in state-administered mass associations, such as women, worker or youth leagues?

CLARIFICATION: State-administered mass associations are civilian organizations created and led by the government or the ruling party. Large shares of specific societal groups are voluntary or compulsory members of these associations. Examples include youth leagues such as the Hitlerjugend in Nazi Germany and the pioneers in the Soviet Union, women leagues such as the Women's Federation in China or the Federacion de Mujeres Cubanas and official trade unions in the Soviet Union. Such organizations are formally or informally affiliated with the state and/or with the ruling party. We consider an individual as active if they attend a meeting, activity or event at least twice a year.

RESPONSES:

0: Virtually no one.

1: A small share of the population (less than 5percent).

2: A moderate share of the population (about 5 to 15 percent).

3: A large share of the population (about 16 percent to 25percent).

4: A very large share of the population (about 26percent or more).

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 10-13.

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1900-2022

2.2.2.15 Campus integrity (v2casurv)

Long tag: vdem_coder_level_v2casurv

Original tag: v2casurv

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Katrin Kinzelbach, Ilyas Saliba, Janika Spannagel

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: To what extent are campuses free from politically motivated surveillance or security infringements?

CLARIFICATION: "Campus" refers to all university buildings as well as digital research and teaching platforms. Campus integrity means the preservation of an open learning and research environment marked by an absence of an externally induced climate of insecurity or intimidation on campus. Examples of infringements of campus integrity are politically motivated on-campus or digital surveillance, presence by intelligence or security forces, presence of student militias, or violent attacks by third parties, if specifically targeting universities to repress academic life on campus. Note that we are only interested in politically motivated infringements and targeted attacks on campus integrity, not in non-political security concerns or proportionate security measures taken on campus to address these.

RESPONSES:

0: Completely restricted. Campus integrity is fundamentally undermined by extensive surveillance and severe intimidation, including violence or closures.

1: Severely restricted. Campus integrity is to a large extent undermined by surveillance and intimidation, at times including violence or closures.
2: Moderately restricted. Campus integrity is challenged by some significant cases of surveillance or intimidation.
3: Mostly free. Campus integrity is to a large extent respected, with only minor cases of surveillance or intimidation.
4: Fully free. Campus integrity is comprehensively respected; there are no cases of surveillance or intimidation.
SCALE: Ordinal, converted to interval by the measurement model.
DATA RELEASE: 10-13.
CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).
CITATION: Spannagel and Kinzelbach (2022); Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

CONVERGENCE: Model parameters with convergence issues: universal thresholds, expert thresholds, main-country-coded thresholds.

2.2.2.17 Political violence (v2caviol)

Long tag: vdem_coder_level_v2caviol

Original tag: v2caviol

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Katrin Kinzelbach

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: How often have non-state actors used political violence against persons this year?

CLARIFICATION: We understand political violence as the use of physical force to achieve political objectives by non-state actors. The restriction to political objectives excludes profit-driven crime-related violence, for instance. By non-state actors we refer to individuals or entities that are not formally part of the state. Thus, politically oriented militias and youth groups count as non-state actors even though they might potentially be informally affiliated with the ruling party or the state. Political violence against persons excludes psychological and symbolic violence (e.g. destruction of objects).

RESPONSES:

0: Not at all. Non-state actors did not use political violence.

1: Rare. Non-state actors rarely used political violence.

2: Occasionally. Non-state actors occasionally used political violence.

3: Frequently. Non-state actors frequently used political violence.

4: Often. Non-state actors often used political violence.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 10-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1900-2022

2.2.3 V-Dem Indicators - Civil Liberty

Instructions to the coders (as shown in the surveys)

Civil Liberty: The following questions are focused on actual practices (*de facto*) rather than formal legal or constitutional rights (*de jure*). Note that if there is significant variation in the respect for a particular civil liberty across the territory, the score should reflect the "average situation" across the territorial scope of the country unit (for each period) as defined in the coder instructions.

2.2.3.1 Freedom of academic and cultural expression (v2clacfree)

Long tag: vdem_coder_level_v2clacfree

Original tag: v2clacfree

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Svend-Erik Skaaning

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Is there academic freedom and freedom of cultural expression related to political issues?

RESPONSES:

0: Not respected by public authorities. Censorship and intimidation are frequent. Academic activities and cultural expressions are severely restricted or controlled by the government.

1: Weakly respected by public authorities. Academic freedom and freedom of cultural expression are practiced occasionally, but direct criticism of the government is mostly met with repression.

2: Somewhat respected by public authorities. Academic freedom and freedom of cultural expression are practiced routinely, but strong criticism of the government is sometimes met with repression.

3: Mostly respected by public authorities. There are few limitations on academic freedom and freedom of cultural expression, and resulting sanctions tend to be infrequent and soft.

4: Fully respected by public authorities. There are no restrictions on academic freedom or cultural expression.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

2.2.3.2 Access to justice for men (v2clacjstm)

Long tag: vdem_coder_level_v2clacjstm

Original tag: v2clacjstm

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Svend-Erik Skaaning

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Do men enjoy secure and effective access to justice?

CLARIFICATION: This question specifies the extent to which men can bring cases before the courts without risk to their personal safety, trials are fair, and men have effective ability to seek redress if public authorities violate their rights, including the rights to counsel, defense, and appeal.

This question does not ask you to assess the *relative* access to justice men and women. Thus, it is possible to assign the lowest possible score to a country even if men and women enjoy equal — and extremely limited — access to justice.

RESPONSES:

0: Secure and effective access to justice for men is non-existent.

1: Secure and effective access to justice for men is usually not established or widely respected.

2: Secure and effective access to justice for men is inconsistently observed. Minor problems characterize most cases or occur rather unevenly across different parts of the country.

3: Secure and effective access to justice for men is usually observed.

4: Secure and effective access to justice for men is almost always observed.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Svend-Erik Skaaning

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Do poor people enjoy the same level of civil liberties as rich people do?

CLARIFICATION: This question specifies the extent to which the level of civil liberties is generally the same across socioeconomic groups so that people with a low social status are not treated worse than people with high social status. Here, civil liberties are understood to include access to justice, private property rights, freedom of movement, and freedom from forced labor.

RESPONSES:

0: Poor people enjoy much fewer civil liberties than rich people.

1: Poor people enjoy substantially fewer civil liberties than rich people.

2: Poor people enjoy moderately fewer civil liberties than rich people.

3: Poor people enjoy slightly fewer civil liberties than rich people.

4: Poor people enjoy the same level of civil liberties as rich people.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

2.2.3.5 Freedom of discussion for men (v2cldiscm)

Long tag: vdem_coder_level_v2cldiscm

Original tag: v2cldiscm

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Svend-Erik Skaaning

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Are men able to openly discuss political issues in private homes and in public spaces?

CLARIFICATION: This indicator specifies the extent to which men are able to engage in private discussions, particularly on political issues, in private homes and public spaces (restaurants, public transportation, sports events, work etc.) without fear of harassment by other members of the polity or the public authorities. We are interested in restrictions by the government and its agents but also cultural restrictions or customary laws that are enforced by other members of the polity, sometimes in informal ways.

This question does not ask you to assess the *relative* freedom of men and women. Thus, it is possible to assign the lowest possible score to a country even if men and women enjoy equal — and extremely low — rights to freedom of discussion.

RESPONSES:

0: Not respected. Hardly any freedom of expression exists for men. Men are subject to immediate and harsh intervention and harassment for expression of political opinion.

1: Weakly respected. Expressions of political opinions by men are frequently exposed to intervention and harassment.

2: Somewhat respected. Expressions of political opinions by men are occasionally exposed to intervention and harassment.

3: Mostly respected. There are minor restraints on the freedom of expression in the private sphere, predominantly limited to a few isolated cases or only linked to soft sanctions. But as a rule there is no intervention or harassment if men make political statements.

4: Fully respected. Freedom of speech for men in their homes and in public spaces is not restricted.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Svend-Erik Skaaning

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Do men enjoy freedom of movement within the country?

CLARIFICATION: This indicator specifies the extent to which all men are able to move freely, in daytime and nighttime, in public thoroughfares, across regions within a country, and to establish permanent residency where they wish. Note that restrictions in movement might be imposed by the state and/or by informal norms and practices. Such restrictions sometimes fall on rural residents, on specific social groups, or on dissidents.

This question does not ask you to assess the *relative* freedom of men and women. Thus, it is possible to assign the lowest possible score to a country even if men and women enjoy equal — and extremely low — freedom of movement.

Do *not* consider restrictions in movement that are placed on ordinary (non-political) criminals. Do not consider restrictions in movement that result from crime or unrest.

RESPONSES:

0: Virtually no men enjoy full freedom of movement (*e.g.*, North Korea).

1: Some men enjoy full freedom of movement, but most do not (*e.g.*, Apartheid South Africa).

2: Most men enjoy some freedom of movement but a sizeable minority does not. Alternatively all men enjoy partial freedom of movement.

3: Most men enjoy full freedom of movement but a small minority does not.

4: Virtually all men enjoy full freedom of movement.

SCALE: Ordinal, converted to interval by the measurement model.

VARIABLE TYPE: C

PROJECT MANAGER(S): Pamela Paxton, Svend-Erik Skaaning

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Do women enjoy freedom of movement within the country?

CLARIFICATION: This indicator specifies the extent to which all women are able to move freely, in daytime and nighttime, in public thoroughfares, across regions within a country, and to establish permanent residency where they wish. Note that restrictions in movement might be imposed by the state and/or by informal norms and practices. Such restrictions sometimes fall on rural residents, on specific social groups, or on dissidents.

This question does not ask you to assess the *relative* freedom of men and women. Thus, it is possible to assign the lowest possible score to a country even if men and women enjoy equal — and extremely low — freedom of movement.

Do *not* consider restrictions in movement that are placed on ordinary (non-political) criminals. Do not consider restrictions in movement that result from crime or unrest.

RESPONSES:

0: Virtually no women enjoy full freedom of movement (*e.g.*, North Korea or Afghanistan under the Taliban).

1: Some women enjoy full freedom of movement, but most do not (*e.g.*, Apartheid South Africa).

2: Most women enjoy some freedom of movement but a sizeable minority does not. Alternatively all women enjoy partial freedom of movement.

3: Most women enjoy full freedom of movement but a small minority does not.

4: Virtually all women enjoy full freedom of movement.

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Is there freedom of foreign travel and emigration?

CLARIFICATION: This indicator specifies the extent to which citizens are able to travel freely to and from the country and to emigrate without being subject to restrictions by public authorities.

RESPONSES:

0: Not respected by public authorities. Citizens are rarely allowed to emigrate or travel out of the country. Transgressors (or their families) are severely punished. People discredited by the public authorities are routinely exiled or prohibited from traveling.

1: Weakly respected by public authorities. The public authorities systematically restrict the right to travel, especially for political opponents or particular social groups. This can take

the form of general restrictions on the duration of stays abroad or delays/refusals of visas.

2: Somewhat respected by the public authorities. The right to travel for leading political opponents or particular social groups is occasionally restricted but ordinary citizens only met minor restrictions.

3: Mostly respected by public authorities. Limitations on freedom of movement and residence are not directed at political opponents but minor restrictions exist. For example, exit visas may be required and citizens may be prohibited from traveling outside the country when accompanied by other members of their family.

4: Fully respected by the government. The freedom of citizens to travel from and to the country, and to emigrate and repatriate, is not restricted by public authorities.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

2.2.3.10 Freedom from political killings (v2clkill)

Long tag: vdem_coder_level_v2clkill

Original tag: v2clkill

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Svend-Erik Skaaning

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Is there freedom from political killings?

CLARIFICATION: Political killings are killings by the state or its agents without due process of law for the purpose of eliminating political opponents. These killings are the result of deliberate use of lethal force by the police, security forces, prison officials, or other agents of the state (including paramilitary groups).

RESPONSES:

0: Not respected by public authorities. Political killings are practiced systematically and they are typically incited and approved by top leaders of government.

1: Weakly respected by public authorities. Political killings are practiced frequently and top leaders of government are not actively working to prevent them.

2: Somewhat respected by public authorities. Political killings are practiced occasionally but they are typically not incited and approved by top leaders of government.

3: Mostly respected by public authorities. Political killings are practiced in a few isolated cases but they are not incited or approved by top leaders of government.

4: Fully respected by public authorities. Political killings are non-existent.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

2.2.3.11 Property rights for men (v2clprptym)

Long tag: vdem_coder_level_v2clprptym

Original tag: v2clprptym

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky,

Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Svend-Erik Skaaning

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Do men enjoy the right to private property?

CLARIFICATION: Private property includes the right to acquire, possess, inherit, and sell private property, including land. Limits on property rights may come from the state (which may legally limit rights or fail to enforce them); customary laws and practices; or religious or social norms. This question concerns the right to private property, not actual ownership of property.

This question does not ask you to assess the *relative* rights of men and women. Thus, it is possible to assign the lowest possible score to a country even if men and women enjoy equal — and very minimal — property rights.

RESPONSES:

0: Virtually no men enjoy private property rights of any kind.

1: Some men enjoy some private property rights, but most have none.

2: Many men enjoy many private property rights, but a smaller proportion enjoys few or none.

3: More than half of men enjoy most private property rights, yet a smaller share of men have much more restricted rights.

4: Most men enjoy most private property rights but a small minority does not.

5: Virtually all men enjoy all, or almost all property rights.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

2.2.3.13 Freedom of religion (v2clrelig)

Long tag: vdem_coder_level_v2clrelig

Original tag: v2clrelig

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Svend-Erik Skaaning

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Is there freedom of religion?

CLARIFICATION: This indicator specifies the extent to which individuals and groups have the right to choose a religion, change their religion, and practice that religion in private or in public as well as to proselytize peacefully without being subject to restrictions by public authorities.

RESPONSES:

0: Not respected by public authorities. Hardly any freedom of religion exists. Any kind of religious practice is outlawed or at least controlled by the government to the extent that religious leaders are appointed by and subjected to public authorities, who control the activities of religious communities in some detail.

1: Weakly respected by public authorities. Some elements of autonomous organized religious practices exist and are officially recognized. But significant religious communities are repressed, prohibited, or systematically disabled, voluntary conversions are restricted, and instances of discrimination or intimidation of individuals or groups due to their religion are common.

2: Somewhat respected by public authorities. Autonomous organized religious practices exist and are officially recognized. Yet, minor religious communities are repressed, prohibited, or systematically disabled, and/or instances of discrimination or intimidation of individuals or groups due to their religion occur occasionally.

3: Mostly respected by public authorities. There are minor restrictions on the freedom of religion, predominantly limited to a few isolated cases. Minority religions face denial of registration, hindrance of foreign missionaries from entering the country, restrictions against proselytizing, or hindrance to access to or construction of places of worship.

4: Fully respected by public authorities. The population enjoys the right to practice any religious belief they choose. Religious groups may organize, select, and train personnel; solicit and receive contributions; publish; and engage in consultations without undue interference. If religious communities have to register, public authorities do not abuse the process to discriminate against a religion and do not constrain the right to worship before registration.

SCALE: Ordinal, converted to interval by the measurement model.

2.2.3.17 Rigorous and impartial public administration (v2clrspct)

Long tag: vdem_coder_level_v2clrspct

Original tag: v2clrspct

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Svend-Erik Skaaning

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Are public officials rigorous and impartial in the performance of their duties?

CLARIFICATION: This question focuses on the extent to which public officials generally abide by the law and treat like cases alike, or conversely, the extent to which public administration is characterized by arbitrariness and biases (*i.e.*, nepotism, cronyism, or discrimination).

The question covers the public officials that handle the cases of ordinary people. If no functioning public administration exists, the lowest score (0) applies.

RESPONSES:

0: The law is not respected by public officials. Arbitrary or biased administration of the law is rampant.

1: The law is weakly respected by public officials. Arbitrary or biased administration of the law is widespread.

2: The law is modestly respected by public officials. Arbitrary or biased administration of the law is moderate.

3: The law is mostly respected by public officials. Arbitrary or biased administration of the law is limited.

4: The law is generally fully respected by the public officials. Arbitrary or biased administration of the law is very limited.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

2.2.3.18 Freedom from forced labor for women (v2clslavef)

Long tag: vdem_coder_level_v2clslavef

Original tag: v2clslavef

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Pamela Paxton, Svend-Erik Skaaning

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Are adult women free from servitude and other kinds of forced labor?

CLARIFICATION: Involuntary servitude occurs when an adult is unable to quit a job s/he desires to leave — not by reason of economic necessity but rather by reason of employer’s coercion. This includes labor camps but not work or service which forms part of normal civic obligations such as conscription or employment in command economies.

This question does not ask you to assess the *relative* freedom of men and women from forced labor. Thus, a country in which both men and women suffer the same conditions of servitude might be coded a (0) for women, even though there is equality across the sexes.

RESPONSES:

0: Female servitude or other kinds of forced labor is widespread and accepted (perhaps even organized) by the state.

1: Female servitude or other kinds of forced labor is substantial. Although officially opposed by the public authorities, the state is unwilling or unable to effectively contain the practice.

2: Female servitude or other kinds of forced labor exists but is not widespread and usually actively opposed by public authorities, or only tolerated in some particular areas or among particular social groups.

3: Female servitude or other kinds of forced labor is infrequent and only found in the criminal underground. It is actively and sincerely opposed by the public authorities.

4: Female servitude or other kinds of forced labor is virtually non-existent.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Do all social groups, as distinguished by language, ethnicity, religion, race, region, or caste, enjoy the same level of civil liberties, or are some groups generally in a more favorable position?

CLARIFICATION: Here, civil liberties are understood to include access to justice, private property rights, freedom of movement, and freedom from forced labor.

RESPONSES:

0: Members of some social groups enjoy much fewer civil liberties than the general population.

1: Members of some social groups enjoy substantially fewer civil liberties than the general population.

2: Members of some social groups enjoy moderately fewer civil liberties than the general population.

3: Members of some social groups enjoy slightly fewer civil liberties than the general population.

4: Members of all salient social groups enjoy the same level of civil liberties.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

2.2.3.22 State ownership of economy (v2clstown)

Long tag: vdem_coder_level_v2clstown

Original tag: v2clstown

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Svend-Erik Skaaning

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Does the state own or directly control important sectors of the economy?

CLARIFICATION: This question gauges the degree to which the state owns and controls capital (including land) in the industrial, agricultural, and service sectors.

It does *not* measure the extent of government revenue and expenditure as a share of total output; indeed, it is quite common for states with expansive fiscal policies to exercise little direct control (and virtually no ownership) over the economy.

RESPONSES:

0: Virtually all valuable capital belongs to the state or is directly controlled by the state. Private property may be officially prohibited.

1: Most valuable capital either belongs to the state or is directly controlled by the state.

2: Many sectors of the economy either belong to the state or are directly controlled by the state, but others remain relatively free of direct state control.

3: Some valuable capital either belongs to the state or is directly controlled by the state, but most remains free of direct state control.

4: Very little valuable capital belongs to the state or is directly controlled by the state.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

2.2.3.23 Freedom from torture (v2cltort)

Long tag: vdem_coder_level_v2cltort

Original tag: v2cltort

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Svend-Erik Skaaning

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Is there freedom from torture?

CLARIFICATION: Torture refers to the purposeful inflicting of extreme pain, whether mental or physical, with an aim to extract information or intimidate victims, who are in a state of incarceration. Here, we are concerned with torture practiced by state officials or other agents of the state (*e.g.*, police, security forces, prison guards, and paramilitary groups).

RESPONSES:

0: Not respected by public authorities. Torture is practiced systematically and is incited and approved by the leaders of government.

1: Weakly respected by public authorities. Torture is practiced frequently but is often not incited or approved by top leaders of government. At the same time, leaders of government are not actively working to prevent it.

2: Somewhat. Torture is practiced occasionally but is typically not approved by top leaders of government.
3: Mostly respected by public authorities. Torture is practiced in a few isolated cases but is not incited or approved by top government leaders.
4: Fully respected by public authorities. Torture is non-existent.
SCALE: Ordinal, converted to interval by the measurement model.
DATA RELEASE: 1-13.
CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).
CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Svend-Erik Skaaning

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Are the laws of the land clear, well publicized, coherent (consistent with each other), relatively stable from year to year, and enforced in a predictable manner?

CLARIFICATION: This question focuses on the transparency and predictability of the laws of the land.

RESPONSES:

0: Transparency and predictability are almost non-existent. The laws of the land are created and/or enforced in completely arbitrary fashion.

1: Transparency and predictability are severely limited. The laws of the land are more often than not created and/or enforced in arbitrary fashion.

2: Transparency and predictability are somewhat limited. The laws of the land are mostly created in a non-arbitrary fashion but enforcement is rather arbitrary in some parts of the country.

3: Transparency and predictability are fairly strong. The laws of the land are usually created and enforced in a non-arbitrary fashion.

4: Transparency and predictability are very strong. The laws of the land are created and enforced in a non-arbitrary fashion.

SCALE: Ordinal, converted to interval by the measurement model.

CONVERGENCE: Model parameters with convergence issues: universal thresholds.

2.2.4 V-Dem Indicators - Exclusion

Instructions to the coders (as shown in the surveys)

Exclusion:

The following survey contains questions pertaining to exclusion. Political, economic and social well-being may depend on whether groups or individuals are excluded from positions of power, the state's protection of rights and freedoms, access to public goods and services, and opportunities to

work or do business with the state.

Please bear in mind the following definitions as you respond to questions on this survey:

Exclusion is when individuals are denied access to services or participation in governed spaces based on their identity or belonging to a particular group. It is not necessary for all members of a group to be excluded in order for group-based exclusion to occur. Exclusion occurs even when only a single individual is excluded based on her or his identity or membership (perceived or actual) in a particular group.

Political groups are defined as those who are affiliated with a particular political party or candidate, or a group of parties/candidates. A common form of partisan exclusion is when state services or regulations are implemented in a way that seeks to reward the incumbent's political supporters and punish non-supporters.

Socio-Economic position defines groups based on attributes of wealth, occupation, or other economic circumstances such as owning property. Exclusion of economic groups occurs when, for example, those who are not property owners are restricted from voting, or when fees associated with justice, health or education are set at a rate that is unaffordable for poorer individuals.

Social group is differentiated within a country by caste, ethnicity, language, race, region, religion, migration status, or some combination thereof. (It does not include identities grounded in sexual orientation, gender, or socioeconomic status.) Social group identity is contextually defined and is likely to vary across countries and through time. Social group identities are also likely to cross-cut, so that a given person could be defined in multiple ways, i.e., as part of multiple groups. Nonetheless, at any given point in time there are social groups within a society that are understood - by those residing within that society - to be different, in ways that may be politically relevant. Contrast Identity group.

Geographic group refers to those living in rural or urban areas. Urban areas are defined as an area that meets the following conditions: population density exceeds a threshold of 150 persons per square kilometer and there is access to a sizeable settlement of 50,000 people or more within some reasonable travel time, for example 60 minutes by road. (World Development Report, 2009: 54).

2.2.4.1 Gender equality in respect for civil liberties (v2clgencl)

Long tag: vdem_coder_level_v2clgencl

Original tag: v2clgencl

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Rachel Sigman

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Do those who reside in rural areas enjoy same level of civil liberties as those residing in urban areas?

CLARIFICATION: This question specifies the extent to which the level of civil liberties is generally the same across geographic areas. Urban areas are defined as an area that meets the following conditions: population density exceeds a threshold of 150 persons per square kilometer, there is access to a sizeable settlement of 50,000 people or more within some reasonable travel time, for example 60 minutes by road (World Development Report, 2009: 54). Here, civil liberties are understood to include access to justice, private property rights, freedom of movement, and freedom from forced labor.

RESPONSES:

0: Those who live in rural areas enjoy much fewer civil liberties than residents of urban areas.

1: Those who live in rural areas enjoy substantially fewer civil liberties than residents of urban areas.

2: Those who live in rural areas enjoy moderately fewer civil liberties than residents of urban areas.

3: Those who live in rural areas enjoy slightly fewer civil liberties than residents of urban areas.

4: Residents of rural areas enjoy the same level of civil liberties as those in urban areas.

5: Residents of rural areas enjoy more civil liberties than those in urban areas.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 9-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see V-Dem Methodology).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1900-2022

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Rachel Sigman

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Do members of all political groups enjoy the same level of civil liberties, or are some groups generally in a more favorable position?

CLARIFICATION: A political group is defined as those who are affiliated with a particular political party or candidate, or a group of parties/candidates that can be distinguished from others in terms of enjoyment of civil liberties. Responses should not reflect which party controls the legislature and executive. Here, civil liberties are understood to include access to justice, private property rights, freedom of movement, and freedom from forced labor.

RESPONSES:

0: Some political groups enjoy much fewer civil liberties than other political groups.

1: Some political groups enjoy substantially fewer civil liberties than other political groups.

2: Some political groups enjoy moderately fewer civil liberties than other political groups.

3: Some political groups enjoy slightly fewer civil liberties than other political groups.
4: All political groups enjoy the same level of civil liberties.
SCALE: Ordinal, converted to interval by the measurement model.
DATA RELEASE: 9-13.
CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see V-Dem Methodology).
CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

2.2.4.4 Access to public services distributed by socio-economic position (v2peapsecon)

Long tag: vdem_coder_level_v2peapsecon

Original tag: v2peapsecon

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Rachel Sigman

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Is access to basic public services, such as order and security, primary education, clean water, and healthcare, distributed equally according to socioeconomic position?

CLARIFICATION: This question asks if socio-economic position is an important cleavage in society for the distribution of public services. Thus, if there are inequalities in access to public services, but these are not mainly due to differentiation between particular socio-economic position, the code should be “4” (equal). The situation could of course vary by type of public service, such that a socio-economic group is denied access to some basic public services but not others. Please base your response on whether access to most of the aforementioned services are distributed equally or unequally.

RESPONSES:

0: Extreme. Because of poverty or low income, 75 percent (percent) or more of the population lack access to basic public services of good quality.

1: Unequal. Because of poverty or low income, 25 percent (percent) or more of the population lack access to basic public services of good quality.

2: Somewhat Equal. Because of poverty or low income, 10 to 25 percent (percent) of the population lack access to basic public services of good quality.

3: Relatively Equal. Because of poverty or low income, 5 to 10 percent (percent) of the population lack access to basic public services of good quality.

4: Equal. Because of poverty or low income, less than 5 percent (percent) of the population lack access to basic public services of good quality.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 9-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see V-Dem Methodology).

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Are state business opportunities equally available to qualified individuals or firms regardless of an individual's association with a political group?

CLARIFICATION: State business opportunities refer to the ability to compete for or receive a public procurement contract, to partner with the government in public-private partnerships, etc. A political group is defined as those who are affiliated with a particular political party or candidate, or a group of parties/candidates that can be distinguished from others in terms of access to power. Responses should not reflect which party controls the legislature and executive.

RESPONSES:

0: Extreme. Because of their political group affiliation 75 percent (percent) or more of the population, even if qualified, lack access to state business opportunities.

1: Unequal. Because of their political group affiliation 25 percent (percent) or more of the population, even if qualified, lack access to state business opportunities.

2: Somewhat Equal. Because of their political group affiliation 10 to 25 percent (percent) of the population, even if qualified, lack access to state business opportunities.

3: Relatively Equal. Because of their political group affiliation 5 to 10 percent (percent) of the population, even if qualified, lack access to state business opportunities.

4: Equal. Because of their political group affiliation less than 5 percent (percent) of the population, even if qualified, lack equal access to state business opportunities.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 9-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see V-Dem Methodology).

2.2.4.19 Power distributed by urban-rural location (v2pepwrgeo)

Long tag: vdem_coder_level_v2pepwrgeo

Original tag: v2pepwrgeo

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Rachel Sigman

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Is political power distributed according to urban-rural location?

CLARIFICATION: Urban areas are defined as an area that meets the following conditions: population density exceeds a threshold of 150 persons per square kilometer, there is access to a sizeable settlement of 50,000 people or more within some reasonable travel time, for example 60 minutes by road. (World Development Report, 2009: 54)

RESPONSES:

0: People living in urban areas have a near-monopoly on political power.

1: People living in urban areas have a dominant hold on political power. Those living in rural areas have only marginal influence.

2: People living in urban areas have much more political power but those living in rural areas have some areas of influence.

3: People living in urban areas have somewhat more political power than those living in rural areas.

4: People living in any area have roughly equal political power or people living in rural areas have more access to political power than those in urban areas.

5: People living in rural areas have much more political power but those living in urban areas have some areas of influence.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 9-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see V-Dem Methodology).

YEARS: 1900-2022

CONVERGENCE: Model parameters with convergence issues: universal thresholds.

2.2.5 V-Dem Indicators - Civil Society

Instructions to the coders (as shown in the surveys)

Civil society organization:

The following set of questions focus on civil society organizations (CSOs). These include interest groups, labor unions, religiously inspired organizations (if they are engaged in civic or political activities), social movements, professional associations, and classic non-governmental organizations (NGOs), but *not* businesses, political parties, government agencies, or religious organizations that are primarily focused on spiritual practices. A CSO must also be at least nominally independent of government and economic institutions.

Civil society organization – Historical clarification: The following set of questions focus on civil society organizations (CSOs). These include interest groups, labor unions, religiously inspired organizations (if they are engaged in civic or political activities), social movements, professional associations, and classic non-governmental organizations (NGOs), but not businesses, political parties, government agencies, or religious organizations that are primarily focused on spiritual practices. A CSO must also be at least nominally independent of government and economic institutions.

If no CSOs exist at all for a particular time period, code the following relevant questions as giving the "lowest score" (indicating, for instance, strong repression or no consultation, a 0).

Religious organizations: In this section, we ask two questions regarding religious organizations. These may be religiously inspired civil society organizations (CSOs) or organizations whose purpose

is primarily spiritual.

2.2.5.1 CSO anti-system movement character (v2csanmvch)

Long tag: vdem_coder_level_v2csanmvch

Original tag: v2csanmvch

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Michael Bernhard

ADDITIONAL VERSIONS: *_nr

QUESTION: How would you characterize the anti-system movement(s) identified in the previous question?

CLARIFICATION: Check all that apply.

RESPONSES:

0: Works through legal channels, for the most part. (0=No, 1=Yes) [v2csanmvch_0]

1: Participates in elections. (0=No, 1=Yes) [v2csanmvch_1]

2: Works through a mix of legal and extra-legal channels. (0=No, 1=Yes) [v2csanmvch_2]

3: Insurrectionary. (0=No, 1=Yes) [v2csanmvch_3]

4: Democratic. Perceived by most disinterested observers as willing to play by the rules of the democratic game, willing to respect constitutional provisions or electoral outcomes, and willing to relinquish power (under democratic auspices). (0=No, 1=Yes) [v2csanmvch_4]

5: Anti-democratic. Perceived by most disinterested observers as unwilling to play by the rules of the democratic game, not willing to respect constitutional provisions or electoral outcomes, and/or not willing to relinquish power (under democratic auspices). (0=No, 1=Yes) [v2csanmvch_5]

6: Leftist, socialist, communist. (0=No, 1=Yes) [v2csanmvch_6]

7: Rightist, conservative, party of order. (0=No, 1=Yes) [v2csanmvch_7]

8: Ethnolinguistic, tribe, kinship, clan. (0=No, 1=Yes) [v2csanmvch_8]

9: Separatist or autonomist. (0=No, 1=Yes) [v2csanmvch_9]

10: Religious. (0=No, 1=Yes) [v2csanmvch_10]

11: Paramilitary. (0=No, 1=Yes) [v2csanmvch_11]

12: Heavily engaged in criminal activity, *e.g.*, narcotics, bootlegging, illegal exploitation of natural resources, extortion, kidnapping. (0=No, 1=Yes) [v2csanmvch_12]

SCALE: Series of dichotomous scales.

ANSWER-TYPE: Multiple-selection.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Mean.

2.2.5.2 CSO anti-system movements (v2csantimv)

Long tag: vdem_coder_level_v2csantimv

Original tag: v2csantimv

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Michael Bernhard

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Among civil society organizations, are there anti-system opposition movements?

CLARIFICATION: An anti-system opposition movement is any movement — peaceful or armed — that is based in the country (not abroad) and is organized in opposition to the current political system. That is, it aims to change the polity in fundamental ways, *e.g.*, from

democratic to autocratic (or vice-versa), from capitalist to communist (or vice-versa), from secular to fundamentalist (or vice-versa). This movement may be linked to a political party that competes in elections but it must also have a "movement" character, which is to say a mass base and an existence separate from normal electoral competition.

If there are several movements, please answer in a general way about the relationship of those movements to the regime.

RESPONSES:

0: No, or very minimal. Anti-system movements are practically nonexistent.

1: There is only a low-level of anti-system movement activity but it does not pose much of a threat to the regime.

2: There is a modest level of anti-system movement activity, posing some threat to the regime.

3: There is a high level of anti-system movement activity, posing substantial threat to the regime.

4: There is a very high level of anti-system movement activity, posing a real and present threat to the regime.

ORDERING: If coded "0", skip the following questions focused on anti-system movements.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

2.2.5.3 CSO consultation (v2cscnsult)

Long tag: vdem_coder_level_v2cscnsult

Original tag: v2cscnsult

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Michael Bernhard

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Are major civil society organizations (CSOs) routinely consulted by policymakers on policies relevant to their members?

RESPONSES:

0: No. There is a high degree of insulation of the government from CSO input. The government may sometimes enlist or mobilize CSOs after policies are adopted to sell them to the public at large. But it does not often consult with them in formulating policies.

1: To some degree. CSOs are but one set of voices that policymakers sometimes take into account.

2: Yes. Important CSOs are recognized as stakeholders in important policy areas and given voice on such issues. This can be accomplished through formal corporatist arrangements or through less formal arrangements.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

2.2.5.4 CSO entry and exit (v2cseeorgs)

Long tag: vdem_coder_level_v2cseeorgs

Original tag: v2cseeorgs

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Michael Bernhard

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: To what extent does the government achieve control over entry and exit by civil society organizations (CSOs) into public life?

RESPONSES:

0: Monopolistic control. The government exercises an explicit monopoly over CSOs. The only organizations allowed to engage in political activity such as endorsing parties or politicians, sponsoring public issues forums, organizing rallies or demonstrations, engaging in strikes, or publicly commenting on public officials and policies are government-sponsored organizations. The government actively represses those who attempt to defy its monopoly on political activity.

1: Substantial control. The government licenses all CSOs and uses political criteria to bar organizations that are likely to oppose the government. There are at least some citizen-based organizations that play a limited role in politics independent of the government. The government actively represses those who attempt to flout its political criteria and bars them from any political activity.

2: Moderate control. Whether the government ban on independent CSOs is partial or full, some prohibited organizations manage to play an active political role. Despite its ban on organizations of this sort, the government does not or cannot repress them, due to either its weakness or political expedience.

3: Minimal control. Whether or not the government licenses CSOs, there exist constitutional provisions that allow the government to ban organizations or movements that have a history of anti-democratic action in the past (*e.g.* the banning of neo-fascist or communist organizations in the Federal Republic of Germany). Such banning takes place under strict rule of law and conditions of judicial independence.

4: Unconstrained. Whether or not the government licenses CSOs, the government does not impede their formation and operation unless they are engaged in activities to violently overthrow the government.

SCALE: Ordinal, converted to interval by the measurement model.

2.2.5.7 CSO repression (v2csreprss)

Long tag: vdem_coder_level_v2csreprss

Original tag: v2csreprss

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Michael Bernhard

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Does the government attempt to repress civil society organizations (CSOs)?

RESPONSES:

0: Severely. The government violently and actively pursues all real and even some imagined members of CSOs. They seek not only to deter the activity of such groups but to effectively liquidate them. Examples include Stalinist Russia, Nazi Germany, and Maoist China.

1: Substantially. In addition to the kinds of harassment outlined in responses 2 and 3 below, the government also arrests, tries, and imprisons leaders of and participants in oppositional CSOs who have acted lawfully. Other sanctions include disruption of public gatherings and violent sanctions of activists (beatings, threats to families, destruction of valuable property). Examples include Mugabe's Zimbabwe, Poland under Martial Law, Serbia under Milosevic.

2: Moderately. In addition to material sanctions outlined in response 3 below, the government also engages in minor legal harassment (detentions, short-term incarceration) to dissuade CSOs from acting or expressing themselves. The government may also restrict the scope of their actions through measures that restrict association of civil society organizations with each other or political parties, bar civil society organizations from taking certain actions, or block international contacts. Examples include post-Martial Law Poland, Brazil in the early 1980s, the late Franco period in Spain.

3: Weakly. The government uses material sanctions (fines, firings, denial of social services) to deter oppositional CSOs from acting or expressing themselves. They may also use burdensome registration or incorporation procedures to slow the formation of new civil society organizations and sidetrack them from engagement. The government may also organize Government Organized Movements or NGOs (GONGOs) to crowd out independent organizations. One example would be Singapore in the post-Yew phase or Putin's Russia.

4: No. Civil society organizations are free to organize, associate, strike, express themselves, and to criticize the government without fear of government sanctions or harassment.

SCALE: Ordinal, converted to interval by the measurement model.

NOTES: For reasons of consistency, as of December 2014, responses to this question are reversed so that the least democratic response is "0" and the most democratic is "4".

DATA RELEASE: 1-13.

2.2.5.8 Religious organization consultation (v2csrlgcon)

Long tag: vdem_coder_level_v2csrlgcon

Original tag: v2csrlgcon

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Michael Coppedge

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Are major religious organizations routinely consulted by policymakers on policies relevant to their members?

RESPONSES:

0: No. There is a high degree of insulation of the government from input from religious organizations. The government may sometimes enlist or mobilize religious organizations after policies are adopted to sell them to the public at large. But typically, it does not consult with them in formulating policies.

1: To some degree. Religious organizations are but one set of voices that policymakers sometimes take into account.

2: Yes. Important religious organizations are recognized as stakeholders in important policy areas and given voice on such issues. This can be accomplished through formal corporatist arrangements or through less formal arrangements.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

2.2.5.10 CSO structure (v2csstruc)

Long tag: vdem_coder_level_v2csstruc

Original tag: v2csstruc

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Michael Bernhard

ADDITIONAL VERSIONS: *_nr

QUESTION: Civil societies inevitably involve a mix of larger and smaller organizations. Please characterize the relative influence of large mass constituency civil society organizations (CSOs) versus smaller, more local, or narrowly construed CSOs.

RESPONSES:

0: The state does not allow autonomous CSOs. (0=No, 1=Yes) [v2csstruc_0]

1: Large encompassing organizations dominate. The government and CSOs are linked formally through a corporatist system of interest intermediation; or, due to historical circumstances, particular large CSOs are highly influential. The voice of such organizations is recognized by the government and is accorded special weight by policymakers. (0=No, 1=Yes) [v2csstruc_1]

2: Neither large encompassing nor small CSOs dominate. Influence is contingent on circumstances. Organizations, both large and small, contend with one another to have their voice considered by policymakers. (0=No, 1=Yes) [v2csstruc_2]

3: Small CSOs dominate. Many small organizations contend with one another to have their voices heard by policymakers. (0=No, 1=Yes) [v2csstruc_3]

SCALE: Series of dichotomous scales.

2.2.6 V-Dem Indicators - Deliberation

Instructions to the coders (as shown in the surveys)

Deliberation:

The following questions address the deliberative or non-deliberative nature of a country's politics, with particular focus on elite levels. Some of these questions focus on the quality of discourse and others focus on public policies.

2.2.6.1 Common good (v2dlcommon)

Long tag: vdem_coder_level_v2dlcommon

Original tag: v2dlcommon

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Michael Coppedge, John Gerring, Staffan Lindberg

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: When important policy changes are being considered, to what extent do political elites justify their positions in terms of the common good?

CLARIFICATION: Because discourse varies greatly from person to person, base your answer on the style that is most typical of prominent national political leaders.

RESPONSES:

0: Little or no justification in terms of the common good is usually offered.

1: Specific business, geographic, group, party, or constituency interests are for the most part offered as justifications.

2: Justifications are for the most part a mix of specific interests and the common good and it is impossible to say which justification is more common than the other.

3: Justifications are based on a mixture of references to constituency/party/group interests and on appeals to the common good.

4: Justifications are for the most part almost always based on explicit statements of the common good for society, understood either as the greatest good for the greatest number or as helping the least advantaged in a society.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

2.2.6.2 Range of consultation (v2dlconstl)

Long tag: vdem_coder_level_v2dlconstl

Original tag: v2dlconstl

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Michael Coppedge, John Gerring, Staffan Lindberg

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: When important policy changes are being considered, how wide is the range of consultation at *elite levels*?

CLARIFICATION: Because practices vary greatly from policy to policy, base your answer on the style that is most typical of policymaking.

RESPONSES:

0: No consultation. The leader or a very small group (*e.g.* military council) makes authoritative decisions on their own.

1: Very little and narrow. Consultation with only a narrow circle of loyal party/ruling elites.

2: Consultation includes the former plus a larger group that is loyal to the government, such as the ruling party's or parties' local executives and/or women, youth and other branches.

3: Consultation includes the former plus leaders of other parties.

4: Consultation includes the former plus a select range of society/labor/business representatives.

5: Consultation engages elites from essentially all parts of the political spectrum and all politically relevant sectors of society and business.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

2.2.6.3 Respect counterarguments (v2dlcountr)

Long tag: vdem_coder_level_v2dlcountr

Original tag: v2dlcountr

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Michael Coppedge, John Gerring, Staffan Lindberg

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: When important policy changes are being considered, to what extent do political elites acknowledge and respect counterarguments?

CLARIFICATION: Because discourse varies greatly from person to person, base your answer on the style that is most typical of prominent national political leaders.

RESPONSES:

- 0: Counterarguments are not allowed or if articulated, punished.
- 1: Counterarguments are allowed at least from some parties, but almost always are ignored.
- 2: Elites tend to acknowledge counterarguments but then explicitly degrade them by making a negative statement about them or the individuals and groups that propose them.
- 3: Elites tend to acknowledge counterarguments without making explicit negative or positive statements about them.
- 4: Elites almost always acknowledge counterarguments and explicitly value them, even if they ultimately reject them for the most part.
- 5: Elites almost always acknowledge counterarguments and explicitly value them, and frequently also even accept them and change their position.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

2.2.6.4 Particularistic or public goods (v2dlencmps)

Long tag: vdem_coder_level_v2dlencmps

Original tag: v2dlencmps

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Michael Coppedge, John Gerring, Staffan Lindberg

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Considering the profile of social and infrastructural spending in the national budget, how *quot*;particularistic*quot*; or *quot*;public goods*quot*; are most expenditures?

CLARIFICATION: Particularistic spending is narrowly targeted on a specific corporation, sector, social group, region, party, or set of constituents. Such spending may be referred to as *quot*;pork*quot*;, *quot*;clientelistic*quot*;, or *quot*;private goods*quot*;

Public-goods spending is intended to benefit all communities within a society, though it may be means-tested so as to target poor, needy, or otherwise underprivileged constituents. The key point is that all who satisfy the means-test are allowed to receive the benefit.

Your answer should consider the entire budget of social and infrastructural spending. We are interested in the relative value of particularistic and public-goods spending, not the number of bills or programs that fall into either category.

RESPONSES:

- 0: Almost all of the social and infrastructure expenditures are particularistic.
- 1: Most social and infrastructure expenditures are particularistic, but a significant portion (*e.g.* 1/4 or 1/3) is public-goods.
- 2: Social and infrastructure expenditures are evenly divided between particularistic and public-goods programs.
- 3: Most social and infrastructure expenditures are public-goods but a significant portion (*e.g.*, 1/4 or 1/3) is particularistic.
- 4: Almost all social and infrastructure expenditures are public-goods in character. Only a small portion is particularistic.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

YEARS: 1789-2022

CONVERGENCE: Model parameters with convergence issues: universal thresholds.

2.2.6.5 Engaged society (v2dlengage)

Long tag: vdem_coder_level_v2dlengage

Original tag: v2dlengage

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Michael Coppedge, John Gerring, Staffan Lindberg

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: When important policy changes are being considered, how wide and how independent are public deliberations?

CLARIFICATION: This question refers to deliberation as manifested in discussion, debate, and other public forums such as popular media.

RESPONSES:

0: Public deliberation is never, or almost never allowed.

1: Some limited public deliberations are allowed but the public below the elite levels is almost always either unaware of major policy debates or unable to take part in them.

2: Public deliberation is not repressed but nevertheless infrequent and non-elite actors are typically controlled and/or constrained by the elites.

3: Public deliberation is actively encouraged and some autonomous non-elite groups participate, but it is confined to a small slice of specialized groups that tends to be the same across issue-areas.

4: Public deliberation is actively encouraged and a relatively broad segment of non-elite groups often participate and vary with different issue-areas.

5: Large numbers of non-elite groups as well as ordinary people tend to discuss major policies among themselves, in the media, in associations or neighborhoods, or in the streets. Grass-roots deliberation is common and unconstrained.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

2.2.6.6 Reasoned justification (v2dlreason)

Long tag: vdem_coder_level_v2dlreason

Original tag: v2dlreason

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Michael Coppedge, John Gerring, Staffan Lindberg

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: When important policy changes are being considered, *i.e.* before a decision has been made, to what extent do political elites give public and reasoned justifications for their positions?

CLARIFICATION: Because discourse varies greatly from person to person, base your answer on the style that is most typical of prominent national political leaders.

RESPONSES:

0: No justification. Elites almost always only dictate that something should or should not be done, but no reasoning about justification is given. For example, quot;We must cut

spending.quot;

1: Inferior justification. Elites tend to give reasons why someone should or should not be for doing or not doing something, but the reasons tend to be illogical or false, although they may appeal to many voters. For example, quot;We must cut spending. The state is inefficient.quot; [The inference is incomplete because addressing inefficiencies would not necessarily reduce spending and it might undermine essential services.]

2: Qualified justification. Elites tend to offer a single simple reason justifying why the proposed policies contribute to or detract from an outcome. For example, quot;We must cut spending because taxpayers cannot afford to pay for current programs.quot;

3: Sophisticated justification. Elites tend to offer more than one or more complex, nuanced and complete justification. For example, quot;We must cut spending because taxpayers cannot afford to pay for current government programs. Raising taxes would hurt economic growth, and deficit spending would lead to inflation.quot;

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

2.2.6.7 Means-tested vs. universalistic (v2dlunivl)

Long tag: vdem_coder_level_v2dlunivl

Original tag: v2dlunivl

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Michael Coppedge, John Gerring, Staffan Lindberg

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: How many welfare programs are means-tested and how many benefit all (or virtually all) members of the polity?

CLARIFICATION: A means-tested program targets poor, needy, or otherwise underprivileged constituents. Cash-transfer programs are normally means-tested.

A universal (non-means tested) program potentially benefits everyone. This includes free education, national health care schemes, and retirement programs. Granted, some may benefit more than others from these programs (*e.g.*, when people with higher salaries get higher unemployment benefits). The key point is that practically everyone is a beneficiary, or potential beneficiary.

The purpose of this question is not to gauge the size of the welfare state but rather its quality. So, your answer should be based on whatever programs exist.

RESPONSES:

0: There are no, or extremely limited, welfare state policies (education, health, retirement, unemployment, poverty programs).

1: Almost all of the welfare state policies are means-tested.

2: Most welfare state policies means-tested, but a significant portion (*e.g.* 1/4 or 1/3) is universalistic and potentially benefits everyone in the population.

3: The welfare state policies are roughly evenly divided between means-tested and universalistic.

4: Most welfare state policies are universalistic, but a significant portion (*e.g.*, 1/4 or 1/3) are means-tested.

5: Almost all welfare state policies are universal in character. Only a small portion is means-tested.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see

V-Dem Methodology).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1900-2022

2.2.7 V-Dem Indicators - Elections

Instructions to the coders (as shown in the surveys) Elections: Among national elections we distinguish elections to: (i) the lower or unicameral chamber of the legislature (including constituent or constitutional assemblies), (ii) the upper chamber of the legislature, and (iii) the presidency. For present purposes an executive who is elected by a legislature is considered a *prime minister*, not a president. In order to be considered a *president*, an executive must, under ordinary circumstances, be chosen directly by the electorate (perhaps mediated by an electoral college).

Non-election specific coding: The following questions are not election-specific and should be coded for every year from 1900 (or when applicable) to the present.

Election specific questions: The following questions pertain to specific national elections. The date of each election is pre-coded. In cases where more than one election is held on the same day(s), the questions in this section are for all elections taking place on that date. If you have coded for V-Dem in the past, your previous scores will be displayed in the survey. You are welcome to revise previously submitted scores in all surveys. For this section, we kindly ask you make sure that you have coded all election years.

Election specific questions – Historical clarification: The following questions pertain to specific national elections. National elections include elections to the presidency (if applicable) and legislature (lower and upper house, whatever applies), whether direct or indirect, as well as constituent assembly elections. It does not include other elections, *e.g.*, subnational elections, plebiscites, initiatives, referendums, or by-elections. The date of each election is pre-coded. In cases where more than one election is held on the same day(s), the questions in this section are for all elections taking place on that date."

Subnational elections and offices: This section of the survey asks a small number of questions about *subnational* elections and offices. You will be instructed to identify two subnational levels, referred to as "regional government" and "local government". Questions in this section should be answered for every year, rather than for specific elections.

Lower chamber election: The following questions pertain to specific lower chamber or unicameral legislative elections. The dates of these elections have been pre-coded.

Executive and legislative versions of Election specific variables

- In order to subset election specific variables for executive elections only (previously *_ex) – keep only those observations where v2xel_elecpres is 1.
- In order to subset election specific variables for legislative elections only (previously *_leg) – keep only those observations where v2xel_elecparl is 1.

2.2.7.1 Election losers accept results (v2elaccept)

Long tag: vdem_coder_level_v2elaccept

Original tag: v2elaccept

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Staffan I. Lindberg

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Did losing parties and candidates accept the result of this national election within three months?

RESPONSES:

0: None. None of the losing parties or candidates accepted the results the election, or all opposition was banned.
1: A few. Some but not all losing parties or candidates accepted the results but those who constituted the main opposition force did not.
2: Some. Some but not all opposition parties or candidates accepted the results but it is unclear whether they constituted a major opposition force or were relatively insignificant.
3: Most. Many but not all opposition parties or candidates accepted the results and those who did not had little electoral support.
4: All. All parties and candidates accepted the results.
SCALE: Ordinal, converted to interval by the measurement model.
DATA RELEASE: 1-13.

2.2.7.2 Election assume office (v2elasmoff)

Long tag: vdem_coder_level_v2elasmoff

Original tag: v2elasmoff

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Staffan I. Lindberg

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Following this national election, did winners assume office according to prescribed constitutional rules and norms?

RESPONSES:

0: No. The official winner of the election was prevented from assuming office by *unconstitutional* means.

1: Partially. The official winner/winning party or largest vote-getter was forced at least in part by unconstitutional means to share power, or delay assuming power for more than 6 months.

2: Yes. Constitutional rules and norms were followed and the official winner/winning party or largest vote-getter assumed office accordingly (or continued in office).

SCALE: Ordinal, converted to interval by the measurement model.

NOTES: The question text between contemporary and historical differ in inclusion of "within 12 months of the election". In contemporary it is excluded while included in historical.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

DATE SPECIFIC: Election-specific dates (v2eltype).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

2.2.7.3 Election boycotts (v2elboycot)

Long tag: vdem_coder_level_v2elboycot

Original tag: v2elboycot

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Staffan I. Lindberg

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: In this national election, did any registered opposition candidates or parties boycott?

CLARIFICATION: A boycott is a deliberate and public refusal to participate in an election by a candidate or party who is eligible to participate.

RESPONSES:

0: Total. All opposition parties and candidates boycotted the election.

1: Significant. Some but not all opposition parties or candidates boycotted but they constituted a major opposition force.

2: Ambiguous. Some but not all opposition parties or candidates boycotted but it is unclear whether they would have constituted a major electoral force.

3: Minor. A few opposition parties or candidates boycotted and they were relatively insignificant ones.

4: Nonexistent. No parties or candidates boycotted the elections.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

DATE SPECIFIC: Election-specific dates (v2eltype).

2.2.7.4 Disclosure of campaign donations (v2eldonate)

Long tag: vdem_coder_level_v2eldonate

Original tag: v2eldonate

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Staffan I. Lindberg

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Are there disclosure requirements for donations to national election campaigns?

RESPONSES:

0: No. There are no disclosure requirements.

1: Not really. There are some, possibly partial, disclosure requirements in place but they are not observed or enforced most of the time.

2: Ambiguous. There are disclosure requirements in place, but it is unclear to what extent they are observed or enforced.

3: Mostly. The disclosure requirements may not be fully comprehensive (some donations not covered), but most existing arrangements are observed and enforced.

4: Yes. There are comprehensive requirements and they are observed and enforced almost all the time.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

2.2.7.5 EMB autonomy (v2elembaut)

Long tag: vdem_coder_level_v2elembaut

Original tag: v2elembaut

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Staffan I. Lindberg

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Does the Election Management Body (EMB) have autonomy from government to apply election laws and administrative rules impartially in national elections?

CLARIFICATION: The EMB refers to whatever body (or bodies) is charged with administering national elections.

RESPONSES:

0: No. The EMB is controlled by the incumbent government, the military, or other *de facto* ruling body.

1: Somewhat. The EMB has some autonomy on some issues but on critical issues that influence the outcome of elections, the EMB is partial to the *de facto* ruling body.

2: Ambiguous. The EMB has some autonomy but is also partial, and it is unclear to what extent this influences the outcome of the election.

3: Almost. The EMB has autonomy and acts impartially almost all the time. It may be influenced by the *de facto* ruling body in some minor ways that do not influence the outcome of elections.

4: Yes. The EMB is autonomous and impartially applies elections laws and administrative rules.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

PROJECT MANAGER(S): Staffan I. Lindberg

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Does the Election Management Body (EMB) have sufficient staff and resources to administer a well-run national election?

CLARIFICATION: The EMB refers to whatever body (or bodies) is charged with administering national elections.

RESPONSES:

0: No. There are glaring deficits in staff, financial, or other resources affecting the organization across the territory.

1: Not really. Deficits are not glaring but they nonetheless seriously compromised the organization of administratively well-run elections in many parts of the country.

2: Ambiguous. There might be serious deficiencies compromising the organization of the election but it could also be a product of human errors and co-incidence or other factors outside the control of the EMB.

3: Mostly. There are partial deficits in resources but these are neither serious nor widespread.

4: Yes. The EMB has adequate staff and other resources to administer a well-run election.

SCALE: Ordinal, converted to interval by the measurement model.
DATA RELEASE: 1-13.

2.2.7.7 Subnational elections free and fair (v2elffelr)

Long tag: vdem_coder_level_v2elffelr

Original tag: v2elffelr

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Kelly McMann

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Taking all aspects of the pre-election period, election day, and the post-election process into account, would you consider subnational elections (regional and local, as previously identified) to be free and fair on average?

CLARIFICATION: This question refers to subnational levels that have elected offices and elections. It does not refer to subnational levels without elected offices and elections. If there were no subnational elections in any of the years covered in this survey, choose option 5.

quot;Free and fairquot; refers to all aspects of the election process *except* the extent of suffrage (by law). Thus, a free and fair election may occur even if the law excludes significant groups (we measure that issue separately).

RESPONSES:

0: No, not at all. The elections were fundamentally flawed and the official results had little if anything to do with the 'will of the people' (who won office).

1: Not really. While the elections allowed for some competition, the irregularities in the end affected the outcome of the elections (who won office).

2: Ambiguous. There was substantial competition and freedom of participation but there were also significant irregularities. It is hard to determine whether the irregularities affected the outcome or not (who won office).

3: Yes, somewhat. There were deficiencies and some degree of fraud and irregularities but these did not in the end affect the outcome (who won office).

4: Yes. There was some amount of human error and logistical restrictions but these were largely unintentional and without significant consequences.

SCALE: Ordinal, converted to interval by the measurement model.

NOTES: As of December 2014, the former category quot;5quot; is recoded as a separate variable (v2elffelrbin).

DATA RELEASE: 3-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CLEANING: Set to missing when v2elffelrbin_ord is 0.

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

2.2.7.8 Subnational elections held (v2elffelrbin)

Long tag: vdem_coder_level_v2elffelrbin

Original tag: v2elffelrbin

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Kelly McMann

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Are subnational elections held?

RESPONSES:

0: No.

1: Yes.

SCALE: Dichotomous, converted to interval by the measurement model.

NOTES: As of December 2014, the former category "5" from variable v2elffelr is recoded as a separate variable (v2elffelrbin). If a coder chose the 5th category in the original question, it receives 0 in the new "v2elffelrbin" variable (corresponding to the answer, no, there were no subnational elections); otherwise it receives 1 (yes, there are subnational elections held). The resulting series of 0-1 country-coder time-series is run in the measurement model, which calculates the final value of v2elffelrbin while taking into account background coder characteristics.

DATA RELEASE: 3-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see V-Dem Methodology).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

2.2.7.11 Election government intimidation (v2elintim)

Long tag: vdem_coder_level_v2elintim

Original tag: v2elintim

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Staffan I. Lindberg

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: In this national election, were opposition candidates/parties/campaign workers subjected to repression, intimidation, violence, or harassment by the government, the ruling party, or their agents?

CLARIFICATION: Other types of clearly distinguishable civil violence, even if politically motivated, during the election period should *not* be factored in when scoring this indicator (it is dealt with separately).

RESPONSES:

0: Yes. The repression and intimidation by the government or its agents was so strong that the entire period was quiet.

1: Yes, frequent: There was systematic, frequent and violent harassment and intimidation of the opposition by the government or its agents during the election period.

2: Yes, some. There was periodic, not systematic, but possibly centrally coordinated — harassment and intimidation of the opposition by the government or its agents.

3: Restrained. There were sporadic instances of violent harassment and intimidation by the

government or its agents, in at least one part of the country, and directed at only one or two local branches of opposition groups.

4: None. There was no harassment or intimidation of opposition by the government or its agents, during the election campaign period and polling day.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

DATE SPECIFIC: Election-specific dates (v2eltype).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

CONVERGENCE: Model parameters with convergence issues: universal thresholds.

2.2.7.12 Election other voting irregularities (v2elirreg)

Long tag: vdem_coder_level_v2elirreg

Original tag: v2elirreg

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Staffan I. Lindberg

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: In this national election, was there evidence of other *intentional* irregularities by incumbent and/or opposition parties, and/or vote fraud?

CLARIFICATION: Examples include use of double IDs, intentional lack of voting materials, ballot-stuffing, misreporting of votes, and false collation of votes. This question does not refer to lack of access to registration, harassment of opposition parties, manipulations of the voter registry or vote-buying (dealt with in previous questions).

RESPONSES:

0: Yes. There were systematic and almost nationwide other irregularities.

1: Yes, some. There were non-systematic, but rather common other irregularities, even if only in some parts of the country.

2: Sporadic. There were a limited number of sporadic other irregularities, and it is not clear whether they were intentional or disfavored particular groups.

3: Almost none. There were only a limited number of irregularities, and many were probably unintentional or did not disfavor particular groups' access to participation.

4: None. There was no evidence of intentional other irregularities. Unintentional irregularities resulting from human error and/or natural conditions may still have occurred.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

DATE SPECIFIC: Election-specific dates (v2eltype).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

2.2.7.13 Local offices relative power (v2ellocpwr)

Long tag: vdem_coder_level_v2ellocpwr

Original tag: v2ellocpwr

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Kelly McMann

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: How would you characterize the relative power, in practice, of elected and non-elected offices at the local level?

CLARIFICATION: We are concerned with the relative power of local offices to *each other*, not the power of local offices relative to higher levels of government.

Please consider only major offices, such as the executive, assembly, and judiciary, *not* those of minor bureaucrats. (A body of government officials, such as an assembly or judiciary, counts as one office.)

An office is "subordinate" if its officeholders can be chosen and removed by another office or if its decisions can be blocked or modified by another office, but it cannot similarly constrain the other office.

RESPONSES:

0: All or nearly all elected offices are subordinate to non-elected offices at the local level.

1: Some elected offices are subordinate to non-elected offices at the local level.

2: Elected and non-elected offices are approximately equal in power at the local level.

3: Most non-elected offices are subordinate to elected offices at the local level.

4: All or nearly all non-elected offices are subordinate to elected offices at the local level.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CLEANING: Set to missing when v2ellocgov is 0

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

2.2.7.14 Elections multiparty (v2elmulpar)

Long tag: vdem_coder_level_v2elmulpar

Original tag: v2elmulpar

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Staffan I. Lindberg

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Was this national election multiparty?

RESPONSES:

0: No. No-party or single-party and there is no meaningful competition (includes situations where a few parties are legal but they are all *de facto* controlled by the dominant party).

1: Not really. No-party or single-party (defined as above) but multiple candidates from the same party and/or independents contest legislative seats or the presidency.

2: Constrained. At least one real opposition party is allowed to contest but competition is highly constrained — legally or informally.

3: Almost. Elections are multiparty in principle but either one main opposition party is prevented (*de jure* or *de facto*) from contesting, or conditions such as civil unrest (excluding natural disasters) prevent competition in a portion of the territory.

4: Yes. Elections are multiparty, even though a few marginal parties may not be permitted to contest (*e.g.* far-right/left extremist parties, anti-democratic religious or ethnic parties).

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Staffan I. Lindberg

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: In this national election, was the campaign period, election day, and post-election process free from other types (*not* by the government, the ruling party, or their agents) of violence related to the conduct of the election and the campaigns (but not conducted by the government and its agents)?

RESPONSES:

0: No. There was widespread violence between civilians occurring throughout the election period, or in an intense period of more than a week and in large swaths of the country. It resulted in a large number of deaths or displaced refugees.

1: Not really. There were significant levels of violence but not throughout the election period or beyond limited parts of the country. A few people may have died as a result, and some people may have been forced to move temporarily.

2: Somewhat. There were some outbursts of limited violence for a day or two, and only in a small part of the country. The number of injured and otherwise affected was relatively small.

3: Almost. There were only a few instances of isolated violent acts, involving only a few people; no one died and very few were injured.

4: Peaceful. No election-related violence between civilians occurred.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

DATE SPECIFIC: Election-specific dates (v2eltype).

2.2.7.20 Election voter registry (v2elrgstry)

Long tag: vdem_coder_level_v2elrgstry

Original tag: v2elrgstry

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Staffan I. Lindberg

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: In this national election, was there a reasonably accurate voter registry in place and was it used?

RESPONSES:

0: No. There was no registry, or the registry was not used.

1: No. There was a registry but it was fundamentally flawed (meaning 20percent or more of eligible voters could have been disenfranchised or the outcome could have been affected significantly by double-voting and impersonation).

2: Uncertain. There was a registry but it is unclear whether potential flaws in the registry had much impact on electoral outcomes.

3: Yes, somewhat. The registry was imperfect but less than 10percent of eligible voters may have been disenfranchised, and double-voting and impersonation could not have affected the results significantly.

4: Yes. The voter registry was reasonably accurate (less than 1percent of voters were affected by any flaws) and it was applied in a reasonable fashion.

SCALE: Ordinal, converted to interval by the measurement model.

2.2.7.24 Election vote buying (v2elvotbuy)

Long tag: vdem_coder_level_v2elvotbuy

Original tag: v2elvotbuy

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Staffan I. Lindberg

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: In this national election, was there evidence of vote and/or turnout buying?

CLARIFICATION: Vote and turnout buying refers to the distribution of money or gifts to individuals, families, or small groups in order to influence their decision to vote/not vote or whom to vote for. It does not include legislation targeted at specific constituencies, *i.e.*, "porkbarrel" legislation.

RESPONSES:

0: Yes. There was systematic, widespread, and almost nationwide vote/turnout buying by almost all parties and candidates.

1: Yes, some. There were non-systematic but rather common vote-buying efforts, even if only in some parts of the country or by one or a few parties.

2: Restricted. Money and/or personal gifts were distributed by parties or candidates but these offerings were more about meeting an ‘entry-ticket’ expectation and less about actual vote choice or turnout, even if a smaller number of individuals may also be persuaded.

3: Almost none. There was limited use of money and personal gifts, or these attempts were limited to a few small areas of the country. In all, they probably affected less than a few percent of voters.

4: None. There was no evidence of vote/turnout buying.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

2.2.8 V-Dem Indicators - The Executive

Instructions to the coders (as shown in the surveys)

Executive:

In this section, we distinguish between the head of state (HOS) and the head of government (HOG). The *head of state* is an individual or collective body that serves as the chief public representative of the country. Sometimes this is a largely ceremonial role, *e.g.* a monarch who reigns but does not rule, or a president whose powers are strictly circumscribed. The *head of government* is the chief officer(s) of the executive branch of government, typically presiding over a cabinet. In a parliamentary system, this is usually the prime minister. In a presidential system, this is usually the president, who then serves as both, head of state and head of government. In a typical semi-presidential system, the president serves as head of state and the prime minister serves as head of government.

These definitions are grounded in the *functions* that each office performs, as described above. Titles can be confusing. Do not assume, for example, that simply because an individual holds the title of "president" s/he is serving as the chief public representative of the country. Likewise, it may be that the *effective* head of state/head of government is someone other than the *official* head of state/head of government. In this instance, the following questions apply to the person who effectively wields this power. In some socialist systems, for example, the official head of state was a person within the state bureaucracy, but in practice the chief public representative of the country was the chairman of the communist party. It is the latter who is the "effective" head of state, and hence should be the focus of your answers. The same applies if the head of state/head of government is so old, sick or perhaps mentally disabled that s/he cannot perform his/her functions, which are instead performed by someone else. It is the latter person who is the effective head of state/head of government.

If you are considering a semi sovereign territory, such as a colony, an annexed territory or a member of the British Commonwealth, please answer the following questions with respect to the head of state and (if separate) the head of government who is located in the territory in question. Thus, in a typical British colony the governor-general—not the King/Queen of England—would be understood as the head of state. Likewise, in a British colony the local prime minister in the colony—not the prime minister in London—would be understood as the head of government.

In order to mitigate potential misunderstandings, the identities of the head of state and head of government for each country have been pre-coded for as many years as possible. Thus, when conducting your coding make sure to pay close attention to the names of these individuals, which you can see by clicking on the year grid for a particular year in the first question of this section, "HOS name." This is your key to what we mean by "head of state" or "head of government."

Note also that when the two functions are fused in the same office, we ask you to code only the head of state section of the survey. Any precoded years contain an orange triangle. This means that either the score or text and/or specific date have already been entered, so we are asking you only to add your confidence in the precoded rating; we do not want you to change the rating, as we need all the Country Experts to answer the subsequent questions for the same executives. If you feel strongly that the precoded information is wrong, please rate your confidence in the preloaded information and

then consult your V-Dem contact. You will have to rate confidence in all the available years in order to proceed to the next question.

In order to avoid spending time on short-lived executives, we have included only executives who held office for at least 100 days.

2.2.8.1 Executive bribery and corrupt exchanges (v2exbribe)

Long tag: vdem_coder_level_v2exbribe

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Jan Teorell

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: How routinely do members of the executive (the head of state, the head of government, and cabinet ministers), or their agents, grant favors in exchange for bribes, kickbacks, or other material inducements?

RESPONSES:

0: It is routine and expected.

1: It happens more often than not in dealings with the executive.

2: It happens but is unpredictable: those dealing with the executive find it hard to predict when an inducement will be necessary.

3: It happens occasionally but is not expected.

4: It never, or hardly ever, happens.

SCALE: Ordinal, converted to interval by the measurement model.

Original tag: v2excrptps

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Jan Teorell

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: How routinely do public sector employees grant favors in exchange for bribes, kickbacks, or other material inducements?

CLARIFICATION: When responding to this question, we would like to you think about a typical person employed by the public sector, excluding the military. If you think there are large discrepancies between branches of the public sector, between the national/federal and subnational/state level, or between the core bureaucracy and employees working with public service delivery, please try to average them out before stating your response.

RESPONSES:

0: Extremely common. Most public sector employees are systematically involved in petty but corrupt exchanges almost all the time.

1: Common. Such petty but corrupt exchanges occur regularly involving a majority of public employees.

2: Sometimes. About half or less than half of public sector employees engage in such exchanges for petty gains at times.

3: Scattered. A small minority of public sector employees engage in petty corruption from time to time.

4: No. Never, or hardly ever.

SCALE: Ordinal, converted to interval by the measurement model.

2.2.8.9 HOG proposes legislation in practice (v2exdfpphg)

Long tag: vdem_coder_level_v2exdfpphg

Original tag: v2exdfpphg

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Jan Teorell

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Does the head of government have the capacity, in practice, to propose legislation?

CLARIFICATION: By "propose legislation", we mean the introduction of legislative bills. The question refers to whether the head of government is considered to hold this power in practice, regardless of whether this is regulated by law and whether this power has been exercised or not.

RESPONSES:

0: Yes, in all policy areas, including some exclusive domains (where neither the legislature nor other bodies may initiate bills).

1: Yes, in all policy areas, but this power is shared with the legislature and perhaps with other bodies.

2: No. The head of government cannot propose legislation.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CLEANING: Set to missing when v2exhoshog is 1

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

2.2.8.11 HOG veto power in practice (v2exdfvthg)

Long tag: vdem_coder_level_v2exdfvthg

Original tag: v2exdfvthg

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Jan Teorell

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: If the head of government took actions to veto a piece of legislation, would he/she be likely to succeed?

CLARIFICATION: By "veto", we mean either a partial veto (concerning any parts of a bill) or package vetoes (concerning whole bills) of bills that have already been passed by the legislature. The question refers to whether the head of government is considered to hold this power in practice, regardless of whether this is regulated by law and whether this power has been exercised or not.

RESPONSES:

0: No.

1: Yes, but the legislature can override the veto by a simple majority vote (a vote of more than half of those voting).

2: Yes, but the legislature can override the veto by an absolute majority vote (a vote of more than half of the members of the legislature).

3: Yes, but the legislature can override the veto by a qualified/extraordinary majority vote (a super-majority — *e.g.*, 2/3 or 3/4 — of those voting).

4: Yes, with no possibility of override.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CLEANING: Set to missing when v2exhoshog is 1

2.2.8.13 HOG appoints cabinet in practice (v2exdjcbhg)

Long tag: vdem_coder_level_v2exdjcbhg

Original tag: v2exdjcbhg

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky,
Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Jan Teorell

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: In practice, does the head of government have the power to appoint — or is the approval of the head of government necessary for the appointment of — cabinet ministers?

CLARIFICATION: The question refers to whether the head of government is considered to hold this power in practice, regardless of whether this is regulated by law and whether this power has been exercised or not. If confirmation of the legislature is needed, this should be coded as such also when the HOG controls the majority of the legislature (quot;tacit consentquot;). Moreover, by the quot;legislaturequot; in this case, we mean either house of the legislature (in the case of bicameralism).

RESPONSES:

0: No.

1: Yes, but only with the tacit consent or explicit confirmation by the legislature.

2: Yes, without any need for confirmation by the legislature.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CLEANING: Set to missing when v2exhoshog is 1

YEARS: 1789-2022

CONVERGENCE: Model parameters with convergence issues: country-date latent trait estimates, universal thresholds, expert thresholds, main-country-coded thresholds.

2.2.8.14 HOG dissolution in practice (v2exdjdsgh)

Long tag: vdem_coder_level_v2exdjdsgh

Original tag: v2exdjdsgh

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky,
Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Jan Teorell

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: If the head of government took actions to dissolve the legislature, would he/she be likely to succeed?

CLARIFICATION: The question refers to whether the head of government is considered to hold this power in practice, regardless of whether this is regulated by law and whether this power has been exercised or not. By quot;dissolving the legislaturequot; we refer to the ability of the head of government to call a new election for the legislature.

RESPONSES:

0: No.

1: Yes, but not at his/her own discretion, only when prompted to as a response to specific

events (for example, after a certain number of votes of no confidence, or after a certain number of failed attempts to form a cabinet).

2: Yes, at his/her own discretion, but with restrictions (for example, by frequency, such as "once a year", by time point within term, such as "not within the last sixth months of the head of government's term", and by the requirement that the head of government must then himself/herself stand for election).

3: Yes, at his/her own discretion and without restrictions.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CLEANING: Set to missing when v2exhoshog is 1

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

2.2.8.15 Executive embezzlement and theft (v2exembez)

Long tag: vdem_coder_level_v2exembez

Original tag: v2exembez

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Jan Teorell

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: How often do members of the executive (the head of state, the head of government, and cabinet ministers), or their agents, steal, embezzle, or misappropriate public funds or other state resources for personal or family use?

RESPONSES:

0: Constantly. Members of the executive act as though all public resources were their personal or family property.

1: Often. Members of the executive are responsible stewards of selected public resources but treat the rest like personal property.

2: About half the time. Members of the executive are about as likely to be responsible stewards of selected public resources as they are to treat them like personal property.

3: Occasionally. Members of the executive are responsible stewards of most public resources but treat selected others like personal property.

4: Never, or hardly ever. Members of the executive are almost always responsible stewards of public resources and keep them separate from personal or family property.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

2.2.8.22 Strongest anti-regime preferences (v2regantireg)

Long tag: vdem_coder_level_v2regantireg

Original tag: v2regantireg

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Carl Henrik Knutsen

ADDITIONAL VERSIONS: *_nr

QUESTION: Which (one) group has the strongest anti-regime preferences/antipathy against the current regime, irrespective of the group's resources and capabilities for affecting the regime's hold on power?

CLARIFICATION: Consider only the anti-regime preferences of the actors in this group, and do not take into consideration the abilities of this group to actually affect regime survival and change. Hence, the group with the strongest anti-regime preferences need not be the most important opposition group. Both capable and incapable political actors may have strong anti-regime preferences and want to see the regime removed from power. We also remind that the group needs not be currently mobilized or explicitly engaged in high-level opposition activities to be counted; individuals may strongly resent a regime, without taking particular actions, in a given year.

One way to think about what pro-/anti-regime preferences mean, independently of ability to affect regime survival is: what would individuals hypothetically (honestly) answer if asked in a survey: "On a scale from 0-10, how pleased are you with the current political regime".

We remind you of the definition of a regime as the set of formal and/or informal rules that are essential for choosing political leaders and/or maintaining political leaders in power. Hence, we are not asking about which groups oppose the current government in a democracy (and who would vote for another party), but still accept the democratic rules as legitimate. We are, instead, asking about groups that want to see the wider political regime removed and replaced.

RESPONSES:

0: The aristocracy, including high status hereditary social groups and castes.

1: Agrarian elites, including rich peasants and large landholders.

2: Party elites (of the party or parties that control the executive).

3: Business elites.

4: Civil servants.
5: The military.
6: An ethnic or racial group(s).
7: A religious group(s).
8: Local elites, including chiefs.
9: Urban working classes, including labor unions.
10: Urban middle classes
11: Rural working classes (e.g., peasants).
12: Rural middle classes (e.g., family farmers)
13: A foreign government or colonial power.
DATA RELEASE: 11-13.
CROSS-CODER AGGREGATION: Mode.
quot;Tiesquot; between categories are resolved so that the corresponding category in v2regoppgroups with the highest mean for the same country-date is chosen.
CLEANING: Set to missing where v2regint is 0.
CITATION: *V-Dem Codebook* (see suggested citation at the top of this document).

2.2.8.24 Regime most important opposition group (v2regimpoppgroup)

Long tag: vdem_coder_level_v2regimpoppgroup

Original tag: v2regimpoppgroup

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Carl Henrik Knutsen

ADDITIONAL VERSIONS: *_nr

QUESTION: Which (one) group constitutes the greatest threat to the current regime?

CLARIFICATION: Choose the one group (among those you registered as opposition groups under the v2regoppgroups question) that is the most dangerous threat to the regime in a given year. That is, the group that could most strongly increase the chance that the regime loses power. The importance/danger associated with an opposition group will be affected both by its level of hostility towards the regime and its power resources/how capable it is of removing the regime should it try to do so. We remind you that groups need not be actively mobilized or explicitly engaged in high-level opposition activities to be counted; key opposition groups may include actors who oppose the regime and constitute a dormant threat to the regime, even though they do not take particular actions in a given year.

RESPONSES:

0: The aristocracy, including high status hereditary social groups and castes.

1: Agrarian elites, including rich peasants and large landholders.

2: Party elites (of the party or parties that control the executive).

3: Business elites.

4: Civil servants.

5: The military.

6: An ethnic or racial group(s).

7: A religious group(s).

8: Local elites, including chiefs.

9: Urban working classes, including labor unions.

10: Urban middle classes

11: Rural working classes (e.g., peasants).

12: Rural middle classes (e.g., family farmers)

13: A foreign government or colonial power.

2.2.8.25 Regime opposition groups (v2regoppgroups)

Long tag: vdem_coder_level_v2regoppgroups

Original tag: v2regoppgroups

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Carl Henrik Knutsen

ADDITIONAL VERSIONS: *_nr

QUESTION: Which groups include noteworthy opposition actors – that is, individuals (mobilized or not) who both want to and who could, under favorable circumstances, be able to remove the existing political regime?(Check all that apply.)

CLARIFICATION: Consider which group(s) include a significant share of individuals who both oppose the regime and pose a non-negligible threat to the regime (either mobilized or dormant). In other words, these individuals must both want to see the regime removed and, at least under hypothetical “favorable conditions”, be capable of removing the regime. Groups need not be actively mobilized or explicitly engaged in high-level opposition activities to be counted; opposition groups also include individuals who oppose the regime without taking particular actions, at the moment. We remind you of the definition of a regime as the set of formal and/or informal rules that are essential for choosing political leaders and/or maintaining political leaders in power. Hence, we are not asking about which groups oppose the current government in a democracy (and who would vote for another party), but still accept the democratic rules as legitimate. We are, instead, asking about groups that want to see the wider political regime removed and replaced.

RESPONSES:

0: The aristocracy, including high status hereditary social groups and castes. [v2regoppgroups_0]

1: Agrarian elites, including rich peasants and large landholders. [v2regoppgroups_1]

2: Party elites (of the party or parties that control the executive). [v2regoppgroups_2]

3: Business elites. [v2regoppgroups_3]

4: The state bureaucracy. [v2regoppgroups_4]

5: The military. [v2regoppgroups_5]

6: An ethnic or racial group(s). [v2regoppgroups_6]

7: A religious group(s). [v2regoppgroups_7]

8: Local elites, including customary chiefs. [v2regoppgroups_8]

9: Urban working classes, including labor unions. [v2regoppgroups_9]

10: Urban middle classes. [v2regoppgroups_10]

11: Rural working classes (e.g., peasants). [v2regoppgroups_11]

12: Rural middle classes (e.g., family farmers). [v2regoppgroups_12]

13: A foreign government or colonial power. [v2regoppgroups_13]

SCALE: Series of dichotomous scales.

ANSWER-TYPE: Multiple-selection.

DATA RELEASE: 11-13.

CROSS-CODER AGGREGATION: Mean.

CLEANING: Set to missing where v2regint is 0.

CITATION: *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1900-2022

DEFAULT DATE: Default date for this variable is January 1.

2.2.8.26 Explicit and active regime opposition groups (v2regoppgroupsact)

Long tag: vdem_coder_level_v2regoppgroupsact

Original tag: v2regoppgroupsact

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Sirianne Dahlum, Tore Wig

ADDITIONAL VERSIONS: *_nr

QUESTION: Which (if any) groups include a significant share of individuals who explicitly and actively mobilize against the regime in a particular year? (Check all that apply.)

CLARIFICATION: Consider which group(s) include a significant share of individuals who engage in active and explicit opposition to the regime to promote its removal. These actors make explicit statements of dissent from the regime, publicly voice their preference for regime change, and may possibly engage in other actions intended to further the removal of the regime such as anti-regime demonstrations, sit-ins, boycotts, strikes, the formation of anti-system parties, acts of sabotage, or armed rebellion. Please note that only years when anti-regime speech or activity occurs should be coded. In years when groups probably oppose the regime, but are not engaged in any explicit acts of opposition, the group should not be

selected. We remind you of the definition of a regime as the set of formal and/or informal rules that are essential for choosing political leaders and/or maintaining political leaders in power. Hence, we are not asking about which groups oppose the current government in a democracy (and who would vote for another party), but still accept the democratic rules as legitimate. We are, instead, asking about groups that want to see the wider political regime removed and replaced.

RESPONSES:

0: The aristocracy, including high status hereditary social groups and castes. [v2regoppgroupsact_0]

1: Agrarian elites, including rich peasants and large landholders. [v2regoppgroupsact_1]

2: Party elites (of the party or parties that control the executive). [v2regoppgroupsact_2]

2.2.8.27 Regime opposition groups size (v2regoppgroupssize)

Long tag: vdem_coder_level_v2regoppgroupssize

Original tag: v2regoppgroupssize

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Carl Henrik Knutsen

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: In total, how large is the share of the domestic adult (18+) population that are noteworthy opposition actors to the current political regime?

CLARIFICATION: Consider the sum total of all the groups (excepting foreign governments and colonial powers) entered in v2regoppgroups. Hence, your answer should take into account the total size/number of the actors that oppose the regime and pose a threat to the regime maintaining power.

We remind you that groups need not be actively mobilized or explicitly engaged in high-level opposition activities to be counted; key opposition groups may include actors who oppose the regime and constitute a dormant threat to the regime, even though they do not take particular actions in a given year.

Regarding the issue of individuals potentially belonging to more than one “opposition group”: Individuals should only be “counted”; once for the purpose of this question. For example, if the two relevant opposition groups are (4) civil servants, which total about 5percent of the population, and all of them belong to a particular ethnic group (6) also coded as a relevant, the overall total size of the opposition groups is still 5percent (presuming that there are no other members of that ethnic group who oppose the regime).

We remind you of the definition of a regime as the set of formal and/or informal rules that are essential for choosing political leaders and/or maintaining political leaders in power. Hence, we are not asking about which groups oppose the current government in a democracy (and who would vote for another party), but still accept the democratic rules as legitimate. We are, instead, asking about groups that want to see the wider political regime removed and replaced.

RESPONSES:

- 0: Extremely small (About 1 percent of the population or less)
- 1: Very small (Between 1 percent and 5 percent of the population)
- 2: Small (Between 5 percent and 15 percent)
- 3: Moderate (Between 15 percent and 30 percent)
- 4: Large (More than 30 percent)

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 11-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see V-Dem Methodology).

CLEANING: Set to missing where v2regint is 0.

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

2.2.8.29 Most powerful group in affecting regime duration and change (v2regpower)

Long tag: vdem_coder_level_v2regpower

Original tag: v2regpower

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Carl Henrik Knutsen

ADDITIONAL VERSIONS: *_nr

QUESTION: Irrespective of its stance toward the regime (pro-, anti-, or neutral), which one group is the most important for affecting the current regime's chances of staying in power?

CLARIFICATION: Here we ask you to disregard group preferences, and only consider a group's resources and capabilities vis-a-vis affecting regime survival. In other words, do not consider whether this group is pro-regime, anti-regime, or neutral to the regime. Take only into consideration the capabilities of this group to affect regime survival, if key members of the group were to hypothetically mobilize the group in an effort to remove the regime. Politically neutral, as well as pro- and anti-regime groups, may have ample resources and be capable of organizing coordinated action. As a result, all three types of groups may have great influence over regime survival and change.

RESPONSES:

0: The aristocracy, including high status hereditary social groups and castes.

1: Agrarian elites, including rich peasants and large landholders.

2: Party elites (of the party or parties that control the executive).

3: Business elites.

4: Civil servants.

5: The military.

6: An ethnic or racial group(s).

7: A religious group(s).

8: Local elites, including chiefs.

9: Urban working classes, including labor unions.

10: Urban middle classes

11: Rural working classes (e.g., peasants).

12: Rural middle classes (e.g., family farmers)

13: A foreign government or colonial power.

DATA RELEASE: 11-13.

CROSS-CODER AGGREGATION: Mode.

quot;Tiesquot; between categories are resolved so that the corresponding category in v2regsupgroups

with the highest mean for the same country-date is chosen.

CLEANING: Set to missing where v2regint is 0.

2.2.8.30 Strongest pro-regime preferences (v2regproreg)

Long tag: vdem_coder_level_v2regproreg

Original tag: v2regproreg

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Carl Henrik Knutsen

ADDITIONAL VERSIONS: *_nr

QUESTION: Which (one) group has the strongest pro-regime preferences, irrespective of the group's resources and capabilities for affecting the regime's hold on power?

CLARIFICATION: Consider only the pro-regime preferences of individuals in this group, and do not take into consideration the abilities of this group to actually affect regime survival. Hence, the group with the strongest pro-regime preferences need not be the most important support group.

One way to think about what pro-/anti-regime preferences means is: what would individuals hypothetically (honestly) answer if asked in a survey: "On a scale from 0-10, how pleased are you with the current political regime, with 10 indicating the strongest support." Select the group with the highest average score in this hypothetical survey.

We remind you of the definition of a regime as the set of formal and/or informal rules that are essential for choosing political leaders and/or maintaining political leaders in power. Hence, we are not asking about which groups oppose the current government in a democracy (and who would vote for another party), but still accept the democratic rules as legitimate. We are, instead, asking about groups that want to see the wider political regime removed and replaced.

RESPONSES:

0: The aristocracy, including high status hereditary social groups and castes.

1: Agrarian elites, including rich peasants and large landholders.

2: Party elites (of the party or parties that control the executive).

3: Business elites.

4: Civil servants.

5: The military.

6: An ethnic or racial group(s).

7: A religious group(s).

8: Local elites, including chiefs.

9: Urban working classes, including labor unions.

10: Urban middle classes

11: Rural working classes (e.g., peasants).

12: Rural middle classes (e.g., family farmers)

13: A foreign government or colonial power.

DATA RELEASE: 11-13.

CROSS-CODER AGGREGATION: Mode.

quot;Tiesquot; between categories are resolved so that the corresponding category in v2regsupgroups with the highest mean for the same country-date is chosen.

2.2.8.32 Regime support groups size (v2regsupgroupssize)

Long tag: vdem_coder_level_v2regsupgroupssize

Original tag: v2regsupgroupssize

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Carl Henrik Knutsen

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: In total, how large is the percentage share of the domestic adult (18+) population that belongs to the political regime's supporting groups?

CLARIFICATION: You should consider the sum of all the groups (excepting foreign governments and colonial powers) entered in v2regsupgroups. Hence, your answer should take into account the total size of the/those groups that are supportive of the regime, and, if it/they were to retract support would substantially increase the chance that the regime would lose power. Regarding the issue of overlapping identities, and one individual potentially belonging to more than one groups: Individuals should only be "counted" once; thus if the two relevant supporting groups are (4) civil servants, which total about 5percent, and all of them belong to a particular ethnic group (6) also coded as a relevant, the overall total size of the supporting groups is still 5percent (presuming that no other members of that ethnic group are essential for the regime staying in power).

RESPONSES:

0: Extremely small

(About 1 percent of the population or less; examples of this could include regimes supported by — and needing the support from — a handful of higher-rank military officers, or by only a royal council and a few hundred landowners)

1: Very small

(Between 1 percent and 5 percent of the population; examples of this could include regimes supported by — and needing the support from — higher ranking civil servants and the military, or by moderately sized business and agrarian elites)

2: Small

(Between 5 percent and 15 percent; examples of this could include regimes supported by — and needing the support from — relatively small ethnic groups, or by urban elites and the urban middle classes in predominantly rural societies)

3: Moderate

(Between 15 percent and 30 percent; examples of this could include regimes supported by — and needing the support from — moderately sized ethnic groups, by rural middle classes in rural societies, or by urban middle classes in urban societies)

4: Large

(More than 30 percent; examples of this could include regimes supported by — and needing the support from — large ethnic groups (and then not only the elites/leaders of such groups), or by rural working classes in rural societies.)

SCALE: Ordinal, converted to interval by the measurement model.

2.2.9 V-Dem Indicators - Legitimation

Instructions to the coders (as shown in the surveys)

Legitimation strategies:

Governments make legitimacy claims—provide justifications for the form of rule under which they govern. In the following section we are interested in the nature of the legitimacy claims made by the sitting government. Please note that the government's claims to legitimacy - their legitimation

strategies - are the object of inquiry here. We are not asking you to assess how ordinary people judge the legitimacy of their rulers. Do not assume that governments make legitimacy claims on only one basis. We are interested in multi-track and hybrid legitimation strategies. The regime is understood as a set of formal and/or informal rules that govern the choice of political leaders and their exercise of power. The government is understood as the chief executive along with the cabinet, ministries, and top civil servants.

2.2.9.1 Ideology (v2exl_legitideol)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Marcus Tannenberg

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: To what extent does the current government refer to the legal norms and regulations in order to justify the regime in place?

CLARIFICATION: This question pertains to legal norms and regulations as laid out for instance in the constitution regarding access to power (e.g. elections) as well as exercise of power (e.g. rule of law). Electoral regimes may score high on this question as well as non-electoral regimes that emphasize their rule-boundedness.

RESPONSES:

0: Not at all.

1: To a small extent.

2: To some extent but it is not the most important component.

3: To a large extent but not exclusively.

4: Almost exclusively.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 9-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see V-Dem Methodology).

CITATION: Tannenberg *et al.* (2021); Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1900-2022

2.2.10 V-Dem Indicators - The Judiciary

Instructions to the coders (as shown in the surveys)

Judiciary: This set of questions pertains to the judiciary. Before you proceed, we would like to clarify several general points. First, some questions below refer to the judiciary in general, whereas others ask for specific evaluations of particular courts or types of courts. Unless otherwise prompted, please consider the judiciary as a whole. This includes all courts in the judicial system at every level, both general jurisdiction courts and more specialized courts. However, with potentially one exception, it excludes specialized courts that are located outside the judiciary, *e.g.* an immigration court that lies inside the executive branch. The one potential exception is the peak constitutional court of the country. Please include this court in your considerations, even though it will be located outside of the judiciary in some countries. If the country you are coding is a federal state, please focus only on the federal judiciary and the federal government.

Seven of the questions about the judiciary concern high courts. By "high court" we are asking you to consider the country's constitutional court, if one exists. If there is no constitutional court, please consider the court of last resort for constitutional matters. If there is no court in your country with constitutional jurisdiction, please consider the highest ordinary court of the state.

For example, in Mexico in 2004, you would consider the Supreme Court of Justice of the Nation and

not the Electoral Tribunal for the Federal Judiciary. In Russia in the same year, you would consider the Constitutional Court of the Russian Federation and not the Supreme Court of the Russian Federation. In Sweden, you would ignore the Supreme Administrative Court and instead focus on the Supreme Court. Germany has both a constitutional court, the Federal Constitutional Court, and a court of last resort for ordinary matters, the Federal Court of Justice. The Federal Constitutional Court is the high court for our purposes. In the United States, there is no separate constitutional court or review body. The Supreme Court is both the highest ordinary court and the highest court in the state with constitutional jurisdiction. Therefore, we consider it to be the high court of the United States. If your country's highest judicial body has separate divisions, only one of which is dedicated to final constitutional review, please consider that division to be the high court if its judges are permanently assigned to that division only. For example, the Supreme Court of Justice of Costa Rica has four chambers. The Fourth Chamber reviews constitutional matters, its judges are appointed to it specifically and the other judges of the Supreme Court do not rotate onto the Fourth Chamber. Therefore, the high court for Costa Rica is the constitutional chamber of the Supreme Court of Justice.

If a new high court was established in a given year, please consider that court as the high court for the purposes of these questions only if the court was functioning for the majority of the calendar year. If a new high court was established in a given year, but did not start functioning until a subsequent year, please do not consider the new court as the high court until it was functioning for the majority of the given calendar year. If you are considering a semi sovereign territory, such as a colony, please answer this question with respect to the government or judicial bodies seated within the territory in question (*e.g.*, the governor-general and his local administration in a British colony or a Commonwealth country), not abroad (*e.g.*, the King/Queen or government of England).

In coding the following questions it is sometimes important to distinguish between formal rules (as stipulated by statute, legislative rules, the constitution, or common law precedent) and actual practice (what happens "on the ground"). In order to clarify the *de jure/de facto* distinction, we employ the terms "by law..." and "in practice..." Please pay close attention to these cues wherever you see them.

2.2.10.1 Judicial accountability (v2juacct)

Long tag: vdem_coder_level_v2juacct

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: When the high court in the judicial system is ruling in cases that are salient to the government, how often would you say that it makes decisions that merely reflect government wishes regardless of its sincere view of the legal record?

CLARIFICATION: We are seeking to identify autonomous judicial decision-making and its absence. Decisions certainly can reflect government wishes without “merely reflecting”; those wishes, *i.e.* a court can be autonomous when its decisions support the government’s position. This is because a court can be fairly persuaded that the government’s position is meritorious. By “merely reflect the wishes of the government”; we mean that the court’s own view of the record, its sincere evaluation of the record, is irrelevant to the outcome. The court simply adopts the government’s position regardless of its sincere view of the record.

RESPONSES:

0: Always.

1: Usually.

2: About half of the time.

3: Seldom.

4: Never.

2.2.10.7 Court packing (v2jupack)

Long tag: vdem_coder_level_v2jupack

Original tag: v2jupack

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Jeffrey Staton

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: The size of the judiciary is sometimes increased for very good reasons, as when judges are added to manage an increasing caseload; however, sometimes judges are added purely for political reasons. With this distinction in mind, please describe any increases in the size of the judiciary that occurred this calendar year.

CLARIFICATION: The second and third response categories permit you to distinguish among limited court packing efforts (*i.e.* when relatively few judgeships are added) by the political importance of the packing. For example, you may consider the packing of the high court to be more important than the packing of a lower court.

RESPONSES:

0: There was a massive, politically motivated increase in the number of judgeships across the entire judiciary.

1: There was a limited, politically motivated increase in the number of judgeships on very important courts.

2: There was a limited, politically motivated increase in the number of judgeships.
3: Judgeships were added to the judiciary, but there is no evidence that the increase was politically motivated; or there was no increase.
SCALE: Ordinal, converted to interval by the measurement model.
NOTES: A previous version of the variable contained category "4: There was no increase";. As of November 2014, all responses in category "4" are assigned to category "3", since the two responses have the same meaning in practice.
DATA RELEASE: 1-13.
CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

YEARS: 1789-2022

2.2.11 V-Dem Indicators - The Legislature

Instructions to the coders (as shown in the surveys)

The Legislature:

The following questions pertain to the legislature, an assembly of deputies or representatives with powers to consider, pass, amend, or repeal laws. If there is no legislature in the country you are coding for some period of years, do not code any questions for those years. If you are considering a semi-sovereign territory such as a colony please answer this question with respect to the legislature that is seated within the territory in question (such as the local legislative assembly in a British colony, not the Parliament in London). A popular election need not involve universal suffrage; indeed, suffrage may be highly restricted. A "direct election" can include seats reserved for special groups (*e.g.*, ethnic groups or women) so long as these members are chosen by popular election.

Frequently, it is important to distinguish between formal rules (as stipulated by statute, legislative rules, the constitution, or common law precedent) and actual practice (what happens on the ground). In order to clarify the *de jure/de facto* distinction, we employ the terms "by law..." and "in practice..." Please pay close attention to these cues. Note that sometimes we ask different coders to code different aspects of a question. So, you might get a question about the *de facto* state of affairs, but another source might provide the answer to the *de jure* state of affairs.

2.2.11.1 Lower chamber committees (v2lgcomslo)

Long tag: vdem_coder_level_v2lgcomslo

Original tag: v2lgcomslo

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).
YEARS: 1789-2022
CONVERGENCE: Model parameters with convergence issues: universal thresholds.

2.2.11.4 Representation of disadvantaged social groups (v2lgdsadlo)

Long tag: vdem_coder_level_v2lgdsadlo

Original tag: v2lgdsadlo

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Pamela Paxton

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Considering all disadvantaged social groups in the country, how well represented are these groups, as a whole, in the national legislature?

CLARIFICATION: Disadvantage refers to socioeconomic disadvantage. Specifically, in order to be considered disadvantaged members of a social group must have an average income that is significantly below the median national income.

RESPONSES:

0 (1): They have no representation at all.

1 (2): They are highly under-represented relative to their proportion of the general population.

2 (3): They are slightly under-represented relative to their proportion of the general population.

3 (4): They are represented roughly equal relative to their proportion of the general population.

4 (5): They are over-represented relative to their proportion of the general population.

SCALE: Ordinal, converted to interval by the measurement model.

NOTES: As of December 2014, the former category 0: There are no disadvantaged groups in the society, is coded as a separate variable (v2lgdsadlobin). The variable is then rebased to zero.

DATA RELEASE: 3-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CLEANING: Set to missing when v2lgbicam is 0

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).
YEARS: 1900-2022

2.2.11.6 Legislature controls resources (v2lgfunds)

Long tag: vdem_coder_level_v2lgfunds

Original tag: v2lgfunds

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C
PROJECT MANAGER(S): Steven Fish, Matthew Kroenig
ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr
QUESTION: In practice, does the legislature control the resources that finance its own internal operations and the perquisites of its members?
RESPONSES:
0: No. The benefits legislators receive or the finances needed for the legislature's operation depend on remaining in good standing with an outside authority, such as the executive.
1: Yes.
SCALE: Dichotomous, converted to interval by the measurement model.
DATA RELEASE: 3-13.
CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).
CLEANING: Set to missing when v2lgbicam is 0
CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).
YEARS: 1789-2022

2.2.11.7 Legislature investigates in practice (v2lginvstp)

Long tag: vdem_coder_level_v2lginvstp

Original tag: v2lginvstp

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C
PROJECT MANAGER(S): Steven Fish, Matthew Kroenig
ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr
QUESTION: If the executive were engaged in unconstitutional, illegal, or unethical activity, how likely is it that a legislative body (perhaps a whole chamber, perhaps a committee,

whether aligned with government or opposition) would conduct an investigation that would result in a decision or report that is unfavorable to the executive?

RESPONSES:

0: Extremely unlikely.

1: Unlikely.

2: As likely as not.

3: Likely.

4: Certain or nearly certain.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

CONVERGENCE: Model parameters with convergence issues: universal thresholds, main-country-coded thresholds.

2.2.11.8 Lower chamber legislates in practice (v2lglegplo)

Long tag: vdem_coder_level_v2lglegplo

Original tag: v2lglegplo

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Steven Fish, Matthew Kroenig

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: In practice, is the approval of the lower (or unicameral) chamber of the legislature required to pass legislation?

RESPONSES:

0: No. Legislation is routinely passed without the approval of the lower (or unicameral) chamber of the legislature.

1: Yes, usually. Legislation is usually passed with the approval of the lower (or unicameral) chamber of the legislature, but occasionally the legislature is by-passed.

2: Yes, always. Legislation of any consequence is always approved by the lower (or unicameral) chamber of the legislature.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CLEANING: Set to missing when v2lgbicam is 0

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1900-2022

2.2.12 V-Dem Indicators - The Media

Instructions to the coders (as shown in the surveys)

Media: Two types of media are distinguished in this section: (1) print (newspapers and magazines) and broadcast (radio and television), and (2) online media. We ask that you evaluate these categories as a whole. Thus, "the print and broadcast media" can provide a wide range of perspectives in a country even when individual publications or programs take a consistently narrow perspective.

Historical clarification: Two types of media are distinguished in this section: (1) print (newspapers and magazines) and (2) broadcast (radio) media. The latter is, however, only for reference to the contemporary era, and should of course be ignored before it appeared. But when applicable, we ask that you evaluate these categories as a whole. If there is no print or broadcast media at all in a given time period, leave the following questions blank (missing) for this time period. Please also explicitly note in the comments section at the end for which years there was no print or broadcast media at all.

2.2.12.1 Media bias (v2mebias)

Long tag: vdem_coder_level_v2mebias

Original tag: v2mebias

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Michael Coppedge

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Is there media bias against opposition parties or candidates?

CLARIFICATION: We ask you to take particular care in rating the year-to-year variation on this question if media bias tends to increase or decrease in election years. Coverage can be considered "more or less impartial" when the media as a whole present a mix of positive and negative coverage of each party or candidate.

RESPONSES:

0: The print and broadcast media cover only the official party or candidates, or have no political coverage, or there are no opposition parties or candidates to cover.

1: The print and broadcast media cover more than just the official party or candidates but all the opposition parties or candidates receive only negative coverage.

2: The print and broadcast media cover some opposition parties or candidates more or less impartially, but they give only negative or no coverage to at least one newsworthy party or candidate.

3: The print and broadcast media cover opposition parties or candidates more or less impartially, but they give an exaggerated *amount* of coverage to the governing party or candidates.

4: The print and broadcast media cover all newsworthy parties and candidates more or less impartially and in proportion to their newsworthiness.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

2.2.12.2 Internet censorship effort (v2mecenefi)

Long tag: vdem_coder_level_v2mecenefi

Original tag: v2mecenefi

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Michael Coppedge

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Does the government attempt to censor information (text, audio, or visuals) on the Internet?

CLARIFICATION: Censorship attempts include Internet filtering (blocking access to certain websites or browsers), denial-of-service attacks, and partial or total Internet shutdowns. We are not concerned with censorship of topics such as child pornography, highly classified information such as military or intelligence secrets, statements offensive to a particular religion, or defamatory speech unless this sort of censorship is used as a pretext for censoring political information or opinions. We are also not concerned with the *extent* of internet access, unless there is absolutely no access at all (in which case the coding should be 0).

RESPONSES:

0 (1): The government successfully blocks Internet access except to sites that are pro-government or devoid of political content.

1 (2): The government attempts to block Internet access except to sites that are pro-government or devoid of political content, but many users are able to circumvent such controls.

2 (3): The government allows Internet access, including to some sites that are critical of the government, but blocks selected sites that deal with especially politically sensitive issues.

3 (4): The government allows Internet access that is unrestricted, with the exceptions mentioned above.

SCALE: Ordinal, converted to interval by the measurement model.

NOTES: As of December 2014, the former category "0 There is no internet" is coded separately as v2mecenefibin. The variable is then rebased to zero.

DATA RELEASE: 3-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1993-2022

2.2.12.3 Internet binary (v2mecenefibin)

Long tag: vdem_coder_level_v2mecenefibin

Original tag: v2mecenefibin

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Michael Coppedge

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Is there Internet in this country?

RESPONSES:

0: No.

1: Yes.

SCALE: Dichotomous, converted to interval by the measurement model.

DATA RELEASE: 3-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1993-2022

2.2.12.4 Government censorship effort - Media (v2mecenefm)

Long tag: vdem_coder_level_v2mecenefm

Original tag: v2mecenefm

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Michael Coppedge

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Does the government directly or indirectly attempt to censor the print or broadcast media?

CLARIFICATION: Indirect forms of censorship might include politically motivated awarding of broadcast frequencies, withdrawal of financial support, influence over printing facilities and distribution networks, selected distribution of advertising, onerous registration requirements, prohibitive tariffs, and bribery.

We are not concerned with censorship of non-political topics such as child pornography, statements offensive to a particular religion, or defamatory speech unless this sort of censorship is used as a pretext for censoring political speech.

RESPONSES:

0: Attempts to censor are direct and routine.

1: Attempts to censor are indirect but nevertheless routine.

2: Attempts to censor are direct but limited to especially sensitive issues.
3: Attempts to censor are indirect and limited to especially sensitive issues.
4: The government rarely attempts to censor major media in any way, and when such exceptional attempts are discovered, the responsible officials are usually punished.
SCALE: Ordinal, converted to interval by the measurement model.
DATA RELEASE: 1-13.
CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*)
CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).
YEARS: 1900-2022

2.2.12.5 Media corrupt (v2mecorrpt)

Long tag: vdem_coder_level_v2mecorrpt

Original tag: v2mecorrpt

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Michael Coppedge

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Do journalists, publishers, or broadcasters accept payments in exchange for altering news coverage?

RESPONSES:

0: The media are so closely directed by the government that any such payments would be either unnecessary to ensure pro-government coverage or ineffective in producing anti-government coverage.

1: Journalists, publishers, and broadcasters routinely alter news coverage in exchange for payments.

2: It is common, but not routine, for journalists, publishers, and broadcasters to alter news coverage in exchange for payments.

3: It is not normal for journalists, publishers, and broadcasters to alter news coverage in exchange for payments, but it happens occasionally, without anyone being punished.

4: Journalists, publishers, and broadcasters rarely alter news coverage in exchange for payments, and if it becomes known, someone is punished for it.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1900-2022

2.2.12.6 Print/broadcast media critical (v2mecrit)

Long tag: vdem_coder_level_v2mecrit

2.2.12.7 Percent (percent) Female Journalists (v2mefemjrn)

Long tag: vdem_coder_level_v2mefemjrn

Original tag: v2mefemjrn

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Pamela Paxton, Michael Coppedge

ADDITIONAL VERSIONS: *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Please estimate the percentage (percent) of journalists in the print and broadcast media who are women.

RESPONSES:

Percent.

SCALE: Interval.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bootstrapped.

CITATION: *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1900-2022

2.2.12.8 Harassment of journalists (v2meharjrn)

Long tag: vdem_coder_level_v2meharjrn

Original tag: v2meharjrn

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Michael Coppedge

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Are individual journalists harassed — *i.e.*, threatened with libel, arrested, imprisoned, beaten, or killed — by governmental or powerful nongovernmental actors while engaged in legitimate journalistic activities?

RESPONSES:

0: No journalists dare to engage in journalistic activities that would offend powerful actors because harassment or worse would be certain to occur.

1: Some journalists occasionally offend powerful actors but they are almost always harassed or worse and eventually are forced to stop.

2: Some journalists who offend powerful actors are forced to stop but others manage to continue practicing journalism freely for long periods of time.

3: It is rare for any journalist to be harassed for offending powerful actors, and if this were to happen, those responsible for the harassment would be identified and punished.

4: Journalists are never harassed by governmental or powerful nongovernmental actors while engaged in legitimate journalistic activities.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

YEARS: 1789-2022

2.2.13 V-Dem Indicators - Political Equality

Instructions to the coders (as shown in the surveys)

Political Equality: This section pertains to political equality, that is, the extent to which members of a polity possess equal political power. It does not refer to the inevitable differentiation in power that occurs in all large societies between those who hold positions of power within the state (political elites) and lay citizens. It is, rather, about the distribution of political power among identifiable groups within the population.

What does it mean for a group of individuals to wield real political power? Although political power cannot be directly observed, one can infer that groups possess power to the extent that they: (a) actively participate in politics (by voting, etc.), (b) are involved in civil society organizations, (c) secure representation in government, (d) are able to set the political agenda, (e) influence political decisions, and (f) influence the implementation of those decisions. Please consider all these factors when answering the following questions. (Of course, the picture across these different dimensions may be mixed; your response should indicate the overall picture, taking all aspects of political power into account.)

2.2.13.1 Educational equality (v2peedueq)

Long tag: vdem_coder_level_v2peedueq

Original tag: v2peedueq

QUESTION: To what extent is high quality basic education guaranteed to all, sufficient to enable them to exercise their basic rights as adult citizens?

CLARIFICATION: Basic education refers to ages typically between 6 and 16 years of age but this varies slightly among countries.

RESPONSES:

0: Extreme. Provision of high quality basic education is extremely unequal and at least 75 percent (percent) of children receive such low-quality education that undermines their ability to exercise their basic rights as adult citizens.

1: Unequal. Provision of high quality basic education is extremely unequal and at least 25 percent (percent) of children receive such low-quality education that undermines their ability to exercise their basic rights as adult citizens.

2: Somewhat equal. Basic education is relatively equal in quality but ten to 25 percent (percent) of children receive such low-quality education that undermines their ability to exercise their basic rights as adult citizens.

3: Relatively equal. Basic education is overall equal in quality but five to ten percent (percent) of children receive such low-quality education that probably undermines their ability to exercise their basic rights as adult citizens.

4: Equal. Basic education is equal in quality and less than five percent (percent) of children receive such low-quality education that probably undermines their ability to exercise their basic rights as adult citizens.

SCALE: Ordinal, converted to interval by the measurement model.

QUESTION: To what extent is high quality basic healthcare guaranteed to all, sufficient to enable them to exercise their basic political rights as adult citizens?

CLARIFICATION: Poor-quality healthcare can make citizens unable to exercise their basic rights as adult citizens by failing to adequately treat preventable and treatable illnesses that render them unable to work, participate in social or political organizations, or vote (where voting is allowed).

RESPONSES:

0: Extreme. Because of poor-quality healthcare, at least 75 percent (percent) of citizens' ability to exercise their political rights as adult citizens is undermined.

1: Unequal. Because of poor-quality healthcare, at least 25 percent (percent) of citizens' ability to exercise their political rights as adult citizens is undermined.

2: Somewhat equal. Because of poor-quality healthcare, ten to 25 percent (percent) of citizens' ability to exercise their political rights as adult citizens is undermined.

3: Relatively equal. Basic health care is overall equal in quality but because of poor-quality healthcare, five to ten percent (percent) of citizens' ability to exercise their political rights as adult citizens is undermined.

4: Equal. Basic health care is equal in quality and less than five percent (percent) of citizens cannot exercise their basic political rights as adult citizens.

2.2.13.4 Power distributed by sexual orientation (v2pepwrt)

Long tag: vdem_coder_level_v2pepwrt

Original tag: v2pepwrt

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): John Gerring

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: To what extent is political power distributed according to sexual orientation?

CLARIFICATION: This question contrasts (A) the political power of heterosexuals and lesbian, gay, bisexual, and transgender (LGBT) members of the polity who are not open about their sexuality with (B) the political power of lesbian, gay, bisexual, and transgender (LGBT) members of the polity who are open about their sexuality. (A) will be referred to as "heterosexual" and (B) as "LGBT."

Note that in comparing the political power of these two groups we are comparing their power per person. So, when we say that LGBT have less, equal, or more power than heterosexuals we mean relative to their share of the population (as near as this can be estimated).

RESPONSES:

0: LGBTs are entirely excluded from the public sphere and thus deprived of any real political power (even though they may possess formal powers such as the ballot).

1: LGBTs have much less political power than heterosexuals. LGBTs enjoy formal rights to participate in politics but are subject to informal norms that often serve to exclude them from the halls of power.

2: LGBTs have somewhat less political power than heterosexual citizens.

3: LGBTs have about the same political power as heterosexuals. Each group enjoys a degree of political power that is roughly proportional to their population.

4: LGBTs enjoy somewhat more political power than heterosexuals by virtue of greater wealth, education, and high level of organization and mobilization.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1900-2022

2.2.13.5 Power distributed by socioeconomic position (v2pepwrses)

Long tag: vdem_coder_level_v2pepwrses

Original tag: v2pepwrses

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky,

Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): John Gerring

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Is political power distributed according to socioeconomic position?

CLARIFICATION: All societies are characterized by some degree of economic (wealth and income) inequality. In some societies, income and wealth are distributed in a grossly unequal fashion. In others, the difference between rich and poor is not so great. Here, we are concerned not with the degree of social inequality but rather with the political effects of this inequality. Specifically, we are concerned with the extent to which wealth and income translates into political power.

RESPONSES:

0: Wealthy people enjoy a virtual monopoly on political power. Average and poorer people have almost no influence.

1: Wealthy people enjoy a dominant hold on political power. People of average income have little say. Poorer people have essentially no influence.

2: Wealthy people have a very strong hold on political power. People of average or poorer income have some degree of influence but only on issues that matter less for wealthy people.

3: Wealthy people have more political power than others. But people of average income have almost as much influence and poor people also have a significant degree of political power.

4: Wealthy people have no more political power than those whose economic status is average or poor. Political power is more or less equally distributed across economic groups.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

2.2.13.6 Power distributed by social group (v2pepwrSOC)

Long tag: vdem_coder_level_v2pepwrSOC

Original tag: v2pepwrSOC

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): John Gerring

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Is political power distributed according to social groups?

CLARIFICATION: A social group is differentiated within a country by caste, ethnicity, language, race, region, religion, or some combination thereof. (It does *not* include identities grounded in sexual orientation or socioeconomic status.) Social group identity is contextually defined and is likely to vary across countries and through time. Social group identities are also likely to cross-cut, so that a given person could be defined in multiple ways, *i.e.*, as part of multiple groups. Nonetheless, at any given point in time there are social groups within a society that are understood — by those residing within that society — to be different, in ways that may be politically relevant.

RESPONSES:

0: Political power is monopolized by one social group comprising a minority of the population. This monopoly is institutionalized, *i.e.*, not subject to frequent change.

1: Political power is monopolized by several social groups comprising a minority of the population. This monopoly is institutionalized, *i.e.*, not subject to frequent change.

2: Political power is monopolized by several social groups comprising a majority of the population. This monopoly is institutionalized, *i.e.*, not subject to frequent change.

3: Either all social groups possess some political power, with some groups having more power than others; or different social groups alternate in power, with one group controlling much of the political power for a period of time, followed by another — but all significant groups have a turn at the seat of power.

4: All social groups have roughly equal political power *or* there are no strong ethnic, caste, linguistic, racial, religious, or regional differences to speak of. Social group characteristics are not relevant to politics.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

2.2.14 V-Dem Indicators - Political Parties

Instructions to the coders (as shown in the surveys)

Political parties:

A "political party" refers to an organization that nominates candidates for public office. A party may refer to a longstanding coalition such as the CDU/CSU in Germany if that coalition functions in most respects like a single party. Sometimes, the identity of a party is obscured by name changes. However, if the party/coalition changes names but retains key personnel and is still run by and for the same constituency then it should be considered the same organization. Our notion of a party includes loose factional groupings such as the Tories and Whigs in the 19th-century Britain or the Caps and Hats in 18th-century Sweden. Unless stated otherwise the following questions pertain to parties that compete for seats in the national legislature or for the presidency.

Most of the questions in the following section ask you to generalize across parties in a particular country (and at a particular point in time). We realize that practices vary from party to party; these are, after all, highly diverse organizations. However, for our purposes it is important to consider what the most common practices are.

In answering these questions it is sometimes important to distinguish between formal rules (as stipulated by statute, legislative rules, the constitution, or common law precedent) and actual practice (what happens on the ground). In order to clarify the *de jure/de facto* distinction, we employ the terms "by law..." and "in practice..." Please pay close attention to these cues wherever you see them. And if there is no clarification of the issue, assume that the question is referring to practices rather than formal rules.

2.2.14.1 Party ban target (v2psbantar)

Long tag: vdem_coder_level_v2psbantar

Original tag: v2psbantar

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Allen Hicken

ADDITIONAL VERSIONS: *_nr

QUESTION: If any parties are banned, what label best describes these parties?

CLARIFICATION: Choose all that apply.

RESPONSES:

0: Ethnic party. [v2psbantar_0]

1: Religious party. [v2psbantar_1]

2: Regional/local party. [v2psbantar_2]

3: Leftist extremist party. [v2psbantar_3]

4: Rightist extremist party. [v2psbantar_4]

5: Other. [v2psbantar_5]
SCALE: Series of dichotomous scales.
ANSWER-TYPE: Multiple-selection.
NOTES: The answer categories for contemporary and historical differ in the inclusion of the word "extremist". In contemporary it is included while excluded in the historical answer categories.
DATA RELEASE: 3-13.
CROSS-CODER AGGREGATION: Mean.
CITATION: *V-Dem Codebook* (see suggested citation at the top of this document).

2.2.14.2 Barriers to parties (v2psbars)

Long tag: vdem_coder_level_v2psbars

Original tag: v2psbars

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C
PROJECT MANAGER(S): Allen Hicken
ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr
QUESTION: How restrictive are the barriers to forming a party?
CLARIFICATION: Barriers include legal requirements such as requirements for membership or financial deposits, as well as harassment.
RESPONSES:
0: Parties are not allowed.
1: It is impossible, or virtually impossible, for parties not affiliated with the government to form (legally).
2: There are significant obstacles (*e.g.* party leaders face high levels of regular political harassment by authorities).
3: There are modest barriers (*e.g.* party leaders face occasional political harassment by authorities).
4: There are no substantial barriers.
ORDERING: If your answer is 1-4, proceed to the next question [v2psoppaut]. If your answer is 0, skip to the question about Party organization [v2psorgs].
SCALE: Ordinal, converted to interval by the measurement model.
DATA RELEASE: 1-13.
CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).
CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

2.2.14.3 Candidate selection—National/local (v2pscnslnl)

Long tag: vdem_coder_level_v2pscnslnl

Original tag: v2pscnslnl

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C
PROJECT MANAGER(S): Allen Hicken
ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr
QUESTION: How centralized is legislative candidate selection within the parties?
CLARIFICATION: The power to select candidates for national legislative elections is often divided between local/municipal party actors, regional/state-level party organizations, and

national party leaders. One level usually dominates the selection process, while sometimes candidate selection is the outcome of bargaining between the different levels of party organization.

RESPONSES:

0: National legislative candidates are selected exclusively by national party leaders.

1: National legislative candidate selection is dominated by national party leaders but with some limited influence from local or state level organizations.

2: National legislative candidates are chosen through bargaining across different levels of party organization.

3: National legislative candidates are chosen by regional or state-level organizations, perhaps with some input from local party organizations or constituency groups.

4: National legislative candidates are chosen by a small cadre of local or municipal level actors.

5: National legislative candidates are chosen by constituency groups or direct primaries.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

2.2.14.6 National party control (v2psnatpar)

Long tag: vdem_coder_level_v2psnatpar

Original tag: v2psnatpar

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C
PROJECT MANAGER(S): Allen Hicken
ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr
QUESTION: How unified is party control of the national government?
CLARIFICATION: With respect to the executive, consider only those offices that have effective power over policymaking. (If there is a monarch or president with very little policymaking power, this office should not be considered.) With respect to bicameral legislatures, consider only the chamber, or chambers, that have effective policymaking power. (If the upper chamber is inactive or clearly subordinate, consider only the lower chamber.) Leave this question blank if election was nonpartisan, *i.e.*, no parties (not even pro-government parties) were allowed.
RESPONSES:
0: Unified coalition control. A single multi-party coalition controls the executive and legislative branches of the national government. (This is true almost by definition in a parliamentary system where a single coalition gathers together a majority of seats.)
1: Divided party control. (A) Different parties or individuals (unconnected to parties) control the executive and the legislature or (B) Executive power is divided between a president/monarch and a prime minister, each of which belongs to different parties; or between a non-partisan monarch and a prime minister.
2: Unified party control. A single party controls the executive and legislative branches of the national government. (This is true almost by definition in a parliamentary system where a single party has a majority of seats.)
SCALE: Ordinal, converted to interval by the measurement model.
DATA RELEASE: 1-13.
CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

PROJECT MANAGER(S): Allen Hicken

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Among the major parties, what is the main or most common form of linkage to their constituents?

CLARIFICATION: A party-constituent linkage refers to the sort of "good" that the party offers in exchange for political support and participation in party activities.

RESPONSES:

0: Clientelistic. Constituents are rewarded with goods, cash, and/or jobs.

1: Mixed clientelistic and local collective.

2: Local collective. Constituents are rewarded with local collective goods, *e.g.*, wells, toilets, markets, roads, bridges, and local development.

3: Mixed local collective and policy/programmatic.

4: Policy/programmatic. Constituents respond to a party's positions on national policies, general party programs, and visions for society.

SCALE: Ordinal, converted to interval by the measurement model.

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Does a single party control important policymaking bodies across subnational units (regional and local governments)?

CLARIFICATION: Leave this question blank if election was nonpartisan, *i.e.*, no parties (not even pro-government parties) were allowed.

RESPONSES:

0: In almost all subnational units (at least 90percent), a single party controls all or virtually all policymaking bodies.

1: In most subnational units (66percent-90percent), a single party controls all or virtually all policymaking bodies.

2: In few subnational units (less than 66percent), a single party controls all or virtually all policymaking bodies.

SCALE: Ordinal, converted to interval by the measurement model.

2.2.15 Digital Society Survey - Social Cleavages

The Digital Society Survey, designed by the Digital Society Project, contains questions pertaining to the political environment of the internet and social media. The data collected through expert-coded surveys provides information on topics related to coordinated information operations, digital media freedom, online media polarization, social cleavages as well as state internet regulation capacity and approach.

Principal investigators for the Digital Society Project are Valeriya Mechkova, Daniel Pemstein, Brigitte Seim, Steven Wilson.

For more information, please visit www.digitalsocietyproject.org.

Instructions to the coders (as shown in the surveys)

Digital society: The following survey contains questions pertaining to the political environment of the Internet and social media. Please bear in mind the following definitions as you respond to questions on this survey:

The government and its agents include official government organs, such as bureaucracies, courts, intelligence services, and the military, but also unofficial agents, such as officially unaffiliated cyber-warfare operatives who perform services, even “off-book” work, on behalf of the government.

Major political parties include the group of political parties that hold a significant number of seats in national legislative body(-ies), or earn a significant number of votes in elections for the executive.

When we ask you to consider “major political parties,” you do not need to consider parties that run in elections but receive only a small minority of seats or votes, or those that receive no seats at all.

We define the Internet as all information that people access over public and private digital networks, worldwide. The Internet includes both publicly accessible digital spaces and private or gated information transmission platforms. The Internet does not include traditional media transmission mechanisms such as paper, television, traditional voice telephone, and radio.

Social media are a subset of Internet platforms that enable normal individuals to create and share content with networks of other people. Social media platforms are available to the public, although content on such networks may be shared privately within subgroups of users. Social media includes both publicly visible, or semi-public platforms, like Facebook, Flickr, Friendster, Google+, Instagram, Myspace, LinkedIn, Twitter, VKontakte, and Weibo and private social networking and messaging platforms like Signal, Slack, Snapchat, or WhatsApp.

Domestic online media is any media source originating in the country in question. For example, the New York Times’ website is domestic online media in the United States, but not in India, even though it operates bureaus in India. Media includes any source reporting on current events or political issues, ranging from well-established brands to newsletters and websites run by an individual.

Cyber security threats include penetration of private digital networks, using means ranging from exploiting software vulnerabilities, password cracking, or social engineering (e.g., tricking individuals into revealing passwords or other information necessary to break into a digital system) to obtain information or disrupt an organization or individual’s use of digital networks and tools. They also include unauthorized alterations of an individual or organization’s digital presence, such as defacing websites and commandeering social media accounts. These threats range from unsophisticated (e.g., exploitation of failure to password protect private networks or use of common passwords by authorized users, and spear phishing) to moderate (e.g., embedding malicious code in emails or exploiting well-known software flaws that organizations have failed to patch), to sophisticated (e.g., exploiting unknown exploits in commonly used software or even embedding exploits into commercial systems unbeknownst to their creators).

Clarification: When we discuss shutting down online content, please consider instances where a website (or websites) have been taken entirely offline as well as instances where a website (or websites) have been slowed down or had access similarly intentionally inhibited, such that use of this website is challenging. In other words, both outright shutting down and more subtle measures that inhibit access should be considered when answering these questions.

Clarification: When we discuss “censorship” or “censoring” content online, we are not concerned with censorship of topics such as child pornography, highly classified information such as military or intelligence secrets, or defamatory speech, unless this sort of censorship is used as a pretext for censoring political information or opinions.

2.2.15.1 Arrests for political content (v2smarrest)

Long tag: vdem_coder_level_v2smarrest

Original tag: v2smarrest

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: If a citizen posts political content online that would run counter to the government and its policies, what is the likelihood that citizen is arrested?

RESPONSES:

0: Extremely likely.

1: Likely.

2: Unlikely.

3: Extremely unlikely.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 9-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see V-Dem Methodology).

2.2.15.7 Use of social media to organize offline violence (v2smorgviol)

Long tag: vdem_coder_level_v2smorgviol

Original tag: v2smorgviol

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: How often do people use social media to organize offline violence?

RESPONSES:

0: Frequently. There are numerous cases in which people have used social media to organize offline violence.

1: Sometimes. There are a few cases in which people have used social media to organize offline violence.
2: Never. People have never used social media to organize offline violence.
SCALE: Ordinal, converted to interval by the measurement model.
DATA RELEASE: 9-13.
CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see V-Dem Methodology).
CITATION: Mechkova *et al.* (2019, *Digital Society Project Working Paper* 2019:1); Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).
YEARS: 2000-2022

2.2.15.8 Political parties hate speech (v2smpolhate)

Long tag: vdem_coder_level_v2smpolhate

Original tag: v2smpolhate

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: How often do major political parties use hate speech as part of their rhetoric?

CLARIFICATION: Hate speech is any speech that is intended to insult, offend, or intimidate members of specific groups, defined by race, religion, sexual orientation, national origin, disability, or similar trait.

RESPONSES:

0: Extremely often.

1: Often.

2: Sometimes.

3: Rarely.

4: Never, or almost never.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 9-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see V-Dem Methodology).

CITATION: Mechkova *et al.* (2019, *Digital Society Project Working Paper* 2019:1); Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 2000-2022

CONVERGENCE: Model parameters with convergence issues: country-date latent trait estimates, universal thresholds, expert reliability, expert thresholds, main-country-coded thresholds.

2.2.15.9 Polarization of society (v2smpolsoc)

Long tag: vdem_coder_level_v2smpolsoc

Original tag: v2smpolsoc

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: How would you characterize the differences of opinions on major political issues in this society?

CLARIFICATION: While plurality of views exists in all societies, we are interested in knowing the extent to which these differences in opinions result in major clashes of views and

polarization or, alternatively, whether there is general agreement on the general direction this society should develop.

RESPONSES:

0: Serious polarization. There are serious differences in opinions in society on almost all key political issues, which result in major clashes of views.

1: Moderate polarization. There are differences in opinions in society on many key political issues, which result in moderate clashes of views.

2: Medium polarization. Differences in opinions are noticeable on about half of the key political issues, resulting in some clashes of views.

3: Limited polarization. There are differences in opinions on only a few key political issues, resulting in few clashes of views.

4: No polarization. There are differences in opinions but there is a general agreement on the direction for key political issues.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 9-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see V-Dem Methodology).

CITATION: Mechkova *et al.* (2019, *Digital Society Project Working Paper 2019:1*); Pemstein *et al.* (2023, *V-Dem Working Paper Series 2023:21*); *V-Dem Codebook* (see suggested citation at the top of this document).

2.2.16 Digital Society Survey - State Internet Regulation Capacity and Approach

The Digital Society Survey, designed by the Digital Society Project, contains questions pertaining to the political environment of the internet and social media. The data collected through expert-coded surveys provides information on topics related to coordinated information operations, digital media freedom, online media polarization, social cleavages as well as state internet regulation capacity and approach.

Principal investigators for the Digital Society Project are Valeriya Mechkova, Daniel Pemstein, Brigitte Seim, Steven Wilson.

For more information, please visit www.digitalsocietyproject.org.

Instructions to the coders (as shown in the surveys)

Digital society: The following survey contains questions pertaining to the political environment of the Internet and social media. Please bear in mind the following definitions as you respond to questions on this survey:

The government and its agents include official government organs, such as bureaucracies, courts, intelligence services, and the military, but also unofficial agents, such as officially unaffiliated cyber-warfare operatives who perform services, even “off-book” work, on behalf of the government.

Major political parties include the group of political parties that hold a significant number of seats in national legislative body(-ies), or earn a significant number of votes in elections for the executive. When we ask you to consider “major political parties,” you do not need to consider parties that run in elections but receive only a small minority of seats or votes, or those that receive no seats at all.

We define the Internet as all information that people access over public and private digital networks, worldwide. The Internet includes both publicly accessible digital spaces and private or gated information transmission platforms. The Internet does not include traditional media transmission mechanisms such as paper, television, traditional voice telephone, and radio.

Social media are a subset of Internet platforms that enable normal individuals to create and share content with networks of other people. Social media platforms are available to the public, although content on such networks may be shared privately within subgroups of users. Social media includes both publicly visible, or semi-public platforms, like Facebook, Flickr, Friendster, Google+, Instagram, Myspace, LinkedIn, Twitter, VKontakte, and Weibo and private social networking and messaging platforms like Signal, Slack, Snapchat, or WhatsApp.

Domestic online media is any media source originating in the country in question. For example, the

New York Times' website is domestic online media in the United States, but not in India, even though it operates bureaus in India. Media includes any source reporting on current events or political issues, ranging from well-established brands to newsletters and websites run by an individual.

Cyber security threats include penetration of private digital networks, using means ranging from exploiting software vulnerabilities, password cracking, or social engineering (e.g., tricking individuals into revealing passwords or other information necessary to break into a digital system) to obtain information or disrupt an organization or individual's use of digital networks and tools. They also include unauthorized alterations of an individual or organization's digital presence, such as defacing websites and commandeering social media accounts. These threats range from unsophisticated (e.g., exploitation of failure to password protect private networks or use of common passwords by authorized users, and spear phishing) to moderate (e.g., embedding malicious code in emails or exploiting well-known software flaws that organizations have failed to patch), to sophisticated (e.g., exploiting unknown exploits in commonly used software or even embedding exploits into commercial systems unbeknownst to their creators).

Clarification: When we discuss shutting down online content, please consider instances where a website (or websites) have been taken entirely offline as well as instances where a website (or websites) have been slowed down or had access similarly intentionally inhibited, such that use of this website is challenging. In other words, both outright shutting down and more subtle measures that inhibit access should be considered when answering these questions.

Clarification: When we discuss "censorship" or "censoring" content online, we are not concerned with censorship of topics such as child pornography, highly classified information such as military or intelligence secrets, or defamatory speech, unless this sort of censorship is used as a pretext for censoring political information or opinions.

2.2.16.1 Abuse of defamation and copyright law by elites (v2smdefabu)

Long tag: vdem_coder_level_v2smdefabu

Original tag: v2smdefabu

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: To what extent do elites abuse the legal system (e.g., defamation and copyright law) to censor political speech online?

RESPONSES:

0: Regularly. Elites abuse the legal system to remove political speech from the Internet as regular practice.

1: Often. Elites commonly abuse the legal system to remove political speech from the Internet.

2: Sometimes. Elites abuse the legal system to remove political speech from the Internet about half the time.

3: Rarely. Elites occasionally abuse the legal system to remove political speech from the Internet.

4: Never, or almost never. Elites do not abuse the legal system to remove political speech from the Internet.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 9-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see V-Dem Methodology).

CITATION: Mechkova et al. (2019, *Digital Society Project Working Paper* 2019:1); Pemstein et al. (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Does the government use its own resources and institutions to monitor and regulate online content or does it distribute this regulatory burden to private actors such as Internet service providers?

RESPONSES:

0: All online content monitoring and regulation is done by the state.

1: Most online content monitoring and regulation is done by the state, though the state involves private actors in a limited way.

2: Some online content monitoring and regulation is done by the state, but the state also involves private actors in monitoring and regulation in various ways.

3: The state does little online content monitoring and regulation, and entrusts most of the monitoring and regulation to private actors.

4: The state off-loads all online content monitoring and regulation to private actors.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 9-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see V-Dem Methodology).

CITATION: Mechkova *et al.* (2019, *Digital Society Project Working Paper* 2019:1); Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 2000-2022

2.2.16.6 Government capacity to regulate online content (v2smregcap)

Long tag: vdem_coder_level_v2smregcap

Original tag: v2smregcap

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Does the government have sufficient staff and resources to regulate Internet content in accordance with existing law?

RESPONSES:

0: No, almost all online activity happens outside of reach of the state, where it lacks the capacity to remove illegal content.

1: Not really. The state has extremely limited resources to regulate online content.

2: Somewhat. The state has the capacity to regulate only some online content or some portions of the law.

3: Mostly. The state has robust capacity to regulate online content, though not enough to regulate all content and all portions of the law.

4: Yes, the government has sufficient capacity to regulate all online content.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 9-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see V-Dem Methodology).

CITATION: Mechkova *et al.* (2019, *Digital Society Project Working Paper* 2019:1); Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 2000-2022

2.2.16.7 Internet legal regulation content (v2smregcon)

Long tag: vdem_coder_level_v2smregcon

Original tag: v2smregcon

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: What type of content is covered in the legal framework to regulate Internet?

RESPONSES:

0: The state can remove any content at will.

1: The state can remove most content, and the law protects speech in only specific, and politically uncontroversial contexts.

2: The legal framework is ambiguous. The state can remove some politically sensitive content, while other is protected by law.

3: The law protects most political speech, but the state can remove especially politically controversial content.

4: The law protects political speech, and the state can only remove content if it violates well-established legal criteria.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 9-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see V-Dem Methodology).

CITATION: Mechkova *et al.* (2019, *Digital Society Project Working Paper* 2019:1); Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 2000-2022

2.2.17 Digital Society Survey - Coordinated Information Operations

The Digital Society Survey, designed by the Digital Society Project, contains questions pertaining to the political environment of the internet and social media. The data collected through expert-coded surveys provides information on topics related to coordinated information operations, digital media freedom, online media polarization, social cleavages as well as state internet regulation capacity and approach.

Principal investigators for the Digital Society Project are Valeriya Mechkova, Daniel Pemstein, Brigitte Seim, Steven Wilson.

For more information, please visit www.digitalsocietyproject.org.

Instructions to the coders (as shown in the surveys)

Digital society: The following survey contains questions pertaining to the political environment of the Internet and social media. Please bear in mind the following definitions as you respond to questions on this survey:

The government and its agents include official government organs, such as bureaucracies, courts, intelligence services, and the military, but also unofficial agents, such as officially unaffiliated cyberwarfare operatives who perform services, even “off-book” work, on behalf of the government.

Major political parties include the group of political parties that hold a significant number of seats in national legislative body(-ies), or earn a significant number of votes in elections for the executive. When we ask you to consider “major political parties,” you do not need to consider parties that run in elections but receive only a small minority of seats or votes, or those that receive no seats at all.

We define the Internet as all information that people access over public and private digital networks, worldwide. The Internet includes both publicly accessible digital spaces and private or gated information transmission platforms. The Internet does not include traditional media transmission mechanisms such as paper, television, traditional voice telephone, and radio.

Social media are a subset of Internet platforms that enable normal individuals to create and share content with networks of other people. Social media platforms are available to the public, although content on such networks may be shared privately within subgroups of users. Social media includes both publicly visible, or semi-public platforms, like Facebook, Flickr, Friendster, Google+, Instagram, Myspace, LinkedIn, Twitter, VKontakte, and Weibo and private social networking and messaging platforms like Signal, Slack, Snapchat, or WhatsApp.

Domestic online media is any media source originating in the country in question. For example, the New York Times’ website is domestic online media in the United States, but not in India, even though it operates bureaus in India. Media includes any source reporting on current events or political issues, ranging from well-established brands to newsletters and websites run by an individual.

Cyber security threats include penetration of private digital networks, using means ranging from exploiting software vulnerabilities, password cracking, or social engineering (e.g., tricking individuals into revealing passwords or other information necessary to break into a digital system) to obtain information or disrupt an organization or individual’s use of digital networks and tools. They also include unauthorized alterations of an individual or organization’s digital presence, such as defacing websites and commandeering social media accounts. These threats range from unsophisticated (e.g., exploitation of failure to password protect private networks or use of common passwords by authorized users, and spear phishing) to moderate (e.g., embedding malicious code in emails or exploiting well-known software flaws that organizations have failed to patch), to sophisticated (e.g., exploiting unknown exploits in commonly used software or even embedding exploits into commercial systems unbeknownst to their creators).

Clarification: When we discuss shutting down online content, please consider instances where a website (or websites) have been taken entirely offline as well as instances where a website (or websites) have been slowed down or had access similarly intentionally inhibited, such that use of this website is challenging. In other words, both outright shutting down and more subtle measures that inhibit access should be considered when answering these questions.

Clarification: When we discuss “censorship” or “censoring” content online, we are not concerned

with censorship of topics such as child pornography, highly classified information such as military or intelligence secrets, or defamatory speech, unless this sort of censorship is used as a pretext for censoring political information or opinions.

2.2.17.1 Foreign governments ads (v2smforads)

Long tag: vdem_coder_level_v2smforads

Original tag: v2smforads

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: How routinely do foreign governments and their agents use paid advertisements on social media in order to disseminate misleading viewpoints or false information to influence domestic politics in this country?

RESPONSES:

0: Extremely often. Foreign governments disseminate false information on all key political issues.

1: Often. Foreign governments disseminate false information on many key political issues.

2: About half the time. Foreign governments disseminate false information on some key political issues, but not others.

3: Rarely. Foreign governments disseminate false information on only a few key political issues.

4: Never, or almost never. Foreign governments never disseminate false information on key political issues.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 9-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see V-Dem Methodology).

CITATION: Mechkova et al. (2019, *Digital Society Project Working Paper* 2019:1); Pemstein et al. (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 2000-2022

2.2.17.2 Foreign governments dissemination of false information (v2smfordom)

Long tag: vdem_coder_level_v2smfordom

Original tag: v2smfordom

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: How routinely do foreign governments and their agents use social media to disseminate misleading viewpoints or false information to influence domestic politics in this country?

RESPONSES:

0: Extremely often. Foreign governments disseminate false information on all key political issues.

1: Often. Foreign governments disseminate false information on many key political issues.

2: About half the time. Foreign governments disseminate false information on some key political issues, but not others.

3: Rarely. Foreign governments disseminate false information on only a few key political issues.

4: Never, or almost never. Foreign governments never disseminate false information on key political issues.

YEARS: 2000-2022

2.2.17.3 Government dissemination of false information abroad (v2smgovab)

Long tag: vdem_coder_level_v2smgovab

Original tag: v2smgovab

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: How often do the government and its agents use social media to disseminate misleading viewpoints or false information to influence citizens of other countries abroad?

RESPONSES:

0: Extremely often. The government disseminates false information on all key political issues.

1: Often. The government disseminates false information on many key political issues.

2: About half the time. The government disseminates false information on some key political issues, but not others.

3: Rarely. The government disseminates false information on only a few key political issues.

4: Never, or almost never. The government never disseminates false information on key political issues.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 9-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see V-Dem Methodology).

CITATION: Mechkova *et al.* (2019, *Digital Society Project Working Paper* 2019:1); Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 2000-2022

CONVERGENCE: Model parameters with convergence issues: universal thresholds.

2.2.17.4 Government dissemination of false information domestic (v2smgovdom)

Long tag: vdem_coder_level_v2smgovdom

Original tag: v2smgovdom

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: How often do the government and its agents use social media to disseminate misleading viewpoints or false information to influence its own population?

RESPONSES:

0: Extremely often. The government disseminates false information on all key political issues.

1: Often. The government disseminates false information on many key political issues.

2: About half the time. The government disseminates false information on some key political issues, but not others.

3: Rarely. The government disseminates false information on only a few key political issues.

4: Never, or almost never. The government never disseminates false information on key

political issues.

2.2.18 Digital Society Survey - Digital Media Freedom

The Digital Society Survey, designed by the Digital Society Project, contains questions pertaining to the political environment of the internet and social media. The data collected through expert-coded surveys provides information on topics related to coordinated information operations, digital media freedom, online media polarization, social cleavages as well as state internet regulation capacity and approach.

Principal investigators for the Digital Society Project are Valeriya Mechkova, Daniel Pemstein, Brigitte Seim, Steven Wilson.

For more information, please visit www.digitalsocietyproject.org.

Instructions to the coders (as shown in the surveys)

Digital society: The following survey contains questions pertaining to the political environment of the Internet and social media. Please bear in mind the following definitions as you respond to questions on this survey:

The government and its agents include official government organs, such as bureaucracies, courts, intelligence services, and the military, but also unofficial agents, such as officially unaffiliated cyber-warfare operatives who perform services, even “off-book” work, on behalf of the government.

Major political parties include the group of political parties that hold a significant number of seats in national legislative body(-ies), or earn a significant number of votes in elections for the executive. When we ask you to consider “major political parties,” you do not need to consider parties that run in elections but receive only a small minority of seats or votes, or those that receive no seats at all.

We define the Internet as all information that people access over public and private digital networks, worldwide. The Internet includes both publicly accessible digital spaces and private or gated information transmission platforms. The Internet does not include traditional media transmission mechanisms such as paper, television, traditional voice telephone, and radio.

Social media are a subset of Internet platforms that enable normal individuals to create and share content with networks of other people. Social media platforms are available to the public, although content on such networks may be shared privately within subgroups of users. Social media includes both publicly visible, or semi-public platforms, like Facebook, Flickr, Friendster, Google+, Instagram, Myspace, LinkedIn, Twitter, VKontakte, and Weibo and private social networking and messaging platforms like Signal, Slack, Snapchat, or WhatsApp.

Domestic online media is any media source originating in the country in question. For example, the New York Times’ website is domestic online media in the United States, but not in India, even though it operates bureaus in India. Media includes any source reporting on current events or political issues, ranging from well-established brands to newsletters and websites run by an individual.

Cyber security threats include penetration of private digital networks, using means ranging from exploiting software vulnerabilities, password cracking, or social engineering (e.g., tricking

individuals into revealing passwords or other information necessary to break into a digital system) to obtain information or disrupt an organization or individual's use of digital networks and tools. They also include unauthorized alterations of an individual or organization's digital presence, such as defacing websites and commandeering social media accounts. These threats range from unsophisticated (e.g., exploitation of failure to password protect private networks or use of common passwords by authorized users, and spear phishing) to moderate (e.g., embedding malicious code in emails or exploiting well-known software flaws that organizations have failed to patch), to sophisticated (e.g., exploiting unknown exploits in commonly used software or even embedding exploits into commercial systems unbeknownst to their creators).

Clarification: When we discuss shutting down online content, please consider instances where a website (or websites) have been taken entirely offline as well as instances where a website (or websites) have been slowed down or had access similarly intentionally inhibited, such that use of this website is challenging. In other words, both outright shutting down and more subtle measures that inhibit access should be considered when answering these questions.

Clarification: When we discuss "censorship" or "censoring" content online, we are not concerned with censorship of topics such as child pornography, highly classified information such as military or intelligence secrets, or defamatory speech, unless this sort of censorship is used as a pretext for censoring political information or opinions.

2.2.18.1 Government cyber security capacity (v2smgovcapsec)

Long tag: vdem_coder_level_v2smgovcapsec

Original tag: v2smgovcapsec

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Does the government have sufficiently technologically skilled staff and resources to mitigate harm from cyber-security threats?

RESPONSES:

0: No. The government does not have the capacity to counter even unsophisticated cyber security threats.

1: Not really. The government has the resources to combat only unsophisticated cyber attacks.

2: Somewhat. The government has the resources to combat moderately sophisticated cyber attacks.

3: Mostly. The government has the resources to combat most sophisticated cyber attacks.

4: Yes. The government has the resources to combat sophisticated cyber attacks, even those launched by highly skilled actors.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 9-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see V-Dem Methodology).

CITATION: Mechkova et al. (2019, *Digital Society Project Working Paper* 2019:1); Pemstein et al. (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 2000-2022

2.2.18.2 Government Internet filtering capacity (v2smgovfilcap)

Long tag: vdem_coder_level_v2smgovfilcap

Original tag: v2smgovfilcap

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Independent of whether it actually does so in practice, does the government have the technical capacity to censor information (text, audio, images, or video) on the Internet by filtering (blocking access to certain websites) if it decided to?

RESPONSES:

0: The government lacks any capacity to block access to any sites on the Internet.

1: The government has limited capacity to block access to a few sites on the Internet.

2: The government has adequate capacity to block access to most, but not all, specific sites on the Internet if it wanted to.

3: The government has the capacity to block access to any sites on the Internet if it wanted to.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 9-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see V-Dem Methodology).

CITATION: Mechkova *et al.* (2019, *Digital Society Project Working Paper* 2019:1); Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 2000-2022

2.2.18.3 Government Internet filtering in practice (v2smgovfilprc)

Long tag: vdem_coder_level_v2smgovfilprc

Original tag: v2smgovfilprc

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: How frequently does the government censor political information (text, audio, images, or video) on the Internet by filtering (blocking access to certain websites)?

RESPONSES:

0: Extremely often. It is a regular practice for the government to remove political content, except to sites that are pro-government.

1: Often. The government commonly removes online political content, except sites that are pro-government.

2: Sometimes. The government successfully removes about half of the critical online political content.

3: Rarely. There have been only a few occasions on which the government removed political content.

4: Never, or almost never. The government allows Internet access that is unrestricted, with the exceptions mentioned in the clarifications section.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 9-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see V-Dem Methodology).

CITATION: Mechkova *et al.* (2019, *Digital Society Project Working Paper* 2019:1); Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 2000-2022

2.2.18.4 Government Internet shut down in practice (v2smgovshut)

Long tag: vdem_coder_level_v2smgovshut

Original tag: v2smgovshut

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: How often does the government shut down domestic access to the Internet?

RESPONSES:

0: Extremely often. It is a regular practice for the government to shut down domestic access to the Internet.

1: Often. The government shut down domestic access to the Internet numerous times this year.

2: Sometimes. The government shut down domestic access to the Internet several times this year.

3: Rarely but there have been a few occasions throughout the year when the government shut down domestic access to Internet.

4: Never, or almost never. The government does not typically interfere with the domestic access to the Internet.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 9-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see V-Dem Methodology).

CITATION: Mechkova *et al.* (2019, *Digital Society Project Working Paper* 2019:1); Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 2000-2022

2.2.18.5 Government Internet shut down capacity (v2smgovshutcap)

Long tag: vdem_coder_level_v2smgovshutcap

Original tag: v2smgovshutcap

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Independent of whether it actually does so in practice, does the government have the technical capacity to actively shut down domestic access to the Internet if it decided to?

CLARIFICATION: A domestic Internet connection is any connection originating physically within the country, whether over wired, wireless, or satellite networks. This question asks what proportion of potential Internet connections of domestic origin the government has the capacity to render inoperable.

RESPONSES:

0: The government lacks the capacity to shut down any domestic Internet connections.

1: The government has the capacity to shut down roughly a quarter of domestic access to the Internet.

2: The government has the capacity to shut down roughly half of domestic access to the Internet.

3: The government has the capacity to shut down roughly three quarters of domestic access to the Internet.

4: The government has the capacity to shut down all, or almost all, domestic access to the Internet.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 9-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see V-Dem Methodology).

CITATION: Mechkova *et al.* (2019, *Digital Society Project Working Paper* 2019:1); Pemstein

et al. (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 2000-2022

2.2.18.6 Government social media shut down in practice (v2smgovsm)

Long tag: vdem_coder_level_v2smgovsm

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: How prevalent is the usage of social media platforms that are wholly controlled by either the government or its agents in this country?

RESPONSES:

0: Essentially all social media usage takes place on platforms controlled by the state.

1: Most usage of social media is on state-controlled platforms, although some groups use non-state-controlled alternatives.

2: There is significant usage of both state-controlled and non-state-controlled social media platforms.

3: While some state-controlled social media platforms exist, their usage only represents a small share of social media usage in the country.

4: Practically no one uses state-controlled social media platforms.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 9-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see V-Dem Methodology).

CITATION: Mechkova *et al.* (2019, *Digital Society Project Working Paper* 2019:1); Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

Long tag: vdem_coder_level_v2smgovsmcenprc

Original tag: v2smgovsmcenprc

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: To what degree does the government censor political content (i.e., deleting or filtering specific posts for political reasons) on social media in practice?

RESPONSES:

0: The government simply blocks all social media platforms.

1: The government successfully censors all social media with political content.

2: The government successfully censors a significant portion of political content on social media, though not all of it.

3: The government only censors social media with political content that deals with especially sensitive issues.

4: The government does not censor political social media content, with the exceptions mentioned in the clarifications section.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 9-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see V-Dem Methodology).

CITATION: Mechkova *et al.* (2019, *Digital Society Project Working Paper* 2019:1); Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

2.2.18.9 Government social media monitoring (v2smgovsmmon)

Long tag: vdem_coder_level_v2smgovsmmon

Original tag: v2smgovsmmon

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: How comprehensive is the surveillance of political content in social media by the government or its agents?

RESPONSES:

0: Extremely comprehensive. The government surveils virtually all content on social media.

1: Mostly comprehensive. The government surveils most content on social media, with comprehensive monitoring of most key political issues.

2: Somewhat comprehensive. The government does not universally surveil social media but can be expected to surveil key political issues about half the time.

3: Limited. The government only surveils political content on social media on a limited basis.

4: Not at all, or almost not at all. The government does not surveil political content on social media, with the exceptions mentioned in the clarifications section.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 9-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see V-Dem Methodology).

YEARS: 2000-2022

2.2.19 Digital Society Survey - Online Media Polarization

The Digital Society Survey, designed by the Digital Society Project, contains questions pertaining to the political environment of the internet and social media. The data collected through expert-coded surveys provides information on topics related to coordinated information operations, digital media freedom, online media polarization, social cleavages as well as state internet regulation capacity and approach.

Principal investigators for the Digital Society Project are Valeriya Mechkova, Daniel Pemstein, Brigitte Seim, Steven Wilson.

For more information, please visit www.digitalsocietyproject.org.

Instructions to the coders (as shown in the surveys)

Digital society: The following survey contains questions pertaining to the political environment of the Internet and social media. Please bear in mind the following definitions as you respond to questions on this survey:

The government and its agents include official government organs, such as bureaucracies, courts, intelligence services, and the military, but also unofficial agents, such as officially unaffiliated cyber-warfare operatives who perform services, even “off-book” work, on behalf of the government.

Major political parties include the group of political parties that hold a significant number of seats in national legislative body(-ies), or earn a significant number of votes in elections for the executive. When we ask you to consider “major political parties,” you do not need to consider parties that run in elections but receive only a small minority of seats or votes, or those that receive no seats at all.

We define the Internet as all information that people access over public and private digital networks, worldwide. The Internet includes both publicly accessible digital spaces and private or gated information transmission platforms. The Internet does not include traditional media transmission mechanisms such as paper, television, traditional voice telephone, and radio.

Social media are a subset of Internet platforms that enable normal individuals to create and share content with networks of other people. Social media platforms are available to the public, although content on such networks may be shared privately within subgroups of users. Social media includes both publicly visible, or semi-public platforms, like Facebook, Flickr, Friendster, Google+, Instagram, Myspace, LinkedIn, Twitter, VKontakte, and Weibo and private social networking and messaging platforms like Signal, Slack, Snapchat, or WhatsApp.

Domestic online media is any media source originating in the country in question. For example, the New York Times’ website is domestic online media in the United States, but not in India, even though it operates bureaus in India. Media includes any source reporting on current events or political issues, ranging from well-established brands to newsletters and websites run by an individual.

Cyber security threats include penetration of private digital networks, using means ranging from exploiting software vulnerabilities, password cracking, or social engineering (e.g., tricking individuals into revealing passwords or other information necessary to break into a digital system) to obtain information or disrupt an organization or individual’s use of digital networks and tools. They also include unauthorized alterations of an individual or organization’s digital presence, such as defacing websites and commandeering social media accounts. These threats range from unsophisticated (e.g., exploitation of failure to password protect private networks or use of common passwords by authorized users, and spear phishing) to moderate (e.g., embedding malicious code in emails or exploiting well-known software flaws that organizations have failed to patch), to sophisticated (e.g., exploiting unknown exploits in commonly used software or even embedding exploits into commercial systems unbeknownst to their creators).

Clarification: When we discuss shutting down online content, please consider instances where a website (or websites) have been taken entirely offline as well as instances where a website (or websites) have been slowed down or had access similarly intentionally inhibited, such that use of this website is challenging. In other words, both outright shutting down and more subtle measures that inhibit access should be considered when answering these questions.

Clarification: When we discuss “censorship” or “censoring” content online, we are not concerned with censorship of topics such as child pornography, highly classified information such as military or intelligence secrets, or defamatory speech, unless this sort of censorship is used as a pretext for censoring political information or opinions.

2.2.19.1 Online media fractionalization (v2smmefra)

Long tag: vdem_coder_level_v2smmefra

Original tag: v2smmefra

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Do the major domestic online media outlets give a similar presentation of major (political) news?

RESPONSES:

0: No. The major domestic online media outlets give opposing presentation of major events.

1: Not really. The major domestic online media outlets differ greatly in the presentation of major events.

2: Sometimes. The major domestic online media outlets give a similar presentation of major events about half the time.

3: Mostly. The major domestic online media outlets mostly give a similar presentation of

major events.

4: Yes. Although there are small differences in representation, the major domestic online media outlets give a similar presentation of major events.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 9-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see V-Dem Methodology).

2.2.19.2 Online media existence (v2smonex)

Long tag: vdem_coder_level_v2smonex

Original tag: v2smonex

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Do people consume domestic online media?

RESPONSES:

0: Not at all. No one consumes domestic online media. Skip next question if this answer is selected.

1: Limited. Domestic online media consumption is limited.

2: Relatively extensive. Domestic online media consumption is common.

3: Extensive. Almost everyone consumes domestic online media.

ORDERING: if 0, skip v2smonper

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 9-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see V-Dem Methodology).

CITATION: Mechkova *et al.* (2019, *Digital Society Project Working Paper* 2019:1); Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 2000-2022

2.2.19.3 Online media perspectives (v2smonper)

Long tag: vdem_coder_level_v2smonper

Original tag: v2smonper

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Do the major domestic online media outlets represent a wide range of political perspectives?

RESPONSES:

0: The major domestic online media outlets represent only the government's perspective.

1: The major domestic online media outlets represent only the perspectives of the government and a government approved, semi-official opposition party.

2: The major domestic online media outlets represent a variety of political perspectives but they systematically ignore at least one political perspective that is important in this society.

3: All perspectives that are important in this society are represented in at least one of the

major domestic online media outlets.

4: All perspectives that are important in this society are represented in many major domestic online media outlets.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 9-13.

YEARS: 2000-2022

2.2.20 V-Dem Indicators - Sovereignty and State

Instructions to the coders (as shown in the surveys)

Sovereignty: This section addresses a number of issues concerning the sovereignty of the state. A state is political organization that organizes compulsory domination over a fixed territory on a continual basis. With respect to state sovereignty, we are interested in measuring two distinct areas of sovereignty. The first is an attribute of states within the context of the international system. Here, we are interested in the state's autonomy from other actors in the system. The second component of sovereignty concerns the relationship of the state to the population and territory over which it claims to rule. Here, we want to gauge the extent of recognition of the preeminent authority of the state over its claimed territory and population.

Sovereignty – Historical clarification: This section addresses a number of issues concerning the state. A state is a political organization that organizes compulsory domination over a fixed territory on a continual basis. The questions concern two general themes: state sovereignty and state administration.

With respect to state sovereignty, we are interested in measuring two distinct areas of sovereignty. The first is an attribute of states within the context of the international system. Here, we are interested in the state's autonomy from and recognition by other actors in the system. The second component of sovereignty concerns the relationship of the state to the population and territory over which it claims to rule. Here, we want to gauge the extent of recognition of the preeminent authority of the state over its claimed territory and population.

A second attribute of states is the state administration: the set of institutions that administer and implement governmental decisions. Here we are mainly interested in the professionalization, or lack thereof, of the state administrative staff – in this context termed the state administrators.

The State: “This section addresses a number of issues concerning the state. A state is a political organization that organizes compulsory domination over a fixed territory on a continual basis. The questions concern two general themes: state sovereignty and state administration.

With respect to state sovereignty, we are interested in measuring two distinct areas of sovereignty. The first is an attribute of states within the context of the international system. Here, we are interested in the state's autonomy from and recognition by other actors in the system. The second component of sovereignty concerns the relationship of the state to the population and territory over which it claims to rule. Here, we want to gauge the extent of recognition of the preeminent authority of the state over its claimed territory and population.

A second attribute of states is the state administration: the set of institutions that administer and implement governmental decisions. Here we are mainly interested in the professionalization, or lack thereof, of the state administrative staff—in this context termed the state administrators.”

2.2.20.1 Criteria for appointment decisions in the armed forces (v2stcritapparm)

Long tag: vdem_coder_level_v2stcritapparm

Original tag: v2stcritapparm

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Agnes Cornell, Jan Teorell

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: To what extent are appointment decisions in the armed forces based on personal or political connections or alternatively based on skills and merit?

CLARIFICATION: Appointment decisions include hiring, firing and promotions in the armed forces. Note that the question refers to the typical *de facto* (rather than *de jure*) situation obtaining in the armed forces. If there are large differences between different branches of the armed forces or between top and lower level ranks please try to consider the average when answering the question.

RESPONSES:

0: All appointment decisions in the armed forces are based on personal or political connections. None are based on skills and merit.

1: Most appointment decisions in the armed forces are based on personal or political connections. Only a few are based on skills and merit.

2: Approximately half of the appointment decisions in the armed forces are based on personal or political connections. Approximately half are based on skills and merit.

3: Only few of the appointment decisions in the armed forces are based on personal or political connections. Most are based on skills and merit.

4: None of the appointment decisions in the armed forces are based on personal or political connections. All are based on skills and merit.

ORDERING: Ordinal.

DATA RELEASE: 9-13.

Long tag: vdem_coder_level_v2stfisccap

Original tag: v2stfisccap

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Jan Teorell

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: On which of the following sources of revenue does the central government primarily rely to finance its activities?

RESPONSES:

0: The state is not capable of raising revenue to finance itself.

1: The state primarily relies on external sources of funding (loans and foreign aid) to finance its activities.

2: The state primarily relies on directly controlling economic assets (natural resource rents, public monopolies, and the expropriation of assets within and outside the country) to finance its activities.

3: The state primarily relies on taxes on property (land taxes) and trade (customs duties).

4: The state primarily relies on taxes on economic transactions (such as sales taxes) and/or taxes on income, corporate profits and capital.

SCALE: Ordinal.

DATA RELEASE: 9-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

2.2.20.6 Domestic Autonomy (v2svdomaut)

Long tag: vdem_coder_level_v2svdomaut

Original tag: v2svdomaut

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Michael Bernhard

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Is the state autonomous from the control of other states with respect to the conduct of domestic policy?

CLARIFICATION: The question of domestic autonomy does not include restrictions emanating from treaties (*e.g.*, NATO), international organizations (*e.g.*, the WTO), or confederations (*e.g.*, the European Union) if these agreements are freely negotiated by the state and if the state is free to exit from that treaty, organization, or confederation. Nor does it include restrictions on policymaking emanating from international market forces and trans-national corporations.

RESPONSES:

0: Non-autonomous. National level authority is exercised by an external power, either by law or in practice. The most common examples of this are direct colonial rule and military occupation (*e.g.* quadripartite occupation of Germany in 1945). It also includes situations in which domestic actors provide *de jure* cover for *de facto* control by a foreign power (*e.g.* Vichy France). However, control of some part of the territory of a state by an enemy during war is not considered control by external actors if the sovereign government remains on scene and continues to wage conventional war (*e.g.*, the USSR during WW II).

1: Semi-autonomous. An external political actor directly constrains the ability of domestic actors to rule, decides who can or cannot rule through formal rules or informal understandings, or precludes certain policies through explicit treaty provisions or well-understood rules of the game from which the subject state cannot withdraw. Examples include Soviet "satellite" states in Eastern Europe, and situations where colonial powers grant limited powers of national self-government to their possessions (*e.g.*, protectorates and limited home government).

2: Autonomous. Domestic political actors exercise political authority free of the direct control of external political actors.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

2.2.20.7 International autonomy (v2svinlaut)

Long tag: vdem_coder_level_v2svinlaut

Original tag: v2svinlaut

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Michael Bernhard

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Is the state autonomous from the control of other states with respect to the conduct of its foreign policy?

RESPONSES:

0: Non-autonomous. Foreign policy is controlled by an external power, either *de facto* or *de jure*. The most common examples of this are colonial rule and military occupation (*e.g.* quadripartite occupation of Germany in 1945). Situations in which domestic actors provide *de jure* cover for *de facto* control by a foreign power should not be construed as semi-autonomy (*e.g.* Vichy France). Governments in exile that control underground forces waging unconventional warfare are not considered as mitigating an occupation regime (*e.g.* countries under German occupation during WWII).

1: Semi-autonomous. An external political actor directly constrains the ability of domestic

actors to pursue an independent foreign policy course in some important areas. This may be the product of explicit treaty provisions or well-understood rules of the game from which the subject state cannot withdraw. Examples would include Soviet strictures over rule in so-called "satellite" states in Eastern Europe, and explicitly negotiated postwar settlements (*e.g.* Austria following WWII).

2: Autonomous. Domestic political actors exercise foreign policy free of the direct control of external political actors. Direct control is meant to exclude the exercise of constraint or the impact of interdependence in the international system. Treaties in which states concede some part of that control to a supra- or international organization voluntarily, and from which there is a possibility of exit should not be interpreted as a violation of autonomy.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

2.2.20.8 State authority over territory (v2svstterr)

Long tag: vdem_coder_level_v2svstterr

Original tag: v2svstterr

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Michael Bernhard

ADDITIONAL VERSIONS: *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Over what percentage (percent) of the territory does the state have effective control?

CLARIFICATION: With this question we seek to judge the extent of recognition of the preeminent authority of the state over its territory. We are not interested here in perfect control by the state, or whether it is relatively effective in comparison to other states, but an assessment of the areas over which it is hegemonic, *e.g.* where it is recognized as the preeminent authority and in a contest of wills it can assert its control over political forces that reject its authority. Several illustrative examples may help in this coding. During civil wars the claim of the state to rule is effectively neutralized by insurgent groups (*e.g.*, the Tamil Tigers in Sri Lanka). There are also situations in which criminals or warlords exert control in contravention of state authority (*e.g.* opium growers in parts of Indochina). There are also cases of failed states where the central government cannot assert control over a share of its territory (*e.g.*, contemporary Somalia). Here, we ask you to estimate the size of the territory that the state has effective control over, as a percentage (percent) of the total territory that is officially part of the country.

By "officially part of the country" we refer to international law. In cases where international law is not entirely clear, we refer you to general understandings. For example, China claims sovereignty over Taiwan, but it remains under the control of its own government. For purposes of this question, Taiwan should not be considered a failure to control its territory by the government of the PRC.

RESPONSES:

Percent.

SCALE: Interval.

DATA RELEASE: 1-6, 10-13.

CROSS-CODER AGGREGATION: Bootstrapped.

CLEANING: Set to missing when v2svindep is 0

CITATION: *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

2.2.21 Historical V-Dem - Civil Liberty

This part of the codebook contains variables pertaining to the Historical V-Dem data collection. A maximum of 91 countries are included in the sample (see the country table), but some variables (in particular C type variables) cover fewer countries, as coding is still ongoing. For more information on the Historical V-Dem project, please refer to the Organization and Management document (<https://www.v-dem.net/static/website/img/refs/orgmanv111.pdf>) or the Historical V-Dem page: <https://www.v-dem.net/hdata.html>. The vast majority of questions coded by Historical V-Dem are V-Dem indicators previously coded back to 1900, and these indicators are found in other sections of the codebook with merged time series extending all the way from 1789 to the present.

The *Historical V-Dem - Civil Liberty*- section includes new A, A* and C type indicators that have (at least so far) only been coded for Historical V-Dem, with the modal time series spanning the years 1789-1920 (although time series coverage is different for some variables). This section also includes v3elcomvot, which is coded as a type C variable in Historical V-Dem, while v2elcomvot is coded as a type A variable in Contemporary V-Dem.

For instructions given to the coders (as shown in the surveys), please see introductions to the corresponding theme in the corresponding V-Dem Indicators section.

2.2.21.1 Labor rights (v3cllabrig)

Long tag: vdem_coder_level_v3cllabrig

Original tag: v3cllabrig

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): John Gerring

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Does labor enjoy the right to organize freely and bargain collectively?

CLARIFICATION: Refers to actual practice not formal (*de jure*) rights. If practices vary across the country, or across sectors, please consider the overall situation of labor.

RESPONSES:

0: Independent labor unions (free from state or ruling party control) are not allowed.

1: Independent labor unions are allowed, at least in some sectors of the economy or some sections of the country. However, they are subject to harassment by the police, paramilitary groups, business associations, or other groups. Harassment refers to systematic beatings, imprisonment, outlawing of specific unions, and other actions that seriously impinge upon the ability of unions to organize and bargain collectively.

2: Independent labor unions are allowed and they do not face violent repression but the legal climate is not friendly (*e.g.*, "closed shop" rules are widespread), making it difficult to organize and bargain collectively.

3: Independent labor unions are allowed and may organize freely in all sectors of the economy.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 8-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2010

2.2.22 Historical V-Dem - Elections

This part of the codebook contains variables pertaining to the Historical V-Dem data collection. A maximum of 91 countries are included in the sample (see the country table), but some variables (in particular C type variables) cover fewer countries, as coding is still ongoing. For more

information on the Historical V-Dem project, please refer to the Organization and Management document (<https://www.v-dem.net/static/website/img/refs/orgmanv111.pdf>) or the Historical V-Dem page: <https://www.v-dem.net/hdata.html>. The vast majority of questions coded by Historical V-Dem are V-Dem indicators previously coded back to 1900, and these indicators are found in other sections of the codebook with merged time series extending all the way from 1789 to the present.

The *Historical V-Dem Elections*- section includes new A, A* and C type indicators that have (at least so far) only been coded for Historical V-Dem, with the modal time series spanning the years 1789-1920 (although time series coverage is different for some variables). This section also includes v3elcomvot, which is coded as a type C variable in Historical V-Dem, while v2elcomvot is coded as a type A variable in Contemporary V-Dem.

For instructions given to the coders (as shown in the surveys), please see introductions to the corresponding theme in the corresponding V-Dem Indicators section.

2.2.22.1 Voting, voice or ballot (v3elbalpap)

Long tag: vdem_coder_level_v3elbalpap

Original tag: v3elbalpap

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Jan Teorell

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: How are votes cast?

RESPONSES:

0: Votes are cast verbally (viva voce).

1: Both voice votes and paper ballots are used, but verbal voting is more common.

2: Voice voting and paper ballots are both common.

3: Both voice votes and paper ballots are used, but paper ballots are more common.

4: All votes are cast on paper ballots.

ORDERING: If coded "0" for entire period, skip the following question (v3elbalstat), meaning: jump to v3elecsedf.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 8-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

DATE SPECIFIC: Election-specific dates (v3eltype).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).
YEARS: 1789-2010

2.2.22.3 Compulsory voting (H) (v3elcomvot)

Long tag: vdem_coder_level_v3elcomvot

Original tag: v3elcomvot

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Pamela Paxton

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Is voting compulsory (for those eligible to vote) in national elections?

RESPONSES:

0: No.

1: Yes. But there are no sanctions or sanctions are not enforced.

2: Yes. Sanctions exist and are enforced, but they impose minimal costs upon the offending voter.

3: Yes. Sanctions exist, they are enforced, and they impose considerable costs upon the offending voter.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 8-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2010

2.2.22.4 Secret ballot, de facto (v3elecsedf)

Long tag: vdem_coder_level_v3elecsedf

Original tag: v3elecsedf

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Jan Teorell

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Are polling stations organized to guarantee voters a secret, anonymous choice?

RESPONSES:

0: No. Voters cannot make a secret, anonymous choice.

1: No. Some voters can make a secret, anonymous choice, but voting secrecy is in most instances violated.

2: Mixed. Voting secrecy and anonymity is assured to roughly the same extent as it is violated.

3: Yes. Most voters can make a secret, anonymous choice, but voting secrecy is in some instances violated.

4: Yes. All voters can make a secret, anonymous choice.
SCALE: Ordinal, converted to interval by the measurement model.
DATA RELEASE: 8-13.
CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).
CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

2.2.22.5 Malapportionment legislature/lower chamber (v3elmalalc)

Long tag: vdem_coder_level_v3elmalalc

Original tag: v3elmalalc

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Daniel Ziblatt

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Is there a large discrepancy in the vote/seat ratio across electoral districts for the lower (or unicameral) chamber?

CLARIFICATION: *quot*;Malapportionment*quot*; characterizes a situation in which voters in some districts have more power by virtue of a more favorable vote/seat ratio. For example, if seats have not been reapportioned in a long time rural areas may be over-represented relative to urban areas simply because the latter have grown more rapidly than the former. (This question does not address inequality of votes based on class or other criteria.) Leave blank if there is no lower (or unicameral) chamber.

RESPONSES:

0: There is a high degree of malapportionment. Vote/seat ratios across districts differ by as much as 50:1.

1: There is a substantial degree of malapportionment. Vote/seat ratios across districts differ as much as 10:1.

2: There is some degree of malapportionment. Vote/seat ratios across districts differ by as much as 2:1.

3: There is modest or no malapportionment. Vote/seat ratios across districts differ by less than 2:1.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 8-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2010

2.2.22.6 Malapportionment upper chamber (v3elmalauc)

Long tag: vdem_coder_level_v3elmalauc

Original tag: v3elmalauc

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Daniel Ziblatt

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Does the electoral system (including the size of electoral districts) involve large differences in the ratios of votes to representatives in elections for the upper chamber?

CLARIFICATION: This question does not address inequality of votes based on class or other criteria but only the relationship between votes and seats. Leave blank if no upper chamber.

RESPONSES:

0: There is a high degree of malapportionment. Vote/seat ratios across districts differ by as much as 50:1.

1: There is a substantial degree of malapportionment. Vote/seat ratios across districts differ as much as 10:1.

2: There is some degree of malapportionment. Vote/seat ratios across districts differ by as much as 2:1.

3: There is modest or no malapportionment. Vote/seat ratios across districts differ by less than 2:1.

2.2.24.1 Lower chamber budget (v3lgbudglo)

Long tag: vdem_coder_level_v3lgbudglo

Original tag: v3lgbudglo

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): John Gerring

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Is the lower chamber of the legislature required to approve the budget?

CLARIFICATION: The budget refers to major revenue (appropriations) and expenditure (spending) bills. Typically, these are passed annually or bi-annually. Approval is understood to mean a formal vote on the floor of the chamber in which at least 50percent of those voting approve the measure.

RESPONSES:

0: No. Includes situations in which (a) there are no formal budget bills, or (b) the executive entirely by-passes the lower house or ignores its actions.

1: Yes. Includes situations in which (a) the executive exercises selective (quot;line-itemquot;) vetoes, and (b) there is a prolonged period in which no budget is passed and the executive is unable to raise and spend money, or must operate under the terms of the previous budget.

SCALE: Dichotomous

DATA RELEASE: 8-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CLEANING: Set to missing when v3lgbicam is 0

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2010

V-Dem Methodology).

CLEANING: Set to missing when v3lgbicam is 0 or 1

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2010

2.2.24.3 Lower chamber in session (v3lginses)

Long tag: vdem_coder_level_v3lginses

Original tag: v3lginses

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): John Gerring, Carl Henrik Knutsen

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: During the year, for how long was the lower (or unicameral) chamber of the legislature in session?

CLARIFICATION: If there is only one session during the year, your answer should reflect the length of this session. If there are multiple sessions, your answer should reflect the total time spent in session, adding together the length of all session during the year.

RESPONSES:

0: It did not convene at all during the year.

1: It did convene, and was in session for less than 1 month, in total.

2: It did convene, and was in session for 1-2 months, in total.

3: It did convene, and was in session for 3-5 months, in total.

4: It did convene, and was in session for 6-8 months, in total.

5: It did convene, and was in session for 9 months or more, in total.

2.2.24.4 Upper chamber in session (v3lginsesup)

Long tag: vdem_coder_level_v3lginsesup

Original tag: v3lginsesup

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): John Gerring, Carl Henrik Knutsen

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: During the year, for how long was the upper chamber of the legislature in session?

CLARIFICATION: If there is only one session during the year, your answer should reflect the length of this session. If there are multiple sessions, your answer should reflect the total time spent in session, adding together the length of all sessions during the year.

RESPONSES:

0: It did not convene at all during the year.

1: It did convene, and was in session for less than 1 month, in total.

2: It did convene, and was in session for 1-2 months, in total.

3: It did convene, and was in session for 3-5 months, in total.
4: It did convene, and was in session for 6-8 months, in total.
5: It did convene, and was in session for 9 months or more, in total.
SCALE: Ordinal, converted to interval by the measurement model.
DATA RELEASE: 8-13.

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).
YEARS: 1789-2010

2.2.25 Historical V-Dem - Historical V-Dem Modified

This part of the codebook contains variables pertaining to the Historical V-Dem data collection. A maximum of 91 countries are included in the sample (see the country table), but some variables (in particular C type variables) cover fewer countries, as coding is still ongoing. For more information on the Historical V-Dem project, please refer to the Organization and Management document (<https://www.v-dem.net/static/website/img/refs/orgmanv111.pdf>) or the Historical V-Dem page: <https://www.v-dem.net/hdata.html>. The vast majority of questions coded by Historical V-Dem are V-Dem indicators previously coded back to 1900, and these indicators are found in other sections of the codebook with merged time series extending all the way from 1789 to the present.

V-Dem indicators that are different to their contemporary counterparts, for the purpose of gathering additional relevant information for the historical period in Historical V-Dem. These variables are also merged into their v2 equivalents.

First, In contrast to contemporary V-Dem, Historical V-Dem codes upper chamber elections and thus also includes eltype category 2. Those observations are treated as missing in the historical-contemporary merged version of v2eltype. Due to election specific variables being cleaned by v2eltype, these do not include upper chamber elections either. In order to include historical data on upper chamber elections we thus also provide v3eltype and v3 election specific variables that are cleaned by v3eltype.

Second, Historical V-Dem codes additional chambers compared to contemporary V-Dem. When merging v2lgbicam and v3lgbicam the categories get recoded as follows:

- Categories 3 (tricameral) and 4 (quadricameral) become category 2 for the merged v2lgbicam.
- Category 9 (Other types of legislature) becomes category 0 for the merged v2lgbicam.

In order to include historical data on additional chambers, we thus also provide v3lgbicam and v3 chamber specific variables that are cleaned by v3lgbicam.

2.2.25.1 Lower chamber committees (v3lgbcomslo)

Long tag: vdem_coder_level_v3lgbcomslo

Original tag: v3lgbcomslo

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Steven Fish, Matthew Kroenig

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Does the lower (or unicameral) chamber of the legislature have a functioning committee system?

RESPONSES:

0: No, there are no committees.

1: Yes, but there are only special (not permanent) committees.
2: Yes, there are permanent committees, but they are not very significant in affecting the course of policy.
3: Yes, there are permanent committees that have strong influence on the course of policymaking.
DATA RELEASE: 8-13.
CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see V-Dem Methodology).

2.2.25.2 Legislature corrupt activities (v3lgcrrpt)

Long tag: vdem_coder_level_v3lgcrrpt

Original tag: v3lgcrrpt

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Steven Fish, Matthew Kroenig

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Do members of the legislature abuse their position for financial gain?

CLARIFICATION: This includes any of the following: (a) accepting bribes, (b) helping to obtain government contracts for firms that the legislator (or his/her family/friends/political supporters) own, (c) doing favors for firms in exchange for the opportunity of employment after leaving the legislature, (d) stealing money from the state or from campaign donations for personal use.

Please make your best estimate, based upon what is known or suspected to be true.

RESPONSES:

0: Never, or hardly ever.

1: Very occasionally. There may be a few legislators who engage in these activities but the vast majority do not.

2: Sometimes. Some legislators probably engage in these activities.

3: Often. Many legislators probably engage in these activities.

4: Commonly. Most legislators probably engage in these activities.

DATA RELEASE: 8-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see V-Dem Methodology).

CLEANING: Set to missing when v3lgbicam is 0

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2010

2.2.25.3 Legislature dominant chamber (v3lgdomchm)

Long tag: vdem_coder_level_v3lgdomchm

Original tag: v3lgdomchm

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Steven Fish, Matthew Kroenig

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: If the legislature is bicameral, which chamber is dominant?

RESPONSES:

- 0: The lower chamber is clearly dominant.
- 1: The lower chamber is somewhat more powerful on most issues.
- 2: They are roughly co-equal in power.
- 3: The upper chamber is somewhat more powerful on most issues.
- 4: The upper chamber is clearly dominant.

DATA RELEASE: 8-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see V-Dem Methodology).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2010

2.2.25.4 Legislature controls resources (v3lgbfunds)

Long tag: vdem_coder_level_v3lgbfunds

Original tag: v3lgbfunds

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Steven Fish, Matthew Kroenig

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: In practice, does the legislature control the resources that finance its own internal operations and the perquisites of its members?

RESPONSES:

0: No. The benefits legislators receive or the finances needed for the legislature's operation depend on remaining in good standing with an outside authority, such as the executive.

1: Yes

DATA RELEASE: 8-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see V-Dem Methodology).

CLEANING: Set to missing when v3lgbicam is 0

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2010

2.2.25.5 Legislature investigates in practice (v3lginvstp)

Long tag: vdem_coder_level_v3lginvstp

Original tag: v3lginvstp

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Steven Fish, Matthew Kroenig

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: If the executive were engaged in unconstitutional, illegal, or unethical activity, how likely is it that a legislative body (perhaps a whole chamber, perhaps a committee, whether aligned with government or opposition) would conduct an investigation that would result in a decision or report that is unfavorable to the executive?

RESPONSES:

0: Extremely unlikely.

1: Unlikely.

2: As likely as not.

3: Likely.

4: Certain or nearly certain.
DATA RELEASE: 8-13.

2.2.26 Historical V-Dem - Political Parties

This part of the codebook contains variables pertaining to the Historical V-Dem data collection. A maximum of 91 countries are included in the sample (see the country table), but some variables (in particular C type variables) cover fewer countries, as coding is still ongoing. For more information on the Historical V-Dem project, please refer to the Organization and Management document (<https://www.v-dem.net/static/website/img/refs/orgmanv111.pdf>) or the Historical V-Dem page: <https://www.v-dem.net/hdata.html>. The vast majority of questions coded by Historical V-Dem are V-Dem indicators previously coded back to 1900, and these indicators are found in other sections of the codebook with merged time series extending all the way from 1789 to the present.

The *Historical V-Dem - Political Parties*- section includes new A, A* and C type indicators that have (at least so far) only been coded for Historical V-Dem, with the modal time series spanning the years 1789-1920 (although time series coverage is different for some variables). This section also includes v3elcomvot, which is coded as a type C variable in Historical V-Dem, while v2elcomvot is coded as a type A variable in Contemporary V-Dem.

For instructions given to the coders (as shown in the surveys), please see introductions to the corresponding theme in the corresponding V-Dem Indicators section.

2.2.26.1 Party identification (v3partyid)

Long tag: vdem_coder_level_v3partyid

Original tag: v3partyid

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): John Gerring

ADDITIONAL VERSIONS: *_nr

QUESTION: Do voters identify with a political party?

CLARIFICATION: When party identification is strong, vote choice is largely determined by a voter's party affiliation (and his/her affiliation with that party) rather than attachments to particular candidates, non-partisan issue-positions, or material incentives (*e.g.*, vote-buying). Likewise, when party identification is strong, voters retain loyalty to a single party rather than switching from one party to another across elections or across offices in the same election (ticket-splitting). In this fashion we can somewhat crudely distinguish between partisans and non-partisans. Note that this question refers only to voters, not to members of the population who do not vote (because they are disenfranchised, choose not to vote, or are discouraged from voting). Leave this question blank if there are no national elections.

RESPONSES:

0: There are national elections, but there are no political parties.

1: Only one party is allowed to participate in national elections.

2: More than one party participates, and nearly all voters are non-partisans.

3: More than one party participates, and most voters are non-partisans.

4: More than one party participates, and voters are equally divided between partisans and non-partisans.

5: More than one party participates, and most voters are partisans.

6: More than one party participates, and nearly all voters are partisans.

SCALE: Nominal, but categories 2–6 constitute ordinal.

DATA RELEASE: 8-13.

CROSS-CODER AGGREGATION: Mean.

CITATION: *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2010

2.2.27 Historical V-Dem - Sovereignty and State

This part of the codebook contains variables pertaining to the Historical V-Dem data collection. A maximum of 91 countries are included in the sample (see the country table), but some variables (in particular C type variables) cover fewer countries, as coding is still ongoing. For more information on the Historical V-Dem project, please refer to the Organization and Management document (<https://www.v-dem.net/static/website/img/refs/orgmanv111.pdf>) or the Historical V-Dem page: <https://www.v-dem.net/hdata.html>. The vast majority of questions coded by Historical V-Dem are V-Dem indicators previously coded back to 1900, and these indicators are found in other sections of the codebook with merged time series extending all the way from 1789 to the present.

The *Historical V-Dem - Sovereignty and State*- section includes new A, A* and C type indicators that have (at least so far) only been coded for Historical V-Dem, with the modal time series spanning the years 1789-1920 (although time series coverage is different for some variables). This section also includes v3elcomvot, which is coded as a type C variable in Historical V-Dem, while v2elcomvot is coded as a type A variable in Contemporary V-Dem.

For instructions given to the coders (as shown in the surveys), please see introductions to the corresponding theme in the corresponding V-Dem Indicators section.

2.2.27.1 Rulers involvement in the state administration (v3struinvadm)

Long tag: vdem_coder_level_v3struinvadm

Original tag: v3struinvadm

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Agnes Cornell

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: To what extent are day-to-day decisions made by state administrators subject to intervention from political elites?

CLARIFICATION: By political elites we mean members of the executive, members of the legislature and political elites at local and regional levels. Note that the focus on the day-to-day decisions of the state administration implies interference in specific operational decisions in a meticulous manner. Decisions taken by rulers about the general direction of the state administration should not be considered. Note that the question refers to the *de facto* situation.

RESPONSES:

0: Constantly. Day-to-day decisions taken by state administrators are constantly subject to intervention.

1: Often. Day-to-day decisions in the state administration are often subject to intervention.

2: About half. Approximately half of the day-to-day decisions in the state administration are subject to intervention.

3: Occasionally. Day-to-day decisions in the state administration are occasionally subject to intervention.

4: Never, or hardly ever. Day-to-day decisions in the state administration are never or hardly ever subject to intervention.

SCALE: Ordinal.

DATA RELEASE: 8-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

2.2.27.2 State steering capacity (v3ststeecap)

Long tag: vdem_coder_level_v3ststeecap

Original tag: v3ststeecap

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Jan Teorell

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Can the state oversee and regulate the economy?

CLARIFICATION: This refers to the state's ability to keep track of economic activities in its territory and potentially influence them by shaping the incentives and constraints that private firms face to do business; *e.g.*, through licensing, granting exploitation rights, taxing, imposing market barriers, building infrastructure, offering subsidies, adjudicating conflicts, or enforcing regulations.

RESPONSES:

0: Most economic activities happen outside the reach of the state

1: The state steers some economic activities

2: The state steers a substantial share – but less than half – of the national economy

3: The state steers about half or more than half, of the national economy

4: The state steers all or almost all economic activities

SCALE: Ordinal.

DATA RELEASE: 8-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2010

2.2.28 Varieties of Indoctrination

The Varieties of Indoctrination (V-Indoc) dataset is constructed based on an expert survey fielded in collaboration with V-Dem and led by the ERC-funded project “Democracy under Threat: How Education can Save it” (DEMED). The dataset contains indices and indicators that measure indoctrination efforts in education and the media across 160 countries from 1945 to 2021. The indices capture broad dimensions of indoctrination such as indoctrination potential and indoctrination content, while the indicators cover topics related to the curriculum, teachers, schools, and the media. The principal investigators are Anja Neundorf, Eugenia Nazrullaeva, Ksenia Northmore-Ball, Katerina Tertytchnaya, and Wooseok Kim. For more information, please visit <https://www.gla.ac.uk/research/az/democracyresearch/>.

2.2.28.1 Centralized curriculum (v2edcentcurrlm)

Long tag: vdem_coder_level_v2edcentcurrlm

Original tag: v2edcentcurrlm

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Anja Neundorf

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: To what extent does a national authority set the official curriculum framework for schools?

CLARIFICATION: The official curriculum may only be a framework, to which individual schools can contribute.

For this question, we are interested in all school subjects across levels of primary and secondary public education. If there are substantive differences between the primary and

secondary education levels, please provide the response that is most accurate for the majority of schools.

A national (or federal) authority can include a state body organized under the auspices of a Ministry of Education.

The sub-national level includes states, provinces, districts, municipalities, villages, local educational authorities, etc.

RESPONSES:

0: A national authority does not set the official curriculum framework, that is, the curriculum framework is completely set by sub-national authorities.

1: Sub-national authorities mostly set the official curriculum framework, with some input from the national authority.

2: A national authority mostly sets the official curriculum framework, with some input from sub-national authorities.

3: A national authority fully sets the official curriculum framework.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Neundorf et al. (2023a, 2023b, *V-Dem Working Paper Series* 2023: 136); Pemstein et al. (2023, *V-Dem Working Paper Series* 2023:21)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Anja Neundorf

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: What proportion of school textbooks across core subjects does a national authority approve centrally?

CLARIFICATION: For this question, we are interested in core subjects, such as languages, mathematics, science, arts, social studies, history, geography. We are not interested in textbooks teaching foreign languages that could be subcontracted to a foreign publisher.

Please consider school subjects across levels of formal primary and secondary public education. If there are substantive differences between the primary and secondary education levels, please provide the response that is most accurate for the majority of schools.

Examples of ways in which textbook production is centrally approved or authorized include: a national public authority reviews textbook content and approves textbooks for use in schools; there is a state-mandated national list of textbooks that schools are recommended to use; the Ministry of Education directly publishes textbooks. A national (or federal) authority can include a public authority organized under the auspices of a Ministry of Education or a different authority.

RESPONSES:

0: No textbooks are centrally approved by a national authority.

1: Some textbooks are centrally approved by a national authority.

2: All textbooks are centrally approved by a national authority.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 13.

QUESTION: To what extent do students have opportunities to discuss what they are taught in history classes?

CLARIFICATION: This question regards the degree to which students are *de facto* given the opportunity to engage in debates which question the material and content of their history classes, as well as being able to voice disagreement with each other. Critical engagement with the content can be expressed by engaging in discussions with the teacher or other students, in oral presentations, or in written work (for example, exams and essays).

Opportunity means that critically engaging with the content would not bring down students' marks.

RESPONSES:

0: Students are never or rarely given the opportunity to discuss what they are taught.

1: Students are sometimes given the opportunity to discuss what they are taught.

2: Students are often given the opportunity to discuss what they are taught.

3: Students are extensively given the opportunity to discuss what they are taught.

QUESTION: How often does the history curriculum promote a specific societal model or ideology?

CLARIFICATION: A societal model or ideology is generally a codified set of beliefs used to justify a particular social and political order, for example, socialism, democracy, liberalism, fascism or social orders related to a specific religion.

The history curriculum can promote a specific ideology or societal model by often referring to it and clearly interpreting one model as better than other alternatives.

We are not just interested in *de jure* history subjects, but also in the *de facto* subject content. Please consider a typical situation for students in primary and secondary schools. If the situation varies across educational levels, please provide the response that is most accurate for the majority of students.

RESPONSES:

0: Rarely or never.

1: Sometimes.
2: Often.
3: Extensively.
SCALE: Ordinal, converted to interval by the measurement model.

QUESTION: How often does the language curriculum promote patriotism?

CLARIFICATION: We are interested in the curriculum for core subjects in language studies, common to a majority of students, for example, teaching the official language(s) of the country. We are not interested in foreign languages.

By promoting patriotism, we mean encouraging feelings of love, pride, loyalty and commitment to one's country. For example, promoting patriotism can take the form of teaching narratives that celebrate the country's military past, national origin stories, the majority ethnic or religious group, or accomplishments in economic or technological sectors. Patriotic education could be part of the texts used to teach basic literacy skills (e.g. handwriting exercises), language textbooks, assigned readings in the literature curriculum, as well as in accompanying teaching manuals.

Please consider a typical situation for students in primary and secondary schools. If the situation varies across educational levels, please provide the response that is most accurate for the majority of students.

RESPONSES:

0: Rarely or never.

1: Sometimes.

2: Often.

3: Extensively.

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Anja Neundorf

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Are primary school students required to study at least one subject that predominately focuses on teaching political values?

CLARIFICATION: Examples of subjects that focus on teaching political values include specific subjects in political education, as well subjects where political values are integrated in the curriculum: for example, moral, religious, and civic education; ethics and civics; ‘knowledge about society’ with elements of sociology, politics, legal studies, or economics. This does not include history as a subject. We are not interested in *de jure* subject labels but in *de facto* subject content: a course does not need to be entitled “political values” to be considered here.

Political values refer to goals that are the desirable purposes for socio-political organizations such as the political community, the nation-state, and regime. Political values guide an individual’s or group’s general behavior/attitudes toward political ‘objects’ (e.g. leaders, events, ideologies).

RESPONSES:

0: No. There is no general requirement for the majority of primary school students to study at least one subject predominately focused on political values.

1: Yes. The majority of primary school students are required to study at least one subject that is predominately focused on political values.

SCALE: Binary, converted to interval by the measurement model.

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Anja Neundorf

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_mode, *_nr

QUESTION: Are patriotic symbols displayed in schools?

CLARIFICATION: Examples of patriotic symbols include: the national flag, a picture or bust of current or past country leaders, singing the national anthem or reciting national pledges, and celebrations of national days, heroes, historical or military events (for example, victory in a war). It further includes symbols associated with the ruling party, royal family, military junta, or other group/entity representing the political regime (e.g., party logo, symbol for royal family, military symbol tied to the particular regime, symbol of specific ethnic group or class dominating the regime). Patriotic symbols include religious symbols if (and only if) religious and state authorities are closely interlinked.

Here we refer to the school building(s) and classrooms and not to the content of learning material, such as textbooks.

If there is significant variation in the use of patriotic symbols across the territory, the answer should reflect the average or typical school across the sub-national units.

RESPONSES:

0: Patriotic symbols are usually not displayed.

1: Patriotic symbols are displayed.

ORDERING: If answer is 0 in a given year, please skip v2edscpatriotcb for this year.

SCALE: Binary, converted to interval by the measurement model.

NOTES: This is a filtering question for v2edscpatriotcb. For the mode version of this variable, we assign an observation a value of 0.5 if the mode is not unique, i.e., a value of 0.5 represents a multimodal response distribution.

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Anja Neundorf

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Do history teachers have autonomy to deviate from the content of the official curriculum in the classroom?

CLARIFICATION: Here we aim to capture the degree to which teachers have autonomy to

de facto deviate from the intended or official curriculum in their classes. Examples of how teachers can deviate from the content of the official curriculum: selecting textbooks that are different from those authorized or recommended by a central authority; diverging from the official curriculum in terms of the amount of time allocated to different topics, or supplement/expand on the official curriculum.

In cases where there is no official history curriculum, or the official history curriculum sets only loose restrictions on teachers' autonomy, please code this question as zero (generally autonomous).

RESPONSES:

0: They are free to deviate to a large extent: teachers are generally autonomous.

1: They are free to deviate to a moderate extent: teachers' autonomy is somewhat restricted.

2: They are free to deviate to a small extent: teachers' autonomy is mostly restricted.

3: They are not at all free to deviate: teachers' autonomy is completely restricted.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

QUESTION: To what extent are hiring decisions for teachers based on their political views and/or political behavior and/or moral character?

CLARIFICATION: Please consider hiring decisions across all subjects.

This question concerns actual practice (*de facto*, not legislation pertaining to the recruitment procedures for teachers).

This question concerns hiring decisions based on political views, or statements, participation in political protests, or membership in political parties or other organizations on the part of hiring candidates. Note that these behaviors can result in either a) relevant candidates not being hired (for example, being denied a teaching job due to a party affiliation) and b) only specific candidates being hired (for example, being hired due to pro-regime ideological affinities, party membership or moral character). Note that sometimes “moral character” is used as a pretext for political hiring decisions. In such cases, treat this pretext as political.

Please consider the situation for both primary and secondary school teachers. If there are substantive differences between the primary and secondary education levels, please provide the response that applies to the majority of teachers.

RESPONSES:

0: Rarely or never.

1: Sometimes.

2: Often.

3: Almost exclusively.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

2.2.28.19 Education requirements for primary school teachers (v2edtequal)

Long tag: vdem_coder_level_v2edtequal

Original tag: v2edtequal

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Anja Neundorf

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: What are the *de facto* education requirements to become a primary school teacher?

CLARIFICATION: If there is substantive variation at the sub-national or local levels, please consider the education requirements for the majority of primary school teachers in the country. Some countries may require a degree/diploma in education and others may accept a degree in any subject – indicate the completed education level required regardless of specialization. Please consider initial requirements to be a teacher not those for further professional development.

RESPONSES:

0: There are no educational requirements for aspiring teachers beyond proof of basic literacy

and/or numeracy skills (ISCED Level 2 or lower).

1: Aspiring teachers must have completed a secondary school level education (ISCED Level 3).

2: Aspiring teachers must have achieved an education at the post-secondary, non-university level (for example, technical or vocational institutions) (ISCED Level 4).

3: Aspiring teachers must have completed at least one degree program taught at the university level (ISCED Level 5 and above).

SCALE: Ordinal, converted to interval by the measurement model.

NOTES: In defining different education levels, we use the ISCED classification adopted by UNESCO, the International Standard Classification of Education (ISCED) 2011.

DATA RELEASE: 13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Neundorf et al. (2023a, 2023b, *V-Dem Working Paper Series* 2023: 136); Pemstein et al. (2023, *V-Dem Working Paper Series* 2023:21)

2.2.28.20 Presence of teacher unions (v2edteunion)

Long tag: vdem_coder_level_v2edteunion

Original tag: v2edteunion

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Anja Neundorf

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_mode, *_nr

QUESTION: Do officially recognized teacher unions exist in this country?

CLARIFICATION: Please answer this question without taking into account the nature of the union. That is, for the purposes of this question it is irrelevant if the teacher union is distinct or part of a larger union (e.g. a trade union federation). This question does not concern why a teacher's union does or does not exist. It is irrelevant if a union does not exist because (teacher) unionization is formally prohibited, teacher unionization can be allowed *de jure* but prohibited *de facto* due to government pressure, or there can be a lack of organization capacity among teachers.

RESPONSES:

0: No officially recognized teacher unions exist.

1: Officially recognized teacher unions exist.

ORDERING: If answer is 0 in a given year, please skip v2edteunionindp for this year.

SCALE: Binary, converted to interval by the measurement model.

NOTES: This is a filtering question for v2edteunionindp. For the mode version of this variable, we assign an observation a value of 0.5 if the mode is not unique, i.e., a value of 0.5 represents a multimodal response distribution.

DATA RELEASE: 13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Neundorf et al. (2023a, 2023b, *V-Dem Working Paper Series* 2023: 136); Pemstein et al. (2023, *V-Dem Working Paper Series* 2023:21)

Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Anja Neundorf

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Are officially recognized teacher unions independent from political authorities?

CLARIFICATION: Please answer this question regardless of the nature of teacher unions, that is, it is irrelevant if teacher unions are distinct or part of a comprehensive union (e.g. trade union federations). In cases where there is substantive sub-national variation, please consider teacher unions in the most populous sub-national units.

Political authorities can be national / sub-national / local public authorities and include ruling political parties and office holders such as presidents, prime minister or ministers.

This question does not distinguish between different mechanisms that can lead to teacher unions being dependent on the state. It is irrelevant if the relationship with the state was due to coercion, co-optation, or voluntary strategic alliances.

RESPONSES:

0: Teacher unions are fully independent.

1: Teacher unions are mostly independent.

2: Teacher unions are somewhat independent.

3: Teacher unions are not independent.

SCALE: Ordinal, converted to interval by the measurement model.

NOTES: Please answer this question only when option 1 was selected for v2edteunion.

DATA RELEASE: 13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CLEANING: Set to missing when v2edteunion is 0.

2.2.28.22 Control of entertainment content (v2medentrain)

Long tag: vdem_coder_level_v2medentrain

Original tag: v2medentrain

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Anja Neundorf

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Do political authorities have control over the production of entertainment content?

CLARIFICATION: Entertainment includes both broadcast and print content, such as movies, TV shows, radio shows, music, and magazines.

Here we distinguish between entertainment content and news content (although, in some cases news content can have an entertainment component, and vice versa), focusing on entertainment.

Political authorities can be national / sub-national / local public authorities and include ruling political parties and office holders, such as presidents, prime minister or ministers.

It is irrelevant how political authorities came to exert the control over the entertainment content.

RESPONSES:

0: Political authorities exert almost no control over the production of entertainment content.

1: Political authorities exert some control over the production of entertainment content.

2: Political authorities exert a high level of control over the production of entertainment content.

3: Political authorities almost exclusively control the production of entertainment content.

SCALE: Ordinal, converted to interval by the measurement model.
DATA RELEASE: 13.
CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).
CITATION: Neundorf et al. (2023a, 2023b, *V-Dem Working Paper Series* 2023: 136); Pemstein et al. (2023, *V-Dem Working Paper Series* 2023:21)

2.2.28.23 Patriotism in the media (v2medpatriot)

Long tag: vdem_coder_level_v2medpatriot

Original tag: v2medpatriot

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Anja Neundorf

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: How often do media outlets promote patriotism?

CLARIFICATION: Promotion of patriotism can be associated with promotion of patriotic consciousness, the love of the country, national pride, loyalty and commitment. For example, specific narratives can celebrate the country's military past, national origin stories, or accomplishments in economic or technological sectors. Patriotism can be promoted in news, movies, TV shows, radio shows, music, or magazines.

For this question, please consider all (state-owned as well as not state-owned) broadcast and print media outlets.

RESPONSES:

0: Rarely or never.

1: Sometimes.

2: Often.

3: Extensively.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Neundorf et al. (2023a, 2023b, *V-Dem Working Paper Series* 2023: 136); Pemstein et al. (2023, *V-Dem Working Paper Series* 2023:21)

YEARS: 1945-2021

2.2.28.24 Political influence, non state-owned media (v2medpolnonstate)

Long tag: vdem_coder_level_v2medpolnonstate

Original tag: v2medpolnonstate

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Anja Neundorf

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: For the print and broadcast media outlets NOT owned by the state, how often do political authorities influence how these cover political issues?

CLARIFICATION: Political authorities can be national / sub-national / local public authorities and include ruling political parties and office holders, such as presidents, prime minister or ministers. Political authorities can influence the coverage of non-state owned outlets both directly and indirectly. Indirect forms of control might include politically motivated awarding of broadcast frequencies, withdrawal of financial support, influence over

printing facilities (e.g. subsidized newsprint) and distribution networks, selected distribution of advertising, onerous registration requirements, and prohibitive tariffs. They might also include tax privileges, bribery, and cash payments. Indirect forms of control may also include the intimidation of owners, advertisers, and editors, through the use of threats and violence.

RESPONSES:

0: Political authorities (almost) never influence the coverage of key political issues.

1: Political authorities sometimes influence the coverage of key political issues.

2: Political authorities often influence the coverage of key political issues.

3: Political authorities almost always influence the coverage of key political issues.

SCALE: Ordinal, converted to interval by the measurement model.

NOTES: Please answer this question only when both v2medstateprint and v2medstatebroad are not both 4.

DATA RELEASE: 13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CLEANING: Set to missing when v2medstateprint and v2medstatebroad are both 4.

CITATION: Neundorf et al. (2023a, 2023b, *V-Dem Working Paper Series 2023*: 136); Pemstein et al. (2023, *V-Dem Working Paper Series 2023*:21)

2.2.28.25 Political influence, state-owned media (v2medpolstate)

Long tag: vdem_coder_level_v2medpolstate

Original tag: v2medpolstate

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Anja Neundorf

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: For the print and broadcast media outlets owned by the state, how often do political authorities influence how these outlets cover political issues?

CLARIFICATION: Political authorities can be national / sub-national / local public authorities and include ruling political parties and office holders, such as presidents, prime minister or ministers. Political authorities can influence which political issues state-media cover, how, and how much they cover them. For example, they can exert influence by directly or indirectly controlling the hiring and firing of producers, directors, writers, editors, and announcers; by manipulating the resources these media require; by withholding resources required for printing or broadcast. Political authorities can also directly dictate content and make editorial decisions.

RESPONSES:

0: Political authorities (almost) never influence the coverage of political issues.

1: Political authorities sometimes influence the coverage of political issues.

2: Political authorities often influence the coverage of political issues.

3: Political authorities almost always influence the coverage of political issues.

SCALE: Ordinal, converted to interval by the measurement model.

NOTES: Please answer this question only when both v2medstateprint and v2medstatebroad are not both 0.

DATA RELEASE: 13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CLEANING: Set to missing when v2medstateprint and v2medstatebroad are both 0.

CITATION: Neundorf et al. (2023a, 2023b, *V-Dem Working Paper Series 2023*: 136); Pemstein et al. (2023, *V-Dem Working Paper Series 2023*:21)

2.2.28.26 State-owned broadcast media (v2medstatebroad)

Long tag: vdem_coder_level_v2medstatebroad

Original tag: v2medstatebroad

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Anja Neundorf

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Out of the top four national broadcast media with the largest audience, how many are state-owned?

CLARIFICATION: If there are fewer than four national broadcast media, please provide your answer based on the number of existing national broadcast media.

Broadcast media includes radio and television stations whose content can be consumed offline or online, for example, through station's websites. Here, we are only interested in state ownership of the media – not in the extent to which the state may control editorial decisions. State ownership takes different forms. For example, state-owned media can be funded by government license fees and advertising. They can also be directly controlled by government agencies (e.g. the Ministry of Information and Culture). The state, the ruling party, or the Head of Government / the Head of State, can also be the owner of media in this context.

RESPONSES:

0: There are no state-owned broadcast media outlets.

1: State-owned outlets make up a minority of media broadcast outlets.

2: There is an equal share of state- and non-state owned broadcast media outlets.

3: State-owned outlets make up the majority of broadcast media outlets.

4: All broadcast media outlets are state-owned.

ORDERING: If v2medstateprint and v2medstatebroad are both set to 0 do not answer v2medpolstate. If both are set to 4 do not answer v2medpolnonstate.

SCALE: Ordinal, converted to interval by the measurement model.

NOTES: This is a filtering question for v2medpolstate and v2medpolnonstate.

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Anja Neundorf

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Is there a comprehensive monitoring system in place for public authorities to conduct external teacher inspection?

CLARIFICATION: This question concerns the formal monitoring efforts of the relevant public/government authorities (national / sub-national / local authorities / school district administration) to conduct external inspection of teachers, that is, it concerns the operations of a formal bureaucratic hierarchy outside of school that works to inspect teachers. We are not interested in peer review observations of teachers working in the same school. We are not interested in *de jure* formal procedures but whether they are *de facto* carried out in practice. Teacher inspection can include external inspectors conducting teaching observations inside the classroom or during a class, before a class (audits of teachers' lesson plans) or after a class (for example, audits of students' notebooks and teachers' assessment of students' schoolwork). We define a comprehensive inspection in the following way(s): inspections are regular, conducted according to standardized and transparent protocols, with impartial and objective judgements; inspection results are reported to relevant national or sub-national government offices, etc.

If there are substantive differences between the primary and secondary education levels, please provide the response that is most accurate for the majority of schools.

RESPONSES:

0: There is no external teacher inspection.

1: While there is a system in place for external teacher inspection, it is not comprehensive.

2: There is a generally comprehensive system in place for external teacher inspection.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Neundorf et al. (2023a, 2023b, *V-Dem Working Paper Series 2023*: 136);

2.2.28.29 Government censorship effort — Media (v3mecenefm)

Long tag: vdem_coder_level_v3mecenefm

Original tag: v3mecenefm

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Michael Coppedge

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Does the government directly or indirectly attempt to censor the print or broadcast media?

CLARIFICATION: Indirect forms of censorship might include politically motivated awarding of broadcast frequencies, withdrawal of financial support, influence over printing facilities and distribution networks, selected distribution of advertising, onerous registration requirements, prohibitive tariffs, and bribery.

We are not concerned with censorship of non-political topics such as child pornography, statements offensive to a particular religion, or defamatory speech unless this sort of censorship is used as a pretext for censoring political speech.

RESPONSES:

0: Attempts to censor are direct and routine.

1: Attempts to censor are indirect but nevertheless routine.

2: Attempts to censor are direct but limited to especially sensitive issues.

3: Attempts to censor are indirect and limited to especially sensitive issues.

4: The government rarely attempts to censor major media in any way, and when such exceptional attempts are discovered, the responsible officials are usually punished.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 13.

2.3.1 Identifier Variables in the V-Dem Datasets

Variables in this section identify the observations in the dataset.

2.3.1.1 Country Name (`country_name`)

Long tag: `vdem_cy_country_name`

Original tag: `country_name`

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: A*

QUESTION: Name of coded country.

CLARIFICATION: A V-Dem country is a political unit enjoying at least some degree of functional and/or formal sovereignty.

RESPONSES:

Text

NOTES: For more details on country units consult the *V-Dem Country Coding Units* document.

DATA RELEASE: 10-13.

CITATION: *V-Dem Codebook* (see suggested citation at the top of this document).

2.3.1.2 Country Name Abbreviation (`country_text_id`)

Long tag: `vdem_cy_country_text_id`

Original tag: `country_text_id`

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: A*

QUESTION: Abbreviated country names.

RESPONSES:

Text

DATA RELEASE: 10-13.

CITATION: *V-Dem Codebook* (see suggested citation at the top of this document).

2.3.1.3 V-Dem Country ID (`country_id`)

Long tag: `vdem_cy_country_id`

Original tag: `country_id`

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: A*

QUESTION: Unique country ID designated for each country.

RESPONSES:

Numeric

NOTES: A list of countries and their corresponding IDs used in the V-Dem dataset can be found in the country table in the codebook, as well as in the *V-Dem Country Coding Units* document.

DATA RELEASE: 10-13.

CITATION: *V-Dem Codebook* (see suggested citation at the top of this document).**2.3.1.4 Year (year)***Long tag:* vdem_cy_year*Original tag:* year*Dataset citation:* Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)*Description:*

VARIABLE TYPE: A*

QUESTION: Four-digit designation of the year for which an observation is given that ranges from the start to the end of the coding period.

RESPONSES:

Numeric

NOTES: This variable is included in the V-Dem Country Year as well as Country Date datasets.

DATA RELEASE: 10-13.

CITATION: *V-Dem Codebook* (see suggested citation at the top of this document).**2.3.1.5 Historical Date (historical_date)***Long tag:* vdem_cy_historical_date*Original tag:* historical_date*Dataset citation:* Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)*Description:*

VARIABLE TYPE: A*

QUESTION: Variable designating the date for which observation is given.

CLARIFICATION: The date is coded in YYYY-MM-DD format. December 31 observation always refers to the situation at the end of the year. There can be observations on other dates signifying other events, i.e. elections or executive appointments.

RESPONSES:

Date

NOTES: This variable is included in the V-Dem Country Date dataset.

DATA RELEASE: 10-13.

CITATION: *V-Dem Codebook* (see suggested citation at the top of this document).**2.3.1.6 V-Dem Project (project)***Long tag:* vdem_cy_project*Original tag:* project*Dataset citation:* Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)*Description:*

VARIABLE TYPE: A*

QUESTION: Indication what project team has coded country in respective year.

RESPONSES:

0: Contemporary.

1: Historical.

2: Both (overlap).

DATA RELEASE: 10-13.

CITATION: *V-Dem Codebook* (see suggested citation at the top of this document).**2.3.1.7 Historical V-Dem coding (historical)***Long tag:* vdem_cy_historical*Original tag:* historical*Dataset citation:* Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)*Description:*

VARIABLE TYPE: A*

QUESTION: Binary indication whether the country in question has been coded by the team of Historical V-Dem project.

RESPONSES:

0: No.

1: Yes.

DATA RELEASE: 10-13.

CITATION: *V-Dem Codebook* (see suggested citation at the top of this document).**2.3.1.8 Start of Coding Period (codingstart)***Long tag:* vdem_cy_codingstart*Original tag:* codingstart*Dataset citation:* Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)*Description:*

VARIABLE TYPE: A*

QUESTION: Year in which coding of the country in question starts.

CLARIFICATION: V-Dem country coding starts in 1789, or from when a country first enjoyed at least some degree of functional and/or formal sovereignty.

RESPONSES:

Numeric

NOTES: For detailed information, please see the *V-Dem Country Coding Units* document.

DATA RELEASE: 10-13.

CITATION: *V-Dem Codebook* (see suggested citation at the top of this document).**2.3.1.9 End of Coding Period (codingend)***Long tag:* vdem_cy_codingend*Original tag:* codingend*Dataset citation:* Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)*Description:*

VARIABLE TYPE: A*

QUESTION: Either a maximum year of country coding period or the year when the country ceased to exist because it lost functional or formal sovereignty.

RESPONSES:

Numeric

NOTES: For more details about V-Dem country coding periods, please see the *V-Dem Country Coding Units* document.

DATA RELEASE: 10-13.

CITATION: *V-Dem Codebook* (see suggested citation at the top of this document).

2.3.1.10 Contemporary Start of Coding Period (codingstart_contemp)

Long tag: vdem_cy_codingstart_contemp

Original tag: codingstart_contemp

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

This variable indicates the coding start for the countries coded by Contemporary V-Dem.
Response: Date.

2.3.1.11 Contemporary End of Coding Period (codingend_contemp)

Long tag: vdem_cy_codingend_contemp

Original tag: codingend_contemp

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: A*

QUESTION: Year in which the coding of Contemporary V-Dem project ends.

CLARIFICATION: Variables from “Contemporary” project can have different question formulation, variable type, or number of coders as opposed to the “Historical” one.

RESPONSES:

Numeric

DATA RELEASE: 10-13.

CITATION: *V-Dem Codebook* (see suggested citation at the top of this document).

2.3.1.12 Historical Start of Coding Period (codingstart_hist)

Long tag: vdem_cy_codingstart_hist

Original tag: codingstart_hist

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: A*

QUESTION: Year in which the coding of Historical V-Dem project starts.

CLARIFICATION: Variables from “Historical” project can have different question formulation, variable type, or number of coders as opposed to the “Contemporary” one.

RESPONSES:

Numeric

DATA RELEASE: 10-13.

CITATION: *V-Dem Codebook* (see suggested citation at the top of this document).

2.3.1.13 Historical End of Coding Period (codingend_hist)

Long tag: vdem_cy_codingend_hist

Original tag: codingend_hist

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: A*

QUESTION: Year in which the coding of Historical V-Dem project ends.

CLARIFICATION: Variables from “Historical” project can have different question

formulation, variable type, or number of coders as opposed to the “Contemporary” one.

RESPONSES:

Numeric

DATA RELEASE: 10-13.

CITATION: *V-Dem Codebook* (see suggested citation at the top of this document).

2.3.1.14 Gap index (gap_index)

Long tag: vdem_cy_gap_index

Original tag: gap_index

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: A*

CLARIFICATION: Indication that party was not present in national legislature.

RESPONSES:

Numeric

DATA RELEASE: 11-13.

2.3.1.15 Country code (cowcode)

Long tag: vdem_cy_cowcode

Original tag: COWcode

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Correlates of War Project (2017)

Description:

VARIABLE TYPE: E

QUESTION: Correlates of War (COW) project country codes.

RESPONSES:

Numeric

SOURCE(S): Correlates of War Project (2017)

DATA RELEASE: 10-13.

CITATION: Correlates of War Project (2017)

YEARS: 1789-2022

2.3.2 V-Dem Democracy Indices - V-Dem High-Level Democracy Indices

This section groups together macro-level indices that describe features of democracy at the highest (most abstract) level. Please see Appendix A of the V-Dem codebook (<https://www.v-dem.net/static/website/img/refs/codebookv12.pdf>) for an overview of all indices, component-indices, and lower-level indices.

2.3.2.1 Electoral Democracy Index (v2x_polyarchy)

Long tag: vdem_cy_v2x_polyarchy

Original tag: v2x_polyarchy

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Teorell et al. (2019), v2x_freexp_altinf v2x_frassoc_thick v2x_suffr v2xel_frefair v2x_elecoeff

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): Jan Teorell

ADDITIONAL VERSIONS: *_codelow, *_codehigh, *_sd

QUESTION: To what extent is the ideal of electoral democracy in its fullest sense achieved?

CLARIFICATION: The electoral principle of democracy seeks to embody the core value of making rulers responsive to citizens, achieved through electoral competition for the electorate's approval under circumstances when suffrage is extensive; political and civil society organizations can operate freely; elections are clean and not marred by fraud or systematic irregularities; and elections affect the composition of the chief executive of the country. In between elections, there is freedom of expression and an independent media capable of presenting alternative views on matters of political relevance. In the V-Dem conceptual scheme, electoral democracy is understood as an essential element of any other conception of representative democracy — liberal, participatory, deliberative, egalitarian, or some other.

SCALE: Interval, from low to high (0-1).

SOURCE(S): v2x_freexp_altinf v2x_frassoc_thick v2x_suffr v2xel_frefair v2x_elecoff

DATA RELEASE: 1-13. Release 1-5 used a different, preliminary aggregation formula.

AGGREGATION: The index is formed by taking the average of, on the one hand, the weighted average of the indices measuring freedom of association thick (v2x_frassoc_thick), clean elections (v2xel_frefair), freedom of expression (v2x_freexp_altinf), elected officials (v2x_elecoff), and suffrage (v2x_suffr) and, on the other, the five-way multiplicative interaction between those indices. This is half way between a straight average and strict multiplication, meaning the average of the two. It is thus a compromise between the two most well known aggregation formulas in the literature, both allowing partial "compensation" in one sub-component for lack of polyarchy in the others, but also punishing countries not strong in one sub-component according to the "weakest link" argument. The aggregation is done at the level of Dahl's sub-components with the one exception of the non-electoral component. The index is aggregated using this formula:

$$\begin{aligned}
 v2x_polyarchy &= .5 * MPI + .5 * API \\
 &= .5 * (v2x_elecoff * v2xel_frefair * v2x_frassoc_thick * \\
 &\quad v2x_suffr * v2x_freexp_altinf) \\
 &+ .5 * ((1/8) * v2x_elecoff + (1/4) * v2xel_frefair \\
 &\quad + (1/4) * v2x_frassoc_thick + (1/8) * v2x_suffr \\
 &\quad + (1/4) * v2x_freexp_altinf)
 \end{aligned}$$

CITATION: Teorell *et al.* (2019); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

2.3.2.2 Liberal Democracy Index (v2x_libdem)

Long tag: vdem_cy_v2x_libdem

Original tag: v2x_libdem

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Coppedge *et al.* (2015), v2x_liberal v2x_polyarchy

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): Jan Teorell

ADDITIONAL VERSIONS: *_codelow, *_codehigh, *_sd

QUESTION: To what extent is the ideal of liberal democracy achieved?

CLARIFICATION: The liberal principle of democracy emphasizes the importance of protecting individual and minority rights against the tyranny of the state and the tyranny of the majority. The liberal model takes a "negative" view of political power insofar as it judges the quality of democracy by the limits placed on government. This is achieved by constitutionally protected civil liberties, strong rule of law, an independent judiciary, and effective checks and balances that, together, limit the exercise of executive power. To make this a measure of liberal democracy, the index also takes the level of electoral democracy into account.

SCALE: Interval, from low to high (0-1).

SOURCE(S): v2x_liberal v2x_polyarchy

DATA RELEASE: 1-13. Release 1, 2, and 3 used a different, preliminary aggregation formula.

AGGREGATION: The index is aggregated using this formula:

$v2x_libdem =$

$.25 * v2x_polyarchy^{1.585} + .25 * v2x_liberal + .5 * v2x_polyarchy^{1.585} * v2x_liberal$

CITATION: Coppedge *et al.* (2015, *V-Dem Working Paper Series* 2015:6); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

2.3.2.3 Participatory Democracy Index (v2x_partipdem)

Long tag: vdem_cy_v2x_partipdem

Original tag: v2x_partipdem

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Coppedge *et al.* (2015), v2x_polyarchy v2x_partip

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): Jan Teorell

ADDITIONAL VERSIONS: *_codelow, *_codehigh, *_sd

QUESTION: To what extent is the ideal of participatory democracy achieved?

CLARIFICATION: The participatory principle of democracy emphasizes active participation by citizens in all political processes, electoral and non-electoral. It is motivated by uneasiness about a bedrock practice of electoral democracy: delegating authority to representatives. Thus, direct rule by citizens is preferred, wherever practicable. This model of democracy thus takes suffrage for granted, emphasizing engagement in civil society organizations, direct democracy, and subnational elected bodies. To make it a measure of participatory democracy, the index also takes the level of electoral democracy into account.

SCALE: Interval, from low to high (0-1).

SOURCE(S): v2x_polyarchy v2x_partip

DATA RELEASE: 1-13. Release 1-3 used a different, preliminary aggregation formula.

AGGREGATION: The index is aggregated using this formula:

$v2x_partipdem =$

$.25 * v2x_polyarchy^{1.585} + .25 * v2x_partip + .5 * v2x_polyarchy^{1.585} * v2x_partip$

CITATION: Coppedge *et al.* (2015, *V-Dem Working Paper Series* 2015:6); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

2.3.2.4 Deliberative Democracy Index (v2x_delibdem)

Long tag: vdem_cy_v2x_delibdem

Original tag: v2x_delibdem

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Coppedge *et al.* (2015), v2xdl_delib v2x_polyarchy

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): Jan Teorell

ADDITIONAL VERSIONS: *_codelow, *_codehigh, *_sd

QUESTION: To what extent is the ideal of deliberative democracy achieved?

CLARIFICATION: The deliberative principle of democracy focuses on the process by which decisions are reached in a polity. A deliberative process is one in which public reasoning focused on the common good motivates political decisions—as contrasted with emotional appeals, solidary attachments, parochial interests, or coercion. According to this principle, democracy requires more than an aggregation of existing preferences. There should also be respectful dialogue at all levels—from preference formation to final decision—among informed and competent participants who are open to persuasion. To make it a measure of not only the deliberative principle but also of democracy, the index also takes the level of electoral democracy into account.

SCALE: Interval, from low to high (0-1).

SOURCE(S): v2xdl_delib v2x_polyarchy

DATA RELEASE: 1-13. Release 1-3 used a different, preliminary aggregation formula.

AGGREGATION: The index is aggregated using this formula:

$$v2x_delibdem =$$

$$.25 * v2x_polyarchy^{1.585} + .25 * v2xdl_delib + .5 * v2x_polyarchy^{1.585} * v2xdl_delib$$

CITATION: Coppedge *et al.* (2015, *V-Dem Working Paper Series* 2015:6); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1900-2022

2.3.2.5 Egalitarian Democracy Index (v2x_egaldem)*Long tag:* vdem_cy_v2x_egaldem*Original tag:* v2x_egaldem

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Sigman & Lindberg (2015), Coppedge *et al.* (2015), v2x_egal v2x_polyarchy

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): Rachel Sigman, Staffan Lindberg

ADDITIONAL VERSIONS: *_codelow, *_codehigh, *_sd

QUESTION: To what extent is the ideal of egalitarian democracy achieved?

CLARIFICATION: The egalitarian principle of democracy holds that material and immaterial inequalities inhibit the exercise of formal rights and liberties, and diminish the ability of citizens from all social groups to participate. Egalitarian democracy is achieved when 1 rights and freedoms of individuals are protected equally across all social groups; and 2 resources are distributed equally across all social groups; 3 groups and individuals enjoy equal access to power. To make it a measure of egalitarian democracy, the index also takes the level of electoral democracy into account.

SCALE: Interval, from low to high (0-1).

SOURCE(S): v2x_egal v2x_polyarchy

DATA RELEASE: 1-13. Release 1-4 used a different, preliminary aggregation formula.

AGGREGATION: The index is aggregated using this formula:

$$v2x_egaldem =$$

$$.25 * v2x_polyarchy^{1.585} + .25 * v2x_egal + .5 * v2x_polyarchy^{1.585} * v2x_egal$$

CITATION: Sigman *et al.* (2015, *V-Dem Working Paper Series* 2015:22); Coppedge *et al.* 2015, *V-Dem Working Paper Series* 2015:6; *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1900-2022

2.3.3 V-Dem Democracy Indices - V-Dem Mid-Level Indices: Components of the Democracy Indices

This section includes the V-Dem mid-level indices, subcomponents of the V-Dem Democracy Indices. Please see Appendix A of the V-Dem codebook (<https://www.v-dem.net/static/website/img/refs/codebookv12.pdf>) for an overview of all indices, component-indices, and lower-level indices.

2.3.3.1 Additive polyarchy index (v2x_api)

Long tag: vdem_cy_v2x_api

Original tag: v2x_api

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Teorell et al. (2019), v2x_frassoc_thick v2x_suffr v2xel_frefair v2x_elecoff v2x_freexp_altinf

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): Jan Teorell

ADDITIONAL VERSIONS: *_codelow, *_codehigh, *_sd

QUESTION: To what extent is the electoral principle of democracy achieved?

CLARIFICATION: The electoral principle of democracy seeks to achieve responsiveness and accountability between leaders and citizens through the mechanism of competitive elections. This is presumed to be achieved when suffrage is extensive; political and civil society organizations can operate freely; elections are clean and not marred by fraud or systematic irregularities; and the chief executive of a country is selected directly or indirectly through elections.

SCALE: Interval, from low to high (0-1).

SOURCE(S): v2x_frassoc_thick v2x_suffr v2xel_frefair v2x_elecoff v2x_freexp_altinf

DATA RELEASE: 6-13.

AGGREGATION: The index is operationalized by taking the weighted average of the indices measuring freedom of association thick (v2x_frassoc_thick), clean elections (v2xel_frefair), freedom of expression (v2x_freexp_altinf), elected executive (v2x_elecoff), and suffrage (v2x_suffr). The weights are constructed so as to sum to 1 and weigh elected executive and suffrage half as much as the other three, respectively.

The index is aggregated using this formula:

$$v2x_api = (1/4) * v2x_frassoc_thick + (1/4) * v2xel_frefair + (1/4) * v2x_freexp_altinf + (1/8) * v2x_elecoff + (1/8) * v2x_suffr$$

CITATION: Teorell et al. (2019); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

2.3.3.2 Multiplicative polyarchy index (v2x_mpi)

Long tag: vdem_cy_v2x_mpi

Original tag: v2x_mpi

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Teorell et al. (2019), v2x_frassoc_thick v2x_suffr v2xel_frefair v2x_elecoff v2x_freexp_altinf

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): Jan Teorell

ADDITIONAL VERSIONS: *_codelow, *_codehigh, *_sd

QUESTION: To what extent is the electoral principle of democracy achieved?

CLARIFICATION: The electoral principle of democracy seeks to achieve responsiveness and accountability between leaders and citizens through the mechanism of competitive elections.

This is presumed to be achieved when suffrage is extensive; political and civil society organizations can operate freely; elections are clean and not marred by fraud or systematic irregularities; and the chief executive of a country is selected directly or indirectly through elections.

SCALE: Interval, from low to high (0-1).

SOURCE(S): v2x_frassoc_thick v2x_suffr v2xel_frefair v2x_elecoff v2x_freexp_altinf

DATA RELEASE: 6-13.

AGGREGATION: The electoral component index is operationalized as a chain defined by its weakest link. Specifically, the index is formed by multiplying indices measuring freedom of association thick (v2x_frassoc_thick), clean elections (v2xel_frefair), freedom of expression (v2x_freexp_altinf), elected executive (v2x_elecoff), and suffrage (v2x_suffr), or

$v2x_mpi = v2x_frassoc_thick * v2xel_frefair * v2x_freexp_altinf * v2x_elecoff * v2x_suffr$

CITATION: Teorell *et al.* (2019); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

2.3.3.3 Freedom of Expression and Alternative Sources of Information Index (v2x_freexp_altinf)

Long tag: vdem_cy_v2x_freexp_altinf

Original tag: v2x_freexp_altinf

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023), v2mecenefm v2meharjrn v2meslfcen v2xcl_disc v2clacfree v2mebias v2mecrit v2merange

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): Svend-Erik Skaaning, Jan Teorell

ADDITIONAL VERSIONS: *_codelow, *_codehigh, *_sd

QUESTION: To what extent does government respect press and media freedom, the freedom of ordinary people to discuss political matters at home and in the public sphere, as well as the freedom of academic and cultural expression?

CLARIFICATION: This index includes all variables in the two indices v2x_freexp and v2xme_altinf.

SCALE: Interval, from low to high (0-1).

SOURCE(S): v2mecenefm v2meharjrn v2meslfcen v2xcl_disc v2clacfree v2mebias v2mecrit v2merange

DATA RELEASE: 4-13.

AGGREGATION: The index is formed by taking the point estimates from a Bayesian factor analysis model of the indicators for media censorship effort (v2mecenefm), harassment of journalists (v2meharjrn), media bias (v2mebias), media self-censorship (v2meslfcen), print/broadcast media critical (v2mecrit), and print/broadcast media perspectives (v2merange), freedom of discussion for men/women (v2cldiscm, v2cldiscw), and freedom of academic and cultural expression (v2clacfree).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

2.3.3.4 Freedom of association index (thick) (v2x_frassoc_thick)

Long tag: vdem_cy_v2x_frassoc_thick

Original tag: v2x_frassoc_thick

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

(2023), v2psparban v2psbars v2psoppaut v2elmulpar v2cseeorgs v2csreprss v2x_elecreg

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): Allen Hicken, Michael Bernhard, Jan Teorell

ADDITIONAL VERSIONS: *_codelow, *_codehigh, *_sd

QUESTION: To what extent are parties, including opposition parties, allowed to form and to participate in elections, and to what extent are civil society organizations able to form and to operate freely?

SCALE: Interval, from low to high (0-1).

SOURCE(S): v2psparban v2psbars v2psoppaut v2elmulpar v2cseeorgs v2csreprss v2x_elecreg

DATA RELEASE: 1-13. Release 1-3 used a different aggregation formula for the thinner index v2x_frassoc.

AGGREGATION: The index is formed by taking the point estimates from a Bayesian factor analysis model of the indicators for party ban (v2psparban), barriers to parties (v2psbars), opposition parties autonomy (v2psoppaut), elections multiparty (v2elmulpar), CSO entry and exit (v2cseeorgs) and CSO repression (v2csreprss). Since the multiparty elections indicator is only observed in election years, its values have first been repeated within election regime periods as defined by v2x_elecreg.

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

2.3.3.5 Share of population with suffrage (v2x_suffr)

Long tag: vdem_cy_v2x_suffr

Original tag: v2x_suffr

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: v2elsuffrage

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): Svend-Erik Skaaning

QUESTION: What share of adult citizens as defined by statute has the legal right to vote in national elections?

CLARIFICATION: This question does not take into consideration restrictions based on age, residence, having been convicted for crime, or being legally incompetent. It covers legal *de jure* restrictions, not restrictions that may be operative in practice *de facto*. The adult population as defined by statute is defined by citizens in the case of independent countries or the people living in the territorial entity in the case of colonies. Universal suffrage is coded as 100percent. Universal male suffrage only is coded as 50percent. Years before electoral provisions are introduced are scored 0percent. The scores do not reflect whether an electoral regime was interrupted or not. Only if new constitutions, electoral laws, or the like explicitly introduce new regulations of suffrage, the scores were adjusted accordingly if the changes suggested doing so. If qualifying criteria other than gender apply such as property, tax payments, income, literacy, region, race, ethnicity, religion, and/or 'economic independence', estimates have been calculated by combining information on the restrictions with different kinds of statistical information on population size, age distribution, wealth distribution, literacy rates, size of ethnic groups, etc., secondary country-specific sources, and — in the case of very poor information — the conditions in similar countries or colonies. The scores reflect *de jure* provisions of suffrage extension in percentage of the adult population. If the suffrage law is revised in a way that affects the extension, the scores reflect this change as of the calendar year the law was enacted.

RESPONSES:

Percent.

SCALE: Interval, from low to high (0-1).

SOURCE(S): v2elsuffrage

2.3.3.6 Clean elections index (v2xel_frefair)

Long tag: vdem_cy_v2xel_frefair

Original tag: v2xel_frefair

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023), v2elembaut v2elembcap v2elrgstry v2elvotbuy v2elirreg v2elintim v2elpeace v2elfrfair v2x_elecreg

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): Staffan Lindberg, Jan Teorell

ADDITIONAL VERSIONS: *_codelow, *_codehigh, *_sd

QUESTION: To what extent are elections free and fair?

CLARIFICATION: Free and fair connotes an absence of registration fraud, systematic irregularities, government intimidation of the opposition, vote buying, and election violence.

SCALE: Interval, from low to high (0-1).

SOURCE(S): v2elembaut v2elembcap v2elrgstry v2elvotbuy v2elirreg v2elintim v2elpeace v2elfrfair v2x_elecreg

DATA RELEASE: 1-13.

AGGREGATION: The index is formed by taking the point estimates from a Bayesian factor analysis model of the indicators for EMB autonomy (v2elembaut), EMB capacity (v2elembcap), election voter registry (v2elrgstry), election vote buying (v2elvotbuy), election other voting irregularities (v2elirreg), election government intimidation (v2elintim), non-state electoral violence (v2elpeace), and election free and fair (v2elfrfair). Since the bulk of these indicators are only observed in election years, the index scores have then been repeated within election regime periods as defined by v2x_elecreg. If a country is recorded as an electoral regime (v2x_elecreg) at the beginning of the time series until the first election that we record, then the scores for this election are backfilled towards the beginning of the time series.

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): Jan Teorell

QUESTION: Is the chief executive and legislature appointed through popular elections?

CLARIFICATION: This index attempts to measure (a) whether the chief executive is elected, either directly elected through popular elections or indirectly through a popularly

elected legislature that then appoints the chief executive; and (b) whether the legislature, in presidential systems with a directly elected president that is also chief executive, is directly or indirectly elected. Note that a popular election is minimally defined and also includes sham elections with limited suffrage and no competition. Similarly, “appointment” by legislature only implies selection and/or approval, not the power to dismiss. This index is useful primarily for aggregating higher-order indices and should not necessarily be interpreted as an important element of democracy in its own right.

SCALE: Interval.

SOURCE(S): `v2ex_elechos` `v2ex_elechog` `v2exdfcbhs_rec` `v2ex_hosw` `v2xex_elecleg` `v2lgbicam` `v2lgello` `v2lgelecup` `v2lginello` `v2lginelup` `v2exaphos` `v2exathhs` `v2exaphogp` `v2exathhg` `v2exdjcbhg` `v2exdfdmhs` `v2exdfdmshg` `v2exhoshog` `v2exapupap` `v2exapup`

DATA RELEASE: 1-13. 1-3 preliminary aggregation formula, 4-6 as `v2x_accex`, 7 renamed to `v2x_elecoff` and modified aggregation, 8.

AGGREGATION: The index is formed in two steps. First, there are six different chains of appointment/selection to take into account in constructing this index, all of which are scaled to vary from 0 to 1. First, whether the head of state is directly elected ($a = 1$) or not ($a = 0$) (from `v2ex_elechos`). Second, the extent to which the legislature is popularly elected (b). If the legislature is unicameral, b is measured as the proportion of legislators directly elected + half of the proportion that are indirectly elected. If the legislature is bicameral and the upper house is involved in the appointment of the chief executive, the same proportion of directly and half of the indirectly elected legislators is calculated for the upper house; the scores for the lower and upper houses are then averaged. Third, whether the head of state is appointed by the legislature, or the approval of the legislature is necessary for the appointment of the head of state ($c1 = 1$, otherwise 0). Fourth, whether the head of government is appointed by the legislature, or the approval of the legislature is necessary for the appointment of the head of government ($c2 = 1$, otherwise 0). Fifth, whether the head of government is appointed by the head of state ($d = 1$) or not ($d = 0$). Sixth, whether the head of government is directly elected ($e = 1$) or not ($e = 0$) (from `v2ex_elechog`).

In the second step, the extent to which the legislature is elected (b) is also independently taken into account in order to penalize presidential systems with unelected legislatures, or legislatures with a large share of presidential appointees, for example.

Define `hosw` as the weight for the head of state. If the head of state is also head of government ($v2exhoshog = 1$, $hosw = 1$). If the head of state has more power than the head of government over the appointment and dismissal of cabinet ministers, then $hosw = 1$; if the reverse is true, $hosw = 0$. If they share equal power, $hosw = .5$. Define the weight for the head of government as $hogw = 1 - hosw$. The formula then is:

$$v2x_elecoff = \& \; hosw \times \max(a, b \times c1) + hogw \times \max(a \times d, b \times c1 \times d, e, b \times c2),$$

unless the head of state is directly elected ($v2ex_elechos = 1$) and the chief executive ($v2ex_hosw = 1$), in case of which:

$$v2x_elecoff = \& \; [hosw \times \max(a, b \times c1) + hogw \times \max(a \times d, b \times c1 \times d, e, b \times c2) + b]/2$$

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023), v2elembaut v2elembcap v2elrgstry v2elvotbuy v2elirreg v2elintim v2elpeace v2elfrfair v2x_elecreg

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): Jan Teorell

ADDITIONAL VERSIONS: *_codelow, *_codehigh, *_sd

QUESTION: To what extent is the liberal principle of democracy achieved?

CLARIFICATION: The liberal principle of democracy emphasizes the importance of protecting individual and minority rights against the tyranny of the state and the tyranny of the majority. The liberal model takes a "negative" view of political power insofar as it judges the quality of democracy by the limits placed on government. This is achieved by constitutionally protected civil liberties, strong rule of law, an independent judiciary, and effective checks and balances that, together, limit the exercise of executive power.

SCALE: Interval, from low to high (0-1).

SOURCE(S): v2xcl_rol v2x_jucon v2xlg_legcon v2lgbicam

DATA RELEASE: 1-13.

AGGREGATION: This index is formed by averaging the following indices: equality before the law and individual liberties (v2xcl_rol), judicial constraints on the executive (v2x_jucon), and legislative constraints on the executive (v2xlg_legcon). Prior to the calculation v2xlg_legcon gets set to 0 whenever v2lgbicam is 0.

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): Jan Teorell

ADDITIONAL VERSIONS: *_codelow, *_codehigh, *_sd

QUESTION: To what extent is the participatory principle achieved?

CLARIFICATION: The participatory principle of democracy emphasizes active participation by citizens in all political processes, electoral and non-electoral. It is motivated by uneasiness about a bedrock practice of electoral democracy: delegating authority to representatives. Thus, direct rule by citizens is preferred, wherever practicable. This model of democracy thus takes suffrage for granted, emphasizing engagement in civil society organizations, direct democracy, and subnational elected bodies.

SCALE: Interval, from low to high (0-1).

SOURCE(S): v2x_cspart v2xdd_dd v2xel_locelec v2xel_regelec

DATA RELEASE: 1-13.

AGGREGATION: This index is formed by averaging the following indices: civil society participation (v2x_cspart), elected local government power (v2xel_locelec) or elected regional government power (v2xel_regelec) — whichever has higher score — and direct popular vote (v2xdd_dd).

CITATION: Coppedge *et al.* (2015, *V-Dem Working Paper Series* 2015:6); *V-Dem Codebook* (see suggested citation at the top of this document).

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): Michael Bernhard

ADDITIONAL VERSIONS: *_codelow, *_codehigh, *_sd

QUESTION: Are major CSOs routinely consulted by policymakers; how large is the involvement of people in CSOs; are women prevented from participating; and is legislative candidate nomination within party organization highly decentralized or made through party primaries?

CLARIFICATION: The sphere of civil society lies in the public space between the private sphere and the state. Here, citizens organize in groups to pursue their collective interests and ideals. We call these groups civil society organizations CSOs. CSOs include, but are by no means limited to, interest groups, labor unions, spiritual organizations if they are engaged in civic or political activities, social movements, professional associations, charities, and other non-governmental organizations.

The core civil society index CCSI is designed to provide a measure of a robust civil society, understood as one that enjoys autonomy from the state and in which citizens freely and actively pursue their political and civic goals, however conceived.

SCALE: Interval, from low to high (0-1).

v2ddthrepl

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): David Altman

QUESTION: To what extent is the direct popular vote utilized?

CLARIFICATION: Direct popular voting refers here to an institutionalized process by which citizens of a region or country register their choice or opinion on specific issues through a ballot. It is intended to embrace initiatives, referendums, and plebiscites, as those terms are usually understood. It captures some aspects of the more general concept of direct democracy at the national level. The term does not encompass recall elections, deliberative assemblies, or settings in which the vote is not secret or the purview is restricted. Likewise, it does not apply to elections for representatives.

SCALE: Interval, from low to high (0-1).

SOURCE(S): v2ddlexci v2ddsigpci v2ddsiglci v2ddsigdci v2ddpartci v2ddapprci v2ddspmc
v2ddadmci v2ddyrci v2ddlexrf v2ddsigprf v2ddsigdrf v2ddpartrf v2ddapprf v2ddspmr

v2ddlexor v2ddpartor v2ddappor v2ddspmor v2ddadmor v2ddyror v2ddthreor v2ddthref
v2ddthrepl

DATA RELEASE: 1-13. New aggregation formula in version 7.

AGGREGATION: This index results from the addition of the weighted scores of each type of popular votes studied (popular initiatives $\times 1.5$, referendums $\times 1.5$, plebiscites, and obligatory referendums). Each type of popular vote receives a maximum score of two resulting from the addition of two terms (easiness of initiation and easiness of approval), where each term obtains a maximum value of one. As we are studying four types of popular votes, the minimum value is 0, and the maximum is 8. In the v2xdd_dd all scores are normalized to range between 0 and 1. For an elaboration of the weighting factor of each component, see: Altman, David. 2017.

The index is aggregated using this formula:

$$v2xdd_dd = \& amp; (v2xdd_i_ci) \times 1.5 + (v2xdd_i_rf) \times 1.5 \\ \& amp; + (v2xdd_i_pl) + (v2xdd_i_or)$$

Regarding each type of citizen initiated popular vote (i.e., popular initiative), the ease of initiation is measured by (a) the existence of a direct democracy process (v2ddlexci), (b) the

number of signatures needed ($v2ddsigpci$), and (c) time-limits to circulate the signatures ($v2ddsigdci$). Easiness of approval is measured by the surface of the polygon determined by (a) participation quorum ($v2ddsigdci$), (b) approval quorum ($v2ddpartci$), and (c) supermajority ($v2ddspmc$). The resulting score is then multiplied with (d) district majority ($v2ddadmci$). Consequences are measured by (a) the legal status of the decision made by citizens (binding or merely consultative) ($v2ddlexci$), and (b) the frequency and degree of success with which direct popular votes have been held in the past ($v2ddthreci$). The index is aggregated using this formula:

$$v2xddd_dd = \& \times [(IF\ v2ddlexci > 0, 1, 0) \times (1 - (v2ddsigpci)) \times (IF\ v2ddthreci > 0, 1, 0) \times (v2ddsigdci / 365) + (v2ddpartci \cap v2ddspmc)] \times (0.5 + ((100 - v2ddadmci) / 100)) / 2 \times (IF\ v2ddlexci = 2, 1, IF\ v2ddlexci = 1, 0.75, v2ddlexci = 0, 0) \times (IF\ years\ since\ last\ successful\ event < 6, v2ddthreci = 1, afterwards\ decreases\ by\ 0.06\ units\ per\ year\ until\ 0.1; if\ the\ event\ was\ not\ successful\ during\ the\ first\ years\ v2ddapprci = 0.9, afterwards\ decreases\ by\ 0.1\ units\ per\ year\ until\ 0.1)$$

In case the vote originates from above (i.e., authorities), there is no need to account for $v2ddsigpci$ and $v2ddsigdci$. For an elaboration of the interaction among quorums, ($v2ddsigdci$) \cap ($v2ddpartci$) \cap ($v2ddspmc$), see Altman, David. 2017.

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): Jan Teorell

ADDITIONAL VERSIONS: *_codelow, *_codehigh, *_sd

QUESTION: To what extent is the deliberative principle of democracy achieved?

CLARIFICATION: The deliberative principle of democracy focuses on the process by which decisions are reached in a polity. A deliberative process is one in which public reasoning focused on the common good motivates political decisions—as contrasted with emotional appeals, solidary attachments, parochial interests, or coercion. According to this principle, democracy requires more than an aggregation of existing preferences. There should also be respectful dialogue at all levels—from preference formation to final decision—among informed and competent participants who are open to persuasion.

To measure these features of a polity we try to determine the extent to which political elites give public justifications for their positions on matters of public policy, justify their positions in terms of the public good, acknowledge and respect counter-arguments; and how wide the range of consultation is at elite levels.

SCALE: Interval, from low to high (0-1).

SOURCE(S): v2dlreason v2dlcommon v2dlcountr v2dlconslt v2dlengage

DATA RELEASE: 1-13.

AGGREGATION: The index is formed by point estimates drawn from a Bayesian factor analysis model including the following indicators: reasoned justification (v2dlreason), common good justification (v2dlcommon), respect for counterarguments (v2dlcountr), range of consultation (v2dlconslt), and engaged society (v2dlengage).

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): Rachel Sigman, Staffan Lindberg

ADDITIONAL VERSIONS: *_codelow, *_codehigh, *_sd

QUESTION: How equal is the protection of rights and freedoms across social groups by the state?

CLARIFICATION: Equal protection means that the state grants and protects rights and freedoms evenly across social groups. To achieve equal protection of rights and freedoms, the state itself must not interfere in the ability of groups to participate and it must also take action to ensure that rights and freedoms of one social group are not threatened by the actions of another group or individual.

SCALE: Interval, from low to high (0-1).

SOURCE(S): v2clacjust v2clsocgrp v2clsnlpct

DATA RELEASE: 5-13. Release 7 modified excluding v2xcl_acjst.

AGGREGATION: The index is formed by taking the point estimates from a Bayesian factor analysis model of the indicators for social class equality in respect for civil liberties (v2clacjust), social group equality in respect for civil liberties (v2clsocgrp) and percent of population with weaker civil liberties (v2clsnlpct); reversed scale.

Variable citation: Sigman & Lindberg (2017), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023), v2pepwrgen v2pepwsoc v2pepwses

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): Rachel Sigman, Staffan Lindberg

ADDITIONAL VERSIONS: *_codelow, *_codehigh, *_sd

QUESTION: How equal is access to power?

CLARIFICATION: The Equal Access subcomponent is based on the idea that neither the protections of rights and freedoms nor the equal distribution of resources is sufficient to ensure adequate representation. Ideally, all groups should enjoy equal *de facto* capabilities to participate, to serve in positions of political power, to put issues on the agenda, and to influence policymaking.

SCALE: Interval, from low to high (0-1).

SOURCE(S): v2pepwrngen v2pepwrsoc v2pepwrses

DATA RELEASE: 7-13.

AGGREGATION: The index is formed by taking the point estimates from a Bayesian factor analysis model of the indicators power distributed by socioeconomic position (v2pepwrses), power distributed by social group (v2pepwrsoc), and power distributed by gender (v2pepwrngen).

CITATION: Sigman and Lindberg (2017); Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

2.3.3.21 Equal distribution of resources index (v2xeg_eqdr)

Long tag: vdem_cy_v2xeg_eqdr

Original tag: v2xeg_eqdr

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Sigman & Lindberg (2015), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023), v2dlencmps v2dlunivl v2peedueq v2pehealth

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): Rachel Sigman, Staffan Lindberg

ADDITIONAL VERSIONS: *_codelow, *_codehigh, *_sd

QUESTION: How equal is the distribution of resources?

CLARIFICATION: This component measures the extent to which resources — both tangible and intangible — are distributed in society. An equal distribution of resources supports egalitarian democracy in two ways. First, lower poverty rates and the distribution of goods and services such as food, water, housing, education and healthcare ensure that all individuals are capable of participating in politics and government. In short, basic needs must be met in order for individuals to effectively exercise their rights and freedoms see, for example, Sen 1999, Maslow 1943. Second, high levels of resource inequality undermine the ability of poorer populations to participate meaningfully Aristotle, Dahl 2006. Thus, it is necessary to include not only measures of poverty and the distribution of goods and services, but also the levels of inequality in these distributions, and the proportion of the population who are not eligible for social services *i.e.* means-tests, particularistic distribution, etc.. This principle also implies that social or economic inequalities can translate into political inequalities, an issue addressed most notably by Walzer 1983, who argues that overlapping "spheres" of inequality are particularly harmful to society. To address these overlapping "spheres", this component also includes measures of the distribution of power in society amongst different socio-economic groups, genders, etc.

SCALE: Interval, from low to high (0-1).

SOURCE(S): v2dlencmps v2dlunivl v2peedueq v2pehealth

DATA RELEASE: 5, 7-13. Release 7 modified: v2pepwrses, v2pepwrsoc and v2pepwrngen now form a separate subcomponent index.

AGGREGATION: The index is formed by taking the point estimates from a Bayesian factor analysis model of the indicators for particularistic or public goods v2dlencmps, means tested vs. universalistic welfare policies v2dlunivl, educational equality v2peedueq and health equality v2pehealth.

CONVERGENCE: Model parameters with convergence issues: intercept.

2.3.4 V-Dem Indicators - Elections

Instructions to the coders (as shown in the surveys) Elections: Among national elections we distinguish elections to: (i) the lower or unicameral chamber of the legislature (including constituent or constitutional assemblies), (ii) the upper chamber of the legislature, and (iii) the presidency. For present purposes an executive who is elected by a legislature is considered a *prime minister*, not a president. In order to be considered a *president*, an executive must, under ordinary circumstances, be chosen directly by the electorate (perhaps mediated by an electoral college).

Non-election specific coding: The following questions are not election-specific and should be coded for every year from 1900 (or when applicable) to the present.

Election specific questions: The following questions pertain to specific national elections. The date of each election is pre-coded. In cases where more than one election is held on the same day(s), the questions in this section are for all elections taking place on that date. If you have coded for V-Dem in the past, your previous scores will be displayed in the survey. You are welcome to revise previously submitted scores in all surveys. For this section, we kindly ask you make sure that you have coded all election years.

Election specific questions – Historical clarification: The following questions pertain to specific national elections. National elections include elections to the presidency (if applicable) and legislature (lower and upper house, whatever applies), whether direct or indirect, as well as constituent assembly elections. It does not include other elections, *e.g.*, subnational elections, plebiscites, initiatives, referendums, or by-elections. The date of each election is pre-coded. In cases where more than one election is held on the same day(s), the questions in this section are for all elections taking place on that date."

Subnational elections and offices: This section of the survey asks a small number of questions about *subnational* elections and offices. You will be instructed to identify two subnational levels, referred to as "regional government" and "local government". Questions in this section should be answered for every year, rather than for specific elections.

Lower chamber election: The following questions pertain to specific lower chamber or unicameral legislative elections. The dates of these elections have been pre-coded.

Executive and legislative versions of Election specific variables

- In order to subset election specific variables for executive elections only (previously *_ex) – keep only those observations where v2xel_elecpres is 1.
- In order to subset election specific variables for legislative elections only (previously *_leg) – keep only those observations where v2xel_elecparl is 1.

2.3.4.1 Election type (v2eltype)

Long tag: vdem_cy_v2eltype

Original tag: v2eltype

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Hyde & Marinov (2012), Marshall & Jagers (2020)

NELDA (Hyde and Marinov 2012); Chronicle of Parliamentary Elections (IPU); IFES; IDEA; Reif (2011, 2012); Polity IV (Marshall, Jagers 2007); *Keesings Records*; *CIA Factbook*; Wikipedia.

Description:

VARIABLE TYPE: A*

PROJECT MANAGER(S): Staffan I. Lindberg

QUESTION: What type of election was held on this date?

CLARIFICATION: Choose all that apply. Whenever possible, specify the exact date of each election. If the election unfolds across more than one day, enter the date for the first day. If the precise date is unavailable, enter the first of the month; if the month is unknown, enter January 1. Multiple-round elections (*e.g.*, two-round elections) are counted separately. (More than one election in a single year can be accommodated.)

RESPONSES:

- 0: Legislative; lower, sole, or both chambers, first or only round. (0=No, 1=Yes) [v2eltype_0]
 1: Legislative, lower, sole, or both chambers, second round. (0=No, 1=Yes) [v2eltype_1]
 2: Legislative, upper chamber only, first or only round. (0=No, 1=Yes) [v2eltype_2] (Not yet coded)
 3: Legislative, upper chamber only, second round. (0=No, 1=Yes) [v2eltype_3] (Not yet coded)
 4: Constituent Assembly, first or only round. (0=No, 1=Yes) [v2eltype_4]
 5: Constituent Assembly, second round. (0=No, 1=Yes) [v2eltype_5]
 6: Presidential, first or only round. (0=No, 1=Yes) [v2eltype_6]
 7: Presidential, second round. (0=No, 1=Yes) [v2eltype_7]
 8: Metropolitan or supranational legislative, first or only round. (0=No, 1=Yes) [v2eltype_8] (Not yet coded)
 9: Metropolitan or supranational legislative, second round. (0=No, 1=Yes) [v2eltype_9] (Not yet coded)

SCALE: Series of dichotomous scales.

ANSWER-TYPE: Multiple selection.

SOURCE(S): NELDA (Hyde and Marinov 2012); Chronicle of Parliamentary Elections (IPU); IFES; IDEA; Reif (2011, 2012); Polity IV (Marshall, Jaggers 2007); *Keesings Records*; *CIA Factbook*; Wikipedia.

NOTES: All direct elections and elections by an electoral college that is elected by the people and has the sole purpose of electing an executive or members of parliament are coded. Note that single-party elections, elections held under limited suffrage and for only parts of a parliament, as well as elections of which the results are subsequently cancelled are included. Elections for constituent assemblies that come to perform functions beyond drafting and adopting a new constitution (*e.g.* legislating, electing president, adopting budget, etc) are also included and coded under category 0 and 1 (Legislative; lower, sole, or both chambers; first or second round). Excluded are elections that are not decisive, *i. e.* when the HOS alone is selecting the candidate(s). The variable includes elections where results were declared invalid after the fact, *e.g.* by a constitutional court, since they also provide information on the quality of democracy.

2.3.4.7 Percent of population with suffrage (v2elsuffrage)

Long tag: vdem_cy_v2elsuffrage

Original tag: v2elsuffrage

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Elkins et al. (2014), IDEA, Nohlen et al. (1999, 2002), Nohlen (2005), Nohlen & Stöver (2010), country-specific sources

Description:

VARIABLE TYPE: A

PROJECT MANAGER(S): Svend-Erik Skaaning

QUESTION: What percentage (percent) of adult citizens (as defined by statute) has the legal right to vote in national elections?

CLARIFICATION: This question does not take into consideration restrictions based on age, residence, having been convicted for crime, being in the military service or being legally incompetent. It covers legal (*de jure*) restrictions, not restrictions that may be operative in practice (*de facto*). The adult population (as defined by statute) is defined by citizens in the case of independent countries or the people living in the territorial entity in the case of colonies.

Universal suffrage is coded as 100percent. Universal male suffrage is only coded as 50percent. Years before electoral provisions are introduced are scored 0percent. The scores do not reflect whether an electoral regime was interrupted or not. Only if new constitutions, electoral laws, or the like explicitly introduce new regulations of suffrage, the scores were adjusted accordingly if the changes suggested doing so. If qualifying criteria other than gender apply (such as property, tax payments, income, literacy, region, race, ethnicity, religion, and/or 'economic independence'), estimates have been calculated by combining information on the restrictions with different kinds of statistical information (on population size, age distribution, wealth distribution, literacy rates, size of ethnic groups, etc.), secondary country-specific sources, and — in the case of very poor information — the conditions in similar countries or colonies.

The scores reflect *de jure* provisions of suffrage extension in percentage of the adult population. If the suffrage law is revised in a way that affects the extension, the scores reflect this change as of the calendar year the law was enacted.

RESPONSES:

Percent.

SCALE: Interval.

QUESTION: Is significant public financing available for parties' and/or candidates' campaigns for national office?

RESPONSES:

0: No. Public financing is not available.

1: Little. There is public financing but it is so small or so restricted that it plays a minor role in most parties' campaigns.

2: Ambiguous. There is some public financing available but it is unclear whether it plays a significant role for parties.

3: Partly. Public financing plays a significant role in the campaigns of many parties.

4: Yes. Public financing funds a significant share of expenditures by all, or nearly all parties.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

2.3.4.13 EMB autonomy (v2elembaut)

Long tag: vdem_cy_v2elembaut

Original tag: v2elembaut

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Staffan I. Lindberg

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Does the Election Management Body (EMB) have autonomy from government to apply election laws and administrative rules impartially in national elections?

CLARIFICATION: The EMB refers to whatever body (or bodies) is charged with administering national elections.

RESPONSES:

0: No. The EMB is controlled by the incumbent government, the military, or other *de facto* ruling body.

1: Somewhat. The EMB has some autonomy on some issues but on critical issues that influence the outcome of elections, the EMB is partial to the *de facto* ruling body.

2: Ambiguous. The EMB has some autonomy but is also partial, and it is unclear to what extent this influences the outcome of the election.

3: Almost. The EMB has autonomy and acts impartially almost all the time. It may be influenced by the *de facto* ruling body in some minor ways that do not influence the outcome of elections.

4: Yes. The EMB is autonomous and impartially applies elections laws and administrative rules.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

Long tag: vdem_cy_v2elembcap

Original tag: v2elembcap

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Staffan I. Lindberg

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Does the Election Management Body (EMB) have sufficient staff and resources to administer a well-run national election?

CLARIFICATION: The EMB refers to whatever body (or bodies) is charged with administering national elections.

RESPONSES:

0: No. There are glaring deficits in staff, financial, or other resources affecting the organization across the territory.

1: Not really. Deficits are not glaring but they nonetheless seriously compromised the organization of administratively well-run elections in many parts of the country.

2: Ambiguous. There might be serious deficiencies compromising the organization of the election but it could also be a product of human errors and co-incidence or other factors outside the control of the EMB.

3: Mostly. There are partial deficits in resources but these are neither serious nor widespread.

4: Yes. The EMB has adequate staff and other resources to administer a well-run election.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

CONVERGENCE: Model parameters with convergence issues: universal thresholds, expert thresholds.

2.3.4.15 Elections multiparty (v2elmulpar)

Long tag: vdem_cy_v2elmulpar

Original tag: v2elmulpar

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Staffan I. Lindberg

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Was this national election multiparty?

RESPONSES:

0: No. No-party or single-party and there is no meaningful competition (includes situations where a few parties are legal but they are all *de facto* controlled by the dominant party).

1: Not really. No-party or single-party (defined as above) but multiple candidates from the same party and/or independents contest legislative seats or the presidency.

2: Constrained. At least one real opposition party is allowed to contest but competition is highly constrained — legally or informally.

3: Almost. Elections are multiparty in principle but either one main opposition party is prevented (*de jure* or *de facto*) from contesting, or conditions such as civil unrest (excluding natural disasters) prevent competition in a portion of the territory.

4: Yes. Elections are multiparty, even though a few marginal parties may not be permitted to contest (*e.g.* far-right/left extremist parties, anti-democratic religious or ethnic parties).

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

DATE SPECIFIC: Election-specific dates (v2eltype).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

2.3.4.16 Election voter registry (v2elrgstry)

Long tag: vdem_cy_v2elrgstry

Original tag: v2elrgstry

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Staffan I. Lindberg

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: In this national election, was there a reasonably accurate voter registry in place and was it used?

RESPONSES:

0: No. There was no registry, or the registry was not used.

1: No. There was a registry but it was fundamentally flawed (meaning 20percent or more of eligible voters could have been disenfranchised or the outcome could have been affected significantly by double-voting and impersonation).

2: Uncertain. There was a registry but it is unclear whether potential flaws in the registry had much impact on electoral outcomes.

3: Yes, somewhat. The registry was imperfect but less than 10percent of eligible voters may have been disenfranchised, and double-voting and impersonation could not have affected the results significantly.

4: Yes. The voter registry was reasonably accurate (less than 1percent of voters were affected by any flaws) and it was applied in a reasonable fashion.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

DATE SPECIFIC: Election-specific dates (v2eltype).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

2.3.4.17 Election vote buying (v2elvotbuy)

Long tag: vdem_cy_v2elvotbuy

Original tag: v2elvotbuy

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Staffan I. Lindberg

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: In this national election, was there evidence of vote and/or turnout buying?

CLARIFICATION: Vote and turnout buying refers to the distribution of money or gifts to individuals, families, or small groups in order to influence their decision to vote/not vote or whom to vote for. It does not include legislation targeted at specific constituencies, *i.e.*, "porkbarrel" legislation.

RESPONSES:

0: Yes. There was systematic, widespread, and almost nationwide vote/turnout buying by almost all parties and candidates.

1: Yes, some. There were non-systematic but rather common vote-buying efforts, even if only in some parts of the country or by one or a few parties.

2: Restricted. Money and/or personal gifts were distributed by parties or candidates but these offerings were more about meeting an 'entry-ticket' expectation and less about actual vote choice or turnout, even if a smaller number of individuals may also be persuaded.

3: Almost none. There was limited use of money and personal gifts, or these attempts were limited to a few small areas of the country. In all, they probably affected less than a few percent of voters.

4: None. There was no evidence of vote/turnout buying.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

DATE SPECIFIC: Election-specific dates (v2eltype).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

2.3.4.18 Election other voting irregularities (v2elirreg)

Long tag: vdem_cy_v2elirreg

Original tag: v2elirreg

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Staffan I. Lindberg

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: In this national election, was there evidence of other *intentional* irregularities by incumbent and/or opposition parties, and/or vote fraud?

CLARIFICATION: Examples include use of double IDs, intentional lack of voting materials,

ballot-stuffing, misreporting of votes, and false collation of votes. This question does not refer to lack of access to registration, harassment of opposition parties, manipulations of the voter registry or vote-buying (dealt with in previous questions).

RESPONSES:

0: Yes. There were systematic and almost nationwide other irregularities.

1: Yes, some. There were non-systematic, but rather common other irregularities, even if only in some parts of the country.

2: Sporadic. There were a limited number of sporadic other irregularities, and it is not clear whether they were intentional or disfavored particular groups.

3: Almost none. There were only a limited number of irregularities, and many were probably unintentional or did not disfavor particular groups' access to participation.

4: None. There was no evidence of intentional other irregularities. Unintentional irregularities resulting from human error and/or natural conditions may still have occurred.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

DATE SPECIFIC: Election-specific dates (v2eltype).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

2.3.4.19 Election government intimidation (v2elintim)

Long tag: vdem_cy_v2elintim

Original tag: v2elintim

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Staffan I. Lindberg

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: In this national election, were opposition candidates/parties/campaign workers subjected to repression, intimidation, violence, or harassment by the government, the ruling party, or their agents?

CLARIFICATION: Other types of clearly distinguishable civil violence, even if politically motivated, during the election period should *not* be factored in when scoring this indicator (it is dealt with separately).

RESPONSES:

0: Yes. The repression and intimidation by the government or its agents was so strong that the entire period was quiet.

1: Yes, frequent: There was systematic, frequent and violent harassment and intimidation of the opposition by the government or its agents during the election period.

2: Yes, some. There was periodic, not systematic, but possibly centrally coordinated — harassment and intimidation of the opposition by the government or its agents.

3: Restrained. There were sporadic instances of violent harassment and intimidation by the government or its agents, in at least one part of the country, and directed at only one or two local branches of opposition groups.

4: None. There was no harassment or intimidation of opposition by the government or its agents, during the election campaign period and polling day.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

DATE SPECIFIC: Election-specific dates (v2eltype).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Staffan I. Lindberg

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: In this national election, was the campaign period, election day, and post-election process free from other types (*not* by the government, the ruling party, or their agents) of violence related to the conduct of the election and the campaigns (but not conducted by the government and its agents)?

RESPONSES:

0: No. There was widespread violence between civilians occurring throughout the election period, or in an intense period of more than a week and in large swaths of the country. It resulted in a large number of deaths or displaced refugees.

1: Not really. There were significant levels of violence but not throughout the election period or beyond limited parts of the country. A few people may have died as a result, and some people may have been forced to move temporarily.

2: Somewhat. There were some outbursts of limited violence for a day or two, and only in a small part of the country. The number of injured and otherwise affected was relatively small.

3: Almost. There were only a few instances of isolated violent acts, involving only a few people; no one died and very few were injured.

4: Peaceful. No election-related violence between civilians occurred.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

DATE SPECIFIC: Election-specific dates (v2eltype).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

CONVERGENCE: Model parameters with convergence issues: universal thresholds.

2.3.4.21 Election boycotts (v2elboycot)

Long tag: vdem_cy_v2elboycot

Original tag: v2elboycot

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Staffan I. Lindberg

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: In this national election, did any registered opposition candidates or parties boycott?

CLARIFICATION: A boycott is a deliberate and public refusal to participate in an election by a candidate or party who is eligible to participate.

RESPONSES:

0: Total. All opposition parties and candidates boycotted the election.

1: Significant. Some but not all opposition parties or candidates boycotted but they

constituted a major opposition force.

2: Ambiguous. Some but not all opposition parties or candidates boycotted but it is unclear whether they would have constituted a major electoral force.

3: Minor. A few opposition parties or candidates boycotted and they were relatively insignificant ones.

4: Nonexistent. No parties or candidates boycotted the elections.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

2.3.4.24 Election paid interest group media (v2elpaidig)

Long tag: vdem_cy_v2elpaidig

Original tag: v2elpaidig

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Michael Coppedge

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: In this election, were interest groups and individuals able to run paid campaign ads on national broadcast media?

RESPONSES:

0: Not at all.

1: It is permitted but regulated in ways that, in practice, favor groups allied with the government.

2: It is permitted without limit.

3: It is permitted but regulated in ways that, in practice, foster representation of diverse perspectives.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

DATE SPECIFIC: Election-specific dates (v2eltype).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1900-2022

2.3.4.25 Election free and fair (v2elfrfair)

Long tag: vdem_cy_v2elfrfair

Original tag: v2elfrfair

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Staffan I. Lindberg

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Taking all aspects of the pre-election period, election day, and the post-election process into account, would you consider this national election to be free and fair?

CLARIFICATION: The only thing that should *not* be considered in coding this is the extent of suffrage (by law). Thus, a free and fair election may occur even if the law excludes significant groups (an issue measured separately).

RESPONSES:

0: No, not at all. The elections were fundamentally flawed and the official results had little if anything to do with the 'will of the people' (*i.e.*, who became president; or who won the legislative majority).

1: Not really. While the elections allowed for some competition, the irregularities in the end affected the outcome of the election (*i.e.*, who became president; or who won the legislative majority).

2: Ambiguous. There was substantial competition and freedom of participation but there were also significant irregularities. It is hard to determine whether the irregularities affected the outcome or not (as defined above).

3: Yes, somewhat. There were deficiencies and some degree of fraud and irregularities but these did not in the end affect the outcome (as defined above).

4: Yes. There was some amount of human error and logistical restrictions but these were largely unintentional and without significant consequences.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Did losing parties and candidates accept the result of this national election within three months?

RESPONSES:

0: None. None of the losing parties or candidates accepted the results the election, or all opposition was banned.

1: A few. Some but not all losing parties or candidates accepted the results but those who constituted the main opposition force did not.

2: Some. Some but not all opposition parties or candidates accepted the results but it is unclear whether they constituted a major opposition force or were relatively insignificant.

3: Most. Many but not all opposition parties or candidates accepted the results and those who did not had little electoral support.

4: All. All parties and candidates accepted the results.

SCALE: Ordinal, converted to interval by the measurement model.

Long tag: vdem_cy_v2elasmoff

Original tag: v2elasmoff

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Staffan I. Lindberg

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Following this national election, did winners assume office according to prescribed constitutional rules and norms?

RESPONSES:

0: No. The official winner of the election was prevented from assuming office by *unconstitutional* means.

1: Partially. The official winner/winning party or largest vote-getter was forced at least in part by unconstitutional means to share power, or delay assuming power for more than 6 months.

2: Yes. Constitutional rules and norms were followed and the official winner/winning party or largest vote-getter assumed office accordingly (or continued in office).

SCALE: Ordinal, converted to interval by the measurement model.

NOTES: The question text between contemporary and historical differ in inclusion of "within 12 months of the election". In contemporary it is excluded while included in historical.

DATA RELEASE: 1-13.

Variable citation: IDEA (VAP figures are estimates and should be treated as such)

Description:

VARIABLE TYPE: A

PROJECT MANAGER(S): Pamela Paxton

QUESTION: In this national election, what percentage (percent) of the adult voting-age population cast a vote according to official results?

CLARIFICATION: The VAP can reflect irregularities such as problems with the voters' register or registration system. VAP numbers are estimates since they do not take into account legal or systemic barriers to the exercise of the franchise or account for non-eligible members of the population. Thus, it can occur that VAP values surpass 100 which is not an error but reflects such conditions.

RESPONSES:

Percent.

SCALE: Interval.

SOURCE(S): IDEA (VAP figures are estimates and should be treated as such).

NOTES: In cases where executive and legislative elections were held on the same day but there is a different VAP turnout for each election, the VAP turnout for this date is coded for the executive elections only. The VAP turnout data for the legislative elections, in these cases, can be found in the IDEA Voter turnout database (see references).

2.3.4.42 Election HOG turnover ordinal (v2elturnhog)*Long tag:* vdem_cy_v2elturnhog*Original tag:* v2elturnhog*Dataset citation:* Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)*Variable citation:* Henisz (2000, 2002), Lentz (1994, 1999), www.worldstatesmen.org, Election Guide, IDEA IPU Parline, V-Dem Country Coordinators*Description:*

VARIABLE TYPE: A

PROJECT MANAGER(S): Staffan I. Lindberg

QUESTION: Was there turnover in the office of the head of government (HOG) as a result of this national election?

CLARIFICATION: Turnover can occur in presidential, semi-presidential, as well as parliamentary systems, and it refers not only to the individual person holding office but also to that person's party. If the HOS and HOG are the same person, the coding is the same for the two variables. The second round of election is coded as the first.

RESPONSES:

0: No. The head of government- retained his/her position either as a result of the outcome of the election, or because the elections do not affect the HOG.

1: Half. The head of government is a different individual than before the election but from the same party that was in power before the election, or a new independent candidate is elected. In parliamentary systems this code applies when the head of government changes as an effect of alternations in the ruling coalition, changes in party leadership.

2: Yes. The executive(s) - head of state and head of government- lost their position(s) as a result of the outcome of the election. In presidential systems this code applies when the new president is both a different person and from a different party than before the election or an independent candidate is elected. In parliamentary systems the ruling party or coalition of parties lost and the new head of government is from a different party or from a new coalition. This code also applies if this is the first head of government elected for a newly (semi-) independent state country.

SCALE: Ordinal.

Variable citation: Henisz (2000, 2002), Lentz (1994, 1999), www.worldstatesmen.org, Election Guide, IDEA IPU Parline, V-Dem Country Coordinators

Description:

VARIABLE TYPE: A

PROJECT MANAGER(S): Staffan I. Lindberg

QUESTION: Was there turnover in the executive office as a result of this national election?

CLARIFICATION: Turnover in the executive can occur in presidential, semi-presidential, as well as parliamentary systems, and it refers not only to the individual person holding office but also to that person's party. This question considers whether turnover occurs both in the office of head of state and head of government, even if one of the positions is not contested in the particular elections.

RESPONSES:

0: No. The executive(s) — head of state and head of government — retained their position either as a result of the outcome of the election, or because the elections do not affect the executive.

1: Half. The head of state or head of government is a different individual than before the election but from the same party (or independent) that was in power before the election. In parliamentary systems this code applies when the head of government changes as an effect of alternations in the ruling coalition, changes in party leadership, or a new independent head of government. In semi-presidential regimes, this code applies when the elections result in co-habitation after a period when one party (or independent) has held both offices, or if one of the executive office holders — the head of state or head of government changes, while the other retains their position.

2: Yes. The executive(s) — head of state and head of government — lost their position(s) as a result of the outcome of the election. In presidential systems this code applies when the new president is both a different person and from a different party (or independent) than before the election. In parliamentary systems the ruling party or coalition of parties lost and the new head of government is from a different party or from a new coalition. In semi-presidential regimes, this code applies when one party holds both the office of the head of state and head of government after a period of co-habitation, or if the holders of both offices change in terms of person and party (or independent) in the same election. This code also applies if this is the first head of state and/or head of government elected for a newly (semi-) independent state country.

Description:

VARIABLE TYPE: A

PROJECT MANAGER(S): Staffan I. Lindberg, Carl Henrik Knutsen, Jan Teorell

QUESTION: What was the electoral system used in this election for the lower or unicameral chamber of the legislature?

CLARIFICATION: Mixed majoritarian systems were coded as a two-round system. Regarding multi-member districts we coded list PR with large multi-member districts when the mean district size = 7. Constituent Assembly elections are excluded from the coding, since they often use specifically designed electoral systems. Further information on the following electoral system types can be found in Reynolds/Reilly, *The New International IDEA Handbook* (2005), chapter two and Annex B (Glossary of Terms) — downloadable, free of charge, at www.idea.int/publications/esd/.

RESPONSES:

0: First-past-the-post (FPP, aka plurality) in single-member constituencies. The candidate with the most votes wins the seat.

1: Two-round system in single-member constituencies. Like FPP except that a threshold — usually 50percent + 1 — is required to avoid a runoff between the two top vote-getters.

2: Alternative vote in single-member districts. Voters rank-order their preferences for the candidates who compete for a single seat. If any candidate receives an absolute majority of first preferences, s/he is elected.

If not, then the least successful candidates (based on first-preferences) are eliminated and their votes reallocated to the second-preferences. This process is repeated until a candidate reaches 50percent +1 of the votes.

3: Block vote in multi-member districts. Electors have as many votes as there are seats within that district and can rank-order them (within or across parties) as they please.

4: Party block vote in multi-member districts. Voters cast a vote for a single party (but not for individual candidates within the party's list). The party with the most votes (*i.e.*, a plurality) wins all the seats in that district.

5: Parallel (SMD/PR). Some seats are in single-member districts (allocated by FPP or two-round electoral rules) and other seats are in multimember districts (allocated by some form of PR). These districts are overlapping, meaning that each elector votes twice: once in the single-member district race and once in the multi-member district race. Results are independent.

6: Mixed-member proportional (SMD with PR compensatory seats). Some seats are in single-member districts (allocated by FPP or two-round electoral rules) and other seats are in multimember districts (allocated by some form of PR). These districts are overlapping, meaning that each elector votes twice: once in the single-member district race and once in the multi-member district race. Results are not independent. Specifically, the multimember seats are used to rectify disproportionalities achieved in the single-member district election — by adding seats, as necessary.

This means that the representation of parties in the legislature is determined entirely by the PR ballot. It also means that the result of an MMP election is similar to the result of a PR election: parties achieve representation according to their nationwide vote share (on the PR ballot).

7: List PR with small multi-member districts (mean district size lt; 7). Each party presents a list of candidates for election within a district. Electors vote for a party, and parties receive seats in (rough) proportion to their overall share of the vote. Mean district size is less than seven.

8: List PR with large multi-member districts (mean district size gt; 7). Each party presents a list of candidates for election within a district. Electors vote for a party, and parties receive seats in (rough) proportion to their overall share of the vote. Mean district size is greater than seven.

9: Single-transferable vote (STV) in multi-member districts. Electors rank-order candidates nominated for a district. Candidates that surpass a specified quota of first-preference votes

are elected. The remaining seats are chosen by reallocating the votes of the least successful candidates to elector's second- (or third-) preferences until the specified quota is reached. This process is repeated until all seats for that district are filled.

10: Single non-transferable vote (SNTV) in multi-member districts. Each elector chooses a single candidate. The candidates with the most votes (a plurality) win. (The number of winners is of course determined by the size of the district.)

11: Limited vote in multi-member districts.

Electors have more than one vote but fewer votes than the number of seats in the district. The candidates with the most votes (a plurality) win. (The number of winners is of course determined by the size of the district.)

12: Borda Count in single- or multi-member districts. Electors use numbers to mark preferences among candidates and each preference is assigned a value. For example, in a ten-candidate field a first preference is worth one, a second preference is worth .9, and so forth. These are summed and the candidate(s) with the highest total(s) is/are elected.

Description:

VARIABLE TYPE: A

PROJECT MANAGER(S): Staffan I. Lindberg

QUESTION: Did control of the lower (or unicameral) chamber of the legislature change as a result of this election, according to official results?

RESPONSES:

0: No. The majority party or ruling coalition includes the same or substantially the same parties, even if some minor parties (holding less than 10 percent of the seats in the legislature) left or joined the coalition, or because the elections do not affect the lower chamber.

1: Half. A minority party or coalition who was not in control of the chamber before the elections assumed the leading position in the legislature but is dependent on other parties for support. Or, a post-election ruling coalition includes some old parties and some new parties and the new parties represent more than 10 percent of the seats in the legislature.

2: Yes. The incumbent party or coalition lost its majority or plurality-dominant position in the legislature and a different party or coalition assumes the majority position.

SCALE: Ordinal.

2.3.4.64 Regional government exists (v2elreggov)

Long tag: vdem_cy_v2elreggov

Original tag: v2elreggov

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Country expert coding (C data)

Description:

VARIABLE TYPE: A,C

PROJECT MANAGER(S): Kelly McMann

QUESTION: Is there a regional government?

CLARIFICATION: Regional government is typically the second-highest level of government, just below the national government. There are many names for units at this level; some common ones are regions, provinces, states, departments, and cantons.

Countries with more than two subnational levels may have multiple levels that fit the definition of regional government. If this is the case, for all questions about regional government please code the regional level that, in practice, has the most responsibilities (*e.g.* making laws, providing primary, education, maintaining roads, policing, etc.) and resources to carry out those responsibilities.

Some countries are so small that, now or in earlier time periods, they have only local government and not regional government. If this is the case, please code this question as "0"; for the appropriate time period.

If you have questions about identifying the regional government for your country, please send an email inquiry to your V-Dem contact.

RESPONSES:

0: No.

1: Yes.

ORDERING: If coded "0" for entire period, skip the following questions focused on regional government.

SCALE: Dichotomous.

SOURCE(S): Country expert coding (C data).

NOTES: Converted from (C) to (A (C)) coding as of December 2014. The part of the time series coming from Historical V-Dem is of variable type A*.

2.3.4.66 Regional government elected (v2elsrgel)

Long tag: vdem_cy_v2elsrgel

Original tag: v2elsrgel

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Country expert coding (C data)

Description:

VARIABLE TYPE: A,C

PROJECT MANAGER(S): Kelly McMann

QUESTION: At the regional level, are government offices elected in practice?

CLARIFICATION: *quot*;Government offices*quot*; here refers to a regional executive and a regional assembly, *not* a judiciary and *not* minor bureaucrats. An *executive* is a single individual (or a very small group) (*e.g.*, a governor). An *assembly* is a larger body of officials, who may be divided into two chambers.

quot;Elected*quot*; refers to offices that are directly elected by citizens or indirectly elected by a regional elected assembly. All other methods of obtaining office — including appointment by higher or lower levels of government — are considered to be *non-elected*.

In classifying a position as elected one is making no judgments about the freeness/fairness of the election or the relative extent of suffrage. One is simply indicating that there is an election and that the winner of that election (however conducted) generally takes office.

RESPONSES:

0: Generally, offices at the regional level are not elected.

1: Generally, the regional executive is elected but not the assembly.

2: Generally, the regional assembly is elected but not the executive.

3: Generally, the regional executive is elected and there is no assembly.

4: Generally, the regional assembly is elected and there is no executive.

5: Generally, the regional executive and assembly are elected.

SCALE: Nominal.

SOURCE(S): Country expert coding (C data).

NOTES: Converted from (C) to (A (C)) coding as of December 2014. The part of the time series coming from Historical V-Dem is of variable type A*.

DATA RELEASE: 1-13.

2.3.4.67 Regional offices relative power (v2elrgpwr)

Long tag: vdem_cy_v2elrgpwr

Original tag: v2elrgpwr

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Kelly McMann

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: How would you characterize the relative power, in practice, of elected and non-elected offices at the regional level?

CLARIFICATION: We are concerned with the relative power of regional offices to each other, *not* the power of regional offices relative to higher or lower levels of government.

Please consider only major offices, such as the executive, assembly, and judiciary, *not* those of minor bureaucrats. (A body of government officials, such as an assembly or judiciary, counts as one office.)

An office is "subordinate" if its officeholders can be chosen and removed by another office or if its decisions can be blocked or modified by another office, but it cannot similarly constrain the other office.

RESPONSES:

0: All or nearly all elected offices are subordinate to non-elected offices at the regional level.

1: Some elected offices are subordinate to non-elected offices at the regional level.

2: Elected and non-elected offices are approximately equal in power at the regional level.

3: Most non-elected offices are subordinate to elected offices at the regional level.

4: All or nearly all non-elected offices are subordinate to elected offices at the regional level.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

2.3.4.68 Local government exists (v2ellocgov)

Long tag: vdem_cy_v2ellocgov

Original tag: v2ellocgov

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Country expert coding (C data)

Description:

VARIABLE TYPE: A,C

PROJECT MANAGER(S): Kelly McMann

QUESTION: Is there a local government?

CLARIFICATION: Local government refers to the level of government below the regional government. There are many names for units at this level; some common ones are counties, communes, cities, municipalities, towns, rural municipalities, and villages.

Countries with more than two subnational levels may have multiple levels that fit the definition of local government. If this is the case, please code the local level that, in practice, has the most responsibilities (*e.g.* making laws, providing primary, education, maintaining roads, policing, etc.) and resources to carry out those responsibilities.

RESPONSES:

0: No.

1: Yes.

ORDERING: If coded "0"; for entire period, skip the following questions focused on local government.

SCALE: Dichotomous, converted to interval by the measurement model.

SOURCE(S): Country expert coding (C data).

NOTES: Converted from (C) to (A (C)) coding as of December 2014. The part of the time series coming from Historical V-Dem is of variable type A*.

DATA RELEASE: 3-13.

CROSS-CODER AGGREGATION: Mode from country experts' coding, cross-checked by research assistants in cases where a single mode was not generated because of expert disagreement.

COUNTRY-YEAR AGGREGATION: Last

CITATION: *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

2.3.4.69 Local government name (v2ellocnam)

Long tag: vdem_cy_v2ellocnam

Original tag: v2ellocnam

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Country expert coding (C data)

Description:

VARIABLE TYPE: A,C

PROJECT MANAGER(S): Kelly McMann

QUESTION: What is the term(s) for the local government units?

CLARIFICATION: If different types of units exist at this single level of local government, use multiple terms. For example, different terms may be needed for rural and urban units.

If the language of politics in your country is not English, please use whatever language is commonly used. For example, in Mexico local units are called "Municipios".

RESPONSES:

Text.

SOURCE(S): Country expert coding (C data).

NOTES: Converted from (C) to (A (C)) coding as of December 2014. The part of the time series coming from Historical V-Dem is of variable type A*.

2.3.4.70 Local government elected (v2ellocelc)

Long tag: vdem_cy_v2ellocelc

Original tag: v2ellocelc

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Country expert coding (C data)

Description:

VARIABLE TYPE: A,C

PROJECT MANAGER(S): Kelly McMann

QUESTION: At the local level, are government (local government) offices elected in practice?

CLARIFICATION: "Government offices"; here refers to a local executive and a local assembly, *not* a judiciary and not minor bureaucrats. An *executive* is a single individual (or a very small group) (*e.g.*, a mayor). An *assembly* is a larger body of officials.

"Elected"; refers to offices that are directly elected by citizens or indirectly elected by a local elected assembly. All other methods of obtaining office — including appointment by a higher level of government — are considered to be *non-elected*.

In classifying a position as elected one is making no judgments about the freeness/fairness of the election or the relative extent of suffrage. One is simply indicating that there is an election and that the winner of that election (however conducted) generally takes office.

RESPONSES:

0: Generally, offices at the local level are not elected.

1: Generally, the local executive is elected but not the assembly.

2: Generally, the local assembly is elected but not the executive.

3: Generally, the local executive is elected and there is no assembly.

4: Generally, the local assembly is elected and there is no executive.

5: Generally, the local executive and assembly are elected.

ORDERING: If coded "0" for entire period, skip the following questions on local offices relative power.

SCALE: Nominal.

SOURCE(S): Country expert coding (C data).

NOTES: Converted from (C) to (A (C)) coding as of December 2014. The part of the time

series coming from Historical V-Dem is of variable type A*.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Mode from country experts' coding, cross-checked by research assistants in cases where a single mode was not generated because of expert disagreement.

COUNTRY-YEAR AGGREGATION: Last

CITATION: *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

2.3.4.71 Local offices relative power (v2ellocpwr)

Long tag: vdem_cy_v2ellocpwr

Original tag: v2ellocpwr

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Kelly McMann

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: How would you characterize the relative power, in practice, of elected and non-elected offices at the local level?

CLARIFICATION: We are concerned with the relative power of local offices to *each other*, not the power of local offices relative to higher levels of government.

Please consider only major offices, such as the executive, assembly, and judiciary, *not* those of minor bureaucrats. (A body of government officials, such as an assembly or judiciary, counts as one office.)

An office is "subordinate" if its officeholders can be chosen and removed by another office or if its decisions can be blocked or modified by another office, but it cannot similarly constrain the other office.

RESPONSES:

0: All or nearly all elected offices are subordinate to non-elected offices at the local level.

1: Some elected offices are subordinate to non-elected offices at the local level.

2: Elected and non-elected offices are approximately equal in power at the local level.

3: Most non-elected offices are subordinate to elected offices at the local level.

4: All or nearly all non-elected offices are subordinate to elected offices at the local level.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CLEANING: Set to missing when v2ellocgov is 0

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

2.3.4.72 Subnational elections free and fair (v2elffelr)

Long tag: vdem_cy_v2elffelr

Original tag: v2elffelr

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Kelly McMann

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Taking all aspects of the pre-election period, election day, and the post-election

process into account, would you consider subnational elections (regional and local, as previously identified) to be free and fair on average?

CLARIFICATION: This question refers to subnational levels that have elected offices and elections. It does not refer to subnational levels without elected offices and elections. If there were no subnational elections in any of the years covered in this survey, choose option 5.

quot;Free and fairquot; refers to all aspects of the election process *except* the extent of suffrage (by law). Thus, a free and fair election may occur even if the law excludes significant groups (we measure that issue separately).

RESPONSES:

0: No, not at all. The elections were fundamentally flawed and the official results had little if anything to do with the 'will of the people' (who won office).

1: Not really. While the elections allowed for some competition, the irregularities in the end affected the outcome of the elections (who won office).

2: Ambiguous. There was substantial competition and freedom of participation but there were also significant irregularities. It is hard to determine whether the irregularities affected the outcome or not (who won office).

3: Yes, somewhat. There were deficiencies and some degree of fraud and irregularities but these did not in the end affect the outcome (who won office).

4: Yes. There was some amount of human error and logistical restrictions but these were largely unintentional and without significant consequences.

SCALE: Ordinal, converted to interval by the measurement model.

NOTES: As of December 2014, the former category quot;5quot; is recoded as a separate variable (v2elffelrbin).

DATA RELEASE: 3-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CLEANING: Set to missing when v2elffelrbin_ord is 0.

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

2.3.4.73 Subnational elections held (v2elffelrbin)

Long tag: vdem_cy_v2elffelrbin

Original tag: v2elffelrbin

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Kelly McMann

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Are subnational elections held?

RESPONSES:

0: No.

1: Yes.

SCALE: Dichotomous, converted to interval by the measurement model.

NOTES: As of December 2014, the former category quot;5quot; from variable v2elffelr is recoded as a separate variable (v2elffelrbin). If a coder chose the 5th category in the original question, it receives 0 in the new quot;v2elffelrbinquot; variable (corresponding to the answer, no, there were no subnational elections); otherwise it receives 1 (yes, there are subnational elections held). The resulting series of 0-1 country-coder time-series is run in the measurement model, which calculates the final value of v2elffelrbin while taking into account background coder characteristics.

DATA RELEASE: 3-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook*

2.3.5 V-Dem Indicators - Political Parties

Instructions to the coders (as shown in the surveys)

Political parties:

A "political party" refers to an organization that nominates candidates for public office. A party may refer to a longstanding coalition such as the CDU/CSU in Germany if that coalition functions in most respects like a single party. Sometimes, the identity of a party is obscured by name changes. However, if the party/coalition changes names but retains key personnel and is still run by and for the same constituency then it should be considered the same organization. Our notion of a party includes loose factional groupings such as the Tories and Whigs in the 19th-century Britain or the Caps and Hats in 18th-century Sweden. Unless stated otherwise the following questions pertain to parties that compete for seats in the national legislature or for the presidency.

Most of the questions in the following section ask you to generalize across parties in a particular country (and at a particular point in time). We realize that practices vary from party to party; these are, after all, highly diverse organizations. However, for our purposes it is important to consider what the most common practices are.

In answering these questions it is sometimes important to distinguish between formal rules (as stipulated by statute, legislative rules, the constitution, or common law precedent) and actual practice (what happens on the ground). In order to clarify the *de jure/de facto* distinction, we employ the terms "by law..." and "in practice..." Please pay close attention to these cues wherever you see them. And if there is no clarification of the issue, assume that the question is referring to practices rather than formal rules.

2.3.5.1 Barriers to parties (v2psbars)

Long tag: vdem_cy_v2psbars

Original tag: v2psbars

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Allen Hicken

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: How restrictive are the barriers to forming a party?

CLARIFICATION: Barriers include legal requirements such as requirements for membership or financial deposits, as well as harassment.

RESPONSES:

0: Parties are not allowed.

1: It is impossible, or virtually impossible, for parties not affiliated with the government to form (legally).

2: There are significant obstacles (*e.g.* party leaders face high levels of regular political

harassment by authorities).

3: There are modest barriers (*e.g.* party leaders face occasional political harassment by authorities).

4: There are no substantial barriers.

ORDERING: If your answer is 1-4, proceed to the next question [v2psoppaut]. If your answer is 0, skip to the question about Party organization [v2psorgs].

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

2.3.5.2 Party Ban (v2psparban)

Long tag: vdem_cy_v2psparban

Original tag: v2psparban

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Allen Hicken

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Are any parties banned?

CLARIFICATION: This does not apply to parties that are barred from competing for failing to meet registration requirements or support thresholds.

RESPONSES:

0: Yes. All parties except the state-sponsored party (and closely allied parties) are banned.

1: Yes. Elections are non-partisan or there are no officially recognized parties.

2: Yes. Many parties are banned.

3: Yes. But only a few parties are banned.

4: No. No parties are officially banned.

ORDERING: If your answer is 4, skip the next question [v2psbantar].

SCALE: Ordinal, converted to interval by the measurement model.

PROJECT MANAGER(S): Allen Hicken

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: How many parties have permanent local party branches?

RESPONSES:

0: None.

1: Fewer than half.

2: About half.

3: More than half.

4: All.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

2.3.5.6 Party linkages (v2psprlnks)

Long tag: vdem_cy_v2psprlnks

Original tag: v2psprlnks

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Allen Hicken

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Among the major parties, what is the main or most common form of linkage to their constituents?

CLARIFICATION: A party-constituent linkage refers to the sort of "good" that the party offers in exchange for political support and participation in party activities.

RESPONSES:

0: Clientelistic. Constituents are rewarded with goods, cash, and/or jobs.

1: Mixed clientelistic and local collective.

2: Local collective. Constituents are rewarded with local collective goods, *e.g.*, wells, toilets, markets, roads, bridges, and local development.

3: Mixed local collective and policy/programmatic.

4: Policy/programmatic. Constituents respond to a party's positions on national policies, general party programs, and visions for society.

SCALE: Ordinal, converted to interval by the measurement model.

2.3.5.7 Distinct party platforms (v2psplats)

Long tag: vdem_cy_v2psplats

Original tag: v2psplats

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Allen Hicken

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: How many political parties with representation in the national legislature or presidency have publicly available party platforms (manifestos) that are publicized and

relatively distinct from one another?

CLARIFICATION: In order to be counted in the affirmative, parties must have platforms that are both distinct (either in terms of content or generalized ideology) and publicly disseminated.

This question is *not* intended to measure how much the public actually knows about these platforms or whether they are important in structuring policymaking.

RESPONSES:

0: None, or nearly none.

1: Fewer than half.

2: About half.

3: More than half.

4: All, or nearly all.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

2.3.5.8 Candidate selection–National/local (v2pscnslnl)

Long tag: vdem_cy_v2pscnslnl

Original tag: v2pscnslnl

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Allen Hicken

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: How centralized is legislative candidate selection within the parties?

CLARIFICATION: The power to select candidates for national legislative elections is often divided between local/municipal party actors, regional/state-level party organizations, and national party leaders. One level usually dominates the selection process, while sometimes candidate selection is the outcome of bargaining between the different levels of party organization.

RESPONSES:

0: National legislative candidates are selected exclusively by national party leaders.

1: National legislative candidate selection is dominated by national party leaders but with some limited influence from local or state level organizations.

2: National legislative candidates are chosen through bargaining across different levels of party organization.

3: National legislative candidates are chosen by regional or state-level organizations, perhaps with some input from local party organizations or constituency groups.

4: National legislative candidates are chosen by a small cadre of local or municipal level actors.

5: National legislative candidates are chosen by constituency groups or direct primaries.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Allen Hicken

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Is it normal for members of the legislature to vote with other members of their party on important bills?

RESPONSES:

0: Not really. Many members are elected as independents and party discipline is very weak.

1: More often than not. Members are more likely to vote with their parties than against them, but defections are common.

2: Mostly. Members vote with their parties most of the time.

3: Yes, absolutely. Members vote with their parties almost all the time.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

Long tag: vdem_cy_v2pscomprg

Original tag: v2pscomprg

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Allen Hicken

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Which of the following best describes the nature of electoral support for major parties (those gaining over 10 percent of the vote)?

CLARIFICATION: Leave this question blank if election was nonpartisan, *i.e.*, no parties (not even pro-government parties) were allowed.

RESPONSES:

0: Most major parties are competitive in only one or two regions of the country, *i.e.*, their support is heavily concentrated in a few areas.

1: Most major parties are competitive in some regions of the country, but not in others.

2: Most major parties are competitive in most regions of the country.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

2.3.5.11 National party control (v2psnatpar)

Long tag: vdem_cy_v2psnatpar

Original tag: v2psnatpar

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Allen Hicken

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: How unified is party control of the national government?

CLARIFICATION: With respect to the executive, consider only those offices that have effective power over policymaking. (If there is a monarch or president with very little policymaking power, this office should not be considered.) With respect to bicameral legislatures, consider only the chamber, or chambers, that have effective policymaking power. (If the upper chamber is inactive or clearly subordinate, consider only the lower chamber.) Leave this question blank if election was nonpartisan, *i.e.*, no parties (not even pro-government parties) were allowed.

RESPONSES:

0: Unified coalition control. A single multi-party coalition controls the executive and legislative branches of the national government. (This is true almost by definition in a parliamentary system where a single coalition gathers together a majority of seats.)

1: Divided party control. (A) Different parties or individuals (unconnected to parties) control the executive and the legislature or (B) Executive power is divided between a president/monarch and a prime minister, each of which belongs to different parties; or between a non-partisan monarch and a prime minister.

2: Unified party control. A single party controls the executive and legislative branches of the national government. (This is true almost by definition in a parliamentary system where a single party has a majority of seats.)

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Allen Hicken

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Does a single party control important policymaking bodies across subnational units (regional and local governments)?

CLARIFICATION: Leave this question blank if election was nonpartisan, *i.e.*, no parties (not even pro-government parties) were allowed.

RESPONSES:

0: In almost all subnational units (at least 90percent), a single party controls all or virtually all policymaking bodies.

1: In most subnational units (66percent-90percent), a single party controls all or virtually all policymaking bodies.

2: In few subnational units (less than 66percent), a single party controls all or virtually all policymaking bodies.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see

V-Dem Methodology).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

2.3.6 V-Dem Indicators - Direct Democracy

Instructions to the coders (as shown in the surveys)

Direct democracy: This set of questions focuses on direct popular votes. Four mechanisms are distinguished: a. Measures placed on the ballot by the executive and/or the legislature for which the constitution or basic laws require a vote. These are referred to as *constitutional referendums* (*i.e. obligatory referendums*). b. Measures placed on the ballot by the executive and/or the legislature that for which the constitution or basic laws does not require a vote. These are referred to as *plebiscites*. c. Measures placed on the ballot through a citizen petition process that concern the possible adoption of a new law or constitutional amendment. These are referred to as *popular initiatives*. d. Measures placed on the ballot through a citizen petition process that concern the possible rejection of a recently approved law or a bill discussed in parliament. These are referred to as *referendums*.

Note that we do not consider recall elections or citizen petitions to the legislature even they may also involve a gathering of signatures or a popular vote. Note also that in coding these questions it is sometimes important to distinguish between formal rules (as stipulated by statute, legislative rules, the constitution, or common law precedent) and actual practice. In order to clarify the *de jure/de facto* distinction, we employ the terms "by law..." and "in practice..."

2.3.6.1 Initiatives permitted (v2ddlexci)

Long tag: vdem_cy_v2ddlexci

2.3.6.21 Constitutional changes popular vote (v2ddlexor)*Long tag:* vdem_cy_v2ddlexor*Original tag:* v2ddlexor*Dataset citation:* Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)*Description:*

VARIABLE TYPE: A

PROJECT MANAGER(S): David Altman

QUESTION: Is a popular and direct vote required in order for a constitutional change to be legally binding?

CLARIFICATION: Unless otherwise stated, every question refers to direct democracy at the national level, *i.e.* it does not incorporate popular votes at the provincial or local level.

RESPONSES:

0: No, it is not required.

1: Depends on the content of constitutional change (for some it is required, for others however it is not).

2: Yes, any constitutional must be approved directly by the citizenry.

SCALE: Ordinal.

DATA RELEASE: 7-13.

2.3.7 V-Dem Indicators - The Executive**Instructions to the coders (as shown in the surveys)****Executive:**

In this section, we distinguish between the head of state (HOS) and the head of government (HOG). The *head of state* is an individual or collective body that serves as the chief public representative of the country. Sometimes this is a largely ceremonial role, *e.g.* a monarch who reigns but does not rule, or a president whose powers are strictly circumscribed. The *head of government* is the chief officer(s) of the executive branch of government, typically presiding over a cabinet. In a parliamentary system, this is usually the prime minister. In a presidential system, this is usually the president, who then serves as both, head of state and head of government. In a typical semi-presidential system, the president serves as head of state and the prime minister serves as head of government.

These definitions are grounded in the *functions* that each office performs, as described above. Titles can be confusing. Do not assume, for example, that simply because an individual holds the title of "president" s/he is serving as the chief public representative of the country. Likewise, it may be that the *effective* head of state/head of government is someone other than the *official* head of state/head of government. In this instance, the following questions apply to the person who effectively wields this power. In some socialist systems, for example, the official head of state was a person within the state bureaucracy, but in practice the chief public representative of the country was the chairman of the communist party. It is the latter who is the "effective" head of state, and hence should be the focus of your answers. The same applies if the head of state/head of government is so old, sick or perhaps mentally disabled that s/he cannot perform his/her functions, which are instead performed by someone else. It is the latter person who is the effective head of state/head of government.

If you are considering a semi sovereign territory, such as a colony, an annexed territory or a member of the British Commonwealth, please answer the following questions with respect to the head of state and (if separate) the head of government who is located in the territory in question. Thus, in a typical British colony the governor-general—not the King/Queen of England—would be understood as the head of state. Likewise, in a British colony the local prime minister in the colony—not the prime minister in London—would be understood as the head of government.

In order to mitigate potential misunderstandings, the identities of the head of state and head

of government for each country have been pre-coded for as many years as possible. Thus, when conducting your coding make sure to pay close attention to the names of these individuals, which you can see by clicking on the year grid for a particular year in the first question of this section, "HOS name." This is your key to what we mean by "head of state" or "head of government."

Note also that when the two functions are fused in the same office, we ask you to code only the head of state section of the survey. Any precoded years contain an orange triangle. This means that either the score or text and/or specific date have already been entered, so we are asking you only to add your confidence in the precoded rating; we do not want you to change the rating, as we need all the Country Experts to answer the subsequent questions for the same executives. If you feel strongly that the precoded information is wrong, please rate your confidence in the preloaded information and then consult your V-Dem contact. You will have to rate confidence in all the available years in order to proceed to the next question.

In order to avoid spending time on short-lived executives, we have included only executives who held office for at least 100 days.

2.3.7.1 HOS name (v2exnamhos)

Long tag: vdem_cy_v2exnamhos

Original tag: v2exnamhos

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: A*

PROJECT MANAGER(S): Jan Teorell

QUESTION: What is the name of the head of state?

CLARIFICATION: If the head of state is a collective body, provide the name of the person exercising the most effective power within this body, or, if no such person exists, enter the expression "collective body." Do not include nicknames. If multiple Heads of State were appointed in a given year, please answer this question with respect to each one of them; also make sure you enter the specific date of appointment and *reappointment* for each one of them. Only heads of state that have been in office for at least 100 days should be included. Once again, the identities of the head of state for each country have been pre-coded for as many years as possible. Any pre-coded years contain an orange triangle. This means that either the score or text and/or specific date have already been entered, so we are asking you only to add your confidence in the pre-coded rating; we do not want you to change the rating, as we need all the Country Experts to answer the subsequent questions for the same executives.

Description:

VARIABLE TYPE: A*

PROJECT MANAGER(S): Jan Teorell

QUESTION: What is the title of the head of state?

CLARIFICATION: If the head of state and the head of government are the same person or body, this and the following questions refer to both. Please provide a literal translation of the title in English, with the title in the native language, or a transcription thereof, within parentheses. If the head of state temporarily fills the role, this will be excluded from the answer; they should be called e.g. *quot;Presidentquot;* and not *quot;Acting Presidentquot;*. Only heads of state that have been in office for at least 100 days should be included. If the head of state is a collective body, provide the title of the person exercising the most effective power over this body, or, if no such person exists, enter the expression *quot;collective body.quot;* If multiple Heads of State with different titles were appointed any given year, please answer this question with respect to each one of them; also make sure you enter the specific date of appointment for each one of them. Once again, the identities of the head of state for each country have been pre-coded for as many years as possible. Any pre-coded years contain an orange triangle. This means that either the score or text and/or specific date have already been entered, so we are asking you only to add your confidence in the pre-coded rating; we do not want you to change the rating, as we need all the Country Experts to answer the subsequent questions for the same executives.

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Jan Teorell

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: If the legislature, or either chamber of the legislature, took actions to remove the head of state from office, would it be likely to succeed even without having to level accusations of unlawful activity *and* without the involvement of any other agency?

CLARIFICATION: The question refers to whether the legislature (or either of its chambers) is considered to hold this power of removal in practice, regardless of whether this is regulated by law and whether this power has been exercised or not. Moreover, the question refers to removal other than through an impeachment process.

RESPONSES:

0: No, under no circumstances.

1: No, unlikely, but there is a chance it would happen.

2: Yes, probably, but there is a chance it would fail.

3: Yes, most likely.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Jan Teorell

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: If the head of state took actions to dissolve the legislature, would he/she be likely to succeed?

CLARIFICATION: The question refers to whether the head of state is considered to hold this power in practice, regardless of whether this is regulated by law and whether this power has been exercised or not. By “dissolving the legislature” we refer to the ability of the head of state to call a new election for the legislature.

RESPONSES:

0: No.

1: Yes, but not at his/her own discretion, only when prompted to as a response to specific events (for example, after a certain number of votes of no confidence, or after a certain number of failed attempts to form a cabinet).

2: Yes, at his/her own discretion, but with restrictions (for example, by frequency, such as “once a year”, by time point within term, such as “not within the last sixth months of the head of state’s term”, and by the requirement that the head of state must then himself/herself stand for election).

3: Yes, at his/her own discretion and without restrictions.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

QUESTION: In practice, does the head of state have the power to appoint — or is the approval of the head of state necessary for the appointment of — cabinet ministers?

CLARIFICATION: The question refers to whether the head of state is considered to hold this power in practice, regardless of whether this is regulated by law and whether this power has been exercised or not. If confirmation of the legislature is needed, this should be coded as such also when the HOS controls the majority of the legislature (“tacit consent”). Moreover, by the “legislature” in this case, we mean either house of the legislature (in the case of bicameralism).

RESPONSES:

0: No.

1: Yes, but only with respect to the head of the cabinet, and only with the tacit consent or

explicit confirmation by the legislature.

2: Yes, but only with the tacit consent or explicit confirmation by the legislature.

3: Yes, without any need for confirmation by the legislature, but only with respect to the head of the cabinet.

4: Yes, without any need for confirmation by the legislature.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

2.3.7.6 HOS veto power in practice (v2exdfvths)

Long tag: vdem_cy_v2exdfvths

Original tag: v2exdfvths

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Jan Teorell

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: If the head of state took actions to veto a piece of legislation, would he/she be likely to succeed?

CLARIFICATION: By "veto", we mean either a partial veto (concerning any parts of a bill) or package vetoes (concerning whole bills) of bills that have already been passed by the legislature. The question refers to whether the head of state is considered to hold this power in practice, regardless of whether this is regulated by law and whether this power has been exercised or not.

RESPONSES:

0: No.

1: Yes, but the legislature can override the veto by a simple majority vote (a vote of more than half of those voting).

2: Yes, but the legislature can override the veto by an absolute majority vote (a vote of more than half of the members of the legislature).

3: Yes, but the legislature can override the veto by a qualified/extraordinary majority vote (a super-majority — *e.g.*, 2/3 or 3/4 — of those voting).

4: Yes, with no possibility of override.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

Description:

VARIABLE TYPE: A*

PROJECT MANAGER(S): Jan Teorell

QUESTION: Is the head of state (HOS) also head of government (HOG)?

CLARIFICATION: Note that this question only pertains to whether the head of state and the head of government are the same person or body, regardless of the relative powers of the two. Thus, in a constitutional monarchy, for example, the head of state and head of government are not the same even though the head of state may lack any real political power. If multiple head of states/head of governments were appointed in any year, please answer this question with respect to all of them by checking or unchecking the specific dates. Once again, the identities of the head of government for each country have been pre-coded for as many years as possible. Any pre-coded years contain an orange triangle. This means that either the score or text and/or specific date have already been entered, so we are asking you only to add your confidence in the pre-coded rating; we do not want you to change the rating, as we need all the Country Experts to answer the subsequent questions for the same executives.

RESPONSES:

0: No

1: Yes

ORDERING: If HOS=HOG (answer is yes: 1) for all years: skip to quot;Executive as whole introductionquot; [v2exintro3].

SCALE: Dichotomous.

2.3.7.14 HOS term length by law (v2exfxtmhs)

Long tag: vdem_cy_v2exfxtmhs

Original tag: v2exfxtmhs

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Elkins et al. (2014), National constitutions

Description:

VARIABLE TYPE: A

PROJECT MANAGER(S): Jan Teorell

QUESTION: What is the maximum term length of the Head of State, in years?

RESPONSES:

Numeric, number of years.

0: Term length not specified in constitution.

99: Not Applicable.

100: Term length for life or there is no term length.

SOURCE(S): CCP (Elkins *et al.* 2012); National constitutions.

NOTES: *De jure* term lengths for Head of State and Head of Government, coded for each head of state and head of government as coded in v2exnamhos and v2exnamhog. In the case of a single office representing both Head of State and Head of Government, HOS is coded to the appropriate term length while HOG is coded as 99. For colonies, if there was no official local constitution, HOS/HOG is coded by their constitutional status according to the colonial power. Finally, for sovereign states lacking a constitution or having suspended their constitution, HOS/HOG is coded to 99 as not applicable for those relevant years.

Changes to term lengths are recorded as occurring on the date that a new constitution or constitutional amendment takes force, or, if unavailable, date of promulgation.

DATA RELEASE: 5-13.

COUNTRY-YEAR AGGREGATION: Last

CITATION: *V-Dem Codebook* (see suggested citation at the top of this document).

2.3.7.15 HOS appointment in practice (v2expathhs)

Long tag: vdem_cy_v2expathhs

Original tag: v2expathhs

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: V-Dem country coordinators, www.constituteproject.org, IPU Parline

Description:

VARIABLE TYPE: A

PROJECT MANAGER(S): Jan Teorell

QUESTION: How did the head of state reach office?

CLARIFICATION: If several bodies were involved in the appointment process, select the one that exerted the most critical impact on the decision. However, in the next question we ask separately about whether the approval of the legislature was necessary. Response category 7 should only be selected if the head of state is directly elected, not if he or she was appointed by the legislature after an election. We count as direct elections (category 7) also those indirect elections carried out by an electoral college, whose only purpose is to elect the president.

RESPONSES:

0: Through the threat of or application of force, such as a coup or rebellion.

1: Appointed by a foreign power.

2: Appointed by the ruling party (in a one-party system).

3: Appointed by a royal council.

4: Through hereditary succession.

5: Appointed by the military.

6: Appointed by the legislature.

7: Directly through a popular election (regardless of the extension of the suffrage).

8: Other.

ORDERING: If you select 0 or 8, proceed to the next question [v2exothhs]. If you select 1-5, skip to question "HOS selection by legislature in practice [v2exaphos]"; If you selected 6-7, skip to question [v2excomhs].

SCALE: Nominal (v2expathhs), or a series of dichotomous scales.

SOURCE(S): V-Dem country coordinators; constituteproject.org; IPU Parline.

NOTES: Converted from B to A coding. v2expathhs is coded according to appointment dates of the Head of State. The same is true for coups or rebellions where the date when the HOS was appointed through a coup, or the first day in office after the coup, is coded.

DATA RELEASE: 1-13.

COUNTRY-YEAR AGGREGATION: Maximum

DATE SPECIFIC: Coded on HOS appointment dates and December 31 (v2exnamhos).

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Jan Teorell

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: If the head of government took actions to dissolve the legislature, would he/she be likely to succeed?

CLARIFICATION: The question refers to whether the head of government is considered to hold this power in practice, regardless of whether this is regulated by law and whether this power has been exercised or not. By "dissolving the legislature"; we refer to the ability of the head of government to call a new election for the legislature.

RESPONSES:

0: No.

1: Yes, but not at his/her own discretion, only when prompted to as a response to specific events (for example, after a certain number of votes of no confidence, or after a certain number of failed attempts to form a cabinet).

2: Yes, at his/her own discretion, but with restrictions (for example, by frequency, such as "once a year", by time point within term, such as "not within the last sixth months of the head of government's term", and by the requirement that the head of government must then himself/herself stand for election).

3: Yes, at his/her own discretion and without restrictions.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CLEANING: Set to missing when v2exhoshog is 1

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Jan Teorell

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: In practice, does the head of government have the power to appoint — or is the approval of the head of government necessary for the appointment of — cabinet ministers?

CLARIFICATION: The question refers to whether the head of government is considered to hold this power in practice, regardless of whether this is regulated by law and whether this power has been exercised or not. If confirmation of the legislature is needed, this should be coded as such also when the HOG controls the majority of the legislature (quot;tacit consentquot;). Moreover, by the quot;legislaturequot; in this case, we mean either house of the legislature (in the case of bicameralism).

RESPONSES:

0: No.

1: Yes, but only with the tacit consent or explicit confirmation by the legislature.

2: Yes, without any need for confirmation by the legislature.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CLEANING: Set to missing when v2exhoshog is 1

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Jan Teorell

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: If the head of government took actions to dismiss cabinet ministers, would he/she be likely to succeed?

CLARIFICATION: The question refers to whether the head of government is considered to hold this power in practice, regardless of whether this is regulated by law and whether this power has been exercised or not, and regardless of possible political repercussions (*e.g.*, vote

of no confidence).

RESPONSES:

0: No.

1: Yes, but not at his/her own discretion, only when prompted to as a response to specific events (for example, after a vote of no confidence taken by the legislature).

2: Yes, at his/her own discretion, but with restrictions (for example, only provided the head of government proposes an alternative minister who would need the legislature's approval, *i.e.*, so called "constructive dismissal").

3: Yes, at his/her own discretion and without restrictions.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CLEANING: Set to missing when v2exhoshog is 1

2.3.7.26 HOG veto power in practice (v2exdfvthg)

Long tag: vdem_cy_v2exdfvthg

Original tag: v2exdfvthg

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Jan Teorell

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: If the head of government took actions to veto a piece of legislation, would he/she be likely to succeed?

CLARIFICATION: By "veto", we mean either a partial veto (concerning any parts of a bill) or package vetoes (concerning whole bills) of bills that have already been passed by the legislature. The question refers to whether the head of government is considered to hold this power in practice, regardless of whether this is regulated by law and whether this power has been exercised or not.

RESPONSES:

0: No.

1: Yes, but the legislature can override the veto by a simple majority vote (a vote of more than half of those voting).

2: Yes, but the legislature can override the veto by an absolute majority vote (a vote of more than half of the members of the legislature).

3: Yes, but the legislature can override the veto by a qualified/extraordinary majority vote (a super-majority — *e.g.*, 2/3 or 3/4 — of those voting).

4: Yes, with no possibility of override.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

Original tag: v2expathhg

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: V-Dem country coordinators, www.constituteproject.org, IPU Parline

Description:

VARIABLE TYPE: A

PROJECT MANAGER(S): Jan Teorell

QUESTION: How did the head of government gain access to office?

CLARIFICATION: If several bodies were involved in the appointment process, select the one that exerted the most critical impact on the decision. However, in the next question we ask separately about whether the approval of the legislature was necessary. Response category 8 should only be selected if the head of government is directly elected, not if he or she was appointed by the legislature after an election. If the same person or body is both head of state and head of government, they are only coded as head of state.

RESPONSES:

0: Through the threat of or application of force, such as a coup or rebellion.

1: Appointed by a foreign power.

2: Appointed by the ruling party (in a one-party system).

3: Appointed by a royal council.

4: Through hereditary succession.

5: Appointed by the military.

6: Appointed by the head of state.

7: Appointed by the legislature.

8: Directly through a popular election (regardless of the extension of the suffrage).

9: Other.

ORDERING: If you select 0 or 9, proceed to the next question [v2exothhgl]. If you selected 1-6, skip to question "HOG selection by legislature in practice"; [v2exaphogp]. If you selected 7-8, skip to question [v2excomex].

SCALE: Nominal (v2expathhg), or a series of dichotomous scales.

SOURCE(S): V-Dem country coordinators; constituteproject.org; IPU Parline.

NOTES: Converted from (B) to (A) coding. v2expathhg is coded according to appointment dates of the Head of Government. The same is true for coups or rebellions where the date when the HOG was appointed through a coup, or the first day in office after the coup, is coded.

2.3.7.42 Executive embezzlement and theft (v2exembez)

Long tag: vdem_cy_v2exembez

Original tag: v2exembez

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Jan Teorell

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: How often do members of the executive (the head of state, the head of government, and cabinet ministers), or their agents, steal, embezzle, or misappropriate public funds or other state resources for personal or family use?

RESPONSES:

0: Constantly. Members of the executive act as though all public resources were their

personal or family property.

1: Often. Members of the executive are responsible stewards of selected public resources but treat the rest like personal property.

2: About half the time. Members of the executive are about as likely to be responsible stewards of selected public resources as they are to treat them like personal property.

3: Occasionally. Members of the executive are responsible stewards of most public resources but treat selected others like personal property.

4: Never, or hardly ever. Members of the executive are almost always responsible stewards of public resources and keep them separate from personal or family property.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

2.3.7.43 Public sector corrupt exchanges (v2excrtps)

Long tag: vdem_cy_v2excrtps

Original tag: v2excrtps

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Jan Teorell

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: How routinely do public sector employees grant favors in exchange for bribes, kickbacks, or other material inducements?

CLARIFICATION: When responding to this question, we would like to you think about a typical person employed by the public sector, excluding the military. If you think there are large discrepancies between branches of the public sector, between the national/federal and subnational/state level, or between the core bureaucracy and employees working with public service delivery, please try to average them out before stating your response.

RESPONSES:

0: Extremely common. Most public sector employees are systematically involved in petty but corrupt exchanges almost all the time.

1: Common. Such petty but corrupt exchanges occur regularly involving a majority of public employees.

2: Sometimes. About half or less than half of public sector employees engage in such exchanges for petty gains at times.

3: Scattered. A small minority of public sector employees engage in petty corruption from time to time.

4: No. Never, or hardly ever.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

2.3.7.45 Chief executive appointment by upper chamber (v2exapup)

Long tag: vdem_cy_v2exapup

Original tag: v2exapup

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: National constitutions, Websites of national governments

Description:

VARIABLE TYPE: A

PROJECT MANAGER(S): Jan Teorell

QUESTION: Is the approval of the upper chamber (together with the lower chamber) necessary for the appointment of the chief executive?

CLARIFICATION: The chief executive is defined by whether the head of state or the head of government have more relative power (v2ex_hosw, v2ex_hogw). Answer v2exapup only if the legislature is playing a role in the appointment of the chief executive (v2exaphos or v2exaphogp are 1), there is a bicameral legislature (v2lgbicam is 2), and the upper and lower chamber are directly or indirectly elected to any extent (v2lgello, v2lgelecup, v2lginello, and v2lginelup are not 0).

RESPONSES:

0: No

1: Yes

SCALE: Dichotomous.

2.3.7.47 Regime information (v2reginfo)

Long tag: vdem_cy_v2reginfo

Original tag: v2reginfo

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: A*

PROJECT MANAGER(S): Carl Henrik Knutsen, Tore Wig, Vilde Lunnan Djuve

QUESTION: What is the regime name as well as start and end dates of this regime?

CLARIFICATION: The information on this question has been pre-coded for as many years as possible. Any pre-coded years contain an orange triangle. This means that the identity of the regime, which is given a suggestive name, and its start and end dates have already been entered. We are asking you only to add your confidence in the pre-coded information. This means that the text and/or specific date have already been entered, so we are asking you only to add your confidence in the pre-coded rating; we do not want you to change the rating, as we need all the Country Experts to answer the subsequent questions for the same regime.

DATA RELEASE: 9-13.

COUNTRY-YEAR AGGREGATION: Last

CITATION: Djuve, Knutsen, and Wig (2020); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

DEFAULT DATE: Default date for this variable is January 1.

2.3.7.48 Regime end type (v2regendtype)

Long tag: vdem_cy_v2regendtype

Original tag: v2regendtype

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: A*

PROJECT MANAGER(S): Carl Henrik Knutsen, Tore Wig, Vilde Lunnan Djuve

QUESTION: Could you specify the type of process that you consider the most important in leading to the end of the regime?

CLARIFICATION: The information on this question has been pre-coded for as many years as possible. Any pre-coded years contain an orange triangle. This means that what is considered the most important process that eventually ended the relevant regime has already been entered. We are asking you only to add your confidence in the pre-coded information. This means that the information has already been entered, so we are asking you only to add your confidence in the pre-coded rating; we do not want you to change the rating, as we need all the Country Experts to answer the subsequent questions for the same regime.

RESPONSES:

0: A military coup d'état.

1: A coup d'état conducted by other groups than the military.

2: A self-coup (autogolpe) conducted by the sitting leader.

3: Assassination of the sitting leader (but not related to a coup d'état)

4: Natural death of the sitting leader

5: Loss in civil war.

6: Loss in inter-state war.

7: Foreign intervention (other than loss in inter-state war)

8: Popular uprising.

9: Substantial political liberalization/democratization with some form of guidance by sitting regime leaders

10: Other type of directed and intentional transformational process of the regime under the guidance of sitting regime leaders (excluding political liberalization/democratization)

11: Substantial political liberalization/democratization without guidance by sitting regime leaders, occurring from some other process (such as an unexpected election loss for the sitting regime) than those specified by categories 1–10

12: Other process than those specified by categories 1–11.

13: The regime still exists

DATA RELEASE: 9-13.

COUNTRY-YEAR AGGREGATION: Last

CITATION: Djuve, Knutsen, and Wig (2020); *V-Dem Codebook* (see suggested citation at the top of this document).

2.3.7.49 Regime interregnum (v2regint)

Long tag: vdem_cy_v2regint

Original tag: v2regint

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Encyclopedia Britannica, Wikipedia, various region- and country-specific sources

Description:

VARIABLE TYPE: A

PROJECT MANAGER(S): Carl Henrik Knutsen, Tore Wig, Vilde Lunnan Djuve

QUESTION: Does there exist an identifiable political regime?

CLARIFICATION: This question is used to identify so-called interregnum periods, where no political regime is in control over the entity. Different types of political situations can lead to periods of time under which there is no identifiable political regime, one example being a civil war in which none of the parties have clear control over political bodies and processes in the country. However, the interregnum coding is employed conservatively, meaning that partial control over political bodies and processes in fairly large parts of the country (which is often the case also during civil wars) is sufficient for a 0 score.

Please note that the expert coded (C) questions on support and opposition groups in the regime survey are only coded when v2regint=1.

RESPONSES:

0: No.

1: Yes.

SCALE: Dichotomous

2.3.7.52 Regime most important support group (v2regimpgroup)

Long tag: vdem_cy_v2regimpgroup

Original tag: v2regimpgroup

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Carl Henrik Knutsen

ADDITIONAL VERSIONS: *_nr

QUESTION: Which (one) group does the current political regime rely on most strongly in order to maintain power?

CLARIFICATION: Choose the group that, if it were to retract its support to the regime, would most endanger the regime (most strongly increase the chance that it loses power).

RESPONSES:

0: The aristocracy, including high status hereditary social groups and castes.

1: Agrarian elites, including rich peasants and large landholders.

2: Party elites (of the party or parties that control the executive).

3: Business elites.

4: Civil servants.

5: The military.

6: An ethnic or racial group(s).

7: A religious group(s).

8: Local elites, including chiefs.

9: Urban working classes, including labor unions.

10: Urban middle classes

11: Rural working classes (e.g., peasants).

12: Rural middle classes (e.g., family farmers)

13: A foreign government or colonial power.

DATA RELEASE: 9-13.

CROSS-CODER AGGREGATION: Mode.

quot;Tiesquot; between categories are resolved so that the corresponding category in v2regsupgroups with the highest mean for the same country-date is chosen.

YEARS: 1789-2022

DEFAULT DATE: Default date for this variable is January 1.

2.3.7.53 Regime support groups size (v2regsupgroupssize)

Long tag: vdem_cy_v2regsupgroupssize

Original tag: v2regsupgroupssize

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky,

Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Carl Henrik Knutsen

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: In total, how large is the percentage share of the domestic adult (18+) population that belongs to the political regime's supporting groups?

CLARIFICATION: You should consider the sum of all the groups (excepting foreign governments and colonial powers) entered in v2regsupgroups. Hence, your answer should take into account the total size of the/those groups that are supportive of the regime, and, if it/they were to retract support would substantially increase the chance that the regime would lose power. Regarding the issue of overlapping identities, and one individual potentially belonging to more than one groups: Individuals should only be "counted" once; thus if the two relevant supporting groups are (4) civil servants, which total about 5percent, and all of them belong to a particular ethnic group (6) also coded as a relevant, the overall total size of the supporting groups is still 5percent (presuming that no other members of that ethnic group are essential for the regime staying in power).

RESPONSES:

0: Extremely small

(About 1 percent of the population or less; examples of this could include regimes supported by — and needing the support from — a handful of higher-rank military officers, or by only a royal council and a few hundred landowners)

1: Very small

(Between 1 percent and 5 percent of the population; examples of this could include regimes supported by — and needing the support from — higher ranking civil servants and the military, or by moderately sized business and agrarian elites)

2: Small

(Between 5 percent and 15 percent; examples of this could include regimes supported by — and needing the support from — relatively small ethnic groups, or by urban elites and the urban middle classes in predominantly rural societies)

3: Moderate

(Between 15 percent and 30 percent; examples of this could include regimes supported by — and needing the support from — moderately sized ethnic groups, by rural middle classes in rural societies, or by urban middle classes in urban societies)

4: Large

(More than 30 percent; examples of this could include regimes supported by — and needing the support from — large ethnic groups (and then not only the elites/leaders of such groups), or by rural working classes in rural societies.)

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 9-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see V-Dem Methodology).

CLEANING: Set to missing where v2regint is 0

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

DEFAULT DATE: Default date for this variable is January 1.

2.3.7.54 Regime support location (v2regsuploc)

Long tag: vdem_cy_v2regsuploc

Original tag: v2regsuploc

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Carl Henrik Knutsen

ADDITIONAL VERSIONS: *_nr

QUESTION: In which geographic area do the support groups for the current political regime mainly reside?

RESPONSES:

0: Abroad.

1: In the capital.

2: In urban areas outside the capital.

3: In rural areas.

4: The groups are not concentrated in any particular area.

SCALE: Nominal

DATA RELEASE: 11-13.

CROSS-CODER AGGREGATION: Mode.

quot;Tiesquot; between categories receive the value 4.

CLEANING: Set to missing where v2regint is 0.

CITATION: V-Dem Codebook (see suggested citation at the top of this document).

2.3.7.55 Regime most important opposition group (v2regimpoppgroup)

Long tag: vdem_cy_v2regimpoppgroup

Original tag: v2regimpoppgroup

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Carl Henrik Knutsen

ADDITIONAL VERSIONS: *_nr

QUESTION: Which (one) group constitutes the greatest threat to the current regime?

CLARIFICATION: Choose the one group (among those you registered as opposition groups under the v2regoppgroups question) that is the most dangerous threat to the regime in a given year. That is, the group that could most strongly increase the chance that the regime loses power. The importance/danger associated with an opposition group will be affected both by its level of hostility towards the regime and its power resources/how capable it is of removing the regime should it try to do so. We remind you that groups need not be actively mobilized or explicitly engaged in high-level opposition activities to be counted; key opposition groups may include actors who oppose the regime and constitute a dormant threat to the regime, even though they do not take particular actions in a given year.

RESPONSES:

0: The aristocracy, including high status hereditary social groups and castes.

1: Agrarian elites, including rich peasants and large landholders.

2: Party elites (of the party or parties that control the executive).

3: Business elites.

4: Civil servants.

5: The military.

6: An ethnic or racial group(s).

7: A religious group(s).

8: Local elites, including chiefs.

9: Urban working classes, including labor unions.

10: Urban middle classes

11: Rural working classes (e.g., peasants).

12: Rural middle classes (e.g., family farmers)

13: A foreign government or colonial power.

DATA RELEASE: 11-13.

CROSS-CODER AGGREGATION: Mode.

quot;Tiesquot; between categories are resolved so that the corresponding category in v2regoppgroups with the highest mean for the same country-date is chosen.

CLEANING: Set to missing where v2regint is 0.

CITATION: *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1900-2022

DEFAULT DATE: Default date for this variable is January 1.

2.3.7.56 Regime opposition groups size (v2regoppgroupsize)

Long tag: vdem_cy_v2regoppgroupsize

Original tag: v2regoppgroupsize

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Carl Henrik Knutsen

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: In total, how large is the share of the domestic adult (18+) population that are noteworthy opposition actors to the current political regime?

CLARIFICATION: Consider the sum total of all the groups (excepting foreign governments and colonial powers) entered in v2regoppgroups. Hence, your answer should take into account the total size/number of the actors that oppose the regime and pose a threat to the regime maintaining power.

We remind you that groups need not be actively mobilized or explicitly engaged in high-level opposition activities to be counted; key opposition groups may include actors who oppose the regime and constitute a dormant threat to the regime, even though they do not take particular actions in a given year.

Regarding the issue of individuals potentially belonging to more than one “opposition group”: Individuals should only be counted once for the purpose of this question. For example, if the two relevant opposition groups are (4) civil servants, which total about 5percent of the population, and all of them belong to a particular ethnic group (6) also coded as a relevant, the overall total size of the opposition groups is still 5percent (presuming that there are no other members of that ethnic group who oppose the regime).

We remind you of the definition of a regime as the set of formal and/or informal rules that are essential for choosing political leaders and/or maintaining political leaders in power. Hence, we are not asking about which groups oppose the current government in a democracy (and who would vote for another party), but still accept the democratic rules as legitimate. We are, instead, asking about groups that want to see the wider political regime removed and replaced.

RESPONSES:

0: Extremely small (About 1 percent of the population or less)

1: Very small (Between 1 percent and 5 percent of the population)

2: Small (Between 5 percent and 15 percent)

3: Moderate (Between 15 percent and 30 percent)

4: Large (More than 30 percent)

2.3.7.58 Strongest pro-regime preferences (v2regproreg)

Long tag: vdem_cy_v2regproreg

Original tag: v2regproreg

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Carl Henrik Knutsen

ADDITIONAL VERSIONS: *_nr

QUESTION: Which (one) group has the strongest pro-regime preferences, irrespective of the group’s resources and capabilities for affecting the regime’s hold on power?

CLARIFICATION: Consider only the pro-regime preferences of individuals in this group, and do not take into consideration the abilities of this group to actually affect regime survival. Hence, the group with the strongest pro-regime preferences need not be the most important support group.

One way to think about what pro-/anti-regime preferences means is: what would individuals hypothetically (honestly) answer if asked in a survey: “On a scale from 0-10, how pleased are you with the current political regime, with 10 indicating the strongest support.” Select the group with the highest average score in this hypothetical survey.

We remind you of the definition of a regime as the set of formal and/or informal rules that are essential for choosing political leaders and/or maintaining political leaders in power. Hence, we are not asking about which groups oppose the current government in a democracy (and who would vote for another party), but still accept the democratic rules as legitimate. We are, instead, asking about groups that want to see the wider political regime removed and replaced.

RESPONSES:

0: The aristocracy, including high status hereditary social groups and castes.

1: Agrarian elites, including rich peasants and large landholders.

2: Party elites (of the party or parties that control the executive).

3: Business elites.

4: Civil servants.

5: The military.

6: An ethnic or racial group(s).

7: A religious group(s).

8: Local elites, including chiefs.

9: Urban working classes, including labor unions.

10: Urban middle classes

11: Rural working classes (e.g., peasants).

12: Rural middle classes (e.g., family farmers)

13: A foreign government or colonial power.

DATA RELEASE: 11-13.

CROSS-CODER AGGREGATION: Mode.

quot;Tiesquot; between categories are resolved so that the corresponding category in v2regsupgroups with the highest mean for the same country-date is chosen.

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Carl Henrik Knutsen

ADDITIONAL VERSIONS: *_nr

QUESTION: Which (one) group has the strongest anti-regime preferences/antipathy against the current regime, irrespective of the group's resources and capabilities for affecting the regime's hold on power?

CLARIFICATION: Consider only the anti-regime preferences of the actors in this group, and do not take into consideration the abilities of this group to actually affect regime survival and change. Hence, the group with the strongest anti-regime preferences need not be the most important opposition group. Both capable and incapable political actors may have strong anti-regime preferences and want to see the regime removed from power. We also remind that the group needs not be currently mobilized or explicitly engaged in high-level opposition activities to be counted; individuals may strongly resent a regime, without taking particular actions, in a given year.

One way to think about what pro-/anti-regime preferences mean, independently of ability to affect regime survival is: what would individuals hypothetically (honestly) answer if asked in a survey: "On a scale from 0-10, how pleased are you with the current political regime".

We remind you of the definition of a regime as the set of formal and/or informal rules that are essential for choosing political leaders and/or maintaining political leaders in power. Hence, we are not asking about which groups oppose the current government in a democracy

(and who would vote for another party), but still accept the democratic rules as legitimate. We are, instead, asking about groups that want to see the wider political regime removed and replaced.

RESPONSES:

0: The aristocracy, including high status hereditary social groups and castes.

1: Agrarian elites, including rich peasants and large landholders.

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Carl Henrik Knutsen

ADDITIONAL VERSIONS: *_nr

QUESTION: Irrespective of its stance toward the regime (pro-, anti-, or neutral), which one group is the most important for affecting the current regime's chances of staying in power?

CLARIFICATION: Here we ask you to disregard group preferences, and only consider a group's resources and capabilities vis-a-vis affecting regime survival. In other words, do not consider whether this group is pro-regime, anti-regime, or neutral to the regime. Take only into consideration the capabilities of this group to affect regime survival, if key members of the group were to hypothetically mobilize the group in an effort to remove the regime. Politically neutral, as well as pro- and anti-regime groups, may have ample resources and be capable of organizing coordinated action. As a result, all three types of groups may have great influence over regime survival and change.

RESPONSES:

0: The aristocracy, including high status hereditary social groups and castes.

1: Agrarian elites, including rich peasants and large landholders.

2: Party elites (of the party or parties that control the executive).

3: Business elites.

4: Civil servants.

2.3.7.61 Regime end type, multiple selection version (v2regendtypems)

Long tag: vdem_cy_v2regendtypems

Original tag: v2regendtypems

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Encyclopedia Britannica, Wikipedia, various region- and country-specific sources

Description:

VARIABLE TYPE: A

PROJECT MANAGER(S): Carl Henrik Knutsen, Tore Wig, Vilde Lunnan Djuve

QUESTION: Could you specify the types of processes (one or more) that led to the end of the regime?

RESPONSES:

0: A military coup d'état. [v2regendtypems_0]

1: A coup d'état conducted by other groups than the military. [v2regendtypems_1]

2: A self-coup (autogolpe) conducted by the sitting leader. [v2regendtypems_2]

3: Assassination of the sitting leader (but not related to a coup d'état). [v2regendtypems_3]

4: Natural death of the sitting leader. [v2regendtypems_4]

5: Loss in civil war. [v2regendtypems_5]

6: Loss in inter-state war. [v2regendtypems_6]

7: Foreign intervention (other than loss in inter-state war). [v2regendtypems_7]

8: Popular uprising. [v2regendtypems_8]

9: Substantial political liberalization/democratization with some form of guidance by sitting regime leaders. [v2regendtypems_9]

10: Other type of directed and intentional transformational process of the regime under the guidance of sitting regime leaders (excluding political liberalization/democratization). [v2regendtypems_10]

11. Substantial political liberalization/democratization without guidance by sitting regime leaders, occurring from some other process (such as an unexpected election loss for the sitting regime) than those specified by categories 1-10. [v2regendtypems_11]

12: Other process than those specified by categories 1-11. [v2regendtypems_12]

13: The regime still exists. [v2regendtypems_13]

2.3.7.63 Explicit and active regime opposition groups (v2regoppgroupsact)

Long tag: vdem_cy_v2regoppgroupsact

Original tag: v2regoppgroupsact

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky,

Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Sirianne Dahlum, Tore Wig

ADDITIONAL VERSIONS: *_nr

QUESTION: Which (if any) groups include a significant share of individuals who explicitly and actively mobilize against the regime in a particular year? (Check all that apply.)

CLARIFICATION: Consider which group(s) include a significant share of individuals who engage in active and explicit opposition to the regime to promote its removal. These actors make explicit statements of dissent from the regime, publicly voice their preference for regime change, and may possibly engage in other actions intended to further the removal of the regime such as anti-regime demonstrations, sit-ins, boycotts, strikes, the formation of anti-system parties, acts of sabotage, or armed rebellion. Please note that only years when anti-regime speech or activity occurs should be coded. In years when groups probably oppose the regime, but are not engaged in any explicit acts of opposition, the group should not be selected. We remind you of the definition of a regime as the set of formal and/or informal rules that are essential for choosing political leaders and/or maintaining political leaders in power. Hence, we are not asking about which groups oppose the current government in a democracy (and who would vote for another party), but still accept the democratic rules as legitimate. We are, instead, asking about groups that want to see the wider political regime removed and replaced.

RESPONSES:

0: The aristocracy, including high status hereditary social groups and castes. [v2regoppgroupsact_0]

2.3.8 V-Dem Indicators - The Legislature

Instructions to the coders (as shown in the surveys)

The Legislature:

The following questions pertain to the legislature, an assembly of deputies or representatives with powers to consider, pass, amend, or repeal laws. If there is no legislature in the country you are coding for some period of years, do not code any questions for those year. If you are considering a semi-sovereign territory such as a colony please answer this question with respect to the legislature that is seated within the territory in question (such as the local legislative assembly in a British colony, not the Parliament in London). A popular election need not involve universal suffrage; indeed, suffrage may be highly restricted. A "direct election" can include seats reserved for special groups (*e.g.*, ethnic groups or women) so long as these members are chosen by popular election.

Frequently, it is important to distinguish between formal rules (as stipulated by statute, legislative rules, the constitution, or common law precedent) and actual practice (what happens on the ground). In order to clarify the *de jure/de facto* distinction, we employ the terms "by law..." and "in practice..." Please pay close attention to these cues. Note that sometimes we ask different coders to code different aspects of a question. So, you might get a question about the *de facto* state of affairs, but another source might provide the answer to the *de jure* state of affairs.

2.3.8.1 Legislature bicameral (v2lgbicam)

Long tag: vdem_cy_v2lgbicam

Original tag: v2lgbicam

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Nohlen et al. (1999, 2002), Nohlen (2005), Nohlen & Stöver (2010), Chronicle of Parliamentary Elections (IPU), IFES, Websites of national parliaments, National constitutions, Elkins et al. (2014)

Description:

VARIABLE TYPE: A*

PROJECT MANAGER(S): Steven Fish, Matthew Kroenig

QUESTION: How many chambers does the legislature contain?

CLARIFICATION: The number of chambers have been pre-coded for as many years as possible. This means that the score has already been entered, so we are asking you only to add your confidence in the pre-coded rating. If there is a change in the number of chambers, this is coded on the exact date of when the change occurred, for example the exact date of when a legislature was dissolved, or when the lower and/or upper chamber was established (usually coded on the date when the new legislature first meets; otherwise on the date of the legislative election where the composition of the new legislature was decided).

RESPONSES:

0: 0 chambers.

1: 1 chamber.

2: 2 or more chambers.

SCALE: Ordinal.

SOURCE(S): Nohlen *et al.* (1999, 2002, 2005, 2010); Chronicle of Parliamentary Elections (IPU); IFES; Websites of national parliaments; National constitutions; CCP (Elkins *et al.* 2012), v191.

NOTES: For the country-year aggregation of the dataset, we have taken the minimum value of v2lgbicam. Constituent assemblies that perform other functions except for drafting and adopting a new constitution (*e.g.* legislating, electing president, adopting budget, etc) are coded as 1 (1 chamber). In cases when a parliament consists of three or more chambers, one of the chamber names is coded in the variable "Lower chamber legislature name" (v2lgnamelo), while the others are listed in the variable "Upper chamber name" (v2lgnameup). South Africa had a three-chamber parliament during the period of 1984-1994. Subsequently, variable v2lgbicam is coded 2, v2lgnamelo is coded "House of Assembly", and v2lgnameup enlists "House of Representatives, House of Delegates".

DATA RELEASE: 1-13.

2.3.8.8 Legislature controls resources (v2lgfunds)

Long tag: vdem_cy_v2lgfunds

Original tag: v2lgfunds

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Steven Fish, Matthew Kroenig

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: In practice, does the legislature control the resources that finance its own internal operations and the perquisites of its members?

RESPONSES:

0: No. The benefits legislators receive or the finances needed for the legislature's operation depend on remaining in good standing with an outside authority, such as the executive.

1: Yes.

SCALE: Dichotomous, converted to interval by the measurement model.

DATA RELEASE: 3-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CLEANING: Set to missing when v2lgbicam is 0

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

2.3.8.9 Representation of disadvantaged social groups (v2lgdsadlo)

Long tag: vdem_cy_v2lgdsadlo

Original tag: v2lgdsadlo

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Pamela Paxton

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Considering all disadvantaged social groups in the country, how well represented are these groups, as a whole, in the national legislature?

CLARIFICATION: Disadvantage refers to socioeconomic disadvantage. Specifically, in order to be considered disadvantaged members of a social group must have an average income that is significantly below the median national income.

RESPONSES:

0 (1): They have no representation at all.

1 (2): They are highly under-represented relative to their proportion of the general population.

2 (3): They are slightly under-represented relative to their proportion of the general population.

3 (4): They are represented roughly equal relative to their proportion of the general population.

4 (5): They are over-represented relative to their proportion of the general population.

SCALE: Ordinal, converted to interval by the measurement model.

NOTES: As of December 2014, the former category 0: There are no disadvantaged groups in the society, is coded as a separate variable (v2lgdsadlobin). The variable is then rebased to zero.

DATA RELEASE: 3-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CLEANING: Set to missing when v2lgbicam is 0

2.3.8.29 Lower chamber introduces bills (v2lgintblo)

Long tag: vdem_cy_v2lgintblo

Original tag: v2lgintblo

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky,

Krusell, Miri & von Römer (2023)

Variable citation: Elkins et al. (2014), National constitutions, V-Dem country coordinators

Description:

VARIABLE TYPE: A

PROJECT MANAGER(S): Steven Fish, Matthew Kroenig

QUESTION: By law, does the lower (or unicameral) chamber of the legislature have the ability to introduce bills in all policy jurisdictions?

RESPONSES:

0: No, there are policy areas in which the lower (or unicameral) chamber cannot introduce bills.

1: Yes.

SCALE: Dichotomous.

SOURCE(S): CCP (Elkins *et al.* 2012), v263; National constitutions; V-Dem country coordinators.

NOTES: Converted from (B) to (A) coding. V-Dem Country Coordinators answers were used for country-years where data was missing in CCP (Elkins *et al.* 2012).

DATA RELEASE: 1-13.

2.3.8.30 Lower chamber gender quota (v2lgqugen)

Long tag: vdem_cy_v2lgqugen

Original tag: v2lgqugen

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Hughes et al. (2017), Quota Project (n.d.), International IDEA (2018a), Coding by project manager

Description:

VARIABLE TYPE: A

PROJECT MANAGER(S): Pamela Paxton

QUESTION: Is there a national-level gender quota for the lower (or unicameral) chamber of the legislature?

CLARIFICATION: National-level quotas either reserve some seats for women in the legislature (as a whole or per district) or mandate through statutory law that all political parties must nominate a certain percentage of female candidates or candidates considered for nomination. A sanction for noncompliance imposes a penalty on a party that fails to meet the quota provisions. Examples of sanctions for noncompliance include rejection of the party list, loss of public campaign funds, or other financial penalties. Weak sanctions are those that parties may be able to ignore, such as a very weak financial penalty. Strong sanctions provide strong deterrents for noncompliance. An example of a strong sanction would be the rejection of a party's list. Countries with both candidate quotas and reserved seats are recorded at the stronger level. This variable records quotas from the date of implementation. The quota adoption date may be earlier, sometimes by several years. Data on quota adoption is available from the QAROT dataset (Hughes, Paxton, Clayton, and Zetterberg 2017) while the theoretical implications of adoption vs. implementation are discussed in Hughes, Paxton, Clayton, and Zetterberg (2018).

RESPONSES:

0: No national level gender quota.

1: Yes, a statutory gender quota for all parties without sanctions for noncompliance.

2: Yes, statutory gender quota for all parties with weak sanctions for noncompliance.

3: Yes, statutory gender quota for all parties with strong sanctions for noncompliance.

4: Yes, there are reserved seats in the legislature for women.

ORDERING: If you answer 1-4, proceed to the next question [v2lgqugens]. If you answer 0, skip to question [v2lglegllo].

SCALE: Ordinal.

SOURCE(S): QAROT dataset (Hughes, Paxton, Clayton, and Zetterberg 2017), Quota project (2018); International IDEA (2018a) ; Coding by project manager.

2.3.8.31 Lower chamber gender quota placement mandate (v2lgqgens)

Long tag: vdem_cy_v2lgqgens

Original tag: v2lgqgens

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Hughes et al. (2017), Quota Project (n.d.), International IDEA (2018a), Coding by project manager

Description:

VARIABLE TYPE: A

PROJECT MANAGER(S): Pamela Paxton

QUESTION: Does the national-level quota for the lower (or unicameral) chamber of the legislature contain a placement mandate?

CLARIFICATION: A placement mandate is a rule concerning rank order on the party list, usually to ensure that women are placed in electable positions on the party list. An example would a rule stating that no more than three of the top five candidates can be of the same gender. Coded only for years where a gender quota was present.

RESPONSES:

0: No.

1: Yes.

ORDERING: Only answer this question if you answered 1-4 on previous question [v2lgqgen].

SCALE: Dichotomous.

SOURCE(S): QAROT dataset (Hughes, Paxton, Clayton, and Zetterberg 2017), Quota project (2018); International IDEA (2018a); Coding by project manager.

2.3.9 V-Dem Indicators - Deliberation

Instructions to the coders (as shown in the surveys)

Deliberation:

The following questions address the deliberative or non-deliberative nature of a country's politics, with particular focus on elite levels. Some of these questions focus on the quality of discourse and others focus on public policies.

2.3.9.1 Reasoned justification (v2dlreason)

Long tag: vdem_cy_v2dlreason

Original tag: v2dlreason

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Michael Coppedge, John Gerring, Staffan Lindberg

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: When important policy changes are being considered, *i.e.* before a decision has been made, to what extent do political elites give public and reasoned justifications for their positions?

CLARIFICATION: Because discourse varies greatly from person to person, base your answer on the style that is most typical of prominent national political leaders.

RESPONSES:

0: No justification. Elites almost always only dictate that something should or should not be done, but no reasoning about justification is given. For example, "We must cut spending."

1: Inferior justification. Elites tend to give reasons why someone should or should not be for doing or not doing something, but the reasons tend to be illogical or false, although they may appeal to many voters. For example, "We must cut spending. The state is inefficient." [The inference is incomplete because addressing inefficiencies would not necessarily reduce spending and it might undermine essential services.]

2: Qualified justification. Elites tend to offer a single simple reason justifying why the proposed policies contribute to or detract from an outcome. For example, "We must cut spending because taxpayers cannot afford to pay for current programs."

3: Sophisticated justification. Elites tend to offer more than one or more complex, nuanced and complete justification. For example, "We must cut spending because taxpayers cannot afford to pay for current government programs. Raising taxes would hurt economic growth, and deficit spending would lead to inflation."

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1900-2022

2.3.9.2 Common good (v2dlcommon)

Long tag: vdem_cy_v2dlcommon

Original tag: v2dlcommon

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Michael Coppedge, John Gerring, Staffan Lindberg

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: When important policy changes are being considered, to what extent do political elites justify their positions in terms of the common good?

CLARIFICATION: Because discourse varies greatly from person to person, base your answer on the style that is most typical of prominent national political leaders.

RESPONSES:

0: Little or no justification in terms of the common good is usually offered.

1: Specific business, geographic, group, party, or constituency interests are for the most part offered as justifications.

2: Justifications are for the most part a mix of specific interests and the common good and it is impossible to say which justification is more common than the other.

3: Justifications are based on a mixture of references to constituency/party/group interests and on appeals to the common good.

4: Justifications are for the most part almost always based on explicit statements of the common good for society, understood either as the greatest good for the greatest number or as helping the least advantaged in a society.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

2.3.9.3 Respect counterarguments (v2dlcountr)

Long tag: vdem_cy_v2dlcountr

Original tag: v2dlcountr

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Michael Coppedge, John Gerring, Staffan Lindberg

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: When important policy changes are being considered, to what extent do political elites acknowledge and respect counterarguments?

CLARIFICATION: Because discourse varies greatly from person to person, base your answer on the style that is most typical of prominent national political leaders.

RESPONSES:

0: Counterarguments are not allowed or if articulated, punished.

1: Counterarguments are allowed at least from some parties, but almost always are ignored.

2: Elites tend to acknowledge counterarguments but then explicitly degrade them by making a negative statement about them or the individuals and groups that propose them.

3: Elites tend to acknowledge counterarguments without making explicit negative or positive statements about them.

4: Elites almost always acknowledge counterarguments and explicitly value them, even if they ultimately reject them for the most part.

5: Elites almost always acknowledge counterarguments and explicitly value them, and frequently also even accept them and change their position.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1900-2022

2.3.9.4 Range of consultation (v2dlconslt)

Long tag: vdem_cy_v2dlconslt

Original tag: v2dlconslt

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Michael Coppedge, John Gerring, Staffan Lindberg

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: When important policy changes are being considered, how wide is the range of consultation at *elite levels*?

CLARIFICATION: Because practices vary greatly from policy to policy, base your answer on the style that is most typical of policymaking.

RESPONSES:

0: No consultation. The leader or a very small group (*e.g.* military council) makes authoritative decisions on their own.

1: Very little and narrow. Consultation with only a narrow circle of loyal party/ruling elites.

2: Consultation includes the former plus a larger group that is loyal to the government, such as the ruling party's or parties' local executives and/or women, youth and other branches.

3: Consultation includes the former plus leaders of other parties.

4: Consultation includes the former plus a select range of society/labor/business representatives.

5: Consultation engages elites from essentially all parts of the political spectrum and all politically relevant sectors of society and business.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

2.3.9.5 Engaged society (v2dlengage)

Long tag: vdem_cy_v2dlengage

Original tag: v2dlengage

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Michael Coppedge, John Gerring, Staffan Lindberg

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: When important policy changes are being considered, how wide and how independent are public deliberations?

CLARIFICATION: This question refers to deliberation as manifested in discussion, debate, and other public forums such as popular media.

RESPONSES:

0: Public deliberation is never, or almost never allowed.

1: Some limited public deliberations are allowed but the public below the elite levels is almost always either unaware of major policy debates or unable to take part in them.

2: Public deliberation is not repressed but nevertheless infrequent and non-elite actors are typically controlled and/or constrained by the elites.

3: Public deliberation is actively encouraged and some autonomous non-elite groups participate, but it is confined to a small slice of specialized groups that tends to be the same across issue-areas.

4: Public deliberation is actively encouraged and a relatively broad segment of non-elite groups often participate and vary with different issue-areas.

5: Large numbers of non-elite groups as well as ordinary people tend to discuss major policies among themselves, in the media, in associations or neighborhoods, or in the streets. Grass-roots deliberation is common and unconstrained.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

2.3.9.6 Particularistic or public goods (v2dlencmps)

Long tag: vdem_cy_v2dlencmps

Original tag: v2dlencmps

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Michael Coppedge, John Gerring, Staffan Lindberg

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Considering the profile of social and infrastructural spending in the national budget, how quot;particularisticquot; or quot;public goodsquot; are most expenditures?

CLARIFICATION: Particularistic spending is narrowly targeted on a specific corporation, sector, social group, region, party, or set of constituents. Such spending may be referred to as quot;porkquot;, quot;clientelisticquot;, or quot;private goods.quot;

Public-goods spending is intended to benefit all communities within a society, though it may be means-tested so as to target poor, needy, or otherwise underprivileged constituents. The key point is that all who satisfy the means-test are allowed to receive the benefit.

Your answer should consider the entire budget of social and infrastructural spending. We are interested in the relative value of particularistic and public-goods spending, not the number of bills or programs that fall into either category.

RESPONSES:

0: Almost all of the social and infrastructure expenditures are particularistic.

1: Most social and infrastructure expenditures are particularistic, but a significant portion (*e.g.* 1/4 or 1/3) is public-goods.

2: Social and infrastructure expenditures are evenly divided between particularistic and public-goods programs.

3: Most social and infrastructure expenditures are public-goods but a significant portion

(*e.g.*, 1/4 or 1/3) is particularistic.

4: Almost all social and infrastructure expenditures are public-goods in character. Only a small portion is particularistic.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

CONVERGENCE: Model parameters with convergence issues: universal thresholds.

2.3.9.7 Means-tested vs. universalistic (v2dlunivl)

Long tag: vdem_cy_v2dlunivl

Original tag: v2dlunivl

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Michael Coppedge, John Gerring, Staffan Lindberg

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: How many welfare programs are means-tested and how many benefit all (or virtually all) members of the polity?

CLARIFICATION: A means-tested program targets poor, needy, or otherwise underprivileged constituents. Cash-transfer programs are normally means-tested.

A universal (non-means tested) program potentially benefits everyone. This includes free education, national health care schemes, and retirement programs. Granted, some may benefit more than others from these programs (*e.g.*, when people with higher salaries get higher unemployment benefits). The key point is that practically everyone is a beneficiary, or potential beneficiary.

The purpose of this question is not to gauge the size of the welfare state but rather its quality. So, your answer should be based on whatever programs exist.

RESPONSES:

0: There are no, or extremely limited, welfare state policies (education, health, retirement, unemployment, poverty programs).

1: Almost all of the welfare state policies are means-tested.

2: Most welfare state policies means-tested, but a significant portion (*e.g.* 1/4 or 1/3) is universalistic and potentially benefits everyone in the population.

3: The welfare state policies are roughly evenly divided between means-tested and universalistic.

4: Most welfare state policies are universalistic, but a significant portion (*e.g.*, 1/4 or 1/3) are means-tested.

5: Almost all welfare state policies are universal in character. Only a small portion is means-tested.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1900-2022

2.3.10 V-Dem Indicators - The Judiciary

Instructions to the coders (as shown in the surveys)

Judiciary: This set of questions pertains to the judiciary. Before you proceed, we would like to clarify several general points. First, some questions below refer to the judiciary in general, whereas others ask for specific evaluations of particular courts or types of courts. Unless otherwise prompted, please consider the judiciary as a whole. This includes all courts in the judicial system at every level, both general jurisdiction courts and more specialized courts. However, with potentially one exception, it excludes specialized courts that are located outside the judiciary, *e.g.* an immigration court that lies inside the executive branch. The one potential exception is the peak constitutional court of the country. Please include this court in your considerations, even though it will be located outside of the judiciary in some countries. If the country you are coding is a federal state, please focus only on the federal judiciary and the federal government.

Seven of the questions about the judiciary concern high courts. By "high court" we are asking you to consider the country's constitutional court, if one exists. If there is no constitutional court, please consider the court of last resort for constitutional matters. If there is no court in your country with constitutional jurisdiction, please consider the highest ordinary court of the state.

For example, in Mexico in 2004, you would consider the Supreme Court of Justice of the Nation and not the Electoral Tribunal for the Federal Judiciary. In Russia in the same year, you would consider the Constitutional Court of the Russian Federation and not the Supreme Court of the Russian Federation. In Sweden, you would ignore the Supreme Administrative Court and instead focus on the Supreme Court. Germany has both a constitutional court, the Federal Constitutional Court, and a court of last resort for ordinary matters, the Federal Court of Justice. The Federal Constitutional Court is the high court for our purposes. In the United States, there is no separate constitutional court or review body. The Supreme Court is both the highest ordinary court and the highest court in the state with constitutional jurisdiction. Therefore, we consider it to be the high court of the United States. If your country's highest judicial body has separate divisions, only one of which is dedicated to final constitutional review, please consider that division to be the high court if its judges are permanently assigned to that division only. For example, the Supreme Court of Justice of Costa Rica has four chambers. The Fourth Chamber reviews constitutional matters, its judges are appointed to it specifically and the other judges of the Supreme Court do not rotate onto the Fourth Chamber. Therefore, the high court for Costa Rica is the constitutional chamber of the Supreme Court of Justice.

If a new high court was established in a given year, please consider that court as the high court for the purposes of these questions only if the court was functioning for the majority of the calendar year. If a new high court was established in a given year, but did not start functioning until a subsequent year, please do not consider the new court as the high court until it was functioning for the majority of the given calendar year. If you are considering a semi sovereign territory, such as a colony, please answer this question with respect to the government or judicial bodies seated within the territory in question (*e.g.*, the governor-general and his local administration in a British colony or a Commonwealth country), not abroad (*e.g.*, the King/Queen or government of England).

In coding the following questions it is sometimes important to distinguish between formal rules (as stipulated by statute, legislative rules, the constitution, or common law precedent) and actual practice (what happens "on the ground"). In order to clarify the *de jure/de facto* distinction, we employ the terms "by law..." and "in practice..." Please pay close attention to these cues wherever you see them.

2.3.10.1 Judicial reform (v2jureform)

Long tag: vdem_cy_v2jureform

Original tag: v2jureform

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Jeffrey Staton

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Were the judiciary's formal powers altered this year in ways that affect its ability to control the arbitrary use of state authority?

CLARIFICATION: Evidence of this kind of reform could include the creation or removal of

various forms of constitutional review, new rules increasing or decreasing access to the judiciary, changes in available judicial remedies, and any other formal institution (procedural or otherwise) that influences the ability of courts to control the arbitrary use of power.

RESPONSES:

0: The judiciary's ability to control arbitrary power was *reduced* via institutional reform.

1: There was no change to the judiciary's ability to control arbitrary power via institutional review.

2: The judiciary's ability to control arbitrary power was *enhanced* via institutional reform.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

2.3.10.2 Judicial purges (v2jupurge)

Long tag: vdem_cy_v2jupurge

Original tag: v2jupurge

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Jeffrey Staton

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Judges are sometimes removed from their posts for cause, as when there is strong evidence of corruption; however, some judges are removed arbitrarily, typically for political reasons. With this distinction in mind, please describe the removal of judges that occurred this calendar year.

CLARIFICATION: The second and third response categories permit you to distinguish among limited arbitrary removals (*i.e.*, when only a few judges are targeted) by the political importance of the removal. For example, you may consider the arbitrary removal of a few high court judges as more important than the arbitrary removal of a few lower court judges.

RESPONSES:

0: There was a massive, arbitrary purge of the judiciary.

1: There were limited but very important arbitrary removals.

2: There were limited arbitrary removals.

3: Judges were removed from office, but there is no evidence that the removals were arbitrary.

4: Judges were not removed from their posts.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1900-2022

2.3.10.3 Government attacks on judiciary (v2jupoatck)

Long tag: vdem_cy_v2jupoatck

Original tag: v2jupoatck

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Jeffrey Staton

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: How often did the government attack the judiciary's integrity in public?

CLARIFICATION: Attacks on the judiciary's integrity can include claims that it is corrupt, incompetent or that decisions were politically motivated. These attacks can manifest in various ways including, but not limited to prepared statements reported by the media, press conferences, interviews, and stump speeches.

RESPONSES:

0: Attacks were carried out on a daily or weekly basis.

1: Attacks were common and carried out in nearly every month of the year.

2: Attacks occurred more than once.

3: There were attacks, but they were rare.

4: There were no attacks on the judiciary's integrity.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1900-2022

2.3.10.4 Court packing (v2jupack)

Long tag: vdem_cy_v2jupack

Original tag: v2jupack

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Jeffrey Staton

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: The size of the judiciary is sometimes increased for very good reasons, as when judges are added to manage an increasing caseload; however, sometimes judges are added purely for political reasons. With this distinction in mind, please describe any increases in the size of the judiciary that occurred this calendar year.

CLARIFICATION: The second and third response categories permit you to distinguish among limited court packing efforts (*i.e.* when relatively few judgeships are added) by the political importance of the packing. For example, you may consider the packing of the high court to be more important than the packing of a lower court.

RESPONSES:

0: There was a massive, politically motivated increase in the number of judgeships across the entire judiciary.

1: There was a limited, politically motivated increase in the number of judgeships on very important courts.

2: There was a limited, politically motivated increase in the number of judgeships.

3: Judgeships were added to the judiciary, but there is no evidence that the increase was politically motivated; or there was no increase.

SCALE: Ordinal, converted to interval by the measurement model.

NOTES: A previous version of the variable contained category "4: There was no increase";. As of November 2014, all responses in category "4" are assigned to category "3", since the two responses have the same meaning in practice.

DATA RELEASE: 1-13.

QUESTION: When the high court in the judicial system is ruling in cases that are salient to the government, how often would you say that it makes decisions that merely reflect government wishes regardless of its sincere view of the legal record?

CLARIFICATION: We are seeking to identify autonomous judicial decision-making and its absence. Decisions certainly can reflect government wishes without “merely reflecting”; those wishes, *i.e.* a court can be autonomous when its decisions support the government’s position. This is because a court can be fairly persuaded that the government’s position is meritorious. By “merely reflect the wishes of the government” we mean that the court’s own view of the record, its sincere evaluation of the record, is irrelevant to the outcome. The court simply adopts the government’s position regardless of its sincere view of the record.

Description:

VARIABLE TYPE: A

PROJECT MANAGER(S): Jeffrey Staton

QUESTION: For constitutions not available in English, did our coders translate the relevant sections of a non-English event?

CLARIFICATION: This variable indicates whether someone on our coding team read the constitutional event in a non-English language and translated information in order to collect the necessary information.

RESPONSES:

0: No

1: Yes, this event was translated by our team

SCALE: Dichotomous

SOURCE(S): V-Dem coding of constitutional texts in CCP (Elkins *et al.* 2012).

DATA RELEASE: 9-13.

COUNTRY-YEAR AGGREGATION: Last

CITATION: *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1901-2015

2.3.11 V-Dem Indicators - Civil Liberty**Instructions to the coders (as shown in the surveys)**

Civil Liberty: The following questions are focused on actual practices (*de facto*) rather than formal legal or constitutional rights (*de jure*). Note that if there is significant variation in the respect for a particular civil liberty across the territory, the score should reflect the "average situation" across the territorial scope of the country unit (for each period) as defined in the coder instructions.

2.3.11.1 Freedom from torture (v2cltort)*Long tag:* vdem_cy_v2cltort*Original tag:* v2cltort*Dataset citation:* Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)*Description:*

VARIABLE TYPE: C

PROJECT MANAGER(S): Svend-Erik Skaaning

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Is there freedom from torture?

CLARIFICATION: Torture refers to the purposeful inflicting of extreme pain, whether mental or physical, with an aim to extract information or intimidate victims, who are in a state of incarceration. Here, we are concerned with torture practiced by state officials or other agents of the state (*e.g.*, police, security forces, prison guards, and paramilitary groups).

RESPONSES:

0: Not respected by public authorities. Torture is practiced systematically and is incited and approved by the leaders of government.

1: Weakly respected by public authorities. Torture is practiced frequently but is often not incited or approved by top leaders of government. At the same time, leaders of government are not actively working to prevent it.

2: Somewhat. Torture is practiced occasionally but is typically not approved by top leaders of government.

3: Mostly respected by public authorities. Torture is practiced in a few isolated cases but is not incited or approved by top government leaders.

4: Fully respected by public authorities. Torture is non-existent.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

YEARS: 1789-2022

2.3.11.3 Freedom from forced labor for men (v2clslavem)

Long tag: vdem_cy_v2clslavem

Original tag: v2clslavem

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Svend-Erik Skaaning

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Are adult men free from servitude and other kinds of forced labor?

CLARIFICATION: Involuntary servitude occurs when an adult is unable to quit a job s/he desires to leave — not by reason of economic necessity but rather by reason of employer's coercion. This includes labor camps but not work or service which forms part of normal civic obligations such as conscription or employment in command economies.

RESPONSES:

0: Male servitude or other kinds of forced labor is widespread and accepted (perhaps even organized) by the state.

1: Male servitude or other kinds of forced labor is substantial. Although officially opposed by the public authorities, the state is unwilling or unable to effectively contain the practice.

2: Male servitude or other kinds of forced labor exists but is not widespread and usually actively opposed by public authorities, or only tolerated in some particular areas or among particular social groups.

3: Male servitude or other kinds of forced labor is infrequent and only found in the criminal underground. It is actively and sincerely opposed by the public authorities.

4: Male servitude or other kinds of forced labor is virtually non-existent.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

2.3.11.4 Freedom from forced labor for women (v2cls slavef)

Long tag: vdem_cy_v2cls slavef

Original tag: v2cls slavef

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Pamela Paxton, Svend-Erik Skaaning

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Are adult women free from servitude and other kinds of forced labor?

CLARIFICATION: Involuntary servitude occurs when an adult is unable to quit a job s/he desires to leave — not by reason of economic necessity but rather by reason of employer's coercion. This includes labor camps but not work or service which forms part of normal civic obligations such as conscription or employment in command economies.

This question does not ask you to assess the *relative* freedom of men and women from forced labor. Thus, a country in which both men and women suffer the same conditions of servitude might be coded a (0) for women, even though there is equality across the sexes.

RESPONSES:

0: Female servitude or other kinds of forced labor is widespread and accepted (perhaps even organized) by the state.

1: Female servitude or other kinds of forced labor is substantial. Although officially opposed by the public authorities, the state is unwilling or unable to effectively contain the practice.

2: Female servitude or other kinds of forced labor exists but is not widespread and usually actively opposed by public authorities, or only tolerated in some particular areas or among particular social groups.

3: Female servitude or other kinds of forced labor is infrequent and only found in the criminal underground. It is actively and sincerely opposed by the public authorities.

4: Female servitude or other kinds of forced labor is virtually non-existent.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

2.3.11.5 Transparent laws with predictable enforcement (v2cltrnslw)

Long tag: vdem_cy_v2cltrnslw

Original tag: v2cltrnslw

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Svend-Erik Skaaning

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Are the laws of the land clear, well publicized, coherent (consistent with each other), relatively stable from year to year, and enforced in a predictable manner?

CLARIFICATION: This question focuses on the transparency and predictability of the laws

of the land.

RESPONSES:

0: Transparency and predictability are almost non-existent. The laws of the land are created and/or enforced in completely arbitrary fashion.

1: Transparency and predictability are severely limited. The laws of the land are more often than not created and/or enforced in arbitrary fashion.

2: Transparency and predictability are somewhat limited. The laws of the land are mostly created in a non-arbitrary fashion but enforcement is rather arbitrary in some parts of the country.

3: Transparency and predictability are fairly strong. The laws of the land are usually created and enforced in a non-arbitrary fashion.

4: Transparency and predictability are very strong. The laws of the land are created and enforced in a non-arbitrary fashion.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

2.3.11.6 Rigorous and impartial public administration (v2clrspct)

Long tag: vdem_cy_v2clrspct

Original tag: v2clrspct

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Svend-Erik Skaaning

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Are public officials rigorous and impartial in the performance of their duties?

CLARIFICATION: This question focuses on the extent to which public officials generally abide by the law and treat like cases alike, or conversely, the extent to which public administration is characterized by arbitrariness and biases (*i.e.*, nepotism, cronyism, or discrimination).

The question covers the public officials that handle the cases of ordinary people. If no functioning public administration exists, the lowest score (0) applies.

RESPONSES:

0: The law is not respected by public officials. Arbitrary or biased administration of the law is rampant.

1: The law is weakly respected by public officials. Arbitrary or biased administration of the law is widespread.

2: The law is modestly respected by public officials. Arbitrary or biased administration of the law is moderate.

3: The law is mostly respected by public officials. Arbitrary or biased administration of the law is limited.

4: The law is generally fully respected by the public officials. Arbitrary or biased administration of the law is very limited.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

2.3.11.7 Access to justice for men (v2clacjstm)

Long tag: vdem_cy_v2clacjstm

Original tag: v2clacjstm

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Svend-Erik Skaaning

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Do men enjoy secure and effective access to justice?

CLARIFICATION: This question specifies the extent to which men can bring cases before the courts without risk to their personal safety, trials are fair, and men have effective ability to seek redress if public authorities violate their rights, including the rights to counsel, defense, and appeal.

This question does not ask you to assess the *relative* access to justice men and women. Thus, it is possible to assign the lowest possible score to a country even if men and women enjoy equal — and extremely limited — access to justice.

RESPONSES:

0: Secure and effective access to justice for men is non-existent.

1: Secure and effective access to justice for men is usually not established or widely respected.

2: Secure and effective access to justice for men is inconsistently observed. Minor problems characterize most cases or occur rather unevenly across different parts of the country.

3: Secure and effective access to justice for men is usually observed.

4: Secure and effective access to justice for men is almost always observed.

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Do women enjoy equal, secure, and effective access to justice?

CLARIFICATION: This question specifies the extent to which women can bring cases before the courts without risk to their personal safety, trials are fair, and women have effective ability to seek redress if public authorities violate their rights, including the rights to counsel, defense, and appeal.

This question does not ask you to assess the *relative* access to justice men and women. Thus, it is possible to assign the lowest possible score to a country even if men and women enjoy equal — and extremely limited — access to justice.

RESPONSES:

0: Secure and effective access to justice for women is non-existent.

1: Secure and effective access to justice for women is usually not established or widely respected.

2: Secure and effective access to justice for women is inconsistently observed. Minor problems characterize most cases or occur rather unevenly across different parts of the country.

QUESTION: Do poor people enjoy the same level of civil liberties as rich people do?

CLARIFICATION: This question specifies the extent to which the level of civil liberties is generally the same across socioeconomic groups so that people with a low social status are not treated worse than people with high social status. Here, civil liberties are understood to include access to justice, private property rights, freedom of movement, and freedom from forced labor.

RESPONSES:

0: Poor people enjoy much fewer civil liberties than rich people.

1: Poor people enjoy substantially fewer civil liberties than rich people.

2: Poor people enjoy moderately fewer civil liberties than rich people.

3: Poor people enjoy slightly fewer civil liberties than rich people.

4: Poor people enjoy the same level of civil liberties as rich people.

2.3.11.15 Freedom of discussion for men (v2cldiscm)

Long tag: vdem_cy_v2cldiscm

Original tag: v2cldiscm

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Svend-Erik Skaaning

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Are men able to openly discuss political issues in private homes and in public spaces?

CLARIFICATION: This indicator specifies the extent to which men are able to engage in private discussions, particularly on political issues, in private homes and public spaces (restaurants, public transportation, sports events, work etc.) without fear of harassment by other members of the polity or the public authorities. We are interested in restrictions by the government and its agents but also cultural restrictions or customary laws that are enforced by other members of the polity, sometimes in informal ways.

This question does not ask you to assess the *relative* freedom of men and women. Thus, it is possible to assign the lowest possible score to a country even if men and women enjoy equal — and extremely low — rights to freedom of discussion.

RESPONSES:

0: Not respected. Hardly any freedom of expression exists for men. Men are subject to immediate and harsh intervention and harassment for expression of political opinion.

1: Weakly respected. Expressions of political opinions by men are frequently exposed to intervention and harassment.

2: Somewhat respected. Expressions of political opinions by men are occasionally exposed to intervention and harassment.

3: Mostly respected. There are minor restraints on the freedom of expression in the private sphere, predominantly limited to a few isolated cases or only linked to soft sanctions. But as a rule there is no intervention or harassment if men make political statements.

4: Fully respected. Freedom of speech for men in their homes and in public spaces is not restricted.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Svend-Erik Skaaning

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Is there academic freedom and freedom of cultural expression related to political issues?

RESPONSES:

0: Not respected by public authorities. Censorship and intimidation are frequent. Academic activities and cultural expressions are severely restricted or controlled by the government.

1: Weakly respected by public authorities. Academic freedom and freedom of cultural expression are practiced occasionally, but direct criticism of the government is mostly met with repression.

2: Somewhat respected by public authorities. Academic freedom and freedom of cultural expression are practiced routinely, but strong criticism of the government is sometimes met with repression.

3: Mostly respected by public authorities. There are few limitations on academic freedom and freedom of cultural expression, and resulting sanctions tend to be infrequent and soft.

4: Fully respected by public authorities. There are no restrictions on academic freedom or cultural expression.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

2.3.11.18 Freedom of religion (v2clrelig)

Long tag: vdem_cy_v2clrelig

Original tag: v2clrelig

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Svend-Erik Skaaning

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Is there freedom of religion?

CLARIFICATION: This indicator specifies the extent to which individuals and groups have the right to choose a religion, change their religion, and practice that religion in private or in public as well as to proselytize peacefully without being subject to restrictions by public authorities.

RESPONSES:

0: Not respected by public authorities. Hardly any freedom of religion exists. Any kind of religious practice is outlawed or at least controlled by the government to the extent that religious leaders are appointed by and subjected to public authorities, who control the activities of religious communities in some detail.

1: Weakly respected by public authorities. Some elements of autonomous organized religious practices exist and are officially recognized. But significant religious communities are repressed, prohibited, or systematically disabled, voluntary conversions are restricted, and instances of discrimination or intimidation of individuals or groups due to their religion are common.

2: Somewhat respected by public authorities. Autonomous organized religious practices exist and are officially recognized. Yet, minor religious communities are repressed, prohibited, or systematically disabled, and/or instances of discrimination or intimidation of individuals or groups due to their religion occur occasionally.

3: Mostly respected by public authorities. There are minor restrictions on the freedom of religion, predominantly limited to a few isolated cases. Minority religions face denial of registration, hindrance of foreign missionaries from entering the country, restrictions against proselytizing, or hindrance to access to or construction of places of worship.

4: Fully respected by public authorities. The population enjoys the right to practice any religious belief they choose. Religious groups may organize, select, and train personnel; solicit and receive contributions; publish; and engage in consultations without undue interference. If religious communities have to register, public authorities do not abuse the process to discriminate against a religion and do not constrain the right to worship before registration.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Svend-Erik Skaaning

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Is there freedom of foreign travel and emigration?

CLARIFICATION: This indicator specifies the extent to which citizens are able to travel

freely to and from the country and to emigrate without being subject to restrictions by public authorities.

RESPONSES:

0: Not respected by public authorities. Citizens are rarely allowed to emigrate or travel out of the country. Transgressors (or their families) are severely punished. People discredited by the public authorities are routinely exiled or prohibited from traveling.

1: Weakly respected by public authorities. The public authorities systematically restrict the right to travel, especially for political opponents or particular social groups. This can take the form of general restrictions on the duration of stays abroad or delays/refusals of visas.

2: Somewhat respected by the public authorities. The right to travel for leading political opponents or particular social groups is occasionally restricted but ordinary citizens only met minor restrictions.

3: Mostly respected by public authorities. Limitations on freedom of movement and residence are not directed at political opponents but minor restrictions exist. For example, exit visas may be required and citizens may be prohibited from traveling outside the country when accompanied by other members of their family.

4: Fully respected by the government. The freedom of citizens to travel from and to the country, and to emigrate and repatriate, is not restricted by public authorities.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

2.3.11.20 Freedom of domestic movement for men (v2cldmovem)

Long tag: vdem_cy_v2cldmovem

Original tag: v2cldmovem

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Svend-Erik Skaaning

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Do men enjoy freedom of movement within the country?

CLARIFICATION: This indicator specifies the extent to which all men are able to move freely, in daytime and nighttime, in public thoroughfares, across regions within a country, and to establish permanent residency where they wish. Note that restrictions in movement might be imposed by the state and/or by informal norms and practices. Such restrictions sometimes fall on rural residents, on specific social groups, or on dissidents.

This question does not ask you to assess the *relative* freedom of men and women. Thus, it is possible to assign the lowest possible score to a country even if men and women enjoy equal — and extremely low — freedom of movement.

Do *not* consider restrictions in movement that are placed on ordinary (non-political) criminals. Do not consider restrictions in movement that result from crime or unrest.

RESPONSES:

0: Virtually no men enjoy full freedom of movement (*e.g.*, North Korea).

1: Some men enjoy full freedom of movement, but most do not (*e.g.*, Apartheid South Africa).

2: Most men enjoy some freedom of movement but a sizeable minority does not. Alternatively all men enjoy partial freedom of movement.

3: Most men enjoy full freedom of movement but a small minority does not.

4: Virtually all men enjoy full freedom of movement.

2.3.11.22 State ownership of economy (v2clstown)

Long tag: vdem_cy_v2clstown

Original tag: v2clstown

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Svend-Erik Skaaning

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Does the state own or directly control important sectors of the economy?

CLARIFICATION: This question gauges the degree to which the state owns and controls

capital (including land) in the industrial, agricultural, and service sectors.

It does *not* measure the extent of government revenue and expenditure as a share of total output; indeed, it is quite common for states with expansive fiscal policies to exercise little direct control (and virtually no ownership) over the economy.

RESPONSES:

0: Virtually all valuable capital belongs to the state or is directly controlled by the state. Private property may be officially prohibited.

1: Most valuable capital either belongs to the state or is directly controlled by the state.

2: Many sectors of the economy either belong to the state or are directly controlled by the state, but others remain relatively free of direct state control.

3: Some valuable capital either belongs to the state or is directly controlled by the state, but most remains free of direct state control.

4: Very little valuable capital belongs to the state or is directly controlled by the state.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

2.3.11.23 Property rights for men (v2clprptym)

Long tag: vdem_cy_v2clprptym

Original tag: v2clprptym

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Svend-Erik Skaaning

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Do men enjoy the right to private property?

CLARIFICATION: Private property includes the right to acquire, possess, inherit, and sell private property, including land. Limits on property rights may come from the state (which may legally limit rights or fail to enforce them); customary laws and practices; or religious or social norms. This question concerns the right to private property, not actual ownership of property.

This question does not ask you to assess the *relative* rights of men and women. Thus, it is possible to assign the lowest possible score to a country even if men and women enjoy equal — and very minimal — property rights.

RESPONSES:

0: Virtually no men enjoy private property rights of any kind.

1: Some men enjoy some private property rights, but most have none.

2: Many men enjoy many private property rights, but a smaller proportion enjoys few or none.

3: More than half of men enjoy most private property rights, yet a smaller share of men have much more restricted rights.

4: Most men enjoy most private property rights but a small minority does not.

5: Virtually all men enjoy all, or almost all property rights.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

2.3.12 V-Dem Indicators - Sovereignty and State

Instructions to the coders (as shown in the surveys)

Sovereignty: This section addresses a number of issues concerning the sovereignty of the state. A state is political organization that organizes compulsory domination over a fixed territory on a continual basis. With respect to state sovereignty, we are interested in measuring two distinct areas of sovereignty. The first is an attribute of states within the context of the international system. Here, we are interested in the state's autonomy from other actors in the system. The second component of sovereignty concerns the relationship of the state to the population and territory over which it claims to rule. Here, we want to gauge the extent of recognition of the preeminent authority of the state over its claimed territory and population.

Sovereignty – Historical clarification: This section addresses a number of issues concerning the state. A state is a political organization that organizes compulsory domination over a fixed territory on a continual basis. The questions concern two general themes: state sovereignty and state administration.

With respect to state sovereignty, we are interested in measuring two distinct areas of sovereignty. The first is an attribute of states within the context of the international system. Here, we are interested in the state's autonomy from and recognition by other actors in the system. The second component of sovereignty concerns the relationship of the state to the population and territory over

which it claims to rule. Here, we want to gauge the extent of recognition of the preeminent authority of the state over its claimed territory and population.

A second attribute of states is the state administration: the set of institutions that administer and implement governmental decisions. Here we are mainly interested in the professionalization, or lack thereof, of the state administrative staff – in this context termed the state administrators.

The State: “This section addresses a number of issues concerning the state. A state is a political organization that organizes compulsory domination over a fixed territory on a continual basis. The questions concern two general themes: state sovereignty and state administration.

With respect to state sovereignty, we are interested in measuring two distinct areas of sovereignty. The first is an attribute of states within the context of the international system. Here, we are interested in the state’s autonomy from and recognition by other actors in the system. The second component of sovereignty concerns the relationship of the state to the population and territory over which it claims to rule. Here, we want to gauge the extent of recognition of the preeminent authority of the state over its claimed territory and population.

A second attribute of states is the state administration: the set of institutions that administer and implement governmental decisions. Here we are mainly interested in the professionalization, or lack thereof, of the state administrative staff—in this context termed the state administrators.”

2.3.12.1 Domestic Autonomy (v2svdomaut)

Long tag: vdem_cy_v2svdomaut

Original tag: v2svdomaut

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Michael Bernhard

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Is the state autonomous from the control of other states with respect to the conduct of domestic policy?

CLARIFICATION: The question of domestic autonomy does not include restrictions emanating from treaties (*e.g.*, NATO), international organizations (*e.g.*, the WTO), or confederations (*e.g.*, the European Union) if these agreements are freely negotiated by the state and if the state is free to exit from that treaty, organization, or confederation. Nor does it include restrictions on policymaking emanating from international market forces and trans-national corporations.

RESPONSES:

0: Non-autonomous. National level authority is exercised by an external power, either by law or in practice. The most common examples of this are direct colonial rule and military occupation (*e.g.* quadripartite occupation of Germany in 1945). It also includes situations in which domestic actors provide *de jure* cover for *de facto* control by a foreign power (*e.g.* Vichy France). However, control of some part of the territory of a state by an enemy during war is not considered control by external actors if the sovereign government remains on scene and continues to wage conventional war (*e.g.*, the USSR during WW II).

1: Semi-autonomous. An external political actor directly constrains the ability of domestic actors to rule, decides who can or cannot rule through formal rules or informal understandings, or precludes certain policies through explicit treaty provisions or well-understood rules of the game from which the subject state cannot withdraw. Examples include Soviet “satellite” states in Eastern Europe, and situations where colonial powers grant limited powers of national self-government to their possessions (*e.g.*, protectorates and limited home government).

2: Autonomous. Domestic political actors exercise political authority free of the direct control of external political actors.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

2.3.12.2 International autonomy (v2svinlaut)

Long tag: vdem_cy_v2svinlaut

Original tag: v2svinlaut

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Michael Bernhard

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Is the state autonomous from the control of other states with respect to the conduct of its foreign policy?

RESPONSES:

0: Non-autonomous. Foreign policy is controlled by an external power, either *de facto* or *de jure*. The most common examples of this are colonial rule and military occupation (*e.g.* quadripartite occupation of Germany in 1945). Situations in which domestic actors provide *de jure* cover for *de facto* control by a foreign power should not be construed as semi-autonomy (*e.g.* Vichy France). Governments in exile that control underground forces waging unconventional warfare are not considered as mitigating an occupation regime (*e.g.* countries under German occupation during WWII).

1: Semi-autonomous. An external political actor directly constrains the ability of domestic actors to pursue an independent foreign policy course in some important areas. This may be the product of explicit treaty provisions or well-understood rules of the game from which the subject state cannot withdraw. Examples would include Soviet strictures over rule in so-called "satellite" states in Eastern Europe, and explicitly negotiated postwar settlements (*e.g.* Austria following WWII).

2: Autonomous. Domestic political actors exercise foreign policy free of the direct control of external political actors. Direct control is meant to exclude the exercise of constraint or the impact of interdependence in the international system. Treaties in which states concede some part of that control to a supra- or international organization voluntarily, and from which there is a possibility of exit should not be interpreted as a violation of autonomy.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

2.3.12.3 State authority over territory (v2svstterr)

Long tag: vdem_cy_v2svstterr

Original tag: v2svstterr

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Michael Bernhard

ADDITIONAL VERSIONS: *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Over what percentage (percent) of the territory does the state have effective control?

CLARIFICATION: With this question we seek to judge the extent of recognition of the

preeminent authority of the state over its territory. We are not interested here in perfect control by the state, or whether it is relatively effective in comparison to other states, but an assessment of the areas over which it is hegemonic, *e.g.* where it is recognized as the preeminent authority and in a contest of wills it can assert its control over political forces that reject its authority. Several illustrative examples may help in this coding. During civil wars the claim of the state to rule is effectively neutralized by insurgent groups (*e.g.*, the Tamil Tigers in Sri Lanka). There are also situations in which criminals or warlords exert control in contravention of state authority (*e.g.* opium growers in parts of Indochina). There are also cases of failed states where the central government cannot assert control over a share of its territory (*e.g.*, contemporary Somalia). Here, we ask you to estimate the size of the territory that the state has effective control over, as a percentage (percent) of the total territory that is officially part of the country.

By “officially part of the country” we refer to international law. In cases where international law is not entirely clear, we refer you to general understandings. For example, China claims sovereignty over Taiwan, but it remains under the control of its own government. For purposes of this question, Taiwan should not be considered a failure to control its territory by the government of the PRC.

RESPONSES:

Percent.

SCALE: Interval.

2.3.12.9 Independent states (v2svindep)

Long tag: vdem_cy_v2svindep

Original tag: v2svindep

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: ?Gleditsch & Ward (2013), IPU Parline, IDEA

Description:

VARIABLE TYPE: A

PROJECT MANAGER(S): Svend-Erik Skaaning, Michael Bernhard

QUESTION: Is the polity an independent state?

CLARIFICATION: We use Gleditsch and Ward's (1999) coding of independent states. Their definition recognizes that listing independent states relies at least in part on subjective evaluations. A state is considered to be an independent polity if it (a) has a relatively autonomous administration over some territory, (b) is considered a distinct entity by local actors or the state it is dependent on. Polities excluded from the list are: colonies; states that have some form of limited autonomy (*e.g.* Scotland); are alleged to be independent but are contiguous to the dominant entity (Ukraine and Belarus prior to 1991); *de facto* independent polities but recognized by at most one other state (Turkish Republic of Northern Cyprus). Occupations or foreign rule are considered to be an actual loss of statehood when they extend beyond a decade. This means that cases such as the Baltic Republic during Soviet occupation are not considered independent states, but independent statehood is retained for European countries occupied during World War II.

RESPONSES:

0: No

1: Yes

SCALE: Dichotomous.

SOURCE(S): Gleditsch and Ward (1999; 2013); IPU Parline; IDEA.

2.3.13 V-Dem Indicators - Civil Society

Instructions to the coders (as shown in the surveys)

Civil society organization:

The following set of questions focus on civil society organizations (CSOs). These include interest groups, labor unions, religiously inspired organizations (if they are engaged in civic or political activities), social movements, professional associations, and classic non-governmental organizations (NGOs), but *not* businesses, political parties, government agencies, or religious organizations that are primarily focused on spiritual practices. A CSO must also be at least nominally independent of government and economic institutions.

Civil society organization – Historical clarification: The following set of questions focus on civil society organizations (CSOs). These include interest groups, labor unions, religiously inspired organizations (if they are engaged in civic or political activities), social movements, professional associations, and classic non-governmental organizations (NGOs), but not businesses, political parties, government agencies, or religious organizations that are primarily focused on spiritual practices. A CSO must also be at least nominally independent of government and economic institutions.

If no CSOs exist at all for a particular time period, code the following relevant questions as giving the "lowest score" (indicating, for instance, strong repression or no consultation, a 0).

Religious organizations: In this section, we ask two questions regarding religious organizations. These may be religiously inspired civil society organizations (CSOs) or organizations whose purpose is primarily spiritual.

2.3.13.1 CSO entry and exit (v2cseeorgs)

Long tag: vdem_cy_v2cseeorgs

Original tag: v2cseeorgs

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Michael Bernhard

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: To what extent does the government achieve control over entry and exit by civil society organizations (CSOs) into public life?

RESPONSES:

0: Monopolistic control. The government exercises an explicit monopoly over CSOs. The only organizations allowed to engage in political activity such as endorsing parties or politicians, sponsoring public issues forums, organizing rallies or demonstrations, engaging in strikes, or publicly commenting on public officials and policies are government-sponsored organizations. The government actively represses those who attempt to defy its monopoly on political activity.

1: Substantial control. The government licenses all CSOs and uses political criteria to bar organizations that are likely to oppose the government. There are at least some citizen-based organizations that play a limited role in politics independent of the government. The government actively represses those who attempt to flout its political criteria and bars them from any political activity.

2: Moderate control. Whether the government ban on independent CSOs is partial or full, some prohibited organizations manage to play an active political role. Despite its ban on organizations of this sort, the government does not or cannot repress them, due to either its weakness or political expedience.

3: Minimal control. Whether or not the government licenses CSOs, there exist constitutional provisions that allow the government to ban organizations or movements that have a history of anti-democratic action in the past (*e.g.* the banning of neo-fascist or communist organizations in the Federal Republic of Germany). Such banning takes place under strict rule of law and conditions of judicial independence.

4: Unconstrained. Whether or not the government licenses CSOs, the government does not impede their formation and operation unless they are engaged in activities to violently overthrow the government.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

QUESTION: Does the government attempt to repress civil society organizations (CSOs)?

RESPONSES:

0: Severely. The government violently and actively pursues all real and even some imagined members of CSOs. They seek not only to deter the activity of such groups but to effectively liquidate them. Examples include Stalinist Russia, Nazi Germany, and Maoist China.

1: Substantially. In addition to the kinds of harassment outlined in responses 2 and 3 below, the government also arrests, tries, and imprisons leaders of and participants in oppositional CSOs who have acted lawfully. Other sanctions include disruption of public gatherings and violent sanctions of activists (beatings, threats to families, destruction of valuable property). Examples include Mugabe's Zimbabwe, Poland under Martial Law, Serbia under Milosevic.

2: Moderately. In addition to material sanctions outlined in response 3 below, the government also engages in minor legal harassment (detentions, short-term incarceration) to dissuade CSOs from acting or expressing themselves. The government may also restrict the scope of their actions through measures that restrict association of civil society organizations with each other or political parties, bar civil society organizations from taking certain actions, or block international contacts. Examples include post-Martial Law Poland, Brazil in the early 1980s, the late Franco period in Spain.

3: Weakly. The government uses material sanctions (fines, firings, denial of social services) to deter oppositional CSOs from acting or expressing themselves. They may also use burdensome registration or incorporation procedures to slow the formation of new civil society organizations and sidetrack them from engagement. The government may also organize Government Organized Movements or NGOs (GONGOs) to crowd out independent organizations. One example would be Singapore in the post-Yew phase or Putin's Russia.

4: No. Civil society organizations are free to organize, associate, strike, express themselves, and to criticize the government without fear of government sanctions or harassment.

SCALE: Ordinal, converted to interval by the measurement model.

NOTES: For reasons of consistency, as of December 2014, responses to this question are reversed so that the least democratic response is "0" and the most democratic is "4".

DATA RELEASE: 1-13.

QUESTION: Are major civil society organizations (CSOs) routinely consulted by policymakers on policies relevant to their members?

RESPONSES:

0: No. There is a high degree of insulation of the government from CSO input. The government may sometimes enlist or mobilize CSOs after policies are adopted to sell them to the public at large. But it does not often consult with them in formulating policies.

1: To some degree. CSOs are but one set of voices that policymakers sometimes take into account.

2: Yes. Important CSOs are recognized as stakeholders in important policy areas and given voice on such issues. This can be accomplished through formal corporatist arrangements or through less formal arrangements.

QUESTION: Which of these best describes the involvement of people in civil society organizations (CSOs)?

RESPONSES:

0: Most associations are state-sponsored, and although a large number of people may be active in them, their participation is not purely voluntary.

1: Voluntary CSOs exist but few people are active in them.

2: There are many diverse CSOs, but popular involvement is minimal.

3: There are many diverse CSOs and it is considered normal for people to be at least occasionally active in at least one of them.

2.3.13.6 CSO anti-system movements (v2csantimv)

Long tag: vdem_cy_v2csantimv

Original tag: v2csantimv

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Michael Bernhard

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Among civil society organizations, are there anti-system opposition movements?

CLARIFICATION: An anti-system opposition movement is any movement — peaceful or armed — that is based in the country (not abroad) and is organized in opposition to the current political system. That is, it aims to change the polity in fundamental ways, *e.g.*, from democratic to autocratic (or vice-versa), from capitalist to communist (or vice-versa), from secular to fundamentalist (or vice-versa). This movement may be linked to a political party that competes in elections but it must also have a "movement" character, which is to say a mass base and an existence separate from normal electoral competition.

If there are several movements, please answer in a general way about the relationship of those movements to the regime.

RESPONSES:

0: No, or very minimal. Anti-system movements are practically nonexistent.

1: There is only a low-level of anti-system movement activity but it does not pose much of a threat to the regime.

2: There is a modest level of anti-system movement activity, posing some threat to the regime.

3: There is a high level of anti-system movement activity, posing substantial threat to the regime.

4: There is a very high level of anti-system movement activity, posing a real and present threat to the regime.

ORDERING: If coded "0", skip the following questions focused on anti-system movements.

2.3.14 V-Dem Indicators - The Media

Instructions to the coders (as shown in the surveys)

Media: Two types of media are distinguished in this section: (1) print (newspapers and magazines) and broadcast (radio and television), and (2) online media. We ask that you evaluate these categories as a whole. Thus, "the print and broadcast media" can provide a wide range of perspectives in a country even when individual publications or programs take a consistently narrow perspective.

Historical clarification: Two types of media are distinguished in this section: (1) print (newspapers and magazines) and (2) broadcast (radio) media. The latter is, however, only for reference to the contemporary era, and should of course be ignored before it appeared. But when applicable, we ask that you evaluate these categories as a whole. If there is no print or broadcast media at all in a given time period, leave the following questions blank (missing) for this time period. Please also explicitly note in the comments section at the end for which years there was no print or broadcast media at all.

2.3.14.1 Government censorship effort - Media (v2mecenefm)

Long tag: vdem_cy_v2mecenefm

Original tag: v2mecenefm

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Michael Coppedge

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Does the government directly or indirectly attempt to censor the print or broadcast media?

CLARIFICATION: Indirect forms of censorship might include politically motivated awarding of broadcast frequencies, withdrawal of financial support, influence over printing facilities and distribution networks, selected distribution of advertising, onerous registration requirements, prohibitive tariffs, and bribery.

We are not concerned with censorship of non-political topics such as child pornography, statements offensive to a particular religion, or defamatory speech unless this sort of censorship is used as a pretext for censoring political speech.

RESPONSES:

0: Attempts to censor are direct and routine.

1: Attempts to censor are indirect but nevertheless routine.

2: Attempts to censor are direct but limited to especially sensitive issues.

3: Attempts to censor are indirect and limited to especially sensitive issues.

4: The government rarely attempts to censor major media in any way, and when such exceptional attempts are discovered, the responsible officials are usually punished.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*)

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Michael Coppedge

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Does the government attempt to censor information (text, audio, or visuals) on the Internet?

CLARIFICATION: Censorship attempts include Internet filtering (blocking access to certain websites or browsers), denial-of-service attacks, and partial or total Internet shutdowns. We are not concerned with censorship of topics such as child pornography, highly classified

information such as military or intelligence secrets, statements offensive to a particular religion, or defamatory speech unless this sort of censorship is used as a pretext for censoring political information or opinions. We are also not concerned with the *extent* of internet access, unless there is absolutely no access at all (in which case the coding should be 0).

RESPONSES:

0 (1): The government successfully blocks Internet access except to sites that are pro-government or devoid of political content.

1 (2): The government attempts to block Internet access except to sites that are pro-government or devoid of political content, but many users are able to circumvent such controls.

2 (3): The government allows Internet access, including to some sites that are critical of the government, but blocks selected sites that deal with especially politically sensitive issues.

3 (4): The government allows Internet access that is unrestricted, with the exceptions mentioned above.

SCALE: Ordinal, converted to interval by the measurement model.

NOTES: As of December 2014, the former category "0 There is no internet" is coded separately as *v2mecenefibin*. The variable is then rebased to zero.

DATA RELEASE: 3-13.

QUESTION: Is there media bias against opposition parties or candidates?

CLARIFICATION: We ask you to take particular care in rating the year-to-year variation on this question if media bias tends to increase or decrease in election years. Coverage can be considered "more or less impartial" when the media as a whole present a mix of positive and negative coverage of each party or candidate.

RESPONSES:

0: The print and broadcast media cover only the official party or candidates, or have no political coverage, or there are no opposition parties or candidates to cover.

1: The print and broadcast media cover more than just the official party or candidates but all the opposition parties or candidates receive only negative coverage.

2: The print and broadcast media cover some opposition parties or candidates more or less impartially, but they give only negative or no coverage to at least one newsworthy party or candidate.

3: The print and broadcast media cover opposition parties or candidates more or less impartially, but they give an exaggerated *amount* of coverage to the governing party or candidates.

4: The print and broadcast media cover all newsworthy parties and candidates more or less impartially and in proportion to their newsworthiness.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

QUESTION: Do journalists, publishers, or broadcasters accept payments in exchange for altering news coverage?

RESPONSES:

0: The media are so closely directed by the government that any such payments would be either unnecessary to ensure pro-government coverage or ineffective in producing anti-government coverage.

1: Journalists, publishers, and broadcasters routinely alter news coverage in exchange for payments.

2: It is common, but not routine, for journalists, publishers, and broadcasters to alter news coverage in exchange for payments.

3: It is not normal for journalists, publishers, and broadcasters to alter news coverage in exchange for payments, but it happens occasionally, without anyone being punished.

4: Journalists, publishers, and broadcasters rarely alter news coverage in exchange for payments, and if it becomes known, someone is punished for it.

SCALE: Ordinal, converted to interval by the measurement model.

2.3.15 V-Dem Indicators - Political Equality

Instructions to the coders (as shown in the surveys)

Political Equality: This section pertains to political equality, that is, the extent to which members of a polity possess equal political power. It does not refer to the inevitable differentiation in power that occurs in all large societies between those who hold positions of power within the state (political elites) and lay citizens. It is, rather, about the distribution of political power among identifiable groups within the population.

What does it mean for a group of individuals to wield real political power? Although political power cannot be directly observed, one can infer that groups possess power to the extent that they: (a) actively participate in politics (by voting, etc.), (b) are involved in civil society organizations, (c) secure representation in government, (d) are able to set the political agenda, (e) influence political decisions, and (f) influence the implementation of those decisions. Please consider all these factors when answering the following questions. (Of course, the picture across these different dimensions may be mixed; your response should indicate the overall picture, taking all aspects of political power into account.)

2.3.15.1 Power distributed by socioeconomic position (v2pepwrse)

Long tag: vdem_cy_v2pepwrse

Original tag: v2pepwrse

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): John Gerring

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Is political power distributed according to socioeconomic position?

CLARIFICATION: All societies are characterized by some degree of economic (wealth and income) inequality. In some societies, income and wealth are distributed in a grossly unequal fashion. In others, the difference between rich and poor is not so great. Here, we are concerned not with the degree of social inequality but rather with the political effects of this inequality. Specifically, we are concerned with the extent to which wealth and income translates into political power.

RESPONSES:

0: Wealthy people enjoy a virtual monopoly on political power. Average and poorer people have almost no influence.

1: Wealthy people enjoy a dominant hold on political power. People of average income have little say. Poorer people have essentially no influence.

2: Wealthy people have a very strong hold on political power. People of average or poorer income have some degree of influence but only on issues that matter less for wealthy people.

3: Wealthy people have more political power than others. But people of average income have almost as much influence and poor people also have a significant degree of political power.

4: Wealthy people have no more political power than those whose economic status is average or poor. Political power is more or less equally distributed across economic groups.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

2.3.15.2 Power distributed by social group (v2pepwrSOC)

Long tag: vdem_cy_v2pepwrSOC

Original tag: v2pepwrSOC

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): John Gerring

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Is political power distributed according to social groups?

CLARIFICATION: A social group is differentiated within a country by caste, ethnicity, language, race, region, religion, or some combination thereof. (It does *not* include identities grounded in sexual orientation or socioeconomic status.) Social group identity is contextually defined and is likely to vary across countries and through time. Social group identities are also likely to cross-cut, so that a given person could be defined in multiple ways, *i.e.*, as part of multiple groups. Nonetheless, at any given point in time there are social groups within a society that are understood — by those residing within that society — to be different, in ways that may be politically relevant.

RESPONSES:

0: Political power is monopolized by one social group comprising a minority of the population. This monopoly is institutionalized, *i.e.*, not subject to frequent change.

1: Political power is monopolized by several social groups comprising a minority of the population. This monopoly is institutionalized, *i.e.*, not subject to frequent change.

2: Political power is monopolized by several social groups comprising a majority of the population. This monopoly is institutionalized, *i.e.*, not subject to frequent change.

3: Either all social groups possess some political power, with some groups having more power than others; or different social groups alternate in power, with one group controlling much of the political power for a period of time, followed by another — but all significant groups have a turn at the seat of power.

4: All social groups have roughly equal political power *or* there are no strong ethnic, caste, linguistic, racial, religious, or regional differences to speak of. Social group characteristics are not relevant to politics.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook*

2.3.15.3 Power distributed by gender (v2pepwrngen)

Long tag: vdem_cy_v2pepwrngen

Original tag: v2pepwrngen

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): John Gerring

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Is political power distributed according to gender?

RESPONSES:

0: Men have a near-monopoly on political power.

1: Men have a dominant hold on political power. Women have only marginal influence.

2: Men have much more political power but women have some areas of influence.

3: Men have somewhat more political power than women.

4: Men and women have roughly equal political power.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

2.3.15.4 Power distributed by sexual orientation (v2pepwrort)

Long tag: vdem_cy_v2pepwrort

Original tag: v2pepwrort

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): John Gerring

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: To what extent is political power distributed according to sexual orientation?

CLARIFICATION: This question contrasts (A) the political power of heterosexuals and lesbian, gay, bisexual, and transgender (LGBT) members of the polity who are not open about their sexuality with (B) the political power of lesbian, gay, bisexual, and transgender (LGBT) members of the polity who are open about their sexuality. (A) will be referred to as "heterosexual" and (B) as "LGBT".

Note that in comparing the political power of these two groups we are comparing their power per person. So, when we say that LGBT have less, equal, or more power than heterosexuals we mean relative to their share of the population (as near as this can be estimated).

RESPONSES:

0: LGBTs are entirely excluded from the public sphere and thus deprived of any real political power (even though they may possess formal powers such as the ballot).

1: LGBTs have much less political power than heterosexuals. LGBTs enjoy formal rights to participate in politics but are subject to informal norms that often serve to exclude them from the halls of power.

2: LGBTs have somewhat less political power than heterosexual citizens.

3: LGBTs have about the same political power as heterosexuals. Each group enjoys a degree of political power that is roughly proportional to their population.

4: LGBTs enjoy somewhat more political power than heterosexuals by virtue of greater wealth, education, and high level of organization and mobilization.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 1-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: To what extent is high quality basic education guaranteed to all, sufficient to enable them to exercise their basic rights as adult citizens?

CLARIFICATION: Basic education refers to ages typically between 6 and 16 years of age but this varies slightly among countries.

RESPONSES:

0: Extreme. Provision of high quality basic education is extremely unequal and at least 75 percent (percent) of children receive such low-quality education that undermines their ability to exercise their basic rights as adult citizens.

1: Unequal. Provision of high quality basic education is extremely unequal and at least 25 percent (percent) of children receive such low-quality education that undermines their ability to exercise their basic rights as adult citizens.

2: Somewhat equal. Basic education is relatively equal in quality but ten to 25 percent (percent) of children receive such low-quality education that undermines their ability to exercise their basic rights as adult citizens.

3: Relatively equal. Basic education is overall equal in quality but five to ten percent (percent) of children receive such low-quality education that probably undermines their ability to exercise their basic rights as adult citizens.

4: Equal. Basic education is equal in quality and less than five percent (percent) of children receive such low-quality education that probably undermines their ability to exercise their basic rights as adult citizens.

SCALE: Ordinal, converted to interval by the measurement model.

2.3.16 V-Dem Indicators - Exclusion

Instructions to the coders (as shown in the surveys)

Exclusion:

The following survey contains questions pertaining to exclusion. Political, economic and social well-being may depend on whether groups or individuals are excluded from positions of power, the state's protection of rights and freedoms, access to public goods and services, and opportunities to work or do business with the state.

Please bear in mind the following definitions as you respond to questions on this survey:

Exclusion is when individuals are denied access to services or participation in governed spaces based on their identity or belonging to a particular group. It is not necessary for all members of a group to be excluded in order for group-based exclusion to occur. Exclusion occurs even when only a single individual is excluded based on her or his identity or membership (perceived or actual) in a particular group.

Political groups are defined as those who are affiliated with a particular political party or candidate, or a group of parties/candidates. A common form of partisan exclusion is when state services or regulations are implemented in a way that seeks to reward the incumbent's political supporters and punish non-supporters.

Socio-Economic position defines groups based on attributes of wealth, occupation, or other economic circumstances such as owning property. Exclusion of economic groups occurs when, for example, those who are not property owners are restricted from voting, or when fees associated with justice, health or education are set at a rate that is unaffordable for poorer individuals.

Social group is differentiated within a country by caste, ethnicity, language, race, region, religion, migration status, or some combination thereof. (It does not include identities grounded in sexual orientation, gender, or socioeconomic status.) Social group identity is contextually defined and is likely to vary across countries and through time. Social group identities are also likely to cross-cut, so that a given person could be defined in multiple ways, i.e., as part of multiple groups. Nonetheless, at any given point in time there are social groups within a society that are understood - by those residing within that society - to be different, in ways that may be politically relevant. Contrast Identity group.

Geographic group refers to those living in rural or urban areas. Urban areas are defined as an area that meets the following conditions: population density exceeds a threshold of 150 persons per square kilometer and there is access to a sizeable settlement of 50,000 people or more within some reasonable travel time, for example 60 minutes by road. (World Development Report, 2009: 54).

2.3.16.1 Access to public services distributed by socio-economic position (v2peapsecon)

Long tag: vdem_cy_v2peapsecon

Original tag: v2peapsecon

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Rachel Sigman

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Is access to basic public services, such as order and security, primary education, clean water, and healthcare, distributed equally according to socioeconomic position?

CLARIFICATION: This question asks if socio-economic position is an important cleavage in society for the distribution of public services. Thus, if there are inequalities in access to public services, but these are not mainly due to differentiation between particular socio-economic position, the code should be “4” (equal). The situation could of course vary by type of public service, such that a socio-economic group is denied access to some basic public services but not others. Please base your response on whether access to most of the aforementioned services are distributed equally or unequally.

RESPONSES:

0: Extreme. Because of poverty or low income, 75 percent (percent) or more of the population lack access to basic public services of good quality.

1: Unequal. Because of poverty or low income, 25 percent (percent) or more of the population lack access to basic public services of good quality.

2: Somewhat Equal. Because of poverty or low income, 10 to 25 percent (percent) of the population lack access to basic public services of good quality.

3: Relatively Equal. Because of poverty or low income, 5 to 10 percent (percent) of the population lack access to basic public services of good quality.

4: Equal. Because of poverty or low income, less than 5 percent (percent) of the population lack access to basic public services of good quality.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 9-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see V-Dem Methodology).

The situation could of course vary by type of public service, such that women are denied access to some basic public services but not others. Please base your response on whether access to most of the aforementioned services are distributed equally or unequally.

RESPONSES:

0: Extreme. Because of their gender, 75 percent (percent) or more of women lack access to basic public services of good quality.

1: Unequal. Because of their gender, 25 percent (percent) or more of women lack access to basic public services of good quality.

2: Somewhat Equal. Because of their gender, 10 to 25 percent (percent) of women lack access to basic public services of good quality.

3: Relatively Equal. Because of their gender, 5 to 10 percent (percent) of women lack access to basic public services of good quality.

4: Equal. Because of their gender, less than 5 percent (percent) of women lack access to basic public services of good quality.

2.3.16.8 Power distributed by urban-rural location (v2pepwrgeo)

Long tag: vdem_cy_v2pepwrgeo

Original tag: v2pepwrgeo

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Rachel Sigman

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Is political power distributed according to urban-rural location?

CLARIFICATION: Urban areas are defined as an area that meets the following conditions: population density exceeds a threshold of 150 persons per square kilometer, there is access to a sizeable settlement of 50,000 people or more within some reasonable travel time, for example 60 minutes by road. (World Development Report, 2009: 54)

RESPONSES:

0: People living in urban areas have a near-monopoly on political power.

1: People living in urban areas have a dominant hold on political power. Those living in rural areas have only marginal influence.

2: People living in urban areas have much more political power but those living in rural areas have some areas of influence.

3: People living in urban areas have somewhat more political power than those living in rural areas.

4: People living in any area have roughly equal political power or people living in rural areas

have more access to political power than those in urban areas.

5: People living in rural areas have much more political power but those living in urban areas have some areas of influence.

SCALE: Ordinal, converted to interval by the measurement model.

2.3.16.9 Urban-rural location equality in respect for civil liberties (v2clgeocl)

Long tag: vdem_cy_v2clgeocl

Original tag: v2clgeocl

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Rachel Sigman

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Do those who reside in rural areas enjoy same level of civil liberties as those residing in urban areas?

CLARIFICATION: This question specifies the extent to which the level of civil liberties is generally the same across geographic areas. Urban areas are defined as an area that meets the following conditions: population density exceeds a threshold of 150 persons per square kilometer, there is access to a sizeable settlement of 50,000 people or more within some reasonable travel time, for example 60 minutes by road (World Development Report, 2009: 54). Here, civil liberties are understood to include access to justice, private property rights, freedom of movement, and freedom from forced labor.

RESPONSES:

0: Those who live in rural areas enjoy much fewer civil liberties than residents of urban areas.

1: Those who live in rural areas enjoy substantially fewer civil liberties than residents of urban areas.

2: Those who live in rural areas enjoy moderately fewer civil liberties than residents of urban areas.

3: Those who live in rural areas enjoy slightly fewer civil liberties than residents of urban areas.

4: Residents of rural areas enjoy the same level of civil liberties as those in urban areas.

5: Residents of rural areas enjoy more civil liberties than those in urban areas.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 9-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see V-Dem Methodology).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

2.3.16.10 Access to public services distributed by urban-rural location (v2peapsgeo)

Long tag: vdem_cy_v2peapsgeo

Original tag: v2peapsgeo

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Rachel Sigman

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Is access to basic public services, such as order and security, primary education, clean water, and healthcare, distributed equally across urban and rural areas?

CLARIFICATION: Urban areas are defined as an area that meets the following conditions: population density exceeds a threshold of 150 persons per square kilometer, there is access to a sizeable settlement of 50,000 people or more within some reasonable travel time, for example 60 minutes by road. (World Development Report, 2009: 54). This question asks if geographic group is an important cleavage in society for the distribution of public services. Thus, if there are inequalities in access to public services, but these are not mainly due to differentiation between urban and rural areas, the code should be “4” (equal). The situation could of course vary by type of public service, such that a geographic group is denied access to some basic public services but not others. Please base your response on whether access to most of the aforementioned services are distributed equally or unequally.

RESPONSES:

0: Extreme. Because they live in rural areas, 75 percent (percent) or more of the population lack access to basic public services of good quality.

1: Unequal. Because they live in rural areas, 25 percent (percent) or more of the population lack access to basic public services of good quality.

2: Somewhat Equal. Because they live in rural areas, 10 to 25 percent (percent) of the population lack access to basic public services of good quality.

3: Relatively Equal. Because they live in rural areas, only 5 to 10 percent (percent) of the population lack access to basic public services of good quality.

4: Equal. Because they live in rural areas, less than 5 percent (percent) of the population lack access to basic public services of good quality.

5: Rural-Bias: Because they live in urban areas, 25percent or more of the population lack access to basic public services of good quality.

YEARS: 1900-2022

2.3.17 V-Dem Indicators - Legitimation

Instructions to the coders (as shown in the surveys)

Legitimation strategies:

Governments make legitimacy claims—provide justifications for the form of rule under which they govern. In the following section we are interested in the nature of the legitimacy claims made by the sitting government. Please note that the government's claims to legitimacy - their legitimation strategies - are the object of inquiry here. We are not asking you to assess how ordinary people judge the legitimacy of their rulers. Do not assume that governments make legitimacy claims on only one basis. We are interested in multi-track and hybrid legitimation strategies. The regime is understood as a set of formal and/or informal rules that govern the choice of political leaders and their exercise of power. The government is understood as the chief executive along with the cabinet, ministries, and top civil servants.

2.3.17.1 Ideology (v2exl_legitideol)

Long tag: vdem_cy_v2exl_legitideol

Original tag: v2exl_legitideol

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Marcus Tannenber

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: To what extent does the current government promote a specific ideology or societal model (an officially codified set of beliefs used to justify a particular set of social, political, and economic relations; for example, socialism, nationalism, religious traditionalism, etc.) in order to justify the regime in place?

RESPONSES:

0: Not at all.

1: To a small extent.

2: To some extent but it is not the most important component.

3: To a large extent but not exclusively.

4: Almost exclusively.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 9-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see V-Dem Methodology).

 YEARS: 1900-2022

2.3.17.4 Rational-legal legitimation (v2exl_legitratio)

Long tag: vdem_cy_v2exl_legitratio

Original tag: v2exl_legitratio

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Marcus Tannenberg

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: To what extent does the current government refer to the legal norms and regulations in order to justify the regime in place?

CLARIFICATION: This question pertains to legal norms and regulations as laid out for instance in the constitution regarding access to power (e.g. elections) as well as exercise of power (e.g. rule of law). Electoral regimes may score high on this question as well as non-electoral regimes that emphasize their rule-boundedness.

RESPONSES:

0: Not at all.

1: To a small extent.

2: To some extent but it is not the most important component.

3: To a large extent but not exclusively.

4: Almost exclusively.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 9-13.

2.3.18 V-Dem Indicators - Civic and Academic Space

Instructions to the coders (as shown in the surveys)

Civic and Academic Space:

In this survey, we ask you to assess several issues concerning the space for and state of civil society and academia. First, we ask about some general issues such as polarization and peaceful assembly. Then, we probe into mobilization for mass events and associations. Finally, we ask you to consider questions related to academia.

2.3.18.1 Political polarization (v2cacamps)

Long tag: vdem_cy_v2cacamps

Original tag: v2cacamps

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Sebastian Hellmeier

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Is society polarized into antagonistic, political camps?

CLARIFICATION: Here we refer to the extent to which political differences affect social relationships beyond political discussions. Societies are highly polarized if supporters of opposing political camps are reluctant to engage in friendly interactions, for example, in family functions, civic associations, their free time activities and workplaces

RESPONSES:

0: Not at all. Supporters of opposing political camps generally interact in a friendly manner.

1: Mainly not. Supporters of opposing political camps are more likely to interact in a friendly than a hostile manner.

2: Somewhat. Supporters of opposing political camps are equally likely to interact in a friendly or hostile manner.

3: Yes, to noticeable extent. Supporters of opposing political camps are more likely to interact in a hostile than friendly manner.

4: Yes, to a large extent. Supporters of opposing political camps generally interact in a hostile manner.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 10-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1900-2022

2.3.18.2 Political violence (v2caviol)

Long tag: vdem_cy_v2caviol

Original tag: v2caviol

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Katrin Kinzelbach

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: How often have non-state actors used political violence against persons this year?

CLARIFICATION: We understand political violence as the use of physical force to achieve political objectives by non-state actors. The restriction to political objectives excludes profit-driven crime-related violence, for instance. By non-state actors we refer to individuals or entities that are not formally part of the state. Thus, politically oriented militias and youth groups count as non-state actors even though they might potentially be informally affiliated with the ruling party or the state. Political violence against persons excludes psychological and symbolic violence (e.g. destruction of objects).

RESPONSES:

0: Not at all. Non-state actors did not use political violence.

1: Rare. Non-state actors rarely used political violence.

2: Occasionally. Non-state actors occasionally used political violence.

3: Frequently. Non-state actors frequently used political violence.

4: Often. Non-state actors often used political violence.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 10-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1900-2022

2.3.18.3 Freedom of peaceful assembly (v2caassemb)

Long tag: vdem_cy_v2caassemb

Original tag: v2caassemb

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Katrin Kinzelbach

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: To what extent do state authorities respect and protect the right of peaceful assembly?

CLARIFICATION: This question focuses on the ability to assemble publically in practice. An assembly is “an intentional and temporary presence of a number of individuals in a public place, for a common expressive purpose” (ODIHR and Venice Commission of the Council of Europe 2010). Authorities may limit the right to assembly only if limitations are necessary in the interests of national security or public safety, public order, the protection of public health or morals, or the protection of the rights and freedoms of others, and are lawful, necessary, and proportionate to the aim pursued. Such reasonable and legal restrictions should not be considered when answering. However, if there is evidence that restrictions are used as a pretext for political reasons, this evidence should be considered.

RESPONSES:

0: Never. State authorities do not allow peaceful assemblies and are willing to use lethal force to prevent them.

1: Rarely. State authorities rarely allow peaceful assemblies, but generally avoid using lethal force to prevent them.

2: Sometimes. State authorities sometimes allow peaceful assemblies, but often arbitrarily deny citizens the right to assemble peacefully.

3: Mostly. State authorities generally allow peaceful assemblies, but in rare cases arbitrarily deny citizens the right to assemble peacefully.

4: Almost always. State authorities almost always allow and actively protect peaceful assemblies except in rare cases of lawful, necessary, and proportionate limitations.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 10-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1900-2022

2.3.18.4 State of emergency (v2casoe)

Long tag: vdem_cy_v2casoe

Original tag: v2casoe

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Katrin Kinzelbach

ADDITIONAL VERSIONS: *_nr

QUESTION: Was a national state of emergency in place at any point this year?

CLARIFICATION: A state of emergency is a formal legal act that enables state actors and institutions to change their roles during times of international or domestic crisis. Our definition of state of emergency includes the application of martial law. If there was more than one state of emergency, code the one that was in place for the longer time. Select one option.

RESPONSES:

0: The legal framework does not allow for a declaration of a national state of emergency. (0=No, 1=Yes) [v2casoe_0]

1: There was no state of emergency in place at any point this year, even though provisions for a declaration of a national state of emergency exist. (0=No, 1=Yes) [v2casoe_1]

2: A national state of emergency was in place due to a natural disaster. (0=No, 1=Yes) [v2casoe_2]

3: A national state of emergency was in place due to a terrorist attack. (0=No, 1=Yes) [v2casoe_3]

4: A national state of emergency was in place due to an armed conflict/war, domestically or internationally. (0=No, 1=Yes) [v2casoe_4]

5: A national state of emergency was in place due to mass protest/popular uprising. (0=No, 1=Yes) [v2casoe_5]

6: A national state of emergency was in place for reasons other than those listed above. (0=No, 1=Yes) [v2casoe_6]

SCALE: Series of dichotomous scales.

DATA RELEASE: 10-13.

CROSS-CODER AGGREGATION: Mean.

CITATION: *V-Dem Codebook* (see suggested citation at the top of this document).

2.3.18.5 Mass mobilization (v2cagenmob)

Long tag: vdem_cy_v2cagenmob

Original tag: v2cagenmob

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Sebastian Hellmeier

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: In this year, how frequent and large have events of mass mobilization been?

CLARIFICATION: This question concerns the mobilization of citizens for mass events such as demonstrations, strikes and sit-ins. These events are typically organized by non-state actors, but the question also concerns state-orchestrated rallies (e.g. to show support of an autocratic government).

RESPONSES:

0: There have been virtually no events.

1: There have been several small-scale events.

2: There have been many small-scale events.

3: There have been several large-scale and small-scale events.

4: There have been many large-scale and small-scale events.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 10-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

2.3.18.6 Mass mobilization concentration (v2caconmob)

Long tag: vdem_cy_v2caconmob

Original tag: v2caconmob

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Sebastian Hellmeier

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Were mass mobilization events concentrated in the capital?

CLARIFICATION: This question is about the geographic location of the events and not their intensity. In the unlikely event that no event at all took place, code option 2. This question concerns the mobilization of citizens for mass events such as demonstrations, strikes and sit-ins. These events are typically organized by non-state actors, but the question also concerns state-orchestrated rallies (e.g. to show support of an autocratic government).

RESPONSES:

0: Yes. Events of mass mobilization were much more frequent in the capital.

1: Somewhat. Events of mass mobilization were somewhat more frequent in the capital.

2: No. Events of mass mobilization were as common in many cities across the country as in the capital or did not take place at all.

3: No. Events of mass mobilization were more common in cities other than the capital.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 10-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1900-2022

CONVERGENCE: Model parameters with convergence issues: universal thresholds.

2.3.18.7 Mobilization for democracy (v2cademmob)

Long tag: vdem_cy_v2cademmob

Original tag: v2cademmob

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Sebastian Hellmeier

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: In this year, how frequent and large have events of mass mobilization for pro-democratic aims been?

CLARIFICATION: Events are pro-democratic if they are organized with the explicit aim to advance and/or protect democratic institutions such as free and fair elections with multiple parties, and courts and parliaments; or if they are in support of civil liberties such as freedom of association and speech. This question concerns the mobilization of citizens for mass events such as demonstrations, strikes and sit-ins.

RESPONSES:

0: There have been virtually no events.

1: There have been several small-scale events.

2: There have been many small-scale events.

3: There have been several large-scale and small-scale events.

4: There have been many large-scale and small-scale events.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 10-13.

2.3.18.8 Mobilization for autocracy (v2caautmob)

Long tag: vdem_cy_v2caautmob

Original tag: v2caautmob

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Sebastian Hellmeier

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: In this year, how frequent and large have events of mass mobilization for pro-autocratic aims been?

CLARIFICATION: Events are pro-autocratic if they are organized explicitly in support of non-democratic rulers and forms of government such as a one-party state, monarchy, theocracy or military dictatorships. Events are also pro-autocratic if they are organized in support of leaders that question basic principles of democracy, or are generally aiming to undermine democratic ideas and institutions such as the rule of law, free and fair elections, or media freedom. This question concerns the mobilization of citizens for mass events such as demonstrations, strikes, sit. These events are typically organized by non-state actors, but the question also concerns also count state-orchestrated rallies (e.g. to show support of an autocratic government).

RESPONSES:

0: There have been virtually no events.

1: There have been several small-scale events.

2: There have been many small-scale events.

3: There have been several large-scale and small-scale events.

4: There have been many large-scale and small-scale events.

2.3.18.9 Engagement in state-administered mass organizations (v2castate)

Long tag: vdem_cy_v2castate

Original tag: v2castate

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Sebastian Hellmeier

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: What share of the population is regularly active in state-administered mass associations, such as women, worker or youth leagues?

CLARIFICATION: State-administered mass associations are civilian organizations created and led by the government or the ruling party. Large shares of specific societal groups are voluntary or compulsory members of these associations. Examples include youth leagues such as the Hitlerjugend in Nazi Germany and the pioneers in the Soviet Union, women leagues such as the Women's Federation in China or the Federacion de Mujeres Cubanas and official trade unions in the Soviet Union. Such organizations are formally or informally affiliated with the state and/or with the ruling party. We consider an individual as active if they attend a meeting, activity or event at least twice a year.

RESPONSES:

0: Virtually no one.

1: A small share of the population (less than 5percent).

2: A moderate share of the population (about 5 to 15 percent).

3: A large share of the population (about 16 percent to 25percent).

4: A very large share of the population (about 26percent or more).

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 10-13.

VARIABLE TYPE: C

PROJECT MANAGER(S): Sebastian Hellmeier

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: What share of the population is regularly active in independent non-political associations, such as sports clubs, literary societies, charities, fraternal groups, or support groups?

CLARIFICATION: Non-political associations include all associations whose main purpose is not the change of policy or practice at the state or societal level. It does NOT include political parties, or trade unions. An organization is independent if it is not controlled by the state or the ruling party and membership is voluntary. We consider an individual as active if they attend a meeting activity or event at least twice a year.

RESPONSES:

0: Virtually no one.

1: A small share of the population (less than 5percent).

2: A moderate share of the population (about 5 to 15 percent).

3: A large share of the population (about 16 percent to 25percent).

4: A very large share of the population (about 26percent or more).

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 10-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

2.3.18.16 Freedom to research and teach (v2cafres)

Long tag: vdem_cy_v2cafres

Original tag: v2cafres

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Katrin Kinzelbach, Ilyas Saliba, Janika Spannagel

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: To what extent are scholars free to develop and pursue their own research and teaching agendas without interference?

CLARIFICATION: Examples of interference include research agendas or teaching curricula being drafted, restricted, or fully censored by a non-academic actor; scholars being externally induced, through possible reprisals, to self-censor; or the university administration abusing its position of power to impose research or teaching agendas on individual academics. It also includes public pressure on academics - offline and online. We do not consider as interference restrictions that are due to research priorities, as well as ethical and quality standards, freely defined by the scholarly community as well as the development of standardized curricula by academics that aim to structure and enhance teaching.

RESPONSES:

0: Completely restricted. When determining their research agenda or teaching curricula, scholars are, across all disciplines, consistently subject to interference or incentivized to self-censor.

1: Severely restricted. When determining their research agenda or teaching curricula, scholars are, in some disciplines, consistently subject to interference or incentivized to self-censor.

2: Moderately restricted. When determining their research agenda or teaching curricula, scholars are occasionally subject to interference or incentivized to self-censor.

3: Mostly free. When determining their research agenda or teaching curricula, scholars are rarely subject to interference or incentivized to self-censor.

4: Fully free. When determining their research agenda or teaching curricula, scholars are not subject to interference or incentivized to self-censor.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 10-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Spannagel and Kinzelbach (2022); Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

2.3.18.17 Freedom of academic exchange and dissemination (v2cafexch)

Long tag: vdem_cy_v2cafexch

Original tag: v2cafexch

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Katrin Kinzelbach, Ilyas Saliba, Janika Spannagel

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: To what extent are scholars free to exchange and communicate research ideas and findings?

CLARIFICATION: Free academic exchange includes uncensored access to research material, unhindered participation in national or international academic conferences, and the uncensored publication of academic material. Free dissemination refers to the unrestricted possibility for scholars to share and explain research findings in their field of expertise to non-academic audiences through media engagement or public lectures.

RESPONSES:

0: Completely restricted. Academic exchange and dissemination is, across all disciplines, consistently subject to censorship, self-censorship or other restrictions.

1: Severely restricted. Academic exchange and dissemination is, in some disciplines, consistently subject to censorship, self-censorship or other restrictions.

2: Moderately restricted. Academic exchange and dissemination is occasionally subject to censorship, self-censorship or other restrictions.

3: Mostly free. Academic exchange and dissemination is rarely subject to censorship, self-censorship or other restrictions.

4: Fully free. Academic exchange and dissemination is not subject to censorship, self-censorship or other restrictions.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 10-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Spannagel and Kinzelbach (2022); Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1900-2022

2.3.18.18 Institutional autonomy (v2cainsaut)

Long tag: vdem_cy_v2cainsaut

Original tag: v2cainsaut

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Katrin Kinzelbach, Ilyas Saliba, Janika Spannagel

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: To what extent do universities exercise institutional autonomy in practice?

CLARIFICATION: Institutional autonomy “means the independence of institutions of higher education from the State and all other forces of society, to make decisions regarding its internal government, finance, administration, and to establish its policies of education, research, extension work and other related activities” (Lima Declaration). Note that institutional autonomy does not preclude universities from accepting state or third party funding, but does require that they remain in charge of all types of decisions listed above. Institutional autonomy does also not preclude a public oversight role by the state over universities’ spending of public funds.

RESPONSES:

0: No autonomy at all. Universities do not exercise any degree of institutional autonomy; non-academic actors control decision-making.

1: Minimal autonomy. Universities exercise only very limited institutional autonomy; non-academic actors interfere extensively with decision-making.

2: Moderate autonomy. Universities exercise some institutional autonomy; non-academic actors interfere moderately with decision-making.

3: Substantial autonomy. Universities exercise institutional autonomy to a large extent; non-academic actors have only rare and minimal influence on decision-making.

4: Complete autonomy. Universities exercise complete institutional autonomy from non-academic actors.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 10-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Spannagel and Kinzelbach (2022); Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

CONVERGENCE: Model parameters with convergence issues: universal thresholds.

2.3.18.19 Campus integrity (v2casurv)

Long tag: vdem_cy_v2casurv

Original tag: v2casurv

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Katrin Kinzelbach, Ilyas Saliba, Janika Spannagel

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: To what extent are campuses free from politically motivated surveillance or security infringements?

CLARIFICATION: “Campus” refers to all university buildings as well as digital research and teaching platforms. Campus integrity means the preservation of an open learning and research environment marked by an absence of an externally induced climate of insecurity or intimidation on campus. Examples of infringements of campus integrity are politically motivated on-campus or digital surveillance, presence by intelligence or security forces, presence of student militias, or violent attacks by third parties, if specifically targeting universities to repress academic life on campus. Note that we are only interested in politically motivated infringements and targeted attacks on campus integrity, not in non-political security concerns or proportionate security measures taken on campus to address these.

RESPONSES:

0: Completely restricted. Campus integrity is fundamentally undermined by extensive surveillance and severe intimidation, including violence or closures.

1: Severely restricted. Campus integrity is to a large extent undermined by surveillance and intimidation, at times including violence or closures.

2: Moderately restricted. Campus integrity is challenged by some significant cases of surveillance or intimidation.

3: Mostly free. Campus integrity is to a large extent respected, with only minor cases of surveillance or intimidation.

4: Fully free. Campus integrity is comprehensively respected; there are no cases of surveillance or intimidation.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 10-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Spannagel and Kinzelbach (2022); Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

2.3.18.20 Academics as critics (v2cacritic)

Long tag: vdem_cy_v2cacritic

Original tag: v2cacritic

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Katrin Kinzelbach, Ilyas Saliba, Janika Spannagel

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: To what extent do scholars and university students publicly criticize government policies?

CLARIFICATION: This question is only about the extent scholars and students actually criticize government policies – irrespective of how free they are to do so and whether they are met with repression or not. We ask you simply to consider to what extent scholars and

students are noticeable as government critics in the public discourse.

Public criticism of government policies can be conveyed for example through the publication of op-eds or social media posts on current affairs, the signing of open letters or petitions, the taking part in or organization of public protests, or the holding of critical lectures to students or the public.

RESPONSES:

0: Not at all. Scholars and university students do not publicly express criticism of government policies.

1: To a small extent. Scholars and university students publicly express minor criticism of government policies.

2: To a moderate extent. Scholars and university students publicly express moderate criticism of government policies.

3: To a large extent. Scholars and university students publicly express substantive criticism of government policies.

4: To a major extent. Scholars and university students publicly express fundamental criticism of government policies.

SCALE: Ordinal, converted to interval by the measurement model.

2.3.18.21 International legal commitment to academic freedom (v2caacadfree)

Long tag: vdem_cy_v2caacadfree

Original tag: v2caacadfree

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: <https://treaties.un.org>

Description:

VARIABLE TYPE: A

PROJECT MANAGER(S): Katrin Kinzelbach, Alicja Polakiewicz, Janika Spannagel

QUESTION: Is the state party to the International Covenant on Economic, Social and Cultural Rights (ICESCR) without reservations to article 15 (right to science)?

CLARIFICATION: This indicator captures the country's international legal commitment to academic freedom. It indicates whether the country is party to the International Covenant on Economic, Social and Cultural Rights without having made explicit reservations to its article 15 (right to science), which stipulates, among other things, that states parties "undertake to respect the freedom indispensable for scientific research".

RESPONSES:

0: State not a party to ICESCR, or made reservations to article 15.

1: State is party to ICESCR without reservations to article 15, but treaty not yet in force.

2: ICESCR in force and signed without reservations to article 15.

3: ICESCR in force and ratified without reservations to article 15.

SCALE: Ordinal.

SOURCE(S): <https://treaties.un.org/>

NOTES: Coded is the ratification status as of December 31st of each year.

DATA RELEASE: 10-13.

2.3.19 Historical V-Dem - Elections

This part of the codebook contains variables pertaining to the Historical V-Dem data collection. A maximum of 91 countries are included in the sample (see the country table), but some variables (in particular C type variables) cover fewer countries, as coding is still ongoing. For more information on the Historical V-Dem project, please refer to the Organization and Management document (<https://www.v-dem.net/static/website/img/refs/orgmanv111.pdf>) or the Historical V-Dem page: <https://www.v-dem.net/hdata.html>. The vast majority of questions coded by Historical V-Dem are V-Dem indicators previously coded back to 1900, and these indicators are found in other sections of the codebook with merged time series extending all the way from 1789 to the present.

The *Historical V-Dem Elections*- section includes new A, A* and C type indicators that have (at least so far) only been coded for Historical V-Dem, with the modal time series spanning the years 1789-1920 (although time series coverage is different for some variables). This section also includes v3elcomvot, which is coded as a type C variable in Historical V-Dem, while v2elcomvot is coded as a type A variable in Contemporary V-Dem.

For instructions given to the coders (as shown in the surveys), please see introductions to the corresponding theme in the corresponding V-Dem Indicators section.

2.3.19.1 Minimum candidate age lower chamber (v3canagelc)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Daniel Ziblatt

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Is there a large discrepancy in the vote/seat ratio across electoral districts for the lower (or unicameral) chamber?

CLARIFICATION: "Malapportionment" characterizes a situation in which voters in some districts have more power by virtue of a more favorable vote/seat ratio. For example, if seats have not been reapportioned in a long time rural areas may be over-represented relative to urban areas simply because the latter have grown more rapidly than the former. (This question does not address inequality of votes based on class or other criteria.) Leave blank if there is no lower (or unicameral) chamber.

RESPONSES:

0: There is a high degree of malapportionment. Vote/seat ratios across districts differ by as

much as 50:1.

1: There is a substantial degree of malapportionment. *Vote/seat* ratios across districts differ as much as 10:1.

2: There is some degree of malapportionment. *Vote/seat* ratios across districts differ by as much as 2:1.

3: There is modest or no malapportionment. *Vote/seat* ratios across districts differ by less than 2:1.

SCALE: Ordinal, converted to interval by the measurement model.

2.3.19.27 Suffrage exclusions (de jure) lower (unicameral) chamber (v3elvstrlc)*Long tag:* vdem_cy_v3elvstrlc*Original tag:* v3elvstrlc*Dataset citation:* Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)*Description:*

VARIABLE TYPE: A

PROJECT MANAGER(S): Svend-Erik Skaaning

QUESTION: Is the right to vote for the lower (or unicameral) chamber of the national parliament restricted for any of the following reasons?

CLARIFICATION: This question applies to citizens only and to legal (*de jure*) restrictions, not restrictions that may be operative in practice (*de facto*).

It applies to direct elections and not indirect elections (except situations where the electors are merely executing the will of the voters such as US presidential elections after 1800).

If there is variation across regions of a country, for each category try to estimate the modal (most common) category. Thus, if most regions of a country imposed restrictions based on property, choose answer #2.

Leave blank if there is no lower (or unicameral) parliament.

RESPONSES:

0: Literacy [v3elvstrlc_0]

1: Property [v3elvstrlc_1]

2: Income [v3elvstrlc_2]

YEARS: 1790-1920

2.3.20 Historical V-Dem - Political Parties

This part of the codebook contains variables pertaining to the Historical V-Dem data collection. A maximum of 91 countries are included in the sample (see the country table), but some variables (in particular C type variables) cover fewer countries, as coding is still ongoing. For more information on the Historical V-Dem project, please refer to the Organization and Management document (<https://www.v-dem.net/static/website/img/refs/orgmanv111.pdf>) or the Historical V-Dem page: <https://www.v-dem.net/hdata.html>. The vast majority of questions coded by Historical V-Dem are V-Dem indicators previously coded back to 1900, and these indicators are found in other sections of the codebook with merged time series extending all the way from 1789 to the present.

The *Historical V-Dem - Political Parties*- section includes new A, A* and C type indicators that

have (at least so far) only been coded for Historical V-Dem, with the modal time series spanning the years 1789-1920 (although time series coverage is different for some variables). This section also includes `v3elcomvot`, which is coded as a type C variable in Historical V-Dem, while `v2elcomvot` is coded as a type A variable in Contemporary V-Dem.

For instructions given to the coders (as shown in the surveys), please see introductions to the corresponding theme in the corresponding V-Dem Indicators section.

2.3.20.1 Party identification (`v3partyid`)

Long tag: `vdem_cy_v3partyid`

Original tag: `v3partyid`

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): John Gerring

ADDITIONAL VERSIONS: *_nr

QUESTION: Do voters identify with a political party?

CLARIFICATION: When party identification is strong, vote choice is largely determined by a voter's party affiliation (and his/her affiliation with that party) rather than attachments to particular candidates, non-partisan issue-positions, or material incentives (*e.g.*, vote-buying). Likewise, when party identification is strong, voters retain loyalty to a single party rather than switching from one party to another across elections or across offices in the same election (ticket-splitting). In this fashion we can somewhat crudely distinguish between partisans and non-partisans. Note that this question refers only to voters, not to members of the population who do not vote (because they are disenfranchised, choose not to vote, or are discouraged from voting). Leave this question blank if there are no national elections.

RESPONSES:

0: There are national elections, but there are no political parties.

1: Only one party is allowed to participate in national elections.

2: More than one party participates, and nearly all voters are non-partisans.

3: More than one party participates, and most voters are non-partisans.

4: More than one party participates, and voters are equally divided between partisans and non-partisans.

5: More than one party participates, and most voters are partisans.

6: More than one party participates, and nearly all voters are partisans.

SCALE: Nominal, but categories 2–6 constitute ordinal.

DATA RELEASE: 8-13.

2.3.21.1 Lower chamber budget (v3lgbudglo)

Long tag: vdem_cy_v3lgbudglo

Original tag: v3lgbudglo

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): John Gerring

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Is the lower chamber of the legislature required to approve the budget?

CLARIFICATION: The budget refers to major revenue (appropriations) and expenditure (spending) bills. Typically, these are passed annually or bi-annually. Approval is understood to mean a formal vote on the floor of the chamber in which at least 50percent of those voting approve the measure.

RESPONSES:

0: No. Includes situations in which (a) there are no formal budget bills, or (b) the executive entirely by-passes the lower house or ignores its actions.

1: Yes. Includes situations in which (a) the executive exercises selective (quot;line-itemquot;) vetoes, and (b) there is a prolonged period in which no budget is passed and the executive is unable to raise and spend money, or must operate under the terms of the previous budget.

SCALE: Dichotomous

2.3.21.5 Upper chamber in session (v3lginsesup)

Long tag: vdem_cy_v3lginsesup

Original tag: v3lginsesup

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): John Gerring, Carl Henrik Knutsen

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: During the year, for how long was the upper chamber of the legislature in session?

CLARIFICATION: If there is only one session during the year, your answer should reflect the length of this session. If there are multiple sessions, your answer should reflect the total time spent in session, adding together the length of all sessions during the year.

RESPONSES:

0: It did not convene at all during the year.

1: It did convene, and was in session for less than 1 month, in total.

2: It did convene, and was in session for 1-2 months, in total.

3: It did convene, and was in session for 3-5 months, in total.

4: It did convene, and was in session for 6-8 months, in total.

5: It did convene, and was in session for 9 months or more, in total.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 8-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CLEANING: Set to missing when v3lgbicam is 0 or 1

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

2.3.21.6 Lower chamber quota for social groups (v3lgqumin)

Long tag: vdem_cy_v3lgqumin

Original tag: v3lgqumin

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: <https://www.constituteproject.org>, <http://countrystudies.us>, <https://en.wikipedia.org>

Description:

VARIABLE TYPE: A

PROJECT MANAGER(S): John Gerring

QUESTION: Is there a national-level quota for any social groups in the lower (or unicameral) chamber of the legislature?

CLARIFICATION: These quotas are sometimes informally known as "minority quotas." Do not record gender quotas here (as gender is not part of what we mean by a social group). Also, do not include special rules that benefit parties defined by social group but do not guarantee seats for these groups. For example, do not count a rule exempting parties from threshold requirements. Code "yes" only if the groups covered by the quota have full voting rights in the legislature.

RESPONSES:

0: No national level quota for any social group.

1: Yes, there are reserved seats for at least one social group.

SCALE: Dichotomous

2.3.23.1 Labor rights (v3cllabrig)

Long tag: vdem_cy_v3cllabrig

Original tag: v3cllabrig

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): John Gerring

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Does labor enjoy the right to organize freely and bargain collectively?

CLARIFICATION: Refers to actual practice not formal (*de jure*) rights. If practices vary across the country, or across sectors, please consider the overall situation of labor.

RESPONSES:

0: Independent labor unions (free from state or ruling party control) are not allowed.

1: Independent labor unions are allowed, at least in some sectors of the economy or some sections of the country. However, they are subject to harassment by the police, paramilitary groups, business associations, or other groups. Harassment refers to systematic beatings, imprisonment, outlawing of specific unions, and other actions that seriously impinge upon the ability of unions to organize and bargain collectively.

2: Independent labor unions are allowed and they do not face violent repression but the legal climate is not friendly (*e.g.*, "closed shop"; rules are widespread), making it difficult to organize and bargain collectively.

3: Independent labor unions are allowed and may organize freely in all sectors of the economy.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 8-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

2.3.24.1 Census (v3stcensus)

Long tag: vdem_cy_v3stcensus

Original tag: v3stcensus

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Brambor et al. (2016), Various country-specific sources

Description:

VARIABLE TYPE: A

PROJECT MANAGER(S): Jan Teorell, Thomas Brambor, Agustín Goenaga, Johannes Lindvall

QUESTION: Was there a national census in this year?

CLARIFICATION: In order to count as a "census", the following four criteria needs to be satisfied:

1. UNIVERSALITY: the census attempted to cover the entire population and not just a sample.

2. INDIVIDUAL ENUMERATION: the census enumerates each individual separately and records his or her characteristics separately. If the census only produces aggregate or summarised information, it is only a population count and should not count as a census. For example, A population count of a household with 4 people would produce the following results:

Age—Adults: 2; Children: 2

Sex—Males: 2; Females: 2

Instead, an individual enumeration would look like this:

Head of household-male-adult

Spouse-female-adult

Son-male-child

Daughter-female-child

The key difference is that only in the individual enumeration the data on various characteristics can be cross-tabulated.

3. DEFINED TERRITORY: The territory covered, along with any changes in its area is clearly stated.

4. SIMULTANEITY AND SPECIFIED TIME: Each person is enumerated as nearly as possible to the same well-defined point in time, and the collected data should refer to a well-defined reference period.

Code "1" if a national census was completed in this year – but not if it was aborted or was not national in scope.

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Agnes Cornell

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: To what extent are day-to-day decisions made by state administrators subject to intervention from political elites?

CLARIFICATION: By political elites we mean members of the executive, members of the legislature and political elites at local and regional levels. Note that the focus on the day-to-day decisions of the state administration implies interference in specific operational decisions in a meticulous manner. Decisions taken by rulers about the general direction of the state administration should not be considered. Note that the question refers to the *de facto* situation.

RESPONSES:

0: Constantly. Day-to-day decisions taken by state administrators are constantly subject to intervention.

1: Often. Day-to-day decisions in the state administration are often subject to intervention.

2: About half. Approximately half of the day-to-day decisions in the state administration are subject to intervention.

3: Occasionally. Day-to-day decisions in the state administration are occasionally subject to intervention.

4: Never, or hardly ever. Day-to-day decisions in the state administration are never or hardly ever subject to intervention.

RESPONSES:

0: No. All ballots are counted equally, regardless of social group. [v3equavouc_0]

1: Yes. There is a curial/estate voting system where voters are separated into categories by, for example, class criteria and assigned a disproportionate numbers of deputies. [v3equavouc_1]

2: Yes. There is census/plural vote for particular groups (*e.g.*, votes cast by individuals with higher incomes or tax contributions are given more weight) [v3equavouc_2]

3: Yes. Some voters are allowed to vote in several constituencies. [v3equavouc_3]

2.3.26 Historical V-Dem - Historical V-Dem Modified

This part of the codebook contains variables pertaining to the Historical V-Dem data collection. A maximum of 91 countries are included in the sample (see the country table), but some variables (in particular C type variables) cover fewer countries, as coding is still ongoing. For more information on the Historical V-Dem project, please refer to the Organization and Management document (<https://www.v-dem.net/static/website/img/refs/orgmanv111.pdf>) or the Historical V-Dem page: <https://www.v-dem.net/hdata.html>. The vast majority of questions coded by Historical V-Dem are V-Dem indicators previously coded back to 1900, and these indicators are found in other sections of the codebook with merged time series extending all the way from 1789 to the present.

V-Dem indicators that are different to their contemporary counterparts, for the purpose of gathering additional relevant information for the historical period in Historical V-Dem. These variables are also merged into their v2 equivalents.

First, In contrast to contemporary V-Dem, Historical V-Dem codes upper chamber elections and thus also includes eltype category 2. Those observations are treated as missing in the historical-contemporary merged version of v2eltype. Due to election specific variables being cleaned by v2eltype, these do not include upper chamber elections either. In order to include historical data on upper chamber elections we thus also provide v3eltype and v3 election specific variables that are cleaned by v3eltype.

Second, Historical V-Dem codes additional chambers compared to contemporary V-Dem. When merging v2lgbicam and v3lgbicam the categories get recoded as follows:

- Categories 3 (tricameral) and 4 (quadricameral) become category 2 for the merged v2lgbicam.
- Category 9 (Other types of legislature) becomes category 0 for the merged v2lgbicam.

In order to include historical data on additional chambers, we thus also provide v3lgbicam and v3 chamber specific variables that are cleaned by v3lgbicam.

2.3.26.1 Lower chamber electoral system (v3elloelsy)

Long tag: vdem_cy_v3elloelsy

Original tag: v3elloelsy

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Golder (2006), Kollman et al. (2011), Nohlen (2005), Nohlen et al. (2002), Nohlen & Stöver (2010), Nohlen et al. (1999), Chronicle of Parliamentary Elections (IPU), IDEA, IFES, various country-specific sources

Description:

VARIABLE TYPE: A

PROJECT MANAGER(S): Carl Henrik Knutsen

QUESTION: What was the electoral system used in this election for the lower or unicameral chamber of the legislature?

CLARIFICATION: Further information on the following electoral system types can be found in Reynolds/Reilly, The New International IDEA Handbook (2005), chapter two and Annex B (Glossary of Terms) – downloadable, free of charge, at www.idea.int/publications/esd/.

RESPONSES:

0: First-past-the-post (FPP, aka plurality) in single-member constituencies. The candidate with the most votes wins the seat.

1: Two-round system in single-member constituencies. Like FPP except that a threshold — usually 50percent + 1 — is required to avoid a runoff between the two top vote-getters.

2: Alternative vote in single-member districts. Voters rank-order their preferences for the

candidates who compete for a single seat. If any candidate receives an absolute majority of first preferences, s/he is elected. If not, then the least successful candidates (based on first-preferences) are eliminated and their votes reallocated to the second-preferences. This process is repeated until a candidate reaches 50percent +1 of the votes.

3: Block vote in multi-member districts. Electors have as many votes as there are seats within that district and can rank-order them (within or across parties) as they please.

4: Party block vote in multi-member districts. Voters cast a vote for a single party (but not for individual candidates within the party's list). The party with the most votes (*i.e.*, a plurality) wins all the seats in that district.

5: Parallel (SMD/PR). Some seats are in single-member districts (allocated by FPP or two-round electoral rules) and other seats are in multimember districts (allocated by some form of PR). These districts are overlapping, meaning that each elector votes twice: once in the single-member district race and once in the multi-member district race. Results are independent.

6: Mixed-member proportional (SMD with PR compensatory seats). Some seats are in single-member districts (allocated by FPP or two-round electoral rules) and other seats are in multimember districts (allocated by some form of PR). These districts are overlapping, meaning that each elector votes twice: once in the single-member district race and once in the multi-member district race. Results are not independent. Specifically, the multimember seats are used to rectify disproportionalities achieved in the single-member district election — by adding seats, as necessary. This means that the representation of parties in the legislature is determined entirely by the PR ballot. It also means that the result of an MMP election is similar to the result of a PR election: parties achieve representation according to their nationwide vote share (on the PR ballot)

7: List PR with small multi-member districts (mean district size ≤ 7). Each party presents a list of candidates for election within a district. Electors vote for a party, and parties receive seats in (rough) proportion to their overall share of the vote. Mean district size is less than seven.

8: List PR with large multi-member districts (mean district size > 7). Each party presents a list of candidates for election within a district. Electors vote for a party, and parties receive seats in (rough) proportion to their overall share of the vote. Mean district size is greater than seven.

9: Single-transferable vote (STV) in multi-member districts. Electors rank-order candidates nominated for a district. Candidates that surpass a specified quota of first-preference votes are elected. The remaining seats are chosen by reallocating the votes of the least successful candidates to elector's second- (or third-) preferences until the specified quota is reached. This process is repeated until all seats for that district are filled.

10: Single non-transferable vote (SNTV) in multi-member districts. Each elector chooses a single candidate. The candidates with the most votes (a plurality) win. (The number of winners is of course determined by the size of the district.)

11: Limited vote in multi-member districts.

Electors have more than one vote but fewer votes than the number of seats in the district. The candidates with the most votes (a plurality) win. (The number of winners is of course determined by the size of the district.)

12: Borda Count in single- or multi-member districts. Electors use numbers to mark preferences among candidates and each preference is assigned a value. For example, in a ten-candidate field a first preference is worth one, a second preference is worth .9, and so forth. These are summed and the candidate(s) with the highest total(s) is/are elected.

Description:

VARIABLE TYPE: A

PROJECT MANAGER(S): Carl Henrik Knutsen

QUESTION: Did control of the lower (or unicameral) chamber of the legislature change as a result of this election, according to official results?

RESPONSES:

0: No. The majority party or ruling coalition includes the same or substantially the same parties, even if some minor parties (holding less than 10 percent of the seats in the legislature) left or joined the coalition, or because the elections do not affect the lower chamber.

1: Half. A minority party or coalition who was not in control of the chamber before the elections assumed the leading position in the legislature but is dependent on other parties for support. Or, a post-election ruling coalition includes some old parties and some new parties and the new parties represent more than 10 percent of the seats in the legislature.

2: Yes. The incumbent party or coalition lost its majority or plurality-dominant position in the legislature and a different party or coalition assumes the majority position.

SCALE: Ordinal.

Description:

VARIABLE TYPE: A*

PROJECT MANAGER(S): Carl Henrik Knutsen

QUESTION: What type of election was held on this date?

CLARIFICATION: The date and type of each election has been pre-coded. Any pre-coded years contain an orange triangle. This means that the score or specific date have already been entered, so we are asking you only to add your confidence in the pre-coded rating; we do not want you to change the rating, as we need all the Country Experts to answer the subsequent questions for the same elections.

If the election unfolds across more than one day, the date for the first day is entered. If the

precise date was unavailable, the first of the month is entered. If the month is unknown, January 1 is entered. Multiple-round elections (*e.g.*, two-round elections) are counted separately, *i.e.*, as separate elections. More than one election in a single year is accommodated by listing each election with a separate calendar date. When elections to more than one office occur on the same day these are listed separately (though naturally with the same date).

RESPONSES:

0: Legislative; lower, sole, or both chambers, first or only round. [v3eltype_0]

1: Legislative, lower, sole, or both chambers, second round. [v3eltype_1]

2: Legislative, upper chamber only, first or only round. [v3eltype_2]

3: Legislative, upper chamber only, second round. [v3eltype_3]

4: Constituent Assembly, first or only round. [v3eltype_4]

5: Constituent Assembly, second round. [v3eltype_5]

6: Presidential, first or only round. [v3eltype_6]

7: Presidential, second round. [v3eltype_7]

8: Metropolitan or supranational legislative, first or only round. [v3eltype_8]

9: Metropolitan or supranational legislative, second round. [v3eltype_9]

ANSWER-TYPE: Multiple-selection

2.3.27 Historical V-Dem - Overlap Period Discrepancies

This part of the codebook contains variables pertaining to the Historical V-Dem data collection. A maximum of 91 countries are included in the sample (see the country table), but some variables (in particular C type variables) cover fewer countries, as coding is still ongoing. For more information on the Historical V-Dem project, please refer to the Organization and Management document (<https://www.v-dem.net/static/website/img/refs/orgmanv111.pdf>) or the Historical V-Dem page: <https://www.v-dem.net/hdata.html>. The vast majority of questions coded by Historical V-Dem are V-Dem indicators previously coded back to 1900, and these indicators are found in other sections of the codebook with merged time series extending all the way from 1789 to the present.

This section includes A and A* variables where there is a discrepancy in the coding of some observations between the Historical and Contemporary V-Dem coding for the overlap period (typically 1900-1920). The v2-versions of these variables, reported elsewhere in the codebook, report the Contemporary V-Dem scores in cases of discrepancies in the overlap period.

Remaining inconsistencies in the Historical and Contemporary V-Dem coding, that are not due to

substantive differences in the indicators, will be sorted out for version 10 of the dataset.

2.3.27.1 Local government elected (v3ellocelc)

Long tag: vdem_cy_v3ellocelc

Original tag: v3ellocelc

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: www.statoids.com, www.hathitrust.org, Library of Congress - Country Studies, Wikipedia, various country-specific sources, including books, articles, constitutions and online sources

Description:

VARIABLE TYPE: A*

PROJECT MANAGER(S): Carl Henrik Knutsen

QUESTION: At the local level, are government offices elected in practice?

CLARIFICATION: The information on this question has been pre-coded. Any pre-coded years contain an orange triangle. This means that the score and/or specific date have already been entered, so we are asking you only to add your confidence in the pre-coded rating; we do not want you to change the rating as we need all the Country Experts to answer the subsequent questions for the same local governments.

quot;Government officesquot; here refers to a local executive and a local assembly, not a judiciary and not minor bureaucrats. An executive is a single individual (or a very small group) (*e.g.*, a mayor). An assembly is a larger body of officials.

quot;Electedquot; refers to offices that are directly elected by citizens or indirectly elected by a local elected assembly. All other methods of obtaining office – including appointment by a higher level of government – are considered to be non-elected.

In classifying a position as elected one is making no judgments about the freeness/fairness of the election or the relative extent of suffrage. One is simply indicating that there is an election and that the winner of that election (however conducted) generally takes office.

RESPONSES:

0: Generally, offices at the local level are not elected.

1: Generally, the local executive is elected but not the assembly.

2: Generally, the local assembly is elected but not the executive.

3: Generally, the local executive is elected and there is no assembly.

4: Generally, the local assembly is elected and there is no executive.

5: Generally, the local executive and assembly are elected.

PROJECT MANAGER(S): Carl Henrik Knutsen

QUESTION: Is there a local government?

CLARIFICATION: The information on this question has been pre-coded. Any pre-coded years contain an orange triangle. This means that the score and/or specific date have already been entered, so we are asking you only to add your confidence in the pre-coded rating; we do not want you to change the rating as we need all the Country Experts to answer the subsequent questions for the same local governments.

Local government refers to the level of government below the regional government. There are many names for units at this level; some common ones are counties, communes, cities, municipalities, towns, rural municipalities, and villages.

Countries with more than two subnational levels may have multiple levels that fit the definition of local government. If this is the case, please code the local level that, in practice, has the most responsibilities (*e.g.* making laws, providing primary education, maintaining roads, policing, etc.) and resources to carry out those responsibilities.

Studies, Wikipedia, various country-specific sources, including books, articles, constitutions and online sources

Description:

VARIABLE TYPE: A*

PROJECT MANAGER(S): Carl Henrik Knutsen

QUESTION: Is there a regional government?

CLARIFICATION: The information on this question has been pre-coded. Any pre-coded years contain an orange triangle. This means that the score and/or specific date have already been entered, so we are asking you only to add your confidence in the pre-coded rating; we do not want you to change the rating as we need all the Country Experts to answer the subsequent questions for the same regional governments.

Regional government is typically the second-highest level of government, just below the national government. There are many names for units at this level; some common ones are regions, provinces, states, departments, and cantons.

Countries with more than two subnational levels may have multiple levels that fit the definition of regional government. If this is the case, for all questions about regional government please code the regional level that, in practice, has the most responsibilities (*e.g.* making laws, providing primary, education, maintaining roads, policing, etc.) and resources to carry out those responsibilities.

Some countries are so small that, now or in earlier time periods, they have only local government and not regional government. If this is the case, this question is coded as "0" for the appropriate time period.

RESPONSES:

0: No

1: Yes

ORDERING: If coded "0" for entire period, skip the following questions focused on regional government.

SOURCE(S): Statoids.com; hathitrust.org; Library of Congress - Country Studies; Wikipedia; various country-specific sources, including books, articles, constitutions and online sources.

Description:

VARIABLE TYPE: A*

PROJECT MANAGER(S): Jan Teorell

QUESTION: Is the head of state (HOS) also head of government (HOG)?

CLARIFICATION: Once again, the identities of the head of government for each country have been pre-coded for as many years as possible. Any pre-coded years contain an orange triangle. This means that either the score or text and/or specific date have already been entered, so we are asking you only to add your confidence in the pre-coded rating; we do not want you to change the rating, as we need all the Country Experts to answer the subsequent questions for the same executives.

Note that this question only pertains to whether the head of state and the head of government are the same person or body, regardless of the relative powers of the two. Thus, in a constitutional monarchy, for example, the head of state and head of government are not the same even though the head of state may lack any real political power. If multiple head of states/head of governments were appointed in any year, the question pertains to each one of them.

RESPONSES:

0: No

1: Yes

ORDERING: If HOS=HOG (answer is "yes") for all years: skip to "Introduction to entire executive." (v2exintro3)

2.3.27.20 Government censorship effort — Media (v3mecenefm)

Long tag: vdem_cy_v3mecenefm

Original tag: v3mecenefm

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Michael Coppedge

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Does the government directly or indirectly attempt to censor the print or broadcast media?

CLARIFICATION: Indirect forms of censorship might include politically motivated awarding of broadcast frequencies, withdrawal of financial support, influence over printing facilities and distribution networks, selected distribution of advertising, onerous registration requirements, prohibitive tariffs, and bribery.

We are not concerned with censorship of non-political topics such as child pornography, statements offensive to a particular religion, or defamatory speech unless this sort of censorship is used as a pretext for censoring political speech.

RESPONSES:

0: Attempts to censor are direct and routine.

1: Attempts to censor are indirect but nevertheless routine.

2: Attempts to censor are direct but limited to especially sensitive issues.

3: Attempts to censor are indirect and limited to especially sensitive issues.

4: The government rarely attempts to censor major media in any way, and when such exceptional attempts are discovered, the responsible officials are usually punished.

SCALE: Ordinal, converted to interval by the measurement model.

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): Marcus Tannenbergh, Staffan I Lindberg

QUESTION: How can the political regime overall be classified considering the competitiveness of access to power (polyarchy) as well as liberal principles?

RESPONSES:

0: Closed autocracy: No multiparty elections for the chief executive or the legislature.

1: Electoral autocracy: De-jure multiparty elections for the chief executive and the legislature, but failing to achieve that elections are free and fair, or de-facto multiparty, or a minimum level of Dahl's institutional prerequisites of polyarchy as measured by V-Dem's Electoral Democracy Index (v2x_polyarchy).

2: Electoral democracy: De-facto free and fair multiparty elections and a minimum level of Dahl's institutional prerequisites for polyarchy as measured by V-Dem's Electoral Democracy Index (v2x_polyarchy), but either access to justice, or transparent law enforcement, or liberal principles of respect for personal liberties, rule of law, and judicial as well as legislative constraints on the executive not satisfied as measured by V-Dem's Liberal Component Index (v2x_liberal).

3: Liberal democracy: De-facto free and fair multiparty elections and a minimum level of Dahl's institutional prerequisites for polyarchy as measured by V-Dem's Electoral Democracy Index (v2x_polyarchy) are guaranteed as well as access to justice, transparent law enforcement and the liberal principles of respect for personal liberties, rule of law, and judicial as well as legislative constraints on the executive satisfied as measured by V-Dem's Liberal Component Index (v2x_liberal).

SCALE: Ordinal.

SOURCE(S): v2x_elecreg v2xlg_elecreg v2xex_elecreg v2elmulpar_osp_ex
v2elmulpar_osp_leg v2elmulpar_osp v2elfrfair_osp v2elfrfair_osp_leg v2elfrfair_osp_ex
v2expathhg v2expathhs v2ex_legconhos v2ex_hosw v2x_polyarchy v2x_liberal
v2clacjstm_osp v2clacjstw_osp v2cltrnslw_osp v2exaphogp

DATA RELEASE: 9-13.

AGGREGATION: Electoral democracies score above 2 on the indicators for multi-party (v2elmulpar_osp) and free and fair elections (v2elfrfair_osp), as well as above 0.5 on the Electoral Democracy Index (v2x_polyarchy). Liberal democracy meets the criteria for Electoral democracy but also satisfy the liberal dimensions by a score above 0.8 on the V-Dem Liberal Component index (v2x_liberal), as well as a score above 3 on transparent law enforcement (v2cltrnslw_osp), access to justice for men (v2clacjstm_osp) and women (v2clacjstw_osp). Electoral autocracies fail to meet one or more of the above-mentioned criteria of electoral democracies, but subject the chief executive and the legislature to de-jure multiparty elections as indicated by a score above 1 on the V-Dem multiparty elections indicator (v2elmulpar_osp). Closed autocracy if either no multiparty elections for the legislature take place (v2xlg_elecreg == 0) or the chief executive is not elected in direct or indirect multiparty elections. To identify whether this is the case, we take into account if there is no basic multiparty competition in elections (v2elmulpar_osp lt; 1) and the relative power of the Head of State (HoS) and the Head of Government (HoG) as well as the appointment procedures. The V-Dem variable v2ex_hosw identifies if the HoS (v2ex_hosw gt; 0.5) or HoG (v2ex_hosw lt; or equal to 0.5) is the chief executive. If the HoG is the chief executive, the variable v2expathhg indicates whether the HoG is directly (8) or indirectly (7) elected or appointed by the HoS (6). In the first case, we consider whether executive elections (v2xex_elecreg == 0) take place, in the second case whether legislative elections take place (v2xlg_elecreg == 0) and in the third case how HoS is selected as follows. The variable v2expathhs indicates whether the HoS is directly (7) or indirectly (6) elected. Thus, in the first case, we consider whether executive elections (v2xex_elecreg) take place, in the second case whether legislative elections take place and the legislature approves on HoG (v2xlg_elecreg == 0 and v2exaphog == 0). This also applies for the cases if the HoS is the chief executive.

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): Kyle L. Marquardt and Valeriya Mechkova

ADDITIONAL VERSIONS: *_osp, *_codelow, *_codehigh

QUESTION: To what extent is the ideal of government accountability achieved?

CLARIFICATION: Government accountability is understood as constraints on the government's use of political power through requirements for justification for its actions and potential sanctions. We organize the sub-types of accountability spatially. Vertical accountability refers to the ability of a state's population to hold its government accountable through elections, horizontal accountability refers to checks and balances between institutions; and diagonal accountability captures oversight by civil society organizations and media activity.

SCALE: We provide two versions of this index. The first is the normalized output from the hierarchical latent variable analysis. It is on an unbounded interval scale. The second, denoted by *_osp, is a version of this output which we scale using a standard normal cumulative distribution function. It is thus scaled low to high (0-1).

SOURCE(S): v2x_elecreg v2elembaut v2elembcap v2elrgstry v2elirreg v2elintim v2elmulpar v2elfrfair v2elsuffrage v2expathhs v2ex_legconhos v2expathhg v2exaphogp v2ex_hosw v2psparban v2psbars v2psoppaut v2juhcind v2juncind v2juhccomp v2jucomp v2exrescon v2lginvstp v2lgqstexp v2lgbicam v2lgotovst v2mecenefm v2mecenefi v2meharjrn v2mecrit v2mebias v2merange v2meslfcen v2csptrcpt v2cseeorgs v2csreprss v2cldiscm v2cldiscw v2clacfree v2dlengage v2x_suffr v2xex_elecreg v2xlg_elecreg

DATA RELEASE: 7-13.

AGGREGATION: To create an aggregate measure of accountability, we conduct a hierarchical analysis using all variables included in the three sub-indices of accountability: vertical (v2x_veracc), horizontal (v2x_horacc) and diagonal accountability (v2x_diagacc). This strategy assumes that overall accountability is a function of all variables included in each sub-index, though the sub-indices structure this relationship.

CITATION: Lührmann *et al.* (2020); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1900-2022

CONVERGENCE: All estimates of country-year overall accountability converged using standard V-Dem criteria. About 1.1percent of the model parameters in the overall accountability index did not converge using the standard V-Dem criterion (R-hat lt; 1.01). However, all parameters converge using the more relaxed criterion of R-hat lt; 1.1.

2.3.29.2 Vertical accountability index (v2x_veracc)

Long tag: vdem_cy_v2x_veracc

Original tag: v2x_veracc

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): Kyle L. Marquardt and Valeriya Mechkova

ADDITIONAL VERSIONS: *_osp, *_codelow, *_codehigh

QUESTION: To what extent is the ideal of vertical government accountability achieved?

CLARIFICATION: Vertical accountability captures the extent to which citizens have the power to hold the government accountable. The mechanisms of vertical accountability include formal political participation on part of the citizens — such as being able to freely organize in political parties — and participate in free and fair elections, including for the chief executive.

SCALE: We provide two versions of this index. The first is the normalized output from the hierarchical latent variable analysis. It is on an unbounded interval scale. The second, denoted by *_osp, is a version of this output which we scale using a standard normal cumulative distribution function. It is thus scaled low to high (0-1).

SOURCE(S): v2x_elecreg v2elembaut v2elembcap v2elrgstry v2elirreg v2elintim v2elmulpar v2elfrfair v2expathhs v2ex_legconhos v2expathhg v2x_suffr v2exaphogp v2ex_hosw v2x_suffr v2psparban v2psbars v2psoppaut

DATA RELEASE: 7-13.

AGGREGATION: Vertical accountability consists of two main components: elections and political parties. We operationalize electoral accountability with three components: 1) an aggregate measure the quality of elections; 2) the percent of enfranchised population and 3) whether the chief executive is directly or indirectly elected. We model non-electoral regimes as having no suffrage and the quality of elections as a function of having an electoral regime (v2x_elecreg). Quality of elections consists of seven variables measuring different aspects of national elections for the executive and legislature. Specifically, we include autonomy and capacity of the electoral management body (v2elembaut) and (v2elembcap); accuracy of the voter registry (v2elrgstry), intentional irregularities conducted by the government and opposition (v2elirreg); intimidation and harassment by the government and its agents (v2elintim); to what extent the elections were multi-party in practice (v2elmulpar); and an overall measure for the freedom and fairness of elections (v2elfrfair). This is a modified version of the V-Dem Clean elections index (v2xel_frefair). We added the variable v2elmulpar, which is theoretically important for accountability, and we removed v2elvtobuy and v2elpeace, as they have low loadings.

We measure suffrage as the percentage of people that have the legal right to vote (v2x_suffr) to proxy the inclusivity of the exercise of electoral accountability. To account for the differences between states which have an executive subject to elections, we include a dichotomous indicator of whether or not the head of the executive either the head of state or head of government — whoever has more relative power over the appointment and dismissal of cabinet ministers as measured by v2ex_hosw is subjected to direct or indirect elections (v2expathhs v2ex_legconhos v2expathhg v2exaphogp).

The second form of vertical accountability focuses on political parties, which we model as a hierarchical node. This node includes variables that capture whether there are barriers to forming a party and how restrictive they are (v2psparban) and (v2psbars), as well as the degree to which opposition parties are independent of the ruling regime (v2psoppaut).

CITATION: Lührmann *et al.* (2020); *V-Dem Codebook* (see suggested citation at the top of

this document).
YEARS: 1900-2022

2.3.29.3 Diagonal accountability index (v2x_diagacc)

Long tag: vdem_cy_v2x_diagacc

Original tag: v2x_diagacc

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Lührmann et al. (2020), v2mecenefm v2mecenefi v2meharjrn v2mecrit v2mebias v2merange v2meslfcen v2csprtcpt v2cseeorgs v2csreprss v2cldiscm v2cldiscw v2clacfree v2dlengage

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): Kyle L. Marquardt and Valeriya Mechkova

ADDITIONAL VERSIONS: *_osp, *_codelow, *_codehigh

QUESTION: To what extent is the ideal of diagonal government accountability achieved?

CLARIFICATION: Diagonal accountability covers the range of actions and mechanisms that citizens, civil society organizations CSOs, and an independent media can use to hold the government accountable. These mechanisms include using informal tools such as social mobilization and investigative journalism to enhance vertical and horizontal accountability.

SCALE: We provide two versions of this index. The first is the normalized output from the hierarchical latent variable analysis. It is on an unbounded interval scale. The second, denoted by *_osp, is a version of this output which we scale using a standard normal cumulative distribution function. It is thus scaled low to high (0-1).

SOURCE(S): v2mecenefm v2mecenefi v2meharjrn v2mecrit v2mebias v2merange v2meslfcen v2csprtcpt v2cseeorgs v2csreprss v2cldiscm v2cldiscw v2clacfree v2dlengage

DATA RELEASE: 7-13.

AGGREGATION: We model this form of accountability as a function of four hierarchical nodes: media freedom, civil society characteristics, freedom of expression, and the degree to which citizens are engaged in politics.

The media freedom node incorporates variables representing two broad dimensions. The first dimension regards the extent to which the government attempts to censor the media (v2mecenefm) and information on the Internet (v2mecenefi), as well as the extent to which government and other powerful actors harass journalists (v2meharjrn). The second dimension concerns the work of the media itself, namely the extent to which: the media criticizes the government at least occasionally (v2mecrit); there is bias against opposition candidates (v2mebias); the media offers a wide array of political perspectives in their coverage (v2merange); and there is self-censorship on salient issues for the government (v2meslfcen). The media freedom node is an expanded version of the V-Dem Alternative sources of information index (v2xme_altinf).

Finally, we use the components of the V-Dem core index of civil society to account for the opportunity of citizens to channel their interests and potentially oppose the government and its policies in an organized way through a robust, self-organized and autonomous civil society organizations. The indicators included in this node are: popular and voluntary participation in CSOs, (v2csprtcpt), government control to the entry and exit of CSOs into the public life, (v2cseeorgs), and government oppression of CSOs (v2csreprss).

The freedom of expression node incorporates variables regarding the degree to which men and women are free to discuss political issues without fear of harassment (v2cldiscm and v2cldiscw), as well as an indicator on the freedom of academic and cultural expression (v2clacfree).

Finally, we incorporate a variable representing engaged society (v2dlengage), which gives information on the width and depth of public deliberations when important policy changes are being considered.

CITATION: Lührmann *et al.* (2020); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1900-2022

2.3.29.4 Horizontal accountability index (v2x_horacc)

Long tag: vdem_cy_v2x_horacc

Original tag: v2x_horacc

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Lührmann et al. (2020), v2juhcind v2juncind v2juhccomp v2jucomp v2exrescon v2lgotovst v2lginvstp v2lgbicam v2lgqstexp

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): Kyle L. Marquardt and Valeriya Mechkova

ADDITIONAL VERSIONS: *_osp, *_codelow, *_codehigh

QUESTION: To what extent is the ideal of horizontal government accountability achieved?

CLARIFICATION: Horizontal accountability concerns the power of state institutions to oversee the government by demanding information, questioning officials and punishing improper behavior. This form of accountability ensures checks between institutions and prevents the abuse of power. The key agents in horizontal government accountability are: the legislature; the judiciary; and specific oversight agencies such as ombudsmen, prosecutor and comptroller generals.

SCALE: We provide two versions of this index. The first is the normalized output from the hierarchical latent variable analysis. It is on an unbounded interval scale. The second, denoted by *_osp, is a version of this output which we scale using a standard normal cumulative distribution function. It is thus scaled low to high (0-1).

SOURCE(S): v2juhcind v2juncind v2juhccomp v2jucomp v2exrescon v2lgotovst v2lginvstp v2lgbicam v2lgqstexp

DATA RELEASE: 7-13.

AGGREGATION: We capture the extent to which the judiciary, the legislature and other oversight agencies hold the government to account by modeling each of these factors as separate hierarchical nodes.

The judiciary node speaks to the degree to which members of the executive compromise horizontal accountability by "unlawfully encroaching" on the legitimate authority of the judiciary branch. To capture that we use the indicators from the V-Dem judicial constraints on the executive index (v2x_jucon).

To model the degree to which a legislature facilitates horizontal accountability we model whether or not a legislature exists a dichotomized version of v2lgbicam, and legislature activities as a function of this variable. The key function of a legislature in terms of horizontal accountability is to scrutinize government officials' potential misconduct by demanding information for their policies and decisions, and taking specific actions in case of irregularities. We use as baseline the indicators from the V-Dem legislative constraints on the executive index (v2xlg_legcon): the degree to which: 1 the legislature routinely questions the executive (v2lgqstexp); and 2 a legislature is likely to investigate and produce a decision unfavorable to the executive, if the latter were engaged in an illegal or unethical activity (v2lginvstp). We exclude the legislature opposition parties (v2lgoppart) as this aspect is part of vertical accountability.

Finally, we include a variable regarding the degree to which other state bodies comptroller general, general prosecutor, or ombudsman are likely to investigate and report on potential illegal or unethical activities on part of the executive (v2lgotovst).

YEARS: 1900-2022

2.3.30 Other Indices Created Using V-Dem Data - Executive Bases of Power

The *Executive Bases of Power Index* uses V-Dem data but is not a subcomponent of the V-Dem Democracy Indices. Please see Appendix A of the V -Dem codebook (<https://www.v-dem.net/>

[static/website/img/refs/codebookv12.pdf](#)) for an overview of all indices, component-indices, and lower-level indices.

2.3.30.1 Confidence dimension index (v2x_ex_confidence)

Long tag: vdem_cy_v2x_ex_confidence

Original tag: v2x_ex_confidence

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Teorell & Lindberg (2019), v2expathhs v2expathhg v2exremhsp_ord v2exrmhsol_2 v2exrmhsol_3 v2exrmhsol_4 v2exhoshog v2ex_hosw

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): Jan Teorell

QUESTION: To what extent is the power base of the chief executive' determined by the confidence of the legislature?

CLARIFICATION: Representing one of five regime dimensions, each of which may be more or less present in any given case, this index taps into the extent to which the dismissal of the chief executive depends on the confidence of the legislature.

SCALE: Interval, from low to high (0-1).

SOURCE(S): v2expathhs v2expathhg v2exremhsp_ord v2exrmhsol_2 v2exrmhsol_3 v2exrmhsol_4 v2exhoshog v2ex_hosw

DATA RELEASE: 9-13.

AGGREGATION: The index is based on whether the "chief executive" can be dismissed by the legislature (without having to level accusations of unlawful activity and without the involvement of any other agency). In nominally dual systems, where the head of state (HOS) and the head of government (HOG) are not the same individual, we determine who is the "chief executive" by comparing HOS and HOG powers over the appointment and dismissal of cabinet ministers. We aggregate across the two executives by taking the average weighted by their relative powers over cabinet formation and dismissal.

YEARS: 1789-2022

2.3.31 Other Indices Created Using V-Dem Data - Neopatrimonialism

The *Neopatrimonialism Index* uses V-Dem data but is not a subcomponent of the V-Dem Democracy Indices. Please see Appendix A of the V-Dem codebook (<https://www.v-dem.net/static/website/img/refs/codebookv12.pdf>) for an overview of all indices, component-indices, and lower-level indices.

2.3.31.1 Neopatrimonial Rule Index (v2x_neopat)

Long tag: vdem_cy_v2x_neopat

Original tag: v2x_neopat

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Sigman & Lindberg (2017, 2018), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023), v2elvotbuy v2dlencmps v2psprlnks v2exrescon v2lgotovst v2lgfunds v2lginvstp v2juhcind v2juncind v2juhccomp v2jucomp v2elembaut v2exembez v2exbribe v2lgcrrpt v2jucorrdc v2x_elecreg

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): Rachel Sigman, Staffan Lindberg

ADDITIONAL VERSIONS: *_codelow, *_codehigh, *_sd

QUESTION: To what extent is rule based on personal authority?

CLARIFICATION: Neopatrimonial rule reflects the idea that personalistic forms of authority pervade formal regime institutions (Clapham, 1985). According to Bratton and Van de Walle (1997) a neopatrimonialism regime is one that combines clientelistic political relationships, strong and unconstrained presidents and the use of public resources for political legitimation. The index is constructed using Bayesian Factor Analysis of 16 indicators representing these three concepts. The sixteen indicators are those included in the three sub-indices: Clientelism, Presidentialism and Regime Corruption. The point estimates for this index have been reversed such that the directionality is opposite to the input variables. That is, lower scores indicate a normatively better situation (e.g. more democratic) and higher scores a normatively worse situation (e.g. less democratic). Note that this directionality is opposite of that of other V-Dem indices, which generally run from normatively worse to better.

SCALE: Interval, from low to high (0-1).

SOURCE(S): v2elvotbuy v2dlencmps v2psprlnks v2exrescon v2lgotovst v2lgfunds v2lginvstp v2juhcind v2juncind v2juhccomp v2jucomp v2elembaut v2exembez v2exbribe v2lgcrrpt v2jucorrdc v2x_elecreg

DATA RELEASE: 9-13.

AGGREGATION: The index is formed by taking the reversed point estimates (so that higher scores = more neopatrimonialism) from a Bayesian factor analysis model of the indicators for vote buying (v2elvotbuy), particularistic vs. public goods (v2dlencmps), party linkages (v2psprlnks), executive respects constitution (v2exrescon), executive oversight (v2lgotovst), legislature controls resources (v2lgfunds), legislature investigates the executive in practice (v2lginvstp), high court independence (v2juhcind), low court independence (v2juncind), compliance with high court (v2juhccomp), compliance with judiciary (v2jucomp), electoral management body autonomy (v2elembaut), executive embezzlement and theft (v2exembez), executive bribes and corrupt exchanges (v2exbribe), legislative corruption (v2lgcrrpt) and judicial corruption (v2jucorrdc).

YEARS: 1789-2022

CONVERGENCE: Model parameters with convergence issues: intercept.

2.3.31.2 Clientelism Index (v2xnp_client)

Long tag: vdem_cy_v2xnp_client

Original tag: v2xnp_client

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023), v2elvotbuy v2dlencmps v2psprlnks v2x_elecreg

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): Rachel Sigman, Staffan Lindberg

ADDITIONAL VERSIONS: *_codelow, *_codehigh, *_sd

QUESTION: To what extent are politics based on clientelistic relationships?

CLARIFICATION: Clientelistic relationships include the targeted, contingent distribution of resources (goods, services, jobs, money, etc) in exchange for political support. The point estimates for this index have been reversed such that the directionality is opposite to the input variables. That is, lower scores indicate a normatively better situation (e.g. more democratic) and higher scores a normatively worse situation (e.g. less democratic). Note that this directionality is opposite of that of other V-Dem indices, which generally run from normatively worse to better.

SCALE: Interval, from low to high (0-1).

SOURCE(S): v2elvotbuy v2dlencmps v2psprlnks v2x_elecreg

DATA RELEASE: 9-13.

AGGREGATION: The index is formed by taking the reversed point estimates (so that higher scores = more clientelism) from a Bayesian factor analysis model of the indicators for vote-buying (v2elvotbuy), particularistic vs. public goods (v2dlencmps) and whether party linkages are programmatic or clientelistic (v2psprlnks).

CITATION: Sigman and Lindberg (2017, *V-Dem Working Paper Series* 2017:56); Sigman and Lindberg (2018); Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

CONVERGENCE: Model parameters with convergence issues: intercept.

2.3.31.3 Presidentialism Index (v2xnp_pres)

Long tag: vdem_cy_v2xnp_pres

Original tag: v2xnp_pres

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Sigman & Lindberg (2017), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023), v2exrescon v2lgotovst v2lglfwunds v2lginvstp v2juhccind v2juncind v2juhccomp v2jucomp v2elembaut v2lgbicam

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): Rachel Sigman, Staffan Lindberg

ADDITIONAL VERSIONS: *_codelow, *_codehigh, *_sd

QUESTION: To what extent is the regime characterized by presidentialism?

CLARIFICATION: Presidentialism means the "systemic concentration of political power in the hands of one individual who resists delegating all but the most trivial decision making tasks" (Bratton and Van de Walle, 1997: 63). It relates closely to V-Dem's index of Horizontal Accountability (v2x_horacc) but focuses more specifically on the extent to which the President is free from constraints by other institutions or actors. The point estimates for this index have been reversed such that the directionality is opposite to the input variables. That is, lower scores indicate a normatively better situation (e.g. more democratic) and higher scores a normatively worse situation (e.g. less democratic). Note that this directionality is opposite of that of other V-Dem indices, which generally run from normatively worse to better.

SCALE: Interval, from low to high (0-1).

SOURCE(S): v2exrescon v2lgotovst v2lglfwunds v2lginvstp v2juhccind v2juncind v2juhccomp

v2jucomp v2elembaut v2lgbicam

DATA RELEASE: 9-13.

AGGREGATION: The index is formed by taking the reversed point estimates (so that higher scores = more presidentialism) from a Bayesian factor analysis model of the indicators for executive respect for the constitution (v2exrescon), whether there are mechanisms for oversight of the executive other than the legislature (v2lgotovst). For legislative constraints, the index includes an indicator of whether the legislature controls its own resources (v2lgbicam) and investigates the executive in practice (v2lginvst). There are four indicators of judicial constraints on the executive: high court independence (v2juhcind), lower court independence (v2jucnind), compliance with high court (v2juhccomp) and compliance with judiciary (v2jucomp). Finally, the index includes a measure of autonomy of the electoral management body (v2elembaut) that captures whether or not the President can influence its decisions and actions.

CITATION: Sigman and Lindberg (2017, *V-Dem Working Paper Series* 2017:56); Sigman and Lindberg (2018); Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

Variable citation: Sigman & Lindberg (2017), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023), v2exembev v2exbribe v2lgcrrpt v2jucorrdc

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): Rachel Sigman, Staffan Lindberg

ADDITIONAL VERSIONS: *_codelow, *_codehigh, *_sd

QUESTION: To what extent do political actors use political office for private or political gain?

CLARIFICATION: In systems of neopatrimonial rule, politicians use their offices for private and/or political gain. This index relates closely to V-Dem's political corruption index (v2x_corr), but focuses on a more specific set of actors – those who occupy political offices – and a more specific set of corrupt acts that relate more closely to the conceptualization of corruption in literature on neopatrimonial rule. The point estimates for this index have been reversed such that the directionality is opposite to the input variables. That is, lower scores indicate a normatively better situation (e.g. more democratic) and higher scores a normatively worse situation (e.g. less democratic). Note that this directionality is opposite of that of other V-Dem indices, which generally run from normatively worse to better.

SCALE: Interval, from low to high (0-1).

SOURCE(S): v2exembev v2exbribe v2lgcrrpt v2jucorrdc

DATA RELEASE: 9-13.

AGGREGATION: The index is formed by taking the reversed point estimates (so that higher scores = more regime corruption) from a Bayesian factor analysis model of the indicators for executive embezzlement (v2exembev), executive bribes (v2exbribe), legislative corruption (v2xlgcrrpt) and judicial corruption (v2jucorrdc).

CITATION: Sigman and Lindberg (2017, *V-Dem Working Paper Series* 2017:56); Sigman and Lindberg (2018); Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

2.3.32 Other Indices Created Using V-Dem Data - Civil Liberties

The *Civil Liberties Index* uses V-Dem data but is not a subcomponent of the V-Dem Democracy Indices. Please see Appendix A of the V-Dem codebook (<https://www.v-dem.net/static/website/img/refs/codebookv12.pdf>) for an overview of all indices, component-indices, and lower-level indices.

2.3.32.1 Civil liberties index (v2x_civlib)

Long tag: vdem_cy_v2x_civlib

Original tag: v2x_civlib

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): Svend-Erik Skaaning

ADDITIONAL VERSIONS: *_codelow, *_codehigh, *_sd

QUESTION: To what extent is civil liberty respected?

CLARIFICATION: Civil liberty is understood as liberal freedom, where freedom is a property of individuals. Civil liberty is constituted by the absence of physical violence committed by government agents and the absence of constraints of private liberties and political liberties by the government.

SCALE: Interval, from low to high (0-1).

SOURCE(S): v2x_clpriv v2x_clphy v2x_clpol

DATA RELEASE: 6-13.

AGGREGATION: The index is formed by taking the average of physical violence index (v2x_clphy), political civil liberties index (v2x_clpol), and private civil liberties (v2x_clpriv).

CITATION: *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

2.3.32.2 Physical violence index (v2x_clphy)

Long tag: vdem_cy_v2x_clphy

Original tag: v2x_clphy

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): Svend-Erik Skaaning

ADDITIONAL VERSIONS: *_codelow, *_codehigh, *_sd

QUESTION: To what extent is physical integrity respected?

CLARIFICATION: Physical integrity is understood as freedom from political killings and torture by the government. Among the set of civil liberties, these liberal rights are the most relevant for political competition and accountability. The index is based on indicators that reflect violence committed by government agents and that are not directly referring to elections.

SCALE: Interval, from low to high (0-1).

SOURCE(S): v2cltort v2clkill

DATA RELEASE: 6-13.

AGGREGATION: We estimate the index by averaging two indicators: freedom from torture (v2cltort) and freedom from political killings (v2clkill).

CITATION: *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

2.3.32.3 Political liberties index (v2x_clpol)

Long tag: vdem_cy_v2x_clpol

QUESTION: To what extent are private liberties respected?

CLARIFICATION: Private liberties are understood as freedom of movement, freedom of religion, freedom from forced labor, and property rights. The index is based on indicators that reflect government repression and that are not directly referring to elections.

SCALE: Interval, from low to high (0-1).

SOURCE(S): v2xcl_slave v2xcl_prpty v2clfmov v2xcl_dmove v2clrelig v2csrlgprep

DATA RELEASE: 6-13.

AGGREGATION: The index is formed by point estimates drawn from a Bayesian factor analysis model including the following indicators: property rights for men/women (v2clprptym, v2clprptyw), from forced labor for men/women (v2clslavem v2clslavew), freedom of religion (v2clrelig), religious organization repression (v2csrlgprep), freedom of foreign movement (v2clfmov), and freedom of domestic movement for men/women (v2cldmovm),

v2cldmovev).

CITATION: Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

2.3.33 Other Indices Created Using V-Dem Data - Exclusion

The *Exclusion Index* uses V-Dem data but is not a subcomponent of the V-Dem Democracy Indices. Please see Appendix A of the V -Dem codebook (<https://www.v-dem.net/static/website/img/refs/codebookv12.pdf>) for an overview of all indices, component-indices, and lower-level indices.

2.3.33.1 Exclusion by Socio-Economic Group (v2xpe_exlecon)

Long tag: vdem_cy_v2xpe_exlecon

Original tag: v2xpe_exlecon

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023), v2pepwrses v2clacjust v2peapsecon v2peasjsoecon v2peasbecon

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): Staffan I. Lindberg

ADDITIONAL VERSIONS: *_codelow, *_codehigh, *_sd

QUESTION: Index of (political) exclusion by socio-economic group

CLARIFICATION: Exclusion is when individuals are denied access to services or participation in governed spaces (spaces that are part of the public space and the government should regulate, while excluding private spaces and organizations except when exclusion in those private spheres is linked to exclusion in the public sphere) based on their identity or belonging to a particular group. The point estimates for this index have been reversed such that the directionality is opposite to the input variables. That is, lower scores indicate a normatively better situation (e.g. more democratic) and higher scores a normatively worse situation (e.g. less democratic). Note that this directionality is opposite of that of other V-Dem indices, which generally run from normatively worse to better.

SCALE: Interval, from low to high (0-1)

SOURCE(S): v2pepwrses v2clacjust v2peapsecon v2peasjsoecon v2peasbecon

DATA RELEASE: 9-13.

AGGREGATION: The index is formed by taking the point estimates from a Bayesian factor analysis model of the indicators power distributed by socio-economic group (v2pepwrses), socio-economic position equality in respect for civil liberties (v2clacjust), access to public services by socio-economic group (v2peapsecon), access to state jobs by socio-economic group (v2peasjsoecon), and access to state business opportunities by socio-economic group (v2peasbecon).

2.3.34 Other Indices Created Using V-Dem Data - Corruption

The *Corruption Index* uses V-Dem data but is not a subcomponent of the V-Dem Democracy Indices. Please see Appendix A of the V-Dem codebook (<https://www.v-dem.net/static/website/img/refs/codebookv12.pdf>) for an overview of all indices, component-indices, and lower-level indices.

2.3.34.1 Political corruption (v2x_corr)

Long tag: vdem_cy_v2x_corr

Original tag: v2x_corr

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: McMann *et al.* (2016), v2x_pubcorr v2x_execorr v2lgcrrpt v2jucorrdc

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): Jan Teorell

ADDITIONAL VERSIONS: *_codelow, *_codehigh, *_sd

QUESTION: How pervasive is political corruption?

CLARIFICATION: The directionality of the V-Dem corruption index runs from less corrupt to more corrupt unlike the other V-Dem variables that generally run from less democratic to more democratic situation. The corruption index includes measures of six distinct types of corruption that cover both different areas and levels of the polity realm, distinguishing between executive, legislative and judicial corruption. Within the executive realm, the measures also distinguish between corruption mostly pertaining to bribery and corruption due to embezzlement. Finally, they differentiate between corruption in the highest echelons of the executive at the level of the rulers/cabinet on the one hand, and in the public sector at large on the other. The measures thus tap into several distinguished types of corruption: both ‘petty’ and ‘grand’; both bribery and theft; both corruption aimed and influencing law making and that affecting implementation.

SCALE: Interval, from low to high (0-1).

SOURCE(S): v2x_pubcorr v2x_execorr v2lgcrrpt v2jucorrdc

DATA RELEASE: 5-13.

AGGREGATION: The index is arrived at by taking the average of (a) public sector corruption index (v2x_pubcorr); (b) executive corruption index (v2x_execorr); (c) the indicator for legislative corruption (v2lgcrrpt); and (d) the indicator for judicial corruption (v2jucorrdc). In other words, these four different government spheres are weighted equally in the resulting index. We replace missing values for countries with no legislature by only taking

the average of a, b and d.

ADDITIONAL VERSIONS: *_codelow, *_codehigh, *_sd

QUESTION: Do citizens enjoy the right to private property?

CLARIFICATION: Private property includes the right to acquire, possess, inherit, and sell private property, including land. Limits on property rights may come from the state which may legally limit rights or fail to enforce them; customary laws and practices; or religious or social norms. This question concerns the right to private property, not actual ownership of property.

SCALE: Interval, from low to high (0-1).

SOURCE(S): v2clprptym v2clprptyw

DATA RELEASE: 1-13.

AGGREGATION: We estimate the index by averaging two indicators: property rights for men (v2clprptym) and women (v2clprptyw).

CITATION: *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

2.3.37 Other Indices Created Using V-Dem Data - Direct Democracy

The *Direct Democracy Index* uses V-Dem data but is not a subcomponent of the V-Dem Democracy Indices. Please see Appendix A of the V-Dem codebook (<https://www.v-dem.net/static/website/img/refs/codebookv12.pdf>) for an overview of all indices, component-indices, and lower-level indices.

2.3.37.1 Popular initiative index (v2xdd_i_ci)

Long tag: vdem_cy_v2xdd_i_ci

Original tag: v2xdd_i_ci

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: v2ddlexci v2ddsigpci v2ddsiglci v2ddsigdci v2ddpartci v2ddapprci v2ddspmci
v2ddadmci v2ddyrci v2ddthreci

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): David Altman

QUESTION: To what extent is the *popular initiative utilized*?

SCALE: Interval, from low to high (0-1).

SOURCE(S): v2ddlexci v2ddsigpci v2ddsiglci v2ddsigdci v2ddpartci v2ddapprci v2ddspmci
v2ddadmci v2ddyrci v2ddthreci

DATA RELEASE: 7-13.

AGGREGATION: This index receives a maximum score of two resulting from the addition of the two terms easiness of initiation and easiness of approval of popular initiatives, where each term obtains a maximum value of one.

The ease of initiation is measured by:

- The existence of a direct democracy process v2ddlexci,
- The number of signatures needed v2ddsigpci, and
- Time-limits to circulate the signatures v2ddsigdci.

Easiness of approval is measured by the surface of the polygon determined by:

- Participation quorum v2ddpartci,
- Approval quorum v2ddapprci, and
- Supermajority v2ddspmci.

For an elaboration of the interaction among quorums, see David Altman (2017). The resulting score is then multiplied with (d) district majority v2ddadmci.

Consequences are measured by:

- The legal status of the decision made by citizens binding or merely consultative v2ddlexci, and
- The frequency and degree of success with which direct popular votes have been held in the past v2ddthreci. The baseline for those countries that have the legal apparatus to hold a particular MDD but have never experienced one is 0.1.

The index is aggregated using this formula:

$$v2xdd_i_ci = \& \text{amp; } [(IF\ v2ddlexci\ gt; 0, 1, 0) \times (1 - v2ddsigpci))$$

$$\& \text{amp; } \times (IF\ v2ddsigdci = 0, 1, 0.5 + v2ddsigdci/365/2)$$

$$\& \text{amp; } + (v2ddsigdci) \cap (v2ddpartci) \cap (v2ddspmc_i)]$$

$$\& \text{amp; } \times (0.5 + 1 - v2ddadmci/2)]$$

$$\& \text{amp; } \times (IF\ v2ddlexci = 1, 0.75, 1 \times IF\ \text{years since last successful}$$

$$\& \text{amp; } \text{eventlt; 6, then } v2ddthreci = 1, \text{ afterwards decr}$$

$$\& \text{amp; } \text{then } v2ddthreci = 1, \text{ afterwards decreases by 0.06 units per year}$$

$$\& \text{amp; } \text{until 0.1; if the event was not successful during the first years}$$

$$\& \text{amp; } v2ddthreci=0.9, \text{ afterwards decreases by 0.1}$$

$$\& \text{amp; } \text{units per year until 0.1)}$$

 YEARS: 1900-2022

2.3.37.2 Popular referendum index (v2xdd_i_rf)

Long tag: vdem_cy_v2xdd_i_rf

Original tag: v2xdd_i_rf

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: v2ddlexrf v2ddsigprf v2ddsigdrf v2ddpartrf v2ddapprf v2ddspmrfrf v2ddadmrfrf v2ddyrrf v2ddthrerf

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): David Altman

QUESTION: To what extent is the *referendum* utilized?

SCALE: Interval, from low to high (0-1).

SOURCE(S): v2ddlexrf v2ddsigprf v2ddsigdrf v2ddpartrf v2ddapprf v2ddspmrfrf v2ddadmrfrf v2ddyrrf v2ddthrerf

DATA RELEASE: 7-13.

AGGREGATION: This index receives a maximum score of two resulting from the addition of the two terms easiness of initiation and easiness of approval of referendums, where each term obtains a maximum value of one.

The ease of initiation is measured by:

- The existence of a direct democracy process v2ddlexrf,
- The number of signatures needed v2ddsigprf,
- Time-limits to circulate the signatures v2ddsigdrf.

Easiness of approval is measured by the surface of the polygon determined by:

- Participation quorum v2ddpartrf,
- Approval quorum v2ddapprf, and
- Supermajority v2ddspmr. For an elaboration of the interaction among quorums, see David Altman 2016.

The resulting score is then multiplied with d district majority v2ddadmrf.

Consequences are measured by:

- The legal status of the decision made by citizens binding or merely consultative v2ddlexrf, and
- The frequency and degree of success with which direct popular votes have been held in the past v2ddthrerf. The baseline for those countries that have the legal apparatus to hold a particular MDD but have never experienced one is 0.1.

The index is aggregated using this *formula*:

$$v2xdd_i_rf = \& \text{amp;} [(IF\ v2ddlexrfgt; 0, 1, 0) \times (1 - v2ddsigprf) \\ \& \text{amp;} \times (IF\ v2ddsigdrf = 0, 1, .5 + (v2ddsigdrf \times 2)/365) \\ \& \text{amp;} + (v2ddpartrf \cap v2ddapprf \cap v2ddspmr)] \times (0.5 + (1 - v2ddadmrf)/2) \\ \& \text{amp;} \times (IF\ v2ddlexrf = 1, .75, 1) \times (IF\ \textit{years since last successful event lt}; 6, \\ \& \text{amp;} \textit{then } v2ddthrerf = 1, \textit{ afterwards decreases by } .06 \textit{ units per year until } .1, \\ \& \text{amp;} \textit{ if the event was not successful during the first years } v2ddthrerf = .9, \\ \& \text{amp;} \textit{ afterwards decreases by } 0.1 \textit{ units per year until } .1)$$

COUNTRY-YEAR AGGREGATION: Last

CITATION: *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1900-2022

2.3.37.3 Obligatory referendum index (v2xdd_i_or)

Long tag: vdem_cy_v2xdd_i_or

Original tag: v2xdd_i_or

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: v2ddlexor v2ddpartor v2ddappor v2ddspmor v2ddadmor v2ddthreor

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): David Altman

QUESTION: To what extent is the *obligatory referendum* utilized?

SCALE: Interval, from low to high (0-1).

SOURCE(S): v2ddlexor v2ddpartor v2ddappor v2ddspmor v2ddadmor v2ddthreor

DATA RELEASE: 7-13.

AGGREGATION: This index receives a maximum score of two resulting from the addition of the two terms easiness of initiation and easiness of approval of obligatory referendums, where each term obtains a maximum value of one.

The ease of initiation is measured by:

- The existence of a direct democracy process `v2ddlexor`.

Easiness of approval is measured by the surface of the polygon determined by:

- Participation quorum `v2ddpartor`
- Approval quorum `v2ddappor`, and
- Supermajority `V2ddspmor`. For an elaboration of the interaction among quorums, see David Altman 2017.

The resulting score is then multiplied with (d) district majority `v2ddadmor`.

Consequences are measured by:

- The legal status of the decision made by citizens binding or merely consultative `v2ddlexor`, and
- The frequency and degree of success with which direct popular votes have been held in the past `v2ddthreor`.

The index is aggregated using this formula:

$$v2xdd_i_or = \& (IF\ v2ddlexor > 0, 1, 0) + (v2ddpartor) \cap v2ddappor$$

$$\& \times ((.5 + (1 - v2ddadmor)/2) \times (IF\ v2ddlexor = 1, .75, 1))$$

$$\& \times (IF\ years\ since\ last\ successful\ event \leq 6, then\ v2ddthreor = 1,$$

$$\& afterwards\ decreases\ by\ .06\ units\ per\ year\ until\ .1,$$

$$\& if\ the\ event\ was\ not\ successful\ during\ the\ first\ years\ v2ddthreor = .9,$$

$$\& afterwards\ decreases\ by\ .1\ units\ per\ year\ until\ .1)$$

COUNTRY-YEAR AGGREGATION: Last
 CITATION: *V-Dem Codebook* (see suggested citation at the top of this document).
 YEARS: 1900-2022

2.3.37.4 Plebiscite index (`v2xdd_i_pl`)

Long tag: `vdem_cy_v2xdd_i_pl`

Original tag: `v2xdd_i_pl`

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: `v2ddlexpl v2ddpartpl v2ddapprpl v2ddspmpl v2ddadmpl v2ddyrpl v2ddthrepl`

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): David Altman

QUESTION: To what extent is the *plebiscite* utilized?

SCALE: Interval, from low to high (0-1).

SOURCE(S): `v2ddlexpl v2ddpartpl v2ddapprpl v2ddspmpl v2ddadmpl v2ddyrpl v2ddthrepl`

DATA RELEASE: 7-13.

AGGREGATION: This index receives a maximum score of two resulting from the addition of the two terms easiness of initiation and easiness of approval of plebiscites, where each term obtains a maximum value of one.

The ease of initiation is measured by:

- The existence of a direct democracy process $v2ddlexpl$.

Easiness of approval is measured by the surface of the polygon determined by:

- Participation quorum $v2ddpartpl$,
- Approval quorum $v2ddapprpl$, and
- Supermajority $v2ddspmpl$. For an elaboration of the interaction among quorums, see David Altman 2017.

The resulting score is then multiplied with (d) district majority $v2ddadmpl$.

Consequences are measured by:

- The legal status of the decision made by citizens (binding or merely consultative) ($v2ddlexpl$), and
- The frequency and degree of success with which direct popular votes have been held in the past ($v2ddthrepl$). The baseline for those countries that have the legal apparatus to hold a particular MDD but have never experienced one is 0.1.

The index is aggregated using this formula:

$$v2xdd_i_pl = \& \times (IF\ v2ddlexpl > 0, 1, 0) + (v2ddpartpl \cap v2ddapprpl) \times ((0.5 + (1 - v2ddadmpl)/2)) \times (IF\ v2ddlexpl = 1, 0.75, 1) \times (IF\ years\ since\ last\ successful\ event < 6, then\ v2ddthrepl = 1, \& \times (IF\ years\ since\ last\ successful\ event > 6, then\ v2ddthrepl = 0.9, \& \times (IF\ years\ since\ last\ successful\ event > 12, then\ v2ddthrepl = 0.1))$$

2.3.38 Other Indices Created Using V-Dem Data - Civil Society

The *Civil Society Index* uses V-Dem data but is not a subcomponent of the V-Dem Democracy Indices. Please see Appendix A of the V-Dem codebook (<https://www.v-dem.net/static/website/img/refs/codebookv12.pdf>) for an overview of all indices, component-indices, and lower-level indices.

2.3.38.1 Core Civil Society Index (v2xcs_ccsi)

Long tag: vdem_cy_v2xcs_ccsi

Original tag: v2xcs_ccsi

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Bernhard et al. (2017), ?, v2cseeorgs v2csreprss v2csprcpt

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): Michael Bernhard

ADDITIONAL VERSIONS: *_codelow, *_codehigh, *_sd

QUESTION: How robust is civil society?

CLARIFICATION: The sphere of civil society lies in the public space between the private

sphere and the state. Here, citizens organize in groups to pursue their collective interests and ideals. We call these groups civil society organizations CSOs. CSOs include, but are by no means limited to, interest groups, labor unions, spiritual organizations if they are engaged in civic or political activities, social movements, professional associations, charities, and other non-governmental organizations.

The core civil society index CCSI is designed to provide a measure of a robust civil society, understood as one that enjoys autonomy from the state and in which citizens freely and actively pursue their political and civic goals, however conceived.

SCALE: Interval, from low to high (0-1).

SOURCE(S): v2cseeorgs v2csreprss v2csptrcpt

DATA RELEASE: 1-13.

AGGREGATION: The index is formed by taking the point estimates from a Bayesian factor analysis model of the indicators for CSO entry and exit (v2cseeorgs), CSO repression (v2csreprss) and CSO participatory environment (v2csptrcpt).

CITATION: Bernhard *et al.* (2017); Pemstein *et al.* (2021, V-Dem Working Paper Series 2022:21); V-Dem Codebook (see suggested citation at the top of this document).

YEARS: 1789-2022

2.3.39 Other Indices Created Using V-Dem Data - Elections

The *Elections Index* uses V-Dem data but is not a subcomponent of the V-Dem Democracy Indices. Please see Appendix A of the V-Dem codebook (<https://www.v-dem.net/static/website/img/refs/codebookv12.pdf>) for an overview of all indices, component-indices, and lower-level indices.

2.3.39.1 Electoral Regime Index (v2x_elecreg)

Long tag: vdem_cy_v2x_elecreg

Original tag: v2x_elecreg

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: v2xel_elecparl v2xlg_leginter v2xel_elecpres v2x_hosinter v2x_hosabort v2x_legabort v2ex_elechos v2ex_elechog

Description:

VARIABLE TYPE: A

PROJECT MANAGER(S): Staffan I. Lindberg, Jan Teorell

QUESTION: At this time, are regularly scheduled national elections on course, as stipulated by election law or well-established precedent?

CLARIFICATION: Coded 0 until an executive or legislative election is held, defined by v2xel_elecpres and v2xel_elecparl, then set to 1 until any of the following two events occur (if they occur): (a) that the election was "aborted", meaning that those elected did not resume power, as defined by v2x_hosabort and v2x_legabort; or (b) an "electoral interruption", meaning that either the legislature was shut down, as defined by v2xlg_leginter, or there was an executive coup, as defined by v2x_hosinter; in the case of (a) or (b), v2x_elecreg is set to 0 until there is another election. The operational indicator of an "aborted" executive election (v2x_hosabort) is that v2expathhs did not turn 7 within 12 months after the election, for a legislative election (v2x_legabort) that v2lgbicam did not turn positive within 12 months after the election. An interruption of the electoral regime occurring through the HOS, *e.g.* a coup d'état, is indicated by v2x_hosinter as a change in v2xel_elecpres, meaning v2expathhs turned from 7 to something else, with the exception of 6, approval by the legislature (in case the legislature remained in place). An interruption of the electoral regime occurring through the legislature is defined by v2xlg_leginter based on v2lgbicam turning 0. We note that the coding of v2x_elecreg does not merely follow mechanically from the scores on these other variables, as the coding of v2x_elecreg has also been cross-checked and validated by research assistants. An executive and a legislative electoral regime cannot be separated since they form an integral part, where an aborted legislature is interpreted as a signal that also the executive is not standing for election any longer, and vice versa.

RESPONSES:

0: No.

1: Yes.

SCALE: Dichotomous.

SOURCE(S): v2xel_elecparl v2xlg_leginter v2xel_elecpres v2x_hosinter v2x_hosabort

2.3.39.9 Freedom of discussion (v2xcl_disc)

Long tag: vdem_cy_v2xcl_disc

Original tag: v2xcl_disc

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: v2cldiscm v2cldiscw

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): Pamela Paxton, Svend-Erik Skaaning

ADDITIONAL VERSIONS: *_codelow, *_codehigh, *_sd

QUESTION: Are citizens able to openly discuss political issues in private homes and in public spaces?

CLARIFICATION: This indicator specifies the extent to which citizens are able to engage in private discussions, particularly on political issues, in private homes and public spaces restaurants, public transportation, sports events, work etc. without fear of harassment by other members of the polity or the public authorities. We are interested in restrictions by the government and its agents but also cultural restrictions or customary laws that are enforced by other members of the polity, sometimes in informal ways.

SCALE: Interval, from low to high (0-1).

SOURCE(S): v2cldiscm v2cldiscw

DATA RELEASE: 1-13.

AGGREGATION: We estimate the index by averaging two indicators: freedom of discussion for men (v2cldiscm) and women (v2cldiscw).

CITATION: *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

2.3.39.10 Freedom of domestic movement (v2xcl_dmove)

Long tag: vdem_cy_v2xcl_dmove

Variable citation: v2cldmovem v2cldmovew

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): Pamela Paxton, Svend-Erik Skaaning

ADDITIONAL VERSIONS: *_codelow, *_codehigh, *_sd

QUESTION: Do citizens enjoy freedom of movement and residence?

CLARIFICATION: This indicator specifies the extent to which citizens are able to move freely, in daytime and nighttime, in public thoroughfares, across regions within a country, and to establish permanent residency where they wish. Note that restrictions in movement might be imposed by the state and/or by informal norms and practices. Such restrictions sometimes fall on rural residents, on specific social groups, or on dissidents.

Do *not* consider restrictions in movement that are placed on ordinary non-political criminals.

Do not consider restrictions in movement that result from crime or unrest.

SCALE: Interval, from low to high (0-1).

SOURCE(S): v2cldmovem v2cldmovew

DATA RELEASE: 1-13.

AGGREGATION: We estimate the index by averaging two indicators: freedom of domestic movement for men (v2cldmovem) and women (v2cldmovew).

2.3.39.14 Legislature directly elected (v2xex_elecleg)

Long tag: vdem_cy_v2xex_elecleg

Original tag: v2xex_elecleg

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: v2lgello v2lgelecup v2lginello v2lginelup v2exapup v2exapupap

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): Jan Teorell

QUESTION: To what extent is the legislature directly or indirectly elected?

CLARIFICATION: If the legislature is unicameral, v2xex_elecleg is measured as the proportion of legislators directly elected + half of the proportion that are indirectly elected. If the legislature is bicameral and the upper house is involved in the appointment of the chief

executive, the same proportion of directly and half of the indirectly elected legislators is calculated for the upper house; the scores for the lower and upper houses are then averaged.

Note that a popular election is minimally defined and also includes sham elections with limited suffrage and no competition.

This index is useful primarily for aggregating higher-order indices and should not necessarily be interpreted as an important element of democracy in its own right. Since the variables coding the share of directly and indirectly elected legislators are not yet fully in sync for all country dates, a few observations now receive an index value larger than 1.

RESPONSES:

Proportion.

SCALE: Interval.

2.3.40 Other Indices Created Using V-Dem Data - Party Institutionalization

The *Party Institutionalization Index* uses V-Dem data but is not a subcomponent of the V-Dem Democracy Indices. Please see Appendix A of the V -Dem codebook (<https://www.v-dem.net/static/website/img/refs/codebookv12.pdf>) for an overview of all indices, component-indices, and lower-level indices.

2.3.40.1 Party institutionalization index (v2xps_party)

Long tag: vdem_cy_v2xps_party

Original tag: v2xps_party

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Bizzarro Neto *et al.* (2017), v2psorgs v2psprbrch v2psprlnks v2psplats v2pscohesv v2lgello

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): Allen Hicken

ADDITIONAL VERSIONS: *_codelow, *_codehigh

QUESTION: To what extent are political parties institutionalized?

CLARIFICATION: Party institutionalization refers to various attributes of the political parties in a country, *e.g.*, level and depth of organization, links to civil society, cadres of party activists, party supporters within the electorate, coherence of party platforms and ideologies, party-line voting among representatives within the legislature. A high score on these attributes generally indicates a more institutionalized party system.

This index considers the attributes of all parties with an emphasis on larger parties, *i.e.*, those that may be said to dominate and define the party system.

SCALE: Interval, from low to high (0-1).

SOURCE(S): v2psorgs v2psprbrch v2psprlnks v2psplats v2pscohesv v2lgello

DATA RELEASE: 1-13. Release 1-6 Party system institutionalization index, release 7 changed to Party institutionalization index.

AGGREGATION: The index is formed by adding scaled indicators for party organizations (v2psorgs), party branches (v2psprbrch), party linkages (v2psprlnks), distinct party platforms (v2psplats), and legislative party cohesion (v2pscohesv, set to missing when the lower chamber of legislature (v2lgello) does not exist). The index is then converted to its CDF in order to range from 0 to 1.

CITATION: Bizzarro *et al.* (2017, *V-Dem Working Paper Series* 2017:48); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

2.3.41 Other Indices Created Using V-Dem Data - Consensual Democracy Dimensions

The *Consensual Democracy Dimensions Index* uses V-Dem data but is not a subcomponent of the V-Dem Democracy Indices. Please see Appendix A of the V -Dem codebook (<https://www.v-dem.net/static/website/img/refs/codebookv12.pdf>) for an overview of all indices, component-indices, and lower-level indices.

2.3.41.1 Divided party control index (v2x_divparctrl)

Long tag: vdem_cy_v2x_divparctrl

Original tag: v2x_divparctrl

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: v2psnatpar v2psnatpar_ord

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): Michael Coppedge, Svend-Erik Skaaning

QUESTION: Are the executive and legislature controlled by different political parties?

CLARIFICATION: This variable is a reordered version of the continuous measurement model estimates for indicator v2psnatpar: National party control. After reordering, the positive extreme signifies Divided party control. A Different parties or individuals unconnected to parties control the executive and the legislature or B Executive power is divided between a president/monarch and a prime minister, each of which belongs to different parties; or between a non-partisan monarch and a prime minister. The intermediate values signify Unified coalition control. A single multi-party coalition controls the executive and legislative branches of the national government. This is true almost by definition in a parliamentary system where a single coalition gathers together a majority of seats. And the negative extreme signifies "Unified party control. A single party controls the executive and legislative branches of the national government. This is true almost by definition in a parliamentary system where a single party has a majority of seats."

SCALE: Interval, from low to high.

SOURCE(S): v2psnatpar v2psnatpar_ord

NOTES: V-Dem originally intended to generate indices to measure concepts inspired by Arend Lijphart's two dimensions of consensus vs. majoritarian democracy. The project no longer plans to produce such indices. Instead, it offers the two indices, the Divided party control index and the Division of power index, which are conceptually thinner than Lijphart's concepts and not equivalent substitutes for them. However, these alternatives are useful for some purposes.

DATA RELEASE: 6-13. For Version 6 as Divided party control of legislature index v2x_lgdivparctrl, 7 modified to Divided party control index.

AGGREGATION: The reordering is accomplished in two steps. First, 5 is subtracted from v2psnatpar when the ordinal version of this variable, v2psnatpar_ord, is 2. This moves the ordinal score corresponding to unified party control to the lowest values. Then the result is standardized to have a mean of 0 and a standard deviation of 1.

COUNTRY-YEAR AGGREGATION: Last

CITATION: *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1900-2022

2.3.41.2 Division of power index (v2x_feduni)

Long tag: vdem_cy_v2x_feduni

Original tag: v2x_feduni

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: v2ellocgov v2elreggov v2ellocelc v2elsrgel v2ellocpwr v2elrgpwr

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): Michael Coppedge, Svend-Erik Skaaning

QUESTION: Are there elected local and regional governments, and — if so — to what extent can they operate without interference from unelected bodies at the local level?

CLARIFICATION: The lowest score would be reserved for a country that has no elected local or regional governments, or where all or nearly all elected offices are subordinate to non-elected offices at any local or regional level that exists. A high score would be accorded to a country in which both local and regional governments are elected and able to operate without restrictions from unelected actors at the local or regional level with the exception of

judicial bodies. A medium score can be achieved in various ways: there are strong elected governments at the local level but not the regional level, or vice versa; or both local and regional governments elect an executive but not an assembly; or elected and non-elected offices are approximately equal in power at the local and regional levels; or various combinations of these scenarios.

SCALE: Interval, from low to high (0-1).

SOURCE(S): v2ellocgov v2elreggov v2ellocelc v2elsrgel v2ellocpwr v2elrgpwr

NOTES: V-Dem originally intended to generate indices to measure concepts inspired by Arend Lijphart's two dimensions of consensus vs. majoritarian democracy. The project no longer plans to produce such indices. Instead, it offers the two indices, the Divided party control index and the Division of power index, which are conceptually thinner than Lijphart's concepts and not equivalent substitutes for them. However, these alternatives are useful for some purposes.

DATA RELEASE: 6-13.

AGGREGATION: This index is an equally weighted average of a local government index and a regional government index. The local government index is the product of a dummy variable for the existence of local government (v2ellocgov), a recoded version of Local government elected (v2ellocelc), and a CDF of local offices relative power (v2ellocpwr). Local governments are recoded as unelected 0 if they did not exist or if data is missing. They are coded 0.5 if an executive is elected but no assembly, and 1 if an assembly is elected, with or without an executive. The regional government index is calculated the same way but using the existence of regional government (v2elreggov), regional government elected (v2elsrgel), and regional offices relative power (v2elrgpwr).

CITATION: *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 1789-2022

2.3.42 Other Indices Created Using V-Dem Data - Academic Freedom

The *Academic Freedom Index* uses V-Dem data but is not a subcomponent of the V-Dem Democracy Indices. Please see Appendix A of the V-Dem codebook (<https://www.v-dem.net/static/website/img/refs/codebookv12.pdf>) for an overview of all indices, component-indices, and lower-level indices.

2.3.42.1 Academic Freedom Index (v2xca_academ)

Long tag: vdem_cy_v2xca_academ

Original tag: v2xca_academ

YEARS: 1900-2022

2.3.43 Digital Society Survey - Coordinated Information Operations

The Digital Society Survey, designed by the Digital Society Project, contains questions pertaining to the political environment of the internet and social media. The data collected through expert-coded surveys provides information on topics related to coordinated information operations, digital media freedom, online media polarization, social cleavages as well as state internet regulation capacity and approach.

Principal investigators for the Digital Society Project are Valeriya Mechkova, Daniel Pemstein, Brigitte Seim, Steven Wilson.

For more information, please visit www.digitalsocietyproject.org.

Instructions to the coders (as shown in the surveys)

Digital society: The following survey contains questions pertaining to the political environment of the Internet and social media. Please bear in mind the following definitions as you respond to questions on this survey:

The government and its agents include official government organs, such as bureaucracies, courts, intelligence services, and the military, but also unofficial agents, such as officially unaffiliated cyberwarfare operatives who perform services, even “off-book” work, on behalf of the government.

Major political parties include the group of political parties that hold a significant number of seats in national legislative body(-ies), or earn a significant number of votes in elections for the executive. When we ask you to consider “major political parties,” you do not need to consider parties that run in elections but receive only a small minority of seats or votes, or those that receive no seats at all.

We define the Internet as all information that people access over public and private digital networks, worldwide. The Internet includes both publicly accessible digital spaces and private or gated information transmission platforms. The Internet does not include traditional media transmission mechanisms such as paper, television, traditional voice telephone, and radio.

Social media are a subset of Internet platforms that enable normal individuals to create and share content with networks of other people. Social media platforms are available to the public, although content on such networks may be shared privately within subgroups of users. Social media includes both publicly visible, or semi-public platforms, like Facebook, Flickr, Friendster, Google+, Instagram, Myspace, LinkedIn, Twitter, VKontakte, and Weibo and private social networking and messaging platforms like Signal, Slack, Snapchat, or WhatsApp.

Domestic online media is any media source originating in the country in question. For example, the New York Times’ website is domestic online media in the United States, but not in India, even though it operates bureaus in India. Media includes any source reporting on current events or political issues, ranging from well-established brands to newsletters and websites run by an individual.

Cyber security threats include penetration of private digital networks, using means ranging from exploiting software vulnerabilities, password cracking, or social engineering (e.g., tricking individuals into revealing passwords or other information necessary to break into a digital system) to obtain information or disrupt an organization or individual’s use of digital networks and tools. They also include unauthorized alterations of an individual or organization’s digital presence, such as defacing websites and commandeering social media accounts. These threats range from unsophisticated (e.g., exploitation of failure to password protect private networks or use of common passwords by authorized users, and spear phishing) to moderate (e.g., embedding malicious code in

emails or exploiting well-known software flaws that organizations have failed to patch), to sophisticated (e.g., exploiting unknown exploits in commonly used software or even embedding exploits into commercial systems unbeknownst to their creators).

Clarification: When we discuss shutting down online content, please consider instances where a website (or websites) have been taken entirely offline as well as instances where a website (or websites) have been slowed down or had access similarly intentionally inhibited, such that use of this website is challenging. In other words, both outright shutting down and more subtle measures that inhibit access should be considered when answering these questions.

Clarification: When we discuss “censorship” or “censoring” content online, we are not concerned with censorship of topics such as child pornography, highly classified information such as military or intelligence secrets, or defamatory speech, unless this sort of censorship is used as a pretext for censoring political information or opinions.

2.3.43.1 Government dissemination of false information domestic (v2smgovdom)

Long tag: vdem_cy_v2smgovdom

2.3.43.4 Party dissemination of false information abroad (v2smparab)

Long tag: vdem_cy_v2smparab

Original tag: v2smparab

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: How often do major political parties and candidates for office use social media to disseminate misleading viewpoints or false information to influence citizens of other

countries abroad?

RESPONSES:

0: Extremely often. Major political parties and candidates disseminate false information on all key political issues.

1: Often. Major political parties and candidates disseminate false information on many key political issues.

2: About half the time. Major political parties and candidates disseminate false information on some key political issues, but not others.

3: Rarely. Major political parties and candidates disseminate false information on only a few key political issues.

4: Never, or almost never. Major political parties and candidates never disseminate false information on key political issues.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 9-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see V-Dem Methodology).

CITATION: Mechkova *et al.* (2019, *Digital Society Project Working Paper* 2019:1); Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

2.3.44 Digital Society Survey - Digital Media Freedom

The Digital Society Survey, designed by the Digital Society Project, contains questions pertaining to the political environment of the internet and social media. The data collected through expert-coded surveys provides information on topics related to coordinated information operations, digital media freedom, online media polarization, social cleavages as well as state internet regulation capacity and approach.

Principal investigators for the Digital Society Project are Valeriya Mechkova, Daniel Pemstein, Brigitte Seim, Steven Wilson.

For more information, please visit www.digitalsocietyproject.org.

Instructions to the coders (as shown in the surveys)

Digital society: The following survey contains questions pertaining to the political environment of the Internet and social media. Please bear in mind the following definitions as you respond to questions on this survey:

The government and its agents include official government organs, such as bureaucracies, courts, intelligence services, and the military, but also unofficial agents, such as officially unaffiliated cyber-warfare operatives who perform services, even “off-book” work, on behalf of the government.

Major political parties include the group of political parties that hold a significant number of seats in national legislative body(-ies), or earn a significant number of votes in elections for the executive. When we ask you to consider “major political parties,” you do not need to consider parties that run in elections but receive only a small minority of seats or votes, or those that receive no seats at all.

We define the Internet as all information that people access over public and private digital networks, worldwide. The Internet includes both publicly accessible digital spaces and private or gated information transmission platforms. The Internet does not include traditional media transmission mechanisms such as paper, television, traditional voice telephone, and radio.

Social media are a subset of Internet platforms that enable normal individuals to create and share content with networks of other people. Social media platforms are available to the public, although

content on such networks may be shared privately within subgroups of users. Social media includes both publicly visible, or semi-public platforms, like Facebook, Flickr, Friendster, Google+, Instagram, Myspace, LinkedIn, Twitter, VKontakte, and Weibo and private social networking and messaging platforms like Signal, Slack, Snapchat, or WhatsApp.

Domestic online media is any media source originating in the country in question. For example, the New York Times' website is domestic online media in the United States, but not in India, even though it operates bureaus in India. Media includes any source reporting on current events or political issues, ranging from well-established brands to newsletters and websites run by an individual.

Cyber security threats include penetration of private digital networks, using means ranging from exploiting software vulnerabilities, password cracking, or social engineering (e.g., tricking individuals into revealing passwords or other information necessary to break into a digital system) to obtain information or disrupt an organization or individual's use of digital networks and tools. They also include unauthorized alterations of an individual or organization's digital presence, such as defacing websites and commandeering social media accounts. These threats range from unsophisticated (e.g., exploitation of failure to password protect private networks or use of common passwords by authorized users, and spear phishing) to moderate (e.g., embedding malicious code in emails or exploiting well-known software flaws that organizations have failed to patch), to sophisticated (e.g., exploiting unknown exploits in commonly used software or even embedding exploits into commercial systems unbeknownst to their creators).

Clarification: When we discuss shutting down online content, please consider instances where a website (or websites) have been taken entirely offline as well as instances where a website (or websites) have been slowed down or had access similarly intentionally inhibited, such that use of this website is challenging. In other words, both outright shutting down and more subtle measures that inhibit access should be considered when answering these questions.

Clarification: When we discuss "censorship" or "censoring" content online, we are not concerned with censorship of topics such as child pornography, highly classified information such as military or intelligence secrets, or defamatory speech, unless this sort of censorship is used as a pretext for censoring political information or opinions.

2.3.44.1 Government Internet filtering capacity (v2smgovfilcap)

Long tag: vdem_cy_v2smgovfilcap

Original tag: v2smgovfilcap

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Independent of whether it actually does so in practice, does the government have the technical capacity to censor information (text, audio, images, or video) on the Internet by filtering (blocking access to certain websites) if it decided to?

RESPONSES:

0: The government lacks any capacity to block access to any sites on the Internet.

1: The government has limited capacity to block access to a few sites on the Internet.

2: The government has adequate capacity to block access to most, but not all, specific sites on the Internet if it wanted to.

3: The government has the capacity to block access to any sites on the Internet if it wanted to.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 9-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see V-Dem Methodology).

CITATION: Mechkova et al. (2019, *Digital Society Project Working Paper 2019:1*); Pemstein et al. (2023, *V-Dem Working Paper Series 2023:21*); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 2000-2022

2.3.44.2 Government Internet filtering in practice (v2smgovfilprc)

Long tag: vdem_cy_v2smgovfilprc

Original tag: v2smgovfilprc

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: How frequently does the government censor political information (text, audio, images, or video) on the Internet by filtering (blocking access to certain websites)?

RESPONSES:

0: Extremely often. It is a regular practice for the government to remove political content, except to sites that are pro-government.

1: Often. The government commonly removes online political content, except sites that are pro-government.

2: Sometimes. The government successfully removes about half of the critical online political content.

3: Rarely. There have been only a few occasions on which the government removed political content.

4: Never, or almost never. The government allows Internet access that is unrestricted, with the exceptions mentioned in the clarifications section.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 9-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see V-Dem Methodology).

CITATION: Mechkova *et al.* (2019, *Digital Society Project Working Paper* 2019:1); Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 2000-2022

2.3.44.3 Government Internet shut down capacity (v2smgovshutcap)

Long tag: vdem_cy_v2smgovshutcap

Original tag: v2smgovshutcap

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Independent of whether it actually does so in practice, does the government have the technical capacity to actively shut down domestic access to the Internet if it decided to?

CLARIFICATION: A domestic Internet connection is any connection originating physically within the country, whether over wired, wireless, or satellite networks. This question asks what proportion of potential Internet connections of domestic origin the government has the capacity to render inoperable.

RESPONSES:

0: The government lacks the capacity to shut down any domestic Internet connections.

1: The government has the capacity to shut down roughly a quarter of domestic access to the Internet.

2: The government has the capacity to shut down roughly half of domestic access to the Internet.

3: The government has the capacity to shut down roughly three quarters of domestic access to the Internet.

4: The government has the capacity to shut down all, or almost all, domestic access to the Internet.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 9-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see V-Dem Methodology).

CITATION: Mechkova *et al.* (2019, *Digital Society Project Working Paper* 2019:1); Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 2000-2022

2.3.44.4 Government Internet shut down in practice (v2smgovshut)

Long tag: vdem_cy_v2smgovshut

Original tag: v2smgovshut

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: How often does the government shut down domestic access to the Internet?

RESPONSES:

0: Extremely often. It is a regular practice for the government to shut down domestic access to the Internet.

1: Often. The government shut down domestic access to the Internet numerous times this year.

2: Sometimes. The government shut down domestic access to the Internet several times this year.

3: Rarely but there have been a few occasions throughout the year when the government shut down domestic access to Internet.

4: Never, or almost never. The government does not typically interfere with the domestic access to the Internet.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 9-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see V-Dem Methodology).

CITATION: Mechkova *et al.* (2019, *Digital Society Project Working Paper* 2019:1); Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 2000-2022

2.3.44.5 Government social media shut down in practice (v2smgovsm)

Long tag: vdem_cy_v2smgovsm

Original tag: v2smgovsm

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: How often does the government shut down access to social media platforms?

RESPONSES:

0: Extremely often. It is a regular practice for the government to shut down access to social media.

1: Often. The government shuts down access to social media numerous times this year.

2: Sometimes. The government shuts down access to social media several times this year.

3: Rarely. There have been a few occasions throughout the year when the government shuts down access to social media.

4: Never, or almost never. The government does not interfere with the access to social media, except in the cases mentioned in the clarifications section.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 9-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see V-Dem Methodology).

2.3.44.6 Government social media alternatives (v2smgovsmalt)

Long tag: vdem_cy_v2smgovsmalt

Original tag: v2smgovsmalt

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: How prevalent is the usage of social media platforms that are wholly controlled by either the government or its agents in this country?

RESPONSES:

0: Essentially all social media usage takes place on platforms controlled by the state.

1: Most usage of social media is on state-controlled platforms, although some groups use non-state-controlled alternatives.

2: There is significant usage of both state-controlled and non-state-controlled social media platforms.

3: While some state-controlled social media platforms exist, their usage only represents a small share of social media usage in the country.

4: Practically no one uses state-controlled social media platforms.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 9-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see V-Dem Methodology).

CITATION: Mechkova *et al.* (2019, *Digital Society Project Working Paper* 2019:1); Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 2000-2022

2.3.44.7 Government social media monitoring (v2smgovsmmon)

Long tag: vdem_cy_v2smgovsmmon

Original tag: v2smgovsmmon

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: How comprehensive is the surveillance of political content in social media by the government or its agents?

RESPONSES:

0: Extremely comprehensive. The government surveils virtually all content on social media.

1: Mostly comprehensive. The government surveils most content on social media, with comprehensive monitoring of most key political issues.

2: Somewhat comprehensive. The government does not universally surveil social media but

can be expected to surveil key political issues about half the time.

3: Limited. The government only surveils political content on social media on a limited basis.

4: Not at all, or almost not at all. The government does not surveil political content on social media, with the exceptions mentioned in the clarifications section.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 9-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see V-Dem Methodology).

CITATION: Mechkova *et al.* (2019, *Digital Society Project Working Paper* 2019:1); Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 2000-2022

2.3.44.8 Government social media censorship in practice (v2smgovsmcenprc)

Long tag: vdem_cy_v2smgovsmcenprc

Original tag: v2smgovsmcenprc

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: To what degree does the government censor political content (i.e., deleting or filtering specific posts for political reasons) on social media in practice?

RESPONSES:

0: The government simply blocks all social media platforms.

1: The government successfully censors all social media with political content.

2: The government successfully censors a significant portion of political content on social media, though not all of it.

3: The government only censors social media with political content that deals with especially sensitive issues.

4: The government does not censor political social media content, with the exceptions mentioned in the clarifications section.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 9-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see V-Dem Methodology).

CITATION: Mechkova *et al.* (2019, *Digital Society Project Working Paper* 2019:1); Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

2.3.45 Digital Society Survey - State Internet Regulation Capacity and Approach

The Digital Society Survey, designed by the Digital Society Project, contains questions pertaining to the political environment of the internet and social media. The data collected through expert-coded surveys provides information on topics related to coordinated information operations, digital media freedom, online media polarization, social cleavages as well as state internet regulation capacity and approach.

Principal investigators for the Digital Society Project are Valeriya Mechkova, Daniel Pemstein, Brigitte Seim, Steven Wilson.

For more information, please visit www.digitalsocietyproject.org.

Instructions to the coders (as shown in the surveys)

Digital society: The following survey contains questions pertaining to the political environment of the Internet and social media. Please bear in mind the following definitions as you respond to questions on this survey:

The government and its agents include official government organs, such as bureaucracies, courts, intelligence services, and the military, but also unofficial agents, such as officially unaffiliated cyberwarfare operatives who perform services, even “off-book” work, on behalf of the government.

Major political parties include the group of political parties that hold a significant number of seats in national legislative body(-ies), or earn a significant number of votes in elections for the executive. When we ask you to consider “major political parties,” you do not need to consider parties that run in elections but receive only a small minority of seats or votes, or those that receive no seats at all.

We define the Internet as all information that people access over public and private digital networks, worldwide. The Internet includes both publicly accessible digital spaces and private or gated information transmission platforms. The Internet does not include traditional media transmission mechanisms such as paper, television, traditional voice telephone, and radio.

Social media are a subset of Internet platforms that enable normal individuals to create and share content with networks of other people. Social media platforms are available to the public, although content on such networks may be shared privately within subgroups of users. Social media includes both publicly visible, or semi-public platforms, like Facebook, Flickr, Friendster, Google+, Instagram, Myspace, LinkedIn, Twitter, VKontakte, and Weibo and private social networking and messaging platforms like Signal, Slack, Snapchat, or WhatsApp.

Domestic online media is any media source originating in the country in question. For example, the New York Times’ website is domestic online media in the United States, but not in India, even though it operates bureaus in India. Media includes any source reporting on current events or political issues, ranging from well-established brands to newsletters and websites run by an individual.

Cyber security threats include penetration of private digital networks, using means ranging from exploiting software vulnerabilities, password cracking, or social engineering (e.g., tricking individuals into revealing passwords or other information necessary to break into a digital system) to obtain information or disrupt an organization or individual’s use of digital networks and tools. They also include unauthorized alterations of an individual or organization’s digital presence, such as defacing websites and commandeering social media accounts. These threats range from unsophisticated (e.g., exploitation of failure to password protect private networks or use of common passwords by authorized users, and spear phishing) to moderate (e.g., embedding malicious code in emails or exploiting well-known software flaws that organizations have failed to patch), to sophisticated (e.g., exploiting unknown exploits in commonly used software or even embedding exploits into commercial systems unbeknownst to their creators).

Clarification: When we discuss shutting down online content, please consider instances where a website (or websites) have been taken entirely offline as well as instances where a website (or websites) have been slowed down or had access similarly intentionally inhibited, such that use of this website is challenging. In other words, both outright shutting down and more subtle measures that inhibit access should be considered when answering these questions.

Clarification: When we discuss “censorship” or “censoring” content online, we are not concerned with censorship of topics such as child pornography, highly classified information such as military or intelligence secrets, or defamatory speech, unless this sort of censorship is used as a pretext for censoring political information or opinions.

2.3.45.1 Internet legal regulation content (v2smregcon)

Long tag: vdem_cy_v2smregcon

Original tag: v2smregcon

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr
 QUESTION: What type of content is covered in the legal framework to regulate Internet?

RESPONSES:

0: The state can remove any content at will.

1: The state can remove most content, and the law protects speech in only specific, and politically uncontroversial contexts.

2: The legal framework is ambiguous. The state can remove some politically sensitive content, while other is protected by law.

3: The law protects most political speech, but the state can remove especially politically controversial content.

4: The law protects political speech, and the state can only remove content if it violates well-established legal criteria.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 9-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see V-Dem Methodology).

2.3.45.3 Privacy protection by law content (v2smprivcon)

Long tag: vdem_cy_v2smprivcon

Original tag: v2smprivcon

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: What does the legal framework to protect Internet users' privacy and their data stipulate?

RESPONSES:

0: The legal framework explicitly allows the government to access any type of personal data on the Internet.

1: The legal framework explicitly allows the government to access most types of personal data on the Internet.

2: The legal framework explicitly allows the government to access many types of personal data on the Internet.

3: The legal framework explicitly allows the government to access only a few types of personal information on the Internet.

4: The legal framework explicitly allows the government to access personal information on the Internet only in extraordinary circumstances.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 9-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see V-Dem Methodology).

2.3.45.4 Government capacity to regulate online content (v2smregcap)

Long tag: vdem_cy_v2smregcap

Original tag: v2smregcap

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Does the government have sufficient staff and resources to regulate Internet content in accordance with existing law?

RESPONSES:

0: No, almost all online activity happens outside of reach of the state, where it lacks the capacity to remove illegal content.

1: Not really. The state has extremely limited resources to regulate online content.

2: Somewhat. The state has the capacity to regulate only some online content or some portions of the law.

3: Mostly. The state has robust capacity to regulate online content, though not enough to regulate all content and all portions of the law.

4: Yes, the government has sufficient capacity to regulate all online content.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 9-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see V-Dem Methodology).

CITATION: Mechkova *et al.* (2019, *Digital Society Project Working Paper* 2019:1); Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

2.3.45.5 Government online content regulation approach (v2smregapp)

Long tag: vdem_cy_v2smregapp

Original tag: v2smregapp

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr
 QUESTION: Does the government use its own resources and institutions to monitor and regulate online content or does it distribute this regulatory burden to private actors such as Internet service providers?

RESPONSES:

0: All online content monitoring and regulation is done by the state.

1: Most online content monitoring and regulation is done by the state, though the state involves private actors in a limited way.

2: Some online content monitoring and regulation is done by the state, but the state also involves private actors in monitoring and regulation in various ways.

3: The state does little online content monitoring and regulation, and entrusts most of the monitoring and regulation to private actors.

4: The state off-loads all online content monitoring and regulation to private actors.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 9-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see V-Dem Methodology).

2.3.46 Digital Society Survey - Online Media Polarization

The Digital Society Survey, designed by the Digital Society Project, contains questions pertaining to the political environment of the internet and social media. The data collected through expert-coded surveys provides information on topics related to coordinated information operations, digital media freedom, online media polarization, social cleavages as well as state internet regulation capacity and approach.

Principal investigators for the Digital Society Project are Valeriya Mechkova, Daniel Pemstein, Brigitte Seim, Steven Wilson.

For more information, please visit www.digitalsocietyproject.org.

Instructions to the coders (as shown in the surveys)

Digital society: The following survey contains questions pertaining to the political environment of the Internet and social media. Please bear in mind the following definitions as you respond to questions on this survey:

The government and its agents include official government organs, such as bureaucracies, courts, intelligence services, and the military, but also unofficial agents, such as officially unaffiliated cyber-warfare operatives who perform services, even “off-book” work, on behalf of the government.

Major political parties include the group of political parties that hold a significant number of seats in national legislative body(-ies), or earn a significant number of votes in elections for the executive. When we ask you to consider “major political parties,” you do not need to consider parties that run in elections but receive only a small minority of seats or votes, or those that receive no seats at all.

We define the Internet as all information that people access over public and private digital networks, worldwide. The Internet includes both publicly accessible digital spaces and private or gated information transmission platforms. The Internet does not include traditional media transmission mechanisms such as paper, television, traditional voice telephone, and radio.

Social media are a subset of Internet platforms that enable normal individuals to create and share content with networks of other people. Social media platforms are available to the public, although content on such networks may be shared privately within subgroups of users. Social media includes

both publicly visible, or semi-public platforms, like Facebook, Flickr, Friendster, Google+, Instagram, Myspace, LinkedIn, Twitter, VKontakte, and Weibo and private social networking and messaging platforms like Signal, Slack, Snapchat, or WhatsApp.

Domestic online media is any media source originating in the country in question. For example, the New York Times' website is domestic online media in the United States, but not in India, even though it operates bureaus in India. Media includes any source reporting on current events or political issues, ranging from well-established brands to newsletters and websites run by an individual.

Cyber security threats include penetration of private digital networks, using means ranging from exploiting software vulnerabilities, password cracking, or social engineering (e.g., tricking individuals into revealing passwords or other information necessary to break into a digital system) to obtain information or disrupt an organization or individual's use of digital networks and tools. They also include unauthorized alterations of an individual or organization's digital presence, such as defacing websites and commandeering social media accounts. These threats range from unsophisticated (e.g., exploitation of failure to password protect private networks or use of common passwords by authorized users, and spear phishing) to moderate (e.g., embedding malicious code in emails or exploiting well-known software flaws that organizations have failed to patch), to sophisticated (e.g., exploiting unknown exploits in commonly used software or even embedding exploits into commercial systems unbeknownst to their creators).

Clarification: When we discuss shutting down online content, please consider instances where a website (or websites) have been taken entirely offline as well as instances where a website (or websites) have been slowed down or had access similarly intentionally inhibited, such that use of this website is challenging. In other words, both outright shutting down and more subtle measures that inhibit access should be considered when answering these questions.

Clarification: When we discuss "censorship" or "censoring" content online, we are not concerned with censorship of topics such as child pornography, highly classified information such as military or intelligence secrets, or defamatory speech, unless this sort of censorship is used as a pretext for censoring political information or opinions.

2.3.46.1 Online media existence (v2smonex)

Long tag: vdem_cy_v2smonex

Original tag: v2smonex

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Do people consume domestic online media?

RESPONSES:

0: Not at all. No one consumes domestic online media. Skip next question if this answer is selected.

1: Limited. Domestic online media consumption is limited.

2: Relatively extensive. Domestic online media consumption is common.

3: Extensive. Almost everyone consumes domestic online media.

ORDERING: if 0, skip v2smonper

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 9-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see V-Dem Methodology).

CITATION: Mechkova et al. (2019, *Digital Society Project Working Paper* 2019:1); Pemstein et al. (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 2000-2022

2.3.46.2 Online media perspectives (v2smonper)

Long tag: vdem_cy_v2smonper

Original tag: v2smonper

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Do the major domestic online media outlets represent a wide range of political perspectives?

RESPONSES:

0: The major domestic online media outlets represent only the government's perspective.

1: The major domestic online media outlets represent only the perspectives of the government and a government approved, semi-official opposition party.

2: The major domestic online media outlets represent a variety of political perspectives but they systematically ignore at least one political perspective that is important in this society.

3: All perspectives that are important in this society are represented in at least one of the major domestic online media outlets.

4: All perspectives that are important in this society are represented in many major domestic online media outlets.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 9-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see V-Dem Methodology).

CITATION: Mechkova *et al.* (2019, *Digital Society Project Working Paper* 2019:1); Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 2000-2022

2.3.46.3 Online media fractionalization (v2smmefra)

Long tag: vdem_cy_v2smmefra

Original tag: v2smmefra

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Do the major domestic online media outlets give a similar presentation of major (political) news?

RESPONSES:

0: No. The major domestic online media outlets give opposing presentation of major events.

1: Not really. The major domestic online media outlets differ greatly in the presentation of major events.

2: Sometimes. The major domestic online media outlets give a similar presentation of major events about half the time.

3: Mostly. The major domestic online media outlets mostly give a similar presentation of major events.

4: Yes. Although there are small differences in representation, the major domestic online media outlets give a similar presentation of major events.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 9-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see V-Dem Methodology).

YEARS: 2000-2022

2.3.47 Digital Society Survey - Social Cleavages

The Digital Society Survey, designed by the Digital Society Project, contains questions pertaining to the political environment of the internet and social media. The data collected through expert-coded surveys provides information on topics related to coordinated information operations, digital media freedom, online media polarization, social cleavages as well as state internet regulation capacity and approach.

Principal investigators for the Digital Society Project are Valeriya Mechkova, Daniel Pemstein, Brigitte Seim, Steven Wilson.

For more information, please visit www.digitalsocietyproject.org.

Instructions to the coders (as shown in the surveys)

Digital society: The following survey contains questions pertaining to the political environment of the Internet and social media. Please bear in mind the following definitions as you respond to questions on this survey:

The government and its agents include official government organs, such as bureaucracies, courts, intelligence services, and the military, but also unofficial agents, such as officially unaffiliated cyberwarfare operatives who perform services, even “off-book” work, on behalf of the government.

Major political parties include the group of political parties that hold a significant number of seats in national legislative body(-ies), or earn a significant number of votes in elections for the executive. When we ask you to consider “major political parties,” you do not need to consider parties that run in elections but receive only a small minority of seats or votes, or those that receive no seats at all.

We define the Internet as all information that people access over public and private digital networks, worldwide. The Internet includes both publicly accessible digital spaces and private or gated information transmission platforms. The Internet does not include traditional media transmission mechanisms such as paper, television, traditional voice telephone, and radio.

Social media are a subset of Internet platforms that enable normal individuals to create and share content with networks of other people. Social media platforms are available to the public, although content on such networks may be shared privately within subgroups of users. Social media includes both publicly visible, or semi-public platforms, like Facebook, Flickr, Friendster, Google+, Instagram, Myspace, LinkedIn, Twitter, VKontakte, and Weibo and private social networking and messaging platforms like Signal, Slack, Snapchat, or WhatsApp.

Domestic online media is any media source originating in the country in question. For example, the New York Times’ website is domestic online media in the United States, but not in India, even though it operates bureaus in India. Media includes any source reporting on current events or political issues, ranging from well-established brands to newsletters and websites run by an individual.

Cyber security threats include penetration of private digital networks, using means ranging from exploiting software vulnerabilities, password cracking, or social engineering (e.g., tricking individuals into revealing passwords or other information necessary to break into a digital system) to obtain information or disrupt an organization or individual’s use of digital networks and tools. They also include unauthorized alterations of an individual or organization’s digital presence, such as defacing websites and commandeering social media accounts. These threats range from unsophisticated (e.g., exploitation of failure to password protect private networks or use of common passwords by authorized users, and spear phishing) to moderate (e.g., embedding malicious code in emails or exploiting well-known software flaws that organizations have failed to patch), to sophisticated (e.g., exploiting unknown exploits in commonly used software or even embedding exploits into commercial systems unbeknownst to their creators).

Clarification: When we discuss shutting down online content, please consider instances where a website (or websites) have been taken entirely offline as well as instances where a website (or websites) have been slowed down or had access similarly intentionally inhibited, such that use of this website is challenging. In other words, both outright shutting down and more subtle measures that inhibit access should be considered when answering these questions.

Clarification: When we discuss “censorship” or “censoring” content online, we are not concerned

with censorship of topics such as child pornography, highly classified information such as military or intelligence secrets, or defamatory speech, unless this sort of censorship is used as a pretext for censoring political information or opinions.

2.3.47.1 Use of social media to organize offline violence (v2smorgviol)

Long tag: vdem_cy_v2smorgviol

2.3.47.6 Polarization of society (v2smpolsoc)

Long tag: vdem_cy_v2smpolsoc

Original tag: v2smpolsoc

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: How would you characterize the differences of opinions on major political issues in this society?

CLARIFICATION: While plurality of views exists in all societies, we are interested in knowing the extent to which these differences in opinions result in major clashes of views and polarization or, alternatively, whether there is general agreement on the general direction this society should develop.

RESPONSES:

0: Serious polarization. There are serious differences in opinions in society on almost all key political issues, which result in major clashes of views.

1: Moderate polarization. There are differences in opinions in society on many key political issues, which result in moderate clashes of views.

2: Medium polarization. Differences in opinions are noticeable on about half of the key political issues, resulting in some clashes of views.

3: Limited polarization. There are differences in opinions on only a few key political issues, resulting in few clashes of views.

4: No polarization. There are differences in opinions but there is a general agreement on the

direction for key political issues.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 9-13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see V-Dem Methodology).

CITATION: Mechkova *et al.* (2019, *Digital Society Project Working Paper* 2019:1); Pemstein *et al.* (2023, *V-Dem Working Paper Series* 2023:21); *V-Dem Codebook* (see suggested citation at the top of this document).

YEARS: 2000-2022

YEARS: 2000-2022

CONVERGENCE: Model parameters with convergence issues: country-date latent trait estimates, universal thresholds, expert reliability, expert thresholds, main-country-coded thresholds.

2.3.47.8 Online harassment groups (v2smhargr)

Long tag: vdem_cy_v2smhargr

Original tag: v2smhargr

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_nr

QUESTION: Which groups are targets of hate speech or harassment in online media?

CLARIFICATION: Multiple selection. Choose all that apply.

RESPONSES:

0: Women [v2smhargr_0]

1: LGBTQ groups and individuals [v2smhargr_1]

2: Specific religious groups [v2smhargr_2]

3: Specific ethnic groups [v2smhargr_3]
 4: Specific caste [v2smhargr_4]
 5: Specific language groups [v2smhargr_5]
 6: Specific race [v2smhargr_6]
 7: People with physical or cognitive disabilities [v2smhargr_7]
 8: People from specific regions [v2smhargr_8]
 9: Other (specify in the next question) [v2smhargr_9]
 10: No group is a specific target [v2smhargr_10]
 SCALE: Series of dichotomous scales.
 DATA RELEASE: 9-13.
 CROSS-CODER AGGREGATION: Mean.
 CITATION: Mechkova *et al.* (2019, *Digital Society Project Working Paper* 2019:1); *V-Dem Codebook* (see suggested citation at the top of this document).
 YEARS: 2000-2022

2.3.47.9 Types of organization through social media (v2smorgtypes)

Long tag: vdem_cy_v2smorgtypes

Original tag: v2smorgtypes

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_nr

QUESTION: What types of offline political action are most commonly mobilized on social media?

CLARIFICATION: Multiple selection. Choose all that apply.

RESPONSES:

0: Petition signing [v2smorgtypes_0]

1: Voter turnout [v2smorgtypes_1]

2: Street protests [v2smorgtypes_2]

3: Strikes/labor actions [v2smorgtypes_3]

4: Riots [v2smorgtypes_4]

5: Organized rebellion [v2smorgtypes_5]

6: Vigilante Justice (e.g., mob lynching, stalking harassment) [v2smorgtypes_6]

7: Terrorism [v2smorgtypes_7]

8: Ethnic cleansing/genocide [v2smorgtypes_8]

9: Other (specify in the next question) [v2smorgtypes_9]

SCALE: Series of dichotomous scales.

DATA RELEASE: 9-13.

CROSS-CODER AGGREGATION: Mean.

CITATION: Mechkova *et al.* (2019, *Digital Society Project Working Paper* 2019:1); *V-Dem Codebook* (see suggested citation at the top of this document).

2.3.48 Other Democracy Indices and Indicators - Ordinal Versions of Indices

This section lists other indicators on democracy, that may help in evaluating the causes and effects of democracy or which may provide convergent validity tests for V-Dem data, divided into sections based on source.

2.3.48.1 Additive polyarchy index ordinal (e_v2x_api_3c)

Long tag: vdem_cy_e_v2x_api_3c

Original tag: e_v2x_api_3C

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Lindberg (2016), v2x_api

Description:

VARIABLE TYPE: D

AVAILABLE VERSIONS: *_3C, *_4C, *_5C

QUESTION: To what extent is the electoral principle of democracy achieved?

CLARIFICATION: These are ordinalized versions of the V-Dem Additive polyarchy index. The original index ranges from 0 to 1. These transformations offer three different ordinal versions with three (_3C), four (_4C), and five (_5C) levels respectively.

For the _3C-version, one can interpret 0.0 as *quot;Autocraticquot;*, 0.5 as *quot;Electoral Authoritarianquot;*, and 1.0 as *quot;Minimally Democraticquot;*.

For the _4C-version, one can interpret 0.0 as *Autocraticquot;*, 0.33 as *quot;Electoral Authoritarianquot;*, 0.67 as *quot;Minimally Democraticquot;*, and 1.0 as *quot;Democraticquot;*.

For the _5C-version, one can interpret 0.0 as *quot;Closed Autocraticquot;*, 0.25 as *quot;Autocraticquot;*, 0.5 as *quot;Ambivalentquot;*, 0.75 as *quot;Minimally Democraticquot;*, and 1.0 as *quot;Democraticquot;*.

Long tag: vdem_cy_e_v2xcs_ccsi_3c

Original tag: e_v2xcs_ccsi_3C

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Lindberg (2016), v2cseeorgs v2csreprss v2csprtcpt

Description:

VARIABLE TYPE: D

AVAILABLE VERSIONS: *_3C, *_4C, *_5C

QUESTION: How robust is civil society?

CLARIFICATION: These are ordinalized versions of the V-Dem core civil society index. The original index ranges from 0 to 1. These transformations offer three different ordinal versions with three (_3C), four (_4C), and five (_5C) levels respectively.

SCALE: Ordinal.

SOURCE(S): v2cseeorgs v2csreprss v2csprtcpt

DATA RELEASE: 5-13.

AGGREGATION: Same transformation rule as for `quot;v2x_libdem_3C/_4C/_5Cquot;`.

CITATION: Lindberg (2016).

YEARS: 1789-2022

2.3.48.33 Direct popular vote index ordinal (e_v2xdd_dd_3c)

Long tag: vdem_cy_e_v2xdd_dd_3c

Original tag: e_v2xdd_dd_3C

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Lindberg (2016), v2ddlexci v2ddsigpci v2ddsiglci v2ddsigdci v2ddpartci v2ddapprci v2ddspmc i v2ddadmci v2ddyrci v2ddlexrf v2ddsigprf v2ddsigdrf v2ddpartrf v2ddapprrf v2ddspmr f v2ddadmrf v2ddyrrf v2ddpartpl v2ddapprpl v2ddspmpl v2ddadmpl v2ddlexpl v2ddy rpl v2ddlexor v2ddpartor v2ddappor v2ddspmor v2ddadmor v2ddyror, v2ddthreor, v2ddthrerf, v2ddthrepl

Description:

VARIABLE TYPE: D

AVAILABLE VERSIONS: *_3C, *_4C, *_5C

QUESTION: To what extent is the direct popular vote utilized?

CLARIFICATION: These are ordinalized versions of the V-Dem direct popular vote index. The original index ranges from 0 to 1. These transformations offer three different ordinal versions with three (_3C), four (_4C), and five (_5C) levels respectively.

SCALE: Ordinal.

2.3.49 Other Democracy Indices and Indicators - Political Regimes

This section lists other indicators on democracy, that may help in evaluating the causes and effects of democracy or which may provide convergent validity tests for V-Dem data, divided into sections based on source.

2.3.49.1 Democracy (BMR) (`e_boix_regime`)

Long tag: `vdem_cy_e_boix_regime`

Original tag: `e_boix_regime`

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Boix et al. (2013, 2022)

Description:

VARIABLE TYPE: E

QUESTION: Is a country democratic?

CLARIFICATION: Dichotomous democracy measure based on contestation and participation. Countries coded democratic have (1) political leaders that are chosen through free and fair elections and (2) a minimal level of suffrage.

RESPONSES:

0: No

1: Yes

SOURCE(S): Boix *et al.* (2013), Boix *et al.* (2022)

NOTES: This variable is taken from version 4 of the Boix-Miller-Rosato dataset. Last update, January 2022.

DATA RELEASE: 5-13.

CITATION: Boix *et al.* (2013).

YEARS: 1800-2020

2.3.49.2 Democratic breakdowns (Boix et al.) (`e_democracy_breakdowns`)

Long tag: `vdem_cy_e_democracy_breakdowns`

Original tag: `e_democracy_breakdowns`

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Boix et al. (2013)

Description:

VARIABLE TYPE: E

QUESTION: How many previous democratic breakdowns occurred?

RESPONSES:

Numeric.

SOURCE(S): Boix *et al.* (2013), Boix *et al.* (2022)

NOTES: This variable is taken from version 4 of the Boix-Miller-Rosato dataset. Last update, January 2022.

DATA RELEASE: 5-13.

CITATION: Boix *et al.* (2013).
YEARS: 1800-2020

2.3.49.3 Omitted data (e_democracy_omitteddata)

Long tag: vdem_cy_e_democracy_omitteddata

Original tag: e_democracy_omitteddata

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Boix *et al.* (2013, 2022)

Description:

VARIABLE TYPE: E

QUESTION: Is the country a democracy?

CLARIFICATION: This is the same measure as democracy, except it records an "NA" for countries occupied during an international war (*e.g.*, the Netherlands 1940-44) or experiencing state collapse during a civil war (*e.g.*, Lebanon 1976-89). The democracy variable instead fills in these years as continuations of the same regime type.

RESPONSES:

0: No

1: Yes

2: NA

SOURCE(S): Boix *et al.* (2013), Boix *et al.* (2022)

NOTES: This variable is taken from version 4 of the Boix-Miller-Rosato dataset. Last update, January 2022.

DATA RELEASE: 5-13.

CITATION: Boix *et al.* (2013).

YEARS: 1800-2020

2.3.49.4 Democratic transition (e_democracy_trans)

Long tag: vdem_cy_e_democracy_trans

Original tag: e_democracy_trans

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Boix *et al.* (2013, 2022)

Description:

VARIABLE TYPE: E

QUESTION: Was there a democratic transition?

RESPONSES:

-1: Democratic breakdown

0: No change

1: Democratic transition

SOURCE(S): Boix *et al.* (2013), Boix *et al.* (2022)

NOTES: This variable is taken from version 4 of the Boix-Miller-Rosato dataset. Last update, January 2022.

DATA RELEASE: 5-13.

CITATION: Boix *et al.* (2013).

YEARS: 1800-2020

2.3.50 Other Democracy Indices and Indicators - Freedom House

This section lists other indicators on democracy, that may help in evaluating the causes and effects of democracy or which may provide convergent validity tests for V-Dem data, divided into sections based on source.

2.3.50.1 Freedom House: Civil Liberties (e_fh_cl)

Long tag: vdem_cy_e_fh_cl

Original tag: e_fh_cl

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Freedom House (2022)

Description:

VARIABLE TYPE: E

CLARIFICATION: Civil liberties allow for the freedoms of expression and belief, associational and organizational rights, rule of law, and personal autonomy without interference from the state. The more specific list of rights considered vary over the years.

RESPONSES:

Countries are graded between 1 (most free) and 7 (least free).

SOURCE(S): Freedom House (2022).

NOTES: This variable is rescaled between 0 and 1 for comparison with V-Dem democracy indices for the online visualisation tools on the website.

DATA RELEASE: 5-13.

CITATION: Freedom House (2022)

YEARS: 1972-2021

2.3.50.2 Freedom House: Political Rights (e_fh_pr)

Long tag: vdem_cy_e_fh_pr

Original tag: e_fh_pr

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Freedom House (2022)

Description:

VARIABLE TYPE: E

CLARIFICATION: Political rights enable people to participate freely in the political process, including the right to vote freely for distinct alternatives in legitimate elections, compete for public office, join political parties and organizations, and elect representatives who have a decisive impact on public policies and are accountable to the electorate. The specific list of rights considered varies over the years.

RESPONSES:

Countries are graded between 1 (most free) and 7 (least free).

SOURCE(S): Freedom House (2022).

NOTES: This variable is rescaled between 0 and 1 for comparison with V-Dem democracy indices for the online visualisation tools on the website.

DATA RELEASE: 5-13.

CITATION: Freedom House (2022)

YEARS: 1972-2021

2.3.50.3 Freedom House: Rule of Law (e_fh_rol)

Long tag: vdem_cy_e_fh_rol

Original tag: e_fh_rol

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Freedom House (2022), Teorell et al. (2019)

Description:

VARIABLE TYPE: E

CLARIFICATION: The variable measures the independence of the judiciary; the extent to which rule of law prevails in civil and criminal matters; the existence of direct civil control

over the police; the protection from political terror, unjustified imprisonment, exile and torture; absence of war and insurgencies; and the extent to which laws, policies and practices guarantee equal treatment of various segments of the population.

RESPONSES:

Countries are graded between 0 (worst) and 16 (best).

SOURCE(S): Freedom House (2022). Taken from Teorell et al (2018).

NOTES: This variable is rescaled between 0 and 1 for comparison with V-Dem democracy indices for the online visualisation tools on the website.

DATA RELEASE: 5-13.

CITATION: Freedom House (2022).

YEARS: 2005-2020

2.3.50.4 Freedom House: Status (e_fh_status)

Long tag: vdem_cy_e_fh_status

Original tag: e_fh_status

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Freedom House (2022)

Description:

VARIABLE TYPE: E

RESPONSES:

1: Free.

2: Partly Free.

3: Not Free.

SCALE: Ordinal.

SOURCE(S): Freedom House (2022).

NOTES: Until 2003, countries whose combined average ratings for Political Rights and Civil Liberties fell between 1.0 and 2.5 were designated "Free"; between 3.0 and 5.5 "Partly Free"; and between 5.5 and 7.0 "Not Free". Since then, countries whose ratings average 1.0 to 2.5 are considered "Free", 3.0 to 5.0 "Partly Free", and 5.5 to 7.0 "Not Free". This variable is rescaled between 0 and 1 for comparison with V-Dem democracy indices for the online visualisation tools on the website.

DATA RELEASE: 5-13.

CITATION: Freedom House (2022)

YEARS: 1972-2021

2.3.51 Other Democracy Indices and Indicators - World Bank Governance Indicators

This section lists other indicators on democracy, that may help in evaluating the causes and effects of democracy or which may provide convergent validity tests for V-Dem data, divided into sections based on source.

2.3.51.1 Control of corruption — estimate (e_wbgi_cce)

Long tag: vdem_cy_e_wbgi_cce

Original tag: e_wbgi_cce

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Kaufmann & Kraay (2016)

Description:

VARIABLE TYPE: E

CLARIFICATION: "Control of Corruption"; measures perceptions of corruption, conventionally defined as the exercise of public power for private gain. The particular aspect of corruption measured by the various sources differs somewhat, ranging from the frequency

of quot;additional payments to get things donequot;; to the effects of corruption on the business environment, to measuring quot;grand corruptionquot; in the political arena or in the tendency of elite forms to engage in quot;state capturequot;.

SOURCE(S): Kaufmann *et al.* (2016).

DATA RELEASE: 5-13.

CITATION: Kaufmann *et al.* (2016).

YEARS: 1996-2021

2.3.51.2 Government effectiveness (e_wbgi_gee)

Long tag: vdem_cy_e_wbgi_gee

Original tag: e_wbgi_gee

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Kaufmann & Kraay (2016)

Description:

VARIABLE TYPE: E

CLARIFICATION: quot;Government Effectivenessquot; combines into a single grouping responses on the quality of public service provision, the quality of the bureaucracy, the competence of civil servants, the independence of the civil service from political pressures, and the credibility of the government's commitment to policies. The main focus of this index is on quot;inputsquot; required for the government to be able to produce and implement good policies and deliver public goods.

SOURCE(S): Kaufmann *et al.* (2016).

DATA RELEASE: 5-13.

CITATION: Kaufmann *et al.* (2016).

YEARS: 1996-2021

2.3.51.3 Political stability — estimate (e_wbgi_pve)

Long tag: vdem_cy_e_wbgi_pve

Original tag: e_wbgi_pve

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Kaufmann & Kraay (2016)

Description:

VARIABLE TYPE: E

CLARIFICATION: quot;Political Stabilityquot; combines several indicators which measure perceptions of the likelihood that the government in power will be destabilized or overthrown by possibly unconstitutional and/or violent means, including domestic violence and terrorism.

SOURCE(S): Kaufmann *et al.* (2016).

DATA RELEASE: 5-13.

CITATION: Kaufmann *et al.* (2016).

YEARS: 1996-2021

2.3.51.4 Rule of law — estimate (e_wbgi_rle)

Long tag: vdem_cy_e_wbgi_rle

Original tag: e_wbgi_rle

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Kaufmann & Kraay (2016)

Description:

VARIABLE TYPE: E

CLARIFICATION: quot;Rule of Lawquot; includes several indicators which measure the extent to which agents have confidence in and abide by the rules of society. These include perceptions of the incidence of crime, the effectiveness and predictability of the judiciary, and the enforceability of contracts. Together, these indicators measure the success of a society in developing an environment in which fair and predictable rules form the basis for economic and social interactions and the extent to which property rights are protected.

SOURCE(S): Kaufmann *et al.* (2016).

DATA RELEASE: 5-13.

CITATION: Kaufmann *et al.* (2016).

YEARS: 1996-2021

2.3.51.5 Regulatory quality — estimate (e_wbgi_rqe)

Long tag: vdem_cy_e_wbgi_rqe

Original tag: e_wbgi_rqe

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Kaufmann & Kraay (2016)

Description:

VARIABLE TYPE: E

CLARIFICATION: quot;Regulatory Qualityquot; includes measures of the incidence of marketunfriendly policies such as price controls or inadequate bank supervision, as well as perceptions of the burdens imposed by excessive regulation in areas such as foreign trade and business development.

SOURCE(S): Kaufmann *et al.* (2016).

DATA RELEASE: 5-13.

CITATION: Kaufmann *et al.* (2016).

YEARS: 1996-2021

2.3.51.6 Voice and accountability — estimate (e_wbgi_vae)

Long tag: vdem_cy_e_wbgi_vae

Original tag: e_wbgi_vae

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Kaufmann & Kraay (2016)

Description:

VARIABLE TYPE: E

CLARIFICATION: quot;Voice and Accountabilityquot; includes a number of indicators measuring various aspects of the political process, civil liberties and political rights. These indicators measure the extent to which citizens of a country are able to participate in the selection of governments. This category also includes indicators measuring the independence of the media, which serves an important role in monitoring those in authority and holding them accountable for their actions.

SOURCE(S): Kaufmann *et al.* (2016).

DATA RELEASE: 5-13.

CITATION: Kaufmann *et al.* (2016).

YEARS: 1996-2021

2.3.52 Other Democracy Indices and Indicators - Lexical Index of Electoral Democracy

This section lists other indicators on democracy, that may help in evaluating the causes and effects of democracy or which may provide convergent validity tests for V-Dem data, divided into sections based on source.

2.3.52.1 Lexical index (e_lexical_index)

Long tag: vdem_cy_e_lexical_index

Original tag: e_lexical_index

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Skaaning et al. (2015)

Description:

VARIABLE TYPE: E

QUESTION: What is the lexical index of democracy in the country?

RESPONSES:

0: No elections

1: No party or one-party elections

2: Multi-party elections for legislature

3: Multi-party elections for legislature and executive

4: Minimally competitive elections

5: Male or female suffrage

6: Universal suffrage

SOURCE(S): Skaaning *et al.* (2015).

DATA RELEASE: 5-13.

CITATION: Skaaning *et al.* (2015).

YEARS: 1789-2021

2.3.53 Other Democracy Indices and Indicators - Unified Democracy Score

This section lists other indicators on democracy, that may help in evaluating the causes and effects of democracy or which may provide convergent validity tests for V-Dem data, divided into sections based on source.

2.3.53.1 Unified democracy score posterior (median) (e_uds_median)

Long tag: vdem_cy_e_uds_median

Original tag: e_uds_median

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

Unified democracy score posterior (median)

2.3.54 Other Democracy Indices and Indicators - Political Institutions and Political Events

This section lists other indicators on democracy, that may help in evaluating the causes and effects of democracy or which may provide convergent validity tests for V-Dem data, divided into sections based on source.

2.3.54.1 Coups (Przeworski et al.) (e_coups)

Long tag: vdem_cy_e_coups

Original tag: e_coups

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Przeworski et al. (2013)

Description:

VARIABLE TYPE: E

CLARIFICATION: Number of successful coups d'état during a given year. A coup is any event resulting in an irregular removal or resignation of the chief executive that involves a

violent action or an explicit threat of resorting to it, by an armed organization. Assassinations of the chief executive are not considered coups unless the group responsible for the action takes over the office. Whenever the rules about the replacement of the chief executive are either not codified or unclear, the force criterion prevails. The definition excludes resignations under pressure of popular mobilization if no armed group (legal or not) is involved (resignation of Carlos Mesa in Bolivia). Similarly, irregular transfers of power among civilians that do not entail force (such as changes of communist leaders) are not considered coups. We place no restriction on whether the armed group causing the replacement is domestic or foreign, nor on the identity of the incoming ruler. In particular, any military intervention of foreign powers producing a replacement of the chief executive is coded as a coup, even if they restore a previously elected ruler (French troops overthrowing Bokassa in Central African Republic). As a general rule, any replacement of a military chief executive by another military man is considered a coup, unless the succession occurred according to pre-established rules (Figueirido replacing Geisel in Brazil). Specifically, resignations of the military chief executive caused by votes of non-confidence of irregular military bodies are considered coups (Galtieri replacing Viola in Argentina). The variable is compatible to other conventional sources such as Powell and Thyne (2011), Marshall and Marshall (2009), and Svobik and Akcinaroglu (2010) for the period 1950–2008, with some difference in the interpretation of specific events. Information for the pre-1950 era is more scarce and therefore the coding may be less reliable.

SOURCE(S): Przeworski *et al.* (2013).

NOTES: Where there is more than one observation per country-year, the maximum of the variable for this period is taken.

DATA RELEASE: 5-13.

CITATION: Przeworski *et al.* (2013).

YEARS: 1789-2008

2.3.54.2 Parties in legislature (e_legparty)

Long tag: vdem_cy_e_legparty

Original tag: e_legparty

Dataset citation: Coppedge *et al.* (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Przeworski *et al.* (2013)

Description:

VARIABLE TYPE: E

CLARIFICATION: Number of parties in the legislature. By "party" we take here any recognizable, named grouping, regardless whether and how they appeared in elections. This variable is coded regardless whether the legislature was elected or appointed.

RESPONSES:

-1: if no legislature.

0: if none (including cases where parties are officially banned).

1: if one (including cases where other parties are officially banned).

2: if more.

SCALE: Nominal.

SOURCE(S): Przeworski *et al.* (2013).

NOTES: During the early period candidates typically competed in elections on an individual basis, without any kind of centralized party organizations or shared programs. Within legislatures, however, they often coalesced into groups, currents, factions, "sentiments," etc. Hence, subjective judgments are inevitable in coding this variable. Our rule of thumb was to code as parties any kind of groups that bore a label that survived over two consecutive legislatures. This was true in several countries of "Liberals" and "Conservatives." In other countries, notably France between 1815 and 1848, however, the divisive issues, the parliamentary groups, and their labels changed frequently, and such cases are coded as "none." A legislature consisting of one party and independents is coded as one party. When there is more than one observation per country-year, the one which has higher value is taken.

DATA RELEASE: 5-13.

CITATION: Przeworski *et al.* (2013).
 YEARS: 1789-2008

2.3.55 Other Democracy Indices and Indicators - Polity5

This section lists other indicators on democracy, that may help in evaluating the causes and effects of democracy or which may provide convergent validity tests for V-Dem data, divided into sections based on source.

2.3.55.1 Institutionalized autocracy (e_autoc)

Long tag: vdem_cy_e_autoc

Original tag: e_autoc

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Marshall & Jaggers (2020)

Description:

VARIABLE TYPE: E

QUESTION: Is the polity an institutionalized autocracy?

CLARIFICATION: Autocracy is defined operationally in terms of the presence of a distinctive set of political characteristics. In mature form, autocracies sharply restrict or suppress competitive political participation. Their chief executives are chosen in a regularized process of selection within the political elite, and once in office they exercise power with few institutional constraints.

RESPONSES:

Numeric.

SOURCE(S): Polity 5 (Marshall and Jaggers 2020).

NOTES: This variable is rescaled between 0 and 1 for comparison with V-Dem democracy indices for the online visualisation tools on the website. Standardized authority codes (i.e. -66, -77, -88) are set to missing for the online graphs.

DATA RELEASE: 5-13.

CITATION: Polity 5 (Marshall and Jaggers 2020).

YEARS: 1789-2020

2.3.55.2 Institutionalized democracy (e_democ)

Long tag: vdem_cy_e_democ

Original tag: e_democ

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Marshall & Jaggers (2020)

Description:

VARIABLE TYPE: E

QUESTION: Is the polity an institutionalized democracy?

CLARIFICATION: Democracy is conceived as three essential, interdependent elements. One is the presence of institutions and procedures through which citizens can express effective preferences about alternative policies and leaders. Second is the existence of institutionalized constraints on the exercise of power by the executive. Third is the guarantee of civil liberties to all citizens in their daily lives and in acts of political participation.

The Democracy indicator is an additive eleven-point scale (0-10). The operational indicator of democracy is derived from codings of the competitiveness of political participation (PARCOMP), the openness and competitiveness of executive recruitment (XROPEN and XRCOMP), and constraints on the chief executive (XCONST).

RESPONSES:

Numeric.

SOURCE(S): Polity 5 (Marshall and Jaggers 2020).

NOTES: This variable is rescaled between 0 and 1 for comparison with V-Dem democracy indices for the online visualisation tools on the website. Standardized authority codes (i.e. -66, -77, -88) are set to missing for the online graphs.

DATA RELEASE: 5-13.

CITATION: Polity 5 (Marshall and Jaggers 2020).

YEARS: 1789-2020

2.3.55.3 Polity combined score (e_p_polity)

Long tag: vdem_cy_e_p_polity

Original tag: e_p_polity

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Marshall & Jaggers (2020)

Description:

VARIABLE TYPE: E

QUESTION: What is the Polity score?

CLARIFICATION: The Polity score is computed by subtracting the autocracy score from the democracy score. The resulting unified POLITY scale ranges from +10 (strongly democratic) to -10 (strongly autocratic).

RESPONSES:

Numeric.

SOURCE(S): Polity 5 (Marshall and Jaggers 2020).

NOTES: Standardized authority codes (i.e. -66, -77, -88) are set to missing for the online graphs.

DATA RELEASE: 5-13.

CITATION: Polity 5 (Marshall and Jaggers 2020).

YEARS: 1789-2020

2.3.55.4 Political competition (e_polcomp)

Long tag: vdem_cy_e_polcomp

Original tag: e_polcomp

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Marshall & Jaggers (2020)

Description:

VARIABLE TYPE: E

QUESTION: Is there any (institutionalized) political competition?

CLARIFICATION: This variable combines information presented in two component variables: the degree of institutionalization, or regulation, of political competition (e_parreg) and the extent of government restriction on political competition (e_parcomp).

RESPONSES:

1: Repressed Competition: While no significant political activity is permitted outside the ranks of the hegemonic regime, nevertheless, some organized political participation occurs within the regime through highly circumscribed institutional channels.

2: Restricted Competition: Some organized political activity occurs outside the ranks of the hegemonic regime, but the regime systematically limits its form, extent, or both in ways that exclude substantial groups from participating in the political arena and/or suppresses the contestation of rival political interests.

3: Authoritarian-guided liberalization of repressed or restricted competition or the deepening of hegemonic control: Used to indicate either the concerted effort on the part of hegemonic regimes to open up their political systems to limited (and typically factional) political competition or the transformation of factional-based "quasi-democracies"; or

quot;weak authoritarian regimesquot; into more repressive hegemonic systems in which political competition is increasingly institutionalized and restricted.

4: Uninstitutionalized Competition: Political participation is decentralized and fluid in character — revolving around personalities, regional interests, and religious/ethnic/clan groups. There are no enduring national political organizations and systematic regime control of political activity is limited, that is, a situation characterized by a coincidence of weak state and weak society. In the contemporary context, uninstitutionalized competition is most likely to occur in resource poor countries and/or following the collapse of central authority under a (former) repressive, authoritarian state.

5: Gradual transition from uninstitutionalized (unregulated) competition to more regulated forms of political competition (the increasing regulation of competition may be centrally-guided or decentralized through the gradual development of political parties and interest groups).

6: Factional/Restricted Competition: Polities that oscillate more or less regularly between intense factionalism and faction-based restrictions: that is, when one faction secures power it uses that power to promote its exclusive interests and favor group members while restricting the political access and activities of other, excluded groups, until it is displaced in turn.

7: Factional Competition: There are relatively stable and enduring political groups which compete for political influence at the national level — parties, regional groups, or ethnic groups — but particularistic/parochial agendas tend to be exclusive and uncompromising with limited social integration or accommodation across identity boundaries. Factional competition is distinguished by a relative balance of group capabilities that prevents any one of the groups from capturing state power and imposing restrictions on other groups.

8: Political liberalization or democratic retrenchment: persistent over coercion: relatively coercive/restrictive transitions either from factional/restricted competition to institutionalized competitive participation or from institutionalized competitive participation to factional/restricted competition. In either case, this code reflects the unconsolidated nature of liberal political participation in otherwise procedurally democratic polities.

9: Political liberalization or democratic retrenchment: limited and/or decreasing overt coercion: This code is used to indicate relatively peaceful transitions either to or from institutionalized competitive participation. In either case, this code reflects the unconsolidated nature of liberal political participation in otherwise procedurally open electoral polities.

10: Institutionalized open electoral participation: Relatively stable and enduring political groups regularly compete for political influence with little use of coercion. No significant or substantial groups, issues, or types of conventional political action are regularly excluded from the political process.

SOURCE(S): Polity 5 (Marshall and Jaggers 2020).

NOTES: Standardized authority codes (i.e. -66, -77, -88) are set to missing for the online graphs.

DATA RELEASE: 5-13.

CITATION: Polity 5 (Marshall and Jaggers 2020).

YEARS: 1789-2020

2.3.55.5 Polity revised combined score (e_polity2)

Long tag: vdem_cy_e_polity2

Original tag: e_polity2

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Marshall & Jaggers (2020)

Description:

VARIABLE TYPE: E

QUESTION: What is the Revised Polity score?

CLARIFICATION: This variable is a modified version of the Polity variable added in order to facilitate the use of the Polity regime measure in time-series analyses. It modifies the combined annual Polity score by applying a simple treatment to convert instances of

standardized authority scores (*i.e.*, -66, -77, and -88) to conventional polity scores (*i.e.*, within the range, -10 to +10). The values have been converted according to the following rule set:

-66: Cases of foreign interruption are treated as system missing.

-77: Cases of interregnum, or anarchy, are converted to a neutral Polity score of 0.

-88: Cases of transition are prorated across the span of the transition.

For example, country X has a POLITY score of -7 in 1957, followed by three years of -88 and, finally, a score of +5 in 1961. The change (+12) would be prorated over the intervening three years at a rate of per year, so that the converted scores would be as follows: 1957 -7; 1958 -4; 1959 -1; 1960 +2; and 1961 +5.

SOURCE(S): Polity 5 (Marshall and Jaggers 2020).

NOTES: This variable is rescaled between 0 and 1 for comparison with V-Dem democracy indices for the online visualisation tools on the website.

DATA RELEASE: 5-13.

CITATION: Polity 5 (Marshall and Jaggers 2020).

YEARS: 1789-2020

2.3.56 Other Democracy Indices and Indicators - Others

This section lists other indicators on democracy, that may help in evaluating the causes and effects of democracy or which may provide convergent validity tests for V-Dem data, divided into sections based on source.

2.3.56.1 Democratic breakdown (Bernhard et al.) (e_bnr_dem)

Long tag: vdem_cy_e_bnr_dem

Original tag: e_bnr_dem

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Bernhard et al. (2001), Teorell et al. (2022)

Description:

VARIABLE TYPE: E

CLARIFICATION: Countries that meet the minimum conditions for democracy (see below) enter the dataset and are coded "0"; When countries cease to meet those minimum criteria they are coded "1" and exit from the dataset.

SCALE: Dichotomous.

SOURCE(S): Bernhard *et al.* (2001). Taken from Quality of Government Standard Dataset version Jan22 *et al.* (2022).

NOTES: If, after a democratic breakdown, a country again meets our minimum criteria it re-enters the data as a new democratic episode. The time frame onset in 1913 is a function of when the first country (Norway) meets the minimum conditions. All series terminate in either in a breakdown in various years or right censorship in 2005. The minimal conditions are based on Dahl's notion of polyarchy (competitiveness, inclusiveness) combined with Linz and Stepan's stateness criteria. Competitiveness: Like Przeworski *et al.* we include countries that hold elections for both the executive and legislature, and in which more than one party contests the elections. However, we exclude cases in which we detected outcome changing vote fraud, in which there was either extensive or extreme violence that inhibited voters' preference expression, or in which political parties representing a substantial portion of the population were banned. Inclusiveness: We only include competitive polities in which at least fifty percent of all adult citizens are enfranchised to vote in our set of democracies. Stateness: We also considered questions of sovereignty, not including colonial states, where founding elections were held prior to the granting of independence, and countries experiencing internal wars in which twenty percent or greater of the population or territory was out of control of the state.

DATA RELEASE: 5-13.

CITATION: Bernhard *et al.* (2001), Teorell *et al.* (2022).

YEARS: 1946-2005

2.3.56.2 Democracy (e_chga_demo)

Long tag: vdem_cy_e_chga_demo

Original tag: e_chga_demo

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Cheibub et al. (2010)

Description:

VARIABLE TYPE: E

CLARIFICATION: A regime is considered a democracy if the executive and the legislature is directly or indirectly elected by popular vote, multiple parties are allowed, there is *de facto* existence of multiple parties outside of regime front, there are multiple parties within the legislature, and there has been no consolidation of incumbent advantage (*e.g.* unconstitutional closing of the lower house or extension of incumbent's term by postponing of subsequent elections). Transition years are coded as the regime that emerges in that year.

RESPONSES:

1: Democracy.

0: Otherwise.

SCALE: Dichotomous.

SOURCE(S): Cheibub *et al.* (2010).

DATA RELEASE: 5-13.

CITATION: Cheibub *et al.* (2010).

YEARS: 1946-2008

2.3.56.3 Corruption perception index (e_ti_cpi)

Long tag: vdem_cy_e_ti_cpi

Original tag: e_ti_cpi

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Transparency International (2022)

Description:

VARIABLE TYPE: E

CLARIFICATION: The CPI focuses on corruption in the public sector and defines corruption as the abuse of public office for private gain. The surveys used in compiling the CPI tend to ask questions in line with the misuse of public power for private benefit, with a focus, for example, on bribe-taking by public officials in public procurement. The sources do not distinguish between administrative and political corruption. The CPI Score relates to perceptions of the degree of corruption as seen by business people, risk analysts and the general public and ranges between 100 (highly clean) and 0 (highly corrupt).

SOURCE(S): Transparency International (2022).

NOTES: The data spans 2012–present due to the methodological incomparability with the data prior 2012.

DATA RELEASE: 7-13.

CITATION: Transparency International (2022).

YEARS: 2012-2021

2.3.56.4 Index of Democratization (e_vanhanen)

Long tag: vdem_cy_e_vanhanen

Original tag: e_vanhanen

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Vanhanen (2019)

Description:

VARIABLE TYPE: E

QUESTION: How democratic is a country, as measured by competition and participation?

CLARIFICATION: The index of democratization is formed by multiplying the competition and the participation variables and then dividing the outcome by 100. See the original citation for a description.

SOURCE(S): Vanhanen (2019).

DATA RELEASE: 13.

CITATION: Vanhanen (2019).

YEARS: 1800-2018

2.3.57 Background Factors (E) - Education

This section lists variables gathered from other sources that may help in evaluating the causes and effects of democracy. The variables are divided into sections based on theme.

2.3.57.1 Education 15+ (e_peaveduc)

Long tag: vdem_cy_e_peaveduc

Original tag: e_peaveduc

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Clio-Infra (2018), Mitchell (1998*b,c*), United States Census Bureau (2021), UNESCO (n.d.), van Leeuwen et al. (2011, 2012*a,b*), Didenko et al. (2012), Földvári & van Leeuwen (2014)

Description:

VARIABLE TYPE: E

QUESTION: What is the average years of education among citizens older than 15?

CLARIFICATION: The Average years of education in the total population aged 15 years and older.

SOURCE(S): Clio Infra (clio-infra.eu), drawing on Mitchell (1998*a*, 1998*b*, 1998*c*), United States Census Bureau (2021), UNESCO, Földvári and van Leeuwen (2014), Leeuwen, van Leeuwen-Li, Földvári (2011), Leeuwen, van Leeuwen-Li, Földvári (2012*a*), Leeuwen, van Leeuwen-Li, Földvári (2012*b*), Didenko, Foldvari, van Leeuwen (2012).

NOTES: Missing data within a time-series is interpolated using linear interpolation for each country. In addition to this, from the last recorded data point to nowadays the data is extrapolated.

DATA RELEASE: 2-13.

CITATION: Clio Infra (clio-infra.eu), along with other sources listed above.

YEARS: 1820-2022

2.3.57.2 Educational inequality, Gini (e_peedgini)

Long tag: vdem_cy_e_peedgini

Original tag: e_peedgini

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Clio-Infra (2018), Mitchell (1998*b,c*), United States Census Bureau (2021), UNESCO (n.d.), van Leeuwen et al. (2011, 2012*a,b*), Didenko et al. (2012), Földvári & van Leeuwen (2014)

Description:

VARIABLE TYPE: E

QUESTION: How unequal is the level of education achieved by the population aged 15 years and older?

CLARIFICATION: Gini coefficient of educational inequality estimated from average education data using the method as suggested by Thomas, Wang, and Fan (2000), Checchi (2004) and Castelló and Doménech (2002: 4). Van Leeuwen, van Leeuwen-Li, and Foldvari (N.d.) provide a more detailed explanation in the Clio-Infra codebook.

SOURCE(S): Clio Infra (clio-infra.eu), drawing on Mitchell (1998a, 1998b, 1998c), United States Census Bureau (2021), UNESCO, Földvári and van Leeuwen (2010a), Leeuwen, van Leeuwen-Li, Földvári (2011), Leeuwen, van Leeuwen-Li, Földvári (2012a), Leeuwen, van Leeuwen-Li, Földvári (2012b), Didenko, Foldvari, van Leeuwen (2012).

DATA RELEASE: 5-13.

CITATION: Clio Infra (clio-infra.eu), along with other sources listed above.

YEARS: 1850-2010

2.3.58 Background Factors (E) - Geography

This section lists variables gathered from other sources that may help in evaluating the causes and effects of democracy. The variables are divided into sections based on theme.

2.3.58.1 Land area (e_area)

Long tag: vdem_cy_e_area

Original tag: e_area

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Haber & Menaldo (2011), Schvitz et al. (2021)

Description:

VARIABLE TYPE: E

QUESTION: What is the land area of a country?

CLARIFICATION: Country land area in square kilometers.

SOURCE(S): Haber and Menaldo (2011); Schvitz et al. (2021).

NOTES: Uses v2.0 of R package cshapes; Where several values were available per country-year, the latest one was chosen for the dataset. If both sources provide a value for a country-year, the one from cshapes are used.

DATA RELEASE: 5-13.

CITATION: Schvitz *et al.* (2021).

YEARS: 1907-2022

2.3.58.2 Region (geographic) (e_regiongeo)

Long tag: vdem_cy_e_regiongeo

Original tag: e_regiongeo

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: United Nations Statistics Division (2013)

Description:

VARIABLE TYPE: E

QUESTION: In which geographic region is this country located?

CLARIFICATION: Regions are described based on geographic location.

RESPONSES:

- 1: Western Europe
- 2: Northern Europe
- 3: Southern Europe
- 4: Eastern Europe
- 5: Northern Africa
- 6: Western Africa
- 7: Middle Africa

- 8: Eastern Africa
- 9: Southern Africa
- 10: Western Asia
- 11: Central Asia
- 12: Eastern Asia
- 13: South-Eastern Asia
- 14: Southern Asia
- 15: Oceania (including Australia and the Pacific)
- 16: North America
- 17: Central America
- 18: South America
- 19: Caribbean (including Belize, Cuba, Haiti, Dominican Republic and Guyana)

SOURCE(S): United Nations Statistics Division (2013).

NOTES: For the countries coded only in the historical project or for which the UN does not have the code, the region is coded by V-Dem Data Manager in accordance with the position of the neighboring countries.

DATA RELEASE: 5-13.

CITATION: United Nations Statistics Division (2013).

YEARS: 1789-2022

2.3.58.3 Region (politico-geographic) (e_regionpol)

Long tag: vdem_cy_e_regionpol

Original tag: e_regionpol

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Teorell et al. (2022)

Description:

VARIABLE TYPE: E

QUESTION: In which politico-geographic region is this country located?

CLARIFICATION: This is a tenfold politico-geographic classification of world regions, based on a mixture of two considerations: geographical proximity (with Cyprus, German Democratic Republic, and Mongolia being recoded from original coding) and demarcation by area specialists having contributed to a regional understanding of democratization. The categories are as follow:

RESPONSES:

- 1: Eastern Europe and post Soviet Union (including Central Asia, Mongolia, and German Democratic Republic)
- 2: Latin America (including Cuba, Haiti, and the Dominican Republic)
- 3: North Africa and the Middle East (including Israel and Türkiye, but excluding Cyprus)
- 4: Sub-Saharan Africa
- 5: Western Europe and North America (including Australia, New Zealand, and Cyprus, but excluding German Democratic Republic)
- 6: Eastern Asia (including Japan, excluding Mongolia)
- 7: South-Eastern Asia
- 8: Southern Asia
- 9: The Pacific (excluding Australia and New Zealand)
- 10: The Caribbean (including Guyana and Suriname, but excluding Cuba, Haiti, and the Dominican Republic)

SOURCE(S): Quality of Government Standard Dataset version Jan22 (Teorell et al. 2022).

NOTES: The values are filled backwards to the first year of coding.

DATA RELEASE: 5-13.

CITATION: Teorell *et al.* (2022).

2.3.58.4 Region (politico-geographic 6-category) (e_regionpol_6c)

Long tag: vdem_cy_e_regionpol_6c

Original tag: e_regionpol_6C

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Teorell et al. (2022)

Description:

VARIABLE TYPE: E

QUESTION: In which politico-geographic region is this country located?

CLARIFICATION: Regions are described as politico-geographic in the sense that they are based on geographical proximity as well as characteristics that contribute to regional understanding as identified by scholars in studies of democratization (e.g. post-Communist). This is a modification of *e_regionpol* above.

RESPONSES:

1: Eastern Europe and Central Asia (including Mongolia and German Democratic Republic)

2: Latin America and the Caribbean

3: The Middle East and North Africa (including Israel and Türkiye, excluding Cyprus)

4: Sub-Saharan Africa

5: Western Europe and North America (including Cyprus, Australia and New Zealand, but excluding German Democratic Republic)

6: Asia and Pacific (excluding Australia and New Zealand; see 5)

SOURCE(S): Quality of Government Standard Dataset (2022).

NOTES: The values are filled backwards to the first year of coding.

DATA RELEASE: 9-13.

CITATION: *V-Dem Codebook* (see suggested citation at the top of this document); Teorell *et al.* (2022).

YEARS: 1789-2022

2.3.59 Background Factors (E) - Economics

This section lists variables gathered from other sources that may help in evaluating the causes and effects of democracy. The variables are divided into sections based on theme.

2.3.59.1 Exports (e_cow_exports)

Long tag: vdem_cy_e_cow_exports

Original tag: e_cow_exports

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Barbieri et al. (2009), Barbieri & Keshk (2016)

Description:

VARIABLE TYPE: E

QUESTION: What is the total value of a country's exports?

CLARIFICATION: Total exports in 2014 US millions of dollars.

SOURCE(S): Barbieri *et al.* (2009), Barbieri and Keshk (2016)

DATA RELEASE: 5-13.

CITATION: Barbieri *et al.* (2009), Barbieri and Keshk (2016)

Description:

VARIABLE TYPE: E

QUESTION: What is the real value of a country's petroleum, coal, natural gas, and metals production?

CLARIFICATION: Real value of petroleum, coal, natural gas, and metals produced per capita.

SOURCE(S): Haber and Menaldo (2011).

DATA RELEASE: 5-13.

CITATION: Haber and Menaldo (2011).

YEARS: 1900-2006

2.3.61 Background Factors (E) - Infrastructure

This section lists variables gathered from other sources that may help in evaluating the causes and effects of democracy. The variables are divided into sections based on theme.

2.3.61.1 Radios (e_radio_n)

Long tag: vdem_cy_e_radio_n

Original tag: e_radio_n

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Comin & Hobijn (2009)

Description:

VARIABLE TYPE: E

QUESTION: What is the number of radio sets?

CLARIFICATION: Original source doesn't specify if the indicators considers total number of radio sets or only radio sets in use.

SOURCE(S): Comin and Hobijn (2009).

DATA RELEASE: 5-13.

CITATION: Comin and Hobijn (2009).

YEARS: 1815-2000

2.3.62 Background Factors (E) - Demography

This section lists variables gathered from other sources that may help in evaluating the causes and effects of democracy. The variables are divided into sections based on theme.

2.3.62.1 Fertility rate (e_miferrat)

Long tag: vdem_cy_e_miferrat

Original tag: e_miferrat

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Gapminder (2018)

Description:

VARIABLE TYPE: E

QUESTION: What is the fertility rate?

CLARIFICATION: The fertility rate (*i.e.* total fertility rate, period total fertility rate, total period fertility rate) of a population is the mean number of children that would be born to a woman over her lifetime if (a) she were to experience the current age-specific fertility rates through her lifetime, and (b) she were to survive through the end of her reproductive life. It is obtained by adding single-year age-specific rates at a given time.

SOURCE(S): Gapminder (gapminder.org), drawn from various sources (unspecified).

DATA RELEASE: 2-13.

CITATION: Gapminder (gapminder.org).

YEARS: 1960-2020

2.3.62.2 Population total (Clio Infra, in thousands) (e_mipopula)

Long tag: vdem_cy_e_mipopula

Original tag: e_mipopula

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

2.3.63.4 Coups d'état (Powell and Thyne) (e_pt_coup)

Long tag: vdem_cy_e_pt_coup

Original tag: e_pt_coup

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Variable citation: Powell & Thyne (2011)

Description:

VARIABLE TYPE: E

QUESTION: How many successful coup d'état were recorded in this year?

CLARIFICATION: According to the source, how many successful coup attempts were recorded in this year? The maximum count of this derived variable is four and its minimum is zero. Coups d'état are defined as "overt attempts by the military or other elites within the

state apparatus to unseat the sitting head of state using unconstitutional means (...) there is no minimal death threshold for defining a coup. A coup attempt is defined as successful if the coup perpetrators seize and hold power for at least seven days” (Powell & Thyne 2011:252).

SCALE: Numeric

SOURCE(S): Powell and Thyne (2011)

NOTES: This variable is derived from the sourced dataset. For every country-year we sum the number of recorded successful coup attempts. The variable `e_pt_coup_attempts` sums the number of coup attempts.

DATA RELEASE: 9-13.

CITATION: Powell and Thyne (2011)

YEARS: 1950-2022

2.3.64 Varieties of Indoctrination

The Varieties of Indoctrination (V-Indoc) dataset is constructed based on an expert survey fielded in collaboration with V-Dem and led by the ERC-funded project “Democracy under Threat: How Education can Save it” (DEMED). The dataset contains indices and indicators that measure indoctrination efforts in education and the media across 160 countries from 1945 to 2021. The indices capture broad dimensions of indoctrination such as indoctrination potential and indoctrination content, while the indicators cover topics related to the curriculum, teachers, schools, and the media. The principal investigators are Anja Neundorf, Eugenia Nazrullaeva, Ksenia Northmore-Ball, Katerina Tertychnaya, and Wooseok Kim. For more information, please visit <https://www.gla.ac.uk/research/az/democracyresearch/>.

2.3.64.1 Indoctrination potential in education (`v2xed_ed_inpt`)

Long tag: `vdem_cy_v2xed_ed_inpt`

Variable citation: Neundorf, Nazrullaeva, Northmore-Ball, Tertychnaya, Kim, Benavot, Bromley, Knutsen, Lutscher, Marquardt, Paglayan, Pemstein, Seim & Rydén (2023), Neundorf, Nazrullaeva, Northmore-Ball, Tertychnaya & Kim (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023), v2xed_ed_poed v2xed_ed_inco

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): Anja Neundorf

ADDITIONAL VERSIONS: *_codelow, *_codehigh, *_sd

QUESTION: How strong is the potential for indoctrination in education?

CLARIFICATION: The potential of regimes to successfully indoctrinate through education is based on their control over the structures and processes of the education system. The index is a function of the coherence of the regime's doctrine (whether it be democratic or autocratic) and the effort devoted to political education. Greater coherence and political education efforts are expected to generate higher potential for indoctrination.

SCALE: Interval, from low to high (0-1).

SOURCE(S): v2xed_ed_poed v2xed_ed_inco

DATA RELEASE: 13.

AGGREGATION: We estimate the index by averaging two indices: v2xed_ed_poed and v2xed_ed_inco.

VARIABLE TYPE: C

PROJECT MANAGER(S): Anja Neundorf

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: To what extent does a national authority set the official curriculum framework for schools?

CLARIFICATION: The official curriculum may only be a framework, to which individual schools can contribute.

For this question, we are interested in all school subjects across levels of primary and secondary public education. If there are substantive differences between the primary and secondary education levels, please provide the response that is most accurate for the majority of schools.

A national (or federal) authority can include a state body organized under the auspices of a Ministry of Education.

The sub-national level includes states, provinces, districts, municipalities, villages, local educational authorities, etc.

RESPONSES:

0: A national authority does not set the official curriculum framework, that is, the curriculum framework is completely set by sub-national authorities.

1: Sub-national authorities mostly set the official curriculum framework, with some input from the national authority.

2: A national authority mostly sets the official curriculum framework, with some input from sub-national authorities.

3: A national authority fully sets the official curriculum framework.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Neundorf et al. (2023a, 2023b, *V-Dem Working Paper Series* 2023: 136); Pemstein et al. (2023, *V-Dem Working Paper Series* 2023:21)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Anja Neundorf

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: What proportion of school textbooks across core subjects does a national authority approve centrally?

CLARIFICATION: For this question, we are interested in core subjects, such as languages, mathematics, science, arts, social studies, history, geography. We are not interested in textbooks teaching foreign languages that could be subcontracted to a foreign publisher.

Please consider school subjects across levels of formal primary and secondary public education. If there are substantive differences between the primary and secondary education levels, please provide the response that is most accurate for the majority of schools.

Examples of ways in which textbook production is centrally approved or authorized include:

a national public authority reviews textbook content and approves textbooks for use in schools; there is a state-mandated national list of textbooks that schools are recommended to use; the Ministry of Education directly publishes textbooks. A national (or federal) authority can include a public authority organized under the auspices of a Ministry of Education or a different authority.

RESPONSES:

0: No textbooks are centrally approved by a national authority.

1: Some textbooks are centrally approved by a national authority.

2: All textbooks are centrally approved by a national authority.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 13.

Long tag: vdem_cy_v2edpoledprim

Original tag: v2edpoledprim

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Anja Neundorf

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Are primary school students required to study at least one subject that predominately focuses on teaching political values?

CLARIFICATION: Examples of subjects that focus on teaching political values include specific subjects in political education, as well subjects where political values are integrated in the curriculum: for example, moral, religious, and civic education; ethics and civics; ‘knowledge about society’ with elements of sociology, politics, legal studies, or economics. This does not include history as a subject. We are not interested in *de jure* subject labels but in *de facto* subject content: a course does not need to be entitled “political values” to be considered here.

Political values refer to goals that are the desirable purposes for socio-political organizations such as the political community, the nation-state, and regime. Political values guide an individual’s or group’s general behavior/attitudes toward political ‘objects’ (e.g. leaders, events, ideologies).

RESPONSES:

0: No. There is no general requirement for the majority of primary school students to study at least one subject predominately focused on political values.

1: Yes. The majority of primary school students are required to study at least one subject that is predominately focused on political values.

SCALE: Binary, converted to interval by the measurement model.

DATA RELEASE: 13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: To what extent does the curriculum of subjects that include the teaching of political values cover topics related to individuals’ political rights and duties?

CLARIFICATION: In this question we are asking about the subjects you considered in the previous two questions, on average across primary and secondary education. Again, these subjects may be specifically focused on political education or may be subjects into which the teaching of political values is only integrated.

Political rights and duties include: guarantees of equal political opportunities and equal protection under the law, regardless of race, religion, gender, or other personal attributes; the right or duty to vote; the right to organize and protest; or the right to join labor unions.

RESPONSES:

0: These subjects do not cover these topics.

1: These subjects rarely cover these topics.

2: These subjects cover these topics, but not at depth.

3: These subjects cover these topics in some depth.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 13.

PROJECT MANAGER(S): Anja Neundorf

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: How often does the language curriculum promote patriotism?

CLARIFICATION: We are interested in the curriculum for core subjects in language studies, common to a majority of students, for example, teaching the official language(s) of the country. We are not interested in foreign languages.

By promoting patriotism, we mean encouraging feelings of love, pride, loyalty and commitment to one's country. For example, promoting patriotism can take the form of teaching narratives that celebrate the country's military past, national origin stories, the majority ethnic or religious group, or accomplishments in economic or technological sectors. Patriotic education could be part of the texts used to teach basic literacy skills (e.g. handwriting exercises), language textbooks, assigned readings in the literature curriculum, as well as in accompanying teaching manuals.

Please consider a typical situation for students in primary and secondary schools. If the situation varies across educational levels, please provide the response that is most accurate for the majority of students.

RESPONSES:

0: Rarely or never.

1: Sometimes.

2: Often.

3: Extensively.

SCALE: Ordinal, converted to interval by the measurement model.

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: How often does the history curriculum promote a specific societal model or ideology?

CLARIFICATION: A societal model or ideology is generally a codified set of beliefs used to justify a particular social and political order, for example, socialism, democracy, liberalism, fascism or social orders related to a specific religion.

The history curriculum can promote a specific ideology or societal model by often referring to it and clearly interpreting one model as better than other alternatives.

We are not just interested in *de jure* history subjects, but also in the *de facto* subject content.

Please consider a typical situation for students in primary and secondary schools. If the situation varies across educational levels, please provide the response that is most accurate for the majority of students.

RESPONSES:

0: Rarely or never.

1: Sometimes.

2: Often.

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Anja Neundorf

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: To what extent do students have opportunities to discuss what they are taught in history classes?

CLARIFICATION: This question regards the degree to which students are *de facto* given the opportunity to engage in debates which question the material and content of their history classes, as well as being able to voice disagreement with each other. Critical engagement with the content can be expressed by engaging in discussions with the teacher or other students, in oral presentations, or in written work (for example, exams and essays).

Opportunity means that critically engaging with the content would not bring down students' marks.

RESPONSES:

0: Students are never or rarely given the opportunity to discuss what they are taught.

1: Students are sometimes given the opportunity to discuss what they are taught.

2: Students are often given the opportunity to discuss what they are taught.

3: Students are extensively given the opportunity to discuss what they are taught.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

PROJECT MANAGER(S): Anja Neundorf

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Do history teachers have autonomy to deviate from the content of the official curriculum in the classroom?

CLARIFICATION: Here we aim to capture the degree to which teachers have autonomy to *de facto* deviate from the intended or official curriculum in their classes. Examples of how teachers can deviate from the content of the official curriculum: selecting textbooks that are different from those authorized or recommended by a central authority; diverging from the official curriculum in terms of the amount of time allocated to different topics, or supplement/expand on the official curriculum.

In cases where there is no official history curriculum, or the official history curriculum sets only loose restrictions on teachers' autonomy, please code this question as zero (generally autonomous).

RESPONSES:

0: They are free to deviate to a large extent: teachers are generally autonomous.

1: They are free to deviate to a moderate extent: teachers' autonomy is somewhat restricted.

2: They are free to deviate to a small extent: teachers' autonomy is mostly restricted.

3: They are not at all free to deviate: teachers' autonomy is completely restricted.

SCALE: Ordinal, converted to interval by the measurement model.

VARIABLE TYPE: C

PROJECT MANAGER(S): Anja Neundorf

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Out of the top four national print media with the highest readership, how many are state-owned?

CLARIFICATION: If there are fewer than four national print media, please provide your answer based on the number of existing national print media.

By print media, we refer to newspapers, magazines, or printed journals whose content can be consumed through their printed or online editions. In this question, we are only interested in state ownership of the media – not in the extent to which the state may control editorial decisions.

State ownership takes different forms. For example, state-owned media can be funded by government license fees and advertising. They can also be directly controlled by government agencies (e.g. the Ministry of Information and Culture). The state, the ruling party, or the Head of Government / the Head of State, can also be the owner of media in this context.

RESPONSES:

- 0: There are no state-owned print media outlets.
- 1: State-owned outlets make up a minority of print media outlets.
- 2: There is an equal share of state- and non-state owned print media outlets.
- 3: State-owned outlets make up the majority of print media outlets.
- 4: All print media outlets are state-owned.

ORDERING: If v2medstateprint and v2medstatebroad are both set to 0 do not answer v2medpolstate. If both are set to 4 do not answer v2medpolnonstate.

SCALE: Ordinal, converted to interval by the measurement model.

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: For the print and broadcast media outlets owned by the state, how often do political authorities influence how these outlets cover political issues?

CLARIFICATION: Political authorities can be national / sub-national / local public authorities and include ruling political parties and office holders, such as presidents, prime minister or ministers. Political authorities can influence which political issues state-media cover, how, and how much they cover them. For example, they can exert influence by directly

or indirectly controlling the hiring and firing of producers, directors, writers, editors, and announcers; by manipulating the resources these media require; by withholding resources required for printing or broadcast. Political authorities can also directly dictate content and make editorial decisions.

RESPONSES:

- 0: Political authorities (almost) never influence the coverage of political issues.
- 1: Political authorities sometimes influence the coverage of political issues.
- 2: Political authorities often influence the coverage of political issues.
- 3: Political authorities almost always influence the coverage of political issues.

SCALE: Ordinal, converted to interval by the measurement model.

QUESTION: For the print and broadcast media outlets NOT owned by the state, how often do political authorities influence how these cover political issues?

CLARIFICATION: Political authorities can be national / sub-national / local public authorities and include ruling political parties and office holders, such as presidents, prime minister or ministers. Political authorities can influence the coverage of non-state owned outlets both directly and indirectly. Indirect forms of control might include politically motivated awarding of broadcast frequencies, withdrawal of financial support, influence over printing facilities (e.g. subsidized newsprint) and distribution networks, selected distribution of advertising, onerous registration requirements, and prohibitive tariffs. They might also include tax privileges, bribery, and cash payments. Indirect forms of control may also include the intimidation of owners, advertisers, and editors, through the use of threats and violence.

RESPONSES:

- 0: Political authorities (almost) never influence the coverage of key political issues.
- 1: Political authorities sometimes influence the coverage of key political issues.
- 2: Political authorities often influence the coverage of key political issues.
- 3: Political authorities almost always influence the coverage of key political issues.

2.3.64.32 Patriotism in the media (v2medpatriot)

Long tag: vdem_cy_v2medpatriot

Original tag: v2medpatriot

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Anja Neundorf

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: How often do media outlets promote patriotism?

CLARIFICATION: Promotion of patriotism can be associated with promotion of patriotic consciousness, the love of the country, national pride, loyalty and commitment. For example, specific narratives can celebrate the country's military past, national origin stories, or accomplishments in economic or technological sectors. Patriotism can be promoted in news, movies, TV shows, radio shows, music, or magazines.

For this question, please consider all (state-owned as well as not state-owned) broadcast and print media outlets.

RESPONSES:

0: Rarely or never.

1: Sometimes.

2: Often.

3: Extensively.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Neundorf et al. (2023a, 2023b, *V-Dem Working Paper Series* 2023: 136); Pemstein et al. (2023, *V-Dem Working Paper Series* 2023:21)

YEARS: 1945-2021

2.3.64.33 Control of entertainment content (v2medentrain)

Long tag: vdem_cy_v2medentrain

Original tag: v2medentrain

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Anja Neundorf

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Do political authorities have control over the production of entertainment content?

CLARIFICATION: Entertainment includes both broadcast and print content, such as movies, TV shows, radio shows, music, and magazines.

Here we distinguish between entertainment content and news content (although, in some cases news content can have an entertainment component, and vice versa), focusing on entertainment.

Political authorities can be national / sub-national / local public authorities and include ruling political parties and office holders, such as presidents, prime minister or ministers.

It is irrelevant how political authorities came to exert the control over the entertainment content.

RESPONSES:

0: Political authorities exert almost no control over the production of entertainment content.

1: Political authorities exert some control over the production of entertainment content.

2: Political authorities exert a high level of control over the production of entertainment content.

3: Political authorities almost exclusively control the production of entertainment content.
 SCALE: Ordinal, converted to interval by the measurement model.
 DATA RELEASE: 13.
 CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).
 CITATION: Neundorf et al. (2023a, 2023b, *V-Dem Working Paper Series 2023*: 136); Pemstein et al. (2023, *V-Dem Working Paper Series 2023*:21)
 YEARS: 1945-2021

2.3.64.34 Presence of patriotic symbols in schools (v2edscpatriot)

Long tag: vdem_cy_v2edscpatriot

Original tag: v2edscpatriot

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Anja Neundorf

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_mode, *_nr

QUESTION: Are patriotic symbols displayed in schools?

CLARIFICATION: Examples of patriotic symbols include: the national flag, a picture or bust of current or past country leaders, singing the national anthem or reciting national pledges, and celebrations of national days, heroes, historical or military events (for example, victory in a war). It further includes symbols associated with the ruling party, royal family, military junta, or other group/entity representing the political regime (e.g., party logo, symbol for royal family, military symbol tied to the particular regime, symbol of specific ethnic group or class dominating the regime). Patriotic symbols include religious symbols if (and only if) religious and state authorities are closely interlinked.

Here we refer to the school building(s) and classrooms and not to the content of learning material, such as textbooks.

If there is significant variation in the use of patriotic symbols across the territory, the answer should reflect the average or typical school across the sub-national units.

RESPONSES:

0: Patriotic symbols are usually not displayed.

1: Patriotic symbols are displayed.

ORDERING: If answer is 0 in a given year, please skip v2edscpatriotcb for this year.

SCALE: Binary, converted to interval by the measurement model.

NOTES: This is a filtering question for v2edscpatriotcb. For the mode version of this variable, we assign an observation a value of 0.5 if the mode is not unique, i.e., a value of 0.5 represents a multimodal response distribution.

DATA RELEASE: 13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Neundorf et al. (2023a, 2023b, *V-Dem Working Paper Series 2023*: 136); Pemstein et al. (2023, *V-Dem Working Paper Series 2023*:21)

YEARS: 1945-2021

2.3.64.35 Presence of patriotic symbols in schools (v2edscpatriot_mode)

Long tag: vdem_cy_v2edscpatriot_mode

Original tag: v2edscpatriot_mode

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Anja Neundorf

QUESTION: Are patriotic symbols displayed in schools?

CLARIFICATION: Examples of patriotic symbols include: the national flag, a picture or bust of current or past country leaders, singing the national anthem or reciting national pledges, and celebrations of national days, heroes, historical or military events (for example, victory in a war). It further includes symbols associated with the ruling party, royal family, military junta, or other group/entity representing the political regime (e.g., party logo, symbol for royal family, military symbol tied to the particular regime, symbol of specific ethnic group or class dominating the regime). Patriotic symbols include religious symbols if (and only if) religious and state authorities are closely interlinked.

Here we refer to the school building(s) and classrooms and not to the content of learning material, such as textbooks.

If there is significant variation in the use of patriotic symbols across the territory, the answer should reflect the average or typical school across the sub-national units.

RESPONSES:

0: Patriotic symbols are usually not displayed.

0.5: Multimodal.

1: Patriotic symbols are displayed.

SCALE: Binary unless it is multimodal, aggregated by expert mode.

NOTES: This version builds on v2edscpatriot but is aggregated across coders using the mode. If the mode is not unique we assign that observation a value of 0.5. Hence, a value of 0.5 represents a multimodal response distribution.

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Anja Neundorf

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: How often are patriotic symbols or dates celebrated in schools?

CLARIFICATION: To celebrate patriotic symbols can be: to explicitly draw students' attention to the symbols or to regularly remind students about the symbols. Examples include: flag raising ceremonies, reciting a pledge of allegiance, or broadcasting or singing the national anthem.

RESPONSES:

0: Never.

1: Once per year or less.

2: Several times per year.

3: At least once per week.

SCALE: Ordinal, converted to interval by the measurement model.

NOTES: Please answer this question only when 1 is selected in a given year for v2edscpatriot.

DATA RELEASE: 13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CLEANING: Set to 0 when v2edscpatriot is 0.

2.3.64.37 Extracurricular activities (v2edsceextracurr)

Long tag: vdem_cy_v2edsceextracurr

Original tag: v2edsceextracurr

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Anja Neundorf

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Do schools promote involvement in extracurricular civic and/or political activities?

CLARIFICATION: Extracurricular civic activities can include (but are not limited to): joining a political organization, a specific political party, the army, a civil society organization, a labor union, a grassroots activist organization, volunteering in the local community, leadership activities, school-community partnerships.

Schools can promote these activities by providing such opportunities (e.g. by having a school council), or encouraging pupils to get involved in these outside of school (e.g. by emphasizing the importance of volunteering).

RESPONSES:

0: Schools do not promote extracurricular civic and/or political activities.

1: Schools promote extracurricular civic and/or political activities to some extent, but these activities are not considered an integral part of education.

2: Schools promote extracurricular civic and/or political activities as an integral part of education.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Neundorf et al. (2023a, 2023b, *V-Dem Working Paper Series* 2023: 136); Pemstein et al. (2023, *V-Dem Working Paper Series* 2023:21)

YEARS: 1945-2021

2.3.64.38 Education requirements for primary school teachers (v2edtequal)

Long tag: vdem_cy_v2edtequal

Original tag: v2edtequal

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Anja Neundorf

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: What are the *de facto* education requirements to become a primary school teacher?

CLARIFICATION: If there is substantive variation at the sub-national or local levels, please consider the education requirements for the majority of primary school teachers in the country. Some countries may require a degree/diploma in education and others may accept a degree in any subject – indicate the completed education level required regardless of specialization. Please consider initial requirements to be a teacher not those for further professional development.

RESPONSES:

0: There are no educational requirements for aspiring teachers beyond proof of basic literacy and/or numeracy skills (ISCED Level 2 or lower).

1: Aspiring teachers must have completed a secondary school level education (ISCED Level 3).

2: Aspiring teachers must have achieved an education at the post-secondary, non-university

level (for example, technical or vocational institutions) (ISCED Level 4).

3: Aspiring teachers must have completed at least one degree program taught at the university level (ISCED Level 5 and above).

SCALE: Ordinal, converted to interval by the measurement model.

NOTES: In defining different education levels, we use the ISCED classification adopted by UNESCO, the International Standard Classification of Education (ISCED) 2011.

DATA RELEASE: 13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Neundorf et al. (2023a, 2023b, *V-Dem Working Paper Series* 2023: 136); Pemstein et al. (2023, *V-Dem Working Paper Series* 2023:21)

YEARS: 1945-2021

2.3.64.39 Teacher inspection (v2tmonitor)

Long tag: vdem_cy_v2tmonitor

Original tag: v2tmonitor

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Anja Neundorf

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Is there a comprehensive monitoring system in place for public authorities to conduct external teacher inspection?

CLARIFICATION: This question concerns the formal monitoring efforts of the relevant public/government authorities (national / sub-national / local authorities / school district administration) to conduct external inspection of teachers, that is, it concerns the operations of a formal bureaucratic hierarchy outside of school that works to inspect teachers. We are not interested in peer review observations of teachers working in the same school. We are not interested in *de jure* formal procedures but whether they are *de facto* carried out in practice. Teacher inspection can include external inspectors conducting teaching observations inside the classroom or during a class, before a class (audits of teachers' lesson plans) or after a class (for example, audits of students' notebooks and teachers' assessment of students' schoolwork). We define a comprehensive inspection in the following way(s): inspections are regular, conducted according to standardized and transparent protocols, with impartial and objective judgements; inspection results are reported to relevant national or sub-national government offices, etc.

If there are substantive differences between the primary and secondary education levels, please provide the response that is most accurate for the majority of schools.

RESPONSES:

0: There is no external teacher inspection.

1: While there is a system in place for external teacher inspection, it is not comprehensive.

2: There is a generally comprehensive system in place for external teacher inspection.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Neundorf et al. (2023a, 2023b, *V-Dem Working Paper Series* 2023: 136); Pemstein et al. (2023, *V-Dem Working Paper Series* 2023:21)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Anja Neundorf

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_mode, *_nr

QUESTION: Do officially recognized teacher unions exist in this country?

CLARIFICATION: Please answer this question without taking into account the nature of the union. That is, for the purposes of this question it is irrelevant if the teacher union is distinct or part of a larger union (e.g. a trade union federation). This question does not concern why a teacher's union does or does not exist. It is irrelevant if a union does not exist because (teacher) unionization is formally prohibited, teacher unionization can be allowed *de jure* but prohibited *de facto* due to government pressure, or there can be a lack of organization capacity among teachers.

RESPONSES:

0: No officially recognized teacher unions exist.

1: Officially recognized teacher unions exist.

ORDERING: If answer is 0 in a given year, please skip v2edteunionindp for this year.

SCALE: Binary, converted to interval by the measurement model.

NOTES: This is a filtering question for v2edteunionindp. For the mode version of this variable, we assign an observation a value of 0.5 if the mode is not unique, i.e., a value of 0.5 represents a multimodal response distribution.

DATA RELEASE: 13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Anja Neundorf

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Are officially recognized teacher unions independent from political authorities?

CLARIFICATION: Please answer this question regardless of the nature of teacher unions, that is, it is irrelevant if teacher unions are distinct or part of a comprehensive union (e.g. trade union federations). In cases where there is substantive sub-national variation, please consider teacher unions in the most populous sub-national units.

Political authorities can be national / sub-national / local public authorities and include ruling political parties and office holders such as presidents, prime minister or ministers.

This question does not distinguish between different mechanisms that can lead to teacher unions being dependent on the state. It is irrelevant if the relationship with the state was due to coercion, co-optation, or voluntary strategic alliances.

RESPONSES:

0: Teacher unions are fully independent.

1: Teacher unions are mostly independent.

2: Teacher unions are somewhat independent.

3: Teacher unions are not independent.

SCALE: Ordinal, converted to interval by the measurement model.

NOTES: Please answer this question only when option 1 was selected for v2edteunion.

DATA RELEASE: 13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CLEANING: Set to missing when v2edteunion is 0.

CITATION: Neundorf et al. (2023a, 2023b, *V-Dem Working Paper Series* 2023: 136);

2.3.64.43 Political teacher hiring (v2edtehire)

Long tag: vdem_cy_v2edtehire

Original tag: v2edtehire

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Anja Neundorf

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: To what extent are hiring decisions for teachers based on their political views and/or political behavior and/or moral character?

CLARIFICATION: Please consider hiring decisions across all subjects.

This question concerns actual practice (*de facto*, not legislation pertaining to the recruitment procedures for teachers).

This question concerns hiring decisions based on political views, or statements, participation

in political protests, or membership in political parties or other organizations on the part of hiring candidates. Note that these behaviors can result in either a) relevant candidates not being hired (for example, being denied a teaching job due to a party affiliation) and b) only specific candidates being hired (for example, being hired due to pro-regime ideological affinities, party membership or moral character). Note that sometimes “moral character” is used as a pretext for political hiring decisions. In such cases, treat this pretext as political. Please consider the situation for both primary and secondary school teachers. If there are substantive differences between the primary and secondary education levels, please provide the response that applies to the majority of teachers.

RESPONSES:

0: Rarely or never.

1: Sometimes.

2: Often.

3: Almost exclusively.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

CITATION: Neundorf et al. (2023a, 2023b, *V-Dem Working Paper Series* 2023: 136); Pemstein et al. (2023, *V-Dem Working Paper Series* 2023:21)

2.3.64.44 Political teacher firing (v2edtefire)

Long tag: vdem_cy_v2edtefire

Original tag: v2edtefire

Dataset citation: Coppedge et al. (2023), Pemstein, Marquardt, Tzelgov, Wang, Medzihorsky, Krusell, Miri & von Römer (2023)

Description:

VARIABLE TYPE: C

PROJECT MANAGER(S): Anja Neundorf

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: How likely is it that teachers would be fired if they were to publicly express political views that contradict the dominant political order?

CLARIFICATION: This question pertains to firings of teachers on the basis of their political views, statements or membership in parties or organizations. We are not interested in firings for reasons related to their performance or professional competencies.

Dominant political order: A country’s political norms and key political institutions and authorities. We are not interested in the violations of predominant social, cultural and moral norms unless they are explicitly politicized.

Public expression of political views can happen at school or outside of school (for example, public tweets, participation in a protest).

RESPONSES:

0: Teachers would almost never be fired.

1: Teachers would sometimes be fired.

2: Teachers would likely be fired.

3: Teachers would almost certainly be fired.

SCALE: Ordinal, converted to interval by the measurement model.

DATA RELEASE: 13.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

2.4.1 Regime Type Variables

This section includes variables related to regime type, country, and year.

2.4.1.1 Country identifier (country_id)

Long tag: vdem_ert_country_id

Original tag: country_id

Dataset citation: Edgell et al. (2020)

Description:

What is the V-Dem unique country identifier for this case?

Format: integer, [3,236]

2.4.1.2 Country text identifier (country_text_id)

Long tag: vdem_ert_country_text_id

Original tag: country_text_id

Dataset citation: Edgell et al. (2020)

Description:

What is the V-Dem country text identifier for this case?

Format: string

2.4.1.3 Country name (country_name)

Long tag: vdem_ert_country_name

Original tag: country_name

Dataset citation: Edgell et al. (2020)

Description:

What is the V-Dem country name for this case?
Format: string

2.4.1.4 Year (year)

Long tag: vdem_ert_year

Original tag: year

Dataset citation: Edgell et al. (2020)

Description:

What is the year of this observation?

Clarification: Based on 31 December or the average of historical date from V-Dem.

Format: integer, [1900,2019]

2.4.1.5 Regimes of the World (v2x_regime)

Long tag: vdem_ert_v2x_regime

Original tag: v2x_regime

Dataset citation: Edgell et al. (2020)

Variable citation: Lührmann et al. (2018), v2x_elecreg v2xlg_elecreg v2xex_elecreg v2elmulpar_osp_ex v2elmulpar_osp_leg v2elmulpar_osp v2elfrfair_osp v2elfrfair_osp_leg v2elfrfair_osp_ex v2expathhg v2expathhs v2ex_legconhos v2ex_hosw v2x_polyarchy v2x_liberal v2clacjstm_osp v2clacjstw_osp v2cltrnslw_osp v2exaphogp

Description:

What is the regime value for this country-year according to the Regimes of the World?

0– Closed autocracy

1– Electoral Autocracy

2– Electoral Democracy

3– Liberal Democracy

Format: integer, [0,3]

2.4.1.6 Electoral democracy index (v2x_polyarchy)

Long tag: vdem_ert_v2x_polyarchy

Original tag: v2x_polyarchy

Dataset citation: Edgell et al. (2020)

Variable citation: Teorell et al. (2019), v2x_freexp_altinf v2x_frassoc_thick v2x_suffr v2xel_frefair v2x_elecoff

Description:

What is the country's current score on the V-Dem electoral democracy index (EDI)?

Format: interval, [0,1]

Other versions: v2x_polyarchy codelow; v2x_polyarchy codehigh

2.4.1.7 Regime founding (reg_start_year)

Long tag: vdem_ert_reg_start_year

Original tag: reg_start_year

Dataset citation: Edgell et al. (2020)

Description:

When was the current regime founded?

Clarification: This variable is coded as the year the regime was founded and is coded for the entire duration of the regime.

For democratic regimes, this is coded as the year after the country moves from autocracy to democracy on the RoW measure, provided that direct national-level elections for the parliament, executive, or a constituent assembly are subsequently held under conditions of

democracy (on the RoW measure) and the elected officials are able to assume office.

For autocratic regimes, this is generally defined as the year the country moved from democracy to autocracy on the RoW measure. To guard against noise in the data, we require that cases moving from democracy to electoral autocracy stay autocratic for the tolerance period (e.g. 5 years) or hold an autocratic founding election. Autocratic founding elections are defined as the first direct national-level election for the parliament, executive, or a constituent assembly having been held under conditions of autocracy on the RoW measure.

To deal with left censoring, we code the first regime after the coding starts or a gap in the case based solely on the RoW value, and set its founding year as the first observation year after the coding starts or a gap ends in the data.

We deal with right censoring conservatively, by assuming the regime persists until we receive information to the contrary. Because democratic regime founding (i.e. transition) is not completed until the founding democratic election occurs, those cases where a change in RoW results in democracy without holding an election before the end of coding or a gap in coding are treated as remaining autocratic. Likewise, for changes from democracy to electoral autocracy that occur within the tolerance (e.g. 5 years) of the coding end or gap in the dataset and do not hold a founding autocratic election, we also treat as remaining democratic until the coding end or gap. For changes from democracy to closed autocracy, censoring is not an issue as we take the year the case becomes closed as the transition or founding of the new autocratic regime.

Required variables: v2x regime; v2eltype 0; v2eltype 4; v2eltype 6; v2elasmoff ord
Format: year, [1900,2019]

2.4.1.8 Regime termination (reg_end_year)

Long tag: vdem_ert_reg_end_year

Original tag: reg_end_year

Dataset citation: Edgell et al. (2020)

Description:

When will the current regime end?

Clarification: This variable is coded as the year the regime ends and is coded for the entire duration of the regime.

For democratic regimes, this is generally coded as the year the country moved from democracy to autocracy on the RoW measure, provided that it resulted in a democratic breakdown. To guard against noise in the data, we require that cases moving from democracy to electoral autocracy stay autocratic for the tolerance period or hold an autocratic founding election. Autocratic founding elections are defined as the first direct national-level election for either the parliament, executive, or a constituent assembly having been held under conditions of autocracy on the RoW measure, after a transition from democracy to autocracy on the RoW measure.

For autocratic regimes, this is coded as the year the country moves from autocracy to democracy on the RoW measure, provided that direct national-level elections for the parliament, executive, or a constituent assembly are subsequently held under conditions of democracy (on the RoW measure) and the elected officials are able to assume office.

Right censoring is not an issue for changes between autocracy and democracy, because the regime ending (i.e. transition) is not completed until after the founding democratic election occurs. Thus, we assume the previous autocratic regime persists until we receive information to the contrary. A change in RoW resulting in democracy that stays there to the end of the coding or a gap in coding without holding an election is treated as remaining autocratic.

For changes from democracy to closed autocracy (i.e. breakdown), censoring is also not an issue as we take the year prior to when the case becomes closed as the end of the regime.

For changes from democracy to electoral autocracy that occur within the tolerance (e.g. 5 years) of the coding end or gap in the dataset and do not hold a founding autocratic election, we treat these as remaining democratic until the coding end or gap.

Required variables: v2x regime; v2eltype 0; v2eltype 4; v2eltype 6; v2elasmoff ord
Format: year, [1900,2019]

2.4.1.9 Regime identifier (reg_id)

Long tag: vdem_ert_reg_id

Original tag: reg_id

Dataset citation: Edgell et al. (2020)

Description:

What is the unique regime identifier?

Clarification: This is a combination of the country text id, start, and end year of the regime.

Required variables: country text id, reg start year, reg end year.

Format: string

2.4.1.10 Regime type (reg_type)

Long tag: vdem_ert_reg_type

Original tag: reg_type

Dataset citation: Edgell et al. (2020)

Description:

What is the current regime type?

Clarification: This variable denotes whether the current regime can be classified as a democracy or autocracy.

0– Autocracy. A country-year coded as autocracy on the RoW measure that has had an autocratic transition, i.e. (a) closed autocracy; or (b) electoral autocracy that has held an autocratic founding election and/or stayed autocratic for the tolerance period (e.g. 5 years).

1– Democracy. A country-year coded as democracy on the RoW measure that has held a democratic founding election. The year of the founding election is included.

To deal with left censoring, we code the first regime after the coding starts or a gap in the case purely based on the RoW value, and set its founding year as the first observation year after the coding starts or a gap ends in the data.

Right censoring is not an issue for changes between autocracy and democracy, because the regime founding (i.e. transition) is not completed until the founding democratic election occurs. Thus, we assume the previous autocratic regime persists until we receive information to the contrary. A change in RoW resulting in democracy that stays there to the end of the coding or a gap in coding without holding an election is treated as remaining autocratic.

For changes from democracy to closed autocracy, censoring is also not an issue as we take the year the case becomes closed as the transition or founding of the new autocratic regime.

For changes from democracy to electoral autocracy that occur within the tolerance (e.g. 5 years) of the coding end or gap in the dataset and do not hold a founding autocratic election, we treat these as remaining democratic until the coding end or gap.

Required variables: v2x regime, reg founding Format: categorical, [0,1]

2.4.1.11 Regime transition (reg_trans)

Long tag: vdem_ert_reg_trans

Original tag: reg_trans

Dataset citation: Edgell et al. (2020)

Description:

Was there a regime transition in the country-year? If so, what type?

Clarification: This variable is coded based on a transition between democracy and autocracy based on the regime founding criteria. It is coded as the final year of a regime.

-1– Democratic breakdown.

0– No regime transition

1– Democratic transition.

Required variables: reg type Format: categorical, [-1,1]

2.4.1.12 Founding election (dem_founding_elec)

Long tag: vdem_ert_dem_founding_elec

Original tag: dem_founding_elec

Dataset citation: Edgell et al. (2020)

Description:

When was the founding democratic election for this regime?

Clarification: This variable is only coded for democratic regime years and reflects the first election held under democracy within the democratic regime that allowed officials to assume office in either the legislature, executive, or a constituent assembly. It is coded for all years of the regime and missing for all non-democratic country-years.

Required variables: v2eltype 0, v2eltype 4, v2eltype 6, v2elasmoff ord, v2x regime Format: year, [1903,2019]

NA: V-Dem data required to construct the variable is missing.

2.4.1.13 Founding autocratic election (aut_founding_elec)

Long tag: vdem_ert_aut_founding_elec

Original tag: aut_founding_elec

Dataset citation: Edgell et al. (2020)

Description:

When was the founding autocratic election for this regime?

Clarification: This variable is only coded for autocratic regime years and reflects the first election held under autocracy in either the legislature, executive, or a constituent assembly. It is coded for all years of the regime and missing for all democratic country- years.

Required variables: v2eltype 0, v2eltype 4, v2eltype 6, v2x regime Format: year, [1903,2019]

NA: V-Dem data required to construct the variable is missing.

2.4.1.14 RoW regime change event (row_regch_event)

Long tag: vdem_ert_row_regch_event

Original tag: row_regch_event

Dataset citation: Edgell et al. (2020)

Description:

Was there a regime change according to the RoW measure during this country-year?

Clarification: This variable is coded based on a change between democracy and autocracy on the RoW measure.

-1- Change from democracy to autocracy on RoW

0- No regime change on RoW

1- Change from autocracy to democracy on RoW

Required variables: v2x regime Format: categorical, [-1,1]

2.4.1.15 RoW regime change censored (row_regch_censored)

Long tag: vdem_ert_row_regch_censored

Original tag: row_regch_censored

Dataset citation: Edgell et al. (2020)

Description:

Is this particular regime change censored?

Clarification: If the regime change on RoW between democracy and autocracy occurs within tolerance period (e.g. 5 years) of the end of coding or a gap in coding, it is considered censored unless we know there was a breakdown or democratic transition based on above criteria.

Required variables: row regch event, codingend, gapstart1, gapstart2, gapstart3

Format: dummy, [0,1]

2.4.2 Democratization Episodes

This section includes variables related to democratization.

2.4.2.1 Democratization episode (dem_ep)

Long tag: vdem_ert_dem_ep

Original tag: dem_ep

Dataset citation: Edgell et al. (2020)

Description:

Was there an ongoing democratization episode during the country-year?

Clarification: A period of substantial and sustained increases on V-Dem's Electoral Democracy Index (EDI). The default parameters require that such a period begin with an initial 0.01 increase on the EDI and a total increase of at least 0.10 throughout the episode. A democratization episode ends the final year of a positive change greater than or equal to the initial increase (e.g. 0.01), prior to experiencing an annual drop, cumulative drop, or stasis period. These are defined in the defaults as -0.03, -0.10, and 5 years, respectively.

Required variables: v2x polyarchy

Format: dummy, [0,1]

2.4.2.2 Democratization episode identifier (dem_ep_id)

Long tag: vdem_ert_dem_ep_id

Original tag: dem_ep_id

Dataset citation: Edgell et al. (2020)

Description:

What is the unique identifier for current the democratization episode?

Clarification: This is a combination of the country text id, start, and end year of the episode. This is coded for all episode years and the pre-episode year.

Required variables: country text id, dem ep start year, dem ep end year.

Format: string

2.4.2.3 Democratization episode start year (dem_ep_start_year)

Long tag: vdem_ert_dem_ep_start_year

Original tag: dem_ep_start_year

Dataset citation: Edgell et al. (2020)

Description:

When did the current episode of democratization begin?

Clarification: The first year of the democratization episode, defined as the first year of a positive change equal or greater than the start inclusion (e.g. +0.01) on the EDI, followed by a period of sustained positive changes on the EDI. This is coded for all years within the episode and the pre-episode year.

Format: year, [1901,2018]

2.4.2.4 Democratization episode end year (dem_ep_end_year)

Long tag: vdem_ert_dem_ep_end_year

Original tag: dem_ep_end_year

Dataset citation: Edgell et al. (2020)

Description:

When will the current episode of democratization end?

Clarification: The final year of the democratization episode, defined as the last positive change equal to or greater than the start inclusion (e.g. +0.01) on the EDI before experiencing an annual drop (e.g. -0.03), gradual drop over the tolerance (e.g. -0.10 over 5 years), or a period of no positive changes on the EDI equal to the start inclusion (e.g. +0.01) for the tolerance (e.g. 5 years). This is coded for all years within the episode and the pre-episode year.

Format: year, [1902,2019]

2.4.2.5 Pre-democratization episode year (dem_pre_ep_year)

Long tag: vdem_ert_dem_pre_ep_year

Original tag: dem_pre_ep_year

Dataset citation: Edgell et al. (2020)

Description:

Will a democratization episode begin in the following year?

Clarification: Coded as the year before a democratization episode begins.

Format: dummy, [0,1]

2.4.2.6 Democratization episode termination type (dem_ep_termination)

Long tag: vdem_ert_dem_ep_termination

Original tag: dem_ep_termination

Dataset citation: Edgell et al. (2020)

Description:

Why did the current democratization episode terminate the year it did?

Clarification: Democratization episodes generally end the final year of a positive change greater than or equal to the start incl parameter (e.g. 0.01). This is coded for the entire episode. The reasons for termination include:

0– Censored. This occurs when the episode has not experienced any of the below conditions and experienced its last positive change greater than or equal to the start incl parameter (e.g. 0.01) within the tolerance period of coding end or a gap in coding (e.g. 5 years).

1– Stasis. The episode terminated because the political unit did not experience any subsequent increases greater than or equal to the start incl parameter (e.g. +0.01) for a period of time longer than the tolerance period (e.g. 5 years).

2– Year drop. The episode terminated because the political unit experienced an annual drop of less than or equal to the year turn parameter (e.g. -0.03) within the tolerance window (e.g. 5 years) of its last positive change greater than or equal to start incl (e.g. +0.01).

3– Cumulative drop. The episode terminated because the political unit experienced a cumulative drop less than or equal to the cum turn parameter (e.g. -0.10) within the tolerance window (e.g. 5 years) of the last positive change greater than or equal to start incl (e.g. +0.01). Note: Using our default parameters with v10 produces no cases of this. All are absorbed by category 2, “year drop”. However, we maintain it here and in the script for those who might encounter this independent of a year drop depending on how the parameters are set.

4– Closed or breakdown. The episode terminated because the country reverted to closed authoritarianism on the RoW measure or experienced a democratic breakdown according to reg trans.

Required variables: v2x polyarchy, v2x regime, codingend, gapstart1, gapstart2, gapstart3

Format: categorical, [0,4]

2.4.2.7 Episode with potential democratic transition (dem_ep_prch)

Long tag: vdem_ert_dem_ep_prch

Original tag: dem_ep_prch

Dataset citation: Edgell et al. (2020)

Description:

Is there an ongoing democratization episode within the political unit that has/had the potential for a regime change?

Clarification: By regime change, we mean a reclassification from autocracy to democracy (“democratic transition”). To count as a “democratic transition”, the country must move from autocracy (1t;2) to democracy (2) on the RoW within the episode period and experience a “founding” democratic election (i.e. elections for the legislature, executive, or constituent assembly) for which the elected officials were able to assume office. Here we are not interested in movements between intermediate types of autocracy (i.e. electoral or closed) or democracy (i.e. electoral or liberal). Instead, this variable captures whether an episode originates in an authoritarian regime and has the potential to produce a democratic transition. This variable is coded for the entire episode, even if the transition has already occurred.

0– Not in an episode with the potential for democratic transition.

1– In an episode with the potential for democratic transition.

Notes: This variable supersedes “sub dem ep” (ERT v1.2). It will be useful for re- searchers interested in studying a subset of democratization episodes where autocracies had the potential to become democratic (i.e. liberalizing autocracies).

Required variables: dem ep, reg type Format: dummy, [0,1]

2.4.2.8 Post-democratic transition episode year (dem_ep_ptr)

Long tag: vdem_ert_dem_ep_ptr

Original tag: dem_ep_ptr

Dataset citation: Edgell et al. (2020)

Description:

Has the political unit experienced a democratic transition within the current episode?

Clarification: This variable captures whether, during the current episode of democrati- zation, the political unit experienced a democratic transition. In other words, it captures those years of democratic deepening that occur in an episode after a democratic transition occurred.

0– No democratic transition has occurred 1– A democratic transition has occurred

Notes: This variable supersedes “sub dem ep” (ERT v1.2). This variable may be useful for those who wish to limit their analysis to the authoritarian years of an episode prior to a democratic transition.

Required variables: dem ep, reg trans, dem ep prch

Format: dummy, [0,1]

2.4.2.9 Democratic transition and democratic deepening (dem_ep_subdep)

Long tag: vdem_ert_dem_ep_subdep

Original tag: dem_ep_subdep

Dataset citation: Edgell et al. (2020)

Description:

Did the current episode experience a democratic transition and subsequently democratic deepening?

Clarification: This variable is coded for episodes that experienced a democratic transition followed by democratic deepening. It is coded for the entire episode. It provides a further refinement of the outcome (dem ep outcome) for those who are interested in exploring which episodes culminated in transition versus those that continued deepening after the transition.

0– This episode does not experience a democratic transition and democratic deepening

1– This episode experiences a democratic transition and subsequently democratic deepening

Required variables: dem_ep, reg _rans, dem_ep_prch, dem_ep_ptr

Format: dummy, [0,1]

2.4.2.10 Democratization outcome (dem_ep_outcome)

Long tag: vdem_ert_dem_ep_outcome

Original tag: dem_ep_outcome

Dataset citation: Edgell et al. (2020)

Description:

What was the outcome of the current democratization episode?

Clarification: This variable captures detailed outcomes of the episodes. Episodes experi- encing a democratic transition are coded accordingly, even if the episode endures a subse- quent period of democratic deepening. Separate variables (dem ep subdep, dem ep ptr) account for this variation.

0–There is no democratization episode during this year.

1 - Democratic transition. The episode resulted in a change from autocracy to democ- racy on the RoW measure followed by a democratic founding election. Applies to entire episode, even if subsequent democratic deepening occurred.

2– Preempted democratic transition. The episode resulted in a change from autocracy to democracy on the RoW measure but the political unit did not hold a democratic founding election before reverting to autocracy.

3– Stabilized electoral autocracy. The episode did not result in a change from autocracy to democracy on the RoW measure, and the political unit stabilized as an electoral autocracy for the tolerance period (e.g. 5 years) without subsequent improvements equal to the start inclusion (e.g. +0.01).

4– Reverted liberalization. The episode (a) never resulted in change from closed autocracy on the RoW measure, (b) resulted in an electoral autocracy on the RoW measure but the political unit reverted back to closed autocracy, (c) resulted in an electoral autocracy on the RoW measure but the political unit experienced a subsequent annual decline less than or equal to the year turn parameter (e.g. -0.03) or a decline less than the cum turn parameter (e.g. -0.10) on the EDI over the course of the tolerance period (e.g. 5 years).

5– Deepened democracy. The episode resulted in further liberalization or democratization of a political unit that was already classified as democracy in the pre-episode year.

6– Uncertain. The outcome of the episode is uncertain because it has the potential for a regime change (`dem ep prch==1`) but is ongoing in the final observation year of the dataset or before a gap in coding is encountered.

Note: This variable supersedes the older version (ERT v1.2) and has been recoded at the entire episode level. There may be a small number of observations (or none, depending on parameters) within each of these outcome types. Users should be aware and consider the more aggregate outcome types for statistical analysis.

Required variables: `dem ep`, `row regch event`, `reg type`, `dem ep termination` Format: categorical, [0,6]

2.4.2.11 Aggregate democratization outcome (`dem_ep_outcome_agg`)

Long tag: `vdem_ert_dem_ep_outcome_agg`

Original tag: `dem_ep_outcome_agg`

Dataset citation: Edgell et al. (2020)

Description:

What was the aggregate outcome of the current democratization episode?

Clarification: This variable captures aggregate outcomes of the episodes. Episodes experiencing a democratic transition are coded accordingly, even if the episode endures a subsequent period of democratic deepening or autocratic regression. Separate variables (`dem ep subdep`, `dem ep ptr`) account for this variation.

0–There is no democratization episode during this year.

1– Democratic transition. The episode resulted in a change from autocracy to democracy on the RoW measure followed by a democratic founding election. Applies to entire episode, even if subsequent democratic deepening occurred.

2– No democratic transition. The episode did not result in a change from autocracy to democracy on the RoW measure; or it did result in a change between democracy and autocracy on the RoW measure, but the political unit did not hold a democratic founding election before reverting to autocracy.

3– Deepened democracy. The episode resulted in further liberalization or democratization of a political unit that was already classified as democracy in the pre-episode year.

4– Uncertain. The outcome of the episode is uncertain because it has the potential for a regime change (`dem ep prch==1`) but is ongoing in the final observation year of the dataset or before a gap in coding is encountered.

Note: This variable provides an aggregate alternative to `dem ep outcome` that may be more useful for those engaging in statistical modeling.

Required variables: `dem ep`, `row regch event`, `reg type`, `dem ep termination` Format: categorical, [0,4]

2.4.2.12 Democratization episode censored (`dem_ep_censored`)

Long tag: `vdem_ert_dem_ep_censored`

Original tag: dem_ep_censored

Dataset citation: Edgell et al. (2020)

Description:

Is the current democratization episode censored?

Clarification: A democratization episode may be censored if its end date corresponds with the date the coding for the case ends (i.e. codingend) or the year before a gap starts in the coding (i.e. gapstart1, gapstart2, gapstart3).

Required variables: dem_ep_end_year, codingend, gapstart1, gapstart2, gapstart3
Format: dummy, [0,1]

2.4.3 Autocratization Episodes

This section includes variables related to autocratization.

2.4.3.1 Autocratization episode (aut_ep)

Long tag: vdem_ert_aut_ep

Original tag: aut_ep

Dataset citation: Edgell et al. (2020)

Description:

QUESTION: Was there an ongoing autocratization episode during the country-year?

CLARIFICATION: A period of substantial and sustained decreases on V-Dem's Electoral Democracy Index (EDI). The default parameters require that such a period begin with an initial -0.01 decrease on the EDI and a total decrease of at least -0.10 throughout the episode. An autocratization episode ends the final year of a negative change less than or equal to the initial decrease (e.g. -0.01), prior to experiencing an annual increase, cumulative increase, or stasis period. These are defined in the defaults as $+0.03$, $+0.10$, and 5 years respectively.

REQUIRED VARIABLES: v2x_polyarchy

FORMAT: dummy, [0,1]

2.4.3.2 Autocratization episode identifier (aut_ep_id)

Long tag: vdem_ert_aut_ep_id

Original tag: aut_ep_id

Dataset citation: Edgell et al. (2020)

Description:

QUESTION: What is the unique identifier for current the autocratization episode? This is coded for all episode years and the pre-episode year.

CLARIFICATION: This is a combination of the country text id, start, and end year of the episode.

REQUIRED VARIABLES: country_text_id, aut_ep_start_year, aut_ep_end_year.

FORMAT: string

2.4.3.3 Autocratization episode start year (aut_ep_start_year)

Long tag: vdem_ert_aut_ep_start_year

Original tag: aut_ep_start_year

Dataset citation: Edgell et al. (2020)

Description:

QUESTION: When did the current episode of autocratization begin?

CLARIFICATION: The first year of the autocratization episode, defined as the first year of a negative change equal or less than the start inclusion (e.g. -0.01) on the EDI, followed by a period of sustained negative changes on the EDI. This is coded for all episode years and the pre-episode year.

FORMAT: year, [1905,2017]

2.4.3.4 Autocratization episode end year (aut_ep_end_year)

Long tag: vdem_ert_aut_ep_end_year

Original tag: aut_ep_end_year

Dataset citation: Edgell et al. (2020)

Description:

QUESTION: When will the current episode of autocratization end?

CLARIFICATION: The final year of the autocratization episode, defined as the last negative change equal to or less than the start inclusion (e.g. -0.01) on the EDI before experiencing an annual increase (e.g. $+0.03$), gradual increase over the tolerance (e.g. $+0.10$ over 5 years), or a period of no negative changes less than or equal to the start inclusion (e.g. -0.01) on the EDI for the tolerance (e.g. 5 years). This is coded for all years of the episode and the pre-episode year.

FORMAT: year, [1906,2019]

2.4.3.5 Pre-autocratization episode year (aut_pre_ep_year)

Long tag: vdem_ert_aut_pre_ep_year

Original tag: aut_pre_ep_year

Dataset citation: Edgell et al. (2020)

Description:

CLARIFICATION: Coded as the year before an autocratization episode begins.

FORMAT: dummy, [0,1]

2.4.3.6 Autocratization episode termination type (aut_ep_termination)

Long tag: vdem_ert_aut_ep_termination

Original tag: aut_ep_termination

Dataset citation: Edgell et al. (2020)

Description:

QUESTION: Why did the current autocratization episode terminate in the year it did?

CLARIFICATION: Autocratization episodes generally end the final year of a negative change less than or equal to the start incl parameter (e.g. -0.01). This variable is coded for all episode years. The reasons for termination include:

0– Censored. This occurs when the episode has not experienced any of the below conditions and experienced its last negative change less than or equal to the start incl parameter (e.g. -0.01) within the tolerance period of coding end or a gap in coding (e.g. 5 years).

1– Stasis. The episode terminated because the political unit did not experience any subsequent decreases less than or equal to the start incl parameter (e.g. -0.01) for a period of time longer than the tolerance period (e.g. 5 years).

2– Year increase. The episode terminated because it experienced an annual increase greater than or equal to the year turn parameter (e.g. $+0.03$) within the tolerance window (e.g. 5 years) of its last negative change.

3– Cumulative increase. The episode terminated because it experienced a cumulative increase greater than or equal to the cum turn parameter (e.g. $+0.10$) within the tolerance window (e.g. 5 years) of the last negative change. Note: Using our default parameters with v10 produces no cases of this. All are absorbed by category 2, “year increase”. However, we maintain it here and in the script for those who might encounter this independent of a year increase depending on how the parameters are set.

4– Democratic transition. The episode terminated because the country experienced a democratic transition according to reg trans.

REQUIRED VARIABLES: v2x_polyarchy, v2x_regime

Format: categorical, [0,3]

2.4.3.7 Episode with potential democratic breakdown (aut_ep_prch)

Long tag: vdem_ert_aut_ep_prch

Original tag: aut_ep_prch

Dataset citation: Edgell et al. (2020)

Description:

QUESTION: Is there an ongoing autocratization episode within the political unit that has/had the potential for a regime change?

CLARIFICATION: By regime change, we mean a reclassification from democracy to autocracy (“democratic breakdown”). To count as a “democratic breakdown”, the country must move from democracy (2) to autocracy (lt;2) on the RoW within the episode period and experience either a “founding” autocratic election (i.e. elections for the legislature, executive, or constituent assembly) or remain classified as autocratic for the tolerance period (e.g. 5 years). Here we are not interested in movements between intermediate types of autocracy (i.e. electoral or closed) or democracy (i.e. electoral or liberal). Instead, this variable captures whether an episode originates in an democratic regime and has the potential to produce a democratic breakdown. This variable is coded for the entire episode, even if the transition has already occurred.

0– Not in an episode with the potential for democratic breakdown.

1– In an episode with the potential for democratic breakdown.

Notes: This variable supersedes “sub aut ep” (ERT v1.2). It will be useful for researchers interested in studying a subset of autocratization episodes where democracies had the potential to become autocratic (i.e. democratic regression).

Required variables: aut_ep, reg_type

FORMAT: dummy, [0,1]

2.4.3.8 Post-democratic breakdown episode year (aut_ep_pbr)

Long tag: vdem_ert_aut_ep_pbr

Original tag: aut_ep_pbr

Dataset citation: Edgell et al. (2020)

Description:

QUESTION: Has the political unit experienced a democratic breakdown within the current episode?

CLARIFICATION: This variable captures whether, during the current episode of autocratization, the political unit experienced a democratic breakdown. In other words, it captures those years of autocratic regression that occur in an episode after a democratic breakdown occurred.

0– No democratic breakdown has occurred

1– A democratic breakdown has occurred

NOTES: This variable supersedes “sub aut ep” (ERT v1.2). This variable may be useful for those who wish to limit their analysis to the democratic years of an episode prior to a democratic breakdown.

REQUIRED VARIABLES: aut_ep, reg_trans, aut_ep_prch

FORMAT: dummy, [0,1]

2.4.3.9 Democratic breakdown and autocratic regression (aut_ep_subreg)

Long tag: vdem_ert_aut_ep_subreg

Original tag: aut_ep_subreg

Dataset citation: Edgell et al. (2020)

Description:

QUESTION: Did the current episode experience a democratic breakdown and subsequently autocratic regression?

CLARIFICATION: This variable is coded for episodes that experienced a democratic breakdown followed by autocratic regression. It is coded for the entire episode. It provides a further refinement of the outcome (aut_ep outcome) for those who are interested in exploring which episodes culminated in breakdown versus those that continued autocratizing after the

breakdown.

0– This episode does not experience a democratic breakdown and autocratic regression

1– This episode experiences a democratic breakdown and subsequently autocratic regression

REQUIRED VARIABLES: aut_ep, reg_trans, aut_ep_prch, aut_ep_pbr

FORMAT: dummy, [0,1]

2.4.3.10 Autocratization outcome (aut_ep_outcome)

Long tag: vdem_ert_aut_ep_outcome

Original tag: aut_ep_outcome

Dataset citation: Edgell et al. (2020)

Description:

QUESTION: What was the outcome of the current autocratization episode?

CLARIFICATION: This variable captures detailed outcomes of the episodes. Episodes experiencing democratic breakdown are coded accordingly, even if the episode endures a subsequent period of autocratic regression. Separate variables (aut ep subreg, aut ep pbr) account for this variation.

0– There is no autocratization episode during this year.

1– Democratic breakdown. The episode resulted in the political unit (a) becoming a closed autocracy on RoW, (b) becoming an electoral autocracy and staying there for at least one election, or (c) becoming an electoral autocracy and staying there for at least the tolerance period (e.g. 5 years). Applies to entire episode, even if subsequent autocratic regression occurred.

2– Preempted democratic breakdown. The episode resulted the political unit becoming an electoral autocracy, but it reclaimed its democratic status without holding an autocratic founding election and within the tolerance period (e.g. 5 years).

3– Diminished democracy. While the democracy retained its democratic status, the episode resulted in depreciated levels of electoral democracy or a transition to electoral democracy from liberal democracy, that was sustained for the tolerance period (e.g. 5 years). Note - with the default parameters we do not observe this outcome.

4– Averted regression. The episode (a) never resulted in a change from liberal democracy, (b) resulted in an electoral democracy on the RoW measure but the political unit reverted back to liberal democracy, (c) resulted in an electoral democracy on the RoW measure but the political unit experienced a subsequent increase greater than or equal to the year turn parameter (e.g. 0.03) or a decline greater than or equal to the cum turn parameter (e.g. 0.10) on the EDI over the course of the tolerance period (e.g. 5 years).

5– Regressed autocracy. The episode resulted in further autocratization of a political unit that was already classified as autocratic in the pre-episode year.

6– Uncertain. The outcome of the episode is uncertain because it has the potential for a regime change (aut ep prch==1) but is ongoing in the final observation year of the dataset or before a gap in coding is encountered.

NOTE: This variable supersedes the older version (ERT v1.2) and has been recoded at the entire episode level. There may be a small number of observations (or none, depending on parameters) within each of these outcome types. Users should be aware and consider the more aggregate outcome types for statistical analysis.

REQUIRED VARIABLES: aut_ep, row_regch event, reg_type, aut_ep_termination

FORMAT: categorical, [0,6]

2.4.3.11 Aggregate Autocratization outcome (aut_ep_outcome_agg)

Long tag: vdem_ert_aut_ep_outcome_agg

Original tag: aut_ep_outcome_agg

Dataset citation: Edgell et al. (2020)

Description:

QUESTION: What was the aggregate outcome of the current autocratization episode?

CLARIFICATION: This variable captures aggregate outcomes of the episodes. Episodes experiencing democratic breakdown are coded accordingly, even if the episode endures a

sub-sequent period of autocratic regression. Separate variables (aut ep subreg, aut ep pbr) account for this variation.

0– There is no autocratization episode during this year.

1– Democratic breakdown. The episode resulted in the political unit (a) becoming a closed autocracy on RoW, (b) becoming an electoral autocracy and staying there for at least one election, or (c) becoming an electoral autocracy and staying there for at least the tolerance period (e.g. 5 years). Applies to entire episode, even if subsequent autocratic regression occurred.

2– No democratic breakdown. The episode did not result in a change from democracy to autocracy on the RoW measure or it did result in a change between democracy and autocracy on the RoW measure, but the political unit did not hold an autocratic founding election or remain autocratic for the tolerance period (e.g. 5 years) before restoring democracy.

3– Regressed autocracy. The episode resulted in further autocratization of a political unit that was already classified as autocratic in the pre-episode year.

4– Uncertain. The outcome of the episode is uncertain because it has the potential for a regime change (aut ep prch==1) but is ongoing in the final observation year of the dataset or before a gap in coding is encountered.

NOTE: This variable provides an aggregate alternative to aut ep outcome that may be more useful for those engaging in statistical modeling.

REQUIRED VARIABLES: aut_ep, row_regch_event, reg_type, aut_ep_termination

FORMAT: categorical, [0,4]

2.4.3.12 Autocratization episode censored (aut_ep_censored)

Long tag: vdem_ert_aut_ep_censored

Original tag: aut_ep_censored

Dataset citation: Edgell et al. (2020)

Description:

QUESTION: Is the current autocratization episode censored?

CLARIFICATION: An autocratization episode may be censored if its end date corresponds with the date the coding for the case ends (i.e. codingend) or the year before a gap starts in the coding (i.e. gapstart1, gapstart2, gapstart3).

NOTE: This is coded for the entire episode. Thus, episodes where a period of democratic regression results in a breakdown may still be censored overall if the resulting period of autocratic regression is censored.

REQUIRED VARIABLES: aut_ep_end_year, codingend, gapstart1, gapstart2, gapstart3

FORMAT: dummy, [0,1]

2.5 V-Dem V-Party Coder Level v2

Dataset tag: vdem_vp_coder_level

Output Unit: V-Dem Party-Date-Coder, i.e., data is collected per party, country and date.

Description: Includes global data on Political Parties at the coder level.

Dataset citation: Staffan I. Lindberg, Nils Düpont, Masaaki Higashijima, Yaman Berker Kavasoglu, Kyle L. Marquardt, Michael Bernhard, Holger Döring, Allen Hicken, Melis Laebens, Juraj Medzihorsky, Anja Neundorf, Ora John Reuter, Saskia Ruth-Lovell, Keith R. <https://www.v-dem.net/vpartyds.html>

2.5.1 Identifier Variables

This section lists the identifier variables in the V-Dem V-Party Dataset

2.5.1.1 Country name abbreviation (A*) (country_text_id)

Long tag: vdem_vp_coder_level_country_text_id

Original tag: country_text_id

Dataset citation: Lindberg et al. (2022)

Description:

VARIABLE TYPE: A*

QUESTION: Abbreviated country names.

RESPONSES: Text

DATA RELEASE: 1-2.

CITATION: V-Dem Codebook

2.5.1.2 Numeric party identifier (v2paid)

Long tag: vdem_vp_coder_level_v2paid

Original tag: v2paid

Dataset citation: Lindberg et al. (2022)

Variable citation: Döring & Regel (2019), Bederke et al. (2021), For a full list of names used by a wide range of academic sources for the party in question see <https://partyfacts.herokuapp.com/data/partycodes/>

Description:

VARIABLE TYPE: A*

QUESTION: Unique identifier for each party.

CLARIFICATION: Unique, numeric identifier for each party as recorded in Party Facts' core parties dataset (Döring and Regel 2019). In case a party changed names of scholars, sources, etc. used (slightly) different names when referring to this entity.)

RESPONSES:

Numeric

SOURCE(S): Party Facts (Döring and Regel 2019; Bederke 2021). For a full list of names used by a wide range of academic sources for the party in question see <https://partyfacts.herokuapp.com/data/partycodes/>.

DATA RELEASE: 10-12.

2.5.1.3 Historical Date (A) (historical_date)

Long tag: vdem_vp_coder_level_historical_date

Original tag: historical_date

Dataset citation: Lindberg et al. (2022)

Description:

VARIABLE TYPE: A*

QUESTION: Variable designating the date for which observation is given.

CLARIFICATION: The date is coded in YYYY-MM-DD format. December 31st observation always refers to the situation at the end of the year. There can be observations on other dates signifying other events, i.e. elections or executive appointments.

RESPONSES: Numeric

NOTES: This variable is included in the V-Dem Country Year as well as Country Date datasets.

DATA RELEASE: 1-2.

CITATION: V-Dem Codebook

2.5.1.4 Coder ID (`coder_id`)

Long tag: vdem_vp_coder_level_coder_id

Original tag: coder_id

Dataset citation: Lindberg et al. (2022)

Description:

Coder ID

2.5.1.5 V-Dem country ID (A) (`country_id`)

Long tag: vdem_vp_coder_level_country_id

Original tag: country_id

Dataset citation: Lindberg et al. (2022)

Description:

VARIABLE TYPE: A*

QUESTION: Unique country ID designated for each country.

RESPONSES: Numeric

NOTES: For more details on country units consult the V-Dem Country Coding Units document.

DATA RELEASE: 1-2.

CITATION: V-Dem Codebook

2.5.2 Party Organisation

This section lists variables related to how parties operate and are organised internally.

2.5.2.1 Local Organizational Strength (`v2paactcom`)

Long tag: vdem_vp_coder_level_v2paactcom

Original tag: v2paactcom

Dataset citation: Lindberg et al. (2022)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: To what degree are party activists and personnel permanently active in local communities?

CLARIFICATION: Please consider the degree to which party activists and personnel are active both during election and non-election periods. Party personnel refers to paid staff.

RESPONSES:

0: There is negligible permanent presence of party activists and personnel in local communities.

1: There is minor permanent presence of party activists and personnel in local communities.

2: There is noticeable permanent presence of party activists and personnel in local communities.

3: There is significant permanent presence of party activists and personnel in local

communities.

4: There is widespread permanent presence of party activists and personnel in local communities.

DATA RELEASE: 10-12.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

DATE SPECIFIC: Election-specific dates.

2.5.2.2 Internal Cohesion (v2padisa)

Long tag: vdem_vp_coder_level_v2padisa

Original tag: v2padisa

Dataset citation: Lindberg et al. (2022)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: To what extent do the elites in this party display disagreement over party strategies?

CLARIFICATION: Party strategies include election campaign strategy, policy stance, distribution of party financial resources, cooperation with other parties (i.e. coalition formation), and the selection of legislative and presidential candidates as well as the party leader. Party elites are prominent and influential party members such as current and former ministers, members of parliament or the party leadership, regional and municipal leaders, and opinion leaders. They do not necessarily have to be the part of the official party leadership.

RESPONSES:

0: Party elites display almost complete disagreement over party strategies and many party elites have left the party.

1: Party elites display a high level of visible disagreement over party strategies and some of them have left the party.

2: Party elites display some visible disagreement over party strategies, but none of them have left the party.

3: Party elites display negligible visible disagreement over party strategies.

4: Party elites display virtually no visible disagreement over party strategies.

DATA RELEASE: 10-12.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

DATE SPECIFIC: Election-specific dates.

2.5.2.3 Party resources (C) (v2pafunds)

Long tag: vdem_vp_coder_level_v2pafunds

Original tag: v2pafunds

Dataset citation: Lindberg et al. (2022)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_nr

QUESTION: What were the major sources of party funds for this election campaign?

CLARIFICATION: Choose up to three most important ones. If a main source of funding for this campaign

comes from the party's assets such as properties and stocks, please code where these assets originally came from.

RESPONSES:

0: Formal state subsidies for political parties. (0=No, 1=Yes) [v2pafunds_0]

1: Large-scale donations from individuals. (0=No, 1=Yes) [v2pafunds_1]

2: Large-scale donations from companies. (0=No, 1=Yes) [v2pafunds_2]

3: Large-scale donations from civil society organizations (including trade unions). (0=No,

1=Yes) [v2pafunds_3]
4: Membership fees and small-scale supporters' donations. (0=No, 1=Yes) [v2pafunds_4] 5:
Informal use of state resources as incumbent party. (0=No, 1=Yes) [v2pafunds_5]
6: Funds of the party leader. (0=No, 1=Yes) [v2pafunds_6]
7: Funds of candidates. (0=No, 1=Yes) [v2pafunds_7]
SOURCE(S): Quality of Government Standard Dataset (2019).
DATA RELEASE: 1-2.
CROSS-CODER AGGREGATION: Mean
DATE SPECIFIC: Election-specific dates.

2.5.2.4 Party support group (C) (v2pagroup)

Long tag: vdem_vp_coder_level_v2pagroup

Original tag: v2pagroup

Dataset citation: Lindberg et al. (2022)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_nr

QUESTION: To which particular group in society does the core membership and supporters of this party belong?

CLARIFICATION: Choose only the key groups. Though you may choose up to three groups, if only one

group is most relevant, please only choose that group.

RESPONSES: 0: No specific, clearly identifiable group. (0=No, 1=Yes) [v2pagroup_0]

1: The aristocracy, including high status hereditary social groups and castes. (0=No, 1=Yes) [v2pagroup_1]

2: Agrarian elites, including rich peasants and large landholders. (0=No, 1=Yes) [v2pagroup_2]

3: Business elites. (0=No, 1=Yes) [v2pagroup_3]

4: The military. (0=No, 1=Yes) [v2pagroup_4]

5: An ethnic or racial group(s). (0=No, 1=Yes) [v2pagroup_5]

6: A religious group(s). (0=No, 1=Yes) [v2pagroup_6]

7: Local elites, including customary chiefs. (0=No, 1=Yes) [v2pagroup_7]

8: Urban working classes, including labor unions. (0=No, 1=Yes) [v2pagroup_8]

9: Urban middle classes. (0=No, 1=Yes) [v2pagroup_9]

10: Rural working classes (e.g., peasants). (0=No, 1=Yes) [v2pagroup_10]

11: Rural middle classes (e.g., family farmers). (0=No, 1=Yes) [v2pagroup_11]

12: Regional groups or separatists. (0=No, 1=Yes) [v2pagroup_12]

13: Women. (0=No, 1=Yes) [v2pagroup_13]

14: Other specific groups. (0=No, 1=Yes) [v2pagroup_14]

DATA RELEASE: 1-2.

CROSS-CODER AGGREGATION: Mean

DATE SPECIFIC: Election-specific dates.

2.5.2.5 Personalization of Party (v2paid)

Long tag: vdem_vp_coder_level_v2paid

Original tag: v2paid

Dataset citation: Lindberg et al. (2022)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: To what extent is this party a vehicle for the personal will and priorities of one individual leader?

RESPONSES:

0: The party is not focused on the personal will and priorities of one individual leader.

1: The party is occasionally focused on the personal will and priorities of one individual party

leader.

2: The party is somewhat focused on the personal will and priorities of one individual party leader.

3: The party is mainly focused on the personal will and priorities of one individual party leader.

4: The party is solely focused on the personal will and priorities of one individual party leader.

DATA RELEASE: 10-12.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

DATE SPECIFIC: Election-specific dates.

2.5.2.6 Local Party Office (v2palocoff)

Long tag: vdem_vp_coder_level_v2palocoff

Original tag: v2palocoff

Dataset citation: Lindberg et al. (2022)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Does this party maintain permanent offices that operate outside of election campaigns at the local or municipal-level?

CLARIFICATION: By “local or municipal” we mean low level administrative divisions that are ranked below regions, provinces, or states. We refer to offices that ensure professional personal and continued interaction of the party with citizens. Permanent offices operate outside of election campaigns.

RESPONSES:

0: The party does not have permanent local offices.

1: The party has permanent local offices in few municipalities.

2: The party has permanent local offices in some municipalities.

3: The party has permanent local offices in most municipalities.

4: The party has permanent local offices in all or almost all municipalities.

DATA RELEASE: 10-12.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

DATE SPECIFIC: Election-specific dates.

2.5.2.7 Candidate Nomination (v2panom)

Long tag: vdem_vp_coder_level_v2panom

Original tag: v2panom

Dataset citation: Lindberg et al. (2022)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Which of the following options best describes the process by which the party decides on candidates for the national legislative elections?

CLARIFICATION: If nomination procedures vary across constituencies consider the most common practice.

RESPONSES:

0: The party leader unilaterally decides on which candidates will run for the party in national legislative elections.

1: The national party leadership (i.e. an executive committee) collectively decides which candidates will run for the party in national legislative elections.

2: Delegates of local/regional organizations decide which candidates will run for the party in national legislative elections.

3: All party members decide on which candidates will run for the party in national legislative elections in primaries/caucuses.

4: All registered voters decide on which candidates will run for the party in national legislative elections in primaries/caucuses.

DATA RELEASE: 10-12.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

DATE SPECIFIC: Election-specific dates.

2.5.2.8 Affiliate Organizations (v2pasoctie)

Long tag: vdem_vp_coder_level_v2pasoctie

Original tag: v2pasoctie

Dataset citation: Lindberg et al. (2022)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: To what extent does this party maintain ties to prominent social organizations?

CLARIFICATION: When evaluating the strength of ties between the party and social organizations please consider the degree to which social organizations contribute to party operations by providing material and personnel resources, propagating the party's message to its members and beyond, as well as by directly participating in the party's electoral campaign and/or mobilization efforts. Social organizations include: Religious organizations (e.g. churches, sects, charities), trade unions/syndical organizations or cooperatives, cultural and social associations (e.g. sports clubs, neighborhood associations), political associations (e.g. environmental protection) and professional and business associations. Social organizations do not include paramilitary units or militias.

RESPONSES:

0: The party does not maintain ties to any prominent social organization.

1: The party maintains weak ties to prominent social organizations.

2: The party maintains moderate ties to prominent social organizations.

3: The party maintains strong ties to prominent social organizations.

4: The party controls prominent social organizations.

DATA RELEASE: 10-12.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

DATE SPECIFIC: Election-specific dates.

2.5.3 Party Identity

This section lists variables related to party identity and ideology.

2.5.3.1 Anti-elitism (v2paanteli)

Long tag: vdem_vp_coder_level_v2paanteli

Original tag: v2paanteli

Dataset citation: Lindberg et al. (2022)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: How important is anti-elite rhetoric for this party?

CLARIFICATION: Elites are relatively small groups that have a greater say in society than others, for instance due to their political power, wealth or societal standing. The specific groups considered to be the elite may vary by country and even from party to party within the same country as do the terms used to describe them. In some cases, "elites" can also refer to an international elite.

RESPONSES:

0: Not at all important. The leadership of this party never makes statements against the elite.

1: Not important. The leadership of this party rarely makes statements against the elite.

2: Somewhat important. The leadership of this party sometimes makes statements against the elite.

3: Important. The leadership of this party often makes statements against the elite.

4: Very important. The leadership of this party makes statements against the elite whenever possible.

DATA RELEASE: 10-12.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

DATE SPECIFIC: Election-specific dates.

2.5.3.2 Clientelism (v2paclient)

Long tag: vdem_vp_coder_level_v2paclient

Original tag: v2paclient

Dataset citation: Lindberg et al. (2022)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: To what extent do the party and its candidates provide targeted and excludable (clientelistic) goods and benefits - such as consumer goods, cash or preferential access to government services - in an effort to keep and gain votes?

CLARIFICATION: In some cases, parties and their candidates deliver targeted and excludable goods and benefits directly to individual voters with the explicit intention to keep or gain votes. In other cases, they rely on brokers or companies as intermediaries. In some countries, candidates promise procurement contracts or favorable regulatory decisions to companies in exchange for ensuring their workers vote for the party/candidate. Such efforts count as an instance of clientelism, if they are clearly targeted at one specific company and excludable. On the other hand, handing out of small gifts can be common in some contexts without the intention to “buy votes” but rather as courtesy or part of what all candidates do (“entry ticket”). Such activities do not count as attempts to “keep or gain votes”.

RESPONSES:

0: Not at all. The party and its candidates do not provide targeted goods and benefits in order to keep and gain votes.

1: A minor extent. The party and its candidates provide targeted goods and benefits to a minor extent in order to keep and gain votes.

2: A moderate extent. The party and its candidates provide targeted goods and benefits to a moderate extent in order to keep and gain votes.

3: A large extent. The party and its candidates provide targeted goods and benefits to a sizeable extent in order to keep and gain votes.

4: As its main effort. The party and its candidates provide targeted goods and benefits to the extent that it constitutes the party’s main effort in order to keep and gain votes.

DATA RELEASE: 10-12.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

DATE SPECIFIC: Election-specific dates.

2.5.3.3 Cultural Superiority (v2paculsup)

Long tag: vdem_vp_coder_level_v2paculsup

Original tag: v2paculsup

Dataset citation: Lindberg et al. (2022)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: To what extent does the party leadership promote the cultural superiority of a specific social group or the nation as a whole?

CLARIFICATION: This question refers to key non-economic cleavages in society, which could, for example, be based on caste, ethnicity, language, race, region, religion, or some combination thereof. This question further refers to cultural issues related to the national history and identity of a country. This question does not pertain to social groups based on gender or sexual orientation.

RESPONSES:

0: Strongly promotes. The party strongly promotes the cultural superiority of a specific social group or the nation as a whole.

1: Promotes. The party promotes the cultural superiority of a specific social group or the nation as a whole.

2: Ambiguous. The party does not take a specific position on the cultural superiority of a specific social group or the nation as a whole.

3: Opposes. The party opposes the promotion of the cultural superiority of a specific social group or the nation as a whole.

4: Strongly opposes. The party strongly opposes the promotion of the cultural superiority of a specific social group or the nation as a whole.

DATA RELEASE: 10-12.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

DATE SPECIFIC: Election-specific dates.

2.5.3.4 Gender Equality (v2pagender)

Long tag: vdem_vp_coder_level_v2pagender

Original tag: v2pagender

Dataset citation: Lindberg et al. (2022)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: What is the share of women in national-level leadership positions of this political party?

CLARIFICATION: This question does NOT concern the share of women in the legislature.

RESPONSES:

0: None.

1: Small minority (about 1-15percent).

2: Medium minority (about 16-25percent).

3: Large minority (about 26-39percent).

4: Balanced (about 40percent or more).

DATA RELEASE: 10-12.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

DATE SPECIFIC: Election-specific dates.

2.5.3.5 Immigration (v2paimmig)

Long tag: vdem_vp_coder_level_v2paimmig

Original tag: v2paimmig

Dataset citation: Lindberg et al. (2022)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: What is the party's position regarding immigration into the country?

CLARIFICATION: Immigration refers to individuals entering the country for an indefinite, long-term or permanent period of time.

RESPONSES:

0: Strongly opposes. This party strongly opposes all or almost all forms of immigration into the country.

1: Opposes. This party opposes most forms of immigration into the country.

2: Ambiguous/No position. This party has no clear policy with regard to immigration into the country.

3: Supports. This party supports most forms of immigration into the country.

4: Strongly supports. This party strongly supports all or almost all forms of immigration into the country.

DATA RELEASE: 10-12.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

DATE SPECIFIC: Election-specific dates.

2.5.3.6 LGBT Social Equality (v2palgbt)

Long tag: vdem_vp_coder_level_v2palgbt

Original tag: v2palgbt

Dataset citation: Lindberg et al. (2022)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: What is this party's position toward social equality for the lesbian, gay, bisexual, and transgender (LGBT) community?

RESPONSES:

0: Strongly opposes. This party is strongly opposed to LGBT social equality.

1: Opposes. This party is opposed to LGBT social equality.

2: Ambiguous/No position. This party has no clear policy with regard to LGBT social equality.

3: Supports. This party supports LGBT social equality.

4: Strongly supports. This party strongly supports LGBT social equality.

DATA RELEASE: 10-12.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

DATE SPECIFIC: Election-specific dates.

2.5.3.7 Minority Rights (v2paminor)

Long tag: vdem_vp_coder_level_v2paminor

Original tag: v2paminor

Dataset citation: Lindberg et al. (2022)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: According to the leadership of this party, how often should the will of the majority be implemented even if doing so would violate the rights of minorities?

CLARIFICATION: This concerns the rights enshrined in the Universal Declaration of Human Rights, which apply to everyone "without distinction of any kind, such as race, colour, sex, language, religion, political or other opinion, national or social origin, property, birth or other status." The declaration protects - among others - freedom of speech, property, religion, peaceful assembly and association.

RESPONSES:

0: Always. The leadership of this party argues that the will of the majority should always determine policy even if such policy violates minority rights.

- 1: Usually. The leadership of this party argues that the will of the majority should usually determine policy even if such policy violates minority rights.
 - 2: Half of the time. The leadership of this party argues that the will of the majority should about half of the time determine policy even if such policy violate minority rights.
 - 3: Usually not. The leadership of this party argues that the will of the majority should usually not determine policy if such policy violates minority rights.
 - 4: Never. The leadership of this party argues that the will of the majority should never determine policy if such policy violates minority rights.
- DATA RELEASE: 10-12.
CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).
DATE SPECIFIC: Election-specific dates.

2.5.3.8 Political Opponents (v2paopresp)

Long tag: vdem_vp_coder_level_v2paopresp

Original tag: v2paopresp

Dataset citation: Lindberg et al. (2022)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Prior to this election, have leaders of this party used severe personal attacks or tactics of demonization against their opponents?

CLARIFICATION: Severe personal attacks and demonization includes dehumanizing opponents or describing them as an existential threat or as subversive, criminal or foreign agents.

RESPONSES:

0: Always. Party leaders always used severe personal attacks or tactics of demonization against their opponents

1: Usually. Party leaders usually used severe personal attacks or tactics of demonization against their opponents

2: About half of the time. Party leaders sometimes used severe personal attacks or tactics of demonization against their opponents.

3: Usually not. Party leaders usually did not use severe personal attacks or tactics of demonization against their opponents.

4: Never. Party leaders never used severe personal attacks or tactics of demonization against their opponents.

DATA RELEASE: 10-12.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

DATE SPECIFIC: Election-specific dates.

CLEANING: Set to missing when there are more than two answers per coder for this question for a particular date, country, and party.

2.5.3.9 People-centrism (v2papeople)

Long tag: vdem_vp_coder_level_v2papeople

Original tag: v2papeople

Dataset citation: Lindberg et al. (2022)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Do leaders of this party glorify the ordinary people and identify themselves as part of them?

CLARIFICATION: Many parties and leaders make reference to the “people”, but only some party leaders describe the ordinary people specifically as a homogenous group and

emphasize/claim that they are part of this group and represent it. This means that they do not acknowledge the existence of divergent interests and values in society, but rather suggest that the “people” have a unified political will which should guide all political action. Often this group is glorified and romanticized, describing an ideal-typical ordinary person/commoner, who embodies the national ideal.

RESPONSES:

0: Never. The party leadership never glorifies and identifies with the ordinary people.

1: Usually not. The party leadership generally does not glorify and identify with the ordinary people.

2: About half of the time. The party leadership sometimes glorifies and identifies with the ordinary people.

3: Usually. The party leadership generally glorifies and identifies with the ordinary people, which they claim to represent.

4: Always. The party leadership always glorifies and identifies with the ordinary people, which they claim to represent.

DATA RELEASE: 10-12.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

DATE SPECIFIC: Election-specific dates.

2.5.3.10 Political Pluralism (v2paplur)

Long tag: vdem_vp_coder_level_v2paplur

Original tag: v2paplur

Dataset citation: Lindberg et al. (2022)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Prior to this election, to what extent was the leadership of this political party clearly committed to free and fair elections with multiple parties, freedom of speech, media, assembly and association?

CLARIFICATION: Party leaders show no commitment to such principles if they openly support an autocratic form of government without elections or freedom of speech, assembly and association (e.g. theocracy; single-party rule; revolutionary regime). Party leaders show a full commitment to key democratic principles if they unambiguously support freedom of speech, media, assembly and association and pledge to accept defeat in free and fair elections.

RESPONSES:

0: Not at all committed. The party leadership was not at all committed to free and fair, multi-party elections, freedom of speech, media, assembly and association.

1: Not committed. The party leadership was not committed to free and fair, multi-party elections, freedom of speech, media, assembly and association.

2: Weakly committed. The party leadership was weakly committed to free and fair, multi-party elections, freedom of speech, media, assembly and association.

3: Committed. The party leadership was committed to free and fair, multi-party elections, freedom of speech, media, assembly and association.

4: Fully committed. The party leadership was fully committed to free and fair, multi-party elections, freedom of speech, media, assembly and association.

DATA RELEASE: 10-12.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

DATE SPECIFIC: Election-specific dates.

2.5.3.11 Religious Principles (v2parelig)

Long tag: vdem_vp_coder_level_v2parelig

Original tag: v2parelig

Dataset citation: Lindberg et al. (2022)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: To what extent does this party invoke God, religion, or sacred/religious texts to justify its positions?

RESPONSES:

0: Always, or almost always. The party almost always invokes God, religion, or sacred/religious texts to justify its positions.

1: Often, but not always. The party often, but not always, invokes God, religion, or religious texts to justify its positions.

2: About half of the time. The party about half of the time invokes God, religion, or religious texts to justify its positions.

3: Rarely. The party rarely invokes God, religion, or religious texts to justify its positions.

4: Never. The party never invokes God, religion, or religious texts to justify its positions.

DATA RELEASE: 10-12.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

DATE SPECIFIC: Election-specific dates.

2.5.3.12 Economic Left-Right Scale (v2pariglef)

Long tag: vdem_vp_coder_level_v2pariglef

Original tag: v2pariglef

Dataset citation: Lindberg et al. (2022)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Please locate the party in terms of its overall ideological stance on economic issues.

CLARIFICATION: Parties on the economic left want government to play an active role in the economy. This includes higher taxes, more regulation and government spending and a more generous welfare state. Parties on the economic right emphasize a reduced economic role for government: privatization, lower taxes, less regulation, less government spending, and a leaner welfare state.

RESPONSES:

0: Far-left.

1: Left.

2: Center-left.

3: Center.

4: Center-right.

5: Right.

6: Far-right.

DATA RELEASE: 10-12.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

DATE SPECIFIC: Election-specific dates.

2.5.3.13 Salience and mobilization (C) (v2pasalie)

Long tag: vdem_vp_coder_level_v2pasalie

Original tag: v2pasalie

Dataset citation: Lindberg et al. (2022)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_nr

QUESTION: Which of the following issues are most relevant for the party's effort to gain and keep voters?

CLARIFICATION: Choose only the key issue(s). Though you may choose up to three issues, if only one issue is most relevant, choose only that issue. Most of these issues have been covered in this survey; if you need additional clarification as to what a category represents, you can return to the relevant question.

RESPONSES: 0: Anti-elitism. (0=No, 1=Yes) [v2pasalie_0]

1: People-centrism. (0=No, 1=Yes) [v2pasalie_1]

2: Political pluralism (pro or contra). (0=No, 1=Yes) [v2pasalie_2]

3: Minority rights (pro or contra). (0=No, 1=Yes) [v2pasalie_3]

4: Immigration (pro or contra). (0=No, 1=Yes) [v2pasalie_4]

5: LGBT social equality (pro or contra). (0=No, 1=Yes) [v2pasalie_5]

6: Cultural superiority (pro or contra). (0=No, 1=Yes) [v2pasalie_6]

7: Religious principles (pro or contra). (0=No, 1=Yes) [v2pasalie_7]

8: Gender equality (pro or contra). (0=No, 1=Yes) [v2pasalie_8]

9: Welfare. (0=No, 1=Yes) [v2pasalie_9]

10: Economic issues (including infrastructure and taxes). (0=No, 1=Yes) [v2pasalie_10]

11: Clientelism in order to keep or gain votes (the distribution of targeted and excludable benefits towards supporters). (0=No, 1=Yes) [v2pasalie_11]

12: Environmental protection. (0=No, 1=Yes) [v2pasalie_12]

13: Farmers' issues. (0=No, 1=Yes) [v2pasalie_13]

14: The leader. (0=No, 1=Yes) [v2pasalie_14]

15: Anti-corruption. (0=No, 1=Yes) [v2pasalie_15]

16: Intimidation/violence. (0=No, 1=Yes) [v2pasalie_16]

17: Other. (0=No, 1=Yes) [v2pasalie_17]

2.5.3.14 Rejection of Political Violence (v2paviol)

Long tag: vdem_vp_coder_level_v2paviol

Original tag: v2paviol

Dataset citation: Lindberg et al. (2022)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: To what extent does the leadership of this party explicitly discourage the use of violence against domestic political opponents?

CLARIFICATION: "Domestic political opponents" refers to all political opponents, with the exception of those who are engaged in an armed conflict with the state. They may be other political parties or other political groups and movements.

RESPONSES:

0: Encourages. Leaders of this party often encourage the use of violence against domestic political opponents.

1: Sometimes encourages. Leaders of this party sometimes encourage the use of violence against domestic political opponents and generally refrain from discouraging it.

2: Discourages about half of the time. Leaders of this party occasionally discourage the use of violence against domestic political opponents, and do not encourage it.

3: Generally discourages. Leaders of this party often discourage the use of violence against its domestic political opponents.

4: Consistently discourages. Leaders of this party consistently reject the use of violence against its domestic political opponents.

DATA RELEASE: 10-12.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

2.5.3.15 Welfare (v2pawelf)

Long tag: vdem_vp_coder_level_v2pawelf

Original tag: v2pawelf

Dataset citation: Lindberg et al. (2022)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: To what extent does the party promote means-tested or universalistic welfare policies?

RESPONSES:

0: The party does not support either type of policies and opposes any public welfare policy.

1: The party solely promotes means-tested welfare policies.

2: The party mainly promotes means-tested policies, but a significant portion (e.g. 1/4 or 1/3) is universalistic and potentially benefits everyone in the population.

3: The party roughly equally supports means-tested and universalistic welfare policies.

4: The party mainly promotes universalistic policies, but a significant portion (e.g. 1/4 or 1/3) of its policies are means-tested.

5: The party solely promotes universalistic welfare policies for all groups of the society.

DATA RELEASE: 10-12.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

DATE SPECIFIC: Election-specific dates.

2.5.3.16 Working Women (v2pawomlab)

Long tag: vdem_vp_coder_level_v2pawomlab

Original tag: v2pawomlab

Dataset citation: Lindberg et al. (2022)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: To what extent does this party support the equal participation of women in the labor market?

CLARIFICATION: Measures that support the equal participation of women in the labor market include - but are not limited to - legal provisions on equal treatment and pay, parental leave and financial support for child care.

RESPONSES:

0: Strongly opposes. This party strongly opposes all or almost all types of measures that support the equal participation of women in the labor market.

1: Opposes. This party opposes most types of measures that support the equal participation of women in the labor market.

2: Ambiguous/No position. This party has no clear policy with regard to measures that support the equal participation of women in the labor market.

3: Supports. This party supports most types of measures that support the equal participation of women in the labor market.

4: Strongly supports. This party strongly supports all or almost all types of measures that support the equal participation of women in the labor market.

DATA RELEASE: 10-12.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

DATE SPECIFIC: Election-specific dates.

2.5.4 Party Basics

This section lists variables related to basic party information.

2.5.4.1 Party continuation (v2paelcont)

Long tag: vdem_vp_coder_level_v2paelcont

Original tag: v2paelcont

Dataset citation: Lindberg et al. (2022)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_nr

QUESTION: Did the party participate in the previous election under its current name?

CLARIFICATION: This question concerns the election prior to the one you are coding. If you choose option 2, please provide the previous party name in the comments field.

RESPONSES:

0: Yes, party participated in the previous election under the same name.

1: No, party did not participate in the previous election.

2: No, but the party participated in the previous election under a different name.

DATA RELEASE: 10-12.

CROSS-CODER AGGREGATION: Mode

DATE SPECIFIC: Election-specific dates.

2.5.4.2 Pariah Party (v2papariah)

Long tag: vdem_vp_coder_level_v2papariah

Original tag: v2papariah

Dataset citation: Lindberg et al. (2022)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: In the years before this election, to what extent have other parties distanced themselves from this party?

RESPONSES:

0: Entirely. All other parties are unwilling to accept formal or informal parliamentary support from this party (e.g. joint legislative initiative; toleration).

1: To a great extent. One or more parties has accepted informal parliamentary support from this party (e.g. joint legislative initiative; toleration) or has signaled that it would be willing to do so. No party is willing to accept formal support from this party.

2: To some extent. One or more parties has accepted formal parliamentary support from this party (e.g. formed a coalition) or has signaled that it would be willing to do so. Most other parties are not willing to accept informal support from this party (e.g. joint legislative initiative; toleration).

3: Not at all. One or more parties has accepted formal parliamentary support from this party (e.g. coalition) or has signaled that it would be willing to do so. Most other parties are willing to accept informal support from this party (e.g. joint legislative initiative; toleration).

NOTES: We show the following question for coding only for election years during which more than two parties won a substantial seat share (more than 5percent) in the election.

DATA RELEASE: 10-12.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

DATE SPECIFIC: Election-specific dates.

2.6 V-Dem V-Party v2

Dataset tag: vdem_vparty

Output Unit: V-Dem Party-Country-Year, i.e., data is collected per party, country and year.

Description: The V-Party dataset includes global data on Political Parties.

2.6.1 Identifier Variables

This section lists the identifier variables in the V-Dem V-Party Dataset

2.6.1.1 Party name, English (v2paenname)

Long tag: vdem_vparty_v2paenname

Original tag: v2paenname

Dataset citation: Lindberg et al. (2022)

Variable citation: Döring & Regel (2019), Bederke et al. (2021)

Description:

VARIABLE TYPE: A*

QUESTION: Harmonized English name.

CLARIFICATION: The most common English name for this party in political science datasets as recorded in Party Facts’ core parties (Döring and Regel 2019).

RESPONSES:

Text

SOURCE(S): Party Facts (Döring and Regel 2019; Bederke 2021). For a full list of names used by a wide range of academic sources for the party in question see <https://partyfacts.herokuapp.com/data/partycodes/>.

DATA RELEASE: 10-12.

2.6.1.2 Party name, Original (v2paorname)

Long tag: vdem_vparty_v2paorname

Original tag: v2paorname

Dataset citation: Lindberg et al. (2022)

Variable citation: Döring & Regel (2019), Bederke et al. (2021), For a full list of names used by a wide range of academic sources for the party in question see <https://partyfacts.herokuapp.com/data/partycodes/>

Description:

VARIABLE TYPE: A*

QUESTION: Harmonized original party name

CLARIFICATION: The most common original name for this party in political science datasets as recorded in Party Facts' core parties (Döring and Regel 2019).

RESPONSES:

Text

SOURCE(S): Party Facts (Döring and Regel 2019; Bederke 2021). For a full list of names used by a wide range of academic sources for the party in question see <https://partyfacts.herokuapp.com/data/partycodes/>.

DATA RELEASE: 10-12.

2.6.1.3 Party short name (v2pashname)

Long tag: vdem_vparty_v2pashname

Original tag: v2pashname

Dataset citation: Lindberg et al. (2022)

Variable citation: Döring & Regel (2019), Bederke et al. (2021), For a full list of names used by a wide range of academic sources for the party in question see <https://partyfacts.herokuapp.com/data/partycodes/>

Description:

VARIABLE TYPE: A*

QUESTION: Harmonized short name

CLARIFICATION: Harmonized short name.

RESPONSES:

Text

SOURCE(S): Party Facts (Döring and Regel 2019; Bederke 2021). For a full list of names used by a wide range of academic sources for the party in question see <https://partyfacts.herokuapp.com/data/partycodes/>.

DATA RELEASE: 10-12.

2.6.1.4 Numeric party identifier (v2paid)

Long tag: vdem_vparty_v2paid

Original tag: v2paid

Dataset citation: Lindberg et al. (2022)

Variable citation: Döring & Regel (2019), Bederke et al. (2021), For a full list of names used by a wide range of academic sources for the party in question see <https://partyfacts.herokuapp.com/data/partycodes/>

Description:

VARIABLE TYPE: A*

QUESTION: Unique identifier for each party.

CLARIFICATION: Unique, numeric identifier for each party as recorded in Party Facts' core parties dataset (Döring and Regel 2019). In case a party changed names of scholars, sources, etc. used (slightly) different names when referring to this entity.)

RESPONSES:

Numeric

SOURCE(S): Party Facts (Döring and Regel 2019; Bederke 2021). For a full list of names used by a wide range of academic sources for the party in question see <https://partyfacts.herokuapp.com/data/partycodes/>.

DATA RELEASE: 10-12.

2.6.1.5 Party Facts ID (A) (pf_party_id)

Long tag: vdem_vparty_pf_party_id

Original tag: pf_party_id

Dataset citation: Lindberg et al. (2022)

Variable citation: Döring & Regel (2019), Bederke et al. (2021)

Description:

VARIABLE TYPE: A*

QUESTION: Party Facts ID

SCALE: Numeric

SOURCE(S): Party Facts (Döring and Regel 2019; Bederke 2021).

DATA RELEASE: 10-12.

2.6.1.6 Start and end year of gap in party coding (A) (party_gaps)

Long tag: vdem_vparty_party_gaps

Original tag: party_gaps

Dataset citation: Lindberg et al. (2022)

Description:

VARIABLE TYPE: A*

QUESTION: The starting and ending year in which the party was out of national legislature.

CLARIFICATION: The default format is YYYY–YYYY. Several time spans can be listed in this manner and are separated by comma. The starting year indicates the first year after the available election year for a party. The ending gap year is specified as the last year before available election for the party in question.

RESPONSES:

Text

DATA RELEASE: 10-12.

2.6.1.7 Party Facts URL (A) (pf_url)

Long tag: vdem_vparty_pf_url

Original tag: pf_url

Dataset citation: Lindberg et al. (2022)

Variable citation: Döring & Regel (2019), Bederke et al. (2021)

Description:

VARIABLE TYPE: A*

QUESTION: URL to party's webpage at Party Facts website

SCALE: Text

SOURCE(S): Party Facts (Döring and Regel 2019; Bederke 2021).

DATA RELEASE: 10-12.

2.6.1.8 Country name (country_name)

Long tag: vdem_vparty_country_name

Original tag: country_name

Dataset citation: Lindberg et al. (2022)

Description:

VARIABLE TYPE: A*

QUESTION: Name of coded country.

CLARIFICATION: A V-Dem country is a political unit enjoying at least some degree of functional and/or

formal sovereignty.

RESPONSES: Text

NOTES: For more details on country units consult the V-Dem Country Coding Units document.

DATA RELEASE: 1-2.

CITATION: V-Dem Codebook

2.6.1.9 Time-Specific Country Name (histname)

Long tag: vdem_vparty_histname

Original tag: histname

Dataset citation: Lindberg et al. (2022)

Description:

VARIABLE TYPE: A*

QUESTION: Name of coded country at different dates.

RESPONSES: Text

ANSWER-TYPE: Text

NOTES: For more details on country units consult the V-Dem Country Coding Units document.

DATA RELEASE: 1-2.

CITATION: V-Dem Codebook

2.6.1.10 V-Dem country ID (A) (country_id)

Long tag: vdem_vparty_country_id

Original tag: country_id

Dataset citation: Lindberg et al. (2022)

Description:

VARIABLE TYPE: A*

QUESTION: Unique country ID designated for each country.

RESPONSES: Numeric

NOTES: For more details on country units consult the V-Dem Country Coding Units document.

DATA RELEASE: 1-2.

CITATION: V-Dem Codebook

2.6.1.11 Country name abbreviation (A*) (country_text_id)

Long tag: vdem_vparty_country_text_id

Original tag: country_text_id

Dataset citation: Lindberg et al. (2022)

Description:

VARIABLE TYPE: A*

QUESTION: Abbreviated country names.

RESPONSES: Text

DATA RELEASE: 1-2.

CITATION: V-Dem Codebook

2.6.1.12 Year (A) (year)

Long tag: vdem_vparty_year

Original tag: year

Dataset citation: Lindberg et al. (2022)

Description:

VARIABLE TYPE: A*

QUESTION: Four-digit designation of the year for which an observation is given that ranges from the start to the end of the coding period.

RESPONSES: Numeric

NOTES: For more details on country units consult the V-Dem Country Coding Units document.

DATA RELEASE: 1-2.

CITATION: V-Dem Codebook

2.6.1.13 Historical Date (A) (historical_date)

Long tag: vdem_vparty_historical_date

Original tag: historical_date

Dataset citation: Lindberg et al. (2022)

Description:

VARIABLE TYPE: A*

QUESTION: Variable designating the date for which observation is given.

CLARIFICATION: The date is coded in YYYY-MM-DD format. December 31st observation always refers to the situation at the end of the year. There can be observations on other dates signifying other events, i.e. elections or executive appointments.

RESPONSES: Numeric

NOTES: This variable is included in the V-Dem Country Year as well as Country Date datasets.

DATA RELEASE: 1-2.

CITATION: V-Dem Codebook

2.6.1.14 Start of coding period (A) (codingstart)

Long tag: vdem_vparty_codingstart

Original tag: codingstart

Dataset citation: Lindberg et al. (2022)

Description:

VARIABLE TYPE: A*

QUESTION: Year in which coding of the country in question starts.

CLARIFICATION: V-Dem country coding starts in 1789, or from when a country first enjoyed at least

some degree of functional and/or formal sovereignty.

RESPONSES: Numeric

NOTES: For detailed information, please see the V-Dem Country Coding Units document.

DATA RELEASE: 1-2.

CITATION: V-Dem Codebook

2.6.1.15 Gap in coding period starts (A) (gapstart)

Long tag: vdem_vparty_gapstart

Original tag: gapstart

Dataset citation: Lindberg et al. (2022)

Description:

VARIABLE TYPE: A*

QUESTION: The starting year in which country in question does not conform to V-Dem definition of an independent state in between the starting and ending year of coding.

CLARIFICATION: Year that indicates the gap start is the last date coded before the gap.

RESPONSES:

Numeric

NOTES: For more details about V-Dem country coding periods, please see the V-Dem Country Coding

Units document.
DATA RELEASE: 1-2.
CITATION: V-Dem Codebook

2.6.1.16 Gap in coding period ends (A) (gapend)

Long tag: vdem_vparty_gapend

Original tag: gapend

Dataset citation: Lindberg et al. (2022)

Description:

VARIABLE TYPE: A*

QUESTION: The ending year in which country in question does not conform to V-Dem definition of an independent state in between the starting and ending year of coding.

CLARIFICATION: Year that indicates the gap end is the last date coded after the gap.

RESPONSES:

Numeric

NOTES: For more details about V-Dem country coding periods, please see the V-Dem Country Coding

Units document.

DATA RELEASE: 1-2.

CITATION: V-Dem Codebook

2.6.1.17 End of coding period (A) (codingend)

Long tag: vdem_vparty_codingend

Original tag: codingend

Dataset citation: Lindberg et al. (2022)

Description:

VARIABLE TYPE: A*

QUESTION: Either a maximum year of country coding period or the year when the country ceased to exist because it lost functional or formal sovereignty.

RESPONSES:

Numeric

NOTES: For more details about V-Dem country coding periods, please see the V-Dem Country Coding

Units document.

DATA RELEASE: 1-2.

CITATION: V-Dem Codebook

2.6.1.18 V-Dem Project (project)

Long tag: vdem_vparty_project

Original tag: project

Dataset citation: Lindberg et al. (2022)

Description:

VARIABLE TYPE: A*

QUESTION: Indication what project team has coded country in respective year.

RESPONSES:

0: Contemporary.

1: Historical.

2: Both (overlap).

DATA RELEASE: 1-2.

CITATION: V-Dem Codebook

2.6.1.19 COW Country Code (E) (cowcode)

Long tag: vdem_vparty_cowcode

Original tag: COWcode

Dataset citation: Lindberg et al. (2022)

Variable citation: Correlates of War Project (2017)

Description:

VARIABLE TYPE: E

QUESTION: Correlates of War (COW) project country codes.

RESPONSES: Numeric

SOURCE(S): Correlates of War Project (2017)

DATA RELEASE: 1-2.

CITATION: Correlates of War Project (2017)

YEARS: 1789-2020

2.6.1.20 Gap index (A) (gap_index)

Long tag: vdem_vparty_gap_index

Original tag: gap_index

Dataset citation: Lindberg et al. (2022)

Description:

VARIABLE TYPE: A*

CLARIFICATION: Indication that party was not present in national legislature.

RESPONSES: Numeric

DATA RELEASE: 2.

2.6.1.21 CHES Party Code (E) (ches_id)

Long tag: vdem_vparty_ches_id

Original tag: CHES_ID

Dataset citation: Lindberg et al. (2022)

Variable citation: Bakker et al. (2015), Polk et al. (2017), Bakker et al. (2020)

Description:

VARIABLE TYPE: E

QUESTION: Unique identifier for each party from Chapel Hill Expert Survey (CHES).

RESPONSES:

Numeric

SOURCE(S): Bakker et al. (2015), Polk et al. (2017), Bakker et al. (2020)

DATA RELEASE: 10-12.

CITATION: Bakker et al. (2015), Polk et al. (2017), Bakker et al. (2020)

2.6.1.22 Region (geographic) (E) (e_regiongeo)

Long tag: vdem_vparty_e_regiongeo

Original tag: e_regiongeo

Dataset citation: Lindberg et al. (2022)

Variable citation: United Nations Statistics Division (2013)

Description:

VARIABLE TYPE: E

QUESTION: In which geographic region is this country located?

CLARIFICATION: Regions are described based on geographic location.

RESPONSES:

1: Western Europe

2: Northern Europe

3: Southern Europe
4: Eastern Europe
5: Northern Africa
6: Western Africa
7: Middle Africa
8: Eastern Africa
9: Southern Africa
10: Western Asia
11: Central Asia
12: Eastern Asia
13: South-Eastern Asia
14: Southern Asia
15: Oceania (including Australia and the Pacific)
16: North America
17: Central America
18: South America
19: Caribbean (including Belize, Cuba, Haiti, Dominican Republic and Guyana)
SOURCE(S): United Nations Statistics Division (2013).
NOTES: For the countries coded only in the historical project or for which the UN does not have the code, the region is coded by V-Dem Data Manager in accordance with the position of the neighboring countries.
DATA RELEASE: 1-2.
YEARS: 1789-2020

2.6.1.23 Region (politico-geographic) (E) (e_regionpol)

Long tag: vdem_vparty_e_regionpol

Original tag: e_regionpol

Dataset citation: Lindberg et al. (2022)

Variable citation: Teorell et al. (2020)

Description:

VARIABLE TYPE: E

QUESTION: WIn which politico-geographic region is this country located?

RESPONSES:

1: Eastern Europe and post Soviet Union (including Central Asia, Mongolia, and German Democratic Republic)

2: Latin America (including Cuba, Haiti, and the Dominican Republic)

3: North Africa and the Middle East (including Israel and Turkey, but excluding Cyprus)

4: Sub-Saharan Africa

5: Western Europe and North America (including Australia, New Zealand, and Cyprus, but excluding German Democratic Republic)

6: Eastern Asia (including Japan, excluding Mongolia)

7: South-Eastern Asia

8: Southern Asia

9: The Pacific (excluding Australia and New Zealand)

10: The Caribbean (including Guyana and Suriname, but excluding Cuba, Haiti, and the Dominican Republic)

SOURCE(S): Quality of Government Standard Dataset (2019).

DATA RELEASE: 1-2.

CITATION: Teorell et al. (2018).

YEARS: 1789-2020

2.6.1.24 Region (politico-geographic 6-category) (E) (e_regionpol_6c)

Long tag: vdem_vparty_e_regionpol_6c

Original tag: e_regionpol_6C

Dataset citation: Lindberg et al. (2022)

Variable citation: Teorell et al. (2020)

Description:

VARIABLE TYPE: E

QUESTION: In which politico-geographic region is this country located?

CLARIFICATION: This is a tenfold politico-geographic classification of world regions, based on a mixture

of two considerations: geographical proximity (with Cyprus, German Democratic Republic, and Mongolia being recoded from original coding) and demarcation by area specialists having contributed to a regional understanding of democratization. The categories are as follow:

RESPONSES: 1: Eastern Europe and post Soviet Union (including Central Asia, Mongolia, and German Democratic Republic)

2: Latin America (including Cuba, Haiti, and the Dominican Republic)

3: North Africa and the Middle East (including Israel and Turkey, but excluding Cyprus)

4: Sub-Saharan Africa

5: Western Europe and North America (including Australia, New Zealand, and Cyprus, but excluding German Democratic Republic)

6: Eastern Asia (including Japan, excluding Mongolia)

7: South-Eastern Asia

8: Southern Asia

9: The Pacific (excluding Australia and New Zealand)

10: The Caribbean (including Guyana and Suriname, but excluding Cuba, Haiti, and the Dominican Republic)

DATA RELEASE: 1-2.

CITATION: Teorell et al. (2018).

YEARS: 1789-2020

2.6.1.25 GPS Party Code (E) (gps_id)

Long tag: vdem_vparty_gps_id

Original tag: GPS_ID

Dataset citation: Lindberg et al. (2022)

Variable citation: Norris (2020)

Description:

VARIABLE TYPE: E

QUESTION: Unique numeric code for each party in the Global Party Survey (GPS) dataset.

RESPONSES: Numeric

SOURCE(S): Norris (2020).

DATA RELEASE: 1-2.

CITATION: Norris (2020).

2.6.2 Indices

This section lists variables related to indices.

2.6.2.1 Anti-Pluralism Index (D) (v2xpa_antiplural)

Long tag: vdem_vparty_v2xpa_antiplural

Original tag: v2xpa_antiplural

Dataset citation: Lindberg et al. (2022)

Description:

VARIABLE TYPE: D

ADDITIONAL VERSIONS: *_codelow, *_codehigh

QUESTION: To what extent does the party show a lacking commitment to democratic norms prior to elections?

SCALE: Interval, from low to high (0-1)

SOURCE(S): v2paopresp v2paplur v2paminor v2paviol

DATA RELEASE: 10-12.

AGGREGATION: The index is computed as a transformed weighted average of the input variables using the following formula:

$$v2xpa_antiplural_i = 1 - \Phi \left(\frac{0.5 * v2paopresp_i + 2 * v2paplur_i + v2paminor_i + v2paviol_i}{4.5} \right),$$

where i indexes observations and Φ is the standard normal cumulative density function.

For each observation, the posterior distribution of the index is obtained by computing the value of the index for each draw from the posterior distributions of $v2paopresp_i$, $v2paplur_i$, $v2paminor_i$ and $v2paviol_i$, and then summarized.

2.6.2.2 Populism Index (D) (v2xpa_popul)

Long tag: vdem_vparty_v2xpa_popul

Original tag: v2xpa_popul

Dataset citation: Lindberg et al. (2022)

Variable citation: v2paanteli v2papeople

Description:

VARIABLE TYPE: D

ADDITIONAL VERSIONS: *_codelow, *_codehigh

QUESTION: To what extent do representatives of the party use populist rhetoric (narrowly defined)?

SCALE: Interval, from low to high (0-1)

SOURCE(S): v2paanteli v2papeople

DATA RELEASE: 10-12.

AGGREGATION: The index is computed as the harmonic mean of rescaled $v2paanteli_osp$ and $v2papeople_osp$ posterior distributions, using the following formula:

$$v2xpa_popul_i = \frac{2}{\frac{1}{x_i} + \frac{1}{y_i}},$$

where i indexes each observation,

$$x_i = \frac{1}{4}v2paanteli_osp_i,$$

and

$$y_i = \frac{1}{4}v2papeople_osp_i.$$

For each observation, the posterior distribution of the index is obtained by computing the value of the index for each draw from the posterior distributions of $v2paanteli_osp_i$ and $v2papeople_osp_i$, and then summarized.

2.6.3 Party Basics

This section lists variables related to basic party information.

2.6.3.1 Seat share (v2paseatshare)

Long tag: vdem_vparty_v2paseatshare

Original tag: v2paseatshare

Dataset citation: Lindberg et al. (2022)

Variable citation: Döring & Düpont (2020)

Description:

VARIABLE TYPE: A
QUESTION: Seat share the party gained in the election to the lower chamber.
RESPONSES:
Numeric
SOURCE(S): Döring and Düpont (2020).
DATA RELEASE: 10-12.
DATE SPECIFIC: Election-specific dates.

2.6.3.2 Seat number (v2panumbseat)

Long tag: vdem_vparty_v2panumbseat

Original tag: v2panumbseat

Dataset citation: Lindberg et al. (2022)

Variable citation: Döring & Düpont (2020)

Description:

VARIABLE TYPE: A
QUESTION: Number of seats the party gained in the election to the lower chamber.
RESPONSES:
Numeric
SOURCE(S): Döring and Düpont (2020).
DATA RELEASE: 10-12.
DATE SPECIFIC: Election-specific dates.

2.6.3.3 Seats total (v2patotalseat)

Long tag: vdem_vparty_v2patotalseat

Original tag: v2patotalseat

Dataset citation: Lindberg et al. (2022)

Variable citation: Döring & Düpont (2020)

Description:

VARIABLE TYPE: A
QUESTION: Total number of seats in the lower chamber.
RESPONSES:
Numeric
SOURCE(S): Döring and Düpont (2020).
DATA RELEASE: 10-12.
DATE SPECIFIC: Election-specific dates.

2.6.3.4 Vote share (v2pavote)

Long tag: vdem_vparty_v2pavote

Original tag: v2pavote

Dataset citation: Lindberg et al. (2022)

Variable citation: Döring & Düpont (2020)

Description:

VARIABLE TYPE: A
QUESTION: Vote share the party gained in the election to the lower chamber.
RESPONSES:
Numeric
SOURCE(S): Döring and Düpont (2020).
DATA RELEASE: 10-12.
DATE SPECIFIC: Election-specific dates.

2.6.3.5 Temporary pre-electoral alliance (v2paallian)

Long tag: vdem_vparty_v2paallian

Original tag: v2paallian

Dataset citation: Lindberg et al. (2022)

Variable citation: Döring & Düpont (2020)

Description:

VARIABLE TYPE: A

QUESTION: Was the party part of a temporary pre-electoral alliance in this national election or is the entity actually an alliance?

RESPONSES:

0: No.

1: Yes, party was part of an alliance.

2: Yes, entity is an alliance of two or more parties.

SOURCE(S): Döring and Düpont (2020).

DATA RELEASE: 10-12.

DATE SPECIFIC: Election-specific dates.

2.6.3.6 Name of temporary pre-electoral alliance (v2panaallian)

Long tag: vdem_vparty_v2panaallian

Original tag: v2panaallian

Dataset citation: Lindberg et al. (2022)

Description:

VARIABLE TYPE: A

QUESTION: If the party was part of a temporary pre-electoral temporary alliance, what was the name of that alliance?

RESPONSES:

Text

DATA RELEASE: 10-12.

DATE SPECIFIC: Election-specific dates.

CLEANING: Set to missing where v2paallian is 0.

2.6.3.7 Vote share of temporary pre-electoral alliance (v2pavallian)

Long tag: vdem_vparty_v2pavallian

Original tag: v2pavallian

Dataset citation: Lindberg et al. (2022)

Description:

VARIABLE TYPE: A

QUESTION: If the party was part of a temporary pre-electoral temporary alliance, what was the vote share of the alliance?

RESPONSES:

Numeric

DATA RELEASE: 10-12.

DATE SPECIFIC: Election-specific dates.

CLEANING: Set to missing where v2paallian is 0.

2.6.3.8 Seats of temporary pre-electoral alliance (v2panoallian)

Long tag: vdem_vparty_v2panoallian

Original tag: v2panoallian

Dataset citation: Lindberg et al. (2022)

Description:

VARIABLE TYPE: A

QUESTION: If the party was part of a temporary pre-electoral temporary alliance, how many seats did the alliance gain?

RESPONSES:

Numeric

DATA RELEASE: 10-12.

DATE SPECIFIC: Election-specific dates.

CLEANING: Set to missing where v2paallian is 0.

2.6.3.9 Party continuation (v2paelcont)

Long tag: vdem_vparty_v2paelcont

Original tag: v2paelcont

Dataset citation: Lindberg et al. (2022)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_nr

QUESTION: Did the party participate in the previous election under its current name?

CLARIFICATION: This question concerns the election prior to the one you are coding. If you choose option 2, please provide the previous party name in the comments field.

RESPONSES:

0: Yes, party participated in the previous election under the same name.

1: No, party did not participate in the previous election.

2: No, but the party participated in the previous election under a different name.

DATA RELEASE: 10-12.

CROSS-CODER AGGREGATION: Mode

DATE SPECIFIC: Election-specific dates.

2.6.3.10 Party continuation (C) (v2paelcont_nr)

Long tag: vdem_vparty_v2paelcont_nr

Original tag: v2paelcont_nr

Dataset citation: Lindberg et al. (2022)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_nr

QUESTION: Did the party participate in the previous election under its current name?

RESPONSES: 0: Yes, party participated in the previous election under the same name.

1: No, party did not participate in the previous election.

2: No, but the party participated in the previous election under a different name.

DATA RELEASE: 1-2.

CROSS-CODER AGGREGATION: Mode

DATE SPECIFIC: Election-specific dates.

2.6.3.11 Government support (v2pagovsup)

Long tag: vdem_vparty_v2pagovsup

Original tag: v2pagovsup

Dataset citation: Lindberg et al. (2022)

Description:

VARIABLE TYPE: A,C

QUESTION: Does this party support the government formed immediately after this election?

CLARIFICATION: This question refers to the initial support, by the party, of the first government formed based on this election. It does not include caretaker cabinets that are in office until the first cabinet forms.

RESPONSES:

0: Yes, as senior partner. The Head of Government belongs to this party.
1: Yes, as junior partner. The Head of Government does not belong to this party, but one or more cabinet ministers do.
2: Yes, but the party is not officially represented in government.
3: No, party is in opposition to the government.
4: Not applicable. No government took office based on this election (yet).
NOTES: The data collected using expert survey and aggregated by mode was cross-checked by a research assistant.
DATA RELEASE: 10-12.
CROSS-CODER AGGREGATION: Mode
DATE SPECIFIC: Election-specific dates.

2.6.3.12 Pariah Party (v2papariah)

Long tag: vdem_vparty_v2papariah

Original tag: v2papariah

Dataset citation: Lindberg et al. (2022)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: In the years before this election, to what extent have other parties distanced themselves from this party?

RESPONSES:

0: Entirely. All other parties are unwilling to accept formal or informal parliamentary support from this party (e.g. joint legislative initiative; toleration).

1: To a great extent. One or more parties has accepted informal parliamentary support from this party (e.g. joint legislative initiative; toleration) or has signaled that it would be willing to do so. No party is willing to accept formal support from this party.

2: To some extent. One or more parties has accepted formal parliamentary support from this party (e.g. formed a coalition) or has signaled that it would be willing to do so. Most other parties are not willing to accept informal support from this party (e.g. joint legislative initiative; toleration).

3: Not at all. One or more parties has accepted formal parliamentary support from this party (e.g. coalition) or has signaled that it would be willing to do so. Most other parties are willing to accept informal support from this party (e.g. joint legislative initiative; toleration).

NOTES: We show the following question for coding only for election years during which more than two parties won a substantial seat share (more than 5percent) in the election.

DATA RELEASE: 10-12.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

DATE SPECIFIC: Election-specific dates.

2.6.4 Party Identity

This section lists variables related to party identity and ideology.

2.6.4.1 Anti-elitism (v2paanteli)

Long tag: vdem_vparty_v2paanteli

Original tag: v2paanteli

Dataset citation: Lindberg et al. (2022)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: How important is anti-elite rhetoric for this party?

CLARIFICATION: Elites are relatively small groups that have a greater say in society than

others, for instance due to their political power, wealth or societal standing. The specific groups considered to be the elite may vary by country and even from party to party within the same country as do the terms used to describe them. In some cases, “elites” can also refer to an international elite.

RESPONSES:

0: Not at all important. The leadership of this party never makes statements against the elite.

1: Not important. The leadership of this party rarely makes statements against the elite.

2: Somewhat important. The leadership of this party sometimes makes statements against the elite.

3: Important. The leadership of this party often makes statements against the elite.

4: Very important. The leadership of this party makes statements against the elite whenever possible.

DATA RELEASE: 10-12.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

DATE SPECIFIC: Election-specific dates.

2.6.4.2 People-centrism (v2papeople)

Long tag: vdem_vparty_v2papeople

Original tag: v2papeople

Dataset citation: Lindberg et al. (2022)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Do leaders of this party glorify the ordinary people and identify themselves as part of them?

CLARIFICATION: Many parties and leaders make reference to the “people”, but only some party leaders describe the ordinary people specifically as a homogenous group and emphasize/claim that they are part of this group and represent it. This means that they do not acknowledge the existence of divergent interests and values in society, but rather suggest that the “people” have a unified political will which should guide all political action. Often this group is glorified and romanticized, describing an ideal-typical ordinary person/commoner, who embodies the national ideal.

RESPONSES:

0: Never. The party leadership never glorifies and identifies with the ordinary people.

1: Usually not. The party leadership generally does not glorify and identify with the ordinary people.

2: About half of the time. The party leadership sometimes glorifies and identifies with the ordinary people.

3: Usually. The party leadership generally glorifies and identifies with the ordinary people, which they claim to represent.

4: Always. The party leadership always glorifies and identifies with the ordinary people, which they claim to represent.

DATA RELEASE: 10-12.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

DATE SPECIFIC: Election-specific dates.

2.6.4.3 Political Opponents (v2paopresp)

Long tag: vdem_vparty_v2paopresp

Original tag: v2paopresp

Dataset citation: Lindberg et al. (2022)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Prior to this election, have leaders of this party used severe personal attacks or tactics of demonization against their opponents?

CLARIFICATION: Severe personal attacks and demonization includes dehumanizing opponents or describing them as an existential threat or as subversive, criminal or foreign agents.

RESPONSES:

0: Always. Party leaders always used severe personal attacks or tactics of demonization against their opponents

1: Usually. Party leaders usually used severe personal attacks or tactics of demonization against their opponents

2: About half of the time. Party leaders sometimes used severe personal attacks or tactics of demonization against their opponents.

3: Usually not. Party leaders usually did not use severe personal attacks or tactics of demonization against their opponents.

4: Never. Party leaders never used severe personal attacks or tactics of demonization against their opponents.

DATA RELEASE: 10-12.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

DATE SPECIFIC: Election-specific dates.

CLEANING: Set to missing when there are more than two answers per coder for this question for a particular date, country, and party.

2.6.4.4 Political Pluralism (v2paplur)

Long tag: vdem_vparty_v2paplur

Original tag: v2paplur

Dataset citation: Lindberg et al. (2022)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Prior to this election, to what extent was the leadership of this political party clearly committed to free and fair elections with multiple parties, freedom of speech, media, assembly and association?

CLARIFICATION: Party leaders show no commitment to such principles if they openly support an autocratic form of government without elections or freedom of speech, assembly and association (e.g. theocracy; single-party rule; revolutionary regime). Party leaders show a full commitment to key democratic principles if they unambiguously support freedom of speech, media, assembly and association and pledge to accept defeat in free and fair elections.

RESPONSES:

0: Not at all committed. The party leadership was not at all committed to free and fair, multi-party elections, freedom of speech, media, assembly and association.

1: Not committed. The party leadership was not committed to free and fair, multi-party elections, freedom of speech, media, assembly and association.

2: Weakly committed. The party leadership was weakly committed to free and fair, multi-party elections, freedom of speech, media, assembly and association.

3: Committed. The party leadership was committed to free and fair, multi-party elections, freedom of speech, media, assembly and association.

4: Fully committed. The party leadership was fully committed to free and fair, multi-party elections, freedom of speech, media, assembly and association.

DATA RELEASE: 10-12.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

DATE SPECIFIC: Election-specific dates.

2.6.4.5 Minority Rights (v2paminor)

Long tag: vdem_vparty_v2paminor

Original tag: v2paminor

Dataset citation: Lindberg et al. (2022)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: According to the leadership of this party, how often should the will of the majority be implemented even if doing so would violate the rights of minorities?

CLARIFICATION: This concerns the rights enshrined in the Universal Declaration of Human Rights, which apply to everyone “without distinction of any kind, such as race, colour, sex, language, religion, political or other opinion, national or social origin, property, birth or other status.” The declaration protects - among others - freedom of speech, property, religion, peaceful assembly and association.

RESPONSES:

0: Always. The leadership of this party argues that the will of the majority should always determine policy even if such policy violates minority rights.

1: Usually. The leadership of this party argues that the will of the majority should usually determine policy even if such policy violates minority rights.

2: Half of the time. The leadership of this party argues that the will of the majority should about half of the time determine policy even if such policy violate minority rights.

3: Usually not. The leadership of this party argues that the will of the majority should usually not determine policy if such policy violates minority rights.

4: Never. The leadership of this party argues that the will of the majority should never determine policy if such policy violates minority rights.

DATA RELEASE: 10-12.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

DATE SPECIFIC: Election-specific dates.

2.6.4.6 Rejection of Political Violence (v2paviol)

Long tag: vdem_vparty_v2paviol

Original tag: v2paviol

Dataset citation: Lindberg et al. (2022)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: To what extent does the leadership of this party explicitly discourage the use of violence against domestic political opponents?

CLARIFICATION: “Domestic political opponents” refers to all political opponents, with the exception of those who are engaged in an armed conflict with the state. They may be other political parties or other political groups and movements.

RESPONSES:

0: Encourages. Leaders of this party often encourage the use of violence against domestic political opponents.

1: Sometimes encourages. Leaders of this party sometimes encourage the use of violence against domestic political opponents and generally refrain from discouraging it.

2: Discourages about half of the time. Leaders of this party occasionally discourage the use of violence against domestic political opponents, and do not encourage it.

3: Generally discourages. Leaders of this party often discourage the use of violence against its domestic political opponents.

4: Consistently discourages. Leaders of this party consistently reject the use of violence against its domestic political opponents.

DATA RELEASE: 10-12.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see

V-Dem Methodology).
DATE SPECIFIC: Election-specific dates.

2.6.4.7 Immigration (v2paimmig)

Long tag: vdem_vparty_v2paimmig

Original tag: v2paimmig

Dataset citation: Lindberg et al. (2022)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: What is the party's position regarding immigration into the country?

CLARIFICATION: Immigration refers to individuals entering the country for an indefinite, long-term or permanent period of time.

RESPONSES:

0: Strongly opposes. This party strongly opposes all or almost all forms of immigration into the country.

1: Opposes. This party opposes most forms of immigration into the country.

2: Ambiguous/No position. This party has no clear policy with regard to immigration into the country.

3: Supports. This party supports most forms of immigration into the country.

4: Strongly supports. This party strongly supports all or almost all forms of immigration into the country.

DATA RELEASE: 10-12.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

DATE SPECIFIC: Election-specific dates.

2.6.4.8 LGBT Social Equality (v2palgbt)

Long tag: vdem_vparty_v2palgbt

Original tag: v2palgbt

Dataset citation: Lindberg et al. (2022)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: What is this party's position toward social equality for the lesbian, gay, bisexual, and transgender (LGBT) community?

RESPONSES:

0: Strongly opposes. This party is strongly opposed to LGBT social equality.

1: Opposes. This party is opposed to LGBT social equality.

2: Ambiguous/No position. This party has no clear policy with regard to LGBT social equality.

3: Supports. This party supports LGBT social equality.

4: Strongly supports. This party strongly supports LGBT social equality.

DATA RELEASE: 10-12.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

DATE SPECIFIC: Election-specific dates.

2.6.4.9 Cultural Superiority (v2paculsup)

Long tag: vdem_vparty_v2paculsup

Original tag: v2paculsup

Dataset citation: Lindberg et al. (2022)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: To what extent does the party leadership promote the cultural superiority of a specific social group or the nation as a whole?

CLARIFICATION: This question refers to key non-economic cleavages in society, which could, for example, be based on caste, ethnicity, language, race, region, religion, or some combination thereof. This question further refers to cultural issues related to the national history and identity of a country. This question does not pertain to social groups based on gender or sexual orientation.

RESPONSES:

0: Strongly promotes. The party strongly promotes the cultural superiority of a specific social group or the nation as a whole.

1: Promotes. The party promotes the cultural superiority of a specific social group or the nation as a whole.

2: Ambiguous. The party does not take a specific position on the cultural superiority of a specific social group or the nation as a whole.

3: Opposes. The party opposes the promotion of the cultural superiority of a specific social group or the nation as a whole.

4: Strongly opposes. The party strongly opposes the promotion of the cultural superiority of a specific social group or the nation as a whole.

2.6.4.10 Religious Principles (v2parelig)

Long tag: vdem_vparty_v2parelig

Original tag: v2parelig

Dataset citation: Lindberg et al. (2022)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: To what extent does this party invoke God, religion, or sacred/religious texts to justify its positions?

RESPONSES:

0: Always, or almost always. The party almost always invokes God, religion, or sacred/religious texts to justify its positions.

1: Often, but not always. The party often, but not always, invokes God, religion, or religious texts to justify its positions.

2: About half of the time. The party about half of the time invokes God, religion, or religious texts to justify its positions.

3: Rarely. The party rarely invokes God, religion, or religious texts to justify its positions.

4: Never. The party never invokes God, religion, or religious texts to justify its positions.

QUESTION: What is the share of women in national-level leadership positions of this political party?

CLARIFICATION: This question does NOT concern the share of women in the legislature.

RESPONSES:

0: None.

1: Small minority (about 1-15percent).

2: Medium minority (about 16-25percent).

3: Large minority (about 26-39percent).

4: Balanced (about 40percent or more).

DATA RELEASE: 10-12.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

DATE SPECIFIC: Election-specific dates.

2.6.4.12 Working Women (v2pawomlab)

Long tag: vdem_vparty_v2pawomlab

Original tag: v2pawomlab

Dataset citation: Lindberg et al. (2022)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: To what extent does this party support the equal participation of women in the labor market?

CLARIFICATION: Measures that support the equal participation of women in the labor market include - but are not limited to - legal provisions on equal treatment and pay, parental leave and financial support for child care.

RESPONSES:

0: Strongly opposes. This party strongly opposes all or almost all types of measures that support the equal participation of women in the labor market.

1: Opposes. This party opposes most types of measures that support the equal participation of women in the labor market.

2: Ambiguous/No position. This party has no clear policy with regard to measures that support the equal participation of women in the labor market.

3: Supports. This party supports most types of measures that support the equal participation of women in the labor market.

4: Strongly supports. This party strongly supports all or almost all types of measures that support the equal participation of women in the labor market.

DATA RELEASE: 10-12.

2.6.4.13 Economic Left-Right Scale (v2pariglef)

Long tag: vdem_vparty_v2pariglef

Original tag: v2pariglef

Dataset citation: Lindberg et al. (2022)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Please locate the party in terms of its overall ideological stance on economic issues.

CLARIFICATION: Parties on the economic left want government to play an active role in

the economy. This includes higher taxes, more regulation and government spending and a more generous welfare state. Parties on the economic right emphasize a reduced economic role for government: privatization, lower taxes, less regulation, less government spending, and a leaner welfare state.

RESPONSES:

0: Far-left.

1: Left.

2: Center-left.

3: Center.

4: Center-right.

5: Right.

6: Far-right.

DATA RELEASE: 10-12.

DATE SPECIFIC: Election-specific dates.

2.6.4.14 Welfare (v2pawelf)

Long tag: vdem_vparty_v2pawelf

Original tag: v2pawelf

Dataset citation: Lindberg et al. (2022)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: To what extent does the party promote means-tested or universalistic welfare policies?

RESPONSES:

0: The party does not support either type of policies and opposes any public welfare policy.

1: The party solely promotes means-tested welfare policies.

2: The party mainly promotes means-tested policies, but a significant portion (e.g. 1/4 or 1/3) is universalistic and potentially benefits everyone in the population.

3: The party roughly equally supports means-tested and universalistic welfare policies.

4: The party mainly promotes universalistic policies, but a significant portion (e.g. 1/4 or 1/3) of its policies are means-tested.

5: The party solely promotes universalistic welfare policies for all groups of the society.

DATA RELEASE: 10-12.

2.6.4.15 Clientelism (v2paclient)

Long tag: vdem_vparty_v2paclient

Original tag: v2paclient

Dataset citation: Lindberg et al. (2022)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: To what extent do the party and its candidates provide targeted and excludable (clientelistic) goods and benefits - such as consumer goods, cash or preferential access to government services - in an effort to keep and gain votes?

CLARIFICATION: In some cases, parties and their candidates deliver targeted and excludable goods and benefits directly to individual voters with the explicit intention to keep or gain votes. In other cases, they rely on brokers or companies as intermediaries. In some countries, candidates promise procurement contracts or favorable regulatory decisions to

companies in exchange for ensuring their workers vote for the party/candidate. Such efforts count as an instance of clientelism, if they are clearly targeted at one specific company and excludable. On the other hand, handing out of small gifts can be common in some contexts without the intention to “buy votes” but rather as courtesy or part of what all candidates do (“entry ticket”). Such activities do not count as attempts to “keep or gain votes”.

RESPONSES:

0: Not at all. The party and its candidates do not provide targeted goods and benefits in order to keep and gain votes.

1: A minor extent. The party and its candidates provide targeted goods and benefits to a minor extent in order to keep and gain votes.

2: A moderate extent. The party and its candidates provide targeted goods and benefits to a moderate extent in order to keep and gain votes.

3: A large extent. The party and its candidates provide targeted goods and benefits to a sizeable extent in order to keep and gain votes.

4: As its main effort. The party and its candidates provide targeted goods and benefits to the extent that it constitutes the party’s main effort in order to keep and gain votes.

DATA RELEASE: 10-12.

2.6.4.16 Salience and Mobilization (v2pasalie_nr)

Long tag: vdem_vparty_v2pasalie_nr

Original tag: v2pasalie_nr

Dataset citation: Lindberg et al. (2022)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_nr

QUESTION: Which of the following issues are most relevant for the party’s effort to gain and keep voters?

CLARIFICATION: Choose only the key issue(s). Though you may choose up to three issues, if only one issue is most relevant, choose only that issue. Most of these issues have been covered in this survey; if you need additional clarification as to what a category represents, you can return to the relevant question.

RESPONSES: 0: Anti-elitism. (0=No, 1=Yes) [v2pasalie_0]

1: People-centrism. (0=No, 1=Yes) [v2pasalie_1]

2: Political pluralism (pro or contra). (0=No, 1=Yes) [v2pasalie_2]

3: Minority rights (pro or contra). (0=No, 1=Yes) [v2pasalie_3]

4: Immigration (pro or contra). (0=No, 1=Yes) [v2pasalie_4]

5: LGBT social equality (pro or contra). (0=No, 1=Yes) [v2pasalie_5]

6: Cultural superiority (pro or contra). (0=No, 1=Yes) [v2pasalie_6]

7: Religious principles (pro or contra). (0=No, 1=Yes) [v2pasalie_7]

8: Gender equality (pro or contra). (0=No, 1=Yes) [v2pasalie_8]

9: Welfare. (0=No, 1=Yes) [v2pasalie_9]

10: Economic issues (including infrastructure and taxes). (0=No, 1=Yes) [v2pasalie_10]

11: Clientelism in order to keep or gain votes (the distribution of targeted and excludable benefits towards supporters). (0=No, 1=Yes) [v2pasalie_11]

12: Environmental protection. (0=No, 1=Yes) [v2pasalie_12]

13: Farmers’ issues. (0=No, 1=Yes) [v2pasalie_13]

14: The leader. (0=No, 1=Yes) [v2pasalie_14]

15: Anti-corruption. (0=No, 1=Yes) [v2pasalie_15]

16: Intimidation/violence. (0=No, 1=Yes) [v2pasalie_16]

17: Other. (0=No, 1=Yes) [v2pasalie_17]

2.6.5 Party Organisation

This section lists variables related to how parties operate and are organised internally.

2.6.5.1 Local Party Office (v2palocoff)

Long tag: vdem_vparty_v2palocoff

Original tag: v2palocoff

Dataset citation: Lindberg et al. (2022)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Does this party maintain permanent offices that operate outside of election campaigns at the local or municipal-level?

CLARIFICATION: By “local or municipal” we mean low level administrative divisions that are ranked below regions, provinces, or states. We refer to offices that ensure professional personal and continued interaction of the party with citizens. Permanent offices operate outside of election campaigns.

RESPONSES:

0: The party does not have permanent local offices.

1: The party has permanent local offices in few municipalities.

2: The party has permanent local offices in some municipalities.

3: The party has permanent local offices in most municipalities.

4: The party has permanent local offices in all or almost all municipalities.

DATA RELEASE: 10-12.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

DATE SPECIFIC: Election-specific dates.

2.6.5.2 Local Organizational Strength (v2paactcom)

Long tag: vdem_vparty_v2paactcom

Original tag: v2paactcom

Dataset citation: Lindberg et al. (2022)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: To what degree are party activists and personnel permanently active in local communities?

CLARIFICATION: Please consider the degree to which party activists and personnel are active both during election and non-election periods. Party personnel refers to paid staff.

RESPONSES:

0: There is negligible permanent presence of party activists and personnel in local communities.

1: There is minor permanent presence of party activists and personnel in local communities.

2: There is noticeable permanent presence of party activists and personnel in local communities.

3: There is significant permanent presence of party activists and personnel in local communities.

4: There is widespread permanent presence of party activists and personnel in local communities.

DATA RELEASE: 10-12.

DATE SPECIFIC: Election-specific dates.

2.6.5.3 Affiliate Organizations (v2pasoctie)

Long tag: vdem_vparty_v2pasoctie

Original tag: v2pasoctie

Dataset citation: Lindberg et al. (2022)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: To what extent does this party maintain ties to prominent social organizations?

CLARIFICATION: When evaluating the strength of ties between the party and social organizations please consider the degree to which social organizations contribute to party operations by providing material and personnel resources, propagating the party's message to its members and beyond, as well as by directly participating in the party's electoral campaign and/or mobilization efforts. Social organizations include: Religious organizations (e.g. churches, sects, charities), trade unions/syndical organizations or cooperatives, cultural and social associations (e.g. sports clubs, neighborhood associations), political associations (e.g. environmental protection) and professional and business associations. Social organizations do not include paramilitary units or militias.

RESPONSES:

0: The party does not maintain ties to any prominent social organization.

1: The party maintains weak ties to prominent social organizations.

2: The party maintains moderate ties to prominent social organizations.

3: The party maintains strong ties to prominent social organizations.

4: The party controls prominent social organizations.

DATA RELEASE: 10-12.

DATE SPECIFIC: Election-specific dates.

2.6.5.4 Candidate Nomination (v2panom)

Long tag: vdem_vparty_v2panom

Original tag: v2panom

Dataset citation: Lindberg et al. (2022)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: Which of the following options best describes the process by which the party decides on candidates for the national legislative elections?

CLARIFICATION: If nomination procedures vary across constituencies consider the most common practice.

RESPONSES:

0: The party leader unilaterally decides on which candidates will run for the party in national legislative elections.

1: The national party leadership (i.e. an executive committee) collectively decides which candidates will run for the party in national legislative elections.

2: Delegates of local/regional organizations decide which candidates will run for the party in national legislative elections.

3: All party members decide on which candidates will run for the party in national legislative elections in primaries/caucuses.

4: All registered voters decide on which candidates will run for the party in national legislative elections in primaries/caucuses.

DATA RELEASE: 10-12.

2.6.5.5 Internal Cohesion (v2padisa)

Long tag: vdem_vparty_v2padisa

Original tag: v2padisa

Dataset citation: Lindberg et al. (2022)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: To what extent do the elites in this party display disagreement over party strategies?

CLARIFICATION: Party strategies include election campaign strategy, policy stance, distribution of party financial resources, cooperation with other parties (i.e. coalition formation), and the selection of legislative and presidential candidates as well as the party leader. Party elites are prominent and influential party members such as current and former ministers, members of parliament or the party leadership, regional and municipal leaders, and opinion leaders. They do not necessarily have to be the part of the official party leadership.

RESPONSES:

0: Party elites display almost complete disagreement over party strategies and many party elites have left the party.

1: Party elites display a high level of visible disagreement over party strategies and some of them have left the party.

2: Party elites display some visible disagreement over party strategies, but none of them have left the party.

3: Party elites display negligible visible disagreement over party strategies.

4: Party elites display virtually no visible disagreement over party strategies.

DATA RELEASE: 10-12.

CROSS-CODER AGGREGATION: Bayesian item response theory measurement model (see *V-Dem Methodology*).

DATE SPECIFIC: Election-specific dates.

2.6.5.6 Personalization of Party (v2paid)

Long tag: vdem_vparty_v2paid

Original tag: v2paid

Dataset citation: Lindberg et al. (2022)

Description:

VARIABLE TYPE: C

ADDITIONAL VERSIONS: *_osp, *_ord, *_codelow, *_codehigh, *_sd, *_mean, *_nr

QUESTION: To what extent is this party a vehicle for the personal will and priorities of one individual leader?

RESPONSES:

0: The party is not focused on the personal will and priorities of one individual leader.

1: The party is occasionally focused on the personal will and priorities of one individual party leader.

2: The party is somewhat focused on the personal will and priorities of one individual party leader.

3: The party is mainly focused on the personal will and priorities of one individual party leader.

4: The party is solely focused on the personal will and priorities of one individual party leader.

DATA RELEASE: 10-12.

2.6.6 Populism

This section lists variables measuring populist features of parties.

2.6.6.1 Salience of anti-establishment rhetoric (E) (ep_antielite_salience)

Long tag: vdem_vparty_ep_antielite_salience

Original tag: ep_antielite_salience

Dataset citation: Lindberg et al. (2022)

Variable citation: Bakker et al. (2015), Polk et al. (2017), Bakker et al. (2020)

Description:

VARIABLE TYPE: E

QUESTION: What is the salience of anti-establishment and anti-elite rhetoric?

RESPONSES:

Numeric

SCALE: Interval, from “Not important at all” to “Extremely important” (0–10)

SOURCE(S): Bakker et al. (2015), Polk et al. (2017), Bakker et al. (2020)

DATA RELEASE: 10-12.

CITATION: Bakker et al. (2015), Polk et al. (2017), Bakker et al. (2020)

2.6.6.2 Salience of reducing political corruption (E) (ep_corrupt_salience)

Long tag: vdem_vparty_ep_corrupt_salience

Original tag: ep_corrupt_salience

Dataset citation: Lindberg et al. (2022)

Variable citation: Bakker et al. (2015), Polk et al. (2017), Bakker et al. (2020)

Description:

VARIABLE TYPE: E

QUESTION: What is the salience of reducing political corruption?

RESPONSES:

Numeric

SCALE: Interval, from “Not important at all” to “Extremely important” (0–10)

SOURCE(S): Bakker et al. (2015), Polk et al. (2017), Bakker et al. (2020)

DATA RELEASE: 10-12.

CITATION: Bakker et al. (2015), Polk et al. (2017), Bakker et al. (2020)

2.6.6.3 Members vs. leadership party policy choices (E) (ep_members_vs_leadership)

Long tag: vdem_vparty_ep_members_vs_leadership

Original tag: ep_members_vs_leadership

Dataset citation: Lindberg et al. (2022)

Variable citation: Bakker et al. (2015), Polk et al. (2017), Bakker et al. (2020)

Description:

VARIABLE TYPE: E

QUESTION: What is the position on whether members/activists or leadership has control

over party policy choices?

RESPONSES:

Numeric

SCALE: Interval, from “Members/activists have complete control over party policy choices” to “Leadership had complete control over party policy choices” (0–10).

SOURCE(S): Bakker *et al.* (2015), Polk *et al.* (2017), Bakker *et al.* (2020)

DATA RELEASE: 10-12.

CITATION: Bakker *et al.* (2015), Polk *et al.* (2017), Bakker *et al.* (2020)

2.6.6.4 Position on direct vs. representative democracy (E) (ep_people_vs_elite)

Long tag: vdem_vparty_ep_people_vs_elite

Original tag: ep_people_vs_elite

Dataset citation: Lindberg *et al.* (2022)

Variable citation: Bakker *et al.* (2015), Polk *et al.* (2017), Bakker *et al.* (2020)

Description:

VARIABLE TYPE: E

QUESTION: What is the position on direct vs. representative democracy?

CLARIFICATION: Some political parties take the position that “the people” should have the final say on the most important issues, for example, by voting directly in referendums. At the opposite pole are political parties that believe that elected representatives should make the most important political decisions.

RESPONSES:

Numeric

SCALE: Interval, from “Elected office holders should make the most important decisions” to “The people, not politicians, should make the most important decisions” (0–10).

SOURCE(S): Bakker *et al.* (2015), Polk *et al.* (2017), Bakker *et al.* (2020)

NOTES: In CHES 2019 survey words “direct” and “representative democracy” are changed to “people” and “elected representatives” accordingly. For this codebook, the entry in CHES 2017 survey was used.

DATA RELEASE: 10-12.

CITATION: Bakker *et al.* (2015), Polk *et al.* (2017), Bakker *et al.* (2020)

2.6.6.5 Populism type (E) (ep_type_populism)

Long tag: vdem_vparty_ep_type_populism

Original tag: ep_type_populism

Dataset citation: Lindberg *et al.* (2022)

Variable citation: Norris (2020)

Description:

VARIABLE TYPE: E

QUESTION: The Party Populism typology categorizes whether parties favor the use of pluralism or populist rhetoric categorized into four groups (V8_Ord).

RESPONSES:

1: Strongly Pluralist.

2: Moderately Pluralist.

3: Moderately Populist.

4: Strongly Populist.

SCALE: Ordinal.

SOURCE(S): Norris (2020)

DATA RELEASE: 10-12.

CITATION: Norris (2020)

2.6.6.6 Populist values type (E) (ep_type_populist_values)

Long tag: vdem_vparty_ep_type_populist_values

Original tag: ep_type_populist_values

Dataset citation: Lindberg et al. (2022)

Variable citation: Norris (2020)

Description:

VARIABLE TYPE: E

QUESTION: The Populist Values typology combines the categories of rhetoric (V8_Bin) and the social values (B6_Bin) for each party.

RESPONSES:

1: Pluralist–Liberal.

2: Pluralist–Conservative.

3: Populist–Liberal.

4: Populist–Conservative.

SCALE: Ordinal.

SOURCE(S): Norris (2020)

DATA RELEASE: 10-12.

CITATION: Norris (2020)

2.6.6.7 Populist rhetoric (E) (ep_v8_popul_rhetoric)

Long tag: vdem_vparty_ep_v8_popul_rhetoric

Original tag: ep_v8_popul_rhetoric

Dataset citation: Lindberg et al. (2022)

Variable citation: Norris (2020)

Description:

VARIABLE TYPE: E

QUESTION: Where would you place each party on the following scale?

CLARIFICATION: Parties can also be classified by their current use of *populist* or *pluralist* rhetoric. *Populist* language typically challenges the legitimacy of established political institutions and emphasizes that the will of the people should prevail. By contrast, *pluralist* rhetoric rejects these ideas, believing that elected leaders should govern, constrained by minority rights, bargaining and compromise, as well as checks and balances on executive power.

RESPONSES:

Numeric

SCALE: Interval, from “Strongly favors pluralist rhetoric” to “Strongly favors populist rhetoric” (0–10).

SOURCE(S): Norris (2020)

DATA RELEASE: 10-12.

CITATION: Norris (2020)

2.6.6.8 Populist saliency (E) (ep_v9_popul_saliency)

Long tag: vdem_vparty_ep_v9_popul_saliency

Original tag: ep_v9_popul_saliency

Dataset citation: Lindberg et al. (2022)

Variable citation: Norris (2020)

Description:

VARIABLE TYPE: E

QUESTION: And how *important* is populist rhetoric currently for each of the following parties? Where would you place each party on the following scale?

RESPONSES:

Numeric

SCALE: Interval, from “No importance” to “Great importance” (0–10).

SOURCE(S): Norris (2020)

DATA RELEASE: 10-12.
CITATION: Norris (2020)

2.6.7 Liberal-Traditional Scaling

This section measures whether parties lean towards liberal values or traditional values.

2.6.7.1 Position on democratic freedoms and rights (E) (ep_galtan)

Long tag: vdem_vparty_ep_galtan

Original tag: ep_galtan

Dataset citation: Lindberg et al. (2022)

Variable citation: Bakker et al. (2015), Polk et al. (2017), Bakker et al. (2020)

Description:

VARIABLE TYPE: E

QUESTION: What is the position of the party in a particular year in terms of their views on democratic freedoms and rights?

CLARIFICATION: “Libertarian” or “postmaterialist” parties favor expanded personal freedoms, for example, access to abortion, active euthanasia, same-sex marriage, or greater democratic participation. “Traditional” or “authoritarian” parties often reject these ideas; they value order, tradition, and stability, and believe that the government should be a firm moral authority on social and cultural issues.

RESPONSES:

Numeric

SCALE: Interval, from “Libertarian/Postmaterialist” to “Traditional/Authoritarian” (0–10).

SOURCE(S): Bakker *et al.* (2015), Polk *et al.* (2017), Bakker *et al.* (2020)

NOTES: In CHES 2019 survey words “democratic freedoms” and “rights” in the wording of the question are changed to “social” and “cultural values” accordingly. The formulation of the clarification section is also nonsignificantly different in comparison with CHES 1999-2017, which is used in this codebook.

DATA RELEASE: 10-12.

CITATION: Bakker *et al.* (2015), Polk *et al.* (2017), Bakker *et al.* (2020)

2.6.7.2 Salience of libertarian or traditional issues (E) (ep_galtan_salience)

Long tag: vdem_vparty_ep_galtan_salience

Original tag: ep_galtan_salience

Dataset citation: Lindberg et al. (2022)

Variable citation: Bakker et al. (2015), Polk et al. (2017), Bakker et al. (2020)

Description:

VARIABLE TYPE: E

QUESTION: What is the relative salience of libertarian/traditional issues in the party’s public stance in a particular year?

RESPONSES:

Numeric

SCALE: Interval, from “No importance” to “Great importance” (0–10).

SOURCE(S): Bakker *et al.* (2015), Polk *et al.* (2017), Bakker *et al.* (2020)

CITATION: Bakker *et al.* (2015), Polk *et al.* (2017), Bakker *et al.* (2020)

2.6.7.3 Social Liberalism-Conservatism (E) (ep_v6_lib_cons)

Long tag: vdem_vparty_ep_v6_lib_cons

Original tag: ep_v6_lib_cons

Dataset citation: Lindberg et al. (2022)

Variable citation: Norris (2020)

Description:

VARIABLE TYPE: E

QUESTION: Where would you place each party on the following scale?

CLARIFICATION: Parties can also be classified by their current social values. Those with *liberal* values favor expanded personal freedoms, for example, on abortion rights, same-sex marriage, and democratic participation. Those with *conservative* values reject these ideas in favor of order, tradition and stability, believing that government should be a firm moral authority on social and cultural issues.

RESPONSES:

Numeric

SCALE: Interval, from “Very liberal” to “Very conservative” (0–10).

SOURCE(S): Norris (2020)

NOTES: Only original score is included.

DATA RELEASE: 10-12.

CITATION: Norris (2020)

2.6.7.4 Social values saliency (E) (ep_v7_lib_cons_saliency)

Long tag: vdem_vparty_ep_v7_lib_cons_saliency

Original tag: ep_v7_lib_cons_saliency

Dataset citation: Lindberg et al. (2022)

Variable citation: Norris (2020)

Description:

VARIABLE TYPE: E

QUESTION: And how *important* are liberal/conservative social values for each of the following parties? Where would you place each party on the following scale?

RESPONSES:

Numeric

SCALE: Interval, from “No importance” to “Great importance” (0–10).

SOURCE(S): Norris (2020)

DATA RELEASE: 10-12.

CITATION: Norris (2020)

2.6.8 Party Systems

This section lists variables related to party systems’ identities.

2.6.8.1 Party-System Democracy Index (v2xpas_democracy)

Long tag: vdem_vparty_v2xpas_democracy

Original tag: v2xpas_democracy

Dataset citation: Lindberg et al. (2022)

Variable citation: Angiolillo et al. (2023)

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): Fabio Angiolillo

QUESTION: To what extent does the party system show commitment to democratic norms prior to elections?

CLARIFICATION: The Party-System Democracy Index (PSDI) ranges from 0 to 1, where lower values are associated with more authoritarian party systems and higher values with more democratic party systems. As this index is calculated for country-election-year, we recommend caution in using it for years where the country does not have a general election (lower house).

RESPONSES: Scale, 0-1 low to high

SOURCE(S): Angiolillo, Wiebrecht, and Lindberg (2023)

NOTES: the PSDI is calculated by using two V-Party variables: the anti-pluralist index for each political party in the party system (`v2xpa_antiplural`) and weighting political parties by their seat shares (`v2paseatshare`). We also divide between parties in the government (`v2pagovsup = 0,1, or 2`) or in the opposition (`v2pagovsup = 3`). We replace any missing values for a non-existent opposition with a value equal to 0 if the regime scores lower than 0.5 in the electoral democracy index (`v2x_polyarchy`). This approach assigns a 0 to the opposition only if the opposition has a missing value and, therefore, does not apply to hegemonic or competitive authoritarian regimes that allow opposition parties. The threshold on the democracy score is important since in some cases formation of the executive is delayed, or parties are not able to reach a governmental coalition also resulting in missing values for the opposition. `CodeLow` and `CodeHigh` are calculated through the same procedure, yet using anti-pluralist index `CodeLow` (`v2xpa_antiplural_CodeLow`) and `CodeHigh` (`v2xpa_antiplural_CodeHigh`) and EDI `CodeLow` (`v2x_polyarchy_CodeLow`) and `CodeHigh` (`v2x_polyarchy_CodeHigh`), respectively.

DATA RELEASE: Demscore v2

CITATION: Angiolillo, Wiebrecht, and Lindberg (2023)

AGGREGATION: the PSDI is calculated using the following equation:

$$\text{PSDI}_{\text{PS}} = 1 - \left[\left(\sum_{p=1}^N (\text{v2pa_antipluralist}_{\text{gpt}} * w_{\text{sgpt}}) + \sum_{p=1}^N (\text{v2pa_antipluralist}_{\text{opt}} * w_{\text{sopt}}) \right) \right] \quad (1)$$

, PSDI uses two V-Party variables: the anti-pluralist index for each political party in the party system (`v2xpa_antiplural`) and weighting political parties by their seat shares (`v2paseatshare`). We also divide between parties in the government (`v2pagovsup = 0,1, or 2`) or in the opposition (`v2pagovsup = 3`). We replace any missing values for a non-existent opposition with a value equal to 0 if the regime scores lower than 0.5 in the electoral democracy index (`v2x_polyarchy`). This approach assigns a 0 to the opposition only if the opposition has a missing value and, therefore, does not apply to hegemonic or competitive authoritarian regimes that allow opposition parties. The threshold on the democracy score is important since in some cases formation of the executive is delayed, or parties are not able to reach a governmental coalition also resulting in missing values for the opposition.

YEARS: 1970-2019

ADDITIONAL VERSIONS: *_`CodeLow`*, *_`CodeHigh`*

DATE SPECIFIC: Election-specific dates.

2.6.8.2 Government Coalition Democracy Index (`v2xpas_democracy_government`)

Long tag: `vdem_vparty_v2xpas_democracy_government`

Original tag: `v2xpas_democracy_government`

Dataset citation: Lindberg et al. (2022)

Variable citation: Angiolillo et al. (2023)

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): Fabio Angiolillo

QUESTION: To what extent do the parties in the government show commitment to democratic norms prior to elections?

CLARIFICATION: The Government Coalition Democracy Index (GCDI) ranges from 0 to 1, where lower values are associated with more authoritarian governmental coalition and higher values with more democratic governmental coalition. As this index is calculated for country-election-year, we recommend caution in using it for years where the country does not

have a general election (lower house).

RESPONSES: Scale, 0-1 high to low

SOURCE(S): Angiolillo, Wiebrecht, and Lindberg (2023)

NOTES: the GCDI is a subgroup of the PSDI variable and it only captures the democratic levels for parties in the governmental coalition. Codelow and codehigh are calculated through the same procedure, yet using anti-pluralist index codelow (v2xpa_antiplural_codelow) and codehigh (v2xpa_antiplural_codehigh) and EDI codelow (v2x_polyarchy_codelow) and codehigh (v2x_polyarchy_codehigh), respectively.

DATA RELEASE: Demscore v2

CITATION: Angiolillo, Wiebrecht, and Lindberg (2023)

AGGREGATION: the GCDI is calculated using the following equation:

$$\text{PSDI}_{\text{PS}} = 1 - \left[\left(\sum_{p=1}^N (\text{v2pa_antipluralist}_{\text{gpt}} * w_{\text{sgpt}}) + \sum_{p=1}^N (\text{v2pa_antipluralist}_{\text{opt}} * w_{\text{sopt}}) \right) \right] \quad (2)$$

, and using only the group `quot;quot;gptquot;quot;` (government parties).

YEARS: 1970-2019

ADDITIONAL VERSIONS: *_codelow, *_codehigh

DATE SPECIFIC: Election-specific dates.

2.6.8.3 Opposition Parties' Democracy Index (v2xpas_democracy_opposition)

Long tag: vdem_vparty_v2xpas_democracy_opposition

Original tag: v2xpas_democracy_opposition

Dataset citation: Lindberg et al. (2022)

Variable citation: Angiolillo et al. (2023)

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): Fabio Angiolillo

QUESTION: To what extent do the parties in the opposition show commitment to democratic norms prior to elections?

CLARIFICATION: The Opposition Parties' Democracy Index (OPDI) ranges from 0 to 1, where lower values are associated with more authoritarian opposition parties and higher values with more democratic opposition parties. As this index is calculated for country-election-year, we recommend caution in using it for years where the country does not have a general election (lower house).

RESPONSES: Scale, 0-1 high to low

SOURCE(S): Angiolillo, Wiebrecht, and Lindberg (2023)

NOTES: the OPDI is a subgroup of the PSDI variable and it only captures the democratic levels for parties in the opposition. Codelow and codehigh are calculated through the same procedure, yet using anti-pluralist index codelow (v2xpa_antiplural_codelow) and codehigh (v2xpa_antiplural_codehigh) and EDI codelow (v2x_polyarchy_codelow) and codehigh (v2x_polyarchy_codehigh), respectively.

DATA RELEASE: Demscore v2

CITATION: Angiolillo, Wiebrecht, and Lindberg (2023)

AGGREGATION: the OPDI is calculated using the following equation:

$$\text{PSDI}_{\text{PS}} = 1 - \left[\left(\sum_{p=1}^N (\text{v2pa_antipluralist}_{\text{gpt}} * ws_{\text{gpt}}) + \sum_{p=1}^N (\text{v2pa_antipluralist}_{\text{opt}} * ws_{\text{opt}}) \right) \right] \quad (3)$$

, and using only the group `quot;quot;optquot;quot;` (opposition parties).

YEARS: 1970-2019

ADDITIONAL VERSIONS: *_codelow, *_codehigh

2.6.8.7 Party-System Exclusion Index (v2xpas_exclusion)

Long tag: vdem_vparty_v2xpas_exclusion

Original tag: v2xpas_exclusion

Dataset citation: Lindberg et al. (2022)

Variable citation: Angiolillo & Wiebrecht (2023)

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): Fabio Angiolillo

QUESTION: To what extent does the party system reject cultural superiority and support immigration policies and the equal participation of women in the labor market?

CLARIFICATION: The Party-System Exclusion Index (PSEXI) ranges from 0 to 1, where lower values are associated with more inclusive party systems and higher values with more exclusive party systems. As this index is calculated for country-election-year, we recommend caution in using it for years where the country does not have a general election (lower house).

RESPONSES: Scale, 0-1 low to high

SOURCE(S): Angiolillo and Wiebrecht (2023)

NOTES: the PSEXI is calculated by first creating a measure of political parties' exclusion preferences using the following equation:

$$\text{party_exclusion_index}_{\text{PS}} = 2 * (\text{v2paculsup}) + 0.5 * (\text{v2paimmig} + \text{v2pawomlab}) \quad (7)$$

Then, the PSEXI is computed by using another V-Party indicator on political parties' seat shares (v2paseatshare), which function is to weight the index. We also divide between parties in the government (v2pagovsup = 0,1, or 2) or in the opposition (v2pagovsup = 3). Codelow and codehigh are calculated through the same procedure, yet using religious principle codelow (party_exclusion_index_codelow) and codehigh (party_exclusion_index_codehigh), respectively.

DATA RELEASE: Demscore v2

CITATION: Angiolillo and Wiebrecht (2023)

AGGREGATION: The PSEXI is calculated using the following equation:

$$\text{PSLRI}_{\text{PS}} = 1 - \left[\sum_{p=1}^N (\text{party_exclusion_index}_{\text{gpt}} * w_{\text{sgpt}}) + \sum_{p=1}^N (\text{party_exclusion_index}_{\text{opt}} * w_{\text{sopt}}) \right] \quad (8)$$

, the PSEXI is calculated by first creating a measure of political parties' exclusion preferences using the following equation:

$$\text{party_exclusion_index}_{\text{PS}} = 2 * (\text{v2paculsup}) + 0.5 * (\text{v2paimmig} + \text{v2pawomlab}) \quad (9)$$

Then, the PSEXI is computed by using another V-Party indicator on political parties' seat shares (v2paseatshare), which function is to weight the index. We also divide between parties

in the government (v2pagovsup = 0, 1, or 2) or in the opposition (v2pagovsup = 3).
YEARS: 1970-2019
ADDITIONAL VERSIONS: *_codelow, *_codehigh
DATE SPECIFIC: Election-specific dates.

2.6.8.8 Government Coalition Exclusion Index (v2xpas_exclusion_government)

Long tag: vdem_vparty_v2xpas_exclusion_government

Original tag: v2xpas_exclusion_government

Dataset citation: Lindberg et al. (2022)

Variable citation: Angiolillo & Wiebrecht (2023)

Description:

VARIABLE TYPE: D

PROJECT MANAGER(S): Fabio Angiolillo

QUESTION: To what extent do parties in the governing coalition reject cultural superiority and support immigration policies and the equal participation of women in the labor market?

CLARIFICATION: The Government Coalition Exclusion Index (GCEXI) ranges from 0 to 1, where lower values are associated with government coalitions' more inclusive stances and higher values with government coalitions' more exclusive stances. As this index is calculated for country-election-year, we recommend caution in using it for years where the country does not have a general election (lower house).

RESPONSES: Scale, -10 to 10 (high to low)

SOURCE(S): Angiolillo and Wiebrecht (2023)

NOTES: the GCEXI is a subgroup of the PSEXI variable and it only captures the aggregated positions on exclusion for parties in the government. Codelow and codehigh are calculated through the same procedure, yet using party exclusion index codelow (party_exclusion_index_codelow) and codehigh (party_exclusion_index_codehigh), respectively.

DATA RELEASE: Demscore v2

CITATION: Angiolillo and Wiebrecht (2023)

AGGREGATION: the GCEXI is calculated using the following equation:

$$\text{PSEXI}_{\text{PS}} = \left(\sum_{p=1}^N (\text{party_exclusion_index}_{\text{gpt}} * w_{s_{\text{gpt}}}) \right) + \left(\sum_{p=1}^N (\text{party_exclusion_index}_{\text{opt}} * w_{s_{\text{opt}}}) \right) \quad (10)$$

, and using only the group `gpt`; (government parties).

QUESTION: Where are opposition parties located on their overall ideological stance on economic issues?

CLARIFICATION: The Opposition Parties' Left-Right Index (OPLRI) ranges from 0 to 1, where lower values are associated with more left-leaning opposition parties and higher values

with more right-leaning opposition parties. As this index is calculated for country-election-year, we recommend caution in using it for years where the country does not have a general election (lower house).

RESPONSES: Scale, -4 to 4 (far-left to far-right)

SOURCE(S): Angiolillo and Wiebrecht (2023)

NOTES: the OPLRI is a subgroup of the PSLRI variable and it only captures the aggregated economic position levels for parties in the opposition. Codelow and codehigh are calculated through the same procedure, yet using economic left-right scale indicator codelow (v2pariglef_codelow) and codehigh (v2pariglef_codehigh), respectively.

DATA RELEASE: Demscore v2

CITATION: Angiolillo and Wiebrecht (2023)

AGGREGATION: the OPREI is calculated using the following equation:

$$\text{PSLRI}_{\text{PS}} = \left(\sum_{p=1}^N (\text{v2pariglef}_{\text{gpt}} * w_{\text{sgpt}}) + \sum_{p=1}^N (\text{v2pariglef}_{\text{opt}} * w_{\text{sopt}}) \right) \quad (14)$$

, and using only the group "opt" (opposition parties).

YEARS: 1970-2019

ADDITIONAL VERSIONS: *_codelow, *_codehigh

DATE SPECIFIC: Election-specific dates.

SOURCE(S): Angiolillo and Wiebrecht (2023)

DATE SPECIFIC: Election-specific dates.
